B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC–2023–0111 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

This proposed ISG is intended to provide clarifying guidance to facilitate stakeholder understanding of the NRC’s position on the use of the decommissioning trust fund (DTF) during operations for major radioactive component (MRC) disposal.

The NRC’s reactor licensing regulations in part 50 of title 10 of the *Code of Federal Regulations* (10 CFR),

“Domestic Licensing of Production and Utilization Facilities,” establish requirements for providing assurance that funding will be available to radiologically decommission a reactor facility and terminate the part 50 license. Specifically, these requirements address, among other things, the amount of decommissioning funding to be provided, the methods to be used for assuring sufficient funding, and provisions restricting the use of the DTF during operations.

Two separate petitions for rulemaking (PRM) were submitted to the NRC for consideration in 2008 and 2019 requesting that the NRC revise the definition of *Decommissioning* in 10 CFR 50.2 and amend 10 CFR 50.82 to allow access to the DTF to pay for the cost of the disposal of MRCs prior to permanent cessation of operations at nuclear power plants. The Commission subsequently denied both petitions, noting that the subject is adequately covered by existing regulations, including the exemption process in 10 CFR 50.12, “Specific exemptions.” In the analysis recommending denial of the PRMs, the NRC staff notes that any withdrawal of funds from the DTF during operations, other than those allowed by NRC regulations, may challenge the underlying intent of the decommissioning funding regulations. Therefore, only under extraordinary circumstances would a withdrawal from the DTF prior to permanent cessation of operations be permissible. However, the NRC staff envisions certain circumstances, which could be stated in an exemption request, that may lead to the approval of the particular request, based on the totality of the facts. This draft ISG discusses the various ways and means by which the DTF could be used to cover the cost of MRC disposal during operations, including what information would assist the NRC staff in assessing a licensee’s request for exemption from the regulations related to the activity.
