

ESTIMATED ANNUAL BURDEN HOURS

Type of instrument (form/activity)	Number of respondents	Number of responses per respondent	Total number of responses	Average burden time per response (hours)	Estimated burden hours
Follow-up survey of study participants	1 533	1	533	.42	222
Protocol for program administrators and frontline staff virtual discussions: Grant administrators	≈ 13	1	13	1.5	20
Total	546	546	242

¹ This assumes we will survey the 2,500 impact study participants enrolled at baseline and obtain a 64 percent response rate. This results in 533 respondents when annualized over three years.

² This assumes we invite a total of 44 grant administrators to participate in the discussions, with a 90 percent response rate. This results in 13 respondents when annualized over three years.

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden,

conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may

be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

MSHA issues certifications, qualifications, and approvals to the nation’s miners to conduct specific work within the mines. Miners requiring qualification or certification from MSHA will register for an MIIN. MSHA uses this unique number in place of individual Social Security numbers (SSNs) for all MSHA collections. MIIN will be used to identify miners who have exercised their option to work in areas of a mine with respirable dust concentration at or below 0.5 milligrams per cubic meter of air under 30 CFR 90.3 (Part 90 option); notice of eligibility; exercise of option and 30 CFR 90.100(b) (Respirable Dust Standard). The MIIN identifier fulfills Executive Order 13402, Strengthening Federal Efforts Against Identity Theft, which requires Federal agencies to better secure government held data.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Qualification/Certification Program Request for MSHA Individual Identification Number (MIIN). MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.

The public may also examine publicly available documents at DOL–MSHA,
