FEDERAL REGISTER

Vol. 88 Wednesday,

No. 104 May 31, 2023

Pages 34745–35728

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 88 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 88, No. 104
Wednesday, May 31, 2023

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0421; Project Identifier MCAI–2022–01360–A; Amendment 39–22435; AD 2023–09–12]

RIN 2120–AA64

Airworthiness Directives; Pilatus Aircraft Ltd. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Pilatus Aircraft Ltd. (Pilatus) Model PC–12, PC–12/45, PC–12/47, and PC–12/47E airplanes. This AD is prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI identifies the unsafe condition as insufficient grounding of the vapor cycle cooling system (VCCS) compressor/condenser. This AD requires inspecting the power return and chassis grounding cable attachment points at frame 37, including the attachment parts, and depending on the inspection results, corrective action. This AD also requires modifying the installation of the VCCS compressor/condenser power return cables and installing an additional isolated VCCS chassis ground cable. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective July 5, 2023.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of July 5, 2023.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0421; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the MCAI, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For service information identified in this final rule, contact Pilatus Aircraft Ltd., Customer Support General Aviation, CH–6371 Stans, Switzerland; phone: +41 848 24 7 365; email: *techsupport.ch@pilatus-aircraft.com;* website: *pilatus-aircraft.com*.
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222–5110. It is also available at *regulations.gov* under Docket No. FAA–2023–0421.

FOR FURTHER INFORMATION CONTACT: Doug Rudolph, Aviation Safety Engineer, International Validation Branch, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (816) 329–4059; email: *doug.rudolph@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain serial-numbered Pilatus Model PC–12, PC–12/45, PC–12/47, and PC–12/47E airplanes. The NPRM published in the **Federal Register** on February 27, 2023 (88 FR 12273). The NPRM was prompted by AD 2022–0212, dated October 18, 2022 (referred to after this as ''the MCAI''), issued by the European Union Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union.

The MCAI was prompted by a reported occurrence of a burning odor coming from the air conditioning vents during the climb phase of a Pilatus Model PC–12/47E airplane. An investigation identified that insufficient grounding of the VCCS compressor/condenser at frame 37 resulted in severe heat damage to the baseplate and adjacent metal support structure. It was determined that this condition may occur on airplanes equipped in production with the large oxygen bottle installed on the right-hand side of the rear fuselage. To address the unsafe condition, the MCAI requires a one-time inspection of the power return and chassis grounding cable attachment point at frame 37, including the attachment parts, and modification of the installation of the VCCS.

In the NPRM, the FAA proposed to require a one-time inspection of the power return and chassis grounding cable attachment point at frame 37, including the attachment parts, and modification of the installation of the VCCS. This condition, if not addressed, could, in the case of damage to the oxygen supply line, lead to an uncontrolled fire with damage to the airplane and injury to the occupants. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2023–0421.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from the Air Line Pilots Association, International (ALPA), who supported the NPRM without change. In addition, an individual commenter submitted a comment to the docket, but did not comment on the proposed required actions or the determination of the costs in the NPRM.

Conclusion

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comment received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Pilatus PC–12 Service Bulletin 21–016, dated August 15, 2022, which specifies procedures for inspecting the power return and chassis grounding cable attachment point on the airframe at frame 37, including the attachment parts, modifying the installation of the VCCS compressor/condenser power return cables, and installing an additional isolated VCCS chassis ground cable. This service bulletin also specifies contacting Pilatus if any damage is found.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in ADDRESSES.

Differences Between This AD and the MCAI

The MCAI requires contacting the manufacturer for approved corrective action instructions if any discrepancy is found during the inspection. This AD requires contacting either the Manager, International Validation Branch, FAA; EASA; or Pilatus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

Costs of Compliance

The FAA estimates that this AD affects 8 airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspect	3 work-hours × $85 per hour = $255	Not Applicable	$255	$2,040
Modify	5 work-hours × $85 per hour = $425	$667	1,092	8,736

The repair instructions that may be needed as a result of the inspection could vary significantly from airplane to airplane. The FAA has no data to determine the costs to accomplish the repair or the number of airplanes that would need this repair.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2023–09–12 Pilatus Aircraft Ltd.: Amendment 39–22435; Docket No. FAA–2023–0421; Project Identifier MCAI–2022–01360–A.

(a) Effective Date

This airworthiness directive (AD) is effective July 5, 2023.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Pilatus Aircraft Ltd. Model PC–12, PC–12/45, PC–12/47, and PC–12/47E airplanes, serial numbers 466, 467, 725, 861, 1032, 1052, 1082, 1115, 1232, 1411, 1428, 1439, 1530, 1541, 1663, 1725, and 1802, certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC) Code 2197, Air Conditioning System Wiring.

(e) Unsafe Condition

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI identifies the unsafe condition as insufficient grounding of the vapor cycle cooling system (VCCS) compressor/condenser. The FAA is issuing this AD to address this condition. The unsafe condition, if not addressed, could, in the case of damage to the oxygen supply line, lead to an uncontrolled fire with damage to the airplane, and injury to the occupants.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) Within 2 months after the effective date of this AD, inspect the power return and chassis grounding cable attachment points at frame 37, including the attachment parts, for physical and heat damage, de-lamination, and corrosion in accordance with steps (2) through (6) of Section 3.B. of the Accomplishment Instructions in Pilatus PC–12 Service Bulletin 21–016, dated August 15, 2022 (Pilatus PC–12 SB 21–016).

(2) If, during the inspection required by paragraph (g)(1) of this AD, any physical or heat damage, de-lamination, or corrosion as identified in steps (2) through (6) of Section 3.B. of the Accomplishment Instructions in Pilatus PC–12 SB 21–016 is detected, before further flight, repair using a method approved by the Manager, International Validation Branch, FAA; the European Union Aviation Safety Agency (EASA); or Pilatus's

EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) Within 2 months after the effective date of this AD, modify the installation of the VCCS compressor/condenser power return cables and install an additional isolated VCCS chassis ground cable in accordance with Section 3.C. of the Accomplishment Instructions in Pilatus PC–12 SB 21–016. Where the service bulletin specifies discarding the stop angle, this AD requires removing the stop angle from service.

(h) Alternative Methods of Compliance (AMOCs)

The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in § 39.19. In accordance with § 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (i)(2) of this AD or email to: *9-AVS-AIR-730-AMOC@faa.gov.* If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(i) Additional Information

(1) Refer to EASA AD 2022–0212, dated October 18, 2022, for related information. This EASA AD may be found in the AD docket at *regulations.gov* under Docket No. FAA–2023–0421.

(2) For more information about this AD, contact Doug Rudolph, Aviation Safety Engineer, International Validation Branch, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (816) 329–4059; email: *doug.rudolph@faa.gov.*

(j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Pilatus PC–12 Service Bulletin 21–016, dated August 15, 2022.

(ii) [Reserved]

(3) For service information identified in this AD, contact Pilatus Aircraft Ltd., Customer Support General Aviation, CH–6371 Stans, Switzerland; phone: +41 848 24 7 365; email: *techsupport.ch@pilatus-aircraft.com;* website: *pilatus-aircraft.com.*

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on May 9, 2023.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DELAWARE RIVER BASIN COMMISSION

18 CFR Parts 401 and 420

Regulatory Program Fees and Water Charges Rates

AGENCY: Delaware River Basin Commission.

ACTION: Final rule.

SUMMARY: Notice is provided of the Commission's regulatory program fees and schedule of water charges for the fiscal year beginning July 1, 2023.

DATES: This final rule is effective July 1, 2023.

FOR FURTHER INFORMATION CONTACT: Elba L. Deck, CPA, Director of Finance and Administration, 609–883–9500, ext. 201.

SUPPLEMENTARY INFORMATION: The Delaware River Basin Commission (''DRBC'' or ''Commission'') is a Federal-interstate compact agency charged with managing the water resources of the Delaware River Basin on a regional basis without regard to political boundaries. Its members are the governors of the four basin states—Delaware, New Jersey, New York and Pennsylvania—and on behalf of the federal government, the North Atlantic Division Commander of the U.S. Army Corps of Engineers.

In accordance with 18 CFR 401.43(c), on July 1 of every year, the Commission's regulatory program fees as set forth in tables 1, 2 and 3 of that section are subject to an annual adjustment, commensurate with any increase in the annual April 12-month Consumer Price Index (CPI) for Philadelphia published by the U.S. Bureau of Labor Statistics during that year. Pursuant to 18 CFR 420.41(c), the same indexed adjustment applies to the Commission's schedule of water charges for consumptive and non-consumptive withdrawals of surface water within the basin. The referenced April 12-month CPI for 2023 showed an increase of 4.74%. Commensurate adjustments are thus required.

This notice is made in accordance with 18 CFR 401.43(c) and 18 CFR 420.41(c), which provide that a revised fee schedule will be published in the **Federal Register** by July 1. The revised fees also may be obtained by contacting the Commission during business hours or by checking the Commission's website.

List of Subjects

18 CFR Part 401

Administrative practice and procedure, Project review, Water pollution control, Water resources.

18 CFR Part 420

Water supply.

For the reasons set forth in the preamble, the Delaware River Basin Commission amends parts 401 and 420 of title 18 of the Code of Federal Regulations as set forth below:

PART 401—RULES OF PRACTICE AND PROCEDURE

■ 1. The authority citation for part 401 continues to read as follows:

Authority: Delaware River Basin Compact (75 Stat. 688), unless otherwise noted.

Subpart C—Project Review Under Section 3.8 of the Compact

■ 2. In § 401.43, revise tables 1, 2, and 3 to read as follows:

§ 401.43 Regulatory program fees.

* * * * *

TABLE 1 TO § 401.43—DOCKET APPLICATION FILING FEE

Project type	Docket application fee	Fee maximum
Water Allocation	$491 per million gallons/month of allocation,[1] not to exceed $18,420.[1] Fee is doubled for any portion to be exported from the basin.	Greater of: $18,420[1] or Alternative Review Fee.
Wastewater Discharge	Private projects: $1,228;[1] Public projects: $614[1]	Alternative Review Fee.
Other	0.4% of project cost up to $10,000,000 plus 0.12% of project cost above $10,000,000 (if applicable), not to exceed $92,099[1].	Greater of: $92,099[1] or Alternative Review Fee.

[1] Subject to annual adjustment in accordance with paragraph (c) of this section.

TABLE 2 TO § 401.43—ANNUAL MONITORING AND COORDINATION FEE

	Annual fee	Allocation
Water Allocation	[1] 368	<4.99 mgm.
	[1] 553	5.00 to 49.99 mgm.
	[1] 798	50.00 to 499.99 mgm.
	[1] 1,013	500.00 to 9,999.99 mgm.
	[1] 1,228	> or = to 10,000 mgm.
	Annual fee	**Discharge design capacity**
Wastewater Discharge	[1] 368	<0.05 mgd
	[1] 749	0.05 to 1 mgd.
	[1] 1,007	1 to 10 mgd.
	[1] 1,228	>10 mgd.

[1] Subject to annual adjustment in accordance with paragraph (c) of this section.

TABLE 3 TO § 401.43—ADDITIONAL FEES

Proposed action	Fee	Fee maximum
Emergency Approval Under 18 CFR 401.40	$5,000	Alternative Review Fee.
Late Filed Renewal Surcharge	$2,000.	
Modification of a DRBC Approval	At Executive Director's discretion, Docket Application Fee for the appropriate project type.	Alternative Review Fee.
Name change	$1,228[1].	
Change of Ownership	$1,842[1].	

[1] Subject to annual adjustment in accordance with paragraph (c) of this section.

PART 420—BASIN REGULATIONS—WATER SUPPLY CHARGES

■ 3. The authority citation for part 420 continues to read as follows:

Authority: Delaware River Basin Compact, 75 Stat. 688.

■ 4. In § 420.41, revise paragraphs (a) and (b) to read as follows:

§ 420.41 Schedule of water charges.

* * * * *

(a) $98 per million gallons for consumptive use, subject to paragraph (c) of this section; and

(b) $0.98 per million gallons for non-consumptive use, subject to paragraph (c) of this section.

* * * * *

Dated: May 19, 2023.

Pamela M. Bush,

Commission Secretary.

BILLING CODE P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 587

Publication of Russian Harmful Foreign Activities Sanctions Regulations Web General License 8G

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Publication of a Web General License.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing one general license (GL) issued pursuant to the Russian Harmful Foreign Activities Sanctions Regulations: GL 8G, which was previously made available on OFAC's website.

DATES: GL 8G was issued on May 5, 2023. See **SUPPLEMENTARY INFORMATION** for additional relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Assistant Director for Licensing, 202–622–2480; Assistant Director for Regulatory Affairs, 202–622–4855; or Assistant Director for Compliance, 202–622–2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

This document and additional information concerning OFAC are available on OFAC's website: *www.treas.gov/ofac.*

Background

On May 5, 2023, OFAC issued GL 8G to authorize certain transactions otherwise prohibited by the Russian Harmful Foreign Activities Sanctions Regulations, 31 CFR part 587. GL 8G was made available on OFAC's website (*www.treas.gov/ofac*) when it was issued. The text of this GL is provided below.

OFFICE OF FOREIGN ASSETS CONTROL

Russian Harmful Foreign Activities Sanctions Regulations

31 CFR Part 587

GENERAL LICENSE NO. 8G

Authorizing Transactions Related to Energy

(a) Except as provided in paragraph (c) of this general license, all transactions prohibited by Executive Order (E.O.) 14024 involving one or more of the following entities that are related to energy are authorized, through 12:01 a.m. eastern daylight time, November 1, 2023:

(1) State Corporation Bank for Development and Foreign Economic Affairs Vnesheconombank;

(2) Public Joint Stock Company Bank Financial Corporation Otkritie;

(3) Sovcombank Open Joint Stock Company;

(4) Public Joint Stock Company Sberbank of Russia;

(5) VTB Bank Public Joint Stock Company;

(6) Joint Stock Company Alfa-Bank;

(7) Public Joint Stock Company Rosbank;

(8) Bank Zenit Public Joint Stock Company;

(9) Bank Saint-Petersburg Public Joint Stock Company;

(10) Any entity in which one or more of the above persons own, directly or indirectly, individually or in the aggregate, a 50 percent or greater interest; or

(11) the Central Bank of the Russian Federation.

(b) For the purposes of this general license, the term ''related to energy'' means the extraction, production, refinement, liquefaction, gasification, regasification, conversion, enrichment, fabrication, transport, or purchase of petroleum, including crude oil, lease condensates, unfinished oils, natural gas liquids, petroleum products, natural gas, or other products capable of producing energy, such as coal, wood, or agricultural products used to manufacture biofuels, or uranium in any form, as well as the development, production, generation, transmission, or exchange of power, through any means, including nuclear, thermal, and renewable energy sources.

(c) This general license does not authorize:

(1) Any transactions prohibited by Directive 1A under E.O. 14024, *Prohibitions Related to Certain Sovereign Debt of the Russian Federation;*

(2) The opening or maintaining of a correspondent account or payable-through account for or on behalf of any entity subject to Directive 2 under E.O. 14024, *Prohibitions Related to Correspondent or Payable-Through Accounts and Processing of Transactions Involving Certain Foreign Financial Institutions;*

(3) Any debit to an account on the books of a U.S. financial institution of the Central Bank of the Russian Federation; or

(4) Any transactions otherwise prohibited by the Russian Harmful Foreign Activities Sanctions Regulations, 31 CFR part 587 (RuHSR), including transactions involving any person blocked pursuant to the RuHSR other than the blocked persons described in paragraph (a) of this general license, unless separately authorized.

(d) Effective May 5, 2023, General License No. 8F, dated February 24, 2023, is replaced and superseded in its entirety by this General License No. 8G.

Note to General License No. 8G. This authorization is valid until November 1, 2023, unless renewed.

Andrea M. Gacki,
Director, Office of Foreign Assets Control.

Dated: May 5, 2023.

Andrea M. Gacki,
Director, Office of Foreign Assets Control.

BILLING CODE 4810–AL–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2023–0287]

Safety Zone; 47th Annual Swim Around Key West, Key West, FL

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the 47th Annual Swim Around Key West, Key West, Florida to provide for the safety of life on the navigable waterways during this event. This action is necessary to ensure the safety of event participants and spectators. During the enforcement period, no person or vessel may enter, transit through, anchor in, or remain within the regulated area without approval from the Captain of the Port Key West or a designated representative.

DATES: The regulation in 33 CFR 165.786 will be enforced for the location identified in Item 6.2 of the table to § 165.786, from 6 a.m. until 4 p.m. on June 3, 2023.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call or email Hailye Wilson, Sector Key West Waterways Management Department, Coast Guard; telephone (305) 292–8768; email: *hailye.m.wilson@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone in 33 CFR 165.786, Table to § 165.786, Item 6.2, for the 47th Annual Swim Around Key West from 6 a.m. until 4 p.m. on June 3, 2023. This action is being taken to provide for the safety of life on navigable waterways during this event. The regulation for recurring marine events within Sector Key West Captain of the Port (COTP) zone, 165.786, Table to § 165.786, Item 6.2, specifies the location of the regulated area. During the enforcement period, no person or vessel may enter, transit through, anchor in, or remain within the established regulated areas without approval from the Captain of the Port Key West or designated representative. The Coast Guard may be assisted by other Federal, State, or local law enforcement agencies in enforcing this regulation.

The Coast Guard will provide notice of the regulated area by Local Notice to Mariners and Broadcast Notice to Mariners. If the Captain of the Port Key West determines that the regulated area need not be enforced for the full duration stated in this publication, he or she may use a Broadcast Notice to Mariners to grant general permission to enter the regulated area.

J.D. Ingram,
Captain, U.S. Coast Guard, Captain of the Port Key West.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2023–0276]

Safety Zone; CFK Swim Around Key West, Key West, FL

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the College of the Florida Keys Swim Around Key West, Key West, Florida to provide for the safety of life on the navigable waterways during this event. This action is necessary to ensure the safety of event participants and spectators. During the enforcement period, no person or vessel may enter, transit through, anchor in, or remain within the regulated area without approval from the Captain of the Port Key West or a designated representative.

DATES: The regulation in 33 CFR 165.786 will be enforced for the location identified in Item 6.1 of the table to § 165.786, from 8:30 a.m. until 4:30 p.m. on June 17, 2023.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call or email Hailye Wilson, Sector Key West Waterways Management Department,

Coast Guard; telephone (305) 292–8768; email: *Hailye.M.Wilson@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone in 33 CFR 165.786, Table to § 165.786, Item 6.1, for the College of the Florida Keys Swim Around Key West from 8:30 a.m. until 4:30 p.m. on June 17, 2023. This action is being taken to provide for the safety of life on navigable waterways during this event. The regulation for recurring marine events within Sector Key West Captain of the Port (COTP) zone, 165.786, Table to § 165.786, Item 6.1, specifies the location of the regulated area. During the enforcement period, no person or vessel may enter, transit through, anchor in, or remain within the established regulated areas without approval from the Captain of the Port Key West or designated representative. The Coast Guard may be assisted by other Federal, State, or local law enforcement agencies in enforcing this regulation.

The Coast Guard will provide notice of the regulated area by Local Notice to Mariners and Broadcast Notice to Mariners. If the Captain of the Port Key West determines that the regulated area need not be enforced for the full duration stated in this publication, he or she may use a Broadcast Notice to Mariners to grant general permission to enter the regulated area.

J.D. Ingram,

Captain, U.S. Coast Guard, Captain of the Port Key West.

BILLING CODE 9110–04–P

DEPARTMENT OF EDUCATION

34 CFR Chapter III

[Docket ID ED–2023–OSERS–0020]

Final Priority and Definition—Activities for Underserved Populations

AGENCY: Office of Special Education and Rehabilitative Services (OSERS), Department of Education.

ACTION: Final priority and definition.

SUMMARY: The U.S. Department of Education (Department) announces a priority and definition under the Rehabilitation Act of 1973, as amended (Rehabilitation Act), for Activities for Underserved Populations program, Assistance Listing Number (ALN) 84.315C. We take this action to improve the delivery of vocational rehabilitation services to, and the employment outcomes of, individuals with disabilities from underserved populations. For this priority, we define "underserved populations" to mean "Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders, and other persons of color." The Department may use this priority and definition for competitions in fiscal year (FY) 2023 and later years.

DATES: Effective June 30, 2023.

FOR FURTHER INFORMATION CONTACT: Kristen Rhinehart-Fernandez, U.S. Department of Education, 400 Maryland Avenue SW, Room 5076, Potomac Center Plaza, Washington, DC 20202–5134. Telephone: (202) 245–6103. Email: *315C@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Purpose of Program: A purpose of the Activities for Underserved Populations program is to make awards to minority entities and Indian Tribes to conduct research, training, technical assistance, or a related activity to improve the quality, access, delivery of services, and competitive integrated employment outcomes under the Rehabilitation Act, especially for individuals with disabilities from underserved populations. As defined in section 21(b)(5) of the Rehabilitation Act, "minority entity" means "a historically Black college or university, a Hispanic-serving institution of higher education, an American Indian Tribal college or university, or another institution of higher education whose minority student enrollment is at least 50 percent." The definition of "Indian Tribe" in section 7(19)(B) of the Rehabilitation Act is "any Federal or State Indian tribe, band, rancheria, pueblo, colony, or community, including any Alaskan native village or regional village corporation (as defined in or established pursuant to the Alaska Native Claims Settlement Act) and a Tribal organization (as defined in section 4(l) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(l))."

Program Authority: 29 U.S.C. 718(b)(2)(B).

We published a notice of proposed priority and definition (NPP) for this program in the **Federal Register** on February 8, 2023 (88 FR 8242). That document contained background information and our reasons for proposing the priority and definition.

There are no differences between the NPP and this notice of final priority and definition (NFP), as discussed in the *Analysis of Comments and Changes* section of this document.

Public Comment: In response to our invitation in the NPP, eight parties submitted comments on the proposed priority and definition. Generally, we do not address technical and other minor changes or suggested changes the law does not authorize us to make under the applicable statutory authority. In addition, we do not address general comments that raised concerns not directly related to the proposed priority and definition.

Analysis of Comments and Changes: An analysis of the comments and of any changes in the priority since publication of the NPP follows.

Comment: One commenter commended the Department for including Indian Tribes in the definition of "underserved populations" and shared that it demonstrates a tangible effort to expand opportunities for Indian Tribes and is a step forward in repairing and building trust with the Tribes. Another commenter agreed that the priority would strengthen the delivery of services to individuals with disabilities from underserved populations.

Discussion: The Department appreciates support for this priority.

Changes: None.

Comment: One commenter expressed opposition to the proposed priority, stating that by exclusively focusing on or prioritizing awards to minority entities and Indian Tribes as described in 29 U.S.C. 718(b)(2)(B), the priority limits the entities described in 29 U.S.C. 718(b)(2)(C), which permits awards to a State or public or private nonprofit agency or organization to provide outreach and technical assistance to minority entities and Indian Tribes in order to increase their participation in activities carried out under the Rehabilitation Act and enhance their capacity to do so. The commenter asserted that awards should be granted based on the best possible outcome, not the race or ethnicity of the applicant.

Discussion: The proposed priority and definition are directly aligned with the program statute. Section 21 of the Rehabilitation Act (29 U.S.C. 718(b)(2)(A–C)) establishes three allowable activities for this program and the entities eligible to receive awards for each of the allowable activities. The Department has provided funding opportunities under each of the allowable activities at different times since this program was authorized, including section 718(b)(2)(C). For this funding opportunity, as described in the NPP, the Department determined that there was a need for the activities authorized by section 718(b)(2)(B). The Department further determined that this

priority and definition align with such activities, as well as the Secretary's Supplemental Priorities and Definitions for Discretionary Grant Programs, published in the **Federal Register** on December 10, 2021 (86 FR 70612), and Executive Order 13985 for Advancing Racial Equity and Support for Underserved Communities Through Federal Government, published in the **Federal Register** on January 20, 2021 (86 FR 7009).

Changes: None.

Comment: One commenter recommended that the priority include targeted research and interventions in educational settings for Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders, and other persons of color who identify as LGBTQ+. The commenter noted that LGBTQ+ youth of color experience higher rates of homelessness and poverty and should be included in the priority.

Discussion: We appreciate the recommendation for including targeted research and interventions in educational settings in the priority for Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders, and other persons of color who identify as LGBTQ+. However, the purpose of the priority is to improve the delivery of State vocational rehabilitation (VR) services to individuals with disabilities from underserved populations with the goal of improving competitive integrated employment outcomes. The Department anticipates that the training and technical assistance provided to State VR agencies through this priority will ultimately benefit Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders, and other persons of color, who are individuals with disabilities, including those who identify as LGBTQ+.

Changes: None.

Comment: One commenter stated that the priority should provide an avenue for minority-serving institutions to train pre-service students and build the capacity of future VR counselors to effectively serve underserved populations. The commenter also suggested that additional strategies are needed to build a critical mass of skilled researchers at minority-serving institutions to study long-term inequities in employment experienced by individuals with disabilities from underserved populations. The commenter also inquired if applicants could propose activities to build a pipeline at minority-serving institutions to train and mentor students as future research leaders who could generate novel knowledge that informs service intervention and policy innovation for reducing employment disparities among individuals with disabilities from underserved populations.

Discussion: The Department believes that pre-service training is essential to improving VR services to, and competitive integrated employment outcomes of, individuals with disabilities from underserved populations. As stated in the priority, applicants are required to disseminate training and technical assistance material, analysis of data collected, evidence-based and promising practices, and lessons learned to RSA-funded Rehabilitation Long-Term Training projects designed to provide pre-service training, as well as RSA-funded technical assistance centers, Department-funded programs, and Federal partners, as applicable. In addition, applicants must develop products, such as toolkits, guides, manuals, webinars, and communities of learning for instructors, facilitators, State VR agency directors, and human resource and professional development specialists to facilitate the implementation of training and technical assistance material in curriculum and relevant training and development activities.

The Department also agrees that research focused on inequities in employment for individuals with disabilities from underserved populations, and encouraging students at minority entities to engage in such research, could help the VR system better enable individuals with disabilities from underserved populations to access VR resources, secure competitive integrated employment, and reach future goals. To that end, the priority requires the grantee to contribute to VR research and pedagogical practices that promote access to approaches that are racially, ethnically, culturally, and linguistically inclusive. Further, as described in paragraph (c)(iv) of the *Application Requirements,* under ''Quality of Project Services,'' applicants may include any other training and technical assistance activity that improves understanding, responsiveness, and delivery of services to, and competitive integrated employment outcomes for, underserved populations. For example, applicants may propose an activity at a minority entity to train and mentor students who could generate new knowledge that informs service intervention and policy innovation for reducing employment disparities among individuals with disabilities from underserved populations. However, activities included under paragraph (c)(iv) should not be the entire focus of the project, since the applicant must propose a project that, at a minimum, provides direct training and technical assistance to VR agencies by conducting all of the activities described under *Application Requirements,* paragraphs (a) through (f) in a culturally appropriate manner.

Changes: None.

Comment: One commenter recommended that the Department also target vulnerable populations such as English learners and individuals living in rural or remote communities under this priority. The commenter added that underserved and vulnerable populations often experience disproportionate outcomes.

Discussion: The Department agrees with the commenter that English learners and individuals living in rural or remote communities have experienced inequities that have limited or prevented their ability to achieve competitive integrated employment; however, the program authority under which the funding is appropriated is based on congressional findings regarding the inequitable treatment of individuals from minority backgrounds in the VR process, and the statute instructs the Secretary to concentrate on improving the outcome of services provided under the Rehabilitation Act to individuals from minority backgrounds. 29 U.S.C. 718 (Section 21, ''Traditionally Underserved Populations''). Therefore, in order to comply with statutory requirements, this priority focuses its definition of ''underserved populations'' on individuals from minority backgrounds: ''Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders, and other persons of color.'' While such underserved populations will likely include some English learners and individuals from rural or remote areas, they are not specifically included in the target population due to the statutory focus on individuals from minority backgrounds in this particular funding opportunity. However, under the priority, the grantee must contribute to VR research and pedagogical practices that promote access to approaches that are racially, ethnically, culturally, and linguistically inclusive.

Changes: None.

Comment: One commenter recommended that we clearly define short- and long-term goals in the priority. The commenter raised concerns about the five-year performance period and proposed that the priority set intervals for evaluating

the effectiveness of the training and technical assistance that the grantee is providing to the identified State VR agencies. The commenter added that the Delphi method (a term generally used to describe a structured, iterative survey or feedback process to elicit and combine expert opinion to reach consensus) could help analyze different phases of development.

Discussion: The Department appreciates the commenter's concerns and suggestions. The Department notes that, under paragraph (d) of the *Application Requirements,* ''Quality of the Project Evaluation,'' applicants must include an evaluation plan for the project that includes such periodic review. The plan must describe a process or approach that will be used for gathering feedback from the identified State VR agencies throughout years two, three, four, and five of the project for continuous improvement and to evaluate the effectiveness of the training and technical assistance provided to a minimum of 15 State VR agencies. Additionally, under paragraph (d)(3), applicants must describe methodologies, including instruments, data collection methods, and analyses, that will be used to evaluate the project and how the methods of evaluation will produce quantitative and qualitative data to demonstrate whether the project activities achieved their intended outcomes. Applicants may propose the Delphi method or other appropriate methods to meet this requirement.

Changes: None.

Comment: One commenter responded to the Department's directed questions about the requirement for applicants to provide technical assistance to a minimum of 15 State VR agencies (Combined, General, or Agencies for the Blind) over a five-year period. The commenter spoke to how the requirement of providing technical assistance to a minimum of 15 State VR agencies may deter Indian Tribes from applying for this funding opportunity. The commenter recommended lowering the requirement from a minimum of 15 State VR agencies to five because of limited Tribal operating budgets, the rural location of many Tribes, andchanges in program staff resulting from Tribal elections. As it applies to Tribes located in Montana and the Rocky Mountain and Great Plains regions, the commenter explained that the minimum requirement may discourage Tribes from the funding opportunity altogether. The commenter indicated that Tribes in Montana operate under very limited budgets to meet the respective needs of the people they serve, and that providing training and technical assistance to a minimum of 15 State VR agencies over five years will likely contribute to additional budget constraints and concerns. The commenter added that it would also be difficult for Tribes in these regions to host or coordinate 15 trainings as Indian Reservations can be hundreds of miles from the neighboring county seat. Additionally, the commenter shared that Tribal elections could result in a change in the program applicant or program coordinator within the five-year grant period, particularly in Montana, where most Tribes hold elections every two years.

Discussion: We appreciate the commenter's concerns about the capability of Indian Tribes located in rural areas to successfully provide training and technical assistance to a minimum of 15 State VR agencies over a five-year performance period, including concerns about limited operating budgets and changes in Tribal government leadership. There are currently 78 VR agencies (34 Combined VR agencies, 22 General VR agencies, and 22 Blind VR agencies) and 93 Tribal VR programs. In addition, the Department funds the American Indian Vocational Rehabilitation Training and Technical Assistance Center and Tribal VR Institute (AIVRTTAC), which assists Tribal governments to develop or to increase their capacity to provide a program of vocational rehabilitation services, in a culturally relevant manner, to American Indians with disabilities residing on or near Federal or State reservations. The program's goal is to enable these individuals, consistent with their individual strengths, resources, priorities, concerns, abilities, capabilities, and informed choice, to prepare for and engage in gainful employment. Program services are provided under an individualized plan for employment and may include native healing services. The AIVRTTAC ensures that all materials and activities are culturally responsive through providing culturally responsive teaching, researching needs assessments, including examining and developing culturally based promising VR practices, assisting AIVRTTAC participants in adapting standard VR practices to the cultural and social needs of AIVRS projects, using the AIVRTTAC holistic AIVRS project model, and developing opportunities to bridge understanding between cultures. The Department identified a minimum number of State VR agencies based on factors such as cost, level of effort, scope of the project, duration of the training and technical assistance, and the unique challenges and demographics of State VR agencies. We note that the grantee may offer training and technical assistance in-person and remotely to the identified State VR agencies. The grantee may also determine how many State VR agencies to serve each year over a five-year period to meet the minimum requirement. In addition, applicants may subgrant to Indian Tribes to directly carry out project activities described in the priority, as stated in the notice inviting applications published elsewhere in this issue of the **Federal Register**.

In addition to these factors, the Department also recognizes the financial constraints of Indian Tribes, especially those located in rural areas, may be a potential barrier to applying for this competition. Therefore, the Department will expand the range of State VR agencies the grantee must serve in the Final Priority from 15 to a minimum range of 5 to 15 to ensure all applicants have an opportunity to successfully meet the goals of this program. When determining a minimum range of State VR agencies to serve, applicants should consider the estimated available funds described in the notice inviting applications published elsewhere in the **Federal Register**. Given the Department only plans to award one grant, applicants are encouraged to identify a meaningful number of State VR agencies to receive training and technical assistance from this project in order to increase competitive integrated employment outcomes for individuals with disabilities from underserved populations.

Changes: In the Final Priority, the Department provides funding for a cooperative agreement for a minority entity or an Indian Tribe to provide training and technical assistance to a minimum range of 5 to 15 State VR agencies (Combined, General, or Agencies for the Blind) over a five-year period of performance.

Comment: One commenter recommended that individuals with 8(a) certification (socially and economically disadvantaged small businesses) be included as eligible applicants.

Discussion: We appreciate the comment. However, for-profit entities, including small businesses, are not eligible applicants under 29 U.S.C. 718(b)(2)(B).

Changes: None.

Final Priority

Improving the Delivery of Vocational Rehabilitation Services to, and the Employment Outcomes of, Individuals with Disabilities from Underserved Populations.

Under this priority, the Department provides funding for a cooperative agreement for a minority entity or an Indian Tribe to provide training and technical assistance to a minimum range of 5 to 15 State VR agencies (Combined, General, or Agencies for the Blind) over a five-year period of performance so that the agencies are equipped to serve as role models for diversity, equity, inclusion, and accessibility in the workforce system by implementing policies, practices, and service delivery approaches that are designed to contribute to increasing competitive integrated employment outcomes for individuals with disabilities from underserved populations. Further, the grantee must contribute to VR research and pedagogical practices that promote access to approaches that are racially, ethnically, culturally, and linguistically inclusive.

During the first year of the project the grantee will focus on developing training and technical assistance material and gathering input and feedback from a diverse group of stakeholders including the Rehabilitation Services Administration (RSA), State VR agencies, and other relevant partners. During the period of performance, the grantee must enter into agreements with the State VR agencies receiving training and technical assistance. Each agreement must: specify the level of involvement from VR agency leadership and personnel and include an assurance that the VR agency is committed to sustainable systems change across the organization for improving delivery of services to underserved populations; explain how data will be collected and shared; identify training and technical assistance needs, intervention strategies, and implementation timelines; and describe how outcomes will be measured. The grantee must have a minimum of two agreements in place by the end of the first year of the grant.

Application Requirements

To be considered for funding under this priority, applicants must, at a minimum, propose a project that will conduct the following activities in a culturally appropriate manner. The Department encourages innovative approaches to meet this requirement. To meet this requirement, applicants must—

(a) Demonstrate, in the narrative section of the application under ''Significance of the Proposed Project,'' an understanding of the inequities and challenges experienced by individuals with disabilities from underserved populations determined eligible to receive VR services. To meet this requirement, applicants must—

(1) Present information and relevant data about the disparities that exist with respect to VR services and employment outcomes for underserved populations; and

(2) Describe how the project proposes to improve VR services for, and competitive integrated employment outcomes of, underserved populations.

(b) Demonstrate, in the narrative section of the application under ''Quality of Project Design,'' how the project will address inequities and challenges experienced by underserved populations determined eligible to receive VR services. To meet this requirement, applicants must—

(1) Demonstrate knowledge and experience working with individuals with disabilities from underserved populations;

(2) Incorporate into the project design current research and promising and evidence-based practices (EBPs),[1] research about adult learning principles and implementation science, and relevant findings, recommendations, and relevant strategies identified by the Targeted Communities project [2] to overcome barriers to competitive integrated employment and VR participation for individuals with disabilities from underserved populations;

(3) Detail how the project will collect and examine data, including from the RSA–911 and other relevant sources, from a minimum range of 5 to 15 State VR agencies regarding VR applicants, VR-eligible individuals, and VR participants by race/ethnicity by—

(i) Exploring patterns, changes, or shifts in demographics for individuals with disabilities from underserved populations;

(ii) Exploring data, by race/ethnicity, from each State VR agency regarding VR applicants to identify opportunities for increased outreach to and referral of individuals with disabilities from underserved populations to VR services;

(iii) Examining data, by race/ethnicity, from each State VR agency regarding selected VR services and competitive integrated employment outcomes at exit to identify inconsistencies or gaps in the provision of services;

(iv) Examining data from each State VR agency to identify reasons for successful and unsuccessful closures between VR program participants from underserved populations and VR program participants who are not from underserved populations; and

(v) Reviewing each State VR agency's service delivery model from eligibility determination to exit; and

(4) Present approaches for how the information and data described above will be used to inform strategies to improve the delivery of services to individuals with disabilities from underserved populations for each of the identified State VR agencies. For example, applicants may consider conducting a needs assessment and asset map for each of the identified State VR agencies to identify existing programs and services and businesses and philanthropic organizations in the community, as well as potential gaps and opportunities for collaboration, to support individuals with disabilities from underserved populations in successfully obtaining competitive integrated employment. Applicants may also consider designing a long-term data collection tool and provide analytical support and training to the identified State VR agencies to identify additional data elements not captured in the RSA–911 or other case management systems to continually assess the quality of services and outcomes for individuals with disabilities from underserved populations and individuals with disabilities not from underserved populations.

(c) Demonstrate, in the narrative section of the application under ''Quality of Project Services,'' how the project will be designed so that policies, practices, and service delivery approaches will contribute to increased competitive integrated employment outcomes for individuals with disabilities from underserved populations. To meet this requirement, applicants must—

(1) Propose training and technical assistance activities that will be offered to the identified State VR agencies. Training and technical assistance activities will be further developed during the first year of the grant and described in the agreements with the identified State VR agencies based on needs and analysis of data. Training and technical assistance activities may include, but are not limited to, (i) assisting in State VR agency coordination and cross-agency

[1] For purposes of these requirements, ''evidence-based practices'' (EBPs) means, at a minimum, demonstrating a rationale (as defined in 34 CFR 77.1) based on high-quality research findings or positive evaluation that such activity, strategy, or intervention is likely to improve student outcomes or other relevant outcomes.

[2] Final Report from the Vocational Rehabilitation Technical Assistance Center for Targeted Communities (Project E3) (PR/Award #H264F150003) *https://ncrtm.ed.gov/library/detail/vocational-rehabilitation-technical-assistance-center-targeted-communities-project* and project website: *https://projecte3.com/.*

partnerships with State and local agencies and community-based organizations, workforce programs, educational institutions, and other relevant local community agencies and organizations (*i.e.,* agencies and organizations that provide services and supports related to mental health, substance use, behavioral health, intellectual developmental disabilities, and other areas of need such as housing, food, transportation, and healthcare) to strengthen outreach and awareness about VR programs and services, build trust between State VR agency counselors and individuals with disabilities from underserved populations, and connect individuals with disabilities from underserved populations determined to be VR eligible with necessary supports to successfully obtain competitive integrated employment; (ii) reviewing policies, practices, and procedures from the identified State VR agencies and providing recommendations to help ensure they are culturally appropriate and implemented in an appropriate manner; (iii) developing strategies to strengthen diversity in the VR workforce (*e.g.,* reviewing hiring practices from the identified State VR agencies and identifying strategies that expand outreach to VR counselors from underserved populations and mentoring and coaching activities for new and existing VR counselors and paraprofessionals, human resource and professional development specialists, and VR management and leadership personnel from underserved populations); and (iv) any other activity that improves understanding, responsiveness, and delivery of services to, and competitive integrated employment outcomes for, individuals with disabilities from underserved populations;

(2) Detail how those activities will incorporate relevant strategies and promising and effective practices identified by the Targeted Communities Project and other EBPs or related sources to the extent possible;

(3) Explain how training and technical assistance activities will be of high quality and sufficient intensity and duration to achieve the intended outcomes of the project;

(4) Describe how remote learning [3] opportunities will be incorporated into the project. Remote learning opportunities should offer experiences that advance engagement and implementation (*e.g.,* synchronous and asynchronous professional learning, professional learning networks or communities, and coaching), which could also be incorporated into Rehabilitation Counseling programs, as well as other training and professional development activities designed for the VR workforce, as appropriate. The remote learning environment must be accessible to individuals with disabilities in accordance with Section 504 of the Rehabilitation Act of 1973;

(5) Describe their knowledge, skills, and experience to support the training and technical assistance activities described above;

(6) Describe how the project will contribute to VR research and pedagogical practices that promote access to approaches that are racially, ethnically, culturally, and linguistically inclusive. To meet this requirement, applicants must describe how they will—

(i) Disseminate to all State VR agencies, RSA-funded Rehabilitation Long-Term Training projects and technical assistance centers, Department-funded programs, and Federal partners, as applicable, training and technical assistance material, analysis of data collected, evidence-based and promising practices, and lessons learned;

(ii) Develop products, such as toolkits, guides, manuals, webinars, and communities of learning, for instructors, facilitators, State VR agency directors, and human resource and professional development specialists to facilitate the implementation of training and technical assistance material in curriculum and relevant training and development activities; and

(iii) Gather input and feedback from a diverse group of stakeholders and subject matter experts, including RSA, State VR agencies, and other relevant partners, throughout the project to inform the development and delivery of the material described above.

(d) In the narrative section of the application under ''Quality of the Project Evaluation,'' include an evaluation plan for the project. The evaluation plan must describe—

(1) Clear and measurable outcomes;

(2) Approaches for measuring the effectiveness of the intervention strategies identified in the agreements, including standards and targets for measuring knowledge, skills, and abilities of State VR agency personnel before and after completion of training activities. To address this requirement, applicants must provide an approach for determining—

(i) The most effective practices in improving the delivery of services to individuals with disabilities from underserved populations and the data that demonstrate the effectiveness of the practices; and

(ii) The most effective practices in creating a culture of systems change within the State VR agency and the data that demonstrate the effectiveness of the practices;

(3) Methodologies, including instruments, data collection methods, and analyses, that will be used to evaluate the project and how the methods of evaluation will produce quantitative and qualitative data to demonstrate whether the project activities achieved their intended outcomes;

(4) How the evaluation will be coordinated, implemented, and revised, as needed, during the project. The applicant must designate at least one individual with sufficient dedicated time, demonstrated experience in evaluation, and knowledge of the project to coordinate and conduct the evaluation. This may include, but is not limited to, making revisions to reflect any changes or clarifications, as needed, to the model and to the evaluation design and instrumentation with the logic model (*e.g.,* designing instruments and developing quantitative or qualitative data collections that permit collecting of progress data and assessing project outcomes);

(5) How evaluation results will be used to improve delivery of services to VR program participants from underserved populations from eligibility determination to exit. To address this requirement, applicants must provide an approach to gather input and feedback that includes the experiences of VR program participants from underserved populations. Applicants may consider voluntary focus groups, use of a unique identifier, or another approach that adheres to consumer confidentiality requirements in 34 CFR 361.38; and

(6) A process for gathering feedback from the identified State VR agencies for continuous improvement throughout years two, three, four, and five of the project.

(e) Demonstrate, in the narrative section of the application under ''Quality of the Management Plan,'' how applicants will ensure that—

(1) The project's intended outcomes, including the evaluation, will be achieved on time and within budget through—

[3] ''Remote learning'' means programming where at least part of the learning occurs away from the physical building in a manner that addresses a learner's educational needs. Remote learning may include online, hybrid/blended learning, or non-technology-based learning (*e.g.,* lab kits, project supplies, paper packets).

(i) Clearly defined responsibilities of key project personnel, subawards, and contracts, as applicable;

(ii) Procedures to track and ensure completion of the action steps, timelines, and milestones established for key project activities, requirements, and deliverables;

(iii) Internal monitoring processes to ensure that the project is being implemented in accordance with the established application and management plan; and

(iv) Internal financial management controls to increase efficiency and cost-effectiveness, including by reducing waste or achieving better outcomes, and how the applicant will ensure accurate and timely obligations, drawdowns, and reporting of grant funds, as well as monitoring subawards as applicable, in accordance with the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards at 2 CFR part 200 and the terms and conditions of the Federal award;

(2) The allocation of key project personnel, subawards, as applicable, and levels of effort of key personnel are appropriate and adequate to achieve the project's intended outcomes;

(3) The products and services are of high quality, relevance, and usefulness, in both content and delivery and are accessible to individuals with disabilities in accordance with section 504 of the Rehabilitation Act of 1973, as applicable;

(4) The proposed project will benefit from a diversity of perspectives; and

(5) Projects will be awarded and operated in a manner consistent with nondiscrimination requirements contained in the Federal civil rights laws.

(f) Include the following:

(1) In Appendix A, personnel-loading charts and timelines, as applicable, to illustrate the management plan described in the narrative;

(2) In Appendix A, a logic model [4] that depicts, at a minimum, the goals, activities, outputs, and outcomes of the proposed project;

(3) An assurance to maintain a high-quality website, with an easy-to-navigate design that is accessible to individuals with disabilities in accordance with Section 504 of the Rehabilitation Act of 1973, as applicable; and

(4) An assurance that training and technical assistance materials such as outreach, training curricula, presentations, reports, outcomes, and other relevant information will be submitted to RSA's National Clearinghouse of Rehabilitation Training Materials (NCRTM) (*https://ncrtm.ed.gov/*) at least 90 days before the end of the final budget period.

Final Definition

Underserved populations means Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders, and other persons of color.

Types of Priorities

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

Absolute priority: Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

This document does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This document does *not* solicit applications. In any year in which we choose to use this priority, we invite applications through a notice in the **Federal Register**.

Executive Orders 12866, 13563, and 14094

Regulatory Impact Analysis

Under Executive Order 12866, the Office of Management and Budget (OMB) determines whether this regulatory action is "significant" and, therefore, subject to the requirements of the Executive order and subject to review by OMB. Section 3(f) of Executive Order 12866, as amended by Executive Order 14094, defines a "significant regulatory action" as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $200 million or more (adjusted every 3 years by the Administrator of OIRA for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or Tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise legal or policy issues for which centralized review would meaningfully further the President's priorities or the principles stated in the Executive order, as specifically authorized in a timely manner by the Administrator of OIRA in each case.

This final regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866 (as amended by Executive Order 14094).

We have also reviewed this final regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation,

[4] "Logic model" (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active "ingredients" that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We are issuing this final priority and definition only on a reasoned determination that their benefits justify the costs. In choosing among alternative regulatory approaches, we selected the approach that maximizes net benefits. Based on the analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, and Tribal governments in the exercise of their governmental functions.

In accordance with these Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department's programs and activities.

Summary of Potential Costs and Benefits

The Department believes that the costs associated with the final priority and definition will be minimal, while the potential benefits are significant. The Department believes that this regulatory action does not impose significant costs on eligible entities. Participation in this program is voluntary, and the costs imposed on applicants by this regulatory action will be limited to paperwork burden related to preparing an application. The potential benefits of implementing the program will outweigh the costs incurred by applicants, and the costs of carrying out activities associated with the application will be paid for with program funds. For these reasons, we have determined that the costs of implementation will not be burdensome for eligible applicants, including small entities.

Paperwork Reduction Act of 1995

The final priority and definition contain information collection requirements that are approved by OMB under OMB control number 1820–0028; the final priority and definition do not affect the currently approved data collection.

Regulatory Flexibility Act Certification: The Secretary certifies that this final regulatory action will not have a significant economic impact on a substantial number of small entities. The U.S. Small Business Administration Size Standards define ''small entities'' as for-profit or nonprofit institutions with total annual revenue below $7,000,000 or, if they are institutions controlled by small governmental jurisdictions (that are comprised of cities, counties, towns, townships, villages, school districts, or special districts), with a population of less than 50,000.

The small entities that this regulatory action will affect are minority entities and Indian Tribes that may apply. We believe that the costs imposed on an applicant by the final priority and definition will be limited to paperwork burden related to preparing an application and that the benefits of the final priority and definition will outweigh any costs incurred by the applicant. We also believe that there are very few entities that can provide the type of technical assistance required under the final priority and definition. For these reasons, the final priority and definition will not impose a burden on a significant number of small entities.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Glenna Wright-Gallo,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 174

[EPA–HQ–OPP–2019–0508; FRL–7261–04–OCSPP]

RIN 2070–AK54

Pesticides; Exemptions of Certain Plant-Incorporated Protectants (PIPs) Derived From Newer Technologies

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is exempting a class of plant-incorporated protectants (PIPs) that have been created using genetic engineering from certain registration requirements under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), and from the requirements to establish a tolerance or tolerance exemption for residues of these substances on food or feed under the Federal Food, Drug, and Cosmetic Act (FFDCA). Specifically, EPA is finalizing its exemptions as described in its October 2020 proposal for PIPs now termed ''PIPs created through genetic engineering from a sexually compatible plant'' and ''loss-of-function PIPs,'' finalizing the process through which the Agency determines their eligibility for exemption, and finalizing the associated recordkeeping requirements. This set of exemptions reflects the biotechnological advances made since 2001, when EPA first exempted PIPs derived through conventional breeding and excluded from the exemptions those PIPs that are created through biotechnology. EPA

anticipates that today's exemptions will benefit the public by ensuring that human health and the environment are adequately protected, while also reducing the regulatory burden for the regulated community. These exemptions may also result in increased research and development activities, commercialization of new pest control options for farmers, particularly in minor crops, and increase the diversity of options for pest and disease management, which could provide environmental benefits.

DATES: This final rule is effective on July 31, 2023.

ADDRESSES: The docket for this action, identified under docket identification (ID) number EPA–HQ–OPP–2019–0508, is available at *https://www.regulations.gov.* Additional instructions on visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.* For the latest status information on EPA/DC services and docket access, visit *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Amanda Pierce, Biopesticides and Pollution Prevention Division (7511P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (202) 948–3693; email address: *BPPDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

You may be potentially affected by this action if you are a developer or registrant of a PIP. This action also may affect any person or company who might petition the Agency for a tolerance or an exemption from the requirement of a tolerance for any residue of a PIP. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Pesticide and Other Agricultural Chemical Manufacturing (NAICS code 325320), *e.g.,* pesticide manufacturers or formulators of pesticide products, importers or any person or company who seeks to register a pesticide or to obtain a tolerance for a pesticide.
- Crop Production (NAICS code 111), *e.g.,* seed companies.
- Colleges, universities, and professional schools (NAICS code 611310), *e.g.,* establishments of higher learning which are engaged in development and marketing of PIPs.
- Research and Development in the Physical, Engineering, and Life Sciences (except Nanobiotechnology) (NAICS code 541714), *e.g.,* biotechnology research and development laboratories or services.

If you have any questions regarding the applicability of this action to a particular entity after reading the regulatory text, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT.**

B. What action is the Agency taking?

This rule establishes exemptions under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136 *et seq.* and codified at 40 CFR 174.26 and 174.27 and for the residues of such PIPs under the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a and codified at 40 CFR 174.541 for certain PIPs that are created in plants using biotechnology. In this final rule, the term ''exemption'' is applied to actions under both of these statutes. (EPA notes that this action only exempts qualifying PIPs from regulation under FIFRA and the need to establish a tolerance for residues of qualifying PIPs under section 408(e) of the FFDCA; other statutory or regulatory requirements may still apply, *e.g.,* State, Tribal, or local requirements). This rule provides criteria and definitions that identify the two groups of PIPs that are exempted through this action, called ''PIPs created through genetic engineering from a sexually compatible plant'' and ''loss-of-function PIPs,'' and codifies the process through which the Agency determines their eligibility for exemption. The rule also codifies the recordkeeping requirements for exempted PIPs, and the preamble, along with the accompanying Response to Comments document (Ref. 1), addresses the public comments that the Agency received on the proposed rule (85 FR 64308; October 9, 2020; FRL–10014–10) (Ref. 2) during the public comment period. EPA's responses to those comments are summarized in Unit IV. and in the Response to Comments document (Ref. 1) that is available in docket for this action.

C. What is the Agency's authority for taking this action?

This action is being taken under the authority of FIFRA section 25 (7 U.S.C. 136w) and FFDCA section 408(e) (21 U.S.C. 346a(e)). FIFRA section 25(a)(1) authorizes EPA to issue regulations to carry out the provisions of FIFRA in accordance with certain procedures prescribed in that section. In addition, FIFRA section 25(b) allows EPA to promulgate regulations to exempt from the requirements of FIFRA any pesticide which the Administrator determines is ''of a character which is unnecessary to be subject to [FIFRA] in order to carry out the purposes of [FIFRA].'' FFDCA section 408(e) authorizes EPA to initiate actions to establish tolerances or exemptions for pesticide chemical residues that meet the safety standard. Section 408 of the FFDCA is focused on human risk. To make a safety finding under FFDCA to support a tolerance or exemption for pesticide residues on food, EPA considers, among other things: the toxicity of the pesticide and its metabolites and degradates, aggregate exposure to the pesticide in foods and from other sources of exposure, and any special risks posed to infants and children. The potential for pesticide exposure through food from food-producing animals that consume feed is part of the human health risk assessment used in EPA's FFDCA determinations. Risk to non-target organisms and risk associated with occupational exposure is evaluated under FIFRA. A more detailed discussion of EPA's statutory authority is available in Units III.A., III.B., and III.C. of the proposed rule (85 FR 64313–64314, October 9, 2020) (Ref. 2).

D. Why is EPA taking this action?

Recent advances in genetic engineering offer not only precise means by which genes coding for pesticidal substances can be inserted into a plant genome but also allow for modifications of genes that already exist within a plant. Due to the sophistication of these technologies, PIPs can now be created through genetic engineering that are virtually indistinguishable from those created through conventional breeding. These advances also allowed EPA to develop specific exemption criteria to circumscribe PIPs created through genetic engineering that pose no greater risk than the PIPs created through conventional breeding that have been exempt since 2001.

This rule is an effort to implement the policy goals articulated by multiple administrations to improve, clarify, and streamline regulations of biotechnology, beginning with the White House Office of Science and Technology Policy in a policy statement in 1986 on the ''Coordinated Framework for the Regulation of Biotechnology'' (51 FR 23302; June 26, 1986), the update to the Coordinated Framework in 2017 (Ref. 3), Executive Order 13874 (84 FR 27899, June 11, 2019) on ''Modernizing the

Regulatory Framework for Agricultural Biotechnology Products,'' and more recently, Executive Order 14801 (87 FR 56849, September 12, 2022) on ''Advancing Biotechnology and Biomanufacturing Innovation for a Sustainable, Safe, and Secure American Bioeconomy.''

E. What are the estimated incremental impacts?

EPA has evaluated the potential incremental impacts of the proposed exemptions in the document entitled ''Cost Analysis For the Final Rule Exempting Certain Plant-Incorporated Protectants (PIPs) from Registration'' (Ref. 4), which is available in the docket and is briefly summarized here.

1. Benefits

This rule reduces the regulatory hurdle (primarily cost) of getting certain PIPs to market. Accordingly, this rule is likely to encourage more research and development in this area of biotechnology and better enable firms of all sizes to engage in the development of these types of PIPs. Entities producing products designed for minor crops may not support markets large enough to warrant fixed registration costs. These entities may feel the most regulatory relief as a result of this rule.

Crop varieties modified for greater pest and disease resistance could increase the diversity of options for pest and disease management, which in turn, could provide environmental benefits and lower exposure for workers who apply pesticides. Growers may also benefit because they will have more tools available to combat pest pressures.

The rule is estimated to reduce overall registration costs (fees plus information and data requirement costs) to developers of ''PIPs created through genetic engineering from a sexually compatible plant'' and ''loss-of-function PIPs.'' On a per-product basis, the cost savings are estimated to range from $472,000–$886,000 using a 3% discount rate on future maintenance fees. A range of cost savings is provided because ''loss-of-function PIPs'' have fewer data requirements than ''PIPs created through genetic engineering from a sexually compatible plant'' and are not required to submit a request for EPA confirmation (thereby avoiding an M009 PRIA fee). Therefore, the savings to developers for ''loss-of-function PIPs'' is higher.

On an annual basis, the Agency estimates that anywhere from one to ten PIPs may be eligible for exemption. This upper and lower bound estimate is provided because, while the number of PIPs eligible for exemption is unknown, EPA has determined that it is likely to be greater than one. This is an increase from the estimate provided in the cost analysis for the proposed rule, which only included savings from one PIP. Accordingly, EPA estimates the annual savings of this rule to range from $472,000–$8,856,000 using a 3% discount rate on future maintenance fees (the lower bound represents one PIP per year and the upper bound represents ten PIPs per year will be eligible for exemption).

Of the entities likely to develop the types of PIPs this rule exempts, EPA currently estimates that approximately 80% are small entities. These cost savings would be realized as EPA approval of new active ingredients are sought. These exemptions are likely to remove a potential barrier to market entry for small entities because the monetary investment via Pesticide Registration Improvement Act (PRIA) fees and information and data requirement costs are substantially reduced from what would have been required under the registration process (in the absence of this rulemaking).

2. Costs

The costs of the rule includes costs imposed on developers and differences to societal welfare as a result of the rulemaking. The cost imposed on developers of PIPs include the costs to:

- Meet the requirements of the eligibility determination process per 40 CFR 174, subpart E;
- Maintain records related to the requirements of the eligibility determination for five years starting from the effective date of the exemption per 40 CFR 174.73; and
- Report any information regarding adverse effects on human health and the environment alleged to be caused by the PIP be reported to EPA per 40 CFR 174.71.

These costs are outlined in the cost analysis for the final rule. In consideration of the benefits and costs of the rule, the net effect is a cost savings to regulated entities. This is because the requirements to meet the eligibility determination process are less than what is required under registration. In the baseline, or no rule scenario, developers must maintain records related to registration; in the rule scenario, developers must similarly maintain records related to the exemption and exemption eligibility determination process—the net effect therefore of this requirement on developers is zero. In both the baseline, or no rule scenario, and in the rule scenario, developers are subject to the adverse effects reporting requirement—the net effect therefore of this requirement on developers is also zero.

The costs of the rule also include differences to societal welfare as a result of the rulemaking, which in this case would be any increased risk to human health or the environment from the change in regulatory oversight from the rule. There are little to no costs such as these anticipated by the rule because the criteria for qualification were chosen to minimize any such risks. EPA has concluded that adverse effects due to aggregate exposure to residues of pesticidal substances from ''PIPs created through genetic engineering from a sexually compatible plant'' through the dietary, non-food oral, dermal and inhalation routes are highly unlikely.

II. Summary of the Proposed Rule

In a proposed rule issued in October 2020 (Ref. 2), EPA proposed to:

1. Exempt ''plant-incorporated protectants based on sexually compatible plants created through biotechnology'' (40 CFR 174.26) from the requirement of a tolerance under FFDCA and from certain registration requirements under FIFRA, except for the following requirements: a proposed requirement of recordkeeping (40 CFR 174.73), a proposed eligibility determination process (40 CFR 174, subpart E), and the existing adverse effects reporting requirement for exempt plant-incorporated protectants (40 CFR 174.71);
2. Clarify the general qualifications for exemption for plant-incorporated protectants at 40 CFR 174.21;
3. Clarify how the proposed exemption relates to the existing exemption for plant-incorporated protectants derived from sexually compatible plants at 40 CFR 174.25; and
4. Allow the existing inert ingredient exemption at 40 CFR 174.705 to include biotechnology.

Unit VI. of the proposed rule explained the proposed exemption for ''PIPs based on sexually compatible plants created through biotechnology,'' detailed the rationale underlying that proposal, and described associated definitions that were proposed for codification or amendment (85 FR 64308) (Ref. 2), and also described the two primary considerations that EPA believed together would constitute the basis for meeting the FIFRA section 25(b)(2) standard for exemption (the pesticidal substance is found in plants that are sexually compatible with the recipient plant; and limitations on the expression profile). Also described were the details of the proposed eligibility determination process, and a proposed recordkeeping requirement for

exempted PIPs listed under 40 CFR 174.21(d).

In addition, EPA proposed edits to 40 CFR 174.21 to clarify the applicability of this framework to other PIP exemptions and EPA proposed to clarify the relationship between the proposal on ''PIPs based on sexually compatible plants created through biotechnology'' and the exemptions currently at 40 CFR 174.25, ''Plant-incorporated protectant from sexually compatible plant,'' and 40 CFR 174.508, ''Pesticidal substance from sexually compatible plant; exemption from the requirement of a tolerance.'' EPA also proposed to allow the existing inert ingredient exemption at 40 CFR 174.705 to include inert ingredients created using biotechnology so long as they still meet the existing criteria.

III. Summary of the Final Rule

In this action, EPA is finalizing the following:

1. An exemption for a category of ''PIPs created through genetic engineering from a sexually compatible plant;''
2. An exemption for a category of ''loss-of-function PIPs;''
3. An exemption eligibility determination process for certain exempted PIPs, including exemption specific information required for submission to support the exemption;
4. Recordkeeping requirements for certain exempted PIPs;
5. Clarifications for the general qualifications for exemption at 40 CFR 174.21;
6. Clarifications on the relationship between the existing exemptions for PIPs from sexually compatible plants and the newly issued exemption for ''PIPs created through genetic engineering from a sexually compatible plant;'' and
7. Allow the existing inert ingredient exemption at 40 CFR 174.705 to include genetic engineering.

A. Exemption for ''PIPs Created Through Genetic Engineering From a Sexually Compatible Plant''

This rule exempts from all FIFRA requirements, except for the adverse effects reporting requirements at 40 CFR 174.71, the recordkeeping requirements at 40 CFR 174.73 (as specified in 40 CFR 174.21(d)), and the eligibility determination process outlined in subpart E, ''PIPs created through genetic engineering from a sexually compatible plant.'' In the proposed rule, PIPs described under 40 CFR 174.26 were termed ''PIPs based on sexually compatible plants created through biotechnology.'' In this final rule, EPA has updated the name of the PIPs described under 40 CFR 174.26 to be ''PIPs created through genetic engineering from a sexually compatible plant'' based on public comment, as discussed in Unit IV.A.3.

1. Associated Definitions

The language describing the exemption appears in 40 CFR 174.26. Pertinent definitions associated with the exemption are found in 40 CFR 174.3 and include:

''*Gene*'' and other grammatical variants such as ''genic,'' means a unit of heritable genetic material that is comprised of the genetic material necessary for the production of a substance.

The definition for ''gene'' was revised from the proposal to remove the word ''functional'' before the phrase ''unit of heritable genetic material that is comprised of the genetic material necessary for the production of a substance.'' EPA made this change because loss-of-function traits are created by targeting a gene underlying an unwanted trait by reducing or removing the gene's function. While the gene may no longer be functional, structurally it is still a gene. Although this is commonly understood in the scientific community, removing the word ''functional'' from the definition may reduce confusion over the relationship between the definition of ''gene'' and ''loss-of-function PIPs.'' Therefore, for the reasons outlined, EPA removed the word ''functional'' from the definition of ''gene.'' As discussed in Unit V.A. of the proposal, the two genic regions relevant to the exemptions under 40 CFR 174.26 are the coding and regulatory regions. These regions are delineated through use of the phrase ''genetic material necessary for the production,'' which as defined under 40 CFR 174.3 means both ''genetic material that encodes a substance or leads to the production of a substance; and regulatory regions. It does not include noncoding nonexpressed nucleotide sequences.'' ''Noncoding, nonexpressed nucleotide sequences'' is also defined under 40 CFR 174.3 and includes examples such as linkers, adapters, homopolymers, and sequences of restriction enzyme recognition sites (further discussed in the context of these exemptions in Unit IV.B.1.).

''*Genetic engineering*'' means the modification of the genome of an organism using recombinant, synthesized, or amplified nucleic acids or other techniques excluded from the definition of conventional breeding. ''Genome'' is a defined term in 40 CFR 174.3 which means ''the sum of the heritable genetic material in the plant, including genetic material in the nucleus and organelles.'' EPA believes the use of the defined word ''genome'' in the ''genetic engineering'' definition would capture genetic engineering edits resulting in modifications to the proteome or transcriptome that are stably heritable.

As discussed in Unit IV.A.2., EPA received a comment suggesting a definition for ''biotechnology.'' However, for consistency across the Coordinated Framework, the Agency chose to instead define ''genetic engineering.'' EPA used the two phrases synonymously in its proposed rule and therefore does not consider the change from ''biotechnology'' to ''genetic engineering'' to be substantive. For additional discussion on maintaining consistency across the Coordinated Framework for exemptions of products derived from genetic engineering, see Unit III.H.: ''Alignment of the proposed rule with USDA's amendment to 7 CFR 340'' of the Response to Comments document in the docket associated with this rulemaking.

''*Native allele*'' means a variant of a native gene that is identified in the genetic diversity of plants sexually compatible with the recipient plant.

''*Native gene*'' means a gene that is identified in the recipient plant or source plants that are sexually compatible with the recipient plant. It does not include genes introduced through genetic engineering from a source organism that is not sexually compatible with the source plant.

The definition for ''native gene'' was revised from the proposal based on public comment (Unit IV.A.1.). In the proposal, rather than specifically excluding genes introduced through recombinant DNA or similar techniques from a non-sexually compatible source organism, EPA used the term ''never derived.'' EPA received comment suggesting that a greater focus on excluding transgenes (*i.e.,* genes introduced from non-sexually compatible organisms) may aid in clarity and in turn reduce uncertainty around genes originating through natural horizontal gene transfer. EPA agreed with the suggestion and revised the definition to state EPA's intent more explicitly as outlined in the proposed rule (*i.e.,* to exclude substances that conventional plant breeders do not have experience with, such as a bacterial endotoxin not historically found in a food plant). Screening practices and analyses performed as part of the standard conventional breeding process serve to eliminate plants that raise safety, quality or performance concerns. By limiting exempt substances to those

in which conventional plant breeders have experience, EPA can have confidence that these conventional plant breeding practices would still be protective for substances of exempt PIPs.

In addition, EPA revised the definition in 40 CFR 174.3 for ''*Sexually compatible.*'' In the proposed definition EPA stated that ''a viable zygote can be formed.'' This phrase was minorly revised to state ''plants must be capable of forming a viable zygote'' for clarity.

2. Exemption Criteria

PIPs that are created through genetic engineering but that could have otherwise been created through conventional breeding are exempt (40 CFR 174.26). The exemption criteria and associated definitions circumscribe PIPs that are created through genetic engineering using knowledge of nucleotide sequences in sexually compatible source plants to re-create a native allele or other functional nucleotide sequence identical to that which is found in a source plant. This would enable the use of genetic engineering of clonally-propogated cultivars of crops such as potato, grape, tree fruits, etc., to recreate pesticidal alleles found in sexually compatible cultivars or crop wild relatives. The exemption specifies criteria regarding the types of modifications that are allowed to be made to ensure that the exempt PIPs are characteristic in identity and in expression profile to those found in conventionally bred plants, and are therefore substances with which conventional plant breeders and conventional plant breeding screening methods have experience.

The scope of ''PIPs created through genetic engineering from a sexually compatible plant'' is delineated in 40 CFR 174.26(a). The regulatory text identifies two overarching categories that specify what will qualify as an exempt PIP pesticidal substance: (1) The insertion of new genetic material and (2) The modification of existing genetic material.

The provision at 40 CFR 174.26(a)(1) allows for insertions of new genetic material into the recipient plant so long as the genetic material is a native gene that is found in the sexually compatible plant population of that plant. This category requires that the entire pesticidal substance (*e.g.,* amino acid sequence for proteinaceous PIPs) that is created from the native gene be identical to that produced in the source plant. 40 CFR 174.26(a)(1) was revised from the proposed text to include a criterion related to inserted regulatory regions. 40 CFR 174.26(a)(1) now requires that any regulatory regions inserted as part of the native gene be identical to the regulatory regions of the native gene identified in the source plant. This change was made in response to comments EPA received stating that the proposed criterion related to expression profile (proposed 40 CFR 174.26(b)) was unclear (Units IV.C.2. and IV.E.4.b.). In response to these comments, EPA instead now provides specific criteria at codified 174.26(a)(1) related to the types of modifications that may impact expression. EPA is aware that intronic regions of genes may exhibit regulatory functions, but EPA does not expect that all introns necessarily need to be inserted as part of a native gene. Therefore, when describing the criterion related to identical sequences in the regulatory regions, EPA used the phrase ''regulatory regions inserted as part of the native gene,'' to specify that the criterion only applies to those regulatory regions that are ultimately inserted as part of the native gene (*i.e.,* it is not required that all regulatory regions be inserted, but those that are inserted must meet the criterion).

The final text in 40 CFR 174.26(a)(1) was revised from what was in the proposed text to remove the clause ''into a non-genic location'' in the phrase ''A native gene is engineered into a non-genic location of the recipient plant genome [. . .].'' In the proposal, EPA stated that this phrase was intended to preclude the insertion of the native gene into an existing gene to prevent the production of a novel substance (*e.g.,* a partial or modified substance) by the existing gene. However, upon further evaluation of this clause, prompted by public comment (Response to Comments document Unit III.A.3.), EPA determined that this restriction is not necessary as any novel substance that would be produced as a result of a fusion with the inserted PIP gene (*i.e.,* through the creation of a novel open reading frame), would not meet the exemption under 40 CFR 174.26.

The provision at 40 CFR 174.26(a)(2) describes permissible modifications to the existing genetic material in the recipient plant. 40 CFR 174.26(a)(2) allows for modifications of the existing native gene to match corresponding polymorphic sequence(s) in a native allele of that gene using a single source plant as a template. Polymorphisms are variants of a gene sequence that are shared between native alleles. These genetic variations may be composed of single nucleotides (*i.e.,* Single nucleotide polymorphisms (SNPs)) or larger DNA segments and they are found at the same locus within the genetic sequence of two or more native alleles. In some cases, enhanced pesticidal properties of a gene product can be attributed to one or more of these genetic variations within a native gene (Refs. 5, 6). The final rule (see 40 CFR 174.26(a)(2)) allows developers to utilize their knowledge of specific polymorphisms in regulatory and coding regions of native alleles to make changes to the native gene in their recipient plant. The phrase ''using a single source plant as a template'' in the provision limits the number of source plants for the polymorphic sequences to one. For example, it is not permissible to modify the polymorphic sequence of a native gene (in the recipient plant) to match a polymorphic sequence found in the native allele of a source plant and also modify a second polymorphic sequence in the native gene to match a sequence found in the native allele of a different source plant. This requirement is because EPA believes that increasing the amount of plants used as source plants for a single PIP may also lead to an increase in the likelihood that the substance is altered to something that plant breeders may not have experience. The second part of the phrase ''as a template'' indicates that the polymorphism that is engineered into the recipient plant must be identical in sequence to that which is found in the native allele of the source plant.

The final rule (see 40 CFR 174.26(a)(2)) differs from what was proposed at 40 CFR 174.26(a)(2)(ii) in that EPA previously proposed to require that modifications resulting in a native allele produce a pesticidal substance identical to that produced in the source plant. The exemption category at 40 CFR 174.26(a)(2) is promulgated in response to comments received indicating that the proposed exemption categories were too narrow in that they do not capture the full extent of genetic variation that can occur in plants (Unit IV.C.1.). While the final text in 40 CFR 174.26(a)(2) does not require the entire substance to be identical to a substance found in the sexually compatible population of the recipient plant, it does require the individual polymorphism(s) to have been identified. By requiring the polymorphic sequences to be identical, this new exemption category allows the Agency to capture more of the possible genetic variation that can occur in plants, while staying within the bounds of what could have been achieved through conventional breeding and what was proposed.

EPA acknowledges that the genetic variation that is observed in plants has the potential to be greater than what is captured at 40 CFR 174.26(a). Therefore, the Agency intends to revisit the

question of capturing a broader range of genetic variation under 40 CFR 174.26 in the future; a new rulemaking process that would be initiated by the Agency if, for example, new scientific information becomes available or if prompted by an interested party through an Agency inquiry, *e.g.,* based on a specific PIP product. Importantly, any new categories of exempt PIPs that would be added to 40 CFR 174.26 through this process in the future: (1) Would be required to fall within the previously defined scope of exempt PIPs, *i.e.,* those that can be created through conventional breeding; (2) Would be subject to recordkeeping requirements and documentation for exemption (Unit III.D.); and (3) Would at least initially be subject to the EPA confirmation process (Unit III.C.3.). By adhering to these requirements, EPA can ensure that any future categories of PIPs created through genetic engineering from sexually compatible plants will remain within the scientific scope that was presented in the proposal, and that underlies the current exemptions at 40 CFR 174.26, and that these categories would remain subject to the procedural guard rails set in place by the eligibility determination process.

The proposed regulatory text included additional categories that are not being finalized under 40 CFR 174.26. To increase clarity, the category encompassing ''loss-of-function PIPs'' that was proposed at 40 CFR 174.26(a)(2)(iv) has been removed and a new, stand alone exemption for ''loss-of-function PIPs'' at 40 CFR 174.27 was created in its place (Unit III.B.). Proposed 40 CFR 174.26(a)(2)(i) allowed for regulatory region modifications so long as the pesticidal substance remained unchanged, but relied on proposed 174.26(b) to specify the bounds of the expression profile. However, EPA received public comment stating that the criterion related to expression profile at proposed 40 CFR 174.26(b) was unclear (Units IV.C.2. and IV.E.4.b.). In response to these comments, 40 CFR 174.26(a)(2) now includes a criterion related to inserted regulatory region modifications (*i.e.,* must match corresponding polymorphic sequences in a native allele), therefore making proposed 40 CFR 174.26(a)(2)(i) redundant. Because proposed 40 CFR 174.26(a)(2)(i) was removed, proposed 40 CFR 174.26(a)(2)(iii) was also removed as it was dependent on proposed 40 CFR 174.26(a)(2)(i). Proposed 40 CFR 174.26(a)(2)(ii) is effectively a subset of what is possible under codified 40 CFR 174.26(a)(2), and is therefore not finalized. Finally, proposed 40 CFR 174.26(b) previously specified expression profile bounds, but due to public comment, EPA now includes specific criteria related to allowable modifications that could impact expression in the subsections of 40 CFR 174.26(a), thereby making proposed 40 CFR 174.26(b) unnecessary.

EPA does not believe that the removal of the proposed categories from the final regulatory text at 40 CFR 174.26 reduces the scope of PIPs exempted through this rulemaking since proposed 40 CFR 174.26(a)(2)(iv) is now being finalized as 40 CFR 174.27, proposed 40 CFR 174.26(a)(2)(ii) represents a subset of what can be accomplished under codified 40 CFR 174.26(a)(2), and since proposed 40 CFR 174.26(a)(2)(i) and proposed 40 CFR 174.26(a)(2)(iii) were deemed redundant.

The final text of 40 CFR 174.26(b) states that the requirements in 40 CFR 174.21(d) (*i.e.,* the recordkeeping requirements and the eligibility determination procedures) must be met in order for the exemption to apply. This is minorly revised from the proposed regulatory text which stated that the ''exemption does not apply until the requirements in subpart E of this part have been met;'' however, the recordkeeping requirements are located in subpart D, and therefore citing to 40 CFR 174.21(d) is a more streamlined citation.

In addition to exempting the active ingredient of PIPs created through genetic engineering from sexually compatible plants from the requirements of FIFRA, EPA is also finalizing the exemption for residues of these substances from the requirement of a tolerance under the FFDCA at 40 CFR 174.541. The exemption criteria are identical to those at 40 CFR 174.26 except that in order to be exempted from the requirements of a tolerance, residues of the pesticidal substance must also not be present at levels that are injurious or deleterious to human health (40 CFR 174.541(b)). The ''injurious or deleterious'' language is included in this rule to align with the same criteria found in 40 CFR 174.508 for residues of PIPs in sexually compatible plants. (*https://www.govinfo.gov/content/pkg/FR-2001-07-19/pdf/01-17983.pdf*). This language was adopted in the 2001 rule in response to comments about the potential for naturally occurring compounds to be present in foods at hazardous levels and to be more consistent with FDA policy and the standard applied to evaluate adulterated food: ''food shall be deemed to be adulterated . . . if it bears or contains any poisonous or deleterious substance which may render it injurious to health. . . .'' 21 U.S.C. 342(a)(1). The purpose of this language was to allow expeditious removal of the offending food from the market if injurious or deleterious levels of a substance were present in food. All of the criteria in 174.541 must be met: the conditions in paragraph (a) limit the identity of the substance, the condition in paragraph (b) set limits on the level of expression in the plant, and the conditions in paragraph (c) ensure the application of the exemption is properly documented. Regarding the condition in paragraph (b), one example of how this might work is if a source plant were to produce a pesticidal substance at levels that are injurious or deleterious to human health, that PIP would not qualify for exemption if the level of expression in the recipient plant matched the injurious or deleterious levels seen in the source plant. It is also important to note that EPA considers multiple native gene insertions of the same gene to be one PIP (further discussed in Unit IV.B.2.), so the criterion related to safe expression levels in food plants (40 CFR 174.541(b)) would apply to the overall expression level from all inserted gene copies. Developers modifying or inserting genes that produce substances with sequence homology to known mammalian toxins, toxicants, or allergens should ensure that the levels of pesticidal substances are within the ranges of levels generally seen in plant varieties currently on the market and known to produce food safe for consumption (*i.e.,* ensure that their levels are not injurious or deleterious to human health). Such substances expressed above these levels would likely trigger additional review during the EPA confirmation and may not fit the exemption criteria.

Additionally, 40 CFR 174.541(c) has been edited to more specifically cite to 40 CFR 174.90, rather than the entire subpart E. This citation is different from that found at 40 CFR 174.26(b) due to a difference in statutes. Specifically, 40 CFR 174.26(b) cites to 40 CFR 174.21(d), which describes the general qualifications for exemption under FIFRA, whereas 40 CFR 174.541 is an exemption from the requirement of a tolerance under FFDCA and therefore would not cite to exemption qualifications under FIFRA. Because the regulatory text at 40 CFR 174.26 for the active ingredient of ''PIPs created through genetic engineering from a sexually compatible plant'' and the corresponding tolerance exemption for residues of these active ingredients at 40 CFR 174.541 are identical (except for

the two clauses discussed in this paragraph) all other changes to the regulatory text that were discussed for 40 CFR 174.26 in this Unit were also applied to 40 CFR 174.541.

B. Exemption of ''Loss-of-Function PIPs''

This rule exempts ''loss-of-function PIPs'' from all FIFRA requirements, except for the adverse effects reporting requirements at 40 CFR 174.71, the recordkeeping requirements at 174.73 (as specified in 40 CFR 174.21(d)), and the eligibility determination process outlined in subpart E. The exempt PIPs represent a subcategory of PIPs described in the proposed rule (Ref. 2). In this final rule, EPA is creating a separate exemption for ''loss-of-function PIPs,'' which allows the Agency to create criteria specific to these types of PIPs and an accompanying definition for increased clarity. EPA made this change in response to comments that indicated the need for greater clarity and the broadening of the exemption text related to ''loss-of-function PIPs'' regarding the identicality of the substance (Unit IV.D.2.). As discussed in Unit IV.D.1., the modified genetic material of a ''loss-of-function PIP'' constitutes both the pesticidal substance and the active ingredient. The language describing the exemption appears in 40 CFR 174.27.

1. Associated Definitions

Because EPA is creating a separate exemption for ''loss-of-function PIPs,'' EPA is also codifying a definition associated with the exemption in 40 CFR 174.3:

''*Loss-of-function plant-incorporated protectant*'' means a plant-incorporated protectant in which the genetic material of a native gene is modified to result in a pesticidal effect through the reduction or elimination of the activity of that gene. For purposes of loss-of-function plant-incorporated protectants, the active ingredient and pesticidal substance are one and the same and are defined as the genetic material that has been modified to create the pesticidal trait (*i.e.,* modification of the sequence of nucleic acids). Loss-of-function plant-incorporated protectants do not include instances where the reduction or elimination of the activity of the modified native gene results in the intentional increase of activity of another pesticidal gene.

The first sentence of this definition specifies that for a PIP to be considered a ''loss-of-function PIP,'' a pesticidal effect must be created through the genetic modification of a native gene, which then leads to the reduction or elimination of the activity of that native gene. The second sentence defines the regulated substance (see Unit IV.D.1. for additional discussion). The third sentence explicitly excludes the scenario in which a modification of a native gene not only leads to the reduction in the expression of that native gene, but additionally leads to an increase of activity of another, ''secondary'' gene, with that ''secondary'' gene then conferring the pesticidal activity (*e.g.,* the altered gene encodes for a repressor whose absence does not itself lead to a pesticidal effect but rather the increased expression of a second gene that encodes a pesticidal substance). This definition is consistent with the description of ''loss-of-function PIPs'' in Unit VII.E. of the proposed rule (Ref. 2).

2. Exemption Criteria

Both the definition at 40 CFR 174.3 and the exemption text at 40 CFR 174.27 focus on the loss-of-function trait that results from the modification (*i.e.,* the reduction or elimination of the activity of the modified gene), and do not include requirements related to source plants or limit the location within the gene to which modifications are allowed to be made (*i.e.,* regulatory region or coding region). Specifically, 40 CFR 174.27 specifies two requirements, the first of which at 40 CFR 174.27(a) is almost identical in language to the loss-of-function definition and specifies that the genetic modification must result in a ''loss-of-function PIP.'' The type of genetic modification to a native gene that results in the loss of activity of that gene is not relevant so long as a ''loss-of-function PIP'' is the result of that modification. As with the exemptions at 40 CFR 174.26, the second requirement at 40 CFR 174.27(b) specifies that the exemption for ''loss-of-function PIPs'' only goes into effect after the requirements for the eligibility determination in 40 CFR 174.21(d) have been met.

In the proposed rule, ''loss-of-function PIPs'' were a subcategory under 40 CFR 174.26 (specifically proposed 40 CFR 174.26(a)(2)(iv)), and they were held to the same ''identical substance'' criterion as other PIPs described in proposed 40 CFR 174.26. While the EPA does not find that it can make an *a priori* safety determination under FIFRA and FFDCA for non-identical pesticidal substances now exempted under 40 CFR 174.26 (Unit IV.C.1.), it finds that no such restriction is warranted for ''loss-of-function PIPs'' under 40 CFR 174.27 (Unit IV.D.2.). This conclusion is based on characteristics of ''loss-of-function PIPs,'' the common occurrence of pesticidal traits resulting from the loss-of-function of endogenous genes in conventional breeding, and the biological processes that all proteins undergo within plants (Unit IV.D.2.).

The absence of function is a hallmark of ''loss-of-function PIPs,'' *e.g.,* loss of the activity of a native gene that would otherwise facilitate the susceptibility of that plant to a pathogen. Importantly, the criteria and definition state that for a ''loss-of-function PIP,'' the native gene modification results in a pesticidal effect from the reduction or elimination of the activity of *that* gene. This indicates a direct cause-and-effect relationship between the reduction in the expression of a specific native gene and a pesticidal effect. This direct cause-and-effect relationship also means that not all modifications that lead to a loss-of-function of a gene and that result in a pesticidal effect are considered ''loss-of-function PIPs.'' For example, this scenario may occur if a modification of a native gene not only leads to the reduction in the expression of that native gene, but also to an increase of the activity of *another,* ''secondary'' gene, with that ''secondary'' gene then conferring the pesticidal activity (*e.g.,* the altered gene encodes for a repressor protein whose absence does not itself lead to a pesticidal trait but rather the increased expression of a second gene that encodes a pesticidal substance). Because in this instance there is no direct cause-and-effect relationship between the reduction of the expression of the modified native gene and the pesticidal effect, that gene modification and resulting ''secondary'' activity would not be considered a ''loss-of-function PIP'' under 40 CFR 174.27. Further, in the scenario described, that gene modification and resulting ''secondary'' activity would only be exempt under the new regulations if it meets the criteria outlined in 40 CFR 174.26 and from FFDCA if the residues meet the requirements under 40 CFR 174.541. For ''loss-of-function PIPs,'' EPA clearly indicates the requirement for this direct cause-and-effect relationship of native gene modification and the pesticidal effect in the second sentence of the ''loss-of-function PIP'' definition.

C. Eligibility Determination Process

The Agency is finalizing subpart E, which includes provisions describing the eligibility determination process and documentation required for an exemption of certain PIPs. Specifically, in order for a PIP listed under 40 CFR 174.21(d) to be eligible for exemption, an exemption eligibility determination must be completed prior to engaging in

FIFRA-regulated activities. EPA agrees with commenters arguing that requiring an eligibility determination will provide additional clarity to developers of PIP products under certain circumstances and increase transparency and public trust in products containing these PIPs (Unit IV.E.1.). The primary difference between the proposal and the final rule is the restriction of the self-determination option to only certain PIPs exempted by this rulemaking. In the proposal, all exempted PIPs had the option of self-determination. However, in the final rule, only developers of ''loss-of-function PIPs'' (40 CFR 174.27) currently have the option to self-determine whether the exemption criteria are met. To that end, modifications were made to proposed 40 CFR 174.90, 40 CFR 174.91, and 40 CFR 174.93 (Units III.C.1., C.2., and C.3.). In addition, the titles of these three subsections were minorly revised from the proposal for clarity.

Given the straightforward criteria describing ''loss-of-function PIPs'' (*i.e.,* a focus on function rather than source plant or underlying sequence), EPA believes it is appropriate for ''loss-of-function PIPs'' to be eligible for the self-determination option as it is unlikely for a developer to accidentally misdetermine exemption eligibility of these PIPs. Additionally, the mode of action of ''loss-of-function PIPs'' (*i.e.,* reduction or elimination of an endogenous gene) is fundamentally different from ''PIPs created through genetic engineering from a sexually compatible plant'' (*e.g.,* intentional production of a pesticidal protein), and as such, further lends itself to the availability of a self-determination option. Although ''PIPs created through genetic engineering from a sexually compatible plant'' are not currently eligible for the self-determination option, EPA intends to reconsider this in future rulemakings.

A separate determination of eligibility of exemption for purposes of the FFDCA exemption for a PIP proposed for use in food or feed is required only if that determination has not already been submitted under FIFRA. This is because the exemption eligibility determination process described in 40 CFR 174.21 already requires the applicant to certify that the PIP meets the general qualifications for exemption, which includes exemption under the FFDCA for PIPs used in food or feed. A scenario in which a developer will need an exemption eligibility determination specifically for the purposes of FFDCA, but not FIFRA, would be when residues of a PIP are in or on food imported into the United States, but the PIP is not intended to be sold or distributed for pesticidal use (*e.g.,* PIP-containing seed or plant sold for planting) in the United States (and thus is not subject to FIFRA regulation). Additional discussion on the types of activities that warrant an eligibility determination can be found in Unit IV.E.5.

1. Determining Eligibility

Regarding the process of an exemption eligibility determination under 40 CFR 174.90, this provision states at 40 CFR 174.90(a) that, depending on the applicable exemption, developers have two, non-mutually exclusive options to notify EPA that their PIP meets the exemption criteria: (1) Seek EPA confirmation that a PIP meets the exemption criteria, and (2) Submit a self-determination letter that a PIP meets the exemption criteria. For PIPs subject to the eligibility determination process, an EPA confirmation is mandatory unless the PIP is listed at 40 CFR 174.90(a)(2) as eligible for the self-determination option. For PIPs eligible for the self-determination option, an EPA confirmation can be sought instead of, in conjunction with, or subsequent to the submission of the self-determination letter.

As stated in Unit III.C., only ''loss-of-function PIPs'' under 40 CFR 174.27 are currently eligible for the self-determination option and no ''PIPs created through genetic engineering from a sexually compatible plant'' under 40 CFR 174.26 are currently listed under 40 CFR 174.90(a)(2). Therefore all ''PIPs created through genetic engineering from a sexually compatible plant'' are required to undergo an EPA confirmation process. However, EPA intends to reconsider this in future rulemakings, and as such, EPA has codified text at 40 CFR 174.90(a)(2)(ii) to accommodate this possibility.

The provision explains at 40 CFR 174.90(b) that submissions for a request for EPA confirmation or a letter of self-determination must be made electronically, which means that they may not be made by mailing the information in physical form to the Agency (*e.g.,* sending hard copies or data storage devices such as DVD). Specifically, electronic submissions are required to be made through EPA's electronic submission portal which receives legally acceptable data in a secure manner (see Unit IV.E.6. for additional discussion). That system is used, amongst other things, for submission of pesticide registration applications, and will now additionally accommodate the eligibility determination processes associated with the PIPs identified in this rule. The electronic submission process will accommodate submissions when the final rule is effective, specifically, 60 days after the date of publication in the **Federal Register**. This electronic submission process differs from the proposal, which included instructions on how to submit a self-determination or confirmation request via physical mail. Guidance for electronic submission can be found in Pesticide Registration Notice 2011–3 (Ref. 7) or any subsequent revision or replacement. The provision at 40 CFR 174.90(c) also explains the procedures that must be followed to claim information submitted as confidential.

For PIPs that are eligible for both the self-determination and EPA confirmation options, the provision at 40 CFR 174.90(d) further explains the relationship between the EPA confirmation processes and a letter of self-determination. Specifically, if a developer chooses to request EPA confirmation in accordance with 40 CFR 174.93 in conjunction with or subsequent to submitting a self-determination letter in accordance with 40 CFR 174.91, the exemption is effective from the time the company receives confirmation of submission of the self-determination letter. The exemption remains effective if EPA affirms the developer's determination that the PIP meets the exemption criteria and the self-determination is superseded by EPA's written confirmation in response to the confirmation request. Alternatively, in instances in which no prior self-determination has been provided to the Agency in accordance with 40 CFR 174.91, and the developer submits a request for confirmation to the Agency, the exemption applies only once EPA provides written notice to the developer confirming that the PIP meets the criteria for exemption.

The provision also includes text at 40 CFR 174.90(e) stating that EPA reserves the right to assess or revisit at any time after EPA issues a confirmation of eligibility or the letter of self-determination is submitted, whether a PIP meets, or has met, the criteria for exemption. If EPA finds or has reason to believe that, at any time before or during this review of eligibility for exemption, the product is non-compliant with FIFRA or presents an adverse risk to human health, the environment, or program integrity, the Agency can take immediate steps—including enforcement—to address that non-compliance or to protect against those adverse risks. This is revised from the proposed text to make explicitly clear

that although EPA will generally notify the submitter in writing of EPA's intention to initiate a review of eligibility for exemption, EPA may take such action without first informing the submitter of an eligibility review if the situation warrants.

As exempt PIPs are still subject to 40 CFR 174.71, upon learning of any adverse effects (*i.e.,* that a person or nontarget organism allegedly suffered an adverse effect due to exposure to a PIP), EPA has the authority to evaluate whether the PIP still meets the criteria for exemption. As described in the preamble of the July 19, 2001, **Federal Register** notice implementing 40 CFR 174.71 (66 FR 37772; July 19, 2001; FRL–6057–7) (Ref. 8), reports involving food or feed (*i.e.,* those subject to enforcement under FFDCA) would be made to EPA, but EPA will share such reports with FDA. EPA and FDA will individually determine whether any action, including the possibility of enforcement, is necessary to protect the public health or the environment, and if so, what constitutes appropriate action based on their respective statutes (EPA–FIFRA; FDA–FFDCA). Additional discussion regarding EPA enforcement can be found in Unit III.D.7. of the Response to Comments document found in the docket associated with this rulemaking.

The provision outlines instances at 40 CFR 174.90(f) in which an exemption determination for a PIP can be extended to other PIPs. A determination that a PIP meets the exemption criteria would be required for each modified gene and plant species combination (*e.g.,* PIP ''A'' in corn and PIP ''A'' in tomato would each require their own determination). However, EPA is aware that a plant species can comprise multiple varieties and does not intend for the PIP in each variety to require its own submission. In order to extend the exemption for a PIP, the developer would need to comply with the provisions outlined in 40 CFR 174.21(d) for the first modification in that plant species and that exemption can then be extended in one of two ways. If the exempted PIP is moved through conventional breeding, the exemption is extended to the subsequent PIP. To extend the exemption of the PIP to subsequent genetic engineering events, the PIP must meet exemption-specific criteria outlined by EPA. The paragraph in this text was edited from the proposed rule to explicitly state that movement of exempt PIPs through conventional breeding also results in the extension of exemption status of that PIP and to clarify that the subparagraphs 40 CFR 174.90(f)(1) and 40 CFR 174.90(f)(2) are specific to genetic engineering.

For a ''PIP created through genetic engineering from a sexually compatible plant,'' the exemption extends to subsequent engineering of that PIP by the submitter into other varieties of that same plant species as long as the subsequent PIP produces the identical substance as in the exempt PIP and no new modifications were made to the regulatory regions. For example, if a developer first modifies an existing gene in a tomato variety to create a native allele, this would require a determination; however, if the developer subsequently creates the same native allele in another tomato variety, the developer would not be required to submit a second determination request for the additional variety. For a ''loss-of-function PIP,'' an exemption extends to subsequent engineering of that PIP by the submitter into other varieties of that same plant species as long as the submitter is targeting the same native gene to create the ''loss-of-function PIP.'' This text is modified from the proposal based on a comment arguing that the criteria should focus on the trait phenotype and function (Unit IV.E.2.). As described in Unit IV.D.2., ''loss-of-function PIPs'' now have their own exemption category with a focus on function rather than substance identity, and as such, the extension of the exemption for ''loss-of-function PIPs'' is now described in 40 CFR 174.90(f)(2) with a similar focus.

Finally, EPA has added a new paragraph (g) to 40 CFR 174.90, which explains that a duplicative eligibility submission is not required for purposes of 40 CFR 174.541(c), if it is already being submitted for purposes of 40 CFR 174.21(d). This provision was not in the proposal, but was added for clarification based on public comment (Unit IV.E.5.). Related to these comments, EPA is confirming that the Agency is requiring a separate eligibility determination to be made through EPA's electronic submission portal for residues of those PIPs under 40 CFR 174.541 that are imported into the United States and that are used for food or feed if the developer has not already obtained an exemption under 40 CFR 174.541. This submission includes an acknowledgement that the developer is only submitting an exemption eligibility determination for the purposes of FFDCA but not FIFRA, and therefore it is not permissible for the PIP to be sold or distributed for pesticidal use (*e.g.,* PIP-containing seed or plant sold for planting) in the United States. As discussed in the preamble of the proposed rule, a separate submission of the eligibility determination of the FFDCA exemption for a PIP proposed for use in food or feed is required only if it has not already been submitted under FIFRA.

2. Process for a ''Letter of Self-Determination'' for a PIP To Qualify for an Exemption

This rule finalizes a new provision in subpart E, 40 CFR 174.91, entitled ''Submitting a letter of self-determination'' The provision describes the requirements and process of notifying EPA that the developer has determined (or ''self-determined'') that a PIP qualifies for exemption.

The provision at 40 CFR 174.91 explains that a developer must submit the letter of self-determination prior to engaging in activities that would be subject to FIFRA for the proposed PIP (*e.g.,* distribution and sale of the PIP at issue). As specified in 40 CFR 174.90(b), self-determination letters must be submitted electronically. If a developer does not have an EPA company number, they will be required to obtain one in order to be able to submit a self-determination letter. Self-determination letters will not be submitted under FIFRA section 33 and will not be subject to application fees under the Pesticide Registration Improvement Extension Act of 2022 (PRIA 5). The exemption does not apply until EPA confirms receipt of the self-determination, but since the submission of the self-determination letter will be made electronically, the receipt confirmation by the Agency occurs automatically upon submission and is considered equivalent to written confirmation of receipt.

The provision at 40 CFR 174.91(b) includes information on the required contents of the self-determination letter. This includes a statement certifying the developer's determination of exemption eligibility, the identity of the recipient plant, a unique gene identifier for the native gene, the trait type (*e.g.,* insect resistance), and information on the applicable exemption. The gene identifier is for the native gene (not necessarily the exact sequence of the PIP) and must be from databases curated by the National Center for Biotechnology Information (NCBI), which is part of the National Library of Medicine of the National Institutes of Health (NLM) at the National Institutes of Health (NIH). These databases are available free of charge to scientists globally and will ensure availability of the gene information to EPA and a means to standardize that information. Based on public comment (Unit IV.E.3.), this provision was clarified to explicitly request the identity of the recipient plant, an identifier for the native gene,

and the trait type, rather than the name of the PIP, which may or may not have included such information. Additionally, rather than listing PIP categories eligible for self-determination under 40 CFR 174.91(b)(2) as had been proposed, the provision now cites to the list under 40 CFR 174.90(a)(2). Lastly, EPA streamlined the regulatory text by merging 40 CFR 174.91(b)(4) with 40 CFR 174.91(b)(3) and removing the text of the certification statement from the provisions. The statement is captured in the electronic submission portal and thus listing it in the regulatory text was deemed redundant.

EPA notes that the developer is responsible at all times for ensuring the self-determination is accurate and if at any time EPA determines that a self-determination was fraudulently or incorrectly made, or is no longer accurate due to the availability of new information that was not available at the time the self-determination was made, EPA will notify FDA of this new information, and the Agencies can take action to protect the environment and public health, respectively. This includes the possibility of enforcement under FIFRA or FFDCA.

3. Process To Obtain an EPA Confirmation That a PIP Qualifies for Exemption

This rule establishes a new provision in subpart E entitled ''Requesting EPA confirmation'' (40 CFR 174.93), which describes the process through which a developer may seek confirmation from EPA as to whether a PIP meets the criteria for exemption codified in 40 CFR 174.21. A developer must submit information as outlined in 40 CFR 174.91 along with specific supporting documentation. For example, the information required to support the request for a ''PIP created through genetic engineering from a sexually compatible plant'' is described in 40 CFR 174.95 and discussed in Unit III.C.4.a.

In addition, the provision at 40 CFR 174.93 explains that upon receipt of the request, EPA will review the submission and determine whether the PIP meets all necessary criteria to be exempt under 40 CFR 174.21. The Agency will notify the submitter in writing of its determination. The exemption goes into effect only once the developer receives EPA's confirmation in writing, unless a self-determination letter was previously submitted. As discussed in Unit III.C.1., EPA reserves the right to reassess whether a PIP meets the criteria for exemption should the Agency learn of relevant information subsequent to confirming its eligibility to be exempt under 40 CFR 174.21.

Requests for EPA confirmation are to be submitted using the submission category (M009) and associated fee structure for a Non-FIFRA Regulated Determination under FIFRA section 33 (PRIA). The logistics of the submission for a request and EPA review times may change in the future if PRIA changes or a different structure for submissions is adopted.

4. Documentation for an Exemption

a. PIPs Created Through Genetic Engineering From Sexually Compatible Plants

The rule finalizes the documentation needed for an exemption for ''PIPs created through genetic engineering from a sexually compatible plant.'' There are four main information elements associated with the required documentation, which capture the: (1) Biology of the plant; (2) Description of how the trait was engineered into the plant; (3) Molecular characterization of the PIP; and (4) Information on the history of safe use for those PIPs that are either known mammalian toxins or toxicants or that are from a source plant that is a wild relative of the recipient plant. Collectively, this information allows EPA to ensure that a PIP meets the exemption criteria at 40 CFR 174.26 and 40 CFR 174.541.

The first element (40 CFR 174.95(a)) requires information on the biology of the plant and has two components: (1) The identity of the recipient plant, including genus and species; and, if the PIP was derived from another plant species, the identity of the source plant, including genus and species; and (2) Information to support that the recipient plant and the source plant are sexually compatible. The regulatory text regarding sexual compatibility was minorly revised from proposed ''if the plant-incorporated protectant was derived from another plant species'' to ''if the plant-incorporated protectant was derived from a plant species other than the recipient plant species'' to more directly articulate that this information is only needed if the source and recipient plant are taxonomically classified as belonging to different plant species. As stated in the preamble of the proposed rule (Unit VI.C.4.), to meet this requirement a developer may provide a peer-reviewed literature rationale (*e.g.,* breeding guides, journal articles) instead of generating empirical data to demonstrate that the two plant species are sexually compatible. Therefore, for clarity based on public comment (Unit IV.E.4.a.), the regulatory text regarding sexual compatibility was further modified to replace ''demonstrate'' with ''information to support.''

The second element (40 CFR 174.95(b)) captures information on the pesticidal trait and how it was engineered into the plant. EPA anticipates that this element can be addressed through a narrative description of the intended pesticidal function of the PIP and information on the techniques used to make the genetic modification in the recipient plant (*e.g.,* the molecular tools used, transformation method). The text was revised from the proposal to also require information on the steps that were taken to ensure that no engineering components (*i.e.,* PIP inert ingredients) are expected to remain in the final plant product. Engineering components include, but are not limited to, those associated with the genetic engineering of the plant itself (*e.g.,* Cas protein) and selectable markers that, in the early steps of PIP development, aid in the selection of plant transformants that contain the desired traits (*e.g.,* herbicide resistant markers). Unless the engineering components themselves meet the requirements at 40 CFR 174.705, they would not be exempt inert ingredients. Thus, by requiring this information, EPA will be able to ensure that no unapproved inert ingredients are expected to remain in the final plant product. Similarly, based on public comment (Unit IV.A.2.), EPA has also included a requirement that the developer describe the measures taken to maximize the likelihood that the modification to the recipient plant is limited to the intended modification, including ensuring off-target mutations were minimized (*e.g.,* through the use of *in silico* techniques in guide RNA development). This could be information on the specificity of the endonuclease in the recipient plant species and the use of predictive *in silico* tools that can identify other potential target sites. As discussed in the preamble of the proposed rule (Unit V.A.), by using the definition of a ''gene'' the Agency restricts any genetic modifications made through biotechnology that would fall under the exemption to modifications to the gene itself. Thus, by requiring this information, EPA can determine that this is true.

The third element (40 CFR 174.95(c)) requires information on the molecular identity of the PIP. Specifically, EPA is requiring the sequence of the PIP in the recipient plant and its comparator. This was revised per public comment to clarify the required sequence information, which is based on the

relevant comparator and the type of pesticidal substance (Unit IV.E.4.a.). For example, for native gene insertions the comparator is the sequence of the PIP in the source plant, whereas for native genes that are modified to match corresponding polymorphic site(s), the relevant comparators are the sequence of the PIP in the source plant, the modified recipient plant, and the original native gene in the unmodified recipient plant. What determines the type of sequence information that must be provided is the molecular composition of the pesticidal substance. Nucleic acid sequences must be provided for both native gene insertions and for genes modified to match a corresponding polymorphic site. In addition, if the pesticidal substance is proteinaceous, an amino acid sequence must also be provided. In addition to basic sequence information, if a native allele has been modified according to 40 CFR 174.26(a)(2), then documentation is also required that identifies the modified polymorphic sites within the relevant sequences.

To provide more clarity in response to several comments that were received on the proposal (Unit IV.E.4.b.), EPA has removed the requirement to provide information on the expression profile for those PIPs where the regulatory region has been modified. In the final rule, EPA was able to remove the requirement to provide information on the expression profile because the Agency now includes at 40 CFR 174.26(a) specific criteria related to allowable modifications that could impact expression, thereby restricting expression to what is found in the sexually compatible plant population.

The fourth element (40 CFR 174.95(d)) captures the requirement from proposed 40 CFR 174.95(b) for pesticidal substances that are known allergens or mammalian toxins/toxicants. For these substances, a description of how conventional breeding practices are being used to ensure they do not exceed human dietary safety levels in the recipient food plant must be provided. EPA revised this from the proposed text to specify ''human dietary safety levels'' rather than ''safe levels'' for clarity. EPA also added a clarifying parenthetical, ''ensure residues of pesticidal substance are not present in food at levels that are injurious or deleterious and are within the ranges of levels generally seen in plant varieties currently on the market and/or known to produce food safe for consumption,'' to further define what is meant by ''human dietary safety levels.'' EPA is aware that the conventional breeding process is generally comprised of three stages: trait mapping, trait introgression, and field testing (Ref. 9). Through genetic engineering, the second stage, trait introgression, can occur more quickly and more precisely (*i.e.,* insert only the trait of interest without linkage drag of undesirable traits). However, trait mapping (requires knowledge of plant genetics and biology, likely includes an understanding of any naturally occuring plant toxins) and field testing (evaluates traits related to agronomic parameters, consumer preferences, allergens/toxins/nutrition) are expected to still occur under their normal timeframes. The second component of this section is specific to those PIPs that are from a source plant that is a wild relative, *i.e.,* a non-domesticated relative. 40 CFR 174.95(d)(2) is new and was added as a result of comments that the Agency received on the proposed rule (Unit IV.E.4.a.). For PIPs from wild relatives, a rationale as to why they do not pose a hazard to humans or the environment must be submitted. Several examples of the type of information that can be used to address this requirement are provided in the regulatory text itself.

Information described under elements one through four will inform whether the PIP meets criteria (a) and (b) of the FIFRA exemption and criteria (a) and (b) of the FFDCA exemption for the requirement of a tolerance for residues of PIPs.

b. Loss-of-Function PIPs

This rule also finalizes the documentation needed for an exemption for ''loss-of-function PIPs.'' As discussed in Unit III.B., ''loss-of-function PIPs'' have now been removed as a subcategory from 40 CFR 174.26 and an exemption specific to ''loss-of-function PIPs'' has been created at 40 CFR 174.27. Consequently, establishment of documentation requirements for this PIP category were necessary (40 CFR 174.96). As the ''loss-of-function PIPs'' exemption is focused on phenotype rather than specific underlying nucleic acid sequences, the documentation associated with the exemption is similarly focused on the trait. To this end, the identity of the modified plant (*i.e.,* genus and species) and a description of the pesticidal trait is required (40 CFR 174.96(a)). Along with the description of the pesticidal trait, a description of how the trait was engineered is also required (40 CFR 174.96(b)). This includes a description of the steps that were taken to ensure that no engineering components (*e.g.,* Cas proteins) are expected to remain in the plant and measures taken to maximize the likelihood that the modification to the recipient plant is limited to the intended modification, including ensuring off-target mutations were minimized (*e.g.,* through the use of *in silico* techniques in guide RNA development). This information allows the EPA to ensure the criteria for exemption are met (*e.g.,* no non-exempt inert ingredients remain in the final plant).

D. Recordkeeping Requirements for PIPs Exempt by This Rulemaking

At 40 CFR 174.73, subpart D, EPA is codifying a requirement under FIFRA section 3(a) that any person who is required to submit documentation for the eligibility determination of a PIP under 40 CFR 174.21(d), must maintain documentation of either the request for EPA confirmation or the letter of self-determination (or both, if applicable) along with all supporting documentation for the specific exemption as specified in subpart E. These documents must be maintained for five years starting with the effective date of the exemption. This text is minorly revised from the proposed text for clarity.

E. Clarification of General Qualifications for Exemption

This rule finalizes edits to the ''General Qualifications for Exemptions'' provisions at 40 CFR 174.21 to clarify the applicability of this framework to other PIP exemptions. For paragraph (a), this revision simply clarifies that this paragraph is specific to the active ingredient of the PIP, rather than the PIP as a whole. This is because the definition of a PIP under 40 CFR 174.3 also includes ''any inert ingredient,'' and inert ingredients are not exempt under subpart B but rather subpart X. In the proposed rule, EPA used the phrase ''pesticidal substance'' in its proposed revisions to 40 CFR 174.21(a), while in the final rule, the Agency uses the phrase ''active ingredient.'' The active ingredient definition at 40 CFR 174.3 includes both the genetic material and any pesticidal substance produced (*e.g.,* a protein). Exemption criteria related to both the genetic material and the pesticidal substance are specified in exemptions under subpart B. As such, the titles for the exemptions in subpart B are similarly codified to specify ''active ingredient.''

Paragraph (b) is revised to refer to subpart W, rather than the specific sections and is also revised to specify that the tolerance exemptions apply to the residues of the active ingredient, rather than the PIP as a whole for the same rationale as outlined for the edit

to 40 CFR 174.21(a). It should be noted that although paragraph (b) specifies active ingredient, there are separate tolerance exemptions specific to both the residues of the pesticidal substance (*e.g.,* 40 CFR 174.541) and the genetic material (*i.e.,* 40 CFR 174.507) under subpart W.

Paragraph (c) is revised to refer to subpart X, rather than the specific section of 40 CFR 174.705.

EPA is also finalizing a new paragraph (d) in section 40 CFR 174.21 to accommodate the exemption eligibility determination process (Unit III.C.) and the recordkeeping requirements (Unit III.D.). This paragraph specifies that for PIPs listed in the subsequent subparagraphs, the exemption is contingent upon compliance with recordkeeping requirements and the eligibility determination process. The addition of paragraph (d) does not impact the exemption under section 40 CFR 174.25 for PIPs from sexually compatible plants through conventional breeding as this exemption is not identified in paragraph (d). EPA made two revisions to 40 CFR 174.21(d) since proposal of the rule. First, the Agency added a clarification that 40 CFR 174.73 is implemented ''per sections 8 and 9 of FIFRA (U.S.C. 136f and 136g).'' Those sections of FIFRA specify EPA's inspection authority and impose recordkeeping requirements and they still apply to the PIPs exempted under this rule. Secondly, ''[Reserved]'' was moved to 40 CFR 174.21(d)(3) and replaced in its proposed position at 40 CFR 174.21(d)(2) with ''Loss-of-function plant-incorporated protectants,'' to accommodate the newly created exemption for these types of PIPs at 40 CFR 174.27.

F. Clarification of the Exemption for Sexually Compatible PIPs

The rule finalizes clarifications of the relationship between the newly exempted ''PIPs created through genetic engineering from a sexually compatible plant'' and ''loss-of-function PIPs'' with the previous FIFRA and FFDCA exemptions related to conventionally bred plants (*i.e.,* 40 CFR 174.25 and 40 CFR 174.508). EPA inserted ''created through conventional breeding'' at the end of each section title, and inserted an additional criterion into 40 CFR 174.25 and 40 CFR 174.508, stating that the genetic material is transferred only through conventional breeding. The exemptions at 40 CFR 174.25 and 40 CFR 174.508 have always meant ''only through conventional breeding,'' but this clarification is necessary given the amended definition for ''sexually compatible.''

G. Inert Ingredient Exemption Includes Genetic Engineering

While EPA revised 40 CFR 174.25 and 40 CFR 174.508 to include a criterion specifying that the genetic material is transferred from the source plant to the recipient plant only through conventional breeding, a parallel revision was not proposed or finalized at 40 CFR 174.705.

The amended definition for ''sexually compatible'' states that ''plants must be *capable of forming* a viable zygote through the union of two gametes through conventional breeding'' (emphasis added), which differs from the definition promulgated in 2001 that specified that ''a viable zygote *is formed only* through the union of two gametes through conventional breeding'' (emphasis added). The amendment of the ''sexually compatible'' definition therefore removes the criterion that the gamete formation may only occur through conventional breeding, which would otherwise preclude the use of genetic engineering to create PIPs that are exempt even if those PIPs are moved between sexually compatible plants. Because EPA is not adding an additional conventional breeding criterion to 40 CFR 174.705, like it is for 40 CFR 174.25 and 40 CFR 174.508, the inert ingredient exemption at 40 CFR 174.705 is no longer bound by conventional breeding and therefore allows for the exemption of inert ingredients that are initiated through biotechnology, so long as they still meet the existing criteria of that section.

IV. Discussion of Public Comments and the Agency's Responses

EPA received a total of 8,120 comments on the proposed rule. Of those, 28 were unique and one of those unique comments was supported by 8,093 co-signers. Comments were received from private citizens, industry, academia, professional and trade associations, State regulatory associations, and public interest groups. Of the 28 unique comments, twenty-three were generally supportive of an exemption for PIPs created through biotechnology, while three comments, one of which included the mass mailer, were opposed. An additional two respondents commented on specific aspects of the rule while remaining silent as to their overall position on its promulgation.

In this unit, EPA provides a summary of the major issues raised by commenters and EPA's responses, as well as summaries of public comments that prompted changes to the proposed requirements for the final rule. All public comments and EPA's responses, including those that do not raise significant issues or substantially change the proposed requirements, are included in Response to Comments document (Ref. 1).

A. Definitions and Titles

1. Relationship Between ''Conventional Breeding'' and the Terms ''Native'' and ''Never Derived''

In the proposed rule, EPA sought comment on whether the intent behind the use of the terms ''native'' and ''never derived'' is clear or whether alternative phrasing should be used instead. Most of the commenters that responded to this request stated that EPA's intent was clear but had suggestions on edits to the definitions of ''native gene'' and ''native allele.'' A concern raised by several of the commenters was that alleles that emerged from the use of common conventional breeding techniques, such as induced mutagenesis, may be unintentionally excluded from the definition of ''native allele.'' Thus, some commenters suggested explicitly including the use of induced mutagenesis, embryo rescue, and other conventional breeding techniques in the 40 CFR 174.3 definitions for ''native allele,'' ''native gene,'' ''sexually compatible,'' or ''conventional breeding.'' Another commenter provided an alternative and suggested to focus on the exclusion of transgenes from the native gene definition more explicitly. EPA agreed with the suggestion to focus on the exclusion of transgenes and revised the definition accordingly (Unit III.A.1.). As stated in the proposal, the Agency does not mean to imply that using the term ''native'' would exclude genes originated through conventional breeding techniques like mutagenesis. Native genes comprising the gene pool of sexually compatible plant populations have been developed through the processes of mutation, selection, and genetic exchange. Mutations in any part of a gene can occur naturally or may be induced including through chemical mutagenesis used by plant breeders to create new varieties. Alleles found in sexually compatible plants that may have been created through conventional breeding would be included in the definition of ''native allele'' and ''native gene.'' Additionally, as the requirement does not specify an allele frequency that must be met to qualify as a native allele, identifying one individual with a particular allele is sufficient to claim an allele as a ''native allele.'' EPA also notes that there is no time component of the requirement, and so use of a

native allele identified in a plant from the 1950s, for example, is permissible so long as that plant species is a species known to be sexually compatible with the recipient plant.

Regarding requests to explicitly list conventional breeding techniques like mutagenesis in one of the definitions, EPA does not find this to be necessary, and listing specific conventional breeding techniques may only serve to further cause confusion. EPA finds that the techniques listed in the conventional breeding definition (*e.g.,* bridging crosses and wide crosses) focus on the merging of genetic material from different organisms. Therefore, specific conventional breeding techniques, such as induced mutagenesis, are not explicitly included in the ''conventional breeding'' definition because they are not relevant techniques to the merging of genetic material between organisms.

2. Definition of ''Genetic Engineering''

Two commenters requested that the term ''biotechnology'' be defined. As the regulations have a definition for ''conventional breeding'' under 40 CFR 174.3, which forms the basis for the exemption under 40 CFR 174.25, EPA agrees that it would be prudent to similarly provide a definition to inform the exemption under 40 CFR 174.26. Given that USDA's recent revisions to 7 CFR 340 use the phrase ''genetic engineering,'' EPA chose to define ''genetic engineering'' rather than ''biotechnology,'' to provide consistency across the Coordinated Framework (Ref. 3). EPA thusly updated the term used in the exemption title to be ''genetic engineering.'' EPA used ''genetic engineering'' and ''biotechnology'' synonymously in its proposed rule as evidenced by Unit VI.A.3.g. titled ''Are there any considerations associated with newer biotechnology techniques?,'' where EPA discussed genetic engineering techniques like clustered regularly interspaced short palindromic repeats (CRISPR), zinc-finger nucleases, transcription activator-like effector nucleases, and oligonucleotide-directed mutagenesis.

EPA also received comments requesting the Agency limit the definition of ''genetic engineering'' and therefore the exemptions at 40 CFR 174.26 and 40 CFR 174.27 to high precision techniques such as CRISPR. The Agency has chosen to adopt a broader definition of ''genetic engineering,'' which is more consistent with the dictionary definition of the term. Although the exemptions at 40 CFR 174.26 and 40 CFR 174.27 are not restricted to specific genetic engineering techniques, the exemption criteria in the provisions themselves inherently limit the types of techniques which are likely to be used. For example, it is unlikely for a developer to be able to make the modifications described in 40 CFR 174.26(a)(2)(i) or 40 CFR 174.26(a)(2)(ii) using techniques other than high precision technologies.

Commenters also pointed out that such high precision techniques can be used to limit potential off-target effects from genetic engineering. EPA agrees with the commenters that existing gene editing technologies can be used in a manner to limit off-target effects (*e.g.,* through the use of *in silico* analyses in guide RNA development), and EPA notes that it is expected that the majority of developers already use these types of techniques (Ref. 10). Rather than explicitly limiting the exemption to specific gene modifying techniques, such as CRISPR, the Agency has added an item in the documentation required for developers in 40 CFR 174.95 to describe the measures taken to maximize the likelihood that the modification to the recipient plant is limited to the intended modification (Unit III.C.4.a.). As noted, it is anticipated that developers are already utilizing basic measures to reduce off-target effects, and as such, EPA does not anticipate that this requirement for a description would be unduly burdensome.

3. Title of the Exemption, Name of Exempted PIPs

EPA received comments related to various aspects of the name EPA chose for PIPs proposed for exemption under 40 CFR 174.26. One commenter requested that EPA move the clause ''created through biotechnology'' to directly follow ''PIP.'' The concern was that the original phrasing of ''PIPs based on sexually compatible plants created through biotechnology'' may suggest that the plant has been modified to be sexually compatible, rather than the intended requirement that the resulting PIP be based on a PIP from a sexually compatible plant. EPA agreed with this comment and reordered the clauses as suggested for clarity.

B. Clarification on Allowable Modifications

1. Noncoding, Nonexpressed

EPA received several comments requesting clarification as to whether the presence of ''noncoding, nonexpressed nucleotide sequences'' would affect the exemption status of a PIP at 40 CFR 174.26(a). Commenters argued that because noncoding, nonexpressed sequences are currently excluded from the definition of ''genetic material necessary for the production'' at 40 CFR 174.3, their presence in the recipient plant should not affect the exemption status of a PIP that otherwise meets the exemption criteria.

''Noncoding, nonexpressed nucleotide sequences'' are defined at 40 CFR 174.3, in part as ''nucleotide sequences that are not transcribed and are not involved in gene expression.'' One such example are the left and right border sequences that flank the genetic material that is inserted into the plant genome when using *Agrobacterium*-mediated transformation. These sequences facilitate the integration of the genetic cargo into the plant genome and will remain in the recipient plant together with the genetic material that the developer wishes to express to create the pesticidal trait. Other examples of ''noncoding, nonexpressed nucleotide sequences'' are linker sequences and restriction enzyme recognition sites.

As discussed in the preamble of the proposed rule, ''EPA expects that any ingredients intentionally added during the development of ''PIPs created through genetic engineering from a sexually compatible plant'' that are specific to the production of the active ingredient (*e.g.,* guide RNA, DNA nuclease) and that could function as an inert ingredient would either be transiently transformed or would be removed (*e.g.,* through segregation of the trait) during the breeding process and that if these ingredients have not been removed from the final product the product would not meet the criteria proposed under the new 40 CFR 174.26 and would not qualify for the new exemptions.'' Like the inert ingredients cited in this quote, noncoding, nonexpressed sequences are intentionally added during the development of the PIP to facilitate the integration of the genetic cargo. Thus, EPA finds that if these sequences are not removed from the final product, *i.e.,* the recipient plant, they similarly do not meet the criteria for exemption under 40 CFR 174.26 and 40 CFR 174.27. In this way, the PIPs exempted under this rulemaking remain indistinguishable from those created through conventional breeding.

2. Editing or Insertion of Multiple PIPs in a Single Event

EPA received requests to clarify whether modifications to multiple genes within a single recipient plant would qualify for the exemptions at 40 CFR 174.26. The exemptions at 40 CFR 174.26 and 40 CFR 174.27 do not limit the number of PIPs that can be created in a single recipient plant. Therefore,

changes to multiple genes in a single recipient plant are allowed, so long as each resulting PIP individually meets the exemption criteria. In these instances, the M009 PRIA fee for an EPA determination applies to each individual PIP, meaning that if one plant contains multiple unique PIPs, the M009 PRIA fee would apply multiple times (*e.g.,* the M009 PRIA fee is applied three times for the creation of three unique PIPs in a single recipient plant). The exception is a scenario in which the same gene is modified or inserted multiple times across the genome. For example, it may be necessary to modify several homologous genes of a native gene in a recipient plant to create a single PIP (*i.e.,* to create a loss-of-function PIP where the trait requires all homologous genes to be modified). Conversely, a developer may wish to insert multiple copies of the same native gene. In the instance of modifying/inserting the same gene multiple times across the genome, the M009 fee is only applied once, as the application contains only one PIP.

C. PIPs Created Through Genetic Engineering From a Sexually Compatible Plant

1. Identical Substance Criterion

EPA received several comments on the ''identical substance'' criteria stating, amongst other things, that modifications that result in non-identical substances may not result in a change in risk profile and that the requirement for the production of an identical substance is not consistent with the requirements for PIPs from sexually compatible plants that are moved through conventional breeding. In response, EPA has edited the exemption category related to modifications in an existing native gene at 40 CFR 174.26(a)(2) to incorporate the use of polymorphic regions (Unit III.A.2.).

The exemption category at 40 CFR 174.26(a)(2) does not require the production of an identical substance, while still staying within the scope of what could be achieved through conventional breeding and thus within the scope of the proposed rulemaking. The exemption criterion at 40 CFR 174.26(a)(2) now allows for modifications of the existing native gene using a single source plant as a template to match corresponding polymorphic sequence(s) in a native allele of that gene. Polymorphisms are variants of a gene sequence that are shared between native alleles. These genetic variations may be composed of single nucleotides (*i.e.,* SNPs) or larger DNA segments and they are found at the same locus within the genetic sequence of two or more native alleles (Ref. 11). In some cases, enhanced pesticidal properties of a gene product can be attributed to one or more of these genetic variations within a native gene. 40 CFR 174.26(a)(2) allows developers to utilize their knowledge of specific polymorphisms in native alleles to make changes to the native gene in their recipient plant. While this category does not require the entire substance to be identical to a substance found in the sexually compatible population of the recipient plant, it does require the individual polymorphism(s) to have been identified. It is also important to note that this category requires the use of a *single* source plant as a template, meaning it is not allowed to combine polymorphisms from multiple native alleles in a single PIP. By requiring the polymorphic sequences to be identical and the use of a single source plant as a template, this separate exemption category allows the Agency to capture more of the possible genetic variation that can occur in plants, while staying within the bounds of what could have been achieved through conventional breeding.

2. Expression Profile Criterion

EPA proposed at 40 CFR 174.26(b) a criterion that was intended to ensure that the expression profile of exempted PIPs falls within that which is found in the sexually compatible population. Limiting expression profiles of exempted PIPs in this way is a key limitation to prevent novel environmental and dietary exposures. However, commenters expressed concern over the feasibility to generate the information required to demonstrate eligibility for exemption and had several questions on how these requirements could be met (Unit IV.E.4.b.). Additionally, the Agency received requests to clarify whether the criteria that the pesticidal substance may not be expressed at higher levels, in different tissues, or at different developmental stages, would apply simultaneously or independently. Commenters also requested clarification on the identity of the appropriate comparator for the expression profile criteria at 40 CFR 174.26(b). These comments prompted the Agency to reevaluate the text proposed at 40 CFR 174.26(b).

Given the number of comments received surrounding the expression criteria, and that limiting expression profiles of exempted PIPs is a key limitation to prevent novel environmental and dietary exposures, EPA is not codifying proposed 40 CFR 174.26(b) and is instead finalizing specific criteria at codified 40 CFR 174.26(a) related to the types of permissible modifications that may impact expression. EPA now requires that regulatory regions inserted as part of a native gene per codified 40 CFR 174.26(a)(1), be identical to those found in the native gene in the source plant. The exemption category at 40 CFR 174.26(a)(2) specifies that modifications to an existing native gene, which includes regulatory and coding regions, must match corresponding polymorphic sequence(s) in a native allele. By requiring that inserted regulatory regions match those found in the native gene in the source plant and that modified regulatory regions match polymorphic sequences found in a native allele, EPA can ensure that the expression profile of PIPs exempted under 40 CFR 174.26 will stay within the bounds of what could be obtained through conventional breeding. Furthermore, this criterion coupled with the information on the history of safe use (40 CFR 174.95(d)) allows EPA to ensure that the expression profile of PIPs exempt from the requirement of a tolerance under 40 CFR 174.541 meet the requirement that expression be at levels that are not injurious or deleterious to human health.

D. Loss-of-Function PIPs

1. How are Loss-of-Function Traits Regulated Under FIFRA?

EPA received a number of comments questioning whether loss-of-function traits conferring pesticidal effects are considered pesticides under FIFRA. As stated in the preamble of the proposed rule (Ref. 2), EPA considers the modification of existing native genes in a plant that elicit a loss-of-function trait conferring a pesticidal effect, *i.e.,* ''loss-of-function PIPs,'' to be a pesticide. In the case of ''loss-of-function PIPs,'' the genetic material of the plant has been altered to reduce or eliminate the activity of a gene that would otherwise facilitate the susceptibility of that plant to a pathogen; therefore, the reduction or elimination of that activity has a mitigating or pesticidal effect.

FIFRA defines a ''pesticide,'' in relevant part, as ''any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest.'' FIFRA section 2(u), 7 U.S.C. 136(u). For ''loss-of-function PIPs'' (now exempted under 40 CFR 174.27), the modified genetic material, *e.g.,* the modified gene or the genetic material surrounding an excised gene, is the pesticidal substance, since that material operates in the plant to mitigate the pest. Further, the modified

genetic material has been modified with the intent to mitigate the pest. Therefore, any plant containing the loss of function trait sold or distributed with pesticidal claims would meet the statutory definition of a pesticide.

Under EPA's regulations, a substance is considered to be intended for a pesticidal purpose if, among other things, the person who distributes or sells the substance as a pesticide product claims, states, or implies that the substance can or should be used as a pesticide; the substance has no significant commercially valuable use other than use for pesticidal purpose; or a person sells or distributes a product with actual or constructive knowledge that the product will be used, or is intended to be used, for a pesticidal purpose. See 40 CFR 152.15. Therefore, products carrying a pesticidal claim, such as stating that the plant variety resists disease, indicate clear pesticidal intent. Further, even if such claims were not made, if the seller or distributor knew that the loss of function trait was contained in the plant, the substance would still be considered to be intended for a pesticidal purpose. Likewise, even for loss-of-function PIPs that result in the complete elimination of activity from the modified genetic material, the intentional modification of the plant's genetic material to result in a pesticidal effect indicates that the developer has actual or constructive knowledge that the substance will be used, or is intended to be used, for a pesticidal purpose and that there is not a significant commercially valuable use other than for a pesticidal purpose. The result is that ''loss-of-function PIPs'' are subject to regulation under FIFRA. This Final Rule exempts ''loss-of-function PIPs'' that meet the criteria under 40 CFR 174.27 from certain regulation under FIFRA. Without this exemption, sale and distribution of plants containing those modifications would require registration under FIFRA.

Furthermore, PIPs from sexually compatible plants have been exempt under 40 CFR 174.25 for over 20 years. Had a developer sought confirmation that their conventionally bred, disease-resistant plant was exempt, EPA would have exempted such a product under 40 CFR 174.25 on the basis that it is a PIP trait that has been created via conventional breeding. (See *e.g.,* 66 FR 37772; July 19, 2001 (FRL–6057–7)). This determination would be made without making a distinction of mode of action (*e.g.,* gene loss-of-function or production of a protein). Disease-resistant traits are often caused by the loss-of-function of a gene, and the 2001 preamble focused on the presence of a pesticidal trait (*i.e.,* disease resistance) and claims of resistance in its determinations that such a trait would be considered a pesticide and a PIP, indicating that EPA did not make a distinction as to whether the disease-resistant trait was conferred via a gene loss-of-function or via production of a proteinaceous substance. Therefore, it is consistent to consider loss-of-function traits to be both pesticides and PIPs.

2. Criteria for the Exemption Specific to ''Loss-of-Function PIPs''

EPA received several comments from industry, trade, and academia on the criterion of substance identity, requesting that the exemptions should be broadened to include non-identical pesticidal substances. By creating a separate exemption for ''loss-of-function PIPs'' with specific criteria and an accompanying definition, EPA finds that ''loss-of-function PIPs'' as described by 40 CFR 174.27 do not require the ''identical substance'' criterion, as do PIPs exempt under 40 CFR 174.26, due to fundamental differences in the pesticidal activity of ''loss-of-function PIPs'' compared to PIPs exempt under 40 CFR 174.26.

''Loss-of-function PIPs'' are characterized by a modification that leads to the reduction or elimination of the activity of that gene, which then results in a pesticidal trait (*e.g.,* the inactivation of a gene coding for a plant receptor confers disease resistance). Mutations that lead to a loss of gene function occur naturally and are prevalent within many organisms, including plants. For example, one study of 1,071 genomes of the model plant *Arabidopsis thaliana* showed a total of 60,819 loss-of-function variants within 12,907 genes, out of a genome-wide total of approximately 25,500 genes (Refs. 12, 13). In addition to their natural occurrence as a result of various biotic and abiotic factors, plant breeders have intentionally induced these types of mutations during the conventional breeding process. One example is the treatment of seeds by chemical mutagens, which is a technique used by breeders to create new plant varieties (Refs. 14, 15).

The traits that may result from the loss of function of a gene are diverse, ranging from altered grain size, increased drought tolerance, and resistance to plant diseases (Refs. 16–20). Disease resistance in plants from the loss of function of S-genes (susceptibility genes) have been identified in natural plant populations, and researchers have used knowledge about naturally occurring gene variants to create pest resistance in various plant species using genetic engineering (Refs. 18, 19). For example, genetically engineered deletions in parts of the regulatory region of the SWEET14 gene in rice created a plant line that is resistant to the *Xanthomonas oryzae* pv. oryzae (*Xoo*) pathogen, and genetically engineered loss-of-function of eIF4E achieved potyvirus resistance in cucumber (Refs. 21, 22).

As previously stated, EPA does not require an ''identical substance'' criterion for ''loss-of-function PIPs,'' and this is because mutations in any part of a gene have the potential to result in the loss of its function. Examples include deletions within the regulatory region that lead to the reduced expression (and thus reduced abundance) of an unmodified protein, or a single nucleotide change in the coding region, which can result in the creation of a premature stop codon, leading to the production of a shorter version of the protein originally encoded by that gene. Other changes to the coding region may also lead to mis-splicing of the pre-mRNA, which can subsequently result in the degradation of the pre-mRNA (no protein produced) or the production of a non-functional protein (Refs. 23, 24). If a non-functional protein is produced, a normal part of routine biological processes is for the cell to recognize it as such and target it for degradation into its amino acid constituents. This turnover of protein occurs independent of how the non-functional protein was created, be it the result from a permanent genetic change (either through natural or induced mutation) or errors created when cells transcribe and/or translate the genetic code (Refs. 25–28). The ability of the cell to recognize and break down non-functional proteins is a routine cell function, and it enables the organism to be economical with its resources by reusing the amino acids for those proteins that do serve a purpose.

Based on the prevalence of loss-of-function mutations in plants and the biological considerations of protein homeostasis, EPA finds that it does not need the same requirements on characteristics as it does for ''PIPs created through genetic engineering from a sexually compatible plant.'' Therefore, ''loss-of-function PIPs,'' as exempted under 40 CFR 174.27, are still supported by the risk assessment as presented in the proposed rule.

As the ''loss-of-function PIP'' exemption is focused on function, there is no nucleic acid sequence requirement in the exemption criteria under 40 CFR 174.27 or in the exemption documentation under 40 CFR 174.96. Commenters have stated a concern that

minor crops may face a disadvantage due to fewer genomic resources being available for their specific crop species. For example, one commenter stated that knowledge of genes in major crops or model organisms can inform the development of minor crops due to conserved gene function from a shared common ancestor, even when those plants are no longer sexually compatible. EPA believes that the codified exemption for ''loss-of-function PIPs'' with its focus on function will allow for use of this knowledge and provide a benefit for developers, including those of minor crops.

E. Eligibility Determination Process

1. Options To Determine Exemption Eligibility

In the proposal, all exempted ''PIPs created through genetic engineering from a sexually compatible plant'' had the option of self-determination. However, in the final rule, only developers of ''loss-of-function PIPs'' (40 CFR 174.27) have the option to self-determine whether the exemption criteria are met.

The Agency finds the approach to require an EPA confirmation for ''PIPs created through genetic engineering from sexually compatible plants'' justified. Commenters felt that a mandatory EPA confirmation process would prevent an incorrect exemption determination. EPA agrees with commenters arguing that doing so will provide additional clarity to developers of ''PIPs created through genetic engineering from sexually compatible plants'' and increase transparency and public trust in products containing these PIPs.

Other commenters were supportive of the flexibility that a mandatory self-determination process with a voluntary EPA confirmation process would provide. EPA acknowledges the value of this flexibility and has determined that developers of ''loss-of-function PIPs'' will have the option to either self-determine or request EPA confirmation of exemption eligibility. Given the straightforward nature of the criteria describing ''loss-of-function PIPs'' (*i.e.,* a focus on function rather than source plant or underlying sequence), EPA believes it appropriate for ''loss-of-function PIPs'' to be eligible for the self-determination option as it is unlikely for a developer to accidentally mis-determine these PIPs. Furthermore, the mode of action of ''loss-of-function PIPs'' (*i.e.,* reduction or elimination of an endogenous gene) is fundamentally different from ''PIPs created through genetic engineering from a sexually compatible plant'' (*e.g.,* intentional production of a pesticidal protein), and as such, further lends itself to the availability of a self-determination option.

2. Extension of Exemption Status

Commenters were largely supportive of the option to transfer the exemption status of a particular PIP to other plant varieties. Regarding this option, one commenter felt that the criterion in the proposal at 40 CFR 174.90(e)(1)(ii) that required that the same phenotype be created through non-homologous end joining repair modifications was too narrow. EPA agreed with this comment and, given the creation of a separate exemption for ''loss-of-function PIPs'' focused on function, was able to revise the exemption extension criteria for ''loss-of-function PIPs'' to be similarly focused on function (Unit III.C.1.).

3. Contents of a Self-Determination Letter

In the proposal, EPA proposed to require submitters of self-determination letters to identify the PIP (at proposed 40 CFR 174.91(b)(2) and 40 CFR 174.91(b)(3)). Two commenters stated that EPA should require additional information on the PIP with the submission of a self-determination letter. Specifically, it was requested that EPA require information on the plant species, a description of the pesticidal trait, and a short summary of how the pesticidal trait was introduced into the plant variety. It was also requested that EPA require developers to submit information that would be required for an EPA confirmation. EPA agrees that information on the recipient plant species and a unique gene identifier should be included in the self-determination letter and has updated the text at 40 CFR 174.91 to reflect this (Unit III.C.2.). Because the identity of the PIP may or may not include the name of the modified gene or plant species (*e.g.,* the identity of the PIP could also be a trade name), the Agency has clarified that a gene identifier and the identity of the recipient plant must also be included in the submission of a self-determination letter.

Regarding the other suggestions, such as a description of the pesticidal trait, a short summary of how the trait was introduced, and other information otherwise provided to the Agency as part of the EPA confirmation process, the Agency does not find this information necessary to be submitted with the self-determination letter. This is because the self-determination process does not involve an EPA review or confirmation. However, the information provided during an EPA confirmation is the same information required to be maintained by the recordkeeping requirements under 40 CFR 174.73, which equally applies to those submitting a self-determination of exemption. As part of the recordkeeping requirements, the information suggested by the commenters must already be made available to EPA upon request. Although the Agency is not requiring a summary description of the pesticidal trait and how it was introduced in the self-determination letter, the Agency agrees that identifying the trait type (*e.g.,* insect resistance or disease resistance) would provide useful information for the public and for State level agencies and edited 40 CFR 174.91(b)(2) to reflect this. Thus, the language at 40 CFR 174.91(b)(2) now requires information on plant species, gene identifier, and trait type.

4. Documentation for an Exemption for ''PIPs Created Through Genetic Engineering From a Sexually Compatible Plant''

a. Scope of the Required Documentation

EPA received comments on the scope of the documentation that is required to be produced to support an exemption for ''PIPs created through genetic engineering from a sexually compatible plant.'' One commenter requested that, in addition to discussing the categories of information needed to assess applicability of the exemption to a PIP, EPA furthermore establish expectations in the regulatory text on what information the Agency deems sufficient to satisfy each of the exemption criteria. In line with this, one commenter suggested to revise 40 CFR 174.95(a)(2) to replace ''information to demonstrate the recipient plant and the source plant are sexually compatible'' with ''information to support that the recipient plant and the source plant are sexually compatible.'' The Agency agrees with this suggestion as a developer may, for example, provide a peer-reviewed literature rationale instead of generating empirical data to demonstrate that two plants are sexually compatible. The Agency revised the regulatory text in the final rule accordingly (Unit III.C.4.a.).

The same commenter also suggested two revisions to 40 CFR 174.95(c)(1). First, the commenter suggested that the documentation requirements should limit sequence comparison to nucleic acids, rather than require both the nucleic acid and the amino acid sequence for proteinaceous PIPs and to limit the nucleic acid sequence comparison to the location of the

intended modification(s) rather than the entire PIP. Second, the commenter requested that if an amino acid sequence was required, EPA further clarify the language on the sequence requirements to state ''nucleotide sequence and deduced amino acid sequence.'' EPA has revised the text at 40 CFR 174.95(c)(1) for increased clarity as to the required sequence information based on the relevant comparator, *i.e.,* the specific comparator at 40 CFR 174.95(c) is now listed based on the corresponding exemption category at 40 CFR 174.26. The Agency maintains that the entire nucleic acid sequence must be provided for all PIPs exempted under 174.26(a), as both exemptions at 40 CFR 174.26(a) allow for modifications in the regulatory regions. Thus, providing EPA with the nucleic acid sequence of the entire gene will allow the determination if the modifications meet the exemption requirements (Unit III.C.4.a.). The Agency maintains that the full-length amino acid sequence must additionally be provided for proteinaceous PIPs but agrees with the commenter that the deduced amino acid sequence would be sufficient to inform the identity of that PIP in these instances.

Commenters requested that EPA exclude wild relatives as potential source plants and/or impose geographic restrictions on source plants, noting that non-target organisms living within the range of the wild donor plants would have adapted to exposures from these wild plants and that non-target organisms from outside this range may therefore be negatively impacted by a PIP from the wild plant due to lack of previous exposure. Additionally, it was noted that allowing sexually compatible wild relatives as source plants may result in toxins from these plants being missed as part of the plant breeder screening.

EPA understands that wild relatives provide an important source of genetic variation for developers and therefore has chosen not to exclude them from use as sexually compatible source plants for exempt PIPs. However, to address the concern raised by the commenters, EPA has added a requirement at 40 CFR 174.95(d)(2) that if the source plant is a wild relative of the recipient plant, the developer must describe why the PIP is not anticipated to pose a hazard to humans or the environment. EPA provides a list in the regulatory text at 40 CFR 174.95(d)(2) of the types of information that can be used to describe why a PIP is not anticipated to pose a hazard to humans or the environment.

b. Feasibility To Meet the PIP Expression Criteria and Develop Adequate Documentation

EPA received several comments on the proposed rule regarding the PIP expression criteria at 40 CFR 174.26(b) and the associated documentation requirements at 40 CFR 174.95(c)(2). Several commenters raised concerns that meeting the documentation requirements would be impractical and cost prohibitive given the large variation in plant gene expression between tissues and growth stages, especially when considering gene expression in different environmental conditions. One commenter submitted that data to meet the expression limitation exemption criteria should only be required if the intent of the modification is to increase levels of the expressed pesticidal substance. This approach is consistent with the Agency's analysis of gene expression articulated in the proposal. Specifically, EPA found that although variations in the production of plant substances will occur in response to environmental conditions, there are physiological and practical considerations that limit the expression level, and thus the abundance of a particular substance in plants that are sexually compatible. EPA finds that this is especially true for regulatory regions and polymorphic sequences that are present in regulatory regions that are moved between native alleles. In other words, there is the expectation that the expression pattern of a PIP would be within that what is found within the sexually compatible population, so long as it is under the control of the regulatory elements found within a native allele.

Consistent with this assessment and taking into consideration the comments received on the impracticality and potential financial burden of determining the expression levels to comply with proposed 40 CFR 174.95(c)(2), the Agency removed the exemption criterion at proposed 40 CFR 174.26(a)(2)(i) that would have allowed modifications to regulatory regions for the purpose of altering the expression level of a pesticidal substance. Instead, EPA is now requiring at 40 CFR 174.26(a)(1) that any regulatory region that is inserted as part of a native gene must be identical in nucleotide sequence to the regulatory region of the native gene as it is identified in the source plant. Similarly, 40 CFR 174.26(a)(2) allows regulatory region changes only based on polymorphic sequence(s) identified in a native allele of the modified gene. In making these revisions to 40 CFR 174.26, EPA is able to remove the requirements for expression profile confirmation at proposed 40 CFR 174.95(c)(2), as the expectation is that the expression profiles of PIPs that meet these exemption criteria at 40 CFR 174.26(a) will not be outside of that what is found within the sexually compatible population of the recipient plant.

5. Activities That Require Submission of an Eligibility Determination

Two commenters requested clarification on which activities may require a separate notification of self-determination for a PIP under 40 CFR 174.541. Specifically, commenters requested clarification in those instances in which a plant containing the PIP is imported to the United States for the distribution in commerce for consumption or planting in the absence of a tolerance or tolerance exemption granted under FFDCA.

EPA is confirming that the Agency is requiring a separate eligibility determination under 40 CFR 174.541 for residues of those PIPs that are imported into the United States and that are used for food or feed if the developer has not already obtained an exemption under 40 CFR 174.21. As discussed in the preamble of the proposed rule, a separate submission of the eligibility determination of the FFDCA exemption for a PIP proposed for use in food or feed is required only if it has not already been submitted under FIFRA. To clarify, EPA has added a new paragraph (g) to 40 CFR 174.90, which explains that a duplicative eligibility submission is not required for purposes of 40 CFR 174.541(c), if it is already being submitted for purposes of 40 CFR 174.21(d). The proposal discussed one such scenario where this might be the case (*e.g.,* Unit VI.C.1. of the proposed rule). Briefly, a developer will need an exemption eligibility determination for the purposes of FFDCA but not FIFRA when residues of a PIP will be in or on food imported into the United States, but the PIP is not intended to be sold or distributed for pesticidal use (*e.g.,* PIP containing seed or plant sold for planting) in the United States. In that case, the PIP residues in the imported food would need a tolerance or tolerance exemption to allow for distribution in interstate commerce in the United States under the FFDCA, but would not need a FIFRA exemption since it is not intended to be sold or distributed for pesticidal purposes in the United States.

Other commenters inquired whether testing of PIPs at or under 10 acres of land would require an Experimental Use Permit (EUP) under FIFRA section 5 and

therefore whether an eligibility determination for certain PIPs would be required at these acreages. 40 CFR 172.3 applies to PIPs. As described in 40 CFR 172.3, tests on 10 acres or less are presumed to not require an EUP so long as any food or feed crops involved in, or affected by, such tests (including, but not limited to, crops subsequently grown on such land which may reasonably be expected to contain residues of the tested pesticides) are destroyed or consumed only by experimental animals unless an appropriate tolerance or exemption from a tolerance has been established under FFDCA for residues of the pesticide. Further, pursuant to 40 CFR 172.3(e), EPA may, on a case-by-case basis, require that testing be carried out under an EUP even if such testing involves 10 acres or less. For a PIP subject to this rulemaking that would be used in testing taking place on 10 acres or less to be able to take advantage of the presumption in 40 CFR 172.3, that PIP would need to either demonstrate that the appropriate tolerance or exemption has been established or follow the requirements of crop destruction. Pursuant to subpart E of 40 CFR 174 as codified in this rule, for PIPs exempted under 40 CFR 174.26, demonstrating that the tolerance exemption at section 40 CFR 174.541 applied would require an EPA confirmation, and for PIPs exempted under 40 CFR 174.27, it would require the submission of a self-determination. For a PIP for which a tolerance exemption has not been established, in addition to requirements of crop destruction for field testing at or under 10 acres, EPA previously published and still relies on guidance (Ref. 29) detailing containment measures to restrict the flow of genetic material, including seeds, from field tests to minimize the potential for PIP residues that do not have a tolerance exemption to enter the food supply. These additional considerations are crucial to prevent PIPs lacking a tolerance exemption from entering the food supply and the consequences of adulteration under FFDCA. EPA notes that it is expecting to provide an update to the information and/or process provided in PRN 2007–2 (Ref. 29) regarding measures needed for containing small-scale testing of PIPs in light of changes in regulatory oversight due to USDA's recently revised 7 CFR part 340 regulations.

6. Submitting Confidential Business Information (CBI)

Several commenters noted that information included in a request for EPA confirmation may be classified as CBI and requested assurance and clarification for how EPA would protect intellectual property and other proprietary information. As EPA is using its existing electronic reporting site for receiving submissions, this information will be transmitted to EPA in a secure manner. As stated in 40 CFR 174.90(c), any claims of confidentiality for information submitted in the request for EPA confirmation must be made in accordance with the procedures outlined in 40 CFR 174.9 of subpart A. 40 CFR 174.9 instructs a submitter on how to claim data or other information as CBI. Information likely to be claimed as CBI may be part of the documentation for an exemption (*e.g.,* sequence information on the pesticidal substance). Developers also have the option to claim information submitted as part of the self-determination as CBI (*e.g.,* gene ID, plant species). However, it is important to note that every individual piece of information claimed as CBI must be supported by its own substantiation. For this reason, and for reasons of public transparency, as it has for all PIPs, EPA continues to encourage PIP developers to limit their claims to CBI to only the most pertinent pieces of information.

F. Endangered Species Assessment

EPA received public comment regarding whether the proposed exemption may affect endangered species. EPA determined that this action invokes obligations under the Endangered Species Act because this is a discretionary action that exempts certain pesticidal substances from some requirements under FIFRA, such that the exemptions could cause potential exposures in the environment. Therefore, EPA conducted an Endangered Species Assessment for ''PIPs created through genetic engineering from a sexually compatible plant'' and for ''loss-of-function PIPs.''

In the proposed rule, after careful consideration of potential interactions that the PIPs proposed for exemption may have with nontarget organisms (see Unit VI.A.3. of the proposed rule), EPA preliminarily determined that use of the PIPs proposed for exemption is not likely to cause unreasonable adverse effects on the environment and humans in the absence of regulatory oversight (although ''regulatory oversight'' still exists in the form of the adverse effects reporting requirement in existing 40 CFR 174.71) resulting in a reasonable expectation that no discernible effects to nontarget organisms will occur. As no discernible effects to nontarget organisms are reasonably expected to occur due to the use of these PIPs, which necessarily includes any threatened or endangered species (listed species), EPA therefore reaches a ''No Effect'' determination for listed species and their critical habitats.

Herein, EPA provides brief summaries of key considerations used in the Agency's determination that the PIP exemptions proposed in the 2020 preamble and finalized in this rule are reasonably expected to result in no discernable effects to nontarget organisms, including listed species. In the proposed rule, EPA considered several factors in determining whether PIPs that meet the criteria under proposed 40 CFR 174.26 could be exempted from FIFRA requirements in order to meet the 40 CFR 174.21(a) requirement (Unit VI.A.3.h. of the proposed rule). In its assessment, the Agency relied on the large body of knowledge that currently exists on sexually compatible plants and genetic diversity. Briefly, with regard to the potential ecological effects, the Agency found that there is: ''(1) Low potential for novel exposures; (2) Low potential for levels of ''PIPs created through genetic engineering from a sexually compatible plant'' to exceed levels found in sexually compatible plants; and (3) Low potential for ''PIPs created through genetic engineering from a sexually compatible plant'' to move from cultivated plants to wild or weedy relatives through gene flow and increase weediness.'' (Unit VI.A.3. of the proposed rule). EPA also evaluated considerations specific to newer biotechnology techniques related to the PIPs proposed for exemption and found that their use in creating these PIPs would pose negligible risk to the environment. Lastly, the Agency found that the likelihood is negligible that the transfer of a PIP via biotechnology from a nonagricultural (wild) relative to an agricultural one would pose a greater risk than if it were transferred through conventional breeding.

In summary, PIPs that are exempted under 40 CFR 174.26 represent a subset of substances already present in related plants and are equivalent both in identity and in expression profile (how much, where, and when the substances are expressed in plants). As ''loss-of-function PIPs'' exempted under 40 CFR 174.27 were originally proposed as a subcategory of PIPs exempted under 40 CFR 174.26, they too fall within the scope of the Agency's analysis in the proposed rule preamble. Pesticidal traits resulting from the loss-of-function of an endogenous gene are common occurrences in wild plants and in conventional breeding (Refs. 18, 19) and EPA finds that there is no potential for

novel exposures or hazards for ''loss-of-function PIPs,'' as this group of PIPs is characterized by a modification that leads to the reduction or elimination of the activity of a gene that had already been present in the recipient plant. As the PIPs exempted under this rule are considered to be equivalent to those already found in nature and used in conventional breeding, there is a reasonable expectation that no discernible effects to listed species will occur from their use. As no discernible effects are reasonably expected to occur to listed species due to the use of these PIPs, EPA therefore reaches a ''No Effect'' determination for listed species and their critical habitats.

VII. References

The following is a listing of the documents that are specifically referenced in this document. The docket includes these documents and other information considered by EPA, including documents that are referenced within the documents that are included in the docket, even if the referenced document is not physically located in the docket. VIII. FIFRA Review Requirements

Pursuant to FIFRA section 25(a), EPA submitted the draft final rule to the United States Department of Agriculture (USDA) for review, with a copy sent to the appropriate Congressional Committees as required under FIFRA section 25(a). The Agency did not receive any comments from USDA.

In accordance with FIFRA section 25(d), the EPA asked the FIFRA Scientific Advisory Panel (SAP) to waive review of the draft final rule, as was done for the draft proposed rule. The FIFRA SAP waived its scientific review of the draft final rule on October 12, 2022, because the rule does not raise scientific or science policy issues that warrant a scientific review by the SAP.

IX. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Orders 12866: Regulatory Planning and Review and 14094: Modernizing Regulatory Review

This action is a significant regulatory action that was submitted to the Office of Management and Budget (OMB) for review under Executive Order 12866 (58 FR 51735, October 4, 1993), as amended by Executive Order 14094 (88 FR 21879, April 11, 2023). Any changes made in response to OMB recommendations during that review have been documented in the docket. EPA prepared an analysis of the potential costs and benefits associated with this action (Ref. 4) which is summarized in more detail in Unit I.E., and included in the docket.

B. Paperwork Reduction Act (PRA)

The information collection activities in this rule have been submitted for approval to OMB under the PRA, 44 U.S.C. 3501 *et seq.* The Information Collection Request (ICR) document that EPA prepared is assigned EPA ICR No. 2619.02 (Ref. 30), and identified by OMB Control No. 2070–0214. You can find a copy of the ICR in the docket for this rule, and it is briefly summarized here. The information collection requirements are not enforceable until OMB approves them.

The information collection activities in this rule are associated with the exemption eligibility process (*i.e.,* self-determination, request for EPA confirmation, and associated recordkeeping) established in this rule as an alternative to the existing pesticide registration and tolerance activities that are currently approved by OMB under OMB Control No. 2070–0060 (EPA ICR No. 0277.23), OMB Control No. 2070–0142 (EPA ICR No. 1693.10), OMB Control No. 2070–0028 (EPA ICR No. 0143.13, and OMB Control No. 2070–0024 (EPA ICR No. 0597.13). Once this ICR is approved, EPA intends to amend the ICR approved by OMB under OMB Control No. 2070–0060 (EPA ICR No. 0277.23) to incorporate the information collection activities and burden attributable to this rule.

Respondents/affected entities: See Unit I.A.

Respondent's obligation to respond: Required to obtain the exemption (40 CFR part 174).

Frequency of response: On occasion.

Total estimated number of respondents: 10.

Total estimated number of responses: 10 (per year), which reflects an estimate of 1 response per respondent each year. The ICR accounts for the most conservative burden estimate, which the Agency projects will be up to 10 submissions per year.

Total estimated burden: 850 hours (per year), which reflects an approximate burden of 85 hours per submission. Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $125,800 (per year), includes $0 annualized capital or operation and maintenance costs.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9. When OMB approves this ICR, the Agency will announce that approval in the **Federal Register** and publish a technical amendment to 40 CFR part 9 to display the OMB control number for the approved information collection activities contained in this final rule.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA, 5 U.S.C. 601 *et seq.* In making this determination, EPA concludes that the impact of concern for this rule is any significant adverse economic impact on small entities and that the Agency is certifying that this rule will not have a significant economic impact on a substantial number of small entities because the rule relieves regulatory burden on the small entities subject to the rule. The rule is expected to reduce costs to developers of ''PIPs created through genetic engineering from a sexually compatible plant'' and ''loss-of-function PIPs,'' and the cost savings per product are approximately $472,000–$886,000. The cost savings per product will be realized when the developer submits a letter of self-determination or requests EPA confirmation, as applicable. The exemption for ''PIPs created through genetic engineering from a sexually compatible plant'' and ''loss-of-function PIPs'' reduces the costs associated with meeting regulatory requirements for these types of PIPs and therefore removes a potential barrier to market entry for small entities. Of the entities likely to develop PIPs that meet the exemptions outlined in this rulemaking, EPA currently estimates that approximately 80% are small entities.

I have therefore concluded that this action will relieve regulatory burden for all directly regulated small entities. The basis for this determination is presented in the small entity analysis prepared as part of the cost analysis for this rulemaking (Ref. 4), which is summarized in Unit I.E., and a copy is available in the docket.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of $100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action is not expected to impose an enforceable duty on any State, local or Tribal governments, and the requirements imposed on the private sector are not expected to result in annual expenditures of $100 million or more. Accordingly, EPA has determined that the requirements of sections 202, 203, or 205 do not apply to this action.

E. Executive Order 13132: Federalism

This action does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Thus, Executive Order 13132 does not apply to this action.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have Tribal implications as specified in Executive Order 13175 (65 FR 67249, November 9, 2000), because it will not have substantial direct effects on Tribal governments, on the relationship

between the Federal Government and the Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997) as applying to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not a ''significant energy action'' as defined in Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not likely to have a significant adverse effect on the supply, distribution or use of energy and has not otherwise been designated as a significant energy action by the Administrator of the Office of Information and Regulatory Affairs.

I. National Technology Transfer Advancement Act (NTTAA)

This action does not involve technical standards that would require Agency consideration under NTTAA section 12(d), 15 U.S.C. 272.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629, February 16, 1994) directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations (people of color and/or indigenous peoples) and low-income populations.

EPA believes that this type of action does not concern human health or environmental conditions and therefore cannot be evaluated with respect to potentially disproportionate and adverse effects on people of color, low-income populations and/or indigenous peoples. Although this action does not concern human health or environmental conditions, EPA considered potential environmental justice concerns during the development of the proposed rule, sought comments specifically on this point with regard to the proposed exemptions, and finds that this action will not result in disproportionately high and adverse human health, environmental, climate-related, or other cumulative impacts on disadvantaged communities.

K. Congressional Review Act (CRA)

This action is subject to the CRA, 5 U.S.C. 801 *et seq.,* and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

L. Executive Orders 13874: Modernizing the Regulatory Framework for Agricultural Biotechnology Products and 14801: Advancing Biotechnology and Biomanufacturing Innovation for a Sustainable, Safe, and Secure American Bioeconomy

This action is intended to further implement section 4(b) of Executive Order 13874 (84 FR 27899, June 11, 2019), and section 8 of Executive Order 14801 (87 FR 56849, September 12, 2022). This final rule may promote future innovation and competitiveness by efficiently exempting through regulation qualifying ''PIPs created through genetic engineering from a sexually compatible plant'' and ''loss-of-function PIPs'' that meet the FIFRA and FFDCA standards for exemption.

List of Subjects in 40 CFR Part 174

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Plant-incorporated protectants, Reporting and recordkeeping requirements.

Michael S. Regan,

Administrator.

Therefore, for the reasons stated in the preamble, 40 CFR part 174 is amended as follows:

PART 174—PROCEDURES AND REQUIREMENTS FOR PLANT-INCORPORATED PROTECTANTS

■ 1. The authority citation for part 174 continues to read as follows:

Authority: 7 U.S.C. 136–136y; 21 U.S.C. 321(q), 346a and 371.

■ 2. Amend § 174.3 by adding in alphabetical order definitions for ''Gene'', ''Genetic engineering'', ''Loss-of-function plant-incorporated protectant'', ''Native allele'', and ''Native gene'' and revising the definition of ''Sexually compatible'' to read as follows:

§ 174.3 Definitions.

* * * * *

Gene, and other grammatical variants such as ''genic,'' means a unit of heritable genetic material that is comprised of the genetic material necessary for the production of a substance.

Genetic engineering means the modification of the genome of an organism using recombinant, synthesized, or amplified nucleic acids or other techniques excluded from the definition of conventional breeding.

* * * * *

Loss-of-function plant-incorporated protectant means a plant-incorporated protectant in which the genetic material of a native gene is modified to result in a pesticidal effect through the reduction or elimination of the activity of that gene. For purposes of loss-of-function plant-incorporated protectants, the active ingredient and pesticidal substance are one and the same and are defined as the genetic material that has been modified to create the pesticidal trait (*i.e.,* modification of the sequence of nucleic acids). Loss-of-function plant-incorporated protectants do not include instances where the reduction or elimination of the activity of the modified native gene results in the intentional increase of activity of another pesticidal gene.

Native allele means a variant of a native gene that is identified in the genetic diversity of plants sexually compatible with the recipient plant.

Native gene means a gene that is identified in the recipient plant or source plants that are sexually compatible with the recipient plant. It does not include genes introduced through genetic engineering from a source organism that is not sexually compatible with the source plant.

* * * * *

Sexually compatible, when referring to plants, means plants must be capable of forming a viable zygote through the union of two gametes through conventional breeding.

* * * * *

■ 3. Revise § 174.21 to read as follows:

§ 174.21 General qualifications for exemptions.

A plant-incorporated protectant is exempt from the requirements of FIFRA, other than the requirements of § 174.71,

if it meets the exemption criteria in paragraphs (a) through (d) of this section. Plant-incorporated protectants that are not exempt from the requirements of FIFRA under this subpart are subject to all the requirements of FIFRA.

(a) The active ingredient of the plant-incorporated protectant meets the exemption criteria listed in at least one of the sections in §§ 174.25 through 174.50.

(b) When the plant-incorporated protectant is intended to be produced and used in a crop used as food, the residues of the active ingredient of the plant-incorporated protectant are either exempted from the requirement of a tolerance under FFDCA (21 U.S.C. 321 *et seq.*) as listed in subpart W of this part, or no tolerance would otherwise be required.

(c) Any inert ingredient that is part of the plant-incorporated protectant is listed as an approved inert ingredient in subpart X of this part.

(d) For plant-incorporated protectants listed in the subparagraphs below, the exemption applies only if the developer is compliant with the general recordkeeping requirements specified in § 174.73 per sections 8 and 9 of FIFRA, 7 U.S.C. 136f and 136g, and only after compliance with the relevant eligibility determination procedures specified in § 174.90:

(1) Plant-incorporated protectant created through genetic engineering from a sexually compatible plant.

(2) Loss-of-function plant-incorporated protectant.

■ 4. Amend § 174.25 by revising the section heading and the introductory text and adding paragraph (c) to read as follows:

§ 174.25 Active ingredient of a plant-incorporated protectant from a sexually compatible plant created through conventional breeding.

The active ingredient is exempt if all of the following conditions are met:

* * * * *

(c) The genetic material is transferred from the source plant to the recipient plant only through conventional breeding.

■ 5. Add § 174.26 to subpart B to read as follows:

§ 174.26 Active ingredient of a plant-incorporated protectant created through genetic engineering from a sexually compatible plant.

The active ingredient is exempt if the conditions in paragraphs (a) and (b) of this section are met.

(a) The active ingredient is characteristic of the population of plants sexually compatible with the recipient plant and is created through genetic engineering from either an insertion of a native gene into the recipient plant as specified in paragraph (a)(1) of this section or a modification of an existing native gene in the recipient plant as specified in paragraph (a)(2) of this section.

(1) *Insertion.* A native gene is inserted into the genome of the recipient plant and produces a pesticidal substance identical in sequence to the pesticidal substance identified in the source plant. The regulatory regions inserted as part of the native gene must be identical in nucleic acid sequence to those regulatory regions of the native gene identified in the source plant.

(2) *Modification.* The existing native gene is modified to match corresponding polymorphic sequence(s) in a native allele of that gene using a single source plant as a template.

(b) This exemption does not apply until the requirements in § 174.21(d) have been met.

■ 6. Add § 174.27 to subpart B to read as follows:

§ 174.27 Active ingredient of a loss-of-function plant-incorporated protectant.

The active ingredient is exempt if the following conditions are met:

(a) The genetic material of a native gene is modified using genetic engineering to result in a pesticidal effect through the reduction or elimination of the activity of that gene; and

(b) This exemption does not apply until the requirements in § 174.21(d) have been met.

■ 7. Add § 174.73 to subpart D to read as follows:

§ 174.73 General recordkeeping requirements for exemptions.

For 5 years, starting with the effective date of a plant-incorporated protectant exemption, any person who is required to submit documentation for the determination of eligibility for a plant-incorporated protectant listed under § 174.21(d) must do both of the following:

(a) Maintain documentation of either the request for EPA confirmation or the letter of self-determination (or both, if applicable) along with all supporting documentation for the specific exemption listed in subpart E of this part.

(b) Make the documentation outlined in paragraph (a) of this section available to EPA upon request.

■ 8. Add subpart E to read as follows:

Subpart E—Exemption Eligibility Determination Process and Requirements

Sec.

174.90 Determining eligibility.
174.91 Submitting a letter of self-determination.
174.93 Requesting EPA confirmation.
174.95 Documentation for an exemption for a plant-incorporated protectant created through genetic engineering from a sexually compatible plant.
174.96 Documentation for an exemption for a loss-of-function plant-incorporated protectant.

Subpart E—Exemption Eligibility Determination Process and Requirements

§ 174.90 Determining eligibility.

(a) *Options for determining eligibility.* As required in §§ 174.21(d) and 174.541(c), the developer must notify EPA to be eligible for exemption. Available notification options differ by plant-incorporated protectant. The developer must do at least one of the following:

(1) *EPA confirmation.* Unless permitted in paragraph (a)(2) of this section, a developer must submit a request for EPA confirmation of eligibility in accordance with § 174.93. Any developer may submit a request for EPA confirmation of eligibility in accordance with § 174.93.

(2) *Self-determination.* A developer may submit a letter of self-determination in accordance with § 174.91 if the plant-incorporated protectant qualifies for exemption as one of the following:

(i) A loss-of-function plant-incorporated protectant eligible for exemption under § 174.27.

(ii) [Reserved]

(b) *Where to submit a request for EPA confirmation or letter of self-determination.* A request for EPA confirmation of eligibility or a letter of self-determination must be submitted electronically.

(c) *Claims of confidentiality.* Any claims of confidentiality for information submitted in the request for EPA confirmation or a letter of self-determination must be made in accordance with the procedures outlined in § 174.9.

(d) *Overlapping determinations of eligibility.* If a plant-incorporated protectant is eligible for a self-determination option, a developer may elect to submit a letter of self-determination as well as a request for EPA confirmation of eligibility concurrently or at a later time. If the developer so elects, the letter of self-determination will remain in effect while EPA evaluates the request for confirmation of eligibility.

(e) *Revisiting eligibility determination.* If, at any time after EPA issues a confirmation of eligibility or the letter of self-determination is submitted, EPA becomes aware of information indicating that a plant-incorporated protectant no longer meets the criteria for exemption (*e.g.,* adverse effects reports submitted under § 174.71) or that the self-determination was incorrect, EPA will generally notify the submitter in writing of EPA's intention to initiate a review of eligibility for exemption and may request additional information from the submitter in order to evaluate that eligibility for exemption. Upon conclusion of its review, EPA will notify the submitter in writing of its determination as to whether the plant-incorporated protectant meets the exemption criteria and any actions that will be required should the plant-incorporated protectant be found to not meet the exemption criteria. Under those circumstances, the plant-incorporated protectant may be considered to be noncompliant with FIFRA and subject to possible enforcement by EPA. At any time, if EPA finds or has reason to believe that a plant-incorporated protectant's non-compliance with FIFRA requires immediate action, EPA may take such action, including enforcement, without first informing the submitter of an eligibility review.

(f) *Extension of exemption.* An exemption can be extended in one of two ways. First, if the exempted plant-incorporated protectant is moved through conventional breeding to other plants, the exemption is extended to the subsequent plant-incorporated protectant. Second, to extend the exemption of the plant-incorporated protectant to subsequent genetic engineering events in other plants, the following exemption-specific criteria apply:

(1) *Plant-incorporated protectant created through genetic engineering from a sexually compatible plant.* An exemption extends to a plant-incorporated protectant when that plant-incorporated protectant is genetically engineered by the submitter into another variety of that same plant species, the substance produced is identical to the substance produced in the original recipient plant, and no new modifications were made to the regulatory regions.

(2) *Loss of function plant-incorporated protectant.* An exemption extends to a plant-incorporated protectant when that plant-incorporated protectant is genetically engineered by the submitter into another variety of that same plant species and the same native gene is targeted to create the loss-of-function PIP.

(g) *No duplication necessary.* A developer is not required to submit duplicative requests for eligibility determination or self-determination under both §§ 174.541(c) and 174.21(d), if it has already been submitted for purposes of determining eligibility under § 174.21(d).

§ 174.91 Submitting a letter of self-determination.

To self-determine eligibility for the exemption of a plant-incorporated protectant listed under § 174.90(a)(2), a developer must comply with all of the following requirements.

(a) *When to submit a letter of self-determination.* A letter of self-determination for an exemption must be submitted to EPA prior to engaging in any activity that would be subject to FIFRA absent an exemption.

(b) *Contents of a letter of self-determination.* The letter of self-determination must:

(1) Provide the name and contact information for the submitter (including telephone number and email address), company name, or other affiliation.

(2) Identify the plant-incorporated protectant by providing: the identity of the recipient plant (genus and species), a unique identifier for the native gene from the National Center for Biotechnology Information (NCBI) at the National Library of Medicine of the National Institutes of Health (NLM) at the National Institutes of Health (NIH) (*i.e.,* Entrez GeneID), the trait type (*e.g.,* insect resistance), and cite the paragraph under § 174.90(a)(2) that indicates that the plant-incorporated protectant is eligible for self-determination.

(3) Complete and submit the certification statement provided in the electronic submission portal. The statement must be dated and signed by the certifying official identified in the certification statement.

(c) *EPA response.* EPA will provide electronic confirmation of receipt immediately. Electronic confirmation of receipt shall be equivalent to written confirmation of receipt.

(d) *Effective date of exemption.* The exemption does not apply until EPA confirms receipt of the letter of self-determination.

§ 174.93 Requesting EPA confirmation.

To request EPA confirmation of eligibility for exemption of a plant-incorporated protectant listed under § 174.21(d), a developer must comply with all of the following requirements.

(a) *When to submit a request for EPA confirmation.* Unless the developer has received confirmation of receipt of a letter of self-determination, the request for EPA confirmation must be submitted prior to engaging in any activity that would be subject to FIFRA absent an exemption.

(b) *Contents of a request for EPA confirmation of exemption eligibility.* The request must contain information as specified in § 174.91(b) and supporting documentation, as specified in exemption-specific sections of this subpart (*e.g.,* § 174.95).

(c) *EPA review and response.* Upon receipt of a request, EPA will review and evaluate the information provided to determine whether the plant-incorporated protectant meets the exemption criteria in § 174.21. EPA may require additional information to assess whether a plant-incorporated protectant meets the criteria for exemption. EPA will notify the submitter in writing of its determination. If EPA determines that the plant-incorporated protectant does not meet the criteria for exemption, EPA will notify the submitter in writing of any actions that will be required.

(d) *Effective date of exemption.* If the plant-incorporated protectant is not already exempt pursuant to the self-determination process under § 174.91, this exemption applies once EPA notifies the submitter in writing, confirming that the plant-incorporated protectant meets the criteria for exemption.

§ 174.95 Documentation for an exemption for a plant-incorporated protectant created through genetic engineering from a sexually compatible plant.

A developer requesting EPA confirmation of exemption eligibility for a plant-incorporated protectant created through genetic engineering from a sexually compatible plant pursuant to § 174.93 must submit the information in the following paragraphs to EPA. The following documentation must be maintained by a developer of a plant-incorporated protectant created through genetic engineering from a sexually compatible plant per § 174.73:

(a) *Biology of the plant.* (1) The identity of the recipient plant, including genus and species.

(2) If the plant-incorporated protectant was derived from a plant species other than the recipient plant species, provide the identity of the source plant including genus and species and information to support the determination that the recipient plant and the source plant are sexually compatible (*e.g.,* through peer-reviewed literature rationale).

(b) *Description of the pesticidal trait and how the trait was engineered into*

the plant. Include a description of the measures that were taken to ensure that no engineering components (*e.g.,* Cas proteins) are present in the final plant product and the measures taken to maximize the likelihood that the modification to the recipient plant is limited to the intended modification.

(c) *Molecular characterization of the plant-incorporated protectant.* A nucleic acid sequence comparison of the plant-incorporated protectant between the recipient plant and the comparator(s). A deduced amino acid sequence comparison is additionally required when the pesticidal substance is proteinaceous. The relevant comparator(s) for the sequence comparison(s) are determined by the type of modification:

(1) For § 174.26(a)(1), sequences in the source plant and in the recipient plant.

(2) For § 174.26(a)(2), sequences in the recipient plant before the modification, after the modification, and the sequence in the source plant. The polymorphic site(s) must be indicated.

(d) *Information on the history of safe use of the plant-incorporated protectant.* (1) If the pesticidal substance is a known allergen or mammalian toxin/toxicant (*e.g.,* solanine), describe how conventional breeding practices are being used to ensure that it does not exceed human dietary safety levels in the recipient food plant (*i.e.,* ensure residues of pesticidal substance are not present in food at levels that are injurious or deleterious and are within the ranges of levels generally seen in plant varieties currently on the market and/or known to produce food safe for consumption).

(2) If the source plant is a wild relative of the recipient plant, describe why the plant-incorporated protectant is not anticipated to pose a hazard to humans or the environment (*e.g.,* Are levels of the pesticidal substance produced in the recipient plant within the ranges of levels generally seen in plant varieties currently on the market and/or known to produce food safe for consumption? Is the pesticidal mode of action non-toxic? Does the plant-incorporated protectant lack sequence similarity to known mammalian toxins, toxicants, or allergens? Is the plant-incorporated protectant a commonly screened substance and therefore familiar to plant breeders?).

§ 174.96 Documentation for an exemption for a loss-of-function plant-incorporated protectant.

A developer requesting EPA confirmation of exemption eligibility for a loss-of-function plant-incorporated protectant pursuant to § 174.93 must submit the information in the following paragraphs to EPA along with the developer's request for exemption confirmation. The following documentation must be maintained by a developer of a loss-of-function plant-incorporated protectant per § 174.73:

(a) Biology of the plant: The identity of the recipient plant, including genus and species.

(b) Description of the pesticidal trait that results from the loss-of-function and how the trait was engineered into the plant. Include a description of the steps that were taken to ensure that no engineering components (*e.g.,* Cas proteins) remain in the plant and the measures taken to maximize the likelihood that the modification to the recipient plant is limited to the intended modification.

■ 9. Amend § 174.508 by:

■ a. Revising the section heading and introductory text;

■ b. Redesignating paragraph (c) as paragraph (d); and

■ c. Adding a new paragraph (c).

These revisions and addition read as follows:

§ 174.508 Pesticidal substance of a plant-incorporated protectant from a sexually compatible plant created through conventional breeding; exemption from the requirement of a tolerance.

Residues of a pesticidal substance are exempt from the requirement of a tolerance if all the following conditions are met:

* * * * *

(c) The genetic material is transferred from the source plant to the recipient plant only through conventional breeding.

* * * * *

■ 10. Add § 174.541 to read as follows:

§ 174.541 Pesticidal substance of a plant-incorporated protectant created through genetic engineering from a sexually compatible plant; exemption from the requirement of a tolerance.

Residues of a pesticidal substance are exempt from the requirements of a tolerance if the conditions in paragraphs (a) through (c) of this section are met.

(a) The pesticidal substance is characteristic of the population of plants sexually compatible with the recipient food plant and is created through genetic engineering from either an insertion of a native gene into the recipient food plant as specified in paragraph (a)(1) of this section or a modification of an existing native gene in the recipient food plant as specified in paragraph (a)(2) of this section.

(1) *Insertion.* A native gene is inserted into the genome of the recipient food plant and produces a pesticidal substance identical in sequence to the pesticidal substance identified in the source plant. The regulatory regions inserted as part of the native gene must be identical in nucleic acid sequence to those regulatory regions of the native gene identified in the source plant.

(2) *Modification.* The existing native gene is modified to match corresponding polymorphic sequence(s) in a native allele of that gene using a single source plant as a template.

(b) The residues of the pesticidal substance are not present in food from the plant at levels that are injurious or deleterious to human health.

(c) This exemption does not apply until the requirements in § 174.90 have been met.

Medicare Program; Contract Year 2024 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicare Cost Plan Program, and Programs of All-Inclusive Care for the Elderly; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule; correction.

SUMMARY: This document corrects technical errors that appeared in the final rule published in the **Federal Register** on April 12, 2023, entitled ''Contract Year 2024 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicare Cost Plan Program, and Programs of All-Inclusive Care for the Elderly.''

DATES: This correcting document is effective June 5, 2023.

FOR FURTHER INFORMATION CONTACT: Lucia Patrone, (410) 786–8621.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2023–07115 of April 12, 2023 (88 FR 22120), there were a

number of technical errors that are identified and corrected in this correcting document. The provisions in this correction document are effective as if they had been included in the document published April 12, 2023. Accordingly, the corrections are effective June 5, 2023.

II. Summary of Errors

A. Summary Errors in the Preamble

On page 22134, we inadvertently omitted § 422.514(d)(1) from the list of sections finalized.

On page 22135, we made errors in our discussion of the effective dates for the changes to the general enrollment period (GEP) made by the Consolidated Appropriations Act, 2021, and the Part D special enrollment period (SEP).

On page 22150, we made a typographical error in a regulatory reference.

On page 22226, we made a typographical error when specifying a term.

On page 22300, we made a technical error regarding an acronym.

B. Summary of Errors in the Regulations Text

On page 22336 in § 422.2267(a)(3), we made a typographical error.

On page 22341 in § 423.2264 we made a typographical error and technical errors in regulations text regarding election periods and third-party marketing.

On page 22344 in § 423.2536(c), we made a typographical error in a reference.

On page 22345 in § 460.70, we made a--typographical error in a paragraph designation; technical error in the use of an acronym; and technical error in the use of a term.

III. Waiver of Proposed Rulemaking and Delay in Effective Date

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment on the proposed rule in accordance with 5 U.S.C. 553(b) of the Administrative Procedure Act (APA). The notice of proposed rulemaking includes a reference to the legal authority under which the rule is proposed, and the terms and substances of the proposed rule or a description of the subjects and issues involved. This procedure can be waived, however, if an agency finds good cause that a notice-and-comment procedure is impracticable, unnecessary, or contrary to the public interest and incorporates a statement of the finding and its reasons in the rule issued.

We believe that this final rule correcting document does not constitute a rule that would be subject to the notice and comment or delayed effective date requirements. This document merely corrects typographical and technical errors in the final rule, but it does not make substantive changes to the policies or the implementing regulations that were adopted in the final rule. As a result, this final rule correcting document is intended to ensure that the information in the final rule accurately reflects the policies and regulatory amendments adopted in that document.

In addition, even if this were a rule to which the notice and comment procedures and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the minor corrections in this document into the final rule or delaying the effective date would be unnecessary, as we are not altering our policies or regulatory changes, but rather, we are simply implementing correctly the policies and regulatory changes that we previously proposed, requested comment on, and subsequently finalized. This final rule correcting document is intended solely to ensure that the final rule accurately reflects these policies and regulatory changes. Furthermore, such notice and comment procedures would be contrary to the public interest because it is in the public's interest to ensure that the final rule accurately reflects our policies and regulatory changes. Therefore, we believe we have good cause to waive the notice and comment and effective date requirements.

Correction of Errors

In FR Doc. 2023–07115 of April 12, 2023 (88 FR 22120), make the following corrections:

A. Corrections of Errors in the Preamble

1. On page 22134, third column, third full paragraph, line 7, the reference ''422.514(g)'' is corrected to read ''422.514(d)(1) and (g)''.

2. On page 22135, first column, second full paragraph, lines 4 and 5, the phrase ''provide that on'' is corrected to read, ''provide that for GEPs on''.

3. On 22150, first column, sixth full paragraph, lines 6 and 7, the reference ''§ 423.2508(d)(1) through (5)'' is corrected to read ''§ 423.2508(c)(1) through (5)''.

4. On page 22226, third column, third full paragraph, line 6, the phrase ''anon-English'' is corrected to read ''a non-English''.

5. On page 22300, third column, first full paragraph, line 28, the phrase ''and the SAA,'' is corrected to read ''and the State administering agency (SAA),''.

B. Correction of Errors in the Regulations Text

■ 1. On page 22336, second column, first partial paragraph (§ 422.2267(a)(3)), line 3, the phrase ''anon-English'' is corrected to read ''a non-English''.

■ 2. On page 22341—

■ a. First column, 17th paragraph (§ 423.2264(c)(3)(i)(A)), line 2, the phrase ''prior of'' is corrected to read ''prior to''.

■ b. Third column—

■ i. Fourth paragraph (§ 423.2267(e)(41) introductory text), line 25, the phrase ''The MA organization must'' is corrected to read ''The Part D sponsor must''.

■ ii. Fifth paragraph (§ 423.2267(e)(41)(i)), lines 3 and 4, the phrase ''one MA organization'' is corrected to read ''one Part D sponsor.''

■ 3. On page 22344, second column, 14th full paragraph (§ 423.2536(c) introductory text), line 6, the reference ''§ 423.2508(d)(1)'' is corrected to read ''§ 423.2508(c)(1)''.

■ 4. On page 22345, second column—

■ a. Third paragraph (§ 460.70(a)), the paragraph number ''(xviv)'' is corrected to read ''(xix)''.

■ b. Fourteenth paragraph (§ 460.70(a)(3)(ii)), line 2, the phrase ''the SAA'' is corrected to read ''the State administering agency''.

■ c. Fifteenth paragraph (§ 460.70(a)(4)), line 8, the phrase ''participant medical specialty.'' is corrected to read ''particular medical specialty''.

Elizabeth J. Gramling,

Executive Secretary to the Department, Department of Health and Human Services.

RIN 1004–AE96

Application Procedures, Execution and Filing of Forms: Correction of State Office and Public Room Addresses for Filings and Recordings, Including Proper Offices for Recording of Mining Claims; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rule.

SUMMARY: This final rule amends Bureau of Land Management (BLM) regulations pertaining to execution and filing of forms in order to reflect the new addresses for the BLM-Colorado State Office and its Public Room. All filings and other documents relating to public lands in Colorado must be filed at the BLM Colorado State Office Public Room, Denver Federal Center Building 1A, Lakewood, CO 80225.

DATES: This rule is effective on May 31, 2023.

ADDRESSES: You may send inquiries or suggestions to the Director for Communications, BLM-Colorado State Office, P.O. Box 151029, Lakewood, CO 80215.

FOR FURTHER INFORMATION CONTACT: Jennifer Bednar, telephone: 303–358–7726, email: *jbednar@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

I. Background
II. Procedural Matters

I. Background

This final rule reflects the administrative action of changing the street addresses of the Colorado State Office, including the Public Room, of the BLM. This rule changes the postal and street address for the personal filing of documents relating to public lands in Colorado but makes no other changes in filing requirements. The BLM has determined that the rule has no substantive impact on the public, imposes no costs, and merely updates a list of addresses included in the Code of Federal Regulations for the convenience of the public. The Department of the Interior, therefore, for good cause finds that under 5 U.S.C. 553(b)(B), notice and public comment procedures are unnecessary.

II. Procedural Matters

Regulatory Planning and Review (Executive Order 12866)

This final rule is an administrative action to change the address for one BLM State Office. This rule was not subject to review by the Office of Management and Budget under Executive Order 12866. The rule imposes no costs, and merely updates a list of addresses included in the Code of Federal Regulations for the convenience of the public.

National Environmental Policy Act

The BLM has found that the final rule is of a procedural nature and thus is categorically excluded from further documentation under the National Environmental Policy Act of 1969 in accordance with 43 CFR 46.210(i). In addition, the final rule does not present any of the 12 extraordinary circumstances listed at 43 CFR 46.215.

Regulatory Flexibility Act

Congress enacted the Regulatory Flexibility Act of 1980 (5 U.S.C. 601, *et seq.*) to ensure that Government regulations do not unnecessarily or disproportionately burden small entities. This final rule is a purely administrative regulatory action having no effects upon the public or the environment, and it has been determined that the rule will not have a significant effect on the economy or small entities.

Congressional Review Act

This final rule is a purely administrative regulatory action having no effects upon the public or the economy. This is not a major rule under the Congressional Review Act (5 U.S.C. 804(2)). The rule will not have an annual effect on the economy of $100 million or more. The rule will not cause a major increase in costs of prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. The rule will not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to complete with foreign-based enterprises.

Unfunded Mandate Reform Act

The BLM has determined that this final rule is not significant under the Unfunded Mandates Reform Act of 1995 because the rule will not result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year. Further, the administrative final rule will not significantly or uniquely affect small governments. It does not require action by any non-Federal government entity. Therefore, the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et. seq.*), is not required.

Executive Order 12630, Government Action and Interference With Constitutionally Protected Property Rights (Takings)

As required by Executive Order 12630, the Department of the Interior has determined that the rule will not cause a taking of private property. No private property rights will be affected by a rule that merely reports an address change for the Colorado State Office and its Public Room. The Department therefore certifies that this final rule does not represent a governmental action capable of interference with constitutionally protected property rights.

Executive Order 13132, Federalism

In accordance with Executive Order 13132, the BLM finds that the rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

The final rule does not have substantial direct effects on the States, on the relationship between the national governments and the States, or the distribution of power and the responsibilities among the various levels of government. This administrative final rule does not preempt State law.

Executive Order 12988, Civil Justice Reform

This final rule is a purely administrative regulatory action having no effects upon the public and will not unduly burden the judicial system. This final rule meets the requirements of Sections 3(a) and 3(b)(2) of the Executive Order.

Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

In accordance with the Executive Order 13175, the BLM finds that the rule does not include policies that have Tribal implications. This final rule is purely an administrative action having no effects upon the public or the environment, imposing no costs, and merely updates the Colorado State Office and its Public Room addresses included in the Code of Federal Regulations.

Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

In accordance with Executive Order 13211, the BLM has determined that the final rule will not have substantial direct effects on the energy supply, distribution, or use, including a shortfall

in supply or price increase. This final rule is a purely administrative action and has no implications under Executive Order 13211.

Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not contain any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 43 CFR Part 1820

Administrative practice and procedure, Archives and records, Public lands.

For the reasons discussed in the preamble, the Bureau of Land Management amends 43 CFR part 1820 as follows:

PART 1820—APPLICATION PROCEDURES

■ 1. The authority citation for part 1820 continues to read as follows:

Authority: 5 U.S.C. 552, 43 U.S.C. 2, 1201, 1733, and 1740.

Subpart 1821—General Information

■ 2. Amend § 1821.10 in paragraph (a) by revising the entry for ''Colorado State Office'' to read as follows:

§ 1821.10 Where are BLM offices located?

(a) * * *

State Offices and Areas of Jurisdiction

* * * * *

Colorado State Office, Denver Federal Center, Building 40, Lakewood, CO 80215; Public Room, Denver Federal Center, Building 1A, Lakewood, CO 80225; P.O. Box 151029, Lakewood, CO 80215.

BILLING CODE 4331–16–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 54

[WC Docket Nos. 17–287, 11–42, 09–197; FCC 17–155; FR ID 141908]

Bridging the Digital Divide for Low-Income Consumers, Lifeline and Link Up Reform and Modernization, Telecommunications Carriers Eligible for Universal Service Support

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) is issuing a final rule for the Lifeline program.

DATES: This rule is effective May 31, 2023. As of May 31, 2023, the amendments to 47 CFR 54.403(a)(3), 54.413, and 54.414(b), published January 16, 2018, at 83 FR 2075, are withdrawn,

FOR FURTHER INFORMATION CONTACT: Nicholas Page, *Nicholas.Page@fcc.gov,* Telecommunications Access Policy Division, Wireline Competition Bureau, (202) 418–7400 or TTY: (202) 418–0484.

SUPPLEMENTARY INFORMATION: The Federal Communications Commission (Commission) adopted amendments to 47 CFR 54.403(a)(3), 54.413, and 54.414(b) that were to become effective upon announcement in the **Federal Register** of OMB information collection approval (83 FR 2075, January 16, 2018) (FR Doc. 2018–00152). These amended rules were vacated by the Court of Appeals for the D.C. Circuit in *National Lifeline Association* v. *Federal Communications Commission.* 921 F.3d 1102. Accordingly, revisions to § 54.403(a)(3), third column on page 2084; § 54.413, first column on page 2085; and § 54.414(b), second column on page 2085 are being withdrawn and these rules are reverting back to their prior version.

List of Subjects in 47 CFR Part 54

Communications common carriers, Health facilities, Internet, Libraries, Reporting and recordkeeping requirements, Schools, and Telecommunications.

Federal Communications Commission.

Marlene Dortch,

Secretary.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 54 to read as follows:

PART 54—UNIVERSAL SERVICE

■ 1. The authority citation for part 54 continues to read as follows:

Authority: 47 U.S.C. 151, 154(i), 155, 201, 205, 214, 219, 220, 229, 254, 303(r), 403, 1004, 1302, 1601–1609, and 1752, unless otherwise noted.

■ 2. Amend § 54.403 by revising paragraph (a)(3) to read as follows:

§ 54.403 Lifeline support amount.

* * * * *

(a) * * *

(3) *Tribal lands support amount.* Additional Federal Lifeline support of up to $25 per month will be made available to an eligible telecommunications carrier providing Lifeline service to an eligible resident of Tribal lands, as defined in § 54.400(e), to the extent that the eligible telecommunications carrier certifies to the Administrator that it will pass through the full Tribal lands support amount to the qualifying eligible resident of Tribal lands and that it has received any non-Federal regulatory approvals necessary to implement the required rate reduction.

* * * * *

■ 3. Revise § 54.413 to read as follows:

§ 54.413 Link Up for Tribal lands.

(a) *Definition.* For purposes of this subpart, the term ''Tribal Link Up'' means an assistance program for eligible residents of Tribal lands seeking telecommunications service from a telecommunications carrier that is receiving high-cost support on Tribal lands, pursuant to subpart D of this part, that provides:

(1) A 100 percent reduction, up to $100, of the customary charge for commencing telecommunications service for a single telecommunications connection at a subscriber's principal place of residence imposed by an eligible telecommunications carrier that is also receiving high-cost support on Tribal lands, pursuant to subpart D of this part. For purposes of this subpart, a ''customary charge for commencing telecommunications service''' is the ordinary charge an eligible telecommunications carrier imposes and collects from all subscribers to initiate service with that eligible telecommunications carrier. A charge imposed only on qualifying low-income consumers to initiate service is not a customary charge for commencing telecommunications service. Activation charges routinely waived, reduced, or eliminated with the purchase of additional products, services, or minutes are not customary charges

eligible for universal service support; and

(2) A deferred schedule of payments of the customary charge for commencing telecommunications service for a single telecommunications connection at a subscriber's principal place of residence imposed by an eligible telecommunications carrier that is also receiving high-cost support on Tribal lands, pursuant to subpart D of this part, for which the eligible resident of Tribal lands does not pay interest. The interest charges not assessed to the eligible resident of Tribal lands shall be for a customary charge for connecting telecommunications service of up to $200 and such interest charges shall be deferred for a period not to exceed one year.

(b) An eligible resident of Tribal lands may receive the benefit of the Tribal Link Up program for a second or subsequent time only for otherwise qualifying commencement of telecommunications service at a principal place of residence with an address different from the address for which Tribal Link Up assistance was provided previously.

■ 4. Amend § 54.414 by revising paragraph (b) to read as follows:

§ 54.414 Reimbursement for Tribal Link Up.

* * * * *

(b) In order to receive universal support reimbursement for providing Tribal Link Up, eligible telecommunications carriers must follow the procedures set forth in § 54.410 to determine an eligible resident of Tribal lands' initial eligibility for Tribal Link Up. Eligible telecommunications carriers must obtain a certification form from each eligible resident of Tribal lands that complies with § 54.410 prior to enrolling him or her in Tribal Link Up.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 230523–0136]

RIN 0648–BM07

Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; 2023 Harvest Specifications for Pacific Whiting, and 2023 Pacific Whiting Tribal Allocation

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This rule implements the domestic 2023 harvest specifications for Pacific whiting including the 2023 tribal allocation for the Pacific whiting fishery, the non-tribal sector allocations, and a set-aside for incidental mortality in research activities and non-groundfish fisheries. NMFS issues this final rule for the 2023 Pacific whiting fishery under the authority of the Pacific Coast Groundfish Fishery Management Plan, the Magnuson-Stevens Fishery Conservation and Management Act, the Pacific Whiting Act of 2006, and other applicable laws. These measures are intended to help prevent overfishing, achieve optimum yield, ensure that management measures are based on the best scientific information available, and provide for the implementation of tribal treaty fishing rights.

DATES: Effective May 31, 2023.

ADDRESSES:

Electronic Access

This final rule is accessible via the internet at the Office of the Federal Register website at *https://www.federalregister.gov*. Background information and documents are available at the NMFS website at *https://www.fisheries.noaa.gov* and at the Pacific Fishery Management Council's (Council's) website at *http://www.pcouncil.org/*.

FOR FURTHER INFORMATION CONTACT: Colin Sayre, phone: 206–526–4656, and email: *Colin.Sayre@noaa.gov*.

SUPPLEMENTARY INFORMATION:

Background

The transboundary stock of Pacific whiting is managed through the Agreement Between the Government of the United States of America and the Government of Canada on Pacific Hake/Whiting of 2003 (Agreement). The Agreement establishes bilateral management bodies to implement the terms of the Agreement, including the Joint Management Committee (JMC), which recommends the annual catch level for Pacific whiting. NMFS issued a proposed rule on April 06, 2023 (88 FR 20457), that describes the Agreement, including the establishment of F–40 percent default harvest rate, the explicit allocation of Pacific whiting coastwide total allowable catch (TAC) to the United States (73.88 percent) and Canada (26.12 percent), the bilateral bodies to implement the terms of the Agreement, including the Joint Management Committee (JMC), and the process used to determine the coastwide TAC under the Agreement, including adjusting the TAC for carryovers from the prior year. The proposed rule also proposed allocating 17.5 percent of the U.S. TAC of Pacific whiting for 2023 to Pacific Coast Indian tribes that have a treaty right to harvest groundfish, and implementing a set-aside (750 metric tons (mt)) for Pacific whiting for research and incidental mortality in other fisheries.

2023 TAC Recommendation

The Treaty's Advisory Panel (AP) and JMC met in Vancouver, British Columbia, Canada February 28–March 1, 2023, to develop advice on a 2023 coastwide TAC. The AP provided its 2023 TAC recommendation to the JMC on March 1, 2023. The JMC reviewed the advice of the AP, as well the Treaty's Joint Technical Committee, and Science Review Group, and agreed on a TAC recommendation for transmittal to the United States and Canadian Governments.

The Agreement directs the JMC to base the catch limit recommendation on the default harvest rate unless scientific evidence demonstrates that a different rate is necessary to sustain the offshore Pacific whiting resource. After consideration of the 2023 stock assessment and other relevant scientific information, the JMC did not use the default harvest rate, and instead agreed on a more conservative approach. There were two primary reasons for choosing a TAC well below the level of F–40 percent. First, the JMC noted aging of the 2010, 2014, and 2016 year classes and wished to extend access to these stocks as long as possible, which a lower TAC would accomplish by lowering the rate of removal of these year-classes. Second, there is uncertainty regarding the current size of the apparent large 2020 year class because there has not yet been a post-recruitment observation of this cohort

by an acoustic survey. The JMC recommended a moderate increase in the TAC, rather than a large increase up to the full F–40 percent harvest rate until a more certain estimate of the year class's size is available after one more year of fishing data, and conclusion of the 2023 acoustic survey.

This conservative TAC setting process, endorsed by the AP, resulted in a TAC that is less than what it would be using the default harvest rate under the Agreement.

The JMC agreed on a recommended and adjusted coastwide TAC of 625,000 mt, of Pacific whiting, which resulted in a U.S. TAC of 461,750 mt (73.88 percent of 625,000 mt). This recommendation is consistent with the best available scientific information, provisions of the Agreement, and the Pacific Whiting Act of 2006 (Whiting Act). The recommendation was transmitted via letter to the United States and Canadian Governments on March 2, 2023. Consistent with the Agreement, the Department of Commerce consulted with the Department of State on the recommended TAC. In a written communication to the NMFS West Coast Region on March 17, 2023, the State Department concurred with the NMFS recommendation to accept the JMC recommended adjusted TAC for 2023. NMFS, under delegation of authority from the Secretary of Commerce, approved the adjusted TAC recommendation of 461,750 mt for U.S. fisheries on March 23, 2023.

This final rule announces the adjusted coastwide TAC of 625,000 mt and adjusted U.S. TAC of 461,750 mt, and implements the domestic 2023 Pacific whiting harvest specifications, including, the 2023 tribal allocation of 80,806 mt, the preliminary allocations for three non-tribal commercial whiting sectors, and a set-aside for incidental mortality in research activities and non-groundfish) fisheries (*e.g.,* pink shrimp fishery). The tribal and non-tribal allocations for Pacific whiting, as well as the set-aside, are effective until December 31, 2023.

Tribal Allocations

This final rule establishes the tribal allocation of Pacific whiting for 2023 as described in the proposed rule (88 FR 20457). Since 1996, NMFS has been allocating a portion of the U.S. TAC of Pacific whiting to the tribal fishery. Regulations for the Pacific Coast Groundfish Fishery Management Plan (FMP) specify that the tribal allocation is subtracted from the total U.S. Pacific whiting TAC. The tribal Pacific whiting fishery is managed separately from the non-tribal Pacific whiting fishery and is not governed by limited entry or open access regulations or allocations. NMFS is establishing the 2023 tribal allocation as 80,806 mt (17.5 percent of the U.S. TAC) in this final rule.

In 2009, NMFS, the states of Washington and Oregon, and the tribes with treaty rights to harvest Pacific whiting started a process to determine the long-term tribal allocation for Pacific whiting; however, no long-term allocation has been determined. While new scientific information or discussions with the relevant parties may impact that decision, the best available scientific information to date suggests that 80,806 mt is within the likely range of potential treaty right amounts. As with prior tribal Pacific whiting allocations, this final rule is not intended to establish precedent for future Pacific whiting seasons, or for the determination of the total amount of Pacific whiting to which the Tribes are entitled under their treaty right. The long-term tribal treaty amount will be based on further development of scientific information and additional coordination and discussion with and among the coastal tribes and the states of Washington and Oregon.

Non-Tribal Research and Bycatch Set-Aside

The U.S. non-tribal whiting fishery is managed under the Council's Pacific Coast Groundfish FMP. Each year, the Council recommends a set-aside of Pacific whiting to accommodate incidental mortality of the fish in research activities and non-groundfish fisheries based on estimates of scientific research catch and estimated bycatch mortality in non-groundfish fisheries. At its November 2022 meeting, the Council recommended an incidental mortality set-aside of 750 mt for 2023. This set-aside is unchanged from the 750 mt set-aside amount for incidental mortality in 2023. Consistent with section 303(c)(2) of the Magnuson-Stevens Fishery Management and Conservation Act (Magnuson-Stevens Act), on November 16, 2022, the Council deemed the proposed regulations for the research and incidental mortality set-aside to be necessary and appropriate to implement the FMP. This final rule will implement the Council's recommendations.

Non-Tribal Harvest Guidelines and Allocations

This final rule implements the fishery harvest guideline (HG), also called the non-tribal allocation as described in the proposed rule published on April 06, 2023 (88 FR 20457). The 2023 fishery HG for Pacific whiting is 380,194 mt. This amount was determined by deducting the 80,806 mt tribal allocation and the 750 mt allocation for scientific research catch and fishing mortality in non-groundfish fisheries from the adjusted U.S. TAC of 461,750 mt. Federal regulations further allocate the fishery HG among the three non-tribal sectors of the Pacific whiting fishery: The catcher/processor (C/P) Co-op Program, the Mothership (MS) Co-op Program, and the Shorebased Individual Fishing Quota (IFQ) Program. The C/P Co-op Program is allocated 34 percent (129,265 mt for 2023), the MS Co-op Program is allocated 24 percent (91,246 mt for 2023), and the Shorebased IFQ Program is allocated 42 percent (159,681 mt for 2023). The fishery south of 42° N lat. may not take more than 7,984 mt (5 percent of the Shorebased IFQ Program allocation) prior to May 1, the start of the primary Pacific whiting season north of 42° N lat.

TABLE 1—2023 U.S. PACIFIC WHITING ALLOCATIONS IN METRIC TONS

Sector	2023 Pacific whiting allocation (mt)
Tribal	80,806
Catcher/Processor (C/P) Co-op Program	129,266
Mothership (MS) Co-op Program	91,247
Shorebased IFQ Program	159,681

This rule would be implemented under the statutory and regulatory authority of sections 304(b) and 305(d) of the Magnuson-Stevens Act, the Whiting Act, the regulations governing the groundfish fishery at 50 CFR 660.5 through 660.360, and other applicable laws. Additionally, with this final rule, NMFS, will ensure that the fishery is managed in a manner consistent with treaty rights of four Treaty Tribes to fish in their "usual and accustomed grounds and stations" in common with non-tribal citizens. *United States* v. *Washington,* 384 F. Supp. 313 (W.D. 1974).

Comments and Responses

NMFS issued a proposed rule on April 6, 2023 (88 FR 20457). The comment period on the proposed rule closed April 21, 2023. No comments were received during the public comment period.

Changes From the Proposed Rule

NMFS has not made any changes to the proposed regulatory text and there are no substantive changes from the proposed rule.

Classification

The Administrator, West Coast Region, NMFS, determined that the final rule is necessary for the conservation and management of the Pacific whiting and that it is consistent with sections 304(b) and 305(d), and other provisions of the Magnuson-Stevens Act, the Pacific Coast Groundfish FMP, and other applicable laws.

Pursuant to 5 U.S.C. 553(d)(3), the NMFS Assistant Administrator finds good cause to waive the 30-day delay in the date of effectiveness for this final rule because such a delay would be contrary to the public interest. If this final rule were delayed by 30 days, Pacific coast whiting fishermen would not be able to fish under the final catch limits for Pacific whiting for that time period, and would not be able to realize the full level of economic opportunity this rule provides. Waiving the 30-day delay in the date of effectiveness will allow this final rule to more fully benefit the fishery through increased fishing opportunities as described in the preamble of this rule.

This rulemaking could not be completed prior to the May 1 start date of the 2023 Pacific Whiting primary fishing season due to the short time frame between the approval of the TAC recommendation and the start of the fishing season. The AP and JMC met in Vancouver, British Columbia, Canada on February 28–March 1, 2023, to develop advice on a 2023 coastwide TAC. At this meeting, the JMC agreed on a TAC recommendation, which was transmitted to the United States and Canadian Governments on March 2, 2023. The Department of Commerce consulted with the Department of State on the recommended TAC, and concurred with the NMFS West Coast Region on March 17, 2023 to accept the JMC recommended adjusted TAC for 2023. NMFS, under delegation of authority from the Secretary of Commerce, approved the TAC recommendation U.S. fisheries on March 23, 2023. This rulemaking was proceeded once the JMC agreed on a recommended coastwide TAC, and the Department of Commerce in consultation with the Department of State reviewed and approved the recommended U.S. TAC. The proposed rule published on April 6, 2023 and the public comment period closed on April 21, 2023 (88 FR 20457). The 2023 Pacific whiting primary fishing season began shortly thereafter on May 1, 2023.

In addition, because this rule increases catch limits for Pacific whiting compared to the interim allocation the fishery is currently operating under, it therefore finds good cause to waive the 30-day delay in the date of effectiveness requirement. The Pacific whiting fishery season began fishing on May 01, 2023 under interim allocations based on the lowest coastwide TAC considered in the proposed rule. This final rule implements a higher TAC for Pacific whiting than the interim allocation provided prior to the season opening, and implementing the rule upon publication provides the whiting fleet more opportunity and greater flexibility to harvest the optimal yield. Timely implementation of the full TAC will avoid the need to pause the Pacific whiting fishery if the interim allocations are fully harvested. Additionally, many vessels in the Pacific Whiting fishery also participate in the Alaskan Pollock fishery. Issuing complete 2023 whiting allocations to quota owners in a timely fashion ensures they can plan their participation for the year in both the Pacific Whiting and Alaskan Pollock fisheries.

Waiving the 30-day delay in effectiveness will not have a negative impact on any entities, as there are no new compliance requirements or other burdens placed on the fishing community with this rule. Making this rule effective immediately would also serve the best interests of the public because it will allow for the longest possible fishing season for Pacific whiting and therefore the best possible economic outcome for those whose livelihoods depend on this fishery.

The Office of Management and Budget has determined that this final rule is not significant for purposes of Executive Order 12866.

A range of potential total harvest levels for Pacific whiting have been considered under the Final Environmental Impact Statement for Harvest Specifications and Management Measures for 2015–2016 and Biennial Periods thereafter (2015/16 FEIS) and in the Amendment 30 to the Pacific Coast Groundfish Fishery Management Plan, 2023–2024 Harvest Specifications, and Management Measures Environmental Assessment (EA) and Regulatory Impact Review (RIR) and is available from NMFS (see **ADDRESSES**). The 2015/16 FEIS examined the harvest specifications and management measures for 2015–16 and 10 year projections for routinely adjusted harvest specifications and management measures. The 10 year projections were produced to evaluate the impacts of the ongoing implementation of harvest specifications and management measures and to evaluate the impacts of the routine adjustments that are the main component of each biennial cycle. The EA for the 2023–24 cycle tiers from the 2015/16 FEIS and focuses on the harvest specifications and management measures that were not within the scope of the 10 year projections in the 2015/16 FEIS.

Final Regulatory Flexibility Analysis

NMFS issued a proposed rule on April 6, 2023 (88 FR 20457), for the 2023 Harvest Specifications for Pacific Whiting, and 2023 tribal allocation for Pacific whiting. An Initial Regulatory Flexibility Analysis (IRFA) was prepared and summarized in the Classification section of the preamble to the proposed rule. The comment period on the proposed rule closed April 21, 2023. NMFS did not receive any public comments on the proposed rule. The Chief Counsel for Advocacy of the Small Business Administration (SBA) did not file any comments on the IRFA or the proposed rule. The description of this action, its purpose, and its legal basis are described in the preamble to the proposed rule and are not repeated here. A Final Regulatory Flexibility Analysis (FRFA) was prepared and incorporates the IRFA. There were no public comments received on the IRFA. NMFS also prepared a RIR for this action. A copy of the RIR/FRFA is available from NMFS (see **ADDRESSES**). A summary of the FRFA, per the requirements of 5 U.S.C. 604 follows.

Under the Regulatory Flexibility Act (RFA), the term ''small entities'' includes small businesses, small organizations, and small governmental jurisdictions. The Small Business Administration has established size criteria for entities involved in the fishing industry that qualify as small businesses. A business involved in fish harvesting is a small business if it is independently owned and operated and not dominant in its field of operation (including its affiliates) and if it has combined annual receipts, not in excess of $11 million for all its affiliated operations worldwide (see 80 FR 81194, December 29, 2015). A wholesale business servicing the fishing industry is a small business if it employs 100 or fewer persons on a full time, part time, temporary, or other basis, at all its affiliated operations worldwide. A small organization is any nonprofit enterprise that is independently owned and operated and is not dominant in its field. A seafood processor is a small business if it is independently owned and operated, not dominant in its field of operation, and employs 750 or fewer persons on a full time, part time, temporary, or other basis, at all its affiliated operations worldwide (See North American Industry Classification

System (NAICS) code 311710 at 13 CFR 121.201). For purposes of rulemaking, NMFS is also applying the seafood processor standard to catcher processors because whiting C/Ps earn the majority of the revenue from processed seafood product.

A Summary of the Significant Issues Raised by the Public in Response to the IRFA, a Summary of the Agency's Assessment of Such Issues, and a Statement of Any Changes Made in the Final Rule as a Result of Such Comments

No public comments were received on the proposed rule.

Description and Estimate of the Number of Small Entities to Which the Rule Applies, and Estimate of Economic Impacts by Entity Size and Industry

This final rule announces the adjusted coastwide TAC and U.S. TAC and allocates Pacific whiting to the following sectors/programs: Tribal, Shorebased IFQ Program Trawl Fishery, MS Coop Program Whiting At-sea Trawl Fishery, and C/P Coop Program Whiting At-sea Trawl Fishery. The amount of Pacific whiting allocated to these sectors is based on the adjusted U.S. TAC.

We expect one tribal entity to fish for Pacific whiting in 2023. Tribes are not considered small entities for the purposes of RFA. Impacts to tribes are nevertheless considered in this analysis.

As of January 2023, the Shorebased IFQ Program is composed of 164 Quota Share permits/accounts (134 of which were allocated whiting quota pounds), and 35 first receivers, one of which is designated as whiting-only receivers and 11 that may receive both whiting and non-whiting.

These regulations also directly affect participants in the MS Co-op Program, a general term to describe the limited access program that applies to eligible harvesters and processors in the MS sector of the Pacific whiting at-sea trawl fishery. This program consists of six MS processor permits, and a catcher vessel fleet currently composed of a single co-op, with 34 Mothership/Catcher Vessel (MS/CV) endorsed permits (with three permits each having two catch history assignments).

These regulations also directly affect the C/P Co-op Program, composed of 10 C/P endorsed permits owned by three companies that have formed a single coop. These co-ops are considered large entities from several perspectives; they have participants that are large entities, and have in total more than 750 employees worldwide including affiliates.

Although there are three non-tribal sectors, many companies participate in two sectors and some participate in all three sectors. As part of the permit application processes for the non-tribal fisheries, based on a review of the Small Business Administration size criteria, permit applicants are asked if they considered themselves a ''small'' business, and they are asked to provide detailed ownership information. Data on employment worldwide, including affiliates, are not available for these companies, which generally operate in Alaska as well as the West Coast and may have operations in other countries as well. NMFS has limited entry permit holders self-report size status. For 2023, all 10 C/P permits reported they are not small businesses, as did 8 mothership catcher vessels. There is substantial, but not complete overlap between permit ownership and vessel ownership so there may be a small number of additional small entity vessel owners who will be impacted by this rule. After accounting for cross participation, multiple Quota Share account holders, and affiliation through ownership, NMFS estimates that there are 103 non-tribal entities directly affected by these regulations, 89 of which are considered ''small'' businesses.

This rule will allocate Pacific whiting between tribal and non-tribal harvesters (a mixture of small and large businesses). Tribal fisheries consist of a mixture of fishing activities that are similar to the activities that non-tribal fisheries undertake. Tribal harvests may be delivered to both shoreside plants and motherships for processing. These processing facilities also process fish harvested by non-tribal fisheries. The effect of the tribal allocation on non-tribal fisheries will depend on the level of tribal harvests relative to their allocation and the reapportionment process. If the tribes do not harvest their entire allocation, there are opportunities during the year to reapportion unharvested tribal amounts to the non-tribal fleets. For example, in 2022 NMFS reapportioned 40,000 mt of the original 70,463 mt tribal allocation. This reapportionment was based on conversations with the tribes and the best information available at the time, which indicated that this amount would not limit tribal harvest opportunities for the remainder of the year. The reapportioning process allows unharvested tribal allocations of Pacific whiting to be fished by the non-tribal fleets, benefitting both large and small entities. The revised Pacific whiting allocations for 2022 following the reapportionment were: Tribal 30,463 mt, C/P Co-op 126,287 mt; MS Co-op 89,144 mt; and Shorebased IFQ Program 156,002 mt.

The prices for Pacific whiting are largely determined by the world market because most of the Pacific whiting harvested in the United States is exported. The U.S. Pacific whiting TAC is highly variable, as have subsequent harvests and ex-vessel revenues. For the years 2016 to 2020, the total Pacific whiting fishery (tribal and non-tribal) averaged harvests of approximately 303,782 mt annually. The 2022 U.S. non-tribal fishery had a Pacific whiting catch of approximately 291,337 mt, and the tribal fishery landed less than 1,100 mt.

Impacts to the U.S. non-tribal fishery are measured with an estimate of ex-vessel revenue. The adjusted coastwide TAC of 625,000 mt would result in an adjusted U.S. TAC of 461,750 mt and, after deduction of the tribal allocation and the incidental catch set-aside, a U.S. non-tribal harvest guideline of 380,194 mt. Using the 2022 weighted-average non-tribal price per metric ton (*e.g.,* $233.5 per metric ton), the TAC is estimated to result in an ex-vessel revenue of $88.8 million for the U.S. non-tribal fishing fleet.

Impacts to tribal catcher vessels who elect to participate in the tribal fishery are measured with an estimate of ex-vessel revenue. In lieu of more complete information on tribal deliveries, total ex-vessel revenue is estimated with the 2022 average ex-vessel price of Pacific whiting, which was $233.50 per mt. At that price, the 2023 tribal allocation of 80,806.25 mt would have an ex-vessel value of $18.87 million.

A Description of Any Significant Alternatives to the Proposed Rule That Accomplish the Stated Objectives of Applicable Statutes and That Minimize any Significant Economic Impact of the Proposed Rule on Small Entities

For the allocations to the non-tribal commercial sectors the Pacific whiting tribal allocation, and the set-aside for research and incidental mortality NMFS considered two alternatives: ''No Action'' and the ''Proposed Action.'' No other alternatives were considered by the Council at their November 2022 meeting.

Under the no action alternative, NMFS would not implement allocations to the non-tribal sectors based on the JMC recommended U.S. TAC, which would not fulfill NMFS' responsibility to manage the U.S. fishery. This is contrary to the Whiting Act and Agreement, which requires sustainable management of the Pacific whiting

resource, therefore this alternative received no further consideration.

Under the no action alternative, NMFS would not implement the set-aside amount of 750 mt recommended by the Council. Not implementing a set-aside of the U.S. whiting TAC would mean incidental mortality of the fish in research activities and non-groundfish fisheries would not be accommodated. This would be inconsistent with the Council's recommendation, the Pacific Groundfish Fishery Management Plan, the regulations setting the framework governing the groundfish fishery, and NMFS' responsibility to manage the fishery. Therefore the no action alternative received no further consideration.

NMFS did not consider a broader range of alternatives to the tribal allocation because the tribal allocation is a percentage of the U.S. TAC and is based primarily on the requests of the tribes. These requests reflect the level of participation in the fishery that will allow them to exercise their treaty right to fish for Pacific whiting. Under the Action alternative, NMFS will set the tribal allocation percentage at 17.5 percent, as requested by the Tribes. This would yield a tribal allocation of 80,806 mt for 2023. Consideration of a percentage lower than the tribal request of 17.5 percent is not appropriate in this instance. As a matter of policy, NMFS has historically supported the harvest levels requested by the Tribes. Based on the information available to NMFS, the tribal request is within their tribal treaty rights. A higher percentage would arguably also be within the scope of the treaty right. However, a higher percentage would unnecessarily limit the non-tribal fishery.

Under the no action alternative, NMFS would not make an allocation to the tribal sector. This alternative was considered, but the regulatory framework provides for a tribal allocation on an annual basis only. Therefore, the no action alternative would result in no allocation of Pacific whiting to the tribal sector in 2023, which would be inconsistent with NMFS' responsibility to manage the fishery consistent with the Tribes' treaty rights. Given that there is a tribal request for allocation in 2023, this alternative received no further consideration.

Regulatory Flexibility Act Determination of No Significant Impact

NMFS determined this final rule would not adversely affect small entities. The reapportioning process allows unharvested tribal allocations of Pacific whiting, fished by small entities, to be fished by the non-tribal fleets, benefitting both large and small entities.

Small Entity Compliance Guide

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as ''small entity compliance guides.'' The agency shall explain the actions a small entity is required to take to comply with a rule or group of rules. A small entity compliance guide will be sent to stakeholders, and copies of the final rule and guides (*i.e.,* information bulletins) are available from NMFS at the following website: *https://www.fisheries.noaa.gov/species/pacific-whiting#management.*

With this final rule, NMFS, acting on behalf of the Secretary, determined that the FMP is implemented in a manner consistent with treaty rights of four Treaty Tribes to fish in their ''usual and accustomed grounds and stations'' in common with non-tribal citizens. *United States* v. *Washington,* 384 F. Supp. 313 (W.D. Wash. 1974).

This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, Indian fisheries.

Dated: May 23, 2023.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 50 CFR part 660 as follows:

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.,* 16 U.S.C. 773 *et seq.,* and 16 U.S.C. 7001 *et seq.*

■ 2. In § 660.50, revise paragraph (f)(4) to read as follows:

§ 660.50 Pacific Coast treaty Indian fisheries.

* * * * *

(f) * * *

(4) *Pacific whiting.* The tribal allocation for 2023 is 80,806 mt.

* * * * *

■ 3. Revise table 1a to part 660, subpart C, to read as follows:

TABLE 1a TO PART 660, SUBPART C—2023, SPECIFICATIONS OF OFL, ABC, ACL, ACT AND FISHERY HARVEST GUIDELINES

[Weights in metric tons]
[Capitalized stocks are overfished]

Stocks	Area	OFL	ABC	ACL [a]	Fishery HG [b]
YELLOWEYE ROCKFISH [c]	Coastwide	123	103	66	55.3

[a] Annual catch limits (ACLs), annual catch targets (ACTs) and harvest guidelines (HGs) are specified as total catch values.

[b] Fishery HGs means the HG or quota after subtracting Pacific Coast treaty Indian tribes allocations and projected catch, projected research catch, deductions for fishing mortality in non-groundfish fisheries, and deductions for EFPs from the ACL or ACT.

[c] Yelloweye rockfish. The 66 mt ACL is based on the current rebuilding plan with a target year to rebuild of 2029 and an SPR harvest rate of 65 percent. 10.7 mt is deducted from the ACL to accommodate the Tribal fishery (5 mt), EFP fishing (0.12 mt), research catch (2.92 mt), and incidental open access mortality (2.66 mt) resulting in a fishery HG of 55.3 mt. The non-trawl HG is 50.9 mt. The combined non-nearshore/nearshore HG is 10.7 mt. Recreational HGs are: 13.2 mt (Washington); 11.7 mt (Oregon); and 15.3 mt (California). In addition, the non-trawl ACT is 39.9 mt, and the combined non-nearshore/nearshore ACT is 8.4 mt. Recreational ACTs are: 10.4 mt (Washington), 9.2 mt (Oregon), and 12.0 mt (California).

[d] Arrowtooth flounder. 2,094.98 mt is deducted from the ACL to accommodate the Tribal fishery (2,041 mt), research catch (12.98 mt) and incidental open access mortality (41 mt), resulting in a fishery HG of 16,537 mt.

[e] Big skate. 59.8 mt is deducted from the ACL to accommodate the Tribal fishery (15 mt), research catch (5.49 mt), and incidental open access mortality (39.31 mt), resulting in a fishery HG of 1,260.2 mt.

[f] Black rockfish (California). 2.26 mt is deducted from the ACL to accommodate EFP fishing (1.0 mt), research catch (0.08 mt), and incidental open access mortality (1.18 mt), resulting in a fishery HG of 332.1 mt.

[g] Black rockfish (Washington). 18.1 mt is deducted from the ACL to accommodate the Tribal fishery (18 mt) and research catch (0.1 mt), resulting in a fishery HG of 271.8 mt.

[h] Bocaccio south of 40°10′ N lat Bocaccio are managed with stock-specific harvest specifications south of 40°10′ N lat and within the Minor Shelf Rockfish complex north of 40°10′ N lat. 48.12 mt is deducted from the ACL to accommodate EFP fishing (40 mt), research catch (5.6 mt), and incidental open access mortality (2.52 mt), resulting in a fishery HG of 1,793.9 mt. The California recreational fishery south of 40°10′ N lat. has an HG of 755.6 mt.

[i] Cabezon (California). 1.63 mt is deducted from the ACL to accommodate EFP fishing (1 mt), research catch (0.02 mt), and incidental open access fishery mortality (0.61 mt), resulting in a fishery HG of 180.4 mt.

[j] California scorpionfish south of 34°27′ N lat. 3.89 mt is deducted from the ACL to accommodate research (0.18 mt) and the incidental open access fishery (3.71 mt), resulting in a fishery HG of 258.4 mt.

[k] Canary rockfish. 68.91 mt is deducted from the ACL to accommodate the Tribal fishery (50 mt), EFP fishing (6 mt), and research catch (10.08 mt), and incidental open access mortality (2.83 mt), resulting in a fishery HG of 1,215.1 mt. The combined nearshore/non-nearshore HG is 121.2 mt. Recreational HGs are: 41.4 mt (Washington); 62.3 mt (Oregon); and 111.7 mt (California).

[l] Chilipepper rockfish south of 40°10′ N lat. Chilipepper are managed with stock-specific harvest specifications south of 40°10′ N lat. and within the Minor Shelf Rockfish complex north of 40°10′ N lat. 97.7 mt is deducted from the ACL to accommodate EFP fishing (70 mt), research catch (14.04 mt), incidental open access fishery mortality (13.66 mt), resulting in a fishery HG of 2,085 mt.

[m] Cowcod south of 40°10′ N lat. Cowcod are managed with stock-specific harvest specifications south of 40°10′ N lat. and within the Minor Shelf Rockfish complex north of 40°10′ N lat. 11.17 mt is deducted from the ACL to accommodate EFP fishing (1 mt), research catch (10 mt), and incidental open access mortality (0.17 mt), resulting in a fishery HG of 68.8 mt.

[n] Darkblotched rockfish. 23.76 mt is deducted from the ACL to accommodate the Tribal fishery (5 mt), EFP fishing (0.5 mt), research catch (8.46 mt), and incidental open access mortality (9.8 mt) resulting in a fishery HG of 761.2 mt.

[o] Dover sole. 1,597.11 mt is deducted from the ACL to accommodate the Tribal fishery (1,497 mt), research catch (50.84 mt), and incidental open access mortality (49.27 mt), resulting in a fishery HG of 48,402.9 mt.

[p] English sole. 259.52 mt is deducted from the ACL to accommodate the Tribal fishery (200 mt), research catch (17 mt), and incidental open access mortality (42.52 mt), resulting in a fishery HG of 8,758.5 mt.

[q] Lingcod north of 40°10′ N lat. 279.63 mt is deducted from the ACL for the Tribal fishery (250 mt), research catch (17.71 mt), and incidental open access mortality (11.92 mt) resulting in a fishery HG of 4,098.4 mt.

[r] Lingcod south of 40°10′ N lat. 15.5 mt is deducted from the ACL to accommodate EFP fishing (4 mt), research catch (3.19 mt), and incidental open access mortality (8.31 mt), resulting in a fishery HG of 710.5 mt.

[s] Longnose skate. 251.3 mt is deducted from the ACL to accommodate the Tribal fishery (220 mt), research catch (12.46 mt), and incidental open access mortality (18.84 mt), resulting in a fishery HG of 1,456.7 mt.

[t] Longspine thornyhead north of 34°27′ N lat. 53.71 mt is deducted from the ACL to accommodate the Tribal fishery (30 mt), research catch (17.49 mt), and incidental open access mortality (6.22 mt), resulting in a fishery HG of 2,241.3 mt.

[u] Longspine thornyhead south of 34°27′ N lat. 2.24 mt is deducted from the ACL to accommodate research catch (1.41 mt) and incidental open access mortality (0.83 mt), resulting in a fishery HG of 722.8 mt.

[v] Pacific cod. 506 mt is deducted from the ACL to accommodate the Tribal fishery (500 mt), research catch (5.47 mt), and incidental open access mortality (0.53 mt), resulting in a fishery HG of 1,094 mt.

[w] Pacific ocean perch north of 40°10′ N lat. Pacific ocean perch are managed with stock-specific harvest specifications north of 40°10′ N lat. and within the Minor Slope Rockfish complex south of 40°10′ N lat. 145.48 mt is deducted from the ACL to accommodate the Tribal fishery (130 mt), research catch (5.39 mt), and incidental open access mortality (10.09 mt), resulting in a fishery HG of 3,427.5 mt.

[x] Pacific hake/whiting. The 2023 OFL of 778,008 mt is based on the 2023 assessment with an F40 percent of FMSY proxy. The 2023 coastwide adjusted Total Allowable Catch (TAC) is 625,000 mt. The U.S. TAC is 73.88 percent of the coastwide TAC. The 2023 adjusted U.S. TAC is 461,750 mt. From the U.S. TAC, 80,806 mt is deducted to accommodate the Tribal fishery, and 750 mt is deducted to accommodate research and bycatch in other fisheries, resulting in a 2023 fishery HG of 380,194-mt. The TAC for Pacific whiting is established under the provisions of the Agreement between the Government of the United States of America and the Government of Canada on Pacific Hake/Whiting of 2003 and the Pacific Whiting Act of 2006, 16 U.S.C. 7001–7010, and the international exception applies. Therefore, no ABC or ACL values are provided for Pacific whiting.

[y] Petrale sole. 386.24 mt is deducted from the ACL to accommodate the Tribal fishery (350 mt), EFP fishing (1 mt), research catch (24.14 mt), and incidental open access mortality (11.1 mt), resulting in a fishery HG of 3,098.8 mt.

[z] Sablefish north of 36° N lat. The sablefish coastwide ACL value is not specified in regulations. The coastwide sablefish ACL value is apportioned north and south of 36° N lat., using the rolling 5-year average estimated swept area biomass from the NMFS NWFSC trawl survey, with 78.4 percent apportioned north of 36° N lat. and 21.6 percent apportioned south of 36° N lat. The northern ACL is 8,486 mt and is reduced by 849 mt for the Tribal allocation (10 percent of the ACL north of 36° N lat.). The 849 mt Tribal allocation is reduced by 1.7 percent to account for discard mortality. Detailed sablefish allocations are shown in Table 1c.

[aa] Sablefish south of 36° N lat. The ACL for the area south of 36° N lat. is 2,338 mt (21.6 percent of the calculated coastwide ACL value). 27.4 mt is deducted from the ACL to accommodate research catch (2.40 mt) and incidental open access mortality (25 mt), resulting in a fishery HG of 2,310.6 mt.

[bb] Shortspine thornyhead north of 34°27′ N lat. 78.3 mt is deducted from the ACL to accommodate the Tribal fishery (50 mt), research catch (10.48 mt), and incidental open access mortality (17.82 mt), resulting in a fishery HG of 1,280.7 mt for the area north of 34°27′ N lat.

[cc] Shortspine thornyhead south of 34°27′ N lat. 6.71 mt is deducted from the ACL to accommodate research catch (0.71 mt) and incidental open access mortality (6 mt), resulting in a fishery HG of 712.3 mt for the area south of 34°27′ N lat.

[dd] Spiny dogfish. 351.48 mt is deducted from the ACL to accommodate the Tribal fishery (275 mt), EFP fishing (1 mt), research catch (41.85 mt), and incidental open access mortality (33.63 mt), resulting in a fishery HG of 1,104.5 mt.

[ee] Splitnose rockfish south of 40°10′ N lat. 18.42 mt is deducted from the ACL to accommodate EFP fishing (1.5 mt), research catch (11.17 mt), and incidental open access mortality (5.75 mt), resulting in a fishery HG of 1,573.4 mt.

[ff] Starry flounder. 48.28 mt is deducted from the ACL to accommodate the Tribal fishery (2 mt), research catch (0.57 mt), and incidental open access mortality (45.71 mt), resulting in a fishery HG of 343.7 mt.

[gg] Widow rockfish. 238.32 mt is deducted from the ACL to accommodate the Tribal fishery (200 mt), EFP fishing (18 mt), research catch (17.27 mt), and incidental open access mortality (3.05 mt), resulting in a fishery HG of 12,385.7 mt.

[hh] Yellowtail rockfish north of 40°10′ N lat. Yellowtail rockfish are managed with stock-specific harvest specifications north of 40°10′ N lat. and within the Minor Shelf Rockfish complex south of 40°10′ N lat. 1,027.55 mt is deducted from the ACL to accommodate the Tribal fishery (1,000 mt), research catch (20.55 mt), and incidental open access mortality (7 mt), resulting in a fishery HG of 4,638.5 mt.

[ii] Black rockfish/Blue rockfish/Deacon rockfish (Oregon). 1.82 mt is deducted from the ACL to accommodate research catch (0.08 mt) and incidental open access mortality (1.74 mt), resulting in a fishery HG of 595.2 mt.

[jj] Cabezon/kelp greenling (Oregon). 0.79 mt is deducted from the ACL to accommodate research catch (0.05 mt), and incidental open access mortality (0.74 mt), resulting in a fishery HG of 184.2 mt.

[kk] Cabezon/kelp greenling (Washington). 2 mt is deducted from the ACL to accommodate the Tribal fishery, resulting in a fishery HG is 18 mt.

[ll] Nearshore Rockfish north of 40°10′ N lat. 3.27 mt is deducted from the ACL to accommodate the Tribal fishery (1.5 mt), research catch (0.47 mt), and incidental open access mortality (1.3 mt), resulting in a fishery HG of 89.7 mt. State specific HGs are Washington (17.7 mt), Oregon (32.0 mt), and California (39.6 mt). The ACT for copper rockfish (California) is 6.93 mt. The ACT for quillback rockfish (California) is 0.87 mt.

[mm] Nearshore Rockfish south of 40°10′ N lat. 4.54 mt is deducted from the ACL to accommodate research catch (2.68 mt) and incidental open access mortality (1.86 mt), resulting in a fishery HG of 882.5 mt. The ACT for copper rockfish is 84.61 mt. The ACT for quillback rockfish is 0.89 mt.

[nn] Other Fish. The Other Fish complex is comprised of kelp greenling off California and leopard shark coastwide. 21.24 mt is deducted from the ACL to accommodate research catch (6.29 mt) and incidental open access mortality (14.95 mt), resulting in a fishery HG of 201.8 mt.

[oo] Other Flatfish. The Other Flatfish complex is comprised of flatfish species managed in the PCGFMP that are not managed with stock-specific OFLs/ABCs/ACLs. Most of the species in the Other Flatfish complex are unassessed and include: butter sole, curlfin sole, flathead sole, Pacific sanddab, rock sole, sand sole, and rex sole. 220.79 mt is deducted from the ACL to accommodate the Tribal fishery (60 mt), research catch (23.63 mt), and incidental open access mortality (137.16 mt), resulting in a fishery HG of 4,641.2 mt.

[pp] Shelf Rockfish north of 40°10′ N lat. 70.94 mt is deducted from the ACL to accommodate the Tribal fishery (30 mt), research catch (15.32 mt), and incidental open access mortality (25.62 mt), resulting in a fishery HG of 1,212.1 mt.

[qq] Shelf Rockfish south of 40°10′ N lat. 132.77 mt is deducted from the ACL to accommodate EFP fishing (50 mt), research catch (15.1 mt), and incidental open access mortality (67.67 mt) resulting in a fishery HG of 1,336.2 mt.

[rr] Slope Rockfish north of 40°10′ N lat. 65.39 mt is deducted from the ACL to accommodate the Tribal fishery (36 mt), and research catch (10.51 mt), and incidental open access mortality (18.88 mt), resulting in a fishery HG of 1,474.6 mt.

[ss] Slope Rockfish south of 40°10′ N lat. 38.94 mt is deducted from the ACL to accommodate EFP fishing (1 mt), research catch (18.21 mt), and incidental open access mortality (19.73 mt), resulting in a fishery HG of 662.1 mt. Blackgill rockfish has a stock-specific HG for the entire groundfish fishery south of 40°10′ N lat. set equal to the species' contribution to the ACL. Harvest of blackgill rockfish in all groundfish fisheries south of 40°10′ N lat. counts against this HG of 172.4 mt.

■ 4. Revise table 1b to part 660, subpart C, to read as follows:

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 230224–0053; RTID 0648–XD009]

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Vessels Using Jig Gear in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting retention of Pacific cod by vessels using jig gear in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary because the 2023 total allowable catch of Pacific cod apportioned to vessels using jig gear in the Central Regulatory Area of the GOA has been reached.

DATES: Effective 12 p.m. Alaska local time (A.l.t.), June 10, 2023, through 12 a.m., A.l.t., December 31, 2023.

FOR FURTHER INFORMATION CONTACT: Obren Davis, 907–581–7241.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2023 Pacific cod total allowable catch (TAC) apportioned to vessels using jig gear in the Central Regulatory Area of the GOA is 111 metric tons (mt) as established by the final 2023 and 2024 harvest specifications for groundfish in the GOA (88 FR 13238, March 2, 2023).

In accordance with § 679.20(d)(2), the Administrator, Alaska Region, NMFS has determined that the 2023 Pacific cod TAC apportioned to vessels using jig gear in the Central Regulatory Area of the GOA has been reached. Therefore, NMFS is requiring that Pacific cod caught by vessels using jig gear in the Central Regulatory Area of the GOA be treated as prohibited species in accordance with § 679.21(a).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion, and would delay prohibiting the retention of Pacific cod by vessels using jig gear in the Central Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of May 24, 2023.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 25, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register

Vol. 88, No. 104

Wednesday, May 31, 2023

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 721

[NCUA–2023–0043]

RIN 3133–AF56

Charitable Donation Accounts

AGENCY: National Credit Union Administration (NCUA).

ACTION: Proposed rule.

SUMMARY: The NCUA Board (Board) is proposing to amend the charitable donation accounts (CDA) section of the NCUA's incidental powers regulation. Specifically, the Board is proposing to add ''war veterans' organizations'' (''veterans' organizations''), as defined under section 501(c)(19) of the Internal Revenue Code, to the definition of a ''qualified charity'' that a federal credit union may contribute to using a CDA. The Board is also asking if there are other groups, entities, or organizations the Board should consider adding to the definition of a ''qualified charity'' to inform potential future rulemaking in this area.

DATES: Comments must be received on or before July 31, 2023.

ADDRESSES: You may submit written comments, identified by RIN 3133–AF56, by any of the following methods (Please send comments by one method only):

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments on Docket NCUA–2023–0043.
- *Mail:* Address to Melane Conyers-Ausbrooks, Secretary of the Board, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.
- *Hand Delivery or Courier:* Same as mail address.

Public Inspection: You may view all public comments on the Federal eRulemaking Portal at *https://www.regulations.gov,* as submitted, except for those we cannot post for technical reasons. The NCUA will not edit or remove any identifying or contact information from the public comments submitted. If you are unable to access public comments on the internet, you may contact the NCUA for alternative access by calling (703) 518–6540 or emailing *OGCMail@ncua.gov.*

FOR FURTHER INFORMATION CONTACT: *Policy:* Rick Mayfield, Senior Capital Markets Specialist, Office of Examination and Insurance; Heather Murphy, Consumer Compliance Policy and Outreach Officer, Office of Consumer Financial Protection. *Legal:* Justin M. Anderson, Senior Staff Attorney, Office of General Counsel, 1775 Duke Street, Alexandria, VA 22314–3428. Rick Mayfield can be reached at (703) 518–1179; Heather Murphy can be reached at (703) 664–3102; and Justin Anderson can be reached at (703) 518–6540.

SUPPLEMENTARY INFORMATION:

I. Background

A. History of the Current Rule

The Board approved the current CDA rule at its December 2013 meeting (current CDA rule or 2013 final rule).[1] This rule permitted federal credit unions to fund a CDA, which may hold investments that are otherwise impermissible for federal credit unions, for use as a charitable contribution or donation under their incidental powers authority. The rule defined a CDA as a hybrid charitable and investment vehicle that a federal credit union may fund to provide charitable contributions and donations to a qualified charity. The rule further defined ''qualified charity'' [2] as a charitable organization or other non-profit entity recognized as exempt from taxation under section 501(c)(3) of the Internal Revenue Code.[3] As noted in the 2013 proposed version of the current CDA rule (2013 proposed rule), ''[t]he exempt purposes set forth in section 501(c)(3) are charitable, religious, educational, scientific, literary, testing for public safety, fostering national or international amateur sports competition, and preventing cruelty to children or animals.'' The 2013 proposed rule further explained that the Board used the word ''charitable'' in its generally accepted legal sense and enumerated what the term encompassed, which ''includes relief of the poor, the distressed, or the underprivileged; advancement of religion; advancement of education or science; erecting or maintaining public buildings, monuments, or works; lessening the burdens of government; lessening neighborhood tensions; eliminating prejudice and discrimination; defending human and civil rights secured by law; and combating community deterioration and juvenile delinquency.'' [4]

B. Scope of ''Qualified Charity''

As noted in the preceding section, the 2013 final rule permitted the use of CDAs as an incidental power for federal credit unions. As CDAs can be funded with investments that are impermissible for federal credit unions, the Board limited the scope of organizations that could be considered a ''qualified charity'' for purposes of the CDA rule. The 2013 final rule required that a ''qualified charity'' be a section 501(c)(3) entity as defined by the Internal Revenue Code. These organizations are non-profit and organized and operated exclusively for charitable purposes. Because CDAs can be funded with impermissible investments, the Board believes it is necessary to keep in place distinct limits on groups that are beneficiaries of a CDA. As such, any group the Board would consider adding as a ''qualified charity'' must be both a non-profit and be organized for a charitable purpose.

II. Proposed Changes

A. Veterans' Organizations as a Qualified Charity

While section 501(c)(3) entities are, by title and definition, charitable organizations, the Board recognizes that there may be other non-profit, charitable entities outside of section 501(c)(3) that could be included as a ''qualified charity'' as defined in the current CDA rule to fulfill the rule's purpose. Still, because the current CDA rule permits federal credit unions to purchase investments that would otherwise be impermissible, it is necessary to limit the use of CDA funds to making charitable contributions or donations to organizations that are both non-profit and charitable in nature. For purposes of this proposal, the Board is focusing

[1] 78 FR 76728 (Dec. 19, 2013).

[2] 12 CFR 721.3(b)(2).

[3] 26 U.S.C. 503(c)(19).

[4] 78 FR 57539 (Sept. 19, 2013).

on ''veterans' organizations'' as defined by section 501(c)(19) of the Internal Revenue Code. The Board has been made aware that some federal credit unions want to donate to veterans' organizations through CDAs. Under section 501(c)(19), a ''veterans' organization'' must meet the following requirements:

- It must be organized in the United States or any of its possessions;
- At least 75 percent of its members must be past or present members of the United States Armed Forces;
- At least 97.5 percent of its members must be:
  - present or former members of the United States Armed Forces,
  - cadets (including only students in college or university ROTC programs or at Armed Services academies), or
  - spouses, widows, widowers, ancestors, or lineal descendants of individuals referred to in the first or second bullet;
- It must be operated exclusively for one or more of the following purposes:
  - to promote the social welfare of the community (*e.g.,* to promote the common good and general welfare of the people of the community);
  - to assist disabled and needy war veterans and members of the United States Armed Forces and their dependents—and the widows and orphans of deceased veterans;
  - to provide entertainment, care, and assistance to hospitalized veterans or members of the United States Armed Forces;
  - to carry on programs to perpetuate the memory of deceased veterans and members of the United States Armed Forces and comfort their survivors;
  - to conduct programs for religious, charitable, scientific, literary or educational purposes;
  - to sponsor or participate in activities of a patriotic nature;
  - to provide insurance benefits for members or their dependents; or
  - to provide social and recreational activities for members.
- No part of its net earnings may inure to the benefit of any private shareholder or individual.

An organization may also be exempt under section 501(c)(19) as an auxiliary unit or society of a veterans' post or organization if it meets the following requirements:

- It is affiliated with, and organized in accordance with the bylaws and regulations of, a veterans' post or organization described above;
- At least 75 percent of its members are veterans, spouses of veterans, or related to a veteran within two degrees of consanguinity (*i.e.,* grandparent, brother, sister, grandchild represent the most distant allowable relationships);
- All members are either members of a veterans' post or organizations described above, or spouses of a member of such post or organization, or are related to a member of such post or organization within two degrees of consanguinity;
- No part of its net earning inures to the benefit of any private shareholder or individual.

Finally, an organization may be exempt under section 501(c)(19) as a trust or foundation for a veterans' post or organization if it meets the following requirements:

- It is valid under local law and, if organized for charitable purposes, has a dissolution provision described in section 1.501(c)(3)–1(b)(4) of the Income Tax Regulations;
- The corpus or income cannot be diverted or used other than to fund a veterans' post or organization for charitable purposes or as an insurance set-aside;
- The trust income is not unreasonably accumulated, and a substantial portion of the income is distributed to such veteran post or organization, or for exclusively religious, charitable, scientific, literary, educational or prevention of cruelty to children or animal purposes;
- It is organized exclusively for one or more of those purposes enumerated above for which a veterans' post or organization itself may be organized.[5]

The Board believes that the attributes listed above of section 501(c)(19) organizations are aligned with the purposes of the current CDA rule. As such, the Board is proposing to add ''veterans' organizations'' meeting the criteria of section 501(c)(19) to the definition of a ''qualified charity.''

B. Questions on Other Organizations

The Board believes section 501(c) of the Internal Revenue Code is a good starting point for determining whether there may be other types of organizations that could be included in the definition of a ''qualified charity'' in the current CDA rule. While all section 501(c) organizations are non-profits, not all of them are charitable in nature. The Board has reviewed the list of organizations in section 501(c) and believes that several of them may be considered charitable in nature. The Board, however, is requesting feedback from stakeholders on whether any of these organizations should be considered as qualified charities in future rulemakings. In addition, the Board is requesting feedback on any other organizations the Board should consider for this purpose that are not enumerated in section 501(c). The Board, therefore, is posing the following questions and instructions to stakeholders and interested parties for use in any future amendments the Board may make to the current CDA rule.

1. Should the Board consider adding additional groups, organizations, or entities to the definition of a ''qualified charity?''
2. If yes, which other groups, organizations, or entities should the Board consider? Note, commenters are not limited only to those entities listed in section 501(c) of the Internal Revenue Code.
3. For any suggested group, organization, or entity, please describe how it is non-profit, organized for a charitable purpose, and how it otherwise meets the purposes of the current CDA rule.

III. Regulatory Procedures

A. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) applies to rulemaking in which an agency creates a new or amends existing information collection requirements.[6] For purposes of the PRA, an information collection requirement may take the form of a reporting, recordkeeping, or a third-party disclosure requirement. The NCUA may not conduct or sponsor, and the respondent is not required to respond to an information collection, unless it displays a valid Office of Management and Budget (OMB) control number. OMB has approved the current information collection requirements and assigned them control number 3133–0133. This rule proposes to add a new entity to the definition of a ''qualified charity.'' NCUA does not anticipate an increase in the recordkeeping requirement associated with CDAs.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act[7] requires the NCUA to prepare an analysis to describe any significant economic impact a regulation may have on a substantial number of small entities (defined as credit unions with under $100 million in assets).[8] This proposed rule merely adds an additional category of permissible entities to which a federal credit union may donate through

[5] 26 U.S.C. 503(c)(19); 26 CFR 1–501(c)(19)–1. *See https://www.irs.gov/charities-non-profits/other-non-profits/veterans-organizations.*

[6] 44 U.S.C. 3507(d); 5 CFR part 1320.

[7] 5 U.S.C. 601 *et seq.*

[8] *Id.* at 603(a); NCUA Interpretive Ruling and Policy Statement 15–2.

a CDA. Currently, there are 145 federal credit unions utilizing CDAs. The NCUA estimates that a small number of federal credit unions would utilize the authority granted in this rule. In addition, as the rule merely adds another category of permissible entities a federal credit union may donate to through a CDA, the NCUA does not find that this rule would impose a cost or burden on any federal credit unions. As such, this rule will not have a significant economic impact on a substantial number of small entities.

C. Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their actions on state and local interests. The NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the Executive Order to adhere to fundamental federalism principles.

This proposed rule would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. The proposed rule would affect only federal credit unions. Federally insured, state-chartered credit unions derive their investment and incidental powers authority from state law, and the NCUA's regulations do not determine the permissibility of such investments or activities. The NCUA has therefore determined that this proposed rule does not constitute a policy that has federalism implications for purposes of the Executive Order.

D. Assessment of Federal Regulations and Policies on Families

The NCUA has determined that this proposed rule would not affect family well-being within the meaning of section 654 of the Treasury and General Government Appropriations Act, 1999, Public Law 105–277, 112 Stat. 2681 (1998). The proposed rule could increase charitable donations by federal credit unions to organizations that provide benefits or services to veterans' households, but the Board believes that the connection would not be direct and is uncertain. However, the Board welcomes comments on this issue to further inform its analysis of this matter.

List of Subjects in 12 CFR Part 721

Credit unions.

By the NCUA Board on May 25, 2023.

Melane Conyers-Ausbrooks,

Secretary of the Board.

For the reasons discussed in the preamble, the NCUA Board proposes to amend 12 CFR part 721, as follows:

PART 721—INCIDENTAL POWERS

■ 1. The authority citation for part 721 continues to read as follows:

Authority: 12 U.S.C. 1757(17), 1766 and 1789.

■ 2. Revise § 721.3(b)(2)(vii)(B) to read as follows:

§ 721.3 What categories of activities are preapproved as incidental powers necessary or requisite to carry on a credit union's business?

* * * * *

(b) * * *

(2) * * *

(vii) * * *

(B) Qualified charity is a charitable organization or other non-profit entity recognized as exempt from taxation under sections 501(c)(3) or 501(c)(19) of the Internal Revenue Code.

BILLING CODE 7535–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–1052; Project Identifier MCAI–2023–00260–T]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc., Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Bombardier, Inc., Model CL–600–1A11 (600), CL–600–2A12 (601), and CL–600–2B16 (601–3A, 601–3R, and 604 Variants) airplanes. This proposed AD was prompted by an uncommanded flap extension accompanied by a flaps fail caution message during climb. This proposed AD requires initial and repetitive operational tests of the flap control system. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by July 17, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–1052; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For service information identified in this NPRM, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email *ac.yul@aero.bombardier.com;* website *bombardier.com.*
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Chirayu Gupta, Aerospace Engineer, Mechanical Systems and Administrative Services Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2023–1052; Project Identifier MCAI–2023–00260–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing

date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Chirayu Gupta, Aerospace Engineer, Mechanical Systems and Administrative Services Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *9-avs-nyaco-cos@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

Transport Canada, which is the aviation authority for Canada, has issued AD CF–2023–07, dated February 10, 2023 (Transport Canada AD CF–2023–07) (also referred to as the MCAI), to correct an unsafe condition on certain Bombardier, Inc., Model CL–600–1A11 (600), CL–600–2A12 (601), and CL–600–2B16 (601–3A, 601–3R, and 604 Variants) airplanes. The MCAI states a Model CL–600–2B16 airplane experienced an uncommanded flap extension from 0 to 45 degrees, accompanied by a flaps fail caution message during climb. The airplane returned to the departure airport without further incident. The investigations found that the flap control system failed to arrest the uncommanded movement due to a failed retract relay. The failed retract relay also caused the flap control system to operate at half speed, which was undetected during previous flights. The root cause of the uncommanded flap extension remains under investigation. Transport Canada considers its AD to be an interim action, and further AD action may follow. See Transport Canada AD CF–2023–07 for additional background information.

The FAA is proposing this AD to address the failure of the flap control system to arrest the uncommanded flap extension. The unsafe condition, if not addressed, could lead to the loss of control of the airplane.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2023–1052.

Related Service Information Under 1 CFR Part 51

The FAA reviewed the following service information, which specifies procedures for performing initial and repetitive operational tests of the inboard and outboard flaps to verify the functionality of the retract relays. The service information also specifies contacting the manufacturer for corrective action for any anomaly found during an operational test. These documents are distinct since they apply to different airplane models.

- Bombardier Service Bulletin 600–0780, dated December 29, 2022.
- Bombardier Service Bulletin 601–1112, Revision 01, dated February 23, 2023.
- Bombardier Service Bulletin 604–27–040, dated December 29, 2022.
- Bombardier Service Bulletin 605–27–011, dated December 29, 2022.
- Bombardier Service Bulletin 650–27–004, dated December 29, 2022.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the aviation authority of another country, and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI and service information referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in the service information already described.

Interim Action

The FAA considers this proposed AD would be an interim action. If final action is later identified, the FAA might consider further rulemaking then.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 1,124 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
1 work-hour × $85 per hour = $85	$0	$85	$95,540 per test cycle.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or

develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Bombardier, Inc.: Docket No. FAA–2023–1052; Project Identifier MCAI–2023–00260–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by July 17, 2023.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Bombardier, Inc., airplanes, certificated in any category, identified in paragraphs (c)(1) through (3) of this AD.

(1) Model CL–600–1A11 (600) airplanes, serial numbers 1004 through 1085 inclusive.

(2) Model CL–600–2A12 (601) airplanes, serial numbers 3001 through 3066 inclusive.

(3) Model CL–600–2B16 (601–3A, 601–3R, and 604 Variants) airplanes, serial numbers 5001 through 5194 inclusive, 5301 through 5665 inclusive, 5701 through 5988 inclusive, and 6050 through 6999 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight Controls.

(e) Unsafe Condition

This AD was prompted by a Model CL–600–2B16 airplane that experienced an uncommanded flap extension from 0 to 45 degrees, accompanied by a flaps fail caution message during climb. The FAA is issuing this AD to address the failure of the flap control system to arrest the uncommanded flap extension. The unsafe condition, if not addressed, could lead to the loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Initial Operational Test

Within 100 flight hours or 15 months, whichever occurs first after the effective date of this AD, perform an initial operational test of the inboard and outboard flaps, and all applicable corrective actions, in accordance with Section 2.B. of the Accomplishment Instructions of the applicable service information identified in paragraphs (g)(1) through (5) of this AD. Corrective actions must be done before further flight after the test.

(1) For Model CL–600–1A11 (Challenger 600) airplanes, serial numbers 1004 through 1085 inclusive: Use Bombardier Service Bulletin 600–0780, dated December 29, 2022.

(2) For Model CL–600–2A12 (Challenger 601) airplanes, serial numbers 3001 through 3066 inclusive, and Model CL–600–2B16 (Challenger 601) airplanes, serial numbers 5001 through 5194 inclusive: Use Bombardier Service Bulletin 601–1112, Revision 01, dated February 23, 2023.

(3) For Model CL–600–2B16 (Challenger 604) airplanes, serial numbers 5301 through 5665 inclusive: Use Bombardier Service Bulletin 604–27–040, dated December 29, 2022.

(4) For Model CL–600–2B16 (Challenger 605) airplanes, serial numbers 5701 through 5988 inclusive: Use Bombardier Service Bulletin 605–27–011, dated December 29, 2022.

(5) For Model CL–600–2B16 (Challenger 650) airplanes, serial numbers 6050 through 6999 inclusive: Use Bombardier Service Bulletin 650–27–004, dated December 29, 2022.

(h) Repetitive Operational Tests

Repeat the operational test required by paragraph (g) of this AD at the applicable time specified in paragraph (h)(1) through (3) of this AD.

(1) For Model CL–600–1A11 airplanes: Repeat at intervals not to exceed 100 flight hours.

(2) For the airplanes identified in paragraphs (h)(2)(i) and (ii) of this AD: Repeat within the repetitive intervals specified in Section 1.D. of Bombardier Service Bulletin 601–1112, Revision 01, dated February 23, 2023.

(i) Model CL–600–2A12 airplanes.

(ii) Model CL–600–2B16 airplanes, serial numbers 5001 through 5194.

(3) For the airplanes identified in paragraphs (h)(3)(i) through (iii) of this AD: Repeat the test at intervals not to exceed 400 flight hours.

(i) Model CL–600–2B16 airplanes, serial numbers 5301 through 5665.

(ii) Model CL–600–2B16 airplanes, serial numbers 5701 through 5988.

(iii) Model CL–600–2B16 airplanes, serial numbers 6050 through 6999.

(i) Credit for Previous Actions

For the airplanes identified in paragraph (h)(2) of this AD: This paragraph provides credit for actions required by paragraphs (g) and (h) of this AD, if those actions were performed before the effective date of this AD using Bombardier Service Bulletin 601–1112, dated December 29, 2022.

(j) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the New York ACO Branch, mail it to ATTN: Program Manager, Continuing Operational Safety, at the address identified in paragraph (k)(2) of this AD or email to: *9-avs-nyaco-cos@faa.gov.* If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, New York ACO Branch, FAA; or Transport Canada; or Bombardier, Inc.'s Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(k) Additional Information

(1) Refer to Transport Canada AD CF–2023–07, dated February 10, 2023, for related information. This Transport Canada AD may be found in the AD docket at *regulations.gov* under Docket No. FAA–2023–1052.

(2) For more information about this AD, contact Chirayu Gupta, Aerospace Engineer, Mechanical Systems and Administrative Services Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *9-avs-nyaco-cos@faa.gov.*

(3) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (l)(3) and (4) of this AD.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference

(IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Bombardier Service Bulletin 600–0780, dated December 29, 2022.

(ii) Bombardier Service Bulletin 601–1112, Revision 01, dated February 23, 2023.

(iii) Bombardier Service Bulletin 604–27–040, dated December 29, 2022.

(iv) Bombardier Service Bulletin 605–27–011, dated December 29, 2022.

(v) Bombardier Service Bulletin 650–27–004, dated December 29, 2022.

(3) For service information identified in this AD, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email *ac.yul@aero.bombardier.com;* website *bombardier.com*.

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on May 24, 2023.

Ross Landes,

Deputy Director for Regulatory Operations, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

FEDERAL TRADE COMMISSION

16 CFR Part 1

[File No. R307002]

Petition for Rulemaking of National Association of Consumer Advocates, Consumer Federation of America, Center for Responsible Lending, Consumers for Auto Reliability and Safety, National Consumer Law Center, and U.S. PIRG

AGENCY: Federal Trade Commission.

ACTION: Petition for rulemaking; request for comment.

SUMMARY: Please take notice that the Federal Trade Commission (''Commission'') received a petition for rulemaking from the National Association of Consumer Advocates, Consumer Federation of America, Center for Responsible Lending, Consumers for Auto Reliability and Safety, National Consumer Law Center, and U.S. PIRG, and has published that petition online at *https://www.regulations.gov.* The Commission invites written comments concerning the petition. Publication of this petition is pursuant to the Commission's Rules of Practice and Procedure and does not affect the legal status of the petition or its final disposition.

DATES: Comments must identify the petition docket number and be filed by June 30, 2023.

ADDRESSES: You may view the petition, identified by docket number FTC–2023–0035, and submit written comments concerning its merits by using the Federal eRulemaking Portal at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit sensitive or confidential information. You may read background documents or comments received at *https://www.regulations.gov* at any time.

FOR FURTHER INFORMATION CONTACT: Daniel Freer, Office of the Secretary, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580, *dfreer@ftc.gov,* (202) 326–2663.

SUPPLEMENTARY INFORMATION: Pursuant to Section 18(a)(1)(B) of the Federal Trade Commission Act, 15 U.S.C. 57a(1)(B), and FTC Rule 1.31(f), 16 CFR 1.31(f), notice is hereby given that the above-captioned petition has been filed with the Secretary of the Commission and has been placed on the public record for a period of thirty (30) days. Any person may submit comments in support of or in opposition to the petition. All timely and responsive comments submitted in connection with this petition will become part of the public record. The Commission will not consider the petition's merits until after the comment period closes.

Because your comment will be placed on the publicly accessible website at *https://www.regulations.gov,* you are solely responsible for making sure your comment does not include any sensitive or confidential information. In particular, your comment should not include any sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . is privileged or confidential''—as provided by Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2).

Authority: 15 U.S.C. 46; 15 U.S.C. 57a; 5 U.S.C. 601 note.

April J. Tabor,

Secretary.

Coast Guard

33 CFR Part 165

[Docket Number USCG–2023–0380]

RIN 1625–AA00

Safety Zone; Hurricanes, Tropical Storms and Other Disasters in Southeast Texas and Southwest Louisiana

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish a permanent safety zone to be enforced in the event of hurricanes, tropical storms, and other disasters in southeast Texas and southwest Louisiana. This action is necessary to ensure the safety of the waters of the Port Arthur Captain of the Port (COTP) zone Port Arthur, TX. This proposed rulemaking would establish actions to be completed by industry and vessels in the COTP zone prior to landfall of hurricanes, tropical storms, and other disasters threatening Port Arthur, TX. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before June 15, 2023.

ADDRESSES: You may submit comments identified by docket number USCG–2023–0380 using the Federal Decision-Making Portal at *https://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Mr. Scott Whalen, Marine Safety Unit Port Arthur, U.S. Coast Guard; telephone 409–719–5086, email *douglas.g.hendrix2@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

Southeast Texas and southwest Louisiana has the potential to be affected by hurricanes, tropical storms and other disasters on a yearly basis, especially between the months of June and November. The Captain of the Port (COTP) Port Arthur proposes establishing a safety zone to provide for the safety of life during and subsequent to such storms.

The purpose of this rulemaking is to protect mariners, port infrastructure and the environment during and after extreme weather and other natural disasters. The Coast Guard is proposing this rulemaking under the authority in 46 U.S.C. 70034.

III. Discussion of Proposed Rule

The COTP Port Arthur is proposing to establish a safety zone to be enforced in case of hurricanes, tropical storms, and other disasters in southeast Texas and southwest Louisiana. This action is necessary to ensure the safety of the waters of the COTP Port Arthur zone. This proposed rule would establish actions to be completed by local industry and vessels in the COTP zone prior to landfall of hurricanes, tropical storms, and other disasters threatening the COTP zone. The proposed safety zone would consist of all navigable waters of the Port Arthur COTP zone, as prescribed in 33 CFR 3.40–25(b). The regulatory text we are proposing appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This NPRM has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB).

We expect the economic impact of this rule to be non-significant for the following reasons: (1) Vessel traffic and facilities would be impacted by this rule only during limited times while heavy weather or other disaster is expected to impact the Port Arthur COTP zone; (2) vessel traffic would be secured only during port conditions Yankee, Zulu, and Recovery and only in port areas potentially affected by gale force winds; and (3) the Coast Guard would issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the safety zone, and this rule would allow vessels to seek permission to remain in port.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section IV.A above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 (Federalism), if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of Government. We have analyzed this proposed rule under that order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the potential effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on

the human environment. This proposed rule involves a safety zone that would prohibit entry in certain waters of the Port Arthur COTP Zone for the duration needed to ensure safe transit of vessels and industry post hurricane, post storm, and post emergency. Normally such actions are categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A preliminary Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments through the Federal Decision-Making Portal at *https://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG- 2023–0380 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using *https://www.regulations.gov,* call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule for alternate instructions.

Viewing material in docket. To view documents mentioned in this proposed rule as being available in the docket, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the *https://www.regulations.gov* Frequently Asked Questions web page. Also, if you click on the Dockets tab and then the proposed rule, you should see a ''Subscribe'' option for email alerts. The option will notify you when comments are posted, or a final rule is published.

We review all comments received, but we will only post comments that address the topic of the proposed rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive.

Personal information. We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the docket in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 6 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add new § 165.804 to read as follows:

§ 165.804 Safety Zone; Hurricanes, Tropical Storms and Other Disasters in Southeast Texas and Southwest Louisiana.

(a) *Regulated Areas.* All navigable waters within the Port Arthur Captain of the Port (COTP) Zone, MSU Port Arthur, TX, as described in 33 CFR 3.40–28(b), during specified conditions.

(b) *Definitions.*

(1) *Designated Representative* means Coast Guard Patrol Commanders, including Coast Guard coxswains, petty officers, and other officers operating Coast Guard vessels, and Federal, state, and local officers designated by or assisting the COTP Port Arthur, in the enforcement of the regulated areas.

(2) *Port Condition WHISKEY* means a condition set by the COTP when weather advisories indicate sustained gale force winds (39–54 mph/34–47 knots) from a tropical or hurricane force storm are predicted to make landfall at the port within 72 hours.

(3) *Port Condition X–RAY* means a condition set by the COTP when weather advisories indicate sustained gale force winds (39–54 mph/34–47 knots) from a tropical or hurricane force storm are predicted to make landfall at the port within 48 hours.

(4) *Port Condition YANKEE* means a condition set by the COTP when weather advisories indicate that sustained gale force winds (39–54 mph/34–47 knots) from a tropical or hurricane force storm are predicted to make landfall at the port within 24 hours.

(5) *Port Condition ZULU* means a condition set by the COTP when weather advisories indicate that sustained gale force winds (39–54 mph/34–47 knots) from a tropical or hurricane force storm are predicted to make landfall at the port within 12 hours.

(6) *Port Condition RECOVERY* means the condition set when weather advisories indicate that sustained gale force winds from a tropical hurricane force storm are no longer predicted for the designated area. This port condition remains in effect until the regulated areas are safe and reopened to normal operations.

(c) Regulations.

(1) *Port Condition WHISKEY.* All vessel and port facilities must exercise due diligence in preparation for potential storm impacts. Ports and waterfront facilities must begin removing all debris and securing potential flying hazards. Oceangoing vessels 500 gross tons (GT) and above must make plans to depart no later than the setting of Port Condition Yankee unless authorized by the COTP. Vessels wishing to remain in port are required to submit a Notice of Intent to Remain In Port to the COTP prior to setting Port Condition X–Ray.

(2) *Port Condition X–RAY.* All vessels and port facilities must ensure that potential flying debris is removed or secured. Hazardous materials/pollution hazards must be secured in a safe manner and away from waterfront areas. Vessels over 500GT without an approval to remain in port must depart prior to the setting of Port Condition YANKEE. Vessels with the COTP's permission to remain in port must implement their pre-approved mooring arrangement. Terminal operators must prepare to terminate all cargo operations. The COTP may require additional precautions to ensure the safety of the ports and waterways.

(3) *Port Condition YANKEE.* Affected ports are closed to inbound vessel traffic. All oceangoing vessels greater than 500 Gross Tons must depart designated ports prior to the setting of Port Condition ZULU. Terminal operators must terminate all cargo operations not associated with storm preparations. Cargo operations associated with storm preparations include moving cargo within or off the port for securing purposes, port/facility equipment preparations, and similar activities, but do not include moving cargo onto the port or vessel loading/discharging operations unless specifically authorized by the COTP. All facilities must continue to operate in accordance with approved Facility Security Plans and comply with the requirements of the Maritime Transportation Security Act.

(4) *Port Condition ZULU.* Designated areas are closed to all vessel traffic except those specifically authorized by the COTP. Cargo operations are suspended, including bunkering and lightering. Waivers may be granted unless Cargo of Particular Hazard or Certain Dangerous Cargo is involved.

(5) *Port Condition RECOVERY.* Designated areas are closed to all commercial traffic and recreational vessels 65-feet in length and greater. Based on assessments of channel conditions, navigability concerns, and hazards to navigation, the COTP may permit vessel movements with restrictions. Restrictions may include, but are not limited to, preventing vessel movements, imposing draft, speed, size, horsepower or daylight restrictions or directing the use of specific routes. Vessels permitted to transit the regulated area shall comply with the lawful orders or directions given by the COTP or designated representative.

(6) *Safety Zones Notice.* The Coast Guard COTP will notify the maritime community of periods during which these safety zones will be in effect via Broadcast Notice to Mariners and Marine Safety Information Bulletin or by on-scene designated representatives.

(7) *Regulated Area Notice.* The Coast Guard will provide notice of the regulated area via Broadcast Notice to Mariners, Marine Safety Information Bulletin or by on-scene designated representatives.

(8) *Exception.* This regulation does not apply to authorized law enforcement agencies operating within the regulated area.

Dated: May 24, 2023.

Molly A. Wike,

Captain, U.S. Coast Guard, Captain of the Port Marine Safety Unit Port Arthur.

[FR Doc. 2023–11481 Filed 5–30–23; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–HQ–ES–2023–0053; FF09E21000 FXES1111090FEDR 234]

RIN 1018–BG55

Endangered and Threatened Wildlife and Plants; Endangered Species Status for Sira Curassow and Southern Helmeted Curassow

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to list the Sira curassow (*Pauxi koepckeae*) and southern helmeted curassow (*Pauxi unicornis*), two bird species from South America, as endangered species under the Endangered Species Act of 1973, as amended (Act). If we finalize this rule as proposed, it would add these species to the List of Endangered and Threatened Wildlife and extend the Act's protections to these species.

DATES: We will accept comments received or postmarked on or before July 31, 2023. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. eastern time on the closing date. We must receive requests for a public hearing, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by July 17, 2023.

ADDRESSES: You may submit comments by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: *https://www.regulations.gov.* In the Search box, enter FWS–HQ–ES–2023–0053, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the panel on the left side of the screen, under the Document Type heading, check the Proposed Rule box to locate this document. You may submit a comment by clicking on "Comment."

(2) *By hard copy:* Submit by U.S. mail to: Public Comments Processing, Attn: FWS–HQ–ES–2023–0053, U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We request that you send comments only by the methods described above. We will post all comments on *https://www.regulations.gov.* This generally means that we will post any personal information you provide us (see Information Requested, below, for more information).

Availability of supporting materials: Supporting materials, such as the species status assessment report, are available at *https://www.regulations.gov* at Docket No. FWS–HQ–ES–2023–0053.

FOR FURTHER INFORMATION CONTACT: Rachel London, Chief, Branch of Delisting and Foreign Species, Ecological Services Program, U.S. Fish and Wildlife Service, MS: ES, 5275 Leesburg Pike, Falls Church, VA 22041–3803; telephone 703–358–2171. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Information Requested

We intend that any final action resulting from this proposed rule will be based on the best scientific and commercial data available and be as accurate and as effective as possible. Therefore, we request comments or information from other governmental agencies, Native American Tribes, the scientific community, industry, or any other interested parties concerning this proposed rule. We particularly seek comments concerning:

(1) The species' biology, range, and population trends, including:

(a) Biological or ecological requirements of the species, including habitat requirements for feeding, breeding, and sheltering;

(b) Genetics and taxonomy;

(c) Historical and current range, including distribution patterns and the locations of any populations of these species;

(d) Historical and current population levels, and current and projected trends; and

(e) Past and ongoing conservation measures for the species, their habitats, or both.

(2) Threats and conservation actions affecting the species, including:

(a) Factors that may be affecting the continued existence of the species,

which may include habitat destruction, modification, or curtailment; overutilization; disease; predation; the inadequacy of existing regulatory mechanisms; or other natural or manmade factors.

(b) Biological, commercial trade, or other relevant data concerning any threats (or lack thereof) to these species.

(c) Existing regulations or conservation actions that may be addressing threats to these species.

(d) Existing regulations whether either of these species are protected species in their range countries.

(3) Additional information concerning the historical and current status of these species.

Please include sufficient information with your submission (such as scientific journal articles or other publications) to allow us to verify any scientific or commercial information you include.

Please note that submissions merely stating support for, or opposition to, the action under consideration without providing supporting information, although noted, do not provide substantial information necessary to support a determination. Section 4(b)(1)(A) of the Act (16 U.S.C. 1533(b)(1)(A)) directs that determinations as to whether any species is an endangered or a threatened species must be made solely on the basis of the best scientific and commercial data available.

You may submit your comments and materials concerning this proposed rule by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in **ADDRESSES**.

If you submit information via *https://www.regulations.gov,* your entire submission—including any personal identifying information—will be posted on the website. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on *https://www.regulations.gov.*

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on *https://www.regulations.gov.*

Because we will consider all comments and information we receive during the comment period, our final determinations may differ from this proposal. Based on the new information we receive (and any comments on that new information), we may conclude that these species are threatened instead of endangered, or we may conclude that these species do not warrant listing as either an endangered species or a threatened species.

Public Hearing

Section 4(b)(5) of the Act (16 U.S.C. 1533(b)(5)) provides for a public hearing on this proposal, if requested. Requests must be received by the date specified in **DATES**. Such requests must be sent to the address shown in **FOR FURTHER INFORMATION CONTACT**. We will schedule a public hearing on this proposal, if requested, and announce the date, time, and place of the hearing, as well as how to obtain reasonable accommodations, in the **Federal Register** at least 15 days before the hearing. We may hold the public hearing in person or virtually via webinar. We will announce any public hearing on our website, in addition to the **Federal Register**. The use of virtual public hearings is consistent with our regulations at 50 CFR 424.16(c)(3).

Previous Federal Actions

We received a petition from the International Council for Bird Preservation to add 53 foreign bird species, including the southern helmeted curassow, to the List of Endangered and Threatened Wildlife on May 6, 1991. On December 16, 1991 (56 FR 65207), we made a substantial 90-day finding that the 53 species may be warranted for listing. On March 28, 1994 (59 FR 14496), we identified the southern helmeted curassow as a candidate under the Act. Candidates are those fish, wildlife, and plants for which we have on file sufficient information on biological vulnerability and threats to support preparation of a listing proposal, but for which development of a listing rule is precluded by other higher priority listing activities. Subsequently, on May 21, 2004, we considered new information for 73 foreign taxa, including the southern helmeted curassow, for which we had previously found listing to be warranted but precluded (69 FR 29354). The 2004 notice retained warranted but precluded findings for 51 of the 73 foreign taxa based on information gathered since 1995; we determined that the southern helmeted curassow should retain its status as a candidate species.

At the time we identified the southern helmeted curassow (*Pauxi unicornis*) as a candidate in 1994 and the subsequent review in 2004, the southern helmeted curassow and Sira curassow were considered subspecies of *Pauxi unicornis.* However, in 2014, the Sira curassow (*Pauxi koepckeae*) was recognized as a full species and became a candidate species under the Act in 2016 (81 FR 71457; October 17, 2016).

Peer Review

In 2022, a species status assessment (SSA) team prepared an SSA report for the Sira curassow and southern helmeted curassow. The SSA team was composed of Service biologists, in consultation with other species experts. The SSA report represents a compilation of the best scientific and commercial data available concerning the status of the species, including the impacts of past, present, and future factors (both negative and beneficial) affecting the species.

In accordance with our joint policy on peer review published in the **Federal Register** on July 1, 1994 (59 FR 34270), and our August 22, 2016, memorandum updating and clarifying the role of peer review of listing actions under the Act, we solicited independent scientific review of the information contained in the SSA report. The Service sent the SSA report to five independent peer reviewers and received one response. Results of this structured peer-review process can be found at Docket No. FWS–HQ–ES–2023–0053 on *https://www.regulations.gov.* In preparing this proposed rule, we incorporated the results of the review, as appropriate, into the SSA report, which is the foundation for this proposed rule.

Summary of Peer Reviewer Comments

As discussed in Peer Review above, we received comments from one peer reviewer on the draft SSA report. We reviewed all comments we received from the peer reviewer for substantive issues and new information regarding the information contained in the SSA report.

The peer reviewer generally concurred with our methods and conclusion, and provided additional information, clarifications, and suggestions, including updates on the threat of forest loss within the range of the southern helmeted curassow. Additionally, the peer reviewer provided updated observations and distribution of the southern helmeted curassow throughout its range, particularly in the northern extent of its range. The peer reviewer's comments did not result in substantive changes to our analysis and conclusions within the SSA report. We did not receive any peer-review comments regarding the Sira curassow.

Proposed Listing Determination

Background

The Sira curassow (*Pauxi koepckeae*), which is endemic to central Peru, and

southern helmeted curassow (or horned curassow; *Pauxi unicornis*), which is endemic to central Bolivia, are gallinaceous birds (relating to the order Galliformes of heavy-bodied, largely terrestrial birds in the Cracidae family (subfamily Cracinae; del Hoyo 1994, in Hosner et al. 2016, p. 6; del Hoyo et al. 2020a, unpaginated)). Both species are large (83–94 centimeters (32–37 inches) in length) and relatively heavy-bodied (about 3.6 kilograms (8 pounds)) with bright red bills and a pale blue ''helmet'' (casque) atop their heads (del Hoyo et al. 2020b, unpaginated).

Both curassow species occur on the eastern side of the Andes Mountains of South America, although their ranges do not overlap and are separated by more than 1,000 kilometers (621 miles) (Gastañaga et al. 2007, p. 63). The Sira curassow is resident in cloud forests at mid to high elevation (1,100 to 1,500 meters (3,609 to 4,921 feet) above sea level (asl); Begazo 2022, unpaginated; Beirne et al. 2017, p. 150; Gastañaga et al. 2011, p. 268) and is known only from the Cerros del Sira in central Peru, which is an isolated mountain outcrop of the Peruvian Andes. Almost all the species' range in the El Sira Communal Reserve (Birdlife International (BLI) 2023a, unpaginated; Gastañaga et al. 2011, p. 269; Gastañaga et al. 2007, p. 63; Tobias and del Hoyo 2006, p. 61). The southern helmeted curassow is resident at lower elevations (400 to 1,400 meters (1,312 to 4,593 feet) asl) in upper tropical and lower montane zones in central Bolivia (Herzog and Kessler 1998, pp. 46–47; Cox et al. 1997, p. 200; Cordier 1971, p. 10; Birds of Bolivia 2019, unpaginated; Beirne et al. 2017, p. 150), although most observations are between 500 and 900 meters (1,640 to 2,953 feet) asl (Armonía 2021, p. 3). The species occurs only within three national parks in central Bolivia: Amboró, Carrasco, and Isiboro-Securé Indigenous Territory and National Park (TIPNIS) (BLI 2023b, unpaginated).

Both the Sira curassow and southern helmeted curassow are endemic to small areas in relatively narrow elevational bands and are considered rare, locally uncommon, and their populations are decreasing (BLI 2023a, unpaginated; 2023b, unpaginated). Population densities for both species are estimated at less than one individual per square kilometer. The Sira curassow was surveyed in 2006 and 2008, but rangewide surveys have not occurred for this species (Gastañaga et al. 2011, p. 273). The species was observed in one population at four locations, all located within 30 km of each other (Gastañaga et al. 2011, p. 273). The Sira curassow's population is very small (50–249 mature individuals) and occurs within 550 square kilometers (212 square miles) (BLI 2023a, unpaginated; MacLeod and Gastañaga in litt. 2014, cited in BLI 2018a, unpaginated). The southern helmeted curassow was surveyed in 2018 and 2021 in the three national parks where the species resides. The southern helmeted curassow's population is also small and is less than what it was historically, including declining by 90 percent over the past 20 years (Boorsma 2023, pers. comm., unpaginated). The population is currently estimated at 1,000–4,999 individuals within 10,700 square kilometers (4,131 square miles) (BLI 2023b, unpaginated; Armonía 2018, pp. 3–4; Boorsma 2023, pers. comm., unpaginated). Information about the status of both species populations is supplemented with anecdotal information based on interviews with local indigenous communities. The following table presents population information for each species:

TABLE—SIRA CURASSOW AND SOUTHERN HELMETED CURASSOW POPULATION SIZE, COUNTRY OF ORIGIN, AND DISTRIBUTION. AS NOTED ABOVE, THE POPULATION TREND FOR THESE SPECIES IS DECREASING

Species	Population	Country	Range/distribution
Sira curassow	50 to 249 mature individuals	Peru	Cerros del Sira; in the El Sira Communal Reserve.
Southern helmeted curassow	1,000 to 4,999 individuals	Bolivia	Amboró and Carrasco National Parks and Isiboro-Securé Indigenous Territory and National Park (TIPNIS).

The Sira curassow and southern helmeted curassows are both large, ground-dwelling birds very similar in appearance and life history. Large body size in tropical birds is often associated with large territory size, small population size, and low reproductive rate (Pearson et al. 2010, p. 508). The Sira curassow and southern helmeted curassow likely take at least 2 to 3 years to reach sexual maturity and have low reproductive outputs as females lay one egg per clutch (Cox et al. 1997, p. 207; Banks 1998, p. 154). We are not aware of how many clutches per year these species produce in the wild; however, in captivity, the southern helmeted curassow produced four clutches within one year, each with one egg per clutch (Banks 1998, p. 154). Generation time, which is the average time between two consecutive generations in lineages of a population, is estimated at 14.5 years (BLI 2023a and 2023b, unpaginated). Detailed information on the biology of both species is limited because, despite their relatively large size, these species are difficult to detect and not well studied.

Regulatory and Analytical Framework

Regulatory Framework

Section 4 of the Act (16 U.S.C. 1533) and the implementing regulations in title 50 of the Code of Federal Regulations set forth the procedures for determining whether a species is an endangered species or a threatened species, issuing protective regulations for threatened species, and designating critical habitat for endangered and threatened species. In 2019, jointly with the National Marine Fisheries Service, the Service issued a final rule that revised the regulations in 50 CFR part 424 regarding how we add, remove, and reclassify endangered and threatened species and the criteria for designating listed species' critical habitat (84 FR 45020; August 27, 2019). On the same day, the Service also issued final regulations that, for species listed as threatened species after September 26, 2019, no longer automatically applied the prohibitions that section 9 of the Act applies to endangered species (84 FR 44753; August 27, 2019).

The Act defines an ''endangered species'' as a species that is in danger of extinction throughout all or a significant portion of its range, and a ''threatened species'' as a species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether any species is an endangered species or a threatened species because of any of the following factors:

(A) The present or threatened destruction, modification, or curtailment of its habitat or range;

(B) Overutilization for commercial, recreational, scientific, or educational purposes;

(C) Disease or predation;

(D) The inadequacy of existing regulatory mechanisms; or

(E) Other natural or manmade factors affecting its continued existence.

These factors represent broad categories of natural or human-caused actions or conditions that could have an effect on a species' continued existence. In evaluating these actions and conditions, we look for those that may have a negative effect on individuals of the species, as well as other actions or conditions that may ameliorate any negative effects or may have positive effects.

We use the term ''threat'' to refer in general to actions or conditions that are known to or are reasonably likely to negatively affect individuals of a species. The term ''threat'' includes actions or conditions that have a direct impact on individuals (direct impacts), as well as those that affect individuals through alteration of their habitat or required resources (stressors). The term ''threat'' may encompass—either together or separately—the source of the action or condition or the action or condition itself.

However, the mere identification of any threat(s) does not necessarily mean that the species meets the statutory definition of an ''endangered species'' or a ''threatened species.'' In determining whether a species meets either definition, we must evaluate all identified threats by considering the species' expected response and the effects of the threats—in light of those actions and conditions that will ameliorate the threats—on an individual, population, and species level. We evaluate each threat and its expected effects on the species, then analyze the cumulative effect of all of the threats on the species as a whole. We also consider the cumulative effect of the threats in light of those actions and conditions that will have positive effects on the species, such as any existing regulatory mechanisms or conservation efforts. The Secretary determines whether the species meets the definition of an ''endangered species'' or a ''threatened species'' only after conducting this cumulative analysis and describing the expected effect on the species now and in the foreseeable future.

The Act does not define the term ''foreseeable future,'' which appears in the statutory definition of ''threatened species.'' Our implementing regulations at 50 CFR 424.11(d) set forth a framework for evaluating the foreseeable future on a case-by-case basis. The term ''foreseeable future'' extends only so far into the future as we can reasonably determine that both the future threats and the species' responses to those threats are likely. In other words, the foreseeable future is the period of time in which we can make reliable predictions. ''Reliable'' does not mean ''certain''; it means sufficient to provide a reasonable degree of confidence in the prediction. Thus, a prediction is reliable if it is reasonable to depend on it when making decisions.

It is not always possible or necessary to define the foreseeable future as a particular number of years. Analysis of the foreseeable future uses the best scientific and commercial data available and should consider the timeframes applicable to the relevant threats and to the species' likely responses to those threats in view of its life-history characteristics. Data that are typically relevant to assessing the species' biological response include species-specific factors such as lifespan, reproductive rates or productivity, certain behaviors, and other demographic factors.

Analytical Framework

The SSA report documents the results of our comprehensive biological review of the best scientific and commercial data regarding the status of the species, including an assessment of the potential threats to the species. The SSA report does not represent our decision on whether the species should be proposed for listing as an endangered or threatened species under the Act. However, it does provide the scientific basis that informs our regulatory decisions, which involve the further application of standards within the Act and its implementing regulations and policies.

To assess the viability of Sira curassow and southern helmeted curassow, we used the three conservation biology principles of resiliency, redundancy, and representation (Shaffer and Stein 2000, pp. 306–310). Briefly, resiliency is the ability of the species to withstand environmental and demographic stochasticity (for example, wet or dry, warm or cold years), redundancy is the ability of the species to withstand catastrophic events (for example, droughts, large pollution events), and representation is the ability of the species to adapt to both near-term and long-term changes in its physical and biological environment (for example, climate conditions, pathogens). In general, species viability will increase with increases in (or decrease with decreases in) resiliency, redundancy, and representation (Smith et al. 2018, p. 306). Using these principles, we identified the species' ecological requirements for survival and reproduction at the individual, population, and species levels, and described the beneficial and risk factors influencing the species' viability.

The SSA process can be categorized into three sequential stages. During the first stage, we evaluated the individual species' life-history needs. The next stage involved an assessment of the historical and current condition of the species' demographics and habitat characteristics, including an explanation of how the species arrived at its current condition. The final stage of the SSA involved making predictions about the species' responses to positive and negative environmental and anthropogenic influences. Throughout all of these stages, we used the best available data to characterize viability as the ability of a species to sustain populations in the wild over time. We use this data to inform our regulatory decision.

The following is a summary of the key results and conclusions from the SSA report; the full SSA report can be found at Docket No. FWS–HQ–ES–2023–0053 on *https://www.regulations.gov.*

Summary of Biological Status and Threats

In this discussion, we review the biological condition of the species and their resources, and the threats that influence the species' current and future condition, in order to assess the species' overall viability and the risks to that viability.

The Sira curassow and southern helmeted curassows are both large, ground-dwelling birds very similar in appearance and life history. These species occur in the Yungas forests and adjacent evergreen forest and rely on dense to semi-open primary forested areas with relatively open understory.

Large tropical birds, such as the two curassow species, are often associated with large territory size (Pearson et al. 2010, p. 508; Thorton et al. 2012, p. 572; Rios et al. 2021, p. 418). However, the forest area or patch size required for the Sira curassow and southern helmeted curassow is unknown. These species are primarily frugivores (fruit-eaters) and they require larger forested patch sizes than non-frugivores because they depend on naturally patchy resources in larger home ranges. Fragmentation into smaller forest patches could cause scarcity and a reduction of food resources within those smaller fragments. As patch size decreases, large-bodied species are generally at a disadvantage because they need more space to nest and forage compared to small-ranging species (Kattan et al.

1994, pp. 141–143; Lees and Peres 2009, pp. 286–288; Lees and Peres 2010, p. 619; Vetter et al. 2011, p. 6; Thorton et al. 2012, p. 572; Kattan et al. 2016, pp. 27–28; Rios et al. 2021, pp. 416–418). The forested and steep slopes where the species occur may provide some protection from human influence.

Hunting, habitat loss and degradation, small population size, climate change, and protected areas are the main factors that affect the species' viability throughout their ranges. Hunting is the primary factor that negatively affects the Sira curassow and southern helmeted curassow throughout their respective ranges (del Hoyo et al. 2020a, 2020b, unpaginated). Habitat loss and degradation affect both species, although to a lesser degree than hunting (Rios et al. 2021, p. 418). Limited loss of forest cover and degradation has occurred within the range of these species because of small-scale agriculture such as coca plantations and roadbuilding. However, human incursions into the protected areas are likely to increase. Because habitat loss and hunting pressure often work in tandem, further human encroachment into their habitats that results in deforestation, roadbuilding, and other land clearance creates opportunities to increase human encounters and hunting opportunities (Laurance et al. 2009, p. 662). Literature reviews of several species in the cracid family, including curassows, demonstrate that they are more likely to persist in forested landscapes with low human density and greater distance from human settlements, primarily because these forested areas would be unaffected, or minimally affected by hunting pressure (Thorton et al. 2012, p. 572; Kattan et al. 2016, pp. 27–28; Rios et al. 2021, pp. 416–418).

Climate change will result in additional loss of forested habitat for these species by shifting these species' habitat upslope, reducing these species' range because the geometric shape of mountains means there is less area on mountain slopes as elevation increases (Chen et al. 2011, entire; Freeman et al. 2018, p. 11983; Forero-Medina et al. 2011, entire; Sekercioglu et al. 2012, p. 3). A meta-analysis of existing data for a suite of taxonomic groups across multiple geographic regions and a study of tropical birds within the El Sira Communal Reserve in Peru showed a median shift to higher elevations of approximately 10 meters per decade (Chen et al 2011, p. 1024; Forero-Medina et al. 2011, p. 4). In the case of tropical bird species in the El Sira Communal Reserve, a gradual, upward shift occurred because of changes in temperature, habitat conditions, and the availability of food resources (Forero-Medina et al. 2011, p. 4). Because birds are endothermic and may tolerate a wider range of temperatures, species that shift their ranges may be responding more to gradual changes in habitat availability, food resources based on long-lived elements of their ecosystem (trees), and response of competitors, than to temperatures, per se (Forero-Medina et al. 2011, p. 4). However, habitat expansion to newly suitable areas will not take place at the same rate as habitat loss due to climate change, especially for relatively sedentary tropical forest species (Sekercioglu et al. 2012, p. 12). Vegetation changes makes it more difficult for species to find suitable habitat that will provide their preferred climate envelope and nesting and foraging needs (Forero-Medina et al. 2011, p. 4).

Almost all the Sira curassow's range is within the El Sira Communal Reserve in Peru. The southern helmeted curassow's range in Bolivia is within three national parks: Amboró, Carrasco, and TIPNIS. The protected areas where these species occur were designated by laws in Peru and Bolivia and are primarily inhabited by local indigenous communities that share management responsibilities with government ministries. The protected areas have been somewhat successful at limiting the magnitude of negative effects to biodiversity within the protected area boundaries. However, the lack of personnel and financial resources make the enforcement of the protected area boundaries difficult, which has resulted in the loss of wildlife because of continued hunting by locals and people from outside the protected areas and loss of primary forest resulting from small-scale agriculture, illegal logging, and roadbuilding within the protected area boundaries (Bucklin 2010, p. 44; Solano 2010, p. 37).

Conservation Efforts and Regulatory Mechanisms

Our evaluation of the status of the species takes into account the extent to which threats are reduced or removed as a result of conservation efforts or existing regulatory mechanisms.

Within Peru and Bolivia, we do not have information on whether either of these species are protected species under existing laws in their range countries. However, the Sira curassow and southern helmeted curassow reside in protected areas throughout their respective ranges. Almost all the Sira curassow's range is within the El Sira Communal Reserve in Peru. The southern helmeted curassow's range in Bolivia is within three national parks: Amboró, Carrasco, and TIPNIS.

In Peru, policies on protected areas were established in the Natural Protected Areas Act (1997), the Master Plan for Natural Protected Areas (1999), and the General Environmental Act (2005) (Solano 2010, pp. 6–7, 46–49). The primary objective of the protected areas is the conservation of biological diversity (Solano 2010, pp. 12–13). Protected areas are monitored by the Intendancy of Protected Natural Areas and managed by the National Service for Natural Protected Areas, a specialized technical body under the Ministry of the Environment (Solano 2010, p. 6; Parkswatch 2003, p. 6).

The El Sira Communal Reserve was established in 2001 by a Supreme Decree (038–2001–AG). The reserve is 616,413 hectares (1.5 million acres) and was established for the conservation of wildlife and to acknowledge the rights of indigenous communities on their lands and consider the traditions and cultures of the local communities (Solano 2010, pp. 10–15, 50; WorldBank 2007, pp. 13–15; Parkswatch 2003, p. 5). The reserve is classified as an International Union for Conservation of Nature (IUCN) category VI protected area, which are protected areas that conserve ecosystems and habitats together with associated cultural values and traditional natural resource management systems (IUCN 2008, p. 2). A portion of the area is under sustainable natural resource management and where low-level non-industrial use of natural resources compatible with nature conservation is seen as one of the main aims of the area (IUCN 2023, unpaginated; UN Environment Programme 2020, unpaginated).

In Bolivia, the Political Constitution of the State (2009) defines protected areas as a common good that is part of the natural and cultural heritage of the country and that fulfills environmental, cultural, social, and economic functions for sustainable development. Likewise, the Framework Law of Mother Earth and Integral Development for Living Well (No. 300; 2012) indicates the System of Protected Areas as one of the main instruments for biodiversity (Elkins et al. 2014, p. 102; Lexivox 2023, unpaginated).

The Bolivian National Protected Area System was established in 1992 through Environmental Law No. 1333 as a collective of interlinked protected areas of different categories (Wildlife Conservation Society (WCS) 2017, unpaginated). The core of the system is the national protected areas, which

includes Amboró, Carrasco, and TIPNIS and covers a total of 20 percent of Bolivia. The National Service of Protected Areas (Sernap) oversees the protected areas of national interest to conserve biological and cultural diversity (Sernap 2023, unpaginated). The involvement of local and indigenous communities in park management plays a vital role to recognize the rights of indigenous and local communities to preserve their cultural identity, value systems, knowledge and traditions, and territory (WCS 2017, unpaginated).

Overall, the protected areas in Peru and Bolivia were designated by laws and have been somewhat successful to limit the magnitude of negative effects to biodiversity within the protected area boundaries. The protected areas are in remote areas and far from government services, which makes enforcement of the protected area boundaries difficult because there is a lack of personnel and financial resources. This has resulted in loss of wildlife because of continued hunting and loss of primary forest within the protected area boundaries (Solano 2010, p. 37; Armonía 2018, p. 7).

The nonprofit, nongovernmental organization Asociatión Armonía (Armonía) has initiated educational campaigns to raise awareness and discourage hunting of both species. The program works with local and indigenous communities to protect wild bird populations through management of protected areas and reducing threats (Armonía 2018, p. 1; Gastañaga et al. 2011, p. 277; Gastañaga 2006, p. 11; Gastañaga and Hennessey 2005, p. 21).

The Sira curassow is classified as critically endangered on the IUCN Red List (IUCN 2023a, unpaginated). Sira curassow is not known to be in international trade and is not included in the Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).

The southern helmeted curassow is classified as critically endangered on the IUCN Red List (IUCN 2023b, unpaginated). Trade has not been noted internationally and the species is not included in the Appendices to CITES. The species is listed on Annex D of the European Union Wildlife Trade Regulations; species listed on Annex D require the importer to complete an import-notification form.

Current Condition

We considered the ecology of the Sira curassow and southern helmeted curassow and factors that influence their viability to assess their current conditions, including their resiliency, redundancy, representation, and their overall viability. We know of minimal occurrence records and both species are narrow endemics; thus, we assess resiliency, redundancy, and representation range wide for both species.

We gauge resiliency for the Sira curassow and southern helmeted curassow by evaluating their population abundance, the availability and condition of habitat throughout their respective ranges, and these species' life history traits that minimize their ability to rapidly recover from disturbances and population losses.

Both the Sira curassow and southern helmeted curassow are considered rare, locally uncommon, and decreasing (BLI 2023a, 2023b). The Sira curassow's population is very small (50–249 mature individuals); the southern helmeted curassow's population is also small, declined by 90 percent over the past 20 years, and is currently estimated at 1,000–4,999 individuals. The species are endemic to small areas in relatively narrow elevational bands. The species' ranges are mostly within protected areas that are intact forest landscapes that show no to minimal signs of human alteration. However, the species' habitats are subject to some deforestation resulting from small-scale illegal agriculture and road construction that spawns additional small-scale development. Over a 20-year period between 2000 and 2020, only 62 hectares (153 acres), or 0.16 percent, of forest cover has been lost within the range of the Sira curassow, and 27,320 hectares (67,509 acres), or 3.33 percent, of forest cover has been lost within the range of the southern helmeted curassow. Most of the forest cover loss in the region is outside the range of the species and outside the protected areas where the species occur. Although, human encroachment is increasing into the protected areas, particularly because of small-scale coca plantations.

Hunting is ongoing and will continue in the future. Both species are more likely to persist in patches located further from settlements and in forested landscapes with low human density, primarily because these areas would be unaffected, or minimally affected by hunting. The presence of local indigenous communities in addition to people from outside the protected areas that engage in small-scale agricultural activities or create inroads that further increase human presence into the species' habitats results in overexploitation of these species. Low rates of reproduction and slow recovery of these species' populations make it difficult for these species to tolerate high levels of continuous hunting. Because these species are endemic to small ranges and have population sizes that are decreasing, combined with low rates of reproduction and recovery, the Sira curassow and southern helmeted curassow are not likely to be resilient to ongoing threats.

We gauge redundancy of these species by assessing the number and distribution of their populations relative to any anticipated catastrophic events within the species' ranges. Redundancy also depends on availability of quality habitat throughout these species' respective ranges. Because most of the current habitat is intact, even though the species are restricted to relatively narrow ranges, we expect the species to have some level of redundancy. An increase of fires in humid forest habitat and road building that are directly drying the landscape, combined with climate change that causes suitable habitat to shift upslope and is expected to result in the loss of a substantial amount of montane forest ecosystems within these species' ranges in the future, could be catastrophic for these species in the future. We are not aware of any other catastrophic events anticipated within the range of these species that could lead to collapse of these species' populations.

The Sira curassow is known only from the Cerros del Sira region of central Peru in the El Sira Communal Reserve. Surveys in 2006 and 2008 observed the species in one population at four locations, all located within 30 km of each other (Gastañaga et al. 2011, p. 273). Because the population and range are very small, we assume the species has minimal redundancy. The southern helmeted curassow has moderate redundancy and is known to occur at 10 total sites in Amboró, Carrasco, and TIPNIS, which is an area that is likely to hold the largest remaining population (Armonía 2018, pp. 3–4; Armonía 2021, entire; Armonía 2022, unpaginated; Boorsma 2023, pers. comm). We have no information on the connectivity between populations (Armonía 2018, p. 7). The available data of population size and distribution for these species is minimal and there is uncertainty regarding the number of extant populations for both species throughout their ranges.

We gauge representation of these species by assessing their ability to adapt to changes in their physical and biological environments because the ability to adapt is essential for species' viability. Both species are restricted to narrow elevational bands of Yungas Forest and adjacent evergreen forest on

the east side of the Andes Mountains. Microhabitats within these species' ranges are likely present because the birds move within their respective habitats in response to patchy resource availability. In 2014, these species were determined to be distinct species, but we have no information about the genetic diversity within each species and there is no information on the degree to which these species exhibit behavioral plasticity, so the ability to assess representation is limited.

As part of the SSA, we developed two future-condition scenarios to capture the range of uncertainties regarding future threats and the projected responses by the Sira curassow and southern helmeted curassow. The scenarios assumed an increased probability of forest cover loss, continued hunting pressure, and ongoing designation of the protected areas where the species occur. The best available information indicates that both species' populations and distributions will decline in the future. However, because we have determined that the Sira curassow and southern helmeted curassow meet the definition of an endangered species based on their current conditions (see Determinations for the Status of Sira Curassow and Southern Helmeted Curassow, below), we are not presenting the results of the future scenarios in this proposed rule. Please refer to the SSA report (Service 2023, entire) for the full analysis of future scenarios.

We note that, by using the SSA framework to guide our analysis of the scientific information documented in the SSA report, we have analyzed the cumulative effects of identified threats and conservation actions on the species. To assess the current and future condition of the species, we evaluate the effects of all the relevant factors that may be influencing the species, including threats and conservation efforts. Because the SSA framework considers not just the presence of the factors, but to what degree they collectively influence risk to the entire species, our assessment integrates the cumulative effects of the factors and replaces a standalone cumulative-effects analysis.

Determinations for the Status of Sira Curassow and Southern Helmeted Curassow

Section 4 of the Act (16 U.S.C. 1533) and its implementing regulations (50 CFR part 424) set forth the procedures for determining whether a species meets the definition of an endangered species or a threatened species. The Act defines an ''endangered species'' as a species in danger of extinction throughout all or a significant portion of its range and a ''threatened species'' as a species likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether a species meets the definition of an endangered species or a threatened species because of any of the following factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence.

Status Throughout All of Its Range—Sira Curassow

We have carefully assessed the best scientific and commercial data available regarding the past, present, and future threats to the Sira curassow. The best available information indicates that the Sira curassow is a narrow endemic with a very small population size of 50 to 249 mature individuals that is decreasing (BLI 2023a; unpaginated; MacLeod and Gastañaga in litt. 2014, cited in BLI 2018a, unpaginated).

The species is known only from the Cerros del Sira region of central Peru in the El Sira Communal Reserve. The Sira curassow is not likely to be highly resilient to ongoing threats. The resilience of the Sira curassow is based on population abundance, the availability of quality habitat throughout its range, and the species' life history traits that minimize recovery from disturbances and population losses. The El Sira Communal Reserve has been somewhat successful at limiting the loss of forest cover from small-scale agriculture activities, although small-scale agriculture is increasing within the protected area. Over a 20-year period between 2000 and 2020, only 62 hectares (153 acres), or 0.16 percent, of forest cover has been lost within the range of the species. However, the species has historically faced and continues to face hunting pressure, and human incursions into the protected area are increasing.

Precise estimates of hunting pressure on the Sira curassow do not exist given the difficulty of monitoring and documenting hunting activities. Generally, curassows rank as the highest category of avian biomass taken by subsistence hunters (Strahl and Grajal 1991, p. 51). Local indigenous communities in addition to people from outside the protected areas that encroach into the species' habitat results in overexploitation of the species. Literature reviews of several species in the cracid family, including curassows, demonstrate that they are more likely to occur in forested landscapes with low human density and in patches located further from settlements, primarily because these forested areas would be unaffected, or minimally affected by hunting pressure (Kattan et al. 2016, pp. 27–28; Rios et al. 2021, pp. 416–418; Thorton et al. 2012, p. 572). The viability of the Sira curassow is likely more affected by hunting than habitat loss and degradation, although habitat loss and hunting pressure often work in tandem because incursions into forested areas for small-scale agriculture and roadbuilding create more opportunities for hunters (Rios et al. 2021, p. 418).

Climate change has caused and will cause a loss of the species' habitat, which is particularly detrimental to endemic species that are restricted to narrow elevational bands (Velasquez-Tibata et al. 2012, p. 235). Climate change shifts the species' habitat upslope, reducing the species' range because the geometric shape of mountains means there is less area on mountain slopes as elevation increases (Chen et al. 2011, entire; Freeman et al. 2018, p. 11983; Forero-Medina et al. 2011, entire; Sekercioglu et al. 2012, p. 3). Even though birds are endothermic and may tolerate a wider range of temperatures, the Sira curassow is not known to have great dispersal capabilities, making them unlikely to colonize new areas if their current habitat is damaged by climate change and other anthropogenic factors (Foster 2001, p. 73).

We are not aware of the number of Sira curassow populations that occur within its limited range in the El Sira Mountains because the species is not well studied and rangewide surveys for the species do not exist, but the best available information indicates that the species has a low area of occurrence and occupancy. Because the population size and its range are very small, we find the species likely has minimal redundancy throughout its range. We are also not aware of any information about the genetic diversity in the Sira curassow, and there is no information on the degree to which the species exhibits behavioral plasticity, so the ability to assess representation is limited for the species. However, the species likely has low representation because it is endemic to the El Sira Mountains and occurs only within 550 square kilometers (212 square miles) in a narrow elevational band.

Overall, the species has a very small population and is considered rare, locally uncommon, and its population is decreasing (BLI 2023a, unpaginated). The species is long-lived, has a long generation time and low reproductive output. Low reproductive output in conjunction with other factors like a high degree of habitat specialization, small population size, and low vagility (ability of an organism to move freely) typically equate to low innate adaptive capacity (Thurman et al. 2020, entire). The Sira curassow's low redundancy combined with the species not likely being highly resilient to ongoing threats and having minimal capacity to adapt to ongoing threats limits the viability of the Sira curassow in the face of ongoing threats. After assessing the best scientific and commercial information available, we conclude that the Sira curassow currently lacks sufficient resiliency, redundancy, and representation for its continued existence to be secure.

Thus, after evaluating the best scientific and commercial data available regarding threats to the species and assessing the cumulative effect of the threats under the Act's section 4(a)(1) factors, we determine that the Sira curassow is in danger of extinction throughout all of its range. The species does not fit the statutory definition of a threatened species because it is currently in danger of extinction, whereas threatened species are those likely to become in danger of extinction within the foreseeable future.

Status Throughout All of Its Range—Southern Helmeted Curassow

We have carefully assessed the best scientific and commercial information available regarding the past, present, and future threats to the southern helmeted curassow. The best available information indicates that the southern helmeted curassow is a narrow endemic with a small population size of 1,000 to 4,999 mature individuals that is decreasing (BLI 2023b, unpaginated; BLI 2018b, unpaginated).

The southern helmeted curassow is not likely to be highly resilient to ongoing threats. The species' resiliency is based on population abundance, the availability of quality habitat throughout its range, and the species' life history traits that minimize recovery from disturbances and population losses. Even though the species resides in three national parks in central Bolivia that have been somewhat successful at limiting the loss of forest cover from small-scale agriculture activities, small-scale agriculture is increasing within the protected areas, particularly because of coca plantations. Over a 20-year period between 2000 and 2020, 27,320 hectares (67,509 acres), or 3.33 percent, of forest cover has been lost within the range of the species. The southern helmeted curassow is likely more affected by hunting than habitat loss and degradation (Rios et al. 2021, p. 418). The species has historically faced and continues to face hunting pressure. Hunting increases with associated habitat loss, and human incursions into the protected areas are increasing.

Precise estimates of hunting pressure do not exist given the difficulty of monitoring and documenting hunting activities. Between 2001 and 2004, surveys showed that the largest known population of southern helmeted curassow declined from 20 singing males to zero because the birds were hunted by incursions of coca growers into the area (MacLeod et al. 2006, p. 62; MacLeod 2009, p. 16). However, in 2017–2018, curassows were observed at this site (Boorsma 2023, pers. comm.). Additionally, in TIPNIS, there are records of southern helmeted curassows being hunted and eaten by community members (Boorsma 2023, pers. comm.). Local indigenous communities in addition to people from outside the protected areas that encroach into the species' habitat results in overexploitation of the species. Generally, curassows rank as the highest category of avian biomass taken by subsistence hunters (Strahl and Grajal 1991, p. 51). Literature reviews of several cracid species, including curassows, demonstrate that they are more likely to occur in forested landscapes with low human density and in patches located further from settlements (Kattan et al. 2016, pp. 27–28; Rios et al. 2021, pp. 416–418; Thorton et al. 2012, p. 572).

Climate change has caused and will cause a loss of the species' habitat, which is particularly detrimental to endemic species that are restricted to narrow elevational bands (Velasquez-Tibata et al. 2012, p. 235). Climate change shifts the species' habitat upslope, reducing the species' range because the geometric shape of mountains means there is less area on mountain slopes as elevation increases (Chen et al. 2011, entire; Freeman et al. 2018, p. 11983; Forero-Medina et al. 2011, entire; Sekercioglu et al. 2012, p. 3). Even though birds are endothermic and may tolerate a wider range of temperatures, the southern helmeted curassow is not known to have great dispersal capabilities, making them unlikely to colonize new areas if their current habitat is damaged by climate change and other anthropogenic factors (Foster 2001, p. 73).

The best available data indicates the southern helmeted curassow is known from 10 locations spread throughout the 3 national parks; we are not aware of any information regarding the connectivity between the known occurrences. Therefore, even though the species' population and range are small, the species has some redundancy throughout its range. However, the species' range is smaller than it was historically, and its population has been reduced by 90 percent over the past 20 years (Armonía 2018, p. 7; Boorsma 2023, pers. comm). We are not aware of any information about the genetic diversity in the southern helmeted curassow, and there is no information on the degree to which the species exhibits behavioral plasticity, so the ability to assess representation is limited for the species. However, the species likely has low representation because it is endemic to the three national parks within a narrow elevational band and occurs only within 10,700 square kilometers (2,644,028 acres).

Overall, the species has a small population and is considered rare, locally uncommon, and its population is decreasing (BLI 2018b, unpaginated; Birds of Bolivia 2019, unpaginated; BLI 2023b, unpaginated). The species is long-lived, has a long generation time, and low reproductive output. Low reproductive output in conjunction with other factors like a high degree of habitat specialization, small population size, and low vagility typically equates to low innate adaptive capacity (Thurman et al. 2020, entire). The southern helmeted curassow's moderate redundancy combined with the species not likely being highly resilient to ongoing threats and having minimal capacity to adapt to ongoing threats limits the viability of the southern helmeted curassow in the face of ongoing threats. After assessing the best scientific and commercial information available, we conclude that the southern helmeted curassow currently lacks sufficient resiliency, redundancy, and representation for its continued existence to be secure.

Thus, after evaluating the best scientific and commercial data available regarding threats to the species and assessing the cumulative effect of the threats under the Act's section 4(a)(1) factors, we determine that the southern helmeted curassow is in danger of extinction throughout all of its range. The species does not fit the statutory definition of a threatened species because it is currently in danger of

extinction, whereas threatened species are those likely to become in danger of extinction within the foreseeable future.

Status Throughout a Significant Portion of Their Ranges

Under the Act and our implementing regulations, a species may warrant listing if it is in danger of extinction or likely to become so in the foreseeable future throughout all or a significant portion of its range. We have determined that the Sira curassow is in danger of extinction throughout all of its range, and the southern helmeted curassow is in danger of extinction throughout all of its range, and accordingly did not undertake an analysis of any significant portion of their ranges. Because the Sira curassow and southern helmeted curassow warrant listing as endangered throughout all of their ranges, our determination does not conflict with the decision in *Center for Biological Diversity* v. *Everson,* 435 F. Supp. 3d 69 (D.D.C. 2020), which vacated the provision of the Final Policy on Interpretation of the Phrase ''Significant Portion of Its Range'' in the Endangered Species Act's Definitions of ''Endangered Species'' and ''Threatened Species'' (79 FR 37578, July 1, 2014) providing that if the Services determine that a species is threatened throughout all of its range, the Services will not analyze whether the species is endangered in a significant portion of its range.

Determination of Status for the Sira Curassow and Southern Helmeted Curassow

Our review of the best available scientific and commercial data indicates that both the Sira curassow and the southern helmeted curassow meet the definition of an endangered species. Therefore, in accordance with sections 3(6) and 4(a)(1) of the Act, we propose to add the Sira curassow and southern helmeted curassow as endangered species to the List of Endangered and Threatened Wildlife in 50 CFR 17.11(h).

Available Conservation Measures

The purposes of the Act are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, to provide a program for the conservation of such endangered species and threatened species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions set forth in the Act. Under the Act, a number of steps are available to advance the conservation of species listed as endangered or threatened species. As explained further below, these conservation measures include: (1) recognition, (2) recovery actions, (3) requirements for Federal protection, (4) financial assistance for conservation programs, and (5) prohibitions against certain activities.

Recognition through listing results in public awareness, as well as in conservation by Federal, State, Tribal, and local agencies, foreign governments, private organizations, and individuals. The Act encourages cooperation with the States and other countries and calls for recovery actions to be carried out for listed species.

Our regulations at 50 CFR part 402 implement the interagency cooperation provisions found under section 7 of the Act. Under section 7(a)(1) of the Act, Federal agencies are to use, in consultation with and with the assistance of the Service, their authorities in furtherance of the purposes of the Act. Section 7(a)(2) of the Act, as amended, requires Federal agencies to ensure, in consultation with the Service, that any action authorized, funded, or carried out by such agency is not likely to jeopardize the continued existence of a listed species or result in destruction or adverse modification of its critical habitat.

A Federal ''action'' that is subject to the consultation provisions of section 7(a)(2) is defined in our implementing regulations at 50 CFR 402.02 as all activities or programs of any kind authorized, funded, or carried out, in whole or in part, by Federal agencies in the United States or upon the high seas. With respect to the Sira curassow and southern helmeted curassow, no known actions require consultation under section 7(a)(2) of the Act. Given the regulatory definition of ''action,'' which clarifies that it applies to activities or programs ''in the United States or upon the high seas,'' the Sira curassow and southern helmeted curassow are unlikely to be the subject of section 7 consultations, because the entire life cycles of the species occur in terrestrial areas outside of the United States and are unlikely to be affected by U.S. Federal actions. Additionally, no critical habitat will be designated for these species because, under 50 CFR 424.12(g), we will not designate critical habitat within foreign countries or in other areas outside of the jurisdiction of the United States.

Section 8(a) of the Act (16 U.S.C. 1537(a)) authorizes the provision of limited financial assistance for the development and management of programs that the Secretary of the Interior determines to be necessary or useful for the conservation of endangered or threatened species in foreign countries. Sections 8(b) and 8(c) of the Act (16 U.S.C. 1537(b) and (c)) authorize the Secretary to encourage conservation programs for foreign listed species, and to provide assistance for such programs, in the form of personnel and the training of personnel.

The Act puts in place prohibitions against particular actions. When a species is listed as endangered, certain actions are prohibited under section 9 of the Act and are implemented through our regulations in 50 CFR 17.21. For endangered wildlife, these include prohibitions under section 9(a)(1) of the Act on import; export; delivery, receipt, carriage, transport, or shipment in interstate or foreign commerce, by any means whatsoever and in the course of commercial activity; and sale or offer for sale in interstate or foreign commerce of any endangered species. It is also illegal to take within the United States or on the high seas; or to possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any endangered species that have been taken in violation of the Act. It is unlawful to attempt to commit, to solicit another to commit or to cause to be committed, any of these acts. Exceptions to the prohibitions for endangered species may be granted in accordance with section 10 of the Act and our regulations at 50 CFR 17.22.

We may issue permits to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits for endangered species are codified at 50 CFR 17.22, and general Service permitting regulations are codified at 50 CFR part 13. With regard to endangered wildlife, a permit may be issued: for scientific purposes, for enhancing the propagation or survival of the species, or for take incidental to otherwise lawful activities. The statute also contains certain exemptions from the prohibitions, which are found in sections 9 and 10 of the Act.

The Service may also register persons subject to the jurisdiction of the United States through its captive-bred wildlife (CBW) program if certain established requirements are met under the CBW regulations (see 50 CFR 17.21(g)). Through a CBW registration, the Service may allow a registrant to conduct certain otherwise prohibited activities under certain circumstances to enhance the propagation or survival of the affected species, including take; export or re-import; delivery, receipt, carriage, transport, or shipment in interstate or foreign commerce in the course of a commercial activity; or sale or offer for sale in interstate or foreign commerce. A

CBW registration may authorize interstate purchase and sale only between entities that both hold a registration for the taxon concerned. The CBW program is available for species having a natural geographic distribution not including any part of the United States and other species that the Service Director has determined to be eligible by regulation. The individual specimens must have been born in captivity in the United States.

It is our policy, as published in the **Federal Register** on July 1, 1994 (59 FR 34272), to identify to the maximum extent practicable at the time a species is listed, those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of a listing on proposed and ongoing activities within the range of the species.

At this time, we are unable to identify specific activities that will not be considered likely to result in a violation of section 9 of the Act beyond what is already clear from the descriptions of prohibitions or already excepted through our regulations at 50 CFR 17.21. Also, as discussed above, certain activities that are prohibited under section 9 may be permitted under section 10 of the Act. Additionally, we are unable to identify specific activities that will be considered likely to result in a violation of section 9 of the Act beyond what is already clear from the descriptions of the prohibitions at 50 CFR 17.21.

Applicable wildlife import/export requirements established under Section 9(d)–(f) of the Act, the Lacey Act Amendments of 1981 (16 U.S.C. 3371, *et seq.*), and 50 CFR part 14 must also be met for the Sira curassow and southern helmeted curassow imports and exports. Questions regarding whether specific activities would constitute a violation of section 9 of the Act should be directed to the Management Authority (*managementauthority@fws.gov;* 703–358–2104).

Required Determinations

Clarity of the Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(1) Be logically organized;
(2) Use the active voice to address readers directly;
(3) Use clear language rather than jargon;
(4) Be divided into short sections and sentences; and
(5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in ADDRESSES. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), need not be prepared in connection with listing a species as an endangered or threatened species under the Endangered Species Act. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244).

References Cited

A complete list of references cited in this rulemaking is available on the internet at *https://www.regulations.gov* in Docket No. FWS–HQ–ES–2023–0053 and upon request from the Headquarters Ecological Services Field Office (see FOR FURTHER INFORMATION CONTACT).

Authors

The primary authors of this proposed rule are the staff members of the Fish and Wildlife Service's Species Assessment Team and the Branch of Delisting and Foreign Species.

List of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Plants, Reporting and recordkeeping requirements, Transportation, Wildlife.

Proposed Regulation Promulgation

Accordingly, we propose to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245, unless otherwise noted.

■ 2. In § 17.11, amend paragraph (h) by adding an entry for ''Curassow, Sira'' and an entry for ''Curassow, southern helmeted'' to the List of Endangered and Threatened Wildlife in alphabetical order under BIRDS to read as follows:

§ 17.11 Endangered and threatened wildlife.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 230524–0138]

RIN 0648–BL95

Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Framework Adjustment 65

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: This action proposes to approve and implement Framework Adjustment 65 to the Northeast Multispecies Fishery Management Plan. This rule proposes to revise the rebuilding plan for Gulf of Maine cod, set catch limits for 16 of the 20 multispecies (groundfish) stocks, and make a temporary modification to the accountability measures for Georges Bank cod. This action also corrects erroneous regulations and removes outdated regulations. This action is necessary to respond to updated scientific information and to achieve the goals and objectives of the fishery management plan. The proposed measures are intended to help prevent overfishing, rebuild overfished stocks, achieve optimum yield, and ensure that management measures are based on the best scientific information available.

DATES: Comments must be received by 5 p.m. EST on June 15, 2023.

ADDRESSES: You may submit comments, identified by NOAA–NMFS–2023–0021, by the following method:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov* and enter NOAA–NMFS–2023–0021 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. You may submit anonymous comments by entering ''N/A'' in the required fields if you wish to remain anonymous.

Copies of Framework Adjustment 65, including the draft Environmental Assessment, the Regulatory Impact Review, and the Regulatory Flexibility Act Analysis prepared by the New England Fishery Management Council in support of this action, are available from Thomas A. Nies, Executive Director, New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950. The supporting documents are also accessible via the internet at: *http://www.nefmc.org/management-plans/northeast-multispecies* or *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Liz Sullivan, Fishery Policy Analyst, phone: 978–282–8493; email: *Liz.Sullivan@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Summary of Proposed Measures

This action would implement the management measures in Framework Adjustment 65 to the Northeast Multispecies Fishery Management Plan (FMP). The New England Fishery Management Council reviewed the proposed regulations and deemed them consistent with, and necessary to implement, Framework 65 in a May 4, 2023, letter from Council Chairman Eric Reid to Regional Administrator Michael Pentony. Under the Magnuson-Stevens Act, on behalf of the Secretary of Commerce, the Greater Atlantic Regional Fisheries Office's Regional Administrator approves, disapproves, or partially approves measures that the Council proposes, based on consistency with the Act and other applicable law. NMFS reviews proposed regulations for consistency with the fishery management plan, plan amendment, the Magnuson-Stevens Act and other applicable law. The Regional Administrator is seeking comments on these proposed regulations and intends to promulgate the final regulations after careful consideration of any submitted comments. Through Framework 65, the Council proposes to:

- Revise the rebuilding plan for Gulf of Maine (GOM) cod;
- Set shared U.S./Canada quotas for Georges Bank (GB) yellowtail flounder and eastern GB cod and haddock for fishing years 2023 and 2024;
- Set specifications, including catch limits for 16 groundfish stocks: GB haddock, GOM haddock, Southern New England/Mid-Atlantic (SNE/MA) yellowtail flounder, Cape Cod (CC)/GOM yellowtail flounder, American plaice, witch flounder, GB winter flounder, GOM winter flounder, SNE/MA winter flounder, pollock, ocean pout, Atlantic halibut, and Atlantic wolffish for fishing years 2023–2025, GB cod and GB yellowtail flounder for fishing years 2023–2024; and white hake for fishing year 2023;
- Remove the management uncertainty buffer for sectors for GOM haddock and white hake, if the at-sea monitoring (ASM) target coverage level is set at 90 percent or greater for the 2023 fishing year only; and
- Make a temporary modification to the accountability measures (AM) for GB cod.

This action also proposes regulatory corrections that are not part of Framework 65, but that may be considered and implemented under section 305(d) authority in the Magnuson-Stevens Act to make changes necessary to carry out the FMP. NMFS is proposing these corrections in conjunction with the Framework 65 proposed measures for expediency purposes. These proposed corrections are described in Regulatory Corrections under Secretarial Authority.

Rebuilding Plan for Gulf of Maine Cod

Framework 65 would revise the rebuilding plan for GOM cod. The current rebuilding plan for GOM cod, as implemented by Framework 51 to the FMP (79 FR 22421, April 22, 2014), has a target date of 2024. On August 13, 2021, the Regional Administrator notified the Council that the stock was not making adequate rebuilding progress. The deadline to implement a rebuilding plan is August 13, 2023.

The Magnuson-Stevens Act requires that overfished stocks be rebuilt as quickly as possible, not to exceed 10 years when biologically possible, accounting for the status and biology of the stocks, the needs of fishing communities, and the interaction of the overfished stock within the marine ecosystem. Rebuilding plans must have at least a 50-percent probability of success. Selection of a rebuilding plan with a higher probability of success is one way of addressing uncertainty, but this does not affect the standard used in the future to determine whether a stock is rebuilt. The minimum rebuilding time

(T_{min}) is the amount of time a stock is expected to take to rebuild to the biomass (B) associated with maximum sustainable yield (MSY) in the absence of any fishing mortality (F). The actual timeline set with a rebuilding plan (T_{target}) may be greater than T_{min}, but cannot exceed the maximum rebuilding time (T_{max}). T_{max} is 10 years if T_{min} is less than 10 years. In situations where T_{min} exceeds 10 years, T_{max} establishes a maximum time for rebuilding that is linked to the biology of the stock.

The GOM cod rebuilding program proposed in this action would rebuild the stock within 10 years, or by 2033, which is the maximum time period allowed by the Magnuson-Stevens Act. Projections suggest the stock could rebuild in 7 years at an F of zero. Fishing mortality of zero for GOM cod is currently technologically and economically impracticable given available gear, fishing methods, fishery management capability, and the multispecies nature of the commercial and recreational fishery. In addition to these factors, other biological and economic factors were identified and considered by the Council in setting $T_{target} = T_{max}$. First, recent recruitment estimates for this stock have been below average, and recruitment may be lower than assumed in the rebuilding projections, making the T_{min} projections (7 years at F = 0) likely to be overly optimistic. There is uncertainty around the stock's natural mortality, and under one of the two approved models (M-ramp, M=0.4), the stock cannot rebuild in the rebuilding projections. Long-term projections for many groundfish stocks have tended to be overly optimistic, such that future levels of biomass are overestimated and fishing mortality is underestimated. Additionally, recent commercial utilization of the GOM cod annual catch limit (ACL) is high, indicating that the stock is an important component of the fishing industry; a longer rebuilding period considers the needs of the fishing communities as much as practicable. The proposed rebuilding plan for GOM cod would set $F_{rebuild}$ at 60 percent of F_{MSY} with a 70-percent probability of achieving B_{MSY} under the M=0.2 model.

As part of the revised rebuilding plan for GOM cod, we propose to remove regulations at 50 CFR 648.90(a)(2)(iv), which include a review process for the rebuilding plans for GOM cod and American plaice. The revised rebuilding plan for GOM cod does not contain this Council review process, but is still subject to Secretarial review for determining adequate rebuilding progress. As of 2019, American plaice is rebuilt and no longer in a rebuilding plan, making this regulation unnecessary.

Fishing Years 2023 and 2024 Shared U.S./Canada Quotas

Management of Transboundary Georges Bank Stocks

Eastern GB cod, eastern GB haddock, and GB yellowtail flounder are jointly managed with Canada under the United States/Canada Resource Sharing Understanding. The Transboundary Management Guidance Committee (TMGC) is a government-industry committee made up of representatives from the United States and Canada. For historical information about the TMGC see: *http://www.bio.gc.ca/info/intercol/tmgc-cogst/index-en.php.* Each year, the TMGC recommends a shared quota for each stock based on the most recent stock information and the TMGC's harvest strategy. The TMGC's harvest strategy for setting catch levels is to maintain a low to neutral risk (less than 50 percent) of exceeding the fishing mortality limit for each stock. The harvest strategy also specifies that when stock conditions are poor, fishing mortality should be further reduced to promote stock rebuilding. The shared quotas are allocated between the United States and Canada based on a formula that considers historical catch (10-percent weighting) and the current resource distribution (90-percent weighting).

For GB yellowtail flounder, the Council's Scientific and Statistical Committee (SSC) also recommends an acceptable biological catch (ABC) for the stock. The ABC is typically used to inform the U.S. TMGC's discussions with Canada for the annual shared quota. Although the stock is jointly managed with Canada, and the TMGC recommends annual shared quotas, the Council may not set catch limits that would exceed the SSC's recommendation. The SSC does not recommend ABCs for eastern GB cod and haddock because they are management units of the total GB cod and haddock stocks. The SSC recommends overall ABCs for the total GB cod and haddock stocks. The shared U.S./Canada quota for eastern GB cod and haddock is included in these overall ABCs, and must be consistent with the SSC's recommendation for the total GB stocks.

2023 and 2024 U.S./Canada Quotas

The Transboundary Resources Assessment Committee assessed the three transboundary stocks in July 2022, and detailed summaries of these assessments can be found at: *https://www.nefsc.noaa.gov/assessments/trac/.* The TMGC met in September 2022 to recommend shared quotas for 2023 based on the updated assessments, and made recommendations for eastern GB cod and GB yellowtail flounder. The Council adopted the TMGC's recommendations in Framework 65. The TMGC was unable to reach consensus on the most appropriate combined Canada/U.S. quota for eastern GB haddock. Instead, the Council selected a U.S. quota based on the shared quota supported by the U.S. delegation and the established method of determining the allocation for each country (42 percent of 3,619 mt), and supported using 2,320 mt as an estimate of possible Canadian catch.

Framework 65 proposes to set the same shared quotas for a second year (*i.e.,* for fishing year 2024) as placeholders, with the expectation that those quotas will be reviewed annually and new recommendations will be received from the TMGC. The proposed 2023 and 2024 shared U.S./Canada quotas, and each country's allocation, are listed in Table 1.

TABLE 1—PROPOSED 2023 AND 2024 FISHING YEARS U.S./CANADA QUOTAS (MT, LIVE WEIGHT) AND PERCENT OF QUOTA ALLOCATED TO EACH COUNTRY

Quota	Eastern GB cod	Eastern GB haddock	GB Yellowtail flounder
Total Shared Quota	520	*No agreement*	200.
U.S. Quota	135 (26 percent)	1,520	106 (53 percent).
Canadian Quota	385 (74 percent)	*2,320 (estimate)*	94 (47 percent).

The proposed 2023 U.S. quotas for the three shared stocks represent decreases compared to 2022: Eastern GB cod by 15.6 percent, eastern GB haddock by 77 percent, and GB yellowtail flounder by 13 percent. For a more detailed discussion of the TMGC's 2023 catch advice, including a description of each country's quota share, see the TMGC's guidance document that will be posted at: *https://www.greateratlantic.fisheries.noaa.gov/.*

The regulations implementing the U.S./Canada Resource Sharing Understanding require deducting any overages of the U.S. quota for eastern GB cod, eastern GB haddock, or GB yellowtail flounder from the U.S. quota in the following fishing year. If catch information for the 2022 fishing year indicates that the U.S. fishery exceeded its quota for any of the shared stocks, we will reduce the respective U.S. quotas for the 2023 fishing year in a future management action, as close to May 1, 2023, as possible. If any fishery that is allocated a portion of the U.S. quota exceeds its allocation and causes an overage of the overall U.S. quota, the overage reduction would be applied only to that fishery's allocation in the following fishing year. This ensures that catch by one component of the overall fishery does not negatively affect another component of the overall fishery.

Catch Limits for Fishing Years 2023–2025

Summary of the Proposed Catch Limits

Tables 2 through 11 show the proposed catch limits for the 2023–2025 fishing years. A brief summary of how these catch limits were developed is provided below. More details on the proposed catch limits for each groundfish stock can be found in Appendix II (Calculation of Northeast Multispecies Annual Catch Limits, FY 2023–FY 2025) to the Framework 65 Environmental Assessment (see **ADDRESSES** for information on how to get this document).

Through Framework 65, the Council proposes to adopt catch limits for 13 stocks for the 2023–2025 fishing years and for white hake for the 2023 fishing year, based on stock assessments completed in 2022, and catch limits for GB cod and GB yellowtail flounder for fishing years 2023–2024. Framework 61 (86 FR 40353, July 28, 2021) previously set 2023 quotas for redfish, northern windowpane flounder, and southern windowpane flounder based on assessments conducted in 2020, and those would remain in place. Framework 63 (87 FR 42375, July 15, 2022) previously set the 2023–2024 quota for GOM cod, based on an assessment conducted in 2021, and that would also remain in place. Table 2 provides an overview of which catch limits, if any, would change, as proposed in Framework 65, as well as when the stock was most recently assessed. Table 3 provides the percent change in the 2023 catch limit compared to the 2022 fishing year.

TABLE 2—CHANGES TO CATCH LIMITS, AS PROPOSED IN FRAMEWORK 65

Stock	Most recent assessment	Proposed change in framework 65
GB Cod	2021	New 2023–2024 ABC.
GOM Cod	2021	Adjust sub-components, 2023–2024 catch limit set by Framework 63.
GB Haddock	2022	New 2023–2025 ABC.
GOM Haddock	2022	New 2023–2025 ABC.
GB Yellowtail Flounder	2022	New 2023–2024 ABC.
SNE/MA Yellowtail Flounder	2022	New 2023–2025 ABC.
CC/GOM Yellowtail Flounder	2022	New 2023–2025 ABC.
American Plaice	2022	New 2023–2025 ABC.
Witch Flounder	2022	New 2023–2025 ABC.
GB Winter Flounder	2022	New 2023–2025 ABC.
GOM Winter Flounder	2022	New 2023–2025 ABC.
SNE/MA Winter Flounder	2022	New 2023–2025 ABC.
Redfish	2020	No change: 2023 catch limit set by Framework 61.
White Hake	2022	New 2023 ABC.
Pollock	2022	New 2023–2025 ABC.
N. Windowpane Flounder	2020	Adjust sub-components, 2023 catch limit set by Framework 61.
S. Windowpane Flounder	2020	Adjust sub-components, 2023 catch limit set by Framework 61.
Ocean Pout	2022	New 2023–2025 ABC.
Atlantic Halibut	2022	New 2023–2025 ABC.
Atlantic Wolffish	2022	New 2023–2025 ABC.

UNK = Unknown

Note: An empty cell indicates no OFL/ABC is adopted for that year. These catch limits would be set in a future action.

Overfishing Limits and Acceptable Biological Catches

The overfishing limit (OFL) is calculated to set the maximum amount of fish that can be caught in a year, without constituting overfishing. The ABC is typically set lower than the OFL to account for scientific uncertainty. For GB cod, GB haddock, and GB yellowtail flounder, the total ABC is reduced by the amount of the Canadian quota (see Table 1 for the Canadian and U.S. shares of these stocks). Although the TMGC recommendations were only for fishing year 2023, the portion of the shared quota that would be allocated to Canada (or assumed for Canada, in the case of GB haddock) in fishing year 2023 was used to project the U.S. portions of the ABCs for these three stocks for 2024. This avoids artificially inflating the U.S. ABC up to the total ABC for the 2024 fishing year. The TMGC will make new recommendations for 2024, which would replace any quotas for these stocks set in this action. Additionally, although GB winter flounder, white hake, and Atlantic halibut are not jointly managed with Canada, there is some Canadian catch of these stocks. Because the total ABC must account for all sources of fishing mortality, expected Canadian catch of GB winter flounder (38 mt), white hake (52 mt), and Atlantic halibut (74 mt) is deducted from the total ABC. The U.S. ABC is the amount available to the U.S. fishery after accounting for Canadian catch (see Table 3). For stocks without Canadian catch, the U.S. ABC is equal to the total ABC.

The OFLs are currently unknown for GB cod, GB yellowtail flounder, witch flounder, northern windowpane flounder, and Atlantic halibut. For 2023, the SSC recommended maintaining the unknown OFL for GB cod, GB yellowtail flounder, witch flounder, and Atlantic halibut. Empirical stock assessments are used for these five stocks, and these assessments can no longer provide quantitative estimates of the status determination criteria, nor were appropriate proxies for stock status determination able to be developed. In the temporary absence of an OFL, in this and previous actions, we have considered recent catch data and estimated trends in stock biomass as an indication that the catch limits derived from ABCs are sufficiently managing fishing mortality at a rate that is preventing overfishing. The SSC recommended setting the GB cod ABC based on an average between the output of the iSmooth (previously referred to as ''PlanBsmooth'') approach and the total calendar year catch from 2020, which results in an increase (approximately 20 percent) from the previously set ABC value. Despite this increase, the SSC states that its recommendation is intended to support stock rebuilding by maintaining low catches relative to historic levels. The SSC noted that the fishing mortality in the GB yellowtail flounder fishery does not appear to be limiting stock recovery. However, the continued low stock biomass and poor recruitment for this stock warrant maintaining low catch levels. For witch flounder, the SSC supported the continued use of the swept-area biomass average and fixed harvest fraction for setting the ABC, noting that the target harvest fraction is low relative to the historic harvest fraction for this stock and that the recommended ABC for witch flounder is not likely to result in overfishing. While the catch multiplier for Atlantic halibut remains below 1 for the last four years, despite reductions in ABC advice, the SSC highlighted the uncertainty of Canadian catch estimates and stated that the recommended ABC is not likely to result in overfishing. For each of these stocks, the Council has relied on the SSC to provide advice on the likelihood of preventing overfishing and promoting rebuilding under the proposed ABCs. Based on these considerations, we have preliminarily determined that these ABCs are a sufficient limit for preventing overfishing and are consistent with the National Standards. This action does not propose any changes to the status determination criteria for these stocks.

Subsequent to submitting Framework 65 to NMFS for review and rulemaking, at its April meeting the New England Council made a new request for NMFS to implement an emergency rule under section 305(c) of the Magnuson-Stevens Act to increase the ABC for GOM haddock based on concerns regarding the economic impacts of the low quota proposed in this action. We are considering this separately from Framework 65, and therefore it is not discussed further here.

ABC for Georges Bank Cod

The GB cod 2021 management track assessment followed the iSmooth approach, using updated commercial fishery catch data through calendar year 2020 and updated research survey indices of abundance through 2021. In Framework 63, the Council decided to set the GB cod ABC at 754 mt for only one year (fishing year 2022), requiring the Council to make a new recommendation for fishing years 2023 and 2024 in the current framework. The SSC met in August 2022 to discuss alternatives for the GB cod ABC for fishing years 2023 and 2024, and a majority of the SSC recommended an ABC of 904 mt, the average between the output of the iSmooth and the 2020 calendar year catch of GB cod (based on

the 2021 assessment). The Council selected 904 mt as its preferred option for the GB cod ABC.

The Council's EA for Framework 65 states that the 904 mt ABC would reduce, but not eliminate, adverse economic impacts, compared to the fishing year 2022 ABC of 754 mt. The Council included an updated analysis in its Framework 65 submission, applying the iSmooth approach using fall 2021 and spring 2022 surveys and catch data through 2021, consistent with the methodology and data sources used by the SSC when recommending the fishing year 2022 ABC. This updated analysis resulted in an amount that is 74 mt higher than the 904-mt ABC recommended by the Council. The Council did not revise its recommendation with the higher amount. Instead, it has demonstrated that the 904-mt ABC recommendation would contribute to stock rebuilding while having a low probability of overfishing. The sector component of the fishery will have a high (90-percent) target coverage level of monitoring in fishing year 2023, which is anticipated to help ensure the accuracy of commercial catch data.

Annual Catch Limits

Development of Annual Catch Limits

The U.S. ABC for each stock is divided among the various fishery components to account for all sources of fishing mortality. An estimate of catch expected from state waters and the other sub-component (*e.g.,* non-groundfish fisheries or some recreational groundfish fisheries) is deducted from the U.S. ABC. The remaining portion of the U.S. ABC is distributed to the fishery components that receive an allocation for the stock. Components of the fishery that receive an allocation have a sub-ACL set by reducing their portion of the ABC to account for management uncertainty and are subject to AMs if they exceed their respective catch limit during the fishing year. For GOM cod and haddock only, the U.S. ABC is first divided between the commercial and recreational fisheries, before being further divided into sub-components and sub-ACLs. This process is described fully in Appendix II of the Framework 65 Environmental Assessment.

Recreational Catch Target for GB Cod

GB cod is not allocated to the recreational fishery. Instead, a catch target is set and used to calculate the amount deducted to account for state and other sub-component catch. Framework 65 proposes to set the GB cod recreational catch target based on the proportional change to the GB cod U.S. ABC from fishing year 2022 to 2023. Under the Council's preferred alternative of a 904-mt GB cod ABC, the recreational catch target would be 113 mt, which is an increase from the 75-mt catch target set for fishing year 2022.

Framework 63 modified the regulatory process for the Regional Administrator to adjust recreational measures to prevent the recreational catch target from being exceeded for fishing years 2023 and 2024. Any change to the recreational measures for GB cod would be implemented through a separate rulemaking.

Sector and Common Pool Allocations

For stocks allocated to sectors, the commercial groundfish sub-ACL is further divided into the non-sector (common pool) sub-ACL and the sector sub-ACL, based on the total vessel enrollment in sectors and the cumulative potential sector contributions (PSC) associated with those sectors. The sector and common pool sub-ACLs proposed in this action are based on final fishing year 2023 sector rosters. All permits enrolled in a sector, and the vessels associated with those permits, had until April 30, 2023, to withdraw from a sector and fish in the common pool for the 2023 fishing year. In addition to the enrollment delay, all permits that change ownership after the roster deadline were able to join a sector (or change sector) through April 30, 2023.

Management Uncertainty Buffer for Sectors

In Framework 65, the Council proposes to remove the management uncertainty buffer for the sector sub-ACL for GOM haddock and white hake, for only the 2023 fishing year, if the at-sea monitoring (ASM) coverage target is 90 percent or higher. The Council's goal is to mitigate the economic impacts of the ACLs for these two stocks by increasing the sector sub-ACLs if the ASM coverage target is high enough to reduce uncertainty. Amendment 23 (87 FR 75852, December 9, 2022) implemented a measure to set the management uncertainty buffer for the sector sub-ACL for each allocated groundfish stock to zero. In years that the ASM coverage target is set at 100 percent, the management uncertainty buffer will default to zero for the sector sub-ACL for allocated stocks, unless the Council's consideration of the 100-percent coverage target warrants specifying a different management uncertainty buffer in order to prevent exceeding the sub-ACL. The process by which the Council evaluates and sets management uncertainty buffers was unchanged by Amendment 23 and the Council may adjust management uncertainty buffers in future actions.

On March 16, 2023, the Regional Administrator announced that the fishing year 2023 ASM coverage target will be 90 percent. Therefore, if this measure is approved, sectors' sub-ABCs for GOM haddock and white hake would not be reduced to account for the management uncertainty for fishing year 2023 (see Table 4). The fishery would remain accountable for remaining within the sub-ACLs allocated to it for both stocks affected by this measure, and the removal of the management uncertainty buffer for the sectors alone is not likely to cause the ABC or OFL to be exceeded. The revised management uncertainty buffers apply only to sectors and not to the common pool component of the fishery or other sub-ACLs or sub-components for any stocks. In the case of GOM haddock, the recreational fishery and common pool fishery would both retain a management uncertainty buffer; for white hake, only the common pool fishery would have a management uncertainty buffer applied. Therefore, a certain level of uncertainty buffer will continue to exist for each stock's ACL.

Common Pool Total Allowable Catches

The common pool sub-ACL for each allocated stock (except for SNE/MA winter flounder) is further divided into trimester TACs. Table 7 summarizes the common pool trimester TACs proposed in this action.

Incidental catch TACs are also specified for certain stocks of concern (*i.e.,* stocks that are overfished or subject to overfishing) for common pool vessels fishing in the special management programs (*i.e.,* special access programs (SAP) and the Regular B Days-at-Sea (DAS) Program), in order to limit the catch of these stocks under each program. Tables 8 through 11 summarize the proposed Incidental Catch TACs for each stock and the distribution of these TACs to each special management program.

Temporary Modification to Accountability Measures for GB Cod

As described above, a portion of the ABC is set aside to account for an estimate of catch in state waters (including both commercial and recreational vessels) and catch in federal waters by the other non-specified fisheries (including non-groundfish commercial and recreational groundfish vessels). For allocated groundfish stocks, there are no accountability measures for the state and other sub-components; an overage to the ACL results in accountability measures for the allocated components of the groundfish fishery. If the overall ACL for a stock is exceeded, the amount of the overage due to catch from vessels fishing in state waters or other, non-specified fisheries is distributed between the allocated components of the groundfish fishery. Each component's attributed share of the overage is added to that component's catch to determine whether the AM for that component is triggered and the resulting overage amount. For the commercial fishery (sectors and common pool), the AM due to an overage is payback in a subsequent fishing year.

Framework 65 would temporarily modify the AMs for GB cod when an ACL overage that occurs in fishing years 2022–2024 is (in part or entirely) due to vessels fishing in state waters or other, non-specified fisheries. If in the year following the overage (Year 2), the ACL is not achieved or exceeded by any amount, the ACL underage would be proportionately applied to each component's share of the overage from Year 1. While the preliminary AM (*i.e.,* payback) would be implemented at the beginning of Year 3, any reduction to the overage (due to the underage in Year 2) would be made through an in-season adjustment as soon as possible in Year 3.

For example, if an ACL overage occurred in fishing year 2022, due to (in part or entirely) excess catch from the state or other sub-components, NMFS would determine the amount of this overage after the end of fishing year 2022, *i.e.,* in fishing year 2023. NMFS would then proportionately apply the excessive catch attributed to the state and other-subcomponents to catch from the allocated groundfish fisheries; in the case of GB cod, this would be sectors and the common pool. If the resulting sum of sector catch plus the sectors' share of the state or other sub-component's overage resulted in an overage of the sector sub-ACL, sectors would be required to pay back this overage, pound for pound. The same

would be done for the common pool's catch and share of the state and other sub-components' overage. Under the modification proposed in this action, however, if there were an underage of the ACL in fishing year 2023, this underage would be distributed between sectors and the common pool. The overage payback would be implemented at the start of fishing year 2024, but NMFS would implement the reduction of the payback due to the 2023 ACL underage through an in-season adjustment in 2024.

Regulatory Corrections Under Secretarial Authority

This rule corrects an error in the northeast regulations for monitoring service providers. We are making this correction consistent with section 305(d) of the Magnuson-Stevens Act, which provides that the Secretary of Commerce may promulgate regulations necessary to ensure that amendments to an FMP are carried out in accordance with the FMP and the Magnuson-Stevens Act. This change is necessary to correct the regulations detailing insurance requirements for monitoring companies to reference the national requirements.

On September 8, 2022, NMFS published a final rule (87 FR 54902) that implemented national insurance requirements for observer providers at 50 CFR 600.748 and revised the northeast regional monitoring program regulations at § 648.11(h)(3)(vii) to reference the newly established national insurance requirements. The final rule implementing Amendment 23 to the Northeast Multispecies FMP (87 FR 75852, December 9, 2022) inadvertently overwrote the northeast regional monitoring program regulations that referred to the national insurance requirements. This rule corrects the regulations at § 648.11(h)(3)(vii)(A) to reference the national insurance requirements. This correction is necessary to eliminate confusion and ensure the northeast monitoring program is consistent with the national insurance requirements.

Framework 65 would also make minor changes in the regulations. It would remove regulatory text that is specific to previous fishing years. Specifically, this action would remove a sentence in 50 CFR 648.90(a)(4)(iii)(H)(*2*) that is specific to the allocation of certain stocks for fishing years 2010 and 2011, and remove the paragraphs at § 648.90(a)(5)(iv)(B) through (D) that are specific to temporary (up through fishing year 2020) modifications to the triggers for the Atlantic sea scallop fishery's AMs for certain flatfish stocks. It would correct sections of the regulations (§§ 648.87(b)(1)(i)(A) and 648.90(a)(4)(iii)(F)) that refer to the northern and southern windowpane flounder as GOM/GB and SNE/MA windowpane flounder, respectively, which is inconsistent with other sections of the regulations. It would remove a section of text that describes the Fippenies Ledge Area that was moved to a different section of the regulations, but not deleted from § 648.87(c)(2)(i)(A). It would correct several citations in §§ 648.87(c)(2)(i) and 648.86(c) to paragraphs within § 648.90(a)(5)(i) that were redesignated in a previous action, but the citations were not updated.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has made a preliminary determination that this proposed rule is consistent with Framework 65, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment. In making the final determination, the Regional Administrator will consider the data, views, and comments received during the public comment period.

NMFS finds that a 15-day comment period for this action provides a reasonable opportunity for public participation in this action, while also ensuring that the final specifications are in place as close to start of the groundfish fishing year on May 1, 2023, as possible. This action was developed by the New England Fishery Management Council as part of the annual Framework Adjustment process, during which final action was taken in December 2022. However, due to the need for additional analysis regarding the measures proposed in Framework 65, the Council was not able to submit the final Framework until April 18, 2023. This action could not be proposed sooner as a result of the delays in submission. Stakeholder and industry groups have been involved with the development of this action and have participated in public meetings throughout the past year. A prolonged comment period and subsequent potential delay in implementation would be contrary to the public interest, as it would leave in place default quotas for some stocks that do not already have specifications for fishing year 2023, rather than replacing them with the quotas proposed in this rule, which are based on the best available science. For multiple stocks, the fishery is operating under lower quotas than those proposed in Framework 65, and an extended delay could limit economic opportunities for the fishery, as well as lead to confusion and uncertainty. Providing timely access to these stocks is also a potential safely issue. A significant portion of fishing activity occurs in early summer, due to better weather, and for some smaller vessels, summer may be the only season in which they are able to participate in the fishery.

This proposed rule has been determined to be not significant for purposes of Executive Order (E.O.) 12866.

An Initial Regulatory Flexibility Analysis (IRFA) was prepared for this proposed rule, as required by section 603 of the Regulatory Flexibility Act, 5 U.S.C. 603. The IRFA describes the economic impact that this proposed rule would have on small entities, including small businesses, and also determines ways to minimize these impacts. The IRFA includes this section of the preamble to this rule and analyses contained in Framework 63 and its accompanying EA/RIR/IRFA. A copy of the full analysis is available from the Council (see **ADDRESSES**). A summary of the IRFA follows.

Description of the Reasons Why Action by the Agency Is Being Considered and Statement of the Objectives of, and Legal Basis for, This Proposed Rule

This action proposes management measures, including annual catch limits, for the multispecies fishery in order to prevent overfishing, rebuild overfished groundfish stocks, and achieve optimum yield in the fishery. A complete description of the action, why it is being considered, and the legal basis for this action are contained in Framework 65, and elsewhere in the preamble to this proposed rule, and are not repeated here.

Description and Estimate of the Number of Small Entities to Which This Proposed Rule Would Apply

The proposed rule would impact the commercial and recreational groundfish, Atlantic sea scallop, small-mesh multispecies, Atlantic herring, and large-mesh non-groundfish fisheries. Individually permitted vessels may hold permits for several fisheries, harvesting species of fish that are regulated by several different FMPs, beyond those impacted by the proposed action. Furthermore, multiple-permitted vessels and/or permits may be owned by entities affiliated by stock ownership, common management, identity of interest, contractual relationships, or economic dependency. For the purposes

of the Regulatory Flexibility Act analysis, the ownership entities, not the individual vessels, are considered to be the regulated entities.

As of June 1, 2022, NMFS had issued 681 commercial limited-access groundfish permits associated with vessels (including those in confirmation of permit history (CPH)), 610 party/charter groundfish permits, 699 limited access and general category Atlantic sea scallop permits, 717 small-mesh multispecies permits, 73 Atlantic herring permits, and 758 large-mesh non-groundfish permits (limited access summer flounder and scup permits). Therefore, this action potentially regulates 3,538 permits. When accounting for overlaps between fisheries, this number falls to 2,027 permitted vessels. Each vessel may be individually owned or part of a larger corporate ownership structure and, for RFA purposes, it is the ownership entity that is ultimately regulated by the proposed action. Ownership entities are identified on June 1st of each year based on the list of all permit numbers, for the most recent complete calendar year, that have applied for any type of Greater Atlantic Federal fishing permit. The current ownership data set is based on calendar year 2021 permits and contains gross sales associated with those permits for calendar years 2019 through 2021.

For RFA purposes only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (see 50 CFR 200.2). A business primarily engaged in commercial fishing (NAICS code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide. The determination as to whether the entity is large or small is based on the average annual revenue for the three years from 2019 through 2021. The Small Business Administration (SBA) has established size standards for all other major industry sectors in the U.S., including for-hire fishing (NAICS code 487210). These entities are classified as small businesses if combined annual receipts are not in excess of $8.0 million for all its affiliated operations. As with commercial fishing businesses, the annual average of the three most recent years (2019–2021) is utilized in determining annual receipts for businesses primarily engaged in for-hire fishing.

Based on the ownership data, 1,506 distinct business entities hold at least one permit that the proposed action potentially regulates. All 1,506 business entities identified could be directly regulated by this proposed action. Of these 1,506 entities, 865 are commercial fishing entities, 274 are for-hire entities, and 367 did not have revenues (were inactive in 2021). Of the 865 commercial fishing entities, 854 are categorized as small entities and 11 are categorized as large entities, per the NMFS guidelines. Furthermore, 515 of these commercial fishing entities held limited access groundfish permits, with 512 of these entities being classified as small businesses and 3 of these entities being classified as large businesses. All 274 for-hire entities are categorized as small businesses.

Description of the Projected Reporting, Record-Keeping, and Other Compliance Requirements of This Proposed Rule

The proposed action does not contain any new collection-of-information requirements under the Paperwork Reduction Act (PRA).

Federal Rules Which May Duplicate, Overlap, or Conflict With This Proposed Rule

The proposed action does not duplicate, overlap, or conflict with any other Federal rules.

Description of Significant Alternatives to the Proposed Action Which Accomplish the Stated Objectives of Applicable Statutes and Which Minimize Any Significant Economic Impact on Small Entities

The economic impacts of each proposed measure are discussed in more detail in sections 6.5 and 7.12 of the Framework 65 Environmental Assessment (see **ADDRESSES**) and are not repeated here. The Council considered several options within the proposed GOM cod rebuilding plan, including a $F_{rebuild}$ that are lower (50 percent of F_{MSY}) and higher (70 and 75 percent of F_{MSY}). The quotas that were set by Framework 63 remain in place for fishing years 2023–2024, and the proposed rebuilding strategy for GOM cod is expected to positively impact the groundfish fishery in the long-term through stock rebuilding. For the updated groundfish specifications, the Council also considered two lower ABC for GB cod, which would have greater negative economic impacts than the preferred alternative. There are no significant alternatives that would minimize the economic impacts. The proposed action is predicted to generate $74.2 million in gross revenues on the sector portion of the commercial groundfish trips, which is $41.7 million more than No Action, but $4.0 million less than fishing year 2021. Small entities engaged in common pool groundfish fishing may be negatively impacted by the proposed action as well. Likewise, small entities engaged in the recreational groundfish fishery are also likely to be negatively impacted. These negative impacts for both commercial and recreational groundfish entities are driven primarily by a substantial decline in the ACL for GOM haddock for fishing year 2023. While this decline is expected to result in short-term negative impacts, decreased GOM haddock catch in fishing year 2023 is expected to yield long-term positive impacts through stock rebuilding.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Recordkeeping, and reporting requirements.

Dated: May 24, 2023.

Samuel D. Rauch, III

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons stated in the preamble, NMFS proposes to amend 50 CFR part 648 as follows:

PART 648—FISHERIES OF THE NORTHEASTERN UNITED STATES

■ 1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 648.11, revise paragraph (h)(3)(vii)(A) to read as follows:

§ 648.11 Monitoring coverage.

* * * * *

(h) * * *

(3) * * *

(vii) * * *

(A) A monitoring service provider must hold insurance specified at § 600.748(b) and (c) of this chapter.

* * * * *

■ 3. In § 648.86, revise paragraph (c) to read as follows:

§ 648.86 NE Multispecies possession restrictions.

* * * * *

(c) *Atlantic halibut.* A vessel issued a NE multispecies permit under § 648.4(a)(1) may land or possess on board no more than one Atlantic halibut per trip, provided the vessel complies with other applicable provisions of this part, unless otherwise specified in § 648.90(a)(5)(i)(F).

* * * * *

■ 4. Amend § 648.87 by:

■ a. Revising paragraph (b)(1)(i)(A) and the first sentence of paragraph (c)(2)(i); and

■ b. Removing paragraphs (c)(2)(i)(A) and (B).

The revisions read as follows:

§ 648.87 Sector allocation.

* * * * *

(b) * * *

(1) * * *

(i) * * *

(A) *Allocated stocks.* Each sector shall be allocated a TAC in the form of an ACE for each NE multispecies stock, with the exception of Atlantic halibut, ocean pout, windowpane flounder (both the northern and southern stocks), and Atlantic wolffish based upon the cumulative PSCs of vessels/permits participating in each sector during a particular fishing year, as described in paragraph (b)(1)(i)(E) of this section.

* * * * *

(c) * * *

(2) * * *

(i) *Regulations that may not be exempted for sector participants.* The Regional Administrator may not exempt participants in a sector from the following Federal fishing regulations: Specific times and areas within the NE multispecies year-round closure areas; permitting restrictions (*e.g.,* vessel upgrades, etc.); gear restrictions designed to minimize habitat impacts (*e.g.,* roller gear restrictions, etc.); reporting requirements; and AMs specified in § 648.90(a)(5)(i)(D) through (H). * * *

* * * * *

■ 5. Amend § 648.90 by:

■ a. Removing and reserving paragraph (a)(2)(iv);

■ b. Revising paragraphs (a)(4)(iii)(A) and (B), (a)(4)(iii)(F), the introductory text of paragraph (a)(4)(iii)(H), paragraphs (a)(4)(iii)(H)(*1*)(*i*) and (a)(4)(iii)(H)(*2*), the second sentence of paragraph (a)(5)(i)(D), and paragraph (a)(5)(ii);

■ c. Removing and reserving paragraph (a)(5)(iv)(B); and

■ d. Removing paragraphs (a)(5)(iv)(C) and (D).

The revisions read as follows:

§ 648.90 NE multispecies assessment, framework procedures and specifications, and flexible area action system.

* * * * *

(a) * * *

(4) * * *

(iii) * * *

(A) *Regulated species or ocean pout catch by vessels operating only in state waters.* The catch of regulated species or ocean pout that is expected to be harvested by vessels operating only in state waters that have not been issued a Federal NE multispecies permit and are not subject to the regulations specified in this part, as well as the recreational catch of regulated species or ocean pout that occurs in state waters, unless otherwise specified in paragraph (a)(4)(iii)(H)(*1*)(*i*) of this section, shall be deducted from the ABC/ACL of each regulated species or ocean pout stock pursuant to the process for specifying ABCs and ACLs, as described in this paragraph (a)(4).

(B) *Regulated species or ocean pout catch by other, non-specified fisheries.* Regulated species or ocean pout catch by other, non-specified fisheries, including, but not limited to, exempted fisheries that occur in Federal waters, fisheries harvesting exempted species specified in § 648.80(b)(3), and recreational fisheries that occur in Federal waters, unless otherwise specified in paragraph (a)(4)(iii)(H)(*1*)(*i*) of this section, shall be deducted from the ABC/ACL of each regulated species or ocean pout stock, pursuant to the process to specify ABCs and ACLs described in this paragraph (a)(4), unless otherwise specified in paragraphs (a)(4)(iii)(C) through (G) of this section. The catch of these non-specified sub-components of the ACL shall be monitored using data collected pursuant to this part. If catch from such fisheries exceeds the amount specified in this paragraph (a)(4)(iii)(B), AMs shall be developed to prevent the overall ACL for each stock from being exceeded, pursuant to the framework adjustment process specified in this section.

* * * * *

(F) *Southern windowpane flounder catch by exempted fisheries.* Southern windowpane flounder catch by other, non-specified fisheries, including, but not limited to, exempted fisheries that occur in Federal waters and fisheries harvesting exempted species specified in § 648.80(b)(3), shall be deducted from the ABC/ACL for southern windowpane flounder pursuant to the process to specify ABCs and ACLs, as described in this paragraph (a)(4). The specific value of the sub-components of the ABC/ACL for southern windowpane flounder distributed to these other fisheries shall be specified pursuant to the biennial adjustment process specified in paragraph (a)(2) of this section.

* * * * *

(H) *Regulated species or ocean pout catch by the NE multispecies commercial and recreational fisheries.* Unless otherwise specified in the ACL recommendations developed pursuant to paragraph (a)(4)(i) of this section, after all of the deductions and considerations specified in paragraphs (a)(4)(iii)(A) through (G) and (a)(4)(iii)(H)(*1*) of this section, the remaining ABC/ACL for each regulated species or ocean pout stock shall be allocated to the NE multispecies commercial fishery, pursuant to paragraph (a)(4)(iii)(H)(2) of this section.

* * * * *

(*1*) * * *

(i) Stocks allocated. Unless otherwise specified in this paragraph (a)(4)(iii)(H)(*1*), the ABCs/ACLs for GOM cod and GOM haddock set pursuant to paragraph (a)(4) of this section shall be divided between commercial and recreational components, based upon the average proportional catch of each component for each stock during fishing years 2001 through 2006.

* * * * *

(*2*) *Commercial allocation.* Unless otherwise specified in this paragraph (a)(4)(iii)(H)(*2*), the ABC/ACL for regulated species or ocean pout stocks available to the commercial NE multispecies fishery, after consideration of the recreational allocation pursuant to paragraph (a)(4)(iii)(H)(*1*) of this section, shall be divided between vessels operating under approved sector operations plans, as described at § 648.87(c), and vessels operating under the provisions of the common pool, as defined in this part, based upon the cumulative PSCs of vessels participating in sectors calculated pursuant to § 648.87(b)(1)(i)(E). The ABC/ACL of each regulated species or ocean pout stocks not allocated to sectors pursuant to § 648.87(b)(1)(i)(E) (*i.e.,* Atlantic halibut, ocean pout, windowpane flounder, and Atlantic wolffish) that is available to the commercial NE multispecies fishery shall be allocated entirely to the common pool, and catch from sector and common pool vessels shall be attributed to this allocation. Unless otherwise specified in paragraph (a)(5) of this section, regulated species or ocean pout catch by common pool and sector vessels shall be deducted from the sub-ACL/ACE allocated pursuant to this paragraph (a)(4)(iii)(H)(*2*) for the purposes of determining whether adjustments to common pool measures are necessary, pursuant to the common pool AMs specified in § 648.82(n), or whether sector ACE overages must be deducted, pursuant to § 648.87(b)(1)(iii).

* * * * *

(5) * * *

(i) * * *

(D) *AMs for both stocks of windowpane flounder, ocean pout,*

Atlantic halibut, and Atlantic wolffish. * * * If the overall ACL for any of these stocks is exceeded, NMFS shall implement the appropriate AM, as specified in paragraphs (a)(5)(i)(D) through (H) of this section, in a subsequent fishing year, consistent with the APA. * * *

* * * * *

(ii) *AMs due to excessive catch of regulated species or ocean pout by state and other, non-specified fisheries.* At the end of the NE multispecies fishing year, NMFS will evaluate whether the catch of any stock of regulated species or ocean pout by vessels operating only in state waters or in other, non-specified fisheries, as defined in paragraphs (a)(4)(iii)(A) and (B) of this section, exceeds the sub-component of the ACL for that stock.

(A) *AMs if the overall ACL for a regulated species or ocean pout stock is exceeded.* If the catch of any stock of regulated species or ocean pout by vessels operating only in state waters or in other, non-specified fisheries exceeds the sub-component of the ACL for that stock, and the overall ACL for that stock is exceeded, then the amount of the overage of the overall ACL for that stock attributed to catch from vessels operating only in state waters or in other, non-specified fisheries, as defined in paragraphs (a)(4)(iii)(A) and (B) of this section, shall be distributed among components of the NE multispecies fishery based upon each component's share of that stock's ACL available to the NE multispecies fishery pursuant to paragraph (a)(4)(iii)(H) of this section. Each component's share of the ACL overage for a particular stock would be then added to the catch of that stock by each component of the NE multispecies fishery. If the resulting sum of catch of that stock for each component of the fishery exceeds that individual component's share of that stock's ACL specified pursuant to paragraph (a)(4)(iii)(H) of this section, then the AMs specified in paragraphs (a)(5)(i)(A) through (C) of this section shall take effect, as applicable, unless otherwise specified in paragraph (a)(5)(ii)(C) of this section.

(B) *AMs if the overall ACL for a regulated species or ocean pout stock is not exceeded.* If the catch of any stock of regulated species or ocean pout by vessels operating only in state waters or in other, non-specified fisheries, as defined in paragraphs (a)(4)(iii)(A) and (B) of this section, exceeds the sub-component of the ACL for that stock, but the overall ACL for that stock is not exceeded, even after consideration of the catch of that stock by other sub-components of the fishery, then the AMs specified in this paragraph (a)(5)(ii) shall not take effect.

(C) *AMs for GB cod due to excessive catch by non-allocated fisheries.* For any overages of the GB cod ACL in the 2022–2024 fishing years, the amount of overage of the overall ACL for GB cod attributed to catch from vessels operating only in state waters or in other, non-specified fisheries, as defined in paragraphs (a)(4)(iii)(A) and (B) of this section, would be reduced by any underage of the GB cod ACL in the fishing year following the overage, in order to determine the total amount that must be added to the catch by components of the NE multispecies fishery, as specified in paragraph (a)(5)(i)(A) of this section. If the full ACL of GB cod is caught or exceeded in the fishing year following an overage, no reduction to this amount would be made. For example, if in 2023 NMFS determines that 100 mt of GB cod catch by vessels operating only in state waters or in other, non-specified fisheries in fishing year 2022 has contributed to an ACL overage, NMFS would implement the AMs specified in paragraph (a)(5)(ii)(A) of this section at the beginning of fishing year 2024. If 2023 fishing year-end data showed that total catch of GB cod in fishing year 2023 was 25 mt below the 2023 ACL, NMFS would reduce the 100-mt overage amount by that 25-mt amount (down to 75 mt) in an in-season adjustment to the 2024 sub-ACLs, as specified in paragraph (a)(5)(i)(A) of this section.

BILLING CODE 3510–22–P

Notices

Federal Register
Vol. 88, No. 104
Wednesday, May 31, 2023

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by June 30, 2023 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food Safety and Inspection Service

Title: Sanitation SOP's Pathogen Reduction/Hazard Analysis and Critical Control Point (HACCP).

OMB Control Number: 0583–0103.

Summary of Collection: The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451). These statutes mandate that FSIS protect the public by verifying that meat and poultry products are safe, wholesome-, and properly labeled and packaged. FSIS has established requirements applicable to meat and poultry establishments designed to reduce the occurrence and numbers of pathogenic microorganisms on meat and poultry products, reduce the incidence of foodborne illness associated with the consumption of those products, and provide a new framework for modernization of the current system of meat and poultry inspection.

Need and Use of the Information: FSIS will collect information to ensure that (1) establishments have developed and maintained a standard operating plan for sanitation that is used by inspection personnel in performing monitoring regulations; (2) establishments have developed written procedures outlining specimen collection and handling for *E.coli* process control verification testing; (3) establishments developed written HAACP plans; (4) establishments will keep records for measurements during slaughter and processing, corrective action, verification check results, and related activities that contain the identity of the product, the product code or slaughter production lot, and the date the record was made; (5) establishments may have prerequisite programs that are designed to provide the basic environmental and operating conditions necessary for the production of safe, wholesome food; and (6) establishments maintain and are able to supply upon request the following information concerning the suppliers of source materials; the name, point of contact, and phone number for the establishment supplying the source materials for the lot of ground beef sampled; and the supplier lot numbers, production dates, and other information that would be useful to know about suppliers.

Description of Respondents: Business or other for-profit.

Number of Respondents: 6,087.

Frequency of Responses: Recordkeeping; Reporting: On occasion; Other (daily).

Total Burden Hours: 7,045,283.

Food Safety and Inspection Service

Title: Procedures for the Notification of New Technology and Requests for Waivers.

OMB Control Number: 0583–0127.

Summary of Collection: The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*), the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*), and the Egg Products Inspection Act (EPIA) (21 U.S.C. 1031 *et seq.*). These statutes mandate that FSIS protect the public by ensuring that meat, poultry and egg products are safe, wholesome, unadulterated, and properly labeled and packaged. FSIS established flexible procedures to actively encourage the development and use of new technologies in meat and poultry establishments and egg products plants. These procedures facilitate notification to the Agency of any new technology that is intended for use in meat and poultry establishments and egg products plants so that the Agency can decide whether the new technology requires a pre-use review. A pre-use review often includes an in-plant trail.

Need and Use of the Information: FSIS will collect information to determine if a pre-use review is needed, FSIS will request that the firm submit a protocol for an in-plant trial of the new technology. The firm then must submit a protocol that is designed to collect relevant data to support the use of the new technology. To not collect this information would reduce the effectiveness of the meat, poultry, and egg products inspection program.

Description of Respondents: Business or other for-profit.

Number of Respondents: 210.

Frequency of Responses: Recordkeeping; Reporting: on occasion.

Total Burden Hours: 12,800.

Food Safety and Inspection Service

Title: Nutrition Labeling of Major Cuts of Single-Ingredient Raw Meat or Poultry Products and Ground or Chopped Meat and Poultry Products.

OMB Control Number: 0583–0148.

Summary of Collection: The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*) These statutes mandate that FSIS protect the public by verifying that meat and, poultry products are safe, wholesome, and properly labeled and packaged. FSIS requires nutrition labeling of the major cuts of single-ingredients, raw meat and poultry products, unless an exemption applies. FSIS also requires nutrition labels on all ground or chopped meat and poultry products, with or without added seasonings, unless an exemption applies. Further, the nutrition labeling requirements for all ground or chopped meat and poultry products are consistent with the nutrition labeling requirements for multi-ingredient and heat processed products. (9 CFR 381.400(a), 9 CFR 317.300(a), 9 CFR 317.301(a), 9 CFR 381.401(a)).

Need and Use of the Information: FSIS requires nutrition labeling of major cuts of single-ingredient, raw meat and poultry products, all ground or chopped meat and poultry products to ensure that consumers will use this information to make better informed nutrition choices when purchasing these meat and poultry products.

Description of Respondents: Business or other for-profit.

Number of Respondents: 76,439.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 67,861.

Food Safety and Inspection Service

Title: Voluntary Destruction of Imported Meat, Poultry, and Egg Products.

OMB Control Number: 0583–0182.

Summary of Collection: FSIS has been delegated the authority to exercise the functions of the Secretary (7 CFR 2.18, 2.53), as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, *et seq.*), the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*), and the Egg Products Inspection Act (EPIA) (21 U.S.C. 1031, *et seq.*). These statutes mandate that FSIS protect the public by verifying that meat, poultry, and egg products are safe, wholesome, and properly labeled and packaged. Imported meat, poultry, and egg products that do not comply with U.S. requirements are not allowed to enter U.S. commerce and are identified as ''U.S. Refused Entry'' product. Inspection Program Personnel (IPP) are required to verify that U.S. refused entry product is stored and segregated from other product at an official import inspection establishment until final disposition occurs, or permission to move the shipment is granted by a FSIS Office of Field Operations (OFO) District Office (DO).

Need and Use of the Information: FSIS IPP uses the information during the observation of the product destruction to verify that the product being destroyed is the same product that was refused entry and that the product is controlled by the import establishment until destruction is completed. The Importer/Broker/Agent completes FSIS Form 9840–4, Voluntary Destruction of Imported Meat (Including Siluriformes), Poultry, and Egg Product, for product that will be destroyed under FSIS supervision.

Description of Respondents: Business or other for-profit.

Number of Respondents: 151.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 17,818.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–DM–P

DEPARTMENT OF AGRICULTURE

Rural Business-Cooperative Service

[Docket No. RBS–22–BUSINESS–0029]

Notice of Solicitation of Applications for the Rural Energy for America Program for Fiscal Years 2023 and 2024, Correction

AGENCY: Rural Business-Cooperative Service, USDA.

ACTION: Notice, correction.

SUMMARY: The Rural Business-Cooperative Service (the Agency) published a Notice of Solicitation of Applications (NOSA) in the **Federal Register** on March 31, 2023, entitled Notice of Solicitation of Applications for the Rural Energy for America Program for Fiscal Years 2023 and 2024 to announce the availability of $1.055 billion in Inflation Reduction Act funds across six quarterly cycles to be obligated by September 30, 2024. The Notice also announced the types of projects that would qualify for a federal grant share not to exceed 50 percent of the project cost, a set-aside for underutilized renewable energy technologies (underutilized technologies), as well as scoring revisions to support Administration priorities. This correction notice is amending the definition of underutilized renewable energy technologies.

FOR FURTHER INFORMATION CONTACT: Jonathan Burns, Program Management Division, Rural Business-Cooperative Service, United States Department of Agriculture, 774–678–7238 or email *CPgrants@usda.gov.*

SUPPLEMENTARY INFORMATION:

Correction

In FR Doc. 2023–06376 of March 31, 2023 (88 FR 19239), on page 19240, in column 3, under Section A.3, the second paragraph that starts with ''For the purpose of this Notice,'' is being replaced with:

For the purpose of this Notice only, underutilized renewable energy technologies (underutilized technologies) are defined as those technologies which make up less than 20 percent of the total grant dollars obligated at the end of the fiscal year, two (2) fiscal years prior to the current year. No single technology may receive more than 50 percent of the total funding available in each fiscal year, excepting years in which all underutilized technology applications have been processed, and applications remain unfunded with funding still available in the set-aside.'' For example, FY 2021 award data will be utilized to determine which technologies are underutilized technologies for the FY 2023 competition.

Karama Neal,

Administrator, Rural Business-Cooperative Service.

BILLING CODE 3410–XY–P

DEPARTMENT OF COMMERCE

Office of the Secretary

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; The Environmental Questionnaire and Checklist (EQC)

AGENCY: Office of Sustainable Energy and Environmental Programs, Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the

Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: Written comments must be submitted on or before July 31, 2023.

ADDRESSES: Interested persons are invited to submit written comments to Kristen Thomas, Associate Director, Office of Sustainable Energy and Environmental Programs, and *PRAcomments@doc.gov.* Please reference OMB Control Number 0608–0028 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Kristen Thomas, Associate Director, Office of Sustainable Energy and Environmental Programs, *kthomas@doc.gov* or (202) 482–1202.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a currently approved information collection. The National Environmental Policy Act (NEPA) (42 U.S.C. 4321–4347) and the White House Council on Environmental Quality's (CEQ) Regulations for Implementing NEPA (40 CFR parts 1500–1508) require that Federal agencies complete an environmental analysis for all major Federal actions significantly affecting the environment. Those actions may include a Federal agency's decision to fund non-Federal projects under grants and cooperative agreements, including infrastructure projects. In order to determine NEPA compliance requirements for a project receiving Department of Commerce (DOC) bureau-level funding, DOC must assess information which can only be provided by the applicant for Federal financial assistance (grant).

The Environmental Questionnaire and Checklist (EQC) provides Federal financial assistance applicants and DOC staff with a tool to ensure that the necessary project and environmental information is obtained. The EQC was developed to collect data concerning potential environmental impacts that the applicant for Federal financial assistance possesses and to transmit that information to the Federal reviewer. The EQC allows for a more rapid review of projects and facilitate DOC's evaluation of the potential environmental impacts of a project and level of NEPA documentation required. DOC staff use the information provided in answers to the questionnaire to determine compliance requirements for NEPA and conduct subsequent NEPA analysis as needed. Information provided in the questionnaire may also be used for other regulatory review requirements associated with the proposed project, such as the National Historic Preservation Act.

II. Method of Collection

The primary method of collection will be the internet (electronically). Some supporting documents may be emailed or mailed.

II. Data

OMB Control Number: 0690–0028.

Form Number: CD–593.

Type of Review: Regular submission (extension of a currently approved collection).

Affected Public: Business or other for-profit organizations; individuals or households; not-for-profit institutions; State, local, or Tribal government; and Federal Government.

Estimated Number of Respondents: 1,000.

Estimated Time per Response: 3 hours.

Estimated Total Annual Burden Hours: 3,000.

Estimated Total Annual Cost to Public: $1,200 in mailing costs ($6 × approximately 200 respondents who choose to mail rather than email attachments).

IV. Request for Comments

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–NW–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Regulations and Procedures Technical Advisory Committee; Notice of Partially Closed Meeting-Hybrid

The Regulations and Procedures Technical Advisory Committee (RPTAC) will meet June 20, 2023, 9:00 a.m., Eastern Standard Time, in the Herbert C. Hoover Building, Room 3884, 1401 Constitution Avenue NW, Washington, DC (enter through Main Entrance on 14th Street between Constitution and Pennsylvania Avenues). The Committee advises the Office of the Assistant Secretary for Export Administration on implementation of the Export Administration Regulations (EAR) and provides for continuing review to update the EAR as needed.

Agenda

Public Session

1. Opening remarks by the Chairman
2. Opening remarks by the Bureau of Industry and Security
3. Presentations of Papers by the Public
4. Regulations Update
5. Automated Export System Update
6. Working Group Reports

Closed Session

7. Discussion of matters determined to be exempt from the open meeting and public participation requirements found in sections 1009(a)(1) and 1009(a)(3) of the Federal Advisory Committee Act (FACA) (5 U.S.C. 1001–1014). The exemption is authorized by Section 1009(d) of the FACA, which permits the closure of advisory committee meetings, or portions thereof, if the head of the agency to which the advisory committee reports determines such meetings may be closed to the public in accordance with subsection (c) of the Government in the Sunshine Act (5 U.S.C. 552b(c)). In this case, the applicable provisions of 5 U.S.C. 552b(c) are subsection 552b(c)(4), which permits closure to protect trade secrets and commercial or financial information that is privileged or confidential,

and subsection 552b(c)(9)(B), which permits closure to protect information that would be likely to significantly frustrate implementation of a proposed agency action were it to be disclosed prematurely. The closed session of the meeting will involve committee discussions and guidance regarding U.S. Government strategies and policies.

The open session will be accessible via teleconference. To join the conference, submit inquiries to Ms. Yvette Springer at *Yvette.Springer@bis.doc.gov,* no later than June 13, 2023.

A limited number of seats will be available for the public session. Reservations are not accepted. To the extent time permits, members of the public may present oral statements to the Committee. The public may submit written statements at any time before or after the meeting. However, to facilitate distribution of public presentation materials to Committee members, the Committee suggests that presenters forward the public presentation materials prior to the meeting to Ms. Springer.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on April 24, 2023, pursuant to 5 U.S.C. 1009(d) of the FACA, that the portion of the meeting dealing with pre-decisional changes to the Commerce Control List and the U.S. export control policies shall be exempt from the provisions relating to public meetings found in 5 U.S.C. 1009(a)(1) and 1009(a)(3). The remaining portions of the meeting will be open to the public.

For more information, contact Ms. Springer via email.

Yvette Springer,

Committee Liaison Officer.

Certain Magnesia Carbon Bricks From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that the 38 companies subject to this administrative review of the antidumping duty order on certain magnesia carbon bricks (bricks) from the People's Republic of China (China) are part of the China-wide entity because none filed a separate rate application (SRA) or a separate rate certification (SRC). The period of review (POR) is September 1, 2021, through August 31, 2022. We invite interested parties to comment on these preliminary results.

DATES: Applicable May 31, 2023.

FOR FURTHER INFORMATION CONTACT: Nathan James, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5305.

SUPPLEMENTARY INFORMATION:

Background

On September 1, 2022, Commerce published in the **Federal Register** a notice of opportunity to request an administrative review of the antidumping duty order on bricks from China [1] for the POR.[2] On November 3, 2022, in response to a timely request from the Magnesia Carbon Bricks Fair Trade Committee (the petitioner),[3] we initiated an administrative review of the *Order* with respect to 38 companies.[4]

On November 30, 2022, we placed on the record U.S. Customs and Border Protection (CBP) entry data under administrative protective order (APO) for all interested parties with APO access.[5] The deadline for interested parties to submit a no-shipment certification, SRA, or SRC was December 5, 2022.[6] No party submitted a no-shipment certification, SRA, or SRC.

Scope of the Order

The scope of the *Order* includes certain chemically bonded (resin or pitch), magnesia carbon bricks with a magnesia component of at least 70 percent magnesia (MgO) by weight, regardless of the source of raw materials for the MgO, with carbon levels ranging from trace amounts to 30 percent by weight, regardless of enhancements (for example, magnesia carbon bricks can be enhanced with coating, grinding, tar impregnation or coking, high temperature heat treatments, anti-slip treatments or metal casing) and regardless of whether or not antioxidants are present (for example, antioxidants can be added to the mix from trace amounts to 15 percent by weight as various metals, metal alloys, and metal carbides).

Certain magnesia carbon bricks that are subject to the *Order* are currently classifiable under subheadings 6902.10.1000, 6902.10.5000, 6815.91.0000, 6815.99.2000 and 6815.99.4000 of the Harmonized Tariff Schedule of the United States (HTSUS). While HTSUS subheadings are provided for convenience and customs purposes, the written description is dispositive.

Methodology

Commerce is conducting this administrative review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.213.

Preliminary Results of Review

The 38 companies subject to this review did not file no-shipment certifications, SRAs, or SRCs. Thus, Commerce preliminarily determines that these companies have not demonstrated their eligibility for separate rate status. As such, Commerce also preliminarily determines that the companies subject to review are part of the China-wide entity.

In addition, Commerce no longer considers the non-market economy (NME) entity as an exporter conditionally subject to an antidumping duty administrative review.[7] Accordingly, the NME entity will not be under review unless Commerce

[3] *See* Petitioner's Letter, ''Request for Administrative Review,'' dated September 30, 2022.

[4] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 87 FR 66275 (November 3, 2022) (*Initiation Notice*); *see also* the appendix to this notice.

[5] *See* Memorandum, ''Placing Customs Data on the Record,'' dated November 30, 2022.

[6] *See Initiation Notice,* 87 FR 66275–76 (''If a producer or exporter named in this notice of initiation had no exports, sales, or entries during the period of review (POR), it must notify Commerce within 30 days of publication of this notice in the **Federal Register**. . . . Separate Rate Applications are due to Commerce no later than 30 calendar days after publication of this **Federal Register** notice.''). Thirty calendar days after the *Initiation Notice* published was Saturday, December 3, 2022. Commerce's practice dictates that, where a deadline falls on a weekend or federal holiday, the appropriate deadline is the next business day. *See Notice of Clarification: Application of ''Next Business Day'' Rule for Administrative Determination Deadlines Pursuant to the Tariff Act of 1930, As Amended,* 70 FR 24533 (May 10, 2005).

specifically receives a request for, or self-initiates, a review of the NME entity. In this administrative review, no party requested a review of the China-wide entity and we have not self-initiated a review of the China-wide entity. Because no review of the China-wide entity is being conducted, the China-wide entity's entries are not subject to the review, and the rate applicable to the NME entity is not subject to change as a result of this review. The China-wide entity rate is 236.00 percent.[8]

Public Comment

Interested parties are invited to comment on the preliminary results and may submit case briefs and/or written comments, filed electronically via Enforcement and Compliance's Antidumping Duty and Countervailing Duty Centralized Electronic Service System (ACCESS), within 30 days after the date of publication of these preliminary results of review.[9] ACCESS is available to registered users at *https://access.trade.gov.* Rebuttal briefs, limited to issues raised in the case briefs, must be filed within seven days after the time limit for filing case briefs.[10] Parties who submit case or rebuttal briefs in this proceeding are requested to submit with each argument a statement of the issue, a brief summary of the argument, and a table of authorities.[11] Note that Commerce has temporarily modified certain portions of its requirements for serving documents containing business proprietary information, until further notice.[12]

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Enforcement and Compliance within 30 days of the date of publication of this notice.[13] Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case and rebuttal briefs. If a request for a hearing is made, parties will be notified of the time and date for the hearing to be held.[14] Commerce intends to issue the final results of this administrative review, which will include the results of our analysis of all issues raised in the case briefs, within 120 days of publication of these preliminary results in the **Federal Register**, unless extended, pursuant to section 751(a)(3)(A) of the Act.

[13] *See* 19 CFR 351.310(c).

[14] *See* 19 CFR 310(d).

Assessment Rates

Upon issuance of the final results of this review, Commerce will determine, and CBP will assess, antidumping duties on all appropriate entries covered by this review.[15] We intend to instruct CBP to liquidate entries containing subject merchandise exported by the companies under review that we determine in the final results to be part of the China-wide entity at the China-wide entity rate of 236.00 percent.[16]

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of review, as provided for by section 751(a)(2)(C) of the Act: (1) for previously-investigated or reviewed Chinese and non-Chinese exporters which are not under review in this segment of the proceeding but which have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (2) for all Chinese exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be the China-wide rate of 236.00 percent; and (3) for all non-Chinese exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to Chinese exporter(s) that supplied that non-Chinese exporter. These cash deposit requirements, when imposed, shall remain in effect until further notice.

[15] *See* 19 CFR 351.212(b)(1).

[16] For a full discussion of this practice, *see Non-Market Economy Antidumping Proceedings: Assessment of Antidumping Duties,* 76 FR 65694 (October 24, 2011).

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of antidumping duties by the amount of countervailing duties.

Notification to Interested Parties

We are issuing and publishing these preliminary results in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(h) and 19 CFR 351.221(b)(4).

Dated: May 23, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Paper File Folders From the People's Republic of China: Postponement of Final Determination in the Less-Than-Fair-Value Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is postponing the deadline for issuing the final determination in the less-than-fair-value investigation of paper file folders from the People's Republic of China (China) until September 29, 2023, and is extending the provisional measures from a four-month period to a six-month period.

DATES: Applicable May 31, 2023.

FOR FURTHER INFORMATION CONTACT: Zachariah Hall, AD/CVD Operations VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6261.

SUPPLEMENTARY INFORMATION:

Background

Commerce published the notice of initiation of this investigation on November 8, 2022.[1] The period of investigation is April 1, 2022, through September 30, 2022. On May 17, 2023, Commerce preliminarily determined that paper file folders from China are being, or are likely to be, sold in the United States at less than fair value.[2]

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.210(b)(2) provide that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner.[3] Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by respondents for postponement of a final antidumping determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On May 12, 2023, pursuant to 19 CFR 351.210(e), mandatory respondents CRE8 Direct (Ningbo) Co., Ltd. (CRE8 Direct) and Ningbo Guangbo Import & Export Co., Ltd. (Guangbo) requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[4] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce's final determination will be issued no later than 135 days after the date of publication of the *Preliminary Determination.*

Notification to Interested Parties

This notice is issued and published pursuant to section 735(a)(2) of the Act and 19 CFR 351.210(g).

Dated: May 24, 2023.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Tin Mill Products From Canada, the People's Republic of China, Germany, the Netherlands, the Republic of Korea, Taiwan, the Republic of Turkey, and the United Kingdom: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable May 31, 2023.

FOR FURTHER INFORMATION CONTACT: Yang Jin Chun (Canada), Emily Halle (the People's Republic of China (China)), George McMahon (Germany), Brittany Bauer (the Netherlands), Fred Baker (the Republic of Korea (Korea)), Jacob Saude (Taiwan), Alice Maldonado (the Republic of Turkey (Turkey)), and Charles DeFilippo (the United Kingdom), AD/CVD Operations, Offices II, V, VI, and VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5760, (202) 482–0176, (202) 482–1167, (202) 482–3860, (202) 482–2924, (202) 482–0981, (202) 482–4682, and (202) 482–3979, respectively.

SUPPLEMENTARY INFORMATION:

Background

On February 7, 2023, the U.S. Department of Commerce (Commerce) initiated less-than-fair-value (LTFV) investigations of imports of tin mill products from Canada, China, Germany, the Netherlands, Korea, Taiwan, Turkey, and the United Kingdom.[1] Currently, the preliminary determinations are due no later than June 27, 2023.

[1] *See Tin Mill Products from Canada, the People's Republic of China, Germany, the Netherlands, the Republic of Korea, Taiwan, the Republic of Turkey, and the United Kingdom: Initiation of Less-Than-Fair-Value Investigations,* 88 FR 9481 (February 14, 2023).

Postponement of Preliminary Determinations

Section 733(b)(1)(A) of the Tariff Act of 1930, as amended (the Act), requires Commerce to issue the preliminary determination in an LTFV investigation within 140 days after the date on which Commerce initiated the investigation. However, section 733(c)(1) of the Act permits Commerce to postpone the preliminary determination until no later than 190 days after the date on which Commerce initiated the investigation if: (A) the petitioner makes a timely request for a postponement; or (B) Commerce concludes that the parties concerned are cooperating, that the investigation is extraordinarily complicated, and that additional time is necessary to make a preliminary determination. Under 19 CFR 351.205(e), the petitioner must submit a request for postponement 25 days or more before the scheduled date of the preliminary determination and must state the reasons for the request. Commerce will grant the request unless it finds compelling reasons to deny the request.

On May 18, 2023, the petitioners [2] submitted a timely request that Commerce postpone the preliminary determinations in the LTFV investigations of imports of tin mill products from Canada, China, Germany, the Netherlands, Korea, Taiwan, Turkey, and the United Kingdom. The petitioners stated that ''{p}ostponement is warranted so that Commerce can evaluate fully the initial questionnaire responses submitted by the mandatory respondents and solicit supplemental information as necessary,'' and the petitioners ''seek postponement of all the antidumping investigations in order to keep them on the same schedule and avoid the need to split the cases at the International Trade Commission.'' [3]

For the reasons stated above and because there are no compelling reasons to deny the request, in accordance with section 733(c)(1)(A) of the Act and 19 CFR 351.205(e), Commerce is postponing the deadline for the preliminary determinations by 50 days (*i.e.,* to 190 days after the date on which these investigations were initiated). As a result, Commerce will issue its preliminary determinations in the above-referenced investigations no later than August 16, 2023. In accordance with section 735(a)(1) of the Act and 19 CFR 351.210(b)(1), the deadline for the final determinations of these investigations will continue to be 75 days after the date of the preliminary determinations, unless postponed at a later date.

[2] The petitioners are Cleveland-Cliffs Inc. and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union.

[3] *See* Petitioners' Letter, ''Request for Postponement of the Preliminary Determinations,'' dated May 18, 2023.

Notification to Interested Parties

This notice is issued and published pursuant to section 733(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: May 24, 2023.

SUPPLEMENTARY INFORMATION:

Background

Commerce published the *Preliminary Results* of this administrative review in the **Federal Register** on December 22, 2022, and invited interested parties to comment.[1] On January 30, 2023, we received case briefs from the following interested parties: Riverside,[2] Jiangsu Senmao, Lumber Liquidators Services, LLC (including various Chinese exporters and producers) (Lumber Liquidators and Foreign Exporters/Producers), the Government of the People's Republic of China (GOC), and the American Manufacturers of Multilayered Wood Flooring (the petitioner).[3] Fine Furniture (Shanghai) Limited and Double F Limited (collectively, Fine Furniture); and Zhejiang Longsen Lumbering Co., Ltd., Huzhou Chenghang Wood Co., Ltd., Hunchun Xingjia Wooden Flooring Inc., Huzhou Fulinmen Imp. & Exp. Co., Ltd., Zhejiang Fuerjia Wooden Co., Ltd, and Dun Hua Sen Tai Wood Co., Ltd, (collectively, CTL Group) submitted letters in lieu of case briefs on January 30, 2023, concurring with the arguments of other respondent parties.[4] On February 13, 2023, we received rebuttal briefs from Riverside, Jiangsu Senmao, and the petitioner.[5] Fine Furniture and Lumber Liquidators and Foreign Exporters/Producers submitted letters in lieu of a rebuttal case brief on February 13, 2023, incorporating the rebuttal comments of other respondent parties.[6] On May 3, 2023, we held a public hearing to discuss the interested parties' comments.[7]

Scope of the Order

The product covered by the *Order* [8] is multilayered wood flooring from China.

[1] *See Multilayered Wood Flooring from the People's Republic of China: Preliminary Results and Partial Rescission of Countervailing Duty Administrative Review; 2020,* 87 FR 78644 (December 22, 2022) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

[2] Cross-owned affiliates are Baroque Timber Industries (Baroque Timber), Suzhou Times Flooring Co., Ltd., and Zhongshan Lianjia Flooring Co., Ltd.

For a complete description of the scope of the *Order, see* the Issues and Decision Memorandum.[9]

Analysis of Comments Received

All issues raised in the parties' briefs are addressed in the Issues and Decision Memorandum. A list of the issues addressed is attached to this notice at Appendix I. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Changes Since the Preliminary Results

Based on our analysis of the case and rebuttal briefs and the evidence on the record, we made certain changes from the *Preliminary Results.* These changes are explained in the Issues and Decision Memorandum.

Methodology

Commerce is conducting this review in accordance with section 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act). For each of the subsidy programs found countervailable, we find that there is a subsidy, *i.e.,* a government-provided financial contribution that gives rise to a benefit to the recipient, and that the subsidy is specific.[10] The Issues and Decision Memorandum contains a full description of the methodology underlying Commerce's conclusions, including any determination that relied upon the use of adverse facts available pursuant to sections 776(a) and (b) of the Act.

Rate for Non-Selected Companies Under Review

The statute and Commerce's regulations do not address the establishment of a rate to be applied to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(e)(2) of the Act. However, Commerce normally determines the rates for non-selected companies in reviews in a manner that is consistent with section 705(c)(5) of the Act, which provides the basis for calculating the all-others rate in an investigation. Section 705(c)(5)(A)(i) of the Act instructs Commerce, as a general rule, to calculate the all-others rate equal to the weighted average of the countervailable subsidy rates established for exporters and producers individually investigated, excluding any zero or *de minimis* countervailable subsidy rates, and any rates determined entirely on the basis of facts available.

There are 18 companies for which a review was requested and not rescinded, and which were not selected as mandatory respondents or found to be cross-owned with a mandatory respondent. For these non-selected companies, because the rates calculated for the participating mandatory respondents in this review, Riverside and Jiangsu Senmao, were above *de minimis* and not entirely based on facts available, we calculated a rate by weight-averaging the calculated subsidy rates of Riverside and Jiangsu Senmao using their publicly ranged sales data for exports of subject merchandise to the United States during the POR.[11]

This is the same methodology Commerce applied in the *Preliminary Results* for determining a rate for companies not selected for individual examination. However, due to changes in the calculations for Riverside and Jiangsu Senmao, we revised the non-selected rate accordingly. Consequently, for the 18 non-selected companies for which a review was requested and not rescinded, we are applying an *ad valorem* subsidy rate of 13.04 percent.

Final Results of Administrative Review

We determine the countervailable subsidy rates for the mandatory and non-selected respondents under review for the period of January 1, 2020, through December 31, 2020, are as follows:

Producer/exporter	Subsidy rate (percent)
Riverside Plywood Corporation and its Cross-Owned Affiliates[12]	17.06
Jiangsu Senmao Bamboo and Wood Industry Co., Ltd.	3.26
Non-Selected Companies Under Review[13]	13.04

Disclosure

Commerce intends to disclose the calculations and analysis performed for these final results of review within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to 19 CFR 351.212(b)(2), Commerce will determine, and CBP shall assess, countervailing duties on all appropriate entries of subject merchandise in accordance with the final results of this review, for the above-listed companies at the applicable *ad valorem* assessment rates listed. We intend to issue assessment instructions to CBP 35 days after the date of publication of these final results of review. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Instructions

In accordance with section 751(a)(2)(C) of the Act, Commerce also intends to instruct CBP to collect cash deposits of estimated countervailing duties in the amounts shown for each of the respective companies listed above on shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. For all non-reviewed firms subject to the *Order,* we will instruct CBP to continue to collect cash deposits of estimated countervailing duties at the most recent company-specific or all-others rate applicable to the company, as appropriate. These cash deposit requirements, effective upon publication of these final results, shall remain in effect until further notice.

Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the destruction of proprietary information

Order, 76 FR 76693 (December 8, 2011) (*Order*); *see also Multilayered Wood Flooring from the People's Republic of China: Amended Antidumping and Countervailing Duty Orders,* 77 FR 5484 (February 3, 2012) (*Amended Order*); and *Multilayered Wood Flooring from the People's Republic of China: Final Clarification of the Scope of the Antidumping and Countervailing Duty Orders,* 82 FR 27799 (June 19, 2017).

[9] *See* Memorandum, ''Issues and Decision Memorandum for the Final Results of the 2020 Countervailing Duty Administrative Review of Multilayered Wood Flooring from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[10] *See* sections 771(5)(B) and (D) of the Act regarding financial contribution; section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.

[11] *See* Memorandum, ''Calculation of the Non-Selected Rate for the Final Results,'' dated concurrently with this notice.

[12] Cross-owned affiliates are Baroque Timber (Zhongshan) Industries, Suzhou Times Flooring Co., Ltd., and Zhongshan Lianjia Flooring Co., Ltd.

[13] *See* Appendix II.

disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing these final results in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: May 23, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Appendix I—List of Topics Discussed in the Final Decision Memorandum

I. Summary
II. Background
III. Scope of the *Order*
IV. Non-Selected Companies Under Review
V. Period of Review
VI. Subsidies Valuation Information
VII. Changes Since the Preliminary Results
VIII. Use of Facts Otherwise Available
IX. Analysis of Programs
X. Discussion of Comments
Comment 1: Whether to Apply Adverse Facts Available to the Export Buyer's Credit Program
Comment 2: Whether to Apply Adverse Facts Available Regarding the Countervailability of the Provision of Electricity for Less Than Adequate Remuneration
Comment 3: Whether to Apply Adverse Facts Available to Specificity Regarding the Countervailability of the Provision of Inputs for Less Than Adequate Remuneration
Comment 4: Whether Individually-Owned Suppliers Are Government Authorities
Comment 5: Whether Commerce Should Treat Pine Integrated Boards as Veneers
Comment 6: Whether Commerce Should Weight International Tropical Timber Organization Pricing Data Differently for the Wood Input Benchmarks
Comment 7: Whether to Include Certain Harmonized Schedule Subheadings in the Glue, Paint, and Plywood Benchmark Price Calculations
A. Wood Glue and Adhesives Benchmark: Whether to Include 3906.10
B. Paint, Primer, and Stain Benchmark: Whether to Exclude 3208.10; 3208.90; and 3209.90
C. Plywood Benchmark: Whether to Exclude All UN Comtrade Data and Use ITTO Prices for Specific Grades
Comment 8: Whether to Include UN Comtrade Data for China and ASEAN in the Input for Less Than Adequate Remuneration Benchmarks
Comment 9: Whether to Include Domestic ITTO Pricing Data in Tier Two World Market Benchmark Prices
Comment 10: Whether to Rely on Certain Ocean Freight Benchmark Data Used to Calculate the Ocean Freight Benchmarks
Comment 11: Whether to Use the Respondents' Inland Freight Costs for the Inland Freight Benchmark
Comment 12: Whether Commerce Correctly Calculated Baroque Timber's Backboard Veneer Benefit
Comment 13: Whether Commerce Made Ministerial Errors in the Subsidy Rate Calculations Pertaining to Various Provision of Inputs for Less Than Adequate Remuneration Programs
XI. Recommendation

Appendix II—Non-Selected Companies Under Review

1. Benxi Flooring Factory (General Partnership)
2. Dalian Kemian Wood Industry Co., Ltd.
3. Dalian Penghong Floor Products Co., Ltd.
4. Dalian Qianqiu Wooden Product Co., Ltd.
5. Dalian Shumaike Floor Manufacturing Co., Ltd.
6. Dun Hua Sen Tai Wood Co., Ltd.
7. Dunhua Shengda Wood Industry Co., Ltd.
8. Fine Furniture (Shanghai) Limited
9. Fusong Jinlong Wooden Group Co., Ltd.
10. Fusong Jinqiu Wooden Product Co., Ltd.
11. Fusong Qianqiu Wooden Product Co., Ltd.
12. Huzhou Jesonwood Co., Ltd
13. Jiangsu Guyu International Trading Co., Ltd.
14. Jiashan HuiJiaLe Decoration Material Co., Ltd.
15. Kingman Wood Industry Co., Ltd.
16. Metropolitan Hardwood Floors, Inc.
17. Samling Elegant Living Trading (Labuan) Ltd.
18. Zhejiang Fuerjia Wooden Co., Ltd.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD027]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Ad Hoc Groundfish Electronic Monitoring Policy Advisory and Technical Advisory Committees (GEMPAC/TAC) will hold an online meeting, which is open to the public.

DATES: The meeting will be held Friday, June 16, 2023, from 9 a.m. to 11 a.m., Pacific Time, or until business for the day is completed.

ADDRESSES: This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements, will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Brett Wiedoff, Staff Officer, Pacific Council; telephone: (503) 820–2424.

SUPPLEMENTARY INFORMATION: The primary purpose of this meeting is for the GEMPAC/TAC to review materials and prepare recommendations for the June 2023 Pacific Council meeting regarding potential changes to the Pacific Council's electronic monitoring program.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov;* (503) 820–2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 25, 2023.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD022]

Fisheries of the South Atlantic; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 82 South Atlantic Gray Triggerfish Assessment Webinar 3.

SUMMARY: The SEDAR 82 assessment of the South Atlantic stock of gray triggerfish will consist of a data workshop, a series of assessment webinars, and a review workshop. A SEDAR 82 Assessment Webinar 3 is scheduled for June 21, 2023. See **SUPPLEMENTARY INFORMATION.**

DATES: The SEDAR 82 South Atlantic Gray Triggerfish Assessment Webinar 3 is scheduled for June 21, 2023, 1 p.m. until 4 p.m., Eastern. The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the assessment process. Such adjustments may result in the meeting being extended from or completed prior to the time established by this notice.

ADDRESSES: The meeting will be held via webinar. The webinar is open to members of the public. Registration for the webinar is available by contacting the SEDAR coordinator via email at *Kathleen.Howington@safmc.net.*

SEDAR address: South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N Charleston, SC 29405; *www.sedarweb.org.*

FOR FURTHER INFORMATION CONTACT: Kathleen Howington, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; phone: (843) 571–4371; email: *Kathleen.Howington@safmc.net.*

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and State and Federal agencies.

Items for discussion are as follows: Discuss any leftover data issues that were not cleared up during the data process, answer any questions that the analysts have, and introduce/discuss model development and model setup.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is accessible to people with disabilities. Requests for auxiliary aids should be directed to the South Atlantic Fishery Management Council office (see **ADDRESSES**) at least 10 business days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 25, 2023.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Solicitation for Applications for Advisory Councils Established Pursuant to the National Marine Sanctuaries Act and Executive Order

AGENCY: Office of National Marine Sanctuaries (ONMS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of solicitation.

SUMMARY: Notice is hereby given that ONMS will solicit applications to fill non-governmental seats on its 17 established national marine sanctuary advisory councils and the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve Advisory Council (advisory councils), under the National Marine Sanctuaries Act and the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve Executive Order, respectively. Note, the list of 18 established advisory councils in the Contact Information for Each Site section includes the advisory council established for the Proposed Lake Ontario National Marine Sanctuary and the Proposed Hudson Canyon National Marine Sanctuary. Vacant seats, including positions (*i.e.,* primary and alternate), for each of the advisory councils will be advertised differently at each site in accordance with the information provided in this notice. This notice contains web page links and contact information for each site, as well as additional resources on advisory council vacancies and the application process.

DATES: Please visit individual site web pages, or reach out to a site as identified in this notice's **SUPPLEMENTARY INFORMATION** section on Contact Information for Each Site, regarding the timing and advertisement of vacant seats, including positions (*i.e.,* primary or alternate), for each of the advisory councils. Applications will only be accepted in response to current, open vacancies and in accordance with the deadlines and instructions included on each site's website.

ADDRESSES: Vacancies and applications are specific to each site's advisory council. As such, questions about a specific council or vacancy, including questions about advisory council applications, should be directed to a site. Contact Information for Each Site is contained in the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: For further information on a particular

advisory council or available seats, please contact the site as identified in this notice's **SUPPLEMENTARY INFORMATION** section on Contact Information for Each Site, below. For general inquiries related to this notice or ONMS advisory councils established pursuant to the National Marine Sanctuaries Act or Executive Order 13178, contact Sage Riddick, Office of National Marine Sanctuaries Protected Area Policy Division, *sage.riddick@noaa.gov,* or at 240–560–3365.

SUPPLEMENTARY INFORMATION: Section 315 of the National Marine Sanctuaries Act (NMSA) (16 U.S.C. 1445a) allows the Secretary of Commerce to establish advisory councils to advise and make recommendations regarding the designation and management of national marine sanctuaries. Executive Order 13178 similarly established a Coral Reef Ecosystem Reserve Council pursuant to the NMSA for the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve. In this **SUPPLEMENTARY INFORMATION** section, NOAA provides details regarding the Office of National Marine Sanctuaries, the role of advisory councils, and contact information for each site.

Office of National Marine Sanctuaries (ONMS)

ONMS serves as the trustee for a network of underwater parks encompassing more than 620,000 square miles of marine and Great Lakes waters from Washington State to the Florida Keys, and from Lake Huron to American Samoa. The network includes a system of 15 national marine sanctuaries and Papahānaumokuākea and Rose Atoll marine national monuments. National marine sanctuaries protect our nation's most vital coastal and marine natural and cultural resources, and through active research, management, and public engagement, sustain healthy environments that are the foundation for thriving communities and stable economies.

One of the many ways ONMS ensures public participation in the designation and management of national marine sanctuaries is through the formation of advisory councils. Advisory councils are community-based advisory groups established to provide advice and recommendations to ONMS on issues including management, science, service, and stewardship; and to serve as liaisons between their constituents in the community and the site. Pursuant to section 315(a) of the National Marine Sanctuaries Act, 16 U.S.C. 1445A(a), advisory councils are exempt from the requirements of the Federal Advisory Committee Act. Additional information on ONMS and its advisory councils can be found at *http://sanctuaries.noaa.gov.*

Advisory Council Membership

Under section 315 of the NMSA, advisory council members may be appointed from among: (1) Persons employed by federal or state agencies with expertise in management of natural resources; (2) members of relevant regional fishery management councils; and (3) representatives of local user groups, conservation and other public interest organizations, scientific organizations, educational organizations, or others interested in the protection and multiple use management of sanctuary resources. For the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve Advisory Council, section 5(f) of Executive Order 13178 (as amended by Executive Order 13196) specifically identifies member and representative categories.

The charter for each advisory council defines the number and type of seats and positions on the council; however, as a general matter, available seats could include: Conservation, education, research, fishing, whale watching, diving and other recreational activities, boating and shipping, tourism, harbors and ports, maritime business, agriculture, maritime heritage, and citizen-at-large.

For each of the advisory councils, applicants are chosen based upon their particular experience in relation to the seat for which they are applying; community and professional affiliations; views regarding the protection and management of marine or Great Lakes resources; and possibly the length of residence in the area affected by the site. Applicants chosen as members or alternates should expect to serve two- or three-year terms, pursuant to the charter of the specific national marine sanctuary advisory council or Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve Advisory Council. More information on advisory council membership and processes, and materials related to the purpose, policies, and operational requirements for advisory councils can be found in the charter for a particular advisory council (*http://sanctuaries.noaa.gov/management/ac/council_charters.html*) and the *National Marine Sanctuary Advisory Council Implementation Handbook* (*https://farallones.noaa.gov/manage/sac_handbook.html*).

Privacy Act Statement

Authority. The collection of information concerning the solicitation for applications for sanctuary advisory councils is authorized under the National Marine Sanctuaries Act, 16 U.S.C. 1445a, and Executive Order 13178, and in accordance with the Privacy Act of 1974, as amended, (Privacy Act) 5 U.S.C. 552a.

Purposes. The collection of names, contact information, professional information, qualifications, and answers to the application questions is required in order for the Office of National Marine Sanctuaries to evaluate and appoint members to the sanctuary advisory councils. The information collected will be reviewed by NOAA employees, and may also be reviewed by current sanctuary advisory council members as part of the evaluation process.

Routine Uses. NOAA will use the application information for the purposes set forth above. The Privacy Act authorizes disclosure of the collected information for the following purposes: to NOAA staff for work-related purposes; for other purposes as set forth in the Privacy Act; and for routine uses published in one or more of the following Privacy Act System of Records Notices, as applicable: COMMERCE/DEPT–11, Candidates for Membership, Members, and Former Members of Department of Commerce Advisory Committees, available at *https://www.osec.doc.gov/opog/PrivacyAct/SORNs/dept-11.html;* COMMERCE/DEPT–18, Employees Personnel Files Not Covered by Notices of Other Agencies, available at *https://www.osec.doc.gov/opog/PrivacyAct/SORNs/DEPT-18.html;* and OPM/GOVT–1, General Personnel Records, available at *https://www.opm.gov/information-management/privacy-policy/sorn/opm-sorn-govt-1-general-personnel-records.pdf,* which cover certain records regarding Federal employees and may also cover records of individuals who are not Federal employees who, through their service on a sanctuary advisory council, may be considered as volunteers providing gratuitous services to the agency without compensation; and, for individuals who are also members of a Regional Fishery Management Council, COMMERCE/NOAA–13, Personnel, Payroll, Travel, and Attendance Records of the Regional Fishery Management Councils.

Effects of Not Providing Information. Providing the application information is voluntary; however, if the information is not provided, the individual will not be considered for appointment as a member of a sanctuary advisory council.

Consent. By submitting an application to the Office of National Marine Sanctuaries for appointment to a sanctuary advisory council, you are consenting to the use and disclosure of the information for the purposes and routine uses described above. However, if you prefer that your application be reviewed by NOAA employees only and not disclosed to current council members as part of the evaluation process, please contact the sanctuary advisory council coordinator to request internal review only, which will not result in any disadvantage or impact regarding your candidacy, or for any questions regarding this Privacy Act Statement.

Paperwork Reduction Act

ONMS has a valid Office of Management and Budget (OMB) control number (0648–0397) for the collection of public information related to the processing of ONMS national marine sanctuary advisory council applications across the National Marine Sanctuary System. Soliciting applications for sanctuary advisory councils fits within the estimated reporting burden under that control number. See *https://www.reginfo.gov/public/do/PRASearch* (Enter Control Number 0648–0397). Therefore, ONMS will not request an update to the reporting burden certified for OMB control number 0648–0397.

Send comments regarding this burden estimate, or any other aspect of this data collection, including suggestions for reducing the burden, to: Office of National Marine Sanctuaries, 1305 East West Highway, N/NMS, Silver Spring, Maryland 20910.

Notwithstanding any other provisions of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act (PRA), *44 U.S.C. 3501 et seq.,* unless that collection of information displays a currently valid Office of Management and Budget (OMB) control number. The OMB control number is #0648–0397.

Authority: 16 U.S.C. 1431 *et seq.*

John Armor,

Director, Office of National Marine Sanctuaries, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–NK–P

CONSUMER FINANCIAL PROTECTION BUREAU

Statement on Enforcement and Supervisory Practices Relating to the Small Business Lending Rule Under the Equal Credit Opportunity Act and Regulation B

AGENCY: Consumer Financial Protection Bureau.

ACTION: Policy guidance.

SUMMARY: The Consumer Financial Protection Bureau (CFPB) is publishing a statutorily mandated small business lending rule concurrently with this Policy Guidance. The rule amends Regulation B to implement changes to the Equal Credit Opportunity Act (ECOA) made by section 1071 of the Consumer Financial Protection Act of 2010 (CFPA). This policy guidance informs covered financial institutions that the CFPB intends to focus its supervisory and enforcement activities in connection with the new rule in particular on ensuring that covered lenders do not discourage small business loan applicants from providing responsive data, including responses to lenders' ECOA-mandated demographic data requests.

DATES: This Policy Guidance is applicable August 29, 2023.

FOR FURTHER INFORMATION CONTACT: Vincent Herman, Senior Counsel, Office of Enforcement, at (202) 435–7700. If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In 2010, Congress passed the CFPA. Section 1071 of the CFPA [1] amended ECOA [2] to require that financial institutions collect and report certain data regarding applications for credit for small businesses. The CFPB has now implemented section 1071 by means of a new rule that requires covered lenders to collect, and annually report to the CFPB, certain information from small businesses applying for credit.[3]

Part II.A below outlines core regulatory requirements relating to the rule's prohibition against discouraging applicants from providing responsive information. Lenders covered by the rule violate ECOA if they fail to observe these requirements. Part II.B explains that the Bureau intends for its enforcement and supervisory work in connection with the new rule to focus on covered lenders' compliance with the rule's prohibition against discouraging applicants from providing responsive information.

II. Policy Guidance

A. Relevant Regulatory Requirements

Although the new rule provides a covered lender with considerable discretion in designing its data collection procedures, it requires that collection methods be designed not to have the effect of discouraging applicants from submitting responsive information.[4] The rule also requires that requests for data be prominent to applicants, that applicants can easily respond to such requests, that such requests initially be made prior to notifying an applicant of the lender's decision on the application, and that the time and manner of a lender's collection procedures otherwise serve to obtain responsive information.[5] In general, compliant lenders will seek to maximize the collection of responses from applicants and minimize missing or erroneous data.[6]

Covered lenders must also work to identify and respond to potential indicia of discouragement in their practices, policies, and procedures, including low response rates from applicants to lenders' requests.[7] In general, this includes promptly investigating any indicia of potential discouragement; taking prompt remedial action if discouragement or other improper conduct is identified; monitoring for low response rates and for significant irregularities in any particular response that may indicate steering, improper interference, or other potential discouragement or obstruction of applicants' preferred responses; monitoring response rates and responses by division, location, loan officer, or other factors to ensure that no discouragement or improper conduct is occurring in some parts of a financial institution, even if the financial institution maintains adequate response rates and responses overall; and providing adequate training to loan officers and other persons involved in collecting data from loan applicants.

B. Enforcement and Supervisory Action

The CFPB intends to use its enforcement and supervisory authorities to focus on covered lenders' compliance with these requirements relating to the rule's prohibition against discouraging applicants from submitting responsive information. The CFPB intends to pay particular attention to covered lenders' response rates for data requested from applicants.[8] As appropriate, the CFPB intends to consider how a lender's response rates compare to financial institutions of a similar size, type, geographic reach, or other relevant factors, because, as noted in the rule, low response rates may indicate discouragement or other failure by that lender to maintain proper collection procedures consistent with the rule.[9] Similarly, the CFPB intends to consider, among other things, irregularities in a particular response (for example, very high rates, relative to similar lenders, of an applicant response of ''I do not wish to provide this information'' or similar) because that may indicate steering, improper interference, or other potential discouragement or obstruction of applicants' preferred responses.

III. Regulatory Requirements

This Policy Guidance is a non-binding general statement of policy articulating considerations relevant to the CFPB's exercise of its supervisory and enforcement authority. It is therefore exempt from notice and comment rulemaking requirements under the Administrative Procedure Act pursuant to 5 U.S.C. 553(b). Because no notice of proposed rulemaking is required, the Regulatory Flexibility Act does not require an initial or final regulatory flexibility analysis. 5 U.S.C. 603(a), 604(a). The CFPB has determined that this Policy Guidance does not impose any new or revise any existing recordkeeping, reporting, or disclosure requirements on covered entities or members of the public that would be collections of information requiring Office of Management and Budget approval under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

Rohit Chopra,

Director, Consumer Financial Protection Bureau.

[FR Doc. 2023–07231 Filed 5–30–23; 8:45 am]

BILLING CODE 4810–AM–P

---

[1] Public Law 111–203, tit. X, section 1071, 124 Stat. 1376, 2056 (2010), codified at ECOA section 704B, 15 U.S.C. 1691c–2. Section 1071's statutory purposes are to: (1) facilitate enforcement of fair lending laws; and (2) enable communities, governmental entities, and creditors to identify business and community development needs and opportunities of women-owned, minority-owned, and small businesses.

[2] 15 U.S.C. 1691 *et seq.*

[3] The rule requires lenders to seek some data from the applicant, some data from the applicant or appropriate third-party sources at the lender's discretion, and some data internally. This Policy Statement pertains to the collection of data from applicants.

[4] 12 CFR 1002.107(c)(1) and (2)(iii); *see also generally* § 1002.107(c)(2).

[5] 12 CFR 1002.107(c)(1), (2)(i), (ii), and (iv).

[6] Comment 107(c)(2)–1.

[7] 12 CFR 1002.107(c)(3) and (4). Response rates may appropriately be measured as the percentage of covered applications for which the lender obtains some type of response to data requests submitted to applicants. For demographic data subject to the statutory right to refuse, this includes responses of ''I do not wish to provide this information'' or similar, or if an applicant responds that there are no principal owners.

[8] Response rates may be relevant across all applicant-provided data, though they are particularly relevant for the collection of the protected demographic data pursuant to § 1002.107(a)(18) and (19). These inquiries are particularly sensitive and responsive data are especially important for the purposes of the rule.

DEPARTMENT OF EDUCATION

Applications for New Awards; Child Care Access Means Parents in School Program

AGENCY: Office of Postsecondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for new awards for fiscal year (FY) 2023 for the Child Care Access Means Parents in School (CCAMPIS) Program, Assistance Listing Number 84.335A. This notice relates to the approved information collection under OMB control number 1840–0737.

DATES:

Applications Available: May 31, 2023.

Deadline for Transmittal of Applications: July 31, 2023.

Deadline for Intergovernmental Review: August 29, 2023.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045), and available at *www.federalregister.gov/d/2022-26554.* Please note that these Common Instructions supersede the version published on December 27, 2021.

FOR FURTHER INFORMATION CONTACT:
Harold Wells, U.S. Department of Education, 400 Maryland Avenue SW, 5th Floor, Washington, DC 20202–4260. Telephone: (202) 453–6131. Email: *Harold.Wells@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The CCAMPIS Program supports the participation of low-income parents in postsecondary education by providing campus-based child care services.

Priorities: This notice contains two absolute priorities, one competitive preference priority, and three invitational priorities. In accordance with 34 CFR 75.105(b)(2)(iv), the absolute priorities are from section 419N(d) of the Higher Education Act of 1965, as amended (HEA), 20 U.S.C. 1070e(d). The competitive preference priority is from the Secretary's Supplemental Priorities and Definitions for Discretionary Grants Programs, published in the **Federal Register** on December 10, 2021 (86 FR 70612) (Supplemental Priorities).

Note: Applicants must include in the one-page abstract submitted with the application a statement indicating whether the competitive preference priority is addressed. If the applicant has addressed the competitive preference priority, this information must also be listed on the CCAMPIS Program Profile form.

Absolute Priorities: For FY 2023, and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are absolute priorities. Under 34 CFR 75.105(c)(3), we consider only applications that meet both priorities.

These priorities are:

Absolute Priority 1: Projects that are designed to leverage significant local or institutional resources, including in-kind contributions, to support the activities assisted under section 419N of the HEA.

Absolute Priority 2: Projects that are designed to utilize a sliding fee scale for child care services provided under section 419N of the HEA in order to support a high number of low-income parents pursuing postsecondary education at the institution.

Competitive Preference Priority: For FY 2023, and any subsequent year in which we make awards from the list of unfunded applicants from this competition, this priority is a competitive preference priority. Under 34 CFR 75.105(c)(2)(i), we award up to an additional 5 points to an application, depending on how well the application meets this priority.

This priority is:

Strengthening Cross-Agency Coordination and Community Engagement to Advance Systemic Change (up to 5 points).

Projects that are designed to take a systemic evidence-based approach to improving outcomes for underserved students in coordinating efforts with Federal, State, or local agencies, or community-based organizations that support students, to address child care.

Background: The Department encourages applicants to coordinate with agencies and organizations to leverage funding available through Federal, State, or local governments, or community-based organizations, to support student parents in meeting early learning needs. Applicants could also propose to establish partnerships with other publicly funded child care centers, including Head Start providers, to help student parents on waiting lists access other child care centers with available space. For example, in recent months, partnerships have developed to encourage the establishment of Head Start Centers on community college campuses. Through these partnerships, community colleges will provide free on-campus space and the Head Start centers will provide free childcare to college students.[1]

Invitational Priorities: For FY 2023, and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are invitational priorities. Under 34 CFR 75.105(c)(1) we do not give an application that meets these invitational priorities a competitive or absolute preference over other applications.

These priorities are:

Invitational Priority 1: Supporting Students Who Are Single Parents.

Projects that propose to serve children of student-parents who are single parents. An applicant should describe in its application how it will use institutional funds, in addition to child care assistance provided by CCAMPIS funds, to provide resources that will enhance the educational, personal, and financial growth of students who are single parents.

Background: According to the Institute for Women's Policy Research (IWPR), there are nearly 2.1 million single mothers in college today, many of whom are women of color.[2] These mothers face nearly insurmountable odds against finishing their degrees, even as many of them are pursuing higher education in order to lift their families out of poverty. IWPR further notes that only 8 percent of single mothers who start college earn an associate or bachelor's degree within 6 years, compared with about half of women who are not mothers.

IWPR research also finds that supports such as free child care, financial assistance, and social skills training would allow more student parents to graduate. According to the IWPR, offering free child care to a single mother pursuing a bachelor's degree improves success rates for community college students. Free child care may

allow many student parents to finish school more quickly, meaning they would require fewer years of support and likely spend more years earning higher wages. One recent study shows that students who utilized a campus child care center had triple the on-time graduation rate of student parents who did not use a center.[3]

Invitational Priority 2: Increasing the quality of campus-based child care for low-income student parents.

Applications from institutions that are working to improve the quality of campus-based child care provided to the children of low-income student parents, which include increases in compensation and providing support services for early childhood teachers, using Federal and non-Federal funding as appropriate.

Background: High-quality child care provides benefits to children, their parents, and the economy at large. Research indicates that children who attend high-quality early childhood education programs perform better in school, have higher educational attainment, have better health, and have higher individual and household earnings.[4] [5] These findings indicate that high-quality child care may produce positive intergenerational impacts by affording low-income parents the ability to participate in postsecondary education while setting up their children for future success.

Beyond the core safety and security requirements, systematic efforts to boost quality in early childhood education include the Head Start Program Performance Standards [6] and States' quality rating and improvement systems.[7] An important, measurable dimension of quality in early childhood settings is the nature of relationships and interactions between early childhood staff and children in the care setting. Evidence suggests that stable, attached child-caregiver relationships in the children's earliest years provide a critical foundation for their subsequent healthy development.[8] Research suggests that staff turnover in early childhood settings is associated with children's weaker language and social skill development,[9] and workers experiencing economic stress have a more difficult time fully engaging with children and offering a high-quality learning experience.[10] Evidence also indicates that improvements in compensation and working conditions can significantly reduce turnover and are associated with better care and improved child outcomes.[11] This priority is in keeping with President Biden's Executive Order on Increasing Access to High-Quality Care and Supporting Caregivers, signed April 18, 2023.[12]

Invitational Priority 3: Providing Wraparound Services for Low-Income Parents in Postsecondary Education.

Projects that propose to develop high-impact community engagement strategies and partner with community organizations in order to leverage institutional and community resources to provide wraparound services that address the comprehensive needs of low-income parents in postsecondary education, such as public benefits and additional financial aid to cover textbook costs, transportation costs, mental health services, faculty mentoring, tutoring, peer support groups, and emergency grants.

Background: Poverty reduces a student's opportunity to enter, persist, and complete higher education. Students from low-income backgrounds are more likely to delay enrollment, enroll in college part-time, or drop out.[13]

The novel coronavirus disease 2019 (COVID–19) pandemic caused many students to delay enrollment in college,[14] and colleges and universities struggle to address the financial needs of enrolled students. Financial aid supports such as Pell Grants provide important resources for under-resourced students to access college, but additional supports are needed to ensure students persist and complete their education. Studies in New York and Ohio, for example, show that comprehensive supports such as leadership opportunities, career development, and removal of key financial barriers designed to help community college students stay enrolled and graduate have doubled 3-year graduation rates for those students.[15]

Application Requirements: For FY 2023, and any subsequent year in which we make awards from the list of unfunded applications from this competition, applicants must meet the following application requirements from section 419N(c) of the HEA:

(a) An institution of higher education desiring a grant under this competition must submit an application that—

(1) Demonstrates that the institution is an eligible institution;

(2) Specifies the amount of funds requested;

(3) Demonstrates the need of low-income students (as defined in this notice) at the institution for campus-based child care services by including in the application—

(i) Information regarding student demographics;

(ii) An assessment of child care capacity on or near campus;

(iii) Information regarding the existence of waiting lists for existing child care;

(iv) Information regarding additional needs created by concentrations of poverty or by geographic isolation; and

(v) Other relevant data;

(4) Contains a description of the activities to be assisted, including whether the grant funds will support an existing child care program or a new child care program;

(5) Identifies the resources, including technical expertise and financial support, the institution will draw upon to support the child care program and the participation of low-income students in the program, such as accessing social services funding, using student activity fees to help pay the costs of child care, using resources obtained by meeting the needs of parents who are not low-income students, and accessing foundation, corporate, or other institutional support,

and demonstrate that the use of the resources will not result in increases in student tuition;

(6) Contains an assurance that the institution will meet the child care needs of low-income students through the provision of services, or through a contract for the provision of services;

(7) Describes the extent to which the child care program will coordinate with the institution's early childhood education curriculum, to the extent the curriculum is available, to meet the needs of the students in the early childhood education program at the institution and the needs of the parents and children participating in the child care program assisted under the applicant's project;

(8) In the case of an institution seeking assistance for a new child care program—

(i) Provides a timeline, covering the period from receipt of the grant through the provision of the child care services, delineating the specific steps the institution will take to achieve the goal of providing low-income students with child care services;

(ii) Specifies any measures the institution will take to assist low-income students with child care during the period before the institution provides child care services; and

(iii) Includes a plan for identifying resources needed for the child care services, including space in which to provide child care services, and technical assistance, if necessary;

(9) Contains an assurance that any child care facility assisted under this section will meet the applicable State or local government licensing, certification, approval, or registration requirements; and

(10) Contains a plan for any child care facility assisted under this program to become accredited within 3 years of the date the institution first receives assistance under this program.

Definitions: The definitions of ''low-income student'' and ''early childhood education program'' are from sections 419N and 103 (20 U.S.C. 1003) of the HEA, respectively.

Early childhood education program means—

(1) A Head Start program or an Early Head Start program carried out under the Head Start Act (42 U.S.C. 9831 *et seq.*), including a migrant or seasonal Head Start program, an Indian Head Start program, or a Head Start program or an Early Head Start program that also receives State funding;

(2) A State licensed or regulated child care program; or

(3) A program that—

(i) Serves children from birth through age six that addresses the children's cognitive (including language, early literacy, and early mathematics), social, emotional, and physical development; and

(ii) Is—

(I) A State prekindergarten program;

(II) A program authorized under section 619 (20 U.S.C. 1419) or part C of the Individuals with Disabilities Education Act (20 U.S.C. 1431 *et seq.*); or

(III) A program operated by a local educational agency.

Low-income student means a student—

(1) Who is eligible to receive a Federal Pell Grant for the award year for which the determination is made; or

(2) Who would otherwise be eligible to receive a Federal Pell Grant for the award year for which the determination is made, except that the student fails to meet the requirements of—

(i) 20 U.S.C. 1070a(c)(1) because the student is enrolled in a graduate or first professional course of study; or

(ii) 20 U.S.C. 1091(a)(5) because the student is in the United States for a temporary purpose.

Program Authority: 20 U.S.C. 1070e.

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in the Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) the Supplemental Priorities.

Note: Because there are no program-specific regulations for the CCAMPIS Program, applicants are encouraged to carefully read the authorizing statute: title IV, part A, subpart 7, section 419N of the HEA (20 U.S.C. 1070e).

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: $13,600,000.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in subsequent years from the list of unfunded applications from this competition.

Estimated Range of Awards: $150,000 to $1,000,000.

Estimated Average Size of Awards: $500,000.

Maximum Award: The maximum annual amount an applicant may receive under this program for a 12-month budget period is $500,000 or the amount equivalent to the product of $100 multiplied by the institution's total number of Pell Grant recipients in FY 2022, whichever amount is greater. The Department encourages all applicants to consult the Department of HHS' Provider Cost of Quality Calculator while developing award requests. This tool can be found at *https://childcareta.acf.hhs.gov/pcqc.*

Estimated Number of Awards: 27.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 48 months.

III. Eligibility Information

1. *Eligible Applicants:* Institutions of higher education that awarded a total of $250,000 or more of Federal Pell Grant funds during FY 2022 to students enrolled at the institution.

2. a. *Cost Sharing or Matching:* This competition does not require cost sharing or matching.

b. *Indirect Cost Rate Information:* This program uses an unrestricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *www2.ed.gov/about/offices/list/ocfo/intro.html.*

c. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045), and available at *www.federalregister.gov/d/2022-26554,* which contain requirements and information on how to submit an application.

2. *Intergovernmental Review:* This program is subject to Executive Order

12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this program. Please note that, under 34 CFR 79.8(a), we have shortened the standard 60-day intergovernmental review period in order to make awards by the end of FY 2023.

3. *Funding Restrictions:* Funding restrictions are outlined in section 419N(b)(2)(B) of the HEA. We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

4. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative, which includes the budget narrative, to no more than 50 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins.
- Double-space all text in the application narrative, and single-space titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a 12-point font.
- Use an easily readable font such as Times New Roman, Courier, Courier New, or Arial.

The recommended 50-page limit does not apply to the Application for Federal Assistance cover sheet (SF 424); the Budget Information Summary form (ED Form 524); the CCAMPIS Program Profile form and the 1-page Project Abstract form; or the assurances and certifications. The recommended page limit also does not apply to a table of contents, which you should include in the application narrative. You must include your complete response to the selection criteria in the application narrative.

We recommend that any application addressing the invitational and competitive preference priorities include no more than three additional pages for each priority.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from section 419N of the HEA and 34 CFR 75.210 and are listed below.

We will award up to 100 points to an application under the selection criteria. An applicant that also chooses to address the competitive preference priority can earn up to 105 total points. The maximum number of points available for each criterion is indicated in parentheses.

(a) *Need for the project.* (up to 24 points)

In determining the need for the proposed project, the Secretary considers the extent to which the applicant demonstrates, in its application, the need for campus-based child care services for low-income students, by including the following (see section 419N(c)(3) of the HEA):

(i) Information regarding student demographics.

(ii) An assessment of child care capacity on or near campus, including information regarding the existence of waiting lists for existing child care.

(iii) Information regarding additional needs created by concentrations of poverty or by geographic isolation.

(iv) Other relevant data.

(b) *Quality of project design.* (up to 36 points)

In determining the quality of the design of the proposed project, the Secretary considers the following:

(i) The extent to which the applicant describes in its application the activities to be assisted, including whether the grant funds will support an existing child care program or a new child care program (see section 419N(c)(4) of the HEA).

(ii) The extent to which the services to be provided by the proposed project are focused on those with greatest needs (see 34 CFR 75.210(d)(3)(xi)).

Note: When describing how the project is focused on those with greatest needs, applicants are encouraged to include, in their assessment of focus on service of those with the greatest needs, the extent to which services are available during all hours that classes are in session, including evenings and weekends, to part-time students, and to students who need only emergency drop-in child care in the event that regularly scheduled child care is unexpectedly unavailable.

(iii) The likely impact of the services to be provided by the proposed project on the intended recipients of those services (see 34 CFR 75.210(d)(3)(iv)).

(iv) The extent to which the application includes an assurance that the institution will meet the child care needs of low-income students through the provision of services, or through a contract for the provision of services (see section 419N(c)(6) of the HEA).

(v) The extent to which the child care program will coordinate with the institution's early childhood education curriculum, to the extent the curriculum is available, to meet the needs of the students in the early childhood education program at the institution, and the needs of the parents and children participating in the child care program assisted under section 419N of the HEA (see section 419N(c)(7) of the HEA).

(vi) The extent to which the proposed project encourages parental involvement (see 34 CFR 75.210(c)(2)(xix)).

(vii) If the applicant is seeking assistance for a new child care program (see section 419N(c)(8) of the HEA)—

(1) The extent to which the applicant's timeline, covering the period from receipt of the grant through the provision of the child care services, delineates the specific steps the institution will take to achieve the goal of providing low-income students with child care services;

(2) The extent to which the applicant specifies any measures the institution will take to assist low-income students with child care during the period before the institution provides child care services; and

(3) The extent to which the application includes a plan for identifying resources needed for the child care services, including space in which to provide child care services and technical assistance if necessary.

Note: The maximum available points for this selection criterion will be divided equally, for applications that seek assistance to support existing programs, among factors (i)–(vi), and, for applications that seek assistance to support new programs, among factors (i)–(vii).

(c) *Quality of management plan.* (up to 21 points)

In determining the quality of the management plan for the proposed project, the Secretary considers the following:

(i) The extent to which the application identifies the resources, including technical expertise and financial support, the institution will draw upon to support the child care program and the participation of low-income students in the program, such as accessing social services funding, using student activity fees to help pay the costs of child care, using resources obtained by meeting the needs of parents who are not low-income students, and accessing foundation, corporate or other institutional support, and demonstrates that the use of the resources will not result in increases in student tuition (see section 419N(c)(5) of the HEA).

(ii) The qualifications, including relevant training and experience, of key project personnel (see 34 CFR 75.210(e)(3)(ii)).

(iii) The adequacy of the management plan to achieve the objectives of the

proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks (see 34 CFR 75.210(g)(2)(i)).

(d) *Quality of project evaluation.* (up to 12 points)

In determining the quality of the project evaluation, the Secretary considers the following:

(i) The extent to which the methods of evaluation are thorough, feasible, and appropriate to the goals, objectives, and outcomes of the proposed project (see 34 CFR 75.210(h)(2)(i)).

(ii) The extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the project and will produce quantitative and qualitative data to the extent possible (see 34 CFR 75.210(h)(2)(iv)).

(iii) The extent to which the methods of evaluation will provide performance feedback and permit periodic assessment of progress toward achieving intended outcomes (see 34 CFR 75.210(h)(2)(vi)).

(e) *Adequacy of resources.* (up to 7 points)

In determining the adequacy of resources for the proposed project, the Secretary considers the following:

(i) The extent to which the budget is adequate to support the proposed project (see 34 CFR 75.210(f)(2)(iii)).

(ii) The extent to which the costs are reasonable in relation to the number of persons to be served and to the anticipated results and benefits (see 34 CFR 75.210(f)(2)(v)).

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

For this competition, a panel of non-Federal reviewers will review each application in accordance with the selection criteria. The individual scores of the reviewers will be added and the sum divided by the number of reviewers to determine the peer review score received in the review process.

If there are insufficient funds for all applications with the same total scores, the Secretary will choose among the tied applications by selecting the institution with the largest number of Pell Grant recipients.

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2), we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

5. *In General:* In accordance with the Office of Management and Budget's guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive guidance, the Department will review and consider applications for funding pursuant to this notice inviting applications in accordance with—

(a) Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);

(b) Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);

(c) Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

(d) Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we will notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant

deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

5. *Performance Measures:* The success of the CCAMPIS Program will be measured by the postsecondary persistence and degree completion rates of the CCAMPIS Program participants. All CCAMPIS Program grantees will be required to submit an annual performance report documenting the persistence and degree attainment of their participants. Although students may choose to use child care services at different points in their college enrollment, the goal is to measure the outcomes of student-parents based on their completion of their program within 150 percent or 200 percent of the published program length. The cohort model of evaluation will track the level of utilization by a student-parent throughout their enrollment at the institution and will provide results based on the long-term academic success of the student-parent. The Department will aggregate the data provided in the annual performance reports from all grantees to determine the accomplishment level. The CCAMPIS reporting data collection is moving toward a semester-to-semester cohort model. This will not increase public reporting burden as CCAMPIS grantees are gathering and maintaining the data needed in completing and reviewing the collection of information currently.

6. *Continuation Awards:* In making a continuation grant under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application.

In making a continuation grant, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Nasser H. Paydar,

Assistant Secretary for Postsecondary Education.

[FR Doc. 2023–11469 Filed 5–30–23; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Activities for Underserved Populations

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for fiscal year (FY) 2023 for Activities for Underserved Populations Program, Assistance Listing Number 84.315C, to make awards to minority entities and Indian Tribes to conduct research, training and technical assistance, and related activities to improve services under the Rehabilitation Act of 1973, as amended (Rehabilitation Act), especially services provided to underserved populations. This notice relates to the approved information collection under OMB control number 1820–0028.

DATES:

Applications available: May 31, 2023.

Deadline for transmittal of applications: July 21, 2023.

Date of pre-application meeting: On the date this notice is published in the **Federal Register**, the Office of Special Education and Rehabilitative Services (OSERS) will post a PowerPoint presentation specifically about Activities for Underserved Populations at *https://ncrtm.ed.gov/grant-info.* OSERS will conduct a pre-application conference call on June 6, 2023 at 2:00 p.m. Eastern Time specific to this competition to respond to questions. Information about the pre-application conference call will be available at *https://ncrtm.ed.gov/grant-info.* OSERS invites you to send questions to *315C@ed.gov* in advance of the pre-application conference call. A summary of questions and responses will be available at *https://ncrtm.ed.gov/grant-info* within six business days after the pre-application conference call.

Deadline for intergovernmental review: September 28, 2023.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045), and available at *www.federalregister.gov/d/2022-26554.* Please note that these Common Instructions supersede the version published on December 27, 2021.

FOR FURTHER INFORMATION CONTACT: Kristen Rhinehart-Fernandez, U.S. Department of Education, 400 Maryland

Avenue SW, Room 5076, Potomac Center Plaza, Washington, DC 20202–5076. Telephone: (202) 245–6103. Email: *315C@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: A purpose of the Activities for Underserved Populations program is to improve the quality, access, and delivery of services and the outcomes of services provided under the Rehabilitation Act, especially services provided to individuals with disabilities from underserved backgrounds, and to increase the capacity of minority entities and Indian Tribes to participate in activities funded under the Rehabilitation Act.

Priority: This priority is from the notice of final priority and definition (NFP) published elsewhere in this issue of the **Federal Register**.

Absolute Priority: For FY 2023, this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

The priority is:

Improving the Delivery of Vocational Rehabilitation Services to, and the Employment Outcomes of, Individuals with Disabilities from Underserved Populations.

Under this priority, the Department provides funding for a cooperative agreement for a minority entity or an Indian Tribe to provide training and technical assistance to a minimum range of 5 to 15 State vocational rehabilitation (VR) agencies (Combined, General, or Agencies for the Blind) over a five-year period of performance so that the agencies are equipped to serve as role models for diversity, equity, inclusion, and accessibility in the workforce system by implementing policies, practices, and service delivery approaches that are designed to contribute to increasing competitive integrated employment outcomes for individuals with disabilities from underserved populations. Further, the grantee must contribute to VR research and pedagogical practices that promote access to approaches that are racially, ethnically, culturally, and linguistically inclusive.

During the first year of the project the grantee will focus on developing training and technical assistance material and gathering input and feedback from a diverse group of stakeholders including the Rehabilitation Services Administration (RSA), State VR agencies, and other relevant partners. During the period of performance, the grantee must enter into agreements with the State VR agencies receiving training and technical assistance. Each agreement must: specify the level of involvement from VR agency leadership and personnel and include an assurance that the VR agency is committed to sustainable systems change across the organization for improving delivery of services to underserved populations; explain how data will be collected and shared; identify training and technical assistance needs, intervention strategies, and implementation timelines; and describe how outcomes will be measured. The grantee must have a minimum of two agreements in place by the end of the first year of the grant.

Application Requirements

To be considered for funding under this priority, applicants must, at a minimum, propose a project that will conduct the following activities in a culturally appropriate manner. The Department encourages innovative approaches to meet this requirement. To meet this requirement, applicants must—

(a) Demonstrate, in the narrative section of the application under ''Significance of the Proposed Project,'' an understanding of the inequities and challenges experienced by individuals with disabilities from underserved populations determined eligible to receive VR services. To meet this requirement, applicants must—

(1) Present information and relevant data about the disparities that exist with respect to VR services and employment outcomes for underserved populations; and

(2) Describe how the project proposes to improve VR services for, and competitive integrated employment outcomes of, underserved populations.

(b) Demonstrate, in the narrative section of the application under ''Quality of Project Design,'' how the project will address inequities and challenges experienced by underserved populations determined eligible to receive VR services. To meet this requirement, applicants must—

(1) Demonstrate knowledge and experience working with individuals with disabilities from underserved populations;

(2) Incorporate into the project design current research and promising and evidence-based practices (EBPs),[1] research about adult learning principles and implementation science, and relevant findings, recommendations, and relevant strategies identified by the Targeted Communities project[2] to overcome barriers to competitive integrated employment and VR participation for individuals with disabilities from underserved populations;

(3) Detail how the project will collect and examine data, including from the RSA–911 and other relevant sources, from a minimum range of 5 to 15 State VR agencies regarding VR applicants, VR-eligible individuals, and VR participants by race/ethnicity by—

(i) Exploring patterns, changes, or shifts in demographics for individuals with disabilities from underserved populations;

(ii) Exploring data, by race/ethnicity, from each State VR agency regarding VR applicants to identify opportunities for increased outreach to and referral of individuals with disabilities from underserved populations to VR services;

(iii) Examining data, by race/ethnicity, from each State VR agency regarding selected VR services and competitive integrated employment outcomes at exit to identify inconsistencies or gaps in the provision of services;

(iv) Examining data from each State VR agency to identify reasons for successful and unsuccessful closures between VR program participants from underserved populations and VR program participants who are not from underserved populations; and

(v) Reviewing each State VR agency's service delivery model from eligibility determination to exit; and

(4) Present approaches for how the information and data described above will be used to inform strategies to improve the delivery of services to individuals with disabilities from underserved populations for each of the identified State VR agencies. For example, applicants may consider conducting a needs assessment and asset map for each of the identified State VR agencies to identify existing programs and services and businesses and philanthropic organizations in the community, as well as potential gaps

[1] For purposes of these requirements, ''evidence-based practices'' (EBPs) means, at a minimum, demonstrating a rationale (as defined in 34 CFR 77.1) based on high-quality research findings or positive evaluation that such activity, strategy, or intervention is likely to improve student outcomes or other relevant outcomes.

[2] Final Report from the Vocational Rehabilitation Technical Assistance Center for Targeted Communities (Project E3) (PR/Award #H264F150003) *https://ncrtm.ed.gov/library/detail/vocational-rehabilitation-technical-assistance-center-targeted-communities-project* and project website: *https://projecte3.com/.*

and opportunities for collaboration, to support individuals with disabilities from underserved populations in successfully obtaining competitive integrated employment. Applicants may also consider designing a long-term data collection tool and provide analytical support and training to the identified State VR agencies to identify additional data elements not captured in the RSA–911 or other case management systems to continually assess the quality of services and outcomes for individuals with disabilities from underserved populations and individuals with disabilities not from underserved populations.

(c) Demonstrate, in the narrative section of the application under ''Quality of Project Services,'' how the project will be designed so that policies, practices, and service delivery approaches will contribute to increased competitive integrated employment outcomes for individuals with disabilities from underserved populations. To meet this requirement, applicants must—

(1) Propose training and technical assistance activities that will be offered to the identified State VR agencies. Training and technical assistance activities will be further developed during the first year of the grant and described in the agreements with the identified State VR agencies based on needs and analysis of data. Training and technical assistance activities may include, but are not limited to, (i) assisting in State VR agency coordination and cross-agency partnerships with State and local agencies and community-based organizations, workforce programs, educational institutions, and other relevant local community agencies and organizations (*i.e.,* agencies and organizations that provide services and supports related to mental health, substance use, behavioral health, intellectual developmental disabilities, and other areas of need such as housing, food, transportation, and healthcare) to strengthen outreach and awareness about VR programs and services, build trust between State VR agency counselors and individuals with disabilities from underserved populations, and connect individuals with disabilities from underserved populations determined to be VR eligible with necessary supports to successfully obtain competitive integrated employment; (ii) reviewing policies, practices, and procedures from the identified State VR agencies and providing recommendations to help ensure they are culturally appropriate and implemented in an appropriate manner; (iii) developing strategies to strengthen diversity in the VR workforce (*e.g.,* reviewing hiring practices from the identified State VR agencies and identifying strategies that expand outreach to VR counselors from underserved populations and mentoring and coaching activities for new and existing VR counselors and paraprofessionals, human resource and professional development specialists, and VR management and leadership personnel from underserved populations); and (iv) any other activity that improves understanding, responsiveness, and delivery of services to, and competitive integrated employment outcomes for, individuals with disabilities from underserved populations;

(2) Detail how those activities will incorporate relevant strategies and promising and effective practices identified by the Targeted Communities Project and other EBPs or related sources to the extent possible;

(3) Explain how training and technical assistance activities will be of high quality and sufficient intensity and duration to achieve the intended outcomes of the project;

(4) Describe how remote learning [3] opportunities will be incorporated into the project. Remote learning opportunities should offer experiences that advance engagement and implementation (*e.g.,* synchronous and asynchronous professional learning, professional learning networks or communities, and coaching), which could also be incorporated into Rehabilitation Counseling programs, as well as other training and professional development activities designed for the VR workforce, as appropriate. The remote learning environment must be accessible to individuals with disabilities in accordance with section 504 of the Rehabilitation Act;

(5) Describe their knowledge, skills, and experience to support the training and technical assistance activities described above;

(6) Describe how the project will contribute to VR research and pedagogical practices that promote access to approaches that are racially, ethnically, culturally, and linguistically inclusive. To meet this requirement, applicants must describe how they will—

(i) Disseminate to all State VR agencies, RSA-funded Rehabilitation Long-Term Training projects and technical assistance centers, Department-funded programs, and Federal partners, as applicable, training and technical assistance material, analysis of data collected, evidence-based and promising practices, and lessons learned;

(ii) Develop products, such as toolkits, guides, manuals, webinars, and communities of learning, for instructors, facilitators, State VR agency directors, and human resource and professional development specialists to facilitate the implementation of training and technical assistance material in curriculum and relevant training and development activities; and

(iii) Gather input and feedback from a diverse group of stakeholders and subject matter experts, including RSA, State VR agencies, and other relevant partners, throughout the project to inform the development and delivery of the material described above.

(d) In the narrative section of the application under ''Quality of the Project Evaluation,'' include an evaluation plan for the project. The evaluation plan must describe—

(1) Clear and measurable outcomes;

(2) Approaches for measuring the effectiveness of the intervention strategies identified in the agreements, including standards and targets for measuring knowledge, skills, and abilities of State VR agency personnel before and after completion of training activities. To address this requirement, applicants must provide an approach for determining—

(i) The most effective practices in improving the delivery of services to individuals with disabilities from underserved populations and the data that demonstrate the effectiveness of the practices; and

(ii) The most effective practices in creating a culture of systems change within the State VR agency and the data that demonstrate the effectiveness of the practices;

(3) Methodologies, including instruments, data collection methods, and analyses, that will be used to evaluate the project and how the methods of evaluation will produce quantitative and qualitative data to demonstrate whether the project activities achieved their intended outcomes;

(4) How the evaluation will be coordinated, implemented, and revised, as needed, during the project. The applicant must designate at least one individual with sufficient dedicated time, demonstrated experience in

[3] ''Remote learning'' means programming where at least part of the learning occurs away from the physical building in a manner that addresses a learner's educational needs. Remote learning may include online, hybrid/blended learning, or non-technology-based learning (*e.g.,* lab kits, project supplies, paper packets).

evaluation, and knowledge of the project to coordinate and conduct the evaluation. This may include, but is not limited to, making revisions to reflect any changes or clarifications, as needed, to the model and to the evaluation design and instrumentation with the logic model (*e.g.,* designing instruments and developing quantitative or qualitative data collections that permit collecting of progress data and assessing project outcomes);

(5) How evaluation results will be used to improve delivery of services to VR program participants from underserved populations from eligibility determination to exit. To address this requirement, applicants must provide an approach to gather input and feedback that includes the experiences of VR program participants from underserved populations. Applicants may consider voluntary focus groups, use of a unique identifier, or another approach that adheres to consumer confidentiality requirements in 34 CFR 361.38; and

(6) A process for gathering feedback from the identified State VR agencies for continuous improvement throughout years two, three, four, and five of the project.

(e) Demonstrate, in the narrative section of the application under ''Quality of the Management Plan,'' how applicants will ensure that—

(1) The project's intended outcomes, including the evaluation, will be achieved on time and within budget through—

(i) Clearly defined responsibilities of key project personnel, subawards, and contracts, as applicable;

(ii) Procedures to track and ensure completion of the action steps, timelines, and milestones established for key project activities, requirements, and deliverables;

(iii) Internal monitoring processes to ensure that the project is being implemented in accordance with the established application and management plan; and

(iv) Internal financial management controls to increase efficiency and cost-effectiveness, including by reducing waste or achieving better outcomes, and how the applicant will ensure accurate and timely obligations, drawdowns, and reporting of grant funds, as well as monitoring subawards as applicable, in accordance with the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards at 2 CFR part 200 and the terms and conditions of the Federal award;

(2) The allocation of key project personnel, subawards, as applicable, and levels of effort of key personnel are appropriate and adequate to achieve the project's intended outcomes;

(3) The products and services are of high quality, relevance, and usefulness, in both content and delivery and are accessible to individuals with disabilities in accordance with section 504 of the Rehabilitation Act, as applicable;

(4) The proposed project will benefit from a diversity of perspectives; and

(5) Projects will be awarded and operated in a manner consistent with nondiscrimination requirements contained in the Federal civil rights laws.

(f) Include the following:

(1) In Appendix A, personnel-loading charts and timelines, as applicable, to illustrate the management plan described in the narrative;

(2) In Appendix A, a logic model [4] that depicts, at a minimum, the goals, activities, outputs, and outcomes of the proposed project;

(3) An assurance to maintain a high-quality website, with an easy-to-navigate design that is accessible to individuals with disabilities in accordance with section 504 of the Rehabilitation Act, as applicable; and

(4) An assurance that training and technical assistance materials such as outreach, training curricula, presentations, reports, outcomes, and other relevant information will be submitted to RSA's National Clearinghouse of Rehabilitation Training Materials (NCRTM) (*https://ncrtm.ed.gov/*) at least 90 days before the end of the final budget period.

Definition: The following definition is from the NFP.

Underserved populations means Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders, and other persons of color.

Program Authority: 29 U.S.C. 718(b)(2)(B).

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84 and 86. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The NFP.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian Tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education only.

II. Award Information

Type of Award: Cooperative agreement.

Estimated Available Funds: $910,490.

Note: This amount will be reduced by up to $9,000 in the first year of the award to support peer review for this competition.

Estimated Number of Awards: 1.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

III. Eligibility Information

1. *Eligible Applicants:* Minority entities and Indian Tribes. As defined in section 21(b)(5)(B) of the Rehabilitation Act, ''minority entity'' means a historically Black college or university, a Hispanic-serving institution of higher education, an American Indian Tribal college or university, or another institution of higher education whose minority student enrollment is at least 50 percent. The definition of ''Indian Tribe'' in section 7(19)(B) of the Rehabilitation Act is ''any Federal or State Indian tribe, band, rancheria, pueblo, colony, or community, including any Alaskan native village or regional village corporation (as defined in or established pursuant to the Alaska Native Claims Settlement Act) and a tribal organization (as defined in section 4(l) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(l)).''

2. a. *Cost Sharing or Matching:* This competition does not require cost sharing or matching.

b. *Indirect Cost Rate Information:* This program uses an unrestricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *www2.ed.gov/about/offices/list/ocfo/intro.html.*

c. *Administrative Cost Limitation:* This program does not include any program-specific limitation on

[4] ''Logic model'' (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* Under 34 CFR 75.708(b) and (c), a grantee under this competition may award subgrants to directly carry out project activities described in its application to the following types of entities: Indian Tribes, institutions of higher education, and public and private nonprofit organizations. The grantee may award subgrants to entities it has identified in an approved application. Under 34 CFR 75.708(e), a grantee may contract for supplies, equipment, and other services in accordance with 2 CFR 200.317–200.326, Procurement Standards.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045), and available at *www.federalregister.gov/d/2022-26554,* which contain requirements and information on how to submit an application. Please note that these Common Instructions supersede the version published on December 27, 2021.

2. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

3. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

4. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 50 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, reference citations, and captions, as well as all text in charts, tables, figures, graphs, and screen shots.
- Use a font that is 12 point or larger.
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the abstract (follow the guidance provided in the application package for completing the abstract), the table of contents, the resumes, the reference list, the letters of support, or the appendices. However, the recommended page limit does apply to all of the application narrative, including all text in charts, tables, figures, graphs, and screen shots. Applicants are expected to make the contents of their application accessible for individuals with disabilities to the maximum extent possible. Tutorials and resources for making documents accessible are available for free on RSA's National Clearinghouse for Rehabilitation Training Materials at *https://ncrtm.ed.gov/accessibility-resources.*

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210, have a maximum score of 100 points, and are as follows:

(a) Significance. (10 points)

(1) The Secretary considers the significance of the proposed project.

(2) In determining the significance of the proposed project, the Secretary considers the following factors:

(i) The likelihood that the proposed project will result in system change or improvement; and

(ii) The potential contribution of the proposed project to increase knowledge or understanding of rehabilitation problems, issues, or effective strategies.

(b) Quality of the project design. (20 points)

(1) The Secretary considers the quality of the design of the proposed project.

(2) In determining the quality of the design of the proposed project, the Secretary considers the following factors:

(i) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified and measurable;

(ii) The extent to which the design for implementing and evaluating the proposed project will result in information to guide possible replication of project activities or strategies, including information about the effectiveness of the approach or strategies employed by the project;

(iii) The extent to which the proposed project is designed to build capacity and yield results that will extend beyond the period of Federal financial assistance;

(iv) The extent to which the design of the proposed project reflects up-to-date knowledge from research and effective practice;

(v) The extent to which the proposed project will establish linkages with other appropriate agencies and organizations providing services to the target population; and

(vi) The extent to which performance feedback and continuous improvement are integral to the design of the proposed project.

(c) Quality of project services. (25 points)

(1) The Secretary considers the quality of the services to be provided by the proposed project.

(2) In determining the quality of the services to be provided by the proposed project, the Secretary considers the quality and sufficiency of strategies for ensuring equal access and treatment for eligible project participants who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

(3) In addition, the Secretary considers the following factors:

(i) The extent to which the services to be provided by the proposed project involve the collaboration of appropriate partners for maximizing the effectiveness of project services;

(ii) The extent to which the training or professional development services to be provided by the proposed project are of sufficient quality, intensity, and duration to lead to improvements in practice among the recipients of those services; and

(iii) The extent to which the results of the proposed project are to be disseminated in ways that will enable others to use the information or strategies.

(d) Quality of the project evaluation. (25 points)

(1) The Secretary considers the quality of the evaluation to be conducted of the proposed project.

(2) In determining the quality of the evaluation, the Secretary considers the following factors:

(i) The extent to which the methods of evaluation will provide valid and reliable performance data on relevant outcomes (as defined in 34 CFR 77.1(c));

(ii) The extent to which the methods of evaluation will, if well implemented, produce promising evidence (as defined in 34 CFR 77.1(c)) about the project's effectiveness;

(iii) The extent to which the methods of evaluation include the use of objective performance measures that are

clearly related to the intended outcomes of the project and will produce quantitative and qualitative data to the extent possible;

(iv) The qualifications, including relevant training, experience, and independence, of the evaluator; and

(v) The extent to which the methods of evaluation provide for examining the effectiveness of project implementation strategies.

(e) Quality of the management plan. (20 points)

(1) The Secretary considers the quality of the management plan for the proposed project.

(2) In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(i) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestone for accomplishing project tasks;

(ii) The extent to which the time commitments of the project director and principal investigator and other key project personnel are appropriate and adequate to meet the objectives of the proposed project; and

(iii) How the applicant will ensure that a diversity of perspectives are brought to bear in the operation of the proposed project, including those of parents, teachers, the business community, a variety of disciplinary and professional fields, recipients or beneficiaries of services, or others, as appropriate.

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

5. *In General:* In accordance with the Office of Management and Budget's guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive guidance, the Department will review and consider applications for funding pursuant to this notice inviting applications in accordance with:

(a) Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);

(b) Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);

(c) Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

(d) Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This

does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) Under 34 CFR 75.250(b), the Secretary may approve a data collection period for a grant for a period of up to 72 months after the end of the project period and provide funding, separate from this funding opportunity, for the data collection period for the sole purpose of collecting, analyzing, and reporting performance measurement data regarding the project.

5. *Performance Measures:* For the purposes of Department reporting under 34 CFR 75.110, we have established the following program performance measures:

Measure 1: Based on the State VR agencies that received training and technical assistance, the number and percentage of individuals with disabilities from underserved populations determined eligible to receive VR services compared to all individuals with disabilities that are not from underserved populations and determined eligible to receive VR services.

Measure 2: Based on the State VR agencies that received training and technical assistance, the number and percentage of individuals with disabilities from underserved populations that received VR services compared to all individuals with disabilities that are not from underserved populations that received VR services.

Measure 3: Based on the State VR agencies that received training and technical assistance, the number and percentage of individuals with disabilities from underserved populations employed at the time of exit compared to all individuals with disabilities that are not from underserved populations and employed at the time of exit.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register***,* in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Glenna Wright-Gallo,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Proposed Agency Information Collection

AGENCY: Office of Infrastructure, U.S. Department of Energy.

ACTION: Notice and request for comments.

SUMMARY: The Department of Energy (DOE) invites public comment on a proposed collection of information that DOE is developing for submission to the Office of Management and Budget (OMB) pursuant to the Paperwork Reduction Act of 1995.

DATES: Comments regarding this proposed information collection must be received on or before July 31, 2023. If you anticipate difficulty in submitting comments within that period, contact the person listed in **ADDRESSES** as soon as possible.

ADDRESSES: Written comments may be sent to Ira Birnbaum, DOE/Infrastructure/FEMP, 1000 Independence Avenue SW, Washington, DC 20585 or by email at *Ira.Birnbaum@hq.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Ira Birnbaum, DOE/Infrastructure/FEMP, 1000 Independence Avenue SW, Washington, DC 20585, *Ira.Birnbaum@hq.doe.gov,* (202) 287–1869.

SUPPLEMENTARY INFORMATION: Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

This information collection request contains: (1) *OMB No.:* New; (2) *Information Collection Request Title:* DOE Qualified List of Energy Service Companies; (3) *Type of Request:* New; (4) *Purpose:* The ESPC statute (42 U.S.C. 8287(b)(2)(A)–(B)) requires the Secretary of Energy to establish and maintain a list of firms qualified to perform energy efficiency and renewable energy

projects specifically using the energy savings performance contracts (ESPCs) project financing methodology. The forms subject to this Paperwork Reduction Act submission constitute the application and recertification statement for inclusion on the DOE Qualified List of Energy Service Companies (ESCOs). The ESCOs on the DOE Qualified List constitute the group of firms that are eligible for contract award under 10 CFR 436.32. ESCOs that would like to bid on ESPC contracts for the Federal government must apply to the DOE Qualified List of ESCOs and complete the annual recertification statement; (5) *Annual Estimated Number of Respondents:* 120; (6) *Annual Estimated Number of Total Responses:* 120; (7) *Annual Estimated Number of Burden Hours:* 492; (8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* $59,220.

Statutory Authority: The ESPC statute (42 U.S.C. 8287(b)(2)(A)–(B)) requires the Secretary of Energy to establish and maintain a list of firms qualified to perform energy efficiency and renewable energy projects specifically using the energy savings performance contracts (ESPCs) project financing methodology.

Signing Authority: This document of the Department of Energy was signed on May 23, 2023, by Mary Sotos, Director, Federal Energy Management Program, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on May 25, 2023.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

[FR Doc. 2023–11484 Filed 5–30–23; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Extension

AGENCY: U.S. Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Notice.

SUMMARY: The Department of Energy (DOE) submitted an information collection request for extension as required by the Paperwork Reduction Act of 1995. The information collection requests a three-year extension without changes to Form FE–746R, ''Natural Gas Imports and Exports,'' OMB Control Number 1901–0294. The information collection request supports DOE's Office of Fossil Energy & Carbon Management (FECM) in gathering critical information on the U.S. trade in natural gas, including liquefied natural gas (LNG). The data are used to monitor natural gas trade, assess the adequacy of U.S. energy resources to meet near and longer-term domestic demands, and support various market and regulatory analyses done by FECM.

DATES: Comments on this information collection must be received no later than June 30, 2023. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: If you need additional information, contact Tu Tran, Office of Fossil Energy and Carbon Management, telephone (202) 235–5873, or by email at *Tu.tran@hq.doe.gov.* The forms and instructions are available on *https://www.energy.gov/fecm/guidelines-filing-monthly-reports.*

SUPPLEMENTARY INFORMATION: This information collection request contains:

(1) *OMB No.:* 1901–0294;

(2) *Information Collection Request Title:* ''Natural Gas Imports and Exports;''

(3) *Type of Request:* Three-year extension without changes;

(4) *Purpose:* The Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) and the DOE Organization Act (42 U.S.C. 7101 *et seq.*) require EIA to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. Additionally, FECM is authorized to regulate natural gas imports and exports, including LNG, under section 3 of the Natural Gas Act (15 U.S.C. 717b). In order to carry out its statutory responsibilities, FECM requires anyone seeking to import or export natural gas to file an application and provide basic information on the scope and nature of the proposed import/export activity. Additionally, once an importer or exporter receives an authorization from FECM, they are required to submit monthly reports of all import and/or export transactions.

Specifically, the Form FE–746R requires the reporting of the following information by every holder of a DOE import or export authorization: the name of importer/exporter; country of origin/destination; international point of entry/exit; name of supplier; volume; price; transporters; U.S. geographic market(s) served; and duration of supply contract on a monthly basis. This information is used by both EIA and FECM to assess the adequacy of energy resources to meet near and longer-term domestic demands, and by FECM in the management of its natural gas regulatory program.

Data collected on Form FE–746R are published in reports made available on DOE's website at *https://www.energy.gov/fecm/regulation,* and in EIA official statistics on U.S. natural gas supply and disposition. In addition, the data are used to monitor the North American natural gas trade, which, in turn, enables the Federal government to perform market and regulatory analyses; improve the capability of industry and the government to respond to any future energy-related supply problems; and keep the general public informed of international natural gas trade.

(5) *Annual Estimated Number of Respondents:* 241;

(6) *Annual Estimated Number of Total Responses:* 2,892;

(7) *Annual Estimated Number of Burden Hours:* 8,676;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* The cost of the burden hours is estimated to be $757,935. DOE estimates that respondents will have no additional costs associated with the surveys other than the burden hours and the maintenance of the information during the normal course of business.

Statutory Authority: 15 U.S.C. 772(b), 42 U.S.C. 7101 *et seq.,* 15 U.S.C. 717b.

Signed in Washington, DC, on May 24, 2023.

Samson A. Adeshiyan,

Director, Office of Statistical Methods and Research, U.S. Energy Information Administration.

[FR Doc. 2023–11483 Filed 5–30–23; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Extension

AGENCY: U.S. Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Notice and request for comments.

SUMMARY: EIA invites public comment on the proposed collection of information, EIA–914, *Monthly Crude Oil and Lease Condensate, and Natural Gas Production Report,* as required under the Paperwork Reduction Act of 1995. EIA is requesting a three-year extension with changes of Form EIA–914 *Monthly Crude Oil and Lease Condensate, and Natural Gas Production Report.* The survey collects monthly data on production and sales of natural gas, and crude oil and lease condensate. The data provide useful information on the nation's production and sales of crude oil and natural gas.

DATES: EIA must receive all comments on this proposed information collection no later than July 31, 2023. If you anticipate any difficulty in submitting comments within that period, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice as soon as possible.

ADDRESSES: Submit comments electronically to *Petroleum and Other Liquids Data* at *eiainfopetroleum@eia.gov* with 60-day Federal Register Notice: Form EIA–914 in the subject line, or mail comments to: Katie Lewis, U.S. Energy Information Administration, EI–23, 1000 Independence Avenue SW, Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: If you need additional information, please contact: Katie Lewis, U.S. Energy Information Administration, at (202)586–5138, or by email at *katie.lewis@eia.gov.* The form and instructions are available on EIA's website at: *https://www.eia.gov/survey/#eia-914.*

SUPPLEMENTARY INFORMATION: This information collection request contains:

(1) *OMB No.:* 1905–0205;

(2) *Information Collection Request Title:* Monthly Crude Oil and Lease Condensate, and Natural Gas Production Report;

(3) *Type of Request:* Thee-year extension with changes; revision of the currently approved Form EIA–914.

(4) *Purpose:* Form EIA–914 *Monthly Crude Oil and Lease Condensate, and Natural Gas Production Report* collects monthly data on natural gas production, and crude oil and lease condensate production, and crude oil and lease condensate sales by API gravity category in 22 state/areas (Alabama, Arkansas, California (including State Offshore), Colorado, Federal Offshore Gulf of Mexico, Federal Offshore Pacific, Kansas, Louisiana (including State Offshore), Michigan, Mississippi (including State Offshore), Montana, New Mexico, North Dakota, Ohio, Oklahoma, Pennsylvania, Texas (including State Offshore), Utah, Virginia, West Virginia, Wyoming, and Other States (defined as all remaining states, except Alaska)). The data appear in the *Monthly Crude Oil and Lease Condensate, and Natural Gas Production Report* on EIA's website and in the EIA publications; *Monthly Energy Review, Petroleum Supply Annual* volumes, *Petroleum Supply Monthly, Natural Gas Annual,* and *Natural Gas Monthly.*

(4a) Changes to Information Collection: EIA proposes to make the following changes to Form EIA–914, Monthly Crude Oil and Lease Condensate, and Natural Gas Production Report:

- Section 4 of Form EIA–914, *Crude Oil and Lease Condensate Run Ticket Volumes (Sales) by API Gravity,* which collected density data for crude oil and lease condensate production for selected States would be discontinued and deleted from Form EIA–914.

(5) *Annual Estimated Number of Respondents:* 400.

(6) *Annual Estimated Number of Total Responses:* 4,800.

(7) *Annual Estimated Number of Burden Hours:* 14,400.

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* $1,257,984 (14,400 burden hours times $87.36). EIA estimates that respondents will have no additional costs associated with the surveys other than the burden hours and that the information is maintained during the normal course of business.

Comments are invited on whether or not: (a) The proposed collection of information is necessary for the proper performance of agency functions, including whether the information will have a practical utility; (b) EIA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used, is accurate; (c) EIA can improve the quality, utility, and clarity of the information it will collect; and (d) EIA can minimize the burden of the collection of information on respondents, such as automated collection techniques or other forms of information technology.

Statutory Authority: 15 U.S.C. 772(b) and 42 U.S.C. 7101 *et seq.*

Signed in Washington, DC, on May 24, 2023.

Samson A. Adeshiyan,

Director, Office of Statistical Methods and Research, U.S. Energy Information Administration.

[FR Doc. 2023–11482 Filed 5–30–23; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Extension

AGENCY: U.S. Energy Information Administration (EIA), U.S. Department of Energy (DOE).

ACTION: Notice and request for comments.

SUMMARY: EIA submitted an information collection request for a three-year extension of the *Coal Markets Reporting System* as required by the Paperwork Reduction Act of 1995. The Coal Markets Reporting System (CMRS) consists of five surveys including, Form EIA–3 *Quarterly Survey of Non-Electric Sector Coal Data,* Form EIA–7A *Annual Survey of Coal Production and Preparation,* Form EIA–8A *Annual Survey of Coal Stocks and Coal Exports,* Form EIA–6 *Emergency Coal Supply Survey* (Standby), and Form EIA–20 *Emergency Weekly Coal Monitoring Survey for Coal Burning Power Producers* (Standby). The CMRS collects data on U.S. coal production, quality, consumption, receipts, stocks, and prices. EIA proposes to make changes to instructions to Forms EIA–3, EIA–7A, and EIA–8A and requests an extension to Forms EIA–6 and EIA–20 with no changes. The changes to Forms EIA–3, EIA–7A, and EIA–8A will reduce the burden of this collection while maintaining the utility and integrity of the data.

DATES: Comments on this information collection must be received no later than June 30, 2023. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this

notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the forms and instructions should be directed to Ms. Rosalyn Berry at (202) 586–1026, or by email at *Coal2023@eia.gov.* The forms are available online.

SUPPLEMENTARY INFORMATION: This information collection request contains:

(1) *OMB No.:* 1905–0167;

(2) *Information Collection Request Title:* Coal Markets Reporting System;

(3) *Type of Request:* Three-year extension with changes;

(4) *Purpose:* The Coal Markets Reporting System (CMRS) program collects, evaluates, assembles, analyzes, and disseminates information on coal production, sales, technology, reserves, and related economic and statistical information. This information is used to assess the adequacy of coal and other energy resources to meet near and longer-term domestic demands and to promote sound policymaking, efficient markets, and public understanding of energy and its interaction with the economy and the environment.

Form EIA–3 collects quarterly data on the use of coal at U.S. manufacturing plants, coal transformation/processing plants, coke plants, and commercial and institutional users of coal. Form EIA–7A collects coal production operations, characteristics of coalbeds mined, recoverable reserves, production capacity, coal sales and revenue, stocks held at mines, and the disposition of the coal mined. For coal preparation, information collected includes operations, locations, production capacity, disposition, and volume of coal prepared. Form EIA–8A collects data on coal stocks by state location, exported coal by origin state, and export revenue of coal sold during the reporting year.

Form EIA–6 *Emergency Coal Supply Survey* and Form EIA–20 *Emergency Weekly Coal Monitoring Survey for Coal Burning Power Producers* are standby surveys used during periods of coal supply and transportation disruptions. In the event of a supply or transportation disruption, these two standby surveys activate and operate weekly over a ten-week period. Once activated, Form EIA–6 collects weekly coal production and stocks data from U.S. coal mining companies. Data are aggregated and reported at the state level. During disruptive events, Form EIA–20 collects available coal-fired capacity, generation, consumption, and stocks from coal-fired electric power generators.

The CMRS also collects coal market data. The data elements include production, consumption, receipts, stocks, sales, and prices. Information pertaining to the quality of the coal is also collected, including heat content, ash content, sulfur content and contents of mercury. Aggregates of this collection are used to support analysis on the effects of public policy on the coal industry, economic modeling, forecasting, coal supply and demand studies, and in guiding research and development programs. The data are included in EIA publications, such as the *Monthly Energy Review, Quarterly Coal Report, Quarterly Coal Distribution Report, Annual Coal Report,* and *Annual Coal Distribution Report.*

EIA also uses the data in short-term and long-term forecast models such as the Short-Term Integrated Forecasting System (STIFS) and the National Energy Modeling System (NEMS) Coal Market Module. The forecast data also appear in the *Short-Term Energy Outlook* and the *Annual Energy Outlook* publications.

(4a) *Proposed Changes:* EIA will be requesting a three-year extension of approval for all its coal surveys with the following changes:

Form EIA–3: Quarterly Survey of Industrial, Commercial, & Institutional Coal Users

• Revise the instructions to indicate only active users of coal need report. Currently, respondents are required to report if they've consumed more than 1,000 short tons in the past year. Respondents who switch from coal to gas are still required to file the EIA–3 for up to almost a year after they stop consuming coal. The proposed change will make it easier for respondents who permanently stop consuming coal to be removed from the survey frame, thereby reducing the reporting burden of this collection.

Form EIA–7A: Annual Survey of Coal Production and Preparation

• Revise the instructions to indicate all coal mining companies that owned a mining operation which produced 50,000 or more short tons of coal during the reporting year must submit the Form EIA–7A, except for anthracite mines. The current threshold for anthracite mines of 10,000 short tons would remain the same. The proposed change in reporting threshold from 25,000 to 50,000 short tons will reduce the reporting burden of this collection while maintaining the utility and integrity of the data.

• Revise the instructions to remove the notes for Part 3 Question 10 advising respondents how to convert longitude and latitude, referencing an external document on EIA's website. These instructions are outdated and unnecessary.

Form EIA–8A: Annual Survey of Coal Stocks and Coal Exports

• Add an instruction to Part 2, Question 1 and Part 3 Question 1 to exclude stocks and exports already reported on the Form EIA–7A. Some respondents file both Forms EIA–7A and EIA–8A, especially companies with parent companies. The proposed change will avoid duplication of data collection, thereby reducing the reporting burden on Form EIA–8A respondents.

(5) *Annual Estimated Number of Respondents:* 833;

• Form EIA–3 will consist of 290 respondents;

• Form EIA–7A will consist of 480 respondents;

• Form EIA–8A will consist of 44 respondents;

• Form EIA–6 (standby) will consist of 10 respondents;

• Form EIA–20 (standby) will consist of 9 respondents;

(6) *Annual Estimated Number of Responses:* 1,830.

(7) *Annual Estimated Number of Burden Hours:* 3,149.

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* Additional costs to respondents are not anticipated beyond costs associated with response burden hours. The information is maintained in the normal course of business. The cost of the burden hours is estimated to be $275,097 (3,149 burden hours times $87.36 per hour). Other than the cost of burden hours, EIA estimates that there are no additional costs for generating, maintaining and providing the information.

Statutory Authority: 42 U.S.C. 7135, 15 U.S.C. 772(b), and 42 U.S.C. 7101 *et seq.*

Signed in Washington, DC, on May 24, 2023.

Samson A. Adeshiyan,

Director, Office of Statistical Methods and Research, U. S. Energy Information Administration.

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC23–74–000.
Applicants: Energy Harbor Corp.
Description: Energy Harbor Corp., et. al. submits Supplemental Submission and Request Not To Adjust Comment Period.
Filed Date: 5/15/23.
Accession Number: 20230515–5180.
Comment Date: 5 p.m. ET 6/16/23.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER23–1942–000.
Applicants: Idaho Power Company.
Description: § 205(d) Rate Filing: RS 172—IPC/PAC Kinport Construction Agreement to be effective 4/14/2023.
Filed Date: 5/23/23.
Accession Number: 20230523–5198.
Comment Date: 5 p.m. ET 6/13/23.

Docket Numbers: ER23–1943–000.
Applicants: Idaho Power Company.
Description: § 205(d) Rate Filing: RS 173—IPC/PAC Midpoint Construction Agreement to be effective 4/14/2023.
Filed Date: 5/23/23.
Accession Number: 20230523–5202.
Comment Date: 5 p.m. ET 6/13/23.

Docket Numbers: ER23–1944–000.
Applicants: Skylar Energy Resources LLC.
Description: Tariff Amendment: Cancellation entire tariff to be effective 5/24/2023.
Filed Date: 5/23/23.
Accession Number: 20230523–5216.
Comment Date: 5 p.m. ET 6/13/23.

Docket Numbers: ER23–1945–000.
Applicants: Skylar Power Marketing, LLC.
Description: Tariff Amendment: Cancellation entire tariff to be effective 5/24/2023.
Filed Date: 5/23/23.
Accession Number: 20230523–5217.
Comment Date: 5 p.m. ET 6/13/23.

Docket Numbers: ER23–1946–000.
Applicants: PacifiCorp.
Description: § 205(d) Rate Filing: Certificate of Concurrence to Kinport Construction Agreement to be effective 4/14/2023.
Filed Date: 5/24/23.
Accession Number: 20230524–5000.
Comment Date: 5 p.m. ET 6/14/23.

Docket Numbers: ER23–1947–000.
Applicants: PacifiCorp.
Description: § 205(d) Rate Filing: Certificate of Concurrence to Midpoint Construction Agreement to be effective 4/14/2023.
Filed Date: 5/24/23.
Accession Number: 20230524–5001.
Comment Date: 5 p.m. ET 6/14/23.

Docket Numbers: ER23–1948–000.
Applicants: Southwest Power Pool, Inc.
Description: § 205(d) Rate Filing: 1518R26 Arkansas Electric Cooperative Corp NITSA NOA to be effective 8/1/2023.
Filed Date: 5/24/23.
Accession Number: 20230524–5009.
Comment Date: 5 p.m. ET 6/14/23.

Docket Numbers: ER23–1949–000.
Applicants: Midcontinent Independent System Operator, Inc.
Description: § 205(d) Rate Filing: 2023–05–24_Cancellation of Schedule 43J Teche Unit No. 3 SSR Cost Allocation to be effective 7/24/2023.
Filed Date: 5/24/23.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER23–1936–000]

Elektron Power LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Elektron Power LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is June 13, 2023.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Dated: May 24, 2023.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2014–0128; FRL–5788–03–OAR]

Release of the Policy Assessment for the Review of the Secondary National Ambient Air Quality Standards for Oxides of Nitrogen, Oxides of Sulfur and Particulate Matter—External Review Draft

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: On or about May 31, 2023, the Environmental Protection Agency (EPA) will make available for public comment the draft document, *Draft Policy Assessment for the Review of the Secondary National Ambient Air Quality Standards for Oxides of Nitrogen, Oxides of Sulfur and Particulate Matter—External Review Draft* (PA). This draft document was prepared as a part of the current review of the Secondary National Ambient Air Quality Standards (NAAQS) for Oxides of Nitrogen, Oxides of Sulfur and Particulate Matter. When final, the PA serves to ''bridge the gap'' between the currently available scientific and technical information and the judgments required of the Administrator in determining whether to retain or revise the existing secondary NO_2, SO_2 and PM NAAQS. The secondary NAAQS for oxides of nitrogen, oxides of sulfur and particulate matter are set to protect the public welfare from known or anticipated effects of these pollutants in the ambient air.

DATES: Comments should be received on or before July 31, 2023.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2014–0128, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov/* (our preferred method). Follow the online instructions for submitting comments.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Office of Air and Radiation Docket, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand Delivery or Courier (by scheduled appointment only):* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operations are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal Holidays).

Instructions: All submissions received must include the Docket ID No. for this notice. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments, see the **SUPPLEMENTARY INFORMATION** section of this document. The draft document described here will be available on the EPA's website at *https://www.epa.gov/naaqs/nitrogen-dioxide-no2-and-sulfur-dioxide-so2-secondary-air-quality-standards.* The documents will be accessible under ''Policy Assessments'' for the current review.

FOR FURTHER INFORMATION CONTACT: Ginger Tennant, Office of Air Quality Planning and Standards, (Mail Code

SUPPLEMENTARY INFORMATION:

I. General Information

Written Comments

Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2014–0128, at *https://www.regulations.gov* (our preferred method), or the other methods identified in the **ADDRESSES** section. Once submitted, comments cannot be edited or removed from the docket. The EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI), Proprietary Business Information (PBI), or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). Please visit *https://www.epa.gov/dockets/commenting-epa-dockets* for additional submission methods; the full EPA public comment policy; information about CBI, PBI, or multimedia submissions; and general guidance on making effective comments.

II. Information About the Documents

Two sections of the Clean Air Act (CAA or the Act) govern the establishment and revision of the NAAQS. Section 108 directs the Administrator to identify and list certain air pollutants and then issue ''air quality criteria'' for those pollutants. The air quality criteria are to ''accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of such pollutant in the ambient air. . .'' (CAA section 108(a)(2)). Under section 109 of the Act, the EPA is then to establish primary (health-based) and secondary (welfare-based) NAAQS for each pollutant for which the EPA has issued air quality criteria. Section 109(d)(1) of the Act requires periodic review and, if appropriate, revision of existing air quality criteria. Revised air quality criteria are to reflect advances in scientific knowledge on the effects of the pollutant on public health and welfare. Under the same provision, the EPA is also to periodically review and, if appropriate, revise the NAAQS, based on the revised air quality criteria. The Act additionally requires appointment of an independent scientific review committee that is to periodically review the existing air quality criteria and NAAQS and to recommend any new standards and revisions of existing criteria and standards as may be appropriate (CAA section 109(d)(2)(A)-(B)). Since the early 1980s, the requirement for an independent scientific review committee has been fulfilled by the Clean Air Scientific Advisory Committee (CASAC).

In characterizing effects related to atmospheric deposition of oxides of nitrogen and oxides of sulfur and their transformation products, this review also recognizes the contribution of PM through deposition to eutrophication-related effects, acidification-related effects, and other such welfare effects, as well to the direct and other indirect effects on vegetation, soils, and biota. Addressing the pollutants together enables us to take a comprehensive look at the nature and interactions of the pollutants, which is important for ensuring that all scientific information relevant to ecological effects is thoroughly evaluated. This approach also addresses the CASAC's comments on the draft Integrated Review Plan (IRP) for this review, as well as the CASAC's comments on the draft IRP for the PM NAAQS review. In particular, the CASAC expressed concern that PM deposition-related effects were not adequately covered in the PM review; and they also encouraged the EPA to include all reduced nitrogen compounds, including ammonia and ammonium, to properly evaluate ecological impacts from nitrogen deposition in the secondary standards review for oxides of nitrogen and oxides of sulfur (Diez Roux and Fernandez, 2016; Diez Roux, 2016). Additional welfare effects associated with PM, such as visibility impairment, climate effects and materials damage, and the health effects of PM (including particulate transformation products of oxides of nitrogen and oxides of sulfur) are considered as part of the separate review of the NAAQS for PM.

In March 2017, EPA released the first external review draft of the *Integrated Science Assessment (ISA) for Oxides of Nitrogen, Oxides of Sulfur, and Particulate Matter Ecological Criteria,* which was then discussed at a CASAC meeting May 24–25, 2017. Comments from the CASAC (Diez Roux, 2017) and the public were considered in preparing the second external review draft (June 2018), which was then discussed at a CASAC meeting September 5–6, 2018, and April 27, 2020. CASAC provided a final letter on the second draft ISA in May 2020 (Cox, 2020), and in October 2020, EPA released the final ISA for NO_X, SO_X, and PM ecological criteria (U.S. EPA, 2020).

This draft PA serves to ''bridge the gap'' between the scientific and technical information in the 2020 ISA and any air quality, exposure, and risk analyses available in this review, and the judgments required of the Administrator in determining whether to retain or revise the existing secondary ambient air quality standards for NO_2, SO_2 and PM. The draft PA document will be available on or about May 31, 2023, on EPA's website at *https://www.epa.gov/naaqs/nitrogen-dioxide-no2-and-sulfur-dioxide-so2-secondary-air-quality-standards.* The EPA is soliciting advice and recommendations from the CASAC by means of a review of this draft document in an upcoming public meeting of the CASAC. Information about this public meeting, including the dates and location, was published as a separate notice in the **Federal Register** on March 23, 2023 (88 FR 17572). Following the CASAC meeting, the EPA will consider comments received from the CASAC and the public in preparing the final PA.

The Draft PA will be available primarily via the internet at: *https://www.epa.gov/naaqs/nitrogen-dioxide-no2-and-sulfur-dioxide-so2-secondary-air-quality-standards.* The document will be accessible under ''Policy Assessments'' from the current review. The draft document briefly described above does not represent and should not be construed to represent any final EPA policy, viewpoint, or determination.

Erika Sasser,

Director, Health and Environmental Impacts Division.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2023–0284; FRL–10996–01–OGC]

Proposed Consent Decree, Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with the Clean Air Act, as amended (CAA or the Act), the Environmental Protection Agency (EPA or the Agency) is providing notice of a proposed consent decree in *California Communities Against Toxics, et al.* v. *Regan,* No. 1:22-cv-03724 (D.D.C.). On December 14, 2022, Plaintiffs California Communities Against Toxics, Clean Power Lake County, Rio Grande International Study Center, Sierra Club, and Union of Concerned Scientists filed a complaint in the United States District Court for the District of Columbia alleging that EPA has failed to perform its nondiscretionary duty to ''review, and revise as necessary'' the National Emission Standards for Hazardous Air Pollutants: Ethylene oxide Emissions Standards for Sterilization Facilities, at least every 8 years. The proposed consent decree would establish a deadline for EPA to sign a final rule for this action.

DATES: Written comments on the proposed consent decree must be received by *June 30, 2023.*

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2023–0284, online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Additional Information about Commenting on the Proposed Consent Decree'' heading under the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Amy Huang Branning, Air and Radiation Law Office, Office of General Counsel, U.S. Environmental Protection Agency; telephone (202) 564–1744; email address *branning.amy@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining a Copy of the Proposed Consent Decree

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2023–0284) contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

The electronic version of the public docket for this action contains a copy of the proposed consent decree and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

II. Additional Information About the Proposed Consent Decree

On December 14, 2022, Plaintiffs California Communities Against Toxics, Clean Power Lake County, Rio Grande International Study Center, Sierra Club, and Union of Concerned Scientists (collectively ''Plaintiffs'') filed a complaint in the United States District Court for the District of Columbia alleging that EPA has failed to perform its nondiscretionary duty under CAA section 112(d)(6) to ''review, and revise as necessary'' the National Emission Standards for Hazardous Air Pollutants (''NESHAP''): Ethylene oxide Emissions Standards for Sterilization Facilities, 40 CFR part 60, subpart O (''Sterilization Facilities NESHAP''), at least every 8 years. EPA promulgated the Sterilization Facilities NESHAP in 1994. 59 FR 62585 (December 6, 1994). In 2006, EPA conducted a risk assessment of this source category pursuant to CAA section 112(f)(2) and a technology review of its NESHAP pursuant to section 112(d)(6), neither of which resulted in revisions to the Sterilization Facilities NESHAP. 71 FR 17712 (April 7, 2006). EPA has not completed a section 112(d)(6) review of this NESHAP since then. EPA recently published a proposed rule that includes revisions to the Sterilization Facilities NESHAP pursuant to CAA section 112(d)(6) of the Act. 88 FR 22790 (April 13, 2023). The proposed consent decree, if finalized, would require that EPA sign a final rule on its review and ''necessary revisions'' of the Sterilization Facility NESHAP pursuant to section 112(d)(6) by March 1, 2024.

In accordance with section 113(g) of the CAA, for a period of thirty (30) days following the date of publication of this document, the Agency will accept written comments relating to the proposed consent decree. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

III. Additional Information About Commenting on the Proposed Consent Decree

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2023–0284, via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document. Note that written comments containing CBI and submitted by mail may be delayed and deliveries or couriers will be received by scheduled appointment only.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties

and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

Gautam Srinivasan,

Associate General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2006–0407; FRL—11005–01–OAR]

Agency Information Collection Activities; Proposed Information Collection Request; Comment Request; EPA's ENERGY STAR Program in the Commercial and Industrial Sectors (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) is planning to submit an information collection request (ICR), ''EPA's ENERGY STAR Program in the Commercial and Industrial Sectors'' (EPA ICR Number 1772.09, OMB Control Number 2060–0347) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through January 21, 2024. This notice allows for 60 days for public comments.

DATES: Comments must be submitted on or before July 31, 2023.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2006–0407, to EPA online using *www.regulations.gov* (our preferred method), by email to *a-and-r-Docket@epa.gov* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Cynthia Veit Maia, Climate Protection Partnerships Division, (5230A), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 202–564–9494; fax number: 202–343–2204; email address: *veitmaia.cynthia@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through January 31, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

This notice allows 60 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets*.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate forms of information technology. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: EPA created ENERGY STAR as a voluntary program to help businesses and individuals protect the environment through superior energy efficiency. The program focuses on reducing utility-generated emissions by reducing the demand for energy. In 1991, EPA launched the Green Lights Program to encourage corporations, State and local governments, colleges and universities, and other organizations to adopt energy-efficient lighting as a profitable means of preventing pollution and improving lighting quality. Since then, EPA has rolled Green Lights into ENERGY STAR and expanded ENERGY STAR to encompass organization-wide energy performance improvement, such as building technology upgrades, product purchasing initiatives, and employee training. At the same time, EPA has streamlined the reporting requirements of ENERGY STAR and focused on providing incentives for improvements (*e.g.,* ENERGY STAR awards program). EPA also makes tools and other resources available over the Web to help the public overcome the barriers to evaluating their energy performance and investing in profitable improvements.

To join ENERGY STAR, organizations are asked to complete a Partnership Application that establishes their commitment to energy efficiency. Partners agree to undertake efforts such as measuring, tracking, and benchmarking their organization's energy performance by using tools such as those offered by ENERGY STAR; developing and implementing a plan to improve energy performance in their facilities and operations by adopting a strategy provided by ENERGY STAR; and educating staff and the public about their Partnership with ENERGY STAR, and highlighting achievements with the ENERGY STAR, where available.

Partners also may be asked to periodically submit information to EPA as needed to assist in program implementation.

Partnership in ENERGY STAR is voluntary and can be terminated by Partners or EPA at any time. EPA does not expect organizations to join the program unless they expect participation to be cost effective and otherwise beneficial for them.

In addition, Partners and other interested parties can seek recognition and help EPA promote energy-efficient technologies by evaluating the efficiency of their buildings using EPA's on-line tools (*e.g.,* Portfolio Manager) and applying for recognition. EPA does

not expect any information collected under ENERGY STAR to be Confidential Business Information (CBI).

Form Numbers: 5900–19, 5900–195, 5900–197, 5900–198, 5900–22, 5900–262, 5900–263, 5900–264, 5900–265, 5900–382, 5900–383, 5900–387, 5900–436, 5900–437, 5900–441, 5900–441a, 5900–442, 5900–443, 5900–444, 5900–445, 5900–89.

Respondents/affected entities: Participants in EPA's ENERGY STAR Program in the commercial and industrial sectors.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 37,021 (total).

Frequency of response: One-time, annually, or on occasion.

Total estimated burden: 210,306 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $14,859,991 (per year), which includes $5,034,450 annualized capital or operation & maintenance costs.

Changes in the Estimates: The burden estimates presented in this notice are from the last approval. EPA is currently evaluating and updating these estimates as part of the ICR renewal process. EPA will discuss its updated estimates, as well as changes from the last approval, in the next **Federal Register** notice to be issued for this renewal.

Jean Lupinacci,

Director, Climate Protection Partnerships Division.

[FR Doc. 2023–11443 Filed 5–30–23; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0703; FR ID 143029]

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it can further reduce the information collection burden for small business concerns with fewer than 25 employees.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before June 30, 2023.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–0703.

Title: Determining Costs of Regulated Cable Equipment and Installation, FCC Form 1205.

Form Number: FCC Form 1205.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 2,650 respondents; 4,650 responses.

Estimated Time per Response: 4–12 hours.

Frequency of Response: Recordkeeping requirement, Annual reporting requirement, Third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in Section 301(j) of the Telecommunications Act of 1996 and 623(a)(7) of the Communications Act of 1934, as amended.

Total Annual Burden: 35,800 hours.

Total Annual Cost: $1,800,000.

Needs and Uses: Information derived from FCC Form 1205 filings is used to facilitate the review of equipment and installation rates. This information is then reviewed by each cable system's respective local franchising authority. Section 76.923 records are kept by cable operators in order to demonstrate that charges for the sale and lease of equipment for installation have been developed in accordance with the Commission's rules.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

[FR Doc. 2023–11492 Filed 5–30–23; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than June 29, 2023.

A. Federal Reserve Bank of Minneapolis (Stephanie Weber, Assistant Vice President)

90 Hennepin Avenue, Minneapolis, Minnesota 55480–0291. Comments can also be sent electronically to *MA@mpls.frb.org:*

1. *Heritage Bancshares Group Inc. Employee Stock Ownership Plan and Trust, Spicer, Minnesota;* to acquire up to 41.12 percent of the voting shares of Heritage Bancshares Group, Inc., and thereby indirectly acquire voting shares of Heritage Bank, N.A., both of Spicer, Minnesota.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

[FR Doc. 2023–11440 Filed 5–30–23; 8:45 am]

BILLING CODE P

GENERAL SERVICES ADMINISTRATION

[Notice–MA–2023–06; Docket No. 2023–0006; Sequence No. 01]

Federal Travel Regulation (FTR); Agency Reporting Requirements

AGENCY: Office of Government-wide Policy (OGP), General Services Administration (GSA).

ACTION: Notice of GSA Bulletin FTR 23–06, travel reporting information profile (trip) reporting requirements.

SUMMARY: GSA Bulletin FTR 23–06 announces updates to the reporting requirements for annual travel and transportation information, commonly called the TRIP report.

DATES: *Applicable:* May 31, 2023.

FOR FURTHER INFORMATION CONTACT: For clarification of content, contact LaMan Dantzler J.D., Office of Government-wide Policy, Office of Asset and Transportation Management, at *travelpolicy@gsa.gov,* or 202–615–5399. Please cite Notice of GSA Bulletin FTR 23–06.

SUPPLEMENTARY INFORMATION: 5 United States Code 5707(c), as implemented in Federal Travel Regulation (FTR) Part 300–70, directs agencies (as defined in FTR § 301–1.1) to report specific information on payments for temporary duty travel and employee relocation no later than November 30 of each year to the General Services Administration (GSA). The head of the agency is responsible for ensuring the reported information is complete and accurate, to include information from all components of the agency, before submitting it to GSA (FTR 300–70.3; 300–70.4).

Executive Order 14057, ''Catalyzing Clean Energy Industries and Jobs Through Federal Sustainability'' and its implementing instructions direct GSA to establish tracking and provide annual reporting of agency-specific and Government-wide Scope 3 greenhouse gas (GHG) carbon emissions for employee travel.

The E-Gov Travel Service (ETS) and the Department of Defense's Defense Travel System (DTS) and MyTravel solutions capture mileage information required to compute a carbon footprint for commercial airline and privately owned vehicle travel, but GSA cannot extract this mileage data directly from other agencies' travel solutions. To consolidate travel-related information into a single repository while enabling necessary GHG calculations, GSA is adding mileage components to the information agencies must submit in the TRIP report.

GSA Bulletin FTR 23–06 can be viewed in its entirety at *https://www.gsa.gov/ftrbulletins.*

Saul A. Japson,

Principal Deputy Associate Administrator, Office of Government-wide Policy.

BILLING CODE 6820–14–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Notice of Meeting

AGENCY: Agency for Healthcare Research and Quality (AHRQ), HHS.

ACTION: Notice.

SUMMARY: The Agency for Healthcare Research and Quality (AHRQ) announces a Special Emphasis Panel (SEP) meeting on ''Supporting the Management of Substance Use Disorders in Primary Care and other Ambulatory Settings (R18)''. This SEP meeting will be closed to the public.

DATES: July 13, 2023.

ADDRESSES: Agency for Healthcare Research and Quality (Video Assisted Review), 5600 Fishers Lane, Rockville, Maryland 20857.

FOR FURTHER INFORMATION CONTACT: Jenny Griffith, Committee Management Officer, Office of Extramural Research, Education and Priority Populations, Agency for Healthcare Research and Quality, (AHRQ), 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 427–1557.

SUPPLEMENTARY INFORMATION: A Special Emphasis Panel is a group of experts in fields related to health care research who are invited by AHRQ, and agree to be available, to conduct on an as needed basis, scientific reviews of applications for AHRQ support. Individual members of the Panel do not attend regularly scheduled meetings and do not serve for fixed terms or a long period of time. Rather, they are asked to participate in particular review meetings which require their type of expertise.

The SEP meeting referenced above will be closed to the public in accordance with the provisions set forth in 5 U.S.C. 1009(d), 5 U.S.C. 552b(c)(4), and 5 U.S.C. 552b(c)(6). Grant applications for ''Supporting the Management of Substance Use Disorders in Primary Care and other Ambulatory Settings (R18)'' are to be reviewed and discussed at this meeting. The grant applications and the discussions could disclose confidential trade secrets or

commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Agenda items for this meeting are subject to change as priorities dictate.

Dated: May 24, 2023.

Marquita Cullom,

Associate Director.

[FR Doc. 2023–11498 Filed 5–30–23; 8:45 am]

BILLING CODE 4160–90–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Refugee Cash and Medical Assistance Federal Financial Report ORR–2 Supplemental Data Collection (OMB #: 0970–0510)

AGENCY: Office of Refugee Resettlement, Administration for Children and Families, U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Administration for Children and Families' (ACF) Office of Refugee Resettlement (ORR) plans to submit a generic information collection (GenIC) request under the following umbrella generic: Generic Clearance for Financial Reports used for ACF Mandatory Grant Programs (0970–0510). This request is to include instructions for ORR Refugee Cash and Medical Assistance (CMA) grant recipients to provide supplemental financial information when submitting the already required ORR–2 Financial Report, which is approved under Office of Management and Budget (OMB) number 0970–0407.

DATES: *Comments due within 14 days of publication.* In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above and below.

ADDRESSES: Copies of the proposed collection of information can be obtained and comments may be forwarded by emailing *infocollection@acf.hhs.gov.* All requests should be identified by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: ACF programs require detailed financial information from their grantees that allows ACF to monitor various specialized cost categories within each program to closely manage program activities and to have sufficient financial information to enable periodic thorough and detailed audits. The Generic Clearance for Financial Reports used for ACF Mandatory Grant Programs allows ACF programs to efficiently develop and receive approval for financial reports that are tailored to specific funding recipients and the associated needs of the program. For more information about the umbrella generic, see: *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202303-0970-002.*

This specific GenIC request applies to all ORR Refugee Cash and Medical Assistance grantees awarded traditional base funding as well as funding received under the Afghanistan Supplemental Appropriations Act, 2022 (ASA), and the Ukraine Supplemental Appropriations Act, 2022, and other appropriations as communicated. All grantees must complete reporting in accordance with statute. Currently, grantees use the ORR–2 (OMB #: 0970–0407) to report federal expenditures by program categories such as refugee cash assistance and refugee medical assistance. The ORR–2 requests grantees to report on the various program categories totaling expenditures, unliquidated obligations, and unobligated balances. ORR is proposing to request that grantees break out unobligated balances reported on the final ORR–2 financial report by funding source (base, ASA, Ukraine) and financial account number as referenced on the Notice of Award as a Word or Excel attachment to upload (with the ORR–2 report) in the Online Line Data Collection via the designated link. This final report is due September 30th. The proposed supplemental instructions will provide guidance and assist grantees with submitting the additional detail about Federal expenditure data reported on the ORR–2. The analysis of this data would further support adherence to program requirements.

Respondents: States, State Agency Grantee Designees.

ANNUAL BURDEN ESTIMATES

Title of information collection	Number of respondents	Annual frequency of responses	Hourly burden per response	Annual hourly burden
RSS SF–425 Supplemental Data Collection	66	1	1.67	110

Comments: The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 14 days of this publication.

Authority: Section 412(c)(1)(A) of the Immigration and Nationality Act (8 U.S.C. 1522(c)(1)(A)).

Mary B. Jones,

ACF/OPRE Certifying Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for Office of Management and Budget (OMB) Review; Monitoring and Compliance for ORR Care Provider Facilities (OMB #: 0970–0564)

AGENCY: Office of Refugee Resettlement, Administration for Children and Families, U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Office of Refugee Resettlement (ORR), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), is inviting public comments on the proposed collection. The request consists of several forms that allow the ORR Unaccompanied Children (UC) Program to enhance monitoring efforts at care provider facilities that are not licensed by the State, as well as continue standard monitoring activities that ensure its care provider facilities are in compliance with Federal and State laws and regulations, licensing and accreditation standards, ORR policies and procedures, and child welfare standards. This notice is specific to forms that were recently approved through emergency approval for 180 days and additional proposed forms.

DATES: *Comments due within 30 days of publication.* OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. You can also obtain copies of the proposed collection of information by emailing *infocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description

Current Proposed Revisions

Quarterly Unlicensed Facility Site Visits

- Unlicensed Facility Unaccompanied Child Case File Checklist (Form M–8A–UF)
  - Admission Documents
    - *Inventory of Property and Cash:* Corrected timeframe to align with policy. The inventory log should be completed ''within 2 hours of admission'' not 24 hours.
    - *Clothing and Supplies:* Added language to clarify what is covered under this item.
  - Orientation Documents—Added new item checking for compliance with ORR's access to reproductive health care policy (also known as the *Garza* policy).
  - Legal Information
    - *Acknowledgement of Receiving Legal Resource Guide:* Changed ''within 24 hours'' to ''within 24 hours of admission'' to clarify the policy requirement.
    - *EOIR Docs:* Corrected name Executive Office for Immigration Review (''Review'' was missing)
  - Medical Documents
    - *Authorization for Medical, Dental, and Mental Health Care:* Changed ''within 24 hours'' to ''within 24 hours of admission'' to clarify the policy requirement.
    - *Documentation of Initial Medical Exam:* Added ''within 48 hours of admission'' to clarify policy requirement. Updated form expiration dates referenced. Added reminder that completion of the exam form is mandatory.
    - *Dental Exam Form:* Updated form expiration dates referenced. Added reminder that completion of the form is mandatory.
    - *Supplemental TB Screening Form:* Updated form expiration dates referenced. Added reminder that completion of the form is mandatory.
    - *Prescriptions:* Changed ''log'' to ''record/log'' for clarity.
    - Split Medical and Mental Health Records into two separate line items and added language to clarify the policy requirements.
  - Assessments
    - *Unaccompanied Child Case Review:* In first bullet point, clarified that it's the *initial* case review that is continuously updated until 30 calendar days after admission. In second bullet point, changed ''Every 30 calendars days . . .'' to ''Subsequently every 30 calendar days . . .'' for clarity.
    - *Sponsor Assessment:* Updated form expiration dates referenced. Changed ''Within 5 days'' to ''Must be initiated within 5 days'' for clarity.
    - *Individual Service Plan:* Changed ''Within 5 days'' to ''Initial must be done within 5 days'' for clarity.
  - Case Management—Recreation/Leisure: Changed ''log'' to ''plan/log'' for clarity. Removed ''Effective 3/20/20—avoid community outing due to COVID–19'' since this is no longer applicable.
  - Clinical Services—Added ''Disclosure Notice'' to reflect new policy requirement.
  - Discharge
    - *Removed ''CDC Covid–19 Fact Sheet and Symptoms Sheet (Effective:* 3/13/20)''—the revised sponsor letter has replaced that fact sheet.
    - Added ''Post-18 Plan (if applicable)'' to align with policy and procedures.
    - *Family Reunification Packet:* Updated form expiration dates referenced.
  - Post-Discharge—Health Follow-Up Call: Updated effective dates for related guidance and added language clarify requirements.
- Unlicensed Facility Staff Secure Addendum to Case File Checklist (Form M–8D–UF)—Made minor edits for more precise language and changed formatting to bullet point lists for several items.
- Unlicensed Facility Personnel File Checklist (Form M–10A–UF)
  - Removed Training Directive per ORR Management section because it is no longer a requirement. This requirement was related to a specific webinar series on the topic of trauma-informed care. It was removed because it is duplicative of the requirements in the cooperative agreement that require training on strength-based behavior management and trauma-informed care approaches.
  - Annual Trainings—Removed ''Hover for additional comments'' and corresponding comment that read ''How does the employee confirm comprehension of a training? *i.e.,* quiz/test score or signature confirming comprehension'' because respondents reported the comments were unhelpful.
  - Trainings Every Two Years per Cooperative Agreement—
    - *Medication Management:* Added ''must also receive medication administration training''
    - Removed ''Hover for additional comments'' and corresponding comment that read ''How does the employee confirm comprehension of a training? *i.e.,* quiz/test score or signature confirming comprehension'' because respondents reported the comments were unhelpful.
    - Rephrased ''Strength-based behavior management . . .'' to ''Strength-based behavior management and trauma-informed care approaches'' to reflect current cooperative agreement requirements.

Reinstated the following forms as the number of respondents has increased to more than nine respondents.

- Unlicensed Facility LTFC Monitoring Notes (Form M–6C–UF)
- Unlicensed Facility LTFC UC Case File Checklist (Form M–8B–UF)
- Unlicensed Facility Staff Secure Addendum to Case File Checklist (Form M–8D–UF)
- Unlicensed Facility Foster Home Onsite Monitoring Checklist (M–9B–UF)

Quarterly Influx Care Facility Site Visits

Added the below-listed alternate version of a form that was previously

approved by OMB but was removed from the information collection due to the number of respondents. Differences between the previously approve version and the alternate version are noted below.

- Influx Care Facility (ICF) Monitoring Notes (Form M–6E)
  - ○ Instructs monitors to review the facility's contract and statement of work (as opposed to the grant application and cooperative agreement) to reflect the funding method used for ICFs.
  - ○ Removes the following sections that are specific to grants.
    - ▪ Fiscal year budget
    - ▪ Key positions approved by the Project Officer
  - ○ Instructs monitors to review Serious Incident Reports (SIRs) from the past three months (as opposed to six months for shelters). This revision does not represent a reduction in SIR review, rather it reflects the ongoing SIR review process that occurs for ICFs. Monitors are performing site visits within the first three months of an ICR opening, which means that there would only be three months' worth of SIRs available during the initial site visit. Thereafter, three months will cover review of all SIRs since the last site visit. For example, if an ICF opened at the start of January, the initial site visit would occur by the end of March and SIRs generated from January through March would be reviewed. The next site visit would then occur at the end of June and during that visit SIRs generated April through June would be review. There would be no need to review six months' worth of SIRs at that time because the SIRs generated January through March would have already been reviewed. This pattern of quarterly reviews would continue while the ICF is operational.
  - ○ Reworded questions under the staffing plan section to be more specific to contracts.
  - ○ Added instruction for monitors to ensure that the facility is following their supervision plan (as reported in the ICF Site Visit Guide) for any staff whose relevant background checks are still pending. All staff must pass a public records criminal background check before hire. Staff with direct access to children must also pass an FBI fingerprint check and child abuse and neglect check (CA/N). However, staff may be hired provisionally before FBI or CA/N check results are received if at all times prior to receipt of results the staff member is within the sight and under the supervision of a staff member whose background checks are complete.
  - ○ Removed questions on State licensing.
  - ○ Removed section on mosquito control inspections. These inspections were originally established to address concerns with the Zika virus and are no longer performed.

Added the below-listed alternate versions of forms already approved under this information collection. Differences between the already approved versions and the alternate versions are as noted below.

- ICF Monitoring Site Visit Guide (Form M–7G)—Revisions were made to develop a more in-depth guide to reflect the size and complexity of influx sites. ORR plans to pilot this revised guide at ICFs and later decide on whether some or all of these revisions should be made to site visit guides for other levels of care. ORR will seek OMB approval for any future revision to other versions of the site visit guide.
  - ○ Reorganized and grouped questions under different sections, as well as rewording questions and instructions for clarity.
  - ○ Added text boxes and tables to make clear where the ICF should enter information.
  - ○ Added areas for the ICF to provide a brief overview of their site operations and list of subcontractors and their respective scopes of work.
  - ○ Expanded the list of facility points of contact requested.
  - ○ Added areas for the ICF to share any innovative and/or best practices implemented at the site and for the ICF to describe know deficiencies and/or areas for improvement.
  - ○ Added a table in the stakeholders section to prompt the ICF to provide more detail information about the frequency and type of collaboration as well as areas in need of improvement.
  - ○ Expanded section on personnel to include questions about personnel evaluation practices, whistleblower policies, and significant staffing changes, vacancies, deficiencies, and/or barriers to personnel capacity.
  - ○ In addition to providing copies of internal procedures, ICFs are asked to document information about the personnel responsible for internal reviews, protocols for responding to noncompliance, and how the ICF protects child privacy and confidentiality.
  - ○ Expands the question asking for the program's video monitoring policies and procedures to include all perimeter and internal security mechanisms.
  - ○ In addition to providing copies of emergency and evacuation plans, programs are asked to describe related procedures and provide information on emergency drills and after-action reviews.
  - ○ Added area for programs to describe their safety inspection practices and related drills, as well as an area to note concerns/deficiencies related to safety and security.
  - ○ Added questions on the program's procedures for staffing cases, case status updates, and how case managers coordinate with other discipline (*e.g.,* clinical).
  - ○ Split the question asking for the programs discharge procedures into several questions that prompt the program to specifically provide information about their procedures for transfers, age redetermination cases, and managing age outs.
  - ○ Added question that requests the program's procedures on facilitating visits among children in care.
  - ○ Added question asking the program to note any complex or especially vulnerable cases that required specialized service coordination.
  - ○ Added question asking the program to note any concerns/deficiencies related to case management.
  - ○ Added new section on child supervision that asks for program's procedures on supervision plans and direct care staffing ratios, determining room/bed assignments, accurately monitoring the location of the child, and behavior management.
  - ○ Expanded the section that asks for a description of ancillary services to include recreational/leisure, religious, languages access, and phone call, visitation, and mail services (in addition to education and transportation).
  - ○ In addition to requesting copies of nutritional services procedures, adds a section for programs to describe these services. This includes food storage and safety protocols, how child dietary needs are meet, how cultural and religious preferences are meet, and any concerns/deficiencies.
  - ○ Expands the medical services section to add questions asking the program to describe their medical intakes procedures, onsite medical services, medication administration protocols, medical records system, the process for referring a child for offsite medical services, and vaccination procurement and administration protocols.
  - ○ Expands the mental health services section to add questions asking the program to describe their mental health intake procedures and onsite mental health services.
  - ○ In addition to requesting copies of prevention of sexual abuse procedures and related materials, asks the program to describe several specific aspects of their procedures.

○ Breaks the general question asking the program to describe their SIR procedures into several more specific questions on who the responsible parties are for submitting reports, follow-up/addendums, and notification/coordination with external entities.

○ Adds a new question asking the program how long it took to complete the form.

○ Updates the type of background check documentation requested to align with background check requirements specific to influx care facilities.

• ICF Personnel File Checklist (Form M–10E)

○ Pre-Service Trainings—Removed ''State licensed required trainings'' because ICF are not State-licensed.

○ Removed Training Directive per ORR Management section because it is no longer a requirement. This requirement was related to a specific webinar series on the topic of trauma-informed care. It was removed because it is duplicative of a new item added to the annual trainings section that monitors for training on strength-based behavior management and trauma-informed care approaches.

○ Annual Trainings—Added ''Strengths-based behavior management approaches and trauma-informed care approaches, such as using conflict resolution, problem solving skills, using rewards and consequences, de-escalation techniques and helping children and youth learn accountability and self-control.''

○ Removed Trainings Every Two Years per Cooperative Agreement section because ICFs are funded through contracts and not grants.

Prevention of Sexual Abuse (PSA) Audits

ORR is seeking approval to add eight new instruments that will allow ORR to audit its care provider programs for compliance with the IFR on Standards to Prevent, Detect, and Respond to Sexual Abuse and Sexual Harassment Involving Unaccompanied Children (45 CFR Subpart L). These instruments are currently in use without OMB approval; this request will allow ORR to comply with the Paperwork Reduction Act requirements. The proposed new instruments are:

• Preaudit Questionnaire and Audit Documentation Requested Checklist (Form M–17A)

• Instructions for Site Visit and Facility Tour (Form M–17B)

• Interview Guide: Random Sample of Staff Interview (Form M–17C)

• Interview Guide: Program Director (Form M–17D)

• Interview Guide: Prevention of Sexual Abuse (PSA) Compliance Manager (Form M–17E)

• Interview Guide: Specialized Staff (Form M–17F)

• Interview Guide: Unaccompanied Child (Form M–17G)

• PSA Audit Corrective Action Report (Form M–17H)

Revisions to Existing Forms

The below noted revisions were made to existing forms in this collection to better align with ORR policies and procedures and strengthen monitoring protocols.

• FFS Compliance and Safety Site Visit Report (Form M–3A)

○ Converted the original Excel version into a web-based format.

○ Removed the following items that are best practices but not explicitly required in ORR policy/procedures:

▪ Client's rights are posted in language unaccompanied child understands

▪ Daily schedule is posted in language unaccompanied child understands

○ Added the following fields

▪ ORR Region

▪ Please note the number of children in the group being interviewed

▪ Please note the estimate age range of the group of children you interviewed

○ Renamed field ''FFS Name'' to ''ORR Representative Name''

○ Consolidated separate questions regarding compliance with staffing ratios into two questions (''Is the program compliant with all ORR staffing ratios?'' and ''Are there staffing concerns?'') and added field ''If Yes, please confirm you elevated this to the Project Officer for resolution or to address UC capacity.''

• PSA Unaccompanied Child Incident Review (Form M–5A)—Corrected typo in the *When did the incident occur?* field dropdown options, changing ''pm'' to ''am.''

• PSA Adult Incident Review (Form M–5B)—Corrected typo in the *When did the incident occur?* field dropdown options, changing ''pm'' to ''am.''

• Site Visit Guide (Form M–7A)

○ Under Child Protection—Added requirement for program to provide link to mandatory reporting laws/rules and specify who is classified as a mandatory reported in the State in which the program is located.

○ Under Background Checks—Clarified that information on foster parents is also required.

○ Removed reference to mosquito control inspections. These inspections were originally established to address concerns with the Zika virus and are no longer performed.

○ Added *Personnel and Volunteer List* as a supplemental tool to use with this instrument. This list directly corresponds to the information requested in the Background Checks section of the guide.

• Foster Care Site Visit Guide (Form M–7C)

○ Retitled form ''Foster Care Site Visit Guide.'' The former title was ''Long Term Foster Care Site Visit Guide.''

○ Under Program Management—Added requirement to describe internal policies and procedures related to referral and placement.

○ Under Child Protection—Rephrased question 3 from ''Describe the State's licensing child maltreatment reporting requirements. (Provide state link to licensing requirements for reporting requirements.)'' to ''Describe the State's child maltreatment reporting requirements. (Provide a link to the state's mandatory reporting laws/rules. Also, include who classifies as a mandatory reporter in your state.)''

○ Under Facility, Foster Homes, and Food Services

▪ Retitled ''Facility, Foster Homes, and Food Services section to ''Foster Homes.''

▪ Moved the two questions unrelated to foster homes into their own section titled ''Facility and Food Services'' and added additional instructions to clarify what programs are expected to include in their description of the facility space.

○ Under Case Management—Clarified what programs must provide related to their procedures on post-18 planning.

○ Under Background Checks—Reordered and rephrased some of the questions.

○ Under Health Services—Added examples of communicable diseases.

○ Under Problems Encountered—Removed requirement to provide list of commonly used partnerships and services.

○ In the list of requested materials

▪ Added educational curriculum and weekly class schedule

▪ Reformatted the item requesting various policies and procedures into a bullet point list

○ Added a note clarifying that ORR will request foster parent documentation for foster homes that are visited during the site visit.

• Personnel File Checklist (Form M–10A)

○ Removed Training Directive per ORR Management section because it is no longer a requirement. This requirement was related to a specific webinar series on the topic of trauma-informed care. It was removed because it is duplicative of the requirements in the cooperative agreement that require

training on strength-based behavior management and trauma-informed care approaches.

◦ Annual Trainings—Removed ''Hover for additional comments'' and corresponding comment that read ''How does the employee confirm comprehension of a training? *i.e.* quiz/test score or signature confirming comprehension'' because respondents reported the comments were unhelpful.

◦ Trainings Every Two Years per Cooperative Agreement—

▪ Medication Management: Added ''must also receive medication administration training''

▪ Removed ''Hover for additional comments'' and corresponding comment that read ''How does the employee confirm comprehension of a training? *i.e.* quiz/test score or signature confirming comprehension'' because respondents reported the comments were unhelpful.

▪ Rephrased ''Strength-based behavior management . . .'' to ''Strength-based behavior management and trauma-informed care approaches'' to reflect current cooperative agreement requirements.

• Foster Parent Checklist (Form M–10D)

◦ Under General Documentation—Added requirement for monitors to check for completed foster home study assessments/inspections.

◦ General Documentation

▪ Foster Home License: Added ''(Effective: 2022; please reference the program-specific Cooperative Agreement)'' to clarify requirements in the current cooperative agreement.

▪ Added new item ''Completed Foster Home Study Assessments/Inspections (Effective: 2022; please reference the program-specific Cooperative Agreement)'' to align with requirements in the current cooperative agreement.

▪ Added new item ''Foster Parent Agreement (signed; Effective: 2022; please reference the program-specific Cooperative Agreement)'' to align with requirements in the current cooperative agreement.

◦ Pre-Service Trainings—ORR Standards to Prevent, Detect, and Respond to SA and SH involving unaccompanied children: Removed ''New employees must complete training before hire.'' to align with current guidance that allows hire (but no interaction with children) before training.

• Foster Parent Questionnaire (Form M–11O)

◦ Added instructions on the first page.

◦ Reordered some questions.

◦ Clarified that when asking the foster parent what information they received on the child, that ORR is asking about information on the child's individual services needs and provided examples (education, health, dietary, religious, etc.).

◦ Added example of independent living to question asking what types of activities the child participates in.

• Unaccompanied Child Questionnaire—Ages 6–12 Years Old (Form M–12As)—Updated Spanish translation to match currently-approved English version.

• Unaccompanied Child Questionnaire—Ages 13 and Older (Form M–12Bs)—Updated Spanish translation to match currently-approved English version.

ORR is requesting that the following instruments be removed from this information collection:

• Remote Monitoring Site Visit Guide (Form M–7B)—Remove from information collection. This instrument was created for use during the height of the COVID–19 pandemic. Monitors have resumed in-person site visits and the instrument is no longer needed.

• Long Term Foster Care Remote Site Visit Guide (Form M–7D)—Remove from information collection. This instrument was created for use during the height of the COVID–19 pandemic. Monitors have resumed in-person site visits and the instrument is no longer needed.

Voluntary Agency Site Visit Guide (Form M–7F)—Remove from information collection. This instrument is completed by less than 10 respondents and therefore not subject to PRA.

Revisions Approved Under Emergency Approval

Added Interpreter Questionnaire (Form M–11P), which is currently approved under OMB #0970–0558, to this information collection.

Quarterly Unlicensed Facility Site Visits

Added the following forms that were previously approved by OMB but were removed from the information collection due to the number of respondents. Differences between the previously approved versions and the current versions that will be used by contractor monitors are as noted below.

• Monitoring Notes (Form M–6A–UF)

◦ Directions added to top of form.

• UC Case File Checklist (Form M–8A–UF)

◦ Added a Read Me tab with directions.

◦ Added a summary tab that auto-sums data from other tabs.

◦ Revised the formatting of the UC Services tab.

• On Site Monitoring Checklist (M–9A–UF)

◦ Removed section on mosquito control. These inspections were originally established to address concerns with the Zika virus and are no longer performed.

◦ Under Documents that Should be Posted—Removed reference to two discontinued items.

◦ Under Other—Removed reference to mosquito repellant.

◦ Under Logs/Schedules—Removed reference to the discontinued UC Temperature Tracker.

Added the below-listed alternate versions of forms already approved under this information collection. Differences between the already approved versions and the alternate versions are as noted below. Unlicensed programs will continue to receive comprehensive biennial monitoring visits pursuant to UC Policy Guide section 5.5.1 during which the full original versions of these forms will be used. Quarterly monitoring visits will mainly focus on health and safety. To align with that purpose and help streamline forms that will be administered more often than their full version counterparts, adjustments made to the alternate versions removed some items related to program management. Other adjustments were made for clarity or to align with current ORR policy and procedures. Quarterly monitoring visits will continue to monitor the same areas related to child welfare practices and provision of services as biennial monitoring visits.

• Site Visit Guide (Form M–7A–UF)

◦ Under Child Protection—Added requirement for program to provide link to mandatory reporting laws/rules and specify who is classified as a mandatory reported in the State in which the program is located.

◦ Under Background Checks—Clarified that information on foster parents is also required.

◦ Removed reference to mosquito control inspections. These inspections were originally established to address concerns with the Zika virus and are no longer performed.

• Personnel File Checklist (Form M–10A–UF)

◦ Under General Documentation—Removed job description; employment application; personal and professional references; educational records; professional licensure; and I–9 documents.

• Program Director Questionnaire (Form M–11A–UF)

◦ Removed question on what changes the program director envisions for the program in the next year.

○ Modified the question on how the program incorporates input from others to assess the program to only ask about how input from minors and staff is used. Previously, the question asked how input from minors, staff, program partners, legal services providers, and sponsor is used.

• Clinician Questionnaire (Form M–11C–UF)

○ Removed question on what system the clinician uses to document clinical sessions.

○ Removed question asking clinician to describe their relationship with their supervisor.

• Case Manager Questionnaire (Form M–11E–UF)

○ Removed question asking case manager to describe their relationship with their supervisor.

• Education Staff Questionnaire (Form M–11G–UF)

○ No modifications made.

• Medical Coordinator Questionnaire (Form M–11I–UF)

○ Removed question asking medical coordinator to describe their relationship with their supervisor.

• Youth Care Worker Questionnaire (Form M–11J–UF)

○ Removed question on access to UC Portal.

○ Removed question on how often staff meetings are held.

○ Removed question asking youth care worker to describe their relationship with their supervisor.

• Prevention of Sexual Abuse Compliance Manager Staff Questionnaire (Form M–11K–UF)

○ No modifications made.

• Interpreter Questionnaire (Form M–11P–UF)

○ No modifications made.

• UC Questionnaire—Ages 6–12 Years Old (Forms M–12A–UF and M–12As–UF)

○ Under Communication with Family—Added question on how often and how long the child speaks with their family.

○ Removed placeholder sections on meetings with case management and clinical staff, which are not asked of children ages 6–12.

• UC Questionnaire—Ages 13 and Older (Forms M–12B–UF and M–12Bs–UF)

○ Under Admission/Orientation—Removed question asking what the child remembers about documents signed/received during the first couple days.

○ Under Communication with Family—Added question on how often and how long the child speaks with their family. Removed question on sending/receiving mail and email.

• UC Questionnaire—Ages 5 and Under (Form M–12E–UF and M–12Es–UF)

○ No modifications made.

• Legal Service Provider Questionnaire (Form M–13C–UF)

○ Reworded questions on ability to perform Know Your Rights and legal screenings.

○ Removed question on with which program staff members legal service providers regularly interact.

○ Removed questions method used to inform legal service providers of incidents affecting the child's legal case.

• Case Coordinator Questionnaire (Form M–13E–UF)

○ No modifications made.

For information about all currently approved forms under this OMB number, see: *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202108-0970-016.*

Respondents: ORR grantee and contractor staff; foster parents; and UC.

Annual Burden Estimates:

Note: These burden estimates include burden related to the revisions described above *and* currently approved forms for which we are not proposing any changes.

ESTIMATED BURDEN HOURS FOR RESPONDENTS

Information collection title	Annual number of respondents	Annual number of responses per respondent	Average burden hours per response	Annual total burden hours
Corrective Action Report (Form M–1)	262	0.4	5.00	524.00
FFS Compliance and Safety Site Visit Report (Form M–3A)	262	12.0	1.00	3,144.00
Out-of-Network Site Visit Report (Form M–3B)	24	5.0	1.00	120.00
Checklist for a Child-Friendly Environment (Form M–4)	262	12.0	0.25	786.00
Incident Reviews (Forms M–5A to M–5B)	262	0.3	1.50	117.90
Site Visit Guide (Forms M–7A)	114	1.0	13.00	1,482.00

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

National Vaccine Injury Compensation Program; List of Petitions Received

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: HRSA is publishing this notice of petitions received under the National Vaccine Injury Compensation Program (the Program), as required by the Public Health Service (PHS) Act, as amended. While the Secretary of HHS is named as the respondent in all proceedings brought by the filing of petitions for compensation under the Program, the United States Court of Federal Claims is charged by statute with responsibility for considering and acting upon the petitions.

FOR FURTHER INFORMATION CONTACT: For information about requirements for filing petitions, and the Program in general, contact Lisa L. Reyes, Clerk of Court, United States Court of Federal Claims, 717 Madison Place NW, Washington, DC 20005, (202) 357–6400. For information on HRSA's role in the Program, contact the Director, National Vaccine Injury Compensation Program, 5600 Fishers Lane, Room 08N146B, Rockville, Maryland 20857; (301) 443–6593, or visit our website at: *http://www.hrsa.gov/vaccinecompensation/index.html.*

SUPPLEMENTARY INFORMATION: The Program provides a system of no-fault compensation for certain individuals who have been injured by specified childhood vaccines. Subtitle 2 of Title XXI of the PHS Act, 42 U.S.C. 300aa–10 *et seq.,* provides that those seeking compensation are to file a petition with the United States Court of Federal Claims and to serve a copy of the petition to the Secretary of HHS, who is named as the respondent in each proceeding. The Secretary has delegated this responsibility under the Program to

HRSA. The Court is directed by statute to appoint special masters who take evidence, conduct hearings as appropriate, and make initial decisions as to eligibility for, and amount of, compensation.

A petition may be filed with respect to injuries, disabilities, illnesses, conditions, and deaths resulting from vaccines described in the Vaccine Injury Table (the Table) set forth at 42 CFR 100.3. This Table lists for each covered childhood vaccine the conditions that may lead to compensation and, for each condition, the time period for occurrence of the first symptom or manifestation of onset or of significant aggravation after vaccine administration. Compensation may also be awarded for conditions not listed in the Table and for conditions that are manifested outside the time periods specified in the Table, but only if the petitioner shows that the condition was caused by one of the listed vaccines.

Section 2112(b)(2) of the PHS Act, 42 U.S.C. 300aa–12(b)(2), requires that ''[w]ithin 30 days after the Secretary receives service of any petition filed under section 2111 the Secretary shall publish notice of such petition in the **Federal Register**.'' Set forth below is a list of petitions received by HRSA on April 1, 2023, through April 30, 2023. This list provides the name of the petitioner, city, and state of vaccination (if unknown then the city and state of the person or attorney filing the claim), and case number. In cases where the Court has redacted the name of a petitioner and/or the case number, the list reflects such redaction.

Section 2112(b)(2) also provides that the special master ''shall afford all interested persons an opportunity to submit relevant, written information'' relating to the following:

1. The existence of evidence ''that there is not a preponderance of the evidence that the illness, disability, injury, condition, or death described in the petition is due to factors unrelated to the administration of the vaccine described in the petition,'' and

2. Any allegation in a petition that the petitioner either:

a. ''[S]ustained, or had significantly aggravated, any illness, disability, injury, or condition not set forth in the Vaccine Injury Table but which was caused by'' one of the vaccines referred to in the Table, or

b. ''[S]ustained, or had significantly aggravated, any illness, disability, injury, or condition set forth in the Vaccine Injury Table the first symptom or manifestation of the onset or significant aggravation of which did not occur within the time period set forth in the Table but which was caused by a vaccine'' referred to in the Table.

In accordance with Section 2112(b)(2), all interested persons may submit written information relevant to the issues described above in the case of the petitions listed below. Any person choosing to do so should file an original and three (3) copies of the information with the Clerk of the United States Court of Federal Claims at the address listed above (under the heading **FOR FURTHER INFORMATION CONTACT**), with a copy to HRSA addressed to Director, Division of Injury Compensation Programs, Health Systems Bureau, 5600 Fishers Lane, 08N146B, Rockville, Maryland 20857. The Court's caption (*Petitioner's Name* v. *Secretary of HHS*) and the docket number assigned to the petition should be used as the caption for the written submission. Chapter 35 of title 44, United States Code, related to paperwork reduction, does not apply to information required for purposes of carrying out the Program.

Carole Johnson,

Administrator.

List of Petitions Filed

1. Rosemary Zummak, Boston, Massachusetts, Court of Federal Claims No: 23–0462V
2. John Staub on behalf of J.S., Blackwood, New Jersey, Court of Federal Claims No: 23–0463V

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Ryan White HIV/AIDS Program: Expenditures Forms, OMB No. 0915–xxxx—New

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than June 30, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting "Currently under Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Samantha Miller, the HRSA Information Collection Clearance Officer, at *paperwork@hrsa.gov* or call (301) 443–3983.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Ryan White HIV/AIDS Program: Expenditures Forms, OMB No. 0915–xxxx—New.

Abstract: HRSA administers the Ryan White HIV/AIDS Program (RWHAP) authorized under Title XXVI of the Public Health Service Act. The RWHAP Allocations and Expenditures Reports (A&E Reports) allow HRSA to monitor and track the use of grant funds for compliance with program and grants policies, and requirements as outlined in the legislation.

A&E Reports: Recipients funded under RWHAP Parts A, B, C, and D are

required to report financial data to HRSA at the beginning (Allocations Report) and at the end (Expenditures Report) of their grant budget period. The A&E Reports request information recipients already collect, including the use of RWHAP grant funds for core medical and support services; and on various program components, such as administration, planning and evaluation, and clinical quality management. RWHAP Parts A and B recipients funded under the Ending the HIV Epidemic in the U.S. (EHE) initiative are also required to report allocations and expenditures of the grant budget period in the EHE A&E Reports. This allows HRSA to track and report progress toward meeting the EHE goals.

The reports are similar in content; however, in the first report, recipients document the allocation of their RWHAP or EHE grant award at the beginning of their grant budget period. In the second report, recipients document actual expenditures of their RWHAP or EHE grant award (including any carryover dollars) at the end of their grant budget period.

HRSA is proposing the following updates to the RWHAP Expenditure Reports.

RWHAP Part A Expenditures Report:

- Revising row and column headers and other language for clarity and alignment with RWHAP requirements;
- Combining the columns for RWHAP Part A Formula and Supplemental Expenditure amounts and updating the title;
- Moving the Prior Fiscal Year (FY) Carryover column row after the Current FY column and updating the title;
- Moving the RWHAP Part A Minority AIDS Initiative (MAI) Award Amount row after the RWHAP Part A Supplemental Award Amount row;
- Re-ordering the MAI rows in the ''RWHAP Part A and MAI Service Category Expenditures'' table as follows: 3. RWHAP Part A Supplemental Award, 4. RWHAP Part A MAI Award Amount, 5. RWHAP Part A MAI Carryover Amount;
- Updating calculations and language in the Legislative Requirements Checklist; and
- Adding a requirement for Financial Officer/Designee to certify subrecipient aggregated administrative expenditures.

RWHAP Part B Expenditures Report:

- Revising rows and column headers and other language for clarity and alignment with RWHAP requirements;
- Adding the following rows to Table 1: 4b. RWHAP Part B HIV Care Consortia Planning & Evaluation and 4c. RWHAP Part B HIV Care Consortia Clinical Quality Management (CQM);
- Blacking out selected cells in the following rows, columns, or tables:

- Updating calculations and language in the Legislative Requirements Checklist;
- Removing Consortia Administration and Emerging Communities Administration from the Legislative Requirement from Legislative Requirement;
- Removing the following services under the Legislative Requirements Checklist's Core Medical Services:
  - Health Insurance Premium & Cost Sharing Assistance
  - Home and Community-based Health Services
- Adding requirement for a Financial Officer/Designee to certify subrecipient aggregated administrative expenditures; and
- Adding a row for the recipient to certify that administrative expenses for the RWHAP Part B does not exceed allowable cap.

RWHAP Part C Expenditures Report:

- There are no proposed changes to the RWHAP Part C Expenditures Report.

RWHAP Part D Expenditures Report:

- There are no proposed changes to the RWHAP Part D Expenditures Report.

EHE Expenditures Reports:

- There are no proposed changes to the EHE Expenditures Reports.

A 60-day notice published in the **Federal Register**, 88 FR pp. 14626–27 (March 9, 2023). There was one comment received. There are no changes made to the information collection since the comment received is outside the scope of this information request.

Need and Proposed Use of the Information: Accurate allocation, expenditure, and service contract records of the recipients receiving RWHAP and EHE funding are critical to the implementation of the RWHAP legislation and EHE initiative appropriation language and thus are necessary for HRSA to fulfill its monitoring and oversight responsibilities.

Likely Respondents: RWHAP Part A, Part B, Part C, Part D, and EHE recipients.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the

information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Part A Expenditures Report	52	1	52	4	208
Part B Expenditures Report	54	1	54	6	324
Part C Expenditures Report	346	1	346	4	1,384
Part D Expenditures Report	116	1	116	4	464
EHE Expenditures Report	47	1	47	4	188
Total	615		615		2,568

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Fiscal Year (FY) 2023 Notice of Supplemental Funding Opportunity

AGENCY: Substance Abuse and Mental Health Services Administration, Department of Health and Human Services (HHS).

ACTION: Notice of intent to award supplemental funding.

SUMMARY: This notice is to inform the public the Substance Abuse and Mental Health Services Administration (SAMHSA) is supporting a supplement (in scope of the parent award) for the grant recipient funded in FY 2020 under the Homeless and Housing Resource Center (HHRC) Notice of Funding Opportunity (NOFO) SM–20–009. The recipient may receive up to $498,500 in supplemental funds. The recipient has a project end date of August 30, 2024. The supplemental funding will be used to address substance use and/or mental disorders associated with service access and delivery and systems needs related to unsheltered and rural homelessness.

FOR FURTHER INFORMATION CONTACT: Michelle E. Daly, M.S.W., Lead Public Health Advisor, Substance Abuse and Mental Health Services Administration, 5600 Fishers Lane, Rockville, MD 20857, telephone 240–276–2789; email: *Michelle.Daly@samhsa.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Funding Opportunity Title: FY 2020 Homeless and Housing Resource Center (HHRC) Grant SM–20–009.

Assistance Listing Number: 93.243.

Authority: Section 520 of the Public Health Services Act as amended.

Justification: Eligibility for this supplemental funding is limited to Policy Research, Inc., which was funded in FY 2020 under the Homeless and Housing Resource Center (HHRC—SM–20–009) grant program. The recipient has special expertise in providing training and technical assistance to support federal, state, and local efforts on strategic planning, capacity development, financing, and delivering substance use and/or mental disorders evidence-based practices to improve systems coordination.

This is not a formal request for application. Assistance will only be provided to the HHRC grant recipient funded in FY 2020 based on the receipt of a satisfactory application and associated budget that is approved by a review group.

Dated: May 24, 2023.

Ann Ferrero,

Public Health Analyst.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4693–DR; Docket ID FEMA–2023–0001]

New Hampshire; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of New Hampshire (FEMA–4693–DR), dated March 15, 2023, and related determinations.

DATES: The declaration was issued March 15, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated March 15, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of New Hampshire resulting from a severe storm and flooding during the period of December 22 to December 25, 2022, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of New Hampshire.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, William F. Roy, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of New Hampshire have been designated as adversely affected by this major disaster:

Belknap, Carroll, Coos, and Grafton Counties for Public Assistance.

All areas within the State of New Hampshire are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Texas; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Texas (FEMA–4705–DR), dated April 21, 2023, and related determinations.

DATES: The declaration was issued April 21, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 21, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of Texas resulting from a severe winter storm during the period of January 30 to February 2, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Texas.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Gerard M. Stolar, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Texas have been designated as adversely affected by this major disaster:

Bastrop, Blanco, Burleson, Burnet, Hays, Henderson, Kendall, Lee, Leon, Milam, Robertson, Travis, and Williamson Counties for Public Assistance.

All areas within the State of Texas are eligible for assistance under the Hazard Mitigation Grant Program.

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4697–DR; Docket ID FEMA–2023–0001]

Mississippi; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Mississippi (FEMA–4697–DR), dated March 26, 2023, and related determinations.

DATES: The declaration was issued March 26, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated March 26, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in the State of Mississippi resulting from severe storms, straight-line winds, and tornadoes during the period of March 24 to March 25, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Mississippi.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and assistance for debris removal and emergency protective measures (Categories A and B), including direct Federal assistance, under the Public Assistance program in the designated areas, Hazard Mitigation throughout the State, and any other forms of assistance under the Stafford Act that you deem appropriate subject to completion of Preliminary Damage Assessments (PDAs).

Consistent with the requirement that Federal assistance is supplemental, any Federal funds provided under the Stafford Act for Public Assistance, Hazard Mitigation, and Other Needs Assistance under section 408 will be limited to 75 percent of the total eligible cost.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, John F. Boyle, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Mississippi have been designated as adversely affected by this major disaster:

Carroll, Humphreys, Monroe, and Sharkey Counties for Individual Assistance.

Carroll, Humphreys, Monroe, and Sharkey Counties for debris removal and emergency protective measures (Categories A and B), including direct federal assistance, under the Public Assistance program.

All areas within the State of Mississippi are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2023–0013; OMB No. 1660–0022]

Agency Information Collection Activities: Proposed Collection, Comment Request; Community Rating System—Application Letter & Quick Check; Community Annual Recertification; Environmental & Historic Preservation Certification; NFIP Repetitive Loss Update Form

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day notice of renewal and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on an extension, without change, of a currently approved information collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, this notice seeks comments concerning the application for the National Flood Insurance Program's (NFIP's) Community Rating System (CRS) program. This program allows communities to become eligible for discounts on the cost of flood insurance when the communities undertake activities to mitigate anticipated damage due to flooding. The application materials verify and document the community mitigation activities performed and provides FEMA with the information necessary to determine what flood insurance premium discounts are appropriate for participating communities.

DATES: Comments must be submitted on or before July 31, 2023.

ADDRESSES: To avoid duplicate submissions to the docket, please submit comments at *www.regulations.gov* under Docket ID FEMA–2023–0013. Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. Regardless of the method used to submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via a link on the homepage of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Bill Lesser, Program Specialist, Federal Insurance and Mitigation Administration, (202) 646–2807, *FEMA-CRS@fema.dhs.gov.* You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The National Flood Insurance Reform Act (NFIRA) of 1994 (Pub. L. 103–325, Sec. 541) requires that a community rating system be established. This ratings system is a voluntary program for communities, and it would provide a method by which flood mitigation activities engaged in by these communities could be measured. The effect of this mitigation activity would reduce the exposure of the communities to damage resulting from flooding and in turn reduce the losses incurred as a result of this flooding. To encourage participation, discounts on flood insurance are offered within communities that successfully complete qualified mitigation actions, and the community ratings system provides the ability to measure these actions and to recertify the communities in successive years.

Collection of Information

Title: Community Rating System (CRS) Program—Application Letter and CRS Quick Check, Community Annual Recertification, Environmental and Historic Preservation Certifications, and NFIP Repetitive Loss Update Form.

Type of Information Collection: Extension, without change, of a currently approved information collection.

OMB Number: 1600–0022.

FEMA Forms: FEMA Form FF–206–FY–23–100 (formerly 086–0–35), Community Rating System Application Letter and Quick Check; FEMA Form FF–206–FY–23–101 (formerly 086–0–35A), Community Annual Recertifications, FEMA Form FF–206–FY–23–102 (formerly 086–0–35B), Environmental and Historic Preservation Certifications, and FEMA Form FF–206–FY–23–103 (formerly 086–0–35C), NFIP Repetitive Loss Update Form.

Abstract: The Community Rating System (CRS) Application Letter & Quick Check, the CRS certification forms, and accompanying guidance are used by communities that participate in the National Flood Insurance Program's (NFIP) CRS program. The CRS is a voluntary program where flood insurance costs are reduced in communities that implement practices, such as building codes and public awareness activities, that are considered to reduce the risks of flooding and promote the purchase of flood insurance.

Affected Public: State, Local, or Tribal government.

Estimated Number of Respondents: 2,170.

Estimated Number of Responses: 4,170.

Estimated Total Annual Burden Hours: 52,292.

Estimated Total Annual Respondent Cost: $4,173,947.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $12,992,290.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Millicent Brown Wilson,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4706–DR; Docket ID FEMA–2023–0001]

Oklahoma; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Oklahoma (FEMA–4706–DR), dated April 24, 2023, and related determinations.

DATES: The declaration was issued April 24, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 24, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in the State of Oklahoma resulting from severe storms, straight-line winds, and tornadoes during the period of April 19 to April 20, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Oklahoma.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and assistance for debris removal and emergency protective measures (Categories A and B) under the Public Assistance program in the designated areas, Hazard Mitigation throughout the State, and any other forms of assistance under the Stafford Act that you deem appropriate subject to completion of Preliminary Damage Assessments (PDAs).

Consistent with the requirement that Federal assistance is supplemental, any Federal funds provided under the Stafford Act for Public Assistance, Hazard Mitigation, and Other Needs Assistance under section 408 will be limited to 75 percent of the total eligible cost.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Adam D. Burpee, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Oklahoma have been designated as adversely affected by this major disaster:

McClain and Pottawatomie Counties for Individual Assistance.

McClain and Pottawatomie Counties for debris removal and emergency protective measures (Categories A and B) under the Public Assistance program.

All areas within the State of Oklahoma are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

[Internal Agency Docket No. FEMA–4696–DR; Docket ID FEMA–2023–0001]

Maine; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Maine (FEMA–4696–DR), dated March 22, 2023, and related determinations.

DATES: The declaration was issued March 22, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated March 22, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of Maine resulting from a severe storm and flooding during the period of December 23 to December 24, 2022, is of sufficient severity and magnitude to warrant a major disaster declaration under

the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Maine.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, William F. Roy, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Maine have been designated as adversely affected by this major disaster:

Franklin, Knox, Oxford, Somerset, Waldo, and York Counties for Public Assistance.

All areas within the State of Maine are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4698–DR; Docket ID FEMA–2023–0001]

Arkansas; Amendment No. 2 to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster declaration for the State of Arkansas (FEMA–4698–DR), dated April 2, 2023, and related determinations.

DATES: This amendment was issued April 8, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 8, 2023, the President amended the cost-sharing arrangements regarding Federal funds provided under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), in a letter to Deanne Criswell, Administrator, Federal Emergency Management Agency, Department of Homeland Security, under Executive Order 12148, as follows:

I have determined that the damage in certain areas of the State of Arkansas resulting from severe storms and tornadoes on March 31, 2023, is of sufficient severity and magnitude that special cost sharing arrangements are warranted regarding Federal funds provided under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act'').

Therefore, I amend my declaration of April 2, 2023, to authorize Federal funds for debris removal and emergency protective measures, including direct Federal assistance at 100 percent of the total eligible costs for a continuous 30-day period of the State's choosing within the first 120 days of the incident period.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050 Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4702–DR; Docket ID FEMA–2023–0001]

Kentucky; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the Commonwealth of Kentucky (FEMA–4702–DR), dated April 10, 2023, and related determinations.

DATES: The declaration was issued April 10, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 10, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the Commonwealth of Kentucky resulting from severe storms, straight-line winds, tornadoes, flooding, landslides, and mudslides during the period of March 3 to March 4, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the Commonwealth of Kentucky.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the

Commonwealth. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Myra M. Shird, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the Commonwealth of Kentucky have been designated as adversely affected by this major disaster:

Adair, Allen, Anderson, Barren, Bourbon, Breckenridge, Bullitt, Butler, Caldwell, Calloway, Carlisle, Casey, Christian, Clark, Clay, Crittenden, Cumberland, Daviess, Edmonson, Estill, Floyd, Franklin, Gallatin, Garrard, Grant, Graves, Grayson, Green, Hancock, Hardin, Harrison, Hart, Henry, Hopkins, Hickman, Jackson, Jessamine, Johnson, LaRue, Laurel, Lee, Lincoln, Livingston, Logan, Lyon, Madison, Marion, Marshall, Martin, McCracken, McLean, Meade, Menifee, Metcalfe, Monroe, Muhlenberg, Nelson, Nicholas, Ohio, Owen, Owsley, Powell, Robertson, Rockcastle, Simpson, Spencer, Taylor, Todd, Trigg, Trimble, Union, Warren, Washington, Webster, Whitley, and Wolfe Counties for Public Assistance.

All areas within the Commonwealth of Kentucky are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

California; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of California (FEMA–4699–DR), dated April 3, 2023, and related determinations.

DATES: The declaration was issued April 3, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 3, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of California resulting from severe winter storms, straight-line winds, flooding, landslides, and mudslides beginning on February 21, 2023, and continuing, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of California.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance, Hazard Mitigation, and Other Needs Assistance under section 408 will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Andrew F. Grant, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of California have been designated as adversely affected by this major disaster:

Kern, Mariposa, Monterey, San Benito, Santa Cruz, Tulare, and Tuolumne Counties for Individual Assistance.

Calaveras, Los Angeles, Monterey, and Tulare Counties for Public Assistance.

All areas within the State of California are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Tennessee; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Tennessee (FEMA–4701–DR), dated April 7, 2023, and related determinations.

DATES: The declaration was issued April 7, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 7, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in the State of Tennessee resulting from severe storms, straight-line winds, and tornadoes during the period of March 31 to April 1, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Tennessee.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and assistance for debris removal and emergency protective measures (Categories A and B), including direct Federal assistance, under the Public Assistance program in the designated areas, Hazard Mitigation throughout the State, and any other forms of assistance under the Stafford Act that you deem appropriate subject to completion of Preliminary Damage Assessments (PDAs).

Consistent with the requirement that Federal assistance is supplemental, any Federal funds provided under the Stafford Act for Public Assistance, Hazard Mitigation, and Other Needs Assistance under section 408 will be limited to 75 percent of the total eligible cost.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Andrew D. Friend, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Tennessee have been designated as adversely affected by this major disaster:

Cannon, Hardeman, Hardin, Haywood, Lewis, Macon, McNairy, Rutherford, Tipton, and Wayne Counties for Individual Assistance.

Cannon, Hardeman, Hardin, Haywood, Lewis, Macon, McNairy, Rutherford, Tipton, and Wayne Counties for debris removal and emergency protective measures (Categories A and B), including direct federal assistance, under the Public Assistance program.

All areas within the State of Tennessee are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance— Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4700–DR; Docket ID FEMA–2023–0001]

Arkansas; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Arkansas

(FEMA–4700–DR), dated April 4, 2023, and related determinations.

DATES: The declaration was issued April 4, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 4, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of Arkansas resulting from a severe winter storm during the period of January 30 to February 2, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Arkansas.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Roland W. Jackson, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Arkansas have been designated as adversely affected by this major disaster:

Bradley, Calhoun, Cleveland, Dallas, Desha, Drew, Grant, Jefferson, Lincoln, Nevada, Ouachita, Searcy, and Stone Counties for Public Assistance.

All areas within the State of Arkansas are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Hoopa Valley Tribe; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the Hoopa Valley Tribe (FEMA–4707–DR), dated April 25, 2023, and related determinations.

DATES: The declaration was issued April 25, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 25, 2023 the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage to the lands associated with the Hoopa Valley Tribe resulting from severe winter storms and mudslides during the period of February 14 to March 5, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists for the Hoopa Valley Tribe.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance and Hazard Mitigation for the Hoopa Valley Tribe. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Benigno Bern Ruiz, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas have been designated as adversely affected by this major disaster:

The Hoopa Valley Tribe for Public Assistance.

The Hoopa Valley Tribe is eligible to apply for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Florida; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major

disaster for the State of Florida (FEMA–4709–DR), dated April 27, 2023, and related determinations.

DATES: The declaration was issued April 27, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 27, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of Florida resulting from severe storms, tornadoes, and flooding during the period of April 12 to April 14, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Florida.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance, Hazard Mitigation, and Other Needs Assistance under section 408 will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Brett H. Howard, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Florida have been designated as adversely affected by this major disaster:

Broward County for Individual Assistance.
Broward County for Public Assistance.

All areas within the State of Florida are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

[Internal Agency Docket No. FEMA–4708–DR; Docket ID FEMA–2023–0001]

Nevada; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Nevada (FEMA–4708–DR), dated April 27, 2023, and related determinations.

DATES: The declaration was issued April 27, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 27, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of Nevada resulting from severe winter storms, flooding, landslides, and mudslides during the period of March 8 to March 19, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Nevada.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Maona N. Ngwira, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Nevada have been designated as adversely affected by this major disaster:

Douglas, Eureka, Lincoln, Lyon, Mineral, and Storey Counties for Public Assistance.

All areas within the State of Nevada are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4697–DR; Docket ID FEMA–2023–0001]

Mississippi; Amendment No. 2 to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster declaration for the State of Mississippi (FEMA–4697–DR), dated March 26, 2023, and related determinations.

DATES: This amendment was issued March 31, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated March 31, 2023, the President amended the cost-sharing arrangements regarding Federal funds provided under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), in a letter to Deanne Criswell, Administrator, Federal Emergency Management Agency, Department of Homeland Security, under Executive Order 12148, as follows:

I have determined that the damage in certain areas of the State of Mississippi resulting from severe storms, straight-line winds, and tornadoes during the period of March 24 to March 25, 2023, is of sufficient severity and magnitude that special cost sharing arrangements are warranted regarding Federal funds provided under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act'').

Therefore, I amend my declaration of March 26, 2023, to authorize Federal funds for debris removal and emergency protective measures at 100 percent of the total eligible costs for a continuous 30-day period of the State's choosing within the first 120 days of the incident period.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050 Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Vermont; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Vermont (FEMA–4695–DR), dated March 20, 2023, and related determinations.

DATES: The declaration was issued March 20, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated March 20, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of Vermont resulting from a severe storm and flooding during the period of December 22 to December 24, 2022, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Vermont.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, William F. Roy, of FEMA is appointed to act as the Federal

Coordinating Officer for this major disaster.

The following areas of the State of Vermont have been designated as adversely affected by this major disaster:

Chittenden, Essex, Franklin, Grand Isle, Lamoille, Orange, Orleans, and Washington Counties for Public Assistance.

All areas within the State of Vermont are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4694–DR; Docket ID FEMA–2023–0001]

New York; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of New York (FEMA–4694–DR), dated March 15, 2023, and related determinations.

DATES: The declaration was issued March 15, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated March 15, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of New York resulting from a severe winter storm and snowstorm during the period of December 23 to December 28, 2022, is of sufficient severity and magnitude to warrant a major disaster

declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of New York.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance limited to Funeral Assistance under Other Needs Assistance and Public Assistance in the designated areas and Hazard Mitigation throughout the State. You are further authorized to provide snow assistance under the Public Assistance program for a limited period of time during or proximate to the incident period. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance, Hazard Mitigation, and Other Needs Assistance under section 408 will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Lai Sun Yee, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of New York have been designated as adversely affected by this major disaster:

Erie and Niagara Counties for Funeral Assistance under Other Needs Assistance.

Erie, Genesee, Niagara, St. Lawrence, and Suffolk Counties for Public Assistance.

Erie and Niagara Counties for snow assistance under the Public Assistance program for any continuous 48-hour period during or proximate to the incident period.

All areas within the State of New York are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance— Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Deanne Criswell,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4703–DR; Docket ID FEMA–2023–0001]

Navajo Nation; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the Navajo Nation (FEMA–4703–DR), dated April 11, 2023, and related determinations.

DATES: The declaration was issued April 11, 2023.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated April 11, 2023, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage to the lands associated with the Navajo Nation resulting from severe winter storms and flooding during the period of January 14 to January 17, 2023, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists for the Navajo Nation.

In order to provide federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance and Hazard Mitigation for the Navajo Nation. Consistent with the requirement that federal assistance be supplemental, any federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Benigno B. Ruiz, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas have been designated as adversely affected by this major disaster:

Navajo Nation for Public Assistance.

The Navajo Nation is eligible to apply for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance— Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Deanne Criswell,

Administrator, Federal Emergency Management Agency.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–HQ–IA–2023–0022; FXIA16710900000–234–FF09A30000]

Marine Mammal Protection Act; Receipt of Permit Application

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit application; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), invite the public to comment on an application to conduct certain activities with marine mammals for which the Service has jurisdiction under the Marine Mammal Protection Act (MMPA). With some exceptions, the MMPA prohibits activities with marine mammals unless Federal authorization is issued that allows such activities. The MMPA also

requires that we invite public comment before issuing permits for any activity that is otherwise prohibited with respect to any marine mammal.

DATES: We must receive comments by June 30, 2023.

ADDRESSES:

Obtaining Documents: The application, application supporting materials, and any comments and other materials that we receive will be available for public inspection at *https://www.regulations.gov* in Docket No. FWS–HQ–IA–2023–0022.

Submitting Comments: You may submit comments by one of the following methods:

- *Internet: https://www.regulations.gov.* Search for and submit comments on Docket No. FWS–HQ–IA–2023–0022.
- *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS–HQ–IA–2023–0022; U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike; Falls Church, VA 22041–3803.

For more information, see Public Comment Procedures under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Brenda Tapia, by phone at 703–358–2185 or via email at *DMAFR@fws.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

A. How do I comment on submitted applications?

We invite the public and local, State, Tribal, and Federal agencies to comment on this application. Before issuing any requested permit, we will take into consideration any information that we receive during the public comment period.

You may submit your comments and materials by one of the methods in **ADDRESSES**. We will not consider comments sent by email, or to an address not in **ADDRESSES**. We will not consider or include in our administrative record comments we receive after the close of the comment period (see **DATES**).

When submitting comments, please specify the name of the applicant and the permit number at the beginning of your comment. Provide sufficient information to allow us to authenticate any scientific or commercial data you include. The comments and recommendations that will be most useful and likely to influence agency decisions are: (1) Those supported by quantitative information or studies; and (2) those that include citations to, and analyses of, the applicable laws and regulations.

B. May I review comments submitted by others?

You may view and comment on others' public comments at *https://www.regulations.gov* unless our allowing so would violate the Privacy Act (5 U.S.C. 552a) or Freedom of Information Act (5 U.S.C. 552).

C. Who will see my comments?

If you submit a comment at *https://www.regulations.gov,* your entire comment, including any personal identifying information, will be posted on the website. If you submit a hardcopy comment that includes personal identifying information, such as your address, phone number, or email address, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

II. Background

To help us carry out our conservation responsibilities for affected species, and in consideration of section 104(c) of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), we invite public comments on permit applications before final action is taken. With some exceptions, the MMPA prohibits certain activities with marine mammals unless Federal authorization is issued that allows such activities. Service regulations regarding permits for any activity otherwise prohibited by the MMPA with respect to any foreign or native marine mammal species are available in title 50 of the Code of Federal Regulations in part 18.

Concurrent with publishing this notice in the **Federal Register**, we are forwarding copies of this marine mammal application to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

III. Permit Application

We invite comments on the following application.

Applicant: U.S. Fish and Wildlife Service, Alaska Marine Mammals Management Office, Anchorage, AK; Permit No. 041309

The applicant requests a renewal and amendment of their permit to capture, re-capture, release, collect carcasses of, import or export parts of, hold, anesthetize, flipper tag, PIT tag, collect samples of, transport, use radio transmitter for location of, use time-depth recorders for study of, use LX2 and TDR transmitters for study of, conduct benthic surveys of using CTD and underwater cameras, deploy passive acoustic monitors for study of, and conduct ensonification studies of up to 200 northern sea otters (*Enhydra lutris kenyoni*) annually, for the purpose of scientific research. This notification covers activities to be conducted by the applicant over a 5-year period.

IV. Next Steps

After the comment period closes, we will make decisions regarding permit issuance. If we issue permits to any of the applicants listed in this notice, we will publish a notice in the **Federal Register**. You may locate the notice announcing the permit issuance by searching *https://www.regulations.gov* for the permit number listed above in this document. For example, to find information about the potential issuance of Permit No. 12345A, you would go to *https://www.regulations.gov* and search for ''12345A''.

V. Authority

We issue this notice under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and its implementing regulations.

Brenda Tapia,

Supervisory Program Analyst/Data Administrator, Branch of Permits, Division of Management Authority.

[FR Doc. 2023–11448 Filed 5–30–23; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[234A2100DD/AAKC001030/A0A501010.999900; OMB Control Number 1076–0122]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Data Elements for Bureau-Funded Schools

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the Bureau of Indian Education (BIE) are proposing to renew an information collection with revisions.

DATES: Interested persons are invited to submit comments on or before June 30, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection request (ICR) should be sent within 30 days of publication of this notice to the Office of Information and Regulatory Affairs (OIRA) through *https://www.reginfo.gov/public/do/PRA/icrPublicCommentRequest?ref_nbr=202301-1076-001* or by visiting *https://www.reginfo.gov/public/do/PRAMain* and selecting ''Currently under Review—Open for Public Comments'' and then scrolling down to the ''Department of the Interior.''

FOR FURTHER INFORMATION CONTACT: Steven Mullen, Information Collection Clearance Officer, by email at *comments@bia.gov* or telephone at (202) 924–2650. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. You may also view the ICR at *https://www.reginfo.gov/public/Forward?SearchTarget=PRA&textfield=1076-0122.*

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (PRA, 44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on March 2, 2023 (88 FR 13145). BIE received one comment.

Comment: Commentor opposes the BIE proposal for a referral intake form to facilitate virtual counseling and crisis services and believes the new form would place undue burden on schools, especially those without a counselor on staff.

Agency Response to Comment: BIE wholeheartedly appreciates schools are limited in both capacity and resources. To clarify, BIE's program seeks to connect schools to federally-funded virtual counseling and crisis services. The proposed action would not create a regulatory requirement for schools to provide counseling services; and it would not require Tribal schools/organizations to have a counselor on staff. BIE's Behavioral Health and Wellness Program (BHWP) is an optional resource for students and staff at all Bureau-funded programs, departments, and institutions—including Bureau operated schools, Tribally controlled schools, post-secondary institutions, and Tribal colleges and universities. The purpose of the referral intake form is to collect information necessary to facilitate virtual counseling and crisis services.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

OMB Control Number 1076–0122

Abstract: The Secretary of the Interior, through the Bureau of Indian Education (BIE), is required by the Snyder Act (25 U.S.C. 13), Indian Self-Determination and Education Assistance Act of 1975 (25 U.S.C. 5301), Education Amendments of 1978 (25 U.S.C. 2001), Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (20 U.S.C. 6301 *et seq.*), and Every Student Succeeds Act (20 U.S.C. 6301) to provide educational services to federally recognized Indians and Alaska Natives. In addition, 25 CFR 43, Maintenance and Control of Student Records in Bureau Schools, contain regulations governing the maintenance, control, and accessibility of student records.

BIE's Student Enrollment Application is utilized by schools operated or funded by BIE. The information is collected by school registrars to determine the student's eligibility for enrollment in a bureau-operated school, and if eligible, is shared with appropriate school officials to identify the student's base and supplemental educational and/or residential program needs. The information is compiled into a national database by the Bureau of Indian Education to facilitate budget requests and the allocation of congressionally appropriated funds.

BIE's Behavioral Health and Wellness Program (BHWP) is focused on providing indigenous focused, evidence-based, and trauma-informed behavioral health and wellness services/resources for students and staff at all Bureau-funded programs, departments, and institutions including Bureau operated schools, Tribally controlled schools, post-secondary institutions, and Tribal colleges and universities.

Proposed Revisions

BIE proposes a referral intake form to facilitate federally-funded virtual counseling and crisis services. All data collected for the BHWP will only be utilized for establishing the appropriate level of care, assessing client safety, ensuring services are individualized to meet the client's specific needs, and providing clients with external referrals,

as needed. The BHWP counseling and crisis services are optional—BIE regulations do not require a school to participate in the BHWP.

Title of Collection: Data Elements for Bureau-Funded Schools.

OMB Control Number: 1076–0122.

Form Number: None.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: Individuals, Contract and Grant schools, and Bureau-funded schools.

Total Estimated Number of Annual Respondents: 49,000 per year, on average.

Total Estimated Number of Annual Responses: 49,000 per year, on average.

Estimated Completion Time per Response: 15 to 30 minutes.

Total Estimated Number of Annual Burden Hours: 12,500 hours.

Frequency of Collection: Occasionally, required to obtain a benefit.

Total Estimated Annual Nonhour Burden Cost: $0.

Authority

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Steven Mullen,

Information Collection Clearance Officer, Office of Regulatory Affairs and Collaborative Action—Indian Affairs.

Receipt of Documented Petition for Federal Acknowledgment as an American Indian Tribe

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Department of the Interior (Department) gives notice that the group known as the Butte Tribe of Bayou Bourbeaux has filed a documented petition for Federal acknowledgment as an American Indian Tribe with the Assistant Secretary—Indian Affairs. The Department seeks comment and evidence from the public on the petition.

DATES: Comments and evidence must be postmarked by September 28, 2023.

ADDRESSES: Copies of the narrative portion of the documented petition, as submitted by the petitioner (with any redactions appropriate under 25 CFR 83.21(b)), and other information are available at OFA's website: *www.bia.gov/as-ia/ofa.* Submit any comments or evidence to: Department of the Interior, Office of the Assistant Secretary—Indian Affairs, Attention: Office of Federal Acknowledgment, Mail Stop 4071 MIB, 1849 C Street NW, Washington, DC 20240, or by email to: *lee.fleming@bia.gov.*

FOR FURTHER INFORMATION CONTACT: Mr. R. Lee Fleming, OFA Director, Office of the Assistant Secretary—Indian Affairs, Department of the Interior, telephone: (202) 513–7650.

SUPPLEMENTARY INFORMATION: On July 31, 2015, the Department's revisions to 25 CFR part 83 became final and effective (80 FR 37861). A key goal of the revisions was to improve transparency through increased notice of petitions and providing improved public access to petitions. Today the Department informs the public that a complete documented petition has been submitted under the current regulations, that portions of that petition are publicly available on the website identified above for easy access, and that we are seeking public comment early in the process on this petition.

Under 25 CFR 83.22(b)(1), OFA publishes notice that the following group has filed a documented petition for Federal acknowledgment as an American Indian Tribe to the Assistant Secretary—Indian Affairs: Butte Tribe of Bayou Bourbeaux c/o Mr. Rodger Collum, 1458 Highway 1226, Natchitoches, Louisiana 71457.

Also, under 25 CFR 83.22(b)(1), OFA publishes on its website the following:

i. The narrative portion of the documented petition, as submitted by the petitioner (with any redactions appropriate under 25 CFR 83.21(b));

ii. The name, location, and mailing address of the petitioner and other information to identify the entity;

iii. The date of receipt;

iv. The opportunity for individuals and entities to submit comments and evidence supporting or opposing the petitioner's request for acknowledgment within 120 days of the date of the website posting; and

v. The opportunity for individuals and entities to request to be kept informed of general actions regarding a specific petitioner.

The Department publishes this notice and request for comment in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Bryan Newland,

Assistant Secretary—Indian Affairs.

HEARTH Act Approval of Pueblo of Santa Clara, New Mexico Business and Residential Leasing Ordinance

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Indian Affairs (BIA) approved the Pueblo of Santa Clara's Leasing Ordinance under the Helping Expedite and Advance Responsible Tribal Homeownership Act of 2012 (HEARTH Act). With this approval, the Tribe is authorized to enter into business and residential leases without further BIA approval.

DATES: BIA issued the approval on May 24, 2023.

FOR FURTHER INFORMATION CONTACT: Ms. Carla Clark, Bureau of Indian Affairs, Division of Real Estate Services, 1001 Indian School Road NW, Albuquerque, NM 87104, *carla.clark@bia.gov,* (702) 484–3233.

SUPPLEMENTARY INFORMATION:

I. Summary of the HEARTH Act

The HEARTH Act makes a voluntary, alternative land leasing process available to Tribes, by amending the Indian Long-Term Leasing Act of 1955, 25 U.S.C. 415. The HEARTH Act authorizes Tribes to negotiate and enter into business leases of Tribal trust lands with a primary term of 25 years, and up to two renewal terms of 25 years each, without the approval of the Secretary of the Interior (Secretary). The HEARTH Act also authorizes Tribes to enter into leases for residential, recreational, religious or educational purposes for a primary term of up to 75 years without the approval of the Secretary. Participating Tribes develop Tribal Leasing regulations, including an environmental review process, and then must obtain the Secretary's approval of those regulations prior to entering into leases. The HEARTH Act requires the Secretary to approve Tribal regulations if the Tribal regulations are consistent with the Department of the Interior's (Department) leasing regulations at 25

CFR part 162 and provide for an environmental review process that meets requirements set forth in the HEARTH Act. This notice announces that the Secretary, through the Assistant Secretary—Indian Affairs, has approved the Tribal regulations for the Pueblo of Santa Clara, New Mexico.

II. Federal Preemption of State and Local Taxes

The Department's regulations governing the surface leasing of trust and restricted Indian lands specify that, subject to applicable Federal law, permanent improvements on leased land, leasehold or possessory interests, and activities under the lease are not subject to State and local taxation and may be subject to taxation by the Indian Tribe with jurisdiction. See 25 CFR 162.017. As explained further in the preamble to the final regulations, the Federal government has a strong interest in promoting economic development, self-determination, and Tribal sovereignty. 77 FR 72440, 72447–48 (December 5, 2012). The principles supporting the Federal preemption of State law in the field of Indian leasing and the taxation of lease-related interests and activities applies with equal force to leases entered into under Tribal leasing regulations approved by the Federal government pursuant to the HEARTH Act.

Section 5 of the Indian Reorganization Act, 25 U.S.C. 5108, preempts State and local taxation of permanent improvements on trust land. *Confederated Tribes of the Chehalis Reservation* v. *Thurston County,* 724 F.3d 1153, 1157 (9th Cir. 2013) (citing *Mescalero Apache Tribe* v. *Jones,* 411 U.S. 145 (1973)). Similarly, section 5108 preempts State taxation of rent payments by a lessee for leased trust lands, because ''tax on the payment of rent is indistinguishable from an impermissible tax on the land.'' *See Seminole Tribe of Florida* v. *Stranburg,* 799 F.3d 1324, 1331, n.8 (11th Cir. 2015). In addition, as explained in the preamble to the revised leasing regulations at 25 CFR part 162, Federal courts have applied a balancing test to determine whether State and local taxation of non-Indians on the reservation is preempted. *White Mountain Apache Tribe* v. *Bracker,* 448 U.S. 136, 143 (1980). The *Bracker* balancing test, which is conducted against a backdrop of ''traditional notions of Indian self-government,'' requires a particularized examination of the relevant State, Federal, and Tribal interests. We hereby adopt the *Bracker* analysis from the preamble to the surface leasing regulations, 77 FR at 72447–48, as supplemented by the analysis below.

The strong Federal and Tribal interests against State and local taxation of improvements, leaseholds, and activities on land leased under the Department's leasing regulations apply equally to improvements, leaseholds, and activities on land leased pursuant to Tribal leasing regulations approved under the HEARTH Act. Congress's overarching intent was to ''allow Tribes to exercise greater control over their own land, support self-determination, and eliminate bureaucratic delays that stand in the way of homeownership and economic development in Tribal communities.'' 158 Cong. Rec. H. 2682 (May 15, 2012). The HEARTH Act was intended to afford Tribes ''flexibility to adapt lease terms to suit [their] business and cultural needs'' and to ''enable [Tribes] to approve leases quickly and efficiently.'' H. Rep. 112–427 at 6 (2012).

Assessment of State and local taxes would obstruct these express Federal policies supporting Tribal economic development and self-determination, and also threaten substantial Tribal interests in effective Tribal government, economic self-sufficiency, and territorial autonomy. *See Michigan* v. *Bay Mills Indian Community,* 572 U.S. 782, 810 (2014) (Sotomayor, J., concurring) (determining that ''[a] key goal of the Federal Government is to render Tribes more self-sufficient, and better positioned to fund their own sovereign functions, rather than relying on Federal funding''). The additional costs of State and local taxation have a chilling effect on potential lessees, as well as on a Tribe that, as a result, might refrain from exercising its own sovereign right to impose a Tribal tax to support its infrastructure needs. *See id.* at 810–11 (finding that State and local taxes greatly discourage Tribes from raising tax revenue from the same sources because the imposition of double taxation would impede Tribal economic growth).

Similar to BIA's surface leasing regulations, Tribal regulations under the HEARTH Act pervasively cover all aspects of leasing. *See* 25 U.S.C. 415(h)(3)(B)(i) (requiring Tribal regulations be consistent with BIA surface leasing regulations). Furthermore, the Federal government remains involved in the Tribal land leasing process by approving the Tribal leasing regulations in the first instance and providing technical assistance, upon request by a Tribe, for the development of an environmental review process. The Secretary also retains authority to take any necessary actions to remedy violations of a lease or of the Tribal regulations, including terminating the lease or rescinding approval of the Tribal regulations and reassuming lease approval responsibilities. Moreover, the Secretary continues to review, approve, and monitor individual Indian land leases and other types of leases not covered under the Tribal regulations according to the Part 162 regulations.

Accordingly, the Federal and Tribal interests weigh heavily in favor of preemption of State and local taxes on lease-related activities and interests, regardless of whether the lease is governed by Tribal leasing regulations or Part 162. Improvements, activities, and leasehold or possessory interests may be subject to taxation by the Pueblo of Santa Clara, New Mexico.

Bryan Newland,

Assistant Secretary—Indian Affairs.

BILLING CODE 4337–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[RR04311000; 23XR0680A3; RX.01633F04.0020000]

Notice of Intent To Prepare an Environmental Impact Statement on the Middle Rio Grande Lower San Acacia Reach

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of intent; request for comments

SUMMARY: The Bureau of Reclamation (Reclamation) intends to prepare an environmental impact statement (EIS) on the Lower San Acacia Reach of the Middle Rio Grande. The project's goals are to increase water delivered to Elephant Butte Reservoir (EBR), maintain and enhance ecosystem health (such as protecting and promoting recovery of endangered species, minimizing river drying, and increasing available habitat), and increase the benefits of system maintenance actions by working with geomorphic trends of the river. Reclamation is seeking suggestions and information on the alternatives and topics to be addressed.

DATES: Submit written comments on the scope of the EIS on or before June 30, 2023.

Reclamation will hold three in-person public scoping meetings on the following dates:

1. June 20, 2023, 5 p.m. to 7 p.m. (MDT), Albuquerque, New Mexico.

2. June 21, 2023, 6 p.m. to 8 p.m. (MDT), Socorro, New Mexico.

3. June 22, 2023, 6 p.m. to 8 p.m., (MDT), Truth or Consequences, New Mexico.

ADDRESSES: Send written scoping comments, requests to be added to the project mailing list, or requests for other special assistance needs via email to *bor-sha-aao-lsari@usbr.gov.*

The meetings will be held at the following locations:

1. Albuquerque—International District Library, 7601 Central Ave., Albuquerque, New Mexico 87108.

2. Socorro—New Mexico Institute of Mining and Technology Macey Center, Upper Lobby, 909 Olive Lane, Socorro, New Mexico 87801.

3. Truth or Consequences—Sierra County Fairgrounds, Albert J. Lyon Event Center, 2953 S Broadway Street, Truth or Consequences, New Mexico 87901.

To view more information regarding this project, go to *https://www.virtualpublicmeeting.com/mrg-lsari-eis.*

FOR FURTHER INFORMATION CONTACT: Ashlee Rudolph, Bureau of Reclamation, Albuquerque Area Office, 555 Broadway Blvd. NE, Suite 100, Albuquerque, New Mexico 87102–2352; telephone (505) 462–3631; email *bor-sha-aao-lsari@usbr.gov.*

Individuals who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services to contact the above individual during normal business hours or to leave a message or question after hours. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: This **Federal Register** notice provides the public with information regarding Reclamation's intent to prepare an EIS pursuant to the National Environmental Policy Act (NEPA) of 1969, as amended. Reclamation will hold public scoping meetings to solicit comments on the scope of the EIS and the issues and alternatives that should be analyzed.

Purpose and Need

Reclamation is authorized to conduct work within the channel and floodplain of the Rio Grande under the Federal Flood Control Acts of 1948 and 1950 (Pub. L. 858 and 516, respectively). Reclamation is also authorized to engage in planning for major rehabilitation and replacement of existing assets under the Reclamation Project Act of 1902 (32 Stat. 388) and supplementary acts; the Water Resources Development Act of 2007, Section 2031 (Pub. L. 110–114); the Omnibus Public Land Management Act of 2009 (Pub. L. 111–11), Title IX, Subtitle G; the Water Resources Planning Act of 1965, as amended (42 U.S.C. 1962a–2); and Department of the Interior Manual Part 707 DM 1.

The US Army Corps of Engineers, Bureau of Indian Affairs, U.S. Fish and Wildlife Service, Bureau of Land Management, Middle Rio Grande Conservancy District, and New Mexico Interstate Stream Commission will be invited to participate as cooperating agencies for the EIS. Other entities will be considered, as necessary, during the EIS process. Reclamation is considering realigning a portion of the Rio Grande from approximately river mile (RM) 74 to RM 54.5 (project, proposed action); this area is part of the Lower San Acacia Reach. Reclamation is the project proponent.

Reclamation and fellow agencies manage the flow of water, transport and deposition of sediment, and environmental resources within the highly dynamic Rio Grande watershed. Reclamation's responsibilities include maintaining the river channel for downstream sediment and water conveyance, maintaining and enhancing ecosystem health, and increasing the benefits of system maintenance actions. At times, these needs conflict with each other. The need to convey water can be at odds with overbank flooding for species' needs and riparian health. The deposition of heavy sediment loads carried by the river, a natural geomorphic process, impedes delivering flows to the EBR and increases maintenance costs. Therefore, maintenance of this system requires understanding and accepting the trade-offs associated with these diverse and often competing needs. Trade-offs associated with the proposed action or alternative actions are to be documented for Reclamation's consideration.

Reclamation and stakeholders identified the need for this project during focused workshops and a value planning study. Most issues during the workshops and value planning study identified sediment imbalance as their root cause which can be linked to agency needs and management practices being at odds with geomorphic trends. Key issues to be addressed by this project are conveyance losses, cost of maintenance on a system with limited benefit, declining of ecosystem health, channel perching, and aging Low Flow Conveyance Channel (LFCC) infrastructure.

The purpose of the proposed action is to deliver water to EBR; maintain and enhance ecosystem health (*i.e.,* protecting and promoting recovery of endangered species, minimizing river drying, increasing available habitat, conserving ecosystem functions), which will help meet requirements under the 2016 Middle Rio Grande Biological Opinion; and increase the benefit-to-cost ratio of system maintenance actions.

Proposed Action and Possible Alternatives

Reclamation intends to realign a portion of the Rio Grande to the west of the existing channel between RM 74 and RM 54.5. Channel realignment will likely consist of multiple segments; it may not include the full distance between RM 74 and RM 54.5. Reclamation is currently considering two preliminary engineering alternatives and the no-action alternative. Reclamation will identify a preferred alternative before a final EIS. The following alternatives are preliminary and may be revised based on public input and internal considerations. The no-action alternative is currently considered Alternative A, where the existing channel between RM 74 and RM 54.5 would remain as-is.

Preliminary Alternative B would involve the construction of a single channel downstream of Bosque del Apache National Wildlife Refuge. A single channel is defined as merging the LFCC with the active river channel. Additional features may include a channel conveying inflow from Elmendorf Drain above RM 69 and secondary high-flow channels, where they are needed. The expected benefits of preliminary Alternative B are improved water delivery and sediment transport by eliminating channel perching, reduced channel incision to allow for improved low-velocity habitat for the Rio Grande silvery minnow (*Hybognathus amarus*), maintaining or promoting riparian habitat suitable for the southwestern willow flycatcher (*Empidonax traillii extimus*), and creating more effective operation and maintenance activities by focusing maintenance on a single primary channel with no levees or structures that would need to be protected from the river. Preliminary Alternative B is anticipated to reduce evaporative losses associated with the current LFCC and ponded water between RM 61 and RM 60.

Preliminary Alternative C would involve constructing a two-channel system above RM 64 and rerouting the LFCC between RM 68 and RM 64. Like preliminary Alternative B, the active river channel would be realigned to the

west; however, the realignment would start farther downstream and would not intersect the LFCC. The expected benefits of preliminary Alternative C are improved water delivery and sediment transport by eliminating channel perching, increased conveyance within the LFCC, reduced channel incision to allow for improved low-velocity habitat for the Rio Grande silvery minnow, improved management of available southwestern willow flycatcher habitat, and a potential to reduce maintenance activities associated with sediment deposition within the river channel. It is anticipated that preliminary Alternative C would also reduce evaporative losses associated with the current LFCC and ponded water between RM 61 and RM 60.

Project Area (Area of Analysis)

The project area is the Lower San Acacia Reach of the Middle Rio Grande in Socorro County, New Mexico. This EIS focus is between the southern boundary of the Bosque del Apache National Wildlife Refuge at RM 74 (upstream end) to the Silver Canyon and LFCC confluence with the Rio Grande at RM 54.5 (downstream end).

Statutory Authority and Anticipated Permits

NEPA [42 U.S.C. 4321 *et seq.*] requires Federal agencies to conduct an environmental analysis of their proposed actions to determine whether the actions may significantly affect the human environment. The EIS will analyze the environmental effects of implementing the proposed action and alternatives. In addition to NEPA, various other Federal, state, and local authorizations may be required for the proposed action. Applicable Federal laws include, but are not limited to, the Endangered Species Act, National Historic Preservation Act, and Clean Water Act.

Schedule for the Decision-Making Process

Reclamation will review and consider comments received during scoping and will prepare a scoping report. After the draft EIS is completed, Reclamation will publish a notice of availability and request public comments on the draft EIS. After the public comment period ends, Reclamation will then develop the final EIS; Reclamation anticipates making the final EIS available to the public in late 2024. In accordance with 40 CFR 1506.11, Reclamation will not decide or issue a Record of Decision sooner than 30 days after the final EIS is released. Reclamation anticipates the issuance of a Record of Decision by March 2025.

Public Disclosure

Before including your address, phone number, email address, or other personal, identifying information in your comment submission, please be advised that the entire submission, including your personal identifying information, may be made publicly available at any time. While a commenter may request that Reclamation withhold personal identifying information from public review, Reclamation cannot guarantee that it will be able to do so.

How To Request Reasonable Accommodation

For special assistance at one of the scoping meetings, please contact Ashlee Rudoph (see **FOR FURTHER INFORMATION CONTACT** section of this notice) or TDD information in the same section, at least 5 working days before the meetings. Information regarding this project is available in alternate formats upon request.

Wayne Pullan,

Regional Director, Upper Colorado Region, Bureau of Reclamation.

BILLING CODE 4332–90–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1364]

Certain Blood Flow Restriction Devices With Rotatable Windlasses and Components Thereof; Institution of Investigation

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on April 24, 2023, under section 337 of the Tariff Act of 1930, as amended, on behalf of Composite Resources, Inc. of Rock Hill, South Carolina and North American Rescue, LLC of Greer, South Carolina. Supplements were filed on April 27, 2023, May 11, 2023, and May 18, 2023. The complaint, as supplemented, alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain blood flow restriction devices with rotatable windlasses and components thereof by reason of the infringement of: certain claims of U.S. Patent No. 7,842,067 (''the '067 patent''); U.S. Patent No. 8,888,807 (''the '807 patent''); and U.S. Patent No. 10,016,203 (''the '203 patent''); and; U.S. Trademark Registration No. 3,863,064 (''the '064 mark'') and U.S. Trademark Registration No. 5,046,378 (''the '378 mark''). The complaint further alleges that an industry in the United States exists as required by the applicable Federal Statute. The complaint also alleges violations of section 337 based upon the importation into the United States, or in the sale of certain blood flow restriction devices with rotatable windlasses by reason of trade dress infringement, the threat or effect of which is to destroy or substantially injure an industry in the United States.

The complainants request that the Commission institute an investigation and, after the investigation, issue a general exclusion order, or in the alternative a limited exclusion order, and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: Pathenia M. Proctor, The Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–2560.

SUPPLEMENTARY INFORMATION:

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2023).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on May 24, 2023, *Ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended,

(a) an investigation be instituted to determine whether there is a violation of subsection (a)(1)(A) of section 337 in

the importation or sale of certain products identified in paragraph (2) by reason of trade dress infringement, the threat or effect of which is to destroy or substantially injure an industry in the United States;

(b) an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain products identified in paragraph (2) by reason of infringement of one or more of claims 1–17 of the '067 patent; claims 1–30 of the '807 patent; and claims 1–13 of the '203 patent, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(c) an investigation be instituted to determine whether there is a violation of subsection (a)(1)(C) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain products identified in paragraph (2) by reason of infringement of the '064 mark and the '378 mark, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) Pursuant to section 210.10(b)(1) of the Commission's Rules of Practice and Procedure, 19 CFR 210.10(b)(1), the plain language description of the accused products or category of accused products, which defines the scope of the investigation, is ''single-handed combat tourniquets with rotatable windlasses that can be applied and tightened by a user to reduce blood loss from an arm or leg'';

(3) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainants are:

Composite Resources, Inc., 483 Lakeshore Pkwy, Rock Hill, SC 29730

North American Rescue, LLC, 35 Tedwall Ct., Greer, SC 29650

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Anping Longji Medical Equipment Factory, No. 8, Suxin Road, Nansu Village, Anping, County, Hengshui City, Hebei Province, China

Chaozhou Jiduo Trading Co., Ltd., Shop No. 35, No. 2 Comm., Xianhe Vil., Phixi, Town, Xiangqiao District, Chaozhou City 521000, China

Dongguan Hongsui Electronic Commerce, Co., Ltd., No. 7, Lane 6, Orchard, Houjie, Dongguan City, Houjie Town, Guangdong Province, 523000, China

SZY Holdings LLC, 300 Liberty Avenue, Brooklyn, NY 11207

Wuxi Emsrun Technology Co., Ltd., No. 100 Fengbin Road, Wuxi City, Jiangsu Province, China

Wuxi Golden Hour Medical Technology Co., Ltd., Room 101–103/105, Building 1, 58, Xiuxi Road, Binhu District, Wuxi City, Jiangsu Province 214000, China,

Wuxi Puneda Technology Co., Ltd., 306–3 Quanfeng Road, Wuxi, 214037, China

Xia Guo Long, Room 316, Fuwei Building, Hongtu Road, Dongguan City, Nancheng District, Guangdong Province, 523000, China

Yinping Yin, No. 6003 Binhe Haibin Square Garden, Mango Web Co, Shenzhen, Guangdong, 518003, China

(c) The Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street SW, Suite 401, Washington, DC 20436; and

(4) For the investigation so instituted, the Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(e) and 210.13(a), as amended in 85 FR 15798 (March 19, 2020), such responses will be considered by the Commission if received not later than 20 days after the date of service by the complainant of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the

issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: May 24, 2023.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2023–11462 Filed 5–30–23; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF LABOR

Office of the Assistant Secretary for Policy, Chief Evaluation Office

Agency Information Collection Activities; Proposed Revision of Information Collection; Comment Request. The Evaluation of the Pathway Home Grant Program (Pathway Home Evaluation)

AGENCY: Office of the Assistant Secretary for Policy, Chief Evaluation Office, Department of Labor.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of Labor (DOL), as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents is properly assessed. Currently, the Department of Labor is soliciting comments concerning the collection of data about The Evaluation of the Pathway Home Grant Program (Pathway Home Evaluation). A copy of the proposed Information Collection Request (ICR) can be obtained by contacting the office listed below in the addressee section of this notice.

DATES: Written comments much be submitted to the office listed in the addressee section below on or before July 31, 2023.

ADDRESSES: You may submit comments by either one of the following methods: *Email: ChiefEvaluationOffice@dol.gov; Mail or Courier:* Monica Mean, Chief Evaluation Office, OASP, U.S. Department of Labor, 200 Constitution Ave. NW, Room S–2312, Washington, DC 20210. *Instructions:* Please submit one copy of your comments by only one method. All submissions received must include the agency name and OMB Control Number identified above for this information collection. Comments, including any personal information provided, become a matter of public record. They will also be summarized and/or included in the request for OMB approval of the information collection request.

FOR FURTHER INFORMATION CONTACT: Monica Mean by email at *ChiefEvaluationOffice@dol.gov* or by phone at (202) 693–6034

SUPPLEMENTARY INFORMATION:

I. *Background:* The Chief Evaluation Office (CEO) of the U.S. Department of Labor (DOL) intends to conduct an evaluation of the DOL-funded Pathway Home grant program, which aims to improve the ability of people in the justice system to find meaningful employment and avoid recidivism. The goal of this four-year evaluation is to build knowledge about the implementation of the Pathway Home grantees and their effectiveness in improving employment and recidivism outcomes for adults reentering the community after incarceration.

The overall study has two components: (1) an implementation evaluation of the Pathway Home grants to describe program models and services, partnerships, and participant characteristics; and (2) an impact evaluation to examine the effectiveness of the Pathway Home grants on participants' outcomes, such as credential attainment, employment and earnings, and ongoing criminal justice involvement.

This **Federal Register** Notice provides the opportunity to comment on two proposed data collection instruments that the evaluation will use: follow-up survey of impact study participants, and protocol for virtual discussions with grantee staff. The follow-up survey will be used as part of the impact study to measure outcomes for study participants. The virtual discussions with grantee staff will be used as part of the implementation study to understand the sustainability of the programs.

1. *Follow-up survey for impact study participants.* Survey of 2,500 impact study participants conducted approximately 12–15 months after their release to collect information on topics including participants' skills and credential attainment, employment and economic wellbeing, and health and stability after reentering their communities.

2. *Protocol for virtual discussions with grantee staff responsible for overseeing the grants.* Small group and one-on-one virtual discussions with grant administrators to understand sustainability of the Pathway Home grantee programs.

II. *Desired Focus of Comments:* Currently, DOL is soliciting comments on the above data collection instruments for the Pathway Home grant program. DOL is particularly interested in comments that do the following:

a. Evaluate whether the proposed collection of information is necessary for the proper performance functions of the agency, including whether the information will have practical utility;

b. Evaluate the accuracy of the agency's burden estimate of the proposed information collection, including the validity of the methodology and assumptions;

c. Enhance the quality, utility, and clarity of the information to be collected; and

d. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology—for example, permitting electronic submissions of responses.

III. *Current Actions:* At this time, DOL is requesting clearance for the follow-up survey of study participants, and the protocol for virtual group discussions with grantee staff.

Type of Review: Revision of a currently approved collection.

Agency: Office of the Assistant Secretary for Policy, Chief Evaluation Office, Department of Labor.

OMB Control Number: 1290–0039.

Affected Public: Individuals or Households.

Annual Respondent or Recordkeeper Cost: There are no direct costs to respondents.

Comments submitted in response to this request will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

ESTIMATED ANNUAL BURDEN HOURS

Type of instrument (form/activity)	Number of respondents	Number of responses per respondent	Total number of responses	Average burden time per response (hours)	Estimated burden hours
Follow-up survey of study participants	[1] 533	1	533	.42	222
Protocol for program administrators and frontline staff virtual discussions: Grant administrators	[2] 13	1	13	1.5	20
Total	546		546		242

[1] This assumes we will survey the 2,500 impact study participants enrolled at baseline and obtain a 64 percent response rate. This results in 533 respondents when annualized over three years.

[2] This assumes we invite a total of 44 grant administrators to participate in the discussions, with a 90 percent response rate. This results in 13 respondents when annualized over three years.

Karen Livingston,

Acting Chief Evaluation Officer, U.S. Department of Labor.

[FR Doc. 2023–11455 Filed 5–30–23; 8:45 am]

BILLING CODE 4510–HX–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Attestation for Employers Seeking To Employ H–2B Nonimmigrant Workers

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employment and Training Administration (ETA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before June 30, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202–693–0213, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: This Information Collection Request (ICR) supports the Temporary Final Rule (TFR), Exercise of Time-Limited Authority to Increase the Numerical Limitation for FY 2023 for H–2B Temporary Nonagricultural Worker Program and Portability Flexibility for H–2B Workers Seeking to Change Employers, which is being promulgated by DOL and the Department of Homeland Security (DHS). The regulatory requirements have been codified at 8 CFR part 214 and 20 CFR part 655. The ICR includes the Attestation for Employers Seeking to Employ H–2B Nonimmigrant Workers under Section 204 of Division O of the Consolidated Appropriations Act, 2022, Public Law 117–103, and Continuing Appropriations and Ukraine Supplemental Appropriations Act, 2023, Public Law 117–180, Form ETA–9142–B–CAA–7, and other information collection requirements (*e.g.,* recruitment efforts, recordkeeping requirements). For additional substantive information about this ICR, see the related notice published in the **Federal Register** on December 15, 2022 (87 FR 76816).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–ETA.

Title of Collection: Attestation for Employers Seeking to Employ H–2B Nonimmigrant Workers.

OMB Control Number: 1205–0554.

Affected Public: Private Sector—Businesses or other for-profits.

Total Estimated Number of Respondents: 4,312.

Total Estimated Number of Responses: 4,312.

Total Estimated Annual Time Burden: 39,541 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Nicole Bouchet,

Senior PRA Analyst.

BILLING CODE 4510–FP–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0143]

Proposed Extension of Information Collection; Qualification/Certification Program Request for MSHA Individual Identification Number (MIIN)

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden,

conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Qualification/Certification Program Request for MSHA Individual Identification Number (MIIN).

DATES: All comments must be received by the Office of Standards, Regulations and Variance on or before July 31, 2023.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below. Please note that late, untimely filed comments will not be considered.

- *Federal E-Rulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions for submitting comments for docket number MSHA–2023–0011.
- *Mail/Hand Delivery:* DOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor's COVID–19 policy. Special health precautions may be required.
- MSHA will post all comments as well as any attachments, except for information submitted and marked as confidential, in the docket at *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances, MSHA, at *MSHA.information.collections@dol.gov* (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

MSHA issues certifications, qualifications, and approvals to the nation's miners to conduct specific work within the mines. Miners requiring qualification or certification from MSHA will register for an MIIN. MSHA uses this unique number in place of individual Social Security numbers (SSNs) for all MSHA collections. MIIN will be used to identify miners who have exercised their option to work in areas of a mine with respirable dust concentration at or below 0.5 milligrams per cubic meter of air under 30 CFR 90.3 (Part 90 option); notice of eligibility; exercise of option and 30 CFR 90.100(b) (Respirable Dust Standard). The MIIN identifier fulfills Executive Order 13402, Strengthening Federal Efforts Against Identity Theft, which requires Federal agencies to better secure government held data.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Qualification/Certification Program Request for MSHA Individual Identification Number (MIIN). MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

The information collection request will be available on *http://www.regulations.gov.* MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on *www.regulations.gov* and *www.reginfo.gov.*

The public may also examine publicly available documents at DOL–MSHA, 201 12th South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor's COVID–19 policy. Special health precautions may be required.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

This information collection request concerns provisions for Qualification/Certification Program Request for MSHA Individual Identification Number (MIIN). MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request from the previous information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0143.

Affected Public: Business or other for-profit.

Number of Respondents: 6,000.

Frequency: On occasion.

Number of Responses: 6,000.

Annual Burden Hours: 500 hours.

Annual Respondent or Recordkeeper Cost: $72.

MSHA Forms: MSHA Form 5000–46, Request for MSHA Individual Identification Number (MIIN).

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Song-ae Aromie Noe,

Certifying Officer, Mine Safety and Health Administration.

[FR Doc. 2023–11456 Filed 5–30–23; 8:45 am]

BILLING CODE 4510–43–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2023–032]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice.

SUMMARY: We have submitted a request to the Office of Management and Budget (OMB) for approval of a reinstatement of one information collection and renewal of three information collections. The reinstated information collection is prepared by companies and organizations that wish to digitize archival holdings with privately-owned equipment. The first renewal information collection is prepared by organizations that want to make paper-to-paper copies of archival holdings with their personal copiers at the National Archives at the College Park facility. The second renewal is used to advise requesters of the correct procedures to follow when requesting certified copies of records for use in civil litigation or criminal actions in courts of law, and the information to be provided so that records may be identified. The third renewal information collection is used when veterans, dependents, and other authorized individuals request information from or copies of documents in military personnel, military medical, and dependent medical records. We invite you to comment on the proposed information collections.

DATES: OMB must receive written comments on or before June 30, 2023.

ADDRESSES: Send any comments and recommendations on the proposed information collection in writing to *www.reginfo.gov/public/do/PRAMain.* You can find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Tamee Fechhelm, Paperwork Reduction Act Officer, by email at *tamee.fechhelm@nara.gov* or by telephone at 301.837.1694 with any requests for additional information.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13), we invite the public and other Federal agencies to comment on proposed information collections. We published a notice of proposed collection for this information collection on March 20, 2023 (88 FR 16670) and we received no comments. We are therefore submitting the described information collection to OMB for approval.

If you have comments or suggestions, they should address one or more of the following points: (a) whether the proposed information collection is necessary for NARA to properly perform its functions; (b) our estimate of the burden of the proposed information collection and its accuracy; (c) ways we could enhance the quality, utility, and clarity of the information we collect; (d) ways we could minimize the burden on respondents of collecting the information, including through information technology; and (e) whether this collection affects small businesses.

In this notice, we solicit comments concerning the following information collection:

1. *Title:* Request to Digitize Records.

OMB number: 3095–0017.

Agency form number: None.

Type of review: Regular.

Affected public: Companies and organizations that wish to digitize archival holdings in the National Archives of the United States or a Presidential library for micropublication.

Estimated number of respondents: 10.

Estimated time per response: 5 hours.

Frequency of response: On occasion (when respondent wishes to request permission to digitize records).

Estimated total annual burden hours: 50.

Abstract: The information collection is prescribed by 36 CFR 1254.92. The collection is prepared by companies and organizations that wish to digitize archival holdings with privately-owned equipment. NARA uses the information to determine whether the request meets the criteria in 36 CFR 1254.94, to evaluate the records for digitization, and to schedule use of the limited space available for digitizing.

2. *Title:* Request to use personal paper-to-paper copiers at the National Archives at College Park facility.

OMB number: 3095–0035.

Agency form number: None.

Type of review: Regular.

Affected public: Business or other for-profit.

Estimated number of respondents: 5.

Estimated time per response: 3 hours.

Frequency of response: On occasion.

Estimated total annual burden hours: 15 hours.

Abstract: The information collection is prescribed by 36 CFR 1254.86. Respondents are organizations that want to make paper-to-paper copies of archival holdings with their personal copiers. NARA uses the information to determine whether the request meets the criteria in 36 CFR 1254.86 and to schedule the limited space available.

3. *Title:* Court Order Requirements.

OMB number: 3095–0038.

Agency form number: NA Form 13027.

Type of review: Regular.

Affected public: Veterans and Former Federal civilian employees, their authorized representatives, state and local governments, and businesses.

Estimated number of respondents: 5,000.

Estimated time per response: 15 minutes.

Frequency of response: On occasion.

Estimated total annual burden hours: 1,250 hours.

Abstract: The information collection is prescribed by 36 CFR 1228.164. In accordance with rules issued by the Office of Personnel Management, the National Personnel Records Center (NPRC) of the National Archives and Records Administration (NARA) administers Official Personnel Folders (OPF) and Employee Medical Folders (EMF) of former Federal civilian employees. In accordance with rules issued by the Department of Defense (DOD) and the Department of Transportation (DOT), the NPRC also administers military service records of veterans after discharge, retirement, and death, and the medical records of these veterans, current members of the Armed Forces, and dependents of Armed Forces personnel. The NA Form 13027, Court Order Requirements, is used to advise requesters of (1) the correct procedures to follow when requesting certified copies of records for use in civil litigation or criminal actions in courts of law and (2) the information to be provided so that records may be identified.

4. *Title:* Forms Relating to Military Service Records.

OMB number: 3095–0039.

Agency form number: NA Forms 13036, 13042, 13055, 13075, and 13177.

Type of review: Regular.

Affected public: Veterans, their authorized representatives, state and local governments, and businesses.

Estimated number of respondents: 79,800.

Estimated time per response: 5 minutes.

Frequency of response: On occasion (when respondent wishes to request information from a military personnel, military medical, and dependent medical record).

Estimated total annual burden hours: 6,650 hours.

Abstract: The information collection is prescribed by 36 CFR 1228.164. In accordance with rules issued by the Department of Defense (DOD) and the Department of Transportation (DOT, U.S. Coast Guard), the National Personnel Records Center (NPRC) of the National Archives and Records Administration (NARA) administers military personnel and medical records of veterans after discharge, retirement, and death. In addition, NPRC

administers the medical records of dependents of service personnel. When veterans, dependents, and other authorized individuals request information from or copies of documents in military personnel, military medical, and dependent medical records, they must provide on forms or in letters certain information about the veteran and the nature of the request. A major fire at the NPRC on July 12, 1973, destroyed numerous military records. If individuals' requests involve records or information from records that may have been lost in the fire, requesters may be asked to complete NA Form 13075, Questionnaire about Military Service, or NA Form 13055, Request for Information Needed to Reconstruct Medical Data, so that NPRC staff can search alternative sources to reconstruct the requested information. Requesters who ask for medical records of dependents of service personnel and hospitalization records of military personnel are asked to complete NA Form 13042, Request for Information Needed to Locate Medical Records, so that NPRC staff can locate the desired records. Certain types of information contained in military personnel and medical records are restricted from disclosure unless the veteran provides a more specific release authorization than is normally required. Veterans are asked to complete NA Form 13036, Authorization for Release of Military Medical Patient Records, to authorize release to a third party of a restricted type of information found in the desired record. For those who have already made a request, and want to check the status, they can use NA Form 13177, Check the Status of a Clinical & Medical Treatment Records Request.

Sheena Burrell,

Executive for Information Services/CIO.

BILLING CODE 7515–01–P

NATIONAL TRANSPORTATION SAFETY BOARD

Investigative Hearing

A recent Norfolk Southern Railway accident in East Palestine, Ohio, has motivated this investigative hearing.

On February 3, 2023, about 8:54 p.m. local time, eastbound Norfolk Southern Railway general merchandise freight train 32N derailed 38 railcars on main track 1 of the Norfolk Southern Fort Wayne Line of the Keystone Division in East Palestine, Ohio. The derailed equipment included 11 tank cars carrying hazardous materials that subsequently ignited, fueling fires that damaged an additional 12 non-derailed railcars. First responders implemented a 1-mile evacuation zone surrounding the derailment site that affected up to 2,000 residents. There were no reported fatalities or injuries.

The investigative hearing will discuss the following issue areas:

- Hazard Communications and Emergency Responder Preparedness for the Initial Emergency Response
- Circumstances that Led to the Decision to Vent and Burn Five Vinyl Chloride Tank Cars
- Freight Car Bearing Failure Modes and Wayside Detection Systems
- Tank Car Derailment Damage, Crashworthiness, and Hazardous Materials Package Information

Parties to the hearing are the Federal Railroad Administration; Pipeline and Hazardous Materials Safety Administration; Norfolk Southern Corporation; Trinity Rail Management Leasing Services; Oxy Vinyls, LP; Brotherhood of Locomotive Engineers and Trainmen; International Association of Sheet Metal, Air, Rail and Transportation Workers; Transportation Communications Union/IAM; Brotherhood of Railroad Signalmen; International Association of Fire Fighters; Ohio State Highway Patrol; and the Village of East Palestine.

Order of Proceedings

1. Opening Statement by the Chair of the Board of Inquiry
2. Introduction of the Board of Inquiry and Technical Panel
3. Introduction of the Parties to the Hearing
4. Introduction of Exhibits by Hearing Officer
5. Overview of the incident and the investigation by Investigator-In-Charge
6. Calling of Witnesses by Hearing Officer and Examination of Witnesses by Technical Panel, Parties, and Board of Inquiry
7. Closing Statement by the Chair of the Board of Inquiry

The investigative hearing will be held at East Palestine High School, 360 West Grant Street, East Palestine, Ohio on Thursday, June 22, 2023, 9:00 a.m. to 7:00 p.m. eastern daylight time (EDT), and Friday, June 23, 2023, 9:00 a.m. to 6:00 p.m. EDT.

Media planning to cover the investigative hearing are asked to contact Keith Holloway at (202) 314–6100 or *mediarelations@ntsb.gov.*

The investigative hearing will be transmitted live via the NTSB's YouTube channel at *https://www.youtube.com/user/NTSBgov.* An archival video of the hearing will be available via the website for 30 days after the hearing.

Individuals requiring reasonable accommodation and/or wheelchair access directions should contact Stephanie Shaw at (202) 314–6014 or by email at *EastPalestineHearing@ntsb.gov.*

NTSB Investigative Hearing Officer: Stephanie D. Shaw—*EastPalestineHearing@ntsb.gov.*

The National Transportation Safety Board is holding this public hearing pursuant to the provisions of the Government in the Sunshine Act (5 U.S.C. 552b) and as authorized by 49 CFR 845.2.

Candi R. Bing,

Federal Register Liaison Officer.

BILLING CODE 7533–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2022–0095]

NUREG: Artificial Intelligence Strategic Plan: Fiscal Years 2023–2027

AGENCY: Nuclear Regulatory Commission.

ACTION: Final report; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing NUREG–2261, ''Artificial Intelligence Strategic Plan: Fiscal Years 2023–2027,'' dated May 31, 2023. The NRC's Artificial Intelligence (AI) Strategic Plan, establishes the vision and goals for the NRC to continue to improve its skills and capabilities to review and evaluate the application of AI to NRC-regulated activities, maintain awareness of technological innovations, and ensure the safe and secure use of AI in NRC-regulated activities. The AI Strategic Plan includes five goals: (1) ensure NRC readiness for regulatory decision-making, (2) establish an organizational framework to review AI applications, (3) strengthen and expand AI partnerships, (4) cultivate an AI proficient workforce, and (5) pursue use cases to build an AI foundation across the NRC.

DATES: This document was published in the **Federal Register** on May 31, 2023.

ADDRESSES: Please refer to Docket ID NRC–2022–0095 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

• *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0095. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

• *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's Public Document Room (PDR), Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Matthew Dennis, telephone: 301–415–3702; email: *Matthew.Dennis@nrc.gov* and Luis Betancourt, telephone: 301–415–6146; email: *Luis.Betancourt@nrc.gov.* Both are staff of the Office of Nuclear Regulatory Research at the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Discussion

The purpose of NUREG–2261, ''Artificial Intelligence Strategic Plan: Fiscal Years 2023–2027,'' is to ensure the NRC's readiness to review and evaluate the use of artificial intelligence (AI) in NRC-regulated activities. NUREG–2261, ''Artificial Intelligence Strategic Plan: Fiscal Years 2023–2027,'' is available in ADAMS under Accession No. ML23132A305. To better understand activities and plans for AI across the nuclear industry, the staff hosted the 2021 Data Science and AI Regulatory Applications Public Workshops and issued a **Federal Register** notice on July 5, 2022, to solicit feedback on the draft AI Strategic Plan (87 FR 39874). Information about and presentations from the workshops can be found on the NRC public website at *https://www.nrc.gov/public-involve/conference-symposia/data-science-ai-reg-workshops.html.* These activities informed the development of the AI Strategic Plan. The NRC anticipates that the nuclear industry may begin deploying AI in NRC-regulated activities in the near future.

The AI Strategic Plan considers machine learning, natural language processing, and deep learning to be subsets of AI. In practice, the term AI describes various activities that range from data collection and analyses to support human decisionmaking to fully autonomous systems. The AI Strategic Plan adds to regulatory certainty by augmenting NRC readiness to review the use of AI in NRC-regulated activities.

The AI Strategic Plan establishes five goals to ensure the agency's readiness to review the use of AI in NRC-regulated activities. The five strategic goals are: (1) ensure NRC readiness for regulatory decision-making, (2) establish an organizational framework to review AI applications, (3) strengthen and expand AI partnerships, (4) cultivate an AI proficient workforce, and (5) pursue use cases to build an AI foundation across the NRC.

II. Public Comment Analysis

The NRC draft AI Strategic Plan for FY 2023–2027 was published in the **Federal Register** for public comment on July 5, 2022 (87 FR 39874) and the comment period closed on August 19, 2022. The NRC staff held a transcribed comment-gathering public meeting on August 3, 2022, to receive additional comments on the draft AI Strategic Plan. In addition to the comments received during the public meeting, the NRC received seven comment submissions in response to the **Federal Register** notice. In total, the NRC staff identified and responded to 105 individual comments received from individual members of the public and various organizations. The NRC responses to these comments are available in ADAMS under Accession No. ML23037A840.

Dated: May 22, 2023.

For the Nuclear Regulatory Commission.

Raymond V. Furstenau,

Director, Office of Nuclear Regulatory Research.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[EA–23–058; Docket No. 70–7005; NRC–2022–0093]

Waste Control Specialists LLC; Superseding Exemption Order

AGENCY: Nuclear Regulatory Commission.

ACTION: Order; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a new Order superseding a previously issued Order to Waste Control Specialists LLC (WCS) on December 3, 2014 (2014 Order), as supplemented by NRC letters to WCS from 2016 to 2022. The current and past NRC Orders are associated with an exemption from NRC regulations, which requires persons who own, acquire, deliver, receive, possess, use, or transfer Special Nuclear Material (SNM) to obtain an NRC license pursuant to the NRC requirements. The current action is in response to a request by WCS dated June 30, 2022. In the letter, WCS requested permission to: (1) move the U.S. Department of Energy (DOE) Los Alamos National Laboratory (LANL) Waste from the WCS Federal Waste Facility (FWF) disposal cell to the WCS Treatment, Storage, and Disposal Facility (TSDF) Bin Storage Area (BSA)–1 Enclosure; (2) prepare the LANL Waste for shipment in the TSDF BSA–1 Enclosure; and (3) temporarily store the LANL Waste in the TSDF BSA–1 Enclosure.

DATES: The Order is effective as of May 22, 2023.

ADDRESSES: Please refer to Docket ID NRC–2022–0093 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

• *Federal Rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0093. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–287–3422; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact

the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced.

- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Harry Felsher, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–6559; email: *Harry.Felsher@nrc.gov.*

SUPPLEMENTARY INFORMATION: The text of the Order is attached.

Dated: May 24, 2023.

For the Nuclear Regulatory Commission.

John W. Lubinski,

Director, Office of Nuclear Material Safety and Safeguards.

Attachment 1—Order

United States Nuclear Regulatory Commission

In the Matter of: Waste Control Specialists LLC, P.O. Box 1129, 0093, Andrews, Texas 79714, Docket No. 70–7005; NRC–2022–EA–23–058.

Order Exempting Waste Control Specialists LLC From the Requirement To Obtain a 10 CFR Part 70 License To Possess Certain Types of Special Nuclear Material

Waste Control Specialists LLC (WCS) operates a site in Andrews County, Texas, that is licensed by the state of Texas to process and store certain types of radioactive material contained in low-level radioactive waste (LLRW) and mixed waste (MW) (waste that has both a hazardous component and a radioactive component) that is regulated under both the Resource Conservation and Recovery Act (RCRA) and the Atomic Energy Act (AEA), as amended. The WCS Site also disposes of RCRA hazardous waste, toxic waste under the Toxic Substances Control Act (TSCA), and naturally occurring radioactive materials. WCS requested by letter dated June 30, 2022, that the NRC modify the conditions of an existing exemption (granted by order in 2014) to allow greater operational authority with respect to material regulated by the NRC. This Order is being issued to grant WCS an exemption from the requirements of 10 CFR part 70 to obtain a license to possess certain types of Special Nuclear Material (SNM) and to perform the activities described below subject to the conditions in Section III of this Order.

II

Under the AEA, as amended, the NRC can relinquish and a State can assume regulatory authority over radioactive material specified in an Agreement with NRC. In 1963, Texas entered into an Agreement and assumed regulatory authority over source, byproduct, and SNM less than critical mass.

On November 30, 1997, the State of Texas Department of Health (TDH) issued WCS a radioactive materials license (RML) to possess, treat, and store LLRW (RML R04971). In 1997, WCS began accepting RCRA and TSCA wastes for treatment, storage, and disposal. Later that year, WCS received a license from the TDH for treatment and storage of MW and LLRW. The MW and LLRW streams may contain quantities of SNM. In 2007, regulatory responsibility for RML R04971 was transferred to the Texas Commission on Environmental Quality (TCEQ). In September 2009, TCEQ issued RML R04100 to WCS for disposal of LLRW.

Section 70.3 of Title 10 of the *Code of Federal Regulations* (10 CFR) Part 70, ''Domestic Licensing of Special Nuclear Material,'' requires persons who own, acquire, deliver, receive, possess, use, or transfer SNM to obtain a license pursuant to the requirements of 10 CFR part 70. The licensing requirements in 10 CFR part 70 apply to persons in Agreement States possessing greater than critical mass quantities, as defined in 10 CFR 150.11, ''Critical mass.'' However, pursuant to 10 CFR 70.17(a), ''Specific exemptions,'' ''the Commission may, upon application of any interested person or upon its own initiative, grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest.''

In September 2000, WCS requested an exemption from the licensing requirements in 10 CFR part 70. On November 21, 2001, the NRC issued an Order to WCS (2001 Order) granting an exemption to WCS from certain NRC regulations and permitted WCS, under specified conditions, to possess waste containing SNM in greater quantities than specified in 10 CFR part 150, ''Exemptions and Continued Regulatory Authority in Agreement States and in Offshore Waters Under Section 274,'' at the WCS storage and treatment facility in Andrews County, Texas, without obtaining an NRC license pursuant to 10 CFR part 70. The 2001 Order was published in the **Federal Register** (FR) on November 15, 2001 (66 FR 57489). The conditions specified in the 2001 Order were further described in the October 2001 Environmental Assessment (EA) and November 2001 Safety Evaluation Report (SER) that supported the 2001 Order.

By letters dated August 6, 2003, and March 14, 2004, WCS requested modifications to the 2001 Order which would allow it to use additional reagents for chemical stabilization of MW containing SNM. The NRC issued a superseding Order to WCS on November 4, 2004 (2004 Order). The 2004 Order changed the 2001 Order Conditions to allow WCS to use such chemical reagents as it deems necessary for treatment and stabilization of MW containing SNM, provided that the SNM mass does not exceed specified concentration limits. The 2004 Order was published on November 12, 2004 (69 FR 65468). The conditions specified in the 2004 Order were described in the October 2004 EA and October 2004 SER that supported the 2004 Order.

By letter dated December 10, 2007, WCS requested modifications to the 2004 Order to discontinue confirmation sampling upon receipt of waste that WCS verifies is adequately characterized by a waste generator to be uniform and which contains less than one-thousandth of the SNM concentration limits presented in Condition 1; and to meet the confirmatory sampling requirements of Condition 7 for sealed sources using surface smear surveys. The NRC issued a superseding Order to WCS on October 20, 2009 (2009 Order). The 2009 Order allowed WCS to discontinue waste generator and WCS confirmation sampling for waste that WCS verifies is adequately characterized by a waste generator to be uniform and which contains less than one tenth of the SNM concentration limits presented in Condition 1; allowed WCS to discontinue confirmatory sampling requirements for sealed sources; clarified Condition 2 with respect to ''pure forms'' of certain chemicals; and clarified the spatial uniformity requirement for waste received by WCS. The 2009 Order was published on October 26, 2009 (74 FR 55072). The

conditions specified in the 2009 Order were described in the October 2009 EA and SER that supported the 2009 Order.

In July 2013, by Amendment No. 22 of RML R04100, the TCEQ began to merge the license requirements in RML R04971 (for the radioactive waste treatment, storage, and processing facility) with the requirements in RML R04100 (for the LLRW land disposal facility). In Amendment No. 22 of RML R04100, the TCEQ license requirements related to the NRC 2009 Order in RML R04971 for the WCS treatment, storage, and processing facility were transferred to RML R04100. Previous NRC Orders referred to a specific location on the WCS Site as the treatment, storage, and processing facility. Subsequently, WCS began referring to that specific location on the WCS Site as the ''Treatment, Storage and Disposal Facility.'' In this Order, the NRC will use the name ''Treatment, Storage, and Disposal Facility'' and the abbreviation TSDF to reference that specific location on the WCS Site.

By letter dated July 18, 2014, WCS requested an exemption from NRC regulations to possess SNM in excess of the critical mass limits specified in 10 CFR 150.11, move the LANL Waste from the TSDF to the FWF disposal cell, and temporarily store the LANL Waste in the WCS FWF disposal cell. The WCS request referenced the actions that WCS had taken in response to the DOE investigation of an unplanned February 2014 radiation release event at the DOE Waste Isolation Pilot Plant (WIPP) Facility in New Mexico (*i.e.,* WIPP Incident). Due to the WIPP Incident, the DOE suspended operations at the WIPP Facility. As a result, WCS began receiving the LANL Waste from the DOE in April 2014. The LANL Waste is transuranic waste with SNM that originated from the DOE LANL and is destined for disposal at the DOE WIPP Facility. WCS intended to temporarily store the LANL Waste at the WCS TSDF until the DOE shipped the LANL Waste off the WCS Site.

Based on the DOE investigation of the WIPP Incident, the DOE subsequently informed WCS that some of the LANL Waste being temporarily stored at the WCS TSDF could, under certain conditions, react and potentially result in a release of transuranic radionuclides to the environment. On June 12, 2014, WCS responded to the DOE information by starting to voluntarily move the identified LANL Waste to the WCS FWF disposal cell on the WCS Site for temporary storage. However, the WCS FWF disposal cell was not a location addressed under the 2009 Order, so WCS needed NRC permission to move the LANL Waste from the TSDF to the FWF disposal cell and temporarily store the LANL Waste in the WCS FWF disposal cell.

The NRC issued a Superseding Order to WCS on December 3, 2014 (2014 Order). The 2014 Order was published on December 11, 2014 (79 FR 73647). The 2014 Order allowed WCS to move the LANL Waste from the TSDF to the FWF disposal cell and temporarily store the LANL Waste in the WCS FWF disposal cell. The conditions specified in the 2014 Order were further described in the October 2014 EA (ML14238A208), and November 2014 SER (ML14230A804) that supported the 2014 Order.

The current and previous NRC Orders to WCS (2001, 2004, 2009, and 2014) addressed the issue that 10 CFR 70.3, ''License requirements,'' requires persons who own, acquire, deliver, receive, possess, use, or transfer SNM to obtain an NRC license pursuant to the requirements in 10 CFR part 70. However, 10 CFR 150.10, ''Persons exempt,'' exempts a person in an Agreement State who possesses SNM in quantities not sufficient to form a critical mass from the NRC's imposed licensing requirements and regulations. The method for calculating the quantity of SNM not sufficient to form a critical mass is set out in 10 CFR 150.11. Therefore, prior to the NRC 2001 Order, WCS was required to comply with NRC regulatory requirements and obtain an NRC specific license to possess SNM in quantities greater than amounts established in 10 CFR 150.11. The 2001 WCS exemption request to NRC proposed to use concentration-based limits rather than mass-based limits at the WCS Site. The NRC 2001 Order granted, and the subsequent NRC Orders (2004, 2009, and 2014) continued, the use of concentration-based limits with conditions at the WCS Site.

The 2014 NRC Order to WCS contains conditions that allow WCS to possess and temporarily store DOE LANL Waste at two locations at the WCS Site (*i.e.,* FWF disposal cell, TSDF) without obtaining an NRC part 70 license. The conditions in the 2014 Order were modified by five NRC letters to WCS dated September 23, 2016 (ML16097A265), September 26, 2017 (ML17234A415), December 19, 2018 (ML18269A318), December 7, 2020 (ML20252A182), and June 8, 2022 (ML22094A131).

By letter dated June 30, 2022, and supplemented by the NRC clarification calls with WCS (ML22257A219), WCS requested that the NRC modify the conditions in the 2014 Order (as supplemented by the five NRC letters from 2016 to 2022) to allow WCS to: (1) move the DOE LANL Waste from one location at the WCS Site (the WCS FWF disposal cell) to another location at the WCS Site (the WCS TSDF BSA–1 Enclosure), (2) prepare the LANL Waste for shipment in the WCS TSDF BSA–1 Enclosure, and (3) temporarily store the LANL Waste in the WCS TSDF BSA–1 Enclosure until the DOE ships the LANL Waste off the WCS Site. After evaluating WCS's exemption request, the NRC staff decided that the appropriate action is to grant the request with Conditions. The reasons for that decision are further described in the SER (ML22221A080) for the June 30, 2022 request.

The NRC reviewed the information in the WCS request and, along with clarifying teleconference calls and other public and non-public information provided by WCS, the NRC decided that the appropriate action is to grant the WCS request but has modified the WCS request to include additional conditions as described in this 2023 Order (2023 Order). As further described in the SER for this WCS request, the NRC has determined that the conditions in this 2023 Order are authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest to allow WCS to undertake the activities described in the request.

In this 2023 Order, Conditions 1 through 7 remain the same as in the 2014 Order. A new Condition 8 is added to reflect the September 26, 2017 NRC supplemental letter to WCS (ML17234A415). The 2014 Order Conditions 8 through 11 are renumbered as Conditions 9 through 12 to address the new Condition 8. The 2014 Order Conditions 8.A. through 8.A.3. are renumbered as Conditions 9.A. through 9.A.3. and updated to reflect the September 26, 2017, NRC supplemental letter to WCS (ML17234A415). The 2014 Order Conditions 8.B. through 8.B.6 are renumbered as 9.B. through 9.B.6. and updated to reflect the five NRC supplemental letters to WCS from 2016 to 2022 (September 23, 2016 (ML16097A265), September 26, 2017 (ML17234A415), December 19, 2018 (ML18269A318), December 7, 2020 (ML20252A182), and June 8, 2022 (ML22094A131)).

The 2023 Order adds Conditions 9.C. through 9.C.2 to reflect NRC approval of WCS moving the LANL Waste from the FWF disposal cell to the TSDF BSA–1 Enclosure. The 2023 Order adds Conditions 9.D. through 9.D.2. to reflect NRC approval of WCS preparing the LANL Waste for shipment in the TSDF BSA–1 Enclosure. No additional conditions are needed to reflect NRC

approval of WCS temporarily storing the LANL Waste in the TSDF BSA–1 Enclosure because that was previously approved in the 2014 Order. As such, Conditions 1 through 12 of this 2023 Order are updated and listed in Section III below.

III

I have concluded, based on the staff's evaluation and pursuant to 10 CFR 70.17(a), that the exemption as described below at the WCS Site is authorized by law, will not endanger life or property or the common defense and security and is otherwise in the public interest. Therefore, pursuant to Sections 51, 161b, 161c, 161i, 182, 186, and 274 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR part 70 as applicable, *it is hereby ordered that:*

WCS is exempted from the requirements of 10 CFR part 70, including the requirements for an NRC license in 10 CFR 70.3 subject to the conditions listed below. This Order supersedes the 2014 Order, as modified by five NRC letters to WCS dated September 23, 2016 (ML16097A265), September 26, 2017 (ML17234A415), December 19, 2018 (ML18269A318), December 7, 2020 (ML20252A182), and June 8, 2022 (ML22094A131).

1. Concentrations of SNM in individual waste containers and/or during processing shall not exceed the following values:

SNM isotope	Operational limit (gram SNM/ gram waste)	Measurement uncertainty (gram SNM/ gram waste)
U–233	4.7E–04	7.1E–05
U–233	4.7E–04	7.1E–05
U–235 (10 percent enriched)	9.9E–04	1.5E–04
U–235 (100 percent enriched)	6.2E–04	9.3E–05
Pu–239	2.8E–04	4.2E–05
Pu–241	2.2E–04	3.2E–05

When mixtures of these SNM isotopes are present in the waste, the sum-of-the-fractions rule, as illustrated below, shall be used.

$$\frac{\text{U-233 conc}}{\text{U-233 limit}} + \frac{\text{100wt\%U-235 conc}}{\text{100wt\%U-235 limit}} + \frac{\text{10wt\%U-235 conc}}{\text{10wt\%U-235 limit}} + \frac{\text{Pu-239 conc}}{\text{Pu-239 limit}} + \frac{\text{Pu-241 conc}}{\text{Pu-241 limit}} \leq 1$$

The measurement uncertainty values in column 3 above represent the maximum one-sigma uncertainty associated with the measurement of the concentration of the particular radionuclide.

The SNM must be uniformly distributed throughout the waste, such that the limiting concentrations must not be exceeded on average in any contiguous mass of 600 kilograms.

2. The mass concentration of carbon, fluorine, and bismuth in the waste must be limited as follows:

SNM isotope	Carbon wt%	Fluorine wt%	Bismuth wt%
U–233	28	34	34
U–235(10)	25	35	31
U–235(100)	41	42	33
Pu–239	43	43	34
Pu–241	37	39	32

For waste containing mixtures of C, F, and Bi, the sum of the weight fractions of C, F, and Bi shall be compared to the most restrictive maximum allowable weight fractions for any one of those elements. Similarly, where mixtures of radionuclides are present in the waste, the limiting maximum allowable weight fraction of C, F, and Bi shall be applied. The presence of the above materials will be determined and documented by the generator, based on process knowledge or testing.

3. Waste accepted shall not contain total quantities of beryllium, hydrogenous material enriched in deuterium, or graphite above one tenth of one percent of the total weight of the waste. The presence of the above materials will be determined and documented by the generator, based on process knowledge, or testing.

4. Possession of highly water soluble forms of SNM shall not exceed the amount of SNM of low strategic significance defined in 10 CFR 73.2, ''Definitions.'' Highly soluble forms of SNM include, but are not limited to: uranium sulfate, uranyl acetate, uranyl chloride, uranyl formate, uranyl fluoride, uranyl nitrate, uranyl potassium carbonate, uranyl sulfate, plutonium chloride, plutonium fluoride, and plutonium nitrate. The presence of the above materials will be determined and documented by the generator, based on process knowledge or testing.

5. Processing of mixed waste containing SNM will be limited to chemical stabilization (*i.e.,* mixing waste with reagents). For batches with more than 600 kilograms of waste, the total mass of SNM shall not exceed the concentration limits in Condition 1 times 600 kilograms of waste.

6. Prior to shipment of waste, WCS shall require generators to provide a written certification containing the following information for each waste stream:

a. Waste Description. The description must detail how the waste was generated, list the physical forms in the

waste, and identify uranium chemical composition.

Waste Characterization Summary. The data must include a general description of how the waste was characterized (including the volumetric extent of the waste, and the number, location, type, and results of any analytical testing), the range of SNM concentrations, and the analytical results with error values used to develop the concentration ranges.

b. Uniformity Description. A description of the process by which the waste was generated showing that the spatial distribution of SNM is homogeneous or other information supporting spatial homogeneity.

c. Manifest Concentration. The generator must describe the methods to be used to determine the concentrations on the manifests. These methods could include direct measurement and the use of scaling factors. The generator must describe the uncertainty associated with sampling and testing used to obtain the manifest concentrations.

WCS shall review the above information and, if adequate, approve in writing this pre-shipment waste characterization and assurance plan before permitting the shipment of a waste stream. This will include statements that WCS has a written copy of all the information required above, that the characterization information is adequate and consistent with the waste description, and that the information is sufficient to demonstrate compliance with Conditions 1 through 4. Where generator process knowledge is used to demonstrate compliance with Conditions 1, 2, 3, or 4, WCS shall review this information and determine when testing is required to provide additional information in assuring compliance with the Conditions. WCS shall retain this information to permit independent review.

At the time waste is received, WCS shall require generators of SNM waste to provide a written certification with each waste manifest that states that the SNM concentrations reported on the manifest do not exceed the limits in Condition 1, and that the waste meets Conditions 2 through 4.

WCS shall require generators to sample and determine the SNM concentration for each waste stream, not to include sealed sources, at a frequency of once per 600 kg if the concentrations are above one tenth the SNM limits of Condition 1. The measurement uncertainty shall not exceed the uncertainty value in Condition 1 and shall be provided on the written certification.

7. WCS shall sample and determine the SNM concentration for each waste stream, not to include sealed sources, at a frequency of once per 600 kg if the concentrations are above one tenth the SNM limits of Condition 1. This confirmatory testing is not required for waste to be disposed of at DOE's WIPP Facility.

8. Upon possession, all waste applies towards the aboveground SNM possession limit except the waste: (1) disposed at the WCS Site; or (2) transported off the WCS Site—unless the waste is transported from the WCS Site to the WCS-owned rail spur.

9. The ''WIPP Incident'' is the February 14, 2014, unplanned radiation release event at the DOE WIPP Facility in New Mexico. The following relate to WCS storing DOE transuranic waste that originated at the LANL, which are destined to be disposed of at the DOE WIPP Facility (*i.e.,* ''LANL Waste''), at either the WCS TSDF or the WCS FWF disposal cell:

A. *The following conditions are applicable to LANL Waste stored at the FWF disposal cell and other SNM-bearing waste stored or disposed of at the FWF:*

1. The following waste is allowed to be stored at the WCS FWF disposal cell: LANL Waste in accordance with the concentration-based limits specified in Conditions 1 through 7, provided that it is in Standard Waste Boxes (SWBs) analyzed to be safe in the DOE ''Nuclear Critical Safety Evaluation,'' WIPP–016, Rev. 4. The lids of the SWBs shall be bolted or similarly secured to the body and the SWBs shall be placed inside Modular Concrete Canisters (MCCs) consistent with the configurations analyzed in WIPP–016.

2. The LANL Waste shall be isolated from other SNM-bearing waste by a minimum of 6.096 meters (20 feet).

3. The LANL Waste in MCCs shall be stacked no more than one MCC high.

B. *The following conditions are applicable to all the LANL Waste stored at either the TSDF or the FWF disposal cell:*

1. WCS shall follow the general reporting and recordkeeping requirements of 10 CFR part 74, ''Material Control and Accounting of Special Nuclear Material,'' that are applicable to those who possess SNM of 1 gram or more. Those requirements are: (1) notification to the NRC within 1 hour of discovery of any unauthorized removal of SNM which WCS is authorized to possess; and (2) maintenance of a recordkeeping program showing the receipt, inventory, acquisition, transfer, and disposal of all SNM in WCS' possession.

2. The contents and matrices of the LANL Waste in the inner containers shall conform to the description in the WCS non-public information.

3. The physical security plan for the LANL Waste shall be maintained to specifically include detection, assessment, and response methods and procedures for the LANL Waste for as long as the LANL Waste is at the WCS Site.

4. WCS is allowed to possess the LANL Waste until December 31, 2024.

5. The LANL Waste shall remain unopened in the inner container in which it was shipped, unless WCS needs to take an action on one of the inner containers based on knowledge from DOE's investigation of the WIPP Incident. Only one inner container may be open at a time.

6. WCS shall keep NRC informed of the status of the DOE investigation of the WIPP Incident. If DOE determines that some of LANL Waste at the WCS Site was similar to the waste that DOE determines to have contributed to the WIPP Incident, then WCS shall notify the NRC.

C. *The following conditions are applicable while moving the LANL Waste from the FWF disposal cell to the TSDF BSA–1 Enclosure:*

1. The Final WCS Documented Safety Analysis shall be followed while moving the LANL Waste from the FWF disposal cell to the TSDF BSA–1 Enclosure, including performing the following sub-activities for each MCC:

- remove the protective sand layer within the FWF disposal cell,
- remove the MCC from its FWF disposal cell storage location,
- place the MCC on the moving equipment,
- move the MCC into the TSDF BSA–1 Enclosure, and
- place the MCC in the TSDF BSA–1 Enclosure.

2. While moving the LANL Waste from the FWF disposal cell to the TSDF BSA–1 Enclosure, WCS shall ensure the following:

- there is no fuel storage or flammable material areas in either the FWF or near the route from the FWF disposal cell to the TSDF BSA–1 Enclosure,
- fuel leaks are quickly dispersed and isolated, and
- there is no vehicle traffic along the route from the FWF disposal cell to the TSDF BSA–1 Enclosure.

D. *The following conditions are applicable while preparing the LANL Waste for shipment in the TSDF BSA–1 Enclosure:*

1. The Final WCS Documented Safety Analysis shall be followed while preparing the LANL Waste for shipment in the TSDF BSA–1 Enclosure (*i.e.,*

under negative pressure with high efficiency particulate air (HEPA) filtration system and temperature control using heating, ventilation, and air conditioning (HVAC) system), including performing the following sub-activities for each MCC:

- remove the pea gravel from the MCC, and
- for each SWB in that MCC:
  - replace the lifting straps of the SWB in the MCC,
  - remove the SWB from the MCC,
  - replace filters in the SWB (as needed),
  - add additional filters in the SWB (as needed),
  - perform borescope work in the SWB (as needed),
  - take air samples from the head space within the SWB (as needed), and
  - place the SWB in temporary storage within the BSA–1 Enclosure.

2. While preparing the LANL Waste for shipment in the TSDF BSA–1 Enclosure, WCS shall ensure the following:

- there are no explosive material storage areas in the TSDF BSA–1 Enclosure, and
- there is no vehicle traffic in the TSDF BSA–1 Enclosure.

10. WCS shall notify the NRC, Region IV office within 24 hours if any of the above Conditions are violated. A written notification of the event must be provided within 7 days.

11. WCS shall obtain NRC's approval prior to changing any activities associated with the above Conditions.

12. The Director of the Office of Nuclear Material Safety and Safeguards (or designee), may, in writing, relax or rescind any of the above conditions upon demonstration by WCS of good cause.

IV

In accordance with 10 CFR 2.202, WCS must, and any other person adversely affected by this Order may, submit an answer to this Order within 20 days of its publication in the **Federal Register**. In addition, WCS and any other person adversely affected by this Order may request a hearing on this Order within 20 days of its publication in the **Federal Register**. Where good cause is shown, consideration will be given to extending the time to answer or request a hearing. A request for extension of time must be directed to the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, and include a statement of good cause for the extension.

All documents filed in NRC adjudicatory proceedings, including a request for hearing and petition for leave to intervene (petition), any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene, and documents filed by interested governmental entities that request to participate under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562; August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Detailed guidance on making electronic submissions may be found in the Guidance for Electronic Submissions to the NRC and on the NRC website at *https://www.nrc.gov/site-help/e-submittals.html.* Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals/getting-started.html.* Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit adjudicatory documents. Submissions must be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public website at *https://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed so that they can obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) first-class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff. Participants filing adjudicatory documents in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting

the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the Commission or the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or personal phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. For example, in some instances, individuals provide home addresses in order to demonstrate proximity to a facility or site. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

If a person other than WCS requests a hearing, that person shall set forth with particularity the manner in which their interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.309(d) and (f).

If a hearing is requested by WCS or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearings. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained. In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions specified in Section III above shall be final 20 days from the date this Order is published in the **Federal Register** without further order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions specified in Section III shall be final when the extension expires if a hearing request has not been received.

Dated: May 22, 2023.

For the Nuclear Regulatory Commission.

John W. Lubinski,

Director, Office of Nuclear Material Safety and Safeguards.

Attachment 2—Availability of Documents

Availability of Documents

The documents identified in the following table are available to interested persons through one or more of the following methods, as indicated.

BILLING CODE P

PENSION BENEFIT GUARANTY CORPORATION

Submission of Information Collections for OMB Review; Comment Request; Special Financial Assistance Information

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of request for extension of OMB approval of information collections.

SUMMARY: The Pension Benefit Guaranty Corporation (PBGC) is requesting that the Office of Management and Budget (OMB) extend approval under the Paperwork Reduction Act of collections of information contained in PBGC's regulation on special financial assistance. The purpose of the information collections is to gather information necessary for PBGC to operate the special financial assistance program. This notice informs the public of PBGC's request and solicits public comment on the collections of information.

DATES: Comments must be submitted on or before June 30, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collections should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find the information collections by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. All comments received will be posted without change to PBGC's website, *http://www.pbgc.gov,* including any personal information provided. Do not submit comments that include any personally identifiable information or confidential business information.

Copies of the collections of information may be obtained by writing to Disclosure Division (*disclosure@pbgc.gov*), Office of the General Counsel, Pension Benefit Guaranty Corporation, 445 12th Street SW, Washington, DC 20024–2101, or calling 202–229–4040 during normal business hours. If you are deaf or hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: Section 4262 of the Employee Retirement Income Security Act of 1974 (ERISA) requires PBGC to provide special financial assistance (SFA) to certain

financially troubled multiemployer plans upon application for assistance. Part 4262 of PBGC's regulations, ''Special Financial Assistance by PBGC,'' provides guidance to multiemployer pension plan sponsors on eligibility for SFA, determining the amount of SFA, content of an application for SFA, the process of applying, PBGC's review of SFA applications, restrictions and conditions, and reporting and notice requirements.

To apply for SFA, a plan sponsor must file an application with PBGC and include information about the plan, plan documentation, and actuarial information, as specified in §§ 4262.6 through 4262.9. Also, if the plan is changing certain assumptions for purposes of its requested amount of SFA, then the plan sponsor may use PBGC's SFA assumptions guidance. PBGC needs the application information to review a plan's eligibility for SFA and amount of requested SFA. In this renewal, PBGC is modifying the instructions of the application for SFA to require full census data of all terminated vested participants that were included in the SFA projections. PBGC will use this information to conduct an independent death audit. In addition, PBGC is adding a new ''assumptions summaries'' template, and a cover letter that a plan, in certain circumstances, may use to withdraw a previously filed application for SFA and seek expedited review of a revised application. These two additions are intended to make PBGC's review process more efficient. PBGC estimates that over the next 3 years an annual average of 59 plan sponsors will file applications for SFA with an average annual hour burden of 649 hours and an average annual cost burden of $1,888,000.

Under § 4262.10(g), a plan sponsor may, but is not required to, file a lock-in application as a plan's initial application. The lock-in application contains basic information about the plan and a statement of intent to lock-in base data. PBGC needs the information in the lock-in application to ensure that a plan sponsor intends to lock-in the plan's base data. In this renewal, PBGC is modifying language in the lock-in application's form and instructions to add information for filing a ''revised lock-in application.'' A revised lock-in application may be used by a plan that was not eligible for SFA on the filing date of the plan's earlier lock-in application, based on the information available on that date. PBGC estimates that over the next 3 years an annual average of 23 plan sponsors will file lock-in applications, including revised lock-in applications, for SFA with an average annual hour burden of 23 hours and an average annual cost burden of $18,400.

Under § 4262.16(i), a plan sponsor of a plan that has received SFA must file an Annual Statement of Compliance with the restrictions and conditions under section 4262 of ERISA and part 4262 once every year through 2051. PBGC needs the information in the Annual Statement of Compliance to ensure that a plan is compliant with the imposed restrictions and conditions. Based on its experience with these filings, PBGC is clarifying the types of documents to be attached to the Annual Statement of Compliance and adding a template that filers may use to submit the required account and investment information. PBGC estimates that over the next 3 years an annual average of 120 plan sponsors will file Annual Statements of Compliance with an average annual hour burden of 240 hours and an average annual cost burden of $288,000.

Under § 4262.15(c), a plan sponsor of a plan with benefits that were suspended under sections 305(e)(9) or 4245(a) of ERISA must issue notices of reinstatement to participants and beneficiaries whose benefits were suspended and are being reinstated. Participants and beneficiaries need the notice of reinstatement to better understand the calculation and timing of their reinstated benefits and, if applicable, make-up payments. PBGC estimates that over the next 3 years an average of 5 plans per year will be required to send notices to participants with suspended benefits. PBGC estimates that these notices will impose an average annual hour burden of 10 hours and average annual cost burden of $10,000.

Finally, under § 4262.16(d), (f), (g) and (h) a plan sponsor must file a request for a determination from PBGC for approval for an exception under certain circumstances for SFA conditions under § 4262.16 relating to reductions in contributions, transfers or mergers, and withdrawal liability. PBGC needs the information required for such a request to determine whether to approve an exception from the specified condition of receiving SFA. PBGC estimates that over the next 3 years, PBGC will receive an average of 3.2 requests per year for determinations. PBGC estimates an average annual hour burden of 15.6 hours and average annual cost burden of $44,000.

The estimated aggregate average annual hour burden for the next 3 years for the information collections in part 4262 is 937.6 hours for employer and fund office administrative, clerical, and supervisory time. The estimated aggregate average annual cost burden for the next 3 years for the information collections in part 4262 is $2,248,400, for approximately 5,621 contract hours assuming an average hourly rate of $400 for work done by outside actuaries and attorneys. The actual hour burden and cost burden per plan will vary depending on plan size and other factors.

The existing collections of information were approved under OMB control number 1212–0074 (expires July 31, 2023). On February 15, PBGC published in the **Federal Register** (at 88 FR 9914) a notice informing the public of its intent to request an extension of the collections of information. No comments were received. PBGC is requesting that OMB extend approval of the collections (with modifications) for 3 years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Issued in Washington, DC.

Hilary Duke,

Assistant General Counsel for Regulatory Affairs, Pension Benefit Guaranty Corporation.

BILLING CODE 7709–02–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–203, OMB Control No. 3235–0195]

Proposed Collection; Comment Request; Extension: Rule 17Ab2–1 and Form CA–1

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information provided for in Rule 17Ab2–1 (17 CFR 240.17Ab2–1) and Form CA–1: Registration of Clearing Agencies (17 CFR 249b.200) under the Securities Exchange Act of 1934 (''Exchange Act'') (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget (''OMB'') for extension and approval.

Rule 17Ab2–1 and Form CA–1 require clearing agencies to register with the Commission and to meet certain requirements with regard to, among other things, the clearing agency's organization, capacities, and rules. The information is collected from the clearing agency upon the initial application for registration on Form CA–1. Thereafter, information is collected by amendment to the initial Form CA–1 when changes in circumstances that render certain information on Form CA–1 inaccurate, misleading, or incomplete necessitate modification of the information previously provided to the Commission.

The Commission uses the information disclosed on Form CA–1 to (i) determine whether an applicant meets the standards for registration set forth in Section 17A of the Exchange Act, (ii) enforce compliance with the Exchange Act's registration requirement, and (iii) provide information about specific registered clearing agencies for compliance and investigatory purposes. Without Rule 17Ab2–1, the Commission could not perform these duties as statutorily required.

The Commission staff estimates that the average Form CA–1 requires approximately 340 hours to complete and submit for approval, and that on average, the Commission receives one application each year. The Commission staff estimates that completion of an initial Form CA–1 will result in an internal cost of compliance of approximately $145,360 per year. The Commission staff estimates that it receives one amendment per year, and that an amendment requires approximately 60 hours of the exempt or registered clearing agency's staff time. The Commission staff estimates that amendment of a filed Form CA–1 will result in an internal cost of compliance of approximately $28,020 per year. Therefore, the aggregate hour burden is approximately 400 hours per year (340 + 60) and the aggregate internal cost of compliance is approximately $173,380 per year ($145,360 + $28,020).

The external costs associated with work on Form CA–1 include fees charged by outside lawyers and accountants to assist the applicant or registrant to collect and prepare the information sought by the form (though such consultations are not required by the Commission). The Commission staff estimates that these external costs are more likely when novel questions arise under a new application, rather than under periodic review and amendment. The staff estimates an annual external cost of 45 hours of an Attorney's time (estimated at $462 per hour) and 10 hours of a Senior Accountant's time (estimated at $241 per hour) for preparation of the Form CA–1, resulting in an aggregate external cost of approximately $23,200 per year ($20,790 + $2,410).

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by July 31, 2023.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Please direct your written comments to: David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or send an email to: *PRA_Mailbox@sec.gov.*

Dated: May 25, 2023.

J. Lynn Taylor,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–97559; File No. SR–FICC–2023–007]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Fees for a New Pair-Off Message That May Be Processed Through the EPN Service

May 24, 2023.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on May 18, 2023, Fixed Income Clearing Corporation (''FICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. FICC filed the proposed rule change pursuant to section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f)(2) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of modifications to the FICC Mortgage-Backed Securities Division (''MBSD'') EPN Rules (''EPN Rules'') to adopt fees for a pair-off Message that EPN Users may process through the EPN Service, as described in greater detail below.[5]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Overview of the Proposed Rule Change

The purpose of this proposed rule change is to adopt fees for a new Message that EPN Users may process through the EPN Service relating to the pair-off of trades in their TBA (''to-be-announced'') contracts in agency mortgage-backed securities. The proposed fees are designed to recover the cost of providing this service and would be set at a rate that is lower than the rate charged for other Messages processed through the EPN Service to incentivize EPN Users to use this voluntary service.

Background

While some trades in agency mortgage-backed securities submitted to FICC for processing on a TBA basis are ''specified pool trades'' (transactions

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(2).

[5] Capitalized terms not defined herein are defined in the EPN Rules, as applicable, *available at https://www.dtcc.com/legal/rules-and-procedures.*

based on a particular set of underlying mortgages), most are not. For those trades, a critical step in the trading and settlement of the TBA contracts is for sellers to inform their buyer counterparties what pools of mortgages will be delivered to satisfy that trade. The EPN Service provides EPN Users with an automated way to transmit this information regarding their TBA contracts through Messages.

The new pair-off Message, which will be announced to EPN Users by Important Notice, would allow EPN Users that are buyers in a TBA contract transaction to notify their seller counterparties of which trades in that transaction should pair-off. Currently messages regarding pair-offs are transmitted between buyers and sellers by electronic mail using spreadsheets, which creates some risk that information sharing is incomplete, incorrect, inconsistent and not timely. In connection with its ongoing dialogue with mortgage-backed security industry participants, FICC was asked to develop and offer pair-off Messages through the EPN Service to minimize these risks. By automating and standardizing the transmittal of this information, the pair-off Messages would reduce those risks to the mortgage-backed securities market. The new pair-off Messages will be designed similarly to the other Messages transmitted through the EPN Service, where buyers would receive an acknowledgement message verifying delivery and receipt of the initial pair-off Message, and sellers would have the ability to return a ''DK'' message if the trades or the terms of the trades in the pair-off Message are not known. The use of this Message will be voluntary and would allow users to eliminate the current manual process of transmitting information regarding the pair-off of transactions.

The proposed rate for the new pair-off Message was designed to be consistent with the fees for other Messages currently processed through the EPN Service. Rates for current Messages are charged per million because these Messages involve pools to satisfy TBA trades and specified pool trades, where the proposed rate for the new pair-off Messages would be charged per Message because these Messages would be sent at the TBA trade-level.

In this fee structure, fees are generally lower for Messages submitted earlier in the day to encourage submission of the initial Message earlier in the day to allow for a response Message to be sent on the same day. Therefore, the rate increases for initial Messages submitted later in the day. The fee is lower for Messages submitted after the 3:00 p.m. cut-off time for response Messages. The fee rates being proposed are slightly lower than the rates for processing other Messages through the EPN Service, which both reflects the low cost to FICC to build these additional Messages and incentivizes EPN Users to use this new, voluntary service.

Proposed Rule Change

FICC is proposing to adopt fees for the use of the pair-off Messages that may be processed through the EPN Service. The proposed fees would be identified in the EPN Service Schedule of Charges in the EPN Rules, as follows: pair-off send Messages would be $0.10 per Message if sent from the opening of business to 1:00 p.m., $0.50 per Message if sent from 1:00 p.m. to 2:00 p.m., $1.00 per Message if sent from 2:00 p.m. to 3:00 p.m., and $0.75 per Message if sent from 3:00 p.m. to close of business; pair-off receive Messages would be $0.50 per Message if received from opening of business to 1:00 p.m., $0.25 per Message if received from 1:00 p.m. to 3:00 p.m., and $0.15 per Message if received from 3:00 p.m. to close of business.

FICC is also proposing to clarify the descriptions of other fees for the EPN Service to use consistent language in describing fees in the EPN Service Schedule of Charges. For example, these proposed changes would refer to the beginning of the business day as ''Opening of Business'' and refer to end of the business day as ''Close of Business'' consistently in the Schedule of Charges. These clarifications would avoid any confusion in the descriptions of these fees in the EPN Service Schedule of Charges, making them clearer to EPN Users.

Member Impact

The proposed fees would impact all EPN Users who voluntarily elect to use the new pair-off Messages. As described above, the proposed fee rates are designed to be comparable to the current fee rates charged for Messages processed through the EPN Service and would be set at a rate that is lower than the rates for processing other Messages in order to incentivize EPN Users to use this voluntary service.

Implementation Timeframe

FICC would implement the proposed rule change on August 31, 2023.

2. Statutory Basis

FICC believes this proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a registered clearing agency. Specifically, FICC believes this proposal is consistent with sections 17A(b)(3)(D) and (b)(3)(F) of the Act[6] and Rule 17Ad–22(e)(23)(ii), as promulgated under the Act,[7] for the reasons described below.

Section 17A(b)(3)(D) of the Act requires that the rules of a clearing agency provide for the equitable allocation of reasonable dues, fees, and other charges among its participants.[8] FICC believes the proposed fees would be allocated equitably among EPN Users that use the new pair-off Message. FICC believes that the proposed fees are reasonable because they are based on the expected investment costs to develop pair-off Messages and such fee changes are expected to recover such investment and operating costs in an appropriate timeframe. As noted above, FICC has set these fees at a rate that is lower than the rate charged for other Messages processed through the EPN Service to incentivize EPN Users to use this voluntary service. FICC notes that once the proposed pair-off Message fees are implemented, the fees would be periodically reviewed under FICC's procedures to determine whether FICC is continuing to appropriately control its costs and to regularly review pricing levels against costs of operation.

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions.[9] FICC believes the proposed rule change is consistent with section 17A(b)(3)(F) of the Act because the new pair-off Message would automate and standardize the transmittal of information related to transaction pair-offs, minimizing the risks presented by the current process of transmitting this information through electronic mail and spreadsheets. By reducing the risks that information sharing is incomplete, incorrect, inconsistent and not timely, the new pair-off Messages would promote the prompt and accurate clearance and settlement of securities transactions and, therefore, are consistent with the requirements of the Act, in particular section 17A(b)(3)(F) of the Act.[10]

Rule 17Ad–22(e)(23)(ii) under the Act requires a covered clearing agency to establish, implement, maintain and enforce written policies and procedures reasonably designed to provide sufficient information to enable participants to identify and evaluate the risks, fees, and other material costs they

[6] 15 U.S.C. 78q–1(b)(3)(D) and (b)(3)(F).

[7] 17 CFR 240.17Ad–22(e)(23)(ii).

[8] 15 U.S.C. 78q–1(b)(3)(D).

[9] 15 U.S.C. 78q–1(b)(3)(F).

[10] *Id.*

incur by participating in the covered clearing agency.[11] The proposed fees would be clearly and transparently published in the EPN Service Schedule of Charges in the EPN Rules, which are available on a public website,[12] thereby enabling EPN Users to identify the fees associated with using the new pair-off Messages. Additionally, the proposed changes to clarify the descriptions of other fees for the EPN Service would make those descriptions consistent throughout the EPN Service Schedule of Charges, reducing the risk of any confusion in the descriptions of these fees and making them clearer to EPN Users. As such, FICC believes the proposed rule change is consistent with Rule 17Ad–22(e)(23)(ii) under the Act.[13]

(B) Clearing Agency's Statement on Burden on Competition

FICC does not believe the proposed rule changes would impact competition. The proposed rule changes would adopt fees for the use of a voluntary service. Because EPN Users would not be obligated to use the new pair-off Messages, FICC believes the proposed rule change would not have any impact on competition.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

FICC has not received or solicited any written comments relating to this proposal. If any written comments are received, they will be publicly filed as an Exhibit 2 to this filing, as required by Form 19b–4 and the General Instructions thereto.

Persons submitting comments are cautioned that, according to Section IV (Solicitation of Comments) of the Exhibit 1A in the General Instructions to Form 19b–4, the Commission does not edit personal identifying information from comment submissions. Commenters should submit only information that they wish to make available publicly, including their name, email address, and any other identifying information.

All prospective commenters should follow the Commission's instructions on how to submit comments, available at *https://www.sec.gov/regulatory-actions/how-to-submit-comments.* General questions regarding the rule filing process or logistical questions regarding this filing should be directed to the Main Office of the Commission's Division of Trading and Markets at *tradingandmarkets@sec.gov* or 202–551–5777.

FICC reserves the right to not respond to any comments received.

III. Date of Effectiveness of the Proposed Rule Change, and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act[14] and paragraph (f) of Rule 19b–4 thereunder.[15] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–FICC–2023–007 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–FICC–2023–007. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FICC and on DTCC's website (*http://dtcc.com/legal/sec-rule-filings.aspx*). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–FICC–2023–007 and should be submitted on or before June 21, 2023.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

SEC File No. 270–638, OMB Control No. 3235–0690]

Proposed Collection; Comment Request; Extension: Form SF–3

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Form SF–3 (17 CFR 239.45) is a short form registration statement used for non-shelf issuers of asset-backed securities to register a public offering of their securities under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*). Form SF–3 takes approximately 1,380.50 hours per response and is filed by approximately 71 issuers annually. The information collected is intended to ensure that the information required to be filed by the Commission permits verification of compliance with securities law requirements and assures

[11] 17 CFR 240.17Ad–22(e)(23)(ii).

[12] *See supra* note 5.

[13] 17 CFR 240.17Ad–22(e)(23)(ii).

[14] 15 U.S.C. 78s(b)(3)(A).

[15] 17 CFR 240.19b–4(f).

[16] 17 CFR 200.30–3(a)(12).

the public availability of such information in the asset-backed securities market. We estimate that 25% of the 1,380.50 hours per response (345.12 hours) is prepared by the issuer for a total annual reporting burden of 24,504 hours (345.12 hours per response × 71 responses).

Written comments are invited on: (a) whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication by July 31, 2023.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Please direct your written comment to David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov.*

Dated: May 24, 2023.

Sherry R. Haywood,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #17943 and #17944; CALIFORNIA Disaster Number CA–00381]

Presidential Declaration of a Major Disaster for the HOOPA VALLEY TRIBE

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for the Hoopa Valley Tribe (FEMA–4707–DR), dated 05/23/2023. Incident: Severe Winter Storms and Mudslides. Incident Period: 02/14/2023 through 03/05/2023.

DATES: Issued on 05/23/2023.

Physical Loan Application Deadline Date: 07/24/2023.

Economic Injury (EIDL) Loan Application Deadline Date: 02/23/2024.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President's major disaster declaration on 05/23/2023, applications for disaster loans may be filed at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Area: (Physical Damage and Economic Injury Loans): Hoopa Valley Tribe.

Contiguous Counties (Economic Injury Loans Only): Humboldt.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	4.750
Homeowners without Credit Available Elsewhere	2.375
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Non-Profit Organizations with Credit Available Elsewhere	2.375
Non-Profit Organizations without Credit Available Elsewhere	2.375
For Economic Injury:	

	Percent
Businesses & Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Non-Profit Organizations without Credit Available Elsewhere	2.375

The number assigned to this disaster for physical damage is 17943 B and for economic injury is 17944 0.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration # 17939 and # 17940; WEST VIRGINIA Disaster Number WV–00058]

Administrative Declaration of a Disaster for the State of West Virginia

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Administrative declaration of a disaster for the State of West Virginia dated 05/24/2023.

Incident: Flooding.

Incident Period: 08/14/2022 through 08/15/2022.

DATES: Issued on 05/24/2023.

Physical Loan Application Deadline Date: 07/24/2023.

Economic Injury (EIDL) Loan Application Deadline Date: 02/26/2024.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's disaster declaration, applications for disaster loans may be filed at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Kanawha.
Contiguous Counties:

West Virginia: Boone, Clay, Fayette, Jackson, Lincoln, Nicholas, Putnam, Raleigh, Roane.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	4.375
Homeowners without Credit Available Elsewhere	2.188
Businesses with Credit Available Elsewhere	6.080
Businesses without Credit Available Elsewhere	3.040
Non-Profit Organizations with Credit Available Elsewhere	1.875
Non-Profit Organizations without Credit Available Elsewhere	1.875
For Economic Injury:	
Businesses & Small Agricultural Cooperatives without Credit Available Elsewhere	3.040
Non-Profit Organizations without Credit Available Elsewhere	1.875

The number assigned to this disaster for physical damage is 17939 6 and for economic injury is 17940 0.

The State which received an EIDL Declaration # is West Virginia.

BILLING CODE 8026–09–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36699 [1]]

Norfolk Southern Railway Company and The Cincinnati, New Orleans, and Texas Pacific Railway Company—Acquisition—Trustees of the Cincinnati Southern Railway

AGENCY: Surface Transportation Board.

ACTION: Decision No. 1 in Docket No. FD 36699; Notice of Acceptance of Application and a Related Verified Notice of Exemption; Issuance of Procedural Schedule.

SUMMARY: The Surface Transportation Board (STB or Board) is accepting for consideration an application (Application) and a related verified notice of exemption, both filed on May 1, 2023, by Norfolk Southern Railway Company (NSR), on behalf of itself and its wholly owned subsidiary, The Cincinnati, New Orleans and Texas Pacific Railway Company (CNOTP) (collectively, Applicants). The Application seeks Board approval for NSR to acquire from the Trustees of the Cincinnati Southern Railway (Trustees) and operate approximately 338.2 miles of rail line between Cincinnati, Ohio, and Chattanooga, Tenn., known as the Cincinnati Southern Railway (the CSR Line or the Line). This proposal is referred to as the Transaction. In the verified notice of exemption, Applicants seek authority for CNOTP to continue to operate the Line following its acquisition by Applicants. The Board finds that the Application is complete. The Board also makes the preliminary determination, based on the evidence presented in the Application, that the Transaction is a minor transaction. The Board emphasizes that this is not a final determination and may be rebutted by subsequent filings and evidence submitted into the record for this proceeding.

DATES: The effective date of this decision is May 31, 2023. Any person who wishes to participate in this proceeding as a Party of Record must file, no later than June 15, 2023, a notice of intent to participate. All comments, protests, requests for conditions, and any other evidence and argument in opposition to the Application and related filings, including filings by the U.S. Department of Justice (DOJ) and the U.S. Department of Transportation (DOT), must be filed by June 30, 2023. Responses to comments, protests, requests for conditions, other opposition, and rebuttal in support of the Application or related filings must be filed by July 28, 2023. *See* Appendix (Procedural Schedule). A final decision in this matter will be served no later than September 11, 2023. Further procedural orders, if any, would be issued by the Board, if necessary.

ADDRESSES: Any filing submitted in this proceeding must be filed with the Board either via e-filing or in writing addressed to: Surface Transportation Board, 395 E Street SW, Washington, DC 20423–0001. In addition, one copy of each filing must be sent (and may be sent by email only if service by email is acceptable to the recipient) to each of the following: (1) Secretary of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590; (2) Attorney General of the United States, c/o Assistant Attorney General, Antitrust Division, Room 3109, Department of Justice, Washington, DC 20530; (3) Applicants NSR and CNOTP's representative, Raymond A. Atkins, Sidley Austin LLP, 1501 K Street NW,

[1] This decision embraces *The Cincinnati, New Orleans & Texas Pacific Railway—Intra-Corporate Family Operation Exemption—Line of Norfolk Southern Railway,* Docket No. FD 36699 (Sub–No. 1).

Washington, DC 20005; and (4) any other person designated as a Party of Record on the service list.

FOR FURTHER INFORMATION CONTACT: Valerie Quinn at (202) 740–5567. If you require an accommodation under the Americans with Disabilities Act, please call (202) 245–0245.

SUPPLEMENTARY INFORMATION: Applicants seek the Board's prior review and authorization pursuant to 49 U.S.C. 11323–25 and 49 CFR part 1180 for NSR to acquire from the Trustees and to operate the CSR Line pursuant to an asset purchase and sale agreement executed by Applicants and the Trustees on November 21, 2022 (PSA). (Appl. 1, 10.) NSR is a Class I rail carrier that operates approximately 19,300 route miles in the District of Columbia and 21 states, including Tennessee, Kentucky, and Ohio. (*Id.* at 18.) CNOTP, a wholly owned subsidiary of NSR and Class III rail carrier, has leased and operated the CSR Line since 1881. (*Id.* at 1–2, 18.) Applicants state that the CSR Line is operated as part of the NSR system, and that, although the lease between CNOTP and the Trustees would be terminated as part of this Transaction, Applicants intend for CNOTP to operate the Line for the foreseeable future. (*Id.* at 2.)

According to Applicants, the CSR Line extends from the City of Cincinnati, Hamilton County, Ohio, at the point of connection to NSR estimated to be at or near calculated milepost 0.0±, and proceeds south to the point of connection to The Alabama Great Southern Railroad Company (another subsidiary of NSR) in the City of Chattanooga, Hamilton County, Tenn., at or near calculated milepost 338.2±, together with all branch lines, sidings, and other appurtenant railroad facilities associated therewith.[2] (*Id.* at 3.)

Financial Arrangements. According to Applicants, no new securities would be issued in connection with the Transaction. (*Id.* at 13.) Applicants anticipate that the purchase price would be paid from cash on hand and/or NSR's credit facilities. (*Id.*)

Passenger Service Impacts. Applicants state that there would be no impact on commuter or other passenger service because there are no current passenger or commuter operations on the CSR Line and the Transaction does not contemplate introducing such operations. (*Id.* at 23–24.)

Discontinuances/Abandonments. Applicants state that rail service would not be abandoned or discontinued on any portion of the CSR Line as a result of the Transaction. (*Id.* at 24.) However, the Application does state that, as part of the PSA, Applicants have agreed to engage in good faith negotiations with the State of Ohio to donate to the state as interim trail manager under the National Trails System Act, 16 U.S.C. 1241–51, on customary terms and subject to obtaining any required STB authority, an approximately 21.52-mile NSR line in Ohio that is not part of, and does not connect with, the CSR Line. (Appl. 24.)

Public Interest Considerations. Applicants state that the Transaction would not result in a lessening of competition, creation of a monopoly, or restraint of trade in any region of the United States. (*Id.* at 13.) According to Applicants, the Transaction would not reduce the number of competitive options available to any shipper, as the number of rail carriers serving each shipper on the Line would remain the same and Applicants would maintain the same interchanges with the same connecting rail carriers at the same locations where those rail carriers currently interchange traffic. (*Id.* at 14.) Applicants maintain that they do not plan to make operational changes as a result of the Transaction. (*Id.*)

Time Schedule for Consummation. Applicants state that the Transaction is scheduled to be consummated as soon as practicable after the Board's decision approving the Application becomes effective and upon satisfaction of all other conditions precedent to closing set forth in the PSA, including approval of the proposed sale by the voters of Cincinnati. (*Id.* at 11.)

Environmental Impacts. Applicants state that, pursuant to 49 CFR 1105.6(c)(1), no environmental reporting is required because the Transaction would not lead to operational changes exceeding the thresholds for environmental review in 49 CFR 1105.7(e)(4) & (5). (Appl. 21.)

Historic Preservation Impacts. Applicants state that no historic report is required because the Transaction is ''for the purpose of continued rail operations where further STB approval is required to abandon any service and there are no plans to dispose of or alter properties subject to STB jurisdiction that are 50 years old or older.'' (*Id.* at 22–23 (quoting 49 CFR 1105.8(b)(1)).)

Labor Impacts. Applicants state that they do not plan to make any changes to the number of employees working on the Line in connection with the Transaction and that no NSR or CNOTP employees would be dismissed or displaced as a result of the Transaction. (Appl. 16.) Applicants also assert that, in accordance with 49 U.S.C. 11326 and Board precedent, the appropriate employee protection conditions to impose are those set out in *New York Dock Railway—Control—Brooklyn Eastern District Terminal,* 360 I.C.C. 60 (1979), *aff'd sub nom. New York Dock Railway* v. *United States,* 609 F.2d 83 (2d Cir. 1979), as modified by *Wilmington Terminal Railroad—Purchase & Lease—CSX Transportation Inc.,* 6 I.C.C.2d 799, 814–26 (1990), *aff'd sub nom. Railway Labor Executives' Association* v. *Interstate Commerce Commission,* 930 F.2d 511 (6th Cir. 1991). (Appl. 16.)

Related Filing. In Docket No. FD 36699 (Sub-No. 1), Applicants have filed a verified notice of exemption pursuant to 49 CFR 1180.2(d)(3) for an intra-corporate family transaction that would permit CNOTP to continue to operate the CSR Line following consummation of the Transaction in Docket No. FD 36699, which would terminate CNOTP's existing lease with the Trustees. Applicants state that they intend to consummate the intra-corporate family transaction contemporaneously with the Transaction in Docket No. FD 36699. As a condition to use of this exemption, Applicants state that they do not object to imposition of the employee protective conditions set out in *Mendocino Coast Railway, Inc.—Lease & Operate,* 354 I.C.C. 732 (1978), as modified in *Mendocino Coast Railway, Inc.—Lease & Operate—California Western Railroad,* 360 I.C.C. 653 (1980).

Primary Application and Related Filing Accepted. The Board finds that the proposed Transaction would be a ''minor transaction'' under 49 CFR 1180.2(c), and the Board accepts the Application for consideration because it is in substantial compliance with the applicable regulations governing minor transactions. *See* 49 U.S.C. 11321–26; 49 CFR part 1180. The Board is also accepting for consideration the related verified notice of exemption filed in Docket No. FD 36699 (Sub–No. 1), which is also in compliance with the applicable regulations. The Board reserves the right to require the filing of supplemental information as necessary to complete the record.

When a transaction does not involve the merger or control of two or more Class I railroads, the Board's treatment differs depending upon whether the transaction would have ''regional or national transportation significance.'' 49 U.S.C 11325. Under 49 CFR 1180.2, a transaction that does not involve two or

[2] Applicants state that, given the long history of the CSR Line, the identification of specific mileposts at the Line's termini has varied slightly over time but that the description of the Line provided in the Application here is correct. (Appl. 3 n.9.)

more Class I railroads is to be classified as ''minor''—and thus not having regional or national transportation significance—if a determination can be made that either: (1) the transaction clearly will not have any anticompetitive effects; or (2) any anticompetitive effects of the transaction will clearly be outweighed by the transaction's anticipated contribution to the public interest in meeting significant transportation needs. A transaction not involving the control or merger of two or more Class I railroads is to be classified as ''significant'' if neither of these determinations can be made.

Nothing in the record thus far suggests that the Transaction would have anticompetitive effects. According to Applicants, the purpose of the Transaction is to convert Applicants' interest in the CSR Line from a leasehold to fee simple ownership, eliminating the need for increasingly complicated and time-consuming negotiations to periodically extend and modify the lease. (Appl. 3.) As such, Applicants state that they will continue to operate the CSR Line in the same manner that they have operated it for more than a century, with no change in service patterns or train operations anticipated as a result of the Transaction. (*Id.* at 7.) Specifically, they claim that there will be no reduction in the competitive options available to shippers and that no connecting railroad will be foreclosed from interchange. (*Id.*) Applicants state that where, as here, no shipper would have fewer competitive rail options and longstanding operations would continue unchanged as a result of a transaction, the Board has found it is unlikely such a transaction would have anticompetitive effects. (*Id.* at 6.)

Therefore, based on the information provided in the Application, the Board finds the proposed Transaction to be a minor transaction under 49 CFR 1180.2(c). Such a categorization does not mean that the proposed Transaction is insignificant or not of importance. Indeed, after the record in the proceeding is fully developed, the Board will carefully review the proposed Transaction to make certain that it does not substantially lessen competition, create a monopoly, or restrain trade, and that any anticompetitive effects are outweighed by the public interest. *See* 49 U.S.C 11324(d)(1)–(2). Pursuant to the applicable standard, the Board may also impose conditions on the Transaction.

Procedural Schedule. Any person who wishes to participate in this proceeding as a Party of Record must file a notice of intent to participate no later than June 15, 2023; all comments, protests, requests for conditions, and any other evidence and argument in opposition to the Application, including filings by DOJ and DOT, must be filed by June 30, 2023; and responses to comments, protests, requests for conditions, and other opposition on the transportation merits of the Transaction must be filed by July 28, 2023. The Board is required to issue ''a final decision by the 45th day after the date on which it concludes the evidentiary proceedings,'' 49 U.S.C. 11325(d)(2), and will do so here.[3] The Board reserves the right to adjust the schedule as circumstances may warrant.

For further information regarding dates, see the Appendix to this decision.

Notice of Intent To Participate. Any person who wishes to participate in this proceeding as a Party of Record must file with the Board, no later than June 15, 2023, a notice of intent to participate, accompanied by a certificate of service indicating that the notice has been properly served on the Secretary of Transportation, the Attorney General of the United States, and Applicants' representative.

If a request is made in the notice of intent to participate to have more than one name added to the service list as a Party of Record representing a particular entity, the extra name(s) will be added to the service list as a ''Non-Party.'' Any person designated as a Non-Party will receive copies of Board decisions, orders, and notices but not copies of official filings. Persons seeking to change their status must accompany that request with a written certification that they have complied with the service requirements set forth at 49 CFR 1180.4 and any other requirements set forth in this decision.

Service on Parties of Record. Each Party of Record will be required to serve upon all other Parties of Record, within 10 days of the service date of this decision, copies of all filings previously submitted by that party (to the extent such filings have not previously been served upon such other parties). Each Party of Record will also be required to file with the Board, within 10 days of the service date of this decision, a certificate of service indicating that the service required by the preceding sentence has been accomplished. Every filing made by a Party of Record after the service date of this decision must have its own certificate of service indicating that all Parties of Record on the service list have been served with a copy of the filing. Members of the United States Congress and Governors are not Parties of Record and need not be served with copies of filings, unless any Member or Governor has requested to be, and is designated as, a Party of Record.

Service of Decisions, Orders, and Notices. The Board will serve copies of its decisions, orders, and notices on those persons who are designated on the service list as a Party of Record or Non-Party. All other interested persons are encouraged to obtain copies of decisions, orders, and notices via the Board's website at *www.stb.gov.*

Access to Filings. Under the Board's rules, any document filed with the Board (including applications, pleadings, etc.) shall be promptly furnished to interested persons on request, unless subject to a protective order. 49 CFR 1180.4(a)(3). The Application and other filings in this proceeding will be furnished to interested persons upon request and will also be available on the Board's website at *www.stb.gov.* In addition, the Application may be obtained from Applicants' representative at the address indicated above.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

1. The Application filed in Docket No. FD 36699 and the related verified notice of exemption filed in Docket No. FD 36699 (Sub–No. 1) are accepted for consideration.

2. The parties to this proceeding must comply with the procedural schedule shown in the Appendix to this decision and the procedural requirements described in this decision.

3. This decision is effective on May 31, 2023.

Decided: May 24, 2023.

By the Board, Board Members Fuchs, Hedlund, Oberman, Primus, and Schultz.

Kenyatta Clay,

Clearance Clerk.

BILLING CODE 4915–01–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notification of the Second United States-Mexico-Canada Agreement Labor Council Meeting

AGENCY: Office of the United States Trade Representative.

ACTION: Notice and request for comments.

SUMMARY: The Parties to the United States-Mexico-Canada Agreement (USMCA) intend to hold the second meeting of the Labor Council on June 28–29, 2023. The meeting will include a closed in-person government-to-government Labor Council session in Mexico City, Mexico, and a virtual public session on implementation of the USMCA labor chapter. The Office of the United States Trade Representative (USTR) and the U.S. Department of Labor (DOL) invite comments and questions from the public in advance of the virtual public session.

DATES:

June 1, 2023: Details for registering for participation in the virtual public session will be made available on DOL and USTR websites.

June 12, 2023: The deadline for submission of questions or comments.

June 29, 2023, 1:00 p.m. to 3:30 p.m. EDT: The Labor Council will convene a virtual public session.

ADDRESSES: Submit written questions and/or comments to *ILAB-Outreach@DOL.gov* and *MBX.USTR.USMCAhotline@ustr.eop.gov.* All submissions must include the subject line *USMCA Labor Council Meeting.*

FOR FURTHER INFORMATION CONTACT: Brenna Dougan, Deputy Assistant U.S. Trade Representative for Labor Affairs, USTR at 202–395–7391, or Samantha Tate, Division Chief for USMCA Monitoring and Enforcement, Office of Trade and Labor Affairs, Bureau of International Labor Affairs, DOL at 202–693–4920.

SUPPLEMENTARY INFORMATION:

I. Background

Article 23.14 of the USMCA establishes a Labor Council composed of senior government representatives from trade and labor ministries that must meet within one year of the date of entry into force of the USMCA. On June 29, 2021, the Labor Council conducted the initial meeting. Thereafter, the Labor Council will meet every two years unless the Parties decide otherwise. The June 28–29, 2023, meeting is being held pursuant to this requirement. The Labor Council may consider any matter within the scope of Chapter 23 (Labor) and perform other functions as the Parties may decide.

In conducting its activities, including meetings, the Labor Council must provide a means for receiving and considering the views of interested persons on matters related to the labor chapter. If practicable, meetings will include a public session or other means for Labor Council members to meet with the public to discuss matters relating to the implementation of Chapter 23 (Labor). Accordingly, the Parties invite questions and comments from interested persons, and the July 28–29, 2023, Labor Council meeting will include a virtual public session.

Labor Council decisions and reports are made by consensus and will be made publicly available unless the Council decides otherwise. The Labor Council issues a joint summary report or statement on its work at the end of each Council meeting.

II. Labor Council Meeting

The Labor Council will include an in-person, government-to-government closed session to discuss the Parties' Chapter 23 (Labor) obligations and a virtual public session. The government-to-government session will not be open to the public.

III. Public Session on USMCA Chapter 23 Implementation

The Labor Council invites members of the public to participate in a virtual public session on June 29, 2023, from 1:00 p.m. to 3:30 p.m. EDT, to address USMCA Chapter 23 (Labor) implementation. Details for registering for virtual participation in the public session will be made available by June 1, 2023, on both the USTR website at *https://ustr.gov/issue-areas/labor,* and the DOL website at *https://www.dol.gov/agencies/ilab/our-work/trade/labor-rights-usmca.*

IV. Comments

The Labor Council is interested in the views of interested persons on matters related to the USMCA labor chapter. DOL and USTR invite specific comments and questions about the labor chapter that could be addressed at the public session. When preparing comments and questions, we encourage submitters to refer to Chapter 23 of the USMCA (*https://ustr.gov/sites/default/files/files/agreements/FTA/USMCA/Text/23-Labor.pdf*) and the USMCA Interagency Labor Committee for Monitoring and Enforcement Interim Procedural Guidelines for Petitions Pursuant to the USMCA (*https://www.federalregister.gov/documents/2020/06/30/2020-14086/interagency-labor-committee-for-monitoring-and-enforcement-procedural-guidelines-for-petitions*).

Joshua Kagan,

Assistant U.S. Trade Representative for Labor, Office of the United States Trade Representative.

BILLING CODE 3390–F3–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Public Notice of Airport Improvement Program Property Release; Bremerton National Airport, Bremerton, Washington

AGENCY: Federal Aviation Administration (FAA), Transportation (DOT).

ACTION: Notice of request to release airport improvement program property.

SUMMARY: Notice is being given that the FAA is considering a request from the Port of Bremerton, Washington to waive the Airport Improvement Program property requirements for approximately 20.65 acres of airport property located at Bremerton National Airport, Bremerton, Washington.

DATES: Comments are due within 30 days of the date of the publication of this notice in the **Federal Register**. Emailed comments can be provided to Ms. Mandi M. Lesauis, Compliance Specialist, Northwest Mountain Region, *mandi.lesauis@faa.gov.*

FOR FURTHER INFORMATION CONTACT: Mandi M. Lesauis, Compliance Specialist, Northwest Mountain Region, *mandi.lesauis@faa.gov,* (206) 231–4140.

SUPPLEMENTARY INFORMATION: The subject properties are located in the southwest section of the airport. This release will allow the Port of Bremerton

[4] The final decision will become effective 30 days after it is served.

to sell 20.65 acres to develop Airport Industrial Way and provide access to industrial airport properties. There will be proceeds generated from the proposed release of this property for capital improvements at the airport. The Port of Bremerton, Washington will receive not less than fair market value for the property and the revenue generated from the sale will be used for airport purposes. It has been determined through study that the subject 20.65 acres will not be needed for aeronautical purposes.

Authority: Title 49.U.S.C. 47153(c).

Issued in Des Moines, Washington, on May 24, 2023.

Warren D. Ferrell,

Manager, Seattle Airports District Office.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2010–0203; FMCSA–2011–0089; FMCSA–2014–0213; FMCSA–2015–0115; FMCSA–2016–0007; FMCSA–2018–0057; FMCSA–2019–0027]

Qualification of Drivers; Exemption Applications; Epilepsy and Seizure Disorders

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew exemptions for seven individuals from the requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) that interstate commercial motor vehicle (CMV) drivers have ‘‘no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause loss of consciousness or any loss of ability to control a CMV.’’ The exemptions enable these individuals who have had one or more seizures and are taking anti-seizure medication to continue to operate CMVs in interstate commerce.

DATES: The exemptions are applicable on June 10, 2023. The exemptions expire on June 10, 2025. Comments must be received on or before June 30, 2023.

ADDRESSES: You may submit comments identified by the Federal Docket Management System Docket No. FMCSA–2010–0203, Docket No. FMCSA–2011–0089, Docket No. FMCSA–2014–0213, Docket No. FMCSA–2015–0115, Docket No. FMCSA–2016–0007, Docket No. FMCSA–2018–0057, or Docket No. FMCSA–2019–0027 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov/,* insert the docket number (FMCSA–2010–0203, FMCSA–2011–0089, FMCSA–2014–0213, FMCSA–2015–0115, FMCSA–2016–0007, FMCSA–2018–0057, or FMCSA–2019–0027) in the keyword box and click ‘‘Search.’’ Next, sort the results by ‘‘Posted (Newer-Older),’’ choose the first notice listed, and click on the ‘‘Comment’’ button. Follow the online instructions for submitting comments.
- *Mail:* Dockets Operations; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, 1200 New Jersey Avenue SE, Washington DC 20590–0001 between 9 a.m. and 5 p.m. ET Monday through Friday, except Federal Holidays.
- *Fax:* (202) 493–2251.

To avoid duplication, please use only one of these four methods. See the ‘‘Public Participation’’ portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, FMCSA, DOT, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001, (202) 366–4001, *fmcsamedical@dot.gov.* Office hours are from 8:30 a.m. to 5 p.m. ET Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Dockets Operations, (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (Docket No. FMCSA–2010–0203, Docket No. FMCSA–2011–0089, Docket No. FMCSA–2014–0213, Docket No. FMCSA–2015–0115, Docket No. FMCSA–2016–0007, Docket No. FMCSA–2018–0057, or Docket No. FMCSA–2019–0027), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *www.regulations.gov/,* insert the docket number (FMCSA–2010–0203, FMCSA–2011–0089, FMCSA–2014–0213, FMCSA–2015–0115, FMCSA–2016–0007, FMCSA–2018–0057, or FMCSA–2019–0027) in the keyword box and click ‘‘Search.’’ Next, sort the results by ‘‘Posted (Newer-Older),’’ choose the first notice listed, click the ‘‘Comment’’ button, and type your comment into the text box on the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. FMCSA will consider all comments and material received during the comment period.

B. Viewing Comments

To view comments go to *www.regulations.gov.* Insert the docket number (FMCSA–2010–0203, FMCSA–2011–0089, FMCSA–2014–0213, FMCSA–2015–0115, FMCSA–2016–0007, FMCSA–2018–0057, or FMCSA–2019–0027) in the keyword box and click ‘‘Search.’’ Next, sort the results by ‘‘Posted (Newer-Older),’’ choose the first notice listed, and click ‘‘Browse Comments.’’ If you do not have access to the internet, you may view the docket online by visiting Dockets Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. ET Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

C. Privacy Act

In accordance with 49 U.S.C. 31315(b)(6), DOT solicits comments from the public on the exemption request. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov.* As described in the system of records notice DOT/ALL 14 (Federal Docket Management System), which can be reviewed at *https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices,* the comments are searchable by the name of the submitter.

II. Background

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statutes also allow the Agency to renew exemptions at the end of the 5-year period. However, FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver's medical certification.

The physical qualification standard for drivers regarding epilepsy found in 49 CFR 391.41(b)(8) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause the loss of consciousness or any loss of ability to control a CMV.

In addition to the regulations, FMCSA has published advisory criteria [1] to assist Medical Examiners in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce.

The seven individuals listed in this notice have requested renewal of their exemptions from the epilepsy and seizure disorders prohibition in § 391.41(b)(8), in accordance with FMCSA procedures. Accordingly, FMCSA has evaluated these applications for renewal on their merits and decided to extend each exemption for a renewable 2-year period.

III. Request for Comments

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b), FMCSA will take immediate steps to revoke the exemption of a driver.

IV. Basis for Renewing Exemptions

In accordance with 49 U.S.C. 31136(e) and 31315(b), each of the seven applicants has satisfied the renewal conditions for obtaining an exemption from the epilepsy and seizure disorders prohibition. The seven drivers in this notice remain in good standing with the Agency, have maintained their medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period. In addition, for commercial driver's license (CDL) holders, the Commercial Driver's License Information System and the Motor Carrier Management Information System are searched for crash and violation data. For non-CDL holders, the Agency reviews the driving records from the State Driver's Licensing Agency. These factors provide an adequate basis for predicting each driver's ability to continue to safely operate a CMV in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each renewal applicant for a period of 2 years is likely to achieve a level of safety equal to that existing without the exemption.

As of June 10, 2023, and in accordance with 49 U.S.C. 31136(e) and 31315(b), the following seven individuals have satisfied the renewal conditions for obtaining an exemption from the epilepsy and seizure disorders prohibition in the FMCSRs for interstate CMV drivers:

John D. Archer (MO)
Brian Brown (PA)
Marvin Fender (CO)
Daniel Gast (KS)
Denton Hineline (WA)
Steve Hunsaker (ID)
Bryan R. Jones (PA)

The drivers were included in docket number FMCSA–2010–0203, FMCSA–2011–0089, FMCSA–2014–0213, FMCSA–2015–0115, FMCSA–2016–0007, FMCSA–2018–0057, or FMCSA–2019–0027. Their exemptions are applicable as of June 10, 2023 and will expire on June 10, 2025.

V. Conditions and Requirements

The exemptions are extended subject to the following conditions: (1) each driver must remain seizure-free and maintain a stable treatment during the 2-year exemption period; (2) each driver must submit annual reports from their treating physicians attesting to the stability of treatment and that the driver has remained seizure-free; (3) each driver must undergo an annual medical examination by a certified ME, as defined by § 390.5; and (4) each driver must provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy of his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the exemption when driving, for presentation to a duly authorized Federal, State, or local enforcement official. The exemption will be rescinded if: (1) the person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).

VI. Preemption

During the period the exemption is in effect, no State shall enforce any law or regulation that conflicts with this exemption with respect to a person operating under the exemption.

VII. Conclusion

Based on its evaluation of the seven exemption applications, FMCSA renews the exemptions of the aforementioned drivers from the epilepsy and seizure disorders prohibition in § 391.41(b)(8). In accordance with 49 U.S.C. 31136(e) and 31315(b), each exemption will be valid for 2 years unless revoked earlier by FMCSA.

Larry W. Minor,
Associate Administrator for Policy.

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[Docket No. FTA–2023–0010]

National Public Transportation Safety Plan

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of availability of proposed National Public Transportation Safety Plan; request for comments.

SUMMARY: The Federal Transit Administration (FTA) invites public comment on a proposed update to the National Public Transportation Safety Plan (National Safety Plan). The proposed National Safety Plan would rescind and replace the plan that FTA published in January 2017. This new version of the National Safety Plan, like the version before it, is intended to guide the national effort to manage safety risk in our nation's public transportation systems. It lays out a performance-based approach to reduce

injuries and fatalities on transit systems under FTA's safety jurisdiction. This proposed update to the plan also supports the USDOT's long-term goal of reaching zero fatalities on America's roadways, as presented in the January 2022 National Roadway Safety Strategy, by adding safety performance criteria for vehicular collisions and providing voluntary standards for bus transit. Pursuant to the Bipartisan Infrastructure Law, the proposed update to the plan also establishes performance measures for Public Transportation Agency Safety Plan (PTASP) risk reduction programs.

DATES: Comments should be filed by July 31, 2023. FTA will consider comments received after that date to the extent practicable.

ADDRESSES: You may send comments, identified by docket number FTA–2023–0010, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for sending comments.
- *Fax:* (202) 493–2251.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery/Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

Instructions: All submissions received must include the agency name and docket number (FTA–2023–0010). All comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or comments received, go to *https://www.regulations.gov* or the street address listed above.

FOR FURTHER INFORMATION CONTACT: For program matters, contact Arnebya Belton, Office of Transit Safety and Oversight, 202–366–7546 or *arnebya.belton@dot.gov.* For legal matters, contact Emily Jessup, Office of Chief Counsel, 202–366–8907 or *emily.jessup@dot.gov.* Office hours are from 8:30 a.m. to 5:00 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: This notice provides a summary of the proposed update to the National Safety Plan. The National Safety Plan itself is not included in this notice; instead, the proposed update to the plan is posted in the docket for this notice. FTA seeks public comment on this proposed National Safety Plan.

Background and Overview

Congress first directed FTA to create and implement a National Public Transportation Safety Plan (National Safety Plan) under the Moving Ahead for Progress in the 21st Century (MAP–21) Act, which authorized a new Public Transportation Safety Program (Safety Program) at 49 U.S.C. 5329 (Pub. L. 112–141). The Safety Program was reauthorized by the Fixing America's Surface Transportation (FAST) Act (Pub. L. 114–94) and again by the Bipartisan Infrastructure Law, enacted as the Infrastructure Investment and Jobs Act (Pub. L. 117–58).

On February 5, 2016, FTA first published a **Federal Register** notice (81 FR 6372) seeking comment on a proposed National Safety Plan. FTA conducted a number of public outreach sessions and a webinar series related to the proposed National Safety Plan and the PTASP notice of proposed rulemaking that also was published in the **Federal Register** on February 5, 2016 (81 FR 6343). Subsequently, FTA published a summary of the final changes to the National Safety Plan and responses to comments in the **Federal Register** (82 FR 5628) and published the finalized plan to the docket and on FTA's website.

Pursuant to 49 U.S.C. 5329(b), the National Safety Plan includes several elements intended to improve the safety of all public transportation systems that receive Federal financial assistance under 49 U.S.C. Chapter 53. The Bipartisan Infrastructure Law adds new elements that must be included in the National Safety Plan, including:

- Safety performance measures related to the PTASP safety risk reduction program;
- In consultation with the Secretary of Health and Human Services, precautionary and reactive actions required to ensure public and personnel safety and health during an emergency; and
- Consideration, where appropriate, of performance-based and risk-based methodologies.

The Bipartisan Infrastructure Law also requires that the minimum safety performance standards for public transportation vehicles used in revenue operations take into consideration, to the extent practicable, innovations in driver assistance technologies and driver protection infrastructure, where appropriate, and a reduction in visibility impairments that contribute to pedestrian fatalities.

This proposed update continues to mature FTA's National Public Transportation Safety Program and addresses new requirements in the Bipartisan Infrastructure Law to further advance transit safety.

The proposed National Safety Plan is organized into the following three chapters:

Chapter I Keeping Safety the Top Priority: Chapter I presents FTA's safety vision, strategic objectives, and an overview of FTA's National Public Transportation Safety Program; and provides high-level safety performance data related to FTA safety priorities.

Chapter II Safety Performance Criteria: Chapter II defines safety performance measures for transit agencies required to establish and implement Agency Safety Plans under FTA's PTASP regulation.

Chapter III Voluntary Minimum Safety Standards: Chapter III provides voluntary minimum safety performance standards for public transportation vehicles used in revenue operations and voluntary minimum safety standards to ensure the safe operation of public transportation systems, as well as recommended practices that may support the transit industry in assessing and mitigating safety risk and help improve safety performance.

FTA is considering the development of mandatory standards for Rail Transit Roadway Worker Protection and Transit Worker Fitness for Duty through rulemaking that may supersede the voluntary minimum safety standards and recommended practices identified in Category A of Chapter III.

Voluntary Safety Standards and Recommended Practices

The proposed National Safety Plan includes an updated list of voluntary minimum safety standards and recommended practices to support mitigation of safety risk and to improve safety performance. The list in the proposed National Safety Plan includes new categories beyond those included in the 2017 version of plan, such as transit worker safety, pedestrian and bicyclist safety, rail grade crossing safety, tunnel ventilation, and fire safety. The proposed list is more comprehensive than the list in 2017, incorporating the large number of voluntary minimum safety standards and recommended practices issued and identified in the intervening years. The proposed list is also organized into a greater number of discrete categories to

facilitate understanding. Pursuant to the Bipartisan Infrastructure Law, the proposed National Safety Plan also includes precautionary and reactive actions to ensure public and personnel safety and health during an emergency. FTA coordinated with the Department of Health and Human Services on the list of such recommended actions.

Safety Performance Measures

Under FTA's PTASP regulation, transit agencies must set performance targets based on the safety performance measures established in the National Safety Plan (49 CFR 673.11(a)(3)). The 2017 version of the National Safety Plan identified seven performance measures to support PTASP performance target setting. The proposed update to the National Safety Plan increases the number of these measures from seven to 14. The proposed seven new performance measures are: Collision Rate, Pedestrian Collision Rate, Vehicular Collision Rate, Transit Worker Fatality Rate, Transit Worker Injury Rate, Assaults on Transit Workers, and Rate of Assaults on Transit Workers. These additions are consistent with the Bipartisan Infrastructure Law's increased focus on bus collisions and transit worker safety.

In addition to the measures described above, the Bipartisan Infrastructure Law directs FTA to include performance measures for the safety risk reduction program required under 49 U.S.C. 5329(d)(1)(I) in the National Safety Plan. In accordance with 49 U.S.C. 5329(b)(2)(A), the National Safety Plan identifies eight measures required for safety risk reduction programs, which apply to Section 5307 recipients that serve an urbanized area of 200,000 or more: Major Events, Major Events Rate, Collisions, Collisions Rate, Injuries, Injury Rate, Assaults on Transit Workers, and Rate of Assaults on Transit Workers. FTA is proposing these measures as they align with the goals of the safety risk reduction program as described in FTA's PTASP notice of proposed rulemaking, namely reducing the number and rates of safety events and injuries, reducing vehicular and pedestrian safety events involving transit vehicles, and mitigating assaults on transit workers. FTA's proposal to identify Major Events, Major Event Rate; Injuries, and Injury Rate as performance measures addresses the safety risk reduction program goal of reducing the number and rates of safety events and injuries. Similarly, proposing Collisions and Collisions Rate as performance measures addresses the goal of reducing vehicular and pedestrian safety events and the measures of Assaults on Transit Workers and Rate of Assaults on Transit Workers address the reduction of assaults on transit workers.

Pursuant to the Bipartisan Infrastructure Law, performance targets for the risk reduction program must be set based on a 3-year rolling average of NTD data. FTA recognizes that certain transit agencies may not yet report detailed safety event information to the NTD that corresponds to these performance measures. FTA proposed requirements to address this situation in a Notice of Proposed Rulemaking for the PTASP regulation, which was published in the **Federal Register** on April 26, 2023 (88 FR 25336).

FTA also notes that some of the eight performance measures for the safety risk reduction program overlap with the 14 measures for all agencies subject to the PTASP regulation described above. Section 5307 recipients that serve an urbanized area with a population of 200,000 or more may choose to use the same target for both measures, provided the target for the safety risk reduction program is based on a 3-year rolling average of NTD data.

Performance targets for a risk reduction program at 49 U.S.C. 5329(d)(4) are not required until FTA has finalized the National Safety Plan to include these performance measures. However, nothing precludes an Agency from implementing a risk reduction program in advance and updating it once the performance measures are finalized.

In the National Safety Plan, FTA also proposes that when setting safety performance targets, transit agencies should use the following modal groups: rail, fixed route bus, and non-fixed route bus. This is responsive to 49 U.S.C. 5329(b)(2)(A), which requires FTA to identify safety performance criteria for all modes of public transportation.

After reviewing and responding to the comments received on this proposed National Safety Plan, FTA will issue a final National Safety Plan.

Nuria I. Fernandez,

Administrator.

[FR Doc. 2023–11551 Filed 5–30–23; 8:45 am]

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2022–0057]

Czinger Vehicles—Grant of Petition for Temporary Exemption From Certain Requirements of FMVSS No. 205, Glazing Materials

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice of grant of petition for temporary exemption.

SUMMARY: This notice grants the petition of Czinger Vehicles (Czinger) for a temporary exemption from windshield abrasion resistance requirements in Federal motor vehicle safety standard (FMVSS) No. 205, Glazing materials. The basis for the exemption is that compliance with these requirements would cause substantial economic hardship to a low volume manufacturer that has tried in good faith to comply with the standard. This action follows our publication in the **Federal Register** of a document announcing receipt of Czinger's petition and soliciting public comments. We received no comments on the petition.

DATES: The exemption from the windshield abrasion resistance requirements in FMVSS No. 205 is effective from August 1, 2023, through July 31, 2026.

FOR FURTHER INFORMATION CONTACT: Callie Roach, Office of the Chief Counsel, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE, Washington, DC 20590. Telephone: 202–366–2992; Fax: 202–366–3820.

SUPPLEMENTARY INFORMATION: NHTSA is granting a request from Czinger for a temporary exemption from FMVSS No. 205's abrasion resistance requirements for windshields for its first vehicle model, the 21C. In accordance with statutory and regulatory requirements, NHTSA is granting the petition on the basis that compliance would cause substantial economic hardship to a low volume manufacturer that has tried in good faith to comply with the standard.

I. Relevant Legal Authority and Regulations

a. Statutory and Regulatory Requirements for Temporary Exemptions

NHTSA is responsible for promulgating and enforcing FMVSS designed to improve motor vehicle safety. Generally, a manufacturer may

not manufacture for sale, sell, offer for sale, or introduce or deliver for introduction into interstate commerce a vehicle that does not comply with all applicable FMVSS.[1] There are limited exceptions to this general prohibition.[2] One path permits manufacturers to petition NHTSA for an exemption for noncompliant vehicles under specified statutory bases.[3]

The National Traffic and Motor Vehicle Safety Act (Safety Act), codified at 49 U.S.C. Chapter 301, authorizes the Secretary of Transportation to exempt, on a temporary basis and under specified circumstances, and on terms the Secretary considers appropriate, motor vehicles from a FMVSS or bumper standard. This authority is set forth at 49 U.S.C. 30113. The Secretary has delegated the authority for implementing this section to NHTSA.[4]

The Safety Act authorizes NHTSA (by delegation) to grant, in whole or in part, a temporary exemption to a vehicle manufacturer if certain specified findings are made.[5] The agency must find that the exemption is consistent with the public interest and the objectives of the Safety Act.[6] In addition, exemptions under § 30113 must meet one of four bases. Czinger petitioned under the first of these bases, asserting that ''[c]ompliance with the standard[s] [from which exemption is sought] would cause substantial economic hardship to a manufacturer that has tried to comply with the standard[s] in good faith.'' [7]

NHTSA established 49 CFR part 555, *Temporary Exemption from Motor Vehicle Safety and Bumper Standards,* to implement the statutory provisions concerning temporary exemptions. The requirements in 49 CFR 555.5 state that the petitioner must set forth the basis of the petition by providing the information required under 49 CFR 555.6, and the reasons why the exemption would be in the public interest and consistent with the objectives of the Safety Act. A petition submitted on the substantial economic hardship basis must include the information specified in 49 CFR 555.6(a).

b. FMVSS No. 205 Abrasion Requirements for Windshields

Czinger's petition seeks an exemption from requirements in FMVSS No. 205, *Glazing materials.* The purpose of FMVSS No. 205 is to reduce injuries (*e.g.,* lacerations) resulting from impact to glazing surfaces, to ensure a necessary degree of transparency in motor vehicle windows for driver visibility, and to minimize the possibility of occupants being thrown through the windows in collisions. Most of the performance requirements for glazing, including the requirement from which Czinger is seeking an exemption, are found in an industry standard, the ''American National Standards Institute American National Standard for Safety Glazing Materials for Glazing Motor Vehicles and Motor Vehicle Equipment Operating on Land Highways-Safety Standard'' (ANSI/SAE Z26.1–1996), which FMVSS No. 205 incorporates by reference.

Czinger's petition concerns requirements for glazing used in windshields. ANSI/SAE Z26.1–1996 sets forth groups of tests that must be met by different glazing types. The standard explains that ''[s]afety glazing materials in motor vehicles shall comply with the applicable requirements listed in this subsection and shown in Table 1, item by item, in definite groupings of tests that are appropriate for the safety glazing material in question, and the location in the motor vehicle in which it is intended to be used.'' For example, AS–1 glazing may be used anywhere in vehicles, including windshields. For AS–1 glazing, the standard provides a list of tests for Laminated Glass, Class 1 Multiple Glazed Unit, and Class 2 Multiple Glazed Unit. For AS–1 glazing, Laminated Glass must meet Test Nos. 1, 2, 3, 4, 9, 12, 15, 18, and 26. As additional background, although the glazing Czinger proposes to use in the 21C's windshield is polycarbonate, NHTSA does not prohibit the material from being used in windshields so long as it meets the tests for one of the glazing types listed. In an interpretation letter issued to Exatec, LLC, NHTSA explained that glazing types not listed in the standard may be used interchangeably with the corresponding materials specified in the standard if and when other materials are developed that possess properties such that they meet one or another of the prescribed groups of tests.[8]

Czinger's petition requests an exemption from the requirement that windshield glazing meet the performance requirements specified in Test 18 for abrasion resistance. The purpose of these abrasion requirements is to ensure that the glazing will resist scratching that can distort the driver's view and thus reduce visibility. Test 18 requires that a specimen of the glazing be subjected to abrasion for 1000 cycles in the manner described in ANSI/SAE Z26.1–1996 section 5.17. After the specimen has been abraded, the amount of light scattered by the specimen cannot exceed 2.0%.

II. Czinger's Petition and Supplemental Information

In accordance with 49 U.S.C. 30113 and the procedures in 49 CFR part 555, Czinger submitted a petition on December 12, 2021 for a temporary exemption from the windshield abrasion resistance requirements in FMVSS No. 205, *Glazing materials.* In addition to its original petition, Czinger submitted supplemental information on October 21, 2022 and January 25, 2023. Copies of these materials have been placed in the docket identified at the beginning of this document.

In its petition, Czinger describes itself as a small volume start-up producer of innovative sports cars.[9] Czinger states that it is located in Los Angeles, California and was founded in 2021.[10] Czinger further states that once production begins in 2023, the company will produce approximately 50 cars per year worldwide.[11] The forecasted production and US sales estimates provided by Czinger indicate that, for the three years for which Czinger is requesting a temporary exemption, Czinger expects to sell a total of 55 vehicles to the U.S. market.[12]

Czinger is seeking an exemption for the Czinger 21C model. Czinger states that its 21C model vehicle is presently under development and describes it as a hypercar comprised of lightweight materials and a hybrid electric powertrain system as its foundation.[13] Czinger describes the 21C as a ''still-in development high-technology, ultra-high performance, high quality Hypercar.'' [14] In support of these assertions, Czinger states that the ''advanced AI developed multi material chassis delivers exceptional light weight'' and that the ''crash structures have been optimized to deliver the safest Hyper-sports car on the

[12] *Id.* at page 6. Czinger's forecasted production for Model Years 2023, 2024, and 2025 is 20 vehicles, 50 vehicles, and 10 vehicles respectively, with an estimated 10 vehicles, 35 vehicles, and 10 vehicles sold in the U.S. in those years.

[13] *Id.* at page 3.

[14] *Id.*

market.'' [15] Czinger states that the 21C's hybrid power train uses the world's most power-dense production internal combustion engine as its foundation and that the total strong hybrid system delivers a peak output of 1250hp (1233bhp).[16] Czinger also states that the 21C's low drag configuration optimizes light-weighting and aerodynamics, allowing for greater efficiency at all speeds.[17] Czinger explains that the vehicle is produced using Additive Manufacturing technology (the industrial production name for 3D printing), which Czinger asserts requires less material, less energy, and less infrastructure than current, widely used, production techniques.[18]

Requested Exemption. Czinger petitioned for an exemption from requirements for glazing it seeks to use in the windshield of Czinger's 21C model on the basis that compliance with the standard would cause substantial economic hardship. Czinger is seeking a temporary exemption for three years to allow Czinger to produce a total of 55 noncompliant vehicles. Czinger states that all glazing on the 21C will be compliant with FMVSS No. 205 with the exception of the windshield.[19] Czinger states that it believes that the only requirements with which the windshield will not comply are those regarding abrasion resistance.[20] In supplemental information submitted on October 21, 2022, Czinger confirmed that the glazing for use in the 21C's windshield meets the performance requirements in Tests Nos. 1, 2, 3, 4, 9, 12, 15, and 26.[21] Czinger also confirmed that the glazing is not expected to meet the abrasion requirements in Test 18.[22]

Eligibility. To be eligible for a temporary exemption on the substantial economic hardship basis, the petitioner's total motor vehicle production in the most recent year of production must be not more than 10,000 vehicles.[23] To demonstrate compliance with this requirement, and pursuant to 49 CFR 555.6(a)(2)(v), Czinger stated that it has not produced any motor vehicles to date.[24]

Substantial economic hardship. In support of its claim that compliance with the windshield abrasion resistance requirements would cause substantial economic hardship, Czinger states that it is experiencing substantial economic hardship, which would be exacerbated by the denial of its exemption petition.[25] Czinger states that it has 35 employees and has been operating since 2021 without any sales.[26] Czinger states that, in a best-case scenario, the company will have two additional years with high expenses and no sales while product development for the 21C is completed.[27]

Czinger states that compliance with the standard would result in an extra loss of $38 million.[28] Czinger explains that the additional loss would result from an additional $3.7 million in research and development costs, a 6-month delay bringing its product to market, and a 15% loss of 21C sales due to the car's modified aesthetics (as necessitated by a laminated windshield).[29]

In further support of its petition, Czinger notes that it has been enduring the pandemic and supply chain issues which, Czinger states, are straining even established OEMs.[30] As a startup, Czinger states that it needs flexibility to endure these challenges.[31]

In supplemental information submitted in January 2023, Czinger indicated that because compliance with the windshield abrasion requirement cannot be achieved with the current vehicle design, in the absence of an exemption, Czinger would produce the vehicle for export only.[32] Czinger states that if the exemption were granted for only one year, production for the U.S. market would be reduced by 82% and if the exemption were granted for only two years, production for the U.S. market would be reduced by 18%.[33] Czinger also provided information about the losses of revenue associated with those lower production volumes. Given the development costs Czinger has incurred to date, Czinger states that the loss in sales from not being able to sell vehicles in the U.S. would result in financial failure of the business.[34]

In the supplemental information submitted in January 2023, Czinger also stated that if the exemption were granted, it would allow Czinger to ''secure revenue essential to its continuation and allow it to form a bridge to be in a position to produce vehicles where such exemptions are not required.'' [35] Czinger noted that while its first vehicle model, the 21C, is a low volume hypercar, the majority of Czinger's future business will be higher volume vehicles such as the Czinger Hyper GT which was revealed at Monterey Car Week in August 2022.[36] This subsequent model, Czinger states, uses a more conventional windshield shape for which the production material will be conventional automotive glass.[37]

Good Faith Efforts to Comply. Pursuant to 49 CFR 555.6(a)(2), a petition for a temporary exemption made under the substantial economic hardship basis must include a description of the petitioner's efforts to comply with the standard for which the exemption is sought. In support of its petition, Czinger asserts that it has put considerable good faith efforts into FMVSS compliance.[38]

Czinger states that the 21C has been designed with in-line seating for two occupants.[39] The central seating position, Czinger explains, allows for an extremely streamlined frontal profile, reducing drag and improving fuel economy, as well as improving performance.[40] Czinger states that this ''fighter jet'' design has been highly regarded by media, and more significantly, by prospective clients.[41]

Czinger states that the wrap-around cockpit is realized by a unique double curvature windscreen, which, during prototype stage, was produced in polycarbonate by Isoclima, a supplier in Europe.[42] Czinger states that the hard polycarbonate material passes European requirements in accordance with ECE R43, including impact performance and abrasion haze resistance.[43] Czinger states that because of the extreme size and shape of the 21C windshield, its supplier, Isoclima, has informed Czinger that the windshield must be produced in polycarbonate.[44]

Czinger also states that at an early stage in the development of the 21C, its supplier Isoclima indicated that it believed the polycarbonate windshield would meet regulatory requirements for the USA market.[45] Czinger states that, based on this information, Czinger

proceeded with the polycarbonate windshield development.[46]

Czinger also states that, despite Isoclima's opinion that the shape of the 21C windshield could not be produced in laminated glass, Czinger invested time and money trying to develop, with the help of multiple suppliers, the planned windshield shape in laminated glass.[47] Specifically, Czinger states that it engaged a Los Angeles-based artisan glazing supplier and tried 20 iterations of tooling strategies, produced over 80 test samples, and made some design changes to improve formability.[48] These efforts, Czinger states, have not been successful.[49]

In supplemental information submitted in January 2023, Czinger stated that it undertook a comprehensive assessment, at a cost of $80,000, of different physical manufacturing techniques with its windshield supplier, Isoclima, in a concerted effort to achieve a solution to manufacture the windshield in glass.[50] The effort, Czinger states, proved unsuccessful and the conclusion was that due to the geometry of the windshield, it could not be manufactured in glass.[51]

Public Interest. Czinger asserts that granting its petition is consistent with the public interest and the Safety Act for the following reasons:

1. The 21C model range will comply with all FMVSS other than the windshield requirements in FMVSS 205.[52]
2. The exempted cars will have a windshield that meets all EU requirements.[53]
3. The exempted cars will not present an unacceptable safety risk.[54]

In support of this assertion, Czinger states that the 21C's crash performance and occupant protection performance is improved when using polycarbonate, compared to laminated glass.[55] Czinger states that it has run crash simulations measuring occupant injury criteria and observes overall improvements in performance with the polycarbonate windshield.[56] Czinger also notes that the 21C has an advanced dynamic knee bolster that deploys a lower IP surface to minimize forward movement of the driver in an unbelted impact scenario.[57] Czinger asserts that this system, in combination with the highly optimized DAPS (Divergent Adaptive Production System) front crash structure, virtually negates the possibility of head impact to the windshield.[58]

As regards visibility, Czinger states its belief that since polycarbonate windshields are permitted in aircrafts, the risks of unacceptable impaired driver visibility due to abrasion *are de minimis.* Czinger also states that 21C's windshield glazing passes the European requirements for abrasion haze resistance in ECE R43.[59] In supplemental information submitted in October 2022, Czinger stated that the 21C's polycarbonate windshield will also meet all of the required tests for AS–4 glazing, which is rigid plastic glazing for use in specific areas of vehicles.[60] AS–4 glazing is required to meet Test Nos. 2, 10, 13, 16, 17, 19, 20, 21, and 24 . In support of its assertion that the 21C's windshield glazing meets the AS–4 requirements, Czinger submitted a copy of a 2016 third party laboratory test report that states that the 3mm and 6mm thick samples of the Isoclima material, which Czinger states that it is using in its windshield, have passed Item 4 (AS4) testing. A copy of this report is included in Czinger's supplementary submission from October 2022 and available in the docket identified at the beginning of this notice.

4. The 21C will be produced in the U.S. in very low numbers and will not be used daily due to its unconventional design.[61]

In support of this assertion, Czinger states that the 21C will be a hand-built specialty car, high-priced and with an unusual design.[62] Czinger states that it believes owners of 21C vehicles will use their vehicles occasionally, rather than for regular transportation, and predicts that the 21Cs will be driven a mere 350 miles per year.[63] In support of this estimate, Czinger provided data for 33 hypercars valued at more than $1 million demonstrating an average accumulated mileage of 259 miles per year.[64] Czinger provided additional information about the hypercar use case in the supplemental information submitted in October 2022. Czinger stated that a hypercar is atypical when compared to more conventional vehicles.[65] Czinger also stated that it performed some analysis with a sample of 53 hypercars across a range of brands and found that the average mileage of these vehicles was 266 miles per year.[66]

5. The denial of the exemption request could have a negative effect on U.S. employment.[67]

In support of this assertion, Czinger states that denying its petition could result in temporary job loses, not only at Czinger, but throughout its distribution chain.[68] Czinger also notes that the same negative effect was identified by NHTSA in a 2006 decision notice granting an exemption to Ferrari.[69]

6. The 21C's innovative technology is a benefit to the public.[70]

In support of this assertion, Czinger states that the 21C offers very significant public interest benefits—the use of Additive Manufacturing technology, weight-saving technology, advanced hybrid drivetrain technology, and innovative crash protection technology.[71] Czinger states that granting its requested exemption would expedite bringing these technologies to the U.S. market.[72]

Additional Czinger Steps. Czinger states that each 21C sold under an exemption will undergo regular,

frequent inspections, and any windshield with degraded visibility will be identified and replaced free of charge. In supplemental information submitted in October 2022, Czinger stated that it would be willing to install tear offs, which are thin protective films.[73] Czinger states that it could install these films on the windshield and the films could be a regular service item.[74]

III. Request for Public Comment

On July 7, 2022, NHTSA published a notice in the **Federal Register** announcing receipt of Czinger's petition and requesting public comment.[75] The notice provided a 30-day comment period, which closed on August 8, 2022. No comments were received.

IV. Agency Analysis and Decision

In this section we provide our analysis and decision regarding Czinger's temporary exemption request from certain requirements in FMVSS No. 205. As explained below, we are granting Czinger's petition for the 21C to be exempted from the requirement for the glazing materials in the 21C's windshield to meet Test 18. The agency's rationale for this decision is as follows:

Eligibility. As discussed above, a manufacturer is eligible to apply for an economic hardship exemption if its total motor vehicle production in its most recent year of production did not exceed 10,000 vehicles. In its petition, Czinger indicated that at the time of submitting the petition, it had not produced any vehicles for sale and stated that it predicted producing 55 vehicles during the exemption period if an exemption were granted. Accordingly, we have determined that Czinger is eligible to apply for an economic hardship exemption as a low volume manufacturer.

Economic Hardship. Czinger states that compliance with the standard will result in an extra loss of $38 million.[76] Czinger states that it has 35 employees and has been operating since 2021 without any sales.[77] Czinger states that, in a best case scenario, the company will have two additional years with high expenses and no sales while product development for the 21C is completed.[78] Czinger explains that denial of its petition would result in an additional loss of $3.7 million in research and development costs, a 6-month delay bringing its product to market, and an estimated 15% loss of 21C sales due to the car's modified aesthetics (as necessitated by a laminated windshield).[79] The confidential information Czinger submitted in its petition supports its assertion that it is experiencing substantial economic hardship, which would be exacerbated by the denial of its exemption petition.

The touchstone that NHTSA uses in determining the existence of substantial economic hardship is an applicant's financial health, as indicated by its income statements. NHTSA has tended to consider a continuing and cumulative net loss position as strong evidence of hardship.[80] The theory behind NHTSA's rationale is that if a company with a continuing net loss is required to divert its limited resources to resolve a compliance problem on an immediate basis, it may be unable to use those resources to resolve other problems that may affect its viability. The agency has considered this especially important in its treatment of petitioners that are just starting to manufacture vehicles. Based on these factors, we conclude that Czinger has demonstrated the requisite economic hardship.

Good Faith Efforts to Comply. In addition to demonstrating that compliance with the standard for which it is seeking an exemption would result in substantial economic hardship, Czinger must demonstrate that it has made good faith efforts to comply with the standard. NHTSA believes Czinger has met this requirement.

In this present case, NHTSA finds that Czinger had reason to believe that it would be able to create a FMVSS-compliant version of its unique vehicle design. Despite the vehicle's unique inline cockpit seating arrangement necessitating a unique double curvature windshield, Czinger had early assurances that its supplier would be able to produce a windshield that met Czinger's shape requirements while also meeting FMVSS requirements. NHTSA also finds that, at the point that Czinger realized that the 21C's windshield would not meet the abrasion resistance requirements, it took good faith efforts to try to source a compliant windshield. Specifically, we note Czinger's statement that it began efforts in August 2020 to locate a supplier that could produce the windshield shape in laminated glass. Czinger stated that it engaged a Los Angeles-based artisan glazing supplier and tried 20 iterations of tooling strategies, produced over 80 test samples and made some design changes to improve formability. When these efforts were not successful, Czinger sought this exemption.

As explained in its petition and supplemental information from January 2023, Czinger intends to stop production of the 21C for the U.S. market at the end of the requested exemption period because it has determined that it is not possible to create a FMVSS No. 205 compliant windshield in the shape required for the 21C. NHTSA has no reason to doubt this statement and believes that it further demonstrates that Czinger has made good faith efforts to comply with the standard but is unable to do so.

Public Interest. The final consideration for granting an exemption under 49 U.S.C. 30113 and Part 555 is whether granting the exemption is in the public interest and consistent with the objectives of the Safety Act. NHTSA finds that in Czinger's case it is.

In its petition, Czinger cites six reasons that granting its petition is in the public interest. The first four of these reasons are related to safety. Czinger states, first, that the 21C will comply with all applicable FMVSS except for windshield glazing requirements in FMVSS No. 205; second, that the exempted vehicles will have a windshield that meets all EU requirements; third, that the exempted vehicles will not present an unacceptable safety risk; and fourth, that the 21C will be built in small numbers and will not be driven daily due to its unconventional design.

While NHTSA acknowledges that Czinger is only requesting an exemption from one requirement and Czinger will only produce a small number of the vehicles, this information alone is insufficient to demonstrate that granting the exemption is in the public interest. That is, a request for exemption from a single requirement for a small number of vehicles could be inconsistent with the public interest if that one exemption presents an unreasonable risk to motor vehicle safety. For this reason, NHTSA first considered how granting the exemption would impact safety.

Czinger's request is for an exemption from certain requirements for windshield glazing. The abrasion resistance requirements are considered to be crash avoidance requirements because the safety benefit of the requirements is derived from the prevention of crashes as opposed to the mitigation of the results of crash impacts (*i.e.,* crashworthiness). This means that instead of just considering how the exemption may impact the

[73] Czinger's Supplemental Information submitted in October 2022 at page 3.

[80] March 11, 1994 grant of petition of Bugatti Automobili, S.p.A., (59 FR 11649 at 11650).

safety to occupants of an exempt vehicle, we must also consider how the exemption may impact the safety of other road users.

We now turn to Czinger's second point and its assertions about how it is able to assure that the 21C's windshield will provide adequate driving visibility despite not meeting the abrasion resistance requirements in Test No. 18 in ANSI/SAE Z26.1–1996. Czinger asserts that the exemption presents minimal risk to safety because the windshield complies with all European requirements for windshield glazing, including the abrasion resistance requirements in ECE R43. While NHTSA has not conducted a full analysis of the differences between Test 18 and the requirements in ECE R43, NHTSA does consider compliance with the ECE standard to be an indication that the glazing used for the 21C's windshield has some level of resistance to abrasion, which is expected to help maintain driver visibility.

In further support of the assertion that the exemption's safety impact will be limited, Czinger provided information regarding the compliance of the 21C's windshield with another abrasion resistance requirement in ANSI/SAE Z26.1–1996. Specifically, Czinger states that the glazing for use in windshields would meet all requirements for AS–4 glazing, including requirements for abrasion resistance. AS–4 glazing is permitted to be used in specific locations in a motor vehicle and must comply with Test Nos. 2, 10, 13, 16, 17, 19, 20, 21, and 24. The abrasion resistance requirements are found in Test 17 and differ from the requirements in Test 18 in two key aspects. First, while Test 17 and Test 18 use the same test method, specimens are abraded for 100 cycles in Test 17 and 1000 cycles in Test 18. Second, while Test 17 requires that the light scattered by the specimens not exceed 15.0%, Test 18 requires that the light scattered by the specimens not exceed 2.0%. As with the information regarding compliance with ECE R43, NHTSA considers the information regarding compliance with the less stringent AS–4 requirements of Test 17 to be some indication of the windshield's abrasion resistance. This information is supportive of Czinger's assertion that the safety impacts of granting the exemption would be minimal.

The decision to grant or deny an economic hardship exemption under part 555 does not turn on whether the failure to meet the standard is consequential to safety.[81] Instead, the decision is based on whether the petitioner meets the criteria for an economic hardship exemption and whether, on balance, granting the petition is in the public interest and consistent with the Safety Act.[82] In implementing this authority, NHTSA considers the risk associated with the particular noncompliance and determines whether the specific circumstances warrant granting an exemption to a low volume manufacturer that would otherwise face economic hardship. NHTSA also considers whether granting the exemption would introduce a defect that presents an unreasonable risk to safety. The presence of such a defect would implicate NHTSA's defect authority under the Safety Act and NHTSA would be compelled to find that granting the exemption is not consistent with the Safety Act.

Considering the impacts of not meeting the abrasion resistance requirements is just one part of NHTSA's consideration of the overall safety impacts of granting Czinger's exemption request. NHTSA also considers whether there are mitigating factors that may reduce the risk associated with exemption, as well as whether there are any other safety risks associated with the vehicle.

In order to mitigate risks associated with the noncompliance, Czinger proposed two different additional steps that it could take. First, in its petition, Czinger notes that each 21C sold under the exemption would undergo regular, frequent inspections. Czinger states that any windshield with degraded visibility would be identified and replaced free-of-charge. NHTSA believes that this is an appropriate mitigation measure and has decided to grant Czinger's exemption subject to this term.

Czinger also suggested that it could install tear off screen protectors on the windshield that could be periodically replaced. NHTSA does not have sufficient information to evaluate the performance or safety impact of these tear off protectors. In particular, NHTSA does not know whether installation of the tear off protectors could decrease the overall safety of the vehicle. Accordingly, NHTSA is not requiring Czinger to install a protective screen on the 21C's windshield. Additionally, NHTSA cautions Czinger that if it chooses to install such a screen, it should take steps to ensure that the screen does not impair the safety of the windshield.

NHTSA has considered the information provided by Czinger in its petition and supplemental documentation and concludes that noncompliance with the abrasion resistance requirements, if mitigated by frequent inspection, would not result in an unreasonable risk to safety.

Apart from consideration of the risks associated with not meeting the abrasion resistance requirements, NHTSA believes it is appropriate to consider how polycarbonate windshields may differ from glass windshields in other ways. Czinger's petition is novel in that it is requesting an exemption from a requirement that has posed a barrier to the use of polycarbonate glazing and other plastics in vehicle windshields other than in low-speed vehicles.[83] Because of this requirement, windshield glazing has, until now and to NHTSA's knowledge, included a glass component that enabled the glazing to comply with the abrasion resistance requirements in Test 18. Heretofore, there has not been a need for NHTSA to consider whether there are any additional requirements that should be met for windshields beyond those considered for glass glazing. This is an important consideration when evaluating a request for an exemption from the abrasion resistance requirements. Glass and plastic have different characteristics, such that when plastic glazing is permitted for use in other locations in a vehicle (*e.g.,* AS–4 glazing), the glazing must also comply with tests that would not be applicable to glass glazing, such as those for dimensional stability, chemical resistance, weathering, and flammability. By providing information supporting its assertion that the plastic glazing meets requirements for AS–4 glazing, Czinger has addressed much of this concern. However, because AS–4 glazing is not permitted for exterior windows in areas requisite for driving visibility, NHTSA notes that the safety performance of AS–4 plastic glazing is

[81] However, as this glazing does not provide the same level of safety performance as compliant glazing, NHTSA notes that it views the failure to meet the abrasion resistance requirements of Test 18 as ''consequential'' to motor vehicle safety, and not as a basis, *e.g.,* for grant of a petition for inconsequential non-compliance under 49 CFR part 556.

[82] In contrast to the other three statutory bases for exemptions under 49 U.S.C. 30113(b)(3)(B), which articulate safety limitations (''safety level at least equal to the safety level of the standard,'' ''not unreasonably lower the safety level of that vehicle,'' and ''overall safety level at least equal to the overall safety level of nonexempt vehicles''), the economic hardship exemption contains no such limitation. NHTSA is left to apply the exemption in a manner that is in the public interest and consistent with the Safety Act.

[83] 49 CFR 571.205 S5.4.

not equivalent to glass glazing permitted for use in windshields.

Czinger's third statement supporting its assertion that granting its exemption request is in the public interest and consistent with the Safety Act pertains to additional safety features included in the 21C. Czinger asserts that the vehicles will not present an unacceptable safety risk and states that the crash performance and occupant protection performance of the vehicles is improved when using polycarbonate, compared to laminated glazing. Specifically, Czinger states that it has performed crash simulations measuring occupant injury criteria and has observed overall improvements in performance. Czinger also states that the 21C has an advanced knee bolster system to minimize forward movement of the driver in an unbelted impact scenario, reducing the possibility of head impact to the windscreen.

As noted earlier, NHTSA considers, as part of its evaluation of whether granting a petition is in the public interest and consistent with the Safety Act, the impact on safety resulting from the noncompliance. If the noncompliance presented an unreasonable risk to motor vehicle safety, NHTSA would deny the exemption, regardless of whether the vehicles contained other features that increased the overall safety of the vehicles. That is, safety improvements in one area cannot offset unreasonable risks to safety in another. Therefore, NHTSA does not consider Czinger's addition of the advanced *crashworthiness* features described above as having a direct bearing on whether noncompliance with the specific *crash avoidance* feature (glazing abrasion resistance) from which it seeks exemption presents an unreasonable risk to safety. However, NHTSA does consider the addition of such safety features when considering the overall safety impact of the exemption and the public interest benefits of supporting a start-up manufacturer that is working to develop and deploy new safety features. In this context, NHTSA has taken into account Czinger's addition of these advanced crashworthiness features in today's decision.

Czinger's fourth assertion is that the 21C will be produced in very small numbers and will not be used daily due to its unconventional design. Czinger asserts that the safety risks associated with the exemption would be minimal because the exempt vehicles would be driven significantly less than conventional vehicles. In support of this assertion, Czinger states that the 21C vehicles will cost more than $2 million and will likely be purchased as collectors' items and be well cared for throughout their life. Czinger also provided mileage data from other hypercars demonstrating an average of 266 miles traveled per year. NHTSA agrees that it is appropriate to compare the 21C to other hypercars when considering the likely use of the vehicles. For this reason, NHTSA believes that Czinger's projection that the vehicles will be driven, on average, 350 miles a year is reasonable. NHTSA also agrees that limited use on public roads would minimize the risks associated with granting the exemption. Czinger estimates that it will only produce 55 vehicles for the U.S. market over the exemption period. While not impacting the safety of the use of individual vehicles, the limited production run of the vehicle would minimize the overall safety impact of granting the exemption.

Overall, NHTSA has considered the safety risks associated with Czinger's exemption request and believes that the safety impacts of granting the request would be minimal given the limited nature of the exemption, the limited number of vehicles affected, the expected limited use of the vehicles, and Czinger's commitment to inspect the windshields frequently and replace abraded windshields free of charge.

We now turn to Czinger's last two assertions supporting its argument that granting the petition is in the public interest. Czinger states that the denial of the exemption request could have a negative effect on U.S. employment and that the 21C's innovative technology is a benefit to the public. The information Czinger submitted indicating that it would face financial failure if the exemption were denied also supports Czinger's assertion that denying the petition would have a negative impact on U.S. employment, not just on Czinger's 35 employees, but also on its U.S. suppliers. In support of its assertion that the 21C's innovative technology is a benefit to the public, Czinger notes that the 21C uses Additive Manufacturing technology, weight-saving technology, advanced hybrid drivetrain technology, and innovative crash protection technology. NHTSA agrees that both of these points weigh in favor of granting Czinger's petition.

Based on the information Czinger provided, NHTSA believes that, on balance, given the criteria for an economic hardship exemption, the limited nature of the exemption, the limited number of vehicles affected, the expected limited use of the vehicles, and Czinger's commitment to inspect the windshields frequently and replace abraded windshields free of charge, granting Czinger's petition is in the public interest and consistent with the Safety Act. NHTSA believes that the exemption will have minimal impact on motor vehicle safety due to the limited number of vehicles affected and the mitigating factors that reduce the safety risks associated with the requested exemption. NHTSA also finds that granting Czinger's exemption request will help a start-up company manufacture vehicles in the U.S., creating U.S. manufacturing jobs while also supporting development of innovative manufacturing processes in the automotive sector and affording consumers a wider variety of motor vehicle choices.

Number of Exempt Vehicles. The statutory cap for exemptions for low-volume manufacturers seeking a substantial hardship exemption requires that the manufacturer must have an annual world-wide production of 10,000 vehicles or less. Czinger originally petitioned for an exemption of up to 55 vehicles over the exemption period. However, in supplemental information submitted in January 2023, Czinger noted that it intended to produce up to 110 vehicles during the three-year exemption period, a substantial portion of which Czinger estimates will be exported to other countries. This falls well below the statutory cap, and NHTSA is granting the exemption for the entire estimated production of the 21C during the exemption period, for a total of 110 vehicles that may be manufactured and sold under the exemption.

Effective Date of the Exemption. In correspondence from April 5, 2023, Czinger requested that, if granted, its exemption begin on August 1, 2023. NHTSA is granting this request.

V. Conclusion

In consideration of the foregoing, we conclude that compliance with the abrasion resistance requirements for windshields in FMVSS No. 205 would cause substantial economic hardship to a manufacturer that has tried in good faith to comply with the standard. We further conclude that granting an exemption from this requirement would be in the public interest and consistent with the Safety Act.

In accordance with 49 U.S.C. 30113(b)(3)(B)(i), the Czinger 21C is granted NHTSA Temporary Exemption No. EX 23–01, from the abrasion resistance requirements for AS–1 glazing to be used in the 21C's windshield for up to 110 vehicles produced over the exemption period.

This exemption is effective from August 1, 2023 until July 31, 2026.

As explained above, the grant of this exemption is subject to the following conditions.

1. Czinger shall provide inspections of the windshield glazing of each 21C produced under this exemption, free of charge, at least once every six months during the service life of the vehicle.

2. Czinger shall replace, free of charge, the windshield of any exempted 21C vehicle produced under this exemption if the windshield becomes abraded due to normal wear and tear such that the abrasion noticeably impairs driver visibility.

3. Czinger shall report to NHTSA any instances in which it replaced a windshield on a 21C exempted vehicle that had become abraded due to normal use. Such report shall be made no later than 30 calendar days after such replacement.

4. The label required to be affixed pursuant to 49 CFR 555.9 must read in relevant part, ''except for the abrasion resistance requirements for windshields in Standard No. 205, Glazing materials, exempted pursuant to NHTSA Exemption No. EX 23–01.''

Authority: 49 U.S.C. 30113 and 49 U.S.C. 30166; delegations of authority at 49 CFR 1.95 and 49 CFR 501.4.

Issued in Washington, DC, under authority delegated in 49 CFR 1.95 and 501.4.

Sophie Shulman,

Deputy Administrator.

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2020–0044]

Pipeline Safety: Request for Special Permit; Florida Gas Transmission Company, LLC

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA); DOT.

ACTION: Notice.

SUMMARY: PHMSA is publishing this notice to solicit public comments on a request for a special permit received from Florida Gas Transmission Company, LLC (FGT). The special permit request is seeking relief from compliance with certain requirements in the Federal pipeline safety regulations. At the conclusion of the 30-day comment period, PHMSA will review the comments received from this notice as part of its evaluation to grant or deny the special permit request.

DATES: Submit any comments regarding this special permit request by June 30, 2023.

ADDRESSES: Comments should reference the docket number for the specific special permit request and may be submitted in the following ways:

- *E-Gov Website: http://www.Regulations.gov.* This site allows the public to enter comments on any **Federal Register** notice issued by any agency.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Management System: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Docket Management System: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays.

Instructions: You should identify the docket number for the special permit request you are commenting on at the beginning of your comments. If you submit your comments by mail, please submit two (2) copies. To receive confirmation that PHMSA has received your comments, please include a self-addressed stamped postcard. Internet users may submit comments at *http://www.Regulations.gov.*

Note: There is a privacy statement published on *http://www.Regulations.gov.* Comments, including any personal information provided, are posted without changes or edits to *http://www.Regulations.gov.*

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this notice, it is important that you clearly designate the submitted comments as CBI. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to give confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as ''Confidential''; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information you are submitting is CBI. Unless you are notified otherwise, PHMSA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this notice. Submissions containing CBI should be sent to Kay McIver, DOT, PHMSA–PHP–80, 1200 New Jersey Avenue SE, Washington, DC 20590–0001. Any commentary PHMSA receives that is not specifically designated as CBI will be placed in the public docket for this matter.

FOR FURTHER INFORMATION CONTACT:

General: Ms. Kay McIver by telephone at 202–366–0113, or by email at *kay.mciver@dot.gov.*

Technical: Mr. Steve Nanney by telephone at 713–272–2855, or by email at *steve.nanney@dot.gov.*

SUPPLEMENTARY INFORMATION: PHMSA received a special permit request on March 24, 2023, from FGT seeking a waiver from the requirements of 49 CFR 192.611(a)(3)(iii): Change in class location: Confirmation or revision of maximum allowable operating pressure. Section 49 CFR 192.611(a)(3)(iii) requires a pressure test of 0.667 times the alternative maximum allowable operating (Alternative MAOP) for a Class 2 to Class 3 location change. The requested pipeline segment extensions are proposed to be added to special permit Docket Number PHMSA–2020–0044, due to the pipeline segments being contiguous to existing special permit segments.

This special permit is being requested for extending class location changes in lieu of pressure testing or pressure reduction for five (5) special permit segment extensions totaling 10,219 feet (approximately 1.935 miles) of the FGT pipeline system. The proposed special permit segments have been previously pressure tested to either 1,899 pounds per square inch gauge (psig), 1,920 psig, or 1,925 psig. The pipe wall thickness and strength meet the requirements of 49 CFR 192.611(a)(1)(ii) for a Class 2 to Class 3 location change. The pipeline segments are as follows:

Special permit segment No.	Outside diameter (inches)	Line name	Proposed special permit segment extension (feet)	County, state	Class summary	Year installed	Alternative MAOP/test pressure (psig)	Pressure test to alternative MAOP factor
166347	18	St. Petersburg Sarasota Connector.	269	Hillsborough, FL	2 to 3	1992	1,333/1,899	1.424
166349	18	St. Petersburg Sarasota Connector.	3,537	Hillsborough, FL	2 to 3	1992	1,333/1,899	1.424
166250	30	West Leg Station 26–27 MP 160.2.	5,799	Hernando, FL	2 to 3	1994	1,322/1,920	1.452
166256	30	West Leg Station 26–27 MP 160.2.	404	Pasco, FL	2 to 3	1994	1,322/1,920	1.452
166129	36	West Leg Loop	210	Hernando, FL	2 to 3	2007	1,322/1,925	1.456

The FGT pipeline segments have not been pressure tested to a high enough pressure to meet the requirements in 49 CFR 192.611(a)(3)(iii). The special permit segments are included in an existing Alternative MAOP special permit (PHMSA–2008–0077) that allows the special permit segments to operate at class location stress levels that meet 49 CFR 192.620(a)(1).

The special permit request, proposed special permit with conditions, and draft environmental assessment (DEA) for the FGT pipelines are available for review and public comment in Docket No. PHMSA–2020–0044. We invite interested persons to review and submit comments on the special permit request, proposed special permit with conditions, and DEA in the docket. Please submit comments on any potential safety, environmental, and other relevant considerations implicated by the special permit request. Comments may include relevant data.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comment closing date. Comments received after the closing date will be evaluated, if it is possible to do so without incurring additional expense or delay. PHMSA will consider each relevant comment it receives in making a decision to grant or deny this request.

Issued in Washington, DC, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Associate Administrator for Pipeline Safety.

Unless you are notified otherwise, PHMSA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this notice. Submissions containing CBI should be sent to Kay McIver, DOT, PHMSA–PHP–80, 1200 New Jersey Avenue SE, Washington, DC 20590–0001. Any commentary PHMSA receives that is not

specifically designated as CBI will be placed in the public docket for this matter.

FOR FURTHER INFORMATION CONTACT:

General: Ms. Kay McIver by telephone at 202–366–0113, or by email at *kay.mciver@dot.gov.*

Technical: Mr. Steve Nanney by telephone at 713–272–2855, or by email at *steve.nanney@dot.gov.*

SUPPLEMENTARY INFORMATION: PHMSA received a special permit request from FGT on March 24, 2023, seeking a waiver from the requirements of 49 CFR 192.611(a) and (d): Change in class location: Confirmation or revision of maximum allowable operating pressure and 49 CFR 192.619(a): Maximum allowable operating pressure: Steel or plastic pipelines.

This special permit is being requested for extending class location changes in lieu of pipe replacement, pressure reduction, or new pressure tests for Class 1 to 3 location changes on one (1) gas transmission special permit segment totaling 455 feet (approximately 0.086 miles). The pipeline segment is as follows:

Special permit segment number	Outside diameter (inches)	Line name	Length (feet)	Start survey station (feet)	End survey station (feet)	County, state	Number dwell-ings	Year installed	Seam type	MAOP (psig)	Pressure test (psig)
165857 extension	26	Mainline Loop CMPR STA 17–18.	455	2077+36	2081+91	Lake, FL	4	1968	DSAW	977	1,340

Note: DSAW is double submerged arc welded longitudinal seam pipe.

The special permit request, proposed special permit with conditions, and draft environmental assessment (DEA) for the above listed FGT pipeline segment is available for review and public comments in Docket Number PHMSA–2020–0001. PHMSA invites interested persons to review and submit comments on the special permit request and DEA in the docket. Please submit comments on any potential safety, environmental, and other relevant considerations implicated by the special permit request. Comments may include relevant data.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comments closing date. Comments received after the closing date will be evaluated, if it is possible to do so without incurring additional expense or delay. PHMSA will consider each relevant comment it receives in making its decision to grant or deny this special permit request.

Issued in Washington, DC, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Associate Administrator for Pipeline Safety.

BILLING CODE 4910–60–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: See **SUPPLEMENTARY INFORMATION** section for effective date(s).

FOR FURTHER INFORMATION CONTACT: OFAC: Andrea Gacki, Director, tel.: 202–622–2490; Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Licensing, tel.: 202–622–2480; Assistant Director for Regulatory Affairs, tel.: 202–622–4855; or the Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The Specially Designated Nationals and Blocked Persons List and additional information concerning OFAC sanctions programs are available on OFAC's website (*www.treasury.gov/ofac*).

Notice of OFAC Action

On May 25, 2023, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following person is blocked under the relevant sanctions authority listed below.

Individual:

1. MASLOV, MASLOV, Ivan Aleksandrovich (Cyrillic: МАСЛОВ, ИВАН АЛЕКСАНДРОВИЧ) (a.k.a. "MASLOV, Ivan Oleksandrovich"), Mali; Uchitelskaya St., Apt 2, Shatki, Nizhny Novgorod Region, Russia; DOB 11 Jul 1982; alt. DOB 03 Jan 1980; POB Arkhangelsk, Russia; alt. POB Chuguevka, Chuguevsky District, Primorsky territory, Russia; nationality Russia; Gender Male; Passport 731849424 (Russia) (individual) [RUSSIA-EO14024] (Linked To: PRIVATE MILITARY COMPANY 'WAGNER').

   Designated pursuant to section 1(a)(vii) of Executive Order 14024 of April 15, 2021, "Blocking Property With Respect To Specified Harmful Foreign Activities of the Government of the Russian Federation," 86 FR 20249, 3 CFR, 2021 Comp., p. 542 (Apr. 15, 2021) (E.O. 14024) for being controlled by, or having acted or purported to act for or on behalf of, directly or indirectly, the Private Military Company 'WAGNER,' a person whose property and interests in property are blocked pursuant to E.O. 14024.

Dated: May 25, 2023.

Andrea Gacki,

Director, Office of Foreign Assets Control, U.S. Department of the Treasury.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Notice of Electronic Tax Administration Advisory Committee Meeting

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of meeting.

SUMMARY: The Electronic Tax Administration Advisory Committee (ETAAC) will hold a public meeting in-person and via telephone conference line on Wednesday, June 28, 2023.

FOR FURTHER INFORMATION CONTACT: Mr. Alec Johnston, Office of National Public Liaison, at (202) 317–4299, or send an email to *publicliaison@irs.gov.*

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to 5 U.S.C. 10(a)(2) of the Federal Advisory Committee Act, that a public meeting of the ETAAC will be held on Wednesday, June 28, 2023, from 9:00 a.m. to 11:00 a.m. EDT. The meeting will take place at the IRS headquarters building, 1111 Constitution Ave. NW, Washington, DC. For those unable to join in person, a conference line will be provided.

The purpose of the ETAAC is to provide continuing advice regarding the development and implementation of the IRS organizational strategy for electronic tax administration. ETAAC is an organized public forum for discussion of electronic tax administration issues such as prevention of identity theft and refund fraud. It supports the overriding goal that paperless filing should be the preferred and most convenient method of filing tax and information returns. ETAAC members convey the public's perceptions of IRS electronic tax administration activities, offer constructive observations about current or proposed policies, programs, and procedures, and suggest improvements.

Please call or email Alec Johnston to confirm your attendance. Mr. Johnston can be reached at 202–317–4299 or *PublicLiaison@irs.gov.* Should you wish the ETAAC to consider a written statement, please call 202–317–4299 or email: *PublicLiaison@irs.gov.*

Dated: May 17, 2023.

John A. Lipold,

Designated Federal Official, Office of National Public Liaison, Internal Revenue Service.

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Financial Crimes Enforcement Network (FinCEN)

AGENCY: Financial Crimes Enforcement Network, U.S. Department of the Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other federal agencies to comment on proposed or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Comments should be received on or before June 30, 2023 to be assured of consideration.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

Copies of the submissions may be obtained from Melody Braswell by emailing *PRA@treasury.gov,* calling (202) 622–1035, or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

Financial Crimes Enforcement Network (FinCEN)

1. Title: Information Collection Requirements in Connection with the Imposition of a Special Measure Against Commercial Bank of Syria, Including its Subsidiary, Syrian Lebanese Commercial Bank, as a Financial Institution of Primary Money Laundering Concern.

OMB Control Number: 1506–0036.

Report Number: Not applicable.

Abstract: FinCEN is issuing this notice to renew the OMB control number for the imposition of a special measure against the Commercial Bank of Syria, including its subsidiary Syrian Lebanese Commercial Bank, as a financial institution of primary money

laundering concern pursuant to the authority contained in 31 U.S.C. 5318A. See 31 CFR 1010.653.

Type of Review: Extension without change of a currently approved collection.

Affected Public: Businesses or other for-profit institutions, and not-for-profit institutions.

Frequency: One time notification and recordkeeping associated with the notification. See *31 CFR part 1010.653(b)(2)(i)(A)* and *31 CFR part 1010.653(b)(3)(i).*

Estimated Number of Respondents: 15,960.

RESPONDENT FINANCIAL INSTITUTIONS BY CATEGORY

Type of institution	Count
Banks, savings associations, thrifts, trust companies [1]	5,102
Credit Unions [2]	4,917
Broker-dealers [3]	3,527
Mutual funds [4]	1,378
Futures commission merchants and introducing brokers in commodities [5]	1,036
Total	15,960

Estimated Time per Respondent: 1 hour.

Estimated Total Annual Burden: 15,960 hours (15,960 respondents × 1 hour).

[1] All counts are from the Q3 2022 Federal Financial Institutions Examination Council (FFIEC) Call Report data, available at *https://cdr.ffiec.gov/public/pws/downloadbulkdata.aspx.* Data for institutions that are not insured, are insured under non-FDIC deposit insurance regimes, or do not have a Federal functional regulator are from the FDIC's Research Information System, available at *https://www.fdic.gov/foia/ris/index.html.*

[2] Credit union data are from the National Credit Union Administration (NCUA) for Q3 2022, available at *https://ncua.gov/analysis/credit-union-corporate-call-report-data.*

[3] According to the SEC, there are 3,527 brokers or dealers in securities as of the end of fiscal year 2021. *See* SEC, *Fiscal Year 2023 Congressional Budget Justification,* p. 33, *https://www.sec.gov/files/FY%202023%20Congressional%20Budget%20Justification%20Annual%20Performance%20Plan_FINAL.pdf.*

[4] According to information provided by the SEC as of December 2022 (including filings made through January 20, 2023), there are 1,378 open-end registered investment companies that report on Form N–CEN. FinCEN assesses that such companies would be responsible for implementing the requirements imposed through the final rule issued on March 15, 2006.

[5] As of November 30, 2022, there are 62 futures commission merchants. *See* Commodity Futures Trading Commission, ''Financial Data for FCMs'', dated November 2022, available at *https://www.cftc.gov/MarketReports/financialfcmdata/index.htm.* Additionally, as of December 31, 2022, there are 974 introducing brokers in commodities according to the Commodity Futures Trading Commission. These two counts total 1,036.

2. Title: Information Collection Requirements in Connection with the Imposition of the Fifth Special Measure Against the Islamic Republic of Iran as a Jurisdiction of Primary Money Laundering Concern.

OMB Control Number: 1506–0074.

Report Number: Not applicable.

Abstract: FinCEN is issuing this notice to renew the OMB control number for the imposition of a special measure against the Islamic Republic of Iran as a jurisdiction of primary money laundering concern pursuant to the authority contained in 31 U.S.C. 5318A. See 31 CFR 1010.661.

Type of Review: Extension without change of a currently approved collection.

Affected Public: Businesses or other for-profit institutions, and not-for-profit institutions.

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 31, 2023.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0922'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20420, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0922'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: White House Cyber Initiative, as supported by VA Principal Deputy Under Secretary for VA Benefits, Mr. Michael Frueh.

Title: IBM Skillsbuild Training Program Application—Pilot Program, VAF 22–10282.

OMB Control Number: 2900–0922.

Type of Review: Revision of a previously approved collection.

Abstract: The IBM SkillsBuild Program is an IBM-sponsored pilot training program administered by VA to provide free virtual Information Technology (IT) training. SkillsBuild is a free online learning platform that provides adult learners with the opportunity to gain or improve IT skills that meet the needs of employers in the High-Technology industry. VA will provide the opportunity for Veterans, Service members, spouse, children, and caregivers to access free, self-paced, virtual training and credentials in Cybersecurity and Data Analytics. This virtual training in the field of Cybersecurity and Data Analytics is an enhanced resource for Veterans and transitioning Service members who are seeking job training and credentials to pursue a career in Technology. The IBM Skillsbuild Training Program Application (Intake Form), VA Form 22–10282 will allow eligible candidates to register and apply on a first-come, first-served basis to participate in the program, and the form will be sent via email to *Vettecpartner@va.gov* for processing.

Affected Public: Individuals or households.

Estimated Annual Burden: 100 hours.

Estimated Average Burden Time per Respondent: 10 minutes.

Frequency of Response: Once.

Estimated Number of Respondents: 600.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

FEDERAL REGISTER

Vol. 88 Wednesday,
No. 104 May 31, 2023

Part II

Department of Homeland Security

U.S. Customs and Border Protection

Distribution of Continued Dumping and Subsidy Offset to Affected Domestic Producers; Notice

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Distribution of Continued Dumping and Subsidy Offset to Affected Domestic Producers

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of intent to distribute offset for Fiscal Year 2023.

SUMMARY: Pursuant to the *Continued Dumping and Subsidy Offset Act of 2000,* this document is U.S. Customs and Border Protection's (CBP) notice of intent to distribute assessed antidumping or countervailing duties (known as the continued dumping and subsidy offset) for Fiscal Year 2023 in connection with countervailing duty orders, antidumping duty orders, or findings under the *Antidumping Act of 1921.* This document provides the instructions for affected domestic producers, or anyone alleging eligibility to receive a distribution, to file certifications to claim a distribution in relation to the listed orders or findings.

DATES: Certifications to obtain a continued dumping and subsidy offset under a particular order or finding must be received by July 31, 2023. Any certification received after July 31, 2023 will be summarily denied, making claimants ineligible for the distribution.

ADDRESSES: Certifications and any other correspondence (whether by mail, or an express or courier service) must be addressed to U.S. Customs and Border Protection, Revenue Division, Attention: CDSOA Team, 6650 Telecom Drive, Suite 100, Indianapolis, IN, 46278.

FOR FURTHER INFORMATION CONTACT: Robin Batt, CDSOA Team, Revenue Division, 6650 Telecom Drive, Suite 100, Indianapolis, IN, 46278; telephone (317) 614–4462.

SUPPLEMENTARY INFORMATION:

Background

The *Continued Dumping and Subsidy Offset Act of 2000* (CDSOA) was enacted on October 28, 2000, as part of the *Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act,* 2001 (the ''Act''). The provisions of the CDSOA are contained in title X (sections 1001–1003) of the appendix of the Act (H.R. 5426).

The CDSOA amended title VII of the *Tariff Act of 1930* by adding section 754 (codified at 19 U.S.C. 1675c) to provide that assessed duties received pursuant to a countervailing duty order, an antidumping duty order, or a finding under the *Antidumping Act of 1921* will be distributed to affected domestic producers for certain qualifying expenditures that these producers incur after the issuance of such an order or finding. The term ''affected domestic producer'' means any manufacturer, producer, farmer, rancher, or worker representative (including associations of such persons) who:

(A) Was a petitioner or interested party in support of a petition with respect to which an antidumping duty order, a finding under the *Antidumping Act of 1921,* or a countervailing duty order has been entered;

(B) Remains in operation continuing to produce the product covered by the countervailing duty order, the antidumping duty order, or the finding under the *Antidumping Act of 1921;* and

(C) Has not been acquired by another company or business that is related to a company that opposed the antidumping or countervailing duty investigation that led to the order or finding (*e.g.,* opposed the petition or otherwise presented evidence in opposition to the petition). The distribution that these parties may receive is known as the continued dumping and subsidy offset.

Section 7601(a) of the *Deficit Reduction Act of 2005* repealed 19 U.S.C. 1675c. According to section 7701 of the *Deficit Reduction Act,* the repeal takes effect as if enacted on October 1, 2005. However, section 7601(b) provides that all duties collected on an entry filed before October 1, 2007, must be distributed as if 19 U.S.C. 1675c had not been repealed by section 7601(a). The funds available for distribution were also affected by section 822 of the *Claims Resolution Act of 2010* and section 504 of the *Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010.*

Historically, the antidumping and countervailing duties assessed and received by U.S. Customs and Border Protection (CBP) on CDSOA-subject entries, along with the interest assessed and received on those duties pursuant to 19 U.S.C. 1677g, were transferred to the CDSOA Special Account for distribution. 66 FR 48546, Sept. 21, 2001; *see also* 19 CFR 159.64(e). Other types of interest, including delinquency interest that accrued pursuant to 19 U.S.C. 1505(d), equitable interest under common law, and interest under 19 U.S.C. 580, were not subject to distribution. *Id.*

Section 605 of the *Trade Facilitation and Trade Enforcement Act of 2015* (TFTEA) (Pub. L. 114–125, February 24, 2016; codified as 19 U.S.C. 4401), provided new authority for CBP to deposit into the CDSOA Special Account for distribution delinquency interest that accrued pursuant to 19 U.S.C. 1505(d), equitable interest under common law, and interest under 19 U.S.C. 580 for all surety payments received by CBP on or after October 1, 2014, on CDSOA subject entries, as well as post-judgment interest received by CBP on those surety payments (*see* 28 U.S.C. 1961).

On March 28, 2022, President Biden ordered the sequester of non-exempt budgetary resources for Fiscal Year 2023 pursuant to section 251A of the *Balanced Budget and Emergency Deficit Control Act of 1985,* as amended (87 FR 18603, March 31, 2022). To implement this sequester during Fiscal Year 2023, the calculation of the Office of Management and Budget (OMB) requires a reduction of 5.7 percent of the assessed duties and interest received in the CDSOA Special Account (account number 015–12–5688). OMB has concluded that any amounts sequestered in the CDSOA Special Account during Fiscal Year 2023 will become available in the subsequent fiscal year (*see* 2 U.S.C. 906(k)(6)). As a result, CBP intends to include the funds that are temporarily reduced via sequester during Fiscal Year 2023 in the continued dumping and subsidy offset for Fiscal Year 2023, which will be distributed not later than 60 days after the first day of Fiscal Year 2024 in accordance with 19 U.S.C. 1675c(c). In other words, the continued dumping and subsidy offset that affected domestic producers receive for Fiscal Year 2023 will include the funds that were temporarily sequestered during Fiscal Year 2023.

Because of the statutory constraints in the assessments of antidumping and countervailing duties, as well as the additional time involved when the Government must initiate litigation to collect delinquent antidumping and countervailing duties, the CDSOA distribution process will be continued for an undetermined period. Consequently, the full impact of the CDSOA repeal on amounts available for distribution has been delayed for several years. It should also be noted that amounts distributed may be subject to recovery as a result of reliquidations, court actions, administrative errors, and other reasons.

List of Orders or Findings and Affected Domestic Producers

It is the responsibility of the U.S. International Trade Commission (USITC) to ascertain and timely forward

to CBP a list of the affected domestic producers that are potentially eligible to receive an offset in connection with an order or finding. In this regard, it is noted that the USITC has supplied CBP with the list of individual antidumping and countervailing duty cases, and the affected domestic producers associated with each case who are potentially eligible to receive an offset. This list appears at the end of this document.

A significant amount of litigation has challenged various provisions of the CDSOA, including the definition of the term ''affected domestic producer.'' In two decisions, the U.S. Court of Appeals for the Federal Circuit (Federal Circuit) upheld the constitutionality of the support requirement contained in the CDSOA. Specifically, in *SKF USA Inc.* v. *United States Customs & Border Prot.,* 556 F.3d 1337 (Fed. Cir. 2009), the Federal Circuit held that the CDSOA's support requirement did not violate either the First or Fifth Amendment. The Supreme Court of the United States denied plaintiff's petition for certiorari, *SKF USA, Inc.* v. *United States Customs & Border Prot.,* 560 U.S. 903 (2010). Similarly, in *PS Chez Sidney, L.L.C.* v. *United States,* 409 Fed. Appx. 327 (Fed. Cir. 2010), the Federal Circuit summarily reversed the U.S. Court of International Trade's judgment that the support requirement was unconstitutional, allowing only plaintiff's non-constitutional claims to go forward. *See PS Chez Sidney, L.L.C.* v. *United States,* 684 F.3d 1374 (Fed. Cir. 2012). Furthermore, in two cases interpreting the CDSOA's language, the Federal Circuit concluded that a producer who never indicates support for a dumping petition by letter or through questionnaire response, despite the act of otherwise filling out a questionnaire, cannot be an affected domestic producer. *Ashley Furniture Indus., Inc. et al.* v. *United States,* 734 F.3d 1306 (Fed. Cir. 2013), *cert. denied,* 135 S. Ct. 72 (2014); *Giorgio Foods, Inc.* v. *United States et al.,* 785 F.3d 595 (Fed. Cir. 2015).

Domestic producers who are not on the USITC list but believe they nonetheless are eligible for a CDSOA distribution under one or more antidumping and/or countervailing duty cases are required, as are all potential claimants that expressly appear on the list, to properly file their certification(s) within 60 days after this notice is published. Such domestic producers must allege all other bases for eligibility in their certification(s). CBP will evaluate the merits of such claims in accordance with the relevant statutes, regulations, and decisions. Certifications that are not timely filed within the requisite 60 days and/or that fail to sufficiently establish a basis for eligibility will be summarily denied. Additionally, CBP may not make a final decision regarding a claimant's eligibility to receive funds until certain legal issues which may affect that claimant's eligibility are resolved. In these instances, CBP may withhold an amount of funds corresponding to the claimant's alleged *pro rata* share of funds from distribution pending the resolution of those legal issues.

It should also be noted that the Federal Circuit ruled in *Canadian Lumber Trade Alliance* v. *United States,* 517 F.3d 1319 (Fed. Cir. 2008), *cert. denied sub nom. United States Steel* v. *Canadian Lumber Trade Alliance,* 129 S. Ct. 344 (2008), that CBP was not authorized to distribute such antidumping and countervailing duties to the extent they were derived from goods from countries that are parties to the North American Free Trade Agreement (NAFTA). Due to this decision, CBP does not list cases related to NAFTA on the Preliminary Amounts Available report, and no distributions will be issued on these cases.

Regulations Implementing the CDSOA

It is noted that CBP published Treasury Decision (T.D.) 01–68 (Distribution of Continued Dumping and Subsidy Offset to Affected Domestic Producers) in the **Federal Register** (66 FR 48546) on September 21, 2001, which was effective as of that date, to implement the CDSOA. The final rule added subpart F to part 159 of title 19, Code of Federal Regulations (19 CFR part 159, subpart F (sections 159.61–159.64)). More specific guidance regarding the filing of certifications is provided in this notice to aid affected domestic producers and other domestic producers alleging eligibility (''claimants'' or ''domestic producers'').

Notice of Intent To Distribute Offset

This document announces that CBP intends to distribute to affected domestic producers the assessed antidumping or countervailing duties, section 1677g interest, and interest provided for in 19 U.S.C. 4401 that are available for distribution in Fiscal Year 2023 in connection with those antidumping duty orders or findings or countervailing duty orders that are listed in this document. All distributions will be issued by paper check to the address provided by the claimants. Section 159.62(a) of title 19, Code of Federal Regulations (19 CFR 159.62(a)), provides that CBP will publish such a notice of intention to distribute at least 90 calendar days before the end of a fiscal year. Failure to publish the notice at least 90 calendar days before the end of the fiscal year will not affect an affected domestic producer's obligation to file a timely certification within 60 days after the notice is published. *See Dixon Ticonderoga* v. *United States,* 468 F.3d 1353, 1354 (Fed. Cir. 2006).

Certifications; Submission and Content

To obtain a distribution of the offset under a given order or finding (including any distribution under 19 U.S.C. 4401), an affected domestic producer (and anyone alleging eligibility to receive a distribution) must submit a certification for each order or finding under which a distribution is sought, to CBP, indicating its desire to receive a distribution. To be eligible to obtain a distribution, certifications must be received by CBP no later than 60 calendar days after the date of publication of this notice of intent to distribute in the **Federal Register**. Claimants are encouraged to submit certifications electronically at *https://www.pay.gov* under the Public Form Name, ''Continued Dumping and Subsidy Offset Act of 2000 Certification'' (CBP Form Number 7401) to ensure CBP's timely receipt and to avoid any potential delivery delays associated with mail or courier service. All certifications not received by the 60th day will not be eligible to receive a distribution.

As required by 19 CFR 159.62(b), this notice provides the case name and number of the order or finding concerned, as well as the specific instructions for filing a certification under section 159.63 to claim a distribution. Section 159.62(b) also provides that the dollar amounts subject to distribution that are contained in the Special Account for each listed order or finding are to appear in this notice. However, these dollar amounts were not available in time for inclusion in this publication. The preliminary amounts will be posted on the CBP website (*https://www.cbp.gov*). However, the final amounts available for disbursement may be higher or lower than the preliminary amounts.

CBP will provide general information to claimants regarding the preparation of certification(s). However, it remains the sole responsibility of the domestic producer to ensure that the certification is correct, complete, and accurate so as to demonstrate the eligibility of the domestic producer for the distribution requested. Failure to ensure that the certification is correct, complete, and accurate as provided in this notice will result in the domestic producer not

receiving a distribution and/or a demand for the return of funds.

Specifically, to obtain a distribution of the offset under a given order or finding (including any distribution under 19 U.S.C. 4401), each potential claimant must timely submit a certification containing the required information detailed below as to the eligibility of the domestic producer (or anyone alleging eligibility) to receive the requested distribution and the total amount of the distribution that the domestic producer is claiming. Certifications should be submitted electronically at *https://www.pay.gov* utilizing Public Form Name, ''Continued Dumping and Subsidy Offset Act of 2000 Certification'' (CBP Form Number 7401) or by mail to U.S. Customs and Border Protection, Revenue Division, Attention: CDSOA Team, 6650 Telecom Drive, Suite 100, Indianapolis, IN, 46278. The certification must enumerate the qualifying expenditures incurred by the domestic producer since the issuance of an order or finding and it must demonstrate that the domestic producer is eligible to receive a distribution as an affected domestic producer or allege another basis for eligibility. Any false statements made in connection with certifications submitted to CBP may give rise to liability under the *False Claims Act* (*see* 31 U.S.C. 3729–3733) and/or to criminal prosecution.

A successor to a company that was an affected domestic producer at the time of acquisition should consult 19 CFR 159.61(b)(1)(i). Any company that files a certification claiming to be the successor company to an affected domestic producer will be deemed to have consented to joint and several liability for the return of any overpayments arising under 19 CFR 159.64(b)(3) that were previously paid to the predecessor. CBP may require the successor company to provide documents to support its eligibility to receive a distribution as set out in 19 CFR 159.63(d). Additionally, any individual or company who purchases any portion of the operating assets of an affected domestic producer, a successor to an affected domestic producer, or an entity that otherwise previously received distributions may be jointly and severally liable for the return of any overpayments arising under 19 CFR 159.64(b)(3) that were previously paid to the entity from which the operating assets were purchased or its predecessor, regardless of whether the purchasing individual or company is deemed a successor company for purposes of receiving distributions.

A member company (or its successor) of an association that appears on the list of affected domestic producers in this notice, where the member company itself does not appear on this list, should consult 19 CFR 159.61(b)(1)(ii). Specifically, for a certification under 19 CFR 159.61(b)(1)(ii), the claimant must name the association of which it is a member, specifically establish that it was a member of the association at the time the association filed the petition with the USITC, and establish that the claimant is a current member of the association.

In order to promote accurate filings and more efficiently process the distributions, we offer the following guidance:

- If claimants are members of an association but the association does not file on their behalf, the association will need to provide its members with a statement that contains notarized company-specific information including dates of membership and an original signature from an authorized representative of the association.
- An association filing a certification on behalf of a member must also provide a power of attorney or other evidence of legal authorization from each of the domestic producers it is representing.
- Any association filing a certification on behalf of a member is responsible for verifying the legal sufficiency and accuracy of the member's financial records, which support the claim, and is responsible for that certification. As such, an association filing a certification on behalf of a member is jointly and severally liable with the member for repayment of any claim found to have been paid or overpaid in error.

The association may file a certification in its own right to claim an offset for that order or finding, but its qualifying expenditures would be limited to those expenditures that the association itself has incurred after the date of the order or finding in connection with the particular case.

As provided in 19 CFR 159.63(a), certifications to obtain a distribution of an offset (including any distribution under 19 U.S.C. 4401) must be received by CBP no later than 60 calendar days after the date of publication of the notice of intent in the **Federal Register**. All certifications received after the 60-day deadline will be summarily denied, making claimants ineligible for the distribution regardless of whether or not they appeared on the USITC list.

A list of all certifications received will be published on the CBP website (*https://www.cbp.gov*) shortly after the receipt deadline. This publication will not confirm acceptance or validity of the certification, but merely receipt of the certification. Due to the high volume of certifications, CBP is unable to respond to individual telephone or written inquiries regarding the status of a certification appearing on the list.

While there is no required format for a certification, CBP has developed a standard certification form to aid claimants in filing certifications. The certification form is available at *https://www.pay.gov* under the Public Form Name ''Continued Dumping and Subsidy Offset Act of 2000 Certification'' (CBP Form Number 7401) or by directing a web browser to *https://www.pay.gov/public/form/start/8776895/.* The certification form can be submitted electronically through *https://www.pay.gov* or by mail. All certifications not submitted electronically must include original signatures.

Regardless of the format for a certification, per 19 CFR 159.63(b), the certification must contain the following information:

(1) The date of this **Federal Register** notice;

(2) The Department of Commerce antidumping or countervailing duty case number (for example, A–331–802);

(3) The case name (product/country);

(4) The name of the domestic producer and any name qualifier, if applicable (for example, any other name under which the domestic producer does business or is also known);

(5) The mailing address of the domestic producer (if a post office box, the physical street address must also appear) including, if applicable, a specific room number or department;

(6) The Internal Revenue Service (IRS) number (with suffix) of the domestic producer, employer identification number, or social security number, as applicable;

(7) The specific business organization of the domestic producer (corporation, partnership, sole proprietorship);

(8) The name(s) of any individual(s) designated by the domestic producer as the contact person(s) concerning the certification, together with the phone number(s), mailing address, and, if available, facsimile transmission number(s) and electronic mail (email) address(es) for the person(s). Correspondence from CBP may be directed to the designated contact(s) by either mail or phone or both;

(9) The total dollar amount claimed;

(10) The dollar amount claimed by category, as described in the section below entitled ''Amount Claimed for Distribution'';

(11) A statement of eligibility, as described in the section below entitled ''Eligibility to Receive Distribution''; and

(12) For certifications not submitted electronically through *https://www.pay.gov*, an original signature by an individual legally authorized to bind the producer.

Qualifying Expenditures That May Be Claimed for Distribution

Qualifying expenditures that may be offset under the CDSOA encompass those expenditures incurred by the domestic producer after issuance of an antidumping duty order or finding or a countervailing duty order (including expenditures incurred on the date of the order's issuance), and prior to its termination, provided that such expenditures fall within certain categories. *See* 19 CFR 159.61(c). The CDSOA repeal language parallels the termination of an order or finding. Therefore, for duty orders or findings that have not been previously revoked or were not revoked prior to October 1, 2007, expenses must be incurred before October 1, 2007, to be eligible for offset. For duty orders or findings that were revoked prior to October 1, 2007, expenses must be incurred before the effective date of the revocation to be eligible for offset. For example, assume for case A–331–802 Certain Frozen Warm-Water Shrimp and Prawns from Ecuador, that the order date is February 1, 2005, and that the revocation effective date is August 15, 2007. In this case, eligible expenditures would have to be incurred on or after February 1, 2005, up to and including August 14, 2007; expenditures incurred on or after August 15, 2007, cannot be included as eligible qualifying expenditures for A–331–802.

For the convenience and ease of the domestic producers, CBP is providing guidance on what the agency takes into consideration when making a calculation for each of the following categories:

(1) Manufacturing facilities (Any facility used for the transformation of raw material into a finished product that is the subject of the related order or finding);

(2) Equipment (Goods that are used in a business environment to aid in the manufacturing of a product that is the subject of the related order or finding);

(3) Research and development (Seeking knowledge and determining the best techniques for production of the product that is the subject of the related order or finding);

(4) Personnel training (Teaching of specific useful skills to personnel, that will improve performance in the production process of the product that is the subject of the related order or finding);

(5) Acquisition of technology (Acquisition of applied scientific knowledge and materials to achieve an objective in the production process of the product that is the subject of the related order or finding);

(6) Health care benefits for employees paid for by the employer (Health care benefits paid to employees who are producing the specific product that is the subject of the related order or finding);

(7) Pension benefits for employees paid for by the employer (Pension benefits paid to employees who are producing the specific product that is the subject of the related order or finding);

(8) Environmental equipment, training, or technology (Equipment, training, or technology used in the production of the product that is the subject of the related order or finding, that will assist in preventing potentially harmful factors from affecting the environment);

(9) Acquisition of raw materials and other inputs (Purchase of unprocessed materials or other inputs needed for the production of the product that is the subject of the related order or finding); and

(10) Working capital or other funds needed to maintain production (Assets of a business that can be applied to its production of the product that is the subject of the related order or finding).

Amount Claimed for Distribution

In calculating the amount of the distribution being claimed as an offset, the certification must indicate:

(1) The total amount of any qualifying expenditures previously certified by the domestic producer, and the amount certified by category;

(2) The total amount of those expenditures which have been the subject of any prior distribution for the order or finding being certified under 19 U.S.C. 1675c; and

(3) The net amount for new and remaining qualifying expenditures being claimed in the current certification (the total amount previously certified as noted in item ''(1)'' above minus the total amount that was the subject of any prior distribution as noted in item ''(2)'' above). In accordance with 19 CFR 159.63(b)(2)(i)–(iii), CBP will deduct the amount of any prior distribution from the producer's claimed amount for that case. Total amounts disbursed by CBP under the CDSOA for some prior fiscal years are available on the CBP website.

Additionally, under 19 CFR 159.61(c), these qualifying expenditures must be related to the production of the same product that is the subject of the order or finding, with the exception of expenses incurred by associations which must be related to a specific case. Any false statements made to CBP concerning the amount of distribution being claimed as an offset may give rise to liability under the *False Claims Act* (*see* 31 U.S.C. 3729–3733) and/or to criminal prosecution.

Eligibility To Receive Distribution

As noted, the certification must contain a statement that the domestic producer desires to receive a distribution and is eligible to receive the distribution as an affected domestic producer or on another legal basis. Also, the domestic producer must affirm that the net amount certified for distribution does not encompass any qualifying expenditures for which distribution has previously been made (19 CFR 159.63(b)(3)(i)). Any false statements made in connection with certifications submitted to CBP may give rise to liability under the *False Claims Act* (*see* 31 U.S.C. 3729–3733) and/or to criminal prosecution.

Furthermore, under 19 CFR 159.63(b)(3)(ii), where a domestic producer files a separate certification for more than one order or finding using the same qualifying expenditures as the basis for distribution in each case, each certification must list all the other orders or findings where the producer is claiming the same qualifying expenditures.

Moreover, as required by 19 U.S.C. 1675c(b)(1) and 19 CFR 159.63(b)(3)(iii), the certification must include information as to whether the domestic producer remains in operation at the time the certifications are filed and continues to produce the product covered by the particular order or finding under which the distribution is sought. If a domestic producer is no longer in operation, or no longer produces the product covered by the order or finding, the producer will not be considered an affected domestic producer entitled to receive a distribution.

In addition, as required by 19 U.S.C. 1675c(b)(5) and 19 CFR 159.63(b)(3)(iii), the domestic producer must state whether it has been acquired by a company that opposed the investigation or was acquired by a business related to a company that opposed the investigation. If a domestic producer has been so acquired, the producer will not be considered an affected domestic producer entitled to receive a

distribution. However, CBP may not make a final decision regarding a claimant's eligibility to receive funds until certain legal issues which may affect that claimant's eligibility are resolved. In these instances, CBP may withhold an amount of funds corresponding to the claimant's alleged *pro rata* share of funds from distribution pending the resolution of those legal issues.

The certification must be executed and dated by a party legally authorized to bind the domestic producer and it must state that the information contained in the certification is true and accurate to the best of the certifier's knowledge and belief under penalty of law, and that the domestic producer has records to support the qualifying expenditures being claimed (see section below entitled ''Verification of Certification''). Moreover, as provided in 19 CFR 159.64(b)(3), all overpayments to affected domestic producers are recoverable by CBP, and CBP reserves the right to use all available collection tools to recover overpayments, including but not limited to garnishments, court orders, administrative offset, enrollment in the Treasury Offset Program, and/or offset of tax refund payments. Overpayments may occur for a variety of reasons, including but not limited to: reliquidations, court actions, settlements, insufficient verification of a certification in response to an inquiry from CBP, and administrative errors. With diminished amounts available over time, the likelihood that these events will require the recovery of funds previously distributed will increase. As a result, domestic producers who receive distributions under the CDSOA may wish to set aside any funds received in case it is subsequently determined that an overpayment has occurred. CBP considers the submission of a certification and the negotiation of any distribution checks received as acknowledgements and acceptance of the claimant's obligation to return those funds upon demand.

Review and Correction of Certification

A certification that is submitted in response to this notice of intent to distribute and received within 60 calendar days after the date of publication of the notice in the **Federal Register** may, at CBP's sole discretion, be subject to review before acceptance to ensure that all informational requirements are complied with and that any amounts set forth in the certification for qualifying expenditures, including the amount claimed for distribution, appear to be correct. A certification that is found to be materially incorrect or incomplete will be returned to the domestic producer within 15 business days after the close of the 60-calendar-day filing period, as provided in 19 CFR 159.63(c). CBP must receive a corrected certification from the domestic producer and/or an association filing on behalf of an association member within 10 business days from the date of the original denial letter. Failure to receive a corrected certification within 10 business days will result in denial of the certification at issue. The return of a certification for correction does not preclude CBP from taking other actions related to the incorrect or incomplete initial certification. It is the sole responsibility of the domestic producer to ensure that the certification is correct, complete, and accurate so as to demonstrate the eligibility of the domestic producer to the distribution requested. Failure to ensure that the certification is correct, complete, and accurate will result in the domestic producer not receiving a distribution and/or a demand for the return of funds, in addition to other potential legal and administrative consequences.

Verification of Certification

Certifications are subject to CBP's verification. The burden remains on each claimant to fully substantiate all elements of its certification. As such, claimants may be required to provide copies of additional records for further review by CBP. Therefore, parties are required to maintain, and be prepared to produce, records adequately supporting their claims for a period of five years after the filing of the certification (19 CFR 159.63(d)). The records must demonstrate that each qualifying expenditure enumerated in the certification was actually incurred, and they must support how the qualifying expenditures are determined to be related to the production of the product covered by the order or finding. Although CBP will accept comments and information from the public and other domestic producers, CBP retains complete discretion regarding the initiation and conduct of investigations stemming from such information. In the event that a distribution is made to a domestic producer from whom CBP later seeks verification of the certification and sufficient supporting documentation is not provided as determined by CBP, then the amounts paid to the affected domestic producer are recoverable by CBP as an overpayment. CBP reserves the right to use all available collection tools to recover overpayments, including but not limited to garnishments, court orders, administrative offset, enrollment in the Treasury Offset Program, and/or offset of tax refund payments. CBP considers the submission of a certification and the negotiation of any distribution checks received as acknowledgements and acceptance of the claimant's obligation to return those funds upon demand. Failure to repay overpayments upon demand may result in administrative consequences. Additionally, the submission of false statements, documents, or records in connection with a certification or verification of a certification may give rise to liability under the *False Claims Act* (*see* 31 U.S.C. 3729–3733) and/or to criminal prosecution.

Disclosure of Information in Certifications; Acceptance by Producer

The name of the claimant, the total dollar amount claimed by the party on the certification, as well as the total dollar amount that CBP actually disburses to that affected domestic producer as an offset, will be available for disclosure to the public, as specified in 19 CFR 159.63(e). To this extent, the submission of the certification is construed as an understanding and acceptance on the part of the domestic producer that this information will be disclosed to the public and a waiver of any right to privacy or non-disclosure. Additionally, a statement in a certification that this information is proprietary and exempt from disclosure may result in CBP's rejection of the certification.

List of Orders or Findings and Related Domestic Producers

The list of individual antidumping duty orders or findings and countervailing duty orders is set forth below together with the affected domestic producers associated with each order or finding who are potentially eligible to receive an offset. Those domestic producers not on the list must allege another basis for eligibility in their certification. Appearance of a domestic producer on the list is not a guarantee of distribution.

Dated: May 17, 2023.

Jeffrey Caine,

Chief Financial Officer, U.S. Customs and Border Protection.

Small Business Lending Under the Equal Credit Opportunity Act (Regulation B)

AGENCY: Consumer Financial Protection Bureau.

ACTION: Final rule.

SUMMARY: The Consumer Financial Protection Bureau (CFPB or Bureau) is amending Regulation B to implement changes to the Equal Credit Opportunity Act (ECOA) made by section 1071 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). Consistent with section 1071, covered financial institutions are required to collect and report to the CFPB data on applications for credit for small businesses, including those that are owned by women or minorities. The final rule also addresses the CFPB's approach to privacy interests and the publication of data; shielding certain demographic data from underwriters and other persons; recordkeeping requirements; enforcement provisions; and the rule's effective and compliance dates.

DATES:

Effective date: This final rule is effective August 29, 2023.

Compliance dates: Covered financial institutions must comply with the final rule beginning October 1, 2024, April 1, 2025, or January 1, 2026, as set forth in § 1002.114(b).

SUPPLEMENTARY INFORMATION:

I. Summary of the Final Rule

In 2010, Congress passed the Dodd-Frank Act. Section 1071 of that Act [1] amended ECOA [2] to require that financial institutions collect and report to the CFPB certain data regarding applications for credit for women-owned, minority-owned, and small businesses. Section 1071's statutory purposes are to (1) facilitate enforcement of fair lending laws, and (2) enable communities, governmental entities, and creditors to identify business and community development needs and opportunities of women-owned, minority-owned, and small businesses.

Section 1071 specifies a number of data points that financial institutions are required to collect and report, and also provides authority for the CFPB to require any additional data that it determines would aid in fulfilling section 1071's statutory purposes. Section 1071 also contains a number of other requirements, including those that address restricting the access of underwriters and other persons to certain data; recordkeeping; publication of small business lending data; and modifications or deletions of data prior to publication in order to advance a privacy interest.

Section 1071 directs the CFPB to prescribe such rules and issue such guidance as may be necessary to carry out, enforce, and compile data pursuant to section 1071, and permits it to adopt exceptions to any requirement or to exempt financial institutions from the requirements of section 1071 as it deems necessary or appropriate to carry out the purposes of section 1071. The CFPB is adding a new subpart B to Regulation B to implement the requirements of section 1071. Key aspects of the CFPB's final rule are summarized below.

As envisioned by Congress, the small business lending rule will create our nation's first consistent and comprehensive database regarding lending to small businesses, including small farms. This will fulfill section 1071's statutory purposes by allowing Federal, State, and local enforcement agencies to assess potential areas for fair lending enforcement and by enabling a range of stakeholders to better identify business and community development needs and opportunities for small businesses, including women-owned and minority-owned small businesses. The database, again as dictated by Congress, will not reveal privacy-protected information about any particular small business applicant, and small businesses will retain control over how much of their demographic information they choose to divulge. In addition, the CFPB believes that its final rule will help to sharpen competition in credit supply by creating greater transparency around small business lending.

Scope. The CFPB is requiring financial institutions to collect and report data regarding applications for credit for small businesses, including those that are owned by women and minorities. The CFPB is not requiring financial institutions to collect and report data regarding applications for women-owned and minority-owned businesses that are *not* small. Because more than 99 percent of women-owned and minority-owned businesses are small businesses, covering small businesses necessarily means nearly all women-owned and minority-owned businesses will also be covered. The CFPB believes that this scope is consistent with the statute and will allow the rule to carry out section 1071's purposes without requiring collection of data that would be of limited utility.

Covered financial institutions. Consistent with language from section 1071, a ''financial institution'' is defined to include any partnership, company, corporation, association (incorporated or unincorporated), trust, estate, cooperative organization, or other entity that engages in any financial activity. The rule thus applies to a variety of entities that engage in small business lending, including depository institutions (*i.e.,* banks, savings associations, and credit unions),[3] online lenders, platform lenders, community development financial institutions (both depository and nondepository institutions), Farm Credit System lenders, lenders involved in equipment and vehicle financing (captive financing companies and independent financing companies), commercial finance companies, governmental lending entities, and nonprofit nondepository lenders.[4]

[1] Public Law 111–203, tit. X, section 1071, 124 Stat. 1376, 2056 (2010), codified at ECOA section 704B, 15 U.S.C. 1691c–2.

[2] 15 U.S.C. 1691 *et seq.*

[3] For purposes of this document, the Bureau is using the term depository institution to mean any bank or savings association defined by the Federal Deposit Insurance Act, 12 U.S.C. 1813(c)(1), or credit union defined pursuant to the Federal Credit Union Act, 12 U.S.C. 1751 *et seq.,* as implemented by 12 CFR 700.2. The Bureau notes that the Dodd-Frank Act defines a depository institution to mean any bank or savings association defined by the Federal Deposit Insurance Act, 12 U.S.C. 1811 *et seq.;* there, that term does not encompass credit unions. 12 U.S.C. 5301(18)(A), 1813(c)(1). To facilitate analysis and discussion, the Bureau is referring to banks and savings associations together with credit unions as depository institutions throughout this document, unless otherwise specified.

[4] The Bureau's rules, including this final rule to implement section 1071, generally do not apply to motor vehicle dealers, as defined in section 1029(f)(2) of the Dodd-Frank Act, that are predominantly engaged in the sale and servicing of motor vehicles, the leasing and servicing of motor vehicles, or both. 12 U.S.C. 5519.

The rule uses the term ''covered financial institution'' to refer to those financial institutions that are required to comply with its data collection and reporting requirements. A covered financial institution is defined as a financial institution that originated at least 100 covered credit transactions (rather than 25, as proposed) for small businesses in each of the two preceding calendar years. The CFPB is not adopting an asset-based exemption threshold for depository institutions, or any other general exemptions for particular categories of financial institutions.

The final rule also permits creditors that are not covered financial institutions to voluntarily collect and report small business lending data in certain circumstances.

Covered credit transactions. Covered financial institutions are required to collect and report data regarding covered applications from small businesses for covered credit transactions. A ''covered credit transaction'' is one that meets the definition of business credit under existing Regulation B, with certain exceptions. Transactions within the scope of the rule include loans, lines of credit, credit cards, merchant cash advances, and credit products used for agricultural purposes. The CFPB is excluding trade credit, public utilities credit, securities credit, and incidental credit as proposed. In addition, the CFPB has added exclusions for transactions that are reportable under the Home Mortgage Disclosure Act of 1975 (HMDA) [5] and insurance premium financing. Consistent with the CFPB's proposal, factoring, leases, and consumer-designated credit that is used for business or agricultural purposes are also not covered credit transactions. In addition, the CFPB has made clear that purchases of originated covered credit transactions are not reportable.

Covered applications. A ''covered application''—which triggers data collection, reporting, and related requirements when submitted by a small business—is defined as an oral or written request for a covered credit transaction that is made in accordance with procedures used by a financial institution for the type of credit requested. This definition of covered application is largely consistent with the existing Regulation B definition of that term. However, certain circumstances are not covered applications for purposes of this rule, even if they are considered applications under existing Regulation B. Specifically, covered applications for purposes of this rule do not include (1) reevaluation, extension, or renewal requests on existing business credit accounts, unless the request seeks additional credit amounts; or (2) inquiries and prequalification requests.

Small business definition. A covered financial institution is required to collect and report data on a covered application from a ''small business,'' which the rule defines in accordance with the meaning of ''business concern or concern'' and ''small business concern'' under the Small Business Act [6] and Small Business Administration (SBA) regulations. However, in lieu of using the SBA's size standards for defining a small business concern, the definition in this final rule looks to whether the business had $5 million or less in gross annual revenue for its preceding fiscal year. The CFPB believes that a straightforward $5 million threshold strikes the right balance in terms of broadly covering the small business credit market to fulfill section 1071's statutory purposes while meeting the SBA's criteria for an alternative size standard.[7] The final rule also anticipates updates to this size standard, not more than every five years, to account for inflation. The SBA Administrator has approved the CFPB's use of this alternative size standard pursuant to the Small Business Act.[8]

Data to be collected and reported. The rule addresses the data points that must be collected and reported by covered financial institutions for covered applications from small businesses. Congress specifically enumerated many of these data points in ECOA section 704B(e)(2); for the others, the Congress granted the CFPB express authority in 704B(e)(2)(H) to require financial institutions to compile and maintain, along with enumerated data points, a record of ''any additional data that the Bureau determines would aid in fulfilling the purposes'' of section 1071. Certain of these data points are or could be collected from the applicant; other data points are based on information within the financial institution's control. Covered financial institutions must not discourage an applicant from responding to requests for applicant-provided data and must otherwise maintain procedures to collect such data at a time and in a manner that are reasonably designed to obtain a response; when collecting data directly from the applicant, the rule identifies certain minimum provisions that must be included within financial institutions' procedures in order for them to be considered ''reasonably designed.'' The rule also addresses what financial institutions should do if, despite having such procedures in place, they are unable to obtain certain data from an applicant. Furthermore, the rule makes clear that a financial institution may rely on information from the applicant, or appropriate third-party sources, when compiling data. If the financial institution verifies particular information, however, it must report that verified information. Financial institutions are permitted to reuse previously collected data in certain circumstances, rather than having to request it from the applicant for each covered application.

As noted above, the rule includes data points that are, or could be, provided by the applicant. Some data points specifically relate to the credit being applied for: the credit type (which includes information on the credit product, types of guarantees, and loan term); the credit purpose; and the amount applied for. There are also data points that relate to the applicant's business: census tract based on an address or location provided by the applicant; gross annual revenue for the applicant's preceding full fiscal year; the 3-digit North American Industry Classification System (NAICS) code for the applicant; the number of workers that the applicant has; the applicant's time in business; and the number of principal owners the applicant has.

There are also applicant-provided data points on the demographics of the applicant's ownership: first, whether the applicant is a minority-owned business or a women-owned business, along with a new data field capturing whether the applicant is an LGBTQI+-owned business; and second, the ethnicity, race, and sex of the applicant's principal owners. The CFPB refers to these data points collectively as an applicant's ''protected demographic information.'' Principal owners' ethnicity and race will be collected from applicants using aggregate categories as well as disaggregated subcategories. Principal owners' sex/gender will be collected from applicants without using pre-defined response categories.

The CFPB is not finalizing its proposed requirement to have financial institutions collect race and ethnicity via visual observation or surname if an in-person applicant does not provide any ethnicity, race, or sex information for any principal owners; instead, the final rule requires that these data be reported based only on information provided by the applicant.

[5] 12 U.S.C. 2801 *et seq.*

[6] 15 U.S.C. 631 *et seq.*

[7] *See* 15 U.S.C. 632(a)(2)(C); 13 CFR 121.903.

[8] *See* 15 U.S.C. 632(a)(2)(C).

The CFPB is providing lenders with a sample data collection form, in both digital and paper form, to assist them in collecting protected demographic data from applicants. Although the contents of the sample form reflect certain legal requirements that financial institutions must follow, their use of the sample form is not itself required under the final rule. Rather, it is an available resource to financial institutions.

In addition, the rule includes data points that will be generated or supplied solely by the financial institution. These data points include, for all applications: a unique identifier for each application for or extension of credit; the application date; the application method (that is, the means by which the applicant submitted the application); the application recipient (that is, whether the financial institution or its affiliate received the application directly, or whether it was received by the financial institution via a third party); the action taken by the financial institution on the application; and the action taken date. For denied applications, there is also a data point for denial reasons. For applications that are originated or approved but not accepted, there is a data point for the amount originated or approved, and a data point for pricing information (which includes, as applicable, interest rate, total origination charges, broker fees, initial annual charges, additional cost for merchant cash advances or other sales-based financing, and prepayment penalties).

Firewall. The CFPB's rule implements a requirement in section 1071 that certain data collected from applicants be shielded from underwriters and certain other persons (or, if a firewall is not feasible, a notice is given instead); the CFPB refers to this as the "firewall."

Generally, an employee or officer of a financial institution or a financial institution's affiliate that is involved in making any determination concerning a covered application is prohibited from accessing the applicant's responses to the inquiries about protected demographic information that the financial institution makes pursuant to the rule. This prohibition does not apply to an employee or officer, however, if the financial institution determines that employee or officer should have access to an applicant's responses to its inquiries regarding the applicant's protected demographic information and the financial institution provides a notice to the applicant regarding that access. The notice must be provided to each applicant whose information will be accessed or, alternatively, the financial institution could provide the notice to all applicants. The final rule does not require specific language for this notice but does provide sample language that a covered financial institution may use. The final rule also clarifies several key points of the firewall provision.

Reporting data to the CFPB; publication of data by the CFPB and other disclosures; and privacy considerations. Financial institutions must collect small business lending data on a calendar year basis and report it to the CFPB on or before June 1 of the following year. Financial institutions reporting data to the CFPB are required to provide certain identifying information about themselves as part of their submission. The CFPB is releasing, concurrently with this final rule, technical instructions for the submission of small business lending data in a Filing Instructions Guide.[9]

The CFPB will make available to the public, on an annual basis, the application-level data submitted to it by financial institutions, subject to modifications or deletions made by the CFPB, to advance privacy interests. To ease burden on covered entities, CFPB publication of application-level data will satisfy financial institutions' statutory obligation to make data available to the public upon request. At this time, the CFPB is not making a final decision on the best way to protect privacy interests through pre-publication modification and deletion of reported data. Assessing the many comments it received in this area, the CFPB is preliminarily of the view that its privacy assessment will focus primarily on whether (and, if so, how) small business lending data, individually or in combination with other data, pose re-identification risk for small businesses and, as a result, for their owners. The CFPB also anticipates taking account of compelling risks to financial institution privacy interests. The CFPB does not anticipate that it can carry out the necessary analysis of pre-publication modifications and deletions without at least one full year of application-level data. The CFPB intends to further engage with stakeholders on the issue of data publication before it resolves on a particular approach to protecting privacy interests through modifications and deletions. Finally, the CFPB anticipates publishing select aggregate data—*i.e.,* data that does not include application-level information—before it publishes application-level data.

[9] *See* CFPB, *Small Business Lending Filing Instructions Guide, https://www.consumerfinance.gov/data-research/small-business-lending/filing-instructions-guide/.*

In addition, the final rule prohibits a financial institution or third party from disclosing protected demographic information, except in limited circumstances. Specifically, the final rule prohibits financial institutions from disclosing or providing to third parties the protected demographic information collected pursuant to the rule, except to further compliance with ECOA or Regulation B or as required by law. The final rule also limits third parties' disclosure of protected demographic information.

Recordkeeping, enforcement, and severability. The rule addresses issues related to recordkeeping, enforcement of violations, and severability. The CFPB is also finalizing provisions regarding treatment of bona fide errors under the rule in general along with several safe harbors for particular kinds of errors. Relatedly, as explained in part VII below, covered financial institutions will also have a 12-month grace period during which the CFPB—for institutions under its jurisdiction—will not assess penalties for errors in data reporting, and will conduct examinations only to assist institutions in diagnosing compliance weaknesses, to the extent that these institutions engaged in good faith compliance efforts.

Effective and compliance dates, transitional provisions. This final rule will become effective 90 days after publication in the **Federal Register**. The CFPB is adopting a tiered compliance date schedule because it believes that smaller and mid-sized lenders would have particular difficulties complying within the single 18-month compliance period proposed in the NPRM. Compliance with the rule beginning October 1, 2024 is required for financial institutions that originate the most covered credit transactions for small businesses. However, institutions with a moderate transaction volume have until April 1, 2025 to begin complying with the rule, and those with the lowest volume have until January 1, 2026. Covered financial institutions may begin collecting applicants' protected demographic information one year prior to their compliance date to help prepare for coming into compliance with this final rule. The CFPB is also adopting a new provision to permit financial institutions that do not have ready access to sufficient information to determine their compliance tier (or whether they are covered by the rule at all) to use reasonable methods to estimate their volume of originations to small businesses for this purpose.

Compliance and technical assistance. The CFPB is supporting small business lenders with a variety of compliance and technical tools to help them determine if they are covered by this new rule, and if so when their obligations arise. For lenders that are covered, the agency is also making available a range of resources to assist with effective implementation of the rule, including a small entity compliance guide. These materials are available at *https://www.consumerfinance.gov/compliance/compliance-resources/small-business-lending-resources/small-business-lending-collection-and-reporting-requirements.* The CFPB is also launching a dedicated regulatory and technical support program that can provide oral and written assistance in response to stakeholder questions about collection and reporting obligations, and a range of technical resources to make it easier to report data to the CFPB. The support program and related materials are available at *https://www.consumerfinance.gov/data-research/small-business-lending-data/.* To further assist covered financial institutions that serve small business customers in their preferred languages, the CFPB will make the sample data collection form available in several languages. The CFPB is also planning to develop resources to help small businesses understand how their data are treated, the availability of the dataset, and the broader purposes of the rule.

Use of technology partners and industry consortia for accurate, cost-efficient data collection and reporting. The final rule broadly permits financial institutions to work with third parties, including industry consortia, to develop services and technologies to aid in collecting and reporting data. So long as they meet the obligations stated in the rule, including collecting data in a manner that does not discourage small businesses from providing it, financial institutions are free to work with third parties to assist them with their compliance obligations, whether that is with respect to data collection, maintenance or reporting. The CFPB plans to work with consortia or other entities seeking to assist financial institutions to deploy industry-identified solutions. For example, the CFPB plans to provide Application Programming Interfaces in an open-source environment to assist financial institutions' technology partners to develop accurate and efficient data reporting tools.

II. Background

As discussed above, in 2010, Congress enacted the Dodd-Frank Act. Section 1071 of the Dodd-Frank Act, which amended ECOA, requires financial institutions to collect and report to the CFPB data regarding applications for credit for women-owned, minority-owned, and small businesses. Section 1071 was adopted for the dual purposes of facilitating fair lending enforcement and enabling communities, governmental entities, and creditors to identify business and community development needs and opportunities of such businesses. Section 1071 complements other Federal efforts to ensure fair lending and to promote community development for small businesses, including through ECOA, the Community Reinvestment Act of 1977 (CRA),[10] and the Community Development Financial Institutions (CDFI) Fund.[11]

The collection and subsequent publication of more robust and granular data regarding credit applications for small businesses will provide much-needed transparency to the small business lending market. The COVID–19 pandemic has shown that transparency is essential, particularly at a time of crisis, when small businesses are in urgent need of credit to recover from economic shocks.

In addition to informing policymaking, data collected under the final rule can help creditors identify potentially profitable opportunities to extend credit. As a result, small business owners stand to benefit from increased credit availability. More transparency will also allow small business owners to more easily compare credit terms and evaluate credit alternatives, helping them to find the credit product that best suits their needs at the best price. In these different ways, the data will help stakeholders to enhance business and community development, boosting broad-based economic activity and growth. Furthermore, in the years and decades to come, the collection and publication of these data will be helpful in identifying potential fair lending violations and otherwise facilitating the enforcement of anti-discrimination laws.

[10] 12 U.S.C. 2901 *et seq.*

[11] The Riegle Community Development Banking and Financial Institutions Act of 1994, 12 U.S.C. 4701 *et seq.*, authorized the Community Development Financial Institution Fund (CDFI Fund). The CDFI Fund is discussed in more detail in part II.F.2.ii below.

Overview

Small businesses are a cornerstone of the U.S. economy. There were over 33 million small businesses in the U.S. in 2019, employing almost half of all private sector employees.[12] Small businesses, particularly start-ups, also generated 62 percent of new jobs since 1995.[13] Small businesses were hit hard by two major shocks in the last two decades. First, the Great Recession, which began in 2007, disproportionately affected small businesses.[14] Between 2007 and 2009, employment at businesses with under 50 employees fell by 10.4 percent, compared with 7.5 percent at larger firms,[15] while between 2008 and 2011, lending to small firms fell by 18 percent, compared with 9 percent for all firms.[16] Small businesses suffered again because of the COVID–19 pandemic. Around 40 percent of small businesses were at least temporarily closed in late March and early April 2020, due primarily to demand shocks and employee health concerns.[17] Across the first year of the pandemic, some

[17] Alexander W. Bartik *et al., The Impact of COVID–19 on Small Business Outcomes and Expectations,* 117 Proc. Nat'l Acad. Sci. 17656, 17656 (July 2020), *https://www.pnas.org/content/pnas/117/30/17656.full.pdf.*

200,000 more businesses exited the market relative to historic levels.[18] It took until July 2021 for non-farm private sector jobs at establishments with fewer than 50 employees to recover to pre-pandemic levels.[19] As of mid-2022, small business loan approvals (other than for government emergency programs) still remained below pre-pandemic levels.[20]

During the last two decades, the small business lending landscape has also transformed. Traditional providers—namely banks—consolidated, leading to branch closures. The number of banks in the U.S. has declined from over 18,000 in 1986 to under 4,800 as of June 30, 2022 and the number of branches declined by 14 percent from 2009 to 2020.[21] Meanwhile, new providers and products, such as online lenders and merchant cash advances, have become increasingly prevalent in the small business lending market. Financing by merchant cash advance providers is estimated to have increased from $8.6 billion in volume in 2014 to $15.3 billion in 2017.[22] From 2017 to 2019, the volume may have increased further to $19 billion.[23] Meanwhile, financing provided by online ''fintech'' [24] lenders is estimated to have increased from $1.4 billion [25] in outstanding balances in 2013 to approximately $25 billion [26] in 2019.

Regarding trends in the small business financing landscape, the shift away from traditional providers of small business credit toward newer types of providers gives rise to both potential harm and opportunity. In terms of potential harms, bank closures may have made it more difficult for small businesses, particularly those that are already underserved, to access credit and remain open—especially in low- and moderate-income areas and rural communities. Newer providers, often offering newer products, have less experience complying with both Federal and State lending laws and regulations than traditional providers. Differences in funding models may also make non-traditional credit providers less resilient than depository banks or credit unions during shocks to the financial system such as the onset of the COVID–19 pandemic.[27] Additionally, they may use complex algorithms and artificial intelligence, which may create or heighten ''risks of unlawful discrimination, unfair, deceptive, or abusive acts or practices . . . or privacy concerns.'' [28] Opaque product terms and high costs can also trap business owners in cycles of debt. In terms of opportunity, some newer approaches may help applicants with low or nonexistent personal or business credit scores—including women and minorities who own or seek to start small businesses but on average have lower personal credit scores than male and white business owners [29]—to access credit.[30] Non-traditional credit providers as well as digital offerings by traditional financial institutions may also help offset decreases in lending

associated with the closure of bank branches.[31]

The precise impacts of these broader trends are not well understood at present because there are no comprehensive, comparable, and application-level data across the fragmented and complex small business lending market. Some small business lending data exist, provided in data reported to Federal regulators, but available data are incomplete in certain ways. Some do not include lending by certain categories of institutions, such as smaller depository institutions. And none include lending by nondepository institutions, which comprises almost half of all small business financing.[32]

The datasets that do exist both over- and underestimate small business lending in certain respects by including small dollar loans to non-small businesses and by excluding larger loans to small businesses.[33] Further, these datasets almost exclusively concern originated loans; they do not include information on applications that do not result in originated loans. Nor do they generally include borrower demographics. Other public, private, and nonprofit datasets offer only partial snapshots of particular areas of the market. Finally, much of the publicly available data are aggregated, which does not permit more granular, loan- or application-level analysis that would facilitate fair lending or business and community development analysis by stakeholders other than those that collected the data. See part II.B below for a detailed discussion on existing data on small business financing.

The remainder of this part II focuses on several broad topics that explain, in more detail, the need for the small business lending data that the CFPB's rule to implement section 1071 will provide: (A) improved understanding of the role of small businesses in the U.S. economy; (B) existing data on small business financing; (C) the landscape of small business financing; (D) estimating the size of the small business financing market despite limited data; (E) the particular challenges faced by women-owned, minority-owned, and LGBTQI+-owned small businesses; and (F) the purposes and impact of section 1071.

A. Small Businesses in the United States

Small businesses are an important, dynamic, and widely diverse part of the U.S. economy. They are critical to employment, innovation, and economic growth and stability, both overall and specifically for minority, women, and LGBTQI+ entrepreneurs.

The Small Business Act, as implemented by the Small Business Administration (SBA), defines a small business using size standards that generally hinge on the average number of employees or average annual receipts of the business concern and are customized industry by industry across 1,012 six-digit North American Industry Classification System (NAICS) codes.[34] Size standards based on average number of employees are used in all industries in the manufacturing and wholesale trade sectors, as well as in certain industries across a variety of other sectors. Employee-based size standards range from 100 employees (used almost entirely in certain industries within the wholesale trade sector) to 1,500 employees (used in industries across a variety of sectors including, for example, petroleum refineries, automobile manufacturing, and greeting card publishers).[35] Size standards based on average annual receipts are used in nearly all other industries, and range from $2.25 million (used in several industries in the crop production and animal production and aquaculture subsectors) to $47 million (used in industries across a variety of sectors including, for example, passenger car leasing, television broadcasting, and general medical and surgical hospitals).[36]

Simpler definitions of what constitutes a small business are used in certain contexts. For example, in certain annual research releases the SBA Office of Advocacy defines a small business as one that has fewer than 500 employees.[37] According to the Office of Advocacy, and based on this definition of a small business, in 2018 there were 32.5 million such businesses in the U.S. that represent 99.9 percent of all U.S. firms and employ over 60 million Americans.[38] Over six million of these small businesses have paid employees, while 26.5 million are non-employer businesses (*i.e.,* the owner(s) are the only people involved in the business).[39] From 1995 to 2020, small businesses, particularly young businesses and start-ups, created 12.7 million net new jobs in the U.S., while large businesses created 7.9 million.[40]

Nearly one third of all businesses are minority-owned and more than one third are women-owned, though minorities and women own a smaller share of employer firms. As of 2019, minorities owned around 1.1 million employer firms in the U.S. (amounting to 18.7 percent of all employer firms)[41] and, as of 2018, approximately 8.7 million non-employer firms (33.6 percent of all non-employer firms).[42] Likewise, as of 2019, women owned about 1.2 million employer firms (20.9 percent of all employer firms)[43] and, as of 2018, approximately 10.9 million non-employer firms (41.0 percent of all non-employer firms).[44] Additionally, in

[31] *See* Cong. Rsch. Serv., *Fintech: Overview of Innovative Financial Technology and Selected Policy Issues,* at 1 (Apr. 28, 2020), *https://crsreports.congress.gov/product/pdf/R/R46332.*

[32] The Bureau estimates that nondepository private business financing totaled approximately $550 billion out of around $1.2 trillion in total private outstanding balances in 2019 (47 percent). This $550 billion figure includes estimated financing by fintechs (around $25 billion), commercial finance companies (around $160 billion), nondepository CDFIs (around $1.5 billion), merchant cash advance providers (around $19 billion), factors (around $100 billion), equipment leasing providers (around $160 billion), nondepository mortgage lenders originating loans for 5+ unit residential developments (around $30 billion), and non-financial trade creditors (around $50 billion). There may additionally be lending that is not captured here by equipment and vehicle dealers originating loans in their own names. Public lenders include SBA, the Federal Housing Administration, Fannie Mae and Freddie Mac, and the Farm Credit System, with public lending totaling around $210 billion in traditional lending programs plus $1 trillion in emergency COVID–19 SBA lending programs. See part II.D below for methodology and sources regarding market size estimates for each lending category.

Continued

2016 there were an estimated 1.4 million LGBTQI+ business owners in the United States.[45]

Businesses are legally structured in several ways. In 2018, 87 percent of non-employer businesses were sole proprietorships, which means that the business is not distinguishable from the owner for tax and legal purposes; the owner receives profits directly but is also legally responsible for the business's obligations.[46] Seven percent of non-employer businesses were partnerships, which can be structured to limit the personal liability of some or all owners; limited partners may exchange control for limited liability, while general partners that run the business may remain personally liable.[47] Six percent of non-employer businesses were structured as corporations—4.5 percent are S-corporations and 1.5 percent are C-corporations—which are independent legal entities owned by shareholders who are not personally liable for the corporation's obligations.[48] In 2018, most small employer businesses were corporations, with 52.1 percent choosing to be S-corporations and 15.3 percent preferring C-corporation status, although sole proprietorship and partnership structures remained relatively popular at 13.7 percent and 11.9 percent, respectively.[49] By contrast, in 2017, 74.2 percent of large employer businesses chose to be C-corporations, with 9.3 percent preferring a partnership structure and 8.1 percent S-corporation status.[50]

Small businesses are particularly important in specific sectors of the economy. In 2019, in the services sector, small businesses supplied 9.2 million healthcare and social services jobs (44 percent of all healthcare and social services jobs), 8.8 million accommodation and food services jobs (61 percent), and 5.7 million construction jobs (81 percent).[51] In the same year, in manufacturing, small businesses supplied 5.1 million manufacturing jobs (42 percent of all manufacturing jobs).[52] Finally, in 2016, family farms with annual gross sales under $500,000 totaled over 91 percent out of 2.2 million farms,[53] and small businesses provided over 137,000 agriculture, forestry, fishing and hunting jobs (84 percent of all agriculture, forestry, fishing and hunting jobs).[54] As such, the financial health of small businesses is essential to the U.S. economy, especially to the supply of critical and basic goods and services—from producing food to serving it at restaurants, and from home building to healthcare.

Small businesses were especially hard-hit by the onset of the COVID–19 pandemic. At one point in the pandemic in April 2020, 20 percent of self-employed workers had temporarily exited the labor market.[55] Industries in which small businesses played a large role have been particularly impacted. For example, comparing April 2020 with April 2019, employment declined by almost 50 percent in the leisure and hospitality businesses (also declining by almost 50 percent among food services and drinking establishments within the leisure and hospitality industry), in which small businesses employ over 60 percent of workers.[56] Women-, minority-, and LGBTQI+-owned small businesses were hit particularly hard. Between February and April 2020, some 373,000 jobs were lost in child daycare services, a sector in which women-ownership predominates and minority-ownership is very significant. Only 54 percent of these jobs were recovered by the end of 2020.[57] In 2021, 85 percent of LGBTQI+-owned small businesses reported the pandemic was having a negative effect on their business, compared to 76 percent of non-LGBTQI+-owned small businesses.[58] Since 2022, small businesses have faced different economic shocks, including inflation and a shortage of labor, as the economy reopened and resurgent consumer demand has stretched still-fragile supply chains.[59]

B. Existing Data on Small Business Lending

While small businesses are a critical part of the U.S. economy and require financial support, it is still true—as it was in 2017 when the CFPB published its White Paper on small business lending—that it is not possible with current data to confidently answer basic questions regarding the state of small business lending. This limitation is especially the case with regard to the ethnicity, race, and sex of small business owners, applications as opposed to originations, and for small business financing products that are not currently reported in Call Report data.[60]

Data on small business lending are fragmented, incomplete, and not standardized, making it difficult to

non-employer firms generated less than $10,000 in annual receipts, while only 0.05 percent generated $1 million or more in receipts. *See* Press Release, Nat'l Women's Bus. Council, *NWBC Shares 2017 Nonemployer Statistics by Demographics Estimates for Women-Owned Businesses* (Dec. 17, 2020), *https://www.nwbc.gov/2020/12/17/nwbc-shares-2017-nonemployer-statistics-by-demographics-estimates-for-women-owned-businesses/*.

conduct meaningful comparisons across products and over time. Against this background, it is not hard to see why Congress believed that the collection of small business application data would serve to identify business and community development needs and opportunities. The lack of data hinders attempts by policymakers and other stakeholders to understand the size, shape, and dynamics of the small business lending marketplace, including the interaction of supply and demand, as well as potentially problematic lending practices, gaps in the market, or trends in funding that may be holding back some communities.[61] For example, absent better data, it is hard to determine if relatively lower levels of bank loans to small businesses in the decade before the pandemic began were reflective of a net relative decline in lending to small businesses as compared to large businesses or rather a shift within small business lending from banks to nondepository lenders.[62] To the extent there may have been a relative decline, it is difficult to assess if that decline affected certain types of small businesses more than others, including women-owned and minority-owned small businesses.[63]

The primary sources of information on lending by depository institutions are the Federal Financial Institutions Examination Council (FFIEC) and National Credit Union Administration (NCUA) Consolidated Reports of Condition and Income (Call Reports), as well as reporting under the Community Reinvestment Act (CRA). Under the FFIEC and CRA reporting regimes, small loans to businesses of any size are used in whole or in part as a proxy for loans to small businesses. The FFIEC Call Report captures banks' outstanding number and amount of small loans to businesses (that is, loans originated under $1 million to businesses of any size; small loans to farms are those originated under $500,000).[64] The CRA currently requires banks and savings associations with assets over a specified threshold to report loans in original amounts of $1 million or less to businesses; reporters are asked to indicate whether the borrower's gross annual revenue is $1 million or less, if they have that information.[65] The NCUA Call Report captures data on all loans over $50,000 to members for commercial purposes, regardless of any indicator about the business's size.[66] There are no similar sources of information about lending to small businesses by nondepository institutions. The SBA also releases loan-level data concerning some of its loan programs, but these typically do not include demographic information, and cover only a small portion of the overall small business financing market.

These public data sources provide some of the most extensive information currently available on small business lending. However, they suffer from four material limitations: namely that the data capture only parts of the market, are published at a high level of aggregation, do not permit detailed analysis across the market, and lack standardization across different agencies.

First, these datasets exclude entire categories of lenders. For example, banks under $1.384 billion in assets, as of 2022, do not have to report under the CRA.[67] The FFIEC and NCUA Call Reports and CRA data do not include lending by nondepository financial institutions, which the CFPB estimates to represent 37 percent of the small business financing market and is rapidly growing.[68]

Second, Federal agencies publish summary data at a high level in a manner that does not facilitate independent analysis by other agencies or stakeholders. The FFIEC and NCUA Call Reports and the CRA data are all available at a higher level of aggregation than loan-level, limiting fair lending and detailed geographic analyses since ethnicity, race, and sex as well as business location data are rarely disclosed.

Third, the detailed data collected by these Federal sources have significant limitations as well, preventing any analysis into certain issues or types of borrowers, even by the regulators possessing these data. Neither Call Report nor CRA data include applications, which limits insights into any potential discrimination or discouragement in application processes as well as into the interaction between credit supply and demand. The FFIEC Call Report and CRA data separately identify loans of under $1 million in value and, among loans of under $1 million in value, CRA data also identify loans to businesses with annual revenues of $1 million or less (if the lender collects borrower revenue information).[69] However, the Call Report definition of ''small business loans'' as those with a loan size of $1 million or less at origination is both overinclusive, as it counts small loans to businesses of all sizes, and underinclusive, as it excludes loans over $1 million made to small businesses. Credit unions report any loans under $50,000 as consumer loans and not as commercial loans on the NCUA Call Report,[70] potentially excluding from measurement an important source of funding for many small businesses, particularly the smallest and often most underserved.

Finally, the Federal sources of small business lending data are not

[61] While Call Report and CRA data provide some indication of the level of supply of small business credit, the lack of data on small business credit applications makes demand for credit by small businesses more difficult to assess, including with respect to local markets or protected classes.

[62] Rebel A. Cole, Off. of Advocacy, Small Bus. Admin., *How Did Bank Lending to Small Business in the United States Fare After the Financial Crisis?,* at 26 (Jan. 2018), *https://cdn.advocacy.sba.gov/wp-content/uploads/2019/05/09134658/439-How-Did-Bank-Lending-to-Small-Business-Fare.pdf* (showing a decline in bank loans to small businesses from 2008 to 2015 from $710 billion to $600 billion). The level of bank lending to small businesses has recovered somewhat since a trough in 2012–13 that represented the lowest amount of lending since 2005. Fed. Deposit Ins. standardized across agencies and cannot be easily compared. For example, as noted above, the FFIEC Call Report collects small loans to businesses as a proxy for small business lending, whereas the NCUA Call Report collects loans to members for commercial purposes above $50,000 but with no upper limit. The loan-level data for the Paycheck Protection Program offer an unprecedented level of insight into small business lending, but this dataset is a one-off snapshot into the market for a specific lending program at an acute moment of crisis and is also limited in utility by relatively low response levels to demographic questions concerning borrowers.[71]

The Federal government also conducts and releases a variety of statistics, surveys, and research reports on small business lending through the member banks for the Federal Reserve System, the FDIC, CDFI Fund, and the U.S. Census Bureau. These data sources offer insights into broad trends and specific small business lending issues but are less useful for detailed fair lending analyses or identification of specific areas, industries, or demographic groups being underserved. Periodic changes in survey methodology, sample sizes, and questions can also limit comparability and the ability to track developments over time.

There are also a variety of non-governmental data sources, issued by both private and nonprofit entities, that cover small businesses and/or the small business financing market. These include datasets and surveys published by commercial data and analytics firms, credit reporting agencies, trade associations, community groups, and academic institutions. Certain of these data sources are publicly available and track specific topics, such as small business optimism,[72] small business employment,[73] rates of small business credit application approvals,[74] and small business lending and delinquency levels.[75] Other databases have more granularity and provide detailed information on individual businesses, including revenue, credit utilization, industry, and location.[76]

While these non-public sources of data on small businesses may provide a useful supplement to existing Federal sources of small business lending data, these private and nonprofit sources often do not have lending information, may rely in places on unverified self-reporting or research based on public internet sources, and/or narrowly limit use cases for parties accessing data. Further, commercial datasets are generally not free to public users and can be costly as well as have restrictions on their use, raising equity issues for stakeholders who cannot afford access or are not permitted to use the data for their desired purposes.

C. The Landscape of Small Business Finance

Notwithstanding the lack of data on the market, it is clear that financing plays an important role in enabling small businesses to grow and contribute to the economy. When it is available, financing not only provides resources for small businesses to smooth cash flows for current operations, but also affords business owners the opportunity to invest in business growth. A study by a small business trade group found a correlation between small business owners' ability to access credit and their ability to hire.[77] This same study found that, while not the sole cause, the inability to secure financing may have led 16 percent of small businesses to reduce their number of employees and approximately 10 percent of small businesses to reduce employee benefits. Lack of access to financing also contributed to a further 10 percent of small businesses being unable to increase store inventory in order to meet existing demand.[78]

To support their growth or to make it through harder times, small businesses look to a variety of funding sources. Especially when starting out, entrepreneurs often rely on their own savings and help from family and friends. If a business generates a profit, its owners may decide to reinvest retained earnings to fund further growth. However, for many aspiring business owners—and their personal networks—savings and retained earnings may not be sufficient to fund a new venture or grow it, leading owners to seek other sources of funding. This is particularly true for minority households and women-led households, which on average have less wealth than white households and male-led households.[79]

One such source of funding comes from others besides family and friends, whether high net worth individuals or ''angel investors,'' venture capital funds, or, in a more recent development usually facilitated by online platforms, via crowdsourcing from retail investors. Often, these early investments take the form of equity funding, which business owners are not obligated to repay to investors. However, equity funding requires giving up some ownership and control to investors, which some entrepreneurs may not wish to do. For small businesses, equity funding also tends to be somewhat more expensive than debt financing in the long run. This is for a number of reasons, including that loan interest payments, unlike capital gains, are tax-deductible.[80] Finally, equity investments from others besides family and friends are available to only a small fraction of small businesses.

Many small businesses instead seek debt financing from a wide range of

providers. These providers include depository institutions, such as banks, savings associations, and credit unions,[81] as well as online lenders and commercial finance companies, specialized providers of specific financing products, nonprofits, and a range of government and government-sponsored enterprises, among others.

In the past, small businesses principally sought credit from banks; however, as banks have merged and consolidated, particularly in the wake of the Great Recession, they have provided less financing to small businesses.[82] As noted earlier, the number of banks has declined significantly since a post-Great Depression peak in 1986 of over 18,000 institutions to under 4,800 institutions as of June 30, 2022,[83] while 13,500 branches closed from 2009 to mid-2020, representing a 14 percent decrease.[84] Although nearly half of counties either gained bank branches or retained the same number between 2012 and 2017, the majority lost branches over this period.[85] Out of 44 counties that were deeply affected by branch closures, defined as having 10 or fewer branches in 2012 and seeing five or more of those close by 2017, 39 were rural counties.[86] Of rural counties, just over 40 percent lost bank branches in that period; the rural counties that experienced substantial declines in bank branches tend to be lower-income and with a higher proportion of African American residents relative to other rural counties,[87] raising concerns about equal access to credit.

As banks have merged and the number of branches reduced, the share of banking assets has also become increasingly concentrated in the largest institutions, with banks of over $10 billion in assets representing 86 percent of all industry assets in 2021, totaling $20.3 trillion out of $23.7 trillion.[88] Nevertheless, banks of under $10 billion in assets continue to hold approximately half of all small business loans (using the FFIEC Call Report definition of loans of under $1 million), highlighting the importance of smaller banks to the small business lending market.[89] Since smaller bank credit approvals have traditionally been close to 50 percent, while large banks approve only 25–30 percent of applications, bank consolidation may have implications for small business credit access.[90] Since institutions under $1.384 billion in assets currently are not required to report on lending under the CRA,[91] it is difficult to precisely quantify the negative impact of bank consolidation and shuttered branches on small business lending and access to credit in local areas.[92] Qualitatively, community banks typically receive high satisfaction scores among small business borrowers, reflecting their greater commitment to relationship banking, a model of banking ''used to serve families, businesses, and communities as individuals, with an emphasis on providing customized help, rather than assembly line service.'' [93]

In contrast to banks, credit unions increased their small business lending from $30 billion in 2008 to $71 billion in 2021.[94] Like community banks, credit

[81] For purposes of this document, the Bureau is using the term depository institution to mean any bank or savings association defined by section 3(c)(1) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(c)(1), or credit union defined pursuant to the Federal Credit Union Act, as implemented by 12 CFR 700.2. The Bureau notes that the Dodd-Frank Act defines a depository institution to mean any bank or savings association defined by the Federal Deposit Insurance Act; there, that term does not encompass credit unions. 12 U.S.C. 5301(18)(A), 1813(c)(1). The Bureau is referring to banks and savings associations together with credit unions as depository institutions throughout this document, unless otherwise specified, to facilitate analysis and discussion.

[94] Rebel A. Cole, Off. of Advocacy, Small Bus. Admin., *How Did Bank Lending to Small Business in the United States Fare After the Financial Crisis?,* at 51 (Jan. 2018), *https://cdn.advocacy.sba.gov/wp-content/uploads/2019/05/09134658/439-How-Did-Bank-Lending-to-Small-Business-Fare.pdf ($30 billion in lending in 2008);* Calculated from NCUA Call Report data accessed on October 18, 2022 ($71 billion in lending in 2021). The Bureau notes that, as discussed in part II.B above, credit unions only report credit transactions made to members for commercial purposes with values over $50,000. The Bureau uses this value as a proxy for small business credit. The Bureau acknowledges that the true value of small business credit extended by credit unions may be different than what is presented here. For example, this proxy may overestimate the value of outstanding small business credit because some members are taking out loans for large businesses. Alternatively, this proxy may underestimate the value of outstanding small business credit if credit unions originate a substantial number of small business loans with origination values of under $50,000. For this analysis, the Bureau includes all types of commercial loans to members except construction and development loans and multifamily residential property. This includes loans secured by farmland; loans secured by owner-occupied, non-farm, non-residential property; loans secured by non-owner occupied, non-farm, non-residential property; loans to finance agricultural

Continued

unions typically receive high satisfaction scores among small business borrowers, reflecting more high-contact, relationship-based lending models.[95]

Certain banks and credit unions choose to be mission-based lenders, as CDFIs or minority depository institutions.[96] Mission-based lenders focus on providing credit to traditionally underserved and low-income communities and individuals to promote community development and expand economic opportunity, making them a relatively smaller by dollar value but essential part of the small business lending market. There were almost 1,400 CDFIs (over half of which are depository institutions) as of August 2022 and over 140 minority depository institutions as of March 2022.[97]

During a period in which depository institutions have been providing relatively less funding to small businesses,[98] some small businesses have increasingly relied on nondepository institutions for financing. Since nondepositories typically do not report their small business financing activities to regulators, there are no authoritative sources for either the number of such entities or the dollar value of financing they provide to small businesses.[99] However, what data are available make clear that nondepository online lenders are increasing their share of the small business financing market.[100]

Whether depository or nondepository, each provider of small business financing may assess a variety of different criteria to determine whether and on what terms to grant an extension of credit or other financing product, including business and financial performance, the credit history of the business and its owner(s), the time in business, and the industry, among other factors. Protections such as guarantees, collateral, and insurance can mitigate perceived risks, potentially enabling a lender to offer better terms or facilitating an extension of credit that would otherwise not meet lending limit or underwriting criteria. Often, government agencies—including the SBA, Federal Housing Administration, and USDA—guarantee or insure loans to encourage lenders to provide credit to borrowers that may not otherwise be able to obtain credit, either on affordable terms and conditions or at all.[101] Different lenders also employ diverse methods for assessing risk, with smaller banks generally relying more on traditional underwriting methods and typically managing multi-product relationships. Online lenders increasingly use complex algorithms, automation, and even artificial intelligence to assess risk and make underwriting decisions, with originations typically being less relationship-based in nature.

As well as diversity in underwriting methodology and criteria, there are also considerable differences across small business financing products and providers with respect to pricing methods and repayment structures. As a result, it can be challenging to compare the competitiveness of product pricing and terms. Term loans, lines of credit, and credit cards typically disclose annualized interest rates; leases often take into account depreciation; factoring products discount an invoice's value and add a fee; and merchant cash advances apply a multiple to the value of the up-front payment.[102] Moreover, providers may add additional fees that are not standardized within industries, much less across them.

D. Estimating the Size and Scope of the Small Business Financing Market

In light of the lack of data and the heterogeneity of products and providers within the small business financing market, it can be difficult to get a clear sense of the size and scope of the market. In this part, the CFPB describes its estimates of the total outstanding balances of credit in the market, the number of institutions that are active in the small business financing market, and how the CFPB arrived at these estimates. Where possible, the CFPB tries to estimate the state of the small business financing market at the end of 2019 in order to estimate the state of the market during the year prior to the onset of the COVID–19 pandemic.

One challenge is that some of the data report the dollar value of originations and some report outstanding balances. For the purposes of this exercise and for most, but not all, products, the CFPB assumes that for every $1 originated in the market in a given year, there is approximately a corresponding $3 of outstanding balances. This assumption is based on the ratio of the 2019 FFIEC Call Report data, which totaled $721 billion in outstanding balances on bank loans to small businesses and small farms, and the 2019 CRA data, which recorded $264 billion in bank loan originations to small businesses and small farms.[103] This assumption is limited by the extent to which other small business financing products differ from loans and lines of credit, which make up the majority of financing products captured by the FFIEC Call Report data and the CRA data.[104]

production and other loans to farmers; commercial and industrial loans; unsecured commercial loans; and unsecured revolving lines of credit for commercial purposes.

[103] FFIEC Call Report data records outstanding balances on loans with origination amounts less than $1 million across Commercial & Industrial, Nonfarm Nonresidential, Agricultural, and Secured by Farmland lending categories. *See* FDIC Quarterly Banking Profile Time Series, *https://www.fdic.gov/analysis/quarterly-banking-profile/qbp/timeseries/small-business-farm-loans.xlsx* (last visited Mar. 20, 2023).

[104] FFIEC Call Report data and CRA data on small business credit products also include business credit card products, but loans and lines of credit made up $713 billion out of $775 billion in outstanding balances on bank, savings association, and credit union loans to small businesses in 2019.

As detailed in this section, the CFPB estimates that the market for small business financing products totaled $1.4 trillion in outstanding balances in 2019. The CFPB estimates that small business financing by depository institutions makes up just over half of small business financing by private institutions. In 2020 and 2021, COVID–19 emergency lending programs added a further $1 trillion to this value, bringing the overall size of the small business financing market up to $2.4 trillion. However, by July 2022, over $740 billion in Paycheck Protection Program loans had been forgiven, bringing the total market size back below $1.7 trillion.[105] Below, the CFPB estimates the market share for different small business financing products.

Since the available data regarding depository institutions' small loans to businesses address term loans, lines of credit, and credit cards together, the respective shares of these three products in the overall small business financing market are difficult to assess. As detailed in this part, the CFPB estimates that together, private term loans and lines of credit constitute the largest small business credit product by value, totaling approximately $770 billion in outstanding balances in 2019. As of July 2022, outstanding balances for Economic Impact Disaster Loan Program and Paycheck Protection Program loans totaled $260 billion, bringing the total value of all outstanding loans and lines of credit to around $1 trillion.[106]

Lending by banks, saving associations, and credit unions comprises the largest part of this total amount for private term loans and lines of credit. Using FFIEC Call Report data for December 2019, the CFPB estimates that banks and savings associations accounted for a total of about $721 billion in outstanding credit to small businesses and small farms as of December 2019.[107] Using NCUA Call Report data for December 2019, the CFPB estimates that credit unions accounted for a total of about $55 billion in outstanding credit to members for commercial purposes.[108] From this value, the CFPB subtracts $62 billion in credit card lending to arrive at $713 billion in outstanding balances for term loans and lines of credit. From this value, the CFPB further subtracts $134 billion in SBA guaranteed loans to arrive at $580 billion in outstanding balances for private term loans and lines of credit extended by depository institutions (*i.e.,* banks, savings associations, and credit unions) as of December 2019.

The remaining $190 billion in outstanding balances for private term loans and lines of credit was extended by various nondepository institutions, namely commercial finance companies, online lenders, and nondepository CDFIs.[109]

Commercial finance companies specialize in financing equipment and vehicle purchases. The CFPB estimates that the value of outstanding balances on credit extended by commercial finance companies totaled approximately $160 billion. Using data from the Board's Finance Company Business Receivables data on owned assets as of December 2019, the CFPB estimates commercial finance companies outstanding credit for commercial purposes as the value of retail motor vehicle loans plus equipment loans and other business receivables, which totaled about $215 billion.[110] The CFPB further assumes that about 75 percent of this value, or $162 billion, can be attributed to loans to small businesses.[111]

Typical ''fintech'' providers are characterized primarily by providing financial services exclusively in an online environment.[112] The CFPB estimates that total outstanding loan balances for such providers reached around $25 billion in 2019. Using this estimate, the CFPB scales up an estimated $9.3 billion in credit originations by online platform lenders to small and medium enterprises in 2019 to $25 billion in estimated outstanding balances, under the assumptions discussed above.[113] At the beginning of the COVID–19 pandemic and associated financial crisis, these lenders originated around $22 billion in Paycheck Protection Program loans to small businesses from March to August 2020[114] and likely continued to originate billions more during the third wave of Paycheck Protection Program loans in 2021, which represents an almost 90 percent increase or more in outstanding balances since 2019.[115] This follows already rapid growth from $1.4 billion in estimated outstanding balances in 2013.[116]

One important caveat to this assumption is that products with materially shorter average term lengths, for example credit cards, factoring products, and merchant cash advances, may have an inverse ratio of originations to outstanding balances. For example, top issuers of general-purpose credit cards recorded purchase volumes of two to seven times their outstanding balances in 2020. Nilson Report, Issue 1192, at 6 (Feb. 2021), *https://nilsonreport.com/publication_newsletter_archive_issue.php?issue=1192.* If business-purpose credit cards, factoring products, and merchant cash advances behaved similarly with respect to the ratio of originations to outstanding balances, then for every $1 originated in the market in a given year, there could be a corresponding $0.14–0.50 in outstanding balances for such products ($1 divided by two to seven).

[105] Pandemic Response Accountability Comm., *Paycheck Protection Program: Loan Forgiveness by the Numbers* (July 2022), *https://www.pandemicoversight.gov/media/file/ppp-loan-forgiveness-fact-sheet-july-2022-updatepdf.*

[106] *Id.*

[107] Calculated from FFIEC Call Report data accessed on October 18, 2022. The CFPB notes that, as discussed in part II.B above, these estimates rely on small loans to businesses as a proxy for loans to small businesses. As such, the CFPB acknowledges that the true outstanding value of credit extended to small businesses by such institutions may be different than what is presented here. For example, the small loans to businesses proxy would overestimate the value of outstanding credit if a significant number of small loans to businesses and farms are to businesses or farms that are actually large. Alternatively, the proxy would underestimate the value of outstanding credit to small businesses if a significant number of businesses and farms that are small under the rule take out loans that are larger than $1 million or $500,000, for businesses and farms, respectively.

[108] Calculated from NCUA Call Report data accessed on October 18, 2022.

[109] There may additionally be lending that is not captured here by equipment and vehicle dealers originating loans in their own names.

[110] Bd. of Governors of the Fed. Rsrv. Sys., *Finance Companies—G.20* (updated Aug. 17, 2022), *https://www.federalreserve.gov/releases/g20/hist/fc_hist_b_levels.html.* The Bureau does not include leases, since they are already counted within the product category of equipment and vehicle leasing, or wholesale loans, which it assumes are typically made to non-small businesses.

[111] This methodology is consistent with the approach taken by Gopal and Schnabl (2020).

[112] Barkley & Schweitzer, 17 Int'l J. Cent. Banking at 35–36.

[113] *See* 2018 US Fintech Market Report at 6. The Bureau notes that this figure may underestimate the total value of such lending because it focuses on platform lenders and may overestimate the value of lending to small businesses because it also includes credit to medium businesses. Additionally, the Bureau notes that fintechs often offer products besides loans and lines of credit, and that there is no clear demarcation between fintech, commercial finance company, and merchant cash advance provider, limiting the precision of market size estimates. Finally, fintechs often sell loans once originated to other entities, securitize their originations, or purchase loans that banks have originated, which may further present challenges to the precision of market size estimates for this market segment.

Continued

The CFPB estimates the value of outstanding balances on credit extended by nondepository CDFIs to small business borrowers to be around $1.5 billion. Using reporting by the CDFI Fund for 2019, the CFPB scales down the outstanding balances for loan funds of $13.8 billion and for venture capital funds of $0.3 billion by the proportion of all CDFI lending attributable to business borrowers, which totaled $15.4 billion out of $141.2 billion.[117]

Categorized here separately so as to distinguish residential from non-residential loans, the CFPB estimates outstanding balances for loans on 5+ unit residential dwellings to total over $30 billion.[118] The CFPB scales up $11 billion in 2019 annual originations on loans of under $1 million in value at origination for 5+ unit residential dwellings to $30 billion in estimated outstanding balances, using the ratio between the FFIEC Call Report and the CRA data discussed above.[119]

Also categorized separately from depository institution totals so as to distinguish private from government and government-sponsored loans, the CFPB estimates that outstanding balances for loans extended by the SBA and the Farm Credit System totaled around $200 billion in 2019.[120]

The SBA, through its traditional 7(a), 504, and microloan programs as well as the Economic Impact Disaster Loan Program and funding for Small Business Investment Companies, is the largest governmental lender by value, with $143.5 billion in outstanding balances at the end of fiscal 2019.[121] As part of the Federal government's response to the COVID–19 pandemic, during 2020 and 2021 SBA lending increased in size by over $1 trillion due to the Paycheck Protection Program, which totaled almost $800 billion, and the Economic Impact Disaster Loan Program, which totaled $210 billion.[122] However, as noted above, over $740 billion in Paycheck Protection Program loans had been forgiven as of July 2022, bringing SBA outstanding loan balances back down.[123]

The Farm Credit System is another important government-related part of the small business credit landscape. The CFPB estimates that Farm Credit System lenders had around $55 billion in outstanding balances of credit extended to small farms in 2019. Using the same small loan to farms proxy as is used in the FFIEC Call Report, the CFPB estimates credit to farms with an origination value of less than $500,000. Based on the Farm Credit System's 2019 Annual Information Statement of the Farm Credit System, the CFPB estimates that outstanding balances of such small credit to farms totaled $55 billion at the end of 2019.[124] The CFPB notes that, as with the FFIEC Call Report proxy, this number may include credit to non-small farms and may exclude larger credit transactions extended to small farms. Considering credit extended with an origination value of between $500,000 and $5 million would increase the market size by $86 billion to $141 billion.[125]

Mostly extended by depository institutions, the CFPB estimates that the market for small business credit cards totaled over $60 billion in outstanding balances for 2020.[126] Using data from Y–14 Form submissions to the Federal Reserve Board, the CFPB estimates the value of outstanding balances for small business credit card accounts where the loan is underwritten with the sole proprietor or primary business owner as an applicant.[127]

Equipment and vehicle leasing, whereby businesses secure the right to possess and use a piece of equipment or vehicle for a term in return for consideration, is another important product category that is estimated to value roughly $160 billion in outstanding balances in 2019. The CFPB estimates the total size of the equipment and vehicle leasing market for all sized businesses in 2019 to be approximately $900 billion.[128] The CFPB further assumes that small businesses comprise around 18 percent of the total

5). This figure annualizes $121 million in estimated 2013 quarterly originations to $484 million in annual originations and scales up to estimated outstanding balances using the ratio between the FFIEC Call Report and the CRA data discussed above.

[117] CDFI Fund, *CDFI Annual Certification and Data Collection Report (ACR): A Snapshot for Fiscal Year 2019,* at 17, 22 (Oct. 2020), *https://www.cdfifund.gov/sites/cdfi/files/2021-01/ACR-Public-Report-Final-10292020-508Compliant.pdf.* To the extent that CDFI loan funds and venture capital funds extend credit to business customers at different rates than CDFI banks and credit unions, this calculation may over- or underestimate the value of lending to small businesses by nondepository CDFIs. This figure also assumes that all CDFI lending is for small businesses.

[118] Depository institutions, discussed above, extend a sizeable proportion of loans for 5+ unit residential dwellings; both nondepository and depository institutions are included in the total for 5+ unit outstanding balances.

[119] *See* Mortg. Bankers Ass'n, *Annual Report on Multi-Family Lending—2019,* at 5 (2020), *https://www.mba.org/store/products/research/general/report/2019-annual-report-on-multifamily-lending.* This includes both private loans, estimated at around $18 billion, and loans extended by Fannie Mae, Freddie Mac, and the Federal Housing Administration, estimated at around $13 billion. The share of 5+ unit residential dwelling loans of all sizes extended by governmental or government-sponsored entities was 41 percent. The Bureau assumes for the purposes of this exercise that the same share is reflected in loans of under $1 million in value at origination, although arguably this share would be higher if government and government-sponsored entities extended disproportionately smaller dollar value loans on average. There is also a substantial market for commercial real estate besides 5+ unit residential dwellings not captured here due to a lack of data on loans of small size or to small businesses. *See* Mortg. Bankers' Ass'n, *MBA: Commercial, Multifamily Mortgage Bankers Originated $683B in 2021; Total Lending Tally Reaches $891B* (Apr. 15, 2022), *https://newslink.mba.org/mba-newslinks/2022/april/mba-newslink-friday-apr-15-2022/mba-commercial-multifamily-mortgage-bankers-originated-683b-in-2021-total-lending-tally-reaches-891b/* (estimating the volume of commercial real estate lending of any size to be $890.6 billion in 2021, of which multifamily lending accounted for $376 billion).

[120] The grand total for lending by government and government-sponsored entities would be approximately $210 billion, including 5+ unit residential dwelling loans extended by Fannie Mae, Freddie Mac, and the Federal Housing Administration, which are separately recorded within the 5+ unit residential dwelling loan product category.

[121] Small Bus. Admin., *Small Business Administration Loan Program Performance* (effective Mar. 31, 2022), *https://www.sba.gov/document/report-small-business-administration-loan-program-performance.* SBA guaranteed loans comprised $134 billion out of this total, which amount has been deducted from the totals for depository institutions to avoid double counting.

equipment and vehicle leasing market.[129]

Factoring is a similarly significant product type, estimated at around $100 billion in market size for 2019.[130] In a factoring transaction, factors purchase, at a discount, a legally enforceable claim for payment (*i.e.,* accounts receivables or invoices) for goods already supplied or services already rendered by a business for which payment has not yet been made in full; hence, a factor's risk related to repayment lies with the business's customer and not the business itself. In most cases, specific companies, called factors, provide factoring products.

The market for merchant cash advances continues to develop rapidly and data are even more scarce than for other segments of the small business lending market. This limits the reliability of estimates as to the merchant cash advance market's size. The CFPB estimates the 2019 market size to be around $20 billion.[131] The merchant cash advance market is also of particular significance for smaller and traditionally underserved businesses that may not qualify for other types of credit.[132] Merchant cash advances are typically structured to provide a lump sum payment up front (a cash advance) in exchange for a share of future revenue until the advance, plus an additional amount, is repaid. Unlike the majority of other small business financing products, merchant cash advances typically purport to be for short durations.[133] The CFPB understands that merchant cash advances also tend to be relatively high-cost products.[134] Several States, including New York and California, are implementing laws that will require providers of ''sales-based financing,'' such as merchant cash advances, as well as other nondepositories to provide disclosures (including estimated APR in some States) similar to those required under the Truth in Lending Act (TILA),[135] which generally only applies to consumer credit.[136]

Finally, trade credit is another significant market, which the Bureau estimates to total $51 billion in outstanding balances in 2019. The Bureau estimates the trade credit market size by adding the total accounts payable for businesses under $1 million in annual revenue.[137] Considering the total value of accounts payable for businesses between $1 million and $5 million would increase the market size by $88 billion.[138] Trade credit is an often informal, business-to-business transaction, usually between non-financial firms whereby suppliers allow their customers to acquire goods and/or services without requiring immediate payment.

The CFPB estimates that there were approximately 8,200 financial institutions extending small business financing in 2019, almost 80 percent of which were depository institutions.[139]

---

[129] *See* Karen Mills, Harvard Bus. Sch., *State of Small Business Lending,* at 29 (July 2014), *https://www.hbs.edu/ris/Supplemental%20Files/15-004%20HBS%20Working%20Paper%20Chart%20Deck_47695.pdf* (estimating equipment leasing outstanding balances for small business borrowers at approximately $160 billion at Dec. 31, 2013); Monitor Daily, *SEFI Report Finds Strong Performance Despite Challenges* (Oct. 21, 2014), *https://www.monitordaily.com/news-posts/sefi-report-finds-strong-performance-despite-challenges/* ($903 billion market in 2014, commensurate with an 18 percent market share for small business borrowers at the time of the Karen Mills report).

[130] *See* Secured Fin. Found., *2019 Secured Finance: Market Sizing & Impact Study Extract Report,* at 7 (June 2019), *https://www.sfnet.com/docs/default-source/data-files-and-research-documents/sfnet_market_sizing___impact_study_extract_f.pdf?sfvrsn=72eb7333_2.* This study estimated the total volume of the U.S. factoring market to be $101 billion. To the extent that factoring volumes differ from outstanding balances, the value of outstanding balances may be higher or lower than this estimate. Also, this estimate captures factoring for business borrowers of all sizes, not just small business borrowers. The CFPB assumes that most factoring is provided to small business customers.

[131] Paul Sweeney, *Gold Rush: Merchant Cash Advances are Still Hot,* deBanked (Aug. 18, 2019), *https://debanked.com/2019/08/gold-rush-merchant-cash-advances-are-still-hot/.* BPC estimates appear to reference origination volumes rather than outstanding balances. *See* Nimayi Dixit, S&P Glob. Mkt. Intel., *Payment Fintechs Leave Their Mark On Small Business Lending* (Aug. 28, 2018), *https://www.spglobal.com/marketintelligence/en/news-insights/research/payment-fintechs-leave-their-mark-on-small-business-lending.* Depending on credit multiplier effects, the value of annual origination volumes could be smaller or greater than outstanding balances. Without information on outstanding balances and for the purposes of calculating a market size for small business financing in 2019, the CFPB assumes in this paper a 1:1 ratio between annual origination volumes and outstanding balances for merchant cash advance products. See above for discussion of credit multiplier effects.

[132] *Cf.* Barbara Lipman & Ann Marie Wiersch, Bd. of Governors of the Fed. Rsrv. Sys., *Uncertain Terms: What Small Business Borrowers Find When Browsing Online Lender websites,* at 3 (Dec. 2019), *https://www.federalreserve.gov/publications/files/what-small-business-borrowers-find-when-browsing-online-lender-websites.pdf* (observing that online lenders, including providers of merchant cash advance products, position themselves as offering financing to borrowers underserved by traditional lenders).

[133] *See id.* (stating that merchant cash advances are generally repaid in three to 18 months).

[134] *Id.* (stating that annual percentage rates on merchant cash advance products can exceed 80 percent or rise to triple digits). *See also* Fed. Trade Comm'n, *'Strictly Business' Forum, Staff Perspective,* at 5 (Feb. 2020), *https://www.ftc.gov/system/files/documents/reports/staff-perspective-paper-ftcs-strictly-business-forum/strictly_business_forum_staff_perspective.pdf* (observing stakeholder concern about the high-cost of merchant cash advances that can reach triple digit annual percentage rates).

[135] 15 U.S.C. 1601 *et seq.*

[136] New York State law requires that providers of ''sales-based financing'' provide disclosures to borrowers that include calculations of an estimated annual percentage rate in accordance with the CFPB's Regulation Z, 12 CFR part 1026. *See* N.Y. S.898, section 803(c) (signed Jan. 6, 2021) (amending S.5470–B), *https://legislation.nysenate.gov/pdf/bills/2021/s898.* The New York Department of Financial Services is currently developing regulations to implement the law. *See* N.Y. Dep't of Fin. Servs., *Proposed Financial Services Regulations, https://www.dfs.ny.gov/industry_guidance/regulations/proposed_fsl.* Similarly, California's Department of Financial Protection and Innovation has adopted regulations to implement a California law requiring disclosures by commercial financing companies, including those providing sales-based financing. *See* 10 Cal. Code Reg. 900(a)(28) (effective Dec. 9, 2022) (defining sales-based financing as ''a commercial financing transaction that is repaid by a recipient to the financer as a percentage of sales or income, in which the payment amount increases and decreases according to the volume of sales made or income received by the recipient'' and including ''a true-up mechanism''); 10 Cal. Code Reg. 914 and 940 (requiring sales-based financing providers disclosure estimated annual percentage rate according to Regulation Z, 12 CFR part 1026). Under these laws, providers of commercial financing generally will be required to disclose: (1) the total amount financed, and the amount disbursed if it is different from the total amount financed; (2) the finance charge; (3) the APR (or the estimated APR for sales-based financing and factoring transactions), calculated in accordance with TILA and Regulation Z; (4) the total repayment amount; (5) the term (or the estimated term for sales-based financing) of the financing; (6) periodic payment amounts; (7) prepayment charges; (8) all other fees and charges not otherwise disclosed; and (9) any collateral requirements or security interests. *See* Cal. S.B. 1235 (Sept. 30, 2018), *https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201720180SB1235*; N.Y. S.B. S5470B (July 23, 2020), *https://legislation.nysenate.gov/pdf/bills/2019/S5470B.* Other States, including Virginia and Utah, have passed commercial financing disclosure laws that do not require disclosure of the APR. *See* Virginia H. 1027 (enacted Apr. 11, 2022), *https://lis.virginia.gov/cgi-bin/legp604.exe?221+ful+CHAP0516*; Utah S.B. 183 (enacted Mar. 24, 2022), *https://le.utah.gov/~2022/bills/static/SB0183.html.*

[137] *See* Fundbox/PYMNTS.com, *The Trade Credit Dilemma,* at 11 (May 2019), *https://www.pymnts.com/wp-content/uploads/2019/05/Trade-Credit-Dilemma-Report.pdf* (estimating accounts payable for businesses with revenue of under $250,000 at $6.7 billion and for businesses with revenue of $250,000 to $999,000 at $44.6 billion).

[138] *Id.* The trade credit market is estimated to total $1.6 trillion across all business sizes in the United States. In the overall $1.4 trillion market size total for all small business financing products, the CFPB has included only the trade credit market for businesses of up to $1 million in revenue for consistency with its White Paper.

[139] This number has increased from 8,100 financial institutions estimated in the NPRM for two reasons related to the number of nondepository financial institutions participating in the credit market for 5+ unit residential dwellings in 2019. First, the CFPB revised its methodology for excluding depository institutions from the total number of participants active in the credit market for 5+ unit residential dwellings, as detailed below. Second, the NPRM total for all financial institutions active in the small business financing market

Continued

Based on FFIEC Call Report data for December 2019, the CFPB estimates that about 5,100 banks and savings associations were active in the small business lending market, out of a total of about 5,200 banks and savings associations.[140] The CFPB assumes that a bank or savings association is ''active'' in the market if it reports a positive outstanding balance of small loans, lines of credit, and credit cards to businesses.

Based on the NCUA Call Report data for December 2019, the CFPB estimates that about 1,200 out of 5,300 total credit unions were active in the small business lending market.[141] The CFPB defines a credit union as ''active'' in the market if it reported a positive number of originations of loans, lines of credit, and credit cards to members for commercial purposes in 2019.

The CFPB estimates that there were about 1,900 nondepository institutions active in the small business financing market in 2019,[142] accounting for around $550 billion in outstanding credit to small businesses. This total number of nondepository institutions includes approximately 300 commercial finance companies, 30 or more online lenders, 340 nondepository CDFIs, 150 nondepository mortgage lenders in the multifamily market, 100 merchant cash advance providers, 700–900 factors, at least 100 government lenders, and 72 Farm Credit System institutions.

The Bureau estimates that about 300 commercial finance companies were engaged in small business lending in 2019.[143] The Bureau also estimates there to be about 30 or more online lenders that were active in the small business lending market in 2019, not including merchant cash advance providers.[144]

The Bureau estimates that 340 nondepository CDFIs were engaged in small business lending in 2019. Both depository and nondepository institutions can be CDFIs. Depository CDFIs are counted in the numbers of banks, savings associations, and credit unions engaged in small business lending. According to the CDFI Fund, 487 nondepository funds (*i.e.,* loan funds and venture capital funds) reported as CDFIs in 2019.[145] Of these, 340 institutions reported that business finance or commercial real estate finance were a primary or secondary line of business in 2019.[146]

The Bureau estimates that about 150 nondepository mortgage lenders participated in the credit market for 5+ unit residential dwellings in 2019.[147] In its *2019 Multifamily Lending Report,* the Mortgage Bankers Association lists annual multifamily lending volumes by institution, including a distinction for loans of under $1 million in value at origination.[148] Using the same small loan to business proxy as is used in the FFIEC Call Report, the Bureau estimates the number of nondepository mortgage lenders by counting the number of institutions that appear on this list that are not depository institutions and that extended at least two loans in 2019.[149]

Data from UCC filings indicates that about 100 institutions were active in the market for providing merchant cash advances to small businesses in 2021.[150]

included only those nondepository financial institutions participating in the credit market for 5+ unit residential dwellings estimated to be covered by the proposed rule rather than all those active in the market at all.

[140] Calculated from FFIEC Call Report data accessed on October 18, 2022. Although 2019 figures are used here for consistency across types of lenders, consolidation among depository institutions has continued since 2019. As of June 30, 2022, 4,692 commercial banks or savings associations and 1,575 credit unions reported a positive outstanding balance of small loans, lines of credit, and credit cards to businesses. Calculated from FFIEC Call Report data accessed on October 14, 2022.

[141] Nat'l Credit Union Admin., *2019 Call Report Quarterly Data, https://www.ncua.gov/analysis/credit-union-corporate-call-report-data/quarterly-data* (last updated Mar. 8, 2023). (One hundred twelve credit unions were not federally insured as of December 2019 but are included here as depository institutions. Calculated from NCUA Call Report data accessed on June 8, 2021.) Although 2019 figures are used here for consistency across types of lenders, consolidation among depository institutions has continued since 2019. As of June 30, 2022, 1,120 credit unions reported a positive number of originations of loans, lines of credit, and credit cards to members for commercial purposes during the first half of 2022. This number was calculated from NCUA Call Report data accessed on October 14, 2022.

[142] There may also be cooperative or nonprofit lenders as well as equipment and vehicle finance dealers originating in their own name that are not captured by the CFPB in these figures. For example, by searching Uniform Commercial Code (UCC) filings, Manasa Gopal and Philipp Schnabl identified 19 cooperative lenders that originated at least 1,500 loans over the period from 2006 to 2016. Manasa Gopal & Philipp Schnabl, *The Rise of Finance Companies and FinTech Lenders in Small Business Lending,* N.Y.U. Stern Sch. of Bus., at 18 (May 13, 2020), *https://ssrn.com/abstract=3600068.* Additionally, these figures do not include trade creditors, which are non-companies that extend credit by allowing customers a period of time in which to pay and which are much greater in number since the practice is widespread across the economy. This number has increased from 1,800 financial institutions estimated in the NPRM for two reasons related to the number of nondepository financial institutions participating in the credit market for 5+ unit residential dwellings in 2019. First, the CFPB revised its methodology for excluding depository institutions from the total number of participants active in the credit market for 5+ unit residential dwellings, as detailed below. Second, the Notice of Proposed Rulemaking total for all nondepository financial institutions active in the small business financing market included only those nondepository financial institutions participating in the credit market for 5+ unit residential dwellings that were estimated to be covered by the proposed rule rather than all those active in the market at all.

[143] *See id.* By searching UCC filings, Manasa Gopal and Philipp Schnabl identified almost 300 commercial finance companies, including both independent and captive finance companies, with at least 1,500 small business loans between 2006 and 2016. This figure combines 192 independent finance companies with 95 captive finance companies. Since this estimate captures only those commercial finance companies averaging at least 150 loans per year over the 2006 to 2016 period, it may exclude smaller volume lenders and should be considered conservative.

[144] *Id.* Using the same methodology as for commercial finance companies, Gopal and Schnabl identified 19 fintech companies. The CFPB conservatively increases this estimate to 30 to account for rapid growth in the industry from 2016 to 2019. Since this estimate captures only those fintechs averaging at least 150 loans per year over the 2006 to 2016 period, it may exclude smaller volume lenders and should be considered conservative. On the other hand, since 2019, the COVID–19 economic shock may have led to some fintechs scaling back or exiting the small business financing market. *See, e.g.,* Ingrid Lunden, *Amex Acquires SoftBank-backed Kabbage After Tough 2020 for the SMB Lender,* TechCrunch (Aug. 17, 2020), *https://techcrunch.com/2020/08/17/amex-acquires-softbank-backed-kabbage-after-tough-2020-for-the-smb-lender/* (noting that Kabbage temporarily shut down credit lines to small businesses during April 2020 and then spun off its small business loan portfolio when it was subsequently acquired by American Express).

[147] Nondepository lenders providing financing for commercial real estate transactions besides 5+ unit residential dwellings are not separately captured here but often overlap with those lenders providing financing for 5+ unit residential dwellings. *See* Com. Prop. Exec., *Top 20 Commercial Mortgage Banking and Brokerage Firms of 2022* (Jan. 3, 2022), *https://www.commercialsearch.com/news/top-20-commercial-mortgage-banking-and-brokerage-firms-of-2022/* (listing top commercial real estate lenders and identifying sectors financed by lender).

[148] *See* Mortg. Bankers Ass'n, *Annual Report on Multi-Family Lending—2019,* at 9–66 (2020), *https://www.mba.org/store/products/research/general/report/2019-annual-report-on-multifamily-lending.* In the Notice of Proposed Rulemaking, the CFPB had estimated nondepository financial institutions participating in the credit market for 5+ unit residential dwellings by excluding financial institutions included in the above-cited report with the word ''bank'' or ''credit union'' in the institution name and further manually removing around ten more institutions that appeared to be depository institutions at first glance. To improve accuracy, for the Final Rule the CFPB has manually coded all 2,588 institutions in the above-cited report to exclude any institutions that are banks, savings associations, credit unions, or farm credit associations but which do not have the word ''bank'' or ''credit union'' in the institution name as recorded in the report. As a result, the total number of nondepository financial institutions active in this market fell from 270 to 150.

[149] The CFPB counts institutions extending at least two loans of any size in order to estimate institutions extending at least one small loan, based on the assumption that some 50 percent of these loans may have been for values greater than $1 million.

[150] deBanked, *UCC–1 and UCC–3 Filings by Merchant Cash Advance Companies & Alternative Business Lenders, https://debanked.com/merchant-cash-advance-resource/merchant-cash-advance-ucc/* (last visited Mar. 20, 2023).

The Bureau estimates the number of factors in 2019 to be between 700–900 and assumes that most factors were providing financing to small business.[151]

Finally, many government agencies and government-sponsored enterprises provide or facilitate a significant proportion of small business credit. As the flagship government lender, the SBA managed in 2019 a portfolio of over $140 billion in loans to small businesses, to which it added over $1 trillion in loans extended as part of the COVID–19 emergency lending programs. (As noted above, over $740 billion in Paycheck Protection Program loans had been forgiven as of July 2022, bringing SBA outstanding loan balances back down.[152]) Across Federal, State, and municipal governments, the Bureau estimates that there are likely over 100 government small business lending programs.[153] Additionally, the Farm Credit System reports that, as of December 2019, the Farm Credit System contained a total of 72 banks and associations.[154] All of these Farm Credit System institutions were engaged in lending to small farms in 2019.[155]

E. Challenges for Women-Owned, Minority-Owned, and LGBTQI+-Owned Small Businesses

Within the context of small business financing, women-owned, minority-owned, and LGBTQI+-owned small businesses often face relatively challenges than their counterparts to obtain credit. In line with congressional purpose, information collected about these businesses may provide opportunities for community development lending, and the information collected may be particularly important to support fair lending analysis and enforcement.

Women-owned, minority-owned, and LGBTQI+-owned small businesses have smaller cash reserves on average, leaving them less able to weather credit crunches. For example, in February 2021, 39 percent of women-owned businesses had one month or less in cash reserves, compared with 29 percent of men-owned firms.[156] And in around 90 percent of majority Black and Hispanic communities, most businesses have fewer than 14 days of cash buffer, while this is true of only 35 percent of majority white communities.[157] As a result, many small businesses, especially those owned by women, minorities, and LGBTQI+ individuals, may have a greater need for financing in general and particularly during economic downturns.

Policy responses to support small businesses in economic downturns may struggle to reach small businesses owned by women, minorities, and LGBTQI+ individuals. For example, although LGBTQI+-owned small businesses were more likely to apply for Paycheck Protection Program loans, they were less likely to receive all of the funds that they applied for, and more likely to have gotten none of the funding they applied for.[158]

Established relationships between applicants and lenders were often critical to approvals in the earliest period of Paycheck Protection Program underwriting;[159] many minority-owned[160] and women-owned[161] businesses did not have such relationships. Minority borrowers with limited English proficiency may also have faced difficulties overcoming language barriers,[162] particularly during the first round of the Paycheck Protection Program in April 2020 when application materials had not yet been translated from English.[163] Further, many minority-owned and women-owned firms are sole proprietorships and independent contractors, both of which received delayed access to Paycheck Protection Program loans.[164]

Applicants whose owners belong to protected categories may have received different program outcomes when applying for Paycheck Protection Program loans, although limitations in demographic information for Paycheck Protection Program loans have hindered fair lending analyses.[165] Even for such firms that did obtaining Paycheck Protection Program loans, they may have faced different outcomes with respect to loan forgiveness.[166]

As demonstrated by the impact of the COVID–19 pandemic on small businesses, small business lending data are essential to better understand the small business financing landscape to maintain and expand support for this key part of the U.S. economy.

F. The Purposes and Impact of Section 1071

The Dodd-Frank Act sets forth the Bureau's purposes and mission. It provides that a key component of the Bureau's fair lending work is to ensure fair, equitable, and nondiscriminatory access to credit for both individuals and their communities.[167] And in passing section 1071, Congress articulated two purposes for requiring the Bureau to collect data on small business credit applications and loans—to ''facilitate enforcement of fair lending laws'' and to ''enable communities, governmental entities, and creditors to identify business and community development needs and opportunities of women-owned, minority-owned, and small businesses.''[168] Although the Dodd-Frank Act does not further explain or clarify these dual statutory purposes, other Federal laws shed light on both purposes. That is, a set of existing Federal laws form the backdrop for the use of small business lending data collected and reported pursuant to section 1071 to facilitate the enforcement of fair lending laws, and to identify business and community development needs and opportunities across the United States.

1. Facilitating Enforcement of Fair Lending Laws

Congress intended for section 1071 to ''facilitate enforcement of fair lending laws,''[169] which include ECOA, the Home Mortgage Disclosure Act of 1975 (HMDA),[170] the Fair Housing Act,[171] and other Federal and State anti-discrimination laws.

i. Equal Credit Opportunity Act (ECOA)

ECOA, which is implemented by Regulation B, applies to all creditors. Congress first enacted ECOA in 1974 to require financial institutions and other firms engaged in the extension of credit to ''make credit equally available to all creditworthy customers without regard to sex or marital status.'' [172] Two years later, Congress expanded ECOA's scope to include age, race, color, religion, national origin, receipt of public assistance benefits, and exercise of rights under the Federal Consumer Credit Protection Act.[173]

ECOA makes it unlawful for any creditor to discriminate against any applicant with respect to any aspect of a credit transaction (1) on the basis of race, color, religion, national origin, sex (including sexual orientation, gender identity, and sex characteristics),[174] marital status, or age (provided the applicant has the capacity to contract); (2) because all or part of the applicant's income derives from any public assistance program; or (3) because the applicant has in good faith exercised any right under the Federal Consumer Credit Protection Act.[175]

Multiple Federal regulators can enforce ECOA and Regulation B and apply various penalties for violations. The enforcement provisions and penalties for those who violate ECOA and Regulation B are set forth in 15 U.S.C. 1691e(b) and 12 CFR 1002.16. Violations may also result in civil money penalties, which are governed by 12 U.S.C. 5565(c)(3). The CFPB and multiple other Federal regulators have the statutory authority to bring actions to enforce the requirements of ECOA.[176] These regulators have the authority to engage in research, conduct investigations, file administrative complaints, hold hearings, and adjudicate claims through the administrative enforcement process regarding ECOA. Regulators also have independent litigation authority and can file cases in Federal court alleging violations of fair lending laws under their jurisdiction. Like other Federal regulators who are assigned enforcement authority under section 704 of ECOA, the CFPB is required to refer matters to the Department of Justice (DOJ) when it has reason to believe that a creditor has engaged in a pattern or practice of lending

[165] Rocio Sanchez-Moyano, Fed. Rsrv. Bank of S.F., *Paycheck Protection Program Lending in the Twelfth Federal Reserve District* (Mar. 3, 2021), *https://www.frbsf.org/community-development/publications/community-development-research-briefs/2021/february/ppp-lending-12th-district/* (citing matched-pair audit studies that found discouragement and provision of incomplete information for minority business owners seeking Paycheck Protection Program loans); 86 FR 7271, 7280 (Jan. 27, 2021) (noting that facially neutral Paycheck Protection Program policies such as limiting loans to businesses with pre-existing relationships may run a risk of violating ECOA and Regulation B due to a disproportionate impact on a prohibited basis).

[166] For example, Black-owned firms applied to fintechs for Paycheck Protection Program loans at a high rate and certain fintechs or banks that partnered with fintechs have also had a high rate of unforgiven Paycheck Protection Program loans. *See* Max Reyes, *Bank Behind Fintech's Rise Reels in Billions in Pandemic's Wake,* Bloomberg (Aug. 22, 2022), *https://www.bloomberg.com/news/articles/2022-08-21/bank-behind-fintech-s-rise-reels-in-billions-in-pandemic-s-wake* (reporting that, as of July 2021, the share of unforgiven Paycheck Protection Program loans at Kabbage, a fintech, and at Cross River, a bank that partnered with fintechs, was 34 percent and 16 percent, respectively); Who Benefited from PPP Loans (showing that Black-owned firms applied to fintechs at higher rates than other firms).

[167] *See* 12 U.S.C. 5493(c)(2)(A) (directing the Office of Fair Lending and Equal Opportunity to provide ''oversight and enforcement of Federal laws intended to ensure the fair, equitable, and nondiscriminatory access to credit for both individuals and communities that are enforced by the Bureau,'' including ECOA and the Home Mortgage Disclosure Act).

[168] ECOA section 704B(a).

[169] *Id.*

[170] 12 U.S.C. 2801 *et seq.*

[171] 42 U.S.C. 3601 through 3619.

[172] Public Law 93–495, tit. V, section 502, 88 Stat. 1500, 1521 (1974).

[173] *See* Equal Credit Opportunity Act Amendments of 1976, Public Law 94–239, section 701(a), 90 Stat. 251, 251 (1976).

[174] In March 2021, the CFPB issued an interpretive rule clarifying that the scope of ECOA's and Regulation B's prohibition on credit discrimination on the basis of sex encompasses discrimination based on sexual orientation and gender identity, including discrimination based on actual or perceived nonconformity with sex-based or gender-based stereotypes and discrimination based on an applicant's associations. 86 FR 14363 (Mar. 16, 2021). *See also* Press Release, CFPB, *CFPB Clarifies That Discrimination by Lenders on the Basis of Sexual Orientation and Gender Identity Is Illegal* (Mar. 9, 2021), *https://www.consumerfinance.gov/about-us/newsroom/cfpb-clarifies-discrimination-by-lenders-on-basis-of-sexual-orientation-and-gender-identity-is-illegal/.* The interpretive rule states that an example of discriminatory sex-based or gender-based stereotyping occurs if a small business lender discourages a small business owner appearing at its office from applying for a business loan and tells the prospective applicant to go home and change because, in the view of the creditor, the small business customer's attire does not accord with the customer's gender. 86 FR 14363, 14365 (Mar. 16, 2021). As discussed further in the section-by-section analysis of § 1002.102(k) and (*l*), regarding the definitions of LGBTQI+ individual and LGBTQI+-owned business, respectively, the CFPB interprets ECOA's and Regulation B's prohibitions on the basis of sex to also include sex characteristics, including intersex traits.

[175] 15 U.S.C. 1601 *et seq.*

[176] These regulators include the OCC, the Board, the FDIC, the NCUA, the Surface Transportation Board, the Civil Aeronautics Board, the Secretary of Agriculture, the Farm Credit Administration, the Securities and Exchange Commission, the SBA, the Secretary of Transportation, the CFPB, and the FTC. *See* 15 U.S.C. 1691c; Regulation B § 1002.16(a). Motor vehicle dealers are subject to the Board's Regulation B (12 CFR part 202); the CFPB's rules, including this rule to implement section 1071, generally do not apply to motor vehicle dealers, as defined in section 1029(f)(2) of the Dodd-Frank Act, that are predominantly engaged in the sale and servicing of motor vehicles, the leasing and servicing of motor vehicles, or both. 12 U.S.C. 5519.

discrimination.[177] Private parties may also bring claims under the civil enforcement provisions of ECOA, including individual and class action claims against creditors for actual and punitive damages for any violation of ECOA.[178]

ii. Home Mortgage Disclosure Act (HMDA)

HMDA, implemented by the CFPB's Regulation C (12 CFR part 1003), requires lenders who meet certain coverage tests to report detailed information to their Federal supervisory agencies about mortgage applications and loans at the transaction level. These reported data are a valuable resource for regulators, researchers, economists, industry, and advocates assessing housing needs, public investment, and possible discrimination as well as studying and analyzing trends in the mortgage market for a variety of purposes, including general market and economic monitoring. There is potential overlap between what is required to be reported under HMDA and what is covered by section 1071 for certain mortgage applications and loans for women-owned, minority-owned, and small businesses.

A violation of HMDA and Regulation C is subject to administrative sanctions, including civil money penalties. Compliance is enforced by the CFPB, the U.S. Department of Housing and Urban Development (HUD), the FDIC, the Board, the National Credit Union Administration (NCUA), or the Office of the Comptroller of Currency (OCC). These regulators have the statutory authority to bring actions to enforce the requirements of HMDA and to engage in research, conduct investigations, file administrative complaints, hold hearings, and adjudicate claims through the administrative enforcement process regarding HMDA.

iii. Fair Housing Act

Title VIII of the Civil Rights Act of 1968, as amended (Fair Housing Act), prohibits discrimination in the sale, rental, or financing of dwellings and in other housing-related activities because of race, color, religion, sex (including sexual orientation and gender identity),[179] disability,[180] familial status, or national origin.[181] The Fair Housing Act [182] and its implementing regulations specifically prohibit discrimination in the making of loans,[183] the purchasing of loans,[184] and in setting the terms and conditions for making loans available,[185] without reference to consumers, legal entities, or the purpose of the loan being made, although these prohibitions relate exclusively to dwellings.[186]

The DOJ and HUD are jointly responsible for enforcing the Fair Housing Act. The Fair Housing Act authorizes the HUD Secretary to issue a Charge of Discrimination on behalf of aggrieved persons following an investigation and a determination that reasonable cause exists to believe that a discriminatory housing practice has occurred.[187] The DOJ may bring lawsuits where there is reason to believe that a person or entity is engaged in a ''pattern or practice'' of discrimination or where a denial of rights to a group of persons raises an issue of general public importance,[188] or where a housing discrimination complaint has been investigated by HUD, HUD has issued a Charge of Discrimination, and one of the parties to the case has ''elected'' to go to Federal court.[189] In Fair Housing Act cases, HUD and the DOJ can obtain injunctive relief, including affirmative requirements for training and policy changes, monetary damages and, in pattern or practice cases, civil penalties.[190]

Upon receipt of a complaint alleging facts that may constitute a violation of the Fair Housing Act or upon receipt of information from a consumer compliance examination or other source suggesting a violation of the Fair Housing Act, Federal executive agencies forward such facts or information to HUD and, where such facts or information indicate a possible pattern or practice of discrimination in violation of the Fair Housing Act, to the DOJ.[191] Private parties may also bring claims under the civil enforcement provisions of the Fair Housing Act.[192]

iv. Other Fair Lending Laws

Several other Federal statutes seek to promote fair lending. The CRA affirmatively encourages institutions to help to meet the credit needs of the entire community served by each institution covered by the statute, and CRA ratings take into account lending discrimination by those institutions.[193] (See part II.F.2.i below for additional discussion of the CRA.) The Americans with Disabilities Act of 1990 prohibits discrimination against persons with disabilities in the provision of goods and services, including credit services.[194] Sections 1981 [195] and 1982 [196] of the Federal Civil Rights Acts are broad anti-discrimination laws that have been applied to many aspects of credit transactions.[197]

[177] *See* 15 U.S.C. 1691e(h).

Ohio 1992) (mortgage redlining case

Continued

Many States and municipalities have also enacted fair lending, fair housing, and/or civil rights laws (often modeled on their Federal counterparts) that broadly prohibit credit discrimination, including protections for business credit.[198]

v. Facilitating Enforcement

To achieve the congressionally mandated purpose of facilitating enforcement of fair lending laws, the Bureau must collect and make available sufficient data to help the public and regulators identify potentially discriminatory lending patterns that could constitute violations of fair lending laws. Financial regulators and enforcement agencies need a consistent and comprehensive dataset for all financial institutions subject to reporting in order to also use these data in their prioritization, peer analysis, redlining reviews, and screening processes to select institutions for monitoring, examination, or investigation. Data collected pursuant to section 1071 will facilitate more efficient fair lending examinations. For example, regulators will be able to use pricing and other data to prioritize fair lending examinations—without such data, some financial institutions might face unnecessary examination burden while others whose practices warrant closer review may not receive sufficient scrutiny.

Moreover, as discussed in part V below, the Bureau believes specific aspects of the rule offer particular benefits for the enforcement of fair lending laws. For example, the inclusion of pricing data such as interest rate and fees will provide information on disparities in pricing outcomes, and data such as gross annual revenue, denial reasons, and time in business will enable a more refined analysis and understanding of disparities in both underwriting and pricing outcomes. While these data alone generally will not establish compliance with fair lending laws, regulators, community groups, researchers, and financial institutions will be able to use the data to identify potential disparities in small business lending based on disaggregated categories of race and ethnicity. Overall, the data collected and reported under the rule will allow, for the first time, for comprehensive and market-wide fair lending risk analysis that enables a better understanding of disparities in both underwriting and pricing outcomes.

2. Identifying Business and Community Development Needs and Opportunities

The second congressionally mandated purpose of section 1071 is to enable communities, governmental entities, and creditors to identify business and community development needs and opportunities of women-owned, minority-owned, and small businesses.[199] While section 1071 does not expressly define the phrase ''business and community development needs,'' other Federal statutes and regulations, including the CRA and the Riegle Community Development and Regulatory Improvement Act of 1994,[200] reference or define the phrases ''business development'' and ''community development'' and can help explain what it means to enable communities, governmental entities, and creditors to ''identify business and community development needs and opportunities.''

The Bureau believes, based on its consideration of these other Federal statutes and regulations, that its rule implementing section 1071 will provide more data to the public—including communities, governmental entities, and creditors—for analyzing whether financial institutions are serving the credit needs of their small business customers. In addition, with data provided under this rule, the public will be better able to understand access to and sources of credit in particular communities or industries, such as a higher concentration of risky loan products in a given community, and to identify the emergence of new loan products, participants, or underwriting practices. The data will not only assist in identifying potentially discriminatory practices, but will contribute to a better understanding of the experiences that members within certain communities may share in the small business financing market.

Increased transparency about application and lending practices across different communities will improve credit outcomes, and thus community and business development. Lenders will be able to better understand small business lending market conditions and determine how best to provide credit to borrowers, where currently they cannot conduct very granular or comprehensive analyses because the data on small business lending are limited. As reduced uncertainty helps lenders to identify potentially profitable opportunities to extend responsible and affordable credit, small businesses stand to benefit from increased credit availability. Transparency will also allow small business owners to more easily compare credit terms and evaluate credit alternatives; without these data, small business owners are limited in their ability to shop for the credit product that best suits their needs at the best price.

i. Community Reinvestment Act (CRA)

The CRA, a part of the Housing and Community Development Act, was passed by Congress in 1977, which found that ''regulated financial institutions have continuing and affirmative obligation to help meet the credit needs of the local communities in which they are chartered.''[201] As such, one of the statutory purposes of the CRA is to encourage such institutions to help meet the credit needs of the local communities in which they are chartered consistent with the safe and sound operation of such institutions.[202]

The legislative history for the CRA suggests that the concerns motivating its passage included certain practices by banks including redlining (*i.e.,* declining to extend credit in neighborhoods populated by ethnic or racial minorities)[203] and community disinvestment (*i.e.,* taking deposits from lower-income areas, often populated by ethnic or racial minorities, without

brought under sections 1981 and 1982 and the Fair Housing Act); *Evans* v. *First Fed. Sav. Bank of Ind.,* 669 F. Supp. 915 (N.D. Ind. 1987) (section 1982 can be used in mortgage lending discrimination case); *Assocs. extending credit or banking services to residents of those areas).[204] The CRA requires the ''appropriate Federal financial supervisory agency'' of a given depository institution to ''prepare a written evaluation of the institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods.''[205] These requirements were first implemented by a 1978 rulemaking,[206] and were amended in 1995[207] and 2005.[208] These rulemakings, adopted by each of the agencies responsible for ensuring compliance with the CRA, established specific performance measures,[209] requiring banks to disclose information about their efforts to meet community credit needs via small business, small farm, and community development lending.[210]

The agencies tasked with ensuring compliance—including the OCC,[211] the Board,[212] and the FDIC[213]—evaluate each insured depository institution's record in helping meet the credit needs of its entire community.[214] Overall, the CRA and its regulations generate data that help agencies and the public at large identify instances of redlining, community disinvestment, and geographical areas that are ''banking deserts.''[215] The CRA regulations of the Board and the FDIC currently have the same definitions of ''community development'' that include banking and credit services that support the following: (1) affordable housing for low- and moderate-income individuals;[216] (2) community services for low- and moderate-income individuals;[217] (3) activities that promote economic development by financing small business and small farms;[218] and (4) activities that revitalize or stabilize low- and moderate-income geographies, disaster areas, and certain distressed or underserved middle-income areas based on other factors.[219]

In May 2022, the Board, FDIC and OCC issued an interagency notice of proposed rulemaking for amendments to update and expand the existing CRA regulations (2022 CRA NPRM).[220] In the 2022 CRA NPRM, these three agencies proposed a number of revisions to the agencies' CRA rules, including a number of key changes relating to how the agencies defined community development and how the agencies intended to measure the community development activity of depository institutions.[221]

In the 2022 CRA NPRM, the agencies recognized the value of data to be collected under the Bureau's small business lending rule for assessing efforts at addressing community small business and small farm credit needs, proposing to incorporate aspects of the Bureau's rule into their CRA rules. First, the agencies proposed to define the terms ''small business'' and ''small farm'' consistent with the Bureau's proposal under section 1071, *i.e.,* as those having gross annual revenues of $5 million or less in the preceding fiscal year.[222]

Further, the 2022 CRA NPRM proposed to eliminate the current CRA small business and small farm data collection and reporting requirements,[223] to be replaced in the long term by the Bureau's small business lending data collection and reporting requirements.[224] The agencies noted that this proposed approach is responsive to various stakeholders' requests that the agencies coordinate the small business and small farm definitions across the CRA and section 1071 rulemakings. The agencies also observed that their proposal would reduce burden related to data collection and reporting, particularly if institutions could submit data for CRA purposes under the format of the Bureau's small business lending rule.[225] Data collected pursuant to section 1071 would be used to measure individual bank performance in CRA assessments, and to establish the agencies' benchmarks against which bank CRA performance would be measured for purposes of the small farm and small business portions of the retail lending tests.[226]

Finally, the agencies proposed that if both the CRA and section 1071 rulemakings were finalized, the agencies would make the compliance date for the CRA amendments that hinge upon the Bureau's section 1071 rulemaking similar to the compliance date for the Bureau's final rule.[227]

ii. Community Development Financial Institution Fund (CDFI Fund)

The Riegle Community Development and Regulatory Improvement Act of 1994 authorized the CDFI Fund.[228] In passing that statute, Congress found that many of the Nation's urban, rural, and Native American communities face ''critical social and economic problems arising in part from the lack of economic growth, people living in poverty, and the lack of employment and other opportunities.''[229]

To address these problems, Congress created the CDFI Fund to ''promote economic revitalization and community development'' through investment in and assistance to CDFIs, including enhancing the liquidity of CDFIs.[230]

The concept of community development is central to the operation of the CDFI Fund. While CDFI Fund regulations do not directly define that term, any entity applying for CDFI certification must have ''promoting community development'' as its ''primary mission.''[231] In making this determination, the CDFI Fund considers whether the activities of the entity are purposefully directed toward improving the social and/or economic conditions of underserved people, which may include low-income persons or persons who lack adequate access to capital and financial services and residents of

economically distressed communities.[232]

The CDFI Fund collects data from the recipients of its financial and technical assistance, shedding some light on the extent of community development in the areas where CDFIs operate.[233] The CDFI Fund also publishes the data it receives with appropriate redactions to protect privacy interests.[234] However, given that CDFIs comprise a relatively small share of the overall small business lending market, 1071 data will materially enhance understanding of the broader extent of community development outside of areas where CDFIs already operate. These data will also likely augment the data the CDFI Fund already receives.

In May 2020, the CDFI Fund issued a request for comment on several aspects of its CDFI program, including proposed changes to the application for certification, as well as proposed changes to the data collection and reporting processes of the CDFI Fund. The RFI proposed a number of other revisions to the data collection and reporting regime in May 2020, including the automation of key elements of existing reporting and improvements to data quality.[235]

In October and November 2022, the CDFI Fund announced that based on public comments, it had revised its proposed changes to the application for certification, and data collection and reporting requirements, subject to another round of public comment prior to the anticipated implementation of changes in April 2023.[236] The CDFI Fund released a preview of changes to the application requirements.[237] One change to the Primary Mission portion of the application, which asks whether an applicant is focused on the mission of community development, would be the addition of bright-line questions related to an organization's lending and financing practices.[238] Specifically, an applicant can be disqualified from CDFI certification if financial products or practices it offers are harmful to low-income and underserved communities.[239] The bright-line questions the new certification application would ask include whether, amongst other things, applicants consider a small business borrower's ability to repay a loan on its terms,[240] whether they have accommodative or concessionary policies or programs for struggling borrowers, and whether loans priced above 36 percent APR meet certain safety and consumer protection standards.

In October 2022, the CDFI Fund also published revisions to the Target Market requirements of the application for CDFI certification.[241] Currently, an applicant must demonstrate that it serves at least one eligible Target Market (either an Investment Area or a Targeted Population). The revisions, if finalized, would eliminate the geographical boundaries and mapping requirements for most Target Markets, replacing these requirements with customized investment areas. In late October 2022, the CDFI Fund published a proposed list of pre-approved methodologies to identify target markets.[242] These methodologies include determining whether most recipients of a CDFI applicant's funds—whether individuals, for-profit entities, or non-profit entities—are members of certain demographic groups (African American, Hispanic, Native American, Native Hawaiian, Native Alaskan, Other Pacific Islanders, people with disabilities, certified CDFIs, low-income targeted populations).[243] These data are collected using a variety of overlapping methods specific to each demographic status, including self-reporting,[244] in-person or photo-identification-based visual observation,[245] surname analysis,[246] government-issued or Tribal-issued identification to demonstrate affiliation,[247] and/or income and residence or business location.[248]

The most recently published amendments to the application requirements remain under consideration by the CDFI Fund.[249]

3. Impact of Small Business Lending Data Under Section 1071

The Bureau's implementation of section 1071 will provide on an annual basis application-level data on small business credit, including certain protected demographic information. This will include information on applications for credit that are originated, as well as those that are denied, withdrawn, incomplete, or approved by the financial institution but not accepted by the applicant. This information will enable stakeholders of all kinds in the small business lending market to gain insight into trends in small business lending. It will also provide insight into the interaction of supply and demand for small business credit over time.

In terms of facilitating fair lending enforcement, interested government agencies and other stakeholders will be able to use data collected and reported under this final rule to identify possible fair lending risks using statistical methods.

Regarding the identification of business and community development needs, small business lending data collected and reported under this final rule will help government entities and

[249] The CDFI Fund paused acceptance of new applications for CDFI certification in October 2022 and will reopen for new applications once the revisions to the application for certification and the transaction-level data collection and reporting regimes are finalized. While initially anticipating that it would finalize changes to the application process in April 2023 after receiving public comments, the CDFI Fund issued a statement in January 2023 that it had received a robust response to the request for comments on the revised application and reporting tools, and that consideration of these comments, while not requiring a lengthy delay, would require postponement of the new application and associated reporting tools beyond April 2023. CDFI Fund, *An Update on the CDFI Fund's Certification Application Review Process* (Jan. 24, 2023), *https://www.cdfifund.gov/news/501.*

public and private lenders identify and target sub-segments of the market that remain underserved, facilitating entrepreneurship and business development in those communities. By reducing uncertainty about the conditions of the small business lending market, data collected under the final rule can help creditors identify potentially profitable opportunities to extend responsible and affordable credit, potentially increasing credit availability to small businesses. Increased transparency, in turn, will also help small business borrowers to understand what credit is available and on what terms, thereby improving their ability to access the credit they need and further serving community and business development goals.

The Bureau believes that small business lending data will come to play an important role for the small business lending market, as HMDA data have done for the mortgage market. HMDA data have provided lenders, community groups, and others the tools to identify and address fair lending risks and strengthen fair lending oversight and enforcement. In a similar way, these data will allow diverse stakeholders to analyze lending patterns that are potentially discriminatory. By identifying and addressing discriminatory small business lending practices, the Bureau will help to ensure fair, equitable, and nondiscriminatory access to credit for both individuals and their communities.[250]

HMDA data have also proven effective in creating transparency in the mortgage market that improves the understanding of credit needs, where they may remain unmet, and the relationship between mortgage lending and community development. The Bureau believes that small business lending data collected and reported under this final rule will provide the Bureau and other stakeholders with critical insights into the small business lending market. The COVID–19 pandemic has shown that transparency is essential at a time of crisis, when small businesses may be in urgent need of credit in order to recover from economic shocks.

The advancement of both statutory purposes of section 1071—facilitating fair lending enforcement and identifying business and community development needs—in turn will support small businesses across all sectors of the economy, which are fundamental to the economic health of the U.S. and which have been hard hit by recent economic and financial crises. Given the critical importance of small businesses to economic growth and wealth creation, that will also help the economy as a whole.

III. Summary of the Rulemaking Process

In the years leading up to the release of the CFPB's NPRM to implement section 1071 of the Dodd-Frank Act, the CFPB held over 100 outreach meetings regarding the rulemaking with financial institutions, trade associations, community groups, researchers, governmental entities, and other stakeholders. The CFPB also took a number of other steps, beyond individual stakeholder meetings, to solicit feedback more broadly from the public on a rule to implement section 1071. Most recently, the CFPB received public comments on its NPRM. Each of these efforts are discussed in turn below.

A. Pre-Proposal Outreach and Engagement

Request for information, field hearing, and white paper on small business lending. On May 10, 2017, the CFPB published a request for information regarding the small business lending market[251] in which it sought public comment to understand more about the products that are offered to small businesses, the financial institutions that offer such credit, the small business lending data that currently are used and may be maintained by financial institutions, the potential complexity and cost of small business data collection and reporting, and privacy concerns related to the disclosure purposes of section 1071.[252] On the same date, the CFPB held a field hearing regarding section 1071 at which the request for information was announced and then-Director Richard Cordray noted the importance of a section 1071 rulemaking given the absence of systematic data on how small businesses are faring and whether or how much they are being held back by financing constraints.[253] Finally, at the same time, the CFPB also published its White Paper on small business lending,[254] which reflected the initial findings of its research providing a preliminary understanding of the small business lending environment, with a particular emphasis on lending to women-owned and minority-owned small businesses.

1071 symposium. In November 2019, the CFPB held a symposium on section 1071 to assist it in its policy development process and to receive feedback from experts, including academic, think tank, consumer advocate, industry, and government experts in the small business lending arena.[255] The symposium had two panels. The first panel focused on the evolution in the small business lending marketplace. The second panel included a discussion surrounding the implementation of section 1071, including issues raised in response to the CFPB's request for information.

Small Business Advisory Review Panel. Under the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA),[256] which amended the Regulatory Flexibility Act (RFA), the CFPB must convene and chair a Small Business Advisory Review Panel (Panel) if it is considering a proposed rule that could have a significant economic impact on a substantial number of small entities.[257] The Panel considers the impact of the proposals under consideration by the CFPB and obtains feedback from representatives of the small entities that would likely be subject to the rule. The Panel is comprised of a representative from the CFPB, the Chief Counsel for Advocacy of the Small Business Administration (SBA), and a representative from the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget (OMB). Representatives from 20 small businesses were selected as small entity representatives for this SBREFA process. These individuals represented small businesses that are financial institutions—including community banks, credit unions, community development financial institutions (CDFIs), financial technology firms, and commercial finance companies—that

[250] *See* 12 U.S.C. 5493(c)(2)(A).

[251] 82 FR 22318 (May 15, 2017).

[252] In response to the request for information, the CFPB received over 2,000 comments in total, and over 100 unique comments offering detailed substantive responses on the topics raised in the request for information. These comments from the public helped to inform the CFPB's approach in its SBREFA Outline. *See* CFPB, *Request for Information Regarding the Small Business Lending Market,* Docket ID CFPB–2017–0011, *https://www.regulations.gov/docket/CFPB-2017-0011.*

[257] 5 U.S.C. 609(b).

would likely be directly affected by a rule implementing section 1071.

On September 15, 2020, the CFPB issued its *Outline of Proposals under Consideration and Alternatives Considered* (SBREFA Outline) for its rulemaking pursuant to section 1071, a detailed document that discusses (1) the relevant law, (2) the regulatory process, (3) the rule proposals the CFPB was considering, and (4) an economic analysis of the potential impacts of those proposals on directly affected small entities.[258]

The CFPB convened the Panel for this proposed rule on October 15, 2020 and held a total of four meetings with small entity representatives during October 19–22, 2020, conducted online via video conference (Panel Outreach Meetings). In preparation for the Panel Outreach Meetings and to facilitate an informed and detailed discussion of the proposals under consideration, discussion questions for the small entity representatives were included throughout the SBREFA Outline.[259]

In advance of the Panel Outreach Meetings, the CFPB, SBA Office of Advocacy, and OIRA held a series of video conferences with the small entity representatives to describe the Small Business Review Process, obtain important background information about each small entity representative's current business practices, and begin discussions on selected portions of the proposals under consideration.

All 20 small entity representatives participated in the Panel Outreach Meetings. Representatives from the CFPB, SBA Office of Advocacy, and OIRA provided introductory remarks. The meetings were then organized around discussions led by the CFPB about each aspect of the proposals under consideration and the potential impact on small businesses. The CFPB also invited small entity representatives to submit written feedback by November 9, 2020; most did so.

On December 15, 2020, the CFPB released the *Final Report of the Small Business Review Panel on the CFPB's Proposals Under Consideration for the Small Business Lending Data Collection Rulemaking* (SBREFA Panel Report).[260] This report includes a summary of the feedback received from small entity representatives during the panel process (including oral feedback received during the pre-Panel video conferences and Panel Outreach Meetings, as well as timely submitted written feedback) and findings and recommendations made by the Panel.[261] As required by the RFA, the CFPB considered the Panel's findings in its initial regulatory flexibility analysis, as set out in part VIII of the NPRM.

The CFPB also invited other stakeholders to submit feedback on the SBREFA Outline by December 14, 2020. The CFPB received approximately 60 submissions from a variety of other stakeholders, including financial institutions, trade associations, community groups, a think tank, and a government agency.[262]

The CFPB considered the feedback it received from small entity representatives, the findings and recommendations of the Panel, and the feedback from other stakeholders in preparing the NPRM. The feedback, findings, and recommendations were summarized throughout the NPRM where relevant.

One-Time Cost Survey. On July 22, 2020, the CFPB released a voluntary survey to measure the one-time costs of compliance with an eventual small business lending data collection rule.[263] The objective of the survey was to solicit, from institutions offering small business credit products that could potentially be covered by this rule, information about potential one-time costs to prepare to collect and report data. The deadline for responses was October 16, 2020. The CFPB received responses from 105 financial institutions.[264] The results of the survey inform the CFPB's analyses of the potential impacts of the rule as set out in parts IX and X below.

ECOA request for information. On July 28, 2020, the CFPB issued a request for information to seek public input on ECOA and Regulation B.[265] In this request for information, the CFPB sought public comment on a number of topics, including small business lending and the ways that the CFPB, in light of its authority under ECOA and Regulation B, might support efforts to meet the credit needs of small businesses, particularly those that are minority-owned and women-owned.[266]

B. Ongoing Outreach and Engagement

Ongoing outreach. The CFPB conducts outreach to industry and other stakeholders to understand their experiences with the small business finance market, economic conditions, and the collection and reporting of data regarding that market. A particular near-term priority in the CFPB's recent outreach has been the impacts of the pandemic and the effectiveness of the Federal government's response. Findings from outreach activities inform the CFPB on matters affecting the small business sector.

Technical outreach. In the months before the publication of the NPRM, the CFPB began conducting technical outreach with third-party software providers that serve financial institutions and software and technology staff from financial institutions that are likely to have to report small business lending data to the CFPB. With these software vendors and technical staff, the CFPB has held and, after publication of this final rule, will continue to hold discussions concerning

the technical systems and procedures the CFPB will provide for financial institutions to submit their data. The CFPB intends to understand the technology solutions currently provided by vendors to support the small business lending activities of financial institutions, as well as their experience in providing financial institutions with technical support for previous data collection regulations. The CFPB believes this information will be helpful in informing the CFPB in its design and implementation of a platform for intake and processing of data to help the platform integrate, to the extent possible, with existing systems and data collection procedures. These discussions also serve to raise awareness of technology providers as to their potential future role in supporting the rule as well as the lead time that may be necessary for some or all affected financial institutions to come into compliance with the requirements of this final rule. This outreach process is ongoing and will continue after the publication of this final rule.

Sample data collection form usability testing. After the NPRM was released, the CFPB, after the appropriate notice in the **Federal Register**, and a 30-day comment period, sought and received OMB approval to conduct several rounds of message and user testing research related to the sample form.[267] The CFPB conducted qualitative research to learn about the experience of filling out the sample data collection form and to explore design options. The CFPB engaged a vendor to conduct interviews with small business stakeholders and listening sessions with small business owners to test different versions of the introductory language on the sample data collection form. The CFPB also conducted qualitative user interviews with small business owners to test their reactions to different versions of the sample data collection form. In addition to comments received in response to the CFPB's proposed sample data collection form as part of the NPRM, the feedback gathered as part of these testing efforts was also considered by the CFPB in finalizing the sample data collection form issued with this final rule. The CFPB is releasing a report, simultaneously with the issuance of this final rule, summarizing the findings from all three rounds of qualitative research testing.[268]

[267] 87 FR 37504 (June 23, 2022).

[268] CFPB, *User testing for sample data collection form for the small business lending final rule* (Mar. 2023), *https://www.consumerfinance.gov/data-research/research-reports/user-testing-for-sample-data-collection-form-for-the-small-business-lending-final-rule/*.

C. Notice of Proposed Rulemaking

On September 1, 2021, the CFPB issued its proposal to implement section 1071. The NPRM was published in the **Federal Register** on October 8, 2021,[269] and the public comment period closed on January 6, 2022.[270] The CFPB received approximately 2,100 comments on the proposal during the comment period.[271] Approximately 650 of these comments were unique, detailed comment letters representing diverse interests. These commenters included lenders such as banks and credit unions, CDFIs, community development companies, Farm Credit System lenders, online lenders, and others; national and regional industry trade associations; software vendors; business advocacy groups; community groups; research, academic, and other advocacy organizations; members of Congress; Federal and State government offices/agencies; small businesses; and individuals.

The remaining comments included some duplicate submissions (*i.e.,* letters with the same content from the same commenter submitted through multiple channels, or letters with the same content submitted by multiple people on behalf of the same commenting organization) as well as comments that were part of several comment submission campaigns organized by industry or community groups. Such comment campaigns typically advocated for or against particular provisions in the NPRM and urged additional changes. These comments were considered by the CFPB along with all other comments received, including any additional remarks included in otherwise identical comment letters.

In addition, the CFPB also considered comments received after the comment period closed via approximately 17 ex parte submissions and meetings.[272] Materials on the record, including all ex parte submissions and summaries of ex parte meetings, are available on the public docket for this rulemaking.[273]

The CFPB received comments on all aspects of the proposed rule, as well as on the proposed approach to protecting privacy interests via modification or deletion of data prior to publication, and on its analyses of the proposed rule's impacts. Relevant information received via comment letters, as well as ex parte submissions, is discussed below in the section-by-section analysis and subsequent parts of this document, as applicable. The CFPB considered all the comments it received regarding the proposal, made certain modifications, and is adopting the final rule as described in part V below. Comments relevant to the CFPB's approach to privacy are discussed in part VIII and regarding its impact analyses in parts IX to XI.

[269] 86 FR 56356 (Oct. 8, 2021).

[270] The CFPB set the length of the comment period on the proposal at 90 days from the date on which it was published in the **Federal Register**. The CFPB received several written requests to extend the comment period. The CFPB believes that the 90-day comment period set forth in the NPRM (along with the 38 days that elapsed between the CFPB's issuance of the NPRM on September 1, 2021 and its publication in the **Federal Register** on October 8, 2021) gave interested parties sufficient time to consider the CFPB's proposal and prepare their responses, and thus did not extend the comment period beyond January 6, 2022.

[271] *See https://www.regulations.gov/docket/CFPB-2021-0015/comments.*

[272] CFPB, *Policy on Ex Parte Presentations in Rulemaking Proceedings,* 82 FR 18687 (Apr. 21, 2017).

IV. Legal Authorities

The Bureau is issuing this final rule pursuant to its authority under section 1071. Some aspects of this rule are also adopted under the Bureau's more general rulemaking authorities in ECOA. Congress enacted ECOA to prohibit discrimination against any applicant, regarding any aspect of a credit transaction, on the basis of, amongst other characteristics, race, color, religion, national origin, and sex.[274] The Bureau has certain oversight, enforcement, and supervisory authority over ECOA requirements and has rulemaking authority under the statute.

ECOA is implemented in Regulation B.[275] Among other things, Regulation B generally prohibits creditors from inquiring about an applicant's race, color, religion, national origin, or sex, with limited exceptions, including if it is required by law.[276]

As discussed above, in the Dodd-Frank Act Congress amended ECOA by adding section 1071, which directs the Bureau to adopt regulations governing the collection and reporting of small business lending data. Specifically, section 1071 requires financial institutions to collect and report to the Bureau certain data on applications for credit for women-owned, minority-owned, and small businesses.[277] Congress enacted section 1071 for the purpose of (1) facilitating enforcement of fair lending laws and (2) enabling communities, governmental entities, and creditors to identify business and

[273] See *https://www.regulations.gov/docket/CFPB-2021-0015/comments*.

[274] 15 U.S.C. 1691(a)(1).

[275] 12 CFR part 1002.

[276] Regulation B § 1002.5(a)(2).

[277] ECOA section 704B.

community development needs and opportunities of women-owned, minority-owned, and small businesses.[278] The Bureau often refers to these as section 1071's fair lending purpose and its business and community development purpose, respectively.

To advance these statutory purposes, section 1071 grants the Bureau general rulemaking authority for section 1071, providing that the Bureau shall prescribe such rules and issue such guidance as may be necessary to carry out, enforce, and compile data pursuant to section 1071.[279] ECOA section 704B(g)(2) also permits the Bureau to adopt exceptions to any requirement of section 1071 and to conditionally or unconditionally exempt any financial institution or class of financial institutions from the requirements of section 1071, as the Bureau deems necessary or appropriate to carry out the purposes of section 1071. The Bureau principally relies on its 704B(g)(1) authority in this proposed rule and relies on 704B(g)(2) when proposing specific exceptions or exemptions to section 1071's requirements. Section 704B(g)(3) directs the Bureau to issue guidance designed to facilitate compliance with the requirements of section 1071.

In addition, section 703(a) of ECOA gives the Bureau broad authority to prescribe regulations to carry out the purposes of ECOA, including provisions that in the judgment of the Bureau are necessary or proper to effectuate the purposes of ECOA, to prevent circumvention or evasion thereof, or to facilitate or substantiate compliance therewith. That section also states that the Bureau may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Bureau are necessary or proper to effectuate the purposes of ECOA, to prevent circumvention or evasion thereof, or to facilitate or substantiate compliance therewith.

Section 1071 establishes requirements or obligations for financial institutions that the Bureau is implementing in this final rule. These provisions include the requirement in ECOA section 704B(b) that a financial institution shall inquire whether an applicant for credit is a women-owned, minority-owned, or small business; that a financial institution must maintain a record of responses to such inquiry, separate from the application; that an applicant may refuse to provide any information requested regarding the inquiry under 704B(b); that a financial institution must limit access of loan underwriters, or other officers or employees of the financial institution or any affiliate, to applicant responses to inquiries under 704B(b); and that if a financial institution determines that a loan underwriter or other officer or employee should have access to any information provided by the applicant pursuant to a request under 704B(b) that the financial institution shall provide notice to the applicant of the access of the underwriter to such information, along with notice that the financial institution may not discriminate on the basis of such information.[280]

ECOA section 704B(e)(1) directs financial institutions to compile and maintain, in accordance with regulations of the Bureau, records of the information provided by applicants for credit pursuant to a request under 704B(b). Section 704B(e)(2) requires that the information compiled and maintained under 704B(e)(1) be itemized in order to clearly and conspicuously disclose an enumerated list of data points. Section 704B(e)(2)(H) requires financial institutions to compile and maintain any additional data that the Bureau determines would aid in fulfilling the purposes of section 1071.

Several provisions of section 1071 expressly refer to regulations to be promulgated by the Bureau to implement certain requirements, including in ECOA section 704B(e)(1) regarding how financial institutions must compile and maintain data pursuant to section 1071, and in 704B(f)(2)(B) and (C) regarding the form of information made available by financial institutions to the public and the form and manner in which the Bureau itself should make data available to the public generally.

Two provisions expressly give the Bureau discretion with respect to public availability of small business lending data. Specifically, ECOA section 704B(e)(4) states that the Bureau may, at its discretion, delete or modify data before making it available to the public if the Bureau determines that the deletion or modification of the data would advance a privacy interest. Section 704B(f)(3) gives the Bureau the discretion to compile and aggregate data for its own use, as well as to make public such compilations of aggregate data.

V. Section-by-Section Analysis

Overview

In this *Overview* of part V, the CFPB first provides some background regarding section 1071, a discussion of the Home Mortgage Disclosure Act of 1975 (HMDA), and a brief summary of the final rule. Each regulatory provision of the final rule, along with its rationale and relevant feedback received through the public comment process, is discussed in detail in the section-by-section analyses that follow. The CFPB has made several major, and a number of minor, adjustments to the rule in response to comments received on the proposal. Major changes are noted in the summary of the final rule below; all changes are discussed in detail in the section-by-section analyses that follow.

Next, the CFPB discusses the high-level and general comments received in response to the NPRM. The CFPB also addresses several issues for which there is no corresponding regulatory text or commentary. Finally, the CFPB discusses the conforming amendments it is making to existing Regulation B.

A. Introduction to Section 1071

As discussed above, section 1071 of the Dodd-Frank Act requires that financial institutions collect and report to the CFPB certain data regarding applications for credit for women-owned, minority-owned, and small businesses. Section 1071's statutory purposes are to (1) facilitate enforcement of fair lending laws, and (2) to enable communities, governmental entities, and creditors to identify business and community development needs and opportunities of women-owned, minority-owned, and small businesses.

Section 1071 specifies a number of data points that financial institutions are required to collect and report, and also provides authority for the CFPB to require any additional data that it determines would aid in fulfilling section 1071's statutory purposes. Section 1071 also contains a number of other requirements, including those that address restricting the access of underwriters and other persons to certain data and publication of data. In addition, section 1071 permits the CFPB to modify or delete data prior to publication if it determines that such a deletion or modification would advance a privacy interest.

Section 1071 directs the CFPB to prescribe such rules, and issue such guidance as may be necessary to carry out, enforce, and compile data pursuant to section 1071. It also permits the CFPB to adopt exceptions to any requirement

[278] ECOA section 704B(a).

[279] ECOA section 704B(g)(1).

[280] ECOA section 704B(b)(1) and (2), (c), (d)(1) and (2).

or to exempt financial institutions from the requirements of section 1071 as it deems necessary or appropriate to carry out the purposes of section 1071. Section 1071 also directs the CFPB to issue guidance designed to facilitate compliance with the requirements of section 1071. As discussed in part IV above and throughout the section-by-section analyses in this part V, the CFPB's rule implements these statutory provisions.

B. Section 1071 and HMDA

HMDA is a data collection and reporting statute that requires certain depository institutions and for-profit nondepository institutions to collect, report, and disclose data about originations and purchases of mortgage loans, as well as mortgage loan applications that do not result in originations (for example, applications that are denied or withdrawn).[281] The CFPB's Regulation C, 12 CFR part 1003, implements HMDA. In light of certain similarities between section 1071 and HMDA as data collection and reporting statutes with different markets but similar fair lending enforcement and community development purposes, the CFPB's section-by-section analyses in this part V sometimes discusses how similar provisions are addressed in the context of HMDA. Of course, the markets to which HMDA and section 1071 apply are also different in significant respects, and those differences are reflected between the present rule and Regulation C, as discussed further in the section-by-section analyses in this part V.

HMDA and Regulation C's purposes are: (1) to help determine whether financial institutions are serving their communities' housing needs; (2) to assist public officials in distributing public investment to attract private investment; and (3) to assist in identifying potential discriminatory lending patterns and enforcing antidiscrimination statutes.

A covered institution for purposes of HMDA reporting is a depository or nondepository institution that meets the relevant coverage criteria set forth in the regulation. A covered transaction under HMDA is generally a loan or line of credit secured (or, for applications, proposed to be secured) by a lien on a dwelling, that is not specifically excluded under Regulation C § 1003.3(c). The data points generally required to be reported about each covered transaction can be grouped into four broad categories: [282] information about the applicants, borrowers, and underwriting process, information about the property securing the loan or proposed to secure the loan, information about the features of the loan, certain unique identifiers.

Covered institutions are required to submit their HMDA data by March 1 following the calendar year for which data are collected. Covered institutions with larger volumes of covered loans and applications are required to submit their HMDA data for each of the first three quarters of the year in addition to their annual submission.

Following the calendar year in which HMDA data are collected, a covered institution's disclosure statement [283] and modified loan/application register become publicly available on the FFIEC's HMDA Platform.[284] Aggregate reports for each Metropolitan Statistical Area and Metropolitan Division that show lending patterns by property location, age of housing stock, and income level, sex, ethnicity, and race are also publicly available on the same platform, which also allows users to create custom datasets, reports, and visualizations from the HMDA data.

HMDA data are the primary source of information for regulators, researchers, economists, industry, and advocates analyzing the mortgage market both for HMDA's purposes and for general market monitoring. HMDA data are used by the Federal supervisory agencies to support a variety of activities. For example, Federal supervisory agencies use HMDA data as part of their fair lending [285] examination process, and also use HMDA data in conducting CRA [286] performance evaluations. HMDA data provide the public with information on the home mortgage lending activities of particular reporting entities and on activity in their communities. These data are used by local, State, and Federal officials to evaluate housing trends and issues and by community organizations to monitor financial institution lending patterns.

C. Summary of the Final Rule

The CFPB is adding a new subpart B to Regulation B to implement the requirements of section 1071. The CFPB is also making some conforming amendments to existing Regulation B. The CFPB's final rule is summarized below, in the order of the section-by-section analyses in this part V that follow.

1. General Provisions (§§ 1002.5(a)(4), 1002.101, and 1002.102)

Changes to existing Regulation B. The CFPB is amending existing § 1002.5(a)(4) to expressly permit voluntary collection and reporting of information regarding the ethnicity, race, and sex of applicants' principal owners, or whether the applicant is a minority-owned, women-owned, or LGBTQI+-owned business, in certain circumstances.

The Bureau is also making other nonsubstantive conforming edits in existing Regulation B to maintain consistency and avoid confusion.

Authority, purpose, and scope (§ 1002.101). Section 1002.101 sets forth the authority, purpose, and scope for subpart B. Among other things, this section states section 1071's two statutory purposes of facilitating enforcement of fair lending laws and enabling communities, governmental entities, and creditors to identify business and community development needs and opportunities of women-owned, minority-owned, and small businesses.

Definitions (§ 1002.102). Section 1002.102 includes a number of definitions for terms used in subpart B, which generally fall into several categories. First, some definitions refer to terms defined elsewhere in subpart B—specifically, terms of particular importance including business, covered application, covered credit transaction, covered financial institution, financial institution, and small business. Second,

[281] 12 U.S.C. 2801 *et seq.*

[282] Under the Economic Growth, Regulatory Relief, and Consumer Protection Act, Public Law 115–174, 132 Stat. 1296 (2018), as implemented in Regulation C § 1003.3(d), certain HMDA-covered institutions may be eligible for partial exemptions from some of the HMDA reporting requirements and only certain covered loans and applications are covered under partial exemptions. If a covered loan or application is covered under a partial exemption, the covered institution is not required to collect, record, and report certain data points.

[283] A disclosure statement contains aggregated data derived from loan-level data.

[284] A HMDA loan/application register contains the record of information required to be collected and the record submitted annually or quarterly, as applicable. A modified loan/application register is a covered institution's loan/application register modified by the CFPB, on its website, to protect applicant and borrower privacy. The CFPB interprets HMDA, as amended by the Dodd-Frank Act, to call for the use of a balancing test to determine whether and how HMDA data should be modified prior to its disclosure to the public in order to protect applicant and borrower privacy while also fulfilling HMDA's public disclosure purposes. *See* 80 FR 66127, 66133–34 (Oct. 28, 2015). In December 2018, the CFPB issued final policy guidance describing the modifications the CFPB intends to apply to the loan-level HMDA data that covered institutions report before the data are disclosed publicly. *See* 84 FR 649 (Jan. 31, 2019).

[285] *See* ECOA (15 U.S.C. 1691 through 1691f), Regulation B (12 CFR part 1002), and the Fair Housing Act (42 U.S.C. 3605, 24 CFR part 100).

[286] 12 U.S.C. 2901 through 2908, and 12 CFR parts 25, 195, 228, and 345.

some definitions refer to terms defined elsewhere in existing Regulation B (*i.e.,* business credit, credit, and State) or other regulations (*i.e.,* a portion of the definitions of small business and affiliate reference an SBA regulation). Finally, the remaining terms are defined in § 1002.102, including applicant, closed-end credit transaction, LGBTQI+ individual, LGBTQI+-owned business, minority-owned business, open-end credit transaction, principal owner, small business lending application register, women-owned business, and a portion of the definition of affiliate.

2. Coverage (§§ 1002.103 Through 1002.106)

Covered applications (§ 1002.103). Section 1002.103 defines what is, and is not, a covered application under subpart B; this definition triggers data collection and reporting requirements under subpart B for covered financial institutions. The CFPB is defining a covered application in § 1002.103(a) as an oral or written request for a covered credit transaction that is made in accordance with procedures used by a financial institution for the type of credit requested. A covered application does not include (1) reevaluation, extension, or renewal requests on an existing business credit account, unless the request seeks additional credit amounts; and (2) inquiries and prequalification requests.

Covered credit transactions and excluded transactions (§ 1002.104). The CFPB is requiring that covered financial institutions collect and report data for all covered applications from small businesses for transactions that meet the definition of business credit under existing Regulation B, with certain exceptions. Section 1002.104(a) defines the term covered credit transaction as an extension of business credit that is not an excluded transaction under § 1002.104(b). Loans, lines of credit, credit cards, and merchant cash advances (including credit transactions for agricultural purposes) all fall within the scope of the rule. Section 1002.104(b) excludes from the requirements of subpart B trade credit, HMDA-reportable transactions, insurance premium financing, public utilities credit, securities credit, and incidental credit. Factoring, leases, consumer-designated credit used for business or agricultural purposes, and credit transaction purchases, purchases in a pool of credit transactions, and purchases of a partial interest in a credit transaction also are not covered credit transactions.

Covered financial institutions and exempt institutions (§ 1002.105). The CFPB is defining in § 1002.105(a) the term financial institution, consistent with the definition in section 1071, as any partnership, company, corporation, association (incorporated or unincorporated), trust, estate, cooperative organization, or other entity that engages in any financial activity. Under this definition, subpart B's requirements apply to a variety of entities that engage in small business lending, including depository institutions (*i.e.,* banks, savings associations, and credit unions), online lenders, platform lenders, CDFIs, Farm Credit System lenders, lenders involved in equipment and vehicle financing (captive financing companies and independent financing companies), commercial finance companies, governmental lending entities, and nonprofit nondepository lenders. Subpart B does not cover motor vehicle dealers.[287] Section 1002.105(b) defines the term covered financial institution as a financial institution that originated at least 100 covered credit transactions for small businesses in each of the two preceding calendar years. Only financial institutions that meet this loan-volume threshold are required to collect and report small business lending data under subpart B.

Business and small business definitions (§ 1002.106). Section 1002.106 adopts the SBA's definitions of ''business concern or concern'' and ''small business concern'' as set out in the Small Business Act and SBA regulations. Notwithstanding the small business size standards established by SBA regulations, for purposes of subpart B, a business is a small business if its gross annual revenue is $5 million or less for its preceding fiscal year. The SBA Administrator has approved the CFPB's use of this alternate small business size standard pursuant to the Small Business Act. Every five years after January 1, 2025, the need to adjust the gross annual revenue threshold for inflation or deflation will be determined using the Consumer Price Index for all Urban Consumers.

3. Compiling, Maintaining, and Reporting Small Business Lending Data (§§ 1002.107 Through 1002.111)

Compilation of reportable data (§ 1002.107). Section 1002.107 addresses several aspects of collecting data on covered applications from small businesses. Section 1002.107(a) requires financial institutions to compile and maintain the data points enumerated in § 1002.107(a)(1) through (20). These data points must be collected and reported in accordance with the rule and the Filing Instructions Guide that the CFPB will provide for the appropriate filing year. Certain of these data points are or could be collected from the applicant (or otherwise determined based on information from appropriate third-party sources); other data points are based on information within the financial institution's control. Appendix E provides a sample data collection form for requesting protected demographic information. Although the form reflects a number of legal requirements applicable to collection, use of the form itself is not mandatory. It is intended as an available implementation resource for lenders, who can make use of it if they so choose.

Section 1002.107(c)(1) provides that covered financial institutions must not discourage an applicant from responding to requests for applicant-provided data and must otherwise maintain procedures to collect such data at a time and in a manner that are reasonably designed to obtain a response. Where data are collected directly from the applicant, § 1002.107(c)(2) identifies certain minimum provisions that must be included within financial institutions' procedures in order for them to be considered ''reasonably designed.'' The rule also addresses what financial institutions should do if, despite having such procedures in place, they are unable to obtain certain data from an applicant. Pursuant to § 1002.107(b), financial institutions are permitted to rely on information from the applicant or appropriate third-party sources, although for most data points if the financial institution verifies the information provided it must report the verified information. Section 1002.107(d) permits financial institutions to reuse certain previously collected data in certain circumstances.

Firewall (§ 1002.108). Section 1002.108 implements section 1071's requirement that certain data collected pursuant to section 1071 be shielded from certain persons if feasible; the CFPB refers to this as the ''firewall.'' Pursuant to § 1002.108(b), if an employee or officer of a covered financial institution or a covered financial institution's affiliate is involved in making any determination concerning a covered application from a small business, that employee or officer is prohibited from accessing the applicant's responses to regarding

[287] Regulation B does not apply to a person excluded from coverage by section 1029 of the Consumer Financial Protection Act of 2010, title X of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376, 2004 (2010).

protected demographic information requested under this final rule.

However, pursuant to § 1002.108(c), this prohibition does not apply to an employee or officer if the financial institution determines that employee or officer should have access to the applicant's responses to the financial institution's inquiries regarding the applicant's protected demographic information, and the financial institution provides a notice to the applicant regarding that access. The notice must be provided to each applicant whose information will be accessed or, alternatively, the financial institution may also provide the notice to applicants whose responses will not or might not be accessed. For example, a financial institution could provide the notice to all applicants or all applicants for a specific type of product. The CFPB is providing sample language that a financial institution can, but is not required to, use for this notice.

Reporting of data to the Bureau (§ 1002.109). Section 1002.109 addresses several aspects of covered financial institutions' obligations to report small business lending data to the CFPB. First, § 1002.109(a) provides that data must be collected on a calendar year basis and reported to the CFPB on or before June 1 of the following year. Section 1002.109(a) also addresses collection and reporting requirements of subsidiaries of financial institutions and reporting requirements of financial institutions where multiple financial institutions are involved in a transaction. Second, the CFPB lists in § 1002.109(b) the information that financial institutions are required to provide about themselves when reporting data to the CFPB, including the financial institution's name, headquarters address, contact person, Federal prudential regulator, institutional identifiers, parent entity information, as well as information on the type of financial institution it is, and whether it is reporting covered applications voluntarily. Finally, § 1002.109(c) addresses technical instructions for the submission of data to the CFPB, including information about the Filing Instructions Guide, which the CFPB will provide for the appropriate year.

Publication of data and other disclosures (§ 1002.110). Section 1002.110 addresses several issues regarding the publication of small business lending data. Section 1002.110(a) provides that the CFPB will make available to the public, on an annual basis, the data submitted to it by financial institutions. These data will be made available subject to deletions or modifications made by the CFPB, if the CFPB determines that such deletions or modifications would advance a privacy interest. Part VIII below discusses the CFPB's preliminary assessment of how best to determine appropriate pre-publication modifications and deletions, particularly in light of re-identification risk to small businesses and their owners. Section 1002.110(b) provides that the CFPB may compile and aggregate data submitted by financial institutions and may publish such compilations or aggregations.

Section 1002.110(c) requires a covered financial institution to publish on its website a statement that its small business lending data, as modified by the CFPB, are or will be available from the CFPB. Section 1002.110(d) sets forth when a covered financial institution shall make this statement available and how long the financial institution shall maintain the statement on its website. These requirements satisfy financial institutions' statutory obligation to make data available to the public upon request.

Finally, § 1002.110(e) prohibits a financial institution or third party from disclosing protected demographic information, except in limited circumstances. Section 1002.110(e)(1) prohibits a financial institution from disclosing or providing to a third party the protected demographic information it collects pursuant to the rule, except to further compliance with ECOA or Regulation B or as required by law. Section 1002.110(e)(2) prohibits a third party that obtains protected demographic information for the purpose of furthering compliance with ECOA and Regulation B from any further disclosure of such information, except to further compliance with ECOA and Regulation B or as required by law.

Recordkeeping (§ 1002.111). Section 1002.111 addresses several aspects of the recordkeeping requirements for small business lending data. First, § 1002.111(a) requires a covered financial institution to retain evidence of compliance with subpart B, which includes a copy of its small business lending application register, for at least three years after the register is required to be submitted to the CFPB pursuant to § 1002.109. Second, § 1002.111(b) requires a covered financial institution to maintain, separately from the rest of an application for credit and accompanying information, an applicant's responses to a financial institution's inquiries regarding the applicant's protected demographic information. Finally, § 1002.111(c) requires that, in compiling, maintaining, and reporting its small business lending application register, as well as the separately maintained protected demographic information pursuant to § 1002.111(b), a financial institution may not include any personally identifiable information concerning any individual who is, or is connected with, an applicant.

4. Other Provisions (§§ 1002.112 Through 1002.114)

Enforcement (§ 1002.112). Section 1002.112 addresses several issues related to the enforcement of subpart B. First, § 1002.112(a) states that a violation of section 1071 or subpart B is subject to administrative sanctions and civil liability as provided in sections 704 and 706 of ECOA. Second, § 1002.112(b) provides that a bona fide error in compiling, maintaining, or reporting data with respect to a covered application is an error that was unintentional and occurred despite the maintenance of procedures reasonably adapted to avoid such an error. Such an error is presumed not to violate ECOA or subpart B if the number of such errors do not exceed the thresholds set forth in appendix F. Third, § 1002.112(c) identifies four safe harbors under which certain errors—specifically those regarding the application date, census tract, and NAICS code data point, along with incorrect determinations of small business status, covered transaction, and covered application—do not constitute violations of ECOA or subpart B. Relatedly, in part VII below, the CFPB discusses its intention to consider, for financial institutions subject to the CFPB's jurisdiction, good faith efforts to comply with the rule and will not generally assess penalties for errors in data reporting. The CFPB will conduct examinations on data during the grace period to assist institutions in diagnosing compliance weaknesses.

Severability (§ 1002.113). Section 1002.113 provides that any provision of subpart B, or any application of a provision, is stayed or determined to be invalid, it is the CFPB's intent that the remaining provisions shall continue in effect.

Effective date, compliance date, and special transitional rules (§ 1002.114). Section 1002.114 addresses several issues related to the rule's effective date, when covered financial institutions are required to comply with the rule, and associated transitional rules. Section 1002.114(a) provides that this final rule will become effective 90 days after publication in the **Federal Register**. However, pursuant to § 1002.114(b) compliance with the final rule is based on a tiered compliance date schedule.

Compliance with the rule beginning October 1, 2024 is required for covered financial institutions that originate the most covered credit transactions for small businesses. However, institutions with a moderate transaction volume have until April 1, 2025 to begin complying with the rule, and those with the lowest volume have until January 1, 2026. Next, § 1002.114(c) provides certain transitional provisions that permit covered financial institutions to begin collecting protected applicants' demographic information beginning 12 months prior to their applicable compliance dates. Finally, § 1002.114(c) also permits financial institutions that do not have ready access to sufficient information to determine their compliance tier (or whether they are covered by the rule at all) to use any reasonable method to estimate their volume of originations to small businesses for this purpose.

D. High-Level and General Comments

1. High-Level and General Comments on the NPRM

High-level and general comments received on the NPRM are discussed here, followed by a discussion of comments specifically addressing implementation issues and comments regarding section 1071's overlap with other data reporting regimes. Comments received on specific aspects of the Bureau's proposed rule are discussed in the section-by-section analyses that follow in this part V. Comments regarding the privacy analysis are addressed in part VIII below, and regarding the Bureau's analysis of impacts in parts IX through XI.

Comments Received

Support for section 1071's statutory purposes was nearly universal amongst commenters, at least at a high level of generality. (See also the section-by-section analysis of § 1002.101 below.) The vast majority of industry commenters praised the purposes of the rule, and the intentions behind section 1071 and ECOA generally, while offering criticisms of specific provisions of the proposed rule.

Broad support. A number of commenters offered general support for the rule, including its scope and its purposes. For example, a trade association stated its appreciation for the comprehensive nature of the proposed rule, noting that the Bureau conducted extensive outreach and worked at ensuring proper and effective rulemaking consistent with legislative intent while allowing for technical improvements and practical considerations. A community group stated that to achieve the community development and fair lending purposes of the statute, the data collected and reported under the rule needs to be comprehensive in its coverage of lenders and must capture key credit underwriting factors as controls for analyses of gender and racial disparities in lending. The commenter also stated that the Bureau recognized that annual disclosure of lending data by the vast majority of small business lenders is a prerequisite for adequate oversight, given that existing data are insufficient. The commenter further explained that existing data consist of periodic surveys that are not usually lender specific and that are inconsistent in the amount of detail provided on key underwriting variables needed for analyses of community needs and fair lending compliance.

A number of commenters offered more specific support for the rule's purposes. One trade association noted that its members have been active in the development of policy supporting section 1071, including participation as small entity representatives during the SBREFA process. A number of banks, a credit union, and several trade associations expressed support for the statutory purposes of section 1071 and the Bureau's proposed rule. One trade association stated that the NPRM was a key opportunity to explore lending data and expand responsible small business lending, which was important to the financial well-being in the communities served by its members, as well as stability of the overall financial system.

A cross-sector group of lenders, community groups, and small business advocates stated that it is critical to require lenders to collect and report applicant data for as many small minority-owned and small women-owned businesses as possible, to uphold congressional intent and establish a comprehensive database.

Several commenters focused on the importance of the fair lending purpose of section 1071. One trade association stated its unequivocal agreement with the purpose of preventing discrimination on the basis of ethnicity, race, and sex, and noted that CDFI lenders share the Bureau's core value of protecting consumers by providing fair and transparent financial products and services to all customers.

A number of commenters, including community banks, credit unions, and trade associations, offered their appreciation for the stated intentions of the rule in the NPRM—to support fair lending and business and community development—but expressed concern about the effect of the rule as proposed on lending and compliance costs. A bank stated that, while it supported the statutory goals of section 1071, the proposed rule would result in restricted, higher-priced credit for the groups the proposal is meant to benefit. A trade association for community banks likewise supported the proposed rule and the congressional intent behind section 1071, but asserted it was necessary to fine-tune specific proposed provisions to mitigate costs and ensure small business lenders remain active, particularly those serving the most underserved markets. Another trade association supported the goals of the NPRM, but worried that the proposed would unduly burden credit unions and would discourage them from offering business credit.

Broad criticisms. Some industry commenters expressed disagreement with the enactment of section 1071 and therefore opposed the rule in its entirety. One lender opposed the rule on the grounds that it already complies with fair lending laws, and that the rule would force a choice between compliance and market exit. Another argued that the Dodd-Frank Act may have intended that section 1071 create a HMDA-like data reporting mechanism, but warned that small business lending is not "cookie-cutter," is not automated, and is highly relationship driven. Another commenter claimed that it would be impossible to derive any meaningful or statistically valid conclusions from a comparison of small business loans.

A credit union stated that the publication of data collected and reported pursuant to section 1071 would not permit it to better identify its members' unmet small business lending needs aside from confirming if there is a significant difference in the number of business borrowers that are female or of a specific race.

One trade association noted that credit unions may only serve their members and are limited by Federal statute in their ability to offer business loans; as a result, data collected from them would not be comparable to data collected from lenders without similar limitations in who they may serve.

Other commenters, without specifically opposing the enactment of section 1071, expressed more general concerns about the NPRM. Trade associations for online lenders supported the policy goals of the NPRM and also believed that modifications should be made to support responsible innovation in banking without unintentionally stifling the efficiency and innovation that digital lending

platforms can provide. A bank supported the enforcement of fair lending laws and appreciated the Bureau's dedication to better supporting small businesses, but was concerned about aspects of the NPRM. A One commenter inquired as to why the Bureau, in charge of consumer financial protection, was concerned with business loans, and claimed that the Bureau was engaged in overreach.

The role of online lenders. Two trade associations suggested that online and "fintech" lenders were important to expanding access to financing, particularly for Black- and Hispanic-owned businesses. These commenters expressed their support for greater transparency and expanding access to sustainable and fair credit in small business lending. They also asserted that women-owned and minority-owned small businesses were disadvantaged in applying for small business lending at traditional banks, and that nontraditional online lenders play a crucial role in modernizing financial services and improving access and outcomes for small businesses. One of the commenters noted that, in particular, the use of artificial intelligence, machine learning, and alternative data would expand lending to minority-owned small businesses.

Uniqueness of small business lending. One bank stated that it was hard to perform comparative analysis on small business loans because they are unique and manually unwritten. Further, the commenter stated that the absence of certain credit criteria or metrics—such as collateral, loan-to-value, debt-to-income, debt service coverage ratio and the like—in the data points to be collected by the rule could cause reviewers of published data, such as consumer groups and agency examiners, to draw incorrect conclusions on variances in rates and terms of loans.

Data accuracy. A bank and a trade association asserted that the Bureau's final rule should focus on ensuring the collection and reporting of high-quality data that maximizes data accuracy and reliability. These commenters noted that inaccurate, unreliable, and poor-quality data could undermine the statutory purposes of section 1071, which the commenters said were to promote access to credit for minority-owned and women-owned small businesses. They further stated that poor data quality could also lead to misguided and factually unsupported fair lending allegations, which could damage the reputations of responsible lenders and subject them to unnecessary investigative burdens and lawsuits, all of which could undermine the Bureau's credibility and waste the Bureau's time and resources. Based on these premises, the commenters sought the elimination of certain provisions which they believed would undermine the collection of accurate, reliable, high-quality data (discussed in the applicable section-by-section analyses that follows).

Specific uses of small business lending data. Two trade associations urged the Bureau to explain how it would use the data collected under this rule, including how it would analyze data collected by the rule. One claimed that the NPRM did not outline potential uses for small business lending data, and asserted that the Bureau should provide notice and comment on potential uses of the rule, even after the issuance of the final rule. The commenter stated that it is important for the Bureau to issue guidance on how it plans to analyze data reported under the rule, including how it will assess whether lenders appropriately serve relevant markets, which can vary significantly by lending product.

The other commenter stated that the Bureau should clearly indicate how implementing the proposed framework will advance fairness and understanding of small business credit needs, that requirements should tie to satisfying stated objectives and designed no more broadly than necessary to reduce unnecessary costs to small business lenders. The commenter stated its belief that by clearly indicating how it will use data it collects, including whether and how it will make such information public, the Bureau will allow stakeholders to assess better the costs and benefits of the overall framework. Additionally, the Bureau should carefully consider potential unintended consequences—especially related to data publication—that could reduce small business credit access and chill further innovation aimed at better serving small businesses.

Responses to Comments Received

The Bureau agrees with the general comments made in favor of keeping the scope of the proposed rule broad. In general, the Bureau believes that broad coverage of institutions and products as requested by a number of commenters is consistent with the statutory purposes of section 1071. The Bureau does not believe that a more limited approach to scope—including the various limitations on the coverage of certain types of financial institutions and products—would be consistent with the statutory purposes of section 1071. The Bureau addresses these issues directly in the section-by-section analyses of proposed §§ 1002.104 and 1002.105 below.

Broad support. Regarding the comment on the scope of the rule, that the Bureau should continue to monitor U.S. Census data to ensure that its definition of small business in this rule continues in the future to be inclusive enough such that the proportion of non-small minority-owned businesses do not exceed 1 percent of all businesses, the Bureau believes that its adoption of an inflation-adjustment for the gross annual revenue threshold in the definition of small business under § 1002.106(b) should help ensure that, over time, the proportion of businesses covered by the rule does not decline. In any case, the Bureau will monitor data concerning the prevalence of small businesses in the context of the economy at large.

Broad criticism. Regarding the comment of a lender that it already complies with fair lending laws, the Bureau notes that continuing enforcement of fair lending laws, and tools such as this data collection rule that facilitate such enforcement, remains necessary because while the commenter may comply with fair lending laws, some lenders may not and a subset of those may repeatedly violate fair lending laws. Additionally, enabling identification of business and community development needs and opportunities is an independent purpose of the statute. Compliance with fair lending laws does not necessarily permit creditors, communities, and governmental entities to identify business and community development needs and opportunities. As to the assertion that the rule would force a choice between compliance and market exit, the Bureau's decision to increase the originations threshold from 25 to 100 transactions will mitigate any risk of such disruptions, even if slight or speculative. Regarding the comment that small business lending is more individualized and highly relationship driven, the Bureau agrees this is true for much small business lending and the final rule is crafted to acknowledge this, as discussed in the section-by-section analyses that follow. But that does not prevent small business lending data from facilitating fair lending enforcement and identifying business and community development needs and opportunities.

As to comments that quarrel with the statutory mandate and question the utility of the data in general terms, the Bureau is bound by the statute and congressional intent. Additionally, many described potentially helpful uses of the data.

Regarding the assertion that the Dodd-Frank Act was only intended to regulate larger institutions, and that smaller lenders should be exempted from the rule to avoid harming those the Act was intended to protect, the Bureau notes that while much of the Dodd-Frank Act explicitly addresses larger entities, section 1071 does not contain such limitations. Nonetheless, Bureau has made changes in the final rule in response to public comment that will have the effect of reducing compliance burden on small lenders. For example, the Bureau has raised the coverage threshold from 25 to 100 originations for purposes of determining which financial institutions must comply with the rule, provided longer compliance periods for lenders with lower volumes of small business lending, and provided for a variety of safe harbors and a good faith error provision which will provide some leeway to smaller-volume lenders. The Bureau implemented these changes in the final rule to limit its impact on institutions with lower volumes of lending to small businesses. The Bureau has also complied with the Dodd-Frank Act requirements under SBREFA and the RFA to assess and mitigate any impact on smaller financial institutions.

The Bureau addresses the effect of the rule on lending and compliance costs, in its impact analyses in parts IX and X below. Regarding the commenter that stated that the rule would not meet its purposes and would result in restricted, higher-priced credit to the very groups the proposal is meant to benefit, the Bureau's analysis suggests that any changes in the cost of credit would be small and unlikely to lead to a significant change in the per-unit cost of loans to individual applicants even from the smallest lenders. The Bureau has made various changes from the proposal in finalizing this rule intended to mitigate costs for smaller-volume lenders serving small businesses in response to comments expressing concern that credit unions and other financial institutions remain active small business lenders.

Regarding the concern that data from credit unions would not be comparable to data collected from other kinds of lenders, the Bureau observes that, under § 1002.109(b), lenders must provide information on financial institution type. Credit unions thus must self-identify themselves in submitting data to the Bureau, and the various limitations on lending by credit unions can be taken into account in analyses of data collected and reported under this rule.

Regarding the comment that the rule should be modified to support responsible innovation in banking without unintentionally stifling the efficiency and innovation that online lenders may provide, the Bureau agrees that it does not wish to stifle responsible innovation. The Bureau has endeavored to be responsive to these concerns in the final rule; to the extent that specific concerns were raised, they are addressed in other provisions of this preamble. Regarding the comment that the rule as proposed was too complex even for most forward-leaning, technologically adept financial institutions, the Bureau disagrees, noting that while this rule is new, it is not dissimilar to other similar data collection regulations in complexity, such as those for HMDA, CRA, and the CDFI Fund. Further, the Bureau has made a number of changes to this final rule to make compliance easier for smaller-volume lenders, or to exclude them from reporting requirements entirely.

Regarding the comment asserting that the Bureau was overreaching by regulating business loans, the Bureau notes that section 1071 explicitly requires the Bureau promulgate a rule to collect data on applications for business credit.

The role of online lenders. Regarding assertions made that nonbank online lenders were important to expanding access to financing for Black- and Hispanic-owned businesses in particular, that traditional lenders provided fewer loans to women-owned and minority-owned small businesses, and that technology improved access and outcomes for small businesses, the Bureau believes that the broader conclusion to draw from these assertions is that the data that will be collected under this rule is needed to assess and further analyze such claims.

Uniqueness of small business lending. Regarding the comment that it is not possible to perform comparative analysis on small business loans because they are unique and manually unwritten, the Bureau disagrees. Other commenters, as set out in the section-by-section analysis of § 1002.101, stated that the data points proposed in the NPRM are fulsome and can contribute to sophisticated analysis and comparison of small business loans. Regarding the comment that the Bureau cannot make comparisons absent additional credit metrics beyond those it proposed to collect and that other reviewers of published data could draw incorrect conclusions, the Bureau does not agree that additional credit metrics are necessary in order to draw meaningful analyses from the data. While the Bureau believes, all things equal, that additional data points would enrich the analysis for users of the data, the Bureau also believes that certain of these metrics can be derived, at least in part, from other data points, and it notes that other commenters varyingly opposed any data points proposed pursuant to ECOA section 704B9(e)(2)(H) or requested that the Bureau collect as few data points as possible. Industry comments were also contradictory on this point; while many commenters suggested the Bureau had proposed too many data points, commenters also asserted that the Bureau was not collecting enough data to draw proper conclusions. The Bureau believes its final rule strikes an appropriate balance between comprehensiveness and minimizing burden and complexity to financial institutions.

Data accuracy. Regarding comments that the final rule should focus on ensuring the collection and reporting of high-quality data, the Bureau agrees. To this end, it has adjusted various provisions in the final rule in response to comments received. In addition, other changes, while made for other reasons, render moot certain comments on accuracy concerns. For example, the decision not to finalize the proposed visual observation and surname requirement, discussed in the section-by-section analysis of § 1002.107(a)(19)), moots the relevance of comments about the accuracy of visual observation.

Specific uses of small business lending data. Regarding the comment that the Bureau should have explained and provided an opportunity for notice and comment for its intended uses of the data collected under this rule, the Bureau disagrees, both that it did not explain what the data would be used for, and that it is obligated to identify specific uses of the data or to provide the public an opportunity to comment on proposed specific uses of the data. Initially, section 1071 itself establishes the intended purposes and uses of the collection and publication of the data—namely, the facilitation of fair lending enforcement and the identification of business and community development needs and opportunities. Next, while section 1071 requires the Bureau to collect and publish data on small business lending applications, it does not require the Bureau to identify its intended uses of the data. Moreover, even if the Bureau articulates specific uses of the data, as the statute explicitly provides, the Bureau is not the only intended user of the data. Enforcement of fair lending laws includes ECOA, which is enforced not only by the Bureau but by many other Federal

agencies.[288] Further, for purposes of identifying business and community development needs and opportunities, the statute specifically names communities, governmental entities, and creditors as potential users of the data collected under this rule. Thus, even if the Bureau disclosed its intended uses—which could change over time depending on the data received and the needs identified—other stakeholders could make different use of the data.

Regarding comments about how the Bureau intends to make the data public, including whether and how it will make such information public, and that the Bureau should carefully consider potential unintended consequences especially related to data publication, the Bureau describes its intended privacy analysis in part VIII below. Regarding concerns that the Bureau might reduce small business credit access and chill further innovation aimed at better serving small businesses, the Bureau has considered various comments concerning access to credit and innovation, which it addresses throughout the section-by-section analyses below.

2. Comments Regarding Implementation

Comments Received

Several commenters said that the Bureau should provide additional implementation or guidance resources about the final rule, specific parts of the rule, or regarding how the rule applies in specific situations. Some of these commenters requested specific forms of guidance or specific resources, such as frequently asked questions, guides, or templates. One commenter said that the final rule should have a table of contents. Some commenters said that the Bureau should provide training on collecting and reporting data or training on how to comply with the rule generally. One commenter said the Bureau should develop a data literacy program. Another commenter said that the Bureau should use all of its available tools to educate and support lenders and their vendors, including no-action letters, advisory opinions, webinars, guides, and other materials.

Some commenters requested specific content in implementation and guidance resources. Many commenters requested additional guidance on specific requirements or data points, and those comments generally are addressed in the relevant section-by-section analyses later in this part V. Additionally, one commenter said that the Bureau should develop materials showing how to do the research needed to find appropriate regulation sections and related commentary. The same commenter said that implementation and guidance resources should provide examples. Another commenter said that implementation resources should address matters not typically addressed in supervision guides. A few other commenters said that implementation materials should be detailed and/or comprehensive.

A few commenters said that implementation materials and guidance should be provided at specific points in time. Two commenters requested that the Filing Instructions Guide be provided at least six months before data collection is required, and another commenter said that the Filing Instructions Guide should be provided early in the implementation process. This commenter also said that the compliance date should take into account the delayed availability of the Filing Instructions Guide. A different commenter said that guidance should be provided before, during, and after the compliance date.

A few commenters said that the Bureau should develop outreach programs or provide additional access to Bureau staff to address questions or issues that arise during implementation of the rule. One commenter said that the Bureau should commit to a formal request for comments on all facets of implementation and compliance with the rule. This commenter also said that the Bureau should dedicate staff to provide definitive answers to industry members that contact the Bureau and that it should not be possible for community banks to be criticized or penalized for following the instructions or answers obtained from Bureau staff. Another commenter said that, during the implementation period, the Bureau should regularly communicate with vendors and covered financial institutions and consider reasonable extensions of the rule's compliance date if issues that could affect industry preparedness arise.

Another commenter said that the Bureau should create a compliance liaison office that has the primary goal of supporting industry in their regulatory submissions and fair lending analyses. This commenter said that this liaison office would require multiple types of specialists in order to function properly and would need ties to other teams so that feedback loops work properly. This commenter further said that questions on specific data entry topics should be saved and communicated to the Office of Regulations and others at the Bureau. The commenter said that Bureau guidance provided to individual industry members should be converted into frequently asked questions and tagged for purposes of amending existing regulations. The commenter further said providing verbal guidance is helpful, but slow, and potentially inconsistent. This commenter also alleged that the Bureau does not track data related to questions received and asserted that such lack of tracking limits the responsiveness of the Bureau in adapting regulations to properly include current industry practices. A different commenter said that the Bureau should consider holding a series of public meetings or hearings to take testimony from small businesses, lenders, and trade associations regarding the impact that implementation of the proposed rule will have on each group as well as on the privacy risks inherent in the proposed data collection and public reporting by the Bureau.

Finally, there were two comments on supervision and enforcement related issues. These commenters said that the Bureau should coordinate with other Federal agencies to develop model examination procedures in advance of the Bureau publishing a final rule. One of these commenters further predicted that, absent a clear description of the methodologies that might be employed to perform fair lending analysis, there would likely be a period where prudential regulators' examination expectations are in flux and, perhaps, materially inconsistent.

Responses to Comments Received

The CFPB aims to provide a wide variety of guidance about the legislative rules it issues pursuant to the Administrative Procedure Act. Although this guidance may include materials such as advisory opinions, interpretive rules, and general statements of policy, the CFPB's guidance more often includes other materials and activities that generally reiterate requirements or positions that previously have been announced in a legislative rule or elsewhere (hereinafter ''implementation resources''). These implementation resources include such documents and materials as rule summaries, compliance guides, checklists, factsheets, frequently asked questions, institutional and transactional coverage charts, webinars, and other compliance aids directed to regulated entities, the general public, or agency staff (*e.g.,* staff manuals). In recent years, the CFPB has

[288] *See* 15 U.S.C. 1691c (listing Federal agencies with authority to enforce ECOA), 1691e (providing private attorneys, the Department of Justice, and the Department of Housing and Urban Development the authority to bring civil suits to enforce ECOA).

developed a process for preparing and releasing these implementation resources. For rules such as this one, the CFPB generally engages in a phased approach and attempts to provide various implementation resources throughout the implementation period and for some period after the compliance date.

The CFPB has provided, simultaneously with this rule's release, a Filing Instructions Guide, an executive summary, and other resources to help financial institutions understand and comply with the final rule. These materials are available on the CFPB's website.[289]

Additionally, the CFPB is planning to release a Small Entity Compliance Guide. This Small Entity Compliance Guide will provide a detailed and comprehensive summary of the rule's requirements, will include examples, and will be separate from and different than any examination manuals or other supervisory materials. The CFPB also anticipates providing other written implementation resources to assist industry, vendors, and others. When providing implementation resources, the CFPB will consider all of its available tools and select the tool that it believes is best suited to the content that the CFPB is addressing in the guidance as well as the timing of the guidance. Individuals who would like to be notified when the CFPB releases additional implementation resources or other guidance can sign up to receive notifications. However, with regard to one commenter's request, the CFPB does not anticipate developing materials attempting to show members of industry how to conduct research. The CFPB believes that such materials are outside the scope of the CFPB's implementation and guidance function and are regularly provided by other sources.

With regard to the comments addressing outreach, the CFPB notes that it has and anticipates that it will continue to engage in ongoing outreach related to this rulemaking. As discussed in part III above, the CFPB engaged in considerable outreach to industry and other stakeholders in the years leading up to issuing this final rule, and intends to continue to engage with industry, along with vendors and other stakeholders, as they prepare to comply with the rule. With regard to one commenter's request that the CFPB hold a series of public meetings or hearings to take testimony from small businesses, lenders, and trade associations regarding the impact that implementation of the proposed rule will have on each group prior to issuance of the final rule, the CFPB did not believe this was needed given the number of substantive comment letters it received and the opportunity provided to stakeholders to submit comments on the proposed rule and its potential impact. Nonetheless, as described in part III.B above, the CFPB has been conducting technical outreach with third-party software providers that serve financial institutions and software and technology staff from financial institutions that are likely to have to report small business lending data to the CFPB. With these software vendors and technical staff, the CFPB has held and, after publication of this final rule, will continue to hold discussions concerning the technical systems and procedures the CFPB will provide for financial institutions to submit data. The CFPB expects that its outreach efforts will provide a channel of communication for industry, vendors, and other parties to constructively provide feedback on the CFPB's existing implementation resources as well as provide direction for future implementation resources.

As set out in more detail above, some commenters said that the CFPB should provide staff to address questions or issues that arise during implementation of the rule. One commenter suggested that the CFPB develop a compliance liaison office. Similar to what it has done with inquiries about HMDA/Regulation C, the CFPB anticipates that it will use its regulatory inquiries function to assist individual inquirers who have specific questions about the rule or how to submit data pursuant to the rule. This function is designed to provide inquirers with brief, informal assistance on regulatory or technical issues. However, in part because of Administrative Procedure Act constraints, the CFPB cannot provide binding or official interpretations through this informal function. In addition, there are other limits on the regulatory inquiries function and on the CFPB's other implementation resources. For example, the CFPB does not provide legal advice through the regulatory inquiries function.

In addition, the CFPB already reviews the inquiries it receives and uses information gleaned from those reviews to help the CFPB prioritize provision of various other types of guidance. Thus, when the CFPB receives multiple individual inquiries about the same topic, the CFPB often prioritizes that topic for webinars and various forms of written guidance, potentially culminating in revisions to the Official Interpretations or the regulatory text after a notice-and-comment process. Thus, as requested by one commenter, the CFPB already tracks data regarding the inquiries it receives and, as appropriate given the nature of the inquiries and the CFPB's resources, uses them as a basis for frequently asked questions, other implementation resources, or other action. The CFPB anticipates doing the same with inquiries received about this rule.

With regard to the comments related to supervision, the CFPB notes that it will coordinate with other Federal agencies to develop examination procedures in connection with the rule, and anticipates publishing such procedures in advance of the rule's first compliance date.

3. Comments Regarding Overlaps With Other Data Reporting Regimes

Comments Received

General comments. Several commenters cast the overlap between this rule and other Federal data collection rules in a positive light. A community group and a CDFI lender observed that small business lending data are collected piecemeal and haphazardly across multiple agencies—including the Federal bank agencies, the SBA, and the CDFI Fund—and that this rule could be used to consolidate small business lending data reporting across agencies to reduce administrative burden by satisfying requirements across programs for various CRA and fair lending uses.

Two commenters noted that the existence of other data collection regimes, including Federal reporting requirements and private-sector reporting (such as HMDA; the SBA 7(a), 504, and Community Advantage Loan programs; CDFI Fund reporting; the Wells Fargo Diverse Community Capital Program; and the Paycheck Protection Program) suggested that compliance with this rule is feasible because these other data collections make this rule well-understood in conceptual, technological, and procedural terms. One commenter noted that these other data collections cover all but three of the data points in the NPRM (application method, application recipient, and denial reasons).

Several commenters stated their appreciation for the Bureau's attempts to harmonize this rule with others and avoid duplicative data reporting. One bank noted that avoiding duplicative reporting was critical for community banks, for which even slight differences in reporting rules would be

[289] See *https://www.consumerfinance.gov/compliance/compliance-resources/small-business-lending-resources/small-business-lending-collection-and-reporting-requirements.*

burdensome, taking away from time that could be spent with customers.

Many other commenters, including lenders, trade associations, a business advocacy group, and a group of State banking regulators, noted the overlap between this rule and other data collection regimes, and requested that the Bureau harmonize this rule with other similar data reporting regulations, with which lenders were familiar, to minimize challenges, complexity, duplication, potential burden on lenders, and potential errors in the data. These commenters named HMDA/Regulation C, CRA, FFIEC Call Reports, Regulation B/ECOA, and FinCEN's Beneficial Ownership Rule as specific examples of other rules that the required harmonization with this rule and that, in many cases, the Bureau itself identified as overlapping.

Commenters argued that, by borrowing from existing frameworks or systems, the Bureau could reduce complexity and facilitate industry compliance, allowing financial institutions to leverage existing processes, training and institutional knowledge. For instance, some commenters suggested that the thresholds in this rule be aligned with those of HMDA and CRA. Other commenters suggested that the Bureau could adopt the framework in FinCEN's beneficial ownership rule for this rule's method of determining minority-owned and women-owned status, rather than layering on a new definition of ''primary owners,'' which they suggested would add unneeded complexity to the loan origination process.

Industry commenters also asserted that by aligning this rule with existing rules, such as HMDA and CRA, the Bureau could avoid imposing inconsistent or duplicative reporting requirements to avoid errors from regulatory confusion and urged the Bureau to avoid requiring lenders to report different data for the same transaction.

Several other commenters identified other concerns with overlapping reporting. One bank noted that, while the Bureau tried to harmonize its requirements with other rules, even slight deviations between rules cause problems, which may confuse customers and make them more likely to refuse to provide data. Another bank noted that some HMDA and CRA data aggregation and submission systems rely upon identifiers to separate and process these different datasets, which the bank suggested was another reason to keep loans reportable under this rule separate from those reportable under HMDA.

A number of industry commenters and a group of State banking regulators requested that the Bureau not require financial institutions that already report data to duplicate their work. One stated that banks already report a significant amount of data to prudential regulators, and that the Bureau should eliminate duplicative reporting. Other commenters asked that the Bureau work with Federal agencies to align this rule with the FFIEC Call Report, and CRA and HMDA regulations to avoid duplication, reduce compliance burden, and reduce the potential for data errors. Two banks urged the Bureau to exempt loans reportable under other data reporting regimes, such as HMDA- and CRA-reportable loans. Another noted that its staff is trained on the established requirements of HMDA and CRA, and that removing duplicative or inconsistent requirements would reduce compliance costs, providing savings that could be passed on to the borrowers. Two community-oriented lenders suggested that the Bureau exempt all credit applications under Federal agency programs, as the data points proposed in this rule are already collected by that loan program's oversight agency (*i.e.,* SBA, USDA, etc.).

Two industry commenters suggested that the Bureau should first use existing small business lending data published by the government and private sector before collecting additional data, thereby assessing the small business finance market without negatively impacting providers of capital to entrepreneurs. One bank asserted that the Bureau itself admitted it had enough data to analyze the small business lending market, and that the rule should focus on collecting data from non-depository institutions, as it would be duplicative to collect data from depositories, which provide data via the FFIEC and NCUA Call Reports and already have a history of being regulated.

Some industry commenters generally requested that the Bureau work out inconsistencies between this rule and other data collection regimes. Some offered more specific requests for harmonization. One suggested more alignment in terms of scope, coverage and exemptions between this rule, HMDA and CRA. Another commenter identified inconsistencies with existing Regulation B, citing the difference between its small business definition ($1 million or less in revenue) and the NPRM's proposed definition ($5 million or less). A CDFI lender observed that CDFIs report lending activity to the CDFI Fund, SBA, CRA, Opportunity Finance Network's annual member survey, and credit reporting agencies, and requested that the Bureau standardize data formats to match those used in CDFI Fund reporting to streamline data collection and minimize burden on CDFIs.

HMDA. A number of commenters identified overlap between this rule and HMDA/Regulation C, and noted that duplicative data would published in two places. Some industry commenters requested that the Bureau avoid inconsistent and duplicative reporting by excluding from HMDA reporting transactions reportable under this rule. Two trade association suggested a parallel rulemaking to amend Regulation C, timed with the release of this final rule.

On the other hand, other commenters suggested that HMDA-reportable loans should be excluded from this rule to avoid duplicative reporting, undue compliance burden, and regulatory confusion. A business advocacy group noted that the Bureau itself identified the overlap between HMDA-reportable loans and loans covered by this rule. A trade association suggested the Bureau could narrowly tailor an exemption by apply the rule only to financial institutions that report data under HMDA, without an exclusion for HMDA-reportable loans by lenders that are not HMDA reporters, arguing that a narrowly tailored exclusion would serve the statutory purposes of the rule because commercial mortgage loans for small businesses would be captured under HMDA or this rule. A bank believed that duplicative reporting of HMDA-reportable applications did not serve the statutory purposes of the rule. A large bank disagreed with the Bureau's assertion that excluding HMDA-reportable transactions from this rule would add complexity to the analysis of data by requiring lenders to find and delete HMDA-reportable transactions from its submission to the Bureau; the bank argued that duplicative reporting was more complex. One lender stated that farm credit data are already collected from Farm Credit System lenders subject to HMDA.

A number of commenters identified, generally, inconsistencies between the proposed requirements for this rule and those of HMDA/Regulation C. Many industry commenters pointed out that many proposed data points in the NPRM would be similar to data points in Regulation C, and expressed concern that any differences in reporting requirements for these data points would lead to confusion and data errors. Two trade associations asserted that the overlap in data would create significant

and needless complexities for covered lenders, and noted that there were inconsistencies between the rules despite the Bureau's attempts to limit them.

Several lenders requested that the Bureau harmonize this rule with Regulation C to the extent possible if no exemptions were possible. A large bank asked that the Bureau harmonize several data points—action taken, application date, and ethnicity, race, and sex of principal owners—because lenders would be able to collect these data just once for each small business applicant, increasing efficiency in the application process and facilitating compliance.

Some commenters addressed overlap between specific data points proposed in the NPRM and existing data point requirements under Regulation C. A number of industry commenters noted that for census tract, HMDA uses the tract where collateral is located while the Bureau proposed to use a waterfall approach of several addresses. Two lenders pointed out that HMDA does not have the firewall requirement proposed for this rule in the NPRM; one of these commenters suggested that the final rule follow the HMDA approach (no firewall) for HMDA-reportable loans.

On the reporting of ethnicity, race, and sex of principal owners, two lenders noted that this rule and HMDA offer different answer choices. One of the commenters noted that lenders would provide two separate questionnaires regarding ethnicity, race, and sex for a single loan application, which could confuse applicants and make them decline to answer either one.

Several lenders noted that the proposed visual observation and surname provision, which does not require its use to determine the sex of a principal owner, was not aligned with the visual observation and surname requirement under Regulation C, which does require its use to determine the sex of a mortgage applicant. One stated that this disparity would cause confusion and errors in data collection. Another stated that for a loan application covered by both rules, the disparity would mean complying with one rule and violating the other.

Regarding credit purpose, a bank noted that a loan to a small business to purchase, improve, or refinance an apartment building would require different information to be collected and reported under both rules.

On action taken, one bank noted a disparity between the approaches of the proposed rule (one option for ''incomplete'' as an action taken) and of Regulation C (two different incompleteness options—one for a loan denial and the other for file closure) that it believed would cause difficulty, despite agreeing with the proposed rule's approach. Another bank noted that the proposed rule would require collection of gross annual revenue for the past fiscal year, while Regulation C requires the income used for the credit decision.

Community Reinvestment Act. A number of commenters noted the similarities between the small business and small farm data collected under CRA and this rule and suggested eliminating duplication. One community group stated that the data for this rule should replace CRA data, noting that this rule could replace the inconsistent, duplicative and inefficient collection of small business lending data with a comprehensive database. The commenter stated that lenders and community groups both would prefer to consult with one database than to contend with two or more that are collected annually, and that this rule is likely to capture more data than the current CRA system. A bank suggested eliminating CRA reporting requirement as data collected under this rule would duplicate and surpass the CRA data points, but would not be interoperable as each rule would require different formatting, rounding, or coding. A minority business advocacy group and a joint letter from community and business advocacy groups requested that 1071 data be used for CRA examinations, just as HMDA data are. These commenters noted that current small business small farm data for CRA examinations is limited and not a good indication of whether lenders serve the most vulnerable businesses, and that the more robust dataset to be collected under this rule would be a better indicator.

One bank asked that the Bureau work with other Federal regulators to eliminate duplication with CRA data reporting, noting that CRA data already provides a good picture of lending to small business including agriculture. Another bank suggested that the Bureau, rather than create a new data collection requirement, exempt federally insured depositories and work with other Federal regulators to enrich existing CRA reporting to include the data the Bureau wants to collect under section 1071. The commenter noted that insured depositories already have robust CRA reporting systems, and generally already collect and report data required by the NPRM to meet CRA obligations. The bank stated that the use of CRA systems to report 1071 data would result in the faster delivery of information the Bureau needs at lower cost to reporters. The bank also suggested that the CFPB should focus this rule on non-depository institutions that do not now have robust reporting requirements. The commenter also stated that institutions are already comfortable with CRA reporting and understand how regulators use such information, but noted that they did not understand how data collected pursuant to section 1071 would be used and was concerned the Bureau would use it to retaliate and micromanage lenders, as it did in the consumer lending space.

A number of lenders asked that the Bureau work collaboratively with the prudential regulators to eliminate inconsistencies and duplication with CRA data reporting. A CDFI lender asserted that successful implementation of this rule would necessitate coordination of data requirements and encouraged the Bureau to coordinate with the CRA agencies to align rules to ensure that lenders covered by CRA continue to meet credit and community development needs of small businesses, particularly those owned by women and minorities. One bank noted that duplicate and inconsistent requirements would increase the compliance burden on lenders as well as data errors, and that inconsistent data reporting would require more resources without adding value. A bank stated that inconsistent definitions could cause community stakeholders to misinterpret data and draw incorrect conclusions regarding a lender's performance.

One bank supported a more streamlined approach taking advantage of existing CRA processes and definitions to reduce costs and burdens related to this rule, which in turn would ease burdens on lenders and reduce costs that would ultimately be passed on to the borrower. Another commenter suggested that the Bureau work closely with the agencies working on the modernization of CRA rules to reduce duplication and the friction caused by differences between the rules.

A number of commenters identified specific areas of inconsistency between the CRA and this rule. Several banks and a trade association noted that the small business definition proposed in the NPRM, businesses with gross annual revenue greater than $5 million, was inconsistent with the CRA definition, which included an asset threshold and originated loans less than $1 million. One bank stated that this discrepancy was likely to cause staff confusion and possible data integrity issues. A trade association requested that the Bureau adopt the CRA's small business definition using a loan size of $1 million

and other Federal laws to create alignment for those lenders that already comply with existing regulations, and that a focus on businesses with $1 million in revenues would support the Bureau's goal of promoting small business lending in underserved areas to underserved small businesses, that are more likely to be closer to $1 million rather than $5 million in revenue. Two banks stated that banks may receive more CRA credit for small business loans originated to businesses with $1 million or less in gross annual revenues.

Several commenters noted that the rule proposed a waterfall approach to using addresses to determine census tract, while CRA regulations inquire only about where loan funds are used. One bank commented that this meant that a single loan could result in the reporting of different census tracts for purposes of the two rules. Another bank suggested that a better way to achieve consistency with CRA was to allow lenders reporting under this rule to choose which of the three addresses to use and require the institution to report which address type it used.

Some industry commenters noted that the Bureau reduce its gross annual revenue threshold for its small business definition under this rule from $5 million to $1 million to align with CRA. A trade association noted that the $1 million threshold would align with the threshold for FFIEC Call Reports and for existing Regulation B, which requires tracking of loans to businesses with $1 million or less in revenue for purposes of sending adverse action notices under § 1002.9(a)(3). The commenter also stated that using this threshold would also mean that other data from this rule could be compared with CRA data, leading to a better evaluation of a bank's small business lending performance.

One bank stated that a discrepancy between this rule and CRA on the revenue threshold could lead to errors, given the many manual processes still used. Another bank asserted that a $5 million threshold would capture applications from businesses it did not consider small.

Several trade associations claimed that the proposed rule did not treat renewals and extensions the way CRA regulations do.

SBA. Several commenters stated that SBA-reportable loans should be exempt from the rule, including loans under the SBA 7(a) and 504 programs. One commenter stated that the Bureau should work with SBA to select reportable data elements and then obtain them from the SBA on loans and application denials to ease the reporting burden of SBA lenders, and that the majority of applications are already captured by third-party lending partners in the 504 program.

One bank stated that the Bureau's proposed small business definition is too broad and may capture entities that are not true small businesses. The commenter originated many multi-family loans to entities formed for the sole purpose of investing in real estate, not to run a small business, and asserted that the proposed definition would capture entities not consistent with SBA's definition of small business based on number of employees by industry and would be consistent with the spirit of section 1071, and that this would skew data.

FinCEN. One bank stated that data reported under this rule would be better provided through other means, such as FinCEN's recent business database and registry.

CDFI Fund. Some commenters, including a number of community-oriented lenders and community groups, stated that the Bureau should work with the CDFI Fund to streamline integrating the data from this rule with that of the CDFI Fund. Several commenters stated that new requirements from the CDFI Fund will likely expand transaction level reporting requirements to all certified CDFIs. One CDFI lender noted that the CDFI Fund's review and improvement to its current annual reporting process could create an opportunity to harmonize its definition, types of data collection, and timing of reporting with the Bureau. Another CDFI lender stated that the Bureau should work with the CDFI Fund to ensure that reporting requirements are aligned; CDFIs are currently required by Federal law to collect, maintain, and report specific demographic data about small businesses and consumers to ensure they serve their target communities. Several others stated that the Bureau should work with the CDFI Fund and loan software providers to streamline the process of integrating new data collection processes into existing systems. Some commenters noted that certain CDFIs must report data points such as interest rate, origination, points and fees, amortization type, loan term, and payment dates to the CDFI Fund. Several also pointed out that some CDFIs also report on loans to the SBA, to Federal prudential banking regulators pursuant to the CRA, and to a non-profit's annual member survey.

One lender stated that CDFIs have long sought guidance from the Bureau on compliance with overlapping statutory requirements from the CDFI Fund, ECOA, and Regulation B, and recommended that the Bureau use this rulemaking process to clarify data collection requirements in coordination with the CDFI Fund to avoid potential conflicts.

Several commenters said that some CDFIs will have to adjust processes and systems to comply with this rule, that the CDFI industry uses several different loan software products, and providers continually modify systems to comply with the CDFI Fund's reporting requirements.

One commenter stated that the Bureau should collect credit score, as CDFI Fund does, because it permits an ''apples-to-apples'' comparison of loans to help determine if small businesses that have historically struggled to access responsible loans receive credit on identical terms as white-owned businesses. The commenter also said that the burden to collect this would be minimal, as many CDFIs already report it to the CDFI Fund.

Farm Credit. An agricultural lender stated that a lack of understanding of the Farm Credit System by the Bureau would have unintended and detrimental consequences for those lenders' customers. The lender noted that these lenders institutions already report lending on Young, Beginning and Small lending efforts and volume (12 CFR 614.4165) to the Farm Credit Administration.

Agency cooperation. One bank suggested that the Bureau work with SBA to create more women-owned and minority-owned business programs, such as diversity loan programs to help the underserved, noting that the Dodd-Frank Act was passed as a reaction to the practices of larger lenders but would affect smaller lenders disproportionately.

A State financial regulator requested that the Bureau work with State regulators to provide them data. The commenter noted that the NPRM proposed modifications or deletions to protect privacy interests but was silent on whether the Bureau would share unredacted data with State regulators, and urged the Bureau to include in the final rule express language permitting the Bureau to share data collected under this rule with State regulators in accordance with information sharing agreements. The commenter noted that such data will help State regulators identify fair lending violations and enforce anti-discrimination laws.

Responses to Comments Received

General comments on overlap. The CFPB acknowledges the general comments concerning the overlap between this rule and other data

collection regimes, and general requests that the Bureau harmonize this rule with other similar data reporting regulations. The CFPB recognizes the overlap with other rules and in this final rule has made attempts to minimize the challenges, complexity, and duplication of effort, as well as potential errors in the data. In some instances, duplicate reporting will be eliminated—this rule will not require the reporting of any HMDA-reportable applications, and proposed amendments to CRA regulations would eliminate reporting on small business and small farm reporting to be replaced exclusively by data from this rule. In addition, the CFPB attempted wherever possible (*i.e.,* consistent with its statutory authorities under this rule) to borrow concepts or structures from other rules, such as FinCEN's customer due diligence rule. The CFPB also intends to continue to coordinate with other agencies to further harmonize this final rule with other similar regulations.

Regarding the requests that the Bureau not require financial institutions that already report data to duplicate their work, or that the Bureau exempt all loan applications under Federal agency programs, the CFPB has made certain adjustments in the final rule. As noted above, duplicate reporting will be eliminated for HMDA-reportable loans and, pursuant to proposed amendments to CRA regulations, under the CRA. However, other data reporting regulations have purposes sufficiently different from those of this rule such that the regulations are not completely overlapping, and that the simple elimination of one of the two reporting requirements would not advance both regulations. For instance, data reported via FFIEC Call Reports are not motivated only by considerations of fair lending and community development. In addition, such other reporting requirements address only originations, while section 1071 requires reporting on applications.

Regarding the comment that the Bureau should first use existing small business lending data generated by the government and private sector before collecting additional data, Congress disagreed when it passed section 1071 calling for data on small business lending applications. Existing data capture only limited application-level data on lending to small businesses by depository institutions, and hardly any application-level data on lending to small businesses by non-depository institutions.

Regarding requests that the CFPB work out inconsistencies between this rule and other data collection regimes, and that the Bureau standardize data formats to match those used in other data reporting, especially for CDFIs, the CFPB has attempted to do so in this final rule where consistent with section 1071's statutory purposes. In addition, the CFPB intends to work with agencies and other sources of small business lending data to explore other possible avenues for additional standardization.

HMDA. Regarding the identification of overlap between this rule and HMDA/Regulation C, and the requests to avoid duplicative reporting, the CFPB is exempting HMDA-reportable transactions from the requirements of this rule. This new provision would have the effect of eliminating inconsistencies between the two rules, the duplication of data collection and reporting, and potential data errors. However, the Bureau is not adopting a more narrowly tailored exclusion that would not apply to HMDA-reportable loans by financial institutions that are not HMDA reporters. For the reasons set out in the section-by-section analysis of § 1002.104(b)(2), the CFPB has determined that trying to close all potential data gaps would defeat the purpose of trying to alleviate concerns from commenters about having to implement and maintain two separate reporting systems. The CFPB's decision to exempt HMDA-reportable transactions also renders moot comments concerning inconsistencies between specific data points in Regulation C and those proposed for this rule, along with the firewall requirement.

Community Reinvestment Act. Regarding the comments identifying the similarities between the data required by this rule and the requirements of the CRA, and the request that the data of this rule replace the data for the CRA, the CFPB notes that, as stated in part II.F.2.i above, the CRA agencies have issued a proposed rule that, amongst other things, would exclusively rely on 1071 data for its assessment of the small business and small farm lending activities of banks, replacing the existing CRA data requirements based on Call Reports and other sources. The CFPB believes that when the final rule amending the CRA requirements is issued, duplication between the CRA and this rule will be eliminated, as requested by numerous commenters, including industry and community groups. As some community groups suggested, the CRA proposal contemplates using 1071 data for CRA examinations in the manner that HMDA data are currently used in CRA examinations. The CFPB agrees with these commenters that 1071 data would be more robust than the data currently collected under existing CRA rules.

Regarding the various request that the Bureau work with other Federal regulators to eliminate duplication, the CFPB observes that the CRA agencies appear to intend with their proposed rule to eliminate duplicative reporting by both relying on the Bureau's small business lending data and eliminating any independent data collection requirement. The CFPB intends to continue cooperating with the CRA agencies to ensure coordination between this rule and amendments to the CRA regulations, especially those concerning potentially duplicative reporting.

Regarding the comments that the Bureau should exempt lenders that report under the CRA, the CFPB does not believe such an exemption would be appropriate. In addition, in light of the CRA's proposal to use data collected and reported pursuant to section 1071, the result of such an exemption might be that no small business lending data would be collected for such institutions.

Regarding the comments that identified specific inconsistencies between the CRA and this rule, the CFPB does not disagree that the inconsistencies identified exist but notes that the CRA's proposal that the CRA agencies rely exclusively on 1071 data for their analysis of small business and small farm lending would render these inconsistencies moot because only 1071 data would exist. Regarding the comment that the Bureau should reduce its gross annual revenue threshold for its small business definition under this rule from $5 million to $1 million to align with FFIEC Call Reports and for Regulation B, the CFPB is not doing so for the reasons set out in the section-by-section analysis of § 1002.106(b). The CFPB believes that a small business definition with a lower threshold would not further the statutory purposes of the rule because it would reduce the amount of data collected concerning lending to many businesses that, according to other metrics would still be considered small though above $1 million in revenue. In addition, the Bureau believes that analyses seeking to match or compare data from this rule that are interoperable with small business lending data from FFIEC need only screen this rule's data for gross annual revenue of less than $1 million, which this rule requires as a data point. For instance, the CRA NPRM proposes screening the 1071 data for loans to small businesses and small farms under $1 million revenue for purposes of certain parts of CRA examinations.

SBA. The CFPB is not exempting SBA-guaranteed loans from reporting

under this rule. For its 7(a) and 504 programs, the SBA only collects and publishes a subset of the data required by this rule for originations. Still, the CFPB intends to coordinate with SBA to try to reduce duplicative reporting.

FinCEN. Regarding the comment that the data reported under this rule would be better provided through other means, such as via FinCEN's recent business database and registry, the CFPB understands that database is not set up to receive small business lending data.

CDFI Fund. Regarding comments that the Bureau should work with the CDFI Fund to harmonize reporting under the CDFI Fund's Transaction Level Report requirements with this rule, the CFPB agrees to coordinate with the CDFI Fund to determine where it is possible to avoid duplicative or inconsistent reporting of data and how to resolve any overlapping statutory requirements. The CFPB observes that it may not be possible to simply eliminate duplicate reporting, as with HMDA or CRA reporting, given the differences in purposes and the requirements of the CDFI Fund compared to those of this rule. Regarding comments that the Bureau should work with loan software providers, the CFPB agrees and intends to meet with software providers as it develops the small business lending data submission platform to determine how reporting can be streamlined for CDFIs that must report small business lending data to various agencies, such as the CFPB under this rule, the SBA, and the CDFI Fund.

Regarding the comment that the Bureau should collect credit score, as CDFI Fund does, the CFPB notes that, as stated in the section-by-section analysis of § 1002.107(a), the CFPB believes that this data point—which the CFPB would also have to collect from other financial institutions that may have operations quite different from CDFIs—could be quite complicated and involve complex sub-fields, which could pose operational difficulties for financial institutions in collecting and reporting this information.

Farm Credit. Regarding the comments that the Bureau's lack of understanding of the Farm Credit System would have unintended and detrimental consequences for FCS customers, and that the FCS lenders already report data to the Farm Credit Administration, the CFPB has consulted with FCS lenders, and believes that its approach will result in consistency across the data collected under this rule, more robust fair lending analyses and transparency into opportunities for small farms, and a more even playing field for compliance across all financial institutions.

Agency cooperation. Regarding the comment that the Bureau work with SBA to create more women-owned and minority-owned business programs, the CFPB regularly engages with other Federal regulators on a range of work that implicates its statutory mission; that includes, as appropriate, the SBA. Regarding the request that the Bureau provide small business lending data to State regulators, the CFPB agrees that doing so would likely be consistent with the statutory purposes of the rule. The CFPB will engage with State and Federal regulators regarding their access to small business lending data collected under this final rule, while ensuring that data security and data privacy are appropriately protected.

E. Cross-Cutting Interpretive Issues

1. The Bureau's Approach to Non-Small Women-Owned and Minority-Owned Businesses in This Rulemaking

ECOA section 704B(b) states that ''in the case of any application to a financial institution for credit for [a] women-owned, minority-owned, or small business,'' the financial institution must ''inquire whether the business is a women-owned, minority-owned or small business. . . .'' As explained below, the Bureau proposed to require financial institutions to collect and report data regarding applications for credit for small businesses; the Bureau did not, however, propose to require financial institutions to collect and report data with respect to applicants that are *not* small businesses.

The Bureau believed that section 1071 was ambiguous with respect to its coverage of applications for credit for non-small women- or minority-owned businesses, and the Bureau therefore proposed to interpret this ambiguity pursuant to ECOA section 704B(g)(1). The Bureau acknowledged that the plain language of 704B(b) could be read to require financial institutions to collect information from all women-owned and minority-owned businesses, including those that are not small businesses. But based on a close consideration of the text, structure, and purpose of the statute, and the interactions between section 1071 and other provisions of ECOA and Regulation B, the Bureau believed that the statute's coverage of, and Congress's intent with respect to, data regarding non-small businesses was ambiguous. The Bureau proposed this approach as an interpretation of the statute pursuant to its authority under 704B(g)(1), and, in the alternative, pursuant to both its authority under 704B(g)(2) to adopt exceptions to any requirement of section 1071 as the Bureau deems necessary or appropriate to carry out the purposes of section 1071 and its implied *de minimis* authority.

The Bureau sought comment on its proposed approach to limiting the scope of data collection pursuant to subpart B to covered applications for small businesses, but not women- or minority-owned businesses that are not small.

Several commenters, including industry and community groups, supported limiting the scope of data collection as the Bureau proposed. In particular, a cross-sector group of lenders, community groups, and small business advocates stated that the Bureau had taken a reasonable and adequately comprehensive approach in proposing to include only minority- and women-owned businesses that are ''small,'' as this would cover 99.9 percent of all minority- and women-owned businesses. The group further noted that the Bureau should continue to monitor the U.S. Census Bureau's Annual Business Survey and adjust this requirement if minority- or women-owned businesses that are not considered ''small'' exceed 1 percent. In contrast, a State financial regulator commented that data collection on non-small women- or minority-owned businesses was important for fair lending enforcement purposes and would provide for better consistency with States pursuing similar information collection requirements. In response to the latter comment, the Bureau notes that such data collection would be of limited utility in light of section 1071's statutory purposes because, as discussed below, the lack of a control group (*i.e.,* data on non-small businesses that are neither women-owned nor minority-owned) would limit such data's utility for fair lending enforcement purposes. For the reasons set forth herein, the Bureau is finalizing the approach to non-small women-owned and minority-owned businesses as proposed.

The Bureau interprets ECOA section 704B(b) and (b)(1) to require that financial institutions first determine whether an applicant is a small business within the scope of the rule's data collection before making the required inquiries that would otherwise be prohibited by existing Regulation B. There is a general prohibition in existing Regulation B (in § 1002.5(b)) which states that a ''creditor shall not *inquire* about the race, color, religion, national origin, or sex of an applicant or any other person in connection with a credit transaction, except if expressly permitted to do so by law or regulation.

In the introductory language to ECOA section 704B(b), Congress instructed that section 1071's data collection regime applies only ''*in the case of* any application to a financial institution for credit for women-owned, minority-owned, or small business'' (emphasis added). The Bureau believes that ''in the case of'' indicates Congress's intent to limit application of section 1071 to these types of businesses, rather than requiring financial institutions to make 1071-related inquiries of all business applicants for credit.[290] The next paragraph (704B(b)(1)) does not use the conditional phrase ''in the case of'' used in 704B(b); rather, it instructs a financial institution to ''inquire.'' The Bureau believes that the instruction to ''inquire'' in 704B(b)(1) is intended to provide the necessary exception to Regulation B's general prohibition against ''inquir[ing]'' as to protected demographic information in connection with a credit transaction.[291] Indeed, absent section 1071's lifting of the prohibition, generally, a financial institution could not determine, or even ask about, an applicant's women- or minority-owned business status, because doing so would necessarily constitute ''inquir[ing] about the race, color, religion, national origin, or sex of an applicant'' in violation of existing § 1002.5(b). The Bureau believes that Congress likely intended to ensure that financial institutions could determine whether section 1071's data collection and reporting requirements apply to an applicant without risking a violation of other provisions of ECOA and Regulation B.

However, unlike with women- and minority-owned business status, there is no legal impediment to a financial institution determining whether an applicant is a small business, and financial institutions can make that determination as a threshold matter without risking running afoul of ECOA and Regulation B. Therefore, the Bureau believes that the scope of the introductory ''in the case of'' language in ECOA section 704(b) is ambiguous as to coverage of non-small women- and minority-owned businesses. To resolve this ambiguity, the Bureau applies its expertise to interpreting the language and structure of section 1071 within the context of the general prohibition on inquiring into protected demographic information in existing § 1002.5(b), and concludes that ECOA section 704B(b)(1) is best read as only referring to questions about applicants' protected demographic information (*i.e.,* women- and minority-owned business status as well as the ethnicity, race, and sex of the principal owners of the business). The Bureau believes 704B(b)'s more general ''in the case of'' language should be understood to indicate the conditions under which data collection should take place, and requires financial institutions to make a threshold determination that an applicant is a small business before proceeding with an inquiry into the applicant's protected demographic information.

A requirement to collect and report data on applications for women-owned and minority-owned businesses that are not small businesses could affect all aspects of financial institutions' commercial lending operations while resulting in limited information beyond what would already be collected and reported about women-owned and minority-owned small businesses. Indeed, as a cross-sector group of lenders, community groups, and small business advocates highlighted, approximately 99.9 percent of women- and minority-owned business are small.[292] In addition, financing for large businesses can be much more varied and complex than are the products used for small business lending The Bureau will continue to observe the market on this issue.

The Bureau also notes that the collection of data on applications for non-small women- or minority-owned businesses would not carry out either of section 1071's statutory purposes because the data would be of only limited usefulness for conducting the relevant analyses of non-small businesses. Such analyses would necessitate comparing data regarding non-small women-owned and minority-owned business applicants to data regarding non-small non-women-owned and non-minority-owned business applicants, in order to control for lending outcomes that result from differences in applicant size. But section 1071 does not require or otherwise address the collection of data for non-small business applicants that are not women- or minority-owned. Therefore, the resulting dataset will lack a control group, arguably the most meaningful comparator for any data on non-small women- or minority-owned businesses. It is unlikely that Congress intended, and the statute is reasonably read not to require, the collection of data that would be of limited utility.[293]

Finally, the Bureau notes that the title of section 1071 is ''Small Business Data Collection,'' and section 1071 amends ECOA to add a new section titled ''Small Business Loan Data Collection.'' In the presence of ambiguity, these titles provide some additional evidence that Congress did not intend the statute to authorize the collection of data on businesses that are not small.[294]

For these reasons, the Bureau interprets ECOA section 704B(b) to cover the collection only of data with respect to small businesses, including those that are women- and minority-owned. Likewise, as discussed immediately below in E.2 of this *Overview* to part V, the Bureau is clarifying that the 704B(b)(1) inquiry, when applicable, pertains to an applicant's minority-owned business status and women-owned business status, as well as an applicant's LGBTQI+-owned business status, along with the ethnicity, race, and sex of its principal owners. For the same reasons, the Bureau believes that not requiring the collection of data with respect to applications for non-small businesses would be necessary or appropriate to carry out the purposes of section 1071; in the alternative, the Bureau exercises its exception authority in 704B(g)(2) to effectuate this outcome. Finally, because

[290] Merriam-Webster defines ''case'' as meaning ''a set of circumstances or conditions,'' ''a situation requiring investigation or action (as by the police),'' or ''the object of investigation or consideration,'' *https://www.merriam-webster.com/dictionary/case* (last visited Mar. 20, 2023).

[291] As discussed in greater detail in the next section, the fact that the language of ECOA section 704B(b)(1) is designed to expressly permit inquiry into protected demographic information, which would otherwise be prohibited by existing § 1002.5(b), is also evidenced by the statute's three provisions creating special protections for responses to the inquiry: 704B(b)(2) requires that responses to inquiries about protected demographic information remain separate from the application and accompanying information; 704B(c) requires that applicants have a right to refuse to answer the inquiry about protected demographic information; and 704B(d) requires that certain underwriters or other employees involved in making determinations on an application not have access to the responses to inquiries about protected demographic information.

[292] In the U.S. Census Bureau's 2018 Annual Business Survey, 5.7 million firms (99.6 percent of all employer firms) are small, as defined within that survey as having fewer than 500 employees. That same definition covers one million minority-owned employer firms (99.9 percent of all minority-owned firms) and 1.1 million women-owned employer firms (99.9 percent of all women-owned firms). *See* U.S. Census Bureau, *2018 Annual Business Survey (ABS)—Company Summary* (2018), *https://www.census.gov/data/tables/2018/econ/abs/2018-abs-company-summary.html.*

[293] *See, e.g., Pub. Citizen* v. *U.S. Dep't of Just.,* 491 U.S. 440, 454 (1989) (''Where the literal reading of a statutory term would 'compel an odd result,' *Green* v. *Bock Laundry Machine Co.,* 490 U.S. 504, 509 (1989), we must search for other evidence of congressional intent to lend the term its proper scope.'').

[294] *Almendarez-Torres* v. *United States,* 523 U.S. 224, 234 (1998) (''[T]he title of a statute and the heading of a section' are 'tools available for the resolution of a doubt' about the meaning of a statute.'') (quoting *Bhd. of R.R. Trainmen* v. *Balt. & Ohio R.R.,* 331 U.S. 519, 529 (1947)).

the Bureau believes that the collection of data on non-small women- and minority-owned businesses would ''yield a gain of trivial or no value,'' in the alternative the Bureau exercises its implied *de minimis* authority to create this exception.[295]

2. The Meaning of ''Information Requested Pursuant to Subsection (b)''

Four different provisions of section 1071 refer to or rely on ''information requested pursuant to subsection (b)'' or similar language. First, ECOA section 704B(b)(2) provides that financial institutions must ''maintain a record of the responses to such inquiry'' and keep those records separate from the application and information that accompanies it. Second, 704B(c) states that applicants for credit ''may refuse to provide any information requested pursuant to subsection (b).'' Third, 704B(d) requires financial institutions to limit the access of certain employees to ''information provided by the applicant pursuant to a request under subsection (b),'' with certain exceptions. Fourth, 704B(e) instructs financial institutions that ''information provided by any loan applicant pursuant to a request under subsection (b) . . . shall be itemized in order to clearly and conspicuously disclose'' data including the loan type and purpose, amount of credit applied for and approved, and gross annual revenue.

In light of these four disparate provisions, the Bureau believes that section 1071 is ambiguous with respect to the meaning of ''any information provided by the applicant pursuant to a request under subsection (b).''[296] On the one hand, ECOA section 704B(b)(1) directs financial institutions to inquire whether a business is ''a women-owned, minority-owned, or small business,'' so the phrase could be interpreted as referring only to those three data points. Section 704B(e), however, indicates that the scope of 704B(b) could be much broader; it suggests that all of the information that financial institutions are required to compile and maintain—not simply an applicant's status as a women-owned, minority-owned, or small business—constitutes information provided by an applicant ''pursuant to a request under subsection (b).'' But as noted above, information deemed provided pursuant to subsection (b) is subject to the notable protections of separate recordkeeping under 704B(b)(2), a right to refuse under 704B(c), and the firewall under 704B(d). Applying these special protections to many of the data points in 704B(e), such as gross annual revenue or amount applied for, would be extremely difficult to implement, because this information is critical to financial institutions' ordinary operations in making credit decisions. Additionally, 704B(e) describes as ''provided by any loan applicant'' under 704B(b) data points that plainly must come from the financial institution itself, such as application number and action taken, further suggesting that Congress viewed this term as encompassing more information than lies within the four corners of 704B(b)(1). Finally, as noted above, the circular structure of 704B(b) complicates the question of what constitutes information provided ''pursuant to a request under subsection (b).'' Read together, the introductory language in 704B(b) and (b)(1) direct financial institutions, ''in the case of'' a credit application ''for [1] women-owned, [2] minority-owned, or [3] small business,'' to ''inquire whether the business is a [1] women-owned, [2] minority-owned, or [3] small business.'' The Bureau believes that this circularity further demonstrates the ambiguity of the phrase ''pursuant to a request under subsection (b).''

The Bureau believes that it is reasonable to resolve these ambiguities by giving different meanings to the phrase ''any information provided by the applicant pursuant to a request under subsection (b)'' (or similar) with respect to ECOA section 704B(e) as opposed to 704B(b)(2), (c), and (d).[297] With respect to 704B(e), the Bureau interprets the phrase to refer to all the data points now articulated in proposed § 1002.107(a). Section 704B(e) is the source of financial institutions' obligation to ''compile and maintain'' data that they must then submit to the Bureau, so it would be reasonable to interpret this paragraph as referring to the complete data collection Congress devised in enacting section 1071.

But with respect to the three statutory provisions creating special protections for certain information—the firewall in ECOA section 704B(d), separate recordkeeping in 704B(b)(2), and the right to refuse in 704B(c)—the Bureau interprets the phrase to refer to the data points in § 1002.107(a)(18) (women-owned and minority-owned business statuses, along with the new LGBTQI+-owned business status), and (a)(19) (ethnicity, race, and sex of principal owners).[298] Each of these data points requests protected demographic information that has no bearing on the creditworthiness of the applicant, about which existing § 1002.5(b) would generally prohibit the financial institution from inquiring absent section 1071's mandate to collect and report that information, and with respect to which applicants are protected from discrimination. The Bureau accordingly believes that it is reasonable to apply section 1071's special-protection provisions only to this information, regardless of whether the statutory authority to collect it originates in 704B(b)(1) (women-owned and minority-owned business statuses), 704B(e)(2)(H) (LGBTQI+-owned business status), or 704B(e)(2)(G) (ethnicity, race, and sex of principal owners). The Bureau similarly believes that it would have been unreasonable for Congress to have intended that these special protections would apply to any of the other data points now proposed in § 1002.107(a), which the financial institution is permitted to request regardless of coverage under section 1071 which are not the subject of Federal antidiscrimination law, and many of which financial institutions currently use for underwriting and other purposes.

The Bureau implements these interpretations of ''information requested pursuant to subsection (b),'' and any relevant comments received, in several different section-by-section analyses. With respect to ECOA section 704B(e), the Bureau discusses its interpretation of the phrase in the section-by-section analysis of § 1002.107(a). The Bureau's interpretation of 704B(d)'s firewall requirement is addressed at greater length in the section-by-section analysis of § 1002.108, and the Bureau's interpretation of the separate recordkeeping requirement in 704B(b)(2) is addressed in the section-

[295] *Waterkeeper All.* v. *EPA,* 853 F.3d 527, 530 (D.C. Cir. 2017) (quoting *Pub. Citizen* v. *FTC,* 869 F.2d 1541, 1556 (D.C. Cir. 1989)); *see Alabama Power Co.* v. *Costle,* 636 F.2d 323, 360–61 (D.C. Cir. 1979).

[296] The Bureau does not believe that the minor linguistic variations in these four provisions themselves have significance.

[297] While there is a presumption that a phrase appearing in multiple parts of a statute has the same meaning in each, ''this is no more than a presumption. It can be rebutted by evidence that Congress intended the words to be interpreted differently in each section, or to leave a gap for the agency to fill.'' *Catskill Mountains Chapter of Trout Unlimited, Inc.* v. *EPA,* 846 F.3d 492, 532 (2d Cir. 2017) (citing *Env't Def.* v. *Duke Energy Corp.,* 549 U.S. 561, 575 (2007)). Here, the Bureau believes Congress indicated such an intention by using the same phrase in the substantially different contexts of providing special protections for protected demographic information on the one hand and ''itemiz[ing]'' all collected data on the other.

[298] The Bureau's interpretations with respect to a separate data point for small business status are discussed in the next section.

by-section analysis of § 1002.111(b). The right to refuse in 704B(c) is discussed in the section-by-section analyses of the data points that the Bureau deems subject to the right to refuse: § 1002.107(a)(18) (women-owned, minority-owned, and LGBTQI+-owned business statuses) and (19) (ethnicity, race, and sex of principal owners).

3. No Collection of Small Business Status as a Data Point

The Bureau notes that neither of its interpretations of ''information requested pursuant to subsection (b)'' reference a specific data point for an applicant's status as a small business, nor did the Bureau otherwise include in proposed § 1002.107(a) that financial institutions collect, maintain, or submit a data point whose sole function is to state whether the applicant is or is not a small business.

The Bureau's definition of small business in final § 1002.106, which is based on an applicant's gross annual revenue, renders redundant any requirement that financial institutions collect a standalone data point whose sole purpose is to state whether an applicant is a small business. Indeed, under the definition of small business, when a financial institution asks an applicant its gross annual revenue, that question is functionally identical to asking, ''are you a small business?'' The Bureau believes that it is a reasonable interpretation of ECOA section 704B(b)'s query as to small business status for that question to take the form of, ''what is your gross annual revenue?'' [299] Furthermore, as discussed above with respect to the Bureau's approach to non-small women- and minority-owned businesses, the Bureau interprets financial institutions' data collection obligations as attaching only in the case of applications from small businesses; if a financial institution determines that an applicant is not a small business, none of the obligations under this rule would apply. As such, a standalone data point that serves only to designate whether a business qualifies as small for purposes of the rule would be redundant with the mere fact that the data collection occurs at all, as well as with the collection of gross annual revenue.

The Bureau sought comment on whether a standalone data point solely dedicated to small business status might nonetheless be useful and, if so, how it might be implemented. The Bureau received no comments on this issue.

The Bureau acknowledges that the plain language of ECOA section 704B(b) could be read to require financial institutions to ask applicants subject to the data collection the precise question, ''are you a small business?'' Upon further analysis, however, the Bureau believes that Congress's intended treatment of small business status as a standalone data point is ambiguous. As described in more detail above with respect to the rulemaking's coverage of women- and minority-owned businesses that are not small, 704B(b)'s introductory language and 704B(b)(1) appear to require financial institutions to know the answer to whether an applicant is women-owned, minority-owned, or small before they make their inquiry; to resolve this ambiguity, the Bureau interprets 704B(b)'s introductory language and 704B(b)(1) to require that financial institutions first straightforwardly assess whether an applicant is a small business before proceeding to inquire into the applicant's protected demographic information that would otherwise be prohibited by existing § 1002.5(b).

Pursuant to its authority under ECOA section 704B(g)(1) to prescribe such rules as may be necessary to carry out, enforce, and compile data pursuant to section 1071, the Bureau interprets 704B(b) and (b)(1) to obviate the need for financial institutions to collect a standalone data point whose sole purpose is to note an applicant's small business status. For the same reasons, the Bureau believes that not requiring the collection of a separate data point on small business status would be necessary or appropriate to carry out the purposes of section 1071; therefore, in the alternative, the Bureau is exercising its exception authority in 704B(g)(2) to effectuate this outcome. Finally, because the Bureau believes that the collection of a standalone data point on small business status would ''yield a gain of trivial or no value,'' in the alternative, the Bureau exercises its implied *de minimis* authority to create this exception.[300]

F. Conforming Amendments to Existing Regulation B

As discussed above, the Bureau is implementing section 1071 in a new subpart B of Regulation B. The content of existing Regulation B is becoming subpart A of Regulation B. This change does not affect the current section numbering in Regulation B. The Bureau believes it is appropriate to make this rule a part of Regulation B, as section 1071 is a part of ECOA.

The Bureau sought comment on whether it should instead codify its rule to implement section 1071 as a free-standing regulation with its own CFR part and, if so, why. A bank commenter supported the location of this rule within a new subpart B to Regulation B, noting that lenders often overlook that Regulation B applies to business as well as consumer credit. The commenter also noted that the intent of section 1071, to provide all credit applicants fair and equitable treatment and credit, makes Regulation B the natural place for this rule, rather than a free-standing regulation, which would generate unnecessary confusion.

As noted above and as discussed in more detail below, the Bureau is amending existing § 1002.5(a)(4) and commentary for existing § 1002.5(a)(2) and (4) to expressly permit under certain circumstances voluntary collection of minority-owned, women-owned, and LGBTQI+-owned business status, and the ethnicity, race, and sex of applicants' principal owners in accordance with the requirements of subpart B.

In addition, the Bureau is revising certain references to the entire regulation (which use the terms ''regulation'' or ''part'') in existing Regulation B to instead refer specifically to subpart A. The Bureau is likewise adding additional specificity in certain provisions in existing Regulation B to avoid confusion. The Bureau does not intend to make any substantive changes with these revisions, but rather intends to maintain the status quo. The Bureau is making the following changes:

In § 1002.1(a), regarding authority and scope, the Bureau is changing two references to ''part'' to instead refer to ''subpart,'' regarding the application of what is now subpart A to creditors.

In § 1002.2, regarding definitions, the introductory text states that definitions contained therein apply to Regulation B, unless the context indicates otherwise. The Bureau is adding ''or as otherwise defined in subpart B'' for clarity.

In § 1002.12(b)(1) introductory text, (b)(2) introductory text, (b)(3) through (5) and (7), regarding record retention, the Bureau is adding ''or as otherwise provided in subpart B'' to indicate that subpart B may provide different record retention requirements than what is set forth in those paragraphs for business credit. The Bureau is also changing a reference to ''this rule'' in comment

[299] The financial institution could ask, in order to make an initial determination as to whether the rule applies, whether the applicant's gross annual revenue in its last full fiscal year was $5 million or less. If it was, the financial institution would need to request the specific revenue amount to comply with final § 1002.107(a)(14), along with the other applicant-provided data points specified in final § 1002.107(a).

[300] *Waterkeeper All.,* 853 F.3d at 530 (quoting *Pub. Citizen,* 869 F.2d at 1556); *see Alabama Power,* 636 F.2d at 360–61.

12(b)(7)–1 to instead refer to existing § 1002.12(b)(7) regarding retention of prescreened credit solicitations, to avoid confusion with subpart B's treatment of solicitations.

Finally, § 1002.13 addresses information for monitoring purposes for credit secured by an applicant's dwelling. The Bureau is revising comment 13(b)–5, which addresses applications made through unaffiliated loan shopping services, to refer to subpart A of Regulation B instead of the entirety of Regulation B, for clarity. The existing comment also refers to applications received by creditors subject to HMDA and associated data collection requirements; the Bureau is also adding to the end of the comment an additional sentence noting that creditors that are covered financial institutions under subpart B of this regulation may also be required to collect, report, and maintain certain data, as set forth in subpart B of Regulation B.

Subpart A—General

Section 1002.5 Rules Concerning Requests for Information

5(a) General Rules

5(a)(4) Other Permissible Collection of Information

Background

ECOA prohibits creditors from discriminating against applicants, with respect to any aspect of a credit transaction, on the basis of—among other characteristics—race, color, religion, national origin, sex, marital status, or age.[301] It also states that making an inquiry under 15 U.S.C. 1691c–2 (that is, section 1071), in accordance with the requirements of that section, shall not constitute discrimination for purposes of ECOA.[302] Regulation B, in existing § 1002.5(b), generally prohibits a creditor from inquiring about certain protected demographic information in connection with a credit transaction. Existing § 1002.5(a)(2), however, expressly permits collection of such otherwise prohibited information if required by a regulation, order, or agreement to monitor or enforce compliance with Regulation B, ECOA, or other Federal or State law or regulation.

In 2017, the Bureau amended Regulation B, adding § 1002.5(a)(4) to expressly permit creditors to collect ethnicity, race, and sex from mortgage applicants in certain cases where the creditor is not required to report under HMDA and Regulation C.[303] For example, existing § 1002.5(a)(4) expressly permits the collection of ethnicity, race, and sex information for certain transactions for which Regulation C permits optional reporting. However, nothing in existing Regulation B (or in ECOA) expressly permits collection and reporting of protected demographic data for financial institutions that are not required to report certain data under section 1071.

During the SBREFA process, some small entity representatives, primarily small CDFIs and mission-oriented community banks, stated that they would be inclined to collect and report small business lending data to the Bureau even if not required to do so, such as if they fell under loan-volume thresholds. These small entity representatives expressed an intent to report data even if not required to out of a belief in the importance and utility of these data.

Proposed Rule

The Bureau proposed to amend existing § 1002.5(a)(4) to add three provisions (in proposed § 1002.5(a)(4)(vii), (viii), and (ix)) that would permit certain creditors that are not covered financial institutions under the rule to collect small business applicants' protected demographic information under certain circumstances. The Bureau also proposed to add comment 5(a)(2)–4 and to revise existing comment 5(a)(4)–1 to provide guidance on these proposed exemptions.

Proposed § 1002.5(a)(4)(vii) would have permitted a previously covered financial institution to collect demographic information pursuant to subpart B for covered applications for up to five years after it fell below the loan-volume threshold of proposed § 1002.105(b), provided that it does so in accordance with the relevant requirements of proposed subpart B.

Proposed § 1002.5(a)(4)(viii) would have provided that a creditor in its first year of exceeding the covered financial institution loan-threshold in § 1002.105(b) may, in the second year collect demographic information pursuant to subpart B for covered applications, provided that it does so in accordance with the relevant requirements of proposed subpart B.

Proposed § 1002.5(a)(4)(ix) would have permitted a financial institution not covered by the rule that wishes to voluntarily report small business lending data to collect applicants' protected demographic information without violating Regulation B. Unlike creditors subject to proposed § 1002.5(a)(4)(vii) or (viii), a creditor seeking to voluntarily collect applicant's protected demographic information under proposed § 1002.5(a)(4)(ix) would also be required to report it to the Bureau.

Existing comment 5(a)(4)–1 addresses recordkeeping requirements for ethnicity, race, and sex information that is voluntarily collected for HMDA under the existing provisions of § 1002.5(a)(4). The Bureau proposed revising this comment by adding to it a parallel reference to proposed subpart B, along with a statement that the information collected pursuant to proposed subpart B must be retained pursuant to the requirements set forth in proposed § 1002.111.

Proposed comment 5(a)(2)–4 would have explained that proposed subpart B of Regulation B generally requires creditors that are covered financial institutions as defined in proposed § 1002.105(a) to collect and report information about the ethnicity, race, and sex of the principal owners of applicants for certain small business credit, as well as whether the applicant is a minority-owned business or a women-owned business as defined in proposed § 1002.102(m) and (s), respectively. The Bureau proposed this comment for parity with existing comment 5(a)(2)–2, which addresses the requirement to collect and report information about the ethnicity, race, and sex of applicants under HMDA. Existing comment 5(a)(2)–3 explains that persons such as loan brokers and correspondents do not violate ECOA or Regulation B if they collect information that they are otherwise prohibited from collecting, where the purpose of collecting the information is to provide it to a creditor that is subject to HMDA or another Federal or State statute or regulation requiring data collection.

The Bureau sought comment on its three proposed provisions to be added to existing § 1002.5(a)(4), and associated commentary, including whether there were other specific situations to add to the list of provisions in § 1002.5(a)(4) to permit the collection of applicants' protected demographic information pursuant to section 1071, and whether any similar modifications to other provisions were necessary. In particular, the Bureau sought comment on whether it should add another provision to § 1002.5(a)(4) relating to proposed § 1002.114(c)(1), wherein the Bureau proposed to permit financial institutions to collect, but would not require them

[301] 15 U.S.C. 1691(a).

[302] 15 U.S.C. 1691(b)(5).

[303] *Equal Credit Opportunity Act (Regulation B) Ethnicity and Race Information Collection,* 82 FR 45680, 45684 (Oct. 2, 2017).

to report, applicants' protected demographic information prior to the compliance date.

Comments Received

The Bureau received comments on this provision from several industry commenters, a business advocacy group, and a community group. The community group supported the reasoning and approach of the proposed provisions. The commenter inquired whether the provisions would allow for voluntary reporting of only the protected demographic data, or all data points, noting that if the Bureau intended only to permit voluntary data collection of demographic information that it would not make sense to permit publication of these data points, and that the usefulness of such incomplete data would be limited. A business advocacy group applauded the Bureau for the proposed provisions and recommended that the Bureau add incentives for voluntary disclosure of data for those financial institutions, but asked that the incentives not distort the purposes of the regulation by encouraging lenders to report inaccurate or untrue data to reap the benefits of the incentive to report.

A community group commented that the Bureau should permit voluntary collection not only by financial institutions not covered by the rule, but also should permit covered financial institutions to collect data on consumer credit used to fund small businesses.[304]

Two agricultural lenders requested that the Bureau exempt Farm Credit System (FCS) lenders entirely from coverage under the rule while also adding a provision to the proposed voluntary reporting provisions stating that FCS lenders may submit a supplemental voluntary collection of data that is not otherwise already being provided to the public.

Final Rule

For the reasons set forth herein, the Bureau is finalizing amendments to existing § 1002.5(a)(4) introductory text and three provisions (in final § 1002.5(a)(4)(vii), (viii), and (ix)) that permit certain creditors that are not covered financial institutions under the rule to collect small business applicants' protected demographic information under certain circumstances. The Bureau is also adopting new § 1002.5(a)(4)(x) to similarly address information collected about multiple co-applicants. The Bureau is finalizing comment 5(a)(2)–4 along with its revision to existing comment 5(a)(4)–1 providing guidance on these new exemptions. The Bureau is additionally revising existing comment 5(a)(2)–3, as discussed below. These provisions contain updated cross-references to other sections in the final regulatory text and commentary, as well as addition of LGBTQI+-owned business status to accompany references to women- and minority-owned business statuses.

Final § 1002.5(a)(4)(vii) provides that a creditor that was required to report small business lending data pursuant to final § 1002.109 for any of the preceding five calendar years but is not currently a covered financial institution under final § 1002.105(b) may collect protected demographic information pursuant to subpart B for covered applications from small businesses as defined in final §§ 1002.103 and 1002.106(b) if it complies with the requirements of subpart B as otherwise required for covered financial institutions pursuant to final §§ 1002.107(a)(18) and (19), 1002.108, 1002.111, and 1002.112 for those applications. Final § 1002.5(a)(4)(vii) also states that such a creditor is permitted, but not required, to report data to the Bureau collected pursuant to subpart B if it complies with the requirements of subpart B as otherwise required for covered financial institutions pursuant to §§ 1002.109 and 1002.110.

The Bureau anticipates that some creditors that are no longer covered financial institutions and thus no longer required to report data in a given reporting year may prefer to continue to collect applicants' protected demographic information in the event they become a covered financial institution again, in order to maintain consistent compliance standards from year to year. As it did in a similar context for HMDA reporting, the Bureau believes that permitting such collection for five years provides an appropriate time frame under which a financial institution should be permitted to continue collecting the information without having to change its compliance processes. The Bureau believes that a five-year period is sufficient to help an institution discern whether it is likely to have to report small business lending data in the near future but not so long as to permit it to collect such information in a period too attenuated from previous reporting.

Final § 1002.5(a)(4)(viii) provides a creditor that exceeded the loan-volume threshold in the first year of the two-year threshold period provided in final § 1002.105(b) may, in the second year, collect protected demographic information pursuant to subpart B for covered applications from small businesses as defined in final §§ 1002.103 and 1002.106(b) if it complies with the requirements of subpart B as otherwise required for covered financial institutions pursuant to final §§ 1002.107(a)(18) and (19), 1002.108, 1002.111, and 1002.112 for that application. Final § 1002.5(a)(4)(viii) also states that such a creditor is permitted, but not required, to report data to the Bureau collected pursuant to subpart B if it complies with the requirements of subpart B as otherwise required for covered financial institutions pursuant to §§ 1002.109 and 1002.110. The Bureau believes that this provision will benefit creditors when the creditor has not previously reported small business lending data but expects to be covered in the following year and wishes to prepare for that future reporting obligation. For example, where a creditor surpasses the loan-volume threshold of final § 1002.105(b) for the first time in a given calendar year, it may wish to begin collecting applicants' protected demographic information for covered applications received in the next calendar year (second calendar year) so as to ensure its compliance systems are fully functional before it is required to collect and report information pursuant to subpart B in the following calendar year (third calendar year).

Final § 1002.5(a)(4)(ix) provides that a creditor that is not currently a covered financial institution under final § 1002.105(b), and is not otherwise a creditor to which final § 1002.5(a)(4)(vii) or (viii) applies, may collect protected demographic information pursuant to subpart B for covered applications from small businesses as defined in final §§ 1002.103 and 1002.106(b) for a transaction if it complies with the requirements of subpart B as otherwise required for covered financial institutions pursuant to final §§ 1002.107 through 1002.112 for that application. Voluntarily reported data pursuant to final § 1002.5(a)(4)(ix) may add some information that otherwise would not be collected and reported, and which would further both the statutory purposes of section 1071 without requiring reporting from very low-volume financial institutions that may find it difficult or costly to report data.

The Bureau is finalizing § 1002.5(a)(4)(ix) in response to feedback from some small entity

[304] The Bureau addresses comments regarding the reporting of non-covered products in the section-by-section analysis of § 1002.104(b), under the heading *Voluntary Reporting.* While the final rule does not permit the voluntary reporting of non-covered products, the Bureau has implemented a safe harbor in § 1002.112(c)(4) for financial institutions that collect data on applications for products that turn out not to be covered credit transactions.

representatives and other stakeholders at SBREFA, as well as several NPRM commenters, that indicated lenders might want to collect and report small business lending data even if they were not required to do so.

New § 1002.5(a)(4)(x) provides that a creditor that is collecting information pursuant to subpart B or as described in §§ 1002.5(a)(4)(vii) through (ix) for covered applications from small businesses as defined in §§ 1002.103 and 1002.106(b) regarding whether an applicant for a covered credit transaction is a minority-owned business, a women-owned business, or an LGBTQI+-owned business, and the ethnicity, race, and sex of the applicant's principal owners may also collect that same information for any co-applicants provided that it also complies with the relevant requirements of subpart B of this part or as described in paragraphs (a)(4)(vii) through (ix) of this section with respect to those co-applicants.

The Bureau is adding § 1002.5(a)(4)(x) to permit creditors to collect information pursuant to subpart B regarding co-applicants for a covered application for a small business. Existing § 1002.5(a)(4) does not explicitly address whether creditors have permission to collect demographic information for co-applicants for a covered application for a small business, and the Bureau implements new § 1002.5(a)(4)(x) to remove any doubt that creditors that are permitted to collection information pursuant to subpart B on an applicant for covered applications for a small business pursuant to §§ 1002.5(a)(4)(vii) through (ix) is also permitted to collect such information for co-applicants as well, even if the financial institution will only report information regarding a single designated applicant per new comment 103(a)–10. As described below, final comment 103(a)–10 provides that if a covered financial institution receives a covered application from multiple businesses that are not affiliates, it shall compile, maintain, and report data for only a single applicant that is a small business. The Bureau believes that it may be easier and more efficient for financial institutions to request the same information of all co-applicants—new § 1002.5(a)(4)(x) will enable financial institutions to collect small business lending data from unreported co-applicants without violating ECOA and Regulation B's general prohibition against collecting protected demographic information.

The Bureau believes that it is an appropriate use of its statutory authority under sections 703(a) and 704B(g)(1) of ECOA to permit creditors to collect, and for § 1002.5(a)(4)(ix) report, protected demographic information in the manner set out in § 1002.5(a)(4)(vii) through (x). These provisions will effectuate the purposes of and facilitate compliance with ECOA and is necessary to carry out, enforce, and compile data pursuant to section 1071. Section 1002.5(a)(4)(vii) will permit creditors to collect information without interruption from year to year, thereby facilitating compliance with the rule's data collection requirements and improving the quality and reliability of the data collected. Section 1002.5(a)(4)(viii) improves the quality and reliability of the data collected by financial institutions that may be transitioning into being required to collect and report 1071 data, and will provide a creditor assurance of compliance with existing § 1002.5 regardless of whether it actually becomes subject to subpart B reporting at the end of the two-year threshold period. Section 1002.5(a)(4)(ix) will potentially increase the collection of additional information and amount of data available for analysis, thereby advancing the purposes of section 1071. Finally, § 1002.5(a)(4)(x) will permit collection of demographic information for co-applicants, thereby reducing operational complexity to allow creditors to focus on data quality and reliability. The Bureau also believes that these provisions are narrowly tailored and preserves and respects the general limitations in existing § 1002.5(b) through (d).

The Bureau is also revising existing comment 5(a)(2)–3, which explains that persons such as loan brokers and correspondents do not violate ECOA or Regulation B if they collect information that they are otherwise prohibited from collecting, where the purpose of collecting the information is to provide it to a creditor that is subject to HMDA or another Federal or State statute or regulation requiring data collection. The Bureau stated its belief in the NPRM that the reference to ''another Federal statute or regulation'' adequately encompassed section 1071 and subpart B, and thus did not propose to amend this existing comment. However, upon further reflection, the Bureau has determined to revise the provision specifically to reference subpart B for the sake of further clarity and the avoidance of doubt that loan brokers and other persons collecting applicants' protected demographic information on behalf of covered financial institutions pursuant to this final rule are not violating ECOA or Regulation B by doing so. The Bureau believes that it is an appropriate use of its general authority under ECOA sections 703(a) and 704B(g)(1) to permit such persons to collect protected demographic information on behalf of covered financial institutions, as such collection will effectuate the purposes of and facilitate compliance with ECOA and is necessary to carry out, enforce, and compile data pursuant to section 1071.

The Bureau is finalizing comment 5(a)(2)–4, which defines the phrase ''information required by subpart B,'' with revisions to add cross-references to LGBTQI+-owned businesses, as defined in § 1002.102(*l*). Final comment 5(a)(2)–4 addresses the requirement under this final rule that creditors that are covered financial institutions as defined in § 1002.105(a) collect and report information about the ethnicity, race, and sex of the principal owners of applicants for certain small business credit, as well as whether the applicant is a minority-owned business, a women-owned business, or an LGBTQI+-owned business, as defined in § 1002.102(m), (s), and (*l*), respectively. The Bureau is finalizing this comment for parity with existing comment 5(a)(2)–2, which addresses the requirement to collect and report information about the ethnicity, race, and sex of applicants under HMDA. The Bureau believes that it is an appropriate use of its general authority under ECOA sections 703(a) and 704B(g)(1) to specify the meaning of ''information required by subpart B,'' by adding comment 5(a)(2)–4 and that the clarity and certainty this provision adds will effectuate the purposes of and facilitates compliance with ECOA and is necessary to carry out, enforce, and compile data pursuant to section 1071.

Finally, the Bureau is finalizing its revisions to existing comment 5(a)(4)–1 as proposed. The existing comment establishes recordkeeping requirements for ethnicity, race, and sex information that is voluntarily collected for HMDA under the existing provisions of § 1002.5(a)(4). The revisions to comment 5(a)(4)–1 likewise provide that protected demographic information that is not required to be collected pursuant to subpart B may nevertheless be collected under the circumstances set forth in § 1002.5(a)(4) without violating existing § 1002.5(b), and that the information collected pursuant to this final rule must be retained pursuant to the requirements set forth in final § 1002.111. The Bureau is revising this comment to provide for parity between this final rule and existing references to voluntary collection of data pursuant to HMDA. The Bureau believes that these

revisions are an appropriate use of its general authority under ECOA sections 703(a) and 704B(g)(1) as these revisions provide clarity and certainty to financial institutions in their voluntary collection of applicants' protected demographic information. Such clarity and certainty effectuate the purposes of and facilitates compliance with ECOA and these revisions are necessary to carry out, enforce, and compile data pursuant to section 1071.

Regarding a commenter's request to clarify whether these amendments permit voluntary reporting only as to data points concerning protected demographic data, the Bureau observes that nothing prohibits creditors from collecting any of the information set forth in final § 1002.107, other than the protected demographic information in § 1002.107(a)(18) and (19). Creditors that choose to collect protected demographic information pursuant to final § 1002.5(a)(4)(ix) must comply with § 1002.109 (along with other specified provisions), which means that they must collect and report all the required data specified in final § 1002.107.

The Bureau is not adding incentives for voluntary disclosure of data for creditors that are not covered financial institutions, as suggested by one commenter. It appears, based on SBREFA and NPRM comments, that some creditors already have an incentive to collect and report small business lending data pursuant to section 1071 even if they are not covered financial institutions under the rule; it is unclear what additional incentives the Bureau could offer to encourage other creditors to do the same. Regarding ensuring that reported data are not distorted, however, the Bureau notes that voluntary reporters must identify themselves as such pursuant to final § 1002.109(b)(10) and, a creditor voluntarily collecting and reporting data pursuant to final § 1002.5(a)(4)(ix) must do so in compliance with §§ 1002.107 through 1002.112 and 1002.114.

Regarding the comment that the visual observation and surname requirement would cause certain covered institutions to violate the prohibition in 12 CFR 202.5(b) from inquiring about the race, color, religion, national origin, or sex of an applicant or any other person in connection with a credit transaction, the Bureau notes that the concern is moot because the Bureau is not finalizing its proposed provisions for collecting principal owners' ethnicity and race via visual observation or surname in certain circumstances. (See the section-by-section analysis of § 1002.107(a)(19) for a detailed discussion of this change.) In any case, a creditor is permitted to make such inquiries under existing § 1002.5(a)(2), given that the provision permits the collection of demographic information when required to do so by another law or regulation (which includes this rule).

The Bureau addresses potential voluntary collection and reporting of data regarding non-covered products, including consumer-designated credit used for small business purposes, in the section-by-section analysis of § 1002.104(b) below. Based on its determination not to permit voluntary collection of data for such non-covered products, the Bureau is not adding an additional provision to § 1002.5(a)(4) to address such collection.

As discussed in the section-by-section analyses of §§ 1002.104(a) and 1002.105(b), the Bureau is not excluding agricultural lending or FCS lenders from coverage under this final rule. The commenter's request to permit supplemental voluntary collection and reporting of data by exempt FCS lenders if such data are not otherwise already being provided to the public is thus moot. Of course, any FCS lenders that are not covered financial institutions could nonetheless voluntarily collect and report data pursuant to final § 1002.5(a)(4)(ix).

Subpart B—Small Business Lending Data Collection

Section 1002.101 Authority, Purpose, and Scope

Proposed § 1002.101 would have set forth the authority, purpose, and scope for proposed subpart B. The Bureau sought comment on its proposed approach to this section, including whether any other information on the rule's authority, purpose, or scope should be addressed herein.

The Bureau did not receive any comments specifically regarding its recitation of the authority, purpose, and scope of subpart B. Comments addressing the authority, purpose, and scope of section 1071 and this final rule as a general matter are addressed in D.1 in the *Overview* to this part V above.

The Bureau is finalizing § 1002.101 as proposed. Final § 1002.101(a) provides that subpart B is issued by the Bureau pursuant to section 704B of ECOA (15 U.S.C. 1691c–2), and states that, except as otherwise provided therein, subpart B applies to covered financial institutions, as defined in § 1002.105(b), other than a person excluded from coverage of this part by section 1029 of the Dodd-Frank Act. Final § 1002.101(b) sets out section 1071's two statutory purposes of facilitating fair lending enforcement and enabling the identification of business and community development needs and opportunities for women-owned, minority-owned, and small businesses.

Section 1002.102 Definitions

The Bureau is finalizing a number of definitions for terms used in subpart B, in § 1002.102.[305] These definitions generally fall into several categories. First, some definitions in final § 1002.102 refer to terms defined elsewhere in subpart B—specifically, the terms business, covered application, covered credit transaction, covered financial institution, financial institution, and small business are defined in final §§ 1002.106(a), 1002.103, 1002.104, 1002.105(b), 1002.105(a), and 1002.106(b), respectively. These terms are of particular importance in subpart B, and the Bureau is defining them in separate sections, rather than in § 1002.102, for ease of reading.

Second, some terms in final § 1002.102 are defined by cross-referencing the definitions of terms defined in existing Regulation B—specifically, business credit, credit, and State are defined by reference to existing § 1002.2(g), (j), and (aa), respectively. Similarly, a portion of the small business and affiliate definitions refer to the SBA's regulation at 13 CFR 121.103. These terms are each used in subpart B, and the Bureau believes it is appropriate to incorporate them into the subpart B definitions in this manner.

Finally, the remaining terms are defined directly in final § 1002.102. These include applicant, closed-end credit transaction, LGBTQI+ individual, LGBTQI+-owned business, minority-owned business, open-end credit transaction, principal owner, small business lending application register, and women-owned business, as well as a portion of the definition of affiliate. Some of these definitions draw on definitions in existing Regulation B or elsewhere in Federal laws or regulations.

The Bureau believes that basing this rule's definitions on previously defined terms (whether in Regulation B or regulations promulgated by another agency), to the extent possible, will

[305] The Bureau notes that there are certain terms defined in subpart B outside of final § 1002.102. This occurs where a definition is relevant only to a particular section. For example, the firewall provisions in final § 1002.108 use the phrases ''involved in making any determination concerning a covered application'' and ''should have access.'' Those phrases are defined in § 1002.108(a). Such definitions are discussed in detail in the section-by-section analyses of the provisions in which they appear.

minimize regulatory uncertainty and facilitate compliance, particularly where the other regulations are likely to apply to the same transactions. As discussed further below, in certain instances, the Bureau is deviating from the existing definitions for purposes of this rule.

These definitions are each discussed in detail below. The Bureau is finalizing these definitions pursuant to its authority under ECOA section 704B(g)(1) to prescribe such rules and issue such guidance as may be necessary to carry out, enforce, and compile data pursuant to section 1071. In addition, the Bureau is finalizing certain of these definitions to implement particular definitions in section 1071 including the statutory definitions set out in 704B(h). Any other authorities that the Bureau is relying on to finalize certain definitions are discussed in the section-by-section analyses of those specific definitions.

102(a) Affiliate

Proposed Rule

The Bureau proposed § 1002.102(a) to define ''affiliate'' based on whether the term is used to refer to a financial institution or to an applicant.

Proposed § 1002.102(a) would have defined ''affiliate'' with respect to a financial institution as any company that controls, is controlled by, or is under common control with, another company, as set forth in the Bank Holding Company Act of 1956.[306] Existing Regulation B does not define affiliate. This proposed definition would have provided a consistent approach with the Bureau's Regulation C, which applies the term to financial institutions, as defined in Regulation C, for certain reporting obligations.[307]

Proposed § 1002.102(a) would have defined ''affiliate'' with respect to a business or an applicant as having the same meaning as described in 13 CFR 121.103, which is an SBA regulation titled ''How does SBA determine affiliation?'' The proposed definition would have provided consistency with the Bureau's proposed approach to what constitutes a small business for purposes of section 1071 in proposed § 1002.106(b). Proposed § 1002.107(a)(14) would have permitted, but not required, a financial institution to report the gross annual revenue for the applicant in a manner that includes the revenue of affiliates as well. In proposed § 1002.107(a)(16), workers for affiliates of the applicant would be counted in certain circumstances for the number of workers data point.

[306] 12 U.S.C. 1841 *et seq.*

[307] *See* Regulation C comment 4(a)(11)–3.

The Bureau sought comment on its proposed approach to this definition.

Comments Received

Several industry commenters provided feedback on the Bureau's proposed definition of ''affiliate.'' A joint letter from several trade associations asked the Bureau to provide clarification on how the definition of ''affiliate'' applies in the context of commercial real estate lending. Two other commenters objected to the Bureau's proposed reference to the SBA definition to determine affiliate of a small business because it can be changed by the SBA and the commenters recommended that the Bureau simplify the definition.

The Bureau did not receive comments on the proposed definition of ''affiliate'' with respect to a financial institution.

Final Rule

For the reasons set forth herein, the Bureau is finalizing § 1002.102(a) as proposed. The Bureau believes it is appropriate to define ''affiliate'' with respect to financial institutions to be consistent with the approach in the Bureau's Regulation C, and received no comments suggesting it should do otherwise. The consistency with an existing regulatory definition may help provide clarity for financial institutions when determining their responsibilities under this final rule.

Regarding commenters' suggestions to simplify the definition of ''affiliate,'' the Bureau does not believe it would be appropriate to deviate from the SBA's definition for determining who is an affiliate with respect to a business or an applicant. ECOA section 704B(h)(2) defines the term ''small business'' as having the same meaning as ''small business concern'' in section 3 of the Small Business Act.[308] Consistent with the statute, the Bureau's definitions of business and small business in final § 1002.106 refer to definitions in the SBA's regulations, of which the SBA's definition of affiliate in 13 CFR 121.103 is a part. The Bureau believes that defining ''affiliate'' in this manner is appropriate and necessary to maintain consistency with the SBA's definitions. In addition, the Bureau believes that using a commonly known existing regulatory definition will facilitate compliance with reporting obligations under this final rule. Finally, the Bureau believes the SBA's definition of affiliate is sufficiently broad to afford financial institutions flexibility in the small business size determination process, as discussed below in the section-by-section analysis of § 1002.106(b).

[308] 15 U.S.C. 632.

The Bureau addresses the comment regarding how the definition of ''affiliate'' applies in the context of commercial real estate lending in the section-by-section analysis of § 1002.106(b)(1) below.

102(b) Applicant

Proposed § 1002.102(b) would have defined ''applicant'' to mean any person who requests or who has received an extension of business credit from a financial institution. The term ''applicant'' is undefined in section 1071. Proposed § 1002.102(b) was based on the definition of applicant in existing Regulation B, though for consistency with other parts of the proposed rule, it added a limitation that the credit be business credit and uses the term financial institution instead of creditor. It also omitted the references to other persons who are or may become contractually liable regarding an extension of credit such as guarantors, sureties, endorsers, and similar parties. The Bureau acknowledged that including other such persons could exceed the scope of the data collection anticipated by section 1071. Including them could also make the data collection more difficult as financial institutions might need to report data points (such as gross annual revenue, NAICS code, time in business, and others) regarding multiple persons in connection with a single application. The Bureau believed that collecting such information on guarantors, sureties, endorsers, and similar parties would likely not support section 1071's business and community development purpose.

The Bureau sought comment on its proposed approach to this definition and received one comment in response. The commenter requested that the Bureau clarify that loans jointly made to multiple borrowers, where one or more of the borrowers may qualify as a small business under the rule but are not the primary business(es) seeking the funding, are not subject to the reporting requirements.

For the reasons discussed herein, the Bureau is finalizing § 1002.102(b) as proposed. The Bureau believes it is appropriate to base the definition of applicant for purposes of new subpart B on the definition of applicant in existing Regulation B, with the limitation that the credit be business credit and using the term financial institution instead of creditor. The Bureau likewise believes that it is appropriate to limit the definition of applicant in subpart B to only those persons who request, or have

received, an extension of business credit from a financial institution. As such, the definition of applicant in final § 1002.102(b) does not include other persons who are or may become contractually liable regarding an extension of business credit such as guarantors, sureties, endorsers, and similar parties. As stated in final comment 102(b)–1, in no way are the limitations to the term applicant in § 1002.102(b) intended to repeal, abrogate, annul, impair, change, or interfere with the scope of the term applicant in existing § 1002.2(e) as applicable to existing Regulation B.

In response to the comment regarding loans jointly made to multiple borrowers, the Bureau does not believe that a modification to the definition of applicant is necessary. Rather, the Bureau is adding comment 103(a)–10 to address data collection and reporting if a covered financial institution receives a covered application from co-applicant businesses that are not affiliates, as defined in final § 1002.102(a). Final comment 103(a)–10 provides that if a covered financial institution receives a covered application from multiple businesses that are not affiliates, as defined by final § 1002.102(a), it shall compile, maintain, and report data pursuant to final §§ 1002.107 through 1002.109 for only a single applicant that is a small business, as defined in final § 1002.106(b). A covered financial institution shall establish consistent procedures for designating a single small business for purposes of collecting and reporting data under subpart B in situations where there is more than one small business co-applicant, such as reporting on the first small business listed on an application form. In addition, the Bureau notes that—if the applicants are affiliated entities—the rule already permits consideration of affiliates' revenues in determining whether a business qualifies as small. See the section-by-section analyses of §§ 1002.106(b) and 1002.107(a)(14) for additional discussion of affiliate revenue.

102(c) Business

Final § 1002.102(c) refers to § 1002.106(a) for a definition of the term ''business.'' See the section-by-section analysis of § 1002.106(a) for a detailed discussion of that definition.

102(d) Business Credit

Proposed § 1002.102(d) would have referred to existing § 1002.2(g) for a definition of the term ''business credit.'' The term ''credit'' is undefined in section 1071. Section 1071 does not use the term ''business credit,'' though it does define ''small business loan'' as a loan made to a small business. Existing § 1002.2(g) defines ''business credit'' as ''refer[ring] to extensions of credit primarily for business or commercial (including agricultural) purposes, but excluding extensions of credit of the types described in § 1002.3(a)–(d),'' *i.e.,* public utilities credit, securities credit, incidental credit, and government credit.

The Bureau received two comments specific to its proposed definition of business credit. These two commenters, both credit union trade associations, expressed support for the proposed definition, stating that it was familiar to credit unions and encompasses the most common business credit products aimed at small business borrowers. The Bureau also received numerous comments related to its proposed coverage of agricultural credit, parts of which also touched on the proposed definition of ''business credit''; these comments are discussed below in the section-by-section analysis of § 1002.104(a).

The Bureau is finalizing § 1002.102(d) as proposed. Final § 1002.102(d) points to existing § 1002.2(g) in defining the term ''business credit.'' The Bureau believes it is appropriate to define business credit by reference to the existing definition in Regulation B, which incorporates by reference the meaning of ''credit,'' as defined in existing § 1002.2(j). For clarity and completeness, as discussed below, the Bureau is also adopting existing Regulation B's definition of credit. The Bureau's final rule uses the term business credit principally in defining a covered credit transaction in § 1002.104(a).

The Bureau notes that existing § 1002.2(g) excludes public utilities credit, securities credit, incidental credit, and government credit (that is, extensions of credit made *to* governments or governmental subdivisions, agencies, or instrumentalities—not extensions of credit made *by* governments), as defined in existing § 1002.3(a) through (d), from certain aspects of existing Regulation B.[309] For the purpose of subpart B, the Bureau is both incorporating existing § 1002.2(g)—which already includes partial carveouts for public utilities credit, securities credit, and incidental credit—and also finalizing complete exclusions for these types of credit from the definition of a covered credit transaction in § 1002.104(b). For clarity, the Bureau is separately defining these terms in § 1002.104(b) and explains the rationales for excluding each of them in the section-by-section analysis of § 1002.104(b) below. The Bureau is not adopting an exclusion for extensions of credit made to governments or governmental subdivisions, agencies, or instrumentalities, because governmental entities do not constitute small businesses under the final rule.[310]

102(e) Closed-End Credit Transaction

Proposed § 1002.102(e) would have stated that a closed-end credit transaction means an extension of credit that is not an open-end credit transaction under proposed § 1002.102(n). The term ''closed-end credit transaction'' is undefined in section 1071. The Bureau's proposal would have specified different requirements for collecting and reporting certain data points based on whether the application is for a closed-end credit transaction or an open-end credit transaction. The definition of open-end credit transaction was addressed in proposed § 1002.102(n).

The Bureau sought comment on its proposed approach to the definition of a closed-end credit transaction. The Bureau received no comments and is finalizing § 1002.102(e) with one revision for clarity. The Bureau is revising the definition of a closed-end credit transaction to mean an extension of business credit that is not an open-end credit transaction under § 1002.102(n). The Bureau believes this definition is reasonable as it aligns with the definition of ''open-end credit transaction'' in final § 1002.102(o), and that such alignment will minimize confusion and facilitate compliance.

102(f) Covered Application

Final § 1002.102(f) refers to § 1002.103 for a definition of the term ''covered application.'' See the section-by-section analysis of § 1002.103 for a detailed discussion of that definition.

102(g) Covered Credit Transaction

Final § 1002.102(g) refers to § 1002.104 for a definition of the term ''covered credit transaction.'' See the section-by-section analysis of § 1002.104 for a detailed discussion of that definition.

[309] As explained in existing comment 3–1, under § 1002.3, procedural requirements of Regulation B do not apply to certain types of credit. The comment further states that all classes of transactions remain subject to § 1002.4(a) (the general rule barring discrimination on a prohibited basis) and to any other provision not specifically excepted.

[310] Government entities are not ''organized for profit'' and thus are not a ''business concern'' under final § 1002.106(a).

102(h) Covered Financial Institution

Final § 1002.102(h) refers to § 1002.105(b) for a definition of the term ''covered financial institution.'' See the section-by-section analysis of § 1002.105(b) for a detailed discussion of that definition.

102(i) Credit

Proposed § 1002.102(i) would have referred to existing § 1002.2(j) for a definition of the term ''credit.'' The term ''credit'' is undefined in section 1071. Existing § 1002.2(j), which largely follows the definition of credit in ECOA,[311] defines ''credit'' to mean the right granted by a creditor to an applicant to defer payment of a debt, incur debt and defer its payment, or purchase property or services and defer payment therefor. The Bureau sought comment on its proposed approach to this definition.

The Bureau received several comments regarding its proposed definition of ''credit.'' A few community groups expressed general support for a broad definition of credit. To ensure adequate coverage for future products, one commenter suggested defining credit to also cover situations where money is transmitted to a recipient but the money still effectively belongs to the transmitter and is to be repaid according to certain terms. Another commenter advocated for a credit definition that included as many lenders (and financing companies that are not technically lenders) as possible within the scope of this rulemaking, even when such companies are providing financing in a format that, according to the commenter, is not technically credit (the commenter offered cash advance and factoring companies as examples).

For the reasons set forth herein, the Bureau is finalizing § 1002.102(i) as proposed. Section 1002.102(i) refers to existing § 1002.2(j) for a definition of the term ''credit.'' The Bureau believes that aligning to the implemented definition of credit in ECOA[312] for purposes of subpart B will help to foster consistency with existing Regulation B. The term credit in subpart B is used in the context of what constitutes a covered credit transaction—that is, whether the application is reportable under this final rule. See the section-by-section analysis of § 1002.104 below for a detailed discussion of what does, and does not, constitute a covered credit transaction for purposes of this final rule.

102(j) Financial Institution

Final § 1002.102(j) refers to § 1002.105(a) for a definition of the term ''financial institution.'' See the section-by-section analysis of § 1002.105(a) for a detailed discussion of that definition.

102(k) LGBTQI+ Individual and 102(l) LGBTQI+-Owned Business

Proposed Rule

ECOA section 704B(e)(2)(H) authorizes the Bureau to require financial institutions to compile and maintain ''any additional data that the Bureau determines would aid in fulfilling the purposes of this section.'' In the NPRM, the Bureau sought comment on whether it should adopt a data point to collect an applicant's lesbian, gay, bisexual, transgender, or queer plus (LGBTQ+)-owned business status, similar to its proposal for collecting minority-owned business status and women-owned business status under proposed § 1002.107(a)(18) and (19). The Bureau also sought comment on whether including this question, along with others, would improve data collection or otherwise further section 1071's purposes, as well as whether it would pose any particular burdens or challenges for industry.[313]

This section-by-section analysis of § 1002.102(k) and (*l*) discusses the Bureau's definition of LGBTQI+ individual and the related definition of LGBTQI+-owned business, respectively. Collection of LGBTQI+-owned business status is addressed in the section-by-section analysis of § 1002.107(a)(18).

Comments Received

The Bureau received comments from several lenders, individual commenters, and community and advocacy groups as to whether the Bureau should adopt a data point to collect an applicant's ''LGBTQ+-owned business'' status.[314] As explained further in the section-by-section analysis of § 1002.107(a)(18), some of these commenters did not support including such a data point in the final rule (and thus did not make any suggestions for how an LGBTQ+-owned business should be defined). One commenter opposed collecting LGBTQ+ data without a corresponding proposal to modify the definition of minority-owned business.

In contrast, other commenters supported requiring the collection and reporting of applicants' LGBTQ+-owned business status information. As discussed further in the section-by-section analysis of § 1002.107(a)(18), commenters generally explained that collecting such data would enhance fair lending enforcement and identify credit needs for these small businesses.

Most of these commenters generally echoed the Bureau's use of the term ''LGBTQ+-owned business'' status in expressing their support for the data point. Several recommended that the Bureau require financial institutions' inquiries about such status to include a definition of the status and give applicants response options specifically indicating that they are or are not such a business, similar to the Bureau's proposed approach for requesting information about applicants' minority-owned and women-owned business status.

One commenter suggested that the Bureau use the phrase ''LGBTQI+-owned business'' and include a definition in the final rule. The commenter recommended that the Bureau define the term as a business where (1) more than 50 percent of the ownership or control of which is held by one or more individuals self-identifying as lesbian, gay, bisexual, transgender, queer, or intersex and (2) more than 50 percent of the net profit or loss accrues to one or more individuals self-identifying as lesbian, gay, bisexual, transgender, queer, or intersex. The commenter stated that this definition is similar to the definitions of minority-owned and women-owned businesses and consistent with other Federal government and expert practice and recommendations as well as the definition of ''LGBTQ-owned business'' in Federal legislation that was pending at that time.[315]

Final Rule

As discussed further in part II above and the section-by-section analysis of § 1002.107(a)(18) below, the Bureau believes that the collection of an applicant's LGBTQI+-owned business status will aid in fulfilling the purposes of section 1071, by facilitating evaluations of potential discriminatory

[311] *See* 15 U.S.C. 1691a. Existing Regulation B uses the term ''applicant'' instead of ''debtor.''

[312] *See id.* Existing Regulation B closely aligns with the definition of credit in ECOA, with some technical revisions and use of the term ''applicant'' instead of ''debtor.''

[313] 86 FR 56356, 56482 (Oct. 8, 2021).

[314] The terms ''LGBT,'' ''LGBTQ,'' ''LGBTQ+,'' and ''LGBTQIA+'' are used in this preamble to reflect the specific terms used by commenters, the conditions or titles of any cited research, or (particularly for ''LGBTQ+'') the Bureau's request for comment in the NPRM.

[315] The commenter cited the *LGBTQ Business Equal Credit Enforcement and Investment Act,* H.R. 1443, 117th Cong. (2021), *https://www.congress.gov/bill/117th-congress/house-bill/1443/text* (which would have amended ECOA section 704B to, among other things, require financial institutions to inquire whether a business is a ''LGBTQ-owned'' business).

lending practices on the basis of sex in violation of fair lending laws and helping communities, governmental entities, and creditors identify needs and opportunities of small businesses. Thus, the Bureau is adopting § 1002.102(k) and (*l*) pursuant to its authority under ECOA section 704B(e)(2)(H) to require financial institutions to compile and maintain any additional data that the Bureau determines would aid in fulfilling the purposes of section 1071 and its authority under ECOA section 704B(g)(1) to prescribe such rules and issue such guidance as may be necessary to carry out, enforce, and compile data pursuant to the statute. The Bureau is not, as suggested by one commenter, including LGBTQI+ status in the definition of minority-owned business, but is, as requested by multiple commenters, adopting a definition of LGBTQI+ owned business that largely parallels the definition of a minority-owned business.

For the reasons set forth herein, the Bureau is defining ''LGBTQI+ individual'' in final § 1002.102(k) as including an individual who identifies as lesbian, gay, bisexual, transgender, queer, or intersex. The Bureau is defining the term ''LGBTQI+-owned business'' in final § 1002.102(*l*) as ''a business for which one or more LGBTQI+ individuals hold more than 50 percent of its ownership or control, and for which more than 50 percent of the net profits or losses accrue to one or more such individuals.'' Both definitions are being included to facilitate the requirement in final § 1002.107(a)(18) that financial institutions collect an applicant's minority-owned, women-owned, and LGBTQI+-owned business statuses.

The Bureau agrees with a commenter's suggestion to use the term ''LGBTQI+-owned business''—including an ''I'' to capture intersex individuals—instead of ''LGBTQ+-owned business.'' [316] The Bureau believes that the term ''LGBTQI+-owned business'' better reflects the Bureau's intent to be broadly inclusive.

The Bureau notes that in user testing it conducted to assist its understanding of small business applicants' potential experience using the sample data collection form in the summer and fall of 2022, a few users were confused by the term ''LGBTQI+-owned business.'' [317] Therefore, and consistent with commenters' suggestions, final comments 102(*l*)–2 and 107(a)(18)–2 explain that a financial institution must provide the definition of LGBTQI+-owned business when inquiring as to the applicant's business ownership status pursuant to final § 1002.107(a)(18). A financial institution may use the definition as set forth on the sample data collection form at appendix E. Final comment 102(*l*)–2 also clarifies that a financial institution must provide the definition of LGBTQI+ individual under final § 1002.102(k) if asked by the applicant, but does not need to do so unless asked.

Final comment 102(*l*)–2 clarifies that the definition of LGBTQI+-owned business is used only when an applicant determines if it is such a business for purposes of final § 1002.107(a)(18). The financial institution is not permitted or required to make its own determination as to whether an applicant is a LGBTQI+-owned business.

In line with commenters' suggestions, the definition for LGBTQI+-owned business in final § 1002.102(*l*) parallels concepts in the Bureau's definitions for minority-owned business and women-owned business in final § 1002.102(m) and (s), respectively. The final rule's LGBTQI+-owned business definition incorporates the same two-prong approach as the other business status definitions, with more than 50 percent ownership or control as the first prong and more than 50 percent of net profits or losses as the second prong.

The commentary for final § 1002.102(*l*) generally mirrors the commentary for the minority-owned business and women-owned business definitions in the final rule.[318] Final comment 102(*l*)–1 explains that a business must satisfy both prongs of the definition to be a LGBTQI+-owned business—that is, (A) more than 50 percent of the ownership or control is held by one or more LGBTQI+ individuals, and (B) more than 50 percent of the net profits or losses accrue to one or more LGBTQI+ individuals. Final comment 102(*l*)–1 clarifies that the first prong of the definition can be met through either the control or ownership requirements (as do final comments 102(m)–1 and 102(s)–1).

Final comments 102(*l*)–3 through –6 mirror the corresponding commentary for the definitions of minority-owned business and women-owned business and provide clarifications of terms used and the concepts of ownership, control, and accrual of net profits or losses.

102(m) Minority-Owned Business

Proposed Rule

As discussed further herein, the final rule combines proposed § 1002.102(*l*) (minority individual) into final § 1002.102(m) to streamline the rule and facilitate compliance.

ECOA section 704B(b)(1) requires financial institutions to inquire whether applicants for credit are minority-owned businesses. For purposes of the financial institution's inquiry under 704B(b), 704B(h)(5) defines a business as a minority-owned business if (A) more than 50 percent of the ownership or control is held by one or more minority individuals, and (B) more than 50 percent of the net profit or loss accrues to one or more minority individuals. Section 1071 does not expressly define the related terms of ''ownership'' or ''control,'' nor does it describe what it means for net profits or losses to accrue to an individual. Section 704B(h)(4) defines the term ''minority'' as having the same meaning as in section 1204(c)(3) of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA).[319] That statute defines ''minority'' to mean any Black American, Native American, Hispanic American, or Asian American.[320] While section 1071 uses the term ''minority individual'' in 704B(h)(5), it does not define that term.

Proposed § 1002.102(l)—definition of minority individual. Proposed § 1002.102(*l*) would have clarified that the term ''minority individual'' means a natural person who is American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, and/or Hispanic or Latino. As explained in the NPRM, the Bureau believed that these categories represent contemporary, more specific delineations of the categories described in section 1204(c)(3) of FIRREA. Proposed comment 102(*1*)–2

[316] Explicit inclusion of intersex individuals within the scope of the definitions for LGBTQI+ individual and LGBTQI+-owned business is consistent with the prohibitions against discrimination on the basis of ''sex'' under ECOA and Regulation B. Sex characteristics including intersex traits are ''inextricably bound up with'' sex,'' *Bostock* v. *Clayton Cty.,* 140 S. Ct. 1731, 1742 (2020), and ''cannot be stated without referencing sex,'' *Grimm* v. *Gloucester Cty. Sch. Bd.,* 972 F.3d 586, 608 (4th Cir. 2020) (quoting *Whitaker* v. *Kenosha Unified Sch. Dist. No. 1 Bd. of Educ.,* 858 F.3d 1034, 1051 (7th Cir. 2017)).

[317] CFPB, *User testing for sample data collection form for the small business lending final rule* at app. C, at 3, 8 (Mar. 2023), *https://www.consumerfinance.gov/data-research/research-reports/user-testing-for-sample-data-collection-form-for-the-small-business-lending-final-rule/.*

[318] For discussion of comments as to the concepts of ownership and control in the LGBTQI+-owned business definition, the Bureau refers to discussion of these concepts in the section-by-section analyses of § 1002.102(m) and (s) regarding the definitions for minority-owned business and women-owned business.

[319] Public Law 101–73, section 1204(c)(3), 103 Stat. 183, 521 (1989) (12 U.S.C. 1811 note).

[320] *Id.*

would have clarified that a multi-racial or multi-ethnic person is a minority individual. Proposed comment 102(*1*)–1 would have clarified that this definition would be used only when an applicant determines whether it is a minority-owned business pursuant to proposed §§ 1002.102(m) (definition of minority-owned business) and 1002.107(a)(18) (data point for minority-owned business status). Proposed comment 102(*1*)–3 would have clarified the relationship of the definition of minority individual to the disaggregated subcategories used to determine a principal owner's ethnicity and race.

The Bureau sought comment on its proposed approach to this definition, including its proposed clarification of the definition of minority individual, and requested comment on whether additional clarification was needed. The Bureau also sought comment on whether the definition of minority individual should include a natural person who is Middle Eastern or North African, and whether doing so should be dependent on whether Middle Eastern or North African is added as an aggregate category for purposes of proposed § 1002.107(a)(20).[321]

Proposed § 1002.102(m)—definition of minority-owned business. Proposed § 1002.102(m) would have defined a minority-owned business as a business for which more than 50 percent of its ownership or control is held by one or more minority individuals, and more than 50 percent of its net profits or losses accrue to one or more minority individuals. Proposed comment 102(m)–1 would have explained that a business must satisfy both prongs of the definition to be a minority-owned business—that is, (A) more than 50 percent of the ownership or control is held by one or more minority individuals, and (B) more than 50 percent of the net profits or losses accrue to one or more minority individuals.

Proposed comment 102(m)–2 would have clarified that the definition of minority-owned business is used only when an applicant determines if it is a minority-owned business for purposes of proposed § 1002.107(a)(18). A financial institution would provide the definition of minority-owned business when asking the applicant to provide minority-owned business status pursuant to proposed § 1002.107(a)(18), but a financial institution would not be permitted or required to make its own determination regarding whether an applicant is a minority-owned business for this purpose.

Proposed comment 102(m)–3 would have further noted that a financial institution would be permitted to assist an applicant when determining whether it is a minority-owned business but would not be required to do so, and could provide the applicant with the definitions of ownership, control, and accrual of net profits or losses set forth in proposed comments 102(m)–4 through –6. Additionally, for purposes of reporting an applicant's minority-owned business status, a financial institution would rely on the applicant's determinations of its ownership, control, and accrual of net profits and losses.

The Bureau proposed to clarify ''ownership'' and ''control'' using concepts from the beneficial ownership requirements in FinCEN's customer due diligence rule.[322] Proposed comment 102(m)–4 would have clarified that a natural person owns a business if that natural person directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, has an equity interest in the business. Proposed comment 102(m)–4 would have also provided examples of ownership and clarified that, where applicable, ownership would need to be traced or followed through corporate or other indirect ownership structures for purposes of proposed §§ 1002.102(m) and 1002.107(a)(18). Proposed comment 102(m)–5 would have clarified that a natural person controls a business if that natural person has significant responsibility to manage or direct the business, and would have provided examples of natural persons who control a business. Proposed comment 102(m)–6 would have clarified that a business's net profits and losses accrue to a natural person if that natural person receives the net profits or losses, is legally entitled or required to receive the net profits or losses, or is legally entitled or required to recognize the net profits or losses for tax purposes.

The Bureau sought comment on the proposed definition of minority-owned business and possible alternatives that may clarify the term in order to help ensure that small business applicants can determine whether they are minority-owned businesses for purposes of data collection pursuant to section 1071.

Comments Received

Proposed § 1002.102(l)—definition of minority individual. The Bureau received comments regarding the definition of minority individual from several industry commenters and community groups.

One community group stated that the Bureau's proposal to mirror HMDA with respect to the definition of minority individual is desirable because HMDA's racial and ethnic categories are reasonably comprehensive, and using the same categories eases reporting requirements and creates consistency for applicants. A group of trade associations and a bank supported the Bureau's proposal to define a minority individual using only aggregate ethnicity and race categories, stating that doing so will help lessen confusion. Another bank requested clarification on who is considered multi-racial or multi-ethnic for purposes of the rule.

Proposed § 1002.102(m)—definition of minority-owned business. The Bureau received comments regarding the definition of minority-owned business from lenders, trade associations, and community groups.

One community group stated that the collection of data on minority-owned businesses, along with the collection of data on women-owned businesses, will help illustrate the experience of firms owned by women of color who likely face even higher barriers to accessing small business credit than those firms not owned by women of color. The commenter noted that these firms comprise a significant portion of small businesses and there are a greater proportion of women of color who own businesses than the share of white-owned businesses owned by women. Another requested that the Bureau add an ''I don't know'' response to the list of possible responses, as there may be applicants who cannot make a legal conclusion as to whether the small business is minority-owned. A trade association asserted that inquiring about the ethnicity (or gender) of business owners is contrary to the expectations of financial institutions and applicants alike.

[321] The Bureau received a number of comments regarding whether Middle Eastern or North African should be added as an aggregate category. Those comments are discussed in the section-by-section analysis of § 1002.107(a)(19).

[322] *See* 31 CFR 1010.230 (describing the beneficial ownership requirements for legal entity customers). The Department of the Treasury's Financial Crimes Enforcement Unit (FinCEN) recently issued a final rule to implement requirements regarding reporting of beneficial ownership information pursuant to the Corporate Transparency Act, 31 U.S.C. 5336. *See* 87 FR 59498 (Sept. 30, 2022). While FinCEN's final rule does not include changes to the current customer due diligence rule, FinCEN has indicated its intent to revise the customer due diligence rule in a future rulemaking. *See id.* at 59507. FinCEN's final rule includes definitions for beneficial owner that will be different from what currently exists in the customer due diligence rule, as to both control and ownership, when the rule goes into effect on January 1, 2024. *See id.* at 59594. However, the final rule does not change the 25 percent threshold for determining ownership. *See id.*

Regarding the proposed requirement that in order to be considered a minority-owned business, one or more minority individuals must hold more than 50 percent of the ownership or control of the business, the Bureau received comments from several community groups and lenders in support. Conversely, a trade association and a bank urged the Bureau to revise the requirement such that one or more minority individuals must hold ''50 percent or more'' of the ownership or control because the statutory definition may result in underreporting for equal partnerships with mixed race partners and this would, they said, slant the statistical picture.

Regarding the proposed requirement that in order to be considered a minority-owned business, more than 50 percent of the net profit or loss must accrue to one or more minority individuals, a community group stated that the definition is appropriate to prevent illusory ''ownership'' by a minority individual. Several other commenters also supported the definition.

Several industry commenters requested that the Bureau not include the requirement that more than 50 percent of the net profits or losses must accrue to one or more minority individuals. Some of these commenters stated that the initial prong of the definition requiring more than 50 percent of ownership or control by a minority individual is sufficient for determining ownership and would reduce complexity for borrowers. A CDFI lender stated that defining ownership based on a profit and loss calculation may not fully serve the objectives of the statute, and asked the Bureau to consider the CDFI Fund definition of minority-owned business.[323] Several commenters also argued that the net profits or losses prong complicates the definition, could result in inaccurate data collection, implicates the limited understanding of many small business owners regarding the meaning of net profits and losses as well as the sensitive nature of these issues, and concluded that many small business owners will not understand the definition as provided and will, as a result, decline to answer the question.

A bank asked for clarification whether data (specifically demographic data) collected in prior years could be reused, and what to do if there are multiple collections. Specifically, the commenter gave an example of an applicant that provides demographic information for one application, and then chooses not to provide information for a subsequent application, and asking which collection should be reported.[324] A trade association stated that it is possible in certain states for a third party non-owner to act as trustee of a trust, and that the Bureau should change a comment example to clarify whether it is the Bureau's intent to presume that the trustee of a trust is the owner. Another bank also asserted that requiring banks to collect such information is costly to banks, customers, and communities. A group of trade associations asserted that the commentary should be revised to explicitly state that a financial institution must provide an applicant with the applicable definition.

Several industry commenters supported the proposal to rely solely on the data provided by the applicant and that financial institutions should not be required to verify any such information provided by the applicant. With respect to self-certification of minority-owned business status, two trade associations supported permitting credit applicants to self-certify that 50 percent or more of the net profit or loss accrues to one or more minority individuals, rather than lenders needing to verify this information. Another trade association asserted that the applicant should solely determine whether the individual owners are multi-ethnic or multi-racial individuals and the financial institution should not be required to otherwise verify or report any information other than that supplied by the applicant.

Final Rule

For the reasons set forth herein, the Bureau is finalizing § 1002.102(m) with a number of revisions to the regulatory text and commentary to incorporate the definition of minority individual. The Bureau has made these changes to streamline the rule and facilitate compliance. The Bureau is otherwise finalizing the associated commentary with a minor adjustment for clarity.

Final § 1002.102(m) defines a minority-owned business as a business for which one or more American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, or Hispanic or Latino individuals hold more than 50 percent of its ownership or control and for which more than 50 percent of the net profits or losses accrue to one or more such individuals. Final comment 102(m)–1 explains that a business must satisfy both prongs of the definition to be a minority-owned business—that is, (A) more than 50 percent of the ownership or control is held by one or more such individuals, and (B) more than 50 percent of the net profits or losses accrue to one or more such individuals. Final comment 102(m)–1 includes an additional sentence to clarify that a business that is controlled by an individual with the characteristics listed in the regulatory text satisfies this prong of the definition even if none of the individuals with ownership in the business satisfies those characteristics.

Final comment 102(m)–2 clarifies that the definition of minority-owned business is used only when an applicant determines if it is a minority-owned business for purposes of final § 1002.107(a)(18), and is finalized with an adjustment made for clarity. Final comment 102(m)–3 is finalized as proposed and notes that a financial institution is permitted to assist an applicant when determining whether it is a minority-owned business but is not required to do so, may provide the applicant with the definitions of ownership, control, and accrual of net profits or losses set forth in final comments 102(m)–4 through –6, and that, for purposes of reporting an applicant's minority-owned business status, a financial institution relies on the applicant's determinations of its ownership, control, and accrual of net profits and losses.

Final comment 102(m)–4, finalized with minor edits for consistency and clarity, provides examples of ownership and clarifies that, where applicable, ownership needs to be traced through corporate or other indirect ownership structures. With regard to a commenter's assertion that, in certain states, a trustee could act as a third party non-owner trustee of a trust, the Bureau believes the trustee would be considered an owner for purposes of this definition. Final comment 102(m)–4 also clarifies (as it did in the Bureau's proposal) that a trustee is considered the owner of a trust.

Final comment 102(m)–5 clarifies that an individual controls a business if that individual has significant responsibility

[323] The community group cited to the September 2021 CDFI Transactional Level Report Data Point Guidance, which provides guidance on providing transactional level report data. Under ''Minority Owned or Controlled,'' the guidance states to ''[r]eport whether the investee/borrower is more than 50% owned or controlled by one or more minorities. If the business is a for-profit entity, report whether more than 50% of the owners are minorities. If the business is a nonprofit entity, report whether more than 50% of its Board of Directors are minorities.'' CDFI Fund, *CDFI Transactional Level Report Data Point Guidance,* at 33 (Sept. 2021), *https://www.cdfifund.gov/sites/cdfi/files/2021-08/CDFITLRGuidance_Final_Sept2021.pdf.*

[324] See the section-by-section analysis of § 1002.107(d) regarding the use of previously collected data.

to manage or direct the business, while final comment 102(m)–6 clarifies that a business's net profits and losses accrue to an individual if that individual receives the net profits, is legally entitled or required to receive the net profits or losses, or is legally entitled or required to recognize the net profits or losses for tax purposes. Both comments are finalized with minor edits for consistency and clarity.

Final comments 102(m)–7 and –8 are adopted from the commentary to proposed § 1002.102(*l*) (respectively, proposed comments 102(*l*)–2 and –3). Final comment 102(m)–7 clarifies that an individual who is multi-racial or multi-ethnic constitutes an individual for which the definition of minority-owned business may apply, depending on whether the individual meets the other requirements of the definition. Final comment 102(m)–8 clarifies that the relationship of the ethnicity and race categories used in this section are aggregate ethnicity and race categories and are the same aggregate categories (along with Not Hispanic or Latino for ethnicity, and White for race) to collect an applicant's principal owners' ethnicity and race pursuant to final § 1002.107(a)(19). Final comment 102(m)–8 is revised from proposed comment 102(*l*)–3 to more clearly state the relationship of the ethnicity and race disaggregated subcategories in this comment to those used in final § 1002.107(a)(19). Proposed comment 102(*l*)–1 was not finalized because it was no longer relevant once the definition of minority individual was incorporated into the minority-owned business definition.

With respect to the categories of persons that constitute minorities for purposes of determining minority-owned business status, the Bureau believes its clarified terminology in final § 1002.102(m), which uses the aggregate ethnicity and race categories set forth in existing § 1002.13(a)(1)(i) and appendix B to Regulation C, will avoid the potentially confusing situation where an applicant is presented one set of aggregate ethnicity and race categories when answering questions about the principal owners' ethnicity and race pursuant to final § 1002.107(a)(19) (which also uses the same aggregate ethnicity and race categories) [325] but is asked to use a different set of aggregate categories when indicating whether the business is a minority-owned business. It also avoids creating a situation where a financial institution is required to use different aggregate ethnicity and race categories when complying with different portions of Regulation B and, if applicable, Regulation C. This consistency across ethnicity and race data collection regimes will also allow for better coordination among data users when reviewing data.[326] Further, the Bureau believes that these categories represent contemporary, more specific delineations of the categories described in section 1204(c)(3) of FIRREA.[327]

The Bureau does not believe it would be appropriate to deviate from the statutory definition of a minority-owned business in the various ways some commenters suggested, and the Bureau's authority to deviate from the statutory language is limited. The Bureau also believes that many small business applicants already respond to questions about who owns and who controls a business entity when completing customer due diligence forms or otherwise responding to questions related to that rule and thus will be familiar with these concepts. Although the customer due diligence rule does not address the second prong of the definition regarding accrual of net profits or losses, final comment 102(m)–6 provides a comprehensive explanation of this prong of the definition.

With regard to comments urging the Bureau to remove the prong requiring that more than 50 percent of its net profits or losses accrue to one or more minority individuals in order to be considered a minority-owned business, aside from the Bureau's limited authority to deviate from the statutory language, the Bureau finds that this prong is necessary to prevent illusory ''ownership'' claims by ''straw'' owners.

Finally, with regard to commenters' requests for further clarification, in accordance with ECOA section 704B(g)(3), the Bureau may release material, as part of its regulatory implementation strategy, to assist both financial institutions with complying with the requirements of § 1002.102(m) and small businesses in understanding this definition.

102(n) Open-End Credit Transaction

Proposed § 1002.102(n) would have stated that an open-end credit transaction means an open-end credit plan as defined in Regulation Z § 1026.2(a)(20), but without regard to whether the credit is consumer credit, as defined in § 1026.2(a)(12), is extended by a creditor, as defined in § 1026.2(a)(17), or is extended to a consumer, as defined in § 1026.2(a)(11). The term ''open-end credit transaction'' is undefined in section 1071. The Bureau's proposal would have specified different rules for collecting and reporting certain data points based on whether the application is for a closed-end credit transaction or an open-end credit transaction.

The Bureau sought comment on its proposed approach to this definition. The Bureau received no comments and is finalizing § 1002.102(n) as proposed. The Bureau believes this definition is reasonable because it aligns with the definition of ''open-end credit transaction'' in Regulation Z § 1026.2(a)(20), and that such alignment will minimize confusion and facilitate compliance.

102(o) Principal Owner

Proposed Rule

ECOA section 704B(e) requires financial institutions to compile and maintain the ethnicity, race, and sex of an applicant's principal owners. However, section 1071 does not expressly define who is a principal owner of a business. Proposed § 1002.102(o) would have defined principal owner in a manner that is, in part, consistent with the beneficial ownership requirements in FinCEN's customer due diligence rule.[328] Specifically, a natural person would be a principal owner if the natural person directly owns 25 percent or more of the equity interests of the business. Further, as noted in proposed comment 102(o)–1, a natural person would need to directly own an equity share of 25 percent or more in the business in order to be a principal owner. The Bureau also

[325] The Bureau notes that while the aggregate ethnicity and race categories are the same among final § 1002.107(a)(19), existing § 1002.13(a)(1)(i), and appendix B to Regulation C, the disaggregated race subcategories that an applicant may use to respond to a financial institution's inquiry as to its principal owners' race under final § 1002.107(a)(19) differ (*i.e.,* due to the addition of disaggregated Black or African American race subcategories) from the disaggregated race subcategories in existing § 1002.13(a)(1)(i), and appendix B to Regulation C. See the section-by-section analysis of § 1002.107(a)(19).

[326] For example, OMB uses these same categories for the classification of Federal data on race and ethnicity. *See* Off. of Mgmt. & Budget, *Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity,* 62 FR 58785 (Oct. 30, 1996).

[327] *See, e.g.,* 80 FR 36356 (June 24, 2015) (NCUA interpretive ruling and policy statement implementing an identical FIRREA definition of minority using this same modern technology).

[328] *See* 31 CFR 1010.230 (describing the beneficial ownership requirements for legal entity customers). As noted above, FinCEN recently issued a final rule to implement requirements regarding reporting of beneficial ownership information pursuant to the Corporate Transparency Act. *See* 87 FR 59498 (Sept. 30, 2022). That final rule does not amend the current customer due diligence rule (although FinCEN has indicated that it will be revised at a later point). *See* 87 FR 59498, 59507. Notably, however, FinCEN's final rule did not change the 25 percent threshold for determining ownership. *See id.* at 59594.

proposed that entities not be considered principal owners and indirect ownership by individuals likewise not be considered when determining if someone is a principal owner for purposes of collecting and reporting principal owners' ethnicity, race, and sex or the number of principal owners. Thus, when determining who is a principal owner, ownership would not be traced through multiple corporate structures to determine if a natural person owns 25 percent or more of the applicant's equity interests. Additionally, because only a natural person would be a principal owner for purposes of the rule, entities such as trusts, partnerships, limited liability companies, and corporations, would not be principal owners.

Proposed comment 102(o)–2 would have clarified that a financial institution would provide an applicant with the definition of principal owner when asking the applicant to provide the number of its principal owners pursuant to proposed § 1002.107(a)(20) and the ethnicity, race, and sex of its principal owners pursuant to proposed § 1002.107(a)(19). Proposed comment 102(o)–2 would have also explained that if a financial institution meets in person with a natural person about a covered application, the financial institution may be required to determine if the natural person with whom it meets is a principal owner in order to collect and report the principal owner's ethnicity and race based on visual observation and/or surname. Additionally, proposed comment 102(o)–2 would have noted that if an applicant does not provide the number of its principal owners in response to the financial institution's request pursuant to proposed § 1002.107(a)(21), the financial institution may need to determine the number of the applicant's principal owners and report that information based on other documents or information.

The Bureau explained that aligning the proposed definition of principal owner with the 25 percent ownership definition in the customer due diligence rule would likely be familiar to most financial institutions and applicants. The customer due diligence rule is broadly in use and banks, credit unions, and certain other financial institutions must comply with that rule. Further, the Bureau believed that applicants, as a general matter, would be more likely to be familiar with customer due diligence requirements than SBA or CDFI Fund requirements because they have to complete customer due diligence forms before opening an initial account (*i.e.,* loan or deposit account) at a bank or at certain other institutions. However, unlike the customer due diligence rule, due to potential complications with collecting ethnicity, race, and sex information for principal owners, the Bureau proposed that individuals that only indirectly own 25 percent or more of an applicant's equity interests, as well as entities and trusts, would not be considered principal owners for purposes of the rule. The Bureau sought comment on its proposed definition, including its proposal to not include individuals that only indirectly own 25 percent or more of an applicant's equity interests as principal owners.

Comments Received

The Bureau received comments on this aspect of the proposal from a number of banks, trade associations, community groups, and a business advocacy group. Some of the industry commenters and a community group supported the Bureau's proposed definition for principal owner. A group of trade associations agreed with the Bureau's proposal to align, in part, the definition with the customer due diligence rule, stating that financial institutions are already familiar with ownership concepts through that rule. Trade association commenters also supported the Bureau's proposal not to include entities and indirect ownership by natural persons, with one stating that the concepts of ownership by entities and indirect ownership would add unnecessary complexity to the Bureau's final rule and another noting that its members found them difficult concepts to explain and determine. The community group supporting the Bureau's proposed definition for principal owner stated that the proposed definition made intuitive sense, as 25 percent is a significant amount of ownership.

Several other industry commenters did not support the Bureau's proposed definition. Specifically, these commenters requested that the Bureau look to and align with all the concepts of the customer due diligence rule. The commenters stated that because financial institutions and customers are familiar with the customer due diligence rule and financial institutions already identify principal owners thereunder, consistency between the two regulatory regimes would reduce complexity and facilitate compliance. A business advocacy group stated that aligning the rules completely would allow financial institutions to leverage existing processes and training and focus on customer needs rather than regulatory interpretation. Another commenter argued that a new definition for principal owner under the rule would add unnecessary complexity to the loan origination process. A lender specifically suggested that financial institutions be required to identify and verify the identity of each individual who owns 25 percent or more of the entity, and one individual who controls the entity, as is required under the customer due diligence rule. Another commenter similarly argued for replicating this requirement for the rule, arguing that financial institutions would not find it challenging to trace indirect ownership because they already do so under the customer due diligence rule, that the approach would be familiar to small business applicants structured as legal entities, and that small businesses that are not legal entities (*e.g.,* sole proprietorships) likely would not have complicated equity structures.

Two industry commenters that supported aligning principal owner definition in the Bureau's rule more closely with the customer due diligence rule than proposed by the Bureau also expressed concern that differences in the definition between the regulatory regimes would lead to customer confusion. One of these commenters argued that confusion would likely result for applicants who will be asked to provide information about principal owners under both rules at the same point of the origination process. The other asserted that confusion as a result of different definitions would increase the possibility that customers would refuse to provide information.

A bank commented that the Bureau's proposal did not provide enough guidance or procedures for how financial institutions should handle reporting for small business applicants whose principal owner(s) are a separate corporate entity or trust.

Another bank stated that financial institutions should not be required to determine the ownership of small businesses, which it said the proposed rule would require.

A trade association, which requested an exclusion for applications from trusts from coverage under the final rule, raised a question about who should be considered a principal owner of a trust for data collection purposes, such as whether they should be the settlors, beneficiaries, trustees, or some combination thereof.

Final Rule

For the reasons set forth herein, the Bureau is finalizing its definition of principal owner in § 1002.102(o) and associated commentary with certain adjustments. The Bureau believes it is appropriate to align, in part, its

definition of principal owner with the 25 percent ownership concept in FinCEN's customer due diligence rule given financial institutions' and applicants' likely familiarity with that rule's requirements.[329] The Bureau does not believe, however, that its definition must completely match the ownership and control requirements in the customer due diligence rule as urged by some commenters. While differences between similar concepts in different regulatory regimes may lead to some initial confusion, particularly as financial institutions (as well as small business applicants) already familiar with the customer due diligence rule implement this final rule's requirements, the Bureau believes that adding the concepts of indirect ownership by natural persons, as well as ownership by entities or trusts, to the definition of principal owner would add unnecessary complexity to this final rule.

Generally, FinCEN's customer due diligence rule defines a beneficial owner as not just any individual who directly owns 25 percent or more of a legal entity, but also includes individuals who indirectly have that amount of ownership in the entity, such as through multiple corporate structures.[330] If a trust directly or indirectly owns 25 percent or more of the entity, the trustee is considered to be a beneficial owner.[331] In addition to ownership, the customer due diligence rule also looks to control. A beneficial owner also includes the single individual with significant responsibility to control, manage, or direct the entity.[332]

The Bureau does not believe that it would be appropriate for the rule's definition of principal owner to incorporate indirect ownership and control, as suggested by some commenters. This final rule requires covered financial institutions to collect and report the ethnicity, race, and sex of small business applicants' principal owners and includes the definition of principal owner at § 1002.102(o) for the purpose of facilitating financial institutions' and applicants' ability to provide such information. The Bureau believes that a simpler definition for principal owner that aligns with the customer due diligence rule's general 25 percent or more ownership concept, but which only applies to individuals (not entities or trusts) with direct ownership, will encourage applicants to provide their principal owners' ethnicity, race, and sex and facilitate more accurate reporting. With the simpler definition for principal owner, applicants do not need to first make potentially difficult determinations about which individuals indirectly own or control the small business before providing such individuals' ethnicity, race, and sex information.

The Bureau does not believe differences between the customer due diligence beneficial owner definition and the principal owner definition in this rule will lead applicants to refuse to provide their principal owners' ethnicity, race, and/or sex information, as suggested by one commenter. In contrast, the Bureau believes that its principal owner definition is less complicated and easier to understand and is more likely to facilitate applicants' willingness to provide their principal owners' information.

With respect to a commenter's assertion that the NPRM did not provide enough guidance or procedures for how financial institutions should handle reporting for small business applicants whose principal owner(s) are a separate corporate entity or trust, under the final rule (as generally in the proposal), only individuals are considered principal owners. Thus, entities, such as trusts, partnerships, limited liability companies, and corporations, are not principal owners. Final comment 107(a)(19)–10 clarifies that if an applicant has fewer than four principal owners (*e.g.,* because only one individual owns 25 percent or more of the equity interests of the small business), the financial institution reports ethnicity, race, and sex information for the number of principal owners that the applicant has identified and reports that the ethnicity, race, and sex fields for additional principal owners are ''not applicable.'' (In the NPRM, this clarification generally appeared in proposed appendix G, instruction 25.)

Relatedly, as discussed in the section-by-section analysis of § 1002.106(a), a trust may also be a small business applicant (as opposed to a trust that is an owner of small business applicant) under the final rule. In this case, as was noted by a trade association commenter, it is unclear who should be considered a principal owner for the purpose of principal owners' ethnicity, race, and sex information. The Bureau has added new comment 102(o)–2 clarifying that if a trust is an applicant for a covered credit transaction, a trustee is considered an owner of the trust, to align with commentary accompanying the definitions for LGBTQI+-owned business, minority-owned business, and women-owned business.

As to a commenter's concern that the rule would require financial institutions to determine the ownership of a business, it is unclear as to the specific aspect of the Bureau's proposal to which the commenter was referring. Under the Bureau's proposal (as in the final rule), a financial institution would collect and report the following information related to the ownership of an applicant: the applicant's status as a minority-owned and/or women-owned small business (as well as LGBTQI+-owned business status), the number of principal owners, and the ethnicity, race, and sex of those principal owners. A financial institution can rely (and, in fact, for the protected demographic information, must rely) upon an applicant's self-reported information. This aspect of those data points has been substantially finalized as proposed. Final comment 107(a)(18)–9, regarding the collection and reporting of women-owned, minority-owned, and LGBTQI+-owned business status information clarifies that a financial institution must only report an applicant's responses, even if it verifies or otherwise obtains such information. Final comment 107(a)(20)–2, regarding the collection and reporting of the number of an applicant's principal owners, also provides that a financial institution may rely upon an applicant's statements or information to report such information. It further provides that the financial institution is not required to verify the number of an applicant's principal owners, but if it does so, then it must report the verified information. Thus, a financial institution is not required to make its own determinations about the ownership of a business under the final rule.[333]

In light of the foregoing, the text of final § 1002.102(o) and final comment 102(o)–1 generally remain unchanged from the proposal, though upon further consideration the Bureau has changed the reference to ''natural person'' in the

Crimes Enf't Network, U.S. Dep't of Treas., *FinCEN Guidance FIN–2018–G001: Frequently Asked Questions Regarding Customer Due Diligence Requirements for Financial Institutions* 3 (Apr. 3, 2018), *https://www.fincen.gov/sites/default/files/2018-04/FinCEN_Guidance_CDD_FAQ_FINAL_508_2.pdf.* Certain legal entities are exempted from the rule. 31 CFR 1010.230(e)(2).

[331] 31 CFR 1010.230(d)(3).

[332] 31 CFR 1010.230(d)(2).

[333] The Bureau notes, however, that as part of its proposal requiring financial institutions to collect principal owners' ethnicity and race via visual observation or surname in certain circumstances, a financial institution would have needed to determine if a representative of the applicant with whom it was meeting in person was a principal owner. As discussed in the section-by-section analysis of § 1002.107(a)(19) below, the Bureau is not finalizing this requirement. Thus, to the extent the comment was referring to this aspect of the proposal, the commenter's concern has been rendered moot.

proposed definition and related comment to ''individual'' in the final rule. In user testing conducted on versions of the Bureau's proposed sample data collection form at appendix E, users expressed confusion about the term ''natural person.'' [334] The Bureau does not believe that there is a meaningful difference between the terms ''individual'' and ''natural person'' and as a result has decided to use the term ''individual'' in the definition for comprehensibility.

The Bureau is finalizing proposed comment 102(o)–2, renumbered as final comment 102(o)–3, to explain the purpose of the definition of principal owner; the Bureau has revised this comment to reflect other changes in the rule.

102(p) Small Business

Final § 1002.102(p) refers to § 1002.106(b) for a definition of the term ''small business.'' See the section-by-section analysis of § 1002.106(b) for a detailed discussion of that definition.

102(q) Small Business Lending Application Register

Proposed § 1002.102(q) would have defined the term ''small business lending application register'' or ''register'' as the data reported, or required to be reported, annually pursuant to proposed § 1002.109. This definition referred only to the data that is reported, or required to be reported, annually; it did not refer to the data required to be collected and maintained (prior to reporting).[335] The Bureau sought comment on its proposed definition of ''small business lending application register'' or ''register'' in proposed § 1002.102(q). The Bureau received no comments on this definition, and therefore is finalizing § 1002.102(q) as proposed.

102(r) State

Proposed § 1002.102(r) would have referred to existing § 1002.2(aa) for a definition of the term ''State.'' Existing § 1002.2(aa) defines the term as any State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States. The Bureau requested comment on its proposed approach to this definition, but did not receive any feedback. The Bureau is finalizing § 1002.102(r) as proposed. The Bureau believes that, being consistent with existing Regulation B, this definition will be familiar to financial institutions.

102(s) Women-Owned Business

Proposed Rule

ECOA section 704B(b)(1) requires financial institutions to inquire whether applicants for credit are women-owned businesses. For purposes of the financial institution's inquiry under 704B(b), 704B(h)(6) defines a business as a women-owned business if (A) more than 50 percent of the ownership or control is held by one or more women, and (B) more than 50 percent of the net profit or loss accrues to one or more women. Section 1071 does not expressly define the related terms of ''ownership'' or ''control,'' nor does it describe what it means for net profits or losses to accrue to an individual.

Proposed § 1002.102(s) would have defined a women-owned business as a business for which more than 50 percent of its ownership or control is held by one or more women, and more than 50 percent of its net profits or losses accrue to one or more women. Proposed comment 102(s)–1 would have explained that a business must satisfy both prongs of the definition to be a women-owned business—that is, (A) more than 50 percent of the ownership or control is held by one or more women, and (B) more than 50 percent of the net profits or losses accrue to one or more women.

Proposed comment 102(s)–2 would have clarified that the definition of women-owned business is used only when an applicant determines if it is a women-owned business for purposes of proposed § 1002.107(a)(19). A financial institution would have provided the definition of women-owned business when asking the applicant to provide women-owned business status pursuant to proposed § 1002.107(a)(19), but a financial institution would not have been permitted or required to make its own determination regarding whether an applicant is a women-owned business for this purpose.

Proposed comment 102(s)–3 would have further noted that a financial institution would be permitted to assist an applicant when determining whether it is a women-owned business but would not be required to do so, and could provide the applicant with the definitions of ownership, control, and accrual of net profits or losses set forth in proposed comments 102(s)–4 through –6. Additionally, for purposes of reporting an applicant's women-owned business status, a financial institution would rely on the applicant's determinations of its ownership, control, and accrual of net profits and losses.

The Bureau proposed to clarify ''ownership'' and ''control'' using concepts from FinCEN's customer due diligence rule. Proposed comment 102(s)–4 would have clarified that a natural person owns a business if that natural person directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, has an equity interest in the business. Proposed comment 102(s)–4 would have also provided examples of ownership and clarified that, where applicable, ownership would need to be traced or followed through corporate or other indirect ownership structures for purposes of proposed §§ 1002.102(s) and 1002.107(a)(19). Proposed comment 102(s)–5 would have clarified that a natural person controls a business if that natural person has significant responsibility to manage or direct the business and would provide examples of natural persons who control a business. Proposed comment 102(s)–6 would have clarified that a business's net profits and losses accrue to a natural person if that natural person receives the net profits, is legally entitled or required to receive the net profits or losses, or is legally entitled or required to recognize the net profits or losses for tax purposes.

The Bureau sought comment on the proposed definition of women-owned business and possible alternatives that may clarify the term in order to help ensure that small business applicants can determine whether they are women-owned businesses for purposes of data collection pursuant to section 1071.

Comments Received

The Bureau received comments regarding the definition of a women-owned business from a number of banks, trade associations, and community groups.

One community group requested that the Bureau add an ''I don't know'' response to the list of possible responses, as there may be applicants who cannot make a legal conclusion as to whether the small business is women-owned.

Regarding the proposed requirement that to be considered a women-owned business, one or more women must hold ''more than 50 percent'' of the ownership or control, the Bureau received several comments from community groups and a CDFI lender

[334] CFPB, *User testing for sample data collection form for the small business lending final rule* at app. B, at 12, 15 (Mar. 2023), *https://www.consumerfinance.gov/data-research/research-reports/user-testing-for-sample-data-collection-form-for-the-small-business-lending-final-rule/*.

[335] In contrast, the term ''Loan/Application Register'' in Regulation C § 1003.2(k) refers to both the record of information required to be collected pursuant to § 1003.4 as well as the record submitted annually or quarterly, as applicable, pursuant to § 1003.5(a).

supporting this requirement. A trade association stated that the Bureau should revise the requirement to state that one or more women must hold ''50 percent or more'' of the ownership or control because the statutory definition may result in underreporting for equal partnerships with mixed gender partners.

Regarding the proposed requirement that to be considered a women-owned business, more than 50 percent of the net profit or loss must accrue to one or more women, one community group stated that the statutory definition is appropriate to prevent illusory ''ownership'' by one or more women. Another commenter supported the definition.
