Certain Freight Rail Couplers and Parts Thereof From the People's Republic of China: Final Affirmative Determination of Sales at Less-Than-Fair Value and Final Affirmative Determination of Critical Circumstances

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that certain freight rail couplers and parts thereof (freight rail couplers) from the People's Republic of China (China) are being, or are likely to be, sold in the United States at less-than-fair value (LTFV) during the period of investigation, January 1, 2022, through June 30, 2022.

DATES: Applicable May 30, 2023.

FOR FURTHER INFORMATION CONTACT: Drew Jackson or Zachary Shaykin, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-4406 or (202) 482-2638, respectively.

SUPPLEMENTARY INFORMATION:

Background

On March 13, 2023, Commerce published in the **Federal Register** the *Preliminary Determination* in this investigation.¹ Commerce invited interested parties to comment on the *Preliminary Determination*.

For a complete description of the events that followed the Preliminary Determination, see the Issues and Decision Memorandum.² The Issues and Decision Memorandum is a public document and is available electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Period of Investigation

The period of investigation is January 1, 2022, through June 30, 2022.

Scope of the Investigation

The products covered by this investigation are freight rail coupler systems and certain components thereof from China. For a complete description of the scope of this investigation, see appendix I.

Scope Comments

During the course of this investigation and the concurrent LTFV and countervailing duty investigations of freight rail couplers from and Mexico, and China, Commerce received scope comments from interested parties. Commerce issued a Preliminary Scope Memorandum to address these comments and set aside a period of time for parties to address scope issues in

scope case and rebuttal briefs.³ We received comments from interested parties on the Preliminary Scope Memorandum, which we address in the Final Scope Memorandum.⁴ As a result of these comments, we made certain changes to the scope of these investigations from that published in the *Preliminary Determination*. See appendix I.

Final Affirmative Determination of Critical Circumstances

In accordance with section 733(e) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.206(h), Commerce determines that critical circumstances exist with respect to imports of freight rail couplers from China for the China-wide entity. For a full description of the methodology and results of Commerce's critical circumstances analysis, see the Preliminary Decision Memorandum and the Issues and Decision Memorandum.

China-Wide Entity and Use of Adverse Facts Available (AFA)

For the purposes of this final determination, consistent with the *Preliminary Determination*,⁵ we relied solely on the application of AFA for the China-wide entity, pursuant to sections 776(a) and (b) of the Act. Further, because no companies are eligible for a rate separate from the China-wide entity, we continue to find that all exporters of Chinese freight rail couplers are part of the China-wide entity. There is no new information on the record that would cause us to revisit our decision in the *Preliminary Determination*. Thus, we made no changes to our analysis or to the China-wide entity's dumping margin for the final determination. A detailed discussion of our application of AFA is provided in the *Preliminary Determination*.⁶

Combination Rates

Because no Chinese exporters qualified for a separate rate, producer/exporter combination rates were not calculated for this final determination.

Final Determination

Commerce determines that the following estimated weighted-average dumping margin exists for the POI:
