SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may

be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

MSHA issues certifications, qualifications, and approvals to the nation’s miners to conduct specific work within the mines. Miners requiring qualification or certification from MSHA will register for an MIIN. MSHA uses this unique number in place of individual Social Security numbers (SSNs) for all MSHA collections. MIIN will be used to identify miners who have exercised their option to work in areas of a mine with respirable dust concentration at or below 0.5 milligrams per cubic meter of air under 30 CFR 90.3 (Part 90 option); notice of eligibility; exercise of option and 30 CFR 90.100(b) (Respirable Dust Standard). The MIIN identifier fulfills Executive Order 13402, Strengthening Federal Efforts Against Identity Theft, which requires Federal agencies to better secure government held data.
