requirements in the Applicable Regulations section of this notice. We reference the regulations outlining the terms and conditions of an award in the Applicable Regulations section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. Open Licensing Requirements: Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. Reporting: (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to www.ed.gov/fund/grant/apply/appforms/appforms.html.

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. Performance Measures: For the purpose of Department reporting under 34 CFR 75.110, we have established the following performance measures for the NCSI program:

(a) The percentage of SASI State entity grantees and high-need LEAs reporting the following:

1. NCSI resources were useful and applicable to their work as evidenced.
2. The TA provided by the NCSI resulted in changes in policies or practices.
3. Satisfaction with the quality, usefulness, and relevance of TA provided by the NCSI.

(b) The percentage of other States and LEAs reporting the following:

1. NCSI resources were useful and applicable to their work as evidenced.
2. The TA provided by the NCSI resulted in changes in policies or practices.
3. Satisfaction with the quality, usefulness, and relevance of TA provided by the NCSI.

(c) The number of times that NCSI provided direct TA to the following:

1. A SASI grantee or high-need LEA in a SASI grantee State.
2. A non-SASI grantee State or LEA in a non-SASI grantee State seeking TA.
3. The extent to which the NCSI provided services and products to a wide range of recipients.

6. Continuation Awards: In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things, whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee’s approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under FOR FURTHER INFORMATION CONTACT, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format. Electronic Access to This Document: The official version of this document is the document published in the Federal Register. You may access the official edition of the Federal Register and the Code of Federal Regulations at www.govinfo.gov. At this site you can view this document, as well as all other documents of this Department published in the Federal Register, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the Federal Register by using the article search feature at www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

James F. Lane,
Principal Deputy Assistant Secretary,
Delegated the Authority to Perform the Functions and Duties of the Assistant Secretary, Office of Elementary and Secondary Education.

BILING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Supporting America’s School Infrastructure Grant Program

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for fiscal year (FY) 2023 for the Supporting America’s School Infrastructure (SASI) Grant Program, Assistance Listing Number (ALN) 84.184K. This notice relates to the approved information collection under OMB control number 1894–0006.

DATES:

Pre-Application Webinar Information: Information about a pre-application webinar will be available on the program website at: https://oese.ed.gov/offices/school-infrastructure-programs/sip/.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common
Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the Federal Register on December 7, 2022 (87 FR 75045), and available at https://www.federalregister.gov/documents/2022/12/07/2022-26554/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs. Please note that these Common Instructions supersede the version published on December 27, 2021.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of this program is to increase the capacity of States to support high-need local educational agencies (LEAs) and schools in leveraging other available Federal, State, and local resources to improve school facilities and environments through public school infrastructure improvements to ensure that their public school facilities are safe, healthy, sustainable, and equitable learning environments for all students.

Background:

Schools, especially those in high-need LEAs, face ongoing challenges in ensuring that their school facilities provide safe, healthy, sustainable, and equitable learning environments. Fifty million students and 6 million adults spend their days learning and working in public school buildings.1 Public schools account for the second most expansive public State and local infrastructure in the country, after highways. Yet, a 2020 U.S. Government Accountability Office (GAO) report found that an estimated 54 percent of LEAs in the United States reported that they need to replace or update major systems in more than half of their buildings,2 and the 2021 Report Card for America’s Infrastructure rated the Nation’s school buildings as a D-Plus.3 In addition to necessary updates, the average public school building was 44 years old as of 2012, according to the most recent comprehensive dataset on public school facilities, the 2013 National Center on Education Statistics Condition of America’s Public School Facilities.4 LEAs, especially those in low-income neighborhoods, face challenges related to project financing, Federal and State grant application procedures, and understanding how to leverage available resources to improve school infrastructure. In making necessary infrastructure updates, LEAs face an estimated annual gap of $85 billion between the level of investment and level of need to maintain safe and up-to-date facilities, according to the 2021 State of Our Schools Report by the 21st Century School Fund.5 Relatedly, the 2021 State of our Schools Report indicates that most school facility financing is provided locally and almost half of States provide little to no funding to LEAs for school infrastructure. Eleven States provide no funding at all, and an additional 10 States provide between 1 and 9 percent of an LEA’s costs for maintaining school infrastructure.6 Without State funding, LEAs rely on local property or sales tax revenue; schools in low-income communities do not have sufficient revenue to finance enough borrowing to address their accumulated deficiencies from aged infrastructure. In this way, schools in low-income communities are disproportionately impacted by inequitable funding systems across the country.

Recently, decades of inadequate school funding systems and aging school infrastructure across the country, the COVID–19 pandemic illuminated the scope of the harm dilapidated school buildings have on our students and educators. In many public schools, the poor state of facilities hampered the return to in-person learning during the COVID–19 pandemic or led to lost instructional time when school ventilation systems were unable to maintain safe and healthy classroom conditions. Specifically, the GAO report found that an estimated 41 percent of school districts need to update or replace heating, ventilation, and air-conditioning (HVAC) systems in at least half of their schools, representing about 36,000 schools nationwide. If not addressed, HVAC-related problems, such as older systems that leak and damage flooring or ceiling tiles, can lead to indoor air quality problems and mold, aggravate asthma, and result in lost learning time. Extreme weather exacerbates these issues. For example, schools that do not have air-conditioning have had to adjust schedules to accommodate extreme heat or retrofit buildings with air-conditioning, requiring additional updates to piping and insulation to avoid air quality problems caused by moisture and condensation. Due to recent increases in extreme weather conditions, maintaining safe and healthy classroom conditions remains a challenge for schools across the United States, particularly in areas with higher proportions of students from “socially vulnerable groups” according to GAO’s 2022 study on disaster recovery.7 This GAO report also shows that school districts serving high proportions of children from vulnerable groups—including children who are from low-income backgrounds, children of color, English learners, and children with disabilities—are particularly susceptible to the adverse effects of disasters and may need more recovery assistance compared to school districts with less vulnerable student populations.

In addition, many States face challenges in building their own capacity to support LEAs in maintaining and improving school infrastructure. According to GAO’s 2020 survey of the 50 States and District of Columbia, most States (38 of 49) either had not conducted or did not know if their State had conducted a State-level facilities condition assessment to determine school facilities’ needs.8 States that had not conducted a statewide facilities condition assessment frequently said they do not assess school conditions because it is primarily the responsibility of LEAs, further compromising the ability of high-need LEAs to maintain safe, healthy, sustainable, and equitable learning environments.

Recent investments in school infrastructure, including the development of resources on related topics, across Federal agencies demonstrate the Federal Government’s commitment to enhancing equity and sustainability in schools. For example, in 2022, the U.S. Department of Energy announced a new grant program focused on energy improvements at public

---

school facilities, especially in the highest-need districts, designed to save schools money. Similarly, the White House released a toolkit on Federal resources for addressing school infrastructure needs in April 2022. Additionally, the Environmental Protection Agency recently released grant announcements enabled by the Bipartisan Infrastructure Law for its Voluntary School and Child Care Lead Testing and Reduction Grant Program, which allows grant funding for lead remediation and testing in K–12 schools.

Additional investment in consolidating available resources and training State and LEA personnel responsible for decision-making, planning, data, budgeting, operations, accountability, and management of public school facilities is necessary to enhance their ability to access and utilize the resources available to address the infrastructure challenges facing LEAs.

To help address these challenges, the Department will use School Safety National Activities funds to increase State capacity to support high-need LEAs and provide technical assistance to those LEAs regarding how to leverage available resources to assess public school infrastructure needs and how to make infrastructure improvements in their highest-need public schools.

Priorities: We are establishing two absolute priorities and one competitive preference priority for the FY 2023 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition, in accordance with section 437(d)(1) of the General Education Provisions Act (GEPA), 20 U.S.C. 1232(d)(1).

Absolute Priorities: For FY 2023 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are absolute priorities. Under 34 CFR 75.105(c)(3), we consider only applications that meet these absolute priorities.

Only one application per State may be submitted to this grant competition under either Absolute Priority 1 or Absolute Priority 2.

Applicants must clearly identify the specific absolute priority the proposed project addresses in the project abstract.

Note: The Department may create two funding slates—one for applicants that meet Absolute Priority 1 and one for applicants that meet Absolute Priority 2. As a result, the Department may fund applications out of the overall rank order, provided applications of sufficient quality are submitted, but the Department is not bound to do so.

These priorities are: Absolute Priority 1—Building Capacity of State Educational Agency (SEA).

To meet this priority, an eligible State educational agency (as defined in this document) must propose a project to increase its capacity to support high-need LEAs (as defined in this document) and provide technical assistance to those LEAs regarding how to leverage available resources to assess infrastructure needs and how to make public school infrastructure improvements in their highest-need public schools.

Absolute Priority 2—Building Capacity of State Entity (Other than the SEA).

To meet this priority, an eligible State entity other than the SEA with authority or responsibility over educational facilities (i.e., if the SEA does not have authority over or responsibility for educational facilities) must propose a project in collaboration with the SEA to increase its capacity to support high-need LEAs and provide technical assistance to those LEAs regarding how to leverage available resources to assess infrastructure needs and how to make public school infrastructure improvements in their highest-need public schools.

Competitive Preference Priority: For FY 2023 and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is a competitive preference priority for applications under Absolute Priority 1. Under 34 CFR 75.105(c)(2)(i), we award up to an additional 5 points for Competitive Preference Priority 1 to any application from an SEA under Absolute Priority 1 that addresses this priority. The total number of competitive preference points an SEA applicant may compete for is 5.

An applicant must clearly identify in the project abstract and the project narrative section of its application that it wishes the Department to consider the application for purposes of earning competitive preference priority points. This priority is: Competitive Preference Priority 1—SEAs with Low Capacity in Areas of School Infrastructure. (Up to 5 points)

To meet this priority, an applicant must demonstrate that it currently has low or no administrative capacity to support LEAs in its State in assessing facility conditions or making public school infrastructure improvements, by attesting that it meets one or more of the following criteria:

(i) The SEA does not currently provide capital funding for school construction or renovations, consistent with the most recent annual Public Elementary-Secondary Education Finance Data the SEA reported to the U.S. Census Bureau. (0 or 3 points)

(ii) The SEA does not currently employ a dedicated staff person whose primary job responsibility is providing technical assistance to LEAs regarding school infrastructure improvements. (0 or 2 points)

Requirements: We are establishing these application and program requirements for the FY 2023 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition.

Application requirement (c) only applies to State entities other than the SEA that have authority over or responsibility for educational facilities. All remaining application requirements apply to all eligible applicants.

Program Requirements: Applicants that receive an award under this program must—

(a) Within one calendar year of receiving the award, complete a needs assessment of high-need LEAs to determine their issues, needs, and potential opportunities related to school infrastructure, and incorporate the needs assessment findings into the applicant’s logic model and annual reporting.

(b) Develop or improve State and local data and information systems management related to public school infrastructure (e.g., the condition of school facilities).

(c) Evaluate the current State-level public school infrastructure funding systems and make recommendations that would ensure systems provide all students access to a safe, healthy, sustainable, and equitable learning environment.

(d) Establish or improve statewide systems for training LEA officials responsible for public school infrastructure or public school infrastructure improvements.

(e) Engage in activities necessary to plan the project period and evaluate impact (e.g., collect baseline data).

(f) Provide technical assistance to high-need LEAs as they implement safe, healthy, sustainable, and equitable
infrastructure improvements with Federal, State, local, and private funding.

g) Build the capacity of SEA and State entity (as applicable for State entity applicants) staff by engaging in professional development on topics related to public school infrastructure and sustainability, including public school facilities planning, management, funding, and accountability; public school infrastructure improvements; regulations impacting infrastructure projects; facilities condition assessments and data management; the effects of education facilities on health, safety, equity, staff retention, and student achievement; environmental sustainability and climate resiliency; and potential cost-savings opportunities through procurement, resource efficiency, and preventative maintenance.

(h) Applicants that receive an award under this program may also use funds, in accordance with their proposed application, on any of the following activities—

(i) Facility conditions assessments for high-need LEAs.

(ii) Support for high-need LEAs in developing sustainable financing models and partnerships.

(iii) Support for high-need LEAs in long-term infrastructure planning.

(iv) Review and update State standards, policies, procedures, regulations, or codes related to school infrastructure and provide related technical assistance to high-need LEAs.

(v) Provide technical assistance to high-need LEAs on planning and implementing public school infrastructure improvements that advance environmental sustainability and climate resiliency.

(vi) Collaborate and coordinate with related Federal, State, and local organizations, and school-based efforts, to increase State capacity to support LEAs in the areas of public school infrastructure and sustainability.

(l) Allocate or hire at least one full-time employee to administer and implement the activities outlined in the grant application.

(j) Annually report to the Department—

(i) How high-need LEA capacity is being increased, as described in the logic model, including the key project components and short-term, mid-term, and long-term outcomes.

(ii) Which LEAs in the State have been designated as high-need, how they meet the definition of high-need, and which received direct technical assistance.

Application Requirements:

(a) Describe the “high-need LEAs” designated by the State to be served by the proposed project.

Applicants must define “high-need LEA” and describe how it will determine an LEA meets the definition of high-need. In addition, an applicant must describe how it will annually determine which LEAs meet the definition of high-need over the period to ensure those designated as high-need benefit from the program.

(b) Logic Model.

Describe the applicant’s approach to building internal capacity using a logic model. The applicant must describe its approach to increasing its capacity to support high-need LEAs in leveraging available resources to achieve safe, healthy, sustainable, and equitable school environments through public school infrastructure improvements using a logic model (as defined in 34 CFR 77.1), including the key project components and relevant outcomes (as defined in 34 CFR 77.1). The description should indicate how the proposed approach will improve or expand on any previous approaches, how the new approach will address barriers, and how the applicant will sustain support for high-need LEAs after the project period has ended.

(c) Interagency collaboration with the SEA.

A State entity applying under Absolute Priority 2 must describe how it will coordinate and collaborate with the SEA when implementing the project. A collaboration plan with the SEA must include—

(i) How the State entity will develop and maintain interagency communication and coordination with the SEA.

(ii) The role of the State entity and SEA in the project.

(iii) A description of how the project will increase the capacity of the SEA to support high-need LEAs in leveraging available resources to assess and make infrastructure improvements in their highest-need public schools.

(iv) In addressing the selection criteria, present a proposed evaluation plan that describes the criteria for which (a) milestones were met; (b) outputs were met; (c) recipient outcomes (i.e., short-term, mid-term, long-term) were met; and (d) capacity-building services are implemented as intended.

Definitions: For FY 2023, and any subsequent year in which we make awards from the list of unfunded applications from this competition, the following definitions apply. The definitions of “logic model,” “project component,” and “relevant outcome” are from 34 CFR 77.1(c). The definitions of “local educational agency” and “State educational agency” are from section 8101 of the Elementary and Secondary Education Act of 1965, as amended (ESEA). We are establishing the definitions of “high-need LEA,” “public school facilities,” “public school infrastructure,” “public school infrastructure improvements,” “state entity,” and “sustainable” for the FY 2023 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition in accordance with section 437(d)(1) of ESEA, 20 U.S.C. 1232(d)(1).

Demonstrates a rationale means a key project component included in the project’s logic model is informed by research or evaluation findings that suggest the project component is likely to improve relevant outcomes.

High-need LEA will be defined by the applicant as a part of the application (the definition for funded applicants will be finalized in consultation with the Department as part of the grant award process). The definition must include a measure of poverty and a measure of capacity to fund school facility improvements. As applicable, applicants may include in the definition secondary factors that impact the ability of an LEA or an individual school within an LEA to effectively make public school infrastructure improvements, such as the documented condition of facilities or geographic isolation of the LEA or individual schools within an LEA. An SEA may use the following definitions of poverty and capacity to fund facilities:

(a) Poverty: An LEA may be defined as high-need if it is among the LEAs in the State with the highest numbers or percentages of students counted as eligible under section 1124(c) of the ESEA (20 U.S.C. 6333(c)).

(b) Capacity to Fund Facilities: An LEA may be defined as high-need if it is among the LEAs in the State with the highest percentage of students counted as eligible under section 1124(c) of the ESEA (20 U.S.C. 6333(c)).

(c) Local educational agency means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a
service function for, public elementary schools or secondary schools in a city, county, township, school district, or other political subdivision of a State, or of or for a combination of school districts or counties that is recognized in a State as an administrative agency for its public elementary schools or secondary schools.

(a) Administrative Control and Direction—The term includes any other public institution or agency having administrative control and direction of a public elementary school or secondary school.

(b) Bureau of Indian Education Schools—The term includes an elementary or secondary school funded by the Bureau of Indian Education but only to the extent that including the school makes the school eligible for programs for which specific eligibility is not provided to the school in another provision of law and the school does not have a student population that is smaller than the student population of the LEA receiving assistance under the ESEA with the smallest student population, except that the school shall not be subject to the jurisdiction of any State educational agency (SEA) other than the Bureau of Indian Education.

(c) Education Service Agencies—The term includes educational service agencies and consortia of those agencies.

(d) State Educational Agency—The term includes the SEA in a State in which the SEA is the sole educational agency for all public schools.

Logic model (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (i.e., the active “ingredients” that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

Project component means an activity, strategy, intervention, process, product, practice, or policy included in a project. Evidence may pertain to an individual project component or to a combination of project components (e.g., training teachers on instructional practices for these teachers).

Public school facility means a building used to provide free public education, including instructional, resource, food service, and general or administrative support areas, so long as they are a part of the facility.

Public school infrastructure means buildings, facilities and grounds, including the built and natural outdoor environment of a public elementary school or secondary school that are necessary for an LEA to provide a safe, healthy, sustainable, and equitable learning environment for all students.

Public school infrastructure improvements means activities related to building, acquiring, altering, remodeling, repairing, modernizing, or extending of public school facilities, including planning, design, financing, maintenance, and operations of public school infrastructure.

Relevant outcome means the student outcome(s) or other outcome(s) the key project component is designed to improve, consistent with the specific goals of the program.

State means each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, and each of the outlying areas, consistent with section 8101(36) of the ESEA. (Section 8101(48) of the ESEA)

State educational agency means the agency primarily responsible for the State supervision of public elementary schools and secondary schools.

State entity means an agency of the State other than the SEA with authority or responsibility over public school facilities.

Sustainable means practices, policies, programs, and systems that do not deplete or permanently damage fiscal or environmental resources, while maintaining social well-being.

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in Federal civil rights laws.

Waiver of Proposed Rulemaking:

Under the Administrative Procedure Act (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed priorities, selection criteria, definitions, application requirements, and other requirements. Section 437(d)(1) of GEPA, however, allows the Secretary to exempt from rulemaking requirements governing the first grant competition under a new or substantially revised program authority. This is the first grant competition for this program under section 4631(a)(1)(B) of the ESEA and the Departments of Labor, Health And Human Services, And Education, And Related Agencies Appropriations Bill, 2023 and therefore qualifies for this exemption. In order to ensure timely grant awards, the Secretary has decided to forgo public comment on the priorities, requirements, definitions, and selection criteria under section 437(d)(1) of GEPA. These priorities, requirements, definitions, and selection criteria will apply to the FY 2023 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474.

II. Award Information

Type of Award: Discretionary grants. Estimated Available Funds: $40,000,000.

Estimated Range of Awards: $3,000,000 to $5,000,000 for the full 60 months.

Estimated Average Size of Awards: $4,000,000.

Estimated Number of Awards: 8–13.

Note: The Department is not bound by any estimates in this notice. Contingent upon the availability of funds and the quality of applications, the Department anticipates making awards for the full 60-months using FY 2023 and FY 2024 appropriations. The Department may make partial awards using FY 2023 appropriations and award the remaining funds using FY 2024 appropriations when they become available.

Project Period: Up to 60 months.

III. Eligibility Information

1. Eligible Applicants: The following entities are eligible to apply under this competition—

(a) SEAs. (b) State entity other than the SEA that has authority over or responsibility for education facilities if the SEA does not have this authority.

(c) A consortium comprised entirely of agencies or organizations within a single State described in clauses (a) or (b). Applicants applying under a consortium of eligible entities will be required to designate a lead agency in order to apply under the appropriate Absolute Priority and must meet all of
the requirements of 34 CFR 75.127 through 75.129.

2. Cost Sharing or Matching: This program does not require cost sharing or matching.

b. Indirect Cost Rate Information: This program uses an unrestricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see www2.ed.gov/about/offices/list/ocfo/intro.html.

c. Administrative Cost Limitation: This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. Limitation on Awards: The Department will make only one award per State.

4. Subgrantees: A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application.

IV. Application and Submission Information

1. Application Submission Instructions: Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the Federal Register on December 7, 2022 (87 FR 75045), and available at https://www.federalregister.gov/documents/2022/12/07/2022-26554/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs, which contain requirements and information on how to submit an application. Please note that these Common Instructions supersede the version published on December 27, 2021.

2. Submission of Proprietary Information: Given the types of projects that may be proposed in applications for the SASI program, your application may include business information that you consider proprietary. In 34 CFR 5.11, we define “business information” and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended). Because we plan to make successful applications available to the public, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under “Other Attachments Form,” please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this program.

4. Funding Restrictions: We reference regulations outlining additional funding restrictions in the Applicable Regulations section of this notice.

5. Recommended Page Limit: The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 30 pages and (2) use the following standards:
   - A “page” is 8.5” x 11”, on one side only, with 1” margins at the top, bottom, and both sides.
   - Double-space (no more than three lines per vertical inch) all text in the application narrative.
   - Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
   - Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the one-page abstract, the resumes, the bibliography, or the letters of support. However, the recommended page limit does apply to all of the application narrative.

V. Application Review Information

1. Selection Criteria: The selection criteria for this competition are from 34 CFR 75.210. The maximum score for all of the selection criteria is 100 points. The maximum score for each criterion is included in parentheses following the title of the specific selection criterion. Each criterion also includes the factors that reviewers will consider in determining the extent to which an applicant meets the criterion.

The selection criteria are as follows:

(a) Need for the Project (up to 15 points).

(i) The magnitude or severity of the problem to be addressed by the proposed project (up to 2 points).

(ii) The magnitude of the need for the services to be provided or the activities to be carried out by the proposed project (up to 8 points).

(iii) The extent to which specific gaps or weaknesses in services, infrastructure, or opportunities have been identified and will be addressed by the proposed project, including the nature and magnitude of those gaps or weaknesses (up to 5 points).

(b) Quality of the Project Design (up to 30 points).

(1) The Secretary considers the quality of the design of the proposed project.

(2) In determining the quality of the design of the proposed project, the Secretary considers the following factors:

(i) The extent to which the design of the proposed project is appropriate to, and will successfully address, the needs of the target population or other identified needs (up to 5 points).

(ii) The extent to which the proposed activities constitute a coherent, sustained program of training in the field (up to 5 points).

(iii) The extent to which the proposed project will establish linkages with other appropriate agencies and organizations providing services to the target population (up to 5 points).

(iv) The extent to which the applicant demonstrates that it has the resources to operate the project beyond the length of the grant, including a multiyear financial and operating model and accompanying plan; the demonstrated commitment of any partners; evidence of broad support from stakeholders (e.g., State educational agencies, teachers’ unions) critical to the project’s long-term success; or more than one of these types of evidence (up to 10 points).

(v) The extent to which the proposed project demonstrates a rationale (as defined in this notice) (up to 5 points).

(c) Quality of Project Services (up to 30 points).

(1) The Secretary considers the quality of the services to be provided by the proposed project.

(2) In determining the quality of the services to be provided by the proposed project, the Secretary considers the quality and sufficiency of strategies for ensuring equal access and treatment for eligible project participants who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability (up to 5 points).
In addition, the Secretary considers the following factors:

(i) The likely impact of the services to be provided by the proposed project on the intended recipients of those services (up to 10 points).

(ii) The extent to which the training or professional development services to be provided by the proposed project are of sufficient quality, intensity, and duration to lead to improvements in practice among the recipients of those services (up to 10 points).

(iii) The extent to which the services to be provided by the proposed project are focused on those with greatest needs (up to 5 points).

(d) Adequacy of Resources (up to 10 points).

(1) The Secretary considers the adequacy of resources for the proposed project.

(2) In determining the adequacy of resources for the proposed project, the Secretary considers the following factors:

(i) The extent to which the budget is adequate to support the proposed project (up to 10 points).

(ii) Quality of Management Plan (up to 10 points).

(1) The Secretary considers quality of the management plan for the proposed project.

(2) In determining the quality of the management plan for the proposed project, the Secretary considers the adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks (up to 10 points).

(i) Quality of Project Evaluation (up to 5 points).

(1) The Secretary considers the quality of the evaluation to be conducted of the proposed project.

(2) In determining the quality of the evaluation, the Secretary considers the extent to which the methods of evaluation provide for examining the effectiveness of project implementation strategies (up to 5 points).

2. Review and Selection Process: We remind potential applicants that, in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant’s use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, and 110.23).

3. Risk Assessment and Specific Conditions: Consistent with 2 CFR 200.206, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. Integrity and Performance System: If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2), we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management.

We may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS. Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

5. In General. In accordance with the Office of Management and Budget’s guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive Orders, the Department will review and consider applications for funding pursuant to this notice inviting applications in accordance with:

(a) Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);

(b) Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);

(c) Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

(d) Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

VI. Award Administration Information

1. Award Notices: If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. Administrative and National Policy Requirements: We identify administrative and national policy requirements in the application package and reference these and other requirements in the Applicable Regulations section of this notice.

We reference the regulations outlining the terms and conditions of an award in the Applicable Regulations section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. Open Licensing Requirements: Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan
In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under FOR FURTHER INFORMATION CONTACT, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requester with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the Federal Register. You may access the official edition of the Federal Register and the Code of Federal Regulations at www.govinfo.gov. At this site you can view this document, as well as all other documents of this Department published in the Federal Register, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the Federal Register by using the article search feature at www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

James F. Lane,
Principal Deputy Assistant Secretary,
Delegated the Authority to perform the Functions and Duties of the Assistant Secretary, Office of Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Agency Information Collection Revision

AGENCY: U.S. Department of Energy.
ACTION: Submission for Office of Management and Budget (OMB) review: comment request.

SUMMARY: The Department of Energy (DOE) has submitted request to revise an information collection request to the OMB under the provisions of the Paperwork Reduction Act of 1995 in connection with the issuance of an interim final rule. The information collection requests a revision the DOE Loan Guarantees for Energy Projects, OMB Control Number 1910–5134.

DATES: Comments regarding this collection must be received on or before July 3, 2023. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, please advise the OMB Desk Officer of your intention to make a submission as soon as possible. The Desk Officer may be telephoned at (202) 881–8865.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAmain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Mr. Steven Westhoff, Attorney-Advisor, Loan Programs Office, email: LPO.IFR@hq.doe.gov, or phone: (240) 220–4994. The collection instruments can be viewed at: https://www.energy.gov/lpo/title-17-clean-energy-financing (Title 17 Program Guidance); and https://www.energy.gov/lpo/articles/tribal-energy-loan-guarantee-program-solicitation-current (TELGP solicitation).

SUPPLEMENTARY INFORMATION: This information collection request contains:
(1) OMB No.: 1910–5134; (2) Information Collection Request Title: DOE Loan Guarantees for Energy Projects; (3) Type of Request: Revision; (4) Purpose: This information collection request revision is submitted in connection with the issuance of an interim final rule “Loan Guarantees for Clean Energy Projects” at 10 CFR part 609. The revision adds the “Program Guidance for Title 17 Clean Energy Financing Program” as a collection instrument under the control number. The revision also explains the public reporting burden associated with the information collection under the Program Guidance for Title 17 Clean Energy Financing Program; (5) Annual Estimated Number of Respondents: 92; (6) Annual Estimated Number of Total Responses: 92; (7) Annual Estimated Number of Burden Hours: 178; (8) Annual Estimated Reporting and Recordkeeping Cost Burden: $2,544,421.
