FEDERAL REGISTER

Vol. 88 Wednesday,
No. 118 June 21, 2023

Pages 39995–40676

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 88 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 50 and 52

[NRC–2023–0028]

Regulatory Guide: Sizing Large Lead-Acid Storage Batteries

AGENCY: Nuclear Regulatory Commission.

ACTION: Final guide; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing Revision 2 to Regulatory Guide (RG) 1.212, ''Sizing Large Lead-Acid Storage Batteries''. This RG describes an approach that is acceptable to the staff of the NRC to meet regulatory requirements for sizing large lead-acid storage batteries for production and utilization facilities.

DATES: Revision 2 to RG 1.212 is available on June 21, 2023.

ADDRESSES: Please refer to Docket ID NRC–2023–0028 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0028. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

Revision 2 to RG 1.212 and the regulatory analysis may be found in ADAMS under Accession Nos. ML23118A344 and ML22307A144, respectively.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

FOR FURTHER INFORMATION CONTACT: Michael Eudy, Office of Nuclear Regulatory Research, telephone: 301–415–3104; email: *Michael.Eudy@nrc.gov* and Liliana Ramadan, Office of Nuclear Reactor Regulation, telephone: 301–415–2463; email: *Liliana.Ramadan@nrc.gov.* Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC is issuing a revision in the NRC's ''Regulatory Guide'' series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

The proposed Revision 2 to RG 1.212 was issued with a temporary identification of Draft Regulatory Guide, (DG)–1418. This revision of the RG (Revision 2) endorses, with some limitations and a clarification, IEEE Std. 485–2020, ''IEEE Recommended Practice for Sizing Lead-Acid Batteries for Stationary Applications,'' and applies to production and utilization facilities licensed under parts 50 and 52 of title 10 of the *Code of Federal Regulations* (10 CFR) within the scope of this RG.

II. Additional Information

The NRC published a notice of the availability of DG–1418 in the **Federal Register** on March 6, 2023 (88 FR 13735) for a 30-day public comment period. The public comment period closed on April 5, 2023. Public comments on DG–1418 and the staff responses to the public comments are available in ADAMS under Accession No. ML23118A345.

As noted in the **Federal Register** on December 9, 2022 (87 FR 75671), this document is being published in the ''Rules'' section of the **Federal Register** to comply with publication requirements in 1 CFR chapter I.

III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Backfitting, Forward Fitting, and Issue Finality

Issuance of RG 1.212, Revision 2, does not constitute backfitting as defined in 10 CFR 50.109, ''Backfitting,'' and as described in NRC Management Directive (MD) 8.4, ''Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests''; affect the issue finality of an approval issued under 10 CFR part 52; or constitute forward fitting as defined in MD 8.4 because, as explained in this RG, licensees are not required to comply with the positions set forth in this RG.

V. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at *https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html.* Suggestions will be considered in future updates and enhancements to the ''Regulatory Guide'' series.

Dated: June 15, 2023.

For the Nuclear Regulatory Commission.

Meraj Rahimi,

Chief, Regulatory Guide and Programs Management Branch, Division of Engineering, Office of Nuclear Regulatory Research.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0921; Project Identifier AD–2022–01430–T; Amendment 39–22471; AD 2023–12–13]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022–05–04, which applied to all The Boeing Company Model 737–100, –200, –200C, –300, –400, –500, –600, –700, –700C, –800, –900, and –900ER series airplanes, except for Model 737–200 and –200C series airplanes equipped with a certain flight control system. AD 2022–05–04 required revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate specific operating procedures for instrument landing system (ILS) approaches, speedbrake deployment, go-arounds, and missed approaches, when in the presence of interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band) as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–05–04, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This AD requires revising the limitations and operating procedures sections of the existing AFM to incorporate specific operating procedures for ILS approaches, speedbrake deployment, go-arounds, and missed approaches, due to the presence of 5G C-Band interference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 21, 2023.

ADDRESSES: *AD Docket:* You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0921; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2022–05–04, Amendment 39–21955 (87 FR 10299, February 24, 2022) (AD 2022–05–04). AD 2022–05–04 applied to all The Boeing Company (Boeing) Model 737–100, –200, –200C, –300, –400, –500, –600, –700, –700C, –800, –900, and –900ER series airplanes, except for Model 737–200 and –200C series airplanes equipped with a certain flight control system. The NPRM published in the **Federal Register** on May 3, 2023 (88 FR 27725). The NPRM was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience 5G C-Band interference, and a determination that, during approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged.

In the NPRM, the FAA proposed to retain the AFM revisions required by AD 2022–05–04 until June 30, 2023. On or before June 30, 2023, the FAA proposed to require replacing those AFM revisions with limitations requiring the same procedures for dispatch or release to airports, and approach, landing, and go-around on runways, at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the FAA proposed to allow the procedures at 5G CMAs as identified in an FAA Domestic Notice. The FAA proposed this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

Discussion of Final Airworthiness Directive

Comments

The FAA provided the public with an opportunity to comment on the proposed AD and received comments from seven commenters. The following presents the comments received on the NPRM and the FAA's response to each comment.

Support for NPRM

Boeing, the Air Line Pilots Association, International (ALPA), and an individual supported the NPRM without change.

The supportive comments from ALPA included additional viewpoints without a suggestion specific to the AD or a request the FAA can act on. These comments are outside the scope of this AD.

Request To Clarify AD Issue Dates

Comment summary: FlyPersia Airlines commented that the issue dates referenced for AD 2022–23–12 and AD 2022–05–04 in the background section of the proposed AD are incorrect. The commenter stated that where ''The FAA issued AD 2022–23–12 (86 FR 69984, December 9, 2021)'' is stated, the correct date should be December 7, 2021; in same section where the proposed AD specifies ''AD 2022–05–04 (87 FR 10299, February 24, 2022),'' the commenter stated the correct date should be February 16, 2022.

FAA response: The dates quoted by the commenter are within the parenthetical citations for referencing documents published in the **Federal Register** by volume, page, and publication date. These dates represent the dates each AD published in the **Federal Register**. The December 7, 2021, and February 24, 2022, dates the commenter referenced are the issuance dates specified in the signature block at the end of each AD (*i.e.,* the dates on which the ADs were issued by the FAA). No change to this AD is necessary because the citation dates are the correct publication dates.

Request To Extend Compliance Time

Comment summary: Southwest Airlines and American Airlines expressed concern regarding the compliance time for the proposed actions and requested the FAA revise the AD to provide a minimum of 30 days from the effective date of the AD.

FAA response: The FAA understands the commenters' concerns and made every effort to publish this AD as soon as possible. After refraining from operating at their FCC-authorized levels for a year and a half, wireless companies are now able to operate at higher levels, yet still not at the levels authorized. Specifically, wireless companies expect to operate their networks in urban areas with minimal restrictions due to the completion of retrofits. Additionally, the FAA anticipates 19 additional telecommunication companies will begin transmitting in the C-Band after June 30, 2023. Although the FAA continues to work with the companies that intend to transmit in the 3.7–3.98–GHz band near 5G CMAs, the FAA has no agreement with those companies to provide the FAA with tower locations and other information necessary to support the current NOTAM/AMOC process. Therefore, the FAA will not be able to extend the June 30, 2023, date.

Effect of Winglets on Accomplishment of the Proposed Actions

Comment summary: Aviation Partners Boeing stated that installing winglets under supplemental type certificate (STC) STC01219SE and STC ST00830SE on applicable Boeing models does not affect accomplishment of the actions specified in the proposed AD.

FAA response: The FAA agrees. The FAA has not changed this AD in this regard.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Interim Action

The FAA considers this AD to be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Effective Date

Section 553(d) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) requires publication of a rule not less than 30 days before its effective date. However, section 553(d) authorizes agencies to make rules effective in less than 30 days when the agency finds ''good cause.'' Radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 5G C-Band. This interference can cause other airplane systems to not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. To address this unsafe condition, the actions required by this AD must be accomplished before the compliance date of June 30, 2023. The FAA based this date on the changes to the 5G C-Band environment beginning on July 1, 2023. These changes include increased wireless broadband deployment and transmissions closer to the parameters authorized by the FCC. The earlier operators learn of the requirements in this AD, the earlier they can take action to ensure compliance. An effective date less than 30 days would ensure the AD is codified earlier, thereby increasing awareness of its requirements. Therefore, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment immediately effective.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this AD largely maintains the AFM limitations currently required by AD 2022–05–04, the FAA acknowledges that this AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct.

The FAA estimates that this AD affects 2,328 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–05–04)	1 work-hour × $85 per hour [1] = $85	$0	$85	$197,880
New AFM revisions (new action)	1 work-hour × $85 per hour = $85 ..	0	85	[2] 197,880

[1] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

[2] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 737–100, –200, –200C, –300, –400, –500, –600, –700, –700C, –800, –900, or –900ER transport category airplane.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–05–04, Amendment 39–21955 (87 FR 10299, February 24, 2022), and

■ b. Adding the following new AD:

2023–12–13 The Boeing Company: Amendment 39–22471; Docket No. FAA–2023–0921; Project Identifier AD–2022–01430–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 21, 2023.

(b) Affected ADs

This AD replaces AD 2022–05–04, Amendment 39–21955 (87 FR 10299, February 24, 2022) (AD 2022–05–04).

(c) Applicability

This AD applies to all The Boeing Company 737–100, –200, –200C, –300, –400, –500, –600, –700, –700C, –800, –900, and –900ER series airplanes, certificated in any category, except for Model 737–200 and –200C series airplanes equipped with an SP–77 flight control system.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that, during approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. The FAA is issuing this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (g) of AD 2022–05–04.

(1) Within 2 days after February 24, 2022 (the effective date of AD 2022–05–04): Revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h)(1) of this AD into the existing AFM.

Figure 3 to paragraph (h)(1)—*AFM Limitations Revisions*

(Required by AD 2022-05-04)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around
The following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Approach, Landing, and Go-Around
Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(2) Within 2 days after February 24, 2022 (the effective date of AD 2022–05–04): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(2) of this AD or figure 5 to paragraph (h)(2) of this AD, as applicable. This may be done by inserting a copy of figure 4 to paragraph (h)(2) or figure 5 to paragraph (h)(2) of this AD, as applicable, into the Operating Procedures Section of the existing AFM.

Figure 4 to paragraph (h)(2)—*AFM Operating Procedures Revision for Model 737–100, –200, –200C, –300, –400, and –500 series airplanes*

(Required by AD 2022-05-04)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches
For ILS approaches not prohibited by AD 2021-23-12, during any ILS approach with autopilot engaged or flight director ON, execute a go-around for any of the following conditions, unless the runway environment is in sight and a manual, visual landing can be accomplished:

- If the flight directors automatically retract from view, or
- If the pitch guidance indicates FLARE mode prematurely, or
- If the autothrottle retards to IDLE prematurely.

During Go-Around and Missed Approach
If go-around is required, ensure thrust is increased to go-around power. Do not use flight director, autopilot, or autothrottles until reaching a safe altitude. TOGA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

Figure 5 to paragraph (h)(2)—AFM *Operating Procedures Revision for Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes*

(Required by AD 2022-05-04)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, during any ILS (and GLS if installed) approach with autopilot engaged or flight director ON, execute a go-around for any of the following conditions, unless the runway environment is in sight and a manual, visual landing can be accomplished:

- If the flight directors automatically retract from view, or
- If the pitch guidance indicates FLARE mode prematurely, or
- If the autothrottle retards to IDLE prematurely.

Landing

Adjust operational (time of arrival) landing distance for manual speedbrakes. Automatic speedbrake deployment may not occur after touchdown.

During Go-Around and Missed Approach

If go-around is required, ensure thrust is increased to go-around power. Do not use flight director, autopilot, or autothrottles until reaching a safe altitude. TOGA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

(i) New Requirement: AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (i) of this AD. This may be done by inserting a copy of figure 6 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (i)—*AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-13)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in the contiguous U.S. airspace.

Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(j) New Requirement: AFM Limitations Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 7 to paragraph (j) of this AD. This may be done by inserting a copy of figure 7 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 7 to paragraph (j) of this AD, remove the AFM

revision required by paragraph (h)(1) of this AD.

Figure 7 to paragraph (j)—*AFM Limitations Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-13)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in the contiguous U.S. airspace unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(k) New Requirement: AFM Operating Procedures Revision

For all airplanes, do the actions specified in paragraphs (k)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 8 to paragraph (k) of this AD or figure 9 to paragraph (k) of this AD, as applicable. This may be done by inserting a copy of figure 8 to paragraph (k) of this AD or figure 9 to paragraph (k) of this AD, as applicable, into the Operating Procedures Section of the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(2) of this AD.

(2) Before further flight after incorporating the operating procedures specified in figure 8 to paragraph (k) of this AD or figure 9 to paragraph (k) of this AD, remove the AFM revision required by paragraph (h)(2) of this AD.

Figure 8 to paragraph (k)—*AFM Operating Procedures Revision for Model 737–100, –200, –200C, –300, –400, and –500 series airplanes*

(Required by AD 2023-12-13)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, during any ILS approach with autopilot engaged or flight director ON, execute a go-around for any of the following conditions, unless the runway environment is in sight and a manual, visual landing can be accomplished:

- If the flight directors automatically retract from view, or
- If the pitch guidance indicates FLARE mode prematurely, or
- If the autothrottle retards to IDLE prematurely.

During Go-Around and Missed Approach

If go-around is required, ensure thrust is increased to go-around power. Do not use flight director, autopilot, or autothrottles until reaching a safe altitude. TOGA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

Figure 9 to paragraph (k)—*AFM Operating Procedures Revision for Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes*

(Required by AD 2023-12-13)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, during any ILS (and GLS if installed) approach with autopilot engaged or flight director ON, execute a go-around for any of the following conditions, unless the runway environment is in sight and a manual, visual landing can be accomplished:

- If the flight directors automatically retract from view, or
- If the pitch guidance indicates FLARE mode prematurely, or
- If the autothrottle retards to IDLE prematurely.

Landing

Adjust operational (time of arrival) landing distance for manual speedbrakes. Automatic speedbrake deployment may not occur after touchdown.

During Go-Around and Missed Approach

If go-around is required, ensure thrust is increased to go-around power. Do not use flight director, autopilot, or autothrottles until reaching a safe altitude. TOGA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

(l) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(m) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

(n) Material Incorporated by Reference

None.

Issued on June 9, 2023.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2023–13151 Filed 6–16–23; 11:15 am]

BILLING CODE 4910–13–C

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0922; Project Identifier AD–2022–01431–T; Amendment 39–22472; AD 2023–12–14]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022–06–16, which applied to all The Boeing Company Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, and 747–400F series airplanes. AD 2022–06–16 required revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate specific operating procedures for takeoff, instrument landing system (ILS) approaches, non-precision approaches, and go around and missed approaches, when in the presence of interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band) interference as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–06–16, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This AD requires revising the limitations section of the existing AFM to incorporate limitations requiring

specific operating procedures, and retains the operating procedures for takeoff, ILS approaches, non-precision approaches, and go-around and missed approaches from AD 2022–06–16, due to the presence of 5G C-Band interference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 21, 2023.

ADDRESSES: *AD Docket:* You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0922; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2022–06–16, Amendment 39–21982 (87 FR 14780, March 16, 2022) (AD 2022–06–16). AD 2022–06–16 applied to all The Boeing Company (Boeing) Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, and 747–400F series airplanes. The NPRM published in the **Federal Register** on May 3, 2023 (88 FR 27734). The NPRM was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience 5G C-Band interference, and a determination that during takeoff, approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged.

In the NPRM, the FAA proposed to retain the AFM revisions required by AD 2022–06–16 until June 30, 2023. On or before June 30, 2023, the FAA proposed to require replacing those AFM revisions with limitations requiring the same procedures for dispatch or release to airports, and takeoff, approach, landing, and go-around on runways at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the FAA proposed that the procedures would not be required at 5G C-Band mitigated airports (5G CMAs) as identified in an FAA Domestic Notice. The FAA proposed this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

Discussion of Final Airworthiness Directive

Comments

The FAA provided the public with an opportunity to comment on the proposed AD and received comments from two commenters. Boeing and the Air Line Pilots Association, International (ALPA), supported the NPRM without change. The supportive comments from ALPA included additional viewpoints without a suggestion specific to the AD or a request the FAA can act on. These comments are outside the scope of this final rule.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Interim Action

The FAA considers this AD to be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Effective Date

Section 553(d) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) requires publication of a rule not less than 30 days before its effective date. However, section 553(d) authorizes agencies to make rules effective in less than 30 days when the agency finds ''good cause.'' Radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 5G C-Band. This interference can cause other airplane systems to not properly function, resulting in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane. To address this unsafe condition, the actions required by this AD must be accomplished before the compliance date of June 30, 2023. The FAA based this date on the changes to the 5G C-Band environment beginning on July 1, 2023. These changes include increased wireless broadband deployment and transmissions closer to the parameters authorized by the FCC. The earlier operators learn of the requirements in this AD, the earlier they can take action to ensure compliance. An effective date less than 30 days would ensure the AD is codified earlier, thereby increasing awareness of its requirements. Therefore, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment immediately effective.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this AD largely maintains the AFM limitations currently required by AD 2022–06–16, the FAA acknowledges that this AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct.

The FAA estimates that this AD affects 137 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–02–16).	1 work-hour × $85 per hour[1] = $85	$0	$85	$11,645
New AFM revisions (new action)	1 work-hour × $85 per hour = $85	0	85	[2] 11,645

[1] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.
[2] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, or 747–400F transport category airplane.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:
■ a. Removing Airworthiness Directive (AD) 2022–06–16, Amendment 39–21982 (87 FR 14780, March 16, 2022), and
■ b. Adding the following new AD:

2023–12–14 The Boeing Company: Amendment 39–22472; Docket No. FAA–2023–0922; Project Identifier AD–2022–01431–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 21, 2023.

(b) Affected ADs

This AD replaces AD 2022–06–16, Amendment 39–21982 (87 FR 14780, March 16, 2022) (AD 2022–06–16).

(c) Applicability

This AD applies to all The Boeing Company Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, and 747–400F series airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that during takeoff, approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. The FAA is issuing this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

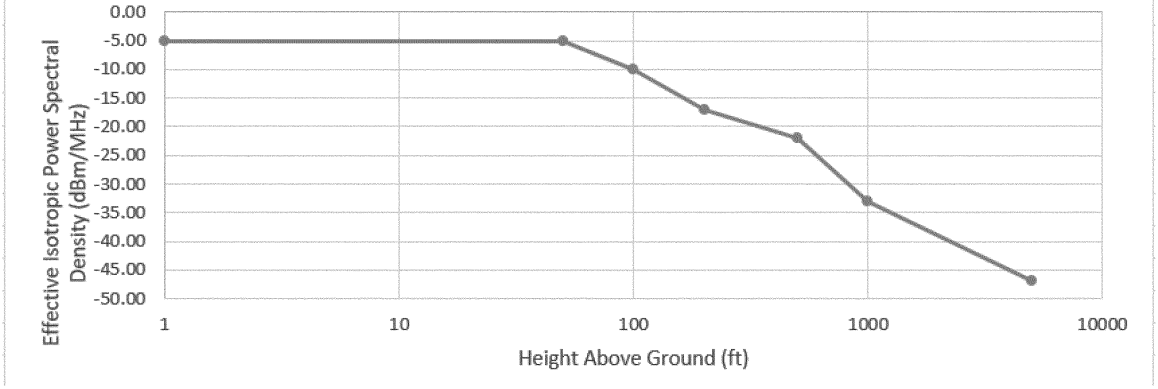
(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

(ii) Tolerance to radio altimeter interference, for the spurious emissions (3.7–3.98 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*

1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (h) of AD 2022–02–16.

(1) Within 2 days after March 16, 2022 (the effective date of AD 2022–06–16): Revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h)(1) of this AD into the existing AFM.

Figure 3 to paragraph (h)(1)—*AFM Limitations Revision*

(Required by AD 2022-06-16)

Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around

The following limitations are required for dispatch or release to airports, and takeoff, approach, landing, and go-around on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Takeoff, Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around procedure contained in the Operating Procedures section of this AFM.

(2) Within 2 days after March 16, 2022 (the effective date of AD 2022–06–16): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(2) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(2) of this AD into the existing AFM.

Figure 4 to paragraph (h)(2)—*AFM Operating Procedures Revision*

(Required by AD 2022-06-16)

Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around

Takeoff

If autopilot does not engage above the minimum altitude, when at a safe altitude, select both flight director switches OFF, then ON, to re-engage. LNAV and VNAV may not engage or engage at an erroneous altitude after departure.

ILS Approaches

For ILS approaches, disconnect the autopilot and autothrottle, and place both flight director switches to OFF prior to glideslope intercept. Do not set RADIO minimums on the EFIS control panel, use BARO minimums only.

Non-Precision Approaches

Autopilot, autothrottles, and flight directors may be used. Do not use autothrottles if the autopilot is disengaged. Prior to descending below MDA, disconnect the autothrottle and disengage the autopilot.

Landing

Do not rely on radio altimeter-based altitude aural callouts during approach. Adjust operational (time of arrival) landing distance for manual speedbrake deployment.

During Go-Around and Missed Approach

If go-around is required, ensure thrust is increased to go-around power.

When the flight director switches are OFF, push either TO/GA switch to display the flight director bars. When able, turn both flight directors to ON.

TO/GA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

(i) New Requirement: AFM Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 5 to paragraph (i) of this AD. This may be done by inserting a copy of figure 5 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 5 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 5 to paragraph (i)—*AFM Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-14)

Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and takeoff, approach, landing, and go-around on runways, in the contiguous U.S. airspace.

Takeoff, Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around procedure contained in the Operating Procedures section of this AFM.

(j) New Requirement: AFM Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (j) of this AD. This may be done by inserting a copy of figure 6 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (j)—*AFM Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-14)

Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and takeoff, approach, landing, and go-around on runways, in the contiguous U.S. airspace unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Takeoff, Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around procedure contained in the Operating Procedures section of this AFM.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (l) of this AD. Information may be emailed to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021), providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(l) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

(m) Material Incorporated by Reference

None.

Issued on June 9, 2023.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–C

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0671; Project Identifier AD–2022–01428–T; Amendment 39–22469; AD 2023–12–11]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022–03–20, which applied to all The Boeing Company Model 737–8, 737–9, and 737–8200 airplanes. AD 2022–03–20 required revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate limitations prohibiting the use of certain minimum equipment list (MEL) items, and to incorporate operating procedures for calculating takeoff and landing distances, when in the presence of interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band) as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–03–20, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This AD requires revising the limitations section of the existing AFM to incorporate limitations prohibiting the use of certain MEL items, and would retain the operating procedures from AD 2022–03–20 for calculating takeoff and landing distances, due to the presence of 5G C-Band interference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 21, 2023.

ADDRESSES: *AD Docket:* You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0671; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2022–03–20, Amendment 39–21937 (87 FR 4787, January 31, 2022) (AD 2022–03–20). AD 2022–03–20 applied to all The Boeing Company Model 737–8, 737–9, and 737–8200 airplanes. The NPRM published in the **Federal Register** on May 3, 2023 (88 FR 27786). The NPRM was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience 5G C-Band interference, and a determination that, during takeoffs and landings, as a result of this interference, certain airplane systems may not properly function, resulting in longer than normal landing or rejected takeoff distances due to the effect on thrust reverser deployment, spoilers, speedbrake deployment, and increased idle thrust, regardless of the approach type or weather.

In the NPRM, the FAA proposed to retain the requirements of AD 2022–03–20 until June 30, 2023. On or before June 30, 2023, the FAA proposed to require replacing those AFM limitations with limitations prohibiting the same dispatching or releasing to airports, and takeoff or landings on runways, and use of certain MEL items at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the FAA proposed to allow the prohibited operations at 5G C-Band mitigated airports (5G CMAs) as identified in an FAA Domestic Notice. The FAA proposed this AD to address degraded deceleration performance, which could lead to a runway excursion.

Discussion of Final Airworthiness Directive

Comments

The FAA provided the public with an opportunity to comment on the proposed AD and received comments from four commenters. The following presents the comments received on the NPRM and the FAA's response to each comment.

Support for NPRM

Boeing and the Air Line Pilots Association, International (ALPA), supported the NPRM without change.

The supportive comments from ALPA included additional viewpoints without a suggestion specific to the AD or a request the FAA can act on. These comments are outside the scope of this AD.

Request To Extend Compliance Time

Comment summary: Southwest Airlines and American Airlines expressed concern regarding the compliance time for the proposed actions and requested the FAA revise the AD to provide a minimum of 30 days from the effective date of the AD.

FAA response: The FAA understands the commenters' concerns and made every effort to publish this AD as soon as possible. After refraining from operating at their FCC-authorized levels for a year and a half, wireless companies are now able to operate at higher levels, yet still not at the levels authorized. Specifically, wireless companies expect to operate their networks in urban areas with minimal restrictions due to the completion of retrofits. Additionally, the FAA anticipates 19 additional telecommunication companies will begin transmitting in the C-Band after June 30, 2023. Although the FAA continues to work with the companies that intend to transmit in the 3.7–3.98-GHz band near 5G CMAs, the FAA has no agreement with those companies to provide the FAA with tower locations and other information necessary to support the current NOTAM/AMOC process. Therefore, the FAA will not be able to extend the June 30, 2023, date.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Interim Action

The FAA considers this AD to be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. Once a new radio altimeter TSO is developed, approved, and available,

the FAA might consider additional rulemaking.

Effective Date

Section 553(d) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) requires publication of a rule not less than 30 days before its effective date. However, section 553(d) authorizes agencies to make rules effective in less than 30 days when the agency finds ''good cause.'' Radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 5G C-Band. This interference can cause other airplane systems to not properly function, resulting in longer than normal landing or rejected takeoff distances due to the effect on thrust reverser deployment, spoilers, speedbrake deployment, and increased idle thrust, regardless of the approach type or weather. To address this unsafe condition, the actions required by this AD must be accomplished before the compliance date of June 30, 2023. The FAA based this date on the changes to the 5G C-Band environment beginning on July 1, 2023. These changes include increased wireless broadband deployment and transmissions closer to the parameters authorized by the FCC. The earlier operators learn of the requirements in this AD, the earlier they can take action to ensure compliance. An effective date less than 30 days would ensure the AD is codified earlier, thereby increasing awareness of its requirements. Therefore, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment immediately effective.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this AD largely maintains the AFM limitations currently required by AD 2022–03–20, the FAA acknowledges that this AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct.

The FAA estimates that this AD affects 276 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–03–20).	1 work-hour [1] × $85 per hour = $85	$0	$85	$23,460
New AFM revisions (new action)	1 work-hour × $85 per hour = $85	0	85	[2] 23,460

[1] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.
[2] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 737–8, 737–9, or 737–8200 transport category airplane.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–03–20, Amendment 39–21937 (87 FR 4787, January 31, 2022), and

■ b. Adding the following new AD:

2023–12–11 The Boeing Company: Amendment 39–22469; Docket No. FAA–2023–0671; Project Identifier AD–2022–01428–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 21, 2023.

(b) Affected ADs

This AD replaces AD 2022–03–20, Amendment 39–21937 (87 FR 4787, January 31, 2022) (AD 2022–03–20).

(c) Applicability

This AD applies to all The Boeing Company 737–8, 737–9, and 737–8200 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that, during takeoffs and landings, as a result of this interference, certain airplane systems may not properly

function, resulting in longer than normal landing or rejected takeoff distances due to the effect on thrust reverser deployment, spoilers, speedbrake deployment, and increased idle thrust, regardless of the approach type or weather. The FAA is issuing this AD to address degraded deceleration performance, which could lead to a runway excursion.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

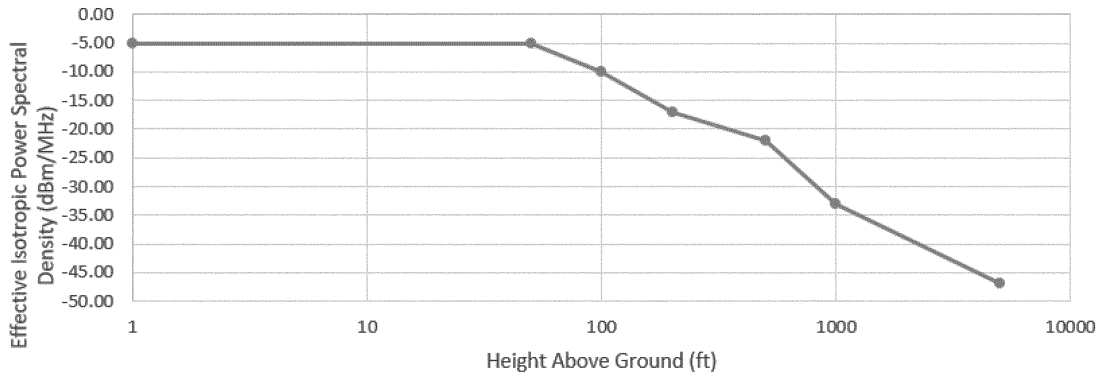
(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

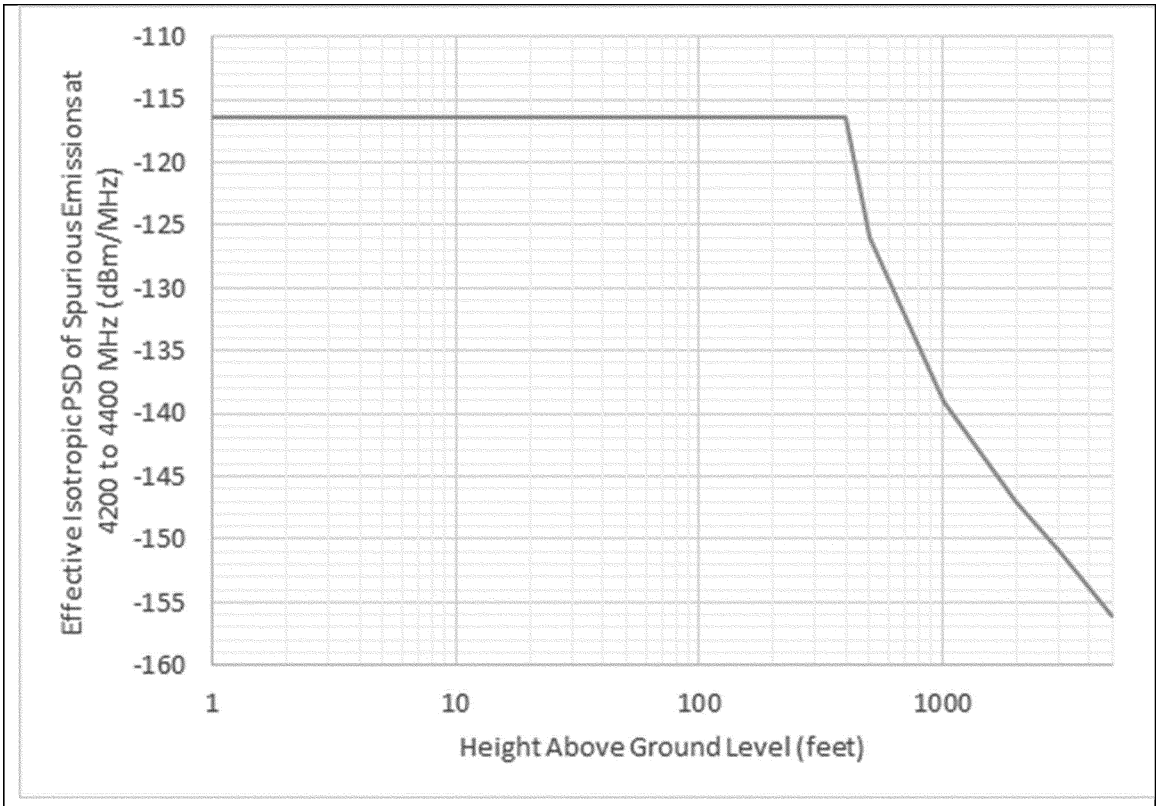
Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

(ii) Tolerance to radio altimeter interference, for the spurious emissions (3.7–3.98 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(4) Runway condition codes are defined in figure 3 to paragraph (g)(4) of this AD.

Figure 3 to paragraph (g)(4)—*Runway Condition Codes*

Runway Condition Code	Runway Condition Description	Reported Braking Action
6	Dry	Dry
5	Wet (smooth, grooved, or porous friction course (PFC)) or frost 3 mm (0.12 inch) or less of: water, slush, dry snow, or wet snow	Good
4	Compacted snow at or below -15°C (5°F) outside air temperature (OAT)	Good to medium
3	Wet (slippery), dry snow, or wet snow (any depth) over compacted snow Greater than 3 mm (0.12 inch) of: dry snow or wet snow Compacted snow at OAT warmer than -15°C (5°F)	Medium
2	Greater than 3 mm (0.12 inch) of: water or slush	Medium to poor
1	Ice	Poor
0	Wet ice, water on top of compacted snow, dry snow, or wet snow over ice	Nil

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (h) of AD 2022–03–20.

(1) Within 2 days after January 31, 2022 (the effective date of AD 2022–03–20): Revise the Limitations Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(1) of this AD into the existing AFM.

Figure 4 to paragraph (h)(1)—*AFM Limitations Revisions*

(Required by AD 2022-03-20)

Radio Altimeter 5G C-Band Interference, Takeoff and Landing Performance

The following limitations are required for dispatch or release to airports, and takeoff or landing on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-01 – Antiskid Systems
- 32-42-02 – Alternate Antiskid Valves
- 32-42-03 – Automatic Brake System
- 32-44-01 – Parking Brake Valve

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or release to, or takeoff or landing on, runways with a runway condition code of 1 or 0 is prohibited.

Takeoff and Landing Performance

Operators must use the 5G C-Band Interference Takeoff Performance and Landing Distance Calculations procedure contained in the Operating Procedures Section of this AFM.

(2) Within 2 days after January 31, 2022 (the effective date of AD 2022–03–20): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 5 to paragraph (h)(2) of this AD. This may be done by inserting a copy of figure 5 to paragraph (h)(2) of this AD into the existing AFM.

Figure 5 to paragraph (h)(2)—*AFM Operating Procedures Revision*

(Required by AD 2022-03-20)

5G C-Band Interference Takeoff Performance and Landing Distance Calculations

Dispatch Guidance – Takeoff Performance

Stopping distance during a rejected takeoff (RTO) can be significantly increased due to the following potential effects on airplane systems:

- Limited spoiler extension
- Higher engine idle
- Thrust reversers may not deploy

For the increased stopping distance during an RTO, refer to the Departure Airport, Takeoff Performance section below.

Dispatch Guidance – Destination or Alternate Airport – Landing Performance

Calculate the required landing distance (select Method A or Method B).

Method A: Use of normal landing performance increased by a predetermined percentage

Use Prior to Descent, Required Landing Distance section below.

Method B: Use of the Non-Normal Configuration Landing Distance table for SPOILERS

Use the SPOILERS Non-Normal Configuration Landing Distance table in the Performance chapter of the AFM, or the applicable table below, for flaps 30 or flaps 40.

- Use the distance for MAX MANUAL braking configurations with the appropriate runway condition at estimated time of arrival.
- Apply all of the appropriate distance adjustments to include the reverse thrust adjustment for no reverse (NO REV).

For runway condition codes 6 and 5, obtain the required landing distance by using the higher of:

- The resulting unfactored distance increased by 15%, or
- The normal dispatch calculations.

For runway condition codes 4 and 3, increase the resulting unfactored distance by 15% to obtain the required landing distance.

For runway condition code 2, increase the resulting unfactored distance by 30% to obtain the required landing distance.

End of Method B

Departure Airport, Takeoff Performance
Select Method 1 or 2 to adjust the accelerate stop distance available (ASDA).
Note: Both methods provide an acceptable margin of safety.

Method 1: Adjust the ASDA by a predetermined value.
Adjust the ASDA by using the following adjustment:

Runway Condition Code	Runway Condition Description	Subtract from ASDA
6	Dry	950 feet
5	Wet skid resistant*	2,600 feet
5, 4, or 3	Wet/dry snow/wet snow/compact snow/slippery	3,700 feet
2	Slush or standing water	4,900 feet

*Provided approval to use wet skid resistant data has been received from the appropriate regulatory authority in accordance with the AFM.

Use the adjusted ASDA and complete the takeoff performance calculations using actual departure runway conditions and actual departure environmental conditions. Do not take credit for use of reverse thrust when calculating takeoff performance.

End of Method 1

Method 2: Adjust the ASDA by a predetermined factor.

Multiply the ASDA by the following factor:

Runway Condition Code	Runway Condition Description	ASDA Factor
6	Dry	0.86
5	Wet skid resistant*	0.76
5, 4, or 3	Wet/dry snow/wet snow/compact snow/slippery	0.71
2	Slush or standing water	0.65

*Provided approval to use wet skid resistant data has been received from the appropriate regulatory authority in accordance with the AFM.

Use the adjusted ASDA and complete the takeoff performance calculations using actual departure runway conditions and actual departure environmental conditions. Do not take credit for use of reverse thrust when calculating takeoff performance.

End of Method 2

Prior to takeoff:
Verify normal radio altimeter indications.

Climb out:
- TO/GA mode may not be available

- Monitor pitch mode engagement
- Monitor roll mode engagement
- Autopilot may not engage

Prior to Descent, Required Landing Distance

Do a time of arrival (en route) landing distance assessment using Method A or B. Use the SPOILERS Non-Normal Configuration Landing Distance table in the Performance chapter of the AFM, or the applicable table below, for flaps 30 or flaps 40.

Method A: Use of normal landing performance and increase by a predetermined percentage.

Use the Normal Configuration Landing Distance table for flaps 30 or flaps 40.

Note: The distances and adjustments shown in the Normal Configuration Landing Distance tables are factored and have been increased 15%.

Select the appropriate runway condition.

Select the distance for the MAX MANUAL braking configuration.

Apply all of the appropriate distance adjustments.

Note: Do not apply adjustments for reverse thrust.

To obtain the required landing distance, increase the resulting factored distance by the percentage below in Table 1 based on the runway condition code or runway braking action.

Table 1

Runway Condition Code	Reported Braking Action	Percentage
6	Dry	23%
5	Good	63%
4	Good to medium	56%
3	Medium	65%
2	Medium to poor	113%

Determine autobrake settings using the Determine Autobrake Settings section below.

End of Method A

Method B: Use of the Non-Normal Configuration Landing Distance table for SPOILERS

Use the SPOILERS Non-Normal Configuration Landing Distance table in the Performance chapter of the AFM, or the applicable table below, for flaps 30 or flaps 40.

Select the appropriate runway condition.

Select the distance for MAX MANUAL braking configuration.

Apply all of the appropriate distance adjustments including the reverse thrust adjustment for no reverse (NO REV).

For runway condition codes 6 to 3, increase the resulting unfactored distance by 15% to obtain the required landing distance.

For runway condition code 2, increase the resulting unfactored distance by 30% to obtain the required landing distance.

Determine autobrake settings using the Determine Autobrake Settings section below.

*For landing distance at or below 8,000 ft pressure altitude, apply the STD adjustment. For altitudes higher than 8,000 ft, first apply the STD adjustment to derive a new reference landing distance for 8,000 ft then apply the HIGH adjustment to this new reference distance.

Reference distance is based on MAX MANUAL braking, sea level, standard day, no wind or slope and maximum reverse thrust.

Reference distance includes a distance from threshold to touchdown associated with a flare time of 7 seconds.

Distances are based on SPOILERS failure distances which conservatively approximates the effects of 5G interference after the Reverse Thrust Adjustment for no Reversers is applied.

Actual (unfactored) distances are shown.

Note: per procedure, MAX MANUAL braking is not required for normal operations.

End of Method B

Determine Autobrake Settings

- Determine desired AUTOBRAKE setting by using the normal configuration landing distance.

  Note: Normal manual or normal autobrakes can be used. The use of maximum brakes is not needed except as stated in the During Landing section below.

During Approach

- Monitor radio altimeters for anomalies.
- Monitor performance of autopilot and autothrottle. If the autopilot or autothrottle is not performing as expected, disconnect both the autopilot and autothrottle and apply manual inputs to ensure proper control of flight path.

At DA(H), MDA(H), or the Missed Approach Point

- If suitable visual reference is established, disengage the autopilot and autothrottle and continue for a normal manual landing.

- If a go-around is needed, do the go-around and the missed approach procedure either in manual or automatic flight.

During Landing

- Radio altitude-based altitude aural callouts during approach may not be available or may be erroneous.
- Manual deployment of the speedbrakes may be needed.
- If the thrust reversers do not deploy, immediately ensure the speedbrakes are extended, apply manual braking, and modulate as needed for the existing runway conditions.

Note: In some conditions, maximum manual braking may be needed throughout the entire landing roll.

During Go-around and Missed Approach

- TO/GA mode may not be available.
- Monitor thrust and verify that thrust increases.
- Monitor pitch mode engagement.
- Monitor roll mode engagement.
- Autopilot may not engage.

(i) New Requirement: AFM Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (i) of this AD. This may be done by inserting a copy of figure 6 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (i)—*AFM Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-11)

Radio Altimeter 5G C-Band Interference, Takeoff and Landing Performance

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and takeoff or landing on runways, in the contiguous U.S. airspace.

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-01 – Antiskid Systems
- 32-42-02 – Alternate Antiskid Valves
- 32-42-03 – Automatic Brake System
- 32-44-01 – Parking Brake Valve

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or release to, or takeoff or landing on, runways with a runway condition code of 1 or 0 is prohibited.

Takeoff and Landing Performance

Operators must use the 5G C-Band Interference Takeoff Performance and Landing Distance Calculations procedure contained in the Operating Procedures Section of this AFM.

(j) New Requirement: AFM Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 7 to paragraph (j) of this AD. This may be done by inserting a copy of figure 7 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 7 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 7 to paragraph (j)—*AFM Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-11)

Radio Altimeter 5G C-Band Interference, Takeoff and Landing Performance

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and takeoff or landing on runways, in the contiguous U.S. airspace, unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-01 – Antiskid Systems
- 32-42-02 – Alternate Antiskid Valves
- 32-42-03 – Automatic Brake System
- 32-44-01 – Parking Brake Valve

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or release to, or takeoff or landing on, runways with a runway condition code of 1 or 0 is prohibited.

Takeoff and Landing Performance

Operators must use the 5G C-Band Interference Takeoff Performance and Landing Distance Calculations procedure contained in the Operating Procedures Section of this AFM.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (l) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(l) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

(m) Material Incorporated by Reference

None.

Issued on June 9, 2023.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0923; Project Identifier AD–2022–01432–T; Amendment 39–22473; AD 2023–12–15]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022–09–18, which applied to all The Boeing Company Model 707, 717, and 727 airplanes; Model DC–8, DC–9, and DC–10 airplanes; Model MD–10 and MD–11 airplanes; Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), and MD–88 airplanes; and Model MD 90–30 airplanes. AD 2022–09–18 required revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate specific operating procedures for, depending on the airplane model, instrument landing system (ILS) approaches, non-precision approaches, ground spoiler deployment, and go-around and missed approaches, when in the presence of interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band) as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–09–18, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This AD requires revising the limitations and operating procedures

sections of the AFM to incorporate specific operating procedures for, depending on the airplane model, ILS approaches, non-precision approaches, ground spoiler deployment, and go-around and missed approaches, due to the presence of 5G C-Band interference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 21, 2023.

ADDRESSES: *AD Docket:* You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0923; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2022–09–18, Amendment 39–22038 (87 FR 31097, May 23, 2022) (AD 2022–09–18). AD 2022–09–18 applied to all The Boeing Company (Boeing) Model 707, 717, and 727 airplanes; Model DC–8, DC–9, and DC–10 airplanes; Model MD–10 and MD–11 airplanes; Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), and MD–88 airplanes; and Model MD 90–30 airplanes. The NPRM published in the **Federal Register** on May 3, 2023 (88 FR 27749). The NPRM was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience 5G C-Band interference, and a determination that during approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged.

In the NPRM, the FAA proposed to retain the AFM revisions required by AD 2022–09–18 until June 30, 2023. On or before June 30, 2023, the FAA proposed to require replacing those AFM revisions with limitations requiring the same procedures for, depending on the airplane model, ILS approaches, non-precision approaches, ground spoiler deployment, and go-around and missed approaches, at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the FAA proposed that the procedures would not be required at 5G C-Band mitigated airports (5G CMAs) as identified in an FAA Domestic Notice. The FAA proposed this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

Discussion of Final Airworthiness Directive

Comments

The FAA provided the public with an opportunity to comment on the proposed AD and received comments from three commenters. The following presents the comments received on the NPRM and the FAA's response to each comment.

Support for NPRM

Boeing and the Air Line Pilots Association, International (ALPA), supported the NPRM without change.

The supportive comments from ALPA included additional viewpoints without a suggestion specific to the AD or a request the FAA can act on. These comments are outside the scope of this final rule.

Request To Extend Compliance Time

Comment summary: American Airlines expressed concern regarding the compliance time for the proposed actions and requested the FAA revise the AD to provide a minimum of 30 days from the effective date of the AD.

FAA response: The FAA understands the commenter's concern and made every effort to publish this AD as soon as possible. After refraining from operating at their FCC-authorized levels for a year and a half, wireless companies are now able to operate at higher levels, yet still not at the levels authorized. Specifically, wireless companies expect to operate their networks in urban areas with minimal restrictions due to the completion of retrofits. Additionally, the FAA anticipates 19 additional telecommunication companies will begin transmitting in the C-Band after June 30, 2023. Although the FAA continues to work with the companies that intend to transmit in the 3.7–3.98–GHz band near 5G CMAs, the FAA has no agreement with those companies to provide the FAA with tower locations and other information necessary to support the current NOTAM/AMOC process. Therefore, the FAA will not be able to extend the June 30, 2023, date.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Interim Action

The FAA considers this AD to be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Effective Date

Section 553(d) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) requires publication of a rule not less than 30 days before its effective date. However, section 553(d) authorizes agencies to make rules effective in less than 30 days when the agency finds ''good cause.'' Radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 5G C-Band. This interference can cause other airplane systems to not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. To address this unsafe condition, the actions required by this AD must be accomplished before the compliance date of June 30, 2023. The FAA based this date on the changes to the 5G C-Band environment beginning on July 1, 2023. These changes include increased wireless broadband deployment and transmissions closer to the parameters authorized by the FCC. The earlier operators learn of the requirements in this AD, the earlier they can take action to ensure compliance. An effective date less than 30 days would ensure the AD is codified earlier, thereby increasing awareness of its requirements. Therefore, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d)

for making this amendment immediately effective.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this AD largely maintains the AFM limitations currently required by AD 2022–09–18, the FAA acknowledges that this AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct.

The FAA estimates that this AD affects 476 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–09–18)	1 work-hour × $85 per hour [1] = $85	$0	$85	$40,460
New AFM revisions (new action)	1 work-hour × $85 per hour = $85	0	85	[2] 40,460

[1] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.
[2] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a 707, 717, 727, DC–8, DC–9, DC–10, MD 10, MD–11, DC–9–81, DC–9–82, DC–9–83, DC–9–87, MD–88, or MD–90–30 transport category airplane.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:
■ a. Removing Airworthiness Directive (AD) 2022–09–18, Amendment 39–22038 (87 FR 31097, May 23, 2022), and
■ b. Adding the following new AD:

2023–12–15 The Boeing Company: Amendment 39–22473; Docket No. FAA–2023–0923; Project Identifier AD–2022–01432–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 21, 2023.

(b) Affected ADs

This AD replaces AD 2022–09–18, Amendment 39–22038 (87 FR 31097, May 23, 2022) (AD 2022–09–18).

(c) Applicability

This AD applies to all The Boeing Company airplanes identified in paragraphs (c)(1) through (9) of this AD, certificated in any category.

(1) Model 707–100 Long Body, –200, –100B Long Body, and –100B Short Body series airplanes, and Model 707–300, –300B, –300C, and –400 series airplanes.

(2) Model 717–200 airplanes.

(3) Model 727, 727C, 727–100, 727–100C, 727–200, and 727–200F series airplanes.

(4) Model DC–8–11, DC–8–12, DC–8–21, DC–8–31, DC–8–32, DC–8–33, DC–8–41, DC–8–42, DC–8–43, DC–8–51, DC–8–52, DC–8–53, DC–8–55, DC–8F–54, DC–8F–55, DC–8–61, DC–8–62, DC–8–63, DC–8–61F, DC–8–62F, DC–8–63F, DC–8–71, DC–8–72, DC–8–73, DC–8–71F, DC–8–72F, and DC–8–73F airplanes.

(5) Model DC–9–11, DC–9–12, DC–9–13, DC–9–14, DC–9–15, DC–9–15F, DC–9–21, DC–9–31, DC–9–32, DC–9–32 (VC–9C), DC–9–32F, DC–9–32F (C–9A, C–9B), DC–9–33F, DC–9–34, DC–9–34F, DC–9–41, and DC–9–51 airplanes.

(6) Model DC–10–10, DC–10–10F, DC–10–15, DC–10–30, DC–10–30F (KC–10A and KDC–10), DC–10–40, and DC–10–40F airplanes.

(7) Model MD–10–10F and MD–10–30F airplanes.

(8) Model MD–11 and MD–11F airplanes.

(9) Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), MD–88, and MD–90–30 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that during approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. The FAA is issuing this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at

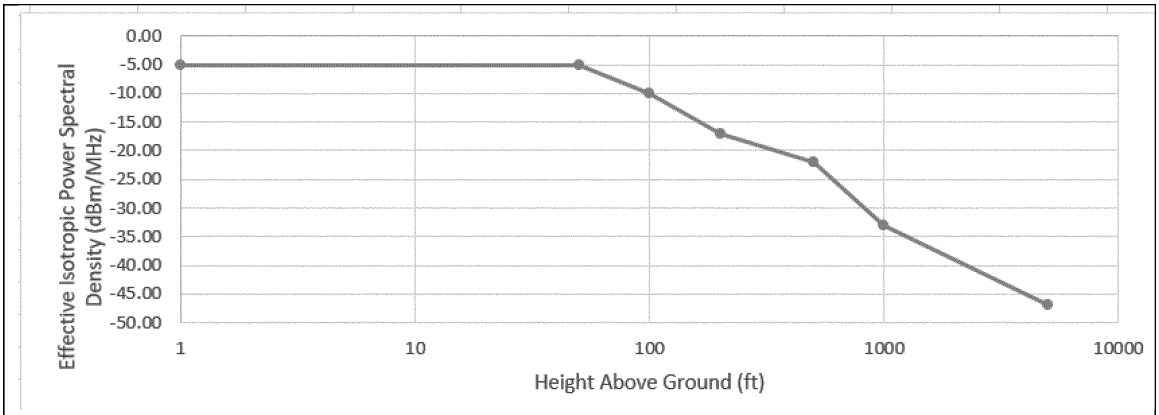
which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

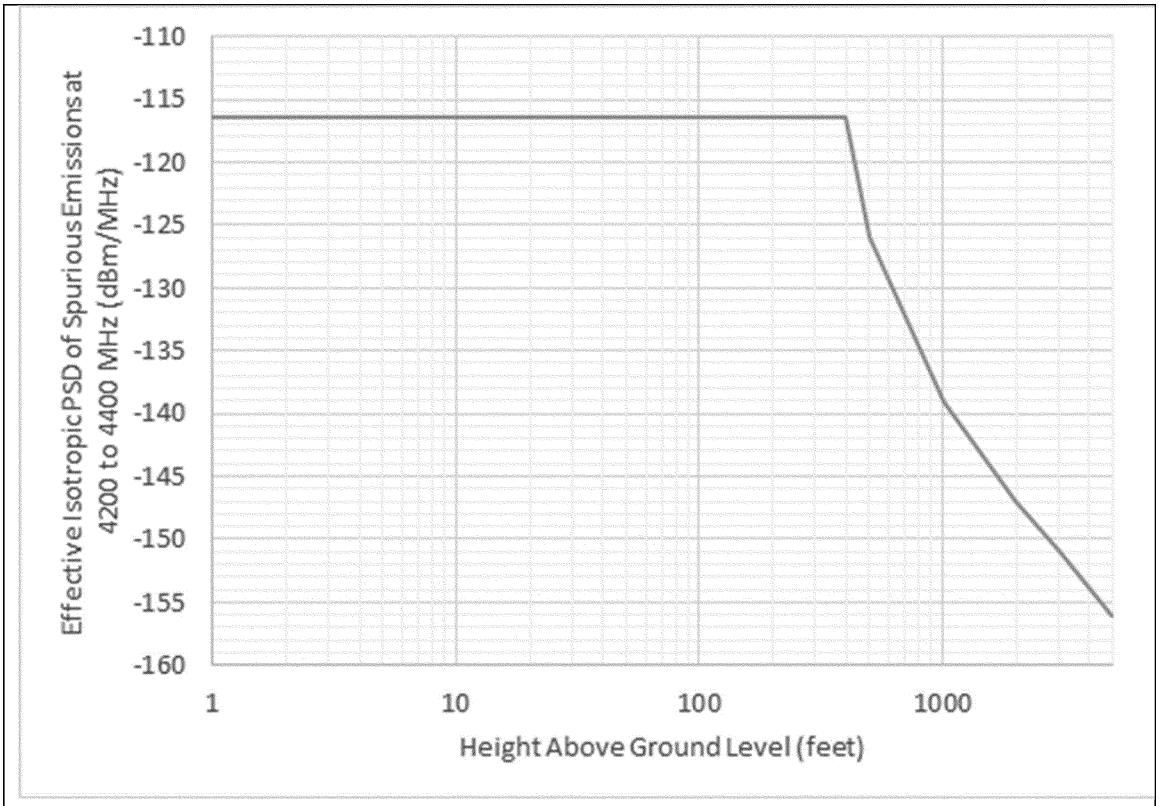
Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

(ii) Tolerance to radio altimeter interference, for the spurious emissions (3.7–3.98 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision-Limitations

This paragraph restates the requirements of paragraph (g) of AD 2022–09–18.

(1) For airplanes identified in paragraphs (c)(1) and (c)(3) through (6) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h)(1) of this AD into the existing AFM.

Figure 3 to paragraph (h)(1)—*AFM Limitations Revision for Model 707, 727, DC–8, DC–9 (except DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), and DC–9–87 (MD–87)), and DC–10*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach Procedures

The following limitations are required for ILS approaches on runways in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

ILS Approaches

Operators must use the Radio Altimeter 5G C-Band Interference, ILS Approaches procedure contained in the Operating Procedures Section of this AFM.

(2) For airplanes identified in paragraphs (c)(2), (7), and (8) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Limitations Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(2) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(2) of this AD into the Limitations Section of the existing AFM.

Figure 4 to paragraph (h)(2)—*AFM Limitations Revision for Model 717, MD–10, and MD–11*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around Procedures

The following limitations are required for approaches, landings, or go-arounds on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

ILS and Non Precision Approaches, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedures contained in the Operating Procedures Section of this AFM.

(3) For airplanes identified in paragraph (c)(9) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Limitations Section of the existing AFM to include the information specified in figure 5 to paragraph (h)(3) of this AD. This may be done by inserting a copy of figure 5 to paragraph (h)(3) of this AD into the Limitations Section of the existing AFM.

Figure 5 to paragraph (h)(3)—*AFM Limitations Revision for Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), MD–88, and MD–90–30*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach Procedures

The following limitations are required for approaches in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

ILS and Non Precision Approaches

Operators must use the Radio Altimeter 5G C-Band Interference, Approaches procedures contained in the Operating Procedures Section of this AFM.

(i) Retained AFM Revision-Operating Procedures

This paragraph restates the requirements of paragraph (h) of AD 2022–09–18.

(1) For airplanes identified in paragraphs (c)(1) and (3) through (6) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Operating Procedures Section of the existing AFM to include the information specified in figure 6 to paragraph (i)(1) of this AD. This may be done by inserting a copy of figure 6 to paragraph (i)(1) of this AD into the Operating Procedures Section of the existing AFM.

Figure 6 to paragraph (i)(1)—*AFM Operating Procedures Revision for Model 707, 727, DC–8, DC–9 (except DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), and DC–9–87 (MD–87)), and DC–10*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, ILS Approaches

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot and autothrottles, and place both flight director switches to OFF prior to glideslope intercept.

(2) For airplanes identified in paragraph (c)(2) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Operating Procedures Section of the existing AFM to include the information specified in figure 7 to paragraph (i)(2) of this AD. This may be done by inserting a copy of figure 7 to paragraph (i)(2) of this AD into the Operating Procedures Section of the existing AFM.

Figure 7 to paragraph (i)(2)—*AFM Operating Procedures Revision for Model 717*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autothrottles and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

Landing

For landing, the Auto Ground Spoiler function may require manual extension. If manual extension is required, calculate landing distance requirements as specified in Appendix 3, Auto Ground Spoiler System Inop, of this AFM.

During Go-Around and Missed Approach

If go-around is required, initial flight director pitch guidance will provide proper speed and pitch targets, but, under certain 5G interference conditions, the flight director cannot be commanded from the Flight Control Panel (FCP) to provide speed or heading guidance, and may not provide altitude capture guidance. If this guidance is not available, manually comply with missed approach procedures, including altitude constraints.

(3) For airplanes identified in paragraph (c)(7) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Operating Procedures Section of the existing AFM to include the information specified in figure 8 to paragraph (i)(3) of this AD. This may be done by inserting a copy of figure 8 to paragraph (i)(3) of this AD into the Operating Procedures Section of the existing AFM.

Figure 8 to paragraph (i)(3)—*AFM Operating Procedures Revision for Model MD–10*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autothrottles and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

Landing

For landing, the Auto Ground Spoiler function may require manual extension. If manual extension is required, calculate landing distance requirements according to the following tables, as applicable.

During Go-Around and Missed Approach

If go-around is required, initial flight director pitch guidance will provide proper speed and pitch targets, but, under certain 5G interference conditions, the flight director cannot be commanded from the Flight Control Panel (FCP) to provide speed or heading guidance, and may not provide altitude capture guidance. If this guidance is not available, manually comply with missed approach procedures, including altitude constraints.

(5) For airplanes identified in paragraph (c)(9) of this AD: Within 2 days after the effective date of this AD, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 10 to paragraph (i)(5) of this AD. This may be done by inserting a copy of figure 10 to paragraph (i)(5) of this AD into the Operating Procedures Section of the existing AFM.

Figure 10 to paragraph (i)(5)—*AFM Operating Procedures Revision for Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), MD–88, and MD–90–30*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approaches

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot and autothrottles, and place both flight director switches to OFF prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autopilot, autothrottles, and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

(j) New Requirement: AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes

(1) For non-radio altimeter tolerant airplanes identified in paragraphs (c)(1) and (c)(3) through (6) of this AD, do the actions specified in paragraphs (j)(1)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 11 to paragraph (j)(1) of this AD. This may be done by inserting a copy of figure 11 to paragraph (j)(1) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 11 to paragraph (j)(1) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 11 to paragraph (j)(1)—*AFM Limitations Revision for Model 707, 727, DC–8, DC–9 (except DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), and DC–9–87 (MD–87)), and DC–10*

(Required by AD 2023-12-15)

Radio Altimeter 5G C-Band Interference, Approach Procedures

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for ILS approaches on runways in the contiguous U.S. airspace.

ILS Approaches

Operators must use the Radio Altimeter 5G C-Band Interference, ILS Approaches procedure contained in the Operating Procedures Section of this AFM.

(2) For non-radio altimeter tolerant airplanes identified in paragraphs (c)(2), (7), and (8) of this AD, do the actions specified in paragraphs (j)(2)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 12 to paragraph (j)(2) of this AD. This may be done by inserting a copy of figure 12 to paragraph (j)(2) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(2) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 12 to paragraph (j)(2) of this AD, remove the AFM revision required by paragraph (h)(2) of this AD.

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around Procedures

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for approaches, landings, or go-arounds on runways, in the contiguous U.S. airspace.

ILS and Non Precision Approaches, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedures contained in the Operating Procedures Section of this AFM.

(3) For non-radio altimeter tolerant airplanes identified in paragraph (c)(9) of this AD, do the actions specified in paragraphs (j)(3)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 13 to paragraph (j)(3) of this AD. This may be done by inserting a copy of figure 13 to paragraph (j)(3) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(3) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 13 to paragraph (j)(3) of this AD, remove the AFM revision required by paragraph (h)(3) of this AD.

Figure 13 to paragraph (j)(3)—*AFM Limitations Revision for Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), MD–88, and MD–90–30*

Radio Altimeter 5G C-Band Interference, ILS Approaches

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, disconnect the autopilot and autothrottles, and place both flight director switches to OFF prior to glideslope intercept.

(2) For airplanes identified in paragraph (c)(2) of this AD, do the actions specified in paragraphs (l)(2)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 18 to paragraph (l)(2) of this AD. This may be done by inserting a copy of figure 18 to paragraph (l)(2) of this AD into the Operating Procedures Section of the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (i)(2) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 18 to paragraph (l)(2) of this AD, remove the AFM revision required by paragraph (i)(2) of this AD.

Figure 18 to paragraph (l)(2)—*AFM Operating Procedures Revision for Model 717*

(Required by AD 2023-12-15)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, disconnect the autopilot prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autothrottles and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

Landing

For landing, the Auto Ground Spoiler function may require manual extension. If manual extension is required, calculate landing distance requirements as specified in Appendix 3, Auto Ground Spoiler System Inop, of this AFM.

During Go-Around and Missed Approach

If go-around is required, initial flight director pitch guidance will provide proper speed and pitch targets, but, under certain 5G interference conditions, the flight director cannot be commanded from the Flight Control Panel (FCP) to provide speed or heading guidance, and may not provide altitude capture guidance. If this guidance is not available, manually comply with missed approach procedures, including altitude constraints.

(3) For airplanes identified in paragraph (c)(7) of this AD, do the actions specified in paragraphs (l)(3)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 19 to paragraph (l)(3) of this AD. This may be done by inserting a copy of figure 19 to paragraph (l)(3) of this AD into the Operating Procedures Section of the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (i)(3) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 19 to paragraph (l)(3) of this AD, remove the AFM revision required by paragraph (i)(3) of this AD.

Figure 19 to paragraph (l)(3)—*AFM Operating Procedures Revision for Model MD–10*

(Required by AD 2023-12-15)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, disconnect the autopilot prior to glideslope intercept.

During Go-Around and Missed Approach

If go-around is required, initial flight director pitch guidance will provide proper speed and pitch targets, but, under certain 5G interference conditions, the flight director cannot be commanded from the Flight Control Panel (FCP) to provide speed or heading guidance, and may not provide altitude capture guidance. If this guidance is not available, manually comply with missed approach procedures, including altitude constraints.

(4) For airplanes identified in paragraph (c)(8) of this AD, do the actions specified in paragraphs (l)(4)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 20 to paragraph (l)(4) of this AD. This may be done by inserting a copy of figure 20 to paragraph (l)(4) of this AD into the Operating Procedures Section of the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (i)(4) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 20 to paragraph (l)(4) of this AD, remove the AFM revision required by paragraph (i)(4) of this AD.

(Required by AD 2023-12-15)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, disconnect the autopilot prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autothrottles and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

Landing

For landing, the Auto Ground Spoiler function may require manual extension. If manual extension is required, calculate landing distance requirements according to the following tables, as applicable.

During Go-Around and Missed Approach

If go-around is required, initial flight director pitch guidance will provide proper speed and pitch targets, but, under certain 5G interference conditions, the flight director cannot be commanded from the Flight Control Panel (FCP) to provide speed or heading guidance, and may not provide altitude capture guidance. If this guidance is not available, manually comply with missed approach procedures, including altitude constraints.

(5) For airplanes identified in paragraph (c)(9) of this AD, do the actions specified in paragraphs (l)(5)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 21 to paragraph (l)(5) of this AD. This may be done by inserting a copy of figure 21 to paragraph (l)(5) of this AD into the Operating Procedures Section of the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (i)(5) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 21 to paragraph (l)(5) of this AD, remove the AFM revision required by paragraph (i)(5) of this AD.

Figure 21 to paragraph (l)(5)—*AFM Operating Procedures Revision for Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), MD–88, and MD–90–30*

(Required by AD 2023-12-15)

Radio Altimeter 5G C-Band Interference, Approaches

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, disconnect the autopilot and autothrottles, and place both flight director switches to OFF prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autopilot, autothrottles, and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

(m) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (n) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(n) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022–04–05, which applied to all The Boeing Company Model 757 and 767 airplanes. AD 2022–04–05 required revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate specific operating procedures for landing distance calculations, instrument landing system (ILS) approaches, non-precision approaches, speedbrake deployment, and go-around and missed approaches, when in the presence of interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band) as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–04–05, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This AD requires revising the limitations and operating procedures sections of the existing AFM to incorporate specific operating procedures for landing distance calculations, ILS approaches, non-precision approaches, speedbrake deployment, and go-around and missed approaches, due to the presence of 5G C-Band interference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 21, 2023.

ADDRESSES: *AD Docket:* You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0672; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room

W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2022–04–05, Amendment 39–21947 (87 FR 8152, February 14, 2022) (AD 2022–04–05). AD 2022–04–05 applied to all The Boeing Company (Boeing) Model 757 and 767 airplanes. The NPRM published in the **Federal Register** on May 3, 2023 (88 FR 27742). The NPRM was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience 5G C-Band interference, and a determination that, during approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged.

In the NPRM, the FAA proposed to retain the AFM revisions required by AD 2022–04–05 until June 30, 2023. On or before June 30, 2023, the FAA proposed to require replacing those AFM revisions with limitations requiring the same procedures for dispatch or release to airports, and approach, landing, and go-around on runways, at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the FAA proposed that the procedures would not be required at 5G C-Band mitigated airports (5G CMAs) as identified in an FAA Domestic Notice. The FAA proposed this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

Discussion of Final Airworthiness Directive

Comments

The FAA provided the public with an opportunity to comment on the proposed AD and received comments from five commenters. The following presents the comments received on the NPRM and the FAA's response to each comment.

Support for NPRM

Boeing and the Air Line Pilots Association, International (ALPA), supported the NPRM without change.

The supportive comments from ALPA included additional viewpoints without a suggestion specific to the AD or a request the FAA can act on. These comments are outside the scope of this final rule.

Request To Revise AFM Limitations

Comment summary: Northern Air Cargo, LLC, requested the FAA revise the proposed AD to allow the flight directors, autothrottle, and autopilot to remain engaged during a CAT I ILS approach until an anomaly is detected, at which time the pilot would immediately disconnect the flight directors, autothrottle, and autopilot and execute a go-around. The commenter stated this would reduce flightcrew workload during normal operations and not handicap every ILS approach based on a very remote possibility of 5G interference.

FAA response: The FAA disagrees. Boeing has not submitted any substantiating safety risk assessment data to show that the flight directors, autothrottle, and autopilot can remain safely engaged during a CAT I ILS approach.

Request To Extend Compliance Time

Comment summary: American Airlines expressed concern regarding the compliance time for the proposed actions and requested the FAA revise the AD to provide a minimum of 30 days from the effective date of the AD.

FAA response: The FAA understands the commenter's concern and made every effort to publish this AD as soon as possible. After refraining from operating at their FCC-authorized levels for a year and a half, wireless companies are now able to operate at higher levels, yet still not at the levels authorized. Specifically, wireless companies expect to operate their networks in urban areas with minimal restrictions due to the completion of retrofits. Additionally, the FAA anticipates 19 additional telecommunication companies will begin transmitting in the C-Band after June 30, 2023. Although the FAA continues to work with the companies that intend to transmit in the 3.7–3.98-GHz band near 5G CMAs, the FAA has no agreement with those companies to provide the FAA with tower locations and other information necessary to support the current NOTAM/AMOC process. Therefore, the FAA will not be able to extend the June 30, 2023, date.

Effect of Winglets on Accomplishment of the Proposed Actions

Comment summary: Aviation Partners Boeing stated that installing winglets under supplemental type certificate (STC) ST01518SE and STC ST01920SE on applicable Boeing models does not affect accomplishment of the actions specified in the proposed AD.

FAA response: The FAA agrees. The FAA has not changed this AD in this regard.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Interim Action

The FAA considers this AD to be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Effective Date

Section 553(d) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) requires publication of a rule not less than 30 days before its effective date. However, section 553(d) authorizes agencies to make rules effective in less than 30 days when the agency finds ''good cause.'' Radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 5G C-Band. This interference can cause other airplane systems to not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. To address this unsafe condition, the actions required by this AD must be accomplished before the compliance date of June 30, 2023. The FAA based this date on the changes to the 5G C-Band environment beginning on July 1, 2023. These changes include increased wireless broadband deployment and transmissions closer to the parameters authorized by the FCC. The earlier operators learn of the requirements in

this AD, the earlier they can take action to ensure compliance. An effective date less than 30 days would ensure the AD is codified earlier, thereby increasing awareness of its requirements. Therefore, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment immediately effective.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this AD largely maintains the AFM limitations currently required by AD 2022–04–05, the FAA acknowledges that this AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct.

The FAA estimates that this AD affects 1,108 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–04–05)	1 work-hour × $85 per hour [1] = $85	$0	$85	$94,180
New AFM revisions (new action)	1 work-hour × $85 per hour = $85	0	85	[2] 94,180

[1] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.
[2] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 757 or 767 transport category airplane.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–04–05, Amendment 39–21947 (87 FR 8152, February 14, 2022), and

■ b. Adding the following new AD:

2023–12–12 The Boeing Company: Amendment 39–22470; Docket No. FAA–2023–0672; Project Identifier AD–2022–01429–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 21, 2023.

(b) Affected ADs

This AD replaces AD 2022–04–05, Amendment 39–21947 (87 FR 8152, February 14, 2022) (AD 2022–04–05).

(c) Applicability

This AD applies to all The Boeing Company airplanes identified in paragraphs (c)(1) and (2) of this AD, certificated in any category.

(1) Model 757–200, –200PF, –200CB, and –300 series airplanes.

(2) Model 767–200, –300, –300F, –400ER, and –2C series airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that, during approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. The FAA is issuing this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

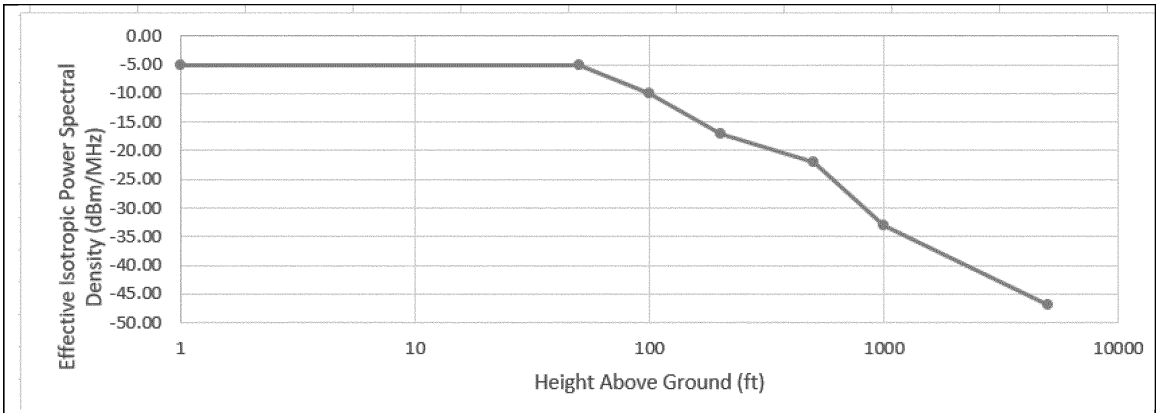
(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

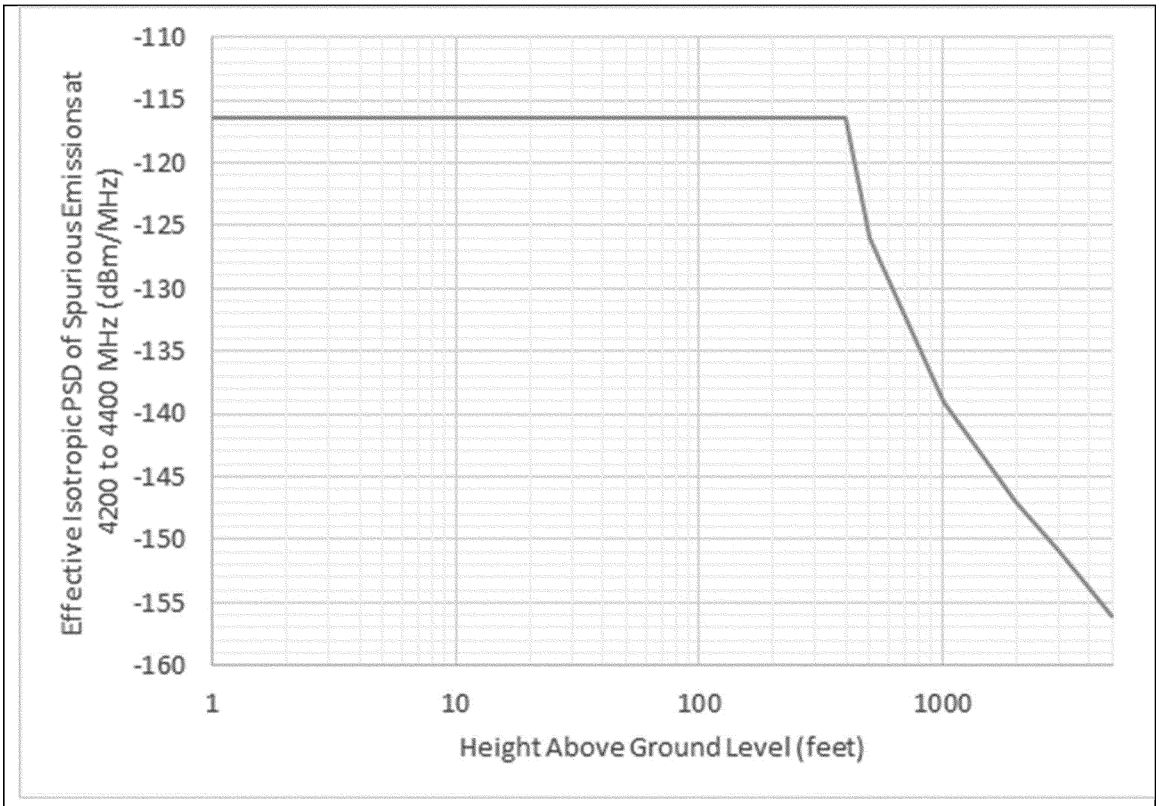
Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

(ii) Tolerance to radio altimeter interference, for the spurious emissions (3.7–3.98 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (g) of AD 2022–04–05.

(1) Within 2 days after February 14, 2022 (the effective date of AD 2022–04–05): Revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h)(1) of this AD into the existing AFM.

Figure 3 to paragraph (h)(1)—*AFM Limitations Revisions*

(Required by AD 2022-04-05)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

The following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(2) Within 2 days after February 14, 2022 (the effective date of AD 2022–04–05): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(2) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(2) of this AD into the Operating Procedures Section of the existing AFM.

Figure 4 to paragraph (h)(2)—*AFM Operating Procedures Revision*

(Required by AD 2022-04-05)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Landing Distance Calculations

For airplanes with Yaw Damper Stabilizer Trim module (YSM), adjust the operational (time of arrival) landing distance for manual speedbrake deployment if MAX MANUAL braking is required. When using autobrakes, no correction is needed since the calculations already take into account that manual speedbrake deployment may be needed.

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot and autothrottle, and place both flight director switches to OFF prior to glideslope intercept.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using VNAV or V/S with flight directors, autopilot, and autothrottle to published minimums.

During Landing

For airplanes with Yaw Damper Stabilizer Trim module (YSM), if MAX MANUAL braking is required, manually deploy the speedbrake if it does not deploy automatically.

During Go-Around and Missed Approach

If the flight director is ON, cycle to OFF, then ON, as needed.
If the flight director is OFF, turn ON, as needed.

(i) New Requirement: AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 5 to paragraph (i) of this AD. This may be done by inserting a copy of figure 5 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 5 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 5 to paragraph (i)—*AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-12)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in the contiguous U.S. airspace.

Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(j) New Requirement: AFM Limitations Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (j) of this AD. This may be done by inserting a copy of figure 6 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (j)—*AFM Limitations Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-12)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in the contiguous U.S. airspace unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(k) New Requirement: AFM Operating Procedures Revision

For all airplanes, do the actions specified in paragraphs (k)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 7 to paragraph (k) of this AD. This may be done by inserting a copy of figure 7 to paragraph (k) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(2) of this AD.

(2) Before further flight after incorporating the operating procedures specified in figure 7 to paragraph (k) of this AD, remove the AFM revision required by paragraph (h)(2) of this AD.

Figure 7 to paragraph (k)—*AFM Operating Procedures Revision*

(Required by AD 2023-12-12)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Landing Distance Calculations
For airplanes with Yaw Damper Stabilizer Trim module (YSM), adjust the operational (time of arrival) landing distance for manual speedbrake deployment if MAX MANUAL braking is required. When using autobrakes, no correction is needed since the calculations already take into account that manual speedbrake deployment may be needed.

ILS Approaches
For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, disconnect the autopilot and autothrottle, and place both flight director switches to OFF prior to glideslope intercept.

Non-Precision Approaches
Non-precision instrument approaches can be conducted using VNAV or V/S with flight directors, autopilot, and autothrottle to published minimums.

During Landing
For airplanes with Yaw Damper Stabilizer Trim module (YSM), if MAX MANUAL braking is required, manually deploy the speedbrake if it does not deploy automatically.

During Go-Around and Missed Approach
If the flight director is ON, cycle to OFF, then ON, as needed.
If the flight director is OFF, turn ON, as needed.

(l) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(m) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

(n) Material Incorporated by Reference

None.

Issued on June 9, 2023.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2023–13153 Filed 6–16–23; 11:15 am]

BILLING CODE 4910–13–C

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0670; Project Identifier AD–2022–01427–T; Amendment 39–22463; AD 2023–12–05]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022–03–05, which applied to all The Boeing Company Model 747–8F and 747–8 series airplanes and Model 777 airplanes. AD 2022–03–05 required

revising the limitations section of the existing airplane flight manual (AFM) to incorporate limitations prohibiting dispatching or releasing to airports, and approaches or landings on runways, when in the presence of interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band) as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–03–05, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This AD requires revising the limitations section of the existing AFM to incorporate limitations prohibiting dispatching or releasing to airports, and approaches or landings on runways, due to the presence of 5G C-Band interference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 21, 2023.

ADDRESSES: *AD Docket:* You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0670; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2022–03–05, Amendment 39–21922 (87 FR 4150, January 27, 2022) (AD 2022–03–05). AD 2022–03–05 applied to all The Boeing Company (Boeing) Model 747–8F and 747–8 series airplanes and Model 777 airplanes equipped with a radio altimeter. The NPRM published in the **Federal Register** on May 3, 2023 (88 FR 27799). The NPRM was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 5G C-Band, and a determination that this interference may affect other airplane systems using radio altimeter data, including the pitch control laws, including those that provide tail strike protection, regardless of the approach type or weather.

In the NPRM, the FAA proposed to retain the AFM revisions required by AD 2022–03–05 until June 30, 2023. On or before June 30, 2023, the FAA proposed to require replacing those AFM revisions with limitations prohibiting dispatching or releasing to airports, and approaches or landings on runways, in the contiguous U.S. airspace for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the FAA proposed to allow the prohibited operations at 5G C-Band mitigated airports (5G CMAs) as identified in an FAA Domestic Notice. The FAA proposed this AD to address missing or erroneous radio altimeter data, which, in combination with multiple flight deck effects, could lead to loss of continued safe flight and landing.

Discussion of Final Airworthiness Directive

Comments

The FAA provided the public with an opportunity to comment on the proposed AD and received comments from five commenters. The following presents the comments received on the NPRM and the FAA's response to each comment.

Support for NPRM

Boeing and the Air Line Pilots Association, International (ALPA), supported the NPRM without change.

The supportive comments from ALPA included additional viewpoints without a suggestion specific to the AD or a request the FAA can act on. These comments are outside the scope of this AD.

Request for Additional AMOC Relief

Comment summary: All Nippon Airways (All Nippon) requested the FAA revise the proposed AD to allow AMOCs approved for AD 2023–10–02, Amendment 39–22438 (88 FR 34065, May 26, 2023) (AD 2023–10–02) as AMOCs for this AD.

FAA response: The FAA does not agree. An airplane that is a radio altimeter tolerant airplane for purposes of AD 2023–10–02 will also be a radio altimeter tolerant airplane for purposes of this AD. However, because the hazards mitigated by AD 2023–10–02 are separate and distinct from the hazards mitigated by this AD, the FAA has determined that AMOCs approved for compliance with AD 2023–10–02 may not always be appropriate to address the unsafe condition specified in this AD. For this reason, operators with an approved AMOC for AD 2023–10–02 will need to request approval of it as an AMOC for compliance with this AD.

Request To Extend Compliance Time

Comment summary: American Airlines expressed concern regarding the compliance time for the proposed actions and requested the FAA revise the AD to provide a minimum of 30 days from the effective date of the AD.

FAA response: The FAA understands the commenter's concern and made every effort to publish this AD as soon as possible. After refraining from operating at their FCC-authorized levels for a year and a half, wireless companies are now able to operate at higher levels, yet still not at the levels authorized. Specifically, wireless companies expect to operate their networks in urban areas with minimal restrictions due to the completion of retrofits. Additionally, the FAA anticipates 19 additional telecommunication companies will begin transmitting in the C-Band after June 30, 2023. Although the FAA continues to work with the companies that intend to transmit in the 3.7–3.98–GHz band near 5G CMAs, the FAA has no agreement with those companies to provide the FAA with tower locations and other information necessary to support the current NOTAM/AMOC process. Therefore, the FAA will not be able to extend the June 30, 2023, date.

Request for List of Compliant Radio Altimeters

Comment summary: All Nippon requested the FAA clarify how to determine whether a radio altimeter (for example, LRA–900 P/N 822–0334–004) corresponds to a radio altimeter tolerant airplane or non-radio altimeter tolerant airplane. An individual requested the FAA revise the AD to add the list of the part numbers for compliant radio altimeters (*e.g.,* Collins LRA–900+ and THALES ERT–530R).

FAA response: The FAA does not maintain a list of tolerant radio altimeters because the determination of a radio altimeter tolerant airplane must consider the installation details, which vary from airplane to airplane. The FAA has developed a policy statement that provides a means of compliance with this AD for all transport and commuter category airplanes and rotorcraft equipped with a radio altimeter. The FAA requested public comments on this proposed policy on May 8, 2023 (88 FR

29554). The proposed policy describes an acceptable framework and method for demonstrating that an airplane or rotorcraft is radio altimeter tolerant. The policy discusses compliance methods that should be applied to programs for type certificates, amended type certificates, STCs, and amended STCs. The proposed policy addresses how to assess 5G C-Band tolerance. Although most data submitted to demonstrate compliance in accordance with the FAA policy statement will be proposed by design approval holders, any person/entity can propose a method to demonstrate compliance.

Request To Clarify Restrictions at Non-CMAs

Comment summary: All Nippon and an individual requested the FAA clarify why the proposed AD would prohibit radio altimeter tolerant airplanes from landing at non-5G CMAs after July 2023. All Nippon stated that there are many non-5G CMAs that are unaffected by 5G C-Band interference and operations should not be restricted at such airports.

FAA response: The FAA disagrees. Boeing has not submitted any substantiating data that demonstrates the hazards addressed by this AD are adequately mitigated for radio altimeter tolerant airplanes at non-5G CMAs.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Interim Action

The FAA considers this AD to be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Effective Date

Section 553(d) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) requires publication of a rule not less than 30 days before its effective date. However, section 553(d) authorizes agencies to make rules effective in less than 30 days when the agency finds ''good cause.'' Radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 5G C-Band. This interference may affect other airplane systems using radio altimeter data, including the pitch control laws, including those that provide tail strike protection, regardless of the approach type or weather, which, in combination with multiple flight deck effects, could lead to loss of continued safe flight and landing. To address this unsafe condition, the actions required by this AD must be accomplished before the compliance date of June 30, 2023. The FAA based this date on the changes to the 5G C-Band environment beginning on July 1, 2023. These changes include increased wireless broadband deployment and transmissions closer to the parameters authorized by the FCC. The earlier operators learn of the requirements in this AD, the earlier they can take action to ensure compliance. An effective date less than 30 days would ensure the AD is codified earlier, thereby increasing awareness of its requirements. Therefore, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment immediately effective.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this AD largely maintains the AFM limitations currently required by AD 2022–03–05, the FAA acknowledges that this AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct.

The FAA estimates that this AD affects 347 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained action from AD 2022–03–05) ..	1 work-hour × $85 per hour[1] = $85	$0	$85	$29,495
New AFM revision (new required action)	1 work-hour × $85 per hour = $85 ..	0	85	[2] 29,495

[1] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

[2] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 747–8F, 747–8, or 777 transport category airplane.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–03–05, Amendment 39–21922 (87 FR 4150, January 27, 2022), and

■ b. Adding the following new AD:

2023–12–05 The Boeing Company: Amendment 39–22463; Docket No. FAA–2023–0670; Project Identifier AD–2022–01427–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 21, 2023.

(b) Affected ADs

This AD replaces AD 2022–03–05, Amendment 39–21922 (87 FR 4150, January 27, 2022) (AD 2022–03–05).

(c) Applicability

This AD applies to all The Boeing Company airplanes identified in paragraphs (c)(1) and (2) of this AD, certificated in any category.

(1) Model 747–8F and 747–8 series airplanes.

(2) Model 777–200, –200LR, –300, –300ER, and 777F series airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that this interference may affect other airplane systems using radio altimeter data, including the pitch control laws, including those that provide tail strike protection, regardless of the approach type or weather. The FAA is issuing this AD to address missing or erroneous radio altimeter data, which, in combination with multiple flight deck effects, could lead to loss of continued safe flight and landing.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

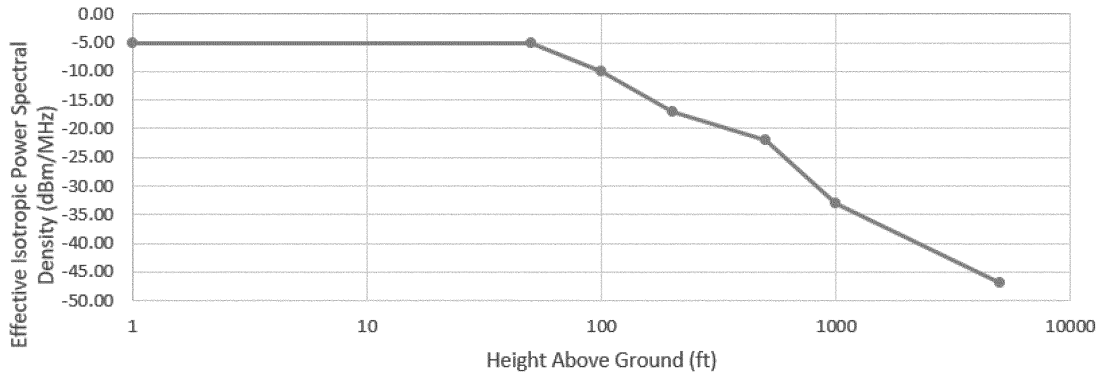
(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

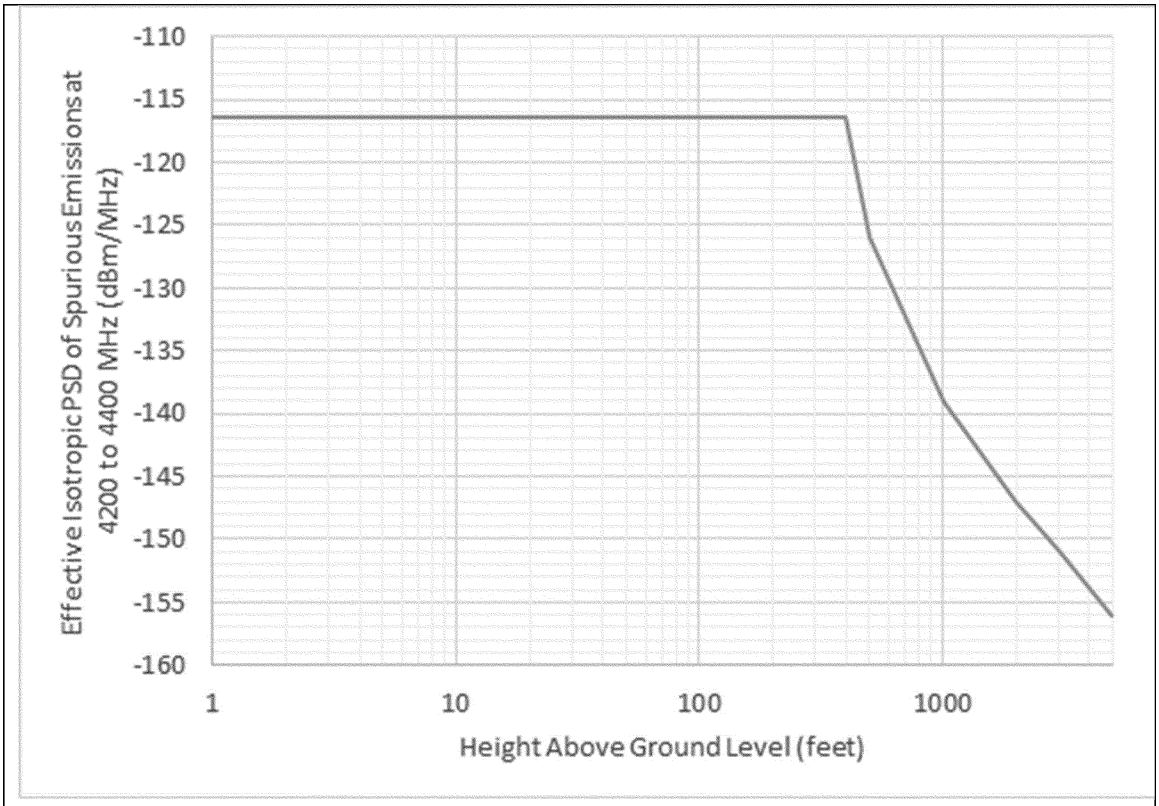
Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

(ii) Tolerance to radio altimeter interference, for the spurious emissions (3.7–3.98 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (g) of AD 2022–03–05. Within 2 days after January 27, 2022 (the effective date of AD 2022–03–05): Revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h) of this AD into the existing AFM.

Figure 3 to paragraph (h)—*AFM Limitations Revisions*

(Required by AD 2022-03-05)

Approaches and Landings in the Presence of Radio Altimeter 5G C-Band Interference

Dispatching or releasing to airports, and approaches or landings on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM is prohibited (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

(i) New Requirement: AFM Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 4 to paragraph (i) of this AD. This may be done by inserting a copy of figure 4 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 4 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h) of this AD.

Figure 4 to paragraph (i)—*AFM Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-05)

Approaches and Landings in the Presence of Radio Altimeter 5G C-Band Interference

Due to the presence of 5G C-Band wireless broadband interference, dispatching or releasing to airports, and approaches or landings on runways, in the contiguous U.S. airspace is prohibited.

(j) New Requirement: AFM Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 5 to paragraph (j) of this AD. This may be done by inserting a copy of figure 5 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 5 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h) of this AD.

Figure 5 to paragraph (j)—*AFM Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-05)

Approaches and Landings in the Presence of Radio Altimeter 5G C-Band Interference

Due to the presence of 5G C-Band wireless broadband interference, dispatching or releasing to airports, and approaches or landings on runways, in the contiguous U.S. airspace is prohibited unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (l) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021), providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(l) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount

Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

(m) Material Incorporated by Reference

None.

Issued on June 9, 2023.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2023–13156 Filed 6–16–23; 11:15 am]

BILLING CODE 4910–13–C

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0163; Project Identifier AD–2022–01380–T; Amendment 39–22468; AD 2023–12–10]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022–02–16, which applied to all The Boeing Company Model 787–8, 787–9, and 787–10 airplanes. AD 2022–02–16 required revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate limitations prohibiting certain landings and the use of certain minimum equipment list (MEL) items, and to incorporate operating procedures for calculating landing distances, when in the presence of interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band) as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–02–16, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This AD requires revising the limitations section of the existing AFM to incorporate limitations prohibiting certain landings and the use of certain MEL items, and retains the operating procedures from AD 2022–02–16 for calculating landing distances, due to the presence of 5G C-Band interference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 21, 2023.

ADDRESSES: *AD Docket:* You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0163; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2022–02–16, Amendment 39–21913 (87 FR 2692, January 19, 2022) (AD 2022–02–16). AD 2022–02–16 applied to all The Boeing Company (Boeing) Model 787–8, 787–9, and 787–10 airplanes. The NPRM published in the **Federal Register** on May 3, 2023 (88 FR 27716).

The NPRM was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience 5G C-Band interference, and a determination that, during landings, as a result of this interference, certain airplane systems may not properly transition from AIR to GROUND mode when landing on certain runways, resulting in a longer landing distance than normal due to the effect on thrust reverser deployment, speedbrake deployment, and increased idle thrust.

In the NPRM, the FAA proposed to retain the AFM revisions required by AD 2022–02–16 until June 30, 2023. On or before June 30, 2023, the FAA proposed to require replacing those AFM revisions with limitations prohibiting the same landings and use of certain MEL items at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the FAA proposed to allow the prohibited operations at 5G C-Band mitigated airports (5G CMAs) as identified in an FAA Domestic Notice. Lastly, the FAA proposed to retain the operating procedures from AD 2022–02–16 for calculating landing distances. The FAA proposed this AD to address degraded deceleration performance and longer landing distance, which could lead to a runway excursion.

Discussion of Final Airworthiness Directive

Comments

The FAA provided the public with an opportunity to comment on the proposed AD and received comments from five commenters. The following presents the comments received on the NPRM and the FAA's response to each comment.

Support for NPRM

Boeing and the Air Line Pilots Association, International (ALPA), supported the NPRM without change.

The supportive comments from ALPA included additional viewpoints without a suggestion specific to the AD or a request the FAA can act on. These comments are outside the scope of this final rule.

Request To Revise AFM Limitations

Comment summary: All Nippon Airways Co., Ltd. (All Nippon), requested the FAA revise paragraph (h)(2) of the proposed AD to refer to the new landing distances instead of HYD PRESS L+R failure distances, based on the new landing distance tables established by Boeing.

FAA response: The FAA has not received or reviewed a new landing distance table as described by the commenter. Anyone may propose alternative data to address the unsafe condition under the AMOC procedures referenced in paragraph (k) of this AD.

Request for Additional AMOC Relief

Comment summary: All Nippon requested that the FAA revise the proposed AD to allow AMOCs approved for AD 2023–10–02, Amendment 39–22438 (88 FR 34065, May 26, 2023) (AD 2023–10–02) as AMOCs for the new AFM revisions for radio altimeter tolerant airplanes specified in paragraph (j) of the proposed AD.

FAA response: The FAA does not agree. An airplane that is a radio altimeter tolerant airplane for purposes of AD 2023–10–02 will also be a radio altimeter tolerant airplane for purposes of this AD. However, because the hazards mitigated by AD 2023–10–02 are separate and distinct from the hazards mitigated by this AD, the FAA has determined that AMOCs approved for compliance with AD 2023–10–02 may not always be appropriate to address the unsafe condition specified in this AD. For this reason, operators with an approved AMOC for AD 2023–10–02 will need to request approval of

it as an AMOC for compliance with this AD.

Request To Extend Compliance Time

Comment summary: All Nippon and American Airlines expressed concern regarding the compliance time for the proposed actions and requested the FAA revise the AD to provide a minimum of 3 to 4 weeks from the effective date of the AD.

FAA response: The FAA understands the commenters' concerns and made every effort to publish this AD as soon as possible. After refraining from operating at their FCC-authorized levels for a year and a half, wireless companies are now able to operate at higher levels, yet still not at the levels authorized. Specifically, wireless companies expect to operate their networks in urban areas with minimal restrictions due to the completion of retrofits. Additionally, the FAA anticipates 19 additional telecommunication companies will begin transmitting in the C-Band after June 30, 2023. Although the FAA continues to work with the companies that intend to transmit in the 3.7–3.98–GHz band near 5G CMAs, the FAA has no agreement with those companies to provide the FAA with tower locations and other information necessary to support the current NOTAM/AMOC process. Therefore, the FAA will not be able to extend the compliance date beyond June 30, 2023.

Request for Clarification of Domestic Notices and 5G CMA List

Comment summary: Virgin Atlantic requested clarification on how to access Domestic Notices, as well as the mechanism to know when an airport is no longer on the 5G CMA list.

FAA response: The Domestic Notice referenced in this AD can be found at *https://www.faa.gov/air_traffic/publications/domesticnotices/domestic_gen.html.* The FAA considers this 5G CMA list permanent based upon the voluntary agreements in place with the telecommunication companies. In the event an airport from the 5G CMA list needs to be removed, the FAA will issue a NOTAM until a more permanent solution is put in place.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Interim Action

The FAA considers this AD to be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Effective Date

Section 553(d) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) requires publication of a rule not less than 30 days before its effective date. However, section 553(d) authorizes agencies to make rules effective in less than 30 days when the agency finds ''good cause.'' Radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 5G C-Band. During landings, as a result of this interference, certain airplane systems may not properly transition from AIR to GROUND mode when landing on certain runways, resulting in a longer landing distance than normal due to the effect on thrust reverser deployment, speedbrake deployment, and increased idle thrust, which could lead to a runway excursion. To address this unsafe condition, the actions required by this AD must be accomplished before the compliance date of June 30, 2023. The FAA based this date on the changes to the 5G C-Band environment beginning on July 1, 2023. These changes include increased wireless broadband deployment and transmissions closer to the parameters authorized by the FCC. The earlier operators learn of the requirements in this AD, the earlier they can take action to ensure compliance. An effective date less than 30 days would ensure the AD is codified earlier, thereby increasing awareness of its requirements. Therefore, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment immediately effective.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this AD largely maintains the AFM limitations currently required by AD 2022–02–16, the FAA acknowledges that this AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct.

The FAA estimates that this AD affects 145 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained action from AD 2022–02–16) ..	1 work-hour × $85 [1] per hour = $85	$0	$85	$12,325
New AFM revision (new required action)	1 work-hour × $85 per hour = $85 ..	0	85	[2] 12,325

[1] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

[2] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 787–8, 787–9, or 787–10 transport category airplane.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or

develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–02–16, Amendment 39–21913 (87 FR 2692, January 19, 2022), and

■ b. Adding the following new AD:

2023–12–10 The Boeing Company: Amendment 39–22468; Docket No. FAA–2023–0163; Project Identifier AD–2022–01380–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 21, 2023.

(b) Affected ADs

This AD replaces AD 2022–02–16, Amendment 39–21913 (87 FR 2692, January 19, 2022) (AD 2022–02–16).

(c) Applicability

This AD applies to all The Boeing Company Model 787–8, 787–9, and 787–10 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that, during landings, as a result of this interference, certain airplane systems may not properly transition from AIR to GROUND mode when landing on certain runways, resulting in a longer landing distance than normal due to the effect on thrust reverser deployment, speedbrake deployment, and increased idle thrust. The FAA is issuing this AD to address degraded deceleration performance and longer landing distance, which could lead to a runway excursion.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

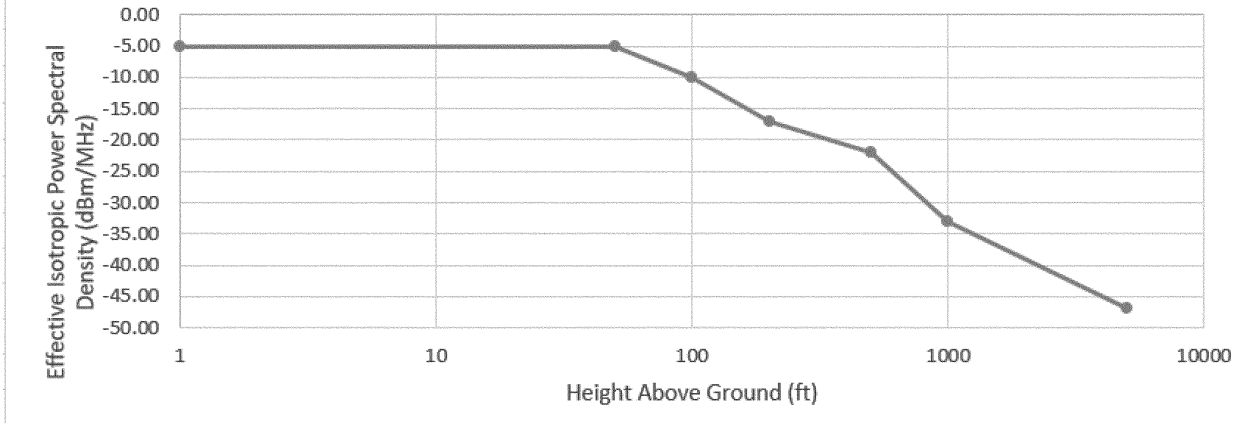
(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

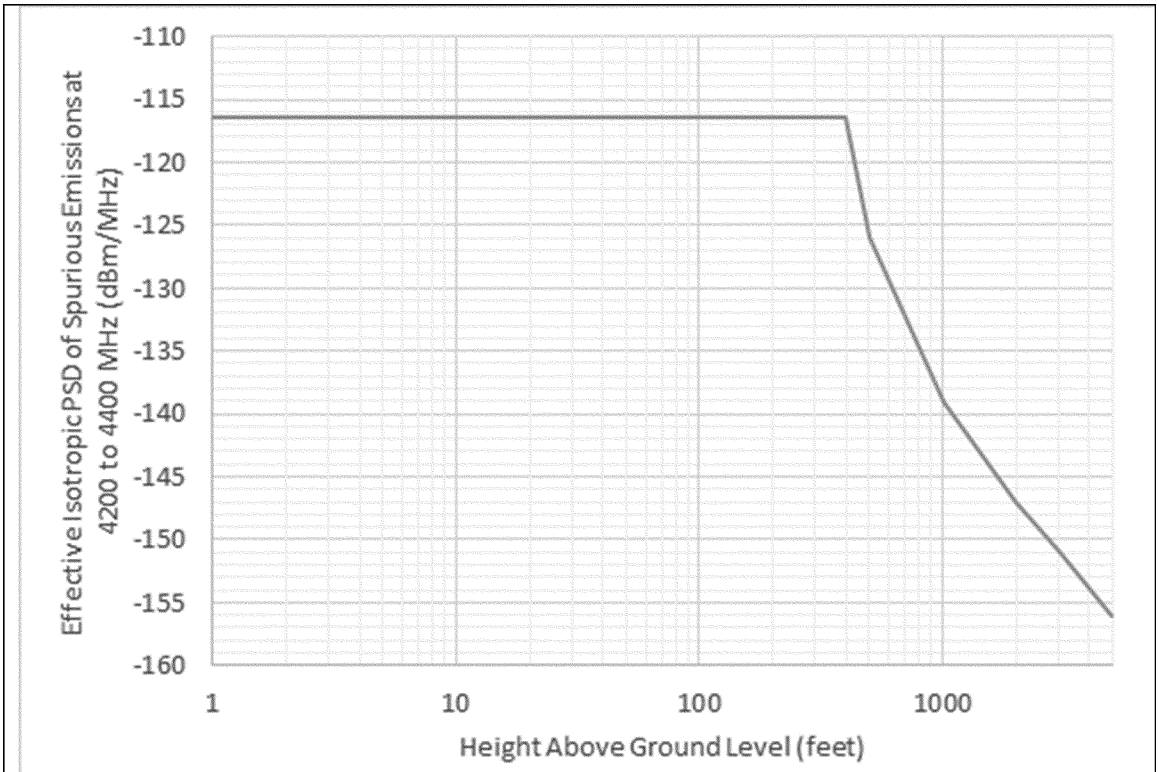
Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

(ii) Tolerance to radio altimeter interference, for the spurious emissions (4.2–4.4 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(4) Runway condition codes are defined in figure 3 to paragraph (g)(4) of this AD.

Figure 3 to paragraph (g)(4)—*Runway Condition Codes*

Runway Condition Code	Runway Condition Description	Reported Braking Action
6	Dry	Dry
5	Wet (smooth, grooved, or porous friction course (PFC)) or frost 3 mm (0.12 inch) or less of: water, slush, dry snow, or wet snow	Good
4	Compacted snow at or below -15°C (5°F) outside air temperature (OAT)	Good to medium
3	Wet (slippery), dry snow, or wet snow (any depth) over compacted snow Greater than 3 mm (0.12 inch) of: dry snow or wet snow Compacted snow at OAT warmer than -15°C (5°F)	Medium
2	Greater than 3 mm (0.12 inch) of: water or slush	Medium to poor
1	Ice	Poor
0	Wet ice, water on top of compacted snow, dry snow, or wet snow over ice	Nil

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (h) of AD 2022–02–16.

(1) Within 2 days after January 19, 2022 (the effective date of AD 2022–02–16): Revise the Limitations Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(1) of this AD into the existing AFM.

Figure 4 to paragraph (h)(1)—*AFM Limitations Revisions*

(Required by AD 2022-02-16)

Radio Altimeter 5G C-Band Interference, Landing Distance

The following limitations are required if dispatching or releasing to or landing on runways in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-02 – Antiskid Control Systems
- 32-45-01 – Wheel Brake Systems
- 32-45-01-01 – Wheel Brake Systems, Electric Brake Actuator Systems

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or releasing to or landing on runways with a runway condition code of 1 or 0 is prohibited.

Landing Distance Calculations for Runway Condition Codes 6 through 2

Operators must follow the 5G C-Band Interference Landing Distance Procedure contained in the Operating Procedures Section of this AFM.

(2) Within 2 days after January 19, 2022 (the effective date of AD 2022–02–16): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 5 to paragraph (h)(2) of this AD. This may be done by inserting a copy of figure 5 to paragraph (h)(2) of this AD into the existing AFM.

Figure 5 to paragraph (h)(2)—AFM Operating Procedures Revision

(Required by AD 2022-02-16)

5G C-Band Interference Landing Distance

When dispatching or releasing to or landing on runways with a runway condition code of 6 through 2:

- Dispatch or Release:
  - No additional landing distance calculations are required for runway condition codes 6 and 5.
  - For runway condition codes 4 through 2, use Table 1 through 6, as applicable, to determine the unfactored landing distance, applying all adjustments. Multiply the resulting unfactored landing distance by 1.15 to obtain the minimum required landing distance.

Table 1:

787-10 / TRENT 1000

	Landing Distances and Adjustments (Feet)								
	Reference Distance	Weight Adjustment	Altitude Adjustment	Wind Adjustment per 10 Knots	Slope Adjustment per 1%	Temperature Adjustment per 10°C	Approach Speed Adjustment	Reverse Thrust Adjustment

Reference distance is based on Max Manual Braking, sea level, standard day, no wind or slope, and no reverse thrust.
Reference distance includes a distance from threshold to touchdown associated with flare time of 7 seconds.
Distances are based on HYD PRESS L+R failure distances which conservatively approximate the effects of 5G interference.
Actual (unfactored) distances are shown.
Note: per procedure, Max Manual Braking is not required for normal operations and is to be used only in the event that significant 5G interference effects occur.

- En route:
  - Plan to use Flaps 30 and V_{REF30} (with appropriate wind additives) for landing.
  - For runway condition codes 6 to 2, compute time of arrival (en route) landing distance using Table 1 through 6, as applicable, applying all adjustments. Multiply the resulting unfactored landing distance by 1.15 to obtain the minimum required landing distance at the destination. This approximates a minimum required landing distance resulting from 5G C-Band interference.
  - Determine desired AUTOBRAKE setting by using the normal configuration landing distance information from an approved source. Maximum manual braking may not be required.

- During approach and landing:
  - Monitor radio altimeter for anomalies.
  - Normal use of autothrottles is allowed. Monitor performance of autopilot and autothrottle. If the autopilot or autothrottle is not performing as expected, disconnect both the autopilot and autothrottle and apply manual inputs to ensure proper control of flight path.
  - If the autothrottle does not reduce the thrust to IDLE at 25 feet, manually reduce the thrust to idle, hold the thrust levers in the idle position and disconnect the autothrottle to prevent autothrottle from advancing the thrust levers after touchdown.
    Caution: If the autothrottle advances the thrust levers after landing, the speedbrakes will stow and the autobrake will disarm. It will not be possible to raise the reverse thrust levers to deploy the thrust reversers until the thrust levers are at idle.
  - Manual deployment of the speedbrakes may be required.
  - If the thrust reversers do not deploy, immediately ensure the speedbrakes are extended, apply manual braking and modulate as required for the existing runway conditions.
    Note: In some conditions, maximum manual braking may be required throughout the entire landing roll.

(i) New Requirement: AFM Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (i) of this AD. This may be done by inserting a copy of figure 6 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (i)—*AFM Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-10)

Radio Altimeter 5G C-Band Interference, Landing Distance

Due to the presence of 5G C-Band wireless broadband interference, when dispatching or releasing to or landing on runways in the contiguous U.S. airspace, the following limitations are required.

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-02 – Antiskid Control Systems
- 32-45-01 – Wheel Brake Systems
- 32-45-01-01 – Wheel Brake Systems, Electric Brake Actuator Systems

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or releasing to or landing on runways with a runway condition code of 1 or 0 is prohibited.

Landing Distance Calculations for Runway Condition Codes 6 through 2

Operators must follow the 5G C-Band Interference Landing Distance Procedure contained in the Operating Procedures Section of this AFM.

(j) New Requirement: AFM Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 7 to paragraph (j) of this AD. This may be done by inserting a copy of figure 7 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 7 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 7 to paragraph (j)—*AFM Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 2023-12-10)

Radio Altimeter 5G C-Band Interference, Landing Distance

Due to the presence of 5G C-Band wireless broadband interference, when dispatching or releasing to or landing on runways in the contiguous U.S. airspace, the following limitations are required unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-02 – Antiskid Control Systems
- 32-45-01 – Wheel Brake Systems
- 32-45-01-01 – Wheel Brake Systems, Electric Brake Actuator Systems

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or releasing to or landing on runways with a runway condition code of 1 or 0 is prohibited.

Landing Distance Calculations for Runway Condition Codes 6 through 2

Operators must follow the 5G C-Band Interference Landing Distance Procedure contained in the Operating Procedures Section of this AFM.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (l) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021), providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(l) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

(m) Material Incorporated by Reference

None.

Issued on June 9, 2023.

BILLING CODE 4910–13–C

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 31490; Amdt. No. 4063]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or removes Standard Instrument Approach Procedures (SIAPS) and associated Takeoff Minimums and Obstacle Departure procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective June 21, 2023. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of June 21, 2023.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops-M30. 1200 New Jersey Avenue SE, West Bldg., Ground Floor, Washington, DC 20590–0001.

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Information Services, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at *nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedures and Airspace Group, Flight Technologies and Procedures Division, Flight Standards Service, Federal Aviation Administration. Mailing Address: FAA Mike Monroney Aeronautical Center, Flight Procedures and Airspace Group, 6500 South MacArthur Blvd., STB Annex, Bldg 26, Room 217, Oklahoma City, OK 73099. Telephone (405) 954–1139.

SUPPLEMENTARY INFORMATION: This rule amends 14 CFR part 97 by establishing, amending, suspending, or removes SIAPS, Takeoff Minimums and/or ODPS. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part 97.20. The applicable FAA Forms 8260–3, 8260–4, 8260–5, 8260–15A, 8260–15B, when required by an entry on 8260–15A, and 8260–15C.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers or aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the typed of SIAPS, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPS, Takeoff Minimums and/or ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flights safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Lists of Subjects in 14 CFR Part 97

Air Traffic Control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on May 26, 2023.

Thomas J. Nichols,

Aviation Safety, Flight Standards Service, Manager, Standards Section, Flight Procedures & Airspace Group, Flight Technologies & Procedures Division.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, 14 CFR part 97 is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

14 CFR Part 97

[Docket No. 31491; Amdt. No. 4064]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide for the safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective June 21, 2023. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of June 21, 2023.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops-M30, 1200 New Jersey Avenue SE, West Bldg., Ground Floor, Washington, DC, 20590–0001;

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Information Services, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA).

For information on the availability of this material at NARA, email *fr.inspection@nara.gov* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center online at *nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedures and Airspace Group, Flight Technologies and Procedures Division, Flight Standards Service, Federal Aviation Administration. Mailing Address: FAA Mike Monroney Aeronautical Center, Flight Procedures and Airspace Group, 6500 South MacArthur Blvd., STB Annex, Bldg 26, Room 217, Oklahoma City, OK 73099. Telephone: (405) 954–1139.

SUPPLEMENTARY INFORMATION: This rule amends 14 CFR part 97 by amending the referenced SIAPs. The complete regulatory description of each SIAP is listed on the appropriate FAA Form 8260, as modified by the National Flight Data Center (NFDC)/Permanent Notice to Airmen (P–NOTAM), and is incorporated by reference under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR 97.20. The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register**

expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained on FAA form documents is unnecessary. This amendment provides the affected CFR sections, and specifies the SIAPs and Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP and Takeoff Minimums and ODP as amended in the transmittal. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP and Takeoff Minimums and ODP as modified by FDC permanent NOTAMs.

The SIAPs and Takeoff Minimums and ODPs, as modified by FDC permanent NOTAM, and contained in this amendment are based on criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these changes to SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied only to specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a FDC NOTAM as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for these SIAP and Takeoff Minimums and ODP amendments require making them effective in less than 30 days.

Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making these SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air Traffic Control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on May 26, 2023.

Thomas J. Nichols,

Aviation Safety, Flight Standards Service, Manager, Standards Section, Flight Procedures & Airspace Group, Flight Technologies & Procedures Division.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, 14 CFR part 97 is amended by amending Standard Instrument Approach Procedures and Takeoff Minimums and ODPs, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, Identified as follows:

** * * Effective Upon Publication*

AIRAC date	State	City	Airport	FDC No.	FDC date	Subject
13–Jul–23	IL	Springfield	Abraham Lincoln Capital	3/0255	3/29/23	RNAV (GPS) RWY 22, Orig-C.

Bureau of Industry and Security

15 CFR Part 744

[Docket No. 230614–0149]

RIN 0694–AJ24

Additions of Entities to the Entity List and Removal of Entity From the Entity List; Correction

AGENCY: Bureau of Industry and Security, Department of Commerce.

ACTION: Correcting amendment.

SUMMARY: The Department of Commerce is amending the Export Administration Regulations (EAR) by adding an inadvertently omitted entity to the Entity List.

DATES: This correcting amendment is effective June 16, 2023.

FOR FURTHER INFORMATION CONTACT: Chair, End-User Review Committee, Office of the Assistant Secretary for Export Administration, Bureau of Industry and Security, Department of Commerce, Phone: (202) 482–5991, Email: *ERC@bis.doc.gov.*

SUPPLEMENTARY INFORMATION: As stated in the Entity List rule titled ''Additions

of Entities to the Entity List and Removal of Entity from the Entity List'' (June 14 Rule) (88 FR 38739), the End-User Review Committee (ERC) determined to add certain entities under the destination of China, including China Aviation Development Harbin Bearing Co., Ltd., to the Entity List for acquiring and attempting to acquire U.S.-origin items in support of China's military modernization. This activity is contrary to U.S. national security and foreign policy interests under § 744.11 of the EAR. As detailed in the June 14 Rule, licenses are required for all items subject to the EAR to these entities, and license applications will be reviewed under a presumption of denial. Further, in the June 14 Rule, the Bureau of Industry and Security (BIS) included an entity in the preamble justification but inadvertently did not instruct, nor provide regulatory text for, the addition of the entity to the Entity List. This correcting amendment amends the EAR by making the addition to the Entity List for this omitted entity.

For the reasons described above, this correcting amendment adds the following entity to the Entity List and includes, where appropriate, aliases:

China

• China Aviation Development Harbin Bearing Co., Ltd.

Savings Clause

For the changes being made in this correcting amendment, shipments of items removed from eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) as a result of this regulatory action that were en route aboard a carrier to a port of export, reexport, or transfer (in-country), on June 16, 2023, pursuant to actual orders for export, reexport, or transfer (in-country) to or within a foreign destination, may proceed to that destination under the previous eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) before July 17, 2023. Any such items not actually exported, reexported, or transferred (in-country) before midnight, on July 17, 2023, require a license in accordance with this correcting amendment.

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA) (50 U.S.C. 4801–4852). ECRA provides the legal basis for BIS's principal authorities and serves as the authority under which BIS issues this rule.

Rulemaking Requirements

1. This rule has been determined to be not significant for purposes of Executive Order 12866.

2. Notwithstanding any other provision of law, no person is required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves collections previously approved by OMB under control number 0694–0088, Simplified Network Application Processing System, which includes, among other things, license applications and commodity classifications, and carries a burden estimate of 29.4 minutes for a manual or electronic submission for a total burden estimate of 33,133 hours. Total burden hours associated with the PRA and OMB control number 0694–0088 are not expected to increase as a result of this rule.

3. This rule does not contain policies with federalism implications as that term is defined in Executive Order 13132.

4. Pursuant to section 1762 of the Export Control Reform Act of 2018, this action is exempt from the Administrative Procedure Act (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation, and delay in effective date.

5. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.,* are not applicable. Accordingly, no regulatory flexibility analysis is required, and none has been prepared.

List of Subjects in 15 CFR Part 744

Exports, Reporting and recordkeeping requirements, Terrorism.

Accordingly, part 744 of the Export Administration Regulations (15 CFR parts 730–774) is corrected by making the following correcting amendment:

PART 744—CONTROL POLICY: END-USER AND END-USE BASED

■ 1. The authority citation for 15 CFR part 744 is continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 22 U.S.C. 3201 *et seq.;* 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13099, 63 FR 45167, 3 CFR, 1998 Comp., p. 208; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13224, 66 FR 49079, 3 CFR, 2001 Comp., p. 786; Notice of September 19, 2022, 87 FR 57569 (September 21, 2022); Notice of November 8, 2022, 87 FR 68015 (November 10, 2022).

■ 2. Supplement no. 4 to part 744 is amended under CHINA, PEOPLE'S REPUBLIC OF, by adding, in alphabetical order, an entry for ''China Aviation Development Harbin Bearing Co., Ltd.'' to read as follows:

BILLING CODE 3510–33–P

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1272

[Docket No. CPSC–2023–0021]

Marking of Toy, Look-Alike, and Imitation Firearms; Correction

AGENCY: Consumer Product Safety Commission.

ACTION: Direct final rule; correction.

SUMMARY: The Federal Energy Management Improvement Act Update transferred authority for regulating the marking of toy, look-alike, and imitation firearms from the Department of Commerce to the Consumer Product Safety Commission. On May 11, 2023, the Commission issued a direct final rule to adopt the Department of Commerce rule for the marking of toy, look-alike, and imitation firearms, with non-substantive and conforming changes. That document contained a typographical error. This document corrects that error.

DATES: Effective June 26, 2023.

FOR FURTHER INFORMATION CONTACT: Salman Sarwar, Compliance Officer, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone: (301) 504–7682; email: *ssarwar@cpsc.gov.*

SUPPLEMENTARY INFORMATION: The Commission is correcting a typographical error in the direct final rule, *Marking of Toy, Look-Alike, and Imitation Firearm,* 16 CFR part 1272, which appeared in the **Federal Register** on May 11, 2023. 88 FR 30226. This document corrects a typographical error in the numbering of § 1272.5 of the direct final rule. The codified text numbered § 1272.5 (Preemption) was erroneously numbered as § 272.5. This document corrects that error by changing the number for the preemption section of the rule from § 272.5 to § 1272.5. This document corrects a typographical error; it does not make any substantive changes to the direct final rule.

Correction

In FR Rule Doc. No. 2023–09999 appearing on page 30226 in the **Federal Register** of Thursday, May 11, 2023, the following correction is made

§ 1272.5 [Corrected]

■ 1. On page 30229, in the third column, correct ''**§ 272.5 Preemption**'' to read ''**§ 1272.5 Preemption**''.

Alberta Mills,

Secretary, U.S. Consumer Product Safety Commission.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 9975]

RIN 1545–BQ76

Pre-Filing Registration Requirements for Certain Tax Credit Elections

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations setting forth mandatory information and registration requirements for taxpayers planning to make an elective payment election under the Inflation Reduction Act of 2022 and the CHIPS Act of 2022 to treat the amount of certain tax credits as a payment of Federal income tax, or in the case of a partnership or S corporation, to receive a payment in the amount of such credits. This document also contains temporary regulations setting forth mandatory information and registration requirements for taxpayers planning to make an election to transfer certain Federal income tax credits under the Inflation Reduction Act of 2022. These temporary regulations affect tax-exempt organizations, State and local governments, Indian tribal governments, Alaska Native Corporations, the Tennessee Valley Authority, rural electric cooperatives, and, in the case of three credits, certain taxpayers eligible to elect the elective payment of credit amounts in a taxable year under section 6417 of the Internal Revenue Code (Code). These temporary regulations also affect taxpayers eligible to make an elective payment election instead of claiming the advanced manufacturing investment credit under section 48D of the Code. These temporary regulations further affect taxpayers eligible to elect to transfer certain Federal income tax credits under section 6418 of the Code.

DATES:

Effective date: This temporary regulation is effective on June 21, 2023.

Applicability date: For dates of applicability, *see* §§ 1.48D–6T(j), 1.6417–5T(d), and 1.6418–4T(d).

FOR FURTHER INFORMATION CONTACT: Concerning these temporary regulations, Lani M. Sinfield at (202) 317–5871 (not a toll free number).

SUPPLEMENTARY INFORMATION:

Background

I. Overview

This document amends the Income Tax Regulations (26 CFR part 1) to add temporary regulations providing information and registration requirements that must be completed before elections available under sections 48D(d), 6417, and 6418 of the Code may be made.

In accordance with section 7805(e)(1) of the Code, concurrent with the publication of this Treasury Decision, the Department of the Treasury (Treasury Department) and the IRS are publishing in the Proposed Rules section of this issue of the **Federal Register** three notices of proposed

rulemaking that contain proposed regulations under §§ 1.48D–6, 1.6417–5, and 1.6418–4, the text of which is identical to the text of §§ 1.48D–6T, 1.6417–5T, and 1.6418–4T of the temporary regulations. REG–105595–23 provides proposed regulations under section 48D(d). REG–101607–23 provides proposed regulations under sections 6241 and 6417. REG–101610–23 provides proposed regulations under section 6418.

Interested persons are directed to the **ADDRESSES** and **COMMENTS AND PUBLIC HEARING** sections of the preambles to REG–105595–23, REG–101607–23, and REG–101610–23 for information on submitting public comments or the public hearings for the proposed regulations.

II. Sections 48D(d), 6417, and 6418

A notice of proposed rulemaking (REG–105595–23) in the Proposed Rules section in this issue of the **Federal Register** provides a background description of section 48D. A notice of proposed rulemaking (REG–101607–23) in the Proposed Rules section in this issue of the **Federal Register** provides a background description of section 6417. A notice of proposed rulemaking (REG–101610–23) in the Proposed Rules section in this issue of the **Federal Register** provides a background description of section 6418.

Explanation of Provisions

I. Pre-Filing Registration Requirements Under Section 48D(d)

Temp. Reg. § 1.48D–6T(b)(1) provides the mandatory pre-filing registration process that, except as provided in guidance, a taxpayer must complete as a condition of, and prior to, any amount being treated as a payment against the tax imposed under § 1.48D–6(a)(1), or an amount paid to a partnership or S corporation pursuant to § 1.48D–6(d)(2)(ii)(A). A taxpayer is required to use the pre-filing registration process to register each qualified investment in an advanced manufacturing facility. A taxpayer that does not obtain a registration number or report the registration number on its annual tax return with respect to an advanced manufacturing facility is ineligible to receive any elective payment amount with respect to the amount of any section 48D credit determined with respect to that advanced manufacturing facility. However, completion of the pre-filing registration requirements and receipt of a registration number does not, by itself, mean that the taxpayer is eligible to receive a payment with respect to the section 48D credits determined with respect to the advanced manufacturing facility.

The pre-filing registration requirements are that a taxpayer:

(1) must complete the registration process electronically through the IRS electronic portal and in accordance with the instructions provided therein, unless otherwise provided in guidance;

(2) must satisfy the registration requirements and receive a registration number prior to making a section 48D(d)(1) elective payment election on the taxpayer's tax return for the taxable year at issue;

(3) is required to obtain a registration number for each qualified investment in an advanced manufacturing facility with respect to which a section 48D credit will be determined and for which the taxpayer wishes to make a section 48D(d)(1) elective payment election; and

(4) must provide the specific information required to be provided as part of the pre-filing registration process. The provision of such information, which includes information about the taxpayer and about the qualified investment in an advanced manufacturing facility, would allow the IRS to prevent duplication, fraud, improper payments, or excessive payments under section 48D. For example, verifying information about the taxpayer would allow the IRS to mitigate the risk of fraud or improper payments to entities that are not eligible taxpayers. Information about the taxpayer's taxable year would allow the IRS to ensure that an elective payment election is timely made on the entity's annual tax return. Information about the advanced manufacturing facility, including its address and coordinates (longitude and latitude), supporting documentation, beginning of construction date, and placed in service date would allow the IRS to mitigate the risk of duplication, fraud, and improper payments for properties that are not advanced manufacturing facilities.

Temp. Reg. § 1.48D–6T(b)(7)(i) provides that, after a taxpayer completes pre-filing registration with respect to each qualified investment in an advanced manufacturing facility with respect to which the taxpayer intends to elect a section 48D(d) elective payment election for the taxable year, the IRS will review the information provided and will issue a separate registration number for each qualified investment for which the taxpayer provided sufficient verifiable information.

Temp. Reg. § 1.48D–6T(b)(7)(ii) provides that a registration number is valid only for the taxable year for which it is obtained. Temp. Reg. § 1.48D–6T(b)(7)(iii) provides that, if an elective payment election will be made with respect to a qualified investment in an advanced manufacturing facility for a taxable year for which a registration number under this section has been obtained for a prior taxable year, the taxpayer must renew the registration each subsequent year in accordance with applicable guidance, including attesting that all the facts previously provided are still correct or updating any facts that are relevant in calculating the amount of the section 48D credit. Temp. Reg. § 1.48D–6T(b)(7)(iv) provides that, if facts change with respect to the qualified investment in an advanced manufacturing facility for which a registration number has been previously obtained, the taxpayer must amend the registration to reflect these new facts. The regulations provide, for example, that if the facility previously registered for an elective payment election undergoes a change of ownership (incident to a corporate reorganization or an asset sale) such that the new owner has a different employer identification number (EIN) than the owner who obtained the original registration, the original owner would be required to amend the original registration to disassociate its EIN from the advanced manufacturing facility and the new owner must submit an original registration (or if the new owner previously registered other advanced manufacturing facilities, must amend its original registration) to associate the new owner's EIN with the previously registered advanced manufacturing facility.

Lastly, Temp. Reg. § 1.48D–6(b)(7)(v) provides that the taxpayer is required to include the registration number of the advanced manufacturing facility on the taxpayer's annual return for the taxable year for an election under Temp. Reg. § 1.48D–6(a)(1). The IRS will treat an elective payment election as ineffective with respect to any section 48D credit determined with respect to the advanced manufacturing facility for which the taxpayer does not include a valid registration number on the annual tax return.

II. Pre-Filing Registration Requirements and Additional Information Under Section 6417

Section 6417(d)(5) provides that, as a condition of, and prior to, any amount being treated as a payment that is made by the taxpayer under section 6417(a) or any payment being made pursuant to section 6417(c), the Secretary may require such information or registration as the Secretary deems necessary or appropriate for purposes of preventing

duplication, fraud, improper payments, or excessive payments.

In general, stakeholders requested additional information about this provision and requested that the regulations balance the need to prevent fraud and abuse with the burden on taxpayers. Stakeholders recommended that the information required to be provided to the IRS should be provided in a manner that facilitates automated procedures to help catch potential fraud, discourages abusive or otherwise illegitimate claims, and allows efficient and prompt review (both before payment and through audits). Stakeholders recommended that all required documents and information should be able to be submitted easily via an online portal. Stakeholders recommended that information or registration should be as consistent as possible across sections 48D(d)(1), 6417(d)(5), and 6418(g)(1).

Temp. Reg. § 1.6417–5T provides the mandatory pre-filing registration process. Temp. Reg. § 1.6417–5T(a) provides an overview of this process and requires an applicable entity or electing taxpayer to satisfy the pre-filing registration requirements as a condition of, and prior to, making an elective payment election. An applicable entity or electing taxpayer is required to use the pre-filing registration process to register itself as intending to make the elective payment election, to list all applicable credits it intends to claim, and to list each applicable credit property that contributed to the determination of such credits as part of the pre-filing submission (or amended submission). An applicable entity or electing taxpayer that does not obtain a registration number and report the registration number on its annual tax return with respect to an applicable credit property is ineligible to make an elective payment election to treat any elective payment amount with respect to the amount of any credit determined with respect to that applicable credit property as a payment of tax. However, completion of the pre-filing registration requirements and receipt of a registration number does not, by itself, mean that the applicable entity or electing taxpayer will receive a payment with respect to the applicable credits determined with respect to the applicable credit property.

Temp. Reg. § 1.6417–5T(b) provides the following pre-filing registration requirements.

First, an applicable entity or electing taxpayer must complete the pre-filing registration process electronically through an IRS electronic portal in accordance with the instructions provided therein, unless otherwise provided in guidance. If the election is by a member of a consolidated group, the member must complete the pre-filing registration process as a condition of, and prior to, making an elective payment election. See § 1.1502–77 (providing rules regarding the status of the common parent as agent for its members).

Second, an applicable entity or electing taxpayer must satisfy the registration requirements and receive a registration number prior to making an elective payment election on the applicable entity's tax return for the taxable year at issue.

Third, an applicable entity or electing taxpayer is required to obtain a registration number for each applicable credit property with respect to which an applicable credit will be determined and for which the applicable entity or electing taxpayer intends to make an elective payment election.

Finally, an applicable entity or electing taxpayer must provide the specific information required to be provided as part of the pre-filing registration process. The provision of such information, which includes information about the taxpayer, about the applicable credits, and about the applicable credit property, will allow the IRS to prevent duplication, fraud, improper payments, or excessive payments under section 6417. For example, verifying information about the taxpayer will allow the IRS to mitigate the risk of fraud or improper payments to entities that are not applicable entities or electing taxpayers. Information about the taxpayer's taxable year will allow the IRS to ensure that an elective payment election is timely made on the entity's annual tax return. Information about applicable credit properties, including their address and coordinates (longitude and latitude), supporting documentation, beginning of construction date, and placed in service date will allow the IRS to mitigate the risk of duplication, fraud, and improper payments for properties that are not applicable credit properties. Information about whether an investment tax credit property was acquired using any Restricted Tax Exempt Amounts will allow the IRS to prevent improper payments.

Temp. Reg. § 1.6417–5T(c) provides information about the required registration number. Temp. Reg. § 1.6417–5T(c)(1) provides that, after an applicable entity or electing taxpayer completes the pre-filing registration process as provided in proposed § 1.6417–5(b) for the applicable credit properties with respect to which the entity intends to make an elective payment election in the taxable year, the IRS will review the information provided and will issue a separate registration number for each applicable credit property for which the applicable entity or electing taxpayer provided sufficient verifiable information, as provided in guidance.

Temp. Reg. § 1.6417–5T(c)(2) provides that a registration number is valid only for the taxable year for which it is obtained. Temp. Reg. § 1.6417–5T(c)(3) provides that, if an elective payment election will be made with respect to an applicable credit property for which a registration number under proposed § 1.6417–5 has been previously obtained, the applicable entity or electing taxpayer will be required to renew the registration each year in accordance with applicable guidance, including attesting that all the facts previously provided are still correct or updating any facts. Temp. Reg. § 1.6417–5T(c)(4) provides that, if specified changes occur with respect to one or more applicable credit properties for which a registration number has been previously obtained, an applicable entity or electing taxpayer is required to amend the registration (or may need to submit a new registration) to reflect these new facts. For example, one stakeholder asked that, if a taxpayer becomes a party to an internal reorganization under section 368(a) (such as a merger or distribution in a nonrecognition transaction) during the election period, the elective payment election should carry over to the successor entity. The temporary regulations provide that if a facility previously registered for an elective payment election undergoes a change of ownership (incident to a corporate reorganization or an asset sale) such that the new owner has a different employer identification number (EIN) than the owner who obtained the original registration, the original owner is required to amend the original registration to disassociate its EIN from the credit property and the new owner must submit an original registration (or if the new owner previously registered other credit properties, must amend its original registration) to associate the new owner's EIN with the previously registered credit property.

Lastly, Temp. Reg. § 1.6417–5T(c)(5) provides that the applicable entity or electing taxpayer is required to include the registration number of the applicable credit property on their annual tax return for the taxable year. The IRS will treat an elective payment election as ineffective with respect to the portion of a credit determined with

respect to an applicable credit property for which the applicable entity or electing taxpayer does not include a valid registration number on the annual tax return.

III. Pre-Filing Registration Requirements and Additional Information Under Section 6418

Section 6418(g)(1) provides that as a condition of, and prior to, any transfer of any portion of an eligible credit under section 6418, the Secretary may require such information (including, in such form or manner as is determined appropriate by the Secretary, such information returns) or registration as the Secretary deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under this section.

In general, consistent with section 6417, stakeholders requested additional information about this provision and requested that the regulations balance the need to prevent fraud and abuse with the burden on taxpayers. Stakeholders recommended a registration system that assigns a transfer number to an eligible taxpayer that can be used by transferee taxpayers to claim transferred credits and allows the IRS to track transfers of eligible credits. Stakeholders also recommended that information or registration requirements should be as consistent as possible across sections 48D(d)(1), 6417(d)(5), and 6418(g)(1). In order to meet the purpose of section 6418(g)(1), the Treasury Department and the IRS have determined that it is necessary to establish a mandatory registration process that is in place before the end of the 2023 calendar year, which is the first full taxable year during which a transfer election under section 6418 is available.

Temp. Reg. § 1.6418–4T generally provides rules requiring that eligible taxpayers register before filing the return on which a transfer election is made and provide information related to each eligible credit property for which the eligible taxpayer intends to transfer a specified credit portion. Temp. Reg. § 1.6418–4T(a), consistent with section 6418(g)(1), requires that, as a condition of, and prior to, making an election to transfer a specified credit portion, an eligible taxpayer satisfy the pre-filing registration requirements in Temp. Reg. § 1.6418–4T(b). After the required pre-filing registration process is successfully completed, an eligible taxpayer will receive a unique registration number from the IRS for each registered eligible credit property for which the eligible taxpayer intends to transfer a specified credit portion. The Treasury Department and the IRS intend for this pre-filling registration process to occur through an IRS electronic portal (unless otherwise allowed in guidance). An eligible taxpayer that does not obtain a registration number and report the registration number on its return with respect to an eligible credit property is ineligible to make a transfer election. However, completion of the pre-filing registration requirements and receipt of a registration number does not, by itself, mean the eligible taxpayer is eligible to transfer any specified credit portion determined with respect to the eligible credit property. The registration number also must be reported on the eligible taxpayer's return.

Temp. Reg. § 1.6418–4T(b) provides the following pre-filing registration requirements.

First, an eligible taxpayer must complete the pre-filing registration process electronically through an IRS electronic portal in accordance with the instructions provided therein, unless otherwise provided in guidance. If the election is by a member of a consolidated group, the member must complete the pre-filing registration process as a condition of, and prior to, making an elective payment election. See § 1.1502–77 (providing rules regarding the status of the common parent as agent for its members).

Second, an eligible taxpayer must satisfy the registration requirements and receive a registration number prior to making a transfer election for a specified credit portion on the eligible taxpayer's return for the taxable year at issue.

Third, an eligible taxpayer is required to obtain a registration number for each eligible credit property with respect to which a transfer election of a specified credit portion is made.

Finally, an eligible taxpayer must provide the specific information required to be provided as part of the pre-filing registration process. The provision of such information, which includes information about the taxpayer, about the eligible credits, and about the eligible credit property, will allow the IRS to prevent duplication, fraud, improper payments, or excessive transfers under section 6418. For example, verifying information about the taxpayer will allow the IRS to mitigate the risk of fraud or improper transfers. Information about eligible credit properties, including their address and coordinates (longitude and latitude), supporting documentation, beginning of construction date, and placed in service date will allow the IRS to mitigate the risk of duplication, fraud, and improper transfers for properties that are not eligible credit properties.

Temp. Reg. § 1.6418–4T(c) provides rules related to the registration number that is obtained after the IRS has reviewed and approved the taxpayer's submitted information. First, these rules provide that a registration number is valid for an eligible taxpayer only for the taxable year for which it is obtained, and for a transferee taxpayer's taxable year in which the specified credit portion is taken into account. Second, Temp. Reg.§ 1.6418–4T(c) provides rules for the renewal of a registration number that has been previously obtained. The eligible taxpayer is required to renew the registration with respect to an eligible credit property each year in accordance with guidance, including attesting that all the facts are still correct or updating any facts. Third, the temporary regulations provide that, if facts change with respect to an eligible credit property for which a registration number has been previously obtained, an eligible taxpayer is required to amend the registration to reflect these new facts. Lastly, the temporary regulations provide that an eligible taxpayer is required to include the registration number of the eligible credit property on the eligible taxpayer's return for the taxable year, as provided in Temp. Reg. § 1.6418–2T(b), for an election to be effective with respect to any eligible credit determined with respect to any eligible credit property. The IRS will treat a transfer election as ineffective with respect to an eligible credit determined with respect to an eligible credit property for which the eligible taxpayer does not include a valid registration number on its return.

A transferee taxpayer is also required to report the registration number received from an eligible taxpayer on its return for the taxable year that the transferee taxpayer takes the transferred eligible credit into account.

Applicability Dates

The temporary regulations under § 1.48D–6T apply to taxable years ending on or after June 21, 2023. The temporary regulations under § 1.48D–6T expire on June 12, 2026.

The temporary regulations under § 1.6417–5T apply to taxable years ending on or after June 21, 2023. The temporary regulations under § 1.6417–5T expire on June 12, 2026.

The temporary regulations under § 1.6418–4T apply to taxable years ending on or after June 21, 2023. The temporary regulations under § 1.6418–4T expire on June 12, 2026.

Special Analyses

I. Good Cause

The Administrative Procedure Act (5 U.S.C. Subchapter II) provides an exception to generally applicable rulemaking requirements when an agency makes a finding of good cause (and incorporates the finding and a brief statement of reasons therefor in the rules issued).

The Treasury Department and the IRS find that good cause exists for making these temporary regulations immediately effective without notice and comment. The pre-filing registration process is critical to the implementation of sections 48D, 6417, and 6418. As expressly authorized by statute to prevent duplication, fraud, and improper or excessive payments, the temporary regulations condition elective payment and transferability on pre-registration with the IRS.[1] Section 48D applies to property placed in service after December 31, 2022, and sections 6417 and 6418 each apply to taxable years beginning after that date. This means that filers will be able take advantage of these provisions for their 2023 tax years.

The Treasury Department and the IRS believe it is important to immediately put into effect these pre-registration requirements. The pre-registration process collects critical information to minimize fraudulent elections and prevent duplication and improper or excessive payments by ensuring basic eligibility requirements for eligible credits before the election is made. Validating certain information before the annual tax return process will result in more accurate review of the veracity of the information and fewer duplicate, fraudulent, improper, or excessive transfers or payments. In addition, the pre-filing registration requirement is expected to reduce the need for recovering erroneous payments and adjusting return positions via costly, burdensome, and inefficient examination, appeals, and litigation processes (which, in the case of section 6418, could potentially be needed with respect to both parties to the credit transfer transaction). Immediate implementation of these safeguards is important because it is anticipated that there will be an immediate and significant increase in utilization of the tax incentives described in sections 48D(d), 6417, and 6418 by entities that have not historically had return-filing obligations, increasing the risk of the duplicative, fraudulent, and improper or excessive payments that the pre-registration process is intended to mitigate.

The Treasury Department and the IRS find that good cause exists for making these temporary regulations effective without notice and comment because failure to do so would be contrary to the public interest. Without these temporary regulations, the IRS may not be able to timely and effectively develop and implement a pre-filing registration system. Lack of a pre-registration process would create risk for the public fisc by increasing the likelihood of duplicate, fraudulent, improper, or excessive payments or transfers. The pre-filing registration system also must be developed sufficiently in advance of the filing season for taxpayers to have time to gather the necessary information and complete the registration process and for the IRS to be able to review the submitted information and issue registration numbers. Failing to pre-register taxpayers who have never before filed a tax return with the IRS could significantly delay the processing of those taxpayers' returns because procedures to allow them to file an annual tax return would need to be taken during the middle of filing season. Such delay would harm taxpayers and also potentially result in the IRS owing interest on any refunds due, further damaging the public fisc.

Additionally, it is in the public interest to have certainly regarding the requirements for pre-registration as far before the 2023 filing season as possible to ensure the ability to timely and accurately fulfill the requirements. This certainty is particularly crucial for those filers already or soon to be engaged in an activity that would qualify them to make an elective payment or transfer election. Taxpayer certainty is also especially important for particular populations of affected taxpayers such as entities that have not historically had return-filing obligations because they may need significant time to review and understand the underlying tax law and the pre-filing registration requirements.

The Treasury Department and the IRS also find that good cause exists for making these temporary regulations immediately effective because it would be impracticable to comply with the notice and comments process. The processes established in sections 48D, 6417, and 6418 are novel and complex. Determining how these processes interact with established tax procedures is complicated and in some aspects very difficult to reconcile. The elections under sections 6417 and 6418 apply to numerous credits, each of which contain different substantive eligibility and other requirements, which had to be separately analyzed to understand what information should be collected as part of the pre-filing registration process. Developing a previously nonexistent registration process, new filing portal, and determining the necessary elements to protect the fisc has been time consuming. The Treasury Department and the IRS have moved quickly to understand these complex Code sections and determine technological elements needed to create the pre-filing registration process and portal.

To accomplish the purpose of the pre-filing registration process, the electronic portal must open by Fall 2023. The Treasury Department and the IRS understand the need to carefully consider all public comments and provide robust responses to all relevant comments. The few months available between the publication of proposed regulations and the opening of the electronic portal is insufficient time to receive, review, and meaningfully respond to public comments. Furthermore, there would not be sufficient time after all comments are considered to then make corresponding changes to the electronic portal, which would require technological development and user testing.

Comments are being solicited in the cross-referenced notices of proposed rulemaking that are in the Proposed Rules section in this issue of the **Federal Register**. Any comments will be considered before final regulations are issued.

II. Paperwork Reduction Act

The collection of information contained in these temporary regulations has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act. Commenters are strongly encouraged to submit public comments electronically. Submit electronic submissions for the proposed information collection to the IRS via email at *pra.comments@irs.gov* (indicate REG–101607–23 on the Subject line). Comments on the collection of information should be received by August 14, 2023. Comments are specifically requested concerning:

[1] Sections 48D(d)(2)(E) and 6417(d)(5) authorize the Secretary to require such information or registration as the Secretary deems necessary or appropriate for purposes of preventing duplication, fraud, improper payments, or excessive payments as a condition of, and prior to, any amount being treated as a payment made by or to the taxpayer. Section 6418(g)(1) states that, as a condition of, and prior to, any transfer of any portion of an eligible credit pursuant to section 6418(a), the Secretary may require such information (including, in such form or manner as is determined appropriate by the Secretary, such information returns) or registration as the Secretary deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under section 6418.

Whether the proposed collection of information is necessary for the proper performance of the functions of the IRS, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information (see below);

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

The collections of information in these temporary regulations contain reporting and recordkeeping requirements. The recordkeeping requirements are considered general tax records under Section 1.6001–1(e). These records are required for IRS to validate that taxpayers have met the regulatory requirements and are entitled to transfer the credits. For PRA purposes, general tax records are already approved by OMB under 1545–0047 for tax-exempt organizations and government entities; under 1545–0074 for individuals; and under 1545–0123 for business entities.

These reporting requirements include a requirement to register with IRS to make the elective payment election or the transfer election in §§ 1.48D–6T, 1.6417–5T, 1.6418–4T. This pre-filing registration requirement is being submitted to OMB and will be processed in accordance with the PRA as required by 5 CFR 1320.10. This collection of information is necessary to prevent duplication, fraud, improper payments, or excessive payments under sections 48D, 6417 and 6418 of the Code. The IRS is seeking a new OMB control number (1545–NEW) for the pre-registration requirements. The respondents are:

(1) Under section 48D, taxpayers eligible to elect the elective payment election of the advanced manufacturing investment credit.

Estimated total annual reporting burden is 271 hours.

Estimated average annual burden per respondent is 5.41 hours.

Estimated number of respondents is 50.

(2) Under section 6417, tax-exempt organizations, State and local governments, Indian tribal governments, Alaska Native Corporations, the Tennessee Valley Authority, rural electric cooperatives, and certain taxpayers eligible to elect the elective payment of applicable credits in a taxable year.

Estimated total annual reporting burden is 126,200 hours.

Estimated average annual burden per respondent is 6.31 hours.

Estimated number of respondents is 20,000.

(3) Under section 6418, eligible taxpayers that elect to transfer eligible credits in a taxable year.

Estimated total annual reporting burden is 308,000 hours.

Estimated average annual burden per respondent is 6.16 hours.

Estimated number of respondents is 50,000.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget. Books or records relating to a collection of information must be retained if their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by section 6103. The IRS anticipates opening the electronic portal for pre-filing registration in Fall 2023, after approval of the collection of information under the Paperwork Reduction Act.

III. Regulatory Flexibility Act

For applicability of the Regulatory Flexibility Act, please refer to the cross-reference notices of proposed rulemaking (REG–105595–23, REG–101607–23, and REG–101610–23) published elsewhere in this issue of the **Federal Register**.

IV. Section 7805(f)

Pursuant to section 7805(f), these temporary regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

V. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandate Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a state, local, or tribal government, in the aggregate, or by the private sector, of $100 million in 1995 dollars (updated annually for inflation). These temporary regulations do not include any Federal mandate that may result in expenditures by state, local, or tribal governments, or by the private sector in excess of that threshold.

VI. Executive Order 13132: Federalism

Executive Order 13132 (Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on state and local governments, and is not required by statute, or preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. These temporary regulations do not have federalism implications and do not impose substantial, direct compliance costs on state and local governments or preempt state law within the meaning of the Executive Order.

VII. Executive Order 12866

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under Executive Order 12866 (June 9, 2023), tax regulatory actions issued by the IRS are not subject to the requirements of section 6 of Executive Order 12866, as amended. Therefore, a regulatory impact assessment is not required.

VIII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as a major rule as defined by 5 U.S.C. 804(2). For good cause pursuant to 5 U.S.C. 808(2), see part I of this Special Analyses section.

Drafting Information

The principal author of this temporary regulation is Lani M. Sinfield, Office of the Associate Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, the Treasury Department and the IRS amend 26 CFR part 1 as follows:

PART 1—INCOME TAXES

■ **Paragraph. 1.** The authority citation for part 1 is amended by adding the following entries in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

* * * * *

Section 1.48D–6T also issued under 26 U.S.C. 48D(d)(2)(E) and (6) * * *

* * * * *

Section 1.6417–5T also issued under 26 U.S.C. 6417(d)(5) and (h) * * *

Section 1.6418–4T also issued under 26 U.S.C. 6418(g)(1) and (h) * * *

* * * * *

■ **Par. 2.** Section 1.48D–6T is added to read as follows:

§ 1.48D–6T Elective payment election.

(a) [Reserved]

(b) *Pre-filing registration required*—(1) *In general.* Pre-filing registration by any taxpayer (including a partnership or an S corporation) in accordance with this paragraph (b) is a condition that must be successfully completed prior to making an elective payment election under section 48D(d)(1) and this section with respect to qualified property placed in service by the taxpayer as part of an advanced manufacturing facility of an eligible taxpayer. An elective payment election will not be effective with respect to the section 48D credit determined with respect to any such qualified property placed in service by any taxpayer unless the taxpayer received a valid registration number for the taxpayer's qualified investment in the advanced manufacturing facility of an eligible taxpayer in accordance with this paragraph (b) and provided the registration number for each qualified investment in each advanced manufacturing facility on its Form 3800, *General Business Credit,* attached to the tax return in accordance with guidance. For purposes of this section, the term *guidance* means guidance published in the **Federal Register** or Internal Revenue Bulletin, as well as administrative guidance such as forms, instructions, publications, or other guidance on the IRS.gov website. See §§ 601.601 and 601.602 of this chapter. However, completion of the pre-filing registration requirements and receipt of a registration number does not, by itself, mean the taxpayer is eligible to receive a payment with respect to any section 48D credit determined with respect to the qualified property.

(2*) Manner of registration.* Unless otherwise provided in guidance, a taxpayer must complete the pre-filing registration process electronically through the IRS electronic portal and in accordance with the instructions provided therein.

(3) *Members of a consolidated group.* A member of a consolidated group is required to complete pre-filing registration as a condition of, and prior to, making an elective payment election. See § 1.1502–77 (providing rules regarding the status of the common parent as agent for its members).

(4) *Timing of pre-filing registration.* A taxpayer must satisfy the pre-filing registration requirements of this paragraph (b) and receive a registration number under paragraph (b)(6) of this section prior to making any elective payment election under this section on the taxpayer's tax return for the taxable year at issue.

(5) *Each qualified investment in an advanced manufacturing facility must have its own registration number.* A taxpayer must obtain a registration number for each qualified investment in an advanced manufacturing facility of an eligible taxpayer with respect to which an elective payment election is made.

(6) *Information required to complete the pre-filing registration process.* Unless modified in future guidance, a taxpayer must provide the following information to the IRS to complete the pre-filing registration process:

(i) The taxpayer's general information, including its name, address, taxpayer identification number, and type of legal entity;

(ii) Any additional information required by the IRS electronic portal;

(iii) The taxpayer's taxable year, as determined under section 441 of the Code;

(iv) The type of annual return(s) normally filed by the taxpayer with the IRS;

(v) A list of each qualified investment in an advanced manufacturing facility that the taxpayer intends to use to determine a section 48D credit for which the taxpayer intends to make an elective payment election;

(vi) For each qualified investment in an advanced manufacturing facility listed in paragraph (b)(5)(v) of this section, any further information required by the IRS electronic portal, such as—

(A) The type of qualified investment in the advanced manufacturing facility;

(B) Physical location (that is, address and coordinates (longitude and latitude) of the advanced manufacturing facility);

(C) Any supporting documentation relating to the construction, reconstruction or acquisition of the advanced manufacturing facility (such as, State and local government permits to operate the advanced manufacturing facility, certifications, and evidence of ownership that ties to the land deed, lease, or other documented right to use and access any land upon which the advanced manufacturing facility is constructed or housed);

(D) The beginning of construction date and the placed in service date of any qualified property that is part of the advanced manufacturing facility;

(E) The source of funds the taxpayer used to acquire the qualified property with respect to which the qualified investment was made; and

(F) Any other information that the taxpayer or entity believes will help the IRS evaluate the registration request;

(vii) The name of a contact person for the taxpayer. The contact person is the person whom the IRS may contact if there is an issue with the registration. The contact person must either possess legal authority to bind the taxpayer or must provide a properly executed power of attorney on Form 2848, *Power of Attorney and Declaration of Representative;*

(viii) A penalties of perjury statement, effective for all information submitted as a complete application, and signed by a person with personal knowledge of the relevant facts that is authorized to bind the registrant; and

(ix) Any other information the IRS deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under this section that is provided in guidance.

(7) *Registration number*—(i) *In general.* The IRS will review the information provided and will issue a separate registration number for each qualified investment in an advanced manufacturing facility of an eligible taxpayer for which the taxpayer making the registration provided sufficient verifiable information.

(ii) *Registration number is only valid for one year.* A registration number is valid only with respect to the taxpayer that obtained the registration number under this section and only for the taxable year for which it is obtained.

(iii) *Renewing registration numbers.* If an elective payment election will be made with respect to any section 48D credit determined with respect to a qualified investment in an advanced manufacturing facility for a taxable year after a registration number under this section has been obtained, the taxpayer must renew the registration for that subsequent year in accordance with applicable guidance, including attesting that all the facts previously provided are still correct or updating any facts.

(iv) *Amendment of previously submitted registration information if a change occurs before the registration number is used.* As provided in instructions to the pre-filing registration portal, if specified changes occur with respect to a qualified investment in an advanced manufacturing facility for which a registration number has been previously obtained, a taxpayer must

amend the registration (or may need to submit a new registration) to reflect these new facts. For example, if an eligible taxpayer that is the owner of an advanced manufacturing facility previously registered for an elective payment election for a section 48D credit determined with respect to that advanced manufacturing facility and the advanced manufacturing facility undergoes a change of ownership (incident to a corporate reorganization or an asset sale) such that the new owner has a different employer identification number (EIN) than the owner who obtained the original registration, the original owner of the advanced manufacturing facility must amend the original registration to disassociate its EIN from the advanced manufacturing facility and the new owner must submit separately an original registration (or if the new owner previously registered other qualified investments or advanced manufacturing facilities, must amend its original registration) to associate the new owner's EIN with the previously registered advanced manufacturing facility.

(v) *Registration number is required to be reported on the return for the taxable year of the elective payment election.* The taxpayer must include the registration number of the qualified investment in the advanced manufacturing facility on the taxpayer's return as provided in paragraph (b) of this section for the taxable year. The IRS will treat an elective payment election as ineffective with respect to a section 48D credit determined with respect to a qualified investment in an advanced manufacturing facility for which the taxpayer does not include a valid registration number on the annual return.

(c)–(i) [Reserved]

(j) *Applicability date for pre-filing registration requirements.* The requirements of paragraph (b) of this section apply to property placed in service on or after December 31, 2022, and during a taxable year ending on or after June 21, 2023.

(k) *Expiration date.* The applicability of paragraph (b) of this section expires on June 12, 2026.

■ **Par. 3.** Section 1.6417–5T is added to read as follows:

§ 1.6417–5T Additional information and registration.

(a) *Pre-filing registration and election.* An applicable entity or electing taxpayer is required to satisfy the pre-filing registration requirements in paragraph (b) of this section as a condition of, and prior to, making an elective payment election. An applicable entity or electing taxpayer must use the pre-filing registration process to register itself as intending to make the elective payment election, to list all applicable credits it intends to claim, and to list each applicable credit property that contributed to the determination of such credits as part of the pre-filing submission (or amended submission). An applicable entity or electing taxpayer that does not obtain a registration number under paragraph (c)(1) of this section or report the registration number on its annual tax return, as defined in § 1.6417–1(b), pursuant to paragraph (c)(5) of this section with respect to an otherwise applicable credit property, is ineligible to receive any elective payment amount with respect to the amount of any credit determined with respect to that applicable credit property. However, completion of the pre-filing registration requirements and receipt of a registration number does not, by itself, mean the applicable entity or electing taxpayer is eligible to receive a payment with respect to the applicable credits determined with respect to the applicable credit property.

(b) *Pre-filing registration requirements*—(1) *Manner of pre-filing registration.* Unless otherwise provided in guidance, an applicable entity or electing taxpayer must complete the pre-filing registration process electronically through the IRS electronic portal and in accordance with the instructions provided therein.

(2) *Pre-filing registration and election for members of a consolidated group.* A member of a consolidated group is required to complete pre-filing registration as a condition of, and prior to, making an elective payment election. See § 1.1502–77 (providing rules regarding the status of the common parent as agent for its members).

(3) *Timing of pre-filing registration.* An applicable entity or electing taxpayer must satisfy the pre-filing registration requirements of this paragraph (b) and receive a registration number under paragraph (c) of this section prior to making an elective payment election under § 1.6417–2(b) on the applicable entity's or electing taxpayer's annual tax return for the taxable year at issue.

(4) *Each applicable credit property must have its own registration number.* An applicable entity or electing taxpayer must obtain a registration number for each applicable credit property with respect to which it intends to make an elective payment election.

(5) *Information required to complete the pre-filing registration process.* Unless modified in future guidance, an applicable entity or electing taxpayer must provide the following information to the IRS to complete the pre-filing registration process:

(i) The applicable entity's or electing taxpayer's general information, including its name, address, taxpayer identification number, and type of legal entity.

(ii) Any additional information required by the IRS electronic portal, such as information regarding the taxpayer's exempt status under section 501(a) of the Code; that the applicable entity is a political subdivision of a State, the District of Columbia, an Indian Tribal government, or a U.S territory; or that the applicable entity is an agency or instrumentality of a State, the District of Columbia, an Indian Tribal government, or a U.S. territory.

(iii) The taxpayer's taxable year, as determined under section 441 of the Code.

(iv) The type of annual tax return(s) normally filed by the applicable entity or electing taxpayer, or that the applicable entity or electing taxpayer does not normally file an annual tax return with the IRS.

(v) The type of applicable credit(s) for which the applicable entity or electing taxpayer intends to make an elective payment election.

(vi) For each applicable credit, each applicable credit property that the applicable entity or electing taxpayer intends to use to determine the credit for which the applicable entity or electing taxpayer intends to make an elective payment election.

(vii) For each applicable credit property listed in paragraph (b)(4)(vi) of this section, any further information required by the IRS electronic portal, such as—

(A) The type of applicable credit property;

(B) Physical location (that is, address and coordinates (longitude and latitude) of the applicable credit property);

(C) Any supporting documentation relating to the construction or acquisition of the applicable credit property (such as State, District of Columbia, Indian Tribal, U.S. territorial, or local government permits to operate the applicable credit property; certifications; evidence of ownership that ties to a land deed, lease, or other documented right to use and access any land or facility upon which the applicable credit property is constructed or housed; U.S. Coast Guard registration numbers for offshore wind vessels; and the vehicle identification number of an

eligible clean vehicle with respect to which a section 45W credit is determined);

(D) The beginning of construction date and the placed in service date of the applicable credit property;

(E) If an investment-related credit property (as defined § 1.6417–2(c)(3)), the source of funds the taxpayer used to acquire the property; and

(F) Any other information that the applicable entity or electing taxpayer believes will help the IRS evaluate the registration request.

(viii) The name of a contact person for the applicable entity or electing taxpayer. The contact person is the person whom the IRS may contact if there is an issue with the registration. The contact person must either possess legal authority to bind the applicable entity or electing taxpayer or must provide a properly executed power of attorney on Form 2848, *Power of Attorney and Declaration of Representative.*

(ix) A penalties of perjury statement, effective for all information submitted as a complete application, and signed by a person with personal knowledge of the relevant facts that is authorized to bind the registrant.

(x) Any other information the IRS deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under this section that is provided in guidance.

(c) *Registration number*—(1) *In general.* The IRS will review the information provided and will issue a separate registration number for each applicable credit property for which the applicable entity or electing taxpayer provided sufficient verifiable information.

(2) *Registration number is only valid for one taxable year.* A registration number is valid only with respect to the applicable entity or electing taxpayer that obtained the registration number under this section and only for the taxable year for which it is obtained.

(3) *Renewing registration numbers.* If an elective payment election will be made with respect to an applicable credit property for a taxable year after a registration number under this section has been obtained, the applicable entity or electing taxpayer must renew the registration for that subsequent taxable year in accordance with applicable guidance, including attesting that all the facts previously provided are still correct or updating any facts.

(4) *Amendment of previously submitted registration information if a change occurs before the registration number is used.* As provided in instructions to the pre-filing registration portal, if specified changes occur with respect to one or more applicable credit properties for which a registration number has been previously obtained but not yet used, an applicable entity or electing taxpayer must amend the registration (or may need to submit a new registration) to reflect these new facts. For example, if the owner of a facility previously registered for an elective payment election for applicable credits determined with respect to that facility and the facility undergoes a change of ownership (incident to a corporate reorganization or an asset sale) such that the new owner has a different employer identification number (EIN) than the owner who obtained the original registration, the original owner of the facility must amend the original registration to disassociate its EIN from the applicable credit property and the new owner must submit separately an original registration (or if the new owner previously registered other credit properties, must amend its original registration) to associate the new owner's EIN with the previously registered applicable credit property.

(5) *Registration number is required to be reported on the return for the taxable year of the elective payment election.* The applicable entity or electing taxpayer must include the registration number of the applicable credit property on its annual tax return as provided in § 1.6417–2(b) for the taxable year. The IRS will treat an elective payment election as ineffective with respect to an applicable credit determined with respect to an applicable credit property for which the applicable entity or electing taxpayer does not include a valid registration number on the annual tax return.

(d) *Applicability date.* This section applies to taxable years ending on or after June 21, 2023.

(e) *Expiration date.* The applicability of this section expires on June 12, 2026.

■ **Par. 4.** Section 1.6418–4T is added to read as follows:

§ 1.6418–4T Additional information and registration.

(a) *Pre-filing registration and election.* As a condition of, and prior to, any specified credit portion being transferred by an eligible taxpayer to a transferee taxpayer pursuant to an election under § 1.6418–2, or a specified credit portion being transferred by a partnership or S corporation pursuant to § 1.6418–3, the eligible taxpayer is required to satisfy the pre-filing registration requirements in paragraph (b) of this section. An eligible taxpayer that does not obtain a registration number under paragraph (c)(1) of this section, and report the registration number on its return pursuant to paragraph (c)(5) of this section, is ineligible to make a transfer election for a specified credit portion under § 1.6418–2 or § 1.6418–3, with respect to the eligible credit determined with respect to the specific eligible credit property for which the eligible taxpayer has failed to obtain and report a registration number. However, completion of the pre-filing registration requirements and receipt of a registration number does not, by itself, mean the eligible taxpayer is eligible to transfer any specified credit portion determined with respect to the eligible credit property.

(b) *Pre-filing registration requirements*—(1) *Manner of pre-filing registration.* Unless otherwise provided in guidance, eligible taxpayers must complete the pre-filing registration process electronically through an IRS electronic portal and in accordance with the instructions provided therein.

(2) *Pre-filing registration and election for members of a consolidated group.* A member of a consolidated group is required to complete pre-filing registration to transfer any eligible credit determined with respect to the member. See § 1.1502–77 (providing rules regarding the status of the common parent as agent for its members).

(3) *Timing of pre-filing registration.* An eligible taxpayer must satisfy the pre-filing registration requirements of this paragraph (b) and receive a registration number under paragraph (c) of this section prior to making a transfer election under § 1.6418–2 or § 1.6418–3 for a specified credit portion on the taxpayer's return for the taxable year at issue.

(4) *Each eligible credit property must have its own registration number.* An eligible taxpayer must obtain a registration number for each eligible credit property with respect to which a transfer election of a specified credit portion is made.

(5) *Information required to complete the pre-filing registration process.* Unless modified in future guidance, an eligible taxpayer is required to provide the following information to the IRS to complete the pre-filing registration process:

(i) The eligible taxpayer's general information, including its name, address, taxpayer identification number, and type of legal entity;

(ii) Any additional information required by the IRS electronic portal,

such as information establishing that the entity is an eligible taxpayer;

(iii) The taxpayer's taxable year, as determined under section 441;

(iv) The type of annual tax return(s) normally filed by the eligible taxpayer, or that the eligible taxpayer does not normally file an annual tax return with the IRS;

(v) The type of eligible credit(s) for which the eligible taxpayer intends to make a transfer election;

(vi) Each eligible credit property that the eligible taxpayer intends to use to determine a specified credit portion for which the eligible taxpayer intends to make a transfer election;

(vii) For each eligible credit property listed in paragraph (b)(4)(vi) of this section, any further information required by the IRS electronic portal, such as—

(A) The type of eligible credit property;

(B) Physical location (that is, address and coordinates (longitude and latitude) of the eligible credit property);

(C) Any supporting documentation relating to the construction or acquisition of the eligible credit property (such as State, Indian Tribal, or local government permits to operate the eligible credit property, certifications, evidence of ownership that ties to a land deed, lease, or other documented right to use and access any land or facility upon which the eligible credit property is constructed or housed, and U.S. Coast Guard registration numbers for offshore wind vessels);

(D) The beginning of construction date, and the placed in service date of the eligible credit property; and

(E) Any other information that the eligible taxpayer believes will help the IRS evaluate the registration request;

(viii) The name of a contact person for the eligible taxpayer. The contact person is the person whom the IRS may contact if there is an issue with the registration. The contact person must either possess legal authority to bind the eligible taxpayer, or must provide a properly executed power of attorney on Form 2848, *Power of Attorney and Declaration of Representative;*

(ix) A penalties of perjury statement, effective for all information submitted as a complete application, and signed by a person with personal knowledge of the relevant facts that is authorized to bind the registrant; and

(x) Any other information the IRS deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under this section that is provided in guidance.

(c) *Registration number*—(1) *In general.* The IRS will review the registration information provided and will issue a separate registration number for each eligible credit property for which the eligible taxpayer provided sufficient verifiable information.

(2) *Registration number is only valid for one taxable year.* A registration number is valid to an eligible taxpayer only for the taxable year in which the credit is determined for the eligible credit property for which the registration is completed, and for a transferee taxpayer's taxable year in which the eligible credit is taken into account under § 1.6418–2(f).

(3) *Renewing registration numbers.* If an election to transfer an eligible credit will be made with respect to an eligible credit property for a taxable year after a registration number under this section has been obtained, the eligible taxpayer must renew the registration for that subsequent taxable year in accordance with applicable guidance, including attesting that all the facts previously provided are still correct or updating any facts.

(4) *Amendment of previously submitted registration information if a change occurs before the registration number is used.* As provided in instructions to the pre-filing registration portal, if specified changes occur with respect to one or more applicable credit properties for which a registration number has been previously obtained but not yet used, an eligible taxpayer must amend the registration (or may need to submit a new registration) to reflect these new facts. For example, if the owner of a facility previously registered for a transfer election under § 1.6418–2 or § 1.6418–3 for eligible credits determined with respect to that facility and the facility undergoes a change of ownership (incident to a corporate reorganization or an asset sale) such that the new owner has a different employer identification number (EIN) than the owner who obtained the original registration, the original owner of the facility must amend the original registration to disassociate its EIN from the eligible credit property and the new owner must submit separately an original registration (or if the new owner previously registered other credit properties, must amend its original registration) to associate the new owner's EIN with the previously registered eligible credit property.

(5) *Reporting of registration number by an eligible taxpayer and a transferee taxpayer*—(i) *Eligible taxpayer reporting.* As part of making a valid transfer election under § 1.6418–2 or § 1.6418–3, an eligible taxpayer must include the registration number of the eligible credit property on the eligible taxpayer's return (as provided in § 1.6418–2(b) or § 1.6418–3(d)) for the taxable year the specified credit portion was determined. The IRS will treat an election as ineffective if the eligible taxpayer does not include a valid registration number on the return.

(ii) *Transferee taxpayer reporting.* A transferee taxpayer must report the registration number received (as part of the transfer election statement as described in § 1.6418–2(b) or otherwise) from a transferor taxpayer on the Form 3800, *General Business Credit,* as part of the return for the taxable year that the transferee taxpayer takes the transferred specified credit portion into account. The specified credit portion will be disallowed to the transferee taxpayer if the transferee taxpayer does not include the registration number on the return.

(d) *Applicability date.* This section applies to taxable years ending on or after June 21, 2023.

(e) *Expiration date.* The applicability of this section expires on June 12, 2026.

Douglas W. O'Donnell,

Deputy Commissioner for Services and Enforcement.

Approved: June 5, 2023.

Lily Batchelder,

Assistant Secretary of the Treasury (Tax Policy).

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 587

Publication of Russian Harmful Foreign Activities Sanctions Regulations Web General License 69

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Publication of a Web General License.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing one general license (GL) issued pursuant to the Russian Harmful Foreign Activities Sanctions Regulations: GL 69, which was previously made available on OFAC's website.

DATES: GL 69 was issued on May 31, 2023. See **SUPPLEMENTARY INFORMATION** for additional relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Assistant Director for Licensing,

202–622–2480; Assistant Director for Regulatory Affairs, 202–622–4855; or Assistant Director for Compliance, 202–622–2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

This document and additional information concerning OFAC are available on OFAC's website: *https://ofac.treasury.gov.*

Background

On May 31, 2023, OFAC issued GL 69 to authorize certain transactions otherwise prohibited by the Russian Harmful Foreign Activities Sanctions Regulations, 31 CFR part 587. GL 69 was made available on OFAC's website (*https://ofac.treasury.gov*) when it was issued. The text of this GL is provided below.

OFFICE OF FOREIGN ASSETS CONTROL

Russian Harmful Foreign Activities Sanctions Regulations 31 CFR Part 587

GENERAL LICENSE NO. 69

Authorizing Certain Debt Securities Servicing Transactions Involving International Investment Bank

(a) Except as provided in paragraph (c) of this general license, all transactions prohibited by Executive Order (E.O.) 14024 that are ordinarily incident and necessary to the processing of interest or principal payments on debt securities issued by International Investment Bank (IIB) prior to April 12, 2023 are authorized through 12:01 a.m. eastern daylight time June 30, 2023, provided that such interest or principal payments are not made to persons located in the Russian Federation and that any payments to a blocked person, wherever located, are made into a blocked account in accordance with the Russian Harmful Foreign Activities Sanctions Regulations, 31 CFR part 587 (RuHSR).

Note to paragraph (a). For the purposes of this general license, the term ''person located in the Russian Federation'' includes persons in the Russian Federation, individuals ordinarily resident in the Russian Federation, and entities incorporated or organized under the laws of the Russian Federation or any jurisdiction within the Russian Federation.

(b) U.S. financial institutions are authorized to unblock interest or principal payments that were blocked on or after April 12, 2023 but before May 31, 2023 on debt securities issued by IIB prior to April 12, 2023, provided that the funds are unblocked solely to effect transactions authorized in paragraph (a) of this general license.

Note to paragraph (b). U.S. financial institutions unblocking property pursuant to paragraph (b) of this general license are required to file an unblocking report pursuant to 31 CFR 501.603.

(c) This general license does not authorize:

(1) Any transactions prohibited by Directive 2 under E.O. 14024, *Prohibitions Related to Correspondent or Payable-Through Accounts and Processing of Transactions Involving Certain Foreign Financial Institutions;*

(2) Any transactions prohibited by Directive 4 under E.O. 14024, *Prohibitions Related to Transactions Involving the Central Bank of the Russian Federation, the National Wealth Fund of the Russian Federation, and the Ministry of Finance of the Russian Federation;* or

(3) Any transactions otherwise prohibited by the RuHSR, including transactions involving any person blocked pursuant to the RuHSR other than the blocked person described in paragraph (a) of this general license, unless separately authorized.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 0, 1, and 64

[WC Docket No. 17–97; FCC 23–18, FR ID 138840]

Call Authentication Trust Anchor

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) takes further steps to combat illegally spoofed robocalls by strengthening and expanding caller ID authentication and robocall mitigation obligations and creating new mechanisms to hold providers accountable for violations of the Commission's rules.

DATES: *Effective date:* This rule is effective August 21, 2023, except for the amendments codified at 47 CFR 64.6303(c) (amendatory instruction 9) and 64.6305(d), (e), (f), and (g) (amendatory instruction 12) which are delayed. The Commission will publish a document in the **Federal Register** announcing the effective dates for the delayed amendments to 47 CFR 64.6303(c) and 64.6305(d), (e), (f), (g).

FOR FURTHER INFORMATION CONTACT: Jonathan Lechter, Competition Policy Division, Wireline Competition Bureau, at (202) 418–0984, *jonathan.lechter@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Sixth Report and Order* in WC Docket No. 17–97 adopted on March 16, 2023 and released on March 17, 2023. The document is available for download at *https://docs.fcc.gov/public/attachments/FCC-23-18A1.pdf.* To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *FCC504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

Synopsis

I. Sixth Report and Order

1. In this document, the Commission continues to strengthen and expand caller ID authentication requirements in the Secure Telephony Identity Revisited/Signature-based Handling of Asserted information using toKENs (STIR/SHAKEN) ecosystem by requiring non-gateway intermediate providers that receive unauthenticated calls directly from an originating provider to use STIR/SHAKEN to authenticate those calls. The STIR/SHAKEN framework is a set of technical standards and protocols that enable providers to authenticate and verify caller ID information transmitted with Session Initiation Protocol (SIP) calls. The STIR/SHAKEN framework consists of two components: (1) the technical process of authenticating and verifying caller ID information; and (2) the certificate governance process that maintains trust in the caller ID authentication information transmitted along with a call.

2. Further, with this document, the Commission expands robocall mitigation requirements for all providers, including those that have not yet implemented STIR/SHAKEN because they lack the necessary infrastructure or are subject to an implementation extension. The Commission empowers the Enforcement Bureau with new tools and penalties to hold providers accountable for failing to comply with its rules. The Commission also defines the STIR/SHAKEN obligations of satellite providers.

3. The STIR/SHAKEN caller ID authentication framework protects consumers from illegally spoofed robocalls by enabling authenticated caller ID information to securely travel with the call itself throughout the entire call path. The Commission, consistent with Congress's direction in the Telephone Robocall Abuse Criminal Enforcement and Deterrence (TRACED) Act, adopted rules requiring voice service providers to implement STIR/SHAKEN in the internet Protocol (IP) portions of their voice networks by June 30, 2021, subject to certain exceptions.

Because the TRACED Act defines ''voice service'' in a manner that excludes intermediate providers, the Commission's authentication and Robocall Mitigation Database rules use ''voice service provider'' in this manner. The Commission's rules in 47 CFR 64.1200, many of which the Commission adopted prior to adoption of the TRACED Act, use a definition of ''voice service provider'' that includes intermediate providers. For purposes of this document, the Commission uses the term ''voice service provider'' consistent with the TRACED Act definition and where discussing caller ID authentication or the Robocall Mitigation Database. In all other instances, the Commission uses ''provider'' and specifies the type of provider as appropriate. Unless otherwise specified, the Commission means any provider, regardless of its position in the call path.

A. Strengthening the Intermediate Provider Authentication Obligation

1. Requiring the First Intermediate Provider To Authenticate Unauthenticated Calls

4. Under the Commission's caller ID authentication rules, intermediate providers are required to authenticate any unauthenticated caller ID information for the SIP calls they receive or, alternatively, cooperate with the industry traceback consortium and timely and fully respond to all traceback requests received from the Commission, law enforcement, and the industry traceback consortium. In the *Fourth Call Blocking Order,* 86 FR 17726 (Apr. 6, 2021), however, the Commission required all providers in the path of a SIP call—including gateway providers and other intermediate providers—to respond fully and in a timely manner to traceback requests. The Commission later enhanced this obligation for gateway providers to require response within 24 hours in the *Fifth Caller ID Authentication Report and Order,* 87 FR 42916 (July 18, 2022). As a result of that action, intermediate providers may decline to authenticate caller ID information given that compliance with the traceback alternative has been made mandatory. In the *Fifth Caller ID Authentication Further Notice of Proposed Rulemaking (FNPRM),* 87 FR 42670 (July 18, 2022), the Commission proposed closing this gap in the STIR/SHAKEN caller ID authentication regime by requiring all U.S. intermediate providers in the path of a SIP call carrying a U.S. number in the caller ID field to authenticate unauthenticated caller ID information, irrespective of their traceback obligations. Based on its review of the record, the Commission adopts its proposal to establish a mandatory caller ID authentication obligation for intermediate providers, but does so on an incremental basis. Specifically, the Commission amends its rules to require any non-gateway intermediate provider that receives an unauthenticated SIP call directly from an originating provider to authenticate the call. Stated differently, the first intermediate provider in the path of an unauthenticated SIP call will now be subject to a mandatory requirement to authenticate the call.

5. The Commission has previously recognized that the STIR/SHAKEN framework has beneficial network effects and becomes more effective as more providers implement it. The record in this proceeding supports expanding STIR/SHAKEN implementation by requiring non-gateway intermediate providers to authenticate unauthenticated calls, regardless of their traceback obligations. Although originating providers are required to authenticate calls under the Commission's rules—with limited exceptions—some originating providers are not capable of implementing STIR/SHAKEN. In other cases, unscrupulous providers may deliberately fail to comply with the Commission's rules. The record shows that the failure of originating providers to sign calls is one of the key weaknesses in the STIR/SHAKEN regime. By requiring intermediate providers to authenticate unauthenticated SIP calls they receive directly from an originating provider, the Commission closes an important loophole in its caller ID authentication scheme, and incorporates calls that would otherwise go unauthenticated into the STIR/SHAKEN framework. Further, intermediate provider authentication will facilitate analytics, blocking, and traceback efforts by providing more information to downstream providers.

6. The Commission recognizes, however, that a mandatory authentication obligation could subject intermediate providers to significant costs. The Commission believes that the goals of the STIR/SHAKEN framework and the public interest are best served by taking a targeted approach to intermediate provider authentication that focuses on the first intermediate provider in the call path. The Commission therefore opts to take an incremental approach to imposing mandatory authentication obligations on intermediate providers, requiring only the first intermediate provider in the path of a SIP call to authenticate unauthenticated caller ID information, rather than requiring all intermediate providers in the path to do so at this time. Intermediate providers should know whether they receive calls directly from an originating provider pursuant to contracts that provide information to the intermediate provider about the originating provider's customers and expectations for handling their traffic. Further, as explained below, the Commission requires non-gateway intermediate providers to take ''reasonable steps'' to mitigate illegal robocall traffic. That duty, along with other requirements of the Commission's rules, may require an intermediate provider to perform the due diligence necessary to understand the sources of the traffic it receives. Accordingly, in the unlikely event that an intermediate provider does not know through its contracts whether it receives calls directly from an originating provider, it should obtain that information to comply with this and other aspects of the Commission's rules. The Commission finds that this approach, which focuses on the beginning of the call path, will directly address the problem of calls entering the call path without being authenticated by originating providers, as described above. The Commission agrees with YouMail that this targeted approach is likely to have the greatest impact on stopping illegally spoofed robocalls. As YouMail argues, apart from the originating provider, the ''best entity to identify and stop the sources of robocalls is the first 'downstream' provider (*i.e.,* the next provider in line that receives calls placed on the originating provider's network).'' While the Commission may consider expanding a call authentication requirement to all intermediate providers in the future, this targeted approach will provide the Commission with an opportunity to evaluate this first mandatory obligation for intermediate providers, together with other pending expansions of the caller ID authentication regime, and determine whether an authentication requirement for more downstream intermediate providers is warranted.

7. The Commission is not persuaded by the arguments submitted by commenters favoring a mandatory authentication requirement for all intermediate providers. For instance, some commenters argue that the Commission's justifications for adopting a mandatory gateway provider authentication requirement apply with equal force to all non-gateway

intermediate providers in the call path. The Commission disagrees. The gateway provider caller ID authentication rules adopted by the Commission in May 2022 apply to the first domestic intermediate provider in the path of a foreign-originated call. The authentication requirement the Commission adopts in this document similarly applies to the first intermediate provider in the path of a U.S.-originated call. Further, there are fewer gateway providers than other domestic intermediate providers. Therefore, the overall industry cost of an authentication obligation imposed on all domestic intermediate providers is likely to be significantly higher than that of the gateway provider obligation. The record in this proceeding simply does not support requiring all intermediate providers to incur those costs at this time if imposing an authentication obligation on the first intermediate provider that receives an unauthenticated call directly from an originating provider can close significant gaps in the Commission's caller ID authentication regime. The Commission finds that the incremental approach it adopts in this document will target a critical gap in its call authentication regime while minimizing the impact of the requirements on industry, including new entrants to the market.

8. The Commission also declines to impose an authentication obligation on all intermediate providers at this time to address instances in which authentication information is ''stripped out'' by the call transiting a non-IP network. The Commission has launched an inquiry into solutions to enable caller ID authentication over non-IP networks, the nexus between non-IP caller ID authentication and the IP transition generally, and on specific steps the Commission can take to encourage the industry's transition to IP. Widespread adoption of a non-IP authentication solution or IP interconnection would result in authenticated caller ID information being preserved and received by the terminating provider. The Commission therefore declines to impose an authentication obligation on all intermediate providers to address circumstances where a call traverses a non-IP network, but may revisit the subject after the Commission concludes its inquiry into whether non-IP authentication or IP interconnection solutions are feasible and can be timely implemented.

9. The Commission notes that the requirement it adopts here for the first intermediate provider to authenticate a call will arise in limited circumstances, such as where the originating provider failed to comply with their own authentication obligation or where the call is sent directly to an intermediate provider from the limited subset of originating providers that lack an authentication obligation. If the originating provider complies with its authentication obligation, the first intermediate provider in the call chain need only meet its preexisting obligation to pass-on that authentication information to the next provider in the chain. Indeed, the first intermediate provider in the call path may completely avoid the need to authenticate calls if it implements contractual provisions with its upstream originating providers stating that it will only accept authenticated traffic. USTelecom requests that the Commission clarify that non-gateway intermediate providers be deemed in compliance with their authentication obligations if they enter into contractual provisions with originating providers and such providers represent and warrant that they do not originate any unsigned traffic and thereafter ''have no reason to know, and do not know, that their upstream provider is sending unsigned traffic it originated.'' The Commission declines to do so, finding that such a clarification is unnecessary. If a non-gateway intermediate provider were to claim that it has complied with the authentication obligation that the Commission adopts pursuant to terms of a contract with an originating provider, the Commission would evaluate such a claim on a case-by-case basis.

2. Applicable STIR/SHAKEN Standards for Compliance

10. Voice service providers and gateway providers are obligated to comply with, at a minimum, the version of the STIR/SHAKEN standards ATIS–1000074, ATIS–1000080, and ATIS–1000084 and all of the documents referenced therein in effect at the time of their respective compliance deadlines, including any errata as of those dates or earlier. In the *Fifth Caller ID Authentication FNPRM,* the Commission proposed that non-gateway intermediate providers comply with, at a minimum, the versions of these standards in effect at the time of their compliance deadline. The Commission also sought comment on whether all providers should be required to comply with the same versions of the standards as non-gateway intermediate providers and whether it should establish a mechanism for updating the standard that providers must comply with going forward, including through delegation to the Wireline Competition Bureau.

11. The Commission adopts its proposal that non-gateway intermediate providers subject to the authentication obligation described above must comply with, at a minimum, the versions of the standards in effect at the time of their authentication compliance deadline (which is addressed in the following section), along with any errata. Like other providers, non-gateway intermediate providers will have the flexibility to assign the level of attestation appropriate to the call based on the applicable level of the standards and the available call information. This approach is supported in the record.

12. The Commission does not at this time require gateway and voice service providers to comply with versions of the standards that came into effect after their respective compliance deadlines. The Commission reiterates, however, that its requirement that providers must comply with a specific version of a standard ''at a minimum,'' means that while providers are required to comply with these standards, they are permitted to comply with any version of the standard that has been ratified by the Alliance for Telecommunications Industry Solutions (ATIS) subsequent to the standard in effect at the time their authentication implementation deadline. However, any later-adopted or improved version of the standards that a provider chooses to incorporate into its STIR/SHAKEN authentication framework must maintain the baseline call authentication functionality exemplified by the versions of ATIS–1000074, ATIS–1000080, and ATIS–1000084 in effect at the time of its respective compliance date.

13. The Commission nevertheless concludes that there may be significant benefits for all providers to comply with standards as they are updated, particularly where updated versions contain critical new features or functions. Requiring all providers to comply with a single, updated standard would also facilitate enforcement of the Commission's rules and ensure that any new features and functions contained in revised standards spread throughout the STIR/SHAKEN ecosystem. Therefore, the Commission adopts a process to incorporate future standards into its rules where appropriate, similar to the process it has adopted to require compliance with updated technical standards in other contexts.

14. Specifically, the Commission delegates to the Wireline Competition Bureau the authority to determine whether to seek comment on requiring compliance with revised versions of the three ATIS standards associated with the STIR/SHAKEN authentication

framework, and all documents referenced therein. The Commission also delegates to the Wireline Competition Bureau the authority to require providers subject to a STIR/SHAKEN authentication requirement to comply with those revised standards, and the authority to set appropriate compliance deadlines regarding such revised standards. Providers will only be required to implement new standards if the benefits to the STIR/SHAKEN ecosystem outweigh any compliance burdens. Additionally, a process based on delegated authority may allow the adoption of revised standards more quickly than would be the case through Commission-level notice and comment procedures.

15. As with voice service and gateway providers, the Commission also requires any non-gateway intermediate provider subject to the authentication obligation described in this section to either upgrade its network to allow for the initiation, maintenance, and termination of SIP calls and fully implement the STIR/SHAKEN framework, or maintain and be ready to provide the Commission on request with documented proof that it is participating, either on its own or through a representative, including third party representatives, as a member of a working group, industry standards group, or consortium that is working to develop a non-internet Protocol caller identification authentication solution, or actively testing such a solution. The Commission finds that expanding the requirements of § 64.6303 to non-gateway intermediate providers will ensure regulatory parity and promote the development of non-IP authentication solutions, while offering flexibility to providers that rely on non-IP infrastructure.

3. Compliance Deadlines

16. The Commission sets a December 31, 2023, deadline for the new authentication obligations adopted in this section. By that date, the first non-gateway intermediate provider in the call chain must authenticate unauthenticated calls it receives. The Commission adopts a deadline longer than the six-month deadline it suggested in the *Fifth Caller ID Authentication FNPRM* because intermediate providers need time to deploy the technical capability to comply with the Commission's requirement to authenticate calls, and providers may wish to amend their contracts with upstream originating providers to meet this new requirement. While the record reflects disagreement as to an appropriate intermediate authentication provider deadline, the Commission concludes that a later deadline is not necessary. Implementation of call authentication technology has likely become faster and less costly for many providers than when the Commission first adopted caller ID authentication requirements, particularly for those that have already implemented STIR/SHAKEN in their other roles in the call stream. Moreover, a non-gateway intermediate provider can avoid the need to implement STIR/SHAKEN where it agrees to only accept authenticated traffic from originating providers. The Commission has previously found that six months is sufficient time for providers to evaluate and renegotiate contracts to address new regulatory requirements. Accordingly, the Commission finds that the approximate nine-month period afforded by the December 31, 2023, deadline provides sufficient time for intermediate providers to amend their contracts with originating providers, if necessary, to comply with the Commission's authentication requirement.

B. Mitigation and Robocall Mitigation Database Filing Obligations

17. The Commission next takes action to strengthen the robocall mitigation requirements and Robocall Mitigation Database filing obligations of all providers. As the Commission proposed in the *Fifth Caller ID Authentication FNPRM,* it requires all providers—including intermediate providers and voice service providers without the facilities necessary to implement STIR/SHAKEN—to: (1) take ''reasonable steps'' to mitigate illegal robocall traffic; (2) submit a certification to the Robocall Mitigation Database regarding their STIR/SHAKEN implementation status along with other identifying information; and (3) submit a robocall mitigation plan to the Robocall Mitigation Database. Consistent with its proposal, the Commission also requires downstream providers to block traffic received directly from all intermediate providers that are not in the Robocall Mitigation Database. These actions have significant support in the record. While the Commission does not require providers to take specific steps to meet their mitigation obligations, it does expand the subjects that providers must describe in their filed mitigation plans and the information that providers must submit to the Robocall Mitigation Database.

1. Applying the ''Reasonable Steps'' Mitigation Standard to All Providers

18. The Commission adopts its proposal in the *Fifth Caller ID Authentication FNPRM* to expand to all providers the obligation to mitigate illegal robocalls under the general ''reasonable steps'' standard. Specifically, the Commission now requires all non-gateway intermediate providers, as well as voice service providers that have fully implemented STIR/SHAKEN, to meet the same ''reasonable steps'' general mitigation standard that is currently applied to gateway providers and voice service providers that have not fully implemented STIR/SHAKEN under the Commission's rules. The general mitigation standard the Commission adopts here for all providers is separate from and in addition to the new robocall mitigation program description obligations for all providers discussed below. The Commission also concludes that voice service providers without the facilities necessary to implement STIR/SHAKEN must mitigate illegal robocalls and meet this same mitigation standard.

19. Requiring all providers to mitigate calls under the ''reasonable steps'' standard will ensure that every provider in the call chain is subject to the same duty to mitigate illegal robocalls, promoting regulatory symmetry and administrability. There is significant support in the record for this approach. For providers with a STIR/SHAKEN authentication obligation, these mitigation duties will serve as an ''effective backstop'' to that authentication obligation and, for those without such an obligation, they will act as a key bulwark against illegal robocalls. As the Commission has noted, STIR/SHAKEN is not a silver bullet and has a limited effect on illegal robocalls where the number was obtained lawfully and not spoofed. Requiring all providers to take reasonable steps to mitigate illegal robocalls will help address these limitations in the STIR/SHAKEN regime.

20. As proposed, the Commission retains a general standard that requires providers to take ''reasonable steps'' to mitigate illegal robocall traffic, rather than mandate that providers include specific measures as part of their mitigation plans. The Commission notes, however, that what constitutes a ''reasonable step'' may depend upon the specific circumstances and the provider's role in the call path. While some commenters argue that the Commission should require providers to take specific measures under the ''reasonable steps'' standard, the Commission agrees that providers should retain ''the necessary flexibility in determining which measures to use to mitigate illegal calls on their networks.'' For this reason, the

Commission rejects ZipDX's request that it require providers to describe specific practices in their robocall mitigation plans, including specific know-your-upstream provider and analytics practices. That said, the Commission agrees that promptly investigating and mitigating illegal robocall traffic that is brought to the provider's attention through measures such as internal monitoring and tracebacks would constitute reasonable steps. Pursuant to this standard, a provider's program is ''sufficient if it includes detailed practices that can reasonably be expected to significantly reduce'' the carrying or processing (for intermediate providers) or origination (for voice service providers) of illegal robocalls. Each provider ''must comply with the practices'' that its program requires, and its program is insufficient if the provider ''knowingly or through negligence'' carries or processes calls (for intermediate providers) or originates (for voice service providers) unlawful robocall campaigns.

21. The Commission declines to adopt Voice On The Net Coalition (VON)'s proposal for a safe harbor from contract breach for providers invoking contract termination provisions against providers originating illegal robocall traffic. VON does not explain why such a safe harbor is necessary or the legal authority for the Commission to adopt such a provision, and the Commission finds it outside the scope of this proceeding. Providers' programs must also commit to respond fully, within the time period required by the Commission's rules, to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping illegal robocallers that use its service to originate, carry, or process illegal robocalls. The Commission declines to adopt Electronic Privacy Information Center and National Consumer Law Center (EPIC/NCLC)'s proposal to replace the ''reasonable steps'' general mitigation standard with the ''affirmative, effective measures'' standard found elsewhere in its rules. Under EPIC/NCLC's proposal, a provider would fail to meet this standard if they allow the origination of any illegal robocalls, even where the provider may have taken ''reasonable steps'' to mitigate such calls. The Commission disagrees with EPIC/NCLC's reading of its rules and conclude that these standards work hand-in-hand to prevent illegal robocalls. A key purpose of the ''reasonable steps'' standard is to ensure that providers enact a robocall mitigation program and describe that program in the Robocall Mitigation Database. If the program is not reasonable as described, or if it is not followed, the provider may be held liable. Further, if the steps described in a mitigation program are followed but are not actually effective in stopping illegal robocalls, the originating provider could be held liable for failing to put in place ''affirmative, effective'' measures to stop robocalls if they do not take further action. Regardless of the mitigation standard the Commission adopts, the Commission disagrees with EPIC/NCLC that providers should be held strictly liable for allowing the origination of any illegal robocalls regardless of whether they have taken ''reasonable steps'' to mitigate such calls, as explained in more detail below.

22. The Commission also does not adopt VON's proposal of a ''gross negligence'' standard to evaluate whether a mitigation program is sufficient, rather than the Commission's existing standard, which assesses whether a provider ''knowingly or through negligence'' originates, carries, or processes illegal robocalls. The Commission disagrees that its existing standard ''essentially impose[s] strict liability on providers,'' as VON asserts. On the contrary, if a provider is taking sufficient ''reasonable steps'' to mitigate illegal robocall traffic pursuant to a robocall mitigation program that complies with the Commission's rules, the provider is likely not acting negligently.

23. The Commission declines to adopt a heightened mitigation obligation solely for Voice over internet Protocol (VoIP) providers. The Commission acknowledges that there is evidence that VoIP providers are disproportionally involved in the facilitation of illegal robocalls. However, the Commission agrees with commenters opposing such a heightened standard, because the threat of illegal robocalls is an industry issue and impacts every type of provider. The Commission finds that applying its obligations to providers regardless of the technology used to transmit calls better aligns with the competitive neutrality of the TRACED Act.

24. *Deadlines.* Consistent with the obligation placed on other providers and the limited comments filed in the record, the Commission requires providers newly covered by the general mitigation standard to meet that standard within 60 days following **Federal Register** publication of this document. No commenter argued that a greater length of time is needed to comply, and the Commission finds no reason to depart from the same compliance timeframe previously established for other providers.

2. Expanded Robocall Mitigation Database Filing Obligations

25. The Commission next takes steps to strengthen its Robocall Mitigation Database filing obligations to increase transparency and ensure that all providers act to mitigate illegal robocalls. The Commission previously required voice service providers with a STIR/SHAKEN implementation obligation and those subject to an extension to file certifications in the Robocall Mitigation Database regarding their efforts to mitigate illegal robocalls on their networks—specifically, whether their traffic is either signed with STIR/SHAKEN or subject to a robocall mitigation program. By ''STIR/SHAKEN implementation obligation,'' the Commission means the applicable requirement under its rules that a provider implement STIR/SHAKEN in the IP portions of their networks by a date certain, subject to certain exceptions. When referencing those providers ''without'' a STIR/SHAKEN implementation obligation, the Commission means those providers that are subject to an implementation extension, such as a provider with an entirely non-IP network or one that is unable to obtain the necessary Service Provider Code (SPC) token to authenticate caller ID information, or that lack control over the facilities necessary to implement STIR/SHAKEN. Those voice service providers that certified that some or all of their traffic is ''subject to a robocall mitigation program'' were required to submit a robocall mitigation plan detailing the specific ''reasonable steps'' that they have taken ''to avoid originating illegal robocall traffic.'' The Commission did not specifically require voice service providers without the facilities necessary to implement STIR/SHAKEN to file certifications in the database and had previously concluded that they were not subject to the Commission's implementation requirements.

26. The Commission adopts its proposal to expand the obligation to file a robocall mitigation plan along with a certification in the Robocall Mitigation Database to all providers regardless of whether they are required to implement STIR/SHAKEN—including non-gateway intermediate providers and providers without the facilities necessary to implement STIR/SHAKEN—and expand the downstream blocking duty to providers receiving traffic directly from non-gateway intermediate providers not in the Robocall Mitigation Database. As

proposed, providers with a new Robocall Mitigation Database filing obligation must submit the same basic information as providers that had previously been required to file. The Commission also requires all providers to file additional information in certain circumstances, as explained below.

27. *Universal Robocall Mitigation Database Filing Obligation.* There was overwhelming record support for broadening the Robocall Mitigation Database certification and mitigation plan filing obligation to cover all providers. Like the expanded mitigation obligation above, this approach will ensure that every provider in the call chain is covered by the same basic set of rules and will increase transparency and accountability. The Commission also agrees with USTelecom that requiring non-gateway intermediate providers to file a certification and mitigation plan in the Robocall Mitigation Database will facilitate the Commission's enforcement efforts for those providers, as it will for voice service providers newly obligated to file a mitigation plan.

28. Consistent with its proposal and existing providers' obligations, all providers' robocall mitigation plans must describe the specific ''reasonable steps'' the provider has taken to avoid, as applicable, the origination, carrying, or processing of illegal robocall traffic as part of its robocall mitigation program. A provider that plays more than one ''role'' in the call chain should explain the mitigation steps it undertakes in each role, to the extent those mitigation steps are different.

29. *New Robocall Mitigation Program Description Obligations for All Providers.* Under the Commission's current rules, voice service providers are required to describe the specific ''reasonable steps'' that they have taken ''to avoid originating illegal robocall traffic'' as part of their robocall mitigation programs. Gateway providers are required to address this topic and provide a description of how they have complied with the know-your-upstream provider requirement in § 64.1200(n)(4) of the Commission's rules. The Commission now imposes specific additional requirements for the contents of robocall mitigation plans filed in the Robocall Mitigation Database. Specifically, as part of their obligation to ''describe with particularity'' their robocall mitigation techniques, (1) voice service providers must describe how they are meeting their existing obligation to take affirmative, effective measures to prevent new and renewing customers from originating illegal calls; (2) non-gateway intermediate providers and voice service providers must, like gateway providers, describe any ''know-your-upstream provider'' procedures in place designed to mitigate illegal robocalls; and (3) all providers must describe any call analytics systems they use to identify and block illegal traffic, including whether they use a third-party vendor or vendors and the name of the vendor(s). To comply with the new requirements to describe their ''new and renewing customer'' and ''know-your-upstream provider'' procedures, providers must describe any contractual provisions with end-users or upstream providers designed to mitigate illegal robocalls. The Commission does not expect providers to necessarily submit contractual provisions, but to describe them in general terms, including whether such provisions are typically included in their contracts. The Commission concludes that the obligation to describe these procedures is particularly important for voice service providers without a STIR/SHAKEN implementation obligation. While the Commission does not currently require intermediate providers other than gateway providers to engage in ''know-your-upstream provider'' procedures, if they have put such procedures in place, they must be documented in their robocall mitigation plan. While the Commission does not specifically require providers to use call analytics, doing so may be a ''reasonable step'' to mitigate illegal robocall traffic, depending on the circumstances. For example, if a provider is a reseller, it is likely to rely on any analytics software adopted by its wholesale provider to monitor call traffic. In that case, the reseller should describe this practice in its robocall mitigation plan.

30. In the *Fifth Caller ID Authentication Report and Order,* the Commission required gateway providers to comply with a new requirement to ''know'' their upstream provider and required gateway providers to include in their Robocall Mitigation Database-filed mitigation plan a description of how they have complied with this obligation. In the *Fifth Caller ID Authentication FNPRM,* the Commission sought comment on expanding these two requirements to non-gateway intermediate providers. The Commission continues to study the record on whether to do so. Similarly, the Commission continues to consider whether to adopt its proposal to require all providers to respond to traceback requests within 24 hours as gateway providers are currently required to do.

31. The Commission imposes these new requirements because it has become increasingly clear that provider due diligence and the use of call analytics are key ways to stop illegal robocalls. The public and the Commission's understanding of the steps providers take to scrutinize their relationships with other providers in the call path and analyze their traffic will facilitate compliance with and enforcement of the Commission's rules. Recent actions by the Enforcement Bureau demonstrating that some providers are not including meaningful descriptions in their mitigation plans warrants more prescriptive obligations. There is also specific record support for these new requirements.

32. *Baseline Information Submitted with Robocall Mitigation Database Certifications.* Consistent with existing providers' filing obligations and the Commission's proposal in the *Fifth Caller ID Authentication FNPRM,* all providers newly obligated to submit a certification to the Robocall Mitigation Database pursuant to the requirements adopted herein must submit the following information: (1) whether it has fully, partially, or not implemented the STIR/SHAKEN authentication framework in the IP portions of its network; (2) the provider's business name(s) and primary address; (3) other business name(s) in use by the provider; (4) all business names previously used by the provider; (5) whether the provider is a foreign provider; and, (6) the name, title, department, business address, telephone number, and email address of one person within the company responsible for addressing robocall mitigation-related issues. The certification must be signed by an officer of the company. Consistent with the Commission's proposal and current rules, providers with a new filing obligation must update any information submitted within 10 business days of ''any change in the information'' submitted, ensuring that the information is kept up to date. Certifications and robocall mitigation plans must be submitted in English or with a certified English translation.

33. *Additional Information to be Submitted with Mitigation Plans.* In order to effectively implement its new and modified authentication obligations, in addition to the baseline information currently required of all filers, the Commission also requires providers to submit additional information in their Robocall Mitigation Database certifications. The Commission requires all providers: (1) to submit additional information regarding their role(s) in the call chain; (2) asserting they do not have an obligation to implement STIR/SHAKEN to include more detail regarding the basis of that

assertion; (3) to certify that they have not been prohibited from filing in the Robocall Mitigation Database; and (4) to state whether they are subject to a Commission, law enforcement, or regulatory agency action or investigation due to suspected unlawful robocalling or spoofing and provide information concerning any such actions or investigations.

34. First, to increase transparency for the industry and regulators and better facilitate its evaluation of the mitigation plans detailed in the Robocall Mitigation Database, the Commission requires providers to submit additional information to indicate the role or roles they are playing in the call chain. Specifically, providers must indicate whether they are: (1) a voice service provider with a STIR/SHAKEN implementation obligation serving end-users; (2) a voice service provider with a STIR/SHAKEN obligation acting as a wholesale provider originating calls; (3) a voice service provider without a STIR/SHAKEN obligation; (4) a non-gateway intermediate provider with a STIR/SHAKEN obligation; (5) a non-gateway intermediate provider without a STIR/SHAKEN obligation; (6) a gateway provider with a STIR/SHAKEN obligation; (7) a gateway provider without a STIR/SHAKEN obligation; and/or (8) a foreign provider. This requirement expands upon the existing rule that providers indicate in their Robocall Mitigation Database filings whether they are a foreign provider, voice service provider, and/or gateway provider. The Commission notes that certain provider classes have different obligations under its rules and, as explained above, the ''reasonable steps'' necessary to meet the Commission's mitigation standard may differ based on the provider's role in the call path. The Commission concludes, therefore, that the collection of this information is necessary to allow the public and the Commission to determine whether a specific provider's mitigation steps are reasonable.

35. Second, the Commission expands its requirement that providers with a current Robocall Mitigation Database filing obligation must state in their mitigation plan whether a STIR/SHAKEN extension applies, and apply that rule to all current and new Robocall Mitigation Database filers. Specifically, a filer asserting it does not have an obligation to implement STIR/SHAKEN because of an ongoing extension, or because it lacks the facilities necessary to implement STIR/SHAKEN, must both explicitly state the rule that exempts it from compliance (for example, by explaining that it lacks the necessary facilities to implement STIR/SHAKEN or it cannot obtain an SPC token) and explain in detail why that exemption applies to the filer (for example, by explaining that it is a pure reseller with some facilities, but that they are not sufficient to implement STIR/SHAKEN, or the steps it has taken to diligently pursue obtaining a token). The Commission concludes that this limited expansion of its existing rule is necessary to permit the public and Commission to evaluate why a provider believes it is not subject to all or a subset of the Commission's rules and whether that explanation is reasonable.

36. Third, the Commission requires new and existing filers to certify that they have not been prohibited from filing in the Robocall Mitigation Database pursuant to a law enforcement action, including the new enforcement requirements adopted herein. Filers will be required to certify that they have not been barred from filing in the Robocall Mitigation Database by such an enforcement action. This includes, but is not limited to, instances in which a provider has been removed from the Robocall Mitigation Database and has been precluded from refiling unless and until certain deficiencies have been cured and those in which a provider's authorization to file has been revoked due to continued violations of the Commission's robocall mitigation rules. This information will enhance the effectiveness of the new enforcement measures the Commission adopts herein to impose consequences on repeat offenders of its robocall mitigation rules. The Commission disagrees with Cloud Communications Alliance (CCA) that the same purpose can be served by indicating whether a provider filed under a prior name. This is not sufficient information to facilitate the Commission's rule barring related entities of repeated bad actors from filing in the Robocall Mitigation Database. The Commission also adopts its proposal to require providers to submit information regarding their principals, affiliates, subsidiaries, and parent companies in sufficient detail to facilitate the Commission's ability to determine whether the provider has been prohibited from filing in the Robocall Mitigation Database. The Commission delegates to the Wireline Competition Bureau to determine the form and format of such data.

37. Fourth, the Commission requires all providers to: (1) state whether, at any time in the prior two years, the filing entity (and/or any entity for which the filing entity shares common ownership, management, directors, or control) has been the subject of a formal Commission, law enforcement, or regulatory agency action or investigation with accompanying findings of actual or suspected wrongdoing due to the filing entity transmitting, encouraging, assisting, or otherwise facilitating illegal robocalls or spoofing, or a deficient Robocall Mitigation Database certification or mitigation program description; and, if so (2) provide a description of any such action or investigation, including all law enforcement or regulatory agencies involved, the date that any action or investigation was commenced, the current status of the action or investigation, a summary of the findings of wrongdoing made in connection with the action or investigation, and whether any final determinations have been issued. The Commission limits this reporting requirement to formal actions and investigations that have been commenced or issued pursuant to a written notice or other instrument containing findings by the law enforcement or regulatory agency that the filing entity has been or is suspected of the illegal activities itemized above, including, but not limited to, notices of apparent liability, forfeiture orders, state or federal civil lawsuits or criminal indictments, and cease-and-desist notices. Providers that must include confidential information to accurately and fully comply with this reporting requirement, as explained below, may seek confidential treatment of that information pursuant to § 0.459 of the Commission's rules. This information will help the Commission evaluate claims made by providers in their mitigation program descriptions and identify potential violations of its rules. The Commission does not adopt USTelecom's request that the reporting requirement the Commission adopts be limited to public actions and investigations. The Commission finds that limiting the reporting requirement to formal actions and investigations that are public would simply reduce the scope of the reporting requirement and is not necessary to clarify it. The Commission agrees with commenters, however, that providers should not be required to submit information concerning mere inquiries from law enforcement or regulatory agencies or investigations that do not include findings of actual or suspected wrongdoing. Thus, for example, traceback requests, Enforcement Bureau letters of inquiry or subpoenas, or investigative demand letters or subpoenas issued by regulatory agencies or law enforcement would not trigger this obligation because they are not

accompanied by findings of actual or suspected wrongdoing. The Commission does not adopt INCOMPAS's proposal that it exempt formal actions and investigations accompanied by findings of actual or suspected wrongdoing that rely ''solely'' on tracebacks from the disclosure requirement the Commission adopts in this document. As stated above, the Commission excludes traceback requests from the disclosure requirement when they are not accompanied by findings of actual or suspected wrongdoing. When a formal action or investigation based solely on traceback requests is accompanied by findings of actual or suspected wrongdoing made by the Commission, law enforcement, or a regulatory agency, disclosure of that information may be useful in evaluating claims made by providers in their mitigation program descriptions and identifying potential violations of the Commission's rules. The Commission finds that inquiries or investigations that do not contain findings of actual or suspected wrongdoing by the law enforcement or regulatory agency would be of limited value to the Commission in evaluating the certifications and robocall mitigation plans submitted to the Robocall Mitigation Database.

38. Finally, the Commission requires filers to submit their Operating Company Number (OCN) if they have one. An OCN is a prerequisite to obtaining an SPC token, and the Commission concludes that filing the OCN or indicating that they do not have one will allow the Commission to more easily determine whether a provider is meeting its requirement to diligently pursue obtaining a token in order to authenticate their own calls and provides an additional way to determine relationships among providers. The Commission does not require filers to include additional identifying information discussed in the *Fourth Caller ID Authentication FNPRM,* 86 FR 59084 (Oct. 26, 2021). There was no support for doing so, and the Commission finds the incremental benefits of providing additional information beyond the OCN are unclear.

39. *Robocall Mitigation Database Filing Deadlines.* Providers newly subject to the Commission's Robocall Mitigation Database filing obligations must submit a certification and mitigation plan to the Robocall Mitigation Database by the later of: (1) 30 days following publication in the **Federal Register** of notice of approval by the Office of Management and Budget (OMB) of any associated Paperwork Reduction Act (PRA) obligations; or (2) any deadline set by the Wireline Competition Bureau through Public Notice. This approach provides additional flexibility to the Wireline Competition Bureau to provide an extended filing window where circumstances warrant. Existing filers subject to new or modified requirements adopted in this document must amend their filings with the newly required information by the same deadline. If a provider is required to fully implement STIR/SHAKEN but has not done so by the Robocall Mitigation Database filing deadline, it must so indicate in its filing. It must then later update the filing within 10 business days of completing STIR/SHAKEN implementation. The Commission recognizes that some of this information may be considered confidential. Providers may make confidential submissions consistent with the Commission's existing confidentiality rules. Providers may only redact filings to the extent appropriate under the Commission's confidentiality rules.

40. *Refusing Traffic From Unlisted Providers.* As proposed, the Commission extends the prohibition on accepting traffic from unlisted (including de-listed) providers to non-gateway intermediate providers. This proposal is well supported in the record and will close the final gap in the Commission's Robocall Mitigation Database call blocking regime. Under this rule, downstream providers will be prohibited from accepting any traffic from a non-gateway intermediate provider not listed in the Robocall Mitigation Database, either because the provider did not file or their certification was removed as part of an enforcement action. The Commission concludes that a non-gateway intermediate provider Robocall Mitigation Database filing requirement and an associated prohibition against accepting traffic from non-gateway intermediate providers not in the Robocall Mitigation Database will ensure regulatory symmetry. By extending this prohibition to non-gateway intermediate providers, the Commission ensures that downstream providers will no longer be required to determine the ''role'' of the upstream provider on a call-by-call basis to determine whether the call should be blocked. Consistent with the Commission's proposal, and the parallel requirements adopted for accepting traffic from gateway providers and voice service providers, compliance will be required no sooner than 90 days following the deadline for non-gateway intermediate providers to submit a certification to the Robocall Mitigation Database.

41. As a result of non-gateway intermediate providers' affirmative obligation to submit a certification in the Robocall Mitigation Database, downstream providers may not rely upon any non-gateway intermediate provider database registration imported from the intermediate provider registry. Any imported Robocall Mitigation Database entry is not sufficient to meet a non-gateway intermediate provider's Robocall Mitigation Database filing obligation or to prevent downstream providers from blocking traffic upon the effective date of the obligation for downstream providers to block traffic from non-gateway intermediate providers.

42. *Bureau Guidance.* Consistent with its prior delegations of authority concerning the Robocall Mitigation Database submission process, the Commission directs the Wireline Competition Bureau to make the necessary changes to the Robocall Mitigation Database and to provide appropriate Robocall Mitigation Database filing instructions and training materials as necessary and consistent with this document. The Commission delegates to the Wireline Competition Bureau the authority to specify the form and format of any submissions as well as necessary changes to the Robocall Mitigation Database submission interface. The Commission also delegates to the Wireline Competition Bureau the authority to make the necessary changes to the Robocall Mitigation Database to indicate whether a non-gateway intermediate provider has made an affirmative filing (as opposed to being imported as an intermediate provider) and whether any provider's filing has been de-listed as part of an enforcement action, and to announce its determination as part of its guidance. The Commission also directs the Wireline Competition Bureau to release a public notice upon Office of Management and Budget (OMB) approval of any information collection associated with the Commission's Robocall Mitigation Database filing requirements, announcing OMB approval of its rules, effective dates, and deadlines for filing and for providers to block traffic from non-gateway intermediate providers that have not filed.

C. Enforcement

43. In order to further strengthen its efforts to hold illegal robocallers accountable for their actions, the Commission adopts several enforcement proposals described in the *Fifth Caller*

ID Authentication FNPRM. Specifically, the Commission: (1) adopts a per-call forfeiture penalty for failure to block traffic in accordance with its rules and sets maximum forfeitures for such violations; (2) requires the removal of non-gateway intermediate providers from the Robocall Mitigation Database for violations of its rules, consistent with the standard applied to other filers; (3) establishes an expedited process for provider removal for facially deficient certifications; and (4) establishes rules that would impose consequences on repeat offenders of its robocall mitigation rules. The adoption of more robust enforcement tools is supported in the record.

1. Per Call Maximum Forfeitures

44. The Commission first adopts its proposal to establish a forfeiture penalty on a per-call basis for violations of its robocall blocking rules in 47 CFR 64.1200 through 64.1204 and 47 CFR 64.6300 through 64.6308. Commenters generally agreed that aggressive penalties are appropriate. Mandatory blocking is an important tool for protecting American consumers from illegal robocalls. As the Commission has found in its previous robocalling orders and enforcement actions, illegal robocalls cause significant consumer harm. Penalties for failure to comply with mandatory blocking requirements must deter noncompliance and be sufficient to ensure that entities subject to these requirements are unwilling to risk suffering serious economic harm.

45. Consistent with its proposal, the Commission authorizes the maximum forfeiture amount for each violation of the mandatory blocking requirements of $23,727 per call. This is the maximum forfeiture amount the Commission's rules permit it to impose on non-common carriers. Although common carriers may be assessed a maximum forfeiture of $237,268 for each violation, the Commission finds that it should not impose a greater penalty on one class of providers than another for purposes of the mandatory blocking requirements. The Commission also sets a base forfeiture amount of $2,500 per call because it concludes that the failure to block results in a similar consumer harm as the robocall itself (*e.g.,* the consumer receives the robocall itself). The Commission finds that a $2,500 base forfeiture is reasonable in comparison to the $4,500 base forfeiture for violations of the Telephone Consumer Protection Act of 1991 (TCPA). While the failure to block produces significant consumer harm, the harm is not as great and does not carry the same degree of culpability as the initiator of an illegal robocall campaign who may have committed a TCPA violation. While the Commission sought comment on whether it should consider specific additional mitigating or aggravating factors, it did not receive sufficient comment to provide a basis for doing so. As with other violations of its rules, however, existing upward and downward adjustment criteria in § 1.80 of the Commission's rules may apply. Additionally, there may be pragmatic factors in its prosecutorial discretion in calculating the total forfeiture amount—particularly when there is a very large number of calls at issue—as the Commission has done in its enforcement actions pursuant to the TCPA and those actions taken against spoofing.

2. Provider Removal From the Robocall Mitigation Database

46. The Commission also adopts its proposal to provide for the removal of non-gateway intermediate providers from the database for violations of its rules. In the *Second Caller ID Authentication Report and Order,* 85 FR 73360 (Nov. 17, 2020), the Commission set forth consequences for voice service providers that file a deficient robocall mitigation plan or that ''knowingly or negligently'' originate illegal robocall campaigns, including removal from the Robocall Mitigation Database. Gateway providers are now subject to the same rules for calls that they carry or process. To promote regulatory symmetry, the Commission concludes that non-gateway intermediate providers should face similar consequences.

47. Specifically, the Commission finds that a non-gateway intermediate provider with a deficient certification—such as when the certification describes a program that is unreasonable, or if it determines that a provider knowingly or negligently carries or processes illegal robocalls—the Commission will take appropriate enforcement action. This may include, among other actions, removing a certification from the database after providing notice to the intermediate provider and an opportunity to cure the filing, requiring the intermediate provider to submit to more specific robocall mitigation requirements, and/or proposing the imposition of a forfeiture. The Commission declines, however, to adopt other reasons to remove providers from the database. The Commission concludes that the existing basis for removal is appropriately tailored to the underlying purpose of the Robocall Mitigation Database—to facilitate detection and elimination of illegal robocall traffic. As proposed, the Commission explicitly expands its delegation of authority to the Enforcement Bureau to de-list or exclude a provider from the Robocall Mitigation Database to include the removal of non-gateway intermediate providers.

48. Downstream providers must refuse traffic sent by a non-gateway intermediate provider that is not listed in the Robocall Mitigation Database, as described above and consistent with the existing safeguards applicable to the Commission's existing rules for refusing traffic for calls to 911, public safety answering points, and government emergency numbers. The Commission agrees with VON that any sanctions for failure to block calls from a provider removed from the database should not occur without sufficient notice to the industry. The Commission concludes, however, that the existing Enforcement Bureau process, where providers are given two business days to block calls following Commission notice of removal from the database, is sufficient, as it appropriately balances the public's interest in blocking unwanted robocalls against the need to allow providers sufficient time to take the necessary steps to block traffic.

3. Expedited Removal Procedure for Facially Deficient Filings

49. The Commission agrees with commenters that there are certain instances in which a provider should be removed from the Robocall Mitigation Database on an expedited basis. Specifically, the Commission finds that where the Enforcement Bureau determines that a provider's filing is facially deficient, the Enforcement Bureau may remove a provider from the Robocall Mitigation Database using an expedited two-step procedure, which entails providing notice and an opportunity to cure the deficiency. This streamlined process will allow the Enforcement Bureau to move more quickly against providers whose filings clearly fail to meet the Commission's requirements.

50. In the *Second Caller ID Authentication Report and Order,* the Commission required that providers be given notice of any deficiencies in their certification and an opportunity to cure prior to removal from the Robocall Mitigation Database, but did not prescribe a specific removal procedure. Pursuant to that requirement and the Commission's prior delegation, the Wireline Competition Bureau and Enforcement Bureau have implemented the following three-step removal procedure: (1) the Wireline Competition Bureau contacts the provider, notifying

it that its filing is deficient, explaining the nature of the deficiency, and providing 14 days for the provider to cure the deficiency; (2) if the provider fails to rectify the deficiency, the Enforcement Bureau releases an order concluding that a provider's filing is deficient based on the available evidence and directing the provider to explain, within 14 days, why the Enforcement Bureau should not remove the Company's certification from the Robocall Mitigation Database and giving the provider a further opportunity to cure the deficiencies in its filing; and (3) if the provider fails to rectify the deficiency or provide a sufficient explanation why its filing is not deficient within that 14-day period, the Enforcement Bureau releases an order removing the provider from the Robocall Mitigation Database.

51. While this procedure is appropriate in cases where there may be questions about the sufficiency of the steps described in a mitigation plan, the Commission concludes that an expedited approach is warranted where the certification is facially deficient. A certification is ''facially deficient'' where the provider fails to submit a robocall mitigation plan within the meaning of the Commission's rules. That is, it fails to submit any information regarding the ''specific reasonable steps'' it is taking to mitigate illegal robocalls. While it is not practical to provide an exhaustive list of reasons why a filing would be considered ''facially deficient,'' examples include, without limitation, instances where the provider only submits: (1) a request for confidentiality with no underlying substantive filing; (2) only non-responsive data or documents (*e.g.,* a screenshot from the Commission's website of a provider's FCC Registration Number data or other document that does not describe robocall mitigation efforts); (3) information that merely states how STIR/SHAKEN generally works, with no specific information about the provider's own robocall mitigation efforts; or (4) a certification that is not in English and lacks a certified English translation. In these and similar cases, the Commission need not reach the question of whether the steps the provider is taking to mitigate robocalls are reasonable because the provider has failed to submit even the most basic information required to do so.

52. The Commission concludes that where a provider's filing is facially deficient, it has ''willfully'' violated its Robocall Mitigation Database filing obligation within the meaning of that term in section 9(b) of the Administrative Procedure Act (APA), 5 U.S.C. 558(c), which applies to revocations of licenses. Although the Commission does not reach a definitive conclusion here, the removal of a provider's certification from the Robocall Mitigation Database—which will lead to the mandatory blocking of the provider's traffic by downstream providers—is arguably equivalent to the revocation of a license. This finding is consistent with precedent concluding that a party acts ''willfully'' within the meaning of section 558(c) where it acts with ''careless disregard.'' As such, where a ''willful'' violation has occurred, the provider's Robocall Mitigation Database certification may be removed without a separate notice prior to the initiation of an ''agency proceeding'' to remove the certification. While the Commission does not specifically conclude that a Robocall Mitigation Database certification is a license within the meaning of that section, the Commission's expedited procedure would be compliant with section 558 if it reached such a conclusion. The Commission does not adopt Professional Association for Customer Engagement (PACE)'s proposal to provide a complete list of reasons for why a provider's filing might be facially deficient, and the specific steps it must take in response to avoid removal. It is not practical to provide an exhaustive list of all potential examples of facially deficient filings and methods to cure such deficiencies. Further, attempting to do so would limit the Commission's flexibility to respond to changing tactics by bad actors and could provide a roadmap for bad actors to avoid expedited removal. Moreover, the Commission concludes that PACE's due process concerns are addressed under the expedited removal process it adopts: The Enforcement Bureau's notice to the provider in the first step will explain the basis for its conclusion that the filing is facially deficient, while the second step offers providers an opportunity to cure that deficiency prior to removal. Therefore, the Commission adopts the following two-step expedited procedure for removing a facially deficient certification: (1) issuance of a notice by the Enforcement Bureau to the provider explaining the basis for its conclusion that the certification is facially deficient and providing an opportunity for the provider to cure the deficiency or explain why its certification is not deficient within 10 days; and (2) if the deficiency is not cured or the provider fails to establish that there is no deficiency within that 10-day period, the Enforcement Bureau will issue an order removing the provider from the database. The Commission notes that a number of providers have responded within 14 days to Enforcement Bureau requests to correct their deficient filings and concludes that employing a marginally shorter time period for this expedited process will further the Commission's interest in swiftly resolving these willful violations without materially affecting a providers' ability to respond to the Enforcement Bureau's notice.

53. The Commission finds that this expedited two-step procedure is also consistent with providers' Fifth Amendment due process rights under the Supreme Court's three factor test. While providers have a significant ''private interest'' under the first factor of the test that would be affected by removal from the Robocall Mitigation Database, the risk of an erroneous deprivation of such interest through the procedures used and the probable value, if any, of additional or substitute procedural safeguards under the second factor is exceedingly low, given that (1) the filings in question are facially deficient, and (2) providers would have a reasonable opportunity to cure the deficient filings by submitting a valid robocall mitigation plan. Given the extremely low risk of erroneous deprivation of a private interest in these situations, the Commission finds that these first two factors do not outweigh the third factor—the ''Government's interest''—which is very weighty here: The Government has a strong interest in ensuring that providers adopt valid robocall mitigation plans as soon as possible to further its continuing efforts to reduce the number of illegal robocalls and harm to consumers, and in blocking traffic of providers that are unable or unwilling to implement or document effective mitigation measures.

54. The Commission concludes that this expedited approach is preferable to EPIC/NCLC's proposal to automatically remove certain ''high-risk'' VoIP providers from the Robocall Mitigation Database or impose forfeitures through a bespoke, expedited process. As explained above, the Commission does not believe that a separate set of rules for VoIP providers is appropriate and the expedited procedure the Commission adopts in this document complies with the APA and due process. EPIC/NCLC do not explain how removal from the database prior to any opportunity to respond is consistent with the APA or due process.

4. Consequences for Continued Violations

55. In order to address continued violations of its robocall mitigation rules, the Commission proposed in the *Fifth Caller ID Authentication FNPRM* to subject repeat offenders to proceedings to revoke their section 214 operating authority and to ban offending companies and/or their individual company owners, directors, officers, and principals from future significant association with entities regulated by the Commission. The Commission further proposed to find that providers that are not common carriers operating pursuant to blanket section 214 authority hold other Commission authorizations sufficient to subject them to the Commission's jurisdiction for purposes of enforcing its rules pertaining to preventing illegal robocalls. The Commission also proposed to find that providers not classified as common carriers but that are registered in the Robocall Mitigation Database hold a Commission certification such that they are subject to the Commission's jurisdiction. The Commission adopts its proposal to revoke the section 214 operating authority of entities that engage in continued violations of its robocall mitigation rules. The Commission also finds that non-common carriers holding Commission authorizations and/or certifications are similarly subject to revocation of their authorizations and/or certifications. The Commission further finds that it will consider whether it is in the public interest for individual company owners, directors, officers, and principals of entities for which the Commission has revoked an authority or a certification, or for other entities with which those individuals are affiliated, to obtain future Commission authorizations, licenses, or certifications at the time that they apply for them.

56. *Revocation of Section 214 Authority and Other Commission Authorizations.* In the *Fifth Caller ID Authentication FNPRM,* the Commission proposed to find that entities engaging in continued violations of its robocall mitigation rules, be subject to revocation of their section 214 operating authority, where applicable. The Commission concludes that the ''robocall mitigation rules'' within the scope of this requirement means the specific obligations to: (1) implement a robocall mitigation program that includes specific ''reasonable steps'' to mitigate illegal robocalls and comply with the steps outlined in the plan; (2) submit a plan describing the mitigation program to the Robocall Mitigation database; and (3) not accept traffic from providers not in the Robocall Mitigation database. This includes obligations that the Commission previously adopted as well as those that it adopts in this document.

57. The Commission concludes that this requirement also pertains to continued violation of providers' authentication obligations. While in certain instances the Commission has referred to provider mitigation obligations as separate from authentication, the Commission has also concluded that they work hand in hand to stop illegal robocalls. Indeed, analytics providers often use authentication information to determine whether to block or label a call. The Commission therefore concludes that call authentication serves to mitigate illegal robocalls, and failure to follow the Commission's authentication rules falls within the scope of the enforcement authority it adopts in this document.

58. The Commission did not receive comments regarding the scope of the specific rules covered by the consequences proposed in the *Fifth Caller ID Authentication FNPRM.* The Commission finds, however, that it is reasonable to fully enforce the foregoing robocall mitigation rules by holding accountable those who engage in continued violations of those rules. The Commission will exercise its ability to revoke the section 214 authorizations for providers engaging in continued violations of those rules, consistent with its long-standing authority to revoke the section 214 authority of any provider for serious misconduct.

59. The Commission's authority to revoke section 214 authority in order to protect the public interest is well established. The Commission intends to apply that authority as necessary to address entities engaging in continued violations of its rules. Specifically, an entity engaging in continued violations of the Commission's robocall mitigation rules as defined in this section will be required to explain to the Enforcement Bureau why the Commission should not initiate proceedings to revoke its domestic and/or international section 214 authorizations. Consistent with established Commission procedures, the Commission may then adopt an order to institute a proceeding to revoke domestic and/or international section 214 authority. Should the entity fail to address concerns regarding its retention of section 214 authority, the Commission would then issue an Order on Revocation consistent with its authority to revoke section 214 authority when warranted to protect the public interest.

60. The Commission also adopts its proposals that providers not classified as common carriers but that hold other types of Commission authorizations, including a certification as a result of being registered in the Robocall Mitigation Database, are subject to the Commission's jurisdiction for the purpose of the consequences the Commission adopts in this section. Interconnected VoIP providers are subject to Title II of the Communications Act of 1934, as amended (Communications Act or Act) through their requirement to file applications to discontinue service under section 214 and § 63.71 of the Commission's rules. As explained below, this approach does not constitute an improper exercise of jurisdiction over domestic non-common carriers or foreign providers. The *Fifth Caller ID Authentication FNPRM* listed the providers that the Commission contemplated would be subject to its enforcement authority. These providers have domestic and international section 214 authorizations, have applied for and received authorization for direct access to numbering resources, are designated as eligible telecommunications carriers under section 214(e) of the Communications Act in order to receive federal universal service support, or are registered in the Robocall Mitigation Database. Where the Commission grants a right or privilege, it unquestionably has the right to revoke or deny that right or privilege in appropriate circumstances. In addition, holders of these and all Commission authorizations have a clear and demonstrable duty to operate in the public interest. Continued violations of the Commission's robocall mitigation rules are wholly inconsistent with the public interest, and the Commission finds it necessary to exercise its authority to institute a proceeding and, if warranted, revoke the authorizations, licenses, and/or certifications of all repeat offenders. Indeed, there is no opposition in the record to the Commission instituting revocation proceedings when warranted, and the Commission agrees with VON that when providers, including those without section 214 authority, have clearly and repeatedly been responsible for originating or transporting illegal robocalls and have had a sufficient opportunity to be heard through the enforcement process, there may be grounds for termination of Commission authorizations. The Commission's established section 214 revocation

process described above satisfies due process requirements, and the Commission intends to apply it to all entities that it finds to be continually violating its robocall mitigation rules.

61. *Future Review of Entities, Individual Company Owners, Directors, Officers, and Principals Applying for Commission Authorizations, Licenses, or Certifications.* Once the Commission has revoked the section 214 or other Commission authorization, license, or certification of an entity that has engaged in continued violations of its robocall mitigation rules, the Commission will consider the public interest impact of granting other future Commission authorizations, licenses, or certifications to the entity that was subject to the revocation, as well as individual company owners, directors, officers, and principals (either individuals or entities) of such entities. The Commission expects that owners, directors, officers, and principals, whether or not they have control of the entity, have influence, management, or supervisory responsibilities for the entity subject to the revocation. The Commission will consider the public interest impact as part of its established review processes for Commission applications at the time that they are filed. For example, a principal of a provider that had its section 214 authority revoked or that was removed from the Robocall Mitigation Database as a result of an enforcement action may be subject to a denial of other Commission authorizations, licenses, or certifications, including for international section 214 authority, or for approval to acquire an entity that holds blanket domestic section 214 authority or international section 214 authority. This is consistent with the Commission's current process in which it reviews many public interest factors in determining whether to grant an application, including whether an applicant for a license has the requisite citizenship, character, financial, technical, and other qualifications. To ensure that the Commission can accurately identify individual company owners, directors, officers, and principals of an entity for which it revoked authority, the Commission intends to rely on information contained in providers' registrations filed in the Robocall Mitigation Database. Where that information is insufficient for this purpose, the Commission will require entities undergoing revocation proceedings to identify their individual company owners, directors, officers, and principals as part of the revocation process.

62. The Commission proposed in the *Fifth Caller ID Authentication FNPRM* that principals and others associated with entities subject to revocation would be banned from holding a 5% or greater ownership interest in any entity that applies for or already holds any FCC license or instrument of authorization for the provision of a regulated service subject to Title II of the Act or of any entity otherwise engaged in the provision of voice service for a period of time to be determined. The record contains no information on how the Commission would undertake the complex process of identifying the providers or applicants that would be impacted by the 5% ownership trigger threshold, or whether it would risk negatively impacting the operations and customers of providers associated with the targeted principal, but which were not involved in the robocall offenses. Should the Commission see an increased volume of repeat offenses of the robocall mitigation rules, it will consider whether to adopt rules permanently barring principals and others associated with entities subject to revocation from holding both existing and future Commission authorizations. Going forward now, the Commission will generally consider whether it is in the public interest for individual company owners, directors, officers, and principals associated with an entity for which it has revoked a Commission authorization to obtain new Commission authorizations or licenses at the time that they, or an entity with which they are affiliated, apply for them. This is consistent with the Commission's stated intent in the *Fifth Caller ID Authentication FNPRM* to consider the impact these principals and others may have on ''future'' significant association with entities regulated by the Commission.

63. The Commission concludes that these new enforcement tools, acting in tandem with its new requirement for providers to submit their related entities and principals in their robocall mitigation plans, will ensure that bad actor providers and their principals will face potentially serious consequences for their repeated violation of the Commission's robocall mitigation rules. These potential consequences reach beyond a forfeiture and appropriately subject these entities and principals to specified consequences and a thorough public interest review as required. The Commission makes clear that revoking a Commission authorization or license does not transform entities that have not been classified as common carriers into common carriers or extend its general jurisdiction over foreign providers. Rather, this consequence merely allows the Commission discretion to revoke a Commission authorization or license that a provider, person, or entity would otherwise be eligible for or to deny an application for a Commission license or authorization by a principal of an entity subject to revocation. For this reason, the Commission need not exempt foreign providers from this rule, as some commenters argue.

5. Other Enforcement Matters

64. The Commission does not adopt EPIC/NCLC's proposal to base enforcement actions, including removal from the Robocall Mitigation Database, solely on the number of tracebacks a provider receives. In enforcement actions, the Commission has considered a high volume of tracebacks as a factor in determining whether a provider engaged in egregious and intentional misconduct. While receiving a high number of traceback requests may be evidence of malfeasance in certain instances, this is not always the case. The Commission's rules independently require providers to commit to respond to traceback requests—and to actually respond to such requests—in a certain time period, and they may be subject to forfeiture or removal for failure to do so. The Commission also declines to adopt licensing or bonding requirements for certain VoIP providers as EPIC/NCLC proposes.

65. The Commission declines to adopt EPIC/NCLC's strict liability standard for forfeiture or removal from the Robocall Mitigation Database for failure to block any illegal calls regardless of the circumstances, or their suggestion of an ''interim'' standard of assessing liability for transmitting illegal robocall traffic based on whether a provider ''knew or should have known that [a] call was illegal.'' The Commission concludes that expectations to stop all illegal calls are not realistic and that a strict liability standard could lead to significant market disruptions. Similarly, the Commission declines to adopt NCTA or ACA Connect's proposed ''good faith'' or CCA's proposed ''reasonableness'' standards.

D. STIR/SHAKEN Obligations of Satellite Providers

66. The Commission concludes that satellite providers that do not use North American Numbering Plan (NANP) numbers to originate calls or only use such numbers to forward calls to non-NANP numbers are not ''voice service providers'' under the TRACED Act and therefore do not have a STIR/SHAKEN

implementation obligation. The Commission also provides an ongoing extension from TRACED Act obligations to satellite providers that are small voice service providers and use NANP numbers to originate calls on the basis of a finding of undue hardship.

67. The Commission previously provided small voice services providers, including satellite providers, an extension from STIR/SHAKEN implementation until June 30, 2023. In the *Fifth Caller ID Authentication FNPRM,* the Commission sought comment on whether the TRACED Act requirements apply to some or all satellite providers and, if so, whether the Commission should grant certain satellite providers a STIR/SHAKEN extension. In addition to the questions raised in the *Fifth Caller ID Authentication FNPRM,* the Wireline Competition Bureau in August 2022 sought comment on the small provider extension generally and its applicability to satellite providers.

68. *Satellite Providers Originating Calls Using Non-NANP Numbers.* The Commission concludes that, where satellite providers originate calls using non-NANP numbers, they are not acting as ''voice service providers'' within the meaning of the TRACED Act. This conclusion is consistent with the TRACED Act's definition of voice service which requires that voice communications must use resources from the NANP. The Commission also concludes that where satellite providers utilize NANP resources for call forwarding to non-NANP numbers, such calls also fall outside of the definition of voice service. This finding is consistent with the underlying purpose of the STIR/SHAKEN regime. One of the key aims of the TRACED Act, STIR/SHAKEN, and the Commission's implementing rules, is to prevent call spoofing. Where a phone number is not displayed to the end user, as is the case in the satellite call forwarding scenario, call spoofing is not a concern.

69. *Satellite Providers Originating Calls Using NANP Numbers.* The Commission next permits an indefinite extension of time for small voice providers that are satellite providers originating calls using NANP numbers. There are de minimis instances where satellite providers may assign NANP resources to their subscribers for caller ID purposes. While the Commission finds that, in these cases, satellite providers are acting as voice service providers, the Commission believes it is also appropriate to provide an indefinite extension for STIR/SHAKEN implementation to these providers by applying the TRACED Act's ''undue hardship'' standard.

70. The TRACED Act directed the Commission to assess burdens or barriers to the implementation of STIR/SHAKEN, and granted the Commission discretion to extend the implementation deadline for a ''reasonable period of time'' based upon a ''public finding of undue hardship.'' In considering whether the hardship is ''undue'' under the TRACED Act—as well as whether an extension is for a ''reasonable period of time''—it is appropriate to balance the hardship of compliance due to the ''the burdens and barriers to implementation'' faced by a voice service provider or class of voice service providers with the benefit to the public of implementing STIR/SHAKEN expeditiously.

71. The Commission concludes that an indefinite extension is appropriate under this standard for small voice providers that are satellite providers originating calls using NANP numbers. The number of satellite subscribers using NANP resources is miniscule. There is little evidence that satellite providers or their users are responsible for illegal robocalls and satellite service costs make the high-volume calling necessary for robocallers uneconomical. The balancing of the benefits and burdens, therefore, counsels against requiring such providers to implement STIR/SHAKEN.

72. The Commission notes that it must annually reevaluate TRACED Act extensions granted, ensuring that the Commission will be able to act quickly to prevent any unforeseen abuses. While the Commission provides small voice service satellite providers an extension from STIR/SHAKEN implementation, the Commission makes clear that they must, like other voice service providers with an extension, submit a certification to the Robocall Mitigation Database pursuant to its existing rules and the new obligations the Commission adopts in this document.

E. Differential Treatment of International Roaming Traffic

73. The Commission next declines to adopt rules in this document concerning the differential treatment of international roaming traffic. The Commission also declines to adopt rules concerning differential treatment of non-conversational traffic in this document. The Commission continues to consider the record on this issue. In the *Fifth Caller ID Authentication FNPRM,* the Commission sought comment on stakeholders' assertions that international cellular roaming traffic involving NANP numbers (*i.e.,* traffic originated abroad from U.S. mobile subscribers carrying U.S. NANP numbers and terminated in the U.S.) is unlikely to carry illegal robocalls and therefore should be treated with a ''lighter'' regulatory touch. As part of that inquiry, the Commission also asked whether any separate regulatory regime for such traffic could be ''gamed'' by illegal robocallers by disguising their traffic as cellular roaming traffic.

74. Given the limited record on this issue, particularly with respect to whether and how providers could readily identify or segregate such traffic for differential treatment, the Commission directs the Wireline Competition Bureau to refer the issue to the North American Numbering Council for further investigation.

F. Summary of Cost Benefit Analysis

75. The Commission finds that the benefits of the rules it adopts in this document will greatly outweigh the costs imposed on providers. As it explained in the *First Caller ID Authentication Report and Order,* 85 FR 22029 (Apr. 21, 2020), the Commission concluded that its STIR/SHAKEN rules are likely to result in, at a minimum, $13.5 billion in annual benefits. In the *Fifth Caller ID Authentication FNPRM,* the Commission sought comment on its belief that its proposed rules and actions would achieve a large share of the annual $13.5 billion benefit and that the benefits will far exceed the costs imposed on providers. After reviewing the record in this proceeding, the Commission confirms this conclusion.

76. Limiting the ability of illegal robocallers to evade existing rules will preserve and extend the benefits of STIR/SHAKEN. The new enforcement tools the Commission adopts, as well as expanded call authentication and robocall mitigation obligations, will increase the effectiveness of its authentication regime, thereby allowing more illegal robocalls to be readily identified and stopped. As the Commission found previously, it again concludes that an overall reduction in illegal robocalls from new rules will lower network costs by eliminating both unwanted traffic congestion and the labor costs of handling numerous customer complaints. This reduction in robocalls will also help restore confidence in the U.S. telephone network and facilitate reliable access to emergency and healthcare services.

77. In this document the Commission adopts a targeted obligation applicable to the first intermediate provider in the call path. By limiting the authentication obligation to the intermediate provider at the beginning of the call chain, the

Commission maximizes the benefits of the requirement while minimizing its costs. Indeed, intermediate providers can avoid any authentication burden if they require their upstream providers to only send them authenticated traffic.

78. The Commission acknowledges that the revised and expanded mitigation and Robocall Mitigation Database filing obligations it adopts in this document will impose limited short-term implementation costs. Nevertheless, the Commission concludes that the benefits of bringing all providers within the mitigation and Robocall Mitigation Database regime will produce significant benefits to the Commission and the public by increasing transparency and accountability, and by facilitating the enforcement of the Commission's rules.

G. Legal Authority

79. Consistent with its proposals, the Commission adopts the foregoing obligations pursuant to the legal authority it relied on in prior caller ID authentication and call blocking orders.

80. *Caller ID Authentication.* The Commission concludes that the same authority through which it imposed caller ID authentication obligations on gateway providers—a subset of intermediate providers—applies equally to its rules that impose caller ID authentication obligations on non-gateway intermediate providers. Specifically, the Commission finds authority to impose caller ID authentication obligations on the first intermediate providers in the call chain under section 251(e) of the Act and the Truth in Caller ID Act. In the *Second Caller ID Authentication Report and Order,* the Commission found it had the authority to impose caller ID authentication obligations on intermediate providers under these provisions. It reasoned that calls that transit the networks of intermediate providers with illegally spoofed caller ID are exploiting numbering resources and so found authority under section 251(e). The Commission found additional, independent authority under the Truth in Caller ID Act on the basis that such rules were necessary to prevent unlawful acts and to protect voice service subscribers from scammers and bad actors, stressing that intermediate providers play an integral role in the success of STIR/SHAKEN across the voice network. The Commission relied on this reasoning in adopting authentication obligations on gateway providers and it therefore relies on this same legal authority to impose an authentication obligation on the first intermediate providers in the call chain.

81. *Robocall Mitigation.* The Commission adopts its robocall mitigation provisions for non-gateway intermediate providers and voice service providers, including those without the facilities necessary to implement STIR/SHAKEN, pursuant to sections 201(b), 202(a), and 251(e) of the Communications Act; the Truth in Caller ID Act; and the Commission's ancillary authority, consistent with the authority the Commission invoked to adopt analogous rules in the *Fifth Caller ID Authentication Report and Order* and *Second Caller ID Authentication Report and Order.* The Commission sought comment on whether it should impose a mitigation duty on voice providers without the facilities necessary to implement STIR/SHAKEN on the basis of an ongoing extension from the TRACED Act. The Commission concludes that because such providers were not granted an initial extension as a class under the TRACED Act, the clearest basis of authority for imposing a mitigation obligation is found in sections 201(b), 202(a), and 251(e) of the Communications Act; the Truth in Caller ID Act; and the Commission's ancillary authority. The Commission concludes that section 251(e) of the Act and the Truth in Caller ID Act authorize it to prohibit domestic intermediate providers and voice service providers from accepting traffic from non-gateway intermediate providers that have not filed in the Robocall Mitigation Database. In the *Second Caller ID Authentication Report and Order,* the Commission concluded that section 251(e) gives it authority to prohibit intermediate providers and voice service providers from accepting traffic from both domestic and foreign voice service providers that do not appear in the Robocall Mitigation Database, noting that its exclusive jurisdiction over numbering policy provides authority to take action to prevent the fraudulent abuse of NANP resources. The Commission observed that illegally spoofed calls exploit numbering resources whenever they transit any portion of the voice network—including the networks of intermediate providers and that preventing such calls from entering an intermediate provider's or terminating voice service provider's network is designed to protect consumers from illegally spoofed calls. The Commission found that the Truth in Caller ID Act provided additional authority for its actions to protect voice service subscribers from illegally spoofed calls.

82. The Commission concluded that it had the authority to adopt these requirements pursuant to sections 201(b), 202(a), and 251(e) of the Act, as well as the Truth in Caller ID Act, and its ancillary authority. Sections 201(b) and 202(a) provide the Commission with broad authority to adopt rules governing just and reasonable practices of common carriers. Accordingly, the Commission found that the new blocking rules were clearly within the scope of its sections 201(b) and 202(a) authority and that it is essential that the rules apply to all voice service providers, applying its ancillary authority in section 4(i). The Commission also found that section 251(e) and the Truth in Caller ID Act provided the basis to prescribe rules to prevent the unlawful spoofing of caller ID and abuse of NANP resources by all voice service providers, a category that includes VoIP providers and, in the context of its call blocking orders, intermediate providers. The Commission concludes that the same authority provides a basis to adopt the mitigation obligations it adopts in this document to the extent that providers are acting as common carriers.

83. While the Commission concludes that its direct sources of authority provide an ample basis to adopt its proposed rules on all providers, its ancillary authority in section 4(i) provides an independent basis to do so with respect to providers that have not been classified as common carriers. The Commission may exercise ancillary jurisdiction when two conditions are satisfied: (1) the Commission's general jurisdictional grant under Title I of the Communications Act covers the regulated subject; and (2) the regulations are reasonably ancillary to the Commission's effective performance of its statutorily mandated responsibilities. The Commission concludes that the regulations adopted in this document satisfy the first prong because providers that interconnect with the public switched telephone network and exchange IP traffic clearly offer ''communication by wire and radio.''

84. With regard to the second prong, requiring providers to comply with its proposed rules is reasonably ancillary to the Commission's effective performance of its statutory responsibilities under sections 201(b), 202(a), and 251(e) of the Communications Act and the Truth in Caller ID Act as described above. With respect to sections 201(b) and 202(a), absent application of its proposed rules to providers that are not classified as common carriers, originators of robocalls could circumvent the Commission's proposed scheme by sending calls only via providers that

have not yet been classified as common carriers.

85. *Enforcement.* The Commission adopts its additional enforcement rules above pursuant to sections 501, 502, and 503 of the Act. These provisions allow the Commission to take enforcement action against common carriers as well as providers not classified as common carriers following a citation. The Commission relies on this same authority to revise § 1.80 of its rules by adding new maximum and base forfeiture amounts.

II. Final Regulatory Flexibility Analysis

86. As required by the Regulatory Flexibility Act of 1980 (RFA), as amended, an Initial Regulatory Flexibility Analysis (IRFA) was incorporated into the *FNPRM* adopted in May 2022 (*Fifth Caller ID Authentication FNPRM*). The Commission sought written public comment on the proposals in the *Fifth Caller ID Authentication FNPRM,* including comment on the IRFA. The comments received are discussed below. This Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.

A. Need for, and Objectives of, the Order

87. This document takes important steps in the fight against illegal robocalls by strengthening caller ID authentication obligations, expanding robocall mitigation rules, and granting an indefinite extension for small voice service providers that are also satellite providers originating calls using NANP numbers on the basis of undue hardship. The decisions the Commission makes here protect consumers from unwanted and illegal calls while balancing the legitimate interests of callers placing lawful calls.

88. First, this document requires any non-gateway intermediate provider that receives an unauthenticated SIP call directly from an originating provider to authenticate the call. Second, it requires non-gateway intermediate providers subject to the authentication obligation to comply with, at a minimum, the version of the standards in effect on December 31, 2023, along with any errata. Third, it requires all providers—including intermediate providers and voice service providers without the facilities necessary to implement STIR/SHAKEN—to: (1) take ''reasonable steps'' to mitigate illegal robocall traffic; (2) submit a certification to the Robocall Mitigation Database regarding their STIR/SHAKEN implementation status along with other identifying information; and (3) submit a robocall mitigation plan to the Robocall Mitigation Database. Fourth, it requires all providers to commit to fully respond to traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping illegal robocallers that use its services to originate, carry, or process illegal robocalls. Fifth, it requires downstream providers to block traffic received directly from non-gateway intermediate providers that have not submitted a certification in the Robocall Mitigation Database or have been removed through enforcement actions. Finally, this document grants an ongoing STIR/SHAKEN implementation extension on the basis of undue hardship for satellite providers that are small service providers using NANP numbers to originate calls.

B. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

89. There were no comments raised that specifically addressed the proposed rules and policies presented in the *Fifth Caller ID Authentication FNPRM* IRFA. Nonetheless, the Commission considered the potential impact of the rules proposed in the IRFA on small entities and took steps where appropriate and feasible to reduce the compliance burden for small entities in order to reduce the economic impact of the rules enacted herein on such entities.

C. Response to Comments by the Chief Counsel for Advocacy of the Small Business Administration

90. Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA), and to provide a detailed statement of any change made to the proposed rules as a result of those comments. The Chief Counsel did not file any comments in response to the proposed rules in this proceeding.

D. Description and Estimate of the Number of Small Entities to Which Rules Will Apply

91. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the rules adopted herein. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''mall governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small-business concern'' under the Small Business Act. Pursuant to 5 U.S.C. 601(3), the statutory definition of a small business applies unless an agency, after consultation with the Office of Advocacy of the SBA and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**. A ''small-business concern'' is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

92. *Small Businesses, Small Organizations, Small Governmental Jurisdictions.* The Commission's actions, over time, may affect small entities that are not easily categorized at present. The Commission therefore describes, at the outset, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the SBA Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 32.5 million businesses.

93. Next, the type of small entity described as a ''small organization'' is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' The Internal Revenue Service (IRS) uses a revenue benchmark of $50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. The IRS benchmark is similar to the population of less than 50,000 benchmark in 5 U.S.C. 601(5) that is used to define a small governmental jurisdiction. Therefore, the IRS benchmark has been used to estimate the number small organizations in this small entity description. Nationwide, for tax year 2020, there were approximately 447,689 small exempt organizations in the U.S. reporting revenues of $50,000 or less according to the registration and tax data for exempt organizations available from the IRS. The IRS Exempt Organization Business Master File (E.O. BMF) Extract provides information on all registered tax-exempt/non-profit organizations. The data utilized for purposes of this description was extracted from the IRS E.O. BMF data for businesses for the tax year 2020 with revenue less than or equal to $50,000,

for Region 1—Northeast Area (58,577), Region 2—Mid-Atlantic and Great Lakes Areas (175,272), and Region 3—Gulf Coast and Pacific Coast Areas (213,840) that includes the continental U.S., Alaska, and Hawaii. This data does not include information for Puerto Rico.

94. Finally, the small entity described as a ''small governmental jurisdiction'' is defined generally as ''governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.'' U.S. Census Bureau data from the 2017 Census of Governments indicate there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. The Census of Governments survey is conducted every five (5) years compiling data for years ending with ''2'' and ''7''. Local governmental jurisdictions are made up of general purpose governments (county, municipal, and town or township) and special purpose governments (special districts and independent school districts). Of this number there were 36,931 general purpose governments (county, municipal and town or township) with populations of less than 50,000 and 12,040 special purpose governments—independent school districts with enrollment populations of less than 50,000. There were 2,105 county governments with populations less than 50,000. This category does not include subcounty (municipal and township) governments. There were 18,729 municipal and 16,097 town and township governments with populations less than 50,000. There were 12,040 independent school districts with enrollment populations less than 50,000. While the special purpose governments category also includes local special district governments, the 2017 Census of Governments data does not provide data aggregated based on population size for the special purpose governments category. Therefore, only data from independent school districts is included in the special purpose governments category. Accordingly, based on the 2017 U.S. Census of Governments data, the Commission estimates that at least 48,971 entities fall into the category of ''small governmental jurisdictions.'' This total is derived from the sum of the number of general purpose governments (county, municipal. and town or township) with populations of less than 50,000 (36,931) and the number of special purpose governments—independent school districts with enrollment populations of less than 50,000 (12,040), from the 2017 Census of Governments—Organizations tbls. 5, 6 & 10.

95. *Wired Telecommunications Carriers.* The U.S. Census Bureau defines this industry as establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired communications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution, and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry. Wired Telecommunications Carriers are also referred to as wireline carriers or fixed local service providers. Fixed Local Service Providers include the following types of providers: Incumbent Local Exchange Carriers (ILECs), Competitive Access Providers (CAPs) and Competitive Local Exchange Carriers (CLECs), Cable/Coax CLECs, Interconnected VOIP Providers, Non-Interconnected VOIP Providers, Shared-Tenant Service Providers, Audio Bridge Service Providers, and Other Local Service Providers. Local Resellers fall into another U.S. Census Bureau industry group and therefore data for these providers is not included in this industry.

96. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 5,183 providers that reported they were engaged in the provision of fixed local services. Of these providers, the Commission estimates that 4,737 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

97. *Local Exchange Carriers* (*LECs*). Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. Providers of these services include both incumbent and competitive local exchange service providers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. Wired Telecommunications Carriers are also referred to as wireline carriers or fixed local service providers. Fixed Local Exchange Service Providers include the following types of providers: Incumbent Local Exchange Carriers (ILECs), Competitive Access Providers (CAPs) and Competitive Local Exchange Carriers (CLECs), Cable/Coax CLECs, Interconnected VOIP Providers, Non-Interconnected VOIP Providers, Shared-Tenant Service Providers, Audio Bridge Service Providers, Local Resellers, and Other Local Service Providers. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 5,183 providers that reported they were fixed local exchange service providers. Of these providers, the Commission estimates that 4,737 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

98. *Incumbent Local Exchange Carriers (Incumbent LECs).* Neither the Commission nor the SBA have developed a small business size standard specifically for incumbent local exchange carriers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. The available U.S. Census

Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 1,227 providers that reported they were incumbent local exchange service providers. Of these providers, the Commission estimates that 929 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, the Commission estimates that the majority of incumbent local exchange carriers can be considered small entities.

99. *Competitive Local Exchange Carriers (LECs).* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. Providers of these services include several types of competitive local exchange service providers. Competitive Local Exchange Service Providers include the following types of providers: Competitive Access Providers (CAPs) and Competitive Local Exchange Carriers (CLECs), Cable/Coax CLECs, Interconnected VOIP Providers, Non-Interconnected VOIP Providers, Shared-Tenant Service Providers, Audio Bridge Service Providers, Local Resellers, and Other Local Service Providers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 3,956 providers that reported they were competitive local exchange service providers. Of these providers, the Commission estimates that 3,808 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

100. *Interexchange Carriers (IXCs).* Neither the Commission nor the SBA have developed a small business size standard specifically for Interexchange Carriers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 151 providers that reported they were engaged in the provision of interexchange services. Of these providers, the Commission estimates that 131 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, the Commission estimates that the majority of providers in this industry can be considered small entities.

101. *Cable System Operators (Telecom Act Standard).* The Communications Act of 1934, as amended, contains a size standard for a ''small cable operator,'' which is a cable operator that, directly or through an affiliate, serves in the aggregate fewer than one percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000. For purposes of the Telecom Act Standard, the Commission determined that a cable system operator that serves fewer than 677,000 subscribers, either directly or through affiliates, will meet the definition of a small cable operator based on the cable subscriber count established in a 2001 Public Notice. Based on industry data, only six cable system operators have more than 677, 000 subscribers. Accordingly, the Commission estimates that the majority of cable system operators are small under this size standard. The Commission notes however, that it neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed $250 million. The Commission does receive such information on a case-by-case basis if a cable operator appeals a local franchise authority's finding that the operator does not qualify as a small cable operator pursuant to § 76.901(e) of the Commission's rules. Therefore, the Commission is unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

102. *Other Toll Carriers.* Neither the Commission nor the SBA has developed a definition for small businesses specifically applicable to Other Toll Carriers. This category includes toll carriers that do not fall within the categories of interexchange carriers, operator service providers, prepaid calling card providers, satellite service carriers, or toll resellers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 115 providers that reported they were engaged in the provision of other toll services. Of these providers, the Commission estimates that 113 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

103. *Wireless Telecommunications Carriers (except Satellite).* This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 797 providers that reported they were engaged in the provision of wireless services. Of these providers, the Commission estimates that 715 providers have 1,500 or fewer employees. Consequently, using the

SBA's small business size standard, most of these providers can be considered small entities.

104. *Satellite Telecommunications.* This industry comprises firms primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications. Satellite telecommunications service providers include satellite and earth station operators. The SBA small business size standard for this industry classifies a business with $35 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 275 firms in this industry operated for the entire year. Of this number, 242 firms had revenue of less than $25 million. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. The Commission also notes that according to the U.S. Census Bureau glossary, the terms receipts and revenues are used interchangeably. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 71 providers that reported they were engaged in the provision of satellite telecommunications services. Of these providers, the Commission estimates that approximately 48 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, a little more than of these providers can be considered small entities.

105. *Local Resellers.* Neither the Commission nor the SBA have developed a small business size standard specifically for Local Resellers. Telecommunications Resellers is the closest industry with a SBA small business size standard. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. The SBA small business size standard for Telecommunications Resellers classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that 1,386 firms in this industry provided resale services for the entire year. Of that number, 1,375 firms operated with fewer than 250 employees. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 293 providers that reported they were engaged in the provision of local resale services. Of these providers, the Commission estimates that 289 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

106. *Toll Resellers.* Neither the Commission nor the SBA have developed a small business size standard specifically for Toll Resellers. Telecommunications Resellers is the closest industry with an SBA small business size standard. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. The SBA small business size standard for Telecommunications Resellers classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that 1,386 firms in this industry provided resale services for the entire year. Of that number, 1,375 firms operated with fewer than 250 employees. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 518 providers that reported they were engaged in the provision of toll services. Of these providers, the Commission estimates that 495 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

107. *Prepaid Calling Card Providers.* Neither the Commission nor the SBA has developed a small business size standard specifically for prepaid calling card providers. Telecommunications Resellers is the closest industry with a SBA small business size standard. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. The SBA small business size standard for Telecommunications Resellers classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that 1,386 firms in this industry provided resale services for the entire year. Of that number, 1,375 firms operated with fewer than 250 employees. The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 58 providers that reported they were engaged in the provision of payphone services. Of these providers, the Commission estimates that 57 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

108. *All Other Telecommunications.* This industry is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Providers of internet services (*e.g.,* dial-up internet Service Providers) or VoIP services, via client-supplied telecommunications connections are also included in this industry. The SBA small business size standard for this industry classifies firms with annual receipts of $35 million or less as small. U.S. Census Bureau data for 2017 show that there were 1,079 firms in this industry that operated for the entire year. Of those firms, 1,039 had revenue of less than $25 million. The available U.S. Census

Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. The Commission also notes that according to the U.S. Census Bureau glossary, the terms receipts and revenues are used interchangeably. Based on this data, the Commission estimates that the majority of ''All Other Telecommunications'' firms can be considered small.

E. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

109. This document requires providers to meet certain obligations. These changes affect small and large companies equally and apply equally to all the classes of regulated entities identified above. Specifically, this document adopts a limited intermediate provider authentication requirement. It requires a non-gateway intermediate provider that receives an unauthenticated SIP call directly from an originating provider to authenticate the call. The requirement will arise in limited circumstances—where the originating provider failed to comply with their own authentication obligation, or where the call is sent directly to an intermediate provider from the limited subset of originating providers that lack an authentication obligation. Indeed, if the first intermediate provider in the call path implements contractual provisions with its upstream originating providers stating that it will only accept authenticated traffic, it will completely avoid the need to authenticate calls. Non-gateway intermediate providers that are subject to the authentication obligation have the flexibility to assign the level of attestation appropriate to the call based on the current version of the standards and the call information available. A non-gateway intermediate provider using non-IP network technology in its network has the flexibility to either upgrade its network to allow for the initiation, maintenance, and termination of SIP calls and fully implement the STIR/SHAKEN framework, or provide the Commission, upon request, with documented proof that it is participating, either on its own or through a representative, as a member of a working group, industry standards group, or consortium that is working to develop a non-IP solution, or actively testing such a solution. Under this rule, a non-gateway intermediate provider satisfies its obligation if it participates through a third-party representative, such as a trade association of which it is a member or vendor.

110. This document also requires all providers to take ''reasonable steps'' to mitigate illegal robocalls. The new classes of providers subject to the ''reasonable steps'' standard are not required to implement specific measures to meet that standard, but providers' programs must include detailed practices that can reasonably be expected to significantly reduce the carrying, processing, or origination of illegal robocalls. In addition, all providers must implement a robocall mitigation program and comply with the practices that its program requires. The providers must also commit to respond fully to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping illegal robocalls.

111. All providers must submit a certification and robocall mitigation plan to the Robocall Mitigation Database regardless of whether they are required to implement STIR/SHAKEN, including providers without the facilities necessary to implement STIR/SHAKEN. The robocall mitigation plan must describe the specific ''reasonable steps'' that the provider has taken to avoid, as applicable, the origination, carrying, or processing of illegal robocall traffic. This document also requires providers to ''describe with particularity'' certain mitigation techniques in their robocall mitigation plans. Specifically, (1) voice service providers must describe how they are complying with their existing obligation to take affirmative effective measures to prevent new and renewing customers from originating illegal calls; (2) non-gateway intermediate providers and voice service providers must describe any ''know-your-upstream provider'' procedures; and (3) all providers must describe any call analytics systems used to identify and block illegal traffic. To comply with the new requirements to describe their ''new and renewing customer'' and ''know-your-upstream provider'' procedures, providers must describe any contractual provisions with end-users or upstream providers designed to mitigate illegal robocalls.

112. All providers with new filing obligations must submit a certification to the Robocall Mitigation Database that includes the following baseline information:

(1) whether the provider has fully, partially, or not implemented the STIR/SHAKEN authentication framework in the IP portions of its network;

(2) the provider's business name(s) and primary address;

(3) other business name(s) in use by the provider;

(4) all business names previously used by the provider;

(5) whether the provider is a foreign service provider;

(6) the name, title, department, business address, telephone number, and email address of one person within the company responsible for addressing robocall mitigation-related issues.

113. Certifications and robocall mitigations plans must be submitted in English or with certified English translation, and providers with new filing obligations must update any submitted information within 10 business days.

114. This document also adopts rules requiring providers to submit additional information in their Robocall Mitigation certifications. Specifically, (1) all providers must submit additional information regarding their role(s) in the call chain; (2) all providers asserting they do not have an obligation to implement STIR/SHAKEN must include more detail regarding the basis of that assertion; (3) all providers must certify that they have not been prohibited from filing in the Robocall Mitigation Database pursuant to a law enforcement action; (4) all providers must state whether they have been subject to a formal Commission, law enforcement, or regulatory agency action or investigation with accompanying findings of actual or suspected wrongdoing due to unlawful robocalling or spoofing and provide information concerning any such actions or investigations; and (5) all filers must submit their OCN if they have one. Submissions may be made confidentially, consistent with the Commission's existing confidentiality rules.

115. This document requires downstream providers to block traffic received from a non-gateway intermediate provider that is not listed in the Robocall Mitigation Database, either because the provider did not file or their certification was removed as part of an enforcement action. After receiving notice from the Commission that a provider has been removed from the Robocall Mitigation Database, downstream providers must block all traffic from the identified provider within two business days.

F. Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

116. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its approach, which may include the following four alternatives, among

others: (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

117. Generally, the decisions the Commission made in this document apply to all providers, and do not impose unique burdens or benefits on small providers. The Commission took several steps to minimize the economic impact of the rules adopted in this document on small entities.

118. This document imposes a limited intermediate provider authentication obligation that requires the first non-gateway intermediate provider in the call chain to authenticate unauthenticated calls received directly from an originating provider. Limiting the application of the authentication obligation to first non-gateway intermediate providers helps reduce the burden on intermediate providers, including small providers, and minimizes the potential costs associated with a broader authentication requirement for all intermediate providers that were identified in the record.

119. The Commission also allowed flexibility where appropriate to ensure that providers, including small providers, can determine the best approach for compliance based on the needs of their networks. For example, non-gateway intermediate providers have the flexibility to assign the level of attestation appropriate to the call based on the applicable level of the standards and the available call information. Additionally, the new classes of providers subject to the ''reasonable steps'' standard have the flexibility to determine which measures to use to mitigate illegal robocall traffic on their networks. In reaching this approach, the Commission considered and declined to adopt a ''gross negligence'' standard for evaluating whether a mitigation program is sufficient. The Commission also declined to adopt a heightened mitigation obligation solely for VoIP providers in order to ensure that the obligation applies to providers regardless of the technology used to transmit calls. Likewise, the Commission allowed non-gateway intermediate providers subject to its call authentication requirements that rely on non-IP infrastructure the flexibility to either upgrade their networks to implement STIR/SHAKEN or participate as a member of a working group, industry standards group, or consortium that is working to develop a non-IP caller ID authentication solution. This flexibility will reduce compliance costs for non-gateway intermediate providers, including small providers. The Commission also declined to require providers to submit information concerning inquiries from law enforcement or regulatory agencies or investigations that do not include findings of actual or suspected wrongdoing. And the Commission declined to require Robocall Mitigation Database filers to include certain additional identifying information discussed in the *Fourth Caller ID Authentication FNPRM* beyond their OCN.

120. This document also grants an indefinite STIR/SHAKEN implementation extension to satellite providers that are small voice service providers and use NANP numbers to originate calls.

G. Report to Congress

121. The Commission will send a copy of the *Sixth Report and Order,* including this FRFA, in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act. In addition, the Commission will send a copy of the *Sixth Report and Order,* including this FRFA, to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the *Sixth Report and Order* (or summaries thereof) will also be published in the **Federal Register**.

III. Procedural Matters

122. *Final Regulatory Flexibility Analysis.* As required by the Regulatory Flexibility Act of 1980 (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was incorporated into the *Fifth Caller ID Authentication FNPRM.* The Commission sought written public comment on the possible significant economic impact on small entities regarding the proposals addressed in the *Fifth Caller ID Authentication FNPRM,* including comments on the IRFA. Pursuant to the RFA, a Final Regulatory Flexibility Analysis (FRFA) is set forth in Section II, above. The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, will send a copy of the *Sixth Report and Order,* including the FRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA).

123. *Paperwork Reduction Act.* This document may contain new or modified information collection requirements subject to the PRA, Public Law 104–13. Specifically, the rules adopted in 47 CFR 64.6303(c) and 64.6305(d), (e), and (f) may require new or modified information collections. All such new or modified information collection requirements will be submitted to OMB for review under section 3507(d) of the PRA. OMB, the general public, and other Federal agencies will be invited to comment on the new or modified information collection requirements contained in this proceeding. In addition, the Commission notes that pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, it previously sought specific comment on how the Commission might further reduce the information collection burden for small business concerns with fewer than 25 employees. In this document, the Commission describes several steps it has taken to minimize the information collection burdens on small entities.

124. *Congressional Review Act.* The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, OMB, concurs, that this rule is ''major'' under the Congressional Review Act, 5 U.S.C. 804(2). The Commission will send a copy of the *Sixth Report and Order* to Congress and the Government Accountability Office pursuant to 5 U.S.C. 801(a)(1)(A).

IV. Ordering Clauses

125. Accordingly, pursuant to sections 4(i), 4(j), 201, 202, 214, 217, 227, 227b, 251(e), 303(r), 501, 502, and 503 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 201, 202, 214, 217, 227, 227b, 251(e), 303(r), 501, 502, and 503, *it is ordered* that the *Sixth Report and Order is adopted.*

126. *It is further ordered* that parts 0, 1, and 64 of the Commission's rules *are amended* as set forth in the Final Rules.

127. *It is further ordered* that, pursuant to §§ 1.4(b)(1) and 1.103(a) of the Commission's rules, 47 CFR 1.4(b)(1), 1.103(a), the *Sixth Report and Order,* including the rule revisions and redesignations described in the Final Rules, *shall be effective* 60 days after publication in the **Federal Register**, except that: (1) the additions of 47 CFR 64.6303(c) and 64.6305(f) and the revisions to redesignated 47 CFR 64.6305(d) and (e) as described in the Final Rules will not be effective until OMB completes any review that the Wireline Competition Bureau determines is required under the Paperwork Reduction Act; and (2) the revisions to redesignated 47 CFR 64.6305(g) as described in the Final

Rules will not be effective until an effective date is announced by the Wireline Competition Bureau. The Commission directs the Wireline Competition Bureau to announce effective dates for the additions of and revisions to 47 CFR 64.6303(c) and 64.6305(d) through (g), as redesignated by the *Sixth Report and Order,* by subsequent notification.

128. *It is further ordered* that the Office of the Managing Director, Performance Evaluation and Records Management, *shall send* a copy of the *Sixth Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A).

129. *It is further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, *shall send* a copy of the *Sixth Report and Order,* including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

List of Subjects

47 CFR Part 0

Authority delegations (Government agencies), Communications, Communications common carriers, Classified information, Freedom of information, Government publications, Infants and children, Organization and functions (Government agencies), Postal Service, Privacy, Reporting and recordkeeping requirements, Sunshine Act, Telecommunications.

47 CFR Part 1

Administrative practice and procedure, Civil rights, Claims, Communications, Communications common carriers, Communications equipment, Cuba, Drug abuse, Environmental impact statements, Equal access to justice, Equal employment opportunity, Federal buildings and facilities, Government employees, Historic preservation, Income taxes, Indemnity payments, Individuals with disabilities, internet, Investigations, Lawyers, Metric system, Penalties, Radio, Reporting and recordkeeping requirements, Satellites, Security measures, Telecommunications, Telephone, Television, Wages.

47 CFR Part 64

Carrier equipment, Communications common carriers, Reporting and recordkeeping requirements, Telecommunications, Telephone.

Federal Communications Commission.

Marlene Dortch,

Secretary.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR parts 0, 1, and 64 as follows:

PART 0—COMMISSION ORGANIZATION

■ 1. The authority citation for part 0 continues to read as follows:

Authority: 47 U.S.C. 151, 154(i), 154(j), 155, 225, and 409, unless otherwise noted.

Subpart A—Organization

■ 2. Amend § 0.111 by revising paragraph (a)(28)(i) and (ii) and adding paragraph (a)(29) to read as follows:

§ 0.111 Functions of the Bureau.

(a) * * *

(28) * * *

(i) Whose certification required by § 64.6305 of this chapter is deficient after giving that provider notice and an opportunity to cure the deficiency; or

(ii) Who accepts calls directly from a provider not listed in the Robocall Mitigation Database in violation of § 64.6305(g) of this chapter.

(29) Take enforcement action, including revoking an existing section 214 authorization, license, or instrument for any entity that has repeatedly violated § 64.6301, § 64.6302, or § 64.6305 of this chapter. The Commission or the Enforcement Bureau under delegated authority will provide prior notice of its intent to revoke an existing license or instrument of authorization and follow applicable revocation procedures, including providing the authorization holder with a written opportunity to demonstrate why revocation is not warranted.

* * * * *

PART 1—PRACTICE AND PROCEDURE

■ 3. The authority citation for part 1 continues to read as follows:

Authority: 47 U.S.C. chs. 2, 5, 9, 13; 28 U.S.C. 2461 note, unless otherwise noted.

Subpart A—General Rules of Practice and Procedure

■ 4. Amend § 1.80 by:

■ a. Redesignating paragraphs (b)(9) through (11) as paragraphs (b)(10) through (12);

■ b. Adding new paragraph (b)(9);

■ c. Revising newly redesignated paragraph (b)(10);

■ d. In newly redesignated paragraph (b)(11):

■ i. Revising table 1;

■ ii. Revising the headings for tables 2 and 3;

■ iii. Revising the heading and footnote 1 for table 4; and

■ iv. Revising note 2 following table 4;

■ e. In newly redesignated paragraph (b)(12)(ii), revising the heading for table 5; and

■ f. Revising note 3 following table 5 to newly redesignated paragraph (b)(12)(ii).

The addition and revisions read as follows:

§ 1.80 Forfeiture proceedings.

* * * * *

(9) *Forfeiture penalty for a failure to block.* Any person determined to have failed to block illegal robocalls pursuant to §§ 64.6305(g) and 64.1200(n) of this chapter shall be liable to the United States for a forfeiture penalty of no more than $23,727 for each violation, to be assessed on a per-call basis.

(10) *Maximum forfeiture penalty for any case not previously covered.* In any case not covered in paragraphs (b)(1) through (9) of this section, the amount of any forfeiture penalty determined under this section shall not exceed $23,727 for each violation or each day of a continuing violation, except that the amount assessed for any continuing violation shall not exceed a total of $177,951 for any single act or failure to act described in paragraph (a) of this section.

(11) * * *

TABLE 1 TO PARAGRAPH (b)(11)—BASE AMOUNTS FOR SECTION 503 FORFEITURES

Forfeitures	Violation amount
Misrepresentation/lack of candor	(1)
Failure to file required DODC required forms, and/or filing materially inaccurate or incomplete DODC information	$15,000
Construction and/or operation without an instrument of authorization for the service	10,000
Failure to comply with prescribed lighting and/or marking	10,000

TABLE 1 TO PARAGRAPH (b)(11)—BASE AMOUNTS FOR SECTION 503 FORFEITURES—Continued

Forfeitures	Violation amount
Violation of public file rules	10,000
Violation of political rules: Reasonable access, lowest unit charge, equal opportunity, and discrimination	9,000
Unauthorized substantial transfer of control	8,000
Violation of children's television commercialization or programming requirements	8,000
Violations of rules relating to distress and safety frequencies	8,000
False distress communications	8,000
EAS equipment not installed or operational	8,000
Alien ownership violation	8,000
Failure to permit inspection	7,000
Transmission of indecent/obscene materials	7,000
Interference	7,000
Importation or marketing of unauthorized equipment	7,000
Exceeding of authorized antenna height	5,000
Fraud by wire, radio or television	5,000
Unauthorized discontinuance of service	5,000
Use of unauthorized equipment	5,000
Exceeding power limits	4,000
Failure to Respond to Commission communications	4,000
Violation of sponsorship ID requirements	4,000
Unauthorized emissions	4,000
Using unauthorized frequency	4,000
Failure to engage in required frequency coordination	4,000
Construction or operation at unauthorized location	4,000
Violation of requirements pertaining to broadcasting of lotteries or contests	4,000
Violation of transmitter control and metering requirements	3,000
Failure to file required forms or information	3,000
Per call violations of the robocall blocking rules	2,500
Failure to make required measurements or conduct required monitoring	2,000
Failure to provide station ID	1,000
Unauthorized pro forma transfer of control	1,000
Failure to maintain required records	1,000

Table 2 to Paragraph (b)(11)—Violations Unique to the Service

* * * * *

Table 3 to Paragraph (b)(11)—Adjustment Criteria for Section 503 Forfeitures

* * * * *

Table 4 to Paragraph (b)(11)—Non-Section 503 Forfeitures That Are Affected by the Downward Adjustment Factors [1]

* * * * *

[1] Unlike section 503 of the Act, which establishes maximum forfeiture amounts, other sections of the Act, with two exceptions, state prescribed amounts of forfeitures for violations of the relevant section. These amounts are then subject to mitigation or remission under section 504 of the Act. One exception is section 223 of the Act, which provides a maximum forfeiture per day. For convenience, the Commission will treat this amount as if it were a prescribed base amount, subject to downward adjustments. The other exception is section 227(e) of the Act, which provides maximum forfeitures per violation, and for continuing violations. The Commission will apply the factors set forth in section 503(b)(2)(E) of the Act and this table 4 to determine the amount of the penalty to assess in any particular situation. The amounts in this table 4 are adjusted for inflation pursuant to the Debt Collection Improvement Act of 1996 (DCIA), 28 U.S.C. 2461. These non-section 503 forfeitures may be adjusted downward using the ''Downward Adjustment Criteria'' shown for section 503 forfeitures in table 3 to this paragraph (b)(11).

Note 2 to paragraph (b)(11): *Guidelines for Assessing Forfeitures.* The Commission and its staff may use the guidelines in tables 1 through 4 of this paragraph (b)(11) in particular cases. The Commission and its staff retain the discretion to issue a higher or lower forfeiture than provided in the guidelines, to issue no forfeiture at all, or to apply alternative or additional sanctions as permitted by the statute. The forfeiture ceilings per violation or per day for a continuing violation stated in section 503 of the Communications Act and the Commission's rules are described in paragraph (b)(12) of this section. These statutory maxima became effective September 13, 2013. Forfeitures issued under other sections of the Act are dealt with separately in table 4 to this paragraph (b)(11).

(12) * * *

(ii) * * *

Table 5 to Paragraph (b)(12)(ii)

* * * * *

Note 3 to paragraph (b)(12): Pursuant to Public Law 104–134, the first inflation adjustment cannot exceed 10 percent of the statutory maximum amount.

* * * * *

PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

■ 5. The authority citation for part 64 continues to read as follows:

Authority: 47 U.S.C. 151, 152, 154, 201, 202, 217, 218, 220, 222, 225, 226, 227, 227b, 228, 251(a), 251(e), 254(k), 255, 262, 276, 403(b)(2)(B), (c), 616, 617, 620, 1401–1473, unless otherwise noted; Pub. L. 115–141, Div. P, sec. 503, 132 Stat. 348, 1091.

Subpart HH—Caller ID Authentication

■ 6. Amend § 64.6300 by redesignating paragraphs (i) through (n) as paragraphs (j) through (o) and adding new paragraph (i) to read as follows:

§ 64.6300 Definitions.

* * * * *

(i) *Non-gateway intermediate provider.* The term ''non-gateway intermediate provider'' means any entity that is an intermediate provider as that term is defined by paragraph (g) of this section that is not a gateway provider as that term is defined by paragraph (d) of this section.

* * * * *

■ 7. Amend § 64.6302 by adding paragraph (d) to read as follows:

§ 64.6302 Caller ID authentication by intermediate providers.

* * * * *

(d) Notwithstanding paragraph (b) of this section, a non-gateway intermediate provider must, not later than December 31, 2023, authenticate caller identification information for all calls it receives directly from an originating provider and for which the caller identification information has not been authenticated and which it will exchange with another provider as a SIP call, unless that non-gateway intermediate provider is subject to an applicable extension in § 64.6304.

§ 64.6303 [Amended]

■ 8. Amend § 63.6303 by adding reserved paragraph (c).

■ 9. Delayed indefinitely, further amend § 63.6303 by adding paragraph (c) to read as follows:

§ 64.6303 Caller ID authentication in non-IP networks.

* * * * *

(c) Except as provided in § 64.6304, not later than December 31, 2023, a non-gateway intermediate provider receiving a call directly from an originating provider shall either:

(1) Upgrade its entire network to allow for the processing and carrying of SIP calls and fully implement the STIR/SHAKEN framework as required in § 64.6302(d) throughout its network; or

(2) Maintain and be ready to provide the Commission on request with documented proof that it is participating, either on its own or through a representative, including third party representatives, as a member of a working group, industry standards group, or consortium that is working to develop a non-internet Protocol caller identification authentication solution, or actively testing such a solution.

■ 10. Amend § 64.6304 by:
■ a. Removing the word ''and'' at the end of paragraph (a)(1)(i);
■ b. Revising paragraph (a)(1)(ii);
■ c. Adding paragraph (a)(1)(iii); and
■ d. Revising paragraphs (b) and (d).

The revisions and addition read as follows:

§ 64.6304 Extension of implementation deadline.

(a) * * *

(1) * * *

(ii) A small voice service provider notified by the Enforcement Bureau pursuant to § 0.111(a)(27) of this chapter that fails to respond in a timely manner, fails to respond with the information requested by the Enforcement Bureau, including credible evidence that the robocall traffic identified in the notification is not illegal, fails to demonstrate that it taken steps to effectively mitigate the traffic, or if the Enforcement Bureau determines the provider violates § 64.1200(n)(2), will no longer be exempt from the requirements of § 64.6301 beginning 90 days following the date of the Enforcement Bureau's determination, unless the extension would otherwise terminate earlier pursuant to paragraph (a)(1) introductory text or (a)(1)(i), in which case the earlier deadline applies; and

(iii) Small voice service providers that originate calls via satellite using North American Numbering Plan numbers are deemed subject to a continuing extension of § 64.6301.

* * * * *

(b) *Voice service providers, gateway providers, and non-gateway intermediate providers that cannot obtain an SPC token.* Voice service providers that are incapable of obtaining an SPC token due to Governance Authority policy are exempt from the requirements of § 64.6301 until they are capable of obtaining an SPC token. Gateway providers that are incapable of obtaining an SPC token due to Governance Authority policy are exempt from the requirements of § 64.6302(c) regarding call authentication. Non-gateway intermediate providers that are incapable of obtaining an SPC token due to Governance Authority policy are exempt from the requirements of § 64.6302(d) regarding call authentication.

* * * * *

(d) *Non-IP networks.* Those portions of a voice service provider, gateway provider, or non-gateway intermediate provider's network that rely on technology that cannot initiate, maintain, carry, process, and terminate SIP calls are deemed subject to a continuing extension. A voice service provider subject to the foregoing extension shall comply with the requirements of § 64.6303(a) as to the portion of its network subject to the extension, a gateway provider subject to the foregoing extension shall comply with the requirements of § 64.6303(b) as to the portion of its network subject to the extension, and a non-gateway intermediate provider receiving calls directly from an originating provider subject to the foregoing extension shall comply with the requirements of § 64.6303(c) as to the portion of its network subject to the extension.

* * * * *

■ 11. Amend § 64.6305 by:
■ a. Revising paragraph (a)(1);
■ b. Redesignating paragraphs (c), (d), and (e) as paragraphs (d), (e), and (g) and adding new paragraph (c);
■ c. Revising newly redesignated paragraphs (d)(3) introductory text, (d)(5) introductory text, (e)(2) introductory text, (e)(3) introductory text, and (e)(5);
■ d. Adding reserved paragraph (f);
■ e. Revising newly redesignated paragraphs (g)(1) through (3);
■ f. Redesignating paragraph (g)(4) as paragraph (g)(5) and adding new reserved paragraph (g)(4); and
■ g. Revising newly redesignated paragraph (g)(5) introductory text.

The additions and revisions read as follows:

§ 64.6305 Robocall mitigation and certification.

(a) * * *

(1) Each voice service provider shall implement an appropriate robocall mitigation program.

* * * * *

(c) *Robocall mitigation program requirements for non-gateway intermediate providers.* (1) Each non-gateway intermediate provider shall implement an appropriate robocall mitigation program.

(2) Any robocall mitigation program implemented pursuant to paragraph (c)(1) of this section shall include reasonable steps to avoid carrying or processing illegal robocall traffic and shall include a commitment to respond fully and in a timely manner to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to carry or process calls.

(d) * * *

(3) All certifications made pursuant to paragraphs (d)(1) and (2) of this section shall:

* * * * *

(5) A voice service provider shall update its filings within 10 business days of any change to the information it must provide pursuant to paragraphs (d)(1) through (4) of this section.

* * * * *

(e) * * *

(2) A gateway provider shall include the following information in its certification made pursuant to paragraph (e)(1) of this section, in

English or with a certified English translation:

* * * * *

(3) All certifications made pursuant to paragraphs (e)(1) and (2) of this section shall:

* * * * *

(5) A gateway provider shall update its filings within 10 business days to the information it must provide pursuant to paragraphs (e)(1) through (4) of this section, subject to the conditions set forth in paragraphs (d)(5)(i) and (ii) of this section.

* * * * *

(f) [Reserved]

(g) * * *

(1) *Accepting traffic from domestic voice service providers.* Intermediate providers and voice service providers shall accept calls directly from a domestic voice service provider only if that voice service provider's filing appears in the Robocall Mitigation Database in accordance with paragraph (d) of this section and that filing has not been de-listed pursuant to an enforcement action.

(2) *Accepting traffic from foreign providers.* Beginning April 11, 2023, intermediate providers and voice service providers shall accept calls directly from a foreign voice service provider or foreign intermediate provider that uses North American Numbering Plan resources that pertain to the United States in the caller ID field to send voice traffic to residential or business subscribers in the United States, only if that foreign provider's filing appears in the Robocall Mitigation Database in accordance with paragraph (d) of this section and that filing has not been de-listed pursuant to an enforcement action.

(3) *Accepting traffic from gateway providers.* Beginning April 11, 2023, intermediate providers and voice service providers shall accept calls directly from a gateway provider only if that gateway provider's filing appears in the Robocall Mitigation Database in accordance with paragraph (e) of this section, showing that the gateway provider has affirmatively submitted the filing, and that filing has not been de-listed pursuant to an enforcement action.

(4) [Reserved]

(5) *Public safety safeguards.* Notwithstanding paragraphs (g)(1) through (4) of this section:

* * * * *

■ 12. Delayed indefinitely, further amend § 64.6305 by:

■ a. Revising paragraphs (d)(1) introductory text, (d)(1)(ii) and (iii), (d)(2), and (d)(4)(iv) and (v) and adding paragraphs (d)(4)(vi) and (vii);

■ b. Revising paragraphs (e)(1) introductory text and (e)(2)(i) through (iii);

■ c. Adding paragraph (e)(2)(iv);

■ d. Revising paragraphs (e)(4)(iv) and (v) and adding paragraphs (e)(4)(vi) and (vii); and

■ e. Adding paragraphs (f) and (g)(4).

The additions and revisions read as follows:

§ 64.6305 Robocall mitigation and certification.

* * * * *

(d) * * *

(1) A voice service provider shall certify that all of the calls that it originates on its network are subject to a robocall mitigation program consistent with paragraph (a) of this section, that any prior certification has not been removed by Commission action and it has not been prohibited from filing in the Robocall Mitigation Database by the Commission, and to one of the following:

* * * * *

(ii) It has implemented the STIR/SHAKEN authentication framework on a portion of its network and all calls it originates on that portion of its network are compliant with § 64.6301(a)(1) and (2); or

(iii) It has not implemented the STIR/SHAKEN authentication framework on any portion of its network.

(2) A voice service provider shall include the following information in its certification in English or with a certified English translation:

(i) Identification of the type of extension or extensions the voice service provider received under § 64.6304, if the voice service provider is not a foreign voice service provider, and the basis for the extension or extensions, or an explanation of why it is unable to implement STIR/SHAKEN due to a lack of control over the network infrastructure necessary to implement STIR/SHAKEN;

(ii) The specific reasonable steps the voice service provider has taken to avoid originating illegal robocall traffic as part of its robocall mitigation program, including a description of how it complies with its obligation to know its customers pursuant to § 64.1200(n)(3), any procedures in place to know its upstream providers, and the analytics system(s) it uses to identify and block illegal traffic, including whether it uses any third-party analytics vendor(s) and the name(s) of such vendor(s);

(iii) A statement of the voice service provider's commitment to respond fully and in a timely manner to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls; and

(iv) State whether, at any time in the prior two years, the filing entity (and/or any entity for which the filing entity shares common ownership, management, directors, or control) has been the subject of a formal Commission, law enforcement, or regulatory agency action or investigation with accompanying findings of actual or suspected wrongdoing due to the filing entity transmitting, encouraging, assisting, or otherwise facilitating illegal robocalls or spoofing, or a deficient Robocall Mitigation Database certification or mitigation program description; and, if so, provide a description of any such action or investigation, including all law enforcement or regulatory agencies involved, the date that any action or investigation was commenced, the current status of the action or investigation, a summary of the findings of wrongdoing made in connection with the action or investigation, and whether any final determinations have been issued.

* * * * *

(4) * * *

(iv) Whether the voice service provider is a foreign voice service provider;

(v) The name, title, department, business address, telephone number, and email address of one person within the company responsible for addressing robocall mitigation-related issues;

(vi) Whether the voice service provider is:

(A) A voice service provider with a STIR/SHAKEN implementation obligation directly serving end users;

(B) A voice service provider with a STIR/SHAKEN implementation obligation acting as a wholesale provider originating calls on behalf of another provider or providers; or

(C) A voice service provider without a STIR/SHAKEN implementation obligation; and

(vii) The voice service provider's OCN, if it has one.

* * * * *

(e) * * *

(1) A gateway provider shall certify that all of the calls that it carries or processes on its network are subject to a robocall mitigation program consistent with paragraph (b)(1) of this section, that any prior certification has not been removed by Commission action and it

has not been prohibited from filing in the Robocall Mitigation Database by the Commission, and to one of the following:

* * * * *

(2) * * *

(i) Identification of the type of extension or extensions the gateway provider received under § 64.6304 and the basis for the extension or extensions, or an explanation of why it is unable to implement STIR/SHAKEN due to a lack of control over the network infrastructure necessary to implement STIR/SHAKEN;

(ii) The specific reasonable steps the gateway provider has taken to avoid carrying or processing illegal robocall traffic as part of its robocall mitigation program, including a description of how it complies with its obligation to know its upstream providers pursuant to § 64.1200(n)(4), the analytics system(s) it uses to identify and block illegal traffic, and whether it uses any third-party analytics vendor(s) and the name(s) of such vendor(s);

(iii) A statement of the gateway provider's commitment to respond fully and within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to carry or process calls; and

(iv) State whether, at any time in the prior two years, the filing entity (and/or any entity for which the filing entity shares common ownership, management, directors, or control) has been the subject of a formal Commission, law enforcement, or regulatory agency action or investigation with accompanying findings of actual or suspected wrongdoing due to the filing entity transmitting, encouraging, assisting, or otherwise facilitating illegal robocalls or spoofing, or a deficient Robocall Mitigation Database certification or mitigation program description; and, if so, provide a description of any such action or investigation, including all law enforcement or regulatory agencies involved, the date that any action or investigation was commenced, the current status of the action or investigation, a summary of the findings of wrongdoing made in connection with the action or investigation, and whether any final determinations have been issued.

* * * * *

(4) * * *

(iv) Whether the gateway provider or any affiliate is also foreign voice service provider;

(v) The name, title, department, business address, telephone number, and email address of one person within the company responsible for addressing robocall mitigation-related issues;

(vi) Whether the gateway provider is:

(A) A gateway provider with a STIR/SHAKEN implementation obligation; or

(B) A gateway provider without a STIR/SHAKEN implementation obligation; and

(vii) The gateway provider's OCN, if it has one.

* * * * *

(f) *Certification by non-gateway intermediate providers in the Robocall Mitigation Database.* (1) A non-gateway intermediate provider shall certify that all of the calls that it carries or processes on its network are subject to a robocall mitigation program consistent with paragraph (c) of this section, that any prior certification has not been removed by Commission action and it has not been prohibited from filing in the Robocall Mitigation Database by the Commission, and to one of the following:

(i) It has fully implemented the STIR/SHAKEN authentication framework across its entire network and all calls it carries or processes are compliant with § 64.6302(b);

(ii) It has implemented the STIR/SHAKEN authentication framework on a portion of its network and calls it carries or processes on that portion of its network are compliant with § 64.6302(b); or

(iii) It has not implemented the STIR/SHAKEN authentication framework on any portion of its network for carrying or processing calls.

(2) A non-gateway intermediate provider shall include the following information in its certification made pursuant to paragraph (f)(1) of this section in English or with a certified English translation:

(i) Identification of the type of extension or extensions the non-gateway intermediate provider received under § 64.6304, if the non-gateway intermediate provider is not a foreign provider, and the basis for the extension or extensions, or an explanation of why it is unable to implement STIR/SHAKEN due to a lack of control over the network infrastructure necessary to implement STIR/SHAKEN;

(ii) The specific reasonable steps the non-gateway intermediate provider has taken to avoid carrying or processing illegal robocall traffic as part of its robocall mitigation program, including a description of any procedures in place to know its upstream providers and the analytics system(s) it uses to identify and block illegal traffic, including whether it uses any third-party analytics vendor(s) and the name of such vendor(s);

(iii) A statement of the non-gateway intermediate provider's commitment to respond fully and in a timely manner to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to carry or process calls; and

(iv) State whether, at any time in the prior two years, the filing entity (and/or any entity for which the filing entity shares common ownership, management, directors, or control) has been the subject of a formal Commission, law enforcement, or regulatory agency action or investigation with accompanying findings of actual or suspected wrongdoing due to the filing entity transmitting, encouraging, assisting, or otherwise facilitating illegal robocalls or spoofing, or a deficient Robocall Mitigation Database certification or mitigation program description; and, if so, provide a description of any such action or investigation, including all law enforcement or regulatory agencies involved, the date that any action or investigation was commenced, the current status of the action or investigation, a summary of the findings of wrongdoing made in connection with the action or investigation, and whether any final determinations have been issued.

(3) All certifications made pursuant to paragraphs (f)(1) and (2) of this section shall:

(i) Be filed in the appropriate portal on the Commission's website; and

(ii) Be signed by an officer in conformity with 47 CFR 1.16.

(4) A non-gateway intermediate provider filing a certification shall submit the following information in the appropriate portal on the Commission's website:

(i) The non-gateway intermediate provider's business name(s) and primary address;

(ii) Other business names in use by the non-gateway intermediate provider;

(iii) All business names previously used by the non-gateway intermediate provider;

(iv) Whether the non-gateway intermediate provider or any affiliate is also foreign voice service provider;

(v) The name, title, department, business address, telephone number, and email address of one person within the company responsible for addressing robocall mitigation-related issues;

(vi) Whether the non-gateway intermediate provider is:

(A) A non-gateway intermediate provider with a STIR/SHAKEN implementation obligation; or

(B) A non-gateway intermediate provider without a STIR/SHAKEN implementation obligation; and

(vii) The non-gateway intermediate service provider's OCN, if it has one.

(5) A non-gateway intermediate provider shall update its filings within 10 business days of any change to the information it must provide pursuant to this paragraph (f) subject to the conditions set forth in paragraphs (d)(5)(i) and (ii) of this section.

(g) * * *

(4) *Accepting traffic from non-gateway intermediate providers.* Intermediate providers and voice service providers shall accept calls directly from a non-gateway intermediate provider only if that non-gateway intermediate provider's filing appears in the Robocall Mitigation Database in accordance with paragraph (f) of this section, showing that the non-gateway intermediate provider affirmatively submitted the filing, and that filing has not been de-listed pursuant to an enforcement action.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 1206013412–2517–02]

RTID 0648–XD065

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; 2023 Commercial Closure for Gulf of Mexico Greater Amberjack

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements an accountability measure for commercial greater amberjack in the Gulf of Mexico (Gulf) reef fish fishery for the 2023 fishing year through this temporary rule. NMFS has determined that Gulf greater amberjack landings have exceeded the commercial annual catch target (ACT). Therefore, the commercial fishing season for greater amberjack in the Gulf exclusive economic zone (EEZ) will close on June 18, 2023, and the sector will remain closed until the start of the next commercial fishing season on January 1, 2024. This closure is necessary to protect the Gulf greater amberjack resource.

DATES: This rule is effective 12:01 a.m., local time, June 18, 2023, until 12:01 a.m., local time, January 1, 2024.

FOR FURTHER INFORMATION CONTACT: Kelli O'Donnell, NMFS Southeast Regional Office, telephone: 727–824–5305, or email: *Kelli.ODonnell@noaa.gov.*

SUPPLEMENTARY INFORMATION: NMFS manages the reef fish fishery of the Gulf, which includes greater amberjack, under the Fishery Management Plan for the Reef Fish Resources of the Gulf (FMP). The Gulf of Mexico Fishery Management Council (Council) prepared the FMP and NMFS implements the FMP under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622. All greater amberjack weights discussed in this temporary rule are in round weight.

On June 15, 2023, NMFS published the final rule implementing Amendment 54 to the FMP (88 FR 39193). Among other measures, that final rule decreased the commercial annual catch limit (ACL) and quota (commercial ACT) for Gulf greater amberjack. Effective on the date of publication of the Amendment 54 final rule, the commercial greater amberjack ACL and ACT for the 2023 fishing year are 101,000 lb (45,813 kg) and 93,930 lb (42,606 kg), respectively (50 CFR 622.41(a)(1)(iii) and 622.39(a)(1)(v)).

Under 50 CFR 622.41(a)(1)(i), NMFS is required to close the greater amberjack commercial sector when the commercial ACT is reached, or is projected to be reached, by filing a notification to that effect with the Office of the Federal Register. NMFS has determined that the commercial ACT of 93,930 lb (42,606 kg) has been exceeded. Accordingly, NMFS closes commercial harvest of greater amberjack from the Gulf EEZ effective 12:01 a.m., local time, June 18, 2023, until 12:01 a.m., local time, January 1, 2024.

During the commercial closure, the sale or purchase of greater amberjack taken from the EEZ is prohibited. The prohibition on sale or purchase does not apply to the sale or purchase of greater amberjack that were harvested, landed ashore, and sold prior to 12:01 a.m., local time, June 18, 2023, and were held in cold storage by a dealer or processor. The commercial sector for greater amberjack will re-open on January 1, 2024, the beginning of the 2024 greater amberjack commercial fishing season.

During the commercial closure, the bag and possession limits specified in 50 CFR 622.38(b)(1) apply to all harvest or possession of greater amberjack in or from the Gulf EEZ. However, for the current 2022–2023 recreational fishing year of August 1, 2022, through July 31, 2023, the recreational fishing season is closed for the remainder of the current fishing year, or through July 31, 2023. Therefore, through July 31, 2023, the bag and possession limits for greater amberjack in or from the Gulf EEZ are zero. The recreational season will reopen on August 1, 2023, the start of the next recreational fishing year.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR 622.41(a)(1), which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment is unnecessary and contrary to the public interest. Such procedures are unnecessary because the regulations associated with the closure of the greater amberjack commercial sector 50 CFR 622.41(a)(1) have already been subject to notice and public comment, and all that remains is to notify the public of the closure. Prior notice and opportunity for public comment are contrary to the public interest because there is a need to immediately implement this action to protect the greater amberjack stock. Prior notice and opportunity for public comment would require time and could result in a harvest well in excess of the commercial ACL. NMFS is required to reduce the 2024 ACT and ACL by the amount of any overage of the 2023 commercial ACL, which would reduce the 2024 fishing season.

For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 15, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Federal Register
Vol. 88, No. 118
Wednesday, June 21, 2023

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 173

[Docket No. FDA–2023–F–2319]

PHM Brands; Filing of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification of petition.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing that we have filed a petition, submitted by PHM Brands, proposing that the food additive regulation for chlorine dioxide be amended to provide for an additional method for producing the additive.

DATES: Either electronic or written comments on the petitioner's environmental assessment must be submitted by July 21, 2023.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of July 21, 2023. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2023–F–2319 for ''PHM Brands; Filing of Food Additive Petition.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' FDA will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Karen Hall, Center for Food Safety and Applied Nutrition, Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240–402–9195.

SUPPLEMENTARY INFORMATION: Under section 409(b)(5) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(b)(5)), we are giving notice that we have filed a food additive petition (FAP 2A4832), submitted by Burdock Group Consultants on behalf of PHM Brands, 730 17th Street, Denver, Colorado 80202. The petition proposes to amend the food additive regulations in § 173.300 (21 CFR 173.300; *Chlorine dioxide*) to provide for production of the additive via an electrolytic method from a brine solution containing chloride salts.

We are reviewing the potential environmental impact of this petition. To encourage public participation consistent with regulations issued under the National Environmental Policy Act (40 CFR 1501.4(b)), we are placing the environmental assessment submitted with the petition that is the subject of this notice on public display at the Dockets Management Staff (see **DATES** and **ADDRESSES**) for public review and comment.

We will also place on public display, at the Dockets Management Staff and at *https://www.regulations.gov,* any amendments to, or comments on, the petitioner's environmental assessment without further announcement in the **Federal Register**. If, based on our review, we find that an environmental impact statement is not required, and this petition results in a regulation, we will publish the notice of availability of our finding of no significant impact and the evidence supporting that finding with the regulation in the **Federal Register** in accordance with 21 CFR 25.51(b).

Dated: June 14, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–105595–23]

RIN 1545–BQ75

Elective Payment of Advanced Manufacturing Investment Credit

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations concerning the elective payment election of the advanced manufacturing investment credit under the Creating Helpful Incentives to Produce Semiconductors (CHIPS) Act of 2022. The proposed regulations describe rules for the elective payment election, including special rules applicable to partnerships and S corporations, repayment of excessive payments, and basis reduction and recapture. In addition, the proposed regulations provide rules related to an IRS pre-filing registration process that taxpayers wanting to make the elective payment election would be required to follow. These proposed regulations affect taxpayers eligible to make the elective payment election of the advanced manufacturing investment tax credit in a taxable year. This document also provides notice of a public hearing on the proposed regulations.

DATES: Written or electronic comments must be received by August 14, 2023. The public hearing on these proposed regulations is scheduled to be held on August 24, 2023, at 10 a.m. ET. Requests to speak and outlines of topics to be discussed at the public hearing must be received by August 14, 2023. If no outlines are received by August 14, 2023, the public hearing will be cancelled. Requests to attend the public hearing must be received by 5 p.m. ET on August 22, 2023. The public hearing will be made accessible to people with disabilities. Requests for special assistance during the hearing must be received by August 21, 2023.

ADDRESSES: Commenters are strongly encouraged to submit public comments electronically. Submit electronic submissions via the Federal eRulemaking Portal at *https://www.regulations.gov* (indicate IRS and REG–105595–23) by following the online instructions for submitting comments. Once submitted to the Federal eRulemaking Portal, comments cannot be edited or withdrawn. The Department of the Treasury (Treasury Department) and the IRS will publish for public availability any comments submitted electronically and comments submitted on paper to its public docket. Send hard copy submissions to: CC:PA:LPD:PR (REG–105595–23), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Concerning this proposed regulation, Lani M. Sinfield at (202) 317–5871 (not a toll-free number); concerning submissions of comments and or the public hearing, Vivian Hayes at (202) 317–6901 (not a toll-free number) or by email to *publichearings@irs.gov* (preferred).

SUPPLEMENTARY INFORMATION:

Background

Section 48D was added to the Internal Revenue Code (Code) on August 9, 2022, by section 107(a) of the CHIPS Act of 2022 (CHIPS Act), which was enacted as Division A of the CHIPS and Science Act of 2022, Public Law 117–167, 136 Stat. 1366, 1393. Section 48D established the advanced manufacturing investment credit (section 48D credit) and section 48D(d) allows taxpayers (other than partnerships and S corporations) to elect to treat the amount of the section 48D credit determined under section 48D(a) as a payment against their Federal income tax liabilities. Section 48D(d) also provides special rules relating to elective payments to partnerships and S corporations and directs the Secretary of the Treasury or her delegate (Secretary) to provide rules for making elections under section 48D and to require information or registration necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under section 48D. Section 48D applies to qualified property placed in service after December 31, 2022, and, for any property the construction of which began prior to January 1, 2023, only to the extent of the basis thereof attributable to the construction, reconstruction, or erection of such qualified property after August 9, 2022 (the date of enactment of the CHIPS Act). See section 107(f)(1) of the CHIPS Act.

On March 23, 2023, the Treasury Department and the IRS published in the **Federal Register** (88 FR 17451) a notice of proposed rulemaking (REG–120653–22), which contains proposed regulations to implement the general provisions relating to the section 48D credit (March 2023 proposed regulations). The March 2023 proposed regulations included proposed definitions of various statutory terms, including ''eligible taxpayer,'' ''qualified property,'' ''advanced manufacturing facility,'' and ''semiconductor.'' The March 2023 proposed regulations also proposed rules under section 48D regarding the beginning of construction requirement; proposed rules requiring pre-filing registration with the IRS in advance of filing an elective payment election; and proposed rules implementing the ''applicable transaction'' credit recapture rules under section 50(a)(3) of the Code. In addition, the March 2023 proposed regulations requested comments on potential issues with respect to the elective payment election provisions under section 48D(d) that may require guidance. This document contains proposed amendments to the Income Tax Regulations (26 CFR part 1) to implement the statutory provisions of section 48D(d) and revise the rules in proposed § 1.48D–6 of the March 2023 proposed regulations.

In the Rules and Regulations section of this issue of the **Federal Register**, the Treasury Department and the IRS are issuing temporary regulations under § 1.48D–6T that implement the pre-filing registration process described in proposed § 1.48D–6 of the proposed regulations. The temporary regulations require taxpayers that want to elect the elective payment of the section 48D credit to register with the IRS through an IRS electronic portal in advance of the taxpayer filing the return on which the election under section 48D is made.

I. Overview of Elective Payment Election Under Section 48D

Section 48D(d)(1) allows a taxpayer to elect to treat the section 48D credit determined for the taxpayer for a taxable year as a payment against the tax imposed by subtitle A of the Code (that is, treated as a payment of Federal income tax) equal to the amount of the credit rather than a credit against the taxpayer's Federal income tax liability for that taxable year (elective payment election).

II. Section 48D Rules for Partnerships and S Corporations

Section 48D(d)(2)(A) provides special rules for partnerships (as defined in section 761(a)) and for S corporations (as defined in section 1361(a)(1) of the Code). Section 48D(d)(2)(A)(i) provides that, in the case of any credit determined with respect to any property held directly by a partnership or S corporation, any election under section 48D(d)(1) is to be made by such partnership or S corporation and must be made in such manner as the Secretary may provide. If such partnership or S corporation makes an election under section 48D(d)(1), (1) the Secretary will make a payment to such partnership or S corporation equal to the amount of such credit, (2) section 48D(d)(3) is applied with respect to the credit before determining any partner's distributive share, or S corporation shareholder's pro rata share, of such credit, (3) any credit amount with respect to which the election in section 48D(d)(1) is made is treated as tax exempt income for purposes of sections 705 and 1366 of the Code, and (4) a partner's distributive share of such tax exempt income is based on such partner's distributive share of the otherwise applicable credit for each taxable year.

III. Special Rules

Section 48D(d)(2)(B) requires the elective payment election to be made no later than the due date (including extensions of time) of the tax return for the taxable year for which the election is made. The elective payment election is irrevocable once made and applies with respect to any credit for the taxable year for which the election is made.

Section 48D(d)(2)(E) provides that, as a condition of, and prior to, any amount between treated as a payment by or to the taxpayer, the Secretary may require such information or registration as the Secretary deems necessary or appropriate for purposes of preventing duplication, fraud, improper payments, or excessive payments.

Section 48D(d)(2)(F) provides rules relating to excessive payments. In the case of any amount treated as a payment which is made by the taxpayer under section 48D(d)(1), or the amount of the payment made pursuant to section 48D(d)(2)(A), that the Secretary determines constitutes an excessive payment, the tax imposed on such taxpayer by chapter 1 of the Code, for the taxable year in which such determination is made must be increased by an amount equal to the sum of (1) the amount of any payment treated as made by or to the taxpayer which the Secretary determines constitutes an excessive payment, (2) plus 20 percent of such excessive payment. The increase equal to 20 percent of the excessive payment does not apply if the taxpayer demonstrates to the satisfaction of the Secretary that the excessive payment resulted from reasonable cause.

Section 48D(d)(2)(F)(iii) defines ''excessive payment'' as, with respect to property for which an elective payment election is made for any taxable year, an amount equal to the excess of (I) the amount treated as a payment made by the taxpayer under section 48D(d)(1) or the amount of the payment made pursuant to section 48D(d)(2)(A)(i) over (II) the amount of the credit which, without application of section 48D(d), would be otherwise allowable under section 48D(a) (determined without regard to section 38(c)) with respect to such property for such taxable year.

Section 48D(d)(3) provides a denial of double benefit rule. It states that, in the case of a taxpayer making an elective payment election with respect to the credit determined under section 48D(a), such credit is reduced to zero and is deemed to have been allowed to the taxpayer for such taxable year for any other purposes under the Code.

Section 48D(d)(5) provides basis reduction and recapture rules. It states that rules similar to the rules of section 50(a) and (c) of the Code apply with respect to amounts treated as a payment made by a taxpayer under section 48D(d)(1) and any payment made pursuant to section 48D(d)(2)(A).

Section 48D(d)(6) authorizes the Secretary to issue regulations or other guidance determined to be necessary or appropriate to carry out the elective payment election provisions of section 48D(d), including (A) regulations or other guidance providing rules for determining a partner's distributive share of the tax exempt income described in section 48D(d)(2)(A)(i) and (B) guidance to ensure that the amount treated as a payment under section 48D(d)(1) or payment made under section 48D(d)(2)(A)(i) is commensurate with the amount of the section 48D credit that generally would be otherwise allowable (determined without regard to section 38(c) of the Code).

Explanation of Provisions

I. Rules for Making Elective Payment Elections

A. In General

These proposed regulations revise § 1.48D–6(a)(1) and (2) of the March 2023 proposed regulations to clarify that an elective payment election may only be made on an original return of tax filed not later than the due date (including extensions of time) for the return for the taxable year for which the section 48D credit is determined and in the manner as provided in guidance, and must include any required completed source credit form(s) with respect to the qualified property, a completed Form 3800, *General Business Credit,* and any additional information, including supporting calculations, required in instructions to the relevant forms. An original return would include a superseding return filed on or before the due date (including extensions). No elective payment election would be permitted to be made or revised on an amended return or by filing an administrative adjustment request under section 6227 of the Code. There also would be no relief available under §§ 301.9100–1 through 301.9100–3 of the Procedure and Administration Regulations (26 CFR part 301) for an elective payment election that is not timely filed.

These proposed regulations would further provide that a taxpayer makes the elective payment election with respect to any section 48D credit determined with respect to such taxpayer in accordance with section 48D(d)(1), and the taxpayer must include a statement with the election attesting under penalties of perjury that the taxpayer claiming to be an eligible taxpayer is not a foreign entity of concern and has not made an applicable transaction during the taxable year that the qualified property is placed in service, and will not claim a double benefit (within the meaning of section 48D(d)(3) and § 1.48–6(d)(2)(ii)(B), (C), and (e)) with respect to any elective payment election made by the taxpayer.

II. Denial of Double Benefit

These proposed regulations revise § 1.48D–6(a)(4) of the March 2023 proposed regulations by explaining the application of the section 48D(d)(3) denial of a double benefit rule and addressing the methodology for

determining the amount of an elective payment, reducing the section 48D credit amount to zero, and treating the section 48D credit as a credit allowed for the taxable year for all other purposes of the Code with respect to taxpayers other than partnerships or S corporations. The proposed application of the denial of a double benefit rule is redesignated as proposed § 1.48D–6(e). The methodology with respect to a payment made to a partnership or S corporation is provided in proposed § 1.48D–6(d)(2)(ii)(B), as described in part III of this Explanation of Provisions.

A taxpayer (other than a partnership or S corporation) making an elective payment election applies section 48D(d)(3) by taking the following steps. First, the taxpayer would compute the amount of the tax liability (if any) for the taxable year, without regard to general business credits (GBCs), that is payable on the due date of the tax return (without regard to extensions), and the amount of the Federal income tax liability that may be offset by GBCs pursuant to the limitation based on the amount of tax under section 38 (Step 1). Second, the taxpayer would compute the allowed amount of the GBCs carryforwards carried to the taxable year plus the amount of current year GBCs (including the section 48D credit) allowed for the taxable year under section 38 (that is, in accordance with all the rules in section 38, including the ordering rules provided in section 38(d)). Since the election would be required to be made on an original return filed before the due date (including extensions of time) for the taxable year for which the section 48D credit is determined, any GBC carryback would not be considered when determining the elective payment amount for the taxable year (Step 2). Third, the taxpayer would apply the GBCs allowed for the taxable year as computed in Step 2, including those attributable to the section 48D credit as GBCs, against the tax liability computed in Step 1. Fourth, the taxpayer would identify the amount of any excess or unused current year GBC, as defined under section 39, attributable to current year section 48D credit(s) for which the taxpayer is making an elective payment election. The amount of such unused section 48D credits would be treated as a payment against the tax imposed by subtitle A for the taxable year with respect to which such credits are determined (rather than having them available for carryback or carryover) (net elective payment amount) (Step 4). Fifth, the taxpayer would reduce the section 48D credit(s) for which an elective payment election is made by the amount (if any) allowed as a general business credit under section 38 for the taxable year, as provided in Step 3, and by the net elective payment amount (if any) that is treated as a payment against tax, as provided in Step 4, which results in the section 48D credit(s) being reduced to zero.

The proposed regulations would provide, consistent with section 48D(d)(3), that the full amount of the section 48D credits for which an elective payment election is made is deemed to have been allowed for all other purposes of the Code, including, but not limited to, the basis reduction and recapture rules imposed by section 50 and the calculation of any underpayment of estimated taxes under sections 6654 and 6655 of the Code.

The Treasury Department and the IRS request comments on whether future guidance should expand or clarify the methodology that a taxpayer follows to compute the amount of its elective payment. Comments are also requested on additional Code sections under which it may be necessary to consider the section 48D credit to have been deemed to have been allowed for the taxable year in which an elective payment election is made.

III. Partnership and S Corporations

A. Overview

Section 48D(d)(2)(A)(i) provides that, in the case of any credit determined with respect to any property held directly by a partnership or S corporation, any election under section 48D(d)(1) is to be made by such partnership or S corporation and must be made in such manner as the Secretary may provide. If such partnership or S corporation makes an election under section 48D(d)(1), the special rules of section 48D(d)(2)(A)(i)(I) through (IV) apply. In that regard, proposed § 1.48D–6(d)(2)(ii) would provide that (1) the IRS will make a payment to such partnership or S corporation equal to the amount of such credit; (2) before determining any partner's distributive share, or shareholder's pro rata share, of such credit, such credit is reduced to zero and is, for any other purposes under the Code, deemed to have been allowed solely to such entity (and not allocated by such entity, or otherwise allowed, to any partner or shareholder) for such taxable year; (3) any amount with respect to which the election under section 48D(d)(1) is made is treated as tax exempt income for purposes of sections 705 and 1366; and (4) a partner's distributive share of such tax exempt income is equal to such partner's distributive share of its otherwise allocable basis in the qualified property as determined under § 1.48D–2(h)(2)(i) for such year. The tax exempt income is taken into account by the partnership or S corporation at the same time as the underlying credit would have been taken into account by the partnership or S corporation absent an elective payment election. Such tax exempt income resulting from such election is treated as received or accrued, including for purposes of sections 705 and 1366 of the Code, as of the date the qualified property is placed in service with respect to the partnership or S corporation. The proposed regulations provide an example illustrating this rule. Because it is the section 48D credits, and not the tax exempt income, that arise from the conduct of the trade or business, the proposed regulations would treat the tax exempt income resulting from an elective payment election by a partnership or an S corporation as arising from an investment activity and not from the conduct of a trade or business within the meaning of section 469(c)(1)(A). As such, the tax exempt income would not be treated as passive income to any partners or shareholders who do not materially participate within the meaning of section 469(c)(1)(B).

In response to stakeholder comments, the Treasury Department and the IRS clarify here that there are no restrictions imposed under section 48D or the section 48D regulations on how a partnership or S corporation that receives a payment from the IRS pursuant to an elective payment election may use the cash payment in its operations (including when it makes distributions to its distributions to its partners or shareholders).

Section 48D(d)(6)(B) requires that the Secretary issue regulations or other guidance to ensure that the amount of a payment under section 48(D)(2)(A)(i)(I) to a partnership or S corporation is commensurate with the amount of the credit that would otherwise be allowable (without regard to section 38(c)). Therefore, proposed § 1.48D–6(d)(6) would provide that, in determining the section 48D credit amount that will result in a payment to a partnership or S corporation, the partnership or S corporation must compute the amount of the section 48D credit allowable (without regard to section 38(c)) as if an elective payment election were not made. Because a partnership or S corporation is not subject to section 469 (that is, section 469 applies at the partner or shareholder

level), the amount of the credit determined with respect to any qualified property owned by a partnership or S corporation is not subject to limitation by section 469.

However, section 49 generally impacts the amount of a credit determined with respect to a qualified property. Proposed § 1.48D–6(d)(6)(ii) provides rules for the application of section 49 to a partnership or S corporation. The proposed regulations would provide that any amount of section 48D credit determined with respect to the qualified property held directly by a partnership or S corporation must be determined by the partnership or S corporation taking into account the section 49 at-risk rules at the partner or shareholder level as of the close of the taxable year in which the qualified property is placed in service. Thus, if the credit base of the qualified property is limited to a partner or shareholder by section 49, then the amount of the section 48D credit determined by the partnership or S corporation is also limited. The proposed regulations would provide that a partnership or S corporation that makes an elective payment election must request from each of its partners or shareholders, respectively, that is subject to section 49, the amount of such partner's or shareholder's nonqualified nonrecourse financing with respect to the qualified property as of the close of the taxable year in which the property is placed in service. Additionally, the partnership or S corporation would attach to its tax return for the taxable year in which the property is placed in service, the amount of each partner's or shareholder's section 49 limitation with respect to the qualified property. The Treasury Department and the IRS request comments as to whether (1) any information or reporting requirements are needed for partnerships and S corporations to apply these rules when determining the amount of the section 48D credit for which an elective payment election can be made by a partnership or S corporation or (2) any additional clarifications are needed regarding how the at-risk rules apply to the determination of the section 48D credit by a taxpayer.

B. BBA Partnership

Many partnerships are subject to the centralized partnership audit regime found in subchapter C of chapter 63 of the Code as amended by the Bipartisan Budget Act of 2015 (BBA).[1] In connection with the implementation of section 48D, the Treasury Department and the IRS identified several areas of the BBA regulations that require updates to administer section 48D in the case of a partnership subject to the BBA (BBA partnership). Section 6221 of the Code provides that any adjustment to a partnership-related item with respect to a BBA partnership, and any tax attributable thereto, is assessed and collected at the partnership-level except to the extent provided under the BBA. The BBA outlines centralized audit procedures which generally must be followed before the IRS can adjust a partnership-related item (as defined in § 301.6241–1). Accordingly, the notice of proposed rulemaking (REG–101607–23) found in the Proposed Rules of this issue of the **Federal Register**, which primarily relates to proposed rules under section 6417, would add a new paragraph (j) to § 301.6241–7 to provide that an election by a BBA partnership under section 48D(d) can be adjusted outside of the BBA audit rules. Proposed § 1.48D–6(d)(7) would cross-reference to proposed § 301.6241–7(j) for rules applicable to payments made to BBA partnerships.

IV. Pre-Filing Registration Requirements and Additional Information

Proposed § 1.48D–6(b)(1) would provide the mandatory pre-filing registration process that, except as provided in guidance, a taxpayer must complete as a condition of, and prior to, any amount being treated as a payment against the tax imposed under § 1.48D–6(a)(1), or an amount paid to a partnership or S corporation pursuant to § 1.48D–6(d)(2)(ii)(A). A taxpayer would be required to use the pre-filing registration process to register each qualified investment in an advanced manufacturing facility. A taxpayer that does not obtain a registration number or report the registration number on its annual tax return with respect to an advanced manufacturing facility would be ineligible to receive any elective payment amount with respect to the amount of any section 48D credit determined with respect to that advanced manufacturing facility. However, completion of the pre-filing registration requirements and receipt of a registration number would not, by itself, mean that the taxpayer would be eligible to receive a payment with respect to the section 48D credits determined with respect to the advanced manufacturing facility.

The pre-filing registration requirements are proposed to be that a taxpayer:

(1) must complete the registration process electronically through the IRS electronic portal and in accordance with the instructions provided therein, unless otherwise provided in guidance;

(2) must satisfy the registration requirements and receive a registration number prior to making a section 48D(d)(1) elective payment election on the taxpayer's tax return for the taxable year at issue;

(3) is required to obtain a registration number for each qualified investment in an advanced manufacturing facility with respect to which a section 48D credit will be determined and for which the taxpayer wishes to make a section 48D(d)(1) elective payment election; and

(4) provide the specific information required to be provided as part of the pre-filing registration process. The provision of such information, which includes information about the taxpayer and about the qualified investment in an advanced manufacturing facility that would allow the IRS to prevent duplication, fraud, improper payments, or excessive payments under section 48D. For example, verifying information about the taxpayer would allow the IRS to mitigate the risk of fraud or improper payments to entities that are not eligible taxpayers. Information about the taxpayer's taxable year would allow the IRS to ensure that an elective payment election is timely made on the entity's annual tax return. Information about the advanced manufacturing facility, including its address and coordinates (longitude and latitude), supporting documentation, beginning of construction date, and placed in service date would allow the IRS to mitigate the risk of duplication, fraud, and improper payments for properties that are not advanced manufacturing facilities.

Proposed § 1.48D–6(b)(7)(i) provides that, after a taxpayer completes pre-filing registration with respect to each qualified investment in an advanced manufacturing facility with respect to which the taxpayer intends to elect a section 48D(d) elective payment election for the taxable year, the IRS will review the information provided and will issue a separate registration number for each qualified investment for which the taxpayer provided sufficient verifiable information.

Proposed § 1.48D–6(b)(7)(ii) would provide that a registration number is valid only for the taxable year for which it is obtained. Proposed § 1.48D–6(c)(7)(iii) would provide that, if an

[1] See section 1101 of the BBA, Public Law 114–74, 129 Stat. 584, 625–638 (2015), as amended by section 411 of the Protecting Americans from Tax Hikes Act of 2015, Public Law 114–113, 129 Stat. 2242, 3121 (2015), and sections 201 through 207 of the Tax Technical Corrections Act of 2018, Public Law 115–141, 132 Stat. 348, 1171–1183 (2018).

elective payment election will be made with respect to qualified investment in an advanced manufacturing facility for a taxable year for which a registration number under this section has been obtained for a prior taxable year, the taxpayer must renew the registration each subsequent year in accordance with applicable guidance, including attesting that all the facts previously provided are still correct or updating any facts that are relevant in calculating the amount of the section 48D credit. Proposed § 1.48D–6(b)(7)(iv) would provide that, if facts change with respect to the qualified investment in an advanced manufacturing facility for which a registration number has been previously obtained, the taxpayer must amend the registration to reflect these new facts. The regulations would provide, for example, that if the facility previously registered for an elective payment election undergoes a change of ownership (incident to a corporate reorganization or an asset sale) such that the new owner has a different employer identification number (EIN) than the owner who obtained the original registration, the original owner would be required to amend the original registration to disassociate its EIN from the advanced manufacturing facility and the new owner must submit an original registration (or if the new owner previously registered other advanced manufacturing facilities, must amend its original registration) to associate the new owner's EIN with the previously registered advanced manufacturing facility.

Lastly, proposed § 1.48D–6(b)(7)(v) would provide that the taxpayer would be required to include the registration number of the advanced manufacturing facility on the taxpayer's annual return for the taxable year for an election under proposed § 1.48D–6(a)(1). The IRS will treat an elective payment election as ineffective with respect to any section 48D credit determined with respect to the advanced manufacturing facility for which the taxpayer does not include a valid registration number on the annual tax return.

The corresponding temporary regulations under § 1.48D–6T(b) published in the Rules and Regulations section of this edition of the **Federal Register**, which are identical to those that would apply under proposed § 1.48D–6(b), apply to taxable years ending on or after June 21, 2023 and expire on June 12, 2026.

V. Special Rules

These proposed regulations amend the proposed rules relating to excessive payment and basis reduction and recapture under REG–120653–22 by adding examples of excessive payment, clarifying the basis reduction and recapture notice requirement and renumbering the affected paragraphs as § 1.48D–6(f) and (g), respectively.

A. Excessive Payment

Proposed § 1.48D–6(f)(4) provides an example of excessive payment, including the year in which the tax is imposed and the calculation of the additional 20 percent tax. The Treasury Department and the IRS request comments on whether additional guidance on excessive payments is needed.

B. Basis Reduction and Recapture

Proposed § 1.48D–6(g)(1) would provide that rules similar to the rules of section 50(a) and (c) apply for purposes of section 48D. Proposed § 1.48D–6(g)(2)(i) provides that the adjusted basis of property generally must be reduced by the amount of the section 48D credit determined with respect to property for which the taxpayer has made an election under section 48D(d)(1). Proposed § 1.48D–6(g)(2)(ii) would provide a similar basis reduction rule for partnerships or S corporations making an election under section 48D(d)(1). Proposed § 1.48D–6(g)(2)(iii) would clarify the application of the basis adjustment rule under section 50(c)(5) to take into account adjustments made under proposed § 1.48D–6(e)(2)(ii) for partners and S corporation shareholders of such partnerships or S corporations.

Proposed § 1.48D–6(g)(3) would clarify that any reporting of recapture is made on the taxpayer's annual return in the manner prescribed by the IRS in any guidance. In addition, the excessive payment rules operate separately from the recapture rules. The excessive payment rules apply where the credit amount reported on the original credit source form by the taxpayer was excessive. Recapture of a tax credit occurs when the original tax credit reported would have been correct without the occurrence of a subsequent recapture event. Thus, recapture events under section 50(a) do not result in an excessive payment.

Proposed Applicability Dates

Proposed § 1.48D–6 is proposed to apply to taxable years ending on or after the date the Treasury decision adopting these regulations as final regulations is published in the **Federal Register**. Taxpayers may rely on these proposed regulations for elective payments of section 48D credit amounts after December 31, 2022, in taxable years ending before the date the Treasury decision adopting these regulations as final regulations is published in the **Federal Register**, provided the taxpayers follow the proposed regulations in their entirety and in a consistent manner with respect to all elections made under section 48D(d).

Special Analyses

I. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) (''PRA'') generally requires that a Federal agency obtain the approval of the Office of Management and Budget (OMB) before collecting information from the public, whether such collection of information is mandatory, voluntary, or required to obtain or retain a benefit. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

The collections of information in these proposed regulations contain reporting and recordkeeping requirements. The recordkeeping requirements mentioned within these proposed regulations are considered general tax records under § 1.6001–1(e). These records are required for the IRS to validate that taxpayers have met the regulatory requirements and are entitled to make an elective payment election. For PRA purposes, general tax records are already approved by OMB under 1545–0074 for individuals and 1545–0123 for business entities.

These proposed regulations also mention reporting requirements related to making elections as detailed in § 1.48D–6. These elections will be made by eligible taxpayers as part of filing a return (such as the appropriate Form 1040, Form 1120, Form 1120–S, or Form 1065), including filling out the relevant source credit form and completing the Form 3800. These forms are approved under 1545–0074 for individuals and 1545–0123 for business entities.

These proposed regulations also describe recapture procedures as detailed in proposed § 1.48D–6 that are required by section 48D(d)(5). The reporting of a recapture event will still be required to be reported using Form 4255, Recapture of Investment Credit. This form is approved under 1545–0074 for individuals and 1545–0123 for business entities. These proposed regulations are not changing or creating new collection requirements for recapture not already approved by OMB.

These proposed regulations mention the reporting requirements to complete

pre-filing registration with the IRS to be able to make an elective payment election in proposed § 1.48D–6. For further information concerning the registration and where to submit comments on the collection of information and the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the preamble to the corresponding temporary regulations (T.D. 9975) published in the Rules and Regulations section of this issue of the **Federal Register**. For burden estimates associated with the pre-filing registration requirement as detailed in proposed § 1.48D–6, see the preamble to the corresponding temporary regulations. These proposed regulations are not changing or creating new collection requirements beyond the requirements that are being reviewed and approved by OMB under the temporary regulations.

II. Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that these proposed regulations will not have a significant economic impact on a substantial number of small entities. Although these temporary regulations may affect small entities, data are not readily available about the number of small entities affected. The economic impact of these proposed regulations is not likely to be significant. Section 1.48D–6T(b) implements the statutory authority granted by section 48D(d)(2)(E) that authorizes the IRS to require such information or registration as the Secretary deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments. These proposed regulations will assist small entities wanting to make the elective payment election under section 48D(d). Notwithstanding this certification, the Treasury Department and the IRS welcome comments on the impact of these temporary regulations on small entities.

III. Section 7805(f)

Pursuant to section 7805(f), these proposed regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

IV. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandate Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a State, local, or Tribal government, in the aggregate, or by the private sector, of $100 million in 1995 dollars (updated annually for inflation). These proposed regulations do not include any Federal mandate that may result in expenditures by State, local, or Tribal governments, or by the private sector in excess of that threshold.

V. Executive Order 13132: Federalism

Executive Order 13132 (Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State and local governments, and is not required by statute, or preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. These proposed regulations do not have federalism implications and do not impose substantial, direct compliance costs on State and local governments or preempt State law within the meaning of the Executive order.

VII. Regulatory Planning and Review

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under Executive Order 12866 (June 9, 2023), tax regulatory actions issued by the IRS are not subject to the requirements of section 6 of Executive Order 12866, as amended. Therefore, a regulatory impact assessment is not required.

Comments and Public Hearing

Before these proposed amendments to the regulations are adopted as final regulations, consideration will be given to comments that are submitted timely to the IRS as prescribed in this preamble under the **ADDRESSES** section. The Treasury Department and the IRS request comments on all aspects of the proposed regulations. All comments will be made available at *www.regulations.gov* or upon request. Once submitted to the Federal eRulemaking Portal, comments cannot be edited or withdrawn.

Announcement 2023–16, 2023–20 I.R.B. 854 (May 15, 2023), provides that public hearings will be conducted in person, although the IRS will continue to provide a telephonic option for individuals who wish to attend or testify at a hearing by telephone. Any telephonic hearing will be made accessible to people with disabilities.

A public hearing has been scheduled for August 24, 2023, beginning at 10 a.m. ET, in the Auditorium at the Internal Revenue Building, 1111 Constitution Avenue NW, Washington, DC, unless no outlines are received by August 14, 2023. Due to building security procedures, visitors must enter at the Constitution Avenue entrance. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 30 minutes before the hearing starts.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons who wish to comment by telephone at the hearing must submit written or electronic comments and an outline of the topics to be discussed as well as the time to be devoted to each topic by August 14, 2023, as prescribed in the preamble under the **ADDRESSES** section. If no outline of the topics to be discussed at the hearing is received by August 14, 2023, the public hearing will be cancelled. If the public hearing is cancelled, a notice of cancellation of the public hearing will be published in the **Federal Register**.

A period of ten minutes will be allocated to each person for making comments. After the deadline for receiving outlines has passed, the IRS will prepare an agenda containing the schedule of speakers. Copies of the agenda will be made available: (1) at the hearing, (2) at *https://www.regulations.gov,* search IRS and REG–105595–23, or (3) by emailing a request to *publichearings@irs.gov.* Please put ''REG–105595–23 Agenda Request'' in the subject line of the email.

Individuals who want to testify in person at the public hearing must send an email to *publichearings@irs.gov* to have your name added to the building access list. The subject line of the email must contain the regulation number REG–105595–23 and the language TESTIFY In Person. For example, the subject line may say: Request to TESTIFY In Person at Hearing for REG–105595–23.

Individuals who want to testify by telephone at the public hearing must send an email to *publichearings@irs.gov* to receive the telephone number and access code for the hearing. The subject line of the email must contain the regulation number REG–105595–23 and the language TESTIFY Telephonically. For example, the subject line may say: Request to TESTIFY Telephonically at Hearing for REG–105595–23.

Individuals who want to attend the public hearing in person without testifying must also send an email to *publichearings@irs.gov* to have your name added to the building access list. The subject line of the email must contain the regulation number REG–105595–23 and the language ATTEND

In Person. For example, the subject line may say: Request to ATTEND Hearing In Person for REG–105595–23. Requests to attend the public hearing must be received by 5 p.m. EST on August 22, 2023.

Individuals who want to attend the public hearing by telephone without testifying must also send an email to *publichearings@irs.gov* to receive the telephone number and access code for the hearing. The subject line of the email must contain the regulation number REG–105595–23 and the language ATTEND Hearing Telephonically. For example, the subject line may say: Request to ATTEND Hearing Telephonically for REG–105595–23. Requests to attend the public hearing must be received by 5 p.m. EST on August 22, 2023.

Hearings will be made accessible to people with disabilities. To request special assistance during a hearing please contact the Publications and Regulations Branch of the Office of Associate Chief Counsel (Procedure and Administration) by sending an email to *publichearings@irs.gov* (preferred) or by telephone at (202) 317–6901 (not a toll-free number) at least August 21, 2023.

Statement of Availability of IRS Documents

Guidance cited in this preamble is published in the Internal Revenue Bulletin and is available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at *https://www.irs.gov.*

Drafting Information

The principal author of this proposed regulation is Lani M. Sinfield, Office of the Associate Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, the Treasury Department and the IRS propose to amend 26 CFR part 1 as follows:

PART 1—INCOME TAXES

■ **Paragraph. 1.** The authority citation for part 1 is amended by adding an entry for § 1.48D–6 in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.48D–6 also issued under 26 U.S.C. 48D(d)(6).

* * * * *

■ **Par. 2.** Section 1.48D–6, as proposed to be added by 88 FR 17451, March 23, 2023, is revised to read as follows:

§ 1.48D–6 Elective payment election.

(a) *Elective payment election*—(1) *In general.* A taxpayer, after successfully completing the pre-filing registration requirements under paragraph (b) of this section, may make an elective payment election with respect to any section 48D credit determined with respect to such taxpayer in accordance with section 48D(d)(1) of the Internal Revenue Code (Code) and this section. A taxpayer, other than a partnership or S corporation, that makes an elective payment election in the manner provided in paragraph (c) of this section will be treated as making a payment against the Federal income taxes imposed by subtitle A of the Code (subtitle A) for the taxable year with respect to which a section 48D credit is determined equal to the amount of the section 48D credit with respect to any qualified property otherwise allowable to the taxpayer (determined without regard to section 38(c) of the Code). The payment described in section 48D(d)(1) and this paragraph (a)(1) will be treated as made on the later of the due date (determined without regard to extensions) of the return of tax imposed by subtitle A for the taxable year or the date on which such return is filed.

(2) *Partnerships and S corporations.* See paragraph (d) of this section for special rules regarding elective payment elections under section 48D(d) applicable to partnerships and S corporations.

(3) *Irrevocable.* Any election under section 48D(d)(1) and this section, once made, will be irrevocable and, except as otherwise provided, will apply with respect to any amount of section 48D credit for the taxable year for which the election is made.

(b) *Pre-filing registration required*—(1) *In general.* Pre-filing registration by any taxpayer (including a partnership or an S corporation) in accordance with this paragraph (b) is a condition that must be successfully completed prior to making an elective payment election under section 48D(d)(1) and this section with respect to qualified property placed in service by the taxpayer as part of an advanced manufacturing facility of an eligible taxpayer. An elective payment election will not be effective with respect to the section 48D credit determined with respect to any such qualified property placed in service by any taxpayer unless the taxpayer received a valid registration number for the taxpayer's qualified investment in the advanced manufacturing facility of an eligible taxpayer in accordance with this paragraph (b) and provided the registration number for each qualified investment in each advanced manufacturing facility on its Form 3800, *General Business Credit,* attached to the tax return in accordance with guidance. For purposes of this section, the term *guidance* means guidance published in the **Federal Register** or Internal Revenue Bulletin, as well as administrative guidance such as forms, instructions, publications, or other guidance on the *IRS.gov* website. See §§ 601.601 and 601.602 of this chapter. However, completion of the pre-filing registration requirements and receipt of a registration number does not, by itself, mean the taxpayer is eligible to receive a payment with respect to any section 48D credit determined with respect to the qualified property.

(2) *Manner of registration.* Unless otherwise provided in guidance, a taxpayer must complete the pre-filing registration process electronically through the IRS electronic portal and in accordance with the instructions provided therein.

(3) *Members of a consolidated group.* A member of a consolidated group is required to complete pre-filing registration as a condition of, and prior to, making an elective payment election. See § 1.1502–77 (providing rules regarding the status of the common parent as agent for its members).

(4) *Timing of pre-filing registration.* A taxpayer must satisfy the pre-filing registration requirements of this paragraph (b) and receive a registration number under paragraph (b)(6) of this section prior to making any elective payment election under this section on the taxpayer's tax return for the taxable year at issue.

(5) *Each qualified investment in an advanced manufacturing facility must have its own registration number.* A taxpayer must obtain a registration number for each qualified investment in an advanced manufacturing facility of an eligible taxpayer with respect to which an elective payment election is made.

(6) *Information required to complete the pre-filing registration process.* Unless modified in future guidance, a taxpayer must provide the following information to the IRS to complete the pre-filing registration process:

(i) The taxpayer's general information, including its name, address, taxpayer identification number, and type of legal entity;

(ii) Any additional information required by the IRS electronic portal;

(iii) The taxpayer's taxable year, as determined under section 441 of the Code;

(iv) The type of annual return(s) normally filed by the taxpayer with the IRS;

(v) A list of each qualified investment in an advanced manufacturing facility that the taxpayer intends to use to determine a section 48D credit for which the taxpayer intends to make an elective payment election;

(vi) For each qualified investment in an advanced manufacturing facility listed in paragraph (b)(6)(v) of this section, any further information required by the IRS electronic portal, such as:

(A) The type of qualified investment in the advanced manufacturing facility;

(B) Physical location (that is, address and coordinates (longitude and latitude) of the advanced manufacturing facility);

(C) Any supporting documentation relating to the construction, reconstruction or acquisition of the advanced manufacturing facility (such as, State and local government permits to operate the advanced manufacturing facility, certifications, and evidence of ownership that ties to the land deed, lease, or other documented right to use and access any land upon which the advanced manufacturing facility is constructed or housed);

(D) The beginning of construction date and the placed in service date of any qualified property that is part of the advanced manufacturing facility;

(E) The source of funds the taxpayer used to acquire the qualified property with respect to which the qualified investment was made; and

(F) Any other information that the taxpayer or entity believes will help the IRS evaluate the registration request;

(vii) The name of a contact person for the taxpayer. The contact person is the person whom the IRS may contact if there is an issue with the registration. The contact person must either:

(A) Possess legal authority to bind the taxpayer; or

(B) Must provide a properly executed power of attorney on Form 2848, *Power of Attorney and Declaration of Representative;*

(viii) A penalties of perjury statement, effective for all information submitted as a complete application, and signed by a person with personal knowledge of the relevant facts that is authorized to bind the registrant; and

(ix) Any other information the IRS deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under this section that is provided in guidance.

(7) *Registration number*—(i) *In general.* The IRS will review the information provided and will issue a separate registration number for each qualified investment in an advanced manufacturing facility of an eligible taxpayer for which the taxpayer making the registration provided sufficient verifiable information.

(ii) *Registration number is only valid for one year.* A registration number is valid only with respect to the taxpayer that obtained the registration number under this section and only for the taxable year for which it is obtained.

(iii) *Renewing registration numbers.* If an elective payment election will be made with respect to any section 48D credit determined with respect to a qualified investment in an advanced manufacturing facility for a taxable year after a registration number under this section has been obtained, the taxpayer must renew the registration for that subsequent year in accordance with applicable guidance, including attesting that all the facts previously provided are still correct or updating any facts.

(iv) *Amendment of previously submitted registration information if a change occurs before the registration number is used.* As provided in instructions to the pre-filing registration portal, if specified changes occur with respect to a qualified investment in an advanced manufacturing facility for which a registration number has been previously obtained, a taxpayer must amend the registration (or may need to submit a new registration) to reflect these new facts. For example, if an eligible taxpayer that is the owner of an advanced manufacturing facility previously registered for an elective payment election for a section 48D credit determined with respect to that advanced manufacturing facility and the advanced manufacturing facility undergoes a change of ownership (incident to a corporate reorganization or an asset sale) such that the new owner has a different employer identification number (EIN) than the owner who obtained the original registration, the original owner of the advanced manufacturing facility must amend the original registration to disassociate its EIN from the advanced manufacturing facility and the new owner must submit separately an original registration (or if the new owner previously registered other qualified investments or advanced manufacturing facilities, must amend its original registration) to associate the new owner's EIN with the previously registered advanced manufacturing facility.

(v) *Registration number is required to be reported on the return for the taxable year of the elective payment election.* The taxpayer must include the registration number of the qualified investment in the advanced manufacturing facility on the taxpayer's return as provided in this paragraph (b) for the taxable year. The IRS will treat an elective payment election as ineffective with respect to a section 48D credit determined with respect to a qualified investment in an advanced manufacturing facility for which the taxpayer does not include a valid registration number on the annual return.

(c) *Time and manner of election*—(1) *In general.* Any elective payment election under section 48D(d)(1) and this section with respect to any section 48D credit determined with respect to a taxpayer's qualified investment must—

(i) Be made on the taxpayer's original return of tax (including a superseding return) filed not later than the due date (including extensions of time) for the taxable year for which the section 48D credit is determined and the election is made in the manner prescribed by the IRS in guidance;

(ii) Include any required completed source credit form(s), a completed Form 3800, and any additional information required in instructions, including supporting calculations;

(iii) Provide on the completed Form 3800 a valid registration number for the qualified investment that is placed in service as part of an advanced manufacturing facility of an eligible taxpayer;

(iv) Include a statement attesting under the penalties of perjury that—

(A) The taxpayer claiming to be an eligible taxpayer is not a foreign entity of concern within the meaning of § 1.48D–2(f)(2) and has not made an applicable transaction as defined in § 1.50–2(b)(3) during the taxable year that the qualified property is placed in service; and

(B) The taxpayer will not claim a double benefit (within the meaning of section 48D(d)(3) and paragraphs (d)(2)(ii)(B) and (C) and (e) of this section) with respect to any elective payment election made by the taxpayer; and

(v) Be made not later than the due date (including extensions of time) for the taxable year for which the election is made, but in no event earlier than May 8, 2023.

(2) *Limitations.* No elective payment election may be made or revised on an amended return or by filing an

administrative adjustment request under section 6227 of the Code. There is no relief available under §§ 301.9100–1 through 301.9100–3 of this chapter for an elective payment election that is not timely filed in accordance with paragraph (c)(1) of this section.

(d) *Special rules for partnerships and S corporations*—(1) *In general.* If a partnership or S corporation directly holds any property for which an advanced manufacturing investment credit is determined, any election under this section must be made by the partnership or S corporation. No election under section 48D(d) and this section by any partner or shareholder is allowed.

(2) *Election*—(i) *Time and manner of election.* An elective payment election by a partnership or S corporation is made at the same time and in the same manner, and subject to the pre-filing registration and other requirements for the election to be effective, as provided in paragraphs (b) and (c) of this section.

(ii) *Effect of election.* If a partnership or S corporation makes an elective payment election with respect to a section 48D credit, the following rules will apply:

(A) The Internal Revenue Service will make a payment to such partnership or S corporation equal to the amount of such credit, determined in accordance with paragraph (d)(6) of this section (unless the partnership or S corporation owes a Federal tax liability, in which case the payment may be reduced by such tax liability);

(B) Before determining any partner's distributive share, or S corporation shareholder's pro rata share, of such credit, such credit is reduced to zero and is, for any other purposes under the Code, deemed to have been allowed solely to such entity (and not allocated or otherwise allowed to its partners or shareholders) for such taxable year; and

(C) Any partner's or S corporation shareholder's share of any qualified investment in an advanced manufacturing facility for which an elective payment election has been made for the taxable year, is reduced to zero for such taxable year.

(iii) *Coordination with sections 705 and 1366.* Any amount with respect to which the election is made is treated as tax exempt income for purposes of sections 705 and 1366 of the Code.

(iv) *Partner's distributive share.* A partner's distributive share of such tax exempt income is equal to such partner's distributive share of its otherwise allocable basis in qualified property under § 1.48D–2(h)(2)(i) for such taxable year.

(v) *S corporation shareholder's pro-rata share.* An S corporation shareholder's pro rata share (as determined under section 1377(a) of the Code) of such tax exempt income is taken into account by the S corporation shareholder in the taxable year (as determined under sections 444 and 1378(b) of the Code) in which the section 48D credit is determined and is based on the shareholder's otherwise apportioned basis in qualified property under § 1.48D–2(h)(2)(ii) for the taxable year.

(vi) *Timing of tax exempt income.* Such tax exempt income resulting from such election is treated as received or accrued, including for purposes of sections 705 and 1366 of the Code, as of the date the qualified property is placed in service with respect to the partnership or S corporation.

(3) *Disregarded entity ownership.* In the case of a qualified property held directly by an entity disregarded as separate from a partnership or S corporation for Federal income tax purposes, such qualified property will be treated as held directly by the partnership or S corporation for purposes of making an elective payment election.

(4) *Electing partnerships in tiered structures.* If a partnership (upper-tier partnership) is a direct or indirect partner of a partnership that makes an elective payment election and directly or indirectly receives an allocation of tax exempt income resulting from the elective payment election made by the partnership, the upper-tier partnership must determine its partners' distributive shares of such tax exempt income in proportion to each partner's distributive share of its otherwise allocable basis in qualified property under § 1.48D–2(h)(2)(i) for such taxable year.

(5) *Character of tax exempt income.* Tax exempt income resulting from an elective payment election by an S corporation or a partnership is treated as arising from an investment activity and not from the conduct of a trade or business within the meaning of section 469(c)(1)(A). As such, the tax exempt income is not treated as passive income to any partners or shareholders who do not materially participate within the meaning of section 469(c)(1)(B).

(6) *Determination of amount of the section 48D credit*—(i) *In general.* In determining the amount of the section 48D credit that will result in a payment under paragraph (d)(2)(ii)(A) of this section, the partnership or S corporation must compute the amount of the credit allowable (without regard to section 38(c)) as if an elective payment election were not made. Because a partnership or S corporation is not subject to section 469 (that is, section 469 applies at the partner or shareholder level), the amount of the credit determined by a partnership or S corporation is not subject to limitation by section 469. Because the section 48D credit is an investment credit under section 46, sections 49 and 50 apply to limit the amount of the credit.

(ii) *Application of section 49 at-risk rules to determination of section 48D credit for partnerships and S corporations.* Any amount of section 48D credit determined with respect to qualified property held directly by a partnership or S corporation must be determined by the partnership or S corporation taking into account the section 49 at-risk rules at the partner or shareholder level as of the close of the taxable year in which the qualified property is placed in service. Thus, if the credit base of a qualified property is limited to a partner or S corporation shareholder by section 49, then the amount of the section 48D credit determined by the partnership or S corporation is also limited. A partnership or S corporation that directly holds qualified property must request from each of its partners or shareholders, respectively, that is subject to section 49, the amount of such partner's or shareholder's nonqualified nonrecourse financing with respect to the qualified property as of the close of the taxable year in which the property is placed in service. Additionally, the partnership or S corporation must attach to its tax return for the taxable year in which the qualified property is placed in service, the amount of each partner's or shareholder's section 49 limitation with respect to any qualified property. Changes to at-risk amounts under section 49 for partners or S corporation shareholders after the close of the taxable year in which the qualified property is placed in service do not impact the section 48D credit determined by the partnership or S corporation, but do impact the partner(s) or S corporation shareholder(s) as provided in paragraph (d)(6)(iii) of this section.

(iii) *Changes in at-risk amounts under section 49 at partner or shareholder level.* A partner or shareholder in a partnership or S corporation, respectively, must apply the rules under section 49 at the partner or shareholder level if there is a change in nonqualified nonrecourse financing with respect to the partner or shareholder after the close of the taxable year in which the qualified property is placed in service and the section 48D credit is

determined. If there is an increase in nonqualified nonrecourse financing to a partner, any adjustment under the rules of section 49(b) is calculated based on the partner's share of the basis (or cost) of the qualified property to which the section 48D credit was determined in accordance with § 1.48D–2(h)(2)(i). If there is an increase in nonqualified nonrecourse financing to a shareholder, any adjustment under the rules of section 49(b) is calculated based on the shareholder's pro rata share of the basis (or cost) of the qualified property to which the section 48D was determined in accordance with § 1.48D–2(h)(2)(ii). If there is a decrease in nonqualified nonrecourse financing, any increase in the credit base is taken into account by the partner or shareholder as provided under section 49, and any resulting credit is not eligible for an elective payment election under section 48D(d).

(7) *Partnerships subject to subchapter C of chapter 63 of the Code.* See § 301.6241–7(j) of this chapter for rules applicable to payments made to partnerships subject to subchapter C of chapter 63 of the Code for a partnership taxable year.

(8) *Example.* The following example illustrates the rules of this paragraph (d).

(i) *Example.* P is a calendar-year partnership consisting of partners A and B, each 50% owners. P constructs Facility A, an advanced manufacturing facility, at V. P completes the pre-filing registration with respect to Facility A at V for 2024 in accordance with paragraph (b) of this section. In 2024, P places in service qualified property which is part of Facility A at V. P timely files its 2024 Form 1065 and properly makes the elective payment election in accordance with paragraph (c) of this section. On its Form 1065, P properly determines that the amount of section 48D credit with respect to the qualified property placed in service at Facility A for 2024 is $100,000. The IRS processes P's return and makes a $100,000 payment to P. Before determining A's and B's distributive shares, P reduces the section 48D credit to zero. However, for other purposes of the Code, the $100,000 section 48D credit is deemed to have been allowed to P for 2024. The $100,000 is treated as tax exempt income for purposes of section 705, and A's and B's distributive shares of such tax exempt income is based on each partner's otherwise allocable basis in qualified property under § 1.48D–2(h)(2)(i) for the 2024 taxable year ($50,000 each). A's and B's basis in their partnership interests and capital accounts will be appropriately adjusted to take into account basis adjustments made to the qualified property under section 50(c)(5) and § 1.704–1(b)(2)(iv)(*j*). See paragraph (g)(2) of this section. The tax exempt income received or accrued by P as a result of the elective payment election is treated as received or accrued, including for purposes of section 705, as of date P placed in service the qualified property in 2024.

(ii) [Reserved]

(e) *Denial of double benefit*—(1) *In general.* In the case of a taxpayer making an election under section 48D(d) and this section with respect to any section 48D credit determined under section 48D(a) and § 1.48D–1, such credit is reduced to zero and is, for any other purposes under the Code, deemed to have been allowed to the taxpayer for such taxable year. Paragraphs (e)(2) and (3) of this section explain the application of the section 48D(d)(3) denial of a double benefit rule to a taxpayer (other than a partnership or S corporation). The application of section 48D(d)(3) to a partnership or S corporation is provided in paragraphs (d)(2)(ii)(B) and (C) of this section.

(2) *Application of the denial of double benefit rule.* A taxpayer (other than a partnership or S corporation) making an elective payment election applies section 48D(d)(3) by taking the following steps:

(i) Compute the amount of the Federal income tax liability (if any) for the taxable year, without regard to the general business credit under section 38 (GBC), that is payable on the due date of the tax return (without regard to extensions), and the amount of the Federal income tax liability that may be offset by GBCs pursuant to the limitation based on the amount of tax under section 38.

(ii) Compute the amount of the GBCs carryforwards carried to the taxable year plus the amount of the current year GBCs (including the current section 48D credit) allowed for the taxable year under section 38. Because the election must made on an original return of tax for the taxable year for which the section 48D credit is determined, any business credit carrybacks are not considered when determining the elective payment amount for the taxable year.

(iii) Apply the GBCs allowed for the taxable year as computed under paragraph (e)(2)(ii) of this section, including those attributable to the section 48D credit as GBC, against the tax liability computed in paragraph (e)(2)(i) of this section.

(iv) Identify the amount of any excess or unused current year GBC, as defined under section 39, attributable to current year section 48D credit for which the taxpayer is making an elective payment election. Treat the amount of such unused section 48D credit as a payment against the tax imposed by subtitle A for the taxable year with respect to which such credit is determined (rather than having them available for carryback or carryover) (net elective payment amount).

(v) Reduce the section 48D credit for which an elective payment election is made by the amount (if any) allowed as a general business credit under section 38 for the taxable year, as provided in paragraph (e)(2)(iii) of this section, and by the net elective payment amount (if any) that is treated as a payment against tax, as provided in paragraph (e)(2)(iv) of this section, which results in the section 48D credit being reduced to zero.

(3) *Use of the section 48D credit for other purposes.* The full amount of the section 48D credit for which an elective payment election is made is deemed to have been allowed for all other purposes of the Code, including, but not limited to, the basis reduction and recapture rules imposed by section 50, and the calculation of any underpayment of estimated taxes under sections 6654 and 6655 of the Code.

(4) *Examples.* The following examples illustrate the rules of this paragraph (e).

(i) *Example 1.* Z Corp is a calendar-year C corporation. Z Corp places in service qualified property which is part of an advanced manufacturing facility in June of 2024. Z Corp completes the pre-filing registration in accordance with this section and receives a registration number for the qualified property. Z Corp timely files its 2024 Form 1120 on April 15, 2025, properly making the elective payment election with respect to the section 48D credit in accordance with this section. On its return, Z Corp properly determines that it has $500,000 of tax imposed by subtitle A of the Code (see paragraph (e)(2)(i) of this section). For simplicity, assume the maximum amount of GBCs that can be claimed for the taxable year is $375,000. Z Corp properly determines that the amount of the section 48D credit determined with respect to the qualified property (its GBC for the taxable year) is $100,000 (see paragraph (e)(2)(ii) of this section. Under paragraph (e)(2)(iii) of this section, the section 48D credit reduces Z Corp's tax liability to $400,000. Z Corp pays its $400,000 tax liability on April 15, 2025. Because there is no unused section 48D credit, paragraph (e)(2)(iv) of this section does not apply. Under paragraph (e)(2)(v) of this section, the $100,000 of section 48D credit is reduced by the $100,000 of section 48D

credit claimed as GBCs for the taxable year, which results in the section 48D credit being reduced to zero. However, the $100,000 of section 48D credit is deemed to have been allowed to Z Corp for 2024 for all other purposes of the Code under paragraph (e) of this section.

(ii) *Example 2.* Assume the same facts as in paragraph (e)(4)(i) of this section (*Example 1*), except that Z Corp has $80,000 of tax imposed by subtitle A (paragraph (e)(2)(i) of this section). Z Corp's GBC credit is still $100,000 (paragraph (e)(2)(ii) of this section). For simplicity, assume the maximum amount of GBCs that can be claimed for the taxable year under section 38(c) is $60,000. Z Corp uses $60,000 of its section 48D credit against its tax liability under paragraph (e)(2)(iii) of this section. Z Corp's net elective payment amount is $40,000 determined under paragraph (e)(2)(iv) of this section. Z Corp reduces the elective payment amount by the $60,000 claimed against tax in paragraph (e)(2)(iii) of this section and by the $40,000 net elective payment amount determined in paragraph (e)(2)(iv) of this section, resulting in the applicable credit being reduced to zero (paragraph (e)(2)(v) of this section). When the IRS processes Z Corp's 2024 Form 1120, the net elective payment amount results in a $40,000 refund to Z Corp. However, for other purposes of the Code, the $100,000 section 48D credit is deemed to have been allowed to Z Corp for 2024 (paragraph (e) of this section). Even though Z Corp did not owe tax after applying the net elective payment amount against its net tax liability, Z Corp may be subject to the section 6655 penalty for failure to pay estimated income tax. The net elective payment is not an estimated tax installment, rather it is treated as a payment made at the filing of the return.

(f) *Excessive payment*—(1) *In general.* Except as provided in paragraph (f)(2) of this section, in the case of any amount treated as a payment which is made by the taxpayer under section 48D(d)(1) and paragraph (a) of this section, or any payment made pursuant to section 48D(d)(2)(A)(i)(II) and paragraph (d) of this section, with respect to any property, which amount the Commissioner determines constitutes an excessive payment as defined in paragraph (f)(3) of this section, the tax imposed on such taxpayer by chapter 1 of the Code for the taxable year in which such determination is made is increased by an amount equal to the sum of—

(i) The amount of such excessive payment; plus

(ii) An amount equal to 20 percent of such excessive payment.

(2) *Reasonable cause.* Paragraph (f)(1)(ii) of this section will not apply if the taxpayer demonstrates to the satisfaction of the Commissioner that the excessive payment resulted from reasonable cause.

(3) *Excessive payment defined.* For purposes of section 48D(d) and this paragraph (f), the term *excessive payment* means, with respect to any property for which an election is made under section 48D(d) and this section for any taxable year, an amount equal to the excess of—

(i) The amount treated as a payment which is made by the taxpayer pursuant to section 48D(d)(1) and paragraph (a) of this section, or any payment made by the Commissioner pursuant to section 48D(d)(2)(A)(I)(i) and paragraph (d) of this section, with respect to such property for such taxable year; over

(ii) The amount of the section 48D credit which, without application of section 48D(d) and this section, would be otherwise allowable (determined without regard to section 38(c)) under section 48D(a) and the section 48D regulations with respect to such property for such taxable year.

(4) *Example*s. The following example illustrates the principles of this paragraph (f).

(i) *Example.* A Corp is a calendar-year C corporation. A Corp places in service qualified property which is part of Facility A, an advanced manufacturing facility in 2023. A Corp properly completes the pre-filing registration in accordance with paragraph (b) of this section and receives a registration number for the advanced manufacturing facility. A Corp timely files its 2023 Form 1120, properly providing the registration number for Facility A and otherwise complying with paragraph (c) of this section. On its return, Corp A calculates that the amount of the section 48D credit with respect to the qualified property is $100,000 and that the net elective payment amount is $100,000. Corp A receives a refund in the amount of $100,000. In 2025, the IRS determines that the amount of the section 48D credit properly allowable to Corp A in 2023 with respect to Facility A (as determined pursuant to § 1.48D–1(b) and without regard to the limitation based on tax in section 38(c)) was $60,000. Corp A is not able to show reasonable cause for the difference. The excessive payment amount is $40,000 ($100,000 treated as a payment − $60,000 allowable amount). In 2025, the tax imposed under chapter 1 on Corp A is increased in the amount of $48,000 ($40,000 + (20% * $40,000 = $8,000).

(ii) [Reserved]

(g) *Basis reduction and recapture*—(1) *In general.* The rules in section 50(a) and (c) of the Code apply with respect to elective payments under paragraphs (a) and (d) of this section.

(2) *Basis adjustment*—(i) *In general.* If a section 48D credit is determined with respect to property for which a taxpayer makes an election under section 48D(d)(1), then the adjusted basis of the property shall be reduced by the amount of the section 48D credit determined for which the taxpayer made an election under section 48D(d)(1).

(ii) *Basis adjustment by partnership or S corporation.* If an advanced manufacturing investment credit is determined with respect to property for which a partnership or S corporation makes an election under section 48D(d)(1), then the adjusted basis of the property shall be reduced by the amount of the advanced manufacturing investment credit determined with respect to the property held by the partnership or S corporation, for which the IRS made a payment to the partnership or S corporation pursuant to section 48D(d)(2)(A)(i)(I).

(iii) *Basis adjustment of partners and S corporation shareholders.* The adjusted basis of a partner's interest in a partnership, and stock in an S corporation, shall be appropriately adjusted pursuant to section 50(c)(5) to take into account adjustments made under paragraph (g)(2)(ii) of this section in the basis of property held by the partnership or S corporation, as the case may be.

(3) *Recapture reporting.* Any reporting of recapture is made on the taxpayer's annual return in the manner prescribed by the IRS in any guidance.

(h) *Applicability date.* This section applies to property that is placed in service after December 31, 2022, and during a taxable year ending on or after [DATE OF PUBLICATION OF FINAL RULE].

Douglas W. O'Donnell,

Deputy Commissioner for Services and Enforcement.

BILLING CODE 4830–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2023–0309]

RIN 1625–AA00

Safety Zone; Henderson Bay, Henderson Harbor, NY

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish a permanent safety zone for certain waters of Henderson Harbor. This action is necessary to provide for the safety of life on these navigable waters near Henderson Harbor, Henderson, NY, during annual reoccurrences of a fireworks display. This proposed rulemaking would prohibit persons and vessels from being in the safety zone unless authorized by the Captain of the Port Buffalo or a designated representative. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before July 21, 2023.

ADDRESSES: You may submit comments identified by docket number USCG–2023–0309 using the Federal Decision Making Portal at *https://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email MST2 Andrew Nevenner, Waterways Management Division MSD Massena, U.S. Coast Guard; telephone 315–769–5483, email *SMB-MSDMassena-WaterwaysManagement@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

On March 6, 2023, the Henderson Business and Community Council notified the Coast Guard that it will be conducting a fireworks display from 9:30 through 10 p.m. on July 29, 2023, for the Christmas in July Celebration. The fireworks are to be launched from a barge in Henderson Bay approximately 1500 yards north of the town boat ramp located on the southern shore of Henderson Harbor in Henderson Harbor, NY. Hazards from firework displays include accidental discharge of fireworks, dangerous projectiles, and falling hot embers or other debris. The Captain of the Port Buffalo (COTP) has determined that potential hazards associated with the fireworks to be used in this display would be a safety concern for anyone within a 140-yard radius of the barge.

The purpose of this rulemaking is to ensure the safety of vessels and the navigable waters within a 140-yard radius of the fireworks barge before, during, and after the scheduled event. The Coast Guard is proposing this rulemaking under authority in 46 U.S.C. 70034 (previously 33 U.S.C. 1231).

III. Discussion of Proposed Rule

The COTP is proposing to establish a safety zone for certain waters of Henderson Harbor for annual reoccurrences of the fireworks display, which will be announced in the **Federal Register**. The safety zone would cover all navigable waters within 140-yards of a barge in Henderson Bay located approximately 1500-yards north of the town boat ramp located on the southern shore of Henderson Harbor in Henderson Harbor, NY. The duration of the zone is intended to ensure the safety of vessels and these navigable waters before, during, and after the scheduled fireworks display. No vessel or person would be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative. The regulatory text we are proposing appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This NPRM has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, duration, and time-of-day of the safety zone. Vessel traffic would be able to safely transit around this safety zone which would impact a small designated area of Henderson Bay for less than 2 hour during the evening when vessel traffic is normally low. Moreover, the Coast Guard would issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone, and the rule would allow vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section IV.A above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under

the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 (Federalism), if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the potential effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves a safety zone lasting 1.5 hours that would prohibit entry within 140 yards of a fireworks barge. Normally such actions are categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments through the Federal Decision Making Portal at *https://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG–2023–0309 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using *https://www.regulations.gov,* call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule for alternate instructions.

Viewing material in docket. To view documents mentioned in this proposed rule as being available in the docket, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the *https://www.regulations.gov* Frequently Asked Questions web page. We review all comments received, but we will only post comments that address the topic of the proposed rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive.

Personal information. We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the docket in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 165

Harbors, marine safety, navigation (water), reporting and recordkeeping requirements, security measures, waterways.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision 1.3.

■ 2. In § 165.939, amend Table 165.939 by adding entry (b)(34)) to read as follows:

§ 165.939 Safety Zones; Annual Events in the Captain of the Port Buffalo Zone.

* * * * *

Event	Location [1]	Enforcement date and time [2]
(b) July Safety Zones		
*	*	*
(34) Christmas in July Fireworks.	Henderson Harbor, NY. All waters within a 420-foot radius of the barge at position 43°86′66″ N, 076°20′97″ W in Henderson Harbor, NY.	On or around the last weekend of July.

[1] All coordinates listed in Table 165.xxx reference Datum NAD 1983.

[2] As noted in paragraph (a)(3) of this section, the enforcement dates and times for each of the listed safety zones are subject to change. In the event of a change, or for enforcement periods listed that do not allow a specific date or dates to be determined, the Captain of the Port will provide notice to the public by publishing a Notice of Enforcement in the **Federal Register**, as well as, issuing a Broadcast Notice to Mariner.]

Dated: May 30, 2023.

Mark I. Kuperman,

Captain, U.S. Coast Guard, Captain of the Port Buffalo.

[FR Doc. 2023–11880 Filed 6–20–23; 8:45 am]

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R03–OAR–2023–0206; FRL–11037–01–R3]

Air Plan Disapproval; Delaware; Removal of Excess Emissions Provisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to disapprove certain portions of a state implementation plan (SIP) revision submitted by the State of Delaware, through the Delaware Department of Natural Resources and Environmental Control (DNREC), on November 22, 2016. The revision was submitted by Delaware in response to a national finding of substantial inadequacy and SIP call published on June 12, 2015, which included certain provisions in the Delaware SIP related to excess emissions during startup, shutdown, and malfunction (SSM) events. EPA is proposing disapproval of certain portions of the SIP revision and proposing to determine that such SIP revision does not correct the remaining deficiencies in Delaware's SIP identified in the June 12, 2015, SIP call in accordance with the requirements for SIP provisions under the Clean Air Act (CAA or Act). This action addresses the remaining deficiencies identified in EPA's June 2015 SIP call that have not yet been addressed by prior EPA actions on Delaware's November 2016 SIP submission.

DATES: Written comments must be received on or before July 21, 2023.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R03–OAR–2023–0206 at *www.regulations.gov,* or via email to *gordon.mike@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *www.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Mallory Moser, Planning & Implementation Branch (3AD30), Air & Radiation Division, U.S. Environmental Protection Agency, Region III, Four Penn Center, 1600 John F. Kennedy Boulevard, Philadelphia, Pennsylvania 19103. The telephone number is (215) 814–2030. Ms. Moser can also be reached via electronic mail at *moser.mallory@epa.gov.*

SUPPLEMENTARY INFORMATION: On November 22, 2016, DNREC submitted a revision to its SIP in response to a national finding of substantial inadequacy and SIP call published on June 12, 2015, which included certain provisions in the Delaware SIP related to excess emissions during SSM events.

I. Background

A. EPA's 2015 SSM SIP Action

On February 22, 2013, EPA issued a **Federal Register** notice of proposed rulemaking outlining EPA's policy at the time with respect to SIP provisions related to periods of SSM. EPA analyzed specific SSM SIP provisions and explained how each one either did or did not comply with the CAA with regard to excess emission events.[1] For each SIP provision that EPA determined to be inconsistent with the CAA, EPA proposed to find that the existing SIP provision was substantially inadequate to meet CAA requirements and thus proposed to issue a SIP call under CAA section 110(k)(5). On September 17, 2014, EPA issued a document supplementing and revising what the Agency had previously proposed on February 22, 2013, in light of a D.C. Circuit decision that determined the CAA precludes authority of the EPA to create affirmative defense provisions applicable to private civil suits. EPA outlined its updated policy that affirmative defense SIP provisions are not consistent with CAA requirements. EPA proposed in the supplemental proposal document to apply its revised interpretation of the CAA to specific affirmative defense SIP provisions and proposed SIP calls for those provisions where appropriate.[2]

On June 12, 2015, pursuant to CAA section 110(k)(5), EPA finalized ''State Implementation Plans: Response to Petition for Rulemaking; Restatement and Update of EPA's SSM Policy Applicable to SIPs; Findings of Substantial Inadequacy; and SIP Calls To Amend Provisions Applying to Excess Emissions During Periods of Startup, Shutdown and Malfunction,'' hereafter referred to as the ''2015 SSM SIP Action.'' [3] The 2015 SSM SIP Action clarified, restated, and updated EPA's interpretation that SSM exemption and affirmative defense SIP provisions are inconsistent with CAA requirements. The 2015 SSM SIP Action found that certain SIP provisions in 36 states were substantially inadequate to meet CAA requirements and issued a SIP call to those states to submit SIP revisions to address the inadequacies. EPA established an 18-month deadline by which the affected states had to submit such SIP revisions. States were required to submit corrective revisions to their SIPs in response to the SIP calls by November 22, 2016.

EPA issued a Memorandum in October 2020 (2020 Memorandum), which stated that certain provisions governing SSM periods in SIPs could be viewed as consistent with CAA requirements.[4] Importantly, the 2020

[1] State Implementation Plans: Response to Petition for Rulemaking; Findings of Substantial Inadequacy; and SIP Calls To Amend Provisions Applying to Excess Emissions During Periods of Startup, Shutdown, and Malfunction, 78 FR 12460 (February 22, 2013).

[2] 79 FR 55920 (September 17, 2014).

[3] 80 FR 33840 (June 12, 2015).

[4] October 9, 2020, memorandum ''Inclusion of Provisions Governing Periods of Startup, Shutdown, and Malfunctions in State

Memorandum stated that it ''did not alter in any way the determinations made in the 2015 SSM SIP Action that identified specific state SIP provisions that were substantially inadequate to meet the requirements of the Act.'' Accordingly, the 2020 Memorandum had no direct impact on the SIP call issued to Delaware in 2015. The 2020 Memorandum did, however, indicate EPA's intent at the time to review SIP calls that were issued in the 2015 SSM SIP Action to determine whether EPA should maintain, modify, or withdraw particular SIP calls through future agency actions.

On September 30, 2021, EPA's Deputy Administrator withdrew the 2020 Memorandum and announced EPA's return to the policy articulated in the 2015 SSM SIP Action (2021 Memorandum).[5] As articulated in the 2021 Memorandum, SIP provisions that contain exemptions or affirmative defense provisions are not consistent with CAA requirements and, therefore, generally are not approvable if contained in a SIP submission. This policy approach is intended to ensure that all communities and populations, including overburdened communities, receive the full health and environmental protections provided by the CAA.[6] The 2021 Memorandum also retracted the prior statement from the 2020 Memorandum of EPA's plans to review and potentially modify or withdraw particular SIP calls. That statement no longer reflects EPA's intent. EPA intends to implement the principles laid out in the 2015 SSM SIP Action as the agency takes action on SIP submissions, including this SIP submittal provided in response to the 2015 SIP call.

B. Delaware's Provisions Related to Excess Emissions

With regard to the Delaware SIP, EPA's 2015 SSM SIP Action determined that the following regulations were substantially inadequate to meet CAA requirements: Title 7 of Delaware's Administrative Code (7 DE Admin. Code) 1104 Section (§) 1.5, 7 DE Admin. Code 1105 § 1.7, 7 DE Admin. Code 1108 § 1.2, 7 DE Admin. Code 1109 § 1.4, 7 DE Admin. Code 1114 § 1.3, 7 DE Admin. Code 1124 § 1.4 and 7 DE Admin. Code 1142 § 2.3.1.6.[7] These provisions provide a state official with the discretion, through the permitting process, to exempt sources from otherwise applicable SIP emission limitations or to set alternative limitations for periods of startup and shutdown. The rationale underlying EPA's determination that these provisions were substantially inadequate to meet CAA requirements, and therefore to issue a SIP call to Delaware to remedy the provisions, is detailed in the 2015 SSM SIP Action and the 2013 proposed SSM SIP Action.[8]

Delaware submitted a SIP revision on November 22, 2016, in response to the SIP call issued in the 2015 SSM SIP Action. In addition to addressing deficiencies identified in 7 DE Admin. Code 1104, 1105, 1109 and 1114, Delaware's submission noted that the deficiency highlighted in 7 DE Admin. Code 1108 § 1.2 was corrected by a previous SIP revision, which was submitted to EPA on July 10, 2013. A final rulemaking which acted on this 2013 submission and remedied 7 DE Admin. Code 1108 § 1.2 published in the **Federal Register** on July 11, 2022.[9] Delaware's submission also requested that EPA revise the Delaware SIP by removing 7 DE Admin. Code 1124 § 1.4 and 7 DE Admin. Code 1142 § 2.3.1.6 in their entirety, thereby removing these provisions, and their deficiencies, from the Delaware SIP. A final rulemaking which remedied 7 DE Admin. Code 1124 § 1.4 and 7 DE Admin. Code 1142 § 2.3.1.6 published in the **Federal Register** on February 14, 2023.[10]

Lastly, Delaware's submission requested that EPA revise the SIP to address the deficiencies identified in the following regulations: 7 DE Admin. Code 1104 § 1.5, 7 DE Admin. Code 1105 § 1.7, 7 DE Admin. Code 1109 § 1.4, and 7 DE Admin. Code 1114 § 1.3. Through this proposed rulemaking, EPA will be acting on these remaining provisions that were identified as deficient in the 2015 SSM SIP Action.

II. Summary of SIP Revision and EPA Analysis

EPA has identified several significant concerns with Delaware's revisions to 7 DE Admin. Code 1104 § 1.5, 7 DE Admin. Code 1105 § 1.7, 7 DE Admin. Code 1109 § 1.4, and 7 DE Admin. Code 1114 § 1.3, which suggest that those parts of the 2016 SIP submission cannot be approved. Delaware's revisions to these sections in the SIP submission and EPA's corresponding analysis are summarized below. An underline/strikeout version of each regulation, showing the changes to the regulations or the changes requested to the Delaware SIP, is included in the docket for this rulemaking.[11]

A. Summary and Analysis of Revisions to 7 DE Admin. Code 1104 § 1.5 and 7 DE Admin. Code 1105 § 1.7

The 2015 SSM SIP Action cited 7 DE Admin. Code 1104 (Particulate Emissions from Fuel Burning Equipment) § 1.5 because it provides a potential exemption from the emission limit in 7 DE Admin. Code 1104 § 2.1. The emission limit in 7 DE Admin. Code 1104 § 2.1 currently contained in the EPA-approved SIP says, ''no person shall cause or allow the emission of particulate matter in excess of 0.3 pound per million British Thermal Units (lb/MMBTU) heat input, maximum two-hour average.'' Section 1.5 creates a potential exemption to this limit during start-up or shutdown events by stating, ''The provisions of this Regulation shall not apply to the start-up and shutdown of equipment which operates continuously or in an extended steady state when emissions from such equipment during start-up and shutdown are governed by an operation permit issued pursuant to the provisions of 2.0 of 7 DE Admin. Code 1102.'' Delaware's SIP submission asked EPA to remove § 1.5 and § 2.1 of 7 DE Admin. Code 1104 from the EPA-approved Delaware SIP, but these provisions would remain in the Delaware regulations. In addition, Delaware revised 7 DE Admin. Code 1104 by adding a new section, § 2.2, which states, ''[n]o person shall cause or allow the emission of particulate matter in excess of 0.3 pound per million BTU heat input, maximum 30-day rolling average, from any fuel burning equipment.'' The SIP submission asked EPA to approve this new § 2.2 into the Delaware SIP. While Delaware requested to remove § 1.5, which contains the potential emission limit exemption during start-up and shutdown, from the EPA-approved SIP, the State also increased the two-hour averaging time found in § 2.1 to 30 days while keeping the same 0.3 lb/MMBTU limit. Thus, the EPA-approved SIP would have a 0.3 lb/MMBTU 30-day rolling average limit, as set forth in the

Implementation Plans,'' from Andrew R. Wheeler, Administrator.

[11] The revisions can be found on pages 4–7 of the PDF, which corresponds to pages 1–4 of Delaware's submitted document entitled ''Revision to Satisfy EPA's State Implementation Plan (SIP) Call Related to Air Emissions During Equipment Start-up and Shutdown,'' which is in the docket for this action.

new § 2.2, while Delaware's regulations would have both a limit of 0.3 lb/MMBTU two-hour average in § 2.1, which could be changed for startup and shutdown purposes via § 1.5, and a 0.3 lb/MMBTU 30-day rolling average limit in § 2.2 that could not be changed via § 1.5.

The 2015 SSM SIP Action also highlighted 7 DE Admin. Code 1105 (Particulate Emissions from Industrial Process Operations) § 1.7 because it provides a potential exemption from the emission limit in 7 DE Admin. Code 1105 § 2.1. The emission limit in 7 DE Admin. Code 1105 § 2.1 currently contained in the EPA-approved SIP says, ''No person shall cause or allow particulate emissions into the atmosphere from any source not provided for in subsequent sections of this Regulation in excess of 0.2 grains per standard cubic foot.'' Section 1.7 creates a potential exemption to this limit by stating, ''The provisions of this Regulation shall not apply to the start-up and shutdown of equipment which operates continuously or in an extended steady state when emissions from such equipment during start-up and shutdown are governed by an operation permit issued pursuant to the provisions of 2.0 of 7 DE Admin. Code 1102.'' Delaware revised 7 DE Admin. Code 1105 by adding a new section, § 2.2, which added an emission limit of 0.2 grains per standard cubic foot on a 30-day rolling average basis. Delaware's SIP submission asked EPA to remove § 1.7 and § 2.1 from the EPA-approved SIP, but these provisions would remain in the Delaware regulations. Delaware's submission also asked EPA to approve the new § 2.2 into the SIP. Again, although Delaware requested to remove § 1.7, which contained the exemption identified in the 2015 SSM SIP Action, the State also asked EPA to approve into the SIP a newly created limit in § 2.2 which adds an averaging period of 30 days to the existing 0.2 grains per cubic foot limit. Delaware does not explain how these differing emission limits in § 2.1 and § 2.2 would be reconciled.

Delaware explained that the increases in averaging times provide the opportunity for any source subject to these limits to compensate for higher emission rates during startup or shutdown events by emitting at lower rates during normal operations, so long as continuous compliance is demonstrated on a 30-day rolling average basis.

However, Delaware's increases in the averaging times for the particulate emission limits found in 7 DE Admin. Code 1104 and 1105 were not supported by a sufficient analysis explaining why these changes meet the requirements of section 110(l) of the CAA. The 2015 SSM SIP Action did not provide an opportunity for averaging times to be increased with no explanation or analysis of how the increased averaging time would or would not affect the national ambient air quality standards (NAAQS). In response to a comment regarding opacity, EPA noted in the 2015 SSM SIP Action that the removal of impermissible SSM exemptions should not be perceived as an opportunity to provide new de facto exemptions for these emissions by manipulation of the averaging time and the numerical level of existing opacity emission limitations.[12] This reasoning is not exclusive to opacity limitations, and also applies to the SIP-approved particulate limit 30-day rolling averaging times that Delaware has added to 7 De Admin. Code 1104 and 1105. During Delaware's public comment period on these regulatory changes, EPA submitted comments raising this and other concerns.[13] EPA noted that Delaware did not address whether changes to the averaging period might affect the emissions of any criteria pollutant and recommended a more robust explanation and analysis be provided to support Delaware's conclusion in order to meet the requirements of section 110(l) of the CAA. The State responded to EPA's comments during the state regulatory comment period with minimal data to assert that the long-term average of emissions would be slightly lower with the implementation of the revised limit. The State also explained these limits were originally intended to protect the total suspended particulate (TSP) NAAQS. However, the particulate matter (PM) NAAQS replaced the TSP standard.[14] Therefore, these limits still play a role in protecting the existing PM NAAQS. Although Delaware is currently attaining the PM standards,[15] the State did not explain how this 30-day rolling average longer-term limit is still protective of the short-term NAAQS, such as the 24-hour PM standard. Delaware's response to EPA's comments did not adequately explain how the increased averaging time of the 30-day rolling average limits, without decreasing the limit itself, would be protective of the PM NAAQS, and instead noted, with minimal explanation, that this would not result in any increase in emissions on a tons per year basis. Delaware explained this using two scenarios. In the first scenario, Delaware referred to the emissions limits and startup/shut down exemptions that are currently SIP-approved. Delaware stated that if all steady-state hours of operation emit exactly at, or very near, the emissions limit, and emissions during startup/shut down events are exempt, then the long-term average of emissions would be slightly higher than the emission limit. In scenario two, they noted with the new 30-day rolling average limits and no exemptions for start-up or shut down events, emissions occurring during SSM events would have to be offset by emissions lower than the 30-day average emission limit during non-SSM operation. Delaware asserted, without any further explanation, that this would result in the long-term average of emissions to be no more than the 30-day average emission limit. Delaware explained, with respect to annual emissions, the emissions calculation in scenario two is less than the emissions in scenario one. Therefore, Delaware believes this change is SIP strengthening.

EPA does not agree that the evaluation of the impacts of changing the averaging period for an emissions limit enacted to ensure the NAAQS is attained and protected can be limited only to consideration of emissions on an annual basis. The potential short-term effect of a sharp increase in particulate emissions during a startup or shutdown event on a shorter-term NAAQS limit, such as the PM_{10} 24-hour standard, need to be examined and explained. Therefore, EPA does not consider the State's explanation of why the longer 30-day averaging period with the same emission limit are adequate to ensure continued attainment of the NAAQS. EPA's comments and Delaware's response can be found in the docket for this action.

Under CAA section 110(l), EPA cannot approve a plan revision ''if the revision would interfere with any applicable requirement concerning attainment and reasonable further progress (as defined in section 7501 of [title 42]), or any other applicable requirement of this chapter.'' [16] The nature of the technical demonstration needed under section 110(l) to support approval of a SIP revision depends on the facts and circumstances of the SIP revision at issue. Based on the

[12] 80 FR 33840 at 33921 (June 12, 2015).

[13] See EPA Comment #1 and EPA Comment #2 of Appendix B in State Submittal document.

[14] The $PM_{2.5}$ 24-hour standard is 35 micrograms per cubic meter ($\mu g/m^3$). The $PM_{2.5}$ annual standard is 12.0 $\mu g/m^3$. The PM_{10} 24-hour standard is 150 $\mu g/m^3$. See 40 CFR 50.6 and 50.7.

[15] See 40 CFR 81.308.

[16] A more detailed discussion of 110(l) can be found in the SO_2 air plan disapproval for Missouri at 87 FR 40759, 40760 (July 8, 2022).

information available to EPA, EPA concluded that approval of these longer-term limits for a shorter-term NAAQS would not be consistent with the requirements of section 110(l). For EPA's analysis to address CAA section 110(l), EPA requested information from the State, but the State did not respond with the appropriate information. At a minimum, Delaware should have explained how this change would not impact maintenance of the PM NAAQS, as well as explain how this change meets the applicable legal requirements of the CAA, including both sections 110(l) and 193, as EPA suggested in their comments during Delaware's public comment period. Additionally, the submittal lacks an explanation of the maximum daily emissions that could occur with the new averaging time. There is also no information regarding the likely frequency of startup and shutdown events, the likely magnitude of emissions during these events, and how many such events it would take in a 30-day period to exceed the new 30-day average. This information is relevant because it could be that one large startup or shutdown event with significant PM emissions could cause an exceedance of the PM NAAQS at a monitor. More frequent SSM events under a 30-day averaging period can cause the short-term emissions to increase, with a deleterious effect on shorter-term NAAQS. There is no explanation of how the NAAQS will continue to be protected with the new, longer averaging period.

Replacement SIP provisions should have averaging periods that are logically related to the NAAQS at issue. The 2015 SSM SIP Action notes, ''For example, if a state chooses to modify averaging times in an emission limitation to account for higher emissions during startup and shutdown, the state would need to consider and demonstrate to the EPA how the variability of emissions over that averaging period might affect attainment and maintenance of a NAAQS with a short averaging period (*e.g.,* how a 30-day averaging period for emissions can ensure attainment of an 8-hour NAAQS).'' (80 FR 33840, 33947 (June 12, 2015)). Delaware has not explained how the 30-day average is reasonably related to the 24-hour PM NAAQS. The 2015 SSM SIP Action also notes that in some cases, extension of the averaging period and elevation of the numerical limitations may in fact be appropriate. In other cases, however, it may instead be appropriate to reduce the existing numerical opacity limitations, given improvements in control technology since the original imposition of the limits.[17] In either scenario, the appropriate analysis and justification is needed, such as specific calculations, including emissions distributions for sources in the state, backed up by operating data, that shows an extension of the averaging period would not violate the NAAQS. EPA has explained, for the sulfur dioxide (SO_2) NAAQS, how an increase in the averaging period for SO_2 emission limits beyond the 8-hour standard used for the SO_2 NAAQS could be protective of the eight-hour SO_2 NAAQS. EPA's 2014 SO_2 Nonattainment Guidance recommends that the emission limits be expressed as short-term averages, but also describes the option to use emission limits with longer averaging times of up to 30 days so long as the state meets various suggested criteria.[18] The guidance recommends that—should states and sources utilize longer averaging times—the longer-term average limit should be set at an adjusted level that reflects a stringency comparable to the 1-hour average limit at the critical emission value (CEV) shown to provide for attainment that the plan otherwise would have set.[19] To preserve comparable stringency, it would be expected that adjusting the level would result in a lowering of the emission rate if lengthening the averaging time. In cases where longer-term average limits are appropriate, EPA envisions that both the short-term and longer-term limits in practice would require similar emission control levels and would commonly result in similar emission patterns.[20] Therefore, a longer averaging time can be appropriate to protect a shorter-term NAAQS but would require an in-depth analysis of what adjusted downward level would provide a comparable stringency. Delaware did not lower their emissions limit when increasing the averaging time, nor did they provide an in-depth analysis explaining how the same emission limit with a 30-day rolling averaging period is comparable in stringency to the same emission limit with a shorter, 3-hour averaging period previously found in their EPA-approved SIP.

To support their adoption of a 30-day averaging period, Delaware's response to comments cited page 2 of EPA's 1984 guidance memo, entitled ''Averaging Times for Compliance with VOC Emission Limits—SIP Revision Policy,'' [21] which states ''Averaging periods must be as short as practicable and in no case longer than 30 days.'' However, in the same memo, EPA specifically states that a demonstration must be made to show the use of long-term averaging will not jeopardize the NAAQS.[22] Though this guidance is geared towards volatile organic compounds (VOCs), the idea that retention of the same limit with a longer-term averaging period requires some demonstration explaining how the longer-term averaging time would not affect the NAAQS is applicable to the PM NAAQS too.

It is also important to recognize the broadness of the source categories for these two regulations—fuel burning equipment and industrial process operations. Given the broadness of these categories, significant consideration should be given to how a 30-day averaging period would even apply to the sources falling in these categories, especially the smaller source categories that do not operate regularly, such as emergency generators. The State's submittal also lacks an explanation of the type and number of Delaware sources which might be subject to these two regulations, and how the change in averaging time might affect their emissions and thus affect the NAAQS. Additional explanation is required to explain how the revisions would impact the sources subject to these regulations, and how these impacts would be unlikely to affect the NAAQS.

Lastly, Delaware noted that the emission limits that were highlighted in the 2015 SSM SIP Action would remain in the Delaware state regulations. Therefore, these short-term limits, along with the exemptions, are still applicable as a matter of state law only. According to Delaware, because the short-term limits are still effective at the state level, there is no change in the status quo of emissions, and this means air quality may remain unaffected. However, this is still problematic for several reasons. First, EPA cannot rely on state-only provisions when evaluating SIP submissions for compliance with CAA requirements. Presumably, Delaware asked that these emission limits be placed into the SIP because they were necessary to attain or maintain the NAAQS, and as discussed above, the effect on the NAAQS of replacing these shorter-term average SIP limits with longer-term averaging limits on attainment or maintenance of the

[20] *Id.* at 29.

[21] See the Averaging Times for Compliance with VOC Emission Limits—SIP Revision Policy Memorandum.

[22] *Id.* at 2.

NAAQS is not adequately explained. Second, removing the shorter-term emission limits from the EPA-approved SIP but keeping them in the state regulation, while also keeping the possibility for a state issued startup or shutdown exemption from these limits, creates the possibility that the current status quo of PM emissions may not be maintained. And, because the shorter-term emission limit is no longer in the SIP, neither EPA nor citizens can enforce the shorter-term limit under CAA sections 113 and 304. In effect, Delaware could grant an exemption to emission limits which might be necessary to attain or maintain the NAAQS without going through the SIP revision process required by the CAA.

The concerns stated above suggest that the revisions to 7 DE Admin. Code 1104, Particulate Emissions from Fuel Burning Equipment, and 7 DE Admin. Code 1105, Particulate Emissions from Industrial Process Operations, cannot be approved. Further justification and information from the State is required to explain that these changes would not be inconsistent with CAA section 110(l), as well as explain how this change meets the applicable legal requirements of the CAA, including CAA section 193.

B. Summary and Analysis of Revisions to 7 DE Admin. Code 1109 § 1.4 and 7 DE Admin. Code 1114 § 1.3

The 2015 SSM SIP Action included 7 DE Admin. Code 1109 (Emissions of Sulfur Compounds From Industrial Operations) § 1.4 because it provides a potential exemption from the emission limitations during startup and shutdown when the emissions during startup and shutdown are governed by an operation permit issued pursuant to § 2.0 of 7 DE Admin. Code 1102. Delaware's SIP revision requests that the EPA remove 7 DE Admin. Code 1109 in its entirety from the Delaware SIP but retains this regulation, including the startup and shutdown exemption, at the state level. Delaware asserts that existing Federal requirements, such as the New Source Performance Standards (NSPS) adopted pursuant to CAA section 111, are adequate to ensure Delaware's maintenance of the sulfur-related NAAQS,[23] which Delaware is currently attaining.[24] Delaware believes that removal of this regulation from the SIP, but retention of the regulation at the state level, will not result in any increase in emissions on a ton per year basis, and that this revision comports with the EPA's interpretation of the CAA and is consistent with the EPA's approach for attainment and maintenance of all NAAQS.

The 2015 SSM SIP Action included 7 DE Admin. Code 1114 (Visible Emissions), § 1.3, because it provides a similar exemption from the visible emission (VE) limits during startup and shutdown when such emissions are governed by an operation permit issued pursuant to § 2.0 of 7 DE Admin. Code 1102. Delaware's SIP revision requests that the EPA remove 7 DE Admin. Code 1114 in its entirety from the Delaware SIP but retains this regulation, including the exemption, in the state regulations. The State asserts that existing Federal requirements, such as the New Source Performance Standards (NSPS), regulate visible emissions from certain sources, while two other Delaware SIP regulations that regulate fine particulate matter and fine particulate matter precursors (7 DE Admin. Code 1108 and 1146) when combined with the NSPS, are adequate to ensure Delaware's attainment and maintenance of any particulate-related NAAQS. In addition, Delaware argues that there is no quantifiable relationship between visible emissions and fine particulate matter emissions. Delaware believes that removal of this regulation from the SIP will not result in any increase in emissions on a ton per year basis, and that because this revision removes from the SIP a provision allowing for excess emissions, the change therefore comports with the EPA's interpretation of the CAA and is consistent with the EPA's approach for attainment and maintenance of all NAAQS. Delaware's response provides no other explanation regarding how the revisions comply with the CAA.

To address CAA section 110(l), EPA believes it needs more information and analysis from the State to support EPA's approval of the removal of these two regulations from the Delaware SIP while keeping the regulations at the state level. Section 110(l) prohibits approval of a SIP revision if it would interfere with attainment or any other applicable requirement. Delaware's SIP revision merely states that the removal of this regulation from the SIP will not result in any increase in emissions on a ton per year basis but provides no further explanation or any technical demonstration to support this assertion, and EPA does not have information available that would support this conclusion. To support an approval decision that would be consistent with section 110(l), Delaware should have provided information demonstrating that these changes would not impact maintenance of the NAAQS, as well as explain how this change meets the applicable legal requirements of the CAA, including section 193. During the state public comment period on this SIP revision, EPA submitted comments to Delaware raising these concerns.[25] EPA's comments and Delaware's response can be found in the docket for this action.

Despite EPA's comments, Delaware's SIP revision did not include an analysis to address CAA section 110(l). Instead, in regard, to 7 DE Admin. Code 1109, the State responded that the sources' reliance on the NSPS is enough to protect the NAAQS. Specifically, Delaware noted there are two facilities in the state currently subject to 7 DE Admin Code 1109—the Chemours Red Lion sulfuric acid plant and the Delaware City Refinery—and that each facility is subject to a more stringent NSPS. The Chemours Red Lion sulfuric acid plant is subject to 40 CFR part 60, subpart H, and the Delaware City Refinery is subject to 40 CFR part 60, subpart J. However, both subparts H and J allow for periods of excess emissions. The provisions at 40 CFR part 60, subpart A, General Provisions, are applicable to sources subject to 40 CFR part 60, subparts H and J. Subpart A of 40 CFR part 60 contains exemptions in both 40 CFR 60.8(c)and 60.11(c) . The provisions at 40 CFR 60.11(c) note ''The opacity standards set forth in this part shall apply at all times except during periods of startup, shutdown, malfunction, and as otherwise provided in the applicable standard.'' While 40 CFR 60.8(c), states ''Operations during periods of startup, shutdown, and malfunction shall not constitute representative conditions for the purpose of a performance test nor shall emissions in excess of the level of the applicable emission limit during periods of startup, shutdown, and malfunction be considered a violation of the applicable emission limit unless otherwise specified in the applicable standard.'' Reliance on these NSPS, which include excess emission exemptions, is problematic in some cases for multiple reasons.

EPA acknowledges that many of the existing NSPS still contain exemptions from emission limitations during periods of SSM. The exemptions in these EPA regulations, however, predate the 2008 issuance of the D.C. Circuit decision in *Sierra Club* v. *Johnson,* in which the court held that emission limitations must be continuous and thus cannot contain exemptions for

[23] The SO_2 1-hour standard is 75 ppb. See 40 CFR 50.17.

[24] See 40 CFR 81.308.

[25] See EPA Comment #3 and EPA Comment #4 of Appendix B in State Submittal document.

emissions during SSM events.[26] Since the 2008 *Sierra Club* decision, EPA has been working to remove or revise these SSM provisions as NSPS are reviewed.[27] Thus, some NSPS have been revised to address the 2008 *Sierra Club* decision, but some have not, and Delaware's sources may be subject to not-yet-updated standards. Despite the fact that EPA has not completed its work removing SSM provisions from every NSPS, the Agency is not willing to approve the removal of SIP approved regulations containing potential startup and shutdown exemptions, on the basis that affected sources would instead be subject to NSPS that also contain SSM exemptions.

Regarding 7 DE Admin Code 1114, the State responded to EPA's comment by noting that there is no discernable relationship between opacity and fine particulate matter emissions, and therefore this regulation cannot be relied on to prevent a source from impacting the NAAQS. EPA assumes Delaware meant that $PM_{2.5}$ cannot be seen as visible emissions because $PM_{2.5}$ is formed after leaving the stack or other source from the precursor emissions of nitrogen oxides (NO_X), VOCs, SO_2, and ammonia. However, PM_{10} can be seen as visible emissions, and the observation of unusual levels of visible emissions could be an indication of a malfunction in the source itself or a pollution control device which may result in increased emissions of one or more of $PM_{2.5}$ precursors. Thus, Delaware's existing opacity limits may be a warning sign of potential increases in the precursor pollutants contributing to $PM_{2.5}$, and therefore may play a role in preventing $PM_{2.5}$ NAAQS exceedances.

Delaware also cites to two other SIP approved regulations, 7 DE Admin. Code 1108 Sulfur Dioxide Emissions from Fuel Burning Equipment, and 7 DE Admin. Code 1146 EGU Multi-Pollutant Regulation, as being adequate to protect the PM NAAQS, along with unidentified NSPS, but does not adequately explain how these regulations or the NSPS control emissions of $PM_{2.5}$ precursors during VE events. In addition, the State still did not provide an explanation of the number and type of Delaware sources subject to 7 DE Admin. Code 1114, how removing this regulation from the Delaware SIP but retaining it as a state regulation with the potential startup and shutdown exemption would affect their emissions and thus affect the NAAQS, and how the Delaware SIP would remain protective of the NAAQS. Further justification is required to explain that this change will not impact attainment and maintenance of the NAAQS, as well as explain how this change meets the applicable legal requirements of the CAA, including CAA section 193.

Lastly, Delaware noted that these regulations that were highlighted in the 2015 SSM SIP Action (1109 and 1114) would be retained at the state level. These state regulations allow Delaware to issue case-by-case permits via 7 DE Admin. Code 1102 to address emissions during startup and shutdown events. Therefore, Delaware would be relying on their own permits to regulate emissions during startup and shutdown events to protect the NAAQS during these periods. Because these regulations (1109 and 1114) provide a potential exemption from the emission limitations during startup and shutdown when the emissions during startup and shutdown are governed by a section 1102 operation permit, but would no longer be in the SIP, neither EPA nor citizens would be able to enforce this alternative limit for startup or shutdown under CAA sections 113 and 304. In effect, Delaware could grant an exemption to formerly federally enforceable emission limits which might be necessary to attain or maintain the NAAQS without justifying these revisions by going through the SIP revision process required by the CAA.

The concerns stated above suggest that the revisions to the Delaware SIP requesting removal of 7 DE Admin. Code 1109, Emissions of Sulfur Compounds From Industrial Operations, and 7 DE Admin. Code 1114, Visible Emissions, from the SIP cannot be approved.

III. Proposed Action

EPA's review of this material indicates Delaware did not provide adequate justification to support the revisions to Delaware's SIP pertaining to 7 DE Admin. Code 1104, 1105, 1109 and 1114 requested in their 2016 SIP submission. Further justification is required to explain that these changes will not impact maintenance of the PM and SO_2 NAAQS. EPA is proposing to disapprove the portion of Delaware's November 22, 2016, SIP submission addressing 7 DE Admin. Code 1104 § 1.5, 7 DE Admin. Code 1105 § 1.7, 7 DE Admin. Code 1109 § 1.4, and 7 DE Admin. Code 1114 § 1.3. EPA is not reopening the 2015 SSM SIP Action and is only taking comment on the issues discussed in this document. These comments will be considered before taking final action.

IV. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a ''significant regulatory action'' as defined by Executive Order 12866 and was therefore not submitted to the Office of Management and Budget for review.

B. Paperwork Reduction Act (PRA)

This proposed action does not impose an information collection burden under the PRA because it does not contain any information collection activities.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action merely proposes to disapprove a SIP submission as not meeting the CAA.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. This action does not apply on any Indian reservation land, any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, or non-reservation areas of Indian country. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those

[26] 551 F.3d 1019 (D.C. Cir. 2008).

[27] 80 FR 33840 at 33890–91 (June 12, 2015).

regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it merely proposes to disapprove a SIP submission as not meeting the CAA.

H. Executive Order 13211, Actions That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.''

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to review state choices, and approve those choices if they meet the minimum criteria of the Act. Accordingly, this proposed action disapproves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law.

The air agency did not evaluate environmental justice considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in this action. Due to the nature of the action being taken here, this action is expected to have a neutral to positive impact on the air quality of the affected area. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving environmental justice for people of color, low-income populations, and Indigenous peoples. This action merely proposes to disapprove a SIP submission as not meeting the CAA.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Adam Ortiz,

Regional Administrator, Region III.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 25

[IB Docket No. 21–456; FCC 23–29; FR ID 147722]

Revising Spectrum Sharing Rules for Non-Geostationary Orbit, Fixed-Satellite Service Systems

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission or we) seeks comment on revisions to its rules governing spectrum sharing among a new generation of broadband satellite constellations to promote market entry, regulatory certainty, and spectrum efficiency. Specifically, the Commission seeks comment on which metrics should be used to define the protection afforded to a non-geostationary satellite orbit, fixed-satellite service (NGSO FSS) system authorized through an earlier processing round from an NGSO FSS system authorized through a later processing round, including the implementation of a degraded throughput methodology.

DATES: Comments are due August 7, 2023. Reply comments are due September 5, 2023.

ADDRESSES: You may submit comments, identified by IB Docket No. 21–456, by any of the following methods:

- *FCC website: http://apps.fcc.gov/ecfs.* Follow the instructions for submitting comments.
- *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: *FCC504@fcc.gov* or phone: 202–418–0530 or TTY: 202–418–0432.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Clay DeCell, 202–418–0803, *Clay.DeCell@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Further Notice of Proposed Rulemaking (FNPRM), FCC 23–29, adopted April 20, 2023, and released April 21, 2023. The full text is available online at *https://docs.fcc.gov/public/attachments/FCC-23-29A1.pdf.* To request materials in accessible formats for people with disabilities, send an email to *FCC504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

Procedural Matters

Comment Filing Requirements

Interested parties may file comments and reply comments on or before the dates indicated in the **DATES** section above. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS).

- *Electronic Filers.* Comments may be filed electronically using the internet by accessing the ECFS: *http://apps.fcc.gov/ecfs.*
- *Paper Filers.* Parties who file by paper must include an original and one copy of each filing.

○ Filings may be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

○ Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD

20701. U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.

○ Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. *See* FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy, Public Notice, DA 20–304 (March 19, 2020), *https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy.*

• *People with Disabilities.* To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), or to request reasonable accommodations for filing comments (accessible format documents, sign language interpreters, CART, etc.), send an email to *FCC504@fcc.gov* or call 202–418–0530 (voice) or 202–418–0432 (TTY).

Ex Parte Presentations

Pursuant to 47 CFR 1.1200(a), this proceeding will be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with 47 CFR 1.1206(b). In proceedings governed by 47 CFR 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (*e.g.,* .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act of 1980, as amended (RFA), requires that an agency prepare a regulatory flexibility analysis for notice and comment rulemakings, unless the agency certifies that ''the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.'' We have prepared an Initial Regulatory Flexibility Analysis (IRFA) concerning the potential impact of the rule and policy changes contained in the FNPRM. The IRFA is set forth in Section IV below. Written public comments are requested on the IRFA. Comments must be filed by the deadlines for comments on the FNPRM indicated on the first page of this document and must have a separate and distinct heading designating them as responses to the IRFA.

Paperwork Reduction Act

This document contains proposed modified information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), we seek specific comment on how we might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Synopsis

I. Introduction

1. In this document, we seek comment on revisions to the Commission's rules governing spectrum sharing among a new generation of broadband satellite constellations to promote market entry, regulatory certainty, and spectrum efficiency through good-faith coordination. Specifically, we seek comment on which metrics should be used to define the protection afforded to an earlier-round NGSO FSS system from a later-round system, including the implementation of a degraded throughput methodology. This document will continue the Commission's efforts to promote development and competition in broadband NGSO satellite services made possible by the new space age.

II. Background

2. This proceeding continues the Commission's recent efforts to update and refine its rules governing NGSO FSS systems. Constellations of NGSO FSS satellites traveling in low- and medium-Earth orbit may provide broadband services to industry, enterprise, and residential customers with lower latency and wider coverage than has previously been available via satellite. The number of applications filed in recent years for NGSO FSS system authorizations, and the number of satellites launched, are unprecedented.

3. *Processing Round Procedure Overview.* Applications for NGSO FSS system licenses and petitions for declaratory ruling seeking U.S. market access for non-U.S.-licensed NGSO FSS systems are considered in groups based on filing date, under a processing round procedure. Pursuant to the Commission's rules, a license application for ''NGSO-like'' satellite operation, including operation of an NGSO FSS system, that satisfies the acceptability for filing requirements is reviewed to determine whether it is a ''competing application'' or a ''lead application.'' A competing application is one filed in response to a public notice initiating a processing round. Any other application is a lead application. Competing applications are placed on public notice to provide interested parties an opportunity to file pleadings in response to the application. Lead applications are also placed on public notice. The public notice for a lead application initiates a processing round, establishes a cut-off date for competing NGSO-like satellite system applications, and provides interested parties an opportunity to file pleadings in response to the application.

4. The Commission reviews each application in the processing round and all the pleadings filed in response to each application. Based upon this review and consideration of such other matters as it may officially notice, the Commission will grant all the applications for which the Commission finds that the applicant is legally, technically, and otherwise qualified, that the proposed facilities and

operations comply with all applicable rules, regulations, and policies, and that grant of the application will serve the public interest, convenience and necessity. The Commission will deny the other applications.

III. Discussion

5. In the Report and Order in FCC 23–29, we adopt a requirement that, prior to commencing operations, an NGSO FSS licensee or market access recipient must either certify that it has completed a coordination agreement with any operational NGSO FSS system licensed or granted U.S. market access in an earlier processing round, or submit a showing for Commission approval that it will not cause harmful interference to any such system with which coordination has not been completed using a degraded throughput methodology. In this FNPRM, we propose to finalize the details of the degraded throughput methodology and invite specific comment on the appropriate values and assumptions to be used in this requirement and whether we should adopt a rule limiting aggregate interference from later-round NGSO FSS systems into earlier-round systems.

6. We expect that the degraded throughput analysis should consist of three steps. The first step is to establish a baseline of performance. To do this, an operator models the earlier-round NGSO system's performance without any additional interference by computing the earlier-round NGSO system's probabilistic C/N level using its published system parameters and a rain-attenuation model. This provides the baseline in terms of: (1) the earlier-round system's time-weighted average throughput (derived by computing the spectral efficiency from the C/N results), and (2) the earlier-round system's link unavailability time percentage (*i.e.,* the percentage of time when the earlier-round system's expected C/N will fall below its minimum usable level). The second step is to repeat the analysis above, adding in the effect of the later-round system's interference into the earlier-round system. This produces a second measurement of time-weighted average throughput and link unavailability time-percentage. The third step is to compare these two sets of figures to measure the effect of any additional interference. If the resulting performance impact exceeds the permissible limits, then the later-round system must adjust its operations to mitigate interference to a permissible level. We seek comment on this process.

7. Specifically, noting that 3% has been suggested as an appropriate value for several aspects of the degraded throughput analysis, we invite comment on the appropriate values for these limits, including their technical justification. What is the appropriate baseline to consider for the earlier-round system, and should it include existing sources of interference, such as interference from GSO networks or intra-system interference? Should a degraded throughput methodology compare an incumbent's baseline level of performance given only natural degradation to that same incumbent's expected performance given a single new entrant's operations? Should we use standardized antenna patterns and noise temperatures for the computation of C/(I+N) in a degraded throughput method? A degraded throughput methodology would rely on detailed technical data about the relevant NGSO FSS systems. How many locations should be evaluated in the methodology, and should the locations include sites outside the United States? How should rain fade conditions in different locations be incorporated into the degraded throughput analysis? What other technical data is needed to appropriately evaluate degraded throughput effects, and how can the Commission ensure that any degraded throughput analysis appropriately protects the specific characteristics of an NGSO system's operations? What role should Schedule S information play in the analysis? Are additional means needed to protect earlier-round systems against loss of synchronization due to potentially high levels of short term interference? Should the earlier-round operator be able to specify two C/N objectives—one relative to the C/N level below which the victim modem would lose lock and another relative to the C/N level below which the victim link would become unavailable because it is not able to offer the minimum wanted throughput? What mitigation techniques would be appropriate if degraded throughput thresholds were not otherwise satisfied?

8. We also note concerns on the record about aggregate interference from multiple NGSO systems. What is a permissible aggregate interference level for protecting priority NGSO systems in a frequency band, as part of an earlier processing round? Should we expect that there will be a maximum number of NGSO FSS systems that can be accommodated in a given frequency band and if so, how should that affect any inter-round protection criteria and the opening of additional processing rounds? How does this methodology accommodate multiple NGSO systems that span multiple processing rounds?

9. Additionally, we seek comment on what criteria should be applied among NGSO systems after the sunset period. We recognize that our default spectrum splitting process is intended to encourage negotiation between systems in the same processing round. Should that also be the default procedure applicable between systems after the sunsetting of interference protection in order to facilitate coordination, or is there an alternative better suited to systems that may be at different stages of deployment? We seek comment on the fit of the default spectrum splitting process to the post-sunset environment. What does co-equal mean when there are established operators on a co-equal basis with newer entrants?

10. *Digital Equity and Inclusion.* Finally, the Commission, as part of its continuing effort to advance digital equity for all, including people of color, persons with disabilities, persons who live in rural or Tribal areas, and others who are or have been historically underserved, marginalized, or adversely affected by persistent poverty or inequality, invites comment on any equity-related considerations and benefits (if any) that may be associated with the proposals and issues discussed herein. Specifically, we seek comment on how our proposals may promote or inhibit advances in diversity, equity, inclusion, and accessibility, as well the scope of the Commission's relevant legal authority.

IV. Initial Regulatory Flexibility Analysis

11. As required by the Regulatory Flexibility Act (RFA), the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this Further Notice of Proposed Rulemaking (FNPRM). The Commission requests written public comments on this IRFA. Commenters must identify their comments as responses to the IRFA and must file the comments by the deadlines provided in the **DATES** section above and as instructed under Comment Filing Requirements above. The Commission will send a copy of the FNPRM, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration. In addition, the FNPRM and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

12. In recent years, the Commission has received an unprecedented number of applications for non-geostationary satellite orbit (NGSO) space station licenses, including for NGSO fixed-satellite service (FSS) systems. Traveling closer to the Earth than a traditional geostationary-satellite orbit (GSO) satellite, low- and medium-orbit NGSO FSS satellite constellations are capable of providing broadband services to industry, enterprise, and residential customers with lower latency and wider coverage than was previously available via satellite. This rulemaking continues to facilitate the deployment of NGSO FSS systems capable of providing broadband and other services on a global basis, and will promote competition among NGSO FSS system proponents, including the market entry of new competitors.

13. This FNPRM seeks public comment on proposed revisions to the Commission's rules governing the treatment NGSO FSS systems filed in different space station processing rounds. Specifically, this FNPRM seeks comment on details regarding the implementation of a degraded throughput methodology. It also seeks comment on what criteria should be applied among NGSO systems after the sunset period.

B. Legal Basis

14. The proposed action is authorized under sections 4(i), 7(a), 303, 308(b), and 316 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 157(a), 303, 308(b), 316.

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rulemaking Will Apply

15. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules and policies, if adopted. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A ''small business concern'' is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

16. *Satellite Telecommunications.* This industry comprises firms ''primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.'' Satellite telecommunications service providers include satellite and earth station operators. The SBA small business size standard for this industry classifies a business with $35 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 275 firms in this industry operated for the entire year. Of this number, 242 firms had revenue of less than $25 million. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 71 providers that reported they were engaged in the provision of satellite telecommunications services. Of these providers, the Commission estimates that approximately 48 providers have 1,500 or fewer employees. Consequently using the SBA's small business size standard, a little more than half of these providers can be considered small entities.

17. *All Other Telecommunications.* The ''All Other Telecommunications'' category is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Establishments providing internet services or voice over internet protocol (VoIP) services via client-supplied telecommunications connections are also included in this industry. The SBA has developed a small business size standard for ''All Other Telecommunications'', which consists of all such firms with annual receipts of $35 million or less. For this category, U.S. Census Bureau data for 2012 show that there were 1,442 firms that operated for the entire year. Of those firms, a total of 1,400 had annual receipts less than $25 million and 15 firms had annual receipts of $25 million to $49, 999,999. Thus, the Commission estimates that the majority of ''All Other Telecommunications'' firms potentially affected by our action can be considered small.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

18. The Commission seeks comment on potential changes to the spectrum sharing requirements among NGSO FSS satellite systems. Specifically, comment is sought on how to implement the degraded throughput methodology. Because of the costs involved in developing and deploying an NGSO FSS satellite constellation, we anticipate that few NGSO FSS operators affected by this rulemaking would qualify under the definition of ''small entity.''

E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

19. The RFA requires an agency to describe any significant, specifically small business, alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): ''(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rules for such small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.''

20. The Commission adopted a requirement that, prior to commencing operations, an NGSO FSS licensee or market access recipient must either certify that it has completed a coordination agreement with any operational NGSO FSS system licensed or granted U.S. market access in an earlier processing round, or submit a showing for Commission approval that it will not cause harmful interference to any such system with which coordination has not been completed using a degraded throughput methodology. This FNPRM invites comment on which specific metrics should be used to define the protection afforded to an earlier-round NGSO FSS system from a later-round system.

21. The Commission seeks comment on the appropriate values and assumptions to be used with the degraded throughput requirement. The Commission also seeks comment on whether to adopt a rule limiting aggregate interference from NGSO FSS systems that were authorized in a later processing round into NGSO FSS systems authorized in an earlier processing round. The Commission also seeks comment on alternative means of

protection of earlier-round NGSO FSS systems.

22. The FNPRM also seeks comment on whether the Commission should expect that there will be a maximum number of NGSO FSS systems that can be accommodated in a given frequency band and if so, how should that affect any inter-round protection criteria and the opening of additional processing rounds. The FNPRM also seeks comment on how the degraded throughput methodology accommodates multiple NGSO systems that span multiple processing rounds.

23. To assist in the Commission's evaluation of the economic impact on small entities, as a result of actions that have been proposed in the FNPRM, and to better explore options and alternatives, the Commission seeks comment on whether any of the burdens associated with the filing, recordkeeping and reporting requirements described above can be minimized for small entities. Additionally, the Commission seeks comment on whether any of the costs associated with any of the proposed requirements to eliminate unlawful robocalls can be alleviated for small entities. The Commission expects to more fully consider the economic impact and alternatives for small entities based on its review of the record and any comments filed in response to the FNPRM and this IRFA.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

24. None

V. Ordering Clauses

25. *It is ordered*, pursuant to Sections 4(i), 7(a), 10, 303, 308(b), and 316 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 157(a), 160, 303, 308(b), 316, that this Further Notice of Proposed Rulemaking *is adopted*.

26. *It is further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center will send a copy of this Further Notice of Proposed Rulemaking, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration, in accordance with Section 603(a) of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq*.

Federal Communications Commission.

Marlene Dortch,

Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

49 CFR Part 372

[Docket No. FMCSA–2023–0007]

RIN 2126–AC57

Exemption From Operating Authority Regulations for Providers of Recreational Activities

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking.

SUMMARY: FMCSA proposes the implementation of the statutory exemption from its operating authority registration rules for providers of recreational activities. The exemption would apply to motor carriers operating a motor vehicle designed or used to transport between 9 and 15 passengers (including the driver), whether operated alone or with a trailer attached to the transport vehicle, if the motor vehicle is operated by a person that provides recreational activities within a 150 air-mile radius of the location at which passengers initially boarded the motor vehicle at the beginning of the trip. FMCSA also proposes to define *recreational activities* to clarify the scope of this exemption.

DATES: Comments must be received on or before August 21, 2023.

ADDRESSES: You may submit comments identified by Docket Number FMCSA–2023–0007 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov/docket/FMCSA-2023-0007/document.* Follow the online instructions for submitting comments.
- *Mail:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.
- *Fax:* (202) 493–2251.

FOR FURTHER INFORMATION CONTACT: Mr. Antonio Harris, Registration, Licensing and Insurance Division, Office of Research and Registration, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001; (202) 366–2964; *antonio.harris@dot.gov.* If you have questions on viewing or submitting material to the docket, call Dockets Operations at (202) 366–9826.

SUPPLEMENTARY INFORMATION: FMCSA organizes this notice of proposed rulemaking (NPRM) as follows:

I. Public Participation and Request for Comments

A. Submitting Comments

If you submit a comment, please include the docket number for this NPRM (FMCSA–2023–0007), indicate the specific section of this document to which your comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *https://www.regulations.gov/docket/FMCSA-2023-0007/document,* click on this NPRM, click ''Comment,'' and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

FMCSA will consider all comments and material received during the comment period.

Confidential Business Information (CBI)

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to the NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to the NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission that constitutes CBI as ''PROPIN'' to indicate it contains proprietary information. FMCSA will treat such marked submissions as confidential under the Freedom of Information Act, and they will not be placed in the public docket of the NPRM. Submissions containing CBI should be sent to Mr. Brian Dahlin, Chief, Regulatory Evaluation Division, Office of Policy, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001. Any comments FMCSA receives not specifically designated as CBI will be placed in the public docket for this rulemaking.

B. Viewing Comments and Documents

To view any documents mentioned as being available in the docket, go to *https://www.regulations.gov/docket/FMCSA-2023-0007/document* and choose the document to review. To view comments, click this NPRM, then click ''Browse Comments.'' If you do not have access to the internet, you may view the docket online by visiting Dockets Operations in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

C. Privacy

DOT solicits comments from the public to better inform its regulatory process, in accordance with 5 U.S.C. 553(c). DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL 14—Federal Docket Management System), which can be reviewed at *https://www.govinfo.gov/content/pkg/FR-2008-01-17/pdf/E8-785.pdf.*

II. Executive Summary

A. Purpose and Summary of the Regulatory Action

Section 23012 of the Infrastructure Investment and Jobs Act (IIJA) (Pub. L. 117–58, 135 Stat. 429 (H.R. 3684, Nov. 15, 2021)) amended 49 U.S.C. 13506 by adding, in paragraph (b)(4), a new exemption from FMCSA's operating authority registration requirements. FMCSA proposes the addition of new regulatory text implementing this statutory exemption. The exemption from operating authority registration applies to motor carriers operating a motor vehicle designed or used to transport between 9 and 15 passengers (including the driver), whether operated alone or with a trailer attached to the transport vehicle, if the motor vehicle is operated by a person [1] that provides recreational activities and the transportation is provided within a 150 air-mile radius of the location at which passengers initially boarded the motor vehicle at the outset of the trip.

FMCSA also proposes to define *recreational activities* to clarify the scope of this exemption. The statute, which requires that the motor vehicle be operated ''by a person that provides recreational activities,'' does not define *recreational activities.* The proposed definition would clarify the types of recreational activities the Agency has determined would qualify for the exemption in 49 U.S.C. 13506(b)(4). FMCSA limited the proposed definition of *recreational activities* to the types of activities that Congress outlined in the IIJA for another section that uses this term. Section 11512 provided examples of ''groups representing recreational activities and interests'' in subsection (c)(4) which provided some insight as to legislative intent for the term *recreational activities* in section 23012. The definition FMCSA proposes in implementing section 23012 includes activities Congress mentioned in section 11512 and also describes activities that fall outside the intended scope of the term. This language is intended to provide context of the activities within the scope of the exemption, based on the intent of Congress, and to allow sufficient flexibility for analysis of the term's applicability to future activities.

B. Costs and Benefits

The cost impacts of the proposed definition include changes in paperwork, fees, and insurance costs associated with maintaining operating authority. Because there is no pre-existing definition of *recreational activities,* motor carriers may be interpreting their eligibility for the operating authority exemption in varying ways. Depending on current interpretations, this proposed rule would either increase, decrease, or have no incremental impact on the degree to which the operating authority exemptions are used relative to the baseline. Differences in interpretation between regulated entities and enforcement officials may be hindering consistent enforcement practices, thereby impacting business-related decisions in providing transportation for recreational activities. This rulemaking would resolve this information asymmetry and enforcement differences by creating a common understanding between FMCSA and motor carriers. Because this rulemaking may also lead to an increase in exemption use, it would benefit existing carriers by improving the efficiency of their business operations and increasing both consumer and producer surplus. For new potential providers of recreational activities that were not aware of this exemption, this rulemaking may encourage new entrants into the field.

IV. Legal Basis for the Rulemaking

Section 23012 of the IIJA (Pub. L. 117–58, 135 Stat. 429 (H.R. 3684, Nov. 15, 2021)) amended 49 U.S.C. 13506 by adding a new exemption from the requirement to obtain operating authority registration for ''providers of recreational activities'' operating passenger vehicles designed or used to transport between 9 and 15 passengers (including the driver) (see 49 U.S.C. 13506(b)(4)). The statute, which requires that the motor vehicle be operated ''by a person that provides recreational activities,'' does not define *recreational activities.* This NPRM proposes to define *recreational activities* to clarify the scope of the exemption applicability.

Under 49 Code of Federal Regulations (CFR) 1.87(a)(5), the authority of the Secretary of the Department of Transportation (the Secretary) to carry out the functions relating to the registration requirements in 49 U.S.C. 13901 and 13902 is delegated to the FMCSA Administrator. Sections 13901 and 13902 generally require that any person that wishes to provide transportation subject to jurisdiction under subchapter I of chapter 135 [2] must be registered as a *motor carrier,* defined in 49 U.S.C. 13102(14) as ''a person providing motor vehicle transportation for compensation.'' The requirements of these sections, which are enforced under § 392.9a (''Operating authority''), are the basis for the rules governing applications for operating authority registration in 49 CFR part 365.

V. Background

Before commencing operations, any person desiring to engage in for-hire interstate transportation of passengers, regardless of vehicle size or passenger seating capacity, must first obtain operating authority registration, unless a specific exemption applies (49 U.S.C. 13102 (14), 13501, 13506, 13901, 13902, and 49 CFR part 365). The relevant regulations governing such operations derive from Title 49, Subtitle IV, Part B, and are frequently referred to as the ''commercial regulations,'' (49 U.S.C. 13102(14), 13902 and 49 CFR part 365). Historically, the regulations promulgated pursuant to this authority were largely economic in nature and did not contain new safety requirements. Today, the most substantial regulatory requirements remaining under this authority require for-hire non-exempt motor carriers to maintain evidence of financial responsibility on file with FMCSA at all times, regardless of whether the carrier is actively operating, and to maintain an active process agent filing designating an agent for the receipt of service of process in every state (49 CFR part 366 and 49 CFR 387.301T).[3] The exemptions from the commercial regulations, including the exemption for providers of recreational activities, are enumerated in 49 U.S.C. 13506 and codified in 49 CFR part 372.

Congress adopted multiple exemptions to these commercial regulations that provided financial relief for certain industries while still maintaining safety oversight over the same operators. Exemptions from the commercial regulations do not impede the Agency's oversight of operations subject to the Agency's separate safety jurisdiction codified in the Motor Carrier Act of 1935 (Pub. L. 74–255, 49 Stat. 543, Aug. 9, 1935), as amended (the 1935 Act) (codified in 49 U.S.C. 31502); the Motor Carrier Safety Act of 1984 (Pub. L. 98–554, Title II, 98 Stat. 2832, Oct. 30, 1984), as amended (codified in 49 U.S.C. chapter 311); and the Commercial Motor Vehicle Safety Act of 1986 (Pub. L. 99–570, Title XII, 100 Stat. 3207–170, Oct. 27, 1986), as amended (codified in 49 U.S.C. chapter 313). A carrier may be exempt from the commercial regulations, relieving them of the obligation to obtain operating authority, file evidence of financial responsibility, and designation of a process agent. The statutory exemptions in 49 U.S.C. 13506 however, relieve the carrier only of the obligation to file with FMCSA evidence of financial responsibility, not the obligation to maintain financial responsibility when engaged in operations. Thus, if the carrier is operating a commercial motor vehicle as defined in 49 U.S.C. chapter 311, the carrier is still required to maintain minimum levels of financial responsibility in order to operate. (49 U.S.C. 31138 and 49 CFR part 387, subpart B).

The operating authority registration required under 49 U.S.C. 13901, 13902, and 13906, provides FMCSA with information about motor carriers and their operations. Although the requirements for operating authority registration apply only to carriers subject to the Agency's commercial regulations, they also provide FMCSA with an opportunity to evaluate those potential new entrant motor carriers' willingness and ability to comply with all commercial and safety regulations (49 U.S.C. 13902). This opportunity, consistent with the Agency's mission to reduce crashes and fatalities, allows FMCSA to prevent carriers who may pose a significant safety risk from entering the industry. Motor carriers operating vehicles for compensation, in interstate commerce and not subject to exemption are prohibited from operating without the required operating authority or beyond the scope of the operating authority granted (§ 392.9a). A motor carrier that violates this provision shall be ordered out of service and may be subject to penalties (§ 392.9a(b)).

The Agency, however, also requires registration under its safety jurisdiction, 49 U.S.C. 31134. As a result, if the carrier has registered and received a USDOT number under FMCSA's safety jurisdiction, the Agency will still maintain adequate information to monitor the motor carrier's safety performance and compliance, even if the carrier is not required to obtain operating authority registration.

FMCSA is required to register a motor carrier for operating authority registration under 49 U.S.C. 13902 only if the applicant is willing and able to comply with all statutory and regulatory requirements for registration (49 U.S.C. 13902, 49 U.S.C. 13906, and 49 CFR part 365). To obtain operating authority registration, each applicant is required to file the appropriate form for the scope of its operations (*e.g.,* to operate as a motor carrier of passengers). Applicants that have never held a USDOT number or any other registration issued by FMCSA must file the Unified Registration System (URS) online application (Form MCSA–1) to obtain a USDOT number and register for operating authority. Applicants that already have a USDOT number but desire to expand to an operation requiring operating authority, such as transporting passengers in interstate commerce for compensation, must file the ''Application for Motor Passenger

[2] Absent an exemption, the Secretary has jurisdiction over transportation by motor carrier and the procurement of that transportation, to the extent that passengers, property, or both, are transported by motor carrier in interstate commerce (49 U.S.C. 13501). This authority has been delegated to the FMCSA Administrator under 49 CFR 1.87(a)(3).

[3] Though providers of recreational activities may not be required to maintain an active process agent filing with FMCSA, other State and Federal law may also require those providers to maintain a process agent in order to engage in business in more than one State. Accordingly, any cost associated with maintaining a process agent, generally, would not automatically be alleviated by this rulemaking.

Carrier Authority'' (Form OP–1(P)), or other appropriate OP–1 series form for the proposed operation to register for operating authority (§ 365.105T), for a fee, currently $300. Again, among other requirements, the statutory requirements for registration require that the applicant have on file with FMCSA proof of liability insurance meeting the minimum levels of financial responsibility required (49 U.S.C. 13902, 49 U.S.C. 13906, and 49 CFR part 365). Motor carriers must submit the ''Motor Carrier Automobile Bodily Injury and Property Damage Liability Certificate of Insurance'' (Form BMC–91, for a single insurance provider, or Form BMC–91X, for an aggregation of insurance coverage) to satisfy the financial responsibility requirements. A registration remains in effect only as long as the registrant continues to satisfy these financial responsibility requirements in 49 U.S.C. 13906.

Before the enactment of section 23012 of the IIJA, a provider of recreational activities operating as a motor carrier of passengers was required to maintain insurance at the minimum prescribed levels [4] for the entire year—including the months during which the provider was not operating. As a result, some providers of recreational activities were voluntarily revoking their operating authority registrations [5] during the off-season months by filing Form OCE–46 so that they did not need to maintain insurance at the minimum prescribed levels during those months. To resume operations, the providers were then required to obtain adequate financial responsibility, ensure evidence of financial responsibility is filed with FMCSA on Form BMC–91 or BMC–91X, and request to reinstate their operating authority registrations by submitting the ''Motor Carrier Records Change'' (MCSA–5889) either online or by paper during the months when they were operating, for an additional fee, currently $80.[6]

Section 23012 of the IIJA created a new exemption from the requirement to obtain FMCSA operating authority registration for providers of recreational activities operating a motor vehicle designed or used to transport not fewer than 9, and not more than 15 passengers (including the driver) whether operated alone or with a trailer [7] attached to the transport vehicle if:

1. The motor vehicle is operated by a person that provides recreational activities;
2. The transportation is provided within a 150 air-mile radius of the location at which passengers initially boarded the motor vehicle at the outset of the trip; and
3. In the case of a motor vehicle transporting passengers over a route between a place in a State and a place in another State, the person operating the motor vehicle is lawfully providing transportation of passengers over the entire route in accordance with applicable State law.

In this NPRM, FMCSA is undertaking only to clarify the term *recreational activities,* as the Agency believes that the other provisions in section 23012 are unambiguous.

The recreational activity industry is comprised of numerous companies, associations, and organizations that focus primarily on outdoor activities. Outdoor activities may include hunting, fishing, trapping, camping, exploring caves, nature study, bicycling, horseback riding, bird watching, motorcycling, ballooning, hang-gliding, hiking, tobogganing, sledding, sleigh riding, snowmobiling, skiing, skating, water sports, rock climbing, climbing observation towers, sport shooting, whitewater rafting, and other outdoor sport, game, or educational activities.

Congress did not define the term *recreational activities* in the IIJA and there is no current definition in statute or regulation. The lack of a definition of *recreational activities* has caused confusion for the industry and safety oversight agencies that may result in myriad interpretations and a patchwork of compliance. This NPRM proposes to define *recreational activities* consistent with the Agency's understanding of congressional intent when establishing the exemption.[8]

VI. Discussion of Proposed Rulemaking

FMCSA proposes a new § 372.113 that outlines the exemption from operating authority registration for providers of recreational activities in 49 U.S.C. 13506(b)(4). This new section would reflect the statutory language and incorporate the exemption into the FMCSRs.

The Agency also proposes a new definition of *recreational activities* to § 372.107 which would provide a clear description of the types of activities that qualify for the exemption in 49 U.S.C. 13506(b)(4). Based on the statute itself and Congress' use of the term elsewhere in the IIJA, FMCSA believes Congress intended to provide an exemption to providers of recreational activities that consist of outdoor experiences or excursions typically of a physical or athletic nature that do not have transportation as an integral part of the activity itself.

In reaching this conclusion, FMCSA has drawn from the canons of statutory construction and applied the presumption of consistent usage. The U.S. Supreme Court has framed this presumption as ''a natural presumption that identical words used in different parts of the same act are intended to have the same meaning'' (*Atlantic Cleaners & Dryers, Inc.* v. *United States,* 286 U.S. 427, 433 (1932)). The presumption should be ''applied . . . pragmatically'' (Antonin Scalia & Bryan A. Garner, Reading Law: The Interpretation of Legal Texts 171 (2012)). FMCSA's interpretation of the types of activities Congress intended to include in the term *recreational activities* is therefore potentially informed by Congress' use of the same term in section 11512 of the IIJA, which directs the Secretary to conduct a nonhighway recreational fuel study. Subsection (c)(4) states the Secretary may consult with groups representing recreational activities and interests, including hiking, biking and mountain biking, horseback riding, water trails, snowshoeing, cross-country skiing, snowmobiling, off-highway motorcycling, all-terrain vehicles and other offroad motorized vehicle activities, and recreational trail advocates (23 U.S.C. 203 note).

The application of this presumption does have limitations. Although the term *recreational activities* is found within the same act, it is used in

[4] The minimum levels of financial responsibility required to be maintained by for-hire motor carriers of passengers operating motor vehicles in interstate or foreign commerce can be found in 49 CFR part 387, subpart B. Section 387.31 prohibits a motor carrier from operating a motor vehicle transporting passengers until the motor carrier has obtained and has in effect the minimum levels of financial responsibility as forth in § 387.33. The minimum level of financial responsibility is $1,500,000 for for-hire motor carriers of passengers operating a vehicle with a seating capacity of 15 passengers or less, including the driver (§ 387.33T).

[5] It should be noted that these revocations did not affect the status of each carrier's safety registration (USDOT number registration under 49 U.S.C. 31134), which remained intact and was still required to be updated biennially by the motor carrier (§ 390.201).

[6] The MCSA–5889 may be submitted by mail, fax, or filled out online. *https://ask.fmcsa.dot.gov/app/answers/detail/a_id/213/session/L3RpbWUvMTQ0Nzg3MzYwOS9zaWQvQXlsamRRQm0=.*

[7] The exemption includes passenger carrier operators who may also be required to have and maintain operating authority to transport property. FMCSA recognizes that a property carrier may also be transporting property for hire within the scope of its recreational activities operation. The Agency believes that the number of carriers requiring additional operating authority to transport property, however, is extremely limited.

[8] As explained in section VI of this rulemaking, FMCSA's interpretation of the term *recreational activities* has been informed by the legislative history of the IIJA. This interpretation has been further informed by the Agency's experiences in applying the operating authority requirements, particularly by the questions and concerns FMCSA has received from motor carriers regarding voluntary revocation of operating authority, *e.g.,* carriers wishing to cancel or decrease their insurance during the off season.

different titles of this lengthy legislation, and applies to different operating administrations within DOT. Nonetheless, while the use of this term in section 11512 is not dispositive of its meaning in section 13506, it can still be potentially informative of Congress' intent. Applying the presumption of consistent usage pragmatically, the language in section 11512 potentially provides insight into the types of activities that Congress intended to be covered by the term *recreational activities* under section 13506 of the IIJA. Accordingly, FMCSA limited the proposed definition of *recreational activities* to similar types of activities, as informed by FMCSA's experience.[9]

Based on these findings, FMCSA proposes to define *recreational activities* which qualify for the exemption under 49 U.S.C. 13506(b)(4) as

> . . . activities consisting of an outdoor experience or excursion typically of a physical or athletic nature which require transportation for the sole purpose of moving customers to another location or locations where the experience or excursion will take place and collecting those customers to transport them back to the place of initial boarding or another outpost of the motor carrier.

Recreational activities under this proposed definition would include things such as hiking, biking, horseback riding, canoeing, whitewater rafting, water trails, tubing, skiing, snowshoeing, snowmobiling, hunting, fishing, mountain climbing, and swimming. While this list of activities in the proposed definition is not all inclusive, it provides sufficient examples to clarify the specific types of activities that would qualify for the exemption.

FMCSA believes that, by including the language a person ''that provides'' recreational activities in the exemption, Congress intended to limit the exemption to only those persons that are actually providing recreational activities. There is no reason to infer that Congress intended for the ''providers of recreational activities'' exemption to apply to persons providing transportation as their core business or providing transportation concurrently with an activity (where the transportation is no longer incidental to the activity itself). These types of activities are distinct from those contemplated by Congress as exempt because the act of transporting passengers from one location to another is the central aspect of the service that the motor carriers are providing.

For instance, FMCSA does not believe Congress intended to exempt activities where the service provided by the motor carriers mainly focuses on transportation from one location to another. In such cases, the motor carrier's business is in fact selling transportation—not providing recreational activities. A bus company offering scheduled route service with multiple stops would not fall within the exemption, for example, merely because one of the scheduled stops was at or near a water park or a horseback riding stable. Likewise, motor carriers that advertise and provide alcohol, music, or other ''party'' activities on board the vehicle as the principal activity or purpose of the transportation would not be eligible for the exemption.[10] In situations like those described above, the activity cannot be completed and has no purpose without the transportation. The transportation in such circumstances is integral to the activities, rather than incidental. Accordingly, the proposed definition in § 372.107 would explicitly exclude any activity for which: (1) the activity offered or sold is occurring simultaneously with the transportation; or (2) the transportation is the primary service offered for sale. FMCSA solicits comment on whether the exclusions at the end of the proposed definition increase clarity. Should the agency include these exclusions at the end of the definition, remove them from the definition, or take another approach to communicate which activities would not fall within the definition in a final rule?

The exemption in 49 U.S.C. 13506(b)(4) is already in effect. This rulemaking is intended to codify the statute and provide clarity regarding which motor carriers qualify for the exemption. Motor carriers that qualify for the exemption in 49 U.S.C. 13506(b)(4) are not subject to the requirement to register for or maintain operating authority as a motor carrier of passengers.

New motor carriers that need a USDOT number, even those that qualify for the exemption, would be required to register via URS (MCSA–1). Such carriers would indicate in the Operation Classification section that they will be transporting passengers for compensation but that they are exempt pursuant to 49 U.S.C. 13506. Motor carriers with a USDOT number that do not currently have operating authority as motor carriers of passengers and would qualify for the exemption do not have to file Form OP–1(P) to obtain operating authority.

Motor carriers that currently have operating authority as motor carriers of passengers and qualify for the exemption are able to voluntarily revoke their operating authority under 49 U.S.C. 13905(d) as discussed in the background section above. After doing so, these motor carriers are no longer required to obtain or reinstate operating authority and thus, no longer required to have their insurance coverage or process agent designation on file with FMCSA (49 CFR parts 365 and 366 and § 387.301T). If a motor carrier does not voluntarily revoke its operating authority registration and fails to maintain evidence of the required level of insurance coverage on file with FMCSA, its operating authority registration will be revoked involuntarily by FMCSA.

These motor carriers would no longer need to have evidence of financial responsibility on file with FMCSA (through either Form BMC–91 or BMC–91X). However, the inapplicability of the insurance coverage filing requirement in 49 CFR part 365 and § 387.301T does not affect a motor carrier's obligation to maintain minimum levels of financial responsibility as set forth in § 387.33. As discussed above in the background section, a provider of recreational activities operating as a motor carrier of passengers is required to maintain insurance at the minimum prescribed levels while they are in operation. Additionally, a motor carrier that is no longer subject to Federal insurance requirements while not in operation may nonetheless still be required to maintain insurance coverage to meet applicable State requirements in those States in which the motor carrier operates.

[9] See Footnote 8. For example, in response to a DOT notice requesting that the public identify and provide input on the Department's existing guidance documents that are good candidates for repeal, replacement, or modification (84 FR 1820, Feb. 5, 2019), the America Outdoors Association (AOA) submitted an undated comment to the Docket (received Apr. 8, 2019) requesting that FMCSA amend its guidance on operating authority, stating that the costs to reinstate operating authority were an unnecessary expense with no added safety benefit. See *https://www.regulations.gov/comment/DOT-OST-2017-0069-2865*. (The comment is also available in the docket for this rulemaking.) AOA requested, in part, that FMCSA provide an exemption from the operating authority requirements for transportation by 9 to 15 passenger vehicles, when such transportation is provided by an entity that provides recreational activities, is not for direct compensation, and is provided entirely within a 150 air-mile radius of trip origination, provided that drivers carry appropriate commercial driver's licenses if needed, the State in which the vehicle is registered has adopted Federal inspection standards, and the operator is in compliance with State requirements.

[10] FMCSA specifically mentions these activities because the Agency has received questions from motor carriers regarding the applicability of the exemption to these activities.

Some motor carriers may have already voluntarily revoked their operating authority registration by filing Form OCE–46 under the exemption in 49 U.S.C. 13506(b)(4). Some of these motor carriers may have correctly revoked their operating authority because they meet the requirements in 49 U.S.C. 13506(b)(4) and provide transportation for activities that fall under the proposed definition in this rulemaking. If the Agency were to issue its proposed definition as a final rule, these exempt motor carriers would be permitted to continue to operate without operating authority. Other motor carriers may have incorrectly revoked their operating authority because they provide transportation for one or more activities that they mistakenly believed would fall under the scope of the statute, but do not, in fact, fall within such scope as clarified by the proposed definition in this rulemaking. These motor carriers are currently required, and would continue to be required, to reinstate their operating authority registration and have their insurance coverage on file with FMCSA in order to continue operating.[11]

VII. Section-by-Section Analysis

This section-by-section analysis describes the proposed changes in numerical order.

Section 372.107 Definitions

FMCSA would add a new paragraph (i), which would contain a definition for *recreational activities.*

Section 372.113 Providers of Recreational Activities

FMCSA would add a new § 372.113 to subpart A of 49 CFR part 372. This new section would outline the exemption from operating authority registration in 49 U.S.C. 13506(b)(4).

VIII. Regulatory Analyses

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review), E.O. 13563 (Improving Regulation and Regulatory Review), E.O. 14094 (Modernizing Regulatory Review), and DOT Regulatory Policies and Procedures

FMCSA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, E.O. 13563 (76 FR 3821, Jan. 21, 2011), Improving Regulation and Regulatory Review, and by E.O. 14094 (88 FR 21879, Apr. 11, 2023), Modernizing Regulatory Review. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this notice of proposed rulemaking is not a significant regulatory action under section 3(f) of E.O. 12866, as supplemented by E.O. 13563 and E.O. 14094, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. Accordingly, OMB has not reviewed it under that E.O.

Purpose

This rulemaking would codify the exemption for providers of recreational activities in regulation and define *recreational activities* to clarify the scope of this exemption by providing a clear description of what types of recreational activities do and do not qualify for the exemption in 49 U.S.C. 13506(b)(4). This would ensure that providers of recreational activities are aware of their eligibility for the exemption from filing for operating authority that FMCSA proposes to add in new § 372.113. Specifically, this rulemaking would affect motor carriers operating a motor vehicle designed or used to transport between 9 and 15 passengers (including the driver), whether operated alone or with a trailer attached to the transport vehicle, if the motor vehicle is operated by a person that provides recreational activities and the transportation is provided within a 150 air-mile radius of the location at which passengers initially boarded the motor vehicle at the outset of the trip.

This proposed rule is to provide clarity to both motor carriers and enforcement officials regarding which carriers qualify for the new exemption in section 23012 of the IIJA as of November 15, 2021. Because Congress did not define *recreational activities* and there is no pre-existing definition of *recreational activities* in statute or regulation, FMCSA proposes bringing the FMCSRs into alignment with the IIJA's exemption. This clarity would resolve possible information asymmetry currently affecting the regulated industry and enforcement officials as to which carriers qualify for the operating authority exemption.

Baseline

For the purposes of this analysis, the changes proposed in this rule are compared to the baseline established by section 23012 of the IIJA and the current requirements for providers of recreational activities under 49 U.S.C. 13901 and 13902 and 49 CFR part 365. As discussed above, the IIJA created a new exemption from the requirement to obtain FMCSA operating authority registration for providers of recreational activities. Accordingly, this exemption has been available to these motor carriers since the IIJA was enacted on November 15, 2021. Therefore, the incremental impacts of this proposed rule relative to the baseline lie in how the affected industry and enforcement officials have been interpreting the term in the absence of a definition in the FMCSRs.

Uncertainties

The Agency relies on the Motor Carrier Management Information System (MCMIS) database to obtain information on commercial motor carriers subject to the FMCSRs. While MCMIS does contain data on passenger vehicle size (*e.g.,* weight and capacity) and type, it does not track industry type, nor whether an operating authority exemption is applicable. Consequently, the Agency knows neither the magnitude of the population that would be affected by this rulemaking, nor the degree to which passenger carriers are currently taking advantage of the exemption. Therefore, FMCSA describes how different carriers would be impacted by costs and benefits on a per-unit basis, depending on their current behavior. The Agency invites the public to provide information on the size of this industry.

Costs

The resulting cost impacts of the definitional clarification proposed in this rulemaking include changes in paperwork, fees, and insurance costs associated with maintaining operating authority. Because there is no pre-existing definition of *recreational activities,* motor carriers may be interpreting their eligibility for the operating authority exemption in varying ways. Depending on current interpretations, this proposed rule would either increase, decrease, or have no incremental impact on the degree to which the operating authority exemptions are used relative to the baseline. Because FMCSA is unable to ascertain how various carriers interpreted this exemption set forth by section 23012 of the IIJA in 2021, the Agency estimates the impacts of this rulemaking based on four hypothetical scenarios. The Agency also invites the public to provide additional information on the degree to which this exemption is being used.

Forms

Currently, there are several forms that providers of recreational activities are responsible for submitting to FMCSA in

[11] Motor carriers may reinstate their operating authority using the procedure detailed at *https://ask.fmcsa.dot.gov/app/answers/detail/a_id/213/~/how-do-i-make-my-mc%2Fff%2Fmx-number-active-%28request-to-reinstate-or-reactivate.*

order to maintain operating authority registration. As detailed later in this analysis, the use of these forms, as explained in table 1, may change as a result of this proposed rule, depending on how the affected carriers are interpreting this exemption.

TABLE 1—FORMS CURRENTLY USED IN MAINTAINING OPERATING AUTHORITY

Form	Affected groups
Motor Carrier Automobile Bodily Injury and Property Damage Liability Certificate of Insurance (BMC–91 or BMC–91X).	Carriers that must provide proof of liability insurance meeting the minimum levels of financial responsibility.
Motor Carrier Records Change (MCSA–5889)	Carriers reinstating operating authority.
Request for Revocation of Authority Granted (OCE–46)	Carriers voluntarily revoking operating authority.
Application for Motor Passenger Carrier Authority (OP–1(P))	Carriers with an existing USDOT number wishing to expand to an operation requiring operating authority.

Tables 2 and 3 display the paperwork burden of these forms to private entities and to the Government, respectively. These estimates are based on the Information Collection Request (ICR) supporting statements associated with each form. For example, table 2 shows that Forms BMC–91 and BMC–91X are estimated to take 10 minutes to complete by an insurance claims and policy processing clerk at a wage rate [12] of $38.72, leading to a paperwork burden of $6 (10 minutes × $38.72 = $6).[13] [14]

TABLE 2—PAPERWORK COSTS TO PRIVATE SECTOR (2021$)

Paperwork	Wage	Hours to submit form	Cost per form	Filing fee	Total cost
Forms BMC–91 or BMC–91X by insurance claims processer	$38.72	0.17	$6	.....	$6
Form MCSA–5889 by office clerk	31.90	0.25	8	80	88
Form OCE–46 by office clerk	31.90	0.25	8	.....	8
Form OP–1(P) by office clerk	31.90	2	64	300	364

Estimates may not total due to rounding.

TABLE 3—PAPERWORK COSTS TO GOVERNMENT (2021$)

Paperwork	GS–9, step 5 wage	Hours to submit form	Cost per form
Form MCSA–5889	$70.31	0.25	$18
Form OCE–46	70.31	0.25	18
Form OP–1(P)	70.31	6.5	457

Estimates may not total due to rounding.

FMCSA computes its estimates of labor costs using data gathered from several sources. Labor costs comprise wages, fringe benefits, and overhead. Fringe benefits include paid leave, bonuses and overtime pay, health and other types of insurance, retirement plans, and legally required benefits (Social Security, Medicare, unemployment insurance, and workers compensation insurance). Overhead includes any expenses to a firm associated with labor that are not part of employees' compensation; this typically includes many types of fixed costs of managing a body of employees, such as management and human resource staff salaries or payroll services. The economic costs of labor to a firm should include the costs of all forms of compensation and labor-related expenses. For this analysis, costs of labor to a firm have been calculated relative to total compensation (base wages, plus fringe benefits, plus overhead).

The primary source for industry wages is the median hourly wage data (May 2021) from the U.S. Department of Labor (DOL), Bureau of Labor Statistics (BLS), Occupational Employment and Wage Statistics (OEWS).[15]

BLS does not publish data on fringe benefits for specific occupations, but it does for the broad industry groups in its Employer Costs for Employee Compensation release. For office clerk employees, this analysis uses an average hourly wage of $26.45 and average hourly benefits of $13.78 for private industry workers in ''transportation and warehousing'' [16] to estimate that fringe benefits are equal to 52 percent ($13.78 ÷ $26.45) of wages. For insurance claims processors, this regulatory impact analysis uses an average hourly wage of $33.93 and average hourly benefits of $16.92 for private industry workers in ''financial activities'' [17] to estimate that

[12] DOL, BLS. Occupational Employment and Wage Statistics (OEWS). National. May 2021. 43–9041 Insurance Claims and Policy Processing Clerks. Available at: *https://www.bls.gov/oes/current/oes439041.htm* (accessed Jan. 5, 2023).

[13] This estimate is based on the calculations used in the ICR titled, ''Financial Responsibility Motor Carriers, Freight Forwarders and Brokers,'' covered by OMB Control Number 2126–0017.

[14] The supporting statement for the ''Financial Responsibility Motor Carriers, Freight Forwarders and Brokers'' ICR estimates Government costs for Forms BMC–91 and BMC–91X at $0, as they are filed electronically.

[15] DOL, BLS. *Occupational Employment and Wage Statistics (OEWS). National. May 2021.* Available at: *https://www.bls.gov/oes/current/oes_nat.htm/oesm21nat.zip* (accessed Apr. 12, 2022).

[16] DOL, BLS. *Table 4: Employer costs for Employee Compensation for private industry workers by occupation and industry group, Dec 2019.* Available at: *https://www.bls.gov/news.release/archives/ecec_03192020.pdf* (accessed Apr. 13, 2022).

[17] Ibid.

fringe benefits are equal to 50 percent ($16.92 ÷ $33.93) of wages.

For estimating the overhead rates on wages, the Agency used industry data gathered for the Truck Costing Model developed by the Upper Great Plains Transportation Institute, North Dakota State University as a proxy for the overhead cost of employees in the transportation intermediary and surety and trustee industries.[18] Research conducted for this model found an average cost of $0.107 per mile of commercial motor vehicle operation for management and overhead, and $0.39 per mile for labor, indicating an overhead rate of 27 percent (27 percent = $0.107 ÷ $0.39, rounded to the nearest whole percent).

It is assumed that FMCSA reviewers will be Federal Government employees located in the Washington DC region at the GS–9 Step 5 wage rate.[19] OPM does not publish annual rates that include fringe benefits or overhead. OMB does publish an object class analysis of the budget of the U.S. Government. The Object Class Analysis estimates that, in 2021, DOT spent $6,351 million in employee compensation and $2,840 million in employee benefits. FMCSA estimates a fringe benefit rate of 45 percent (2,840 ÷ 6,351) for FMCSA personnel. FMCSA uses the DOT Volpe Center overhead rate of 64 percent for Federal personnel.[20] The Volpe Center is a Federal fee-for-service research and innovation center in the DOT. Unlike most Federal agencies, Volpe receives no direct appropriation from Congress and must cover direct and indirect expenses through agreements with project sponsors.[21] [22] These indirect costs are recovered through the overhead rate charged on direct labor costs. Volpe employees are compensated according to the Federal locality pay tables used for all Federal employees and their labor costs include the same employee benefits. Therefore, FMCSA believes that the overhead rate for Volpe personnel is similar to the rate for all DOT personnel.

Insurance

In addition to submitting forms to FMCSA, providers of recreational activities wishing to maintain a valid operating authority registration must also have proof of liability insurance filed with FMCSA, as explained in section V of this NPRM. The Agency estimates that such liability insurance currently costs entities an average of $190 per month for one vehicle, or $2,280 per year ($190 × 12 = $2,280).[23] Using a range of fleet sizes for illustrative purposes, table 4 presents the estimated costs currently associated with maintaining liability insurance by fleet size. The Agency invites the public to provide additional information on these estimates.

TABLE 4—CURRENT INSURANCE ESTIMATES BY FLEET SIZE (2022$)

Number of vehicles in fleet	Monthly premium	Yearly premium
1	$190	$2,280
5	950	11,400
10	1,900	22,800

Scenario One: Increase in Exemption Use

Scenario One includes existing providers of recreational activities that have been eligible for the operating authority exemption established by section 23012 of the IIJA in 2021 but are not utilizing it due to the definitional ambiguity of *recreational activities.* Upon issuance of this rulemaking, such carriers would understand they classify as a provider of recreational activities and are, therefore, eligible for this exemption. This would lead to an incremental increase in the number of operational authority exemptions being used relative to the baseline. As explained in detail below, these carriers would be impacted in different ways by the following costs and cost savings: financial responsibility compliance costs, operating authority registration fees, and paperwork costs.

Financial Responsibility Under Scenario One

Carriers under Scenario One that are currently maintaining their operating authority registration year-round would experience cost savings associated with maintaining financial responsibility. As displayed in table 4, the Agency estimates that the liability insurance required for carriers to maintain operating authority registration costs an average of $2,280 per year for one vehicle. Carriers under this scenario would save on insurance costs during the months they are not in operation (such as off-season months). In other words, carriers operating one vehicle would only pay for the months they need to be insured instead of the full $2,280 per year, or $190 per month, to operate one vehicle.

The Agency estimates a range of annual insurance cost savings from $190 to $17,100, depending on the number of vehicles a carrier owns and the number of months they currently maintain operating authority. These estimates are derived by multiplying the monthly insurance premiums according to fleet size in table 4 by the number of months they operate per year. Therefore, if a carrier with one vehicle is currently operating for one month per year, their annual cost savings would be $190 (1 month of insurance premiums × 1 vehicle). If a carrier with 10 vehicles is currently operating for 9 months per year, their annual cost savings would be $1,900 multiplied by 9 months ($17,100).

To illustrate further, table 5 displays estimated insurance cost savings of this rulemaking for a carrier operating five vehicles, as a result of no longer incurring year-round insurance costs. For example, using the values from table 4, the Agency estimates that a carrier operating five vehicles currently pays an average of $950 per month, or $11,400 per year, to maintain liability insurance. If such a carrier only maintained operating authority for 3 months, their cost savings would be $8,550 per year ($950 × 3 months = $2,850. $2,850 − $11,400 = − $8,550).

TABLE 5—INSURANCE COSTS BY NUMBER OF MONTHS IN OPERATION: 5-VEHICLE FLEET (2022$)

Number of months in operation	Yearly premium for 5 vehicles	Cost savings
1	$950	($10,450)
3	2,850	(8,550)
9	8,550	(2,850)

Note: estimates may not total due to rounding.

[22] DOT, Volpe Center. *Volpe Project Costs.* Available at: *http://www.volpe.dot.gov/work-with-us/volpe-project-costs* (accessed Apr. 13, 2022).

[23] Insuranks Online Insurance Comparison Marketplace. *https://www.insuranks.com/commercial-van-insurance* (accessed Oct. 31, 2022). These estimates are quoted from 12 different insurance companies, including Geico, Progressive, State Farm, and others. The monthly quotes were summed and then divided by 12 to obtain an estimated monthly average for the industry: ($115 + $120 + $130 + $183 + $165 + $180 + $195 + $210 + $221 + $232 + $254 + $270) ÷ 12 = $190.

There would also be cost savings as a result of avoided insurance-related administrative requirements. Currently, carriers must choose an insurance plan or other acceptable form of financial responsibility, and have proof filed with FMCSA whenever they apply for or reinstate operating authority. The Agency estimates that it takes carriers 8 hours to research and identify which insurance company, financial surety, or bond provider they will use. Assuming this task is performed by an office clerk, this activity is estimated to cost each carrier $255 ($31.90 × 8 hours = $255).[24] The Agency welcomes input from the public on the amount of time spent researching financial responsibility options.

As displayed in table 2, carriers under Scenario One were also required to ensure that their financial responsibility provider submit Forms BMC–91 or BMC–91X to FMCSA at a cost of $6 per form. These administrative requirements for insurance were no longer required after the enactment of the IIJA in 2021; therefore, the definitional clarification in this proposed rule may lead to cost savings of $255 to the carrier and $6 to the insurance company.

Voluntary Revocation Under Scenario One

As detailed in section V of this NPRM, some carriers under Scenario One were filing Form OCE–46 to voluntarily revoke their operating authority registrations during the off-season months so that they did not need to maintain insurance at the minimum prescribed levels during those months. To resume operations, the providers were then required to submit Form MCSA–5889 to reinstate their operating authority registrations during the months when they were operating. As displayed in tables 2 and 3, it is estimated to cost $8 to submit Form MCSA–5889, with a fee of $80 to carriers, and $18 to FMCSA.[25] Form OCE–46 is also estimated to cost $8 per carrier and $18 for FMCSA processing time.[26] As a result of this rulemaking, carriers under this scenario would no longer be subject to the costs associated with submitting Form MCSA–5889 or Form OCE–46.

Scenario Two: Decrease in Exemption Use

It is also possible that this rulemaking would limit the use of this exemption for certain carriers. Because neither FMCSA nor Congress provided a definition of *recreational activities,* there may be carriers that incorrectly believed they are providers of recreational activities, but upon issuance of this rulemaking, would realize they are not. These carriers may currently be incorrectly utilizing this exemption and revoking their operating authority when they were not eligible to do so. Therefore, such carriers may incur a cost of $88 to submit Form MCSA–5889 as a result of this rulemaking for reinstatement of their operating authority (table 2). They would also need to resume paying for financial responsibility in order to maintain valid operating authority. Illustrative examples of possible insurance-related costs are displayed in Tables 4 and 5. FMCSA invites public comment on the number of carriers that would no longer be using this exemption as a result of this rulemaking.

Scenario Three: No Incremental Change in Exemption Use

There may also be eligible carriers that correctly interpreted Congress' intent and have been utilizing the exemption correctly since the IIJA's enactment. These carriers are not expected to be impacted by this proposed rule relative to the baseline. They have already gone through the steps of voluntarily revoking their operating authority with FMCSA, are maintaining financial responsibility only while in operation, and are not paying fees or completing paperwork associated with maintaining operating authority.

Scenario Four: New Providers

This proposed rule may also affect eligible providers considering engaging in providing recreational activities in the future. If there are new carriers considering entering this field that were not aware of the IIJA exemption, they would no longer need to account for the following costs as a result of this rulemaking: year-round financial responsibility premiums, financial responsibility-related administrative costs, and operating authority fees and paperwork. The Agency invites public comment on the industry's trajectory and how many new entrants can be expected annually.

Prior to the enactment of the IIJA, new providers of recreational activities would have had to submit the ''Application for Motor Passenger Carrier Authority'' (Form OP–1(P)).[27] The Agency estimates that this form costs $64 with a $300 fee for carriers, and $457 in Government costs (Tables 2 and 3, respectively).[28] Additionally, as described in the *Financial Responsibility Under Scenario One* section, the avoided insurance-related administrative costs would be $6 for insurance companies and $255 for carriers. An illustrative example of potential avoided insurance premium costs is presented in table 5.

Government Costs

These changes would not require additional training for enforcement personnel. The Agency expects that the definitional clarification set forth in this NPRM would be communicated to FMCSA personnel and the Agency's State-based enforcement partners through existing means, such as policy updates and ongoing training. The Agency would be impacted by the costs and cost savings associated with this NPRM, as outlined in table 3 ($457 for Form OP–1(P), $18 for Form OCE–46 and Form MCSA–5889).

Benefits

The affected entities would be providers of recreational activities that typically consist of physically demanding outdoor experiences or excursions that do not have transportation as an integral part of the activity itself. Overall, the outdoor recreation economy accounted for 1.9 percent ($454 billion) of current-dollar gross domestic product (GDP) for the nation in 2021. Hawaii, Montana, Vermont, Alaska, and Maine are among the States where outdoor recreation as a percent of that States' GDP ranks the highest. For example, in 2021, outdoor recreation accounted for $4.4 billion of Hawaii's $91.1 billion overall GDP, or 4.8 percent—the highest proportion of any State. In terms of actual levels, the States that produced the highest outdoor recreation GDP in 2021 were California ($54.7 billion), Florida ($41.9 billion), and Texas ($37.5 billion).

[24] DOL, BLS. Occupational Employment and Wage Statistics (OEWS). National. May 2021. 43–9061 Office Clerks, General. Available at: *https://www.bls.gov/oes/current/oes439061.htm* (accessed Jan. 5, 2023).

[25] This estimate is based on the calculations used in the ICR titled, ''Motor Carrier Records Change Form'' (Form MCSA–5889), covered by OMB Control Number 2126–0060. The cost of a paper submission is $6 and the cost of an electronic submission is $0.

[26] This estimate is based on the calculations used in the ICR titled ''Request for Revocation of Authority Granted,'' covered by OMB Control Number 2126–0018.

[27] Applicants that have never held a USDOT number or any other registration issued by FMCSA must file the URS online application (Form MCSA–1) to obtain a USDOT number and register for operating authority.

[28] This estimate is based on calculations used in the ICR titled ''Licensing Applications for Motor Carrier Operating Authority,'' covered by OMB Control Number 2126–0016.

Differences in interpretation between regulated entities and enforcement officials may be hindering consistent enforcement practices, thereby impacting business-related decisions in providing transportation for recreational activities. This rulemaking would resolve this information asymmetry by creating a common understanding between FMCSA and motor carriers. Because this rulemaking may also lead to an increase in exemption use, it would benefit existing carriers by improving the efficiency of their business operations and increasing both consumer and producer surplus.

For new potential providers of recreational activities that were not aware of this exemption, this rulemaking may encourage new entrants into the field. The costs of maintaining year-round financial responsibility and paying registration fees may have posed a barrier to entry that discouraged some entities from participating in this industry. Therefore, this proposed rule may introduce new businesses into the field, increase competition and market efficiency, and benefit consumers by creating more options when choosing a provider of recreational activities.

B. Congressional Review Act

This proposed rule is not a *major rule* as defined under the Congressional Review Act (5 U.S.C. 801–808).[29]

C. Advance Notice of Proposed Rulemaking

Under 49 U.S.C. 31136(g), FMCSA is required to publish an advance notice of proposed rulemaking (ANPRM) or proceed with a negotiated rulemaking, if a proposed rule is likely to lead to the promulgation of a major rule. As this proposed rule is not likely to result in the promulgation of a major rule, the Agency is not required to issue an ANPRM or to proceed with a negotiated rulemaking.

D. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980, Public Law 96–354, 94 Stat. 1164 (5 U.S.C. 601–612), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857, March 29, 1996) and the Small Business Jobs Act of 2010 (Pub. L. 111–240, 124 Stat. 2504, September 27, 2010), requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. FMCSA has not determined whether this proposed rule would have a significant economic impact on a substantial number of small entities. Therefore, FMCSA is publishing this initial regulatory flexibility analysis (IRFA) to aid the public in commenting on the potential small business impacts of the proposals in this NPRM. We invite all interested parties to submit data and information regarding the potential economic impact that would result from adoption of the proposals in this NPRM. We will consider all comments received in the public comment process when making a determination in the final regulatory flexibility analysis.

An IRFA must contain the following:

1. a description of the reasons why the action by the agency is being considered;
2. a succinct statement of the objective of, and legal basis for, the proposed rule;
3. a description of and, where feasible, an estimate of the number of small entities to which the proposed rule will apply;
4. a description of the projected reporting, recordkeeping, and other compliance requirements of the proposed rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report or record;
5. an identification, to the extent practicable, of all relevant Federal rules that may duplicate, overlap, or conflict with the proposed rule.
6. a description of any significant alternatives to the proposed rule which accomplish the stated objectives of applicable statutes and which minimize any significant economic impact of the proposed rule on small entities.

1. Why the Action by the Agency is Being Considered

Section 23012 of the IIJA amended 49 U.S.C. 13506 by adding a new exemption in paragraph (b)(4) from the operating authority registration requirements. FMCSA is proposing to add a new regulatory section incorporating that statutory exemption and also including a definition for the exempt operations. The exemption from operating authority registration applies to motor carriers operating a motor vehicle designed or used to transport not fewer than 9, and not more than 15 passengers (including the driver) whether operated alone or with a trailer attached to the transport vehicle, if the motor vehicle is operated by a person that provides recreational activities and the transportation is provided within a 150 air-mile radius of the location at which passengers initially boarded the motor vehicle at the outset of the trip. The new statutory exemption did not include a definition of recreational activities, creating some ambiguity in the exemption's applicability. The Agency is proposing to codify the exemption in regulation and to remove ambiguity by defining the term.

2. The Objectives of and Legal Basis for the Proposed Rule

As discussed in section 1 of this IRFA, FMCSA is proposing to add a new regulatory section incorporating the statutory exemption in 49 U.S.C. 13506 that was added by section 23012 of the IIJA (see 49 U.S.C. 13506(b)(4)). The statutory provision, which relates to operating authority registration and requires, in part, that the motor vehicle be operated ''by a person that provides recreational activities,'' does not define *recreational activities.* This NPRM proposes to define *recreational activities* to clarify the scope of the exemption applicability.

The FMCSA Administrator has the authority to carry out the functions relating to the registration requirements in 49 U.S.C. 13901 and 13902, as delegated by the Secretary under § 1.87(a)(5). The requirements of these sections, which are enforced under § 392.9a (''Operating authority''), are the basis for the rules governing applications for operating authority registration in 49 CFR part 365.

3. A Description of, and Where Feasible an Estimate of, the Number of Small Entities to Which the Proposed Rule Will Apply

Small entity is defined in 5 U.S.C. 601. Section 601(3) defines a *small entity* as having the same meaning as *small business concern* under section 3 of the Small Business Act. This includes any small business concern that is independently owned and operated and is not dominant in its field of operation. Section 601(4), likewise includes within the definition of *small entities* not-for-profit enterprises that are independently owned and operated and are not dominant in their fields of operation. Additionally, section 601(5) defines

[29] A *major rule* means any rule that OMB finds has resulted in or is likely to result in (a) an annual effect on the economy of $100 million or more; (b) a major increase in costs or prices for consumers, individual industries, geographic regions, Federal, State, or local government agencies; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets (§ 389.3).

small entities as governments of cities, counties, towns, townships, villages, school districts, or special districts with populations less than 50,000.

This NPRM would affect providers of recreational activities to motor carriers operating a motor vehicle designed or used to transport not fewer than 9, and not more than 15 passengers (including the driver) whether operated alone or with a trailer attached to the transport vehicle, if the motor vehicle is operated by a person that provides recreational activities and the transportation is provided within a 150 air-mile radius of the location at which passengers initially boarded the motor vehicle at the outset of the trip. Providers of recreational activities affected by this proposed rule operate under many different North American Industry Classification System [30] (NAICS) codes with differing size standards. FMCSA provides a wide range of NAICS codes in the recreational activities industry, in order to capture all of the potential NAICS codes that providers of recreational activities may operate under. In doing so, FMCSA is highlighting many entities that perform various other functions beyond transporting passengers to and from recreational activities. As shown in table 6 below, the SBA size standard for providers of recreational activities ranges from $8 million in revenue per year for the All Other Amusement Recreation Industries NAICS national industry, to $41.5 million in revenue per year for Tour Operators and Racetracks.

TABLE 6—SBA SIZE STANDARDS FOR SELECTED INDUSTRIES

[in millions of 2019$]

NAICS code	NAICS industry description	SBA size standard in millions
	Subsector 487—Scenic and Sightseeing Transportation	
487110	Scenic and Sightseeing Transportation, Land	$18
487210	Scenic and Sightseeing Transportation, Water	12.5
487990	Scenic and Sightseeing Transportation, Other	22
	Subsector 561—Administrative and Support Services	
561520	Tour Operators	41.5
	Subsector 711—Performing Arts, Spectator Sports, and Related Industries	
711212	Racetracks	41.5
711219	Other Spectator Sports	14.5
	Subsector 713—Amusement, Gambling, and Recreation Industries	
713910	Golf Courses and Country Clubs	16.5
713920	Skiing Facilities	31.0
713940	Fitness and Recreational Sports Centers	15.5
713990	All Other Amusement Recreation Industries	8.0

FMCSA examined data from the 2017 Economic Census, the most recent Census for which data were available, to determine the percentage of firms that have revenue at or below SBA's thresholds within each of the NAICS industries.[31] Boundaries for the revenue categories used in the Economic Census do not exactly coincide with the SBA thresholds. Instead, the SBA threshold generally falls between two different revenue categories. However, FMCSA was able to make reasonable estimates as to the percent of small entities within each NAICS code.

The Agency estimates that many entities affected by this NPRM may fall under the Scenic and Sightseeing Transportation NAICS subsector (487). Firms in this subsector utilize transportation equipment to provide recreation and entertainment. These operations are distinct from passenger transportation carried out for other types of for-hire transportation. The recreational activities involved are local in nature, usually involving a same-day return to the point of departure.[32] Industry groups under this subsector include Scenic and Sightseeing Transportation, Land (4871), Scenic and Sightseeing Transportation, Water (4872), and Scenic and Sightseeing Transportation, Other (4879).

The Scenic and Sightseeing Transportation, Land NAICS national industry (487110) has a revenue size standard of $18 million, which falls between two Economic Census revenue categories, $10 million and $25 million. This industry comprises firms engaged in various outdoor excursions, including horse-drawn sightseeing rides. The percentages of Scenic and Sightseeing Transportation, Land with revenue less than these amounts ranged from 97 percent to 98 percent. Because the SBA threshold is closer to the higher of these two boundaries, FMCSA has assumed that the percent of Scenic and Sightseeing Transportation, Land entities that are small will be closer to 98 percent and is using that figure.

For Scenic and Sightseeing Transportation, Water (487210), the $12.5 million SBA threshold falls between two Economic Census revenue categories, $10 million and $25 million. Entities in this national industry are primarily engaged in providing scenic and sightseeing transportation on water, such as fishing boat charter operation. The percentages of Scenic and Sightseeing Transportation, Water with revenue less than these amounts ranged from 97 percent to 99 percent. Because

[30] More information about NAICS is available at: *http://www.census.gov/eos/www/naics/* (accessed Dec. 21, 2022).

[31] U.S. Census Bureau. *2017 Economic Census.* Available at: *https://data.census.gov/cedsci/table?q=EC17008&n=48-49&tid=ECNSIZE2017.EC1700SIZEREVEST&hidePreview=true* (accessed Dec. 18, 2022).

[32] US Census Bureau 2022 NAICS Definition. Available at *https://www.census.gov/naics/?input=48&year=2022&details=487* (accessed Jan. 5, 2023).

the SBA threshold is closer to the lower of these two boundaries, FMCSA has assumed that the percent of these entities that are small will be closer to 97 percent and is using that figure.

Scenic and Sightseeing Transportation, Other (487990) focuses on all other scenic and sightseeing transportation, such as hot air balloon rides and glider excursions. The SBA size standard for this national industry is $22 million. The $22 million SBA threshold falls between two Economic Census revenue categories, $10 million and $25 million. The percentages of these entities with revenue less than these amounts were 93 percent and 98 percent. Because the SBA threshold is closer to the higher of these two boundaries, FMCSA has assumed that the percent of these providers that are small will be closer to 98 percent and is using that figure.

Firms falling under the Travel Arrangement and Reservation Services industry group (5615) may also be impacted by this NPRM. This industry group comprises the Travel Agencies (561510), Tour Operators (561520), and Convention and Visitors Bureaus (561591) national industries.[33] The Agency assumes that providers of recreational activities fall under the Tour Operators national industry.

Tour Operators (561520) focuses on arranging and assembling tours, including travel or wholesale tour operators. The SBA size standard for this national industry is $41.5 million, which falls between two Economic Census revenue categories, $25 million and $100 million. The percentages of Tour Operators with revenue less than these amounts were 92 percent and 100 percent. The Agency presents a high-end estimate of 100 percent due to limitations in Economic Census data availability. Revenue data for firms with revenue less than $100,000, which would be considered small, are suppressed by the Economic Census to avoid disclosing for individual companies. Because the Agency is unable to ascertain the revenue for the suppressed firms, the high-end estimate assumes that such firms may fall under the $41.5 million SBA threshold and would be considered small. The low-end estimate assumes the suppressed firms are not small. Because the SBA threshold is closer to the lower of these two boundaries, FMCSA has assumed that the percent of Tour Operators that is small will be closer to 92 percent and is using that figure.

The Agency estimates that many providers of recreational activities affected by this NPRM would also fall under the Arts, Entertainment, and Recreation sector (71). This sector includes a wide range of firms operating facilities that meet varied cultural, entertainment, and recreational interests of patrons.[34] Subsectors under this group include Performing Arts, Spectator Sports, and Related Industries (711), Amusement, Gambling, and Recreational Industries (713), and others.

The industry groups under the Spectator Sports and Related Industries (711) subsector cover Spectator Sports (7112). Spectator Sports includes the Racetracks (711212) and Other Spectator Sports (711219) national industries.

The Racetracks national industry (711212) focuses on firms operating racetracks without casinos, such as auto, motorcycle, snowmobile, and horse races. The SBA size standard for this national industry is $41.5 million. The $41.5 million SBA threshold falls between two Economic Census revenue categories, $25 million and $100 million. The percentages of these entities with revenue less than these amounts were 83 percent and 100 percent.[35] Because the SBA threshold is closer to the lower of these two boundaries, FMCSA has assumed that the percent of Racetracks entities that are small will be closer to 83 percent and is using that figure.

Other Spectator Sports (711219) focuses on independent athletes, owners of racing participants (such as cars, dogs, and horses), and firms engaged in specialized services in support of said participants. The SBA size standard for this national industry is $14.5 million, which falls between two Economic Census revenue categories, $10 million and $25 million. The percentages of these entities with revenue less than these amounts were 82 percent and 100 percent.[36] Because the SBA threshold is closer to the lower of these two boundaries, FMCSA has assumed that the percent of Other Spectator Sports entities that are small will be closer to 82 percent and is using that figure.

The industry groups under the Amusement, Gambling, and Recreation Industries (713) subsector include Amusement Parks and Arcades (7131), Gambling Industries (7132), and Other Amusement and Recreation Industries (7139).[37] The Agency estimates the entities affected by this NPRM would fall into the third industry group, Other Amusement and Recreation Industries (7139). This group, as detailed below, covers firms operating golf courses and country clubs, skiing facilities, and all other amusement and recreation activities.[38]

Entities falling under Golf Courses and Country Clubs (713910) primarily engage in operating such facilities, and providing food and beverage services, equipment rental, or golf instruction. The SBA size standard for this national industry is $16.5 million, which falls between two Economic Census revenue categories, $10 million and $25 million. The percentages of Golf Courses and Country Clubs with revenue less than these amounts were 95 percent and 99 percent. Because the SBA threshold is closer to the lower of these two boundaries, FMCSA has assumed that the percent of these entities that are small will be closer to 95 percent and is using that figure.

Skiing Facilities (713920) industries primarily operate downhill, cross country, or related skiing areas, and provide food and beverage services, equipment rental, and ski instruction. The SBA size standard for this national industry is $31 million, which falls between two Economic Census revenue categories, $25 million and $100 million. The percentages of Skiing Facilities with revenue less than these amounts were 93 percent and 98 percent.[39] Because the SBA threshold is

[33] U.S. Census Bureau 2022 NAICS Definition. Available at *https://www.census.gov/naics/?input=56&year=2022&details=5615* (accessed Jan. 5, 2023).

[34] U.S. Census Bureau 2022 NAICS Definition. Available at *https://www.census.gov/naics/?input=71&year=2022&details=71* (accessed Jan. 5, 2023)

[35] The Agency presents a high-end estimate of 100 percent due to limitations in Economic Census data availability. Revenue data for firms with revenue less than $100,000, which would be considered small, are suppressed by the Economic Census to avoid disclosing for individual companies. Because the Agency is unable to ascertain the revenue for the suppressed firms, the high-end estimate assumes that such firms may fall under the $41.5 million SBA threshold. The low-end estimate assumes the suppressed firms are not small.

[36] The Agency presents a high-end estimate of 100 percent due to limitations in Economic Census data availability. Revenue data for firms with revenue less than $100,000, which would be considered small, are suppressed by the Economic Census. Because the Agency is unable to ascertain the revenue for the suppressed firms, the high-end estimate assumes that such firms may fall under the $14.5 million SBA threshold. The low-end estimate assumes the suppressed firms are not small.

[37] U.S. Census Bureau 2022 NAICS Definition. Available at *https://www.census.gov/naics/?input=71&year=2022&details=713* (accessed Jan. 5, 2023).

[38] U.S. Census Bureau 2022 NAICS Definition. Available at *https://www.census.gov/naics/?input=71&year=2022&details=7139* (accessed Jan. 5, 2023).

[39] The Agency presents a high-end estimate of 98 percent which includes assumptions about limitations in Economic Census data. Some revenue data for firms that would be considered small

Continued

closer to the lower of these two boundaries, FMCSA has assumed that the percent of these facilities that are small will be closer to 93 percent and is using that figure.

The Agency estimates that the majority of entities affected by this NPRM would fall under the All Other Amusement Recreation Industries national industry (713990). This includes whitewater rafting, hunting, horseback riding stables, boating clubs, canoeing, archery and shooting ranges, hiking, and others. The SBA size standard for this national industry is $8 million. The $8 million SBA threshold falls between two Economic Census revenue categories, $5 million and $10 million. The percentages of these providers with revenue less than these amounts were 60 percent and 99.6 percent. The Agency estimates a wide range in estimates due to limitations in Economic Census data for this NAICS category. Specifically, of the 12,688 firms in this industry, 12,631 have revenue between $100,000 and $10 million. However, data on small entities with revenue under $250,000 are suppressed. There are 7,490 small entities (59 percent) with revenue between $250,000 and $5 million, and 139 firms with revenue between $5 million and $10 million (1.1 percent). Of the 12,688 firms in All Other Amusement Recreation Industries, there are firms 5,002 without revenue data (39.4 percent). The high-end estimate assumes all such firms are small (99.6 percent) and FMCSA is using that figure.

Table 7 below shows the complete estimates of the number of small entities within the national industries that may be affected by this rulemaking.

TABLE 7—ESTIMATES OF NUMBERS OF SMALL ENTITIES

NAICS code	Description	Total number of firms	Number of small entities	Percent of all firms (%)
487110	Scenic and Sightseeing Transportation, Land	520	512	98
487210	Scenic and Sightseeing Transportation, Water	1,129	1,097	97
487990	Scenic and Sightseeing Transportation, Other	169	165	98
561520	Tour Operators	2,175	1,991	92
711212	Racetracks	299	248	83
711219	Other Spectator Sports	1,916	1,577	82
713910	Golf Courses and Country Clubs	8,076	7,712	95
713920	Skiing Facilities	203	189	93
713990	All Other Amusement Recreation Industries	12,688	7,629	60

4. A Description of the Proposed Reporting, Recordkeeping and Other Compliance Requirements of the Proposed Rule, Including an Estimate of the Classes of Small Entities Which Will be Subject to the Requirement and the Type of Professional Skills Necessary for Preparation of the Report or Record

This proposed rule would not result in new recordkeeping requirements.

5. An Identification, to the Extent Practicable, of All Relevant Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rule

FMCSA is not aware of any relevant Federal rules that may duplicate, overlap, or conflict with the proposed rule.

6. A Description of Any Significant Alternatives to the Proposed Rule Which Accomplish the Stated Objectives of Applicable Statutes and Which Minimize Any Significant Economic Impact of the Proposed Rule on Small Entities

Given that the recreational activities exemption was statutorily mandated, FMCSA did not have an alternative or discretion as to whether to adopt the exemption but did consider whether to propose a definition of the term *recreational activities* or to remain silent. FMCSA also considered the alternative of adding a definition without including specific examples. However, FMCSA believes that remaining silent or proposing a definition without specific examples could result in confusion or inconsistent enforcement and that it was better to propose a definition with examples consistent with the legislative intent to minimize any significant economic impact on small entities.

7. Description of Steps Taken by a Covered Agency To Minimize Costs of Credit for Small Entities

FMCSA is not a covered agency as defined in section 609(d)(2) of the Regulatory Flexibility Act and has taken no steps to minimize the additional cost of credit for small entities.

8. Requests for Comment To Assist Regulatory Flexibility Analysis

FMCSA requests comments on all aspects of this initial regulatory flexibility analysis.

E. Assistance for Small Entities

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FMCSA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

Small businesses may send comments on the actions of Federal employees who enforce or otherwise determine compliance with Federal regulations to the Small Business Administration's Small Business and Agriculture Regulatory Enforcement Ombudsman (Office of the National Ombudsman, see *https://www.sba.gov/about-sba/oversight-advocacy/office-national-ombudsman*) and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of FMCSA, call 1–888–REG–FAIR (1–888–734–3247). DOT has a policy regarding the rights of small entities to regulatory enforcement

(revenue categories of $100,000 or more and $250,000 to $499,999) are suppressed by the Economic Census. Because the Agency is unable to ascertain the revenue for the suppressed firms, the high-end estimate assumes that such firms may fall under the $31 million SBA threshold. The low-end estimate assumes the suppressed firms are not small.

fairness and an explicit policy against retaliation for exercising these rights.

F. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) requires Federal agencies to assess the effects of their discretionary regulatory actions. The Act addresses actions that may result in the expenditure by a State, local, or Tribal government, in the aggregate, or by the private sector of $178 million (which is the value equivalent of $100 million in 1995, adjusted for inflation to 2021 levels) or more in any 1 year. Though this NPRM would not result in such an expenditure, and the analytical requirements of UMRA do not apply as a result, the Agency discusses the effects of this proposed rule elsewhere in this preamble.

G. Paperwork Reduction Act

This proposed rule contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

H. E.O. 13132 (Federalism)

A rule has implications for federalism under section 1(a) of E.O. 13132 if it has ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' FMCSA has determined that this proposed rule would not have substantial direct costs on or for States, nor would it limit the policymaking discretion of States. Nothing in this document preempts any State law or regulation. Therefore, this proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Impact Statement.

I. Privacy

The Consolidated Appropriations Act, 2005,[40] requires the Agency to assess the privacy impact of a regulation that will affect the privacy of individuals. This NPRM would not require the collection of personally identifiable information.

The Privacy Act (5 U.S.C. 552a) applies only to Federal agencies and any non-Federal agency that receives records contained in a system of records from a Federal agency for use in a matching program.

The E-Government Act of 2002,[41] requires Federal agencies to conduct a Privacy Impact Assessment (PIA) for new or substantially changed technology that collects, maintains, or disseminates information in an identifiable form. No new or substantially changed technology would collect, maintain, or disseminate information as a result of this rulemaking. Accordingly, FMCSA has not conducted a PIA.

In addition, the Agency submitted a Privacy Threshold Assessment (PTA) to evaluate the risks and effects the proposed rulemaking might have on collecting, storing, and sharing personally identifiable information. The DOT Privacy Office has determined that this rulemaking does not create privacy risk.

J. E.O. 13175 (Indian Tribal Governments)

This proposed rule does not have Tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

K. National Environmental Policy Act of 1969

FMCSA analyzed this proposed rule pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*) and determined this action is categorically excluded from further analysis and documentation in an environmental assessment or environmental impact statement under FMCSA Order 5610.1 (69 FR 9680), Appendix 2, (6)(b). The categorical exclusion (CE) in paragraph (6)(b) covers regulations which are editorial or procedural, such as, those updating addresses or establishing application procedures, and procedures for acting on petitions for waivers, exemptions and reconsiderations, including technical or other minor amendments to existing FMCSA regulations. The proposed requirements in this rule are covered by this CE, there are no extraordinary circumstances present, and the proposed action does not have the potential to significantly affect the quality of the environment.

[40] Public Law 108–447, 118 Stat. 2809, 3268, note following 5 U.S.C. 552a (Dec. 4, 2014).

[41] Public Law 107–347, sec. 208, 116 Stat. 2899, 2921 (Dec. 17, 2002).

List of Subjects in 49 CFR Part 372

Agricultural commodities, Buses, Cooperatives, Freight forwarders, Motor carriers, Moving of household goods, Seafood.

Accordingly, FMCSA proposes to amend 49 CFR part 372 as follows:

PART 372—EXEMPTIONS, COMMERCIAL ZONES, AND TERMINAL AREAS

■ 1. The authority citation for part 372 continues to read as follows:

Authority: 49 U.S.C. 13504 and 13506; Pub. L. 105–178, sec. 4031, 112 Stat. 418; and 49 CFR 1.87.

■ 2. Amend § 372.107 by adding paragraph (i) to read as follows:

§ 372.107 Definitions.

* * * * *

(i) *Recreational activities.* The term recreational activities means activities consisting of an outdoor experience or excursion typically of a physical or athletic nature which require transportation for the sole purpose of moving customers to another location or locations where the outdoor experience or excursion will take place and collecting those customers to transport them back to the place of initial boarding or another outpost of the motor carrier. Recreational activities include but are not limited to hiking, biking, horseback riding, canoeing, whitewater rafting, water trails, tubing, skiing, snowshoeing, snowmobiling, hunting, fishing, mountain climbing, and swimming. The term does not include any activity for which:

(1) The activity offered or sold is occurring simultaneously with the transportation; or

(2) For which the transportation is the primary service offered for sale.

■ 3. Add § 372.113 to read as follows:

§ 372.113 Providers of recreational activities.

Transportation by a motor vehicle designed or used to transport not fewer than 9, and not more than 15, passengers (including the driver), whether operated alone or with a trailer attached for the transport of recreational equipment, is exempted from regulation promulgated pursuant to part B of title 49 U.S.C. subtitle IV if:

(a) The motor vehicle is operated by a person that provides recreational activities;

(b) The transportation is provided within a 150 air-mile radius of the location at which passengers initially boarded the motor vehicle at the outset of the trip; and

(c) In the case of a motor vehicle transporting passengers over a route between a place in a State and a place in another State, the person operating the motor vehicle is lawfully providing transportation of passengers over the entire route in accordance with applicable State law.

Issued under authority delegated in 49 CFR 1.87.

Robin Hutcheson,

Administrator.

RIN 1018–BE93

Endangered and Threatened Wildlife and Plants; Endangered Species Status for Southern Elktoe and Designation of Critical Habitat

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to list the southern elktoe (*Alasmidonta triangulata*), a freshwater mussel species endemic to the Apalachicola-Chattahoochee-Flint Basin of Alabama, Georgia, and Florida, as an endangered species and designate critical habitat under the Endangered Species Act of 1973, as amended (Act). This determination also serves as our 12-month finding on a petition to list the southern elktoe. After a review of the best available scientific and commercial information, we find that listing the species is warranted. Accordingly, we propose to list the southern elktoe as an endangered species under the Act. We also propose to designate critical habitat for the southern elktoe under the Act. In total, approximately 578 river miles (929 river kilometers) in Russell County, Alabama; Calhoun, Franklin, Gadsden, Gulf, Jackson, and Liberty Counties, Florida; and Baker, Coweta, Crawford, Decatur, Dooly, Dougherty, Fayette, Harris, Macon, Meriwether, Mitchell, Peach, Pike, Spalding, Sumter, Talbot, Taylor, and Upson Counties, Georgia, fall within the boundaries of the proposed critical habitat designation. We announce the availability of a draft economic analysis of the proposed designation of critical habitat for southern elktoe. If we finalize this rule as proposed, it would add this species to the List of Endangered and Threatened Wildlife and extend the Act's protections to the species and its critical habitat.

DATES: We will accept comments received or postmarked on or before August 21, 2023. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. eastern time on the closing date. We must receive requests for a public hearing, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by August 7, 2023.

ADDRESSES: You may submit comments by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: *https://www.regulations.gov.* In the Search box, enter FWS–R4–ES–2022–0179, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the panel on the left side of the screen, under the Document Type heading, check the Proposed Rule box to locate this document. You may submit a comment by clicking on ''Comment.''

(2) *By hard copy:* Submit by U.S. mail to: Public Comments Processing, Attn: FWS–R4–ES–2022–0179, U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We request that you send comments only by the methods described above. We will post all comments on *https://www.regulations.gov.* This generally means that we will post any personal information you provide us (see Information Requested, below, for more information).

Availability of supporting materials: For the proposed critical habitat designation, the coordinates or plot points or both from which the maps are generated are included in the decision file and are available at *https://www.regulations.gov* under Docket No. FWS–R4–ES–2022–0179. The species status assessment (SSA) report is also available in the docket on *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Lourdes Mena, Florida Classification and Recovery Division Manager, U.S. Fish and Wildlife Service, Florida Ecological Services Field Office, 7915 Baymeadows Way, Suite 200, Jacksonville, FL 32256–7517; telephone 904–731–3134. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Act, a species warrants listing if it meets the definition of an endangered species (in danger of extinction throughout all or a significant portion of its range) or a threatened species (likely to become endangered within the foreseeable future throughout all or a significant portion of its range). If we determine that a species warrants listing, we must list the species promptly and designate the species' critical habitat to the maximum extent prudent and determinable. We have determined that the southern elktoe meets the definition of an endangered species; therefore, we are proposing to list it as such and proposing a designation of its critical habitat. Both listing a species as an endangered or threatened species and designating critical habitat can be completed only by issuing a rule through the Administrative Procedure Act rulemaking process (5 U.S.C. 551 *et seq.*).

What this document does. We propose to list the southern elktoe as an endangered species, and we propose the designation of critical habitat for the species.

The basis for our action. Under the Act, we may determine that a species is an endangered or threatened species because of any of five factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence. The primary threat to the southern elktoe is habitat loss and degradation (Factor A) resulting from increased sedimentation, degraded water quality, insufficient water quantity, and loss of habitat connectivity.

Section 4(a)(3) of the Act requires the Secretary of the Interior (Secretary) to designate critical habitat concurrent with listing to the maximum extent prudent and determinable. Section 3(5)(A) of the Act defines critical habitat as (i) the specific areas within the geographical area occupied by the species, at the time it is listed, on which are found those physical or biological

features (I) essential to the conservation of the species and (II) which may require special management considerations or protections; and (ii) specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination by the Secretary that such areas are essential for the conservation of the species. Section 4(b)(2) of the Act states that the Secretary must make the designation on the basis of the best scientific data available and after taking into consideration the economic impact, the impact on national security, and any other relevant impacts of specifying any particular area as critical habitat.

Information Requested

We intend that any final action resulting from this proposed rule will be based on the best scientific and commercial data available and be as accurate and as effective as possible. Therefore, we request comments or information from other governmental agencies, Native American Tribes, the scientific community, industry, or any other interested parties concerning this proposed rule. We particularly seek comments concerning:

(1) The species' biology, range, and population trends, including:

(a) Biological or ecological requirements of the species, including habitat requirements for feeding, breeding, and sheltering;

(b) Genetics and taxonomy;

(c) Historical and current range, including distribution patterns;

(d) Historical and current population levels, and current and projected trends; and

(e) Past and ongoing conservation measures for the species, its habitat, or both.

(2) Factors that may affect the continued existence of the species, which may include habitat modification or destruction, overutilization, disease, predation, the inadequacy of existing regulatory mechanisms, or other natural or manmade factors.

(3) Biological, commercial trade, or other relevant data concerning any threats (or lack thereof) to this species and existing regulations that may be addressing those threats.

(4) Additional information concerning the historical and current status, range, distribution, and population size of this species, including the locations of any additional populations of this species.

(5) Specific information on:

(a) The amount and distribution of southern elktoe habitat;

(b) Any additional areas occurring within the range of the species, the Apalachicola, Chattahoochee, Flint, and Chipola river basins in Georgia, Florida, and Alabama, that should be included in the designation because they (i) are occupied at the time of listing and contain the physical or biological features that are essential to the conservation of the species and that may require special management considerations, or (ii) are unoccupied at the time of listing and are essential for the conservation of the species; and

(c) Special management considerations or protection that may be needed in critical habitat areas we are proposing, including managing for the potential effects of climate change; and

(d) To evaluate the potential to include areas not occupied at the time of listing, we particularly seek comments regarding whether occupied areas are adequate for the conservation of the species. Additionally, please provide specific information regarding whether or not unoccupied areas would, with reasonable certainty, contribute to the conservation of the species and contain at least one physical or biological feature essential to the conservation of the species. We also seek comments or information regarding whether areas not occupied at the time of listing qualify as habitat for the species.

(6) Land use designations and current or planned activities in the subject areas and their possible impacts on proposed critical habitat.

(7) Any probable economic, national security, or other relevant impacts of designating any area that may be included in the final designation, and the related benefits of including or excluding specific areas.

(8) Information on the extent to which the description of probable economic impacts in the draft economic analysis is a reasonable estimate of the likely economic impacts and any additional information regarding probable economic impacts that we should consider.

(9) Whether any specific areas we are proposing for critical habitat designation should be considered for exclusion under section 4(b)(2) of the Act, and whether the benefits of potentially excluding any specific area outweigh the benefits of including that area under section 4(b)(2) of the Act. If you think we should exclude any additional areas, please provide information supporting a benefit of exclusion.

(10) Whether we could improve or modify our approach to designating critical habitat in any way to provide for greater public participation and understanding, or to better accommodate public concerns and comments.

Please include sufficient information with your submission (such as scientific journal articles or other publications) to allow us to verify any scientific or commercial information you include.

Please note that submissions merely stating support for, or opposition to, the action under consideration without providing supporting information, although noted, do not provide substantial information necessary to support a determination. Section 4(b)(1)(A) of the Act directs that determinations as to whether any species is an endangered or a threatened species must be made solely on the basis of the best scientific and commercial data available, and section 4(b)(2) of the Act directs that the Secretary shall designate critical habitat on the basis of the best scientific data available.

You may submit your comments and materials concerning this proposed rule by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in **ADDRESSES**.

If you submit information via *https://www.regulations.gov,* your entire submission—including any personal identifying information—will be posted on the website. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on *https://www.regulations.gov.*

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on *https://www.regulations.gov.*

Because we will consider all comments and information we receive during the comment period, our final determinations may differ from this proposal. Based on the information we receive (and any comments on that new information), we may conclude that the species is threatened instead of endangered, or we may conclude that the species does not warrant listing as either an endangered species or a threatened species. For critical habitat, our final designation may not include all areas proposed, may include some additional areas that meet the definition of critical habitat, or may exclude some areas if we find the benefits of exclusion outweigh the benefits of inclusion and exclusion will not result in the extinction of the species.

Public Hearing

Section 4(b)(5) of the Act provides for a public hearing on this proposal, if requested. Requests must be received by the date specified in **DATES**. Such requests must be sent to the address shown in **FOR FURTHER INFORMATION CONTACT**. We will schedule a public hearing on this proposal, if requested, and announce the date, time, and place of the hearing, as well as how to obtain reasonable accommodations, in the **Federal Register** and local newspapers at least 15 days before the hearing. We may hold the public hearing in person or virtually via webinar. We will announce any public hearing on our website, in addition to the **Federal Register**. The use of virtual public hearings is consistent with our regulations at 50 CFR 424.16(c)(3).

Previous Federal Actions

On April 20, 2010, we received a petition from the Center for Biological Diversity (CBD), Alabama Rivers Alliance, Clinch Coalition, Dogwood Alliance, Gulf Restoration Network, Tennessee Forests Council, and West Virginia Highlands Conservancy (referred to below as the CBD petition) to list 404 aquatic, riparian, and wetland species, including the southern elktoe, as endangered or threatened species under the Act. On September 27, 2011, we published a 90-day finding that the petition contained substantial information indicating listing may be warranted for the species (76 FR 59836). This document serves as our 12-month finding on the April 20, 2010, petition.

Peer Review

A species status assessment (SSA) team prepared an SSA report for the southern elktoe. The SSA team was composed of Service biologists, in consultation with other scientists with southern elktoe expertise. The SSA report represents a compilation of the best scientific and commercial data available concerning the status of the species, including the impacts of past, present, and future factors (both negative and beneficial) affecting the species.

In accordance with our joint policy on peer review published in the **Federal Register** on July 1, 1994 (59 FR 34270), and our August 22, 2016, memorandum updating and clarifying the role of peer review of listing actions under the Act, we solicited independent scientific review of the information contained in the southern elktoe SSA report. We sent the SSA report to four independent peer reviewers and received responses from two. Results of this structured peer review process can be found at *https://regulations.gov.* In preparing this proposed rule, we incorporated the results of these reviews, as appropriate, into the SSA report, which is the foundation for this proposed rule.

Summary of Peer Reviewer Comments

As discussed under Peer Review, above, we received comments from two peer reviewers on the draft SSA report. We reviewed all comments we received from the peer reviewers for substantive issues and new information regarding the information contained in the SSA report. The peer reviewers generally concurred with our methods and conclusions, and provided additional information, clarifications, and suggestions that were incorporated into the SSA report. No substantive changes to our analysis and conclusions within the SSA report were deemed necessary, and peer reviewer comments are addressed in version 1.1 of the SSA report.

I. Proposed Listing Determination

Background

A thorough review of the taxonomy, life history, and ecology of the southern elktoe (*Alasmidonta triangulata*) is presented in the SSA report (version 1.1; Service 2022, pp. 17–25).

The southern elktoe (*Alasmidonta triangulata;* Lea 1858) is a medium-sized freshwater mussel that reaches up to 70 millimeters (mm) (2.8 inches (in)) in length. The southern elktoe has a moderately thin and somewhat triangular shell. Adults are olive brown to black in color, usually with obscured rays; juveniles are typically yellowish brown to olive, often with dark green rays. The species can be distinguished by its moderately to highly inflated shell, sharp posterior ridge, and umbo (*i.e.,* hinge area of shell which is elevated well above the hinge line of the shell) (Williams et al. 2014, p. 132).

The southern elktoe is endemic to the Apalachicola, Chattahoochee, and Flint River (ACF) basins of Alabama, Florida, and Georgia. Although surveys since 2000 have documented the species as extant in all four large river basins of the ACF Basin (Apalachicola River, Chipola River, Chattahoochee River, and the Flint River), the southern elktoe is considered very rare in distribution (Clench and Turner 1956, entire; Brim Box and Williams 2000, entire). In the ACF Basin, the southern elktoe inhabits permanently flowing creeks and rivers with natural hydrologic regimes. The species most often occurs in areas with slow current along stream margins and prefers deposition habitats consisting of mixtures of silty mud, sand, and gravel. Unlike other freshwater mussel species, the southern elktoe does not occur in dense beds (Williams 2015, p. 3).

The southern elktoe, like other freshwater mussels, has a complex life history involving an obligate parasitic larval life stage that is dependent on a suitable host fish. During reproduction, males release sperm into the water column, females take up the sperm, and the sperm fertilizes eggs held in the female. The developing larvae (glochidia) remain in the female's gill chamber until they mature and are ready to be released. This reproductive strategy requires that adult mussels of both sexes be in proximity to one another; additionally, fish host presence must overlap with brooding mussels to allow infestation. A reproductive study found that southern elktoe, like other *Alasmidonta* species (*e.g., A. arcula*), use host fish species from the sucker family, Catostomidae, as primary glochidial hosts (Fobian et al. 2018, p. 9).

Adult freshwater mussels are suspension-feeders and filter particles from the water column. Mussels may also obtain food by deposit feeding using cilia on their foot to move food particles into the shell. Mussel diets consist of a mixture of algae, bacteria, detritus, and microscopic animals.

Little is known about growth or longevity of southern elktoe; therefore, we rely on information for closely related species to help summarize characteristics of this species. Species in the tribe Andontini, which includes the southern elktoe, generally share the following traits: moderate to high growth rate, moderate life span, early maturity, and low to moderate fecundity. Typically, species of *Alasmidonta* reach maximum ages of 10–18 years and mature at 2–3 years (Haag and Rypel 2011, p. 239; Haag 2012, pp. 210–214).

Regulatory and Analytical Framework

Regulatory Framework

Section 4 of the Act (16 U.S.C. 1533) and the implementing regulations in title 50 of the Code of Federal Regulations set forth the procedures for determining whether a species is an endangered species or a threatened species, issuing protective regulations for threatened species, and designating critical habitat for endangered and threatened species. In 2019, jointly with the National Marine Fisheries Service, the Service issued a final rule that revised the regulations in 50 CFR part 424 regarding how we add, remove, and reclassify endangered and threatened

species and the criteria for designating listed species' critical habitat (84 FR 45020; August 27, 2019). On the same day, the Service also issued final regulations that, for species listed as threatened species after September 26, 2019, eliminated the Service's general protective regulations automatically applying to threatened species the prohibitions that section 9 of the Act applies to endangered species (84 FR 44753; August 27, 2019).

The Act defines an ''endangered species'' as a species that is in danger of extinction throughout all or a significant portion of its range, and a ''threatened species'' as a species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether any species is an endangered species or a threatened species because of any of the following factors:

(A) The present or threatened destruction, modification, or curtailment of its habitat or range;

(B) Overutilization for commercial, recreational, scientific, or educational purposes;

(C) Disease or predation;

(D) The inadequacy of existing regulatory mechanisms; or

(E) Other natural or manmade factors affecting its continued existence.

These factors represent broad categories of natural or human-caused actions or conditions that could have an effect on a species' continued existence. In evaluating these actions and conditions, we look for those that may have a negative effect on individuals of the species, as well as other actions or conditions that may ameliorate any negative effects or may have positive effects.

We use the term ''threat'' to refer in general to actions or conditions that are known to or are reasonably likely to negatively affect individuals of a species. The term ''threat'' includes actions or conditions that have a direct impact on individuals (direct impacts), as well as those that affect individuals through alteration of their habitat or required resources (stressors). The term ''threat'' may encompass—either together or separately—the source of the action or condition or the action or condition itself.

However, the mere identification of any threat(s) does not necessarily mean that the species meets the statutory definition of an ''endangered species'' or a ''threatened species.'' In determining whether a species meets either definition, we must evaluate all identified threats by considering the species' expected response and the effects of the threats—in light of those actions and conditions that will ameliorate the threats—on an individual, population, and species level. We evaluate each threat and its expected effects on the species, then analyze the cumulative effect of all of the threats on the species as a whole. We also consider the cumulative effect of the threats in light of those actions and conditions that will have positive effects on the species, such as any existing regulatory mechanisms or conservation efforts. The Secretary determines whether the species meets the definition of an ''endangered species'' or a ''threatened species'' only after conducting this cumulative analysis and describing the expected effect on the species now and in the foreseeable future.

The Act does not define the term ''foreseeable future,'' which appears in the statutory definition of ''threatened species.'' Our implementing regulations at 50 CFR 424.11(d) set forth a framework for evaluating the foreseeable future on a case-by-case basis. The term ''foreseeable future'' extends only so far into the future as we can reasonably determine that both the future threats and the species' responses to those threats are likely. In other words, the foreseeable future is the period of time in which we can make reliable predictions. ''Reliable'' does not mean ''certain''; it means sufficient to provide a reasonable degree of confidence in the prediction. Thus, a prediction is reliable if it is reasonable to depend on it when making decisions.

It is not always possible or necessary to define foreseeable future as a particular number of years. Analysis of the foreseeable future uses the best scientific and commercial data available and should consider the timeframes applicable to the relevant threats and to the species' likely responses to those threats in view of its life-history characteristics. Data that are typically relevant to assessing the species' biological response include species-specific factors such as lifespan, reproductive rates or productivity, certain behaviors, and other demographic factors.

Analytical Framework

The SSA report documents the results of our comprehensive biological review of the best scientific and commercial data regarding the status of the species, including an assessment of the potential threats to the species. The SSA report does not represent our decision on whether the species should be proposed for listing as an endangered or threatened species under the Act. However, it does provide the scientific basis that informs our regulatory decisions, which involve the further application of standards within the Act and its implementing regulations and policies.

To assess southern elktoe's viability, we used the three conservation biology principles of resiliency, redundancy, and representation (Shaffer and Stein 2000, pp. 306–310). Briefly, resiliency is the ability of the species to withstand environmental and demographic stochasticity (for example, wet or dry, warm or cold years), redundancy is the ability of the species to withstand catastrophic events (for example, droughts, large pollution events), and representation is the ability of the species to adapt to both near-term and long-term changes in its physical and biological environment (for example, climate conditions, pathogens). In general, species viability will increase with increases in resiliency, redundancy, and representation (Smith et al. 2018, p. 306). Using these principles, we identified the species' ecological requirements for survival and reproduction at the individual, population, and species levels, and described the beneficial and risk factors influencing the species' viability.

The SSA process can be categorized into three sequential stages. During the first stage, we evaluated the individual species' life-history needs. The next stage involved an assessment of the historical and current condition of the species' demographics and habitat characteristics, including an explanation of how the species arrived at its current condition. The final stage of the SSA involved making predictions about the species' responses to positive and negative environmental and anthropogenic influences. Throughout all of these stages, we used the best available information to characterize viability as the ability of a species to sustain populations in the wild over time. We use this information to inform our regulatory decision.

The following is a summary of the key results and conclusions from the SSA report; the full SSA report can be found at Docket No. FWS–R4–ES–2022–0179 on *https://www.regulations.gov.*

Summary of Biological Status and Threats

In this discussion, we review the biological condition of the species and its resources, and the threats that influence the species' current and future condition, in order to assess the species' overall viability and the risks to that viability.

Species Needs

We assessed the best available information for the southern elktoe to identify the physical and biological needs to support individual fitness at all life stages (Service 2022, pp. 11–15). When information specific to the southern elktoe is not available, we rely on generalized freshwater mussel literature, as well as information on six other ACF Basin freshwater mussel species listed under the Act (fat threeridge (*Amblema neislerii*), shinyrayed pocketbook (*Hamiota subangulata*), Gulf moccasinshell (*Medionidus penicillatus*), oval pigtoe (*Pleurobema pyriforme*), Chipola slabshell (*Elliptio chipolaensis*), and purple bankclimber (*Elliptoideus sloatianus*); see 63 FR 12664; March 16, 1998). Note that the Ochlockonee moccasinshell (*Medionidus simpsonianus*) was also included in that rule but does not occur in the ACF Basin. In the remainder of this document, we will refer to the six species collectively as ''the listed ACF mussels.''

Important habitat components for the southern elktoe, derived from the listed ACF mussels, are permanently flowing water and geomorphologically stable stream channels. Adequate flow levels are required to deliver oxygen, enable passive reproduction, transport food items to the sedentary juvenile and adult mussels, remove wastes and fine sediments, and maintain good water quality. Further, to maintain mussel populations over time, a natural flow regime (including magnitude, frequency, duration, and seasonality of discharge) is critical for the exchange of nutrients, movement and spawning activities of fish hosts, and maintenance of instream habitats. The southern elktoe is dependent upon stable stream channels with areas with low shear stress so that sediments on the stream bottom remain stable during high flow events.

Each life stage (fertilized egg, glochidia, juvenile, and adult) has specific resource and life-history requirements that must be met to survive. The primary requirements for all life stages of the southern elktoe are flowing waters with a moderate temperature (generally, less than 32 degrees Celsius (°C)), adequate dissolved oxygen (generally, greater than 5.0 milligrams per liter (mg/L)), and good water quality. Early life stages are uniformly sensitive to many chemical compounds including ammonia, heavy metals, pharmaceuticals, and some commonly used pesticides and surfactants. In order for eggs to be fertilized, they require mature males upstream from mature females with suitable flows for fertilization to occur. Fertilized eggs require low to moderate levels of suspended solids and appropriate spawning temperatures. Glochidia require the presence of catostomid host fish and suitable water levels to permit host-glochidia interactions. Juvenile and adult needs are similar and include areas with low shear stress, substrates consisting of stable sand and gravel free from excessive silt, and the presence of adequate food availability (bacteria, algae, diatoms, detritus) in the water column.

The southern elktoe requires the presence of host fishes to complete its life cycle. In host fish trials, southern elktoe glochidia primarily metamorphosed on species of the sucker family, Catostomidae (Fobian et al. 2018, p. 9). Several species from the sucker family are found in the ACF Basin, but detailed studies on local ecology or population trends of species identified as probable host fishes for the southern elktoe, or catostomids in general, are limited. Additionally, stressors to southern elktoe such as habitat degradation, barriers to movement, and altered flow regimes also negatively affect catostomids; however, there is uncertainty regarding the extent to which host fish availability may influence southern elktoe populations.

Connectivity among populations is also important for southern elktoe viability. Although the species' capability to disperse is evident through historical occurrence of a wide range of rivers and streams, the fragmentation of populations by small and large impoundments has resulted in isolation and only remnant patches of what once was occupied contiguous river and stream habitat. Genetic exchange occurs between and among mussel beds via sperm drift, host fish movement, and movement of mussels during high flow events. For genetic exchange to occur, connectivity must be maintained, and proximity of male and female southern elktoes is essential. Most freshwater mussels, including the southern elktoe, are found in mussel beds with other species that vary in size and density, and elktoes have very sporadic occurrences within these beds. These beds are often separated by stream reaches in which mussels are absent or rare (Vaughn 2012, p. 983). Because the species is often a component of these healthy mussel assemblages within optimal mussel habitats, maintaining connectivity between these populations is necessary for the species to maintain resiliency over time.

Threats Analysis

The following discussions include evaluations of three main influences on southern elktoe viability: (1) habitat degradation or loss, (2) presence of host fish, and (3) nonnative species. Full descriptions of each of the factors and their sources, including specific examples where threats are impacting the species or its habitat, are available in chapter 5 of the SSA report (Service 2022, pp. 70–96). Potential impacts associated with other threats such as disease, parasites, predation, sea level rise, and harvest/overcollection were evaluated, but these threats were found to have minimal effects on the viability of the species based on the best available information and are not covered in detail here.

Habitat Degradation or Loss

Agriculture—The advent of intensive row crop agricultural practices has been considered as a potential factor in freshwater mussel decline and species extirpation in the eastern United States (Peacock et al. 2005, p. 550). Based on the U.S. Geological Survey's (USGS) National Land Cover Database (NLCD) 2016, approximately 20 percent of the ACF Basin is used for cropland. Agricultural influences within the ACF Basin are most apparent in the lower areas of the Chattahoochee (Alabama and Georgia), Flint (Georgia), and Chipola Basins (Alabama and Florida), and in the northern areas of the Apalachicola Basin (Florida).

Pumping groundwater for agricultural practices is contributing to decreased spring outflows and lowered stream levels in the ACF Basin. Agriculture is the largest source of water use in the ACF Basin, accounting for 35 percent of all water withdrawals in 2010 (Lawrence 2016, p. 29). In the ACF Basin, spring-fed streams and small rivers may experience 50 to 100 percent reductions in flows during droughts (Georgia Water Coalition 2017, p. 3), and the additive effect of groundwater withdrawals can exacerbate drought conditions during dry years (Albertson and Torak 2002, p. 22; Mitra et al. 2016, entire). In the lower Flint River basin, an extensive conversion to center pivot irrigation systems increased groundwater withdrawals 100 percent between 1970 and 1976 (Rugel et al. 2011, p. 2), and the Lower Flint River experiences an approximate 20 percent decrease in median flow levels because of irrigation during drought years (Singh et al. 2016, p. 279).

During periods of drought, streams may cease to flow entirely, or be reduced to isolated pools with high temperatures, low dissolved oxygen (DO), low food resources, and concentrated contaminants. Maintaining adequate water levels in streams is particularly important during the reproductive season (*e.g.,* October to March for southern elktoe), as suitable water levels are required to permit host-glochidia interactions. Within the Flint River basin, decreases in flow velocity and DO have been highly correlated to mussel mortality (Johnson et al. 2001, p. 6). Drought-related responses could affect the long-term viability of mussel populations in the lower Flint River basin by hindering reproductive processes.

Agriculture in the ACF Basin also contributes to an increase in contaminants and sediment entering streams and rivers. Contaminants from agriculture can include excess nutrients from poultry farms and livestock feedlots, and pesticides and fertilizers from row crop agriculture (Couch et al. 1996, p. 52; Frick et al. 1998, p. 2). Although moderate levels of siltation from sediment are common in many ACF Basin streams, particularly in the Piedmont, livestock grazing in riparian buffers adds excess sediment and alters stream hydrology by increasing runoff and erosion (Agouridis 2005, p. 593, Couch et al. 1996, p. 7). The concentrations of contaminants and sediment input associated with crop lands may negatively affect the viability of southern elktoe populations, especially given the large extent of agricultural activities within the southern elktoe's range (also see *Water Quality,* below).

Development—With urban development, watersheds become more impervious. Impervious surfaces result in increased and accelerated storm-water runoff, which can alter stream sediment regimes by increasing bank erosion and bed scouring (Brim Box and Mossa 1999, p. 103). Stream bank erosion and scouring contributes up to two-thirds of the total sediment yield in urbanized watersheds (Trimble 1997, p. 1443). The increased and accelerated flows and incising associated with storm-water runoff has been shown to lower mussel richness and abundance through increased shear stress and bed mobilization (Allen and Vaughn 2010, p. 390; Doyle et al. 2000, p. 177; Layzer and Madison 1995, p. 337).

Water quantity in urban areas is affected by water consumption and runoff from impervious surfaces. Impervious surfaces and other areas with reduced permeability, such as grass and barren land, can lead to high flow events from rainfall, and the reduction in ground penetration leads to reduced groundwater recharge and thus reduced baseflows during dry periods (U.S. Army Corps of Engineers (USACE) 2016, pp. 2–13). In addition, contamination of aquatic habitats by pesticides, excess nutrients, heavy metals, pharmaceuticals, and organic pollutants is widespread in urban areas and associated with point (*e.g.,* wastewater treatment plants) and nonpoint sources (Paul and Meyer 2001, pp. 341–346). The widespread and pervasive extent of non-permitted, nonpoint discharges in urban systems has been posited as a key factor in the biological degradation frequently encountered in urban aquatic environments (Duda et al. 1982, pp. 1144–1145; see *Water Quality,* below).

Development and urbanization activities that may contribute to the southern elktoe habitat degradation and loss is mostly concentrated near Atlanta, Columbus, and Albany, Georgia, with Atlanta having a larger influence than the two smaller cities. Although the Atlanta metro region occupies a relatively small portion of the Chattahoochee and Flint River headwaters, it has a large ecological footprint and substantial downstream effects.

River Regulation—The ACF Basin includes rivers and streams with both unregulated (natural) and regulated flow. The natural rivers exhibit a relatively consistent seasonal pattern, responding to precipitation and drought periods as expected with short periods of high flows and sometimes prolonged periods of low flows, respectively. Regulated streams exhibit an induced variable daily pattern, with daily variations due to hydroelectric power generation, navigation releases, lower flood peaks, and higher sustained minimum flows through dry periods as the upstream reservoirs augment low flows. The alterations in flow regimes that result from regulated rivers can have a direct impact on freshwater mussels and their host fish. The timing and rates of discharges from dams may interrupt the ability of the host fish to become infected with glochidia, and the settlement of the juvenile mussels once released.

Habitat fragmentation as a result of dam construction is one of the primary causes of loss of mussel diversity (Haag and Williams 2014, pp. 47–48). Upstream effects resulting from dams include changes from flowing water to still water habitats, increased depths and sedimentation, decreased dissolved oxygen, and changes in fish communities that can affect mussel reproductive success by separating host fish from mussel populations (Neves et al. 1997, p. 63). Effects downstream of dams include alterations in flow regime, scouring, seasonal dissolved oxygen dips, reduced water temperatures, and changes in fish community structure (Neves et al. 1997, p. 63).

Numerous small rivers and tributaries of the ACF Basin have been transformed by dams and channel alterations (Hupp 2000, entire; Light et al. 2006, pp. 29–46; Price et al. 2006, entire). Additionally, there are 16 mainstem impoundments within the basin (Brim Box and Williams 2000, p. 4).

The impacts from navigational channels within the ACF Basin may also contribute to loss of habitat for the southern elktoe and alter habitats for host fish. A navigation channel is maintained on the Apalachicola River for 172 kilometers (km) (107 miles (mi)) between the Gulf Intracoastal Waterway and Jim Woodruff Lock and Dam; 249 km (155 mi) up the Chattahoochee River to Columbus, Georgia, and Phenix City, Alabama; and 45 km (28 mi) up the Flint River to Bainbridge, Georgia. The channelization that results from these navigation channels can affect a stream's physical (*e.g.,* erosion rates, depth, habitat diversity, geomorphic stability, riparian canopy) and biological (*e.g.,* species composition and abundance, biomass, growth rates) characteristics.

Water Quality—As a group, mussels are often the first organisms to respond to water quality impacts (Haag 2012, p. 355), with mussel early life stages frequently showing the highest sensitivity to many chemical compounds (Augspurger et al. 2007, p. 2025–2026). Contamination or alteration to water chemistry can result from both point and nonpoint sources, including spills, industrial sources, municipal effluents, and runoff from agricultural and developed areas. These sources may contribute to changes in dissolved oxygen (DO), sediment loading, and the concentrations of nitrogen, phosphorus, ammonia, heavy metals, pesticides, and pharmaceuticals in the affected waterways. Although there are no current data for the tolerance levels of southern elktoe to specific pollutants, there is some general information available on the relationships and importance of these parameters to freshwater mussels and aquatic life.

Ammonia is one of the most common and widespread pollutants found in freshwaters, with nitrogen-based fertilizers and industrial and domestic wastewater among the most significant sources of ammonia in streams.

Freshwater mussels are sensitive to elevated concentrations of ammonia, especially its un-ionized form (Augspurger et al. 2003, pp. 2571–2574; Wang et al. 2007, pp. 2039–2046), and exposure to ammonia has been linked to mussel recruitment failure when present in sediments (Strayer and Malcom 2012, p. 1787). High nitrogen loads within the ACF Basin correspond to sub-watersheds with high urban and row cropland uses, including the metro Atlanta area of the far Upper Flint, and in agricultural areas of the Lower Flint and Chipola Rivers.

In 2013, the Environmental Protection Agency (EPA) adopted final national recommended ambient water quality criteria for the protection of aquatic life from effects of ammonia in freshwater (see 78 FR 52192; August 22, 2013), and in 2016, the Florida Department of Environmental Protection adopted the chronic criteria for ammonia as both the acute and chronic values, therefore improving the ammonia standard even further for the conservation of freshwater mussels Statewide (EPA 2016, entire). In 2017, Georgia also addressed ammonia toxicity in a new National Pollutant Discharge Elimination System (NPDES) Permitting Strategy to comply with the EPA's 2013 ammonia criteria (GADNR 2017, entire). The new criteria recommendations consider the latest freshwater toxicity information for ammonia, including toxicity studies for sensitive unionid mussels and gill-breathing snails (EPA 2013, entire). We do not currently have information on specific tolerance levels for southern elktoe regarding un-ionized ammonia, but EPA's new criteria represents the best general target for freshwater mussels. Still, recent work suggests that even low levels of ammonia (*e.g.,* 1.5 mg N/L (milligrams Nitrogen per Liter)), which are below thresholds set in the 2013 criteria, can be toxic to some mussel species (Wang et al. 2017, pp. 791–792).

Agricultural and developed lands are associated with high loadings of nutrients and silt and sediments in streams. Suspended sediment and total phosphorus (TP; determined by parent-rock minerals, urban land, manure from livestock, municipal wastewater, agricultural fertilizer, and phosphate mining) are both highest toward the northern extent of the ACF Basin, and areas of higher concentrations coincide with the Upper Flint and Middle Chattahoochee southern elktoe populations. For more information on the association between land use and nitrogen, phosphorus, and suspended sediment loads by within the ACF Basin, see chapter 5 of the SSA report (Service 2022, pp. 82–87).

Mussels may suffer lethal and nonlethal effects from low dissolved oxygen levels and elevated stream temperatures (Fuller 1974, pp. 240–245; Dimock and Wright 1993, pp. 188–190; Gagnon et al. 2004, p. 675), and are particularly susceptible to these conditions during their early life stages (Sparks and Strayer 1998, pp. 132–133; Pandolfo et al. 2010, p. 965; Archambault et al. 2013, p. 247). The amount of DO in water can vary due to several factors including water temperature, nutrient levels, and water velocity. Additionally, low flow levels that result from drought conditions can expose mussels to low DO concentrations and high water temperatures for extended periods (Haag and Warren 2008, pp. 1174–1176).

Heavy metal exposure can cause substantial harm to mussels. These inorganic pollutants enter aquatic systems via point and non-point sources and are frequently associated with urban land-use, mining, and industrial processes such as energy production. Many lab trials have demonstrated that mussels are among the most sensitive aquatic organisms to several metals, including nickel, copper, and zinc (Wang et al. 2017, pp. 792, 795).

Pesticides are widespread contaminants that have been implicated in mussel declines. Pesticides have been linked to freshwater mussel die-offs (Fleming et al. 1995, pp. 877–879), and lab studies show that sensitivity of mussel glochidia and juveniles to common pesticides can be high but is variable and difficult to predict (Conners and Black 2004, pp. 362–371; Bringolf et al. 2007, pp. 2089–2093; Wang et al. 2017, p. 792).

An emerging category of contaminants of concern to aquatic species is pharmaceuticals, including contraceptive medications, antidepressants, and livestock growth hormones originating from municipal, agricultural, and industrial wastewater sources. Pharmaceuticals have been shown to bioaccumulate in mussels downstream of wastewater treatment plants (De Solla et al. 2016, p. 489), and in lab studies, acute pharmaceutical exposure has caused mortality of glochidia (Gilroy et al. 2014, p. 543) and changes to mussel physiology (Bringolf et al. 2010, pp. 1315–1317) and behavior (Hazelton et al. 2014, pp. 31–32).

Although specific physical and chemical tolerance ranges are not known for the southern elktoe, numeric standards for most water quality criteria important to mussels currently adopted by the States of Alabama, Florida, and Georgia under the Clean Water Act (33 U.S.C. 1251 are sufficient to sustain elktoe. However, some standards (such as those for chloride, potassium, and nickel) are toxic to mussels at levels below the current criteria (Gibson et al. 2018, pp. 244–250; Wang et al. 2017, p. 795). In addition, standards do not exist for some mussel toxicants (for example, the surfactant sodium dodecyl sulfate) (Gibson et al. 2016, p. 32), nor do any exist for any of the pharmaceuticals listed above.

Changing Climate Conditions—Climate conditions that may influence the southern elktoe include increasing water temperatures and changes to precipitation patterns that may result in changes to hydrologic conditions, including increased flooding, prolonged droughts, reduced stream flows, and changes in salinity levels (Nobles and Zhang 2011, pp. 147–148). Climate change may affect the frequency and duration of both drought and floods, as well as alter normal temperature regimes. Drought can cause dewatering of freshwater habitats and low flows, which exacerbate water quality impairments (*e.g.,* dissolved oxygen, temperature, contaminants), whereas floods can cause excessive erosion, destabilize banks and bed materials, and lead to increases in sedimentation and suspended solids.

Long-term climate records suggest that decade-long ''mega-droughts'' have occurred periodically during the past 1,000 years in the southeastern United States, including in the ACF Basin (Stahle et al. 2007, entire). This suggests that while the recently observed droughts in 2006–2008 and 2010–2012 were exceptional based on our recent (less than 100 years) period of record, they may not be exceptional compared to historical episodes (Pederson et al. 2012, p. 2). However, projections for the ACF watershed indicate that future droughts are likely to be more intense, replicating those historical conditions more frequently (Yao and Georgakakos 2011, entire).

The Intergovernmental Panel on Climate Change's (IPCC) Fifth Assessment Report (AR5), published in 2014, presents recent climate findings based on a set of scenarios that use representative concentration pathways (RCPs). The recently updated flow models in the ACF Basin allow a closer look at predicted flows by river reach for a range of hydrologic variables into the future (the future time period is integrated over 2045–2075). These data indicate that streams and rivers within southern elktoe occurrence could exhibit a range of changes in flow conditions under future climates

(LaFontaine et al. 2019, entire). An analysis of conditions in the ACF Basin through 2050 under RCP 4.5 and 8.5 predicts increases in temperature (particularly summer and fall, (Neupane et al. 2018, p. 2232)), surface water runoff, and evapotranspiration, and decreases in soil moisture and groundwater discharge; all patterns are more pronounced under RCP 8.5 than RCP 4.5 (Neupane et al. 2018, p. 2236).

Despite the recognition of potential climate effects on ecosystem processes, there is uncertainty about what the exact climate future for the southeastern United States will be and how ecosystems and species in this region will respond. The greatest threat from climate change may come from synergistic effects. That is, factors associated with a changing climate may act as risk multipliers by increasing the risk and severity of more imminent threats, especially for rivers in wide floodplains where stream channels have room to migrate (Elliot et al. 2014, pp. 67–68). As a result, impacts from land use change might be exacerbated under even a mild to moderate climate future. A suite of potential hydrological impacts to waters of the southeastern United States is possible under conditions of climate change, but climate models generally predict increases in extreme rainfall events and droughts of greater duration and intensity (Carter et al. 2018, pp. 745–746).

Presence of Host Fish

Host fish for southern elktoe are in the sucker family, Catostomidae, including *Moxostoma* (Apalachicola redhorse, greater jumprock, and blacktail redhorse) and *Erimyzon* (creek chubsucker and lake chubsucker). Several species from the sucker family are found in the ACF Basin, but detailed studies on local ecology or population trends of species identified as probable host fishes for the southern elktoe, or sucker fishes in general, are more limited. As such, there is some uncertainty as to whether host fish availability is a limiting factor for southern elktoe.

The primary stressors to sucker fishes in southeastern U.S. rivers are identified as habitat degradation from urbanization and agriculture, hydropower, and barriers to dispersal (Cooke et al. 2005, p. 325), so it is important to consider that some of the same stressors acting on southern elktoe at individual and watershed levels are also acting on the host fishes. Generally, sucker fishes are large-bodied fishes that move significant distances, particularly to reach spawning locations. As a result, sucker fish species can disperse mussels farther than smaller-bodied and less mobile fishes. However, we are uncertain to the extent to which barriers may limit host fish movement or affect dispersal and colonization capabilities of southern elktoe.

Nonnative Species

The invasive Asian clam (Corbicula *fluminea*) was first detected in the eastern Gulf drainages in the early 1960s and was widespread within the ACF Basin by the mid-1970s (Heard 1975, p. 3). Asian clam life history enables fast colonization; it is hermaphroditic and can self-fertilize, grows fast, reaches maturity in 3 to 6 months, and produces large numbers of juveniles (Strayer 1999, p. 81; Haag 2012, p. 368). These traits allow the species to quickly reach densities of hundreds to thousands per square meter (Gardner et al. 1976, pp. 119–121), and to thrive in disturbed habitats (Haag 2012, p. 370).

Although the Asian clam can inhabit a wide range of flow and substrate conditions, densities are highest in areas with low flow velocity and in substrates composed of sand or mixtures of mud, sand, and gravel. Southern elktoe generally exhibits similar habitat preferences as the Asian clam; therefore, Asian clams may reach high abundances in areas inhabited by southern elktoe (Gardner et al. 1976, p. 122; McDowell and Byers 2019, p. 6). Additionally, Asian clams have one of the highest filtration rates per biomass, compared to native mussels and fingernail clams (sphaeriids) (McMahon and Bogan 2001, pp. 331–429), thereby potentially competing for food resources. Asian clams may also negatively affect mussels by ingesting mussel sperm, glochidia, or newly metamorphosed juvenile mussels (Strayer 1999, pp. 81–85; Modesto et al. 2019, pp. 159–162). Although the specific interaction between Asian clams and native mussels is not well understood, there is sufficient evidence to conclude that Asian clams can negatively affect native mussel populations (Haag 2012, p. 370).

Current Condition

There are six populations of southern elktoe, and each generally corresponds with river sub-basins where southern elktoe occur: Middle Chattahoochee, Upper Flint, Lower Flint, Ichawaynochaway, Apalachicola, and Chipola. The Middle Chattahoochee and Lower Flint sub-basins (HUC8 watersheds) were slightly modified for population-level analyses of current and future condition by extending the boundaries to align with major system barriers (dams) that are relevant to the species because they form barriers for host fishes. While no significant barriers to the southern elktoe's host fishes occur between the Lower Flint and Ichawaynochaway sub-basins, or between the Apalachicola and Chipola sub-basins, factors that influence southern elktoe populations vary among those sub-basins, making it most appropriate to analyze each separately when considering current and future condition. Below, we describe occurrence records for each of the six southern elktoe populations.

Middle Chattahoochee

Historical collection records in the Middle Chattahoochee portion of the southern elktoe's range are from the mainstem Chattahoochee River near Columbus, Georgia; the Mulberry Creek system (Mulberry and Ossahatchie Creeks), Georgia; and the Uchee Creek System (Uchee and Little Uchee Creeks), Alabama. The species is known from 12 localities (sites); however, there has been only one collection record since 2000 in this sub-basin.

Upper Flint River

The historical southern elktoe distribution in the Upper Flint River includes the Flint River from Lake Blackshear upstream to Spalding County, Georgia, and the following tributaries: Patsiliga, Potato, White Oak, Line, and Whitewater Creeks. Southern elktoe has been documented at a total of 20 locations in this sub-basin; however, since 2000, southern elktoe has been observed at only one of these locations (Patsiliga Creek).

Ichawaynochaway Creek

Southern elktoe was not known from the Ichawaynochaway sub-basin prior to 2000, so there are no historical records for this population. In 2019, one live southern elktoe was found near the confluence of Chickasawhatchee Creek and Ichawaynochaway Creek in Baker County, Georgia. This site is part of Elmodel Wildlife Management Area and is managed by the State of Georgia.

Lower Flint River

The species is known from six localities in the Lower Flint River, four of which have observations since 2000. The species is historically known from Hutchinson Ferry (1953, 1954) and U.S. Highway 27 in Bainbridge (1954, 1956); however, Woodruff Dam was completed in 1954, and these sites on the lower Flint River are now in the upper reaches of Seminole Reservoir (Lake Seminole), all in the state of Georgia. In 2011, the southern elktoe was observed at four locations in the Flint River about 10.5

km (6.5 mi) north-northeast of Bainbridge. Presently, this reach is considered to harbor the most individuals known from its current rangewide distribution. Collection records from 2011–2017 noted at least 34 individuals of various sizes, some under 30 millimeters (mm) (1.2 inches (in)) in length, indicating the presence of multiple age classes and successful recruitment (Wisniewski et al. 2014, p. 37).

Apalachicola River

Prior to 2000, the southern elktoe was documented in the Apalachicola River near Chattahoochee, Florida. Currently, southern elktoe is considered rare in the Apalachicola River; one shell was collected in 2006, and one live individual each in 2010, 2012, and 2015. The lack of collections in Apalachicola River may be due in part to limited river access points and deeper habitats.

Chipola River

The southern elktoe appears to be relatively more abundant in the Chipola River in Florida; a total 18 live individuals and one shell were observed at 10 locations during 2013–2018. A recent quantitative study examining freshwater mussel distribution in the Apalachicola and lower Chipola Rivers collected six southern elktoe from the lower Chipola (Kaeser et al. 2019, p. 662).

Resiliency, Redundancy, and Representation

To assess resilience of southern elktoe, we developed population-level metrics associated with aspects of population dynamics that characterize freshwater mussel populations that are used in existing recovery criteria for other ACF Basin listed mussel species, including persistence within watersheds over both long- and short-term time frames, evidence of stable or increasing trends, and evidence of reproduction/recruitment. Presumed average lifespan of an individual elktoe is approximately 10 years; therefore, we interpret multiple collections through time in the same watershed as persistence, which implies conditions are appropriate for recruitment, growth, and survival. Also given this presumed lifespan of southern elktoe, we are confident that the species is still present in a watershed if it has been collected since 2010. Detection of small juvenile (less than 25 mm) mussels is challenging and biased by visual sampling methods. Given mussels of this size are hard to detect, we considered observation of southern elktoe less than 50 mm as evidence of recruitment in the previous 1 to 3 years. We also evaluated trends in land use/land cover as surrogates for associated stressors from both urban and agricultural development. We then combined the demographic and habitat indices into an overall resilience index to reflect the presence and severity of habitat stressors associated with those land use types within a watershed that would likely negatively influence the viability of southern elktoe populations.

TABLE 1—OVERALL RESILIENCE SUMMARY. SEE SSA REPORT FOR DETAILS ABOUT METHODOLOGY AND CALCULATIONS

[Service 2022, pp. 50–65]

	Middle chat	Upper flint	Ichaway	Lower flint	Apalach	Chipola
Demographic	0.09	0.05	0.36	0.27	0.23	0.43
Habitat	0.1	0.2	0.29	0.42	0.08	0.23
Overall	0.09 (0)	0	0.26	0.07 (0)	0.23	0.33

During the defined current time period (since 2000), the overall resilience indices (sum of all metrics) indicate that the Middle Chattahoochee, Upper Flint River, and Lower Flint River populations have extremely low resiliency and may be at risk of extirpation (Table 1). In the Middle Chattahoochee and Upper Flint Rivers, only isolated individuals have been documented since 2000, and both populations had limited evidence of recruitment. In the Lower Flint, individuals have been collected in recent years, with evidence of recent recruitment. However, elktoe persistence in this area over a longer time period is not yet evident, and land use stressors are highest in this area; therefore, there is extremely low current resilience for this population. Resilience of the other three populations (Ichawaynochaway Creek, Chipola River, and Apalachicola River) is categorized as poor. Very few elktoes were recently observed in these populations: 4 in Ichawaynochaway, 3 in Apalachicola, and 18 in Chipola. Although natural rarity of southern elktoe does not mean the species is in danger of extinction, small population size could lead to an increased chance of extirpation due to a random event. Ultimately, the overall resilience indices for all populations reflect land use patterns and stressors affecting those areas. These stressors have not been abated and continue to act on the species currently.

Based on best available data that we reviewed and synthesized in the SSA report, the southern elktoe's current condition is characterized by very low individual numbers within a restricted range, and associated reductions in redundancy and representation from the known historical distribution of the species. Southern elktoe was documented as extant in each population during the defined current time frame of 2000–2019. However, there is little redundancy as none of the six populations is categorized above poor resilience; thus, the species is extremely susceptible to catastrophic events. To assess the current representation of southern elktoe, we used three metrics to estimate and predict representative units that reflect the subspecies' adaptive capacity: (1) river basin, (2) longitudinal gradient in the watershed (ecoregions, hydrogeology, and water source/aquifers), and (3) habitat variability (size, categories range from creek to great rivers). While the species is still extant in all four river basins, there has been a loss of representation along the longitudinal gradient, and the three populations with poor resilience are all limited to large tributaries (Ichawaynochaway Creek) and rivers (Chipola, Apalachicola), thus the species has extremely limited representation across its range.

Future Conditions

To investigate future conditions, we predicted the southern elktoe's response to plausible future scenarios reflecting different environmental conditions and conservation efforts. The future scenarios project threats into the future and then consider the impacts the threats could have on the viability of the species. Based on our review of factors currently affecting viability of southern elktoe, we focused our evaluation of

future condition on habitat degradation and loss associated with two prevalent land uses in the ACF Basin, agricultural and urban development, and their associated stressors to water quality and quantity. We interpreted projections for increases in agriculture and urban development through 2050 as surrogates for the stressors that would accompany increased water use for irrigation or municipal sources, increased surface runoff, and increases in contaminants specific to each sector (*e.g.,* nutrients and pesticides for agriculture, pollutants from urban land use). We used 2050 as our future time horizon because it is within the time frame for which climate and land use model projections exist and it encompasses at least three generations of southern elktoe, which provides confidence in predicting the species' response to threats.

We evaluated three future scenarios by modifying demographic variables according to feasible future trajectories to cover a range of possibilities from stable/increasing populations to loss of populations with the lowest number of individuals documented during our current time frame. We used land use/land cover models to forecast urban and agricultural land uses within each sub-basin, and again we combined the demographic and habitat indices into ''overall resilience'' for each population. We assessed redundancy and representation in the same manner as we did for current condition. Because we determined that the current condition of southern elktoe is consistent with an endangered species (see Determination of Southern Elktoe's Status, below), we are not presenting the results of the future scenarios in this proposed rule. Please refer to the SSA report (Service 2022, pp.103–113) for the full analysis of future conditions and descriptions of the associated scenarios.

We note that, by using the SSA framework to guide our analysis of the scientific information documented in the SSA report, we have not only analyzed individual effects on the species, but we have also analyzed their potential cumulative effects. We incorporate the cumulative effects into our SSA analysis when we characterize the current and future condition of the species. To assess the current and future condition of the species, we undertake an iterative analysis that encompasses and incorporates the threats individually and then accumulates and evaluates the effects of all the factors that may be influencing the species, including threats and conservation efforts. Because the SSA framework considers not just the presence of the factors, but to what degree they collectively influence risk to the entire species, our assessment integrates the cumulative effects of the factors and replaces a standalone cumulative effects analysis.

Conservation Efforts

Multiple water resource planning and policy actions in Georgia and Florida have been enacted to increase water quality and/or decrease water consumption. The State of Georgia's regional water plans are developed in accordance with the Georgia Comprehensive State-wide Water Management Plan (State Water Plan), which was adopted by the General Assembly in January 2008. The State Water Plan requires the preparation of regional water development and conservation plans (regional water plans) to manage water resources in a sustainable manner through 2050, thus protecting instream habitat for the southern elktoe. Additionally, the Metropolitan North Georgia Water Planning District has implemented and expanded numerous conservation measures outlined in the 2017 Water Management Plan. The State has also enacted a number of laws related to water conservation, including the Water Stewardship Act of 2010, which has decreased per capita water use in the District by 30 percent since 2000 (Metropolitan North Georgia Water Planning District 2017, pp. 5–44).

In 1977, Georgia amended the Georgia Water Control Act of 1964 to regulate wastewater discharges and required permits for municipal and industrial users in excess of 100,000 gallons per day, but it did not limit the volume of withdrawals. Not until 1988, when the Georgia Water Quality Control Act (1964) and the Groundwater Use Act (1972) were amended, did farm withdrawals of surface and groundwater in excess of 100,000 gallons per day require a permit. These State laws prevent degradation of water quality, which is important to support southern elktoe.

Georgia passed the Flint River Drought Protection Act (FRDPA) in 2000 with the goal of reducing surface water withdrawals during dry periods, keeping more water in the ACF Basin, and mitigating tri-state water resource friction. The FRDPA allowed the Georgia Environmental Protection Division (GEPD) director to declare a drought in the Flint River basin and enabled the State to pay farmers not to irrigate. The process was used in 2001 and 2002; however, the GEPD concluded that the cropland users with the highest water usage continued to irrigate. This State law allows more water to remain in rivers during dry periods, thus reducing the potential stress to southern elktoe during droughts.

The Florida Water Resources Act establishes all water in Florida as a public resource that is managed by the Florida Department of Environmental Protection and five water management districts. Each district creates a regional water supply plan every 5 years. Florida establishes minimum flow limits (MFLs) to identify the limit at which withdrawals would be significantly harmful to the water resources or ecology of an area, particularly those areas where southern elktoe exist. Also, the Florida Legislature enacted the Surface Water Improvement and Management (SWIM) Act in 1987 by to improve and manage the water quality and natural systems of Florida's surface waters, which include lakes, rivers, streams, estuaries, springs, and wetlands. These laws that are intended to maintain flow and quality of the waters also support the southern elktoe.

The presence of other listed mussels within the ACF Basin resulted in designation of their critical habitat in 2007 (see 72 FR 64286; November 15, 2007). As a result, Federal agencies have been required under the Act's section 7 to coordinate with the Service to ensure actions they carry out, fund, or authorize will not jeopardize species' persistence or adversely modify critical habitat. This requirement has indirectly offered some protection to southern elktoe throughout most of its historical range; however, it is important to note that the most recent known locations of southern elktoe collections during the current time period in the Upper Flint population are not in any species' designated critical habitat and do not benefit from this collateral protection. Additionally, lands in conservation ownership in the ACF Basin include the Apalachicola National Forest in the Apalachicola, several spring habitats in the Chipola River Basin, and Elmodel Wildlife Management Area in the Ichawaynochaway. These conservation lands provide protection from development and other stressors to the southern elktoe.

Determination of Southern Elktoe's Status

Section 4 of the Act (16 U.S.C. 1533) and its implementing regulations (50 CFR part 424) set forth the procedures for determining whether a species meets the definition of an endangered species or a threatened species. The Act defines an ''endangered species'' as a species in danger of extinction throughout all or a

significant portion of its range, and a ''threatened species'' as a species likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether a species meets the definition of an endangered species or a threatened species because of any of the following factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence.

Status Throughout All of Its Range

After evaluating threats to the species and assessing the cumulative effect of the threats under the Act's section 4(a)(1) factors, we find that past and ongoing habitat degradation and loss, including impaired water quality, decreased water quantity, and barriers to host fish movement, have reduced habitat suitability (Factor A) for the southern elktoe to such a degree that there is little resiliency of the species throughout its range. Once known from a variety of small stream to large river habitats, which supported the ability to adapt to changing riverine conditions (representation), currently the southern elktoe is restricted to larger rivers and mainstem habitats within the ACF Basin. This reduction in range represents significantly reduced representation and redundancy from historical conditions. Stressors to the southern elktoe's habitat from agricultural and urban land uses are present in all the southern populations except the Apalachicola River. The Middle Chattahoochee, Upper Flint River, and Lower Flint River populations have little resiliency and may be at risk of extirpation. Resilience of the other three populations—Ichawaynochaway Creek, Chipola River, and Apalachicola River—is currently categorized as poor (*i.e.,* has an index between 0.2–0.39, see Table 1 above and Table 4.4. in SSA report (Service 2022, p. 57).

While we anticipate that the threats will continue to act on the species in the future, they are affecting the species such that it is in danger of extinction now, and, therefore, we find that a threatened species status is not appropriate. We find that the southern elktoe's vulnerability to ongoing stressors is heightened to such a degree that it is currently in danger of extinction as a result of its reduced range and critically low numbers. Thus, after assessing the best available information, we determine that southern elktoe is in danger of extinction throughout all of its range.

Status Throughout a Significant Portion of Its Range

Under the Act and our implementing regulations, a species may warrant listing if it is in danger of extinction or likely to become so in the foreseeable future throughout all or a significant portion of its range. We have determined that the southern elktoe is in danger of extinction throughout all of its range and accordingly did not undertake an analysis of any significant portion of its range. Because the southern elktoe warrants listing as endangered throughout all of its range, our determination does not conflict with the decision in *Center for Biological Diversity* v. *Everson,* 435 F. Supp. 3d 69 (D.D.C. 2020) (*Everson*), which vacated the provision of the Final Policy on Interpretation of the Phrase ''Significant Portion of Its Range'' in the Endangered Species Act's Definitions of ''Endangered Species'' and ''Threatened Species'' (79 FR 37578; July 1, 2014) providing that if the Service determines that a species is threatened throughout all of its range, the Service will not analyze whether the species is endangered in a significant portion of its range.

Determination of Status

Our review of the best available scientific and commercial information indicates that the southern elktoe meets the Act's definition of an endangered species. Therefore, we propose to list the southern elktoe as an endangered species in accordance with sections 3(6) and 4(a)(1) of the Act.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened species under the Act include recognition as a listed species, planning and implementation of recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing results in public awareness, and conservation by Federal, State, Tribal, and local agencies, private organizations, and individuals. The Act encourages cooperation with the States and other countries and calls for recovery actions to be carried out for listed species. The protection required by Federal agencies, including the Service, and the prohibitions against certain activities are discussed, in part, below.

The primary purpose of the Act is the conservation of endangered and threatened species and the ecosystems upon which they depend. The ultimate goal of such conservation efforts is the recovery of these listed species, so that they no longer need the protective measures of the Act. Section 4(f) of the Act calls for the Service to develop and implement recovery plans for the conservation of endangered and threatened species. The goal of this process is to restore listed species to a point where they are secure, self-sustaining, and functioning components of their ecosystems.

The recovery planning process begins with development of a recovery outline made available to the public soon after a final listing determination. The recovery outline guides the immediate implementation of urgent recovery actions while a recovery plan is being developed. Recovery teams (composed of species experts, Federal and State agencies, nongovernmental organizations, and stakeholders) may be established to develop and implement recovery plans. The recovery planning process involves the identification of actions that are necessary to halt and reverse the species' decline by addressing the threats to its survival and recovery. The recovery plan identifies recovery criteria for review of when a species may be ready for reclassification from endangered to threatened (''downlisting'') or removal from protected status (''delisting''), and methods for monitoring recovery progress. Recovery plans also establish a framework for agencies to coordinate their recovery efforts and provide estimates of the cost of implementing recovery tasks. Revisions of the plan may be done to address continuing or new threats to the species, as new substantive information becomes available. The recovery outline, draft recovery plan, final recovery plan, and any revisions will be available on our website as they are completed (*https://www.fws.gov/program/endangered-species*), or from our Florida Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**).

Implementation of recovery actions generally requires the participation of a broad range of partners, including other Federal agencies, States, Tribes, nongovernmental organizations, businesses, and private landowners. Examples of recovery actions include habitat restoration (*e.g.,* restoration of native vegetation), research, captive propagation and reintroduction, and outreach and education. The recovery of many listed species cannot be accomplished solely on Federal lands

because their range may occur primarily or solely on non-Federal lands. To achieve recovery of these species requires cooperative conservation efforts on private, State, and Tribal lands.

If this species is listed, funding for recovery actions will be available from a variety of sources, including Federal budgets, State programs, and cost-share grants for non-Federal landowners, the academic community, and nongovernmental organizations. In addition, pursuant to section 6 of the Act, the States of Alabama, Georgia, and Florida would be eligible for Federal funds to implement management actions that promote the protection or recovery of the southern elktoe. Information on our grant programs that are available to aid species recovery can be found at: *https://www.fws.gov/service/financial-assistance.*

Although the southern elktoe is only proposed for listing under the Act at this time, please let us know if you are interested in participating in recovery efforts for this species. Additionally, we invite you to submit any new information on this species whenever it becomes available and any information you may have for recovery planning purposes (see **FOR FURTHER INFORMATION CONTACT**).

Section 7(a) of the Act requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as an endangered or threatened species and with respect to its critical habitat, if any is designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a species proposed for listing or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of the species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service.

Examples of actions that may be subject to the section 7 processes are land management or other landscape-altering activities on Federal lands administered by the Service, U.S. Forest Service, and National Park Service, as well as actions on State, Tribal, local, or private lands that require a Federal permit (such as a permit from the U.S. Army Corps of Engineers under section 404 of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or a permit from the Service under section 10 of the Act) or that involve some other Federal action (such as funding from the Federal Highway Administration, Federal Aviation Administration, or the Federal Emergency Management Agency). Federal actions not affecting listed species or critical habitat—and actions on State, Tribal, local, or private lands that are not federally funded, authorized, or carried out by a Federal agency—do not require section 7 consultation. Examples of Federal agency actions that may require consultation for the southern elktoe could include: channel dredging and maintenance, dam projects including flood control, navigation, hydropower, bridge projects, stream restoration, and Clean Water Act permitting; flow management and water storage (systemwide), slough restoration project on Apalachicola River, expansion of limestone mine on Chipola River; technical and financial assistance for projects and the U.S. Forest Service (aquatic habitat restoration, fire management plans, fire suppression, fuel reduction treatments, forest plans, mining permits); renewable and alternative energy projects; issuance of section 10 permits for enhancement of survival, habitat conservation plans, and safe harbor agreements; National Wildlife Refuge planning and refuge activities; Partners for Fish and Wildlife program projects benefiting these species or other listed species, Wildlife and Sportfish Restoration program sportfish stocking; development of water quality criteria and permitting; and future river crossings/bridge replacement and maintenance. Given the difference in triggers for conferencing and consultation, Federal agencies should coordinate with the local Service Field Office (see **FOR FURTHER INFORMATION CONTACT**) with any specific questions.

The Act and its implementing regulations set forth a series of general prohibitions and exceptions that apply to endangered wildlife. The prohibitions of section 9(a)(1) of the Act, codified at 50 CFR 17.21, make it illegal for any person subject to the jurisdiction of the United States to take (which includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect; or to attempt any of these) endangered wildlife within the United States or on the high seas. In addition, it is unlawful to import; export; deliver, receive, carry, transport, or ship in interstate or foreign commerce in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any species listed as an endangered species. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to employees of the Service, the National Marine Fisheries Service, other Federal land management agencies, and State conservation agencies.

We may issue permits to carry out otherwise prohibited activities involving endangered wildlife under certain circumstances. Regulations governing permits are codified at 50 CFR 17.22. With regard to endangered wildlife, a permit may be issued for the following purposes: for scientific purposes, to enhance the propagation or survival of the species, and for incidental take in connection with otherwise lawful activities. The statute also contains certain exemptions from the prohibitions, which are found in sections 9 and 10 of the Act.

It is our policy, as published in the **Federal Register** on July 1, 1994 (59 FR 34272), to identify to the maximum extent practicable at the time a species is listed those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of a proposed listing on proposed and ongoing activities within the range of the species proposed for listing. At this time, we are unable to identify specific activities that would not be considered to result in a violation of section 9 of the Act because the southern elktoe occurs in several riverine habitats across its range and it is likely that site-specific conservation measures may be needed for activities that may directly or indirectly affect the species.

Based on the best available information, the following activities may potentially result in a violation of section 9 of the Act if they are not authorized in accordance with applicable law; this list is not comprehensive:

(1) Introduction of nonnative species that compete with or prey upon the southern elktoe;

(2) Release of biological control agents that affect any life stage of this species;

(3) Modification of the channel or water flow of any stream in which the southern elktoe is known to occur; and

(4) Discharge of chemicals or fill material into any waters in which the southern elktoe is known to occur.

II. Critical Habitat

Background

Critical habitat is defined in section 3 of the Act as:

(1) The specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the Act, on which are found those physical or biological features

(a) Essential to the conservation of the species, and

(b) Which may require special management considerations or protection; and

(2) Specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Our regulations at 50 CFR 424.02 define the geographical area occupied by the species as an area that may generally be delineated around species' occurrences, as determined by the Secretary (that is, range). Such areas may include those areas used throughout all or part of the species' life cycle, even if not used on a regular basis (*e.g.,* migratory corridors, seasonal habitats, and habitats used periodically, but not solely by vagrant individuals).

Conservation, as defined under section 3 of the Act, means to use and the use of all methods and procedures that are necessary to bring an endangered or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

Critical habitat receives protection under section 7 of the Act through the requirement that Federal agencies ensure, in consultation with the Service, that any action they authorize, fund, or carry out is not likely to result in the destruction or adverse modification of critical habitat. The designation of critical habitat does not affect land ownership or establish a refuge, wilderness, reserve, preserve, or other conservation area. Such designation also does not allow the government or public to access private lands. Such designation does not require implementation of restoration, recovery, or enhancement measures by non-Federal landowners. Where a landowner requests Federal agency funding or authorization for an action that may affect a listed species or critical habitat, the Federal agency would be required to consult with the Service under section 7(a)(2) of the Act. However, even if the Service were to conclude that the proposed activity would likely result in destruction or adverse modification of the critical habitat, the Federal action agency and the landowner are not required to abandon the proposed activity, or to restore or recover the species; instead, they must implement ''reasonable and prudent alternatives'' to avoid destruction or adverse modification of critical habitat.

Under the first prong of the Act's definition of critical habitat, areas within the geographical area occupied by the species at the time it was listed are included in a critical habitat designation if they contain physical or biological features (1) which are essential to the conservation of the species and (2) which may require special management considerations or protection. For these areas, critical habitat designations identify, to the extent known using the best scientific and commercial data available, those physical or biological features that are essential to the conservation of the species (such as space, food, cover, and protected habitat).

Under the second prong of the Act's definition of critical habitat, we can designate critical habitat in areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Section 4 of the Act requires that we designate critical habitat on the basis of the best scientific data available. Further, our Policy on Information Standards Under the Endangered Species Act (published in the **Federal Register** on July 1, 1994 (59 FR 34271)), the Information Quality Act (section 515 of the Treasury and General Government Appropriations Act for Fiscal Year 2001 (Pub. L. 106–554; H.R. 5658)), and our associated Information Quality Guidelines provide criteria, establish procedures, and provide guidance to ensure that our decisions are based on the best scientific data available. They require our biologists, to the extent consistent with the Act and with the use of the best scientific data available, to use primary and original sources of information as the basis for recommendations to designate critical habitat.

When we are determining which areas should be designated as critical habitat, our primary source of information is generally the information from the SSA report and information developed during the listing process for the species. Additional information sources may include any generalized conservation strategy, criteria, or outline that may have been developed for the species; the recovery plan for the species; articles in peer-reviewed journals; conservation plans developed by States and counties; scientific status surveys and studies; biological assessments; other unpublished materials; or experts' opinions or personal knowledge.

Habitat is dynamic, and species may move from one area to another over time. We recognize that critical habitat designated at a particular point in time may not include all of the habitat areas that we may later determine are necessary for the recovery of the species. For these reasons, a critical habitat designation does not signal that habitat outside the designated area is unimportant or may not be needed for recovery of the species. Areas that are important to the conservation of the species, both inside and outside the critical habitat designation, will continue to be subject to: (1) Conservation actions implemented under section 7(a)(1) of the Act; (2) regulatory protections afforded by the requirement in section 7(a)(2) of the Act for Federal agencies to ensure their actions are not likely to jeopardize the continued existence of any endangered or threatened species; and (3) the prohibitions found in section 9 of the Act. Federally funded or permitted projects affecting listed species outside their designated critical habitat areas may still result in jeopardy findings in some cases. These protections and conservation tools will continue to contribute to recovery of the species. Similarly, critical habitat designations made on the basis of the best available information at the time of designation will not control the direction and substance of future recovery plans, habitat conservation plans (HCPs), or other species conservation planning efforts if new information available at the time of those planning efforts calls for a different outcome.

Physical or Biological Features Essential to the Conservation of the Species

In accordance with section 3(5)(A)(i) of the Act and regulations at 50 CFR 424.12(b), in determining which areas we will designate as critical habitat from within the geographical area occupied

by the species at the time of listing, we consider the physical or biological features that are essential to the conservation of the species and which may require special management considerations or protection. The regulations at 50 CFR 424.02 define ''physical or biological features essential to the conservation of the species'' as the features that occur in specific areas and that are essential to support the life-history needs of the species, including, but not limited to, water characteristics, soil type, geological features, sites, prey, vegetation, symbiotic species, or other features. A feature may be a single habitat characteristic or a more complex combination of habitat characteristics. Features may include habitat characteristics that support ephemeral or dynamic habitat conditions. Features may also be expressed in terms relating to principles of conservation biology, such as patch size, distribution distances, and connectivity. For example, physical features essential to the conservation of the species might include gravel of a particular size required for spawning, alkaline soil for seed germination, protective cover for migration, or susceptibility to flooding or fire that maintains necessary early-successional habitat characteristics. Biological features might include prey species, forage grasses, specific kinds or ages of trees for roosting or nesting, symbiotic fungi, or absence of a particular level of nonnative species consistent with conservation needs of the listed species. The features may also be combinations of habitat characteristics and may encompass the relationship between characteristics or the necessary amount of a characteristic essential to support the life history of the species.

In considering whether features are essential to the conservation of the species, we may consider an appropriate quality, quantity, and spatial and temporal arrangement of habitat characteristics in the context of the life-history needs, condition, and status of the species. These characteristics include, but are not limited to, space for individual and population growth and for normal behavior; food, water, air, light, minerals, or other nutritional or physiological requirements; cover or shelter; sites for breeding, reproduction, or rearing (or development) of offspring; and habitats that are protected from disturbance.

Summary of Essential Physical or Biological Features

As described above under Summary of Biological Status and Threats, the southern elktoe is a freshwater mussel that occurs in river and streams. Occasional or regular interaction among individuals in different reaches not interrupted by a barrier likely occurs, but in general, interaction is strongly influenced by habitat fragmentation and distance between occupied river or stream reaches. Once released from their fish host, freshwater mussels are benthic, generally sedentary aquatic organisms and closely associated with appropriate habitat patches within a river or stream.

We derive the specific physical or biological features essential to the conservation of the southern elktoe from studies of these species' (or appropriate surrogate species') habitat, ecology, and life history. The primary habitat elements that influence resiliency of the southern elktoe include water quality, water quantity, substrate, habitat connectivity, and the presence of host fish species to ensure recruitment. Adequate flows ensure delivery of oxygen, enable reproduction, deliver food to filter-feeding mussels, and reduce contaminants and fine sediments from interstitial spaces. Stream velocity is not static over time, and variations may be attributed to seasonal changes (with higher flows in winter/spring and lower flows in summer/fall), extreme weather events (*e.g.,* drought or floods), or anthropogenic influence (*e.g.,* flow regulation via impoundments).These features are also described above as resource needs under Summary of Biological Status and Threats, and a full description is available in the SSA report; the individuals' needs are summarized below in Table 2.

TABLE 2—SOUTHERN ELKTOE'S RESOURCE NEEDS

Life stage	Resources needed to complete life stage [1]
All	• Flowing water. • Moderate water temperature (in general ≤32°C). • Adequate dissolved oxygen (in general ≥5.0 mg/L). • Good water quality with low concentrations of toxicants (chlorine, un-ionized ammonia, heavy metals, salts, pesticides).
Fertilized eggs (brooding Oct–Feb).	• Normal suspended solid levels. • Appropriate spawning temperatures. • Mature males upstream from mature females. • Suitable flows for fertilization to occur.
Glochidia Winter.	• Presence of catostomid host fish. • Suitable flows to permit host-glochidia interactions.
Juveniles Excystment from host fish to ~25 mm.	• Areas with low shear stress during high flows. • Appropriate substrates (stable sand/gravel free from excessive silt). • Suitable interstitial water quality, including moderate temperature and adequate dissolved oxygen, and absence of toxicants. • Adequate food availability (bacteria, algae, diatoms, detritus) in sediment. • Suitable temperatures to maximize growth (predation risk declines as size increases). • Limited predators to juveniles (*e.g.*, flatworms).
Adults Greater than ~25 mm.	• Areas with low shear stress during high flows. • Appropriate substrates (stable sand/gravel free from excessive silt). • Adequate food availability (bacteria, algae, diatoms, detritus) in water column.

[1] These resource needs are common among North American freshwater mussels; however, due to lack of species-specific research, parameters specific to the southern elktoe are unavailable.

Additional information can be found in chapter 2 of the SSA report (Service 2022, pp. 11–15), which is available on *https://www.regulations.gov* under Docket No. FWS–R4–ES–2022–0179. We have determined that the following physical or biological features are essential to the conservation of southern elktoe:

(1) Adequate flows, or a hydrologic flow regime (magnitude, timing, frequency, duration, rate of change, and overall seasonality of discharge over time), necessary to maintain benthic habitats where the species is found and to maintain stream connectivity, specifically providing for the exchange of nutrients and sediment for maintenance of the mussel and fish host's habitat and food availability, maintenance of spawning habitat for native fishes that could serve as host fish, and the ability for newly transformed juveniles to settle and become established in their habitats.

(2) Suitable substrates and connected instream habitats, characterized by geomorphically stable stream channels and banks (*i.e.,* channels that maintain lateral dimensions, longitudinal profiles, and sinuosity patterns over time without an aggrading or degrading bed elevation) with habitats that support the southern elktoe (*e.g.,* slightly depositional habitats consisting of mixtures of silty mud, sand, and gravel).

(3) Water and sediment quality necessary to sustain natural physiological processes for normal behavior, growth, and viability of all life stages. Water and sediment quality needs include appropriate thermal and dissolved oxygen regimes (temperature generally not above 90 degrees Fahrenheit (°F) (32 degrees Celsius (°C)) and dissolved oxygen generally greater than 5.0 mg/L) that are also low in ammonia (generally not above 1.5 mg N/L), heavy metals, pharmaceutical concentrations, salinity (generally not above 4 parts per million), total suspended solids, and other pollutants.

(4) The presence and abundance of fish hosts necessary for recruitment of the southern elktoe, specifically species of the sucker family, Catostomidae, including the genera *Moxostoma* (Apalachicola redhorse, greater jumprock, and blacktail redhorse) and *Erimyzon* (creek chubsucker and lake chubsucker).

Special Management Considerations or Protection

When designating critical habitat, we assess whether the specific areas within the geographical area occupied by the species at the time of listing contain features which are essential to the conservation of the species and which may require special management considerations or protection.

The features essential to the conservation of the southern elktoe may require special management considerations or protections to reduce the following threats:

(1) Alteration of the natural flow regime (modifying the natural hydrograph or seasonal flows), including (but not limited to) water withdrawals that result in flow reduction and available water quantity, or channelization that changes the natural stream flow pattern;

(2) Changes of the landscape, including (but not limited to) land conversion for urban and agricultural use, infrastructure (pipelines, roads, bridges, utilities), and water uses (ground water withdrawal, water supply reservoirs, wastewater treatment, etc.);

(3) Significant degradation of water quality and nutrient pollution from a variety of sources, such as stormwater runoff or wastewater from municipal facilities;

(4) Impacts from invasive species;

(5) Incompatible land use activities that remove large areas of forested wetlands or riparian areas or watershed/floodplain disturbances that release sediments, pollutants, or nutrients into the water;

(6) Installation or maintenance of dams, culverts, or pipes that create a barrier to movement for the southern elktoe, or its host fishes; and

(7) Changes and shifts in seasonal precipitation patterns as a result of climate change.

Management activities that could ameliorate these threats include, but are not limited to: use of best management practices designed to reduce sedimentation, erosion, and bank destruction; protection of riparian corridors and native woody vegetation; moderation of surface and ground water withdrawals to maintain natural flow regimes; improved stormwater management; and avoidance or minimization of other watershed and floodplain disturbances that release sediments, pollutants, or nutrients into the water.

Criteria Used To Identify Critical Habitat

As required by section 4(b)(2) of the Act, we use the best scientific data available to designate critical habitat. In accordance with the Act and our implementing regulations at 50 CFR 424.12(b), we review available information pertaining to the habitat requirements of the species and identify specific areas within the geographical area occupied by the species at the time of listing and any specific areas outside the geographical area occupied by the species to be considered for designation as critical habitat. We are proposing to designate critical habitat in areas within the geographical area occupied by the species at the time of listing. The proposed critical habitat designation includes the occupied rivers and streams within the current range that we determined contain the physical and biological features that are essential to the conservation of these species. These rivers and streams contain known populations and have retained the physical or biological features that could allow for the maintenance and expansion of existing populations.

We also are proposing to designate specific areas outside the geographical area occupied by the species because we have determined that a designation limited to occupied areas would be inadequate to ensure the conservation of the species. There are current records of southern elktoe in the Upper Flint River Complex and the Middle Chattahoochee system; however, the currently occupied reaches are significantly reduced compared to historical distribution. Designating only occupied areas in these two systems (which equates to one small stream reach in each system and thus provides little redundancy for the species) is not sufficient for the conservation of the species; therefore, unoccupied reaches that had historical observations of the species are included in the designation. The addition of these unoccupied reaches will provide areas that support the southern elktoe's life processes; thus, these unoccupied reaches are considered habitat that contains all of the physical and biological features that are essential to the conservation of the southern elktoe. Further, these unoccupied areas are reasonably certain to contribute to the conservation of the species, as they currently support other freshwater mussel species and provide habitat for fish hosts that are essential for the conservation of the southern elktoe.

Sources of data for this proposed critical habitat include information from State agencies and survey reports throughout the species' range (Service 2022, entire). We have also reviewed available information that pertains to the habitat requirements of the species. Sources of information on habitat requirements include information for the six co-occurring listed mussels and other closely related species, published peer-reviewed articles, agency reports, and data collected during monitoring efforts.

In summary, for all areas within the geographic area occupied or unoccupied by the species at the time of listing that we are proposing as critical habitat, we delineated critical habitat unit boundaries using the following criteria: the upstream boundary of a unit is the first perennial tributary confluence or first permanent barrier to fish passage (such as a dam) upstream of the upstream-most occurrence record (either current or historical). The downstream boundary of a unit is the mouth of the stream, the upstream extent of tidal influence, or the upstream extent of an impoundment, whichever comes first, downstream of the farthest downstream occurrence record. The lateral extent of each unit includes the bankfull width of the stream. We consider portions of the following rivers and streams to be appropriate for critical habitat designation: Apalachicola River, Chipola River, Lower Flint River Complex, Upper Flint River Complex, and Middle Chattahoochee (see Proposed Critical Habitat Designation, below).

When determining proposed critical habitat boundaries, we made every effort to avoid including developed areas such as lands covered by buildings, pavement, and other structures because such lands lack physical or biological features necessary for the southern elktoe. The scale of the maps we prepared under the parameters for publication within the Code of Federal Regulations may not reflect the exclusion of such developed lands. Any such lands inadvertently left inside critical habitat boundaries shown on the maps of this proposed rule have been excluded by text in the proposed rule and are not proposed for designation as critical habitat. Therefore, if the critical habitat is finalized as proposed, a Federal action involving these lands would not trigger section 7 consultation with respect to critical habitat and the requirement of no adverse modification unless the specific action would affect the physical or biological features in the adjacent critical habitat.

We propose to designate as critical habitat lands that we have determined are occupied at the time of listing (*i.e.,* currently occupied) and that contain one or more of the physical or biological features that are essential to support life-history processes of the species. We have determined that occupied areas are inadequate to ensure the conservation of the species. Therefore, we have also identified, and propose for designation as critical habitat, unoccupied areas that are essential for the conservation of the species. Five units are proposed for designation based on one or more of the physical or biological features being present to support the southern elktoe's life-history processes.

The proposed critical habitat designation is defined by the map or maps, as modified by any accompanying regulatory text, presented at the end of this document under Proposed Regulation Promulgation. We include more detailed information on the boundaries of the critical habitat designation in the preamble of this document. We will make the coordinates or plot points or both on which each map is based available to the public on *https://www.regulations.gov* at Docket No. FWS–R4–ES–2022–0179.

Proposed Critical Habitat Designation

We are proposing to designate approximately 578 river mi (929 river km) in five units as critical habitat for the southern elktoe. The critical habitat areas we describe below constitute our current best assessment of areas that meet the definition of critical habitat for the species. Critical habitat includes only stream channels up to bankfull height, where the stream base flow is contained within the channel. The five units we propose as critical habitat are: (1) Apalachicola River, (2) Chipola River, (3) Lower Flint River Complex, (4) Upper Flint River Complex, and (5) Middle Chattahoochee. Table 3 shows the proposed critical habitat units and the approximate area of each unit.

TABLE 3—PROPOSED CRITICAL HABITAT UNITS FOR SOUTHERN ELKTOE

[Area estimates reflect all land within critical habitat unit boundaries]

Critical habitat unit	Land ownership by type	Length of unit in river kilometers (miles)	Occupied?
1. Apalachicola River	Public and Private	142.8 (88.7)	Yes.
2. Chipola River	Public and Private	131.3 (81.6)	Yes.
3. Lower Flint River Complex	Public and Private	165.9 (103.1)	Yes.
4. Upper Flint River Complex		Total: 396.6 (246.4)	
4a: Patsiliga Creek	Private	36.2 (22.5)	Yes.
4b: Upper Flint Tributaries	Public and Private	360.4 (223.9)	No.
5. Middle Chattahoochee		Total 92.9 (57.7)	
5a: Uchee Creek	Private	36.7 (22.8)	Yes.
5b: Little Uchee Creek	Private	20.3 (12.6)	No.
5c: Mulberry Creek	Public and Private	35.9 (22.3)	No.
Total		929.5 (577.6)	

Note: Area sizes may not sum due to rounding.

We present brief descriptions of all units, and reasons why they meet the definition of critical habitat for southern elktoe, below.

Unit 1: Apalachicola River

Unit 1 consists of 142.8 river km (88.7 mi) of the Apalachicola River in Calhoun, Franklin, Gadsden, Gulf, Jackson, and Liberty Counties, Florida; this unit is currently occupied and contains all the physical and biological features essential to the conservation of the species. The main stem of the Apalachicola River in Unit 1 extends from near Prospect Bluff Historic Sites in Apalachicola National Forest at river mile 20 (U.S. Army Corps of Engineers Navigable Waterway Mile Markers) in Franklin County, Florida, upstream to the Jim Woodruff Lock and Dam in Gadsden and Jackson Counties, Florida (the river is the county boundary), including stream habitat up to bankfull height.

Riparian lands that border the unit include approximately 36.5 river km (22.7 mi) in public conservation and 41.9 river km (26 mi) in combined public conservation and private ownership. The Nature Conservancy's Apalachicola Bluffs and Ravines Preserve (included in private ownership) protects rare steephead and other habitats along the Apalachicola

River. General land use on adjacent riparian lands and the surrounding HUC 8-level management unit includes forested or rural lands with more limited threats than other units. Special management considerations that may be required to maintain the physical and biological features include, but are not limited to: use of best management practices designed to reduce sedimentation, erosion, and bank destruction and protection of riparian corridors and native woody vegetation.

Unit 2: Chipola River

Unit 2 consists of 131.3 river km (81.6 mi) of the Chipola River (including the reach known as Dead Lake) in Calhoun, Gulf, and Jackson Counties, Florida; this unit is currently occupied and contains all the physical and biological features essential to the conservation of the species. The main stem of the Chipola River in Unit 2 extends from its confluence with the Apalachicola River in Gulf County, Florida, upstream 131.3 km (81.6 mi) to approximately where the river flows underground in Florida Caverns State Park in Jackson County, Florida, including stream habitat up to bankfull height.

Riparian lands that border the unit include approximately 16.6 river km (10.3 mi) in public conservation and 19.3 river km (12 mi) in combined public conservation and private ownership. Water quality and quantity stressors from expansion of agricultural land use is a possible future threat in this unit. Special management considerations that may be required to maintain the physical and biological features include, but are not limited to: use of best management practices designed to reduce sedimentation, erosion, and bank destruction; protection of riparian corridors and native woody vegetation; moderation of surface and ground water withdrawals to maintain natural flow regimes; and avoidance or minimization of other watershed and floodplain disturbances that release sediments, pollutants, or nutrients into the water.

Unit 3: Lower Flint River Complex

Unit 3 consists of 165.9 river km (103.1 mi) of the mainstem of the Flint River between Lake Seminole (impounded by the Jim Woodruff Lock and Dam) and the Flint River Dam (which impounds Lake Worth), and the mainstems of two tributaries in Baker, Decatur, Dougherty, and Mitchell Counties, Georgia; this unit is currently occupied and contains all the physical and biological features essential to the conservation of the species. The mainstem of the Flint River in Unit 3 extends from 1.3 river km (0.82 mi) downstream of U.S. Highway 84 in Decatur County, Georgia (the approximate upstream extent of Lake Seminole), upstream 122.7 river km (76.3 mi) to the Flint River Dam in Dougherty County, Georgia. Unit 3 includes 26.1 river km (16.2 mi) of the mainstem of Ichawaynochaway Creek from its confluence with the Flint River upstream to its confluence with Chickasawhatchee Creek, and 15.7 river km (9.7 mi) of the mainstem of Chickasawhatchee Creek from its confluence with Ichawaynochaway Creek upstream to its confluence with Spring Creek in Baker County, Georgia, including stream habitat up to bankfull height.

Riparian lands that border the unit include approximately 17.3 river km (10.8 mi) in public conservation and 28.5 river km (17.7 mi) in combined public conservation and private ownership. Water quality and quantity stressors from expansion of agricultural land use is a future threat in this unit. Special management considerations that may be required to maintain the physical and biological features include, but are not limited to: use of best management practices designed to reduce sedimentation, erosion, and bank destruction; protection of riparian corridors and native woody vegetation; moderation of surface and ground water withdrawals to maintain natural flow regimes; and avoidance or minimization of other watershed and floodplain disturbances that release sediments, pollutants, or nutrients into the water.

Unit 4: Upper Flint River Complex

Unit 4 is comprised of two subunits; both subunits include stream habitat up to bankfull height.

Subunit 4a includes 36.2 river km (22.5 mi) of Patsiliga Creek in Taylor County, Georgia. This subunit is currently occupied by the species and contains all the physical and biological features essential to the conservation of the species.

Subunit 4b includes 360.4 river km (223.9 mi) of the mainstem Flint River and four of its tributaries upstream of Lake Blackshear in Coweta, Crawford, Dooly, Fayette, Macon, Meriwether, Peach, Pike, Spalding, Sumter, Talbot, Taylor, and Upson Counties, Georgia. This subunit is considered currently unoccupied by the species and contains all the physical and biological features essential to the conservation of the species. These unoccupied areas are essential to restore historical redundancy for the species in the Upper Flint system and provide connectivity to subunit 4a, thus enabling the southern elktoe to sustain this population over time. We are reasonably certain that the unit will contribute to the conservation of the species because it currently sustains other freshwater mussels and the fish hosts that are essential to southern elktoe viability. These unoccupied reaches are considered habitat that contains all of the physical and biological features that are essential to the conservation of the southern elktoe.

Riparian lands that border Unit 4 include approximately 12.7 river km (7.9 mi) in public conservation and 64.7 river km (40.2) in combined public conservation and private ownership. Water quality and quantity stressors from urban land use is a primary threat in this unit. Special management considerations that may be required to maintain the physical and biological features include, but are not limited to: use of best management practices designed to reduce sedimentation, erosion, and bank destruction; protection of riparian corridors and native woody vegetation; moderation of surface and ground water withdrawals to maintain natural flow regimes; improved stormwater management; and avoidance or minimization of other watershed and floodplain disturbances that release sediments, pollutants, or nutrients into the water.

Unit 5: Middle Chattahoochee

Unit 5 is comprised of three subunits:

Subunit 5a includes 36.7 river km (22.8 mi) of the mainstem of Uchee Creek from its confluence with the Chattahoochee River upstream to the confluence with Island Creek in Russell County, Alabama. This subunit is currently occupied by the species and contains all of the physical and biological features essential to the conservation of the species. Because Fort Benning, which is located within this unit, has an integrated natural resources management plan (INRMP) that provides for conservation of the southern elktoe, we have not included 4 miles of Uchee Creek in this proposed designation (see Application of Section 4(a)(3) of the Act, below).

Subunit 5b includes 20.3 river km (12.6 mi) of Little Uchee Creek in Russell County, Alabama. This subunit is considered unoccupied, although it is contiguous with the occupied habitat in Uchee Creek and contains all the physical and biological features essential to the conservation of the species.

Subunit 5c includes 35.9 river km (22.3 mi) of Mulberry Creek in Harris County, Georgia. This subunit is considered currently unoccupied and

contains all the physical and biological features essential to the conservation of the species.

Subunits 5b and 5c, the two unoccupied subunits in Unit 5, are essential to restore historical redundancy for the species in the Middle Chattahoochee system, thus enabling the southern elktoe to sustain itself in this system over time. We are reasonably certain that the unit will contribute to the conservation of the species because it currently sustains other freshwater mussels and the fish hosts that are essential to southern elktoe viability. These unoccupied reaches are considered habitat that contains all of the physical and biological features that are essential to the conservation of the southern elktoe. Riparian lands that border the unit include approximately 0.5 river km (0.3 mi) in combined public conservation and private ownership; the remainder is private. Water quality and quantity stressors from expansion of agricultural land use is a future threat in this unit. Special management considerations that may be required to maintain the physical and biological features include, but are not limited to: use of best management practices designed to reduce sedimentation, erosion, and bank destruction; protection of riparian corridors and native woody vegetation; moderation of surface and ground water withdrawals to maintain natural flow regimes; improved stormwater management; and avoidance or minimization of other watershed and floodplain disturbances that release sediments, pollutants, or nutrients into the water.

Effects of Critical Habitat Designation

Section 7 Consultation

Section 7(a)(2) of the Act requires Federal agencies, including the Service, to ensure that any action they fund, authorize, or carry out is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of designated critical habitat of such species. In addition, section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any agency action which is likely to jeopardize the continued existence of any species proposed to be listed under the Act or result in the destruction or adverse modification of proposed critical habitat.

We published a final rule revising the definition of destruction or adverse modification on August 27, 2019 (84 FR 44976). Destruction or adverse modification means a direct or indirect alteration that appreciably diminishes the value of critical habitat as a whole for the conservation of a listed species.

If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency (action agency) must enter into consultation with us. Examples of actions that are subject to the section 7 consultation process are actions on State, Tribal, local, or private lands that require a Federal permit (such as a permit from the U.S. Army Corps of Engineers under section 404 of the Clean Water Act or a permit from the Service under section 10 of the Act) or that involve some other Federal action (such as funding from the Federal Highway Administration, Federal Aviation Administration, or the Federal Emergency Management Agency). Federal actions not affecting listed species or critical habitat—and actions on State, Tribal, local, or private lands that are not federally funded, authorized, or carried out by a Federal agency—do not require section 7 consultation.

Compliance with the requirements of section 7(a)(2) is documented through our issuance of:

(1) A concurrence letter for Federal actions that may affect, but are not likely to adversely affect, listed species or critical habitat; or

(2) A biological opinion for Federal actions that may affect, and are likely to adversely affect, listed species or critical habitat.

When we issue a biological opinion concluding that a project is likely to jeopardize the continued existence of a listed species and/or destroy or adversely modify critical habitat, we provide reasonable and prudent alternatives to the project, if any are identifiable, that would avoid the likelihood of jeopardy and/or destruction or adverse modification of critical habitat. We define ''reasonable and prudent alternatives'' (at 50 CFR 402.02) as alternative actions identified during consultation that:

(1) Can be implemented in a manner consistent with the intended purpose of the action,

(2) Can be implemented consistent with the scope of the Federal agency's legal authority and jurisdiction,

(3) Are economically and technologically feasible, and

(4) Would, in the Service Director's opinion, avoid the likelihood of jeopardizing the continued existence of the listed species and/or avoid the likelihood of destroying or adversely modifying critical habitat.

Reasonable and prudent alternatives can vary from slight project modifications to extensive redesign or relocation of the project. Costs associated with implementing a reasonable and prudent alternative are similarly variable.

Regulations at 50 CFR 402.16 set forth requirements for Federal agencies to reinitiate consultation on previously reviewed actions. These requirements apply when the Federal agency has retained discretionary involvement or control over the action (or the agency's discretionary involvement or control is authorized by law) and, subsequent to the previous consultation: (a) if the amount or extent of taking specified in the incidental take statement is exceeded; (b) if new information reveals effects of the action that may affect listed species or critical habitat in a manner or to an extent not previously considered; (c) if the identified action is subsequently modified in a manner that causes an effect to the listed species or critical habitat that was not considered in the biological opinion or written concurrence; or (d) if a new species is listed or critical habitat designated that may be affected by the identified action.

In such situations, Federal agencies sometimes may need to request reinitiation of consultation with us, but Congress also enacted some exceptions in 2018 to the requirement to reinitiate consultation on certain land management plans on the basis of a new species listing or new designation of critical habitat that may be affected by the subject Federal action. See 2018 Consolidated Appropriations Act, Public Law 115–141, Div, O, 132 Stat. 1059 (2018).

Application of the ''Destruction or Adverse Modification'' Standard

The key factor related to the destruction or adverse modification determination is whether implementation of the proposed Federal action directly or indirectly alters the designated critical habitat in a way that appreciably diminishes the value of the critical habitat as a whole for the conservation of the listed species. As discussed above, the role of critical habitat is to support physical or biological features essential to the conservation of a listed species and provide for the conservation of the species.

Section 4(b)(8) of the Act requires us to briefly evaluate and describe, in any proposed or final regulation that designates critical habitat, activities involving a Federal action that may violate section 7(a)(2) of the Act by destroying or adversely modifying such habitat, or that may be affected by such designation.

Activities that the Services may, during a consultation under section 7(a)(2) of the Act, consider likely to destroy or adversely modify critical habitat include, but are not limited to:

(1) Actions that would degrade or alter water quality. Such activities could include, but are not limited to, polluted wastewater discharge or spills from industrial, municipal, and mining facilities; or polluted stormwater runoff or infiltration from agricultural lands and urban areas. These activities could eliminate or reduce the habitat necessary for the growth and reproduction of the southern elktoe and its fish hosts.

(2) Actions that would alter flow regimes. Such activities could include, but are not limited to, groundwater pumping and surface water withdrawal or diversion, dam construction and operation, and land clearing. These activities could eliminate or reduce the habitat necessary for the growth and reproduction of the southern elktoe and its fish hosts.

(3) Actions that would destroy or alter southern elktoe habitats. Such activities could include, but are not limited to, installation or maintenance of in-stream structures (such as dams, culverts, bridges, boat ramps, retaining walls, and pipelines), dredging, impounding, channelization, or modification of stream channels or banks, and discharge of fill material. These activities could eliminate or reduce the habitat necessary for the growth and reproduction of the southern elktoe and its fish hosts.

(4) Actions that would cause silt and sediment to wash into stream channels. Such activities could include, but are not limited to, road and bridge construction, agricultural and mining activities, and commercial and residential development. These activities could eliminate or reduce the habitat necessary for the growth and reproduction of the southern elktoe and its fish hosts.

Exemptions

Application of Section 4(a)(3) of the Act

The Sikes Act Improvement Act of 1997 (Sikes Act) (16 U.S.C. 670a) required each military installation that includes land and water suitable for the conservation and management of natural resources to complete an integrated natural resources management plan (INRMP) by November 17, 2001. An INRMP integrates implementation of the military mission of the installation with stewardship of the natural resources found on the base. Each INRMP includes:

(1) An assessment of the ecological needs on the installation, including the need to provide for the conservation of listed species;

(2) A statement of goals and priorities;

(3) A detailed description of management actions to be implemented to provide for these ecological needs; and

(4) A monitoring and adaptive management plan.

Among other things, each INRMP must, to the extent appropriate and applicable, provide for fish and wildlife management; fish and wildlife habitat enhancement or modification; wetland protection, enhancement, and restoration where necessary to support fish and wildlife; and enforcement of applicable natural resource laws.

The National Defense Authorization Act for Fiscal Year 2004 (Pub. L. 108–136) amended the Act to limit areas eligible for designation as critical habitat. Specifically, section 4(a)(3)(B)(i) of the Act (16 U.S.C. 1533(a)(3)(B)(i)) provides that the Secretary shall not designate as critical habitat any lands or other geographical areas owned or controlled by the Department of Defense, or designated for its use, that are subject to an INRMP prepared under section 101 of the Sikes Act (16 U.S.C. 670a), if the Secretary determines in writing that such plan provides a benefit to the species for which critical habitat is proposed for designation.

We consult with the military on the development and implementation of INRMPs for installations with listed species. We analyzed INRMPs developed by military installations located within the range of the proposed critical habitat designation for the southern elktoe to determine if they meet the criteria for exemption from critical habitat under section 4(a)(3) of the Act. The following areas are Department of Defense (DoD) lands with completed, Service-approved INRMPs within the proposed critical habitat designation.

Approved INRMPs

U.S. Army Fort Benning, Georgia; 4 Stream Miles (6.4 km)

We have identified one area within the proposed critical habitat designation that consists of DoD lands with a completed, Service-approved INRMP. The Army Maneuver Center of Excellence Fort Benning (Fort Benning) is located in Georgia and Alabama on 182,000 acres in three counties: Muscogee and Chattahoochee Counties, Georgia, and Russell County, Alabama. Fort Benning is federally owned land that is managed by the U.S. Army and is subject to all Federal laws and regulations. The Fort Benning INRMP covers fiscal years 2021–2026, and it serves as the principal management plan governing all natural resource activities on the installation. Among the goals and objectives listed in the INRMP is habitat management for rare, threatened, and endangered species, and the southern elktoe is included in this plan. Management actions that benefit the southern elktoe include maintenance or improvement of habitat quality in a portion of Uchee Creek by mitigating (avoiding) adverse impacts of any action within the watershed that could have effects on the quality of habitat in Uchee Creek.

Four stream miles (6.4 km) of Unit 5 (Middle Chattahoochee) are located within the area covered by this INRMP. Based on the above considerations, and in accordance with section 4(a)(3)(B)(i) of the Act, we have determined that the identified lands and streams are subject to the Fort Benning INRMP and that conservation efforts identified in the INRMP will provide a benefit to southern elktoe. Therefore, the streams within this installation are exempt from critical habitat designation under section 4(a)(3) of the Act. We are not including approximately 4 stream miles (6.4 km) of habitat in this proposed critical habitat designation because of this exemption.

Consideration of Impacts Under Section 4(b)(2) of the Act

Section 4(b)(2) of the Act states that the Secretary shall designate and make revisions to critical habitat on the basis of the best available scientific data after taking into consideration the economic impact, national security impact, and any other relevant impact of specifying any particular area as critical habitat. The Secretary may exclude an area from critical habitat based on economic impacts, impacts on national security, or any other relevant impacts. Exclusion decisions are governed by the regulations at 50 CFR 424.19 and the Policy Regarding Implementation of Section 4(b)(2) of the Endangered Species Act (hereafter, the ''2016 Policy''; 81 FR 7226, February 11, 2016), both of which were developed jointly with the National Marine Fisheries Service (NMFS). We also refer to a 2008 Department of the Interior Solicitor's opinion entitled ''The Secretary's Authority to Exclude Areas from a Critical Habitat Designation under Section 4(b)(2) of the Endangered Species Act'' (M–37016).

In considering whether to exclude a particular area from the designation, we identify the benefits of including the area in the designation, identify the benefits of excluding the area from the designation, and evaluate whether the benefits of exclusion outweigh the benefits of inclusion. If the analysis indicates that the benefits of exclusion outweigh the benefits of inclusion, the Secretary may exercise discretion to exclude the area only if such exclusion would not result in the extinction of the species. In making the determination to exclude a particular area, the statute on its face, as well as the legislative history, are clear that the Secretary has broad discretion regarding which factor(s) to use and how much weight to give to any factor. In our final rules, we explain any decision to exclude areas, as well as decisions not to exclude, to demonstrate that the decision is reasonable. We describe below the process that we use for taking into consideration each category of impacts and any initial analyses of the relevant impacts.

Consideration of Economic Impacts

Section 4(b)(2) of the Act and its implementing regulations require that we consider the economic impact that may result from a designation of critical habitat. To assess the probable economic impacts of a designation, we must first evaluate specific land uses or activities and projects that may occur in the area of the critical habitat. We then must evaluate the impacts that a specific critical habitat designation may have on restricting or modifying specific land uses or activities for the benefit of the species and its habitat within the areas proposed. We then identify which conservation efforts may be the result of the species being listed under the Act versus those attributed solely to the designation of critical habitat for this particular species. The probable economic impact of a proposed critical habitat designation is analyzed by comparing scenarios both ''with critical habitat'' and ''without critical habitat.''

The ''without critical habitat'' scenario represents the baseline for the analysis, which includes the existing regulatory and socio-economic burden imposed on landowners, managers, or other resource users potentially affected by the designation of critical habitat (*e.g.,* under the Federal listing as well as other Federal, State, and local regulations). Therefore, the baseline represents the costs of all efforts attributable to the listing of the species under the Act (*i.e.,* conservation of the species and its habitat incurred regardless of whether critical habitat is designated). The ''with critical habitat'' scenario describes the incremental impacts associated specifically with the designation of critical habitat for the species. The incremental conservation efforts and associated impacts would not be expected without the designation of critical habitat for the species. In other words, the incremental costs are those attributable solely to the designation of critical habitat, above and beyond the baseline costs. These are the costs we use when evaluating the benefits of inclusion and exclusion of particular areas from the final designation of critical habitat should we choose to conduct a discretionary 4(b)(2) exclusion analysis.

Executive Orders (E.O.s) 12866 and 13563 direct Federal agencies to assess the costs and benefits of available regulatory alternatives in quantitative (to the extent feasible) and qualitative terms. Consistent with the E.O. regulatory analysis requirements, our effects analysis under the Act may take into consideration impacts to both directly and indirectly affected entities, where practicable and reasonable. If sufficient data are available, we assess to the extent practicable the probable impacts to both directly and indirectly affected entities. Section 3(f) of E.O. 12866 identifies four criteria when a regulation is considered a ''significant'' rulemaking, and requires additional analysis, review, and approval if met. The criterion relevant here is whether the designation of critical habitat may have an economic effect of greater than $100 million in any given year (section 3(f)(1)). Therefore, our consideration of economic impacts uses a screening analysis to assess whether a designation of critical habitat for the southern elktoe is likely to exceed the economically significant threshold.

For this particular designation, we developed an incremental effects memorandum (IEM) considering the probable incremental economic impacts that may result from this proposed designation of critical habitat. The information contained in our IEM was then used to develop a screening analysis of the probable effects of the designation of critical habitat for the southern elktoe (IEc 2021, entire). We began by conducting a screening analysis of the proposed designation of critical habitat in order to focus our analysis on the key factors that are likely to result in incremental economic impacts. The purpose of the screening analysis is to filter out particular geographic areas of critical habitat that are already subject to such protections and are, therefore, unlikely to incur incremental economic impacts. In particular, the screening analysis considers baseline costs (*i.e.,* absent critical habitat designation) and includes probable economic impacts where land and water use may already be subject to conservation plans, land management plans, best management practices, or regulations that protect the habitat area as a result of the Federal listing status of the species. Ultimately, the screening analysis allows us to focus our analysis on evaluating the specific areas or sectors that may incur probable incremental economic impacts as a result of the designation. The presence of the listed species in occupied areas of critical habitat means that any destruction or adverse modification of those areas is also likely to jeopardize the continued existence of the species. Therefore, designating occupied areas as critical habitat typically causes little if any incremental impacts above and beyond the impacts of listing the species. Therefore, the screening analysis focuses on areas of unoccupied critical habitat. If there are any unoccupied units in the proposed critical habitat designation, the screening analysis assesses whether any additional management or conservation efforts may incur incremental economic impacts. This screening analysis combined with the information contained in our IEM are what we consider to be our draft economic analysis (DEA) of the proposed critical habitat designation for the southern elktoe; our DEA is summarized in the narrative below.

As part of our screening analysis, we considered the types of economic activities that are likely to occur within the areas likely affected by the critical habitat designation. In our evaluation of the probable incremental economic impacts that may result from the proposed designation of critical habitat for the southern elktoe, first we identified, in the IEM dated July 29, 2021, probable incremental economic impacts associated with the following categories of activities: (1) channel dredging and maintenance; dam projects including flood control, navigation, hydropower, bridge projects, stream restoration, and Clean Water Act permitting; flow management and water storage (systemwide); slough restoration project on Apalachicola River, and an expansion of a limestone mine on Chipola River; (2) technical and financial assistance for projects, including aquatic habitat restoration, fire management plans, fire suppression, fuel reduction treatments, forest plans, and mining permits; (3) renewable and alternative energy projects; (4) issuance of section 10 permits for enhancement

of survival, habitat conservation plans, and safe harbor agreements; (5) Federal lands management; (6) water quality permitting; (7) roadway and bridge construction; (8) natural disaster management; and (9) recreation (including sport fishing and sportfish stocking).

We considered each industry or category individually. Additionally, we considered whether their activities have any Federal involvement. Critical habitat designation generally will not affect activities that do not have any Federal involvement; under the Act, designation of critical habitat only affects activities conducted, funded, permitted, or authorized by Federal agencies. If we list the species, in areas where the southern elktoe is present, Federal agencies would be required to consult with the Service under section 7 of the Act on activities they fund, permit, or implement that may affect the species. If, when we list the species, we also finalize this proposed critical habitat designation, Federal agencies would be required to consider the effects of their actions on the designated habitat, and if the Federal action may affect critical habitat, our consultations would include an evaluation of measures to avoid the destruction or adverse modification of critical habitat.

In our IEM, we attempted to clarify the distinction between the effects that would result from the species being listed and those attributable to the critical habitat designation (*i.e.,* difference between the jeopardy and adverse modification standards) for the southern elktoe's critical habitat. Because the designation of critical habitat for southern elktoe is being proposed concurrently with the listing, it has been our experience that it is more difficult to discern which conservation efforts are attributable to the species being listed and those which will result solely from the designation of critical habitat. However, the following specific circumstances in this case help to inform our evaluation: (1) The essential physical or biological features identified for critical habitat are the same features essential for the life requisites of the species, and (2) any actions that would likely adversely affect the essential physical or biological features of critical habitat would also likely adversely affect the species itself. The IEM outlines our rationale concerning this limited distinction between baseline conservation efforts and incremental impacts of the designation of critical habitat for this species. This evaluation of the incremental effects has been used as the basis to evaluate the probable incremental economic impacts of this proposed designation of critical habitat.

The proposed critical habitat designation for the southern elktoe totals approximately 578 river miles (929 km), of which approximately 55 percent is currently occupied by the species. In these occupied areas, any actions that may affect the species or its habitat would also affect designated critical habitat, and it is unlikely that any additional conservation efforts would be recommended to address the adverse modification standard over and above those recommended as necessary to avoid jeopardizing the continued existence of the southern elktoe. Therefore, only administrative costs are expected in approximately 55 percent of the proposed critical habitat designation. While this additional analysis will require time and resources by both the Federal action agency and the Service, it is believed that, in most circumstances, these costs would predominantly be administrative in nature and would not be significant.

The remaining approximately 259 mi (416 km) (45 percent of the total proposed critical habitat designation) are currently unoccupied by the species but are essential for the conservation of the species. In these unoccupied areas, any conservation efforts or associated probable impacts would be considered incremental effects attributed to the critical habitat designation. Of the 259 mi (416 km) of unoccupied critical habitat, approximately 74 percent overlaps with existing designated critical habitat of other listed aquatic species. In these areas, consultations would likely occur even absent the proposed critical habitat designation for the southern elktoe.

A number of additional baseline conservation actions exist for the species, including State water conservation plans and measures, as well as best management practices for riparian activities for construction, forestry, and agricultural activities. For example, the States' Departments of Transportation report consultation road and bridge best management practices that specifically intend to benefit water quality in proposed critical habitat areas. Other conservation activities on public lands include activities on Apalachicola National Forest in Florida, tracts managed by the Northwest Florida Water Management District in Florida, and the Elmodel Wildlife Management Area managed by the State of Georgia. Conservation activity is also being conducted by nonprofit organizations that would serve to directly or indirectly benefit southern elktoe critical habitat on some private lands. Based on the substantial baseline protections afforded to the southern elktoe that are anticipated to occur in proposed critical habitat areas even absent the designation of critical habitat for the species, we do not foresee any incremental costs associated with project modifications that would involve additional conservation efforts for the species. When some incremental section 7 consultations costs are anticipated, costs are likely to be limited to the additional administrative efforts to consider adverse modification during the consultation process.

The probable incremental economic impacts of the proposed southern elktoe critical habitat designation are expected to be limited to additional administrative effort as well as minor costs of conservation efforts resulting from a small number of future section 7 consultations. This is due to two factors: (1) A significant portion of proposed critical habitat stream reaches are considered to be occupied by the species (55 percent), and incremental economic impacts of critical habitat designation, other than administrative costs, are unlikely; and (2) in proposed areas that are not occupied by southern elktoe, approximately 74 percent of the areas are already designated as critical habitat for other listed aquatic species, so many of the conservation efforts undertaken for those other listed aquatic species would also provide substantial protections to critical habitat areas for the southern elktoe even absent critical habitat designation. In the remaining 26 percent of the areas, there are predicted to be fewer than one formal and two informal consultations per year. The associated costs are estimated to be $10,000 or less per consultation. Accordingly, in order to reach the threshold of $100 million of incremental administrative impacts in a single year, critical habitat designation would have to result in more than 11,000 consultations in a single year. However, based on consultation history areas across the entirety of the proposed designation, we only anticipate one formal consultation and six informal consultations per year. Thus, the annual administrative burden is very unlikely to reach $100 million.

We are soliciting data and comments from the public on the DEA discussed above, as well as on all aspects of this proposed rule and our required determinations. During the development of a final designation, we will consider the information presented in the DEA and any additional information on economic impacts we receive during the public comment period to determine whether any specific areas should be

excluded from the final critical habitat designation under authority of section 4(b)(2) of the Act, our implementing regulations at 50 CFR 424.19, and the 2016 Policy. We may exclude an area from critical habitat if we determine that the benefits of excluding the area outweigh the benefits of including the area, provided the exclusion will not result in the extinction of this species.

Consideration of National Security Impacts

Section 4(a)(3)(B)(i) of the Act may not cover all DoD lands or areas that pose potential national-security concerns (*e.g.,* a DoD installation that is in the process of revising its INRMP for a newly listed species or a species previously not covered). If a particular area is not covered under section 4(a)(3)(B)(i), then national-security or homeland-security concerns are not a factor in the process of determining what areas meet the definition of ''critical habitat.'' However, the Service must still consider impacts on national security, including homeland security, on those lands or areas not covered by section 4(a)(3)(B)(i), because section 4(b)(2) requires the Service to consider those impacts whenever it designates critical habitat. Accordingly, if DoD, Department of Homeland Security (DHS), or another Federal agency has requested exclusion based on an assertion of national-security or homeland-security concerns, or we have otherwise identified national-security or homeland-security impacts from designating particular areas as critical habitat, we generally have reason to consider excluding those areas.

However, we cannot automatically exclude requested areas. When DoD, DHS, or another Federal agency requests exclusion from critical habitat on the basis of national-security or homeland-security impacts, we must conduct an exclusion analysis if the Federal requester provides information, including a reasonably specific justification of an incremental impact on national security that would result from the designation of that specific area as critical habitat. That justification could include demonstration of probable impacts, such as impacts to ongoing border-security patrols and surveillance activities, or a delay in training or facility construction, as a result of compliance with section 7(a)(2) of the Act. If the agency requesting the exclusion does not provide us with a reasonably specific justification, we will contact the agency to recommend that it provide a specific justification or clarification of its concerns relative to the probable incremental impact that could result from the designation. If we conduct an exclusion analysis because the agency provides a reasonably specific justification or because we decide to exercise the discretion to conduct an exclusion analysis, we will defer to the expert judgment of DoD, DHS, or another Federal agency as to: (1) Whether activities on its lands or waters, or its activities on other lands or waters, have national-security or homeland-security implications; (2) the importance of those implications; and (3) the degree to which the cited implications would be adversely affected in the absence of an exclusion. In that circumstance, in conducting a discretionary section 4(b)(2) exclusion analysis, we will give great weight to national-security and homeland-security concerns in analyzing the benefits of exclusion.

In preparing this proposal, we have determined that the lands within the proposed designation of critical habitat for southern elktoe are not owned or managed by the DoD or DHS, and, therefore, we anticipate no impact on national security or homeland security.

Consideration of Other Relevant Impacts

Under section 4(b)(2) of the Act, we consider any other relevant impacts, in addition to economic impacts and impacts on national security discussed above. To identify other relevant impacts that may affect the exclusion analysis, we consider a number of factors, including whether there are permitted conservation plans covering the species in the area—such as HCPs, safe harbor agreements, or candidate conservation agreements with assurances—or whether there are non-permitted conservation agreements and partnerships that may be impaired by designation of, or exclusion from, critical habitat. In addition, we look at whether Tribal conservation plans or partnerships, Tribal resources, or government-to-government relationships of the United States with Tribal entities may be affected by the designation. We also consider any State, local, social, or other impacts that might occur because of the designation.

Summary of Exclusions Considered Under 4(b)(2) of the Act

We have not identified any areas to consider for exclusion from critical habitat based on other relevant impacts. We have determined that there are currently no HCPs or other management plans for the southern elktoe, and the proposed designation does not include any Tribal lands or trust resources or any lands for which designation would have any economic or national security impacts. Therefore, we anticipate no impact on Tribal lands, partnerships, or HCPs from this proposed critical habitat designation and thus, as described above, we are not considering excluding any particular areas on the basis of the presence of conservation agreements or impacts to trust resources.

However, if through the public comment period we receive information that we determine indicates that there are potential economic, national security, or other relevant impacts from designating particular areas as critical habitat, then as part of developing the final designation of critical habitat, we will evaluate that information and may conduct a discretionary exclusion analysis to determine whether to exclude those areas under authority of section 4(b)(2) and our implementing regulations at 50 CFR 424.19. If we receive a request for exclusion of a particular area and after evaluation of supporting information we do not exclude, we will fully describe our decision in the final rule for this action.

Required Determinations

Clarity of the Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(1) Be logically organized;

(2) Use the active voice to address readers directly;

(3) Use clear language rather than jargon;

(4) Be divided into short sections and sentences; and

(5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Regulatory Planning and Review (Executive Orders 12866, 13563, and 14094)

Executive Order 14094 reaffirms the principles of E.O. 12866 and E.O 13563 and states that regulatory analysis should facilitate agency efforts to develop regulations that serve the public interest, advance statutory objectives, and are consistent with E.O.

12866, E.O. 13563, and the Presidential Memorandum of January 20, 2021 (Modernizing Regulatory Review). Regulatory analysis, as practicable and appropriate, shall recognize distributive impacts and equity, to the extent permitted by law. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this proposed rule in a manner consistent with these requirements.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

Under the Regulatory Flexibility Act (RFA; 5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA; 5 U.S.C. 801 *et seq.*), whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effects of the rule on small entities (*i.e.,* small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of the agency certifies the rule will not have a significant economic impact on a substantial number of small entities. The SBREFA amended the RFA to require Federal agencies to provide a certification statement of the factual basis for certifying that the rule will not have a significant economic impact on a substantial number of small entities.

According to the Small Business Administration, small entities include small organizations such as independent nonprofit organizations; small governmental jurisdictions, including school boards and city and town governments that serve fewer than 50,000 residents; and small businesses (13 CFR 121.201). Small businesses include manufacturing and mining concerns with fewer than 500 employees, wholesale trade entities with fewer than 100 employees, retail and service businesses with less than $5 million in annual sales, general and heavy construction businesses with less than $27.5 million in annual business, special trade contractors doing less than $11.5 million in annual business, and agricultural businesses with annual sales less than $750,000. To determine whether potential economic impacts to these small entities are significant, we considered the types of activities that might trigger regulatory impacts under this designation as well as types of project modifications that may result. In general, the term ''significant economic impact'' is meant to apply to a typical small business firm's business operations.

Under the RFA, as amended, and as understood in light of recent court decisions, Federal agencies are required to evaluate the potential incremental impacts of rulemaking on those entities directly regulated by the rulemaking itself; in other words, the RFA does not require agencies to evaluate the potential impacts to indirectly regulated entities. The regulatory mechanism through which critical habitat protections are realized is section 7 of the Act, which requires Federal agencies, in consultation with the Service, to ensure that any action authorized, funded, or carried out by the agency is not likely to destroy or adversely modify critical habitat. Therefore, under section 7, only Federal action agencies are directly subject to the specific regulatory requirement (avoiding destruction and adverse modification) imposed by critical habitat designation. Consequently, it is our position that only Federal action agencies would be directly regulated if we adopt the proposed critical habitat designation. The RFA does not require evaluation of the potential impacts to entities not directly regulated. Moreover, Federal agencies are not small entities. Therefore, because no small entities would be directly regulated by this rulemaking, the Service certifies that, if made final as proposed, the proposed critical habitat designation will not have a significant economic impact on a substantial number of small entities.

In summary, we have considered whether the proposed designation would result in a significant economic impact on a substantial number of small entities. For the above reasons and based on currently available information, we certify that, if made final, the proposed critical habitat designation would not have a significant economic impact on a substantial number of small business entities. Therefore, an initial regulatory flexibility analysis is not required.

Energy Supply, Distribution, or Use—Executive Order 13211

Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use) requires agencies to prepare Statements of Energy Effects when undertaking certain actions. In our economic analysis, we did not find that this proposed critical habitat designation would significantly affect energy supplies, distribution, or use. No known hydropower, oil/gas leases, power lines, or pipelines will be affected within or adjacent to proposed critical habitat areas. Therefore, this action is not a significant energy action, and no Statement of Energy Effects is required.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*), we make the following finding:

(1) This proposed rule would not produce a Federal mandate. In general, a Federal mandate is a provision in legislation, statute, or regulation that would impose an enforceable duty upon State, local, or Tribal governments, or the private sector, and includes both ''Federal intergovernmental mandates'' and ''Federal private sector mandates.'' These terms are defined in 2 U.S.C. 658(5)–(7). ''Federal intergovernmental mandate'' includes a regulation that ''would impose an enforceable duty upon State, local, or Tribal governments'' with two exceptions. It excludes ''a condition of Federal assistance.'' It also excludes ''a duty arising from participation in a voluntary Federal program,'' unless the regulation ''relates to a then-existing Federal program under which $500,000,000 or more is provided annually to State, local, and Tribal governments under entitlement authority,'' if the provision would ''increase the stringency of conditions of assistance'' or ''place caps upon, or otherwise decrease, the Federal Government's responsibility to provide funding,'' and the State, local, or Tribal governments ''lack authority'' to adjust accordingly. At the time of enactment, these entitlement programs were: Medicaid; Aid to Families with Dependent Children work programs; Child Nutrition; Food Stamps; Social Services Block Grants; Vocational Rehabilitation State Grants; Foster Care, Adoption Assistance, and Independent Living; Family Support Welfare Services; and Child Support Enforcement. ''Federal private sector mandate'' includes a regulation that ''would impose an enforceable duty upon the private sector, except (i) a condition of Federal assistance or (ii) a duty arising from participation in a voluntary Federal program.''

The designation of critical habitat does not impose a legally binding duty on non-Federal Government entities or private parties. Under the Act, the only regulatory effect is that Federal agencies must ensure that their actions are not likely to destroy or adversely modify critical habitat under section 7. While non-Federal entities that receive Federal

funding, assistance, or permits, or that otherwise require approval or authorization from a Federal agency for an action, may be indirectly impacted by the designation of critical habitat, the legally binding duty to avoid destruction or adverse modification of critical habitat rests squarely on the Federal agency. Furthermore, to the extent that non-Federal entities are indirectly impacted because they receive Federal assistance or participate in a voluntary Federal aid program, the Unfunded Mandates Reform Act would not apply, nor would critical habitat shift the costs of the large entitlement programs listed above onto State governments.

(2) We do not believe that this proposed rule would significantly or uniquely affect small governments because those governments will be affected only to the extent that any programs having Federal funds, permits, or other authorized activities must ensure their actions will not adversely affect critical habitat. Therefore, a Small Government Agency Plan is not required.

Takings—Executive Order 12630

In accordance with E.O. 12630 (Government Actions and Interference with Constitutionally Protected Private Property Rights), we have analyzed the potential takings implications of designating critical habitat for southern elktoe in a takings implications assessment. The Act does not authorize the Service to regulate private actions on private lands or confiscate private property as a result of critical habitat designation. Designation of critical habitat does not affect land ownership, or establish any closures, or restrictions on use of or access to the designated areas. Furthermore, the designation of critical habitat does not affect landowner actions that do not require Federal funding or permits, nor does it preclude development of habitat conservation programs or issuance of incidental take permits to permit actions that do require Federal funding or permits to go forward. However, Federal agencies are prohibited from carrying out, funding, or authorizing actions that would destroy or adversely modify critical habitat. A takings implications assessment has been completed for the proposed designation of critical habitat for southern elktoe, and it concludes that, if adopted, this designation of critical habitat does not pose significant takings implications for lands within or affected by the designation.

Federalism—Executive Order 13132

In accordance with E.O. 13132 (Federalism), this proposed rule does not have significant Federalism effects. A federalism summary impact statement is not required. In keeping with Department of the Interior and Department of Commerce policy, we requested information from, and coordinated development of this proposed critical habitat designation with, appropriate State resource agencies. From a federalism perspective, the designation of critical habitat directly affects only the responsibilities of Federal agencies. The Act imposes no other duties with respect to critical habitat, either for States and local governments, or for anyone else. As a result, the proposed rule does not have substantial direct effects either on the States, or on the relationship between the Federal Government and the States, or on the distribution of powers and responsibilities among the various levels of government. The proposed designation may have some benefit to these governments because the areas that contain the features essential to the conservation of the species are more clearly defined, and the physical or biological features of the habitat necessary for the conservation of the species are specifically identified. This information does not alter where and what federally sponsored activities may occur. However, it may assist State and local governments in long-range planning because they no longer have to wait for case-by-case section 7 consultations to occur.

Where State and local governments require approval or authorization from a Federal agency for actions that may affect critical habitat, consultation under section 7(a)(2) of the Act would be required. While non-Federal entities that receive Federal funding, assistance, or permits, or that otherwise require approval or authorization from a Federal agency for an action, may be indirectly impacted by the designation of critical habitat, the legally binding duty to avoid destruction or adverse modification of critical habitat rests squarely on the Federal agency.

Civil Justice Reform—Executive Order 12988

In accordance with E.O. 12988 (Civil Justice Reform), the Office of the Solicitor has determined that the proposed rule would not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of the Order. We have proposed designating critical habitat in accordance with the provisions of the Act. To assist the public in understanding the habitat needs of the species, this proposed rule identifies the physical or biological features essential to the conservation of the species. The proposed areas of critical habitat are presented on maps, and the proposed rule provides several options for the interested public to obtain more detailed location information, if desired.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

This proposed rule does not contain information collection requirements, and a submission to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) is not required. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

Regulations adopted pursuant to section 4(a) of the Act are exempt from the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and do not require an environmental analysis under NEPA. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244). This includes listing, delisting, and reclassification rules, as well as critical habitat designations. In a line of cases starting with *Douglas County* v. *Babbitt,* 48 F.3d 1495 (9th Cir. 1995), the courts have upheld this position.

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994 (Government-to-Government Relations with Native American Tribal Governments; 59 FR 22951), Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments), and the Department of the Interior's manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with federally recognized Tribes on a government-to-government basis. In accordance with Secretary's Order 3206 of June 5, 1997 (American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act), we readily acknowledge our responsibilities to work directly with Tribes in developing programs for healthy ecosystems, to acknowledge that Tribal lands are not subject to the same controls as Federal public lands, to remain sensitive to Indian culture, and

to make information available to Tribes. We have determined that no Tribal lands fall within the boundaries of the proposed critical habitat for the southern elktoe, so no Tribal lands would be affected by the proposed designation.

List of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Plants, Reporting and recordkeeping requirements, Transportation, Wildlife.

Proposed Regulation Promulgation

Accordingly, we propose to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245, unless otherwise noted.

■ 2. Amend § 17.11, in paragraph (h), by adding an entry for ''Elktoe, Southern'' to the List of Endangered and Threatened Wildlife in alphabetical order under CLAMS to read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Common name	Scientific name	Where listed	Status	Listing citations and applicable rules
*	*	*	*	*
CLAMS				
*	*	*	*	*
Elktoe, Southern	*Alasmidonta triangulata*	Wherever found	E	[**Federal Register** citation when published as a final rule]; 50 CFR 17.95(f).[CH]
*	*	*	*	*

■ 3. Amend § 17.95, in paragraph (f), by adding an entry for ''Southern Elktoe (*Alasmidonta triangulata*)'' following the entry for ''Appalachian Elktoe (*Alasmidonta raveneliana*)'' to read as follows:

§ 17.95 Critical habitat—fish and wildlife.

* * * * *

(f) *Clams and Snails.*

* * * * *

Southern Elktoe (*Alasmidonta triangulata*)

(1) Critical habitat units are depicted for Russell County, Alabama; Calhoun, Franklin, Gadsden, Gulf, Jackson, and Liberty Counties, Florida; and Baker, Coweta, Crawford, Decatur, Dooly, Dougherty, Fayette, Harris, Macon, Meriwether, Mitchell, Peach, Pike, Spalding, Sumter, Talbot, Taylor, and Upson Counties, Georgia, on the maps in this entry.

(2) Within these areas, the physical or biological features essential to the conservation of southern elktoe consist of the following components:

(i) Adequate flows, or a hydrologic flow regime (magnitude, timing, frequency, duration, rate of change, and overall seasonality of discharge over time), necessary to maintain benthic habitats where the species is found and to maintain stream connectivity, specifically providing for the exchange of nutrients and sediment for maintenance of the mussel and fish host's habitat and food availability, maintenance of spawning habitat for native fishes that could serve as host fish, and the ability for newly transformed juveniles to settle and become established in their habitats.

(ii) Suitable substrates and connected instream habitats, characterized by geomorphically stable stream channels and banks (*i.e.,* channels that maintain lateral dimensions, longitudinal profiles, and sinuosity patterns over time without an aggrading or degrading bed elevation) with habitats that support the southern elktoe (*e.g.,* slightly depositional habitats consisting of mixtures of silty mud, sand, and gravel).

(iii) Water and sediment quality necessary to sustain natural physiological processes for normal behavior, growth, and viability of all life stages. Water and sediment quality needs include appropriate thermal and dissolved oxygen regimes (temperature generally not above 90 °F (32 °C) and dissolved oxygen generally greater than 5.0 milligrams per liter (mg/L)) that are also low in ammonia (generally not above 1.5 mg N/L (milligrams Nitrogen per Liter)), heavy metals, pharmaceutical concentrations, salinity (generally not above 4 parts per million), total suspended solids, and other pollutants.

(iv) The presence and abundance of fish hosts necessary for recruitment of the southern elktoe, specifically species of the sucker family, Catostomidae, including the genera *Moxostoma* (Apalachicola redhorse, greater jumprock, and blacktail redhorse) and *Erimyzon* (creek chubsucker and lake chubsucker).

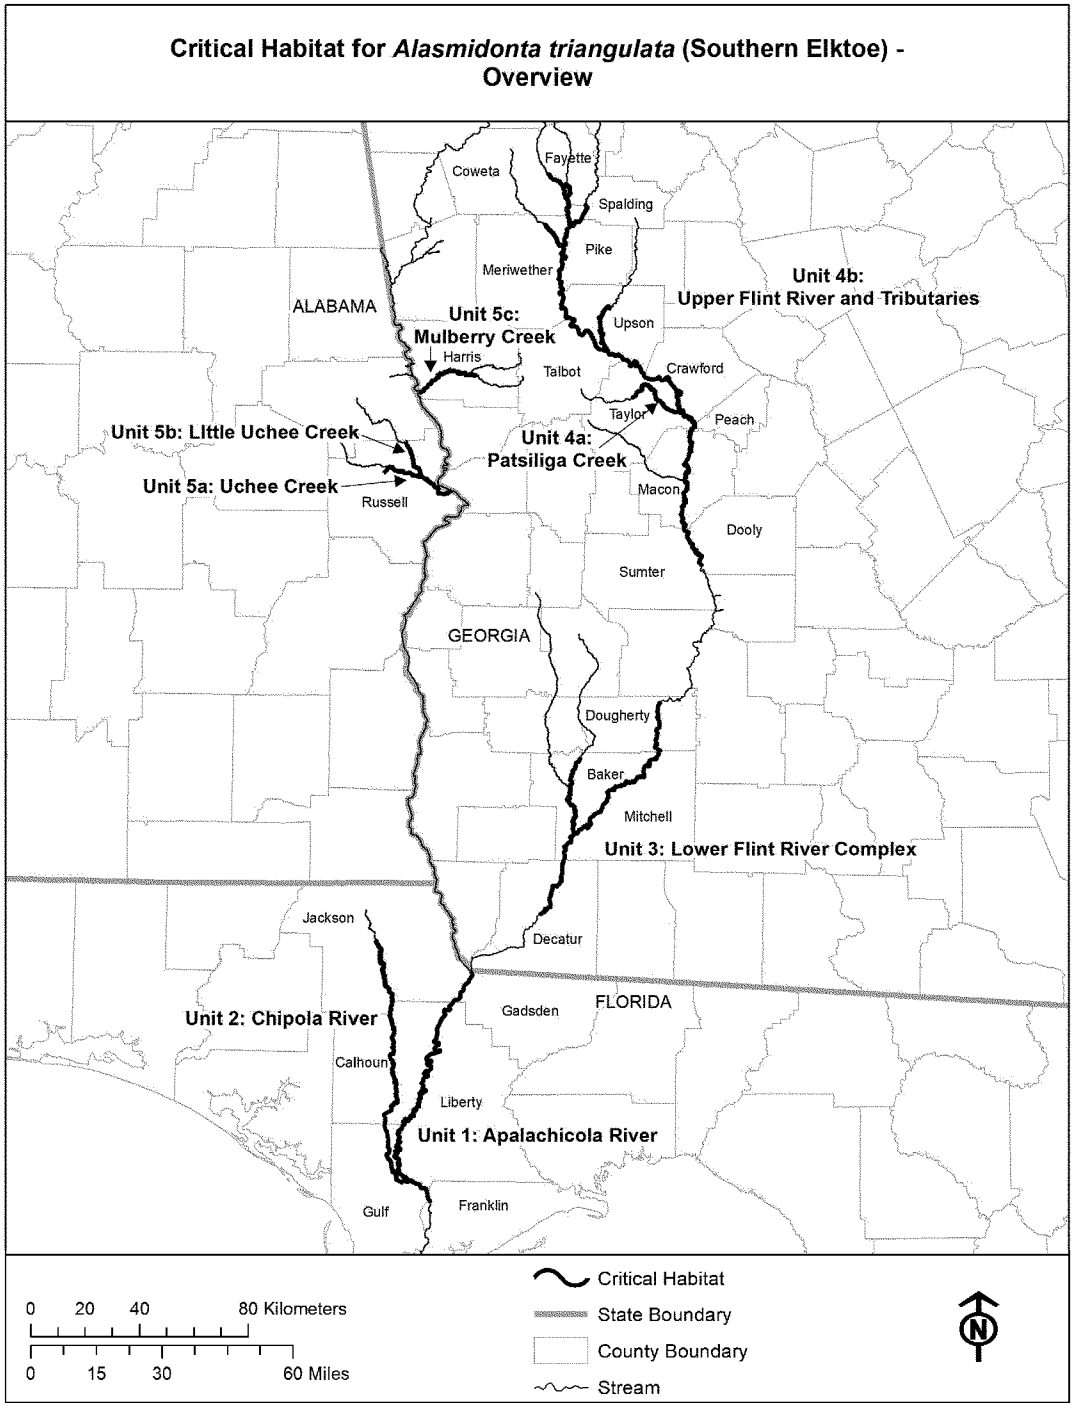
(3) Critical habitat does not include manmade structures (such as buildings, aqueducts, runways, roads, and other paved areas) and the land on which they are located existing within the legal boundaries on [EFFECTIVE DATE OF RULE].

(4) Data layers defining map units were created using ArcMap GIS, and critical habitat units were then mapped using the National Hydrography Dataset (NAD) using NAD83 UTM Zone 16N coordinates. The maps in this entry, as modified by any accompanying regulatory text, establish the boundaries of the critical habitat designation. The coordinates or plot points or both on which each map is based are available to the public at *https://www.regulations.gov* at Docket No. FWS–R4–ES–2022–0179.

(5) Index map follows:

BILLING CODE 4333–15–P

Figure 1 to Southern Elktoe (*Alasmidonta triangulata*) paragraph (5)

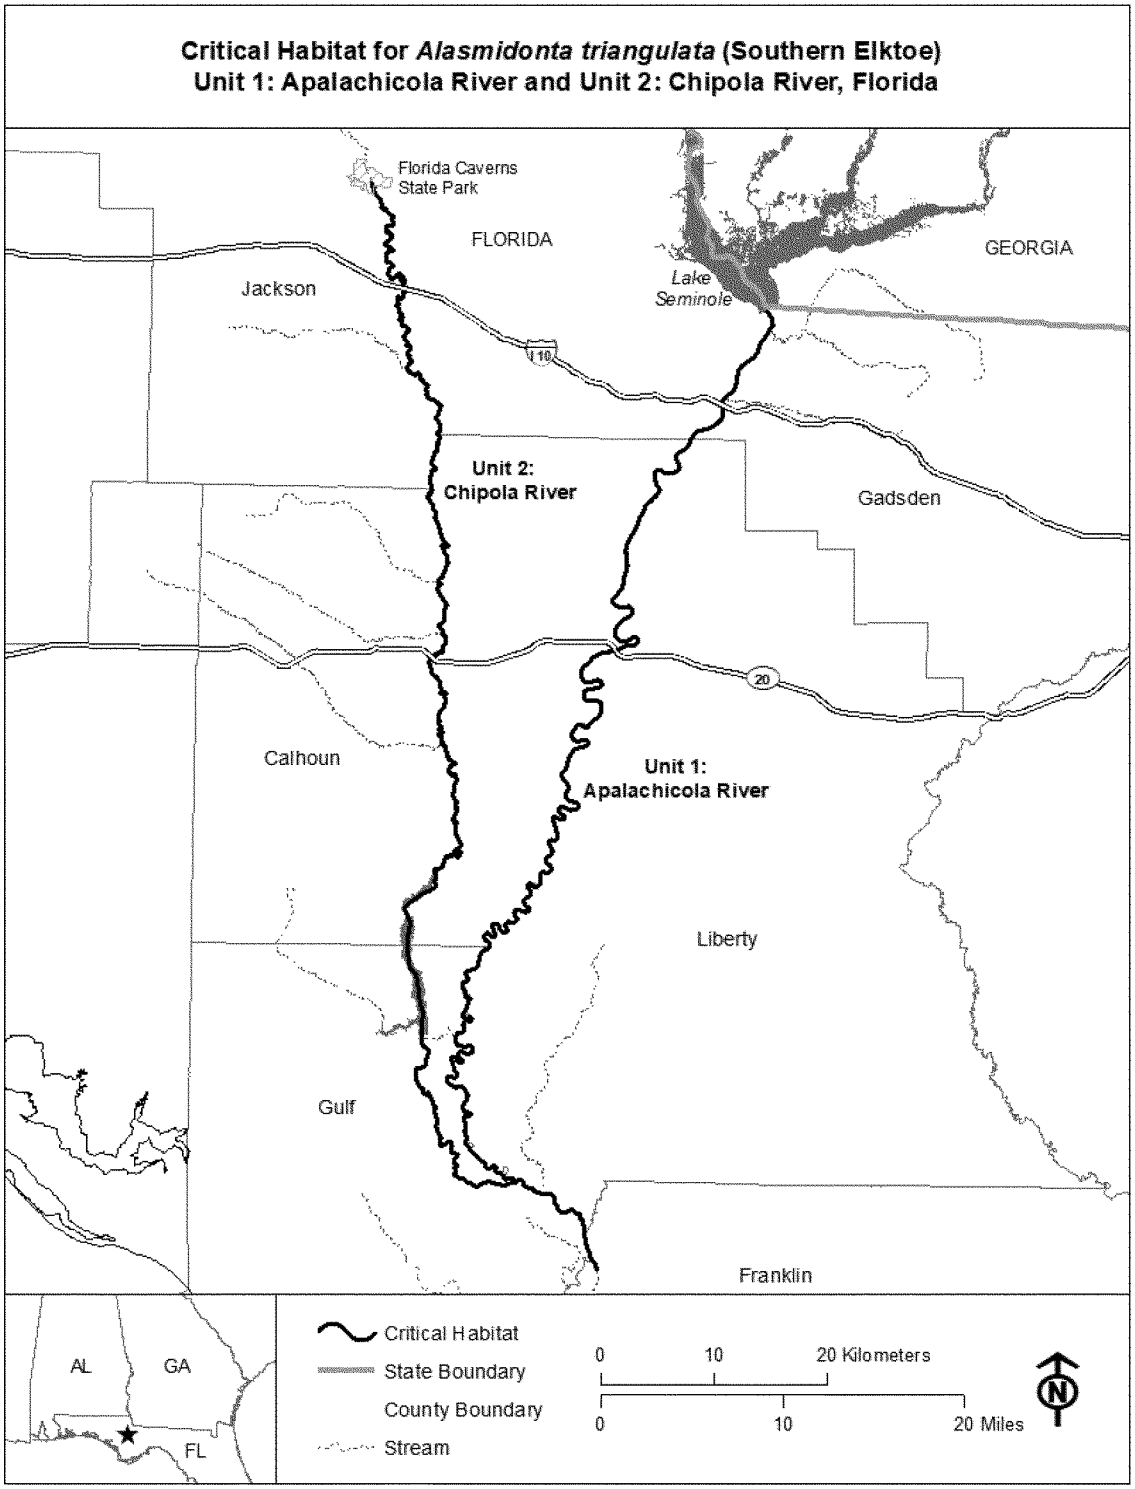


(6) Unit 1: Apalachicola River; Calhoun, Franklin, Gadsden, Gulf, Jackson, and Liberty Counties, Florida.

(i) Unit 1 consists of 142.8 river kilometers (km) (88.7 miles (mi)) of the Apalachicola River in Calhoun, Franklin, Gadsden, Gulf, Jackson, and Liberty Counties, Florida. The mainstem of the Apalachicola River in Unit 1 extends from near Prospect Bluff Historic Sites in Apalachicola National Forest at river mile 20 (U.S. Army Corps of Engineers Navigable Waterway Mile Markers) in Franklin County, Florida, upstream to the Jim Woodruff Lock and Dam in Gadsden and Jackson Counties, Florida (the river is the county boundary). Unit 1 includes stream habitat up to bankfull height.

(ii) Map of Units 1 and 2 follows:

Figure 2 to Southern Elktoe (*Alasmidonta triangulata*) paragraph (6)(ii)



(7) Unit 2: Chipola River; Calhoun, Gulf, and Jackson Counties, Florida.

(i) Unit 2 consists of 131.3 river km (81.6 mi) of the Chipola River (including the reach known as Dead Lake) in Calhoun, Gulf, and Jackson Counties, Florida. The mainstem of the Chipola River in Unit 2 extends from its confluence with the Apalachicola River in Gulf County, Florida, upstream 131.3 km (81.6 mi) to approximately where the river flows underground in Florida Caverns State Park in Jackson County, Florida. Unit 2 includes stream habitat up to bankfull height.

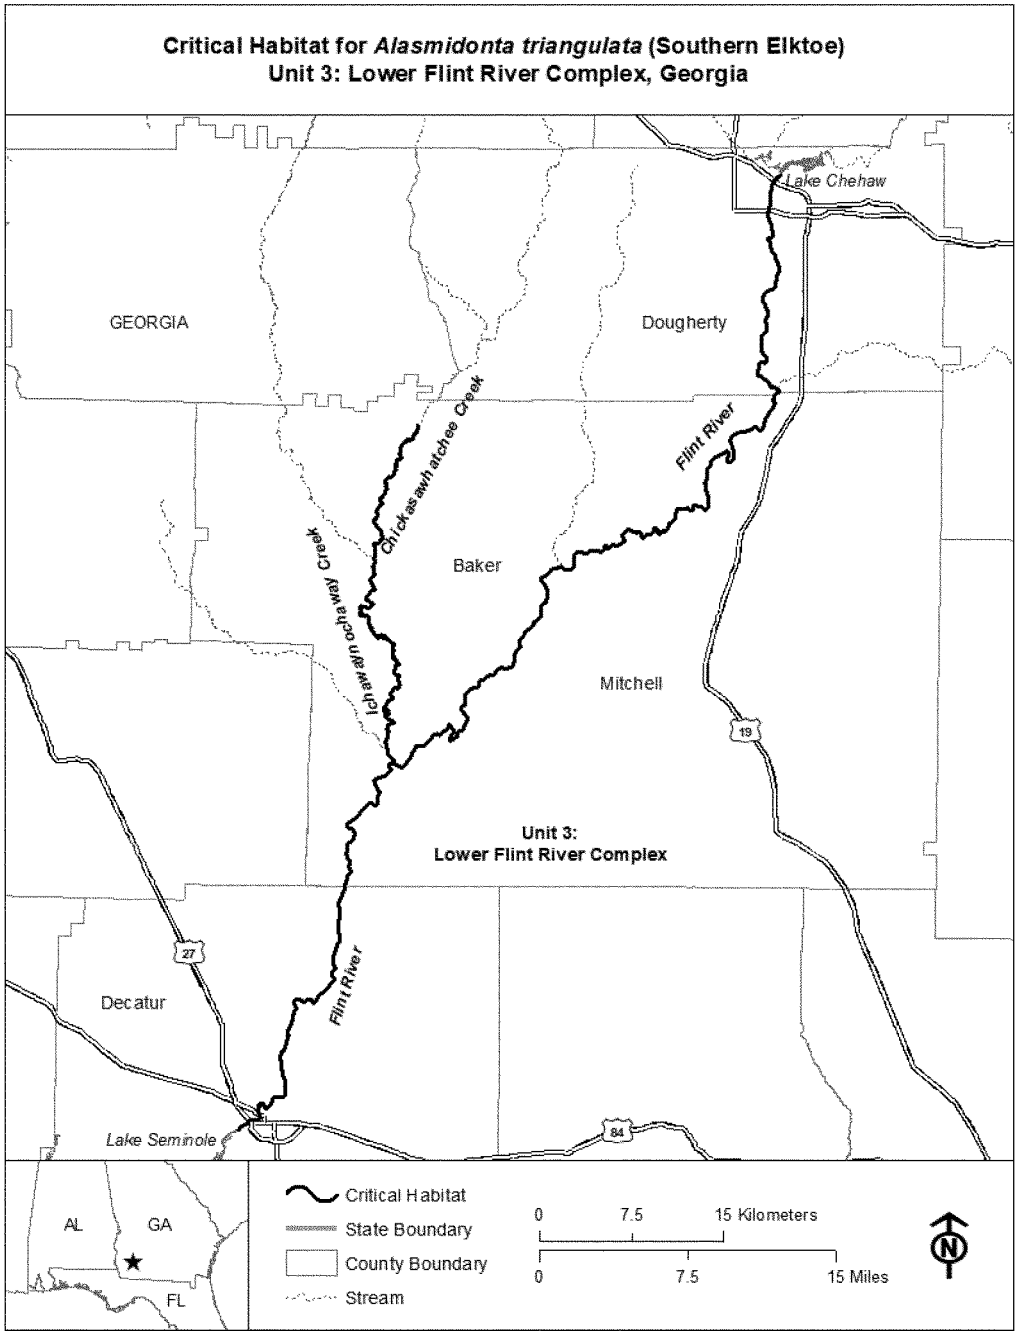
(ii) Map of Unit 2 is provided at paragraph (6)(ii) of this entry.

(8) Unit 3: Lower Flint River Complex; Baker, Decatur, Dougherty, and Mitchell Counties, Georgia.

(i) Unit 3 consists of 165.9 river km (103.1 mi) of the mainstem of the Flint River between Lake Seminole (impounded by the Jim Woodruff Lock and Dam) and the Flint River Dam (which impounds Lake Worth), and the mainstems of two tributaries in Baker, Decatur, Dougherty, and Mitchell Counties, Georgia. The mainstem of the Flint River in Unit 3 extends from 1.3 river km (0.82 mi) downstream of U.S. Highway 84 in Decatur County, Georgia (the approximate upstream extent of Lake Seminole), upstream 122.7 river km (76.3 mi) to the Flint River Dam in Dougherty County, Georgia. Unit 3 includes 26.1 river km (16.2 mi) of the mainstem of Ichawaynochaway Creek from its confluence with the Flint River upstream to its confluence with Chickasawhatchee Creek, and 15.7 river km (9.7 mi) of the mainstem of Chickasawhatchee Creek from its confluence with Ichawaynochaway Creek upstream to its confluence with Spring Creek in Baker County, Georgia. Unit 3 includes stream habitat up to bankfull height.

(ii) Map of Unit 3 follows:

Figure 3 to Southern Elktoe (*Alasmidonta triangulata*) paragraph (8)(ii)



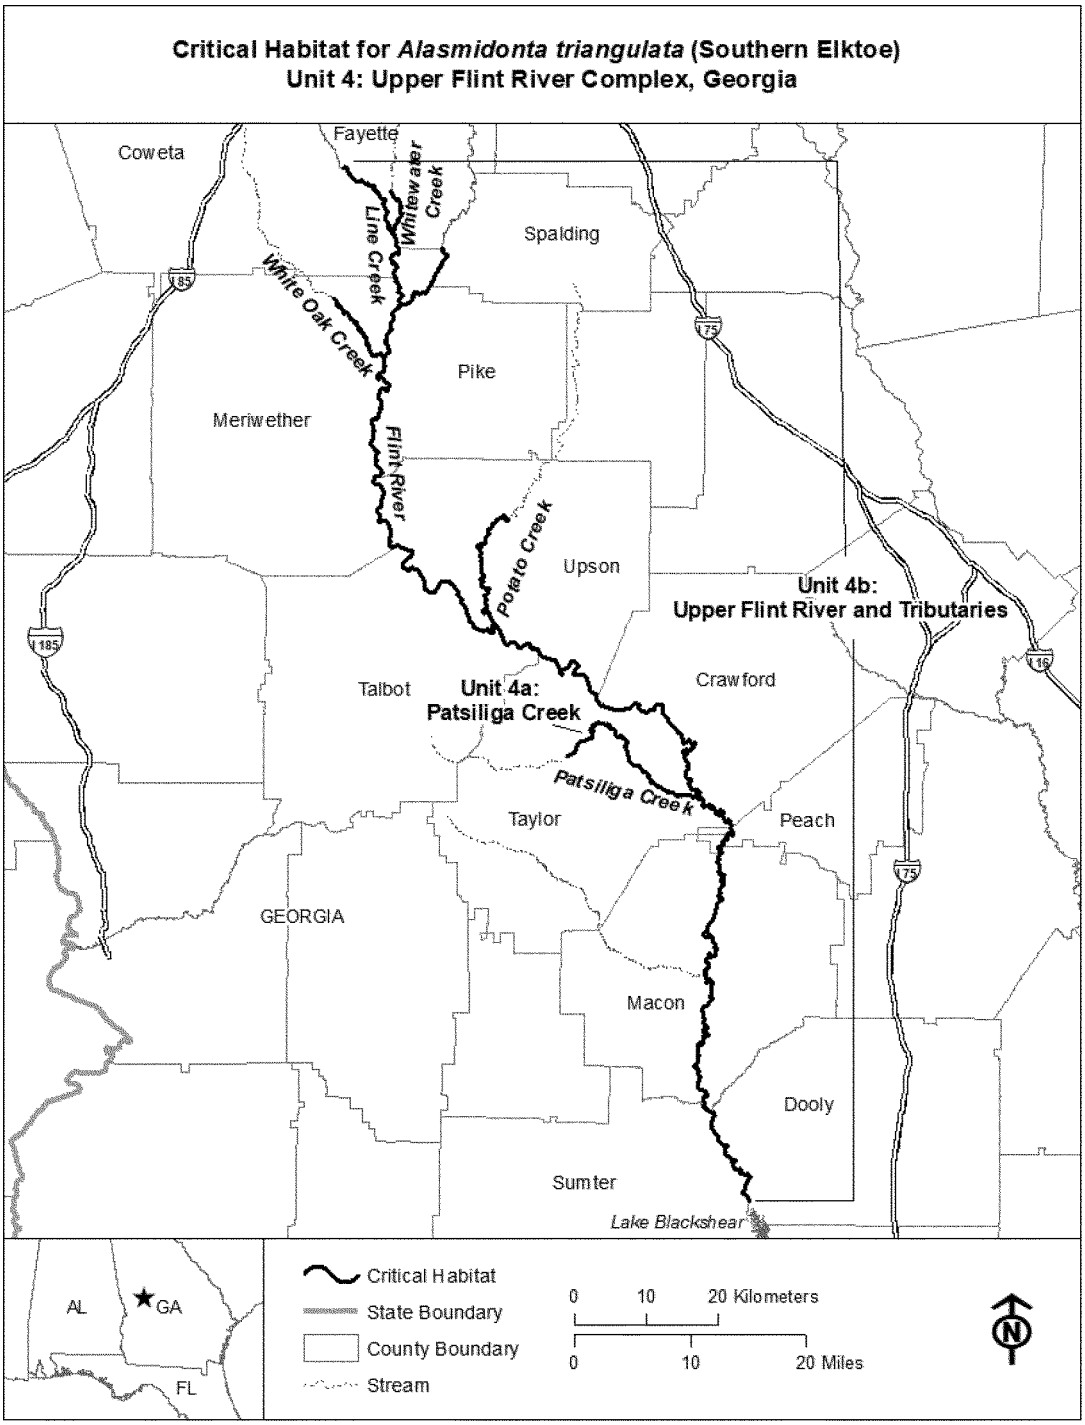
(9) Unit 4: Upper Flint River Complex; Coweta, Crawford, Dooly, Fayette, Macon, Meriwether, Peach, Pike, Spalding, Sumter, Talbot, Taylor, and Upson Counties, Georgia.

(i) Unit 4 is comprised of two subunits:

(A) Subunit 4a includes 36.2 river km (22.5 mi) of Patsiliga Creek in Taylor County, Georgia.

(B) Subunit 4b includes 360.4 river km (223.9 mi) of the mainstem of the Flint River and four of its tributaries upstream of Lake Blackshear in Coweta, Crawford, Dooly, Fayette, Macon, Meriwether, Peach, Pike, Spalding, Sumter, Talbot, Taylor, and Upson Counties, Georgia.

(ii) Map of Unit 4 follows:



(10) Unit 5: Middle Chattahoochee; Russell County, Alabama, and Harris County, Georgia.

(i) Unit 5 includes stream habitat up to bankfull height and is comprised of three subunits:

(A) Subunit 5a includes 36.7 river km (22.8 mi) of the mainstem of Uchee Creek from its confluence with the Chattahoochee River upstream to the confluence with Island Creek in Russell County, Alabama.

Figure 4 to Southern Elktoe (*Alasmidonta triangulata*) paragraph (9)(ii)

(B) Subunit 5b includes 20.3 river km (12.6 mi) of Little Uchee Creek in Russell County, Alabama.

(C) Subunit 5c includes 35.9 river km (22.3 mi) of Mulberry Creek in Harris County, Georgia.

(ii) Map of Unit 5 follows:

Figure 5 to Southern Elktoe (*Alasmidonta triangulata*) paragraph (10)(ii)

BILLING CODE 4333–15–C

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

RIN 0648–BL93

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-Grouper Fishery of the South Atlantic Region; Amendment 49

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Announcement of availability of fishery management plan amendment; request for comments.

SUMMARY: The South Atlantic Fishery Management Council (Council) submitted Amendment 49 to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (FMP) for review, approval, and implementation by NMFS. If approved by the Secretary of Commerce, Amendment 49 to the FMP would revise the overfishing limit (OFL), acceptable biological catch (ABC), annual optimum yield (OY), sector allocations, the total and sector annual catch limits (ACLs), commercial minimum size limit, the commercial seasonal trip limits, and the April spawning season closure. In addition, Amendment 49 would remove the recreational annual catch targets (ACTs) for species in the FMP. The purpose of Amendment 49 is to ensure catch limits are based on the best scientific information available and to ensure overfishing does not occur for the South Atlantic greater amberjack stock, while increasing social and economic benefits.

DATES: Written comments must be received on or before August 21, 2023.

ADDRESSES: You may submit comments on Amendment 49, identified by ''NOAA–NMFS–2023–0061'', by either of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov* and enter ''NOAA–NMFS–2023–0061'' in the Search box. Click the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Mary Vara, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Electronic copies of Amendment 49, which includes a fishery impact statement and a regulatory impact review, may be obtained from the Southeast Regional Office website at *https://www.fisheries.noaa.gov/node/150641.*

FOR FURTHER INFORMATION CONTACT: Mary Vara, telephone: 727–824–5305, or email: *mary.vara@noaa.gov.*

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) requires each regional fishery management council to submit any fishery management plan or an amendment to such a plan to the Secretary of Commerce (the Secretary) for review and approval, partial approval, or disapproval. The Magnuson-Stevens Act also requires that NMFS, upon receiving a fishery management plan or an amendment to such a plan, publish an announcement in the **Federal Register** notifying the public that the plan or amendment is available for review and comment.

The Council prepared the FMP that is being revised by Amendment 49. If approved, Amendment 49 would be implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Act.

Background

The Magnuson-Stevens Act requires that NMFS and the regional fishery management councils prevent overfishing and achieve, on a continuing basis, the OY from federally managed fish stocks. These mandates are intended to ensure that fishery resources are managed for the greatest overall benefit to the Nation, particularly with respect to providing food production and recreational opportunities, and protecting marine ecosystems. To further this goal, the Magnuson-Stevens Act requires fishery managers to minimize bycatch and bycatch mortality to the extent practicable.

In 2008, a stock assessment for greater amberjack was completed through the Southeast Data, Assessment, and Review (SEDAR) process (SEDAR 15), and it was determined that the stock was not overfished or undergoing overfishing. As a result of that stock status, the Comprehensive Amendment to the FMP (77 FR 15915, March 16, 2012) established the current total ACL and annual OY.

The most recent SEDAR stock assessment for South Atlantic greater amberjack (SEDAR 59) was completed in 2020. The assessment included data through 2018. The assessment used revised estimates for recreational catch from the Marine Recreational Information Program (MRIP) based on the Fishing Effort Survey (FES). In 2018, the MRIP fully transitioned its estimation of recreational effort from the Coastal Household Telephone Survey (CHTS) to the mail-based FES. Estimates of recreational catch for greater amberjack included in the previous assessment were made using the Marine Recreational Fisheries Statistics Survey (MRFSS) methodology. As explained in Amendment 49, total recreational fishing effort estimates generated from MRIP FES are different than those from the MRIP CHTS and MRFSS. This difference in estimates is because MRIP FES is designed to more accurately measure fishing activity, not because there was a sudden change in fishing effort. The MRIP FES is considered a more reliable estimate of recreational effort by the Council's Scientific and Statistical Committee (SSC), the Council, and NMFS, and more robust compared to the MRFSS method previously used to estimate recreational catches for greater amberjack. The SSC reviewed SEDAR 59 (2020) and found that the assessment was conducted using the best scientific information available, and was adequate for determining stock status and supporting fishing level recommendations. The findings of the assessment indicated that the South Atlantic greater amberjack stock is not overfished or undergoing overfishing.

Updated catch and data changes incorporated in the assessment provided information to update the OFL, ABC, annual OY, and ACLs. In response to the results of SEDAR 59 (2020), the Council subsequently developed Amendment 49.

In addition to the proposed revisions to the sector ACLs and seasonal commercial quotas, the Council determined that further modifications to greater amberjack management measures are needed to ensure that overfishing does not occur, while increasing social and economic benefits through sustainable harvest of greater

amberjack in the South Atlantic exclusive economic zone (EEZ). Amendment 49 would reduce the commercial minimum size limit, increase the seasonal commercial trip limits, and revise the April spawning closure for greater amberjack. Amendment 49 would also make changes to the FMP by removing recreational ACTs from the FMP to make administrative efforts more efficient, since the Council has not used, and does not anticipate using, recreational ACTs for management.

Actions Contained in Amendment 49

For South Atlantic greater amberjack, Amendment 49 would revise the OFL, ABC, annual OY, total ACL, sector allocations, and sector ACLs. Amendment 49 would also revise the commercial minimum size limit, commercial seasonal trip limits, and the April spawning closure. In addition, Amendment 49 would remove the recreational ACTs for snapper-grouper species in the FMP.

OFL, ABC, Annual OY, and Total ACL

As implemented through the Comprehensive ACL Amendment, the current OFL for greater amberjack is 2,005,000 lb (909,453 kg), round weight. The current total ACL and annual OY are equal to the ABC of 1,968,001 lb (892,670 kg), round weight. All of these current values include recreational landings for greater amberjack tracked using MRFSS estimation methods, and the Council's choice of these values was based on the recommendations of their SSC from the SEDAR 15 stock assessment (2008).

In April 2021, the Council's SSC reviewed the latest stock assessment SEDAR 59 (2020) and recommended new OFL and ABC levels based on the assessment. As discussed above, SEDAR 59 and the associated OFL and ABC recommendations for greater amberjack incorporated the revised estimates for recreational catch and effort from the MRIP FES. MRIP replaced MRFSS in 2013 and replaced the CHTS with FES in 2018. MRIP also incorporated a new survey design for the Access Point Angler Intercept Survey in 2013. As explained in Amendment 49, total recreational fishing effort estimates generated from MRIP FES are generally higher than both the MRFSS and MRIP CHTS estimates. This difference in estimates is because MRIP FES is designed to more accurately measure fishing activity, not because there was a sudden increase in fishing effort. The MRIP FES is considered a more reliable estimate of recreational effort by the Council's SSC, the Council, and NMFS, and more robust compared to the MRFSS method previously used to estimate recreational catches for greater amberjack. The new OFL and ABC recommendations within Amendment 49 also represent the best scientific information available as determined by the Council's SSC and NMFS. The Council chose to specify OY for greater amberjack on an annual basis and set it equal to the ABC and total ACL, in accordance with the guidance provided in the Magnuson-Stevens Act National Standard 1 Guidelines at 50 CFR 600.310(f)(4)(iv).

The fishing year for greater amberjack is March 1 through the end of February; therefore, OFL, ABC, OY and total ACL values are described as a combination of years. Amendment 49 would revise the OFL to be 3,283,000 lb (1,489,144 kg), round weight, for 2023–2024; 2,839,000 lb (1,287,749 kg), round weight, for 2024–2025; 2,719,000 lb (1,233,317 kg), round weight, for 2025–2026; and 2,691,000 lb (1,220,617 kg), round weight, for 2026–2027 and subsequent years.

Amendment 49 would revise the total ACL and annual OY equal to the recommended ABC of 3,233,000 lb (1,466,464), round weight, for 2023–2024; 2,818,000 lb (1,278,223 kg), round weight, for 2024–2025; 2,699,000 lb (1,224,246), round weight, for 2025–2026; and 2,669,000 lb (1,210,638), round weight, for 2026–2027 and subsequent fishing years.

Sector Allocations and ACLs

Amendment 49 would revise the commercial and recreational allocations of the total ACL for greater amberjack. The current sector ACLs for greater amberjack are based on the current commercial and recreational allocations of the total ACL at 40.66 percent and 59.34 percent, respectively. The current allocations were established by applying the formula of sector ACL = ((mean landings 2006–2008)*0.5) + ((mean landings 1986–2008)*0.5) to the landings dataset that were used in the Comprehensive ACL Amendment (77 FR 15916, March 16, 2012).

The revised greater amberjack sector allocations in Amendment 49 would result in commercial and recreational allocations of 35.00 percent and 65.00 percent, respectively. After considering various allocation alternatives, the Council proposed allocations based on their current allocation equation, updated estimates of recreational landings from the MRIP FES method, and a consideration of economic and social impacts to the commercial and recreational sectors. The proposed sector allocations are approximate midpoints between the current allocations, and the allocations that result from applying the current allocation formula to a revised dataset that is inclusive of MRIP–FES, which results in commercial and recreational allocations of the total ACL at 29.84 percent and 70.16 percent, respectively. While the Council increased the recreational allocation percentage to account for the increase in recreational catch estimates under the new MRIP FES estimation method, the Council chose to increase the recreational allocation to 65.00 percent, instead of 70.16 percent, to account for potential adverse economic and social impacts to the commercial sector. Several recently completed stock assessments for other species in the FMP have indicated poor stock status and necessitated reduced harvest of these stocks, making greater amberjack potentially more important to the commercial sector. The proposed greater amberjack sector allocation percentages also approximate the average annual total landings percentages for each sector from 2010–2019.

The Council determined that the sector allocations in Amendment 49 would result in the most appropriate balance between the needs of both sectors to maximize harvest opportunities. The Council considers this revised allocation to be fair and equitable to fishery participants in both the commercial and recreational sectors. The Council determined that this allocation is also reasonably calculated to promote conservation and is a wise use of the resource, since it achieves OY and is based upon an ABC recommendation from their SSC that incorporates the best scientific information available. The Council acknowledged that the recreational sector would benefit with an increase to their allocation, and that the recreational sector management measures and accountability measures (AMs) are in place to prevent overages of the recreational ACL.

The commercial quota for greater amberjack is equivalent to the commercial ACL. The final rule for Regulatory Amendment 27 to the FMP established two commercial fishing seasons and divided the commercial quota between the seasons to lengthen the greater amberjack commercial season and allow for a more equitable distribution and price stability of the greater amberjack resource throughout the South Atlantic (85 FR 4588, January 27, 2020). Regulatory Amendment 27 allocated 60 percent of the commercial quota to Season 1 from March through August, and 40 percent of the quota to

Season 2 from September through February. Any remaining commercial quota from Season 1 is added to the commercial quota in Season 2. Any remaining quota from Season 2 is not carried forward into the next fishing year. Amendment 49 would not alter the current fishing seasons or seasonal allocations of the commercial ACL.

Currently, the commercial ACL is 769,388 lb (348,989 kg), gutted weight. The commercial Season 1 quota is 461,633 lb (209,393 kg), gutted weight. The commercial Season 2 quota is 307,755 lb (139,595 kg), gutted weight.

Amendment 49 would revise the commercial ACLs to be 1,088,029 lb (493,522 kg), gutted weight, for 2023–2024; 948,365 lb (430,171 kg), gutted weight, for 2024–2025; 908,317 lb (412,006 kg), gutted weight, for 2025–2026; and 898,221 lb (407,426 kg), gutted weight, for 2026–2027 and subsequent fishing years.

The commercial Season 1 quotas would be 652,817 lb (296,113 kg), gutted weight, for 2023–2024; 569,019 lb (258,103 kg), gutted weight, for 2024–2025; 544,990 lb (247,203 kg), gutted weight, for 2025–2026; and 538,933 lb (244,456 kg), gutted weight, for 2026–2027 and subsequent fishing years.

The commercial Season 2 quotas would be 435,212 lb (197,409 kg), gutted weight, for 2023–2024; 379,346 lb (172,068 kg), gutted weight, for 2024–2025; 363,327 lb (164,802 kg), gutted weight, for 2025–2026; and 359,288 lb (162,970 kg), gutted weight, for 2026–2027 and subsequent fishing years.

The current recreational ACL is 1,167,837 lb (529,722 kg), round weight. In Amendment 49,the recreational ACLs would be 2,101,450 lb (953,202 kg), round weight, for 2023–2024; 1,831,700 lb (830,845 kg), round weight, for 2024–2025; 1,754,350 lb (795,760 kg), round weight, for 2025–2026; and 1,734,850 lb (786,915 kg), round weight, for 2026–2027 and subsequent fishing years.

Commercial Minimum Size Limit

Amendment 4 to the FMP (56 FR 56016, October 31, 1991) implemented the current minimum size limit for the commercial sector of 36 inches (91.4 cm) fork length (FL).

Amendment 49 would reduce the commercial minimum size limit to 34 inches (86.4 cm), FL. Consideration of a reduced commercial minimum size limit was recommended during public scoping (April 2021) and from the Council's Snapper-Grouper Advisory Panel (AP) at their April 2021 meeting. For similar reasons as those provided through public and AP comments, the Council determined that reducing the minimum size limit would reduce regulatory discards, reduce the risk of shark depredation, and more align with the greater commercial desirability for smaller fish. Additionally, the Council decided that a reduction to 34 inches (86.4 cm), FL, is not likely to jeopardize the current positive stock status, given other management constraints on the commercial sector such as in-season AMs, trip limits, and split season quotas.

Seasonal Commercial Trip Limits

The final rule for Regulatory Amendment 27 revised the commercial trip limit for greater amberjack to the current limits of 1,200 lb (544 kg) during Season 1, and 1,000 lb (454 kg) during Season 2 (in round or gutted weight).

Amendment 49 would increase the Season 2 trip limit for greater amberjack to 1,200 lb (544 kg). After hearing a recommendation for this change from the Snapper-Grouper AP, the Council selected this option to have more regulatory consistency by having the same commercial trip limit throughout the year. Additionally, the Council acknowledged that the analyses considered in Amendment 49 indicate that under the 1,200 lb (544 kg) trip limit, the commercial sector is not expected to experience a closure in Season 2. The Council decided that having the same trip limit throughout the fishing year would best meet the purpose of revising the commercial trip limit to increase efficiency of commercial fishing for greater amberjack, while minimizing adverse social and economic effects.

April Spawning Closure

The peak spawning month for greater amberjack is during April and spawning aggregations are vulnerable to fishing effort during that time of the year. Due to the concerns of high catch rates of greater amberjack in spawning aggregations, the final rule for Amendment 4 to the FMP (56 FR 56016, October 31, 1991) implemented a spawning season closure for the commercial harvest of greater amberjack during April, in which commercial fishermen were restricted to a three fish per person per day limit (the same as the recreational bag limit at the time). To further enhance the protection to spawning greater amberjack, the final rule for Amendment 9 to the FMP revised those commercial possession limits and sale/purchase restrictions (64 FR 3624, February 24, 1999). Currently during April each year, for both the commercial and recreational sectors, no person may sell or purchase a greater amberjack harvested from the South Atlantic EEZ and the harvest and possession limit is one per person per day or one per person per trip, whichever is more restrictive.

Amendment 49 would revise the April spawning closure restrictions for both the commercial and recreational sectors from April 1 through April 30, and not allow any person to fish for, harvest, or possess a greater amberjack from the South Atlantic EEZ and the harvest and possession limits would be zero. The sale or purchase of greater amberjack would also continue to be prohibited in April. The Council determined that additional protections were needed for greater amberjack during this portion of their peak spawning period (April-May), and that both sectors should fully participate in this effort by not allowing either sector to harvest greater amberjack.

Proposed Rule for Amendment 49

A proposed rule to implement Amendment 49 has been drafted. In accordance with the Magnuson-Stevens Act, NMFS is evaluating the proposed rule for Amendment 49 to determine whether it is consistent with the FMP, the Magnuson-Stevens Act, and other applicable law. If that determination is affirmative, NMFS will publish the proposed rule in the **Federal Register** for public review and comment.

Consideration of Public Comments

The Council has submitted Amendment 49 for Secretarial review, approval, and implementation. Comments on Amendment 49 must be received by August 21, 2023. Comments received during the respective comment periods, whether specifically directed to Amendment 49 or the proposed rule, will be considered by NMFS in the decision to approve, partially approve, or disapprove, Amendment 49. All comments received by NMFS on the amendment or the proposed rule during their respective comment periods will be addressed in the final rule.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 13, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Foreign Agricultural Service

Notice of a Request for Revision and Extension of a Currently Approved Information Collection

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the Foreign Agricultural Service (FAS) to request a revision and extension from the Office of Management and Budget (OMB) of a currently approved information collection for the Dairy Tariff-Rate Quota (TRQ) Import Licensing program.

DATES: Comments on this notice must be received by August 21, 2023 to be assured of consideration.

ADDRESSES: You may send comments, identified by the OMB Control number 0551–0001, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov*. This portal enables respondents to enter short comments or attach a file containing lengthier comments.
- *Email: Bettyann.Gonzales@usda.gov*. Include OMB Control number 0551–0001 in the subject line of the message.
- *Mail, Courier, or Hand Delivery:* BettyAnn Gonzales, Foreign Agricultural Service, U.S. Department of Agriculture, 1400 Independence Avenue SW, Room 5550, Stop 1070, Washington, DC 20250–1070.

Instructions: All submissions received must include the agency name and OMB Control Number for this notice.

FOR FURTHER INFORMATION CONTACT: BettyAnn Gonzales, 202 720–1344, *Bettyann.Gonzales@usda.gov*.

SUPPLEMENTARY INFORMATION:

Title: Dairy TRQ Import Licensing Program.

OMB Number: 0551–0001.

Expiration Date of Approval: January 31, 2024.

Type of Request: Revision and extension of a currently approved information collection.

Abstract: The currently approved information collection supports the Dairy TRQ Import Licensing regulation (the Regulation) (7 CFR 6.20–6.36) which governs the administration of the import licensing system applicable to most dairy products subject to TRQs. The TRQs were established in the Harmonized Tariff Schedule of the United States (HTS) as a result of the entry into force of certain provisions in the Uruguay Round Agreements Act (Pub. L. 103–465) that converted existing absolute quotas to TRQs. Imports of nearly all cheeses made from cow's milk (except soft-ripened cheese such as Brie) and certain non-cheese dairy products (including butter and dried milk) are subject to TRQs and the Regulation. Licenses are issued each quota year to eligible applicants and are valid for 12 months (January 1 through December 31). Only licensees may enter specified quantities of the subject dairy articles at the applicable in-quota tariff-rates. Importers who do not hold licenses may enter dairy articles only at the over-quota tariff-rates.

Each quota year, all applicants for historical, non-historical and designated licenses must certify their eligibility for the following quota year through the online Agricultural Trade License Administration System (ATLAS) platform. ATLAS has now replaced any online forms previously utilized before. The ATLAS application process requires applicants to: (1) certify they are an importer, manufacturer, or exporter of certain dairy products; and (2) certify they meet the eligibility requirements of § 6.23 of the Regulation. Applicants for non-historical licenses must request licenses in descending order of preference for specific products and countries listed on the form.

After licenses are issued, § 6.26 requires licensees to surrender by October 1 in ATLAS any license amount that a licensee does not intend to enter that year. If October 1 falls on a weekend, then the deadline will be the next business day. These amounts are reallocated, to the extent practicable, to existing licensees for the remainder of that year based on requests submitted in ATLAS. ATLAS requires the licensee to complete a table listing the surrendered amount by license number. For reallocated quota, the licensee may complete an additional table listing the additional amounts requested by dairy article and supplying country in descending order of preference.

The estimated total annual burden of 479 hours in the Office of Management and Budget (OMB) inventory for the currently approved information collection will decrease to 394 hours. The public reporting burden for this collection of currently approved license application process through ATLAS is estimated to average 368.5 hours; and the license surrender process is 25.5 hours.

Estimate of Burden: The average burden, including the time for reviewing instructions, gathering data needed, data input, and record keeping is estimated at .67 hour for license application and .17 hour for license surrender.

Type of Respondents: Importers and manufacturers of cheese and non-cheese dairy products, and exporters of non-cheese dairy products.

Estimated Number of Respondents: For license application and license surrender under the ATLAS system: 700.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden: 394 hours.

Copies of this information collection may be obtained from Dacia Rogers, the Agency Information Collection Coordinator, at *Dacia.Rogers@usda.gov*.

Requests for Comments: Send comments regarding (a) whether the information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information including validity of the methodology and assumption used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated, electronic, mechanical, or other technological collection techniques, or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be available without change, including any personal information provided, for inspection online at *http://www.regulations.gov* and at the mail address listed above between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Comments will be summarized and included in the submission for OMB approval.

Persons with disabilities who require an alternative means for communication of information (Braille, large print, audiotape, etc.) should contact *RARequest@usda.gov*.

Daniel Whitley,

Administrator, Foreign Agricultural Service.

BILLING CODE 3410–10–P

DEPARMENT OF AGRICULTURE

Natural Resources Conservation Service

[Docket No. NRCS–2023–0008]

Notice of Intent To Prepare an Environmental Impact Statement for the Upper Maple River Watershed Plan, North Dakota

AGENCY: Natural Resources Conservation Service, Department of Agriculture.

ACTION: Notice of intent (NOI) to prepare an environmental impact statement (EIS).

SUMMARY: The Natural Resources Conservation Service (NRCS) North Dakota State Office, announces its intent to prepare an EIS for the Upper Maple River Watershed located within Cass, Barnes, Steele, and Griggs Counties, North Dakota. NRCS will examine alternative solutions through the EIS process to provide watershed protection. NRCS is requesting comments to identify significant issues, potential alternatives, information, and analyses relevant to the Proposed Action from all interested individuals, Federal and State Agencies, and Tribes.

DATES: We will consider comments that we receive by August 7, 2023. Comments received after the close of the comment period will be considered to the extent possible.

ADDRESSES: We invite you to submit comments in response to this notice. You may submit your comments through one of the methods below:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and search for docket ID NRCS–2023–0008. Follow the online instructions for submitting comments; or
- *Mail or Hand Delivery:* Carol Lewis, Cass County Joint Water Resource District, 1201 Main Avenue West, West Fargo, ND 58078–1301. In your comment, specify the docket ID NRCS–2023–0008.

All comments received will be posted and made publicly available on *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Christi Fisher; telephone: (701) 530–2091; email: *christi.fisher@usda.gov.* Individuals who require alternative means of communication should contact USDA Target Center at (202) 720–2600 (voice).

SUPPLEMENTARY INFORMATION:

Purpose and Need

The U.S. Army Corps of Engineers (USACE) and U.S. Fish and Wildlife Service (USFWS) are cooperating federal agencies in the watershed planning effort. NRCS is the lead federal agency implementing the National Environmental Policy Act and the National Historic Preservation Act (NHPA). An interagency team consisting of the following agencies are participating in the planning effort: Federal Emergency Management Agency; U.S. Environmental Protection Agency; North Dakota Department of Water Resources (ND DWR); North Dakota Department of Environmental Quality; North Dakota Game and Fish Department; North Dakota Department of Transportation; Cass County Joint Water Resource District; Cass County Highway Department; Cass County Sheriff's Office; Cass County Commission; Cass County Emergency Management; City of Amenia; and City of Casselton. NRCS is consulting on both the National Environmental Policy Act (NEPA) and section 106 of the NHPA with the North Dakota State Historical Preservation Office and 31 Tribal Nations.

The primary purpose of the proposed action is watershed protection. The proposed action will also result in flood damage reduction to cropland, structures, roads, drain ditches, structures, and vehicles in the watershed. Watershed protection goals consist of reducing nutrient loads from the watershed, particularly dissolved phosphorus, and increasing quantity and quality of wetlands and wildlife habitat.

The Watershed Project Plan is authorized under the authority of the Watershed Protection and Flood Prevention Act of 1954 (Pub. L. 83–566), as amended, and the Regional Conservation Partnership Program Project (16 U.S.C. chapter 58, Subchapter VIII). This action is needed because:

- The Upper Maple River Watershed, with a drainage area of 186,400 acres, annually contributes an estimated 30,200 pounds of phosphorus and 331,600 pounds of nitrogen to the Red River downstream. Approximately 88 percent of the watershed is farmed for row crops consisting predominantly of soybeans, corn, spring wheat, dry beans, and sunflowers.
- The average slope of the Upper Maple River is 4 foot per mile and the downstream Red River averages 1 foot per mile. The low topographic relief landscape results in floods over wide swaths of cropland for long durations, allowing for phosphorus dissolution from soils and vegetation into the overlying stagnant floodwaters. Within the Upper Maple Watershed, 17,684 acres of cropland are inundated by the 2-year recurrence interval (RI) flood event, 29,418 acres at the 10-year RI flood, and 37,246 acres are inundated by a 100-year RI flood.
- In addition to generating nutrient transport from cropland to the Maple River, the average annual flood inundation of 12,600 acres of cropland generates $2.1 million annual damages to agricultural producers. Total economic losses due to flooding, considering damage to cropland, structures, roads, drain ditches, structures, and vehicles in the watershed are estimated at $3.8 million a year.
- Agricultural non-point source nutrient loads in the Red River are of international significance. The Red River discharges to Lake Winnipeg, the 10th largest freshwater lake in the world, also designated one of the most eutrophic large lakes [1] in the world. Eutrophication has resulted in negative effects on the aquatic food web within the lake, resulting in declines to critical species which support recreational and commercial fisheries, tourism, and subsistence fishing of indigenous people. While the Red River contributes only 10 to 15 percent of overall annual runoff to the lake by volume, it

[1] A eutrophic lake is rich in nutrients and supports a dense phytoplankton or plant population, the respiration and decomposition of which results in depletion of dissolved oxygen levels. Eutrophication generates adverse effects on aquatic species due to zones of low dissolved oxygen in the lake and impacts recreation, public safety, and drinking water supply due to algal blooms on the lake surface.

contributes 69 percent of the total phosphorus load, largely in the form of inorganic dissolved phosphorus, and it is also a major contributor of nitrogen. Nitrogen loads have remained relatively stable in the Red River since 2000, however phosphorus loads at the U.S. and Canadian border have continued to steadily increase over the last two decades despite significant USDA–NRCS program investments in the installation of on-farm conservation practices throughout the North Dakota and Minnesota portions of the Red River Basin.

- Cropland conservation practices promoted by NRCS are effective at reducing particulate bound phosphorus, nitrogen, and sediment loss; however, have been largely ineffective in reducing dissolved phosphorus runoff from cropland in this watershed. This is demonstrated not just in the upward trend of dissolved phosphorus at the U.S. Geological Survey (USGS) gauge on the international border, but through published research from Red River Basin study sites. Other flood prone, flat, cold climate, agricultural landscapes with predominantly fine-grained soils, such as those found in Finland, Sweden, and the Netherlands, experience similar challenges with dissolved phosphorus management.
- Federal investment in nutrient reduction within the Red River Basin is an important contribution to the Boundary Waters Treaty (BWT) obligation of the United States. Article IV of the BWT states that ''boundary waters or waters flowing across the boundary shall not be polluted to the injury of health and property to the other.'' The International Joint Commission (IJC) acts as the arbitral body for the BWT, with the Red River Basin Commission (RRBC) established as a sub-entity between the two countries for management in the international Red River Basin. In 2020, based on the recommendations of the RRBC, the IJC adopted nutrient concentration objectives for the international border crossing of the Red River. Meeting the target for phosphorus will require an approximately 50 percent reduction in the average concentrations from the last two decades, which in turn will require implementation of new and innovative techniques for phosphorus reduction from cropland. U.S. negotiations with the Canadian government for similar investments to protect U.S. waterways from pollutants originating in Canada, through the IJC, will be bolstered by U.S. investments in the Red River Basin.
- The Prairie Pothole Region (PPR) in the northcentral Great Plains is one of the most threatened waterfowl habitats in the United States. The Red River Valley is one of the largest artificially drained landscapes in the world, with hundreds of miles of publicly owned drainage ditches, privately owned lateral ditches, and thousands of acres of surface tile drains. The remaining wetlands and grasslands of the PPR are one of the most productive areas in the world for breeding waterfowl and are important habitat for migratory grassland and shore birds as well. Drainage of remaining wetlands continues in the region, from 1997 to 2009 more than 50,000 individual wetlands were lost within North Dakota alone, a –3.3 percent overall change.

Preliminary Proposed Action and Alternatives

The Upper Maple Watershed planning process was initiated in 2016 with a public scoping meeting, which was not advertised in the **Federal Register** because it was assumed that an Environmental Assessment would be completed for the project. Through the course of the planning process since 2016, 38 different alternatives were evaluated with comments solicited. Based on technical analysis results and comments, all but one alternative was selected. Both the EIS and the second public scoping meeting, dated May 30, 2023, will provide a summary of the preliminary alternatives analysis and opportunity for input. The EIS is expected to evaluate two alternatives: one action alternative and one no action alternative. The alternatives we intend to carry forward to final analysis are:

Alternative 1—No Action: Taking no action would mean that no federal action would be taken in the Upper Maple River Watershed and implementation of significant flood damage reduction or watershed protection projects would not occur. The watershed will continue to contribute an average of 19,841 pounds of phosphorus and 50,223 pounds of nitrogen annually to the Maple River, and the downstream Red River and Lake Winnipeg. Wetlands and wildlife habitat will remain unchanged barring a significant change in federal conservation programs.

Alternative 2—Upper Maple River Site 2A (Proposed Action): Upper Maple River Site 2A would be a multi-purpose dry dam with interior features designed and operated for the purpose of dissolved phosphorus (DP) and nitrogen reduction, and wetlands and uplands managed for wildlife habitat. The primary dam structure would provide 2,863 acre-feet of temporary (less than 10 days inundation at the 10-year recurrence interval flood) floodwater retention for a 59.7 square mile drainage area and would consist of a 2.3-mile embankment with a maximum height of 31 feet, 48-inch principal spillway conduit, and structural concrete auxiliary spillway. Reduction of dissolved inorganic phosphorus will be through two primary means. The first involves construction and operation of three shallow retention cells, totaling 240 acres, on the interior of the dry dam to which water would be routed and held to depths of 2 to 3 feet through the growing season. Vegetation would uptake DP as it grows and in the early fall the cells would be drained via automated control structures and tile drains below the cells to allow vegetation to be cut, baled, and removed from cells prior to the first frost in 2 out of 3 years. The second primary means of DP reduction occurs through reducing the extents, frequency, and duration of cropland inundation downstream of the dam through modification of the peak flow hydrograph. The alternative would also result in enhancement of approximately 200 acres of existing wetlands, and enhancement of approximately 500 acres of uplands which would be managed to maximize wildlife habitat benefits.

Summary of Expected Impacts

An NRCS evaluation of this federally assisted action indicates that the proposed alternative may have a significant local, regional, national, or international impact on the environment. Hydrologic impacts include peak flow reductions of 82 percent and 56 percent of the 10- and 100-year recurrence interval flood events immediately downstream of the retention site, and 14 percent and 19 percent of the 10- and 100-year recurrence interval flood events at the downstream confluence between Maple River and unnamed tributary which site 2A is located. Immediately downstream of the retention site, average annual loads of total phosphorus, total nitrogen, and total suspended solids are reduced by 60 percent, 66 percent, and 38 percent respectively. The proposed alternative would result in a total loss of 21.4 acres of wetlands through fill placement, excavation, which will be mitigated via onsite wetland restoration. The project is expected to generate a net increase of 230.3 acres of wetlands and enhances approximately 30 acres of existing wetlands because of restored hydrology and vegetative communities, and enhancement of approximately 500 acres upland wildlife habitat for the benefit of migratory birds and other

wildlife species. Short term negative impacts during construction are anticipated to be local only, and may occur in relation to soils, vegetation, noise, and traffic.

Anticipated Permits and Authorizations

The following permits and other authorizations are anticipated to be required:

- *CWA Section 404 permit.* Implementation of the proposed federal action would require a Clean Water Act (CWA) Section 404 permit from the U.S. Army Corps of Engineers, which is a cooperating federal agency on the planning effort. Consultation is ongoing and no significant challenges are anticipated given the overall environmental benefits of the project.
- *CWA Section 401 permit.* The project would also require water quality certification under Section 401 of the CWA and permitting under Section 402 of the CWA (National Pollutant Discharge Elimination Permit), both of which would be issued by the North Dakota Department of Environmental Quality, which is participating on the interagency team for the watershed plan. Consultation is ongoing and no significant challenges are anticipated given the overall environmental benefits of the project.
- *Permit to Construct or Modify a Dam.* The project will require authorization from the ND DWR for construction of a dam. ND DWR is participating on the interagency team for the watershed plan and has also provided funding for the planning effort. No significant challenges are anticipated given the project is being designed to meet State of North Dakota dam safety standards.
- *Water Appropriation Permit.* The project may require a conditional water use permit from ND DWR for construction of a dam that will temporarily retain water during flood events. ND DWR is participating on the interagency team for the watershed plan and has also provided funding for the planning effort.
- *Floodplain Permit.* The project will require a floodplain development permit from Cass County. Cass County is participating on the interagency team for the watershed plan and no significant challenges are expected given the beneficial flood damage reduction effects of the project.
- *NHPA Section 106 Consultation.* Consultation with 31 Tribal Nations and the North Dakota State Historical Society is ongoing, as required by the NHPA. To date no concerns have been raised about NHPA, however consultation is ongoing.

Schedule of Decision-Making Process

A draft EIS will be prepared and circulated for review and comment by agencies and the public for at least 45 days per 40 CFR 1503.1, 1502.2, 1506.11, 1502.17, and 7 CFR 650.13. The draft EIS is anticipated to be published in the **Federal Register** approximately 6 months after publication of this NOI. A final EIS is anticipated to be published within 6 months of completion of the public comment period for the draft EIS. NRCS will then decide whether to implement one of the alternatives as evaluated in the EIS.

NRCS will provide technical and financial assistance for the proposed project through the NRCS Watershed Protection and Flood Prevention Program if an action is selected. A Record of Decision will be completed after the required 30-day waiting period and will be publicly available. The responsible Federal official for the NRCS is Nathan Jones, North Dakota Acting State Conservationist.

Public Scoping Process

Public scoping meetings will be held to further develop the scope of the draft EIS. A preliminary scoping meeting was held on February 24, 2016, in Casselton, ND. An additional public scoping meeting was held on May 30, 2023. The meeting was virtual only. A recording of the meeting may be accessed at: *https://www.nrcs.usda.gov/conservation-basics/conservation-by-state/north-dakota/upper-maple-river-watershed-plan.*

Comments received for both meetings, including names and addresses of those who comment, will be part of the public record.

NRCS will coordinate the scoping process as provided in 36 CFR 800.2(d)(3) and 800.8 (54 U.S.C. 306108) to help fulfill the NHPA, as amended, review process. The USACE and USFWS have declined to participate in the NRCS led NHPA process and instead intend to use their agency specific NHPA processes.

Identification of Potential Alternatives, Information, and Analyses

NRCS invites agencies, Tribes, and individuals who have special expertise, legal jurisdiction, or interest in the Upper Maple Watershed and the Red River Basin to provide comments concerning the scope of the analysis and identification of potential alternatives, information, and analyses relevant to the Proposed Action in writing.

Authorities

This document is published pursuant to NEPA regulations regarding publication of a notice of intent to issue an EIS (40 CFR 1501.9(d)). The EIS will be prepared to evaluate potential environmental impacts as required by section 102(2)(C) of NEPA, the Council on Environmental Quality regulations (40 CFR parts 1500–1508); and NRCS regulations that implement NEPA in 7 CFR part 650 and 7 CFR 622. Watershed planning is authorized under the Watershed Protection and Flood Prevention Act of 1954, as amended, (Pub. L. 83–566) and the Flood Control Act of 1944 (Pub. L. 78–534).

Federal Assistance Program

The title and number of the Federal Assistance Programs, as found in the Assistance Listing,[2] to which this document applies is 10.904, Watershed Protection and Flood Prevention.

Executive Order 12372

Executive Order 12372, ''Intergovernmental Review of Federal Programs,'' requires consultation with State and local officials that would be directly affected by proposed Federal financial assistance. The objectives of the Executive Order are to foster an intergovernmental partnership and a strengthened federalism, by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance and direct Federal development. This program is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

USDA Non-Discrimination Policy

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family or parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Individuals who require alternative means of communication for program information (for example, braille, large print, audiotape, American Sign Language, etc.) should contact the

[2] See *https://sam.gov/content/assistance-listings.*

responsible Agency or USDA TARGET Center at (202) 720–2600 (voice and text telephone) or dial 711 for Telecommunications Relay Service (both voice and text telephone users can initiate this call from any phone). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at *https://www.usda.gov/oascr/how-to-file-program-discrimination-complaint* and at any USDA office or write a letter addressed to USDA and provide in the letter all the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410 or email: *OAC@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Nathan Jones,

North Dakota Acting State Conservationist, Natural Resources Conservation Service.

[FR Doc. 2023–13129 Filed 6–20–23; 8:45 am]

BILLING CODE 3410–16–P

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

[Docket No. NRCS–2023–0010]

Notice of Intent To Prepare an Environmental Impact Statement for the St. Mary Canal Modernization Project, Glacier County, MT

AGENCY: Natural Resources Conservation Service, USDA.

ACTION: Notice of intent (NOI) to prepare an environmental impact statement (EIS).

SUMMARY: The Natural Resources Conservation Service (NRCS) Montana State Office, in coordination with the U.S. Bureau of Reclamation, announces its intent to prepare a Watershed Plan and EIS for the St. Mary Canal Modernization Watershed Project (Milk River Project), located east of Babb, in Glacier County, Montana. The proposed Watershed Plan will examine alternatives through the EIS process for improving the St. Mary Canal system to provide for agricultural water management. NRCS is requesting comments to identify significant issues, potential alternatives, information, and analyses relevant to the proposed action from all interested individuals, Federal and State agencies, and Tribes.

DATES: We will consider comments that we receive by August 7, 2023. Comments received after close of comment period will be considered to the extent possible.

ADDRESSES: We invite you to submit comments in response to this notice. You may submit your comments through one of the methods below:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and search for docket ID NRCS–2023–0010. Follow the online instructions for submitting comments; or
- *Mail or Hand Delivery:* Alyssa Fellow, Environmental Compliance Specialist, 10 East Babcock Street, Room 443, Bozeman, MT 59715. For written comments, specify the docket ID NRCS–2023–0010.

All comments received will be posted without change and made publicly available on *www.regulation.gov.*

FOR FURTHER INFORMATION CONTACT: Alyssa Fellow; telephone: (406) 587–6712; email: *Alyssa.Fellow@usda.gov* for questions related to submitting comments; or visit the project website: *https://www.milkriverproject.com/projects/watershed/.* Individuals who require alternative means for communication should contact the U.S. Department of Agriculture (USDA) Target Center at (202) 720–2600 (voice and text telephone (TTY)) or dial 711 for Telecommunications Relay service (both voice and text telephone users can initiate this call from any telephone).

SUPPLEMENTARY INFORMATION:

Purpose and Need

The primary purpose of the proposed watershed project is to improve agricultural water management by rehabilitating and modernizing the St. Mary Canal along its existing alignment in Glacier County, Montana. Watershed planning is authorized under the Watershed Protection and Flood Prevention Act of 1954 (Pub. L. 83–566), as amended, and the Flood Control Act of 1944 (Pub. L. 78–534).

The proposed project is needed due to existing St. Mary Canal system inadequacies, as well as the risk of infrastructure failure. The current St. Mary Canal system inadequacies have reduced the water delivery reliability to users who rely on the St. Mary Canal for agricultural, municipal, residential, industrial, and recreational uses. Failure could lead to environmental damage on the Blackfeet Indian Reservation, the St. Mary River, and the North Fork Milk River.

The Milk River Joint Board of Control (MRJBOC) is the umbrella organization that works with the U.S. Bureau of Reclamation to operate and maintain the St. Mary Canal for the users that receive Milk River Project water. Milk River Project water diverted from the St. Mary River is conveyed through the St. Mary Canal to the North Fork Milk River. The Milk River Project supplies water to approximately 120,000 acres, including eight irrigation districts, the Blackfeet Indian Reservation, numerous private irrigators, several municipalities, and the Bowdoin National Wildlife Refuge.

The proposed Milk River Project will address the deteriorating state of the St. Mary Canal and associated infrastructure including the 29 mile St. Mary Canal, siphons, and concrete drops. Most of the structures have exceeded their design life and require major repairs or replacement. Aging of the St. Mary Canal system has resulted in reduced flow rates from the original design of 850 cubic feet per second (cfs) to around 600 cfs. The steel siphons are at risk of failure due to slope stability problems and leaks, and the concrete in three of the five drop structures are severely deteriorating. According to a report published by the Montana Department of Natural Resources and Conservation (DNRC), many hydraulic components of the conveyance system have an elevated risk of failure with potential damages ranging from minor to catastrophic (DNRC 2010.[1])

Agriculture is an essential part of the north-central Montana economy and agricultural production depends on the structural integrity of the St. Mary Canal and associated infrastructure. Water diverted from the St. Mary River and conveyed to the North Fork Milk River through the St. Mary Canal comprises a range of 70–95 percent of the total flow in the Milk River, as measured in Havre, MT, from May through September, depending upon whether it was a dry or average year for precipitation (DNRC 2006.[2]) Correspondingly, water conveyed through the St. Mary Canal comprises over half of the Milk River Project's water supply in an average year (Reclamation 2012.[3])

A Preliminary Investigation Feasibility Report (PIFR), completed in

[1] Montana Department of Natural Resources and Conservation (DNRC). 2010. *St. Mary Diversion and Conveyance Facilities Failure and O&M Reference Guide.* Helena, MT.

[2] DNRC. 2006. *St. Mary Diversion Facilities Data Review, Preliminary Cost Estimate, and Proposed Rehabilitation Plan.* Helena, MT.

[3] U.S. Bureau of Reclamation (Reclamation). 2012. *St. Mary River and Milk River Basins Study Summary Report.* Billings, MT.

2021, investigated and studied possible solutions to address agricultural water management for the St. Mary Canal and associated infrastructure. As a result of the information obtained during the PIFR process, the level of National Environmental Policy Act (NEPA) analysis required an EIS. Estimated federal funds required for the construction of the proposed action may exceed $25 million. The proposed action will therefore require congressional approval per the 2018 Agriculture Appropriations Act amended funding threshold. In accordance with 7 CFR 650.7(a)(2), an EIS is required for projects requiring congressional approval.

Preliminary Proposed Action and Alternatives

The objective of the EIS is to formulate and evaluate alternatives for agricultural water management along the St. Mary Canal alignment. The alternatives were preliminarily identified through the PIFR process as likely to be evaluated in the EIS, given their anticipated viability of meeting the purpose and need of the proposed watershed project. The EIS is expected to evaluate three alternatives: two action alternatives or no action alternative. The alternatives that may be considered for detailed analysis include:

Alternative 1—No Action: Taking no action would consist of activities carried out if no Federal action or funding were provided. No watershed project would be implemented, and the St. Mary Canal and associated infrastructure would not be modernized.

Alternative 2—Proposed Action: This alternative would include the following system improvement measures including: canal lining and reshaping, siphon replacement, drop structure replacement, access road improvements, wasteway turnouts, underdrain replacements, and slide mitigation. Options for each measure would be evaluated.

Alternative 3—Proposed Action: This alternative would include the following system improvement measures including: canal reshaping (no lining), siphon replacement, drop structure replacement, access road improvements, wasteway turnouts, underdrain replacements, and slide mitigation. Options for each measure would be evaluated.

Summary of Expected Impacts

Initial cost estimates of the proposed actions have determined that the Federal contribution to construction will exceed $25 million, requiring congressional approval. Per 7 CFR 650.7, an EIS is required when projects require congressional action. The NRCS Montana State Conservationist, has determined that the preparation of an EIS is required for this watershed project. An EIS will be prepared as required by section 102(2)(C) of NEPA; the Council on Environmental Quality Regulations (40 CFR parts 1500–1508); and NRCS regulations that implement NEPA in 7 CFR parts 622 and 650. In addition, the EIS will be prepared in accordance with the Principles, Requirements, and Guidelines for Water and Land Related Resources Implementation Studies (PR&Gs, USDA NRCS 2017).[4] NEPA compliance will cover the analysis of various resource concerns listed below, while compliance with the PR&Gs will include additional assessments such as analyzing effects to ecosystem services and a National Economic Efficiency Analysis.

Environmental resources in the Milk River Project area consist of the natural and human-made environment. Resource issues identified through the PIFR process included water delivery efficiency issues, soil aggregate instability, soil organism habitat loss or degradation, surface water quality, and surface water quantity. Any additional resource issues will be identified and addressed in the EIS and potential for impacts will be analyzed for Cultural Resources, Economics, Soils, Land Use, Environmental Justice, Endangered and Threatened Species, Wildlife, Hydrology, Wetlands, Vegetation, and Climate Change.

Anticipated Permits and Authorizations

The following permits and authorizations are anticipated to be required:

- *Endangered Species Act (ESA) Consultation.* Consultation with the U.S. Fish and Wildlife Service will be conducted as required by the Endangered Species Act of 1973.
- *Tribal Consultation.* Consultation with the Blackfeet Tribe is required as the Canal lies completely within the Blackfeet Indian Reservation in Glacier County, MT. Required permits will be determined through consultation.
- *Section 106 Consultation.* Consultation with the Tribal Historic Preservation Office will be conducted as required by the National Historic Preservation Act (NHPA) of 1966.
- *Clean Water Act (CWA) Section 404 Permit.* Implementation of the proposed Federal action would require a CWA section 404 permit from the U.S. Army Corps of Engineers. Permitting with the U.S. Army Corps of Engineers regarding potential impacts will be finalized prior to final design and construction.
- *Ordinance 117 Permit.* Implementation of the proposed Federal action would require an Aquatic Lands Protection Ordinance 117 permit from the Blackfeet Nation.

Schedule of Decision-Making Process

A Draft EIS (DEIS) will be prepared and circulated for review and comment by agencies, Tribes, consulting parties, and the public for at least 45 days as required by 40 CFR 1503.1, 1502.20, 1506.11, and 1502.17, and 7 CFR 650.13. The DEIS is anticipated to be published in the **Federal Register** approximately 6 months after publication of this NOI. A Final EIS is anticipated to be published within 6 months of completion of the public comment period for the DEIS.

NRCS will decide whether to implement one of the alternatives as evaluated in the EIS. A Record of Decision will be completed after the required 30-day waiting period and will be publicly available. The responsible Federal official and decision maker for the NRCS is the Montana NRCS State Conservationist.

Public Scoping Process

Public scoping meetings will be held in Browning, Havre, and Malta to determine the scope of the analysis presented in the EIS. Meetings are scheduled to occur in the summer of 2023 and will be held at selected public venues in each location. Exact meeting locations and times will be determined closer to the dates of the events. Public notices will be placed in local newspapers and on the NRCS, MRJBOC, and the U.S. Bureau of Reclamation websites. Additionally, a letter providing details on the public meetings and the scoping comment and objection processes will be sent to Federal and state agencies, Tribes, local landowners, and interested parties.

Public scoping meetings provide an opportunity to review and evaluate the Milk River Project alternatives, express concern or support, and gain further information regarding the Milk River Project. Comments received, including the names and addresses of those who comment, will be part of the public record. Comments submitted anonymously will be accepted and considered.

[4] USDA NRCS. (2017). *Guidance for Conducting Analyses Under the Principles, Requirements, and Guidelines for Water and Land Related Resources Implementation Studies and Federal Water Resource Investments. https://www.usda.gov/directives/dm-9500-013.*

Identification of Potential Alternatives, Information, and Analyses

NRCS, MRJBOC, and the U.S. Bureau of Reclamation invite agencies, Tribes, and individuals that have special expertise, legal jurisdiction, or interest, to provide comments concerning the scope of the analysis and identification of potential alternatives, information, and analyses relevant to the Proposed Action in writing.

NRCS, MRJBOC, and the U.S. Bureau of Reclamation will use the scoping process to help fulfill the public involvement process under section 106 of the NHPA (54 U.S.C. 306108), as provided in 36 CFR 800.2(d)(3). Information about historic and cultural resources within the area potentially affected by the proposed action and alternatives will assist NRCS, MRJBOC, and the U.S. Bureau of Reclamation in identifying and evaluating impacts to resources in the context of both NEPA and section 106.

Native American Tribal consultations will be conducted in accordance with Tribal policy, and Tribal concerns will be given due consideration. In addition, Federal, State, and local agencies, along with other stakeholders that may be interested or affected by NRCS, MRJBOC, or the U.S. Bureau of Reclamation decisions on this Milk River Project, are invited to participate in the scoping process. Eligible entities may request or be requested by the NRCS to participate as a cooperating or participating agency.

Authorities

This document is published pursuant to the NEPA regulations regarding publication of a NOI to issue an EIS (40 CFR 1501.9(d)). This EIS will be prepared to evaluate potential environmental impacts as required by section 102(2)(C) of NEPA; the Council on Environmental Quality regulations (40 CFR parts 1500–1508); and NRCS regulations that implement NEPA in 7 CFR part 650. Watershed planning is authorized under the Watershed Protection and Flood Prevention Act of 1954, as amended, (Pub. L. 83–566) and the Flood Control Act of 1944 (Pub. L. 78–534).

Federal Assistance Program

The title and number of the Federal Assistance Programs as found in the Assistance Listing,[5] to which this document applies is 10.904, Watershed Protection and Flood Prevention.

[5] See *https://sam.gov/content/assistance-listings.*

Executive Order 12372

Executive Order 12372, ''Intergovernmental Review of Federal Programs,'' requires consultation with State and local officials that would be directly affected by proposed Federal financial assistance. The objectives of Executive Order are to foster an intergovernmental partnership and a strengthened federalism, by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance and to direct Federal development. This Watershed Plan is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

USDA Non-Discrimination Policy

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family or parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Individuals who require alternative means of communication for program information (for example, braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA TARGET Center at (202) 720–2600 (voice and text telephone) or dial 711 for Telecommunications Relay Service (both voice and text telephone users can initiate this call from any phone). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at: *https://www.usda.gov/oascr/how-to-file-a-program-discrimination-complaint* and at any USDA office or write a letter addressed to USDA and provide in the letter all the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by mail to: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410 or email: *OAC@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Kyle Tackett,

Acting Montana State Conservationist, Natural Resources Conservation Service.

BILLING CODE 3410–16–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Minnesota Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: Commission on Civil Rights.

ACTION: Notice of public meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act, that the Minnesota Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a public meeting via Zoom at 12:30 p.m. CT on Thursday, July 27, 2023, to discuss the Committee's draft project proposal on housing affordability in the state.

DATES: Thursday, July 27, 2023, from 12:30 p.m.–1:30 p.m. Central Time.

ADDRESSES: The meeting will be held via Zoom.

Registration Link (Audio/Visual): https://www.zoomgov.com/j/1612943387.

Join by Phone (Audio Only): (833) 435–1820 USA Toll-Free; Meeting ID: 161 294 3387.

FOR FURTHER INFORMATION CONTACT: David Barreras, Designated Federal Officer, at *dbarreras@usccr.gov* or (202) 656–8937.

SUPPLEMENTARY INFORMATION: This committee meeting is available to the public through the registration link above. Any interested member of the public may listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Closed captioning

will be available for individuals who are deaf, hard of hearing, or who have certain cognitive or learning impairments. To request additional accommodations, please email Liliana Schiller, Support Services Specialist, at *lschiller@usccr.gov* at least 10 business days prior to the meeting.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to David Barreras at *dbarreras@usccr.gov.* Persons who desire additional information may contact the Regional Programs Coordination Unit at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meetings will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Minnesota Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at *lschiller@usccr.gov.*

Agenda

I. Welcome & Roll Call
II. Discussion: Housing Affordability in Minnesota
III. Public Comment
IV. Next Steps
V. Adjournment

Dated: June 14, 2023.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

BILLING CODE P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Pobeda Airlines, 108811, Russian Federation, Moscow, p. Moskovskiy, Kievskoe shosse, 22nd km, 4/1. Moscow, Russia; Order Renewing Temporary Denial of Export Privileges

Pursuant to Section 766.24 of the Export Administration Regulations, 15 CFR Parts 730–774 (2021) (''EAR'' or ''the Regulations''),[1] I hereby grant the request of the Office of Export Enforcement (''OEE'') to renew the temporary denial order (''TDO'') issued in this matter on December 20, 2022. I find that renewal of this order is necessary in the public interest to prevent an imminent violation of the Regulations.

I. Procedural History

On June 24, 2022, I signed an order denying the export privileges of Pobeda Airlines (''Pobeda'') for a period of 180 days on the ground that issuance of the order was necessary in the public interest to prevent an imminent violation of the Regulations. The order was issued *ex parte* pursuant to Section 766.24(a) of the Regulations and was effective upon issuance.[2] This temporary denial order was subsequently renewed in accordance with Section 766.24(d) of the Regulations.[3] The renewal order issued on December 20, 2022 and was effective upon issuance.[4]

On May 18, 2023, BIS, through OEE, submitted a written request for renewal of the TDO that issued on December 20, 2022. The written request was made more than 20 days before the TDO's scheduled expiration. A copy of the renewal request was sent to Pobeda in accordance with Sections 766.5 and 766.24(d) of the Regulations. No opposition to the renewal of the TDO has been received.

II. Renewal of the TDO

A. Legal Standard

Pursuant to Section 766.24, BIS may issue an order temporarily denying a respondent's export privileges upon a showing that the order is necessary in the public interest to prevent an ''imminent violation'' of the Regulations, or any order, license or authorization issued thereunder. 15 CFR 766.24(b)(1) and 766.24(d). ''A violation may be 'imminent' either in time or degree of likelihood.'' 15 CFR 766.24(b)(3). BIS may show ''either that a violation is about to occur, or that the general circumstances of the matter under investigation or case under criminal or administrative charges demonstrate a likelihood of future violations.'' *Id.* As to the likelihood of future violations, BIS may show that the violation under investigation or charge ''is significant, deliberate, covert and/or likely to occur again, rather than technical or negligent[.]'' *Id.* A ''lack of information establishing the precise time a violation may occur does not preclude a finding that a violation is imminent, so long as there is sufficient reason to believe the likelihood of a violation.'' *Id.*

B. The TDO and BIS's Request for Renewal

The U.S. Commerce Department, through BIS, responded to the Russian Federation's (''Russia's'') further invasion of Ukraine by implementing a sweeping series of stringent export controls that severely restrict Russia's access to technologies and other items that it needs to sustain its aggressive military capabilities. These controls primarily target Russia's defense, aerospace, and maritime sectors and are intended to cut off Russia's access to vital technological inputs, atrophy key sectors of its industrial base, and undercut Russia's strategic ambitions to exert influence on the world stage. Effective February 24, 2022, BIS imposed expansive controls on aviation-related (*e.g.,* Commerce Control List Categories 7 and 9) items to Russia, including a license requirement for the export, reexport or transfer (in-country) to Russia of any aircraft or aircraft parts specified in Export Control Classification Number (ECCN) 9A991 (Section 746.8(a)(1) of the EAR).[5] BIS will review any export or reexport license applications for such items under a policy of denial. *See* Section 746.8(b).

Effective March 2, 2022, BIS excluded any aircraft registered in, owned, or controlled by, or under charter or lease by Russia or a national of Russia from being eligible for license exception Aircraft, Vessels, and Spacecraft (AVS) (Section 740.15 of the EAR), and as part of the same rule, imposed a license requirement for the export, reexport, or transfer (in-country) of all items

[1] On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which includes the Export Control Reform Act of 2018, 50 U.S.C. 4801–4852 (''ECRA''). While Section 1766 of ECRA repeals the provisions of the Export Administration Act, 50 U.S.C. App. 2401 *et seq.* (''EAA''), (except for three sections which are inapplicable here), Section 1768 of ECRA provides, in pertinent part, that all orders, rules, regulations, and other forms of administrative action that were made or issued under the EAA, including as continued in effect pursuant to to the International Emergency Economic Powers Act, 50 U.S.C. 1701 *et seq.* (''IEEPA''), and were in effect as of ECRA's date of enactment (August 13, 2018), shall continue in effect according to their terms until modified, superseded, set aside, or revoked through action undertaken pursuant to the authority provided under ECRA. Moreover, Section 1761(a)(5) of ECRA authorizes the issuance of temporary denial orders. 50 U.S.C. 4820(a)(5).

[2] The TDO was published in the **Federal Register** on June 29, 2022 (87 FR 38707).

[3] Section 766.24(d) provides that BIS may seek renewal of a temporary denial order for additional 180-day renewal periods, if it believes that renewal is necessary in the public interest to prevent an imminent violation. Renewal requests are to be made in writing no later than 20 days before the scheduled expiration date of a temporary denial order.

[4] The December 20, 2022 renewal order was published in the **Federal Register** on December 23, 2022 (87 FR 78925).

[5] 87 FR 12226 (Mar. 3, 2022).

controlled under CCL Categories 3 through 9 to Belarus.[6] Accordingly, any U.S.-origin aircraft or foreign aircraft that includes more than 25% controlled U.S.-origin content, and that is registered in, owned, or controlled by, or under charter or lease by Russia or a national of Russia, is subject to a license requirement before it can travel to Russia or Belarus.

OEE's request for renewal is based upon the facts underlying the issuance of the initial TDO and the evidence developed over the course of this investigation, which indicate a blatant disregard for U.S. export controls, as well as the TDO. Specifically, the initial TDO, issued on June 24, 2022, was based on evidence that Pobeda engaged in conduct prohibited by the Regulations by operating multiple aircraft subject to the EAR and classified under ECCN 9A991.b on flights into Russia after March 2, 2022 from destinations including, but not limited to, Antalya, Turkey, Gazipasa, Turkey, and Istanbul, Turkey, without the required BIS authorization.[7]

As discussed in the December 20, 2022 renewal order, evidence presented by BIS indicated that, after the renewal order issued, Pobeda continued to operate aircraft subject to the EAR and classified under ECCN 9A991.b on flights into Russia, in violation of the Regulations and the TDO itself.[8] Specifically, the December 20, 2022 renewal order detailed Siberian's continued operation of aircraft subject to the EAR, including, but not limited to, on flights into and between Belarus and Russia.[9]

In its May 18, 2023 request for renewal of the TDO, BIS has submitted evidence that Pobeda continues to operate in violation of the December 20, 2022 TDO and/or the Regulations by operating aircraft subject to the EAR and classified under ECCN 9A991.b. Specifically, BIS's evidence and related investigation indicates that after the issuance of the TDO, Pobeda continued to fly aircraft into Russia in violation of the EAR, including flights from Gyumri, Armenia, Antalya, Turkey, and Dubai, United Arab Emirates, as well as between Russia and Belarus. Information about those flights includes, but is not limited to, the following:

Tail No.	Serial No.	Aircraft type	Departure/arrival cities	Dates
RA–73242	41227	737–8LJ (B738)	Istanbul, TR/Moscow, RU	May 24, 2023.

III. Findings

Under the applicable standard set forth in Section 766.24 of the Regulations and my review of the entire record, I find that the evidence presented by BIS convincingly demonstrates that Pobeda has acted in violation of the Regulations and the TDO; that such violations have been significant, deliberate and covert; and that given the foregoing and the nature of the matters under investigation, there is a likelihood of imminent violations. Therefore, renewal of the TDO is necessary in the public interest to prevent imminent violation of the Regulations and to give notice to companies and individuals in the United States and abroad that they should avoid dealing with Pobeda, in connection with export and reexport transactions involving items subject to the Regulations and in connection with any other activity subject to the Regulations.

IV. Order

It is therefore ordered:

First, Pobeda Airlines, 108811, Russian Federation, Moscow, p. Moskovskiy, Kievskoe shosse, 22nd km, 4/1. Moscow, Russia, when acting for or on their behalf, any successors or assigns, agents, or employees may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the EAR, or in any other activity subject to the EAR including, but not limited to:

A. Applying for, obtaining, or using any license (except directly related to safety of flight), license exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations, or engaging in any other activity subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations; or

[6] 87 FR 13048 (Mar. 8, 2022).

[7] Publicly available flight tracking information shows, for example, that on March 6, 2022, serial number (''SN'') 64862 flew from Antalya, Turkey to Moscow, Russia. On March 7, 2022, SN 64863 flew from Gazipasa, Turkey to Moscow, Russia, and, on March 6, 2022, SN 64864 flew from Istanbul, Turkey to Mineralnye Vody, Russia.

[8] Engaging in conduct prohibited by a denial order violates the Regulations. 15 CFR 764.1(a) and (k).

[9] Publicly available flight tracking information shows, for example, the following flights: (1) on November 26, 2022, SN 61793 flew from Minsk, Belarus to Moscow, Russia; (2) on December 3, 2023, SN 41238 flew from Minsk, Belarus to Moscow, Russia; and (3) on November 24, 2022, SN 64866 flew from Minsk, Belarus to Moscow, Russia.

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the EAR, or from any other activity subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations.

Second, that no person may, directly or indirectly, do any of the following:

A. Export, reexport, or transfer (in-country) to or on behalf of Pobeda any item subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by Pobeda of the ownership, possession, or control of any item subject to the EAR that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby Pobeda acquires or attempts to acquire such ownership, possession or control except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from Pobeda of any item subject to the EAR that has been exported from the United States except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations;

D. Obtain from Pobeda in the United States any item subject to the EAR with knowledge or reason to know that the item will be, or is intended to be, exported from the United States except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations; or

E. Engage in any transaction to service any item subject to the EAR that has been or will be exported from the United States and which is owned, possessed or controlled by Pobeda, or service any item, of whatever origin, that is owned, possessed or controlled by Pobeda if such service involves the use of any item subject to the EAR that has been or will be exported from the United States except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations. For purposes of this paragraph, servicing means installation, maintenance, repair, modification, or testing.

Third, that, after notice and opportunity for comment as provided in section 766.23 of the EAR, any other person, firm, corporation, or business organization related to Pobeda by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order.

In accordance with the provisions of Sections 766.24(e) of the EAR, Pobeda may, at any time, appeal this Order by filing a full written statement in support of the appeal with the Office of the Administrative Law Judge, U.S. Coast Guard ALJ Docketing Center, 40 South Gay Street, Baltimore, Maryland 21202–4022.

In accordance with the provisions of Section 766.24(d) of the EAR, BIS may seek renewal of this Order by filing a written request not later than 20 days before the expiration date. A renewal request may be opposed by Pobeda as provided in Section 766.24(d), by filing a written submission with the Assistant Secretary of Commerce for Export Enforcement, which must be received not later than seven days before the expiration date of the Order.

A copy of this Order shall be provided to Pobeda, and shall be published in the **Federal Register**.

This Order is effective immediately and shall remain in effect for 180 days.

Dated: June 15, 2023.

Matthew S. Axelrod,

Assistant Secretary of Commerce for Export Enforcement.

[FR Doc. 2023–13161 Filed 6–20–23; 8:45 am]

BILLING CODE 3510–DT–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Nordwind Airlines, Leningradskaya Str., Building 25, Office 27. 28, Moscow Region, Khimki City, 141402, Russia; Pegas Touristik, a/k/a Pegas Touristik OOO, 5 Building 1 Volokolamsk Highway, Moscow, Russian Federation, 125080, and Yenigöl, Nergiz Sk. No:94/1, Muratpaşa/Antalya, Türkiye, 07230; Order Renewing Temporary Denial of Export Privileges

Pursuant to Section 766.24 of the Export Administration Regulations, 15 CFR parts 730–774 (2021) (''EAR'' or ''the Regulations''),[1] I hereby grant the request of the Office of Export Enforcement (''OEE'') to renew the temporary denial order (''TDO'') issued in this matter on December 20, 2022. I find that renewal of this order, along with the addition of Pegas Touristik a/k/a Pegas Touristik OOO (''Pegas Touristik'') as a related person, is necessary in the public interest to prevent an imminent violation of the Regulations.

I. Procedural History

On June 24, 2022, I signed an order denying the export privileges of Nordwind Airlines (''Nordwind'') for a period of 180 days on the ground that issuance of the order was necessary in the public interest to prevent an imminent violation of the Regulations. The order was issued *ex parte* pursuant to Section 766.24(a) of the Regulations and was effective upon issuance.[2] This temporary denial order was subsequently renewed in accordance with Section 766.24(d) of the Regulations.[3] The renewal order issued on December 20, 2022 and was effective upon issuance.[4]

On May 18, 2023, BIS, through OEE, submitted a written request for renewal of the Nordwind TDO that issued on December 20, 2022. The written request was made more than 20 days before the TDO's scheduled expiration. A copy of the renewal request was sent to Nordwind in accordance with Sections 766.5 and 766.24(d) of the Regulations. No opposition to the renewal of the TDO has been received. OEE submitted a separate written request that Pegas Touristik be added to the TDO as a related person to Nordwind in accordance with Section 766.23 of the Regulations.

[1] On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which includes the Export Control Reform Act of 2018, 50 U.S.C. 4801–4852 (''ECRA''). While Section 1766 of ECRA repeals the provisions of the Export Administration Act, 50 U.S.C. App. 2401 *et seq.* (''EAA''), (except for three sections which are inapplicable here), Section 1768 of ECRA provides, in pertinent part, that all orders, rules, regulations, and other forms of administrative action that were made or issued under the EAA, including as continued in effect pursuant to the International Emergency Economic Powers Act, 50 U.S.C. 1701 *et seq.* (''IEEPA''), and were in effect as of ECRA's date of enactment (August 13, 2018), shall continue in effect according to their terms until modified, superseded, set aside, or revoked through action undertaken pursuant to the authority provided under ECRA. Moreover, Section 1761(a)(5) of ECRA authorizes the issuance of temporary denial orders. 50 U.S.C. 4820(a)(5).

[2] The TDO was published in the **Federal Register** on June 29, 2022 (87 FR 38704).

[3] Section 766.24(d) provides that BIS may seek renewal of a temporary denial order for additional 180-day renewal periods, if it believes that renewal is necessary in the public interest to prevent an imminent violation. Renewal requests are to be made in writing no later than 20 days before the scheduled expiration date of a temporary denial order. Renewal requests may include discussion of any additional or changed circumstances, and may seek appropriate modifications to the order, including the addition of parties as respondents or related persons.

[4] The December 20, 2022 renewal order was published in the **Federal Register** on December 27, 2022 (87 FR 79725).

II. Renewal of the TDO

A. Legal Standard

Pursuant to Section 766.24, BIS may issue an order temporarily denying a respondent's export privileges upon a showing that the order is necessary in the public interest to prevent an ''imminent violation'' of the Regulations, or any order, license or authorization issued thereunder. 15 CFR 766.24(b)(1) and 766.24(d). ''A violation may be 'imminent' either in time or degree of likelihood.'' 15 CFR 766.24(b)(3). BIS may show ''either that a violation is about to occur, or that the general circumstances of the matter under investigation or case under criminal or administrative charges demonstrate a likelihood of future violations.'' *Id.* As to the likelihood of future violations, BIS may show that the violation under investigation or charge ''is significant, deliberate, covert and/or likely to occur again, rather than technical or negligent[.]'' *Id.* A ''lack of information establishing the precise time a violation may occur does not preclude a finding that a violation is imminent, so long as there is sufficient reason to believe the likelihood of a violation.'' *Id.*

Pursuant to Sections 766.23 and 766.24, a TDO may also be made applicable to other persons if BIS has reason to believe that they are related to a respondent and that applying the order to them is necessary to prevent its evasion. 15 CFR 766.23(a)–(b) and 766.24(c). A ''related person'' is a person, either at the time the TDO's issuance or thereafter, who is related to a respondent ''by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business.'' 15 CFR 766.23(a). Related persons may be added to a TDO on an *ex-parte* basis in accordance with Section 766.23(b) of the Regulations. 15 CFR 766.23(b).

B. The TDO and BIS's Request for Renewal

The U.S. Commerce Department, through BIS, responded to the Russian Federation's (''Russia's'') further invasion of Ukraine by implementing a sweeping series of stringent export controls that severely restrict Russia's access to technologies and other items that it needs to sustain its aggressive military capabilities. These controls primarily target Russia's defense, aerospace, and maritime sectors and are intended to cut off Russia's access to vital technological inputs, atrophy key sectors of its industrial base, and undercut Russia's strategic ambitions to exert influence on the world stage. Effective February 24, 2022, BIS imposed expansive controls on aviation-related (*e.g.,* Commerce Control List Categories 7 and 9) items to Russia, including a license requirement for the export, reexport or transfer (in-country) to Russia of any aircraft or aircraft parts specified in Export Control Classification Number (ECCN) 9A991 (Section 746.8(a)(1) of the EAR).[5] BIS will review any export or reexport license applications for such items under a policy of denial. *See* Section 746.8(b). Effective March 2, 2022, BIS excluded any aircraft registered in, owned, or controlled by, or under charter or lease by Russia or a national of Russia from being eligible for license exception Aircraft, Vessels, and Spacecraft (AVS) (Section 740.15 of the EAR).[6] Accordingly, any U.S.-origin aircraft or foreign aircraft that includes more than 25% controlled U.S.-origin content, and that is registered in, owned, or controlled by, or under charter or lease by Russia or a national of Russia, is subject to a license requirement before it can travel to Russia.

OEE's request for renewal is based upon the facts underlying the issuance of the initial TDO, the renewal order subsequently issued in this matter on December 20, 2022, and the evidence developed over the course of this investigation, which indicate a blatant disregard for U.S. export controls, as well as the TDO. Specifically, the initial TDO, issued on June 24, 2022, was based on evidence that Nordwind engaged in conduct prohibited by the Regulations by operating multiple aircraft subject to the EAR and classified under ECCN 9A991.b on flights into Russia after March 2, 2022 from destinations including, but not limited to, Yerevan, Armenia, Istanbul, Turkey, and Sharm el-Sheikh, Egypt, without the required BIS authorization.[7]

As discussed in the December 20, 2022 renewal order, evidence presented by BIS indicated that, after the initial order issued, Nordwind continued to operate aircraft subject to the EAR and classified under ECCN 9A991.b on flights both into and out of Russia, in violation of the Regulations and the TDO itself.[8] Specifically, the December 20, 2022 renewal order detailed Nordwind's continued operation of aircraft subject to the EAR, including, but not limited to, on flights into and out of Russia from/to Sharm el-Sheikh, Egypt, Hurghada, Egypt, and Bokhtar, Tajikistan.[9]

In its May 18, 2023 request for renewal of the TDO, BIS has submitted evidence that Nordwind continues to operate in violation of the December 20, 2022 TDO and/or the Regulations by operating aircraft subject to the EAR and classified under ECCN 9A991.b. Specifically, BIS's evidence and related investigation demonstrates that Nordwind has continued to operate aircraft subject to the EAR, including, but not limited to, on flights into and out of Russia from/to Bokhtar, Tajikistan, Tehran, Iran, and Osh, Kyrgyzstan. Information about those flights includes, but is not limited to, the following:

Tail No.	Serial No.	Aircraft type	Departure/arrival cities	Dates
RA–73313	35700	737–82R (B738)	Bokhtar, TJ/Orsk, RU	June 2, 2023.
RA–73313	35700	737–82R (B738)	Bokhtar, TJ/Orsk, RU	June 3, 2023.
RA–73313	35700	737–82R (B738)	Bokhtar, TJ/Orsk, RU	June 4, 2023.
RA–73313	35700	737–82R (B738)	Bokhtar, TJ/Orsk, RU	June 11, 2023.
RA–73317	40874	737–82R (B738)	Tehran, IR/Moscow, RU	May 16, 2023.
RA–73317	40874	737–82R (B738)	Dushanbe, TJ/UFA, RU	June 8, 2023.

[5] 87 FR 12226 (Mar. 3, 2022). Additionally, BIS published a final rule effective April 8, 2022, which imposed licensing requirements on items controlled on the Commerce Control List (''CCL'') under Categories 0–2 that are destined for Russia or Belarus. Accordingly, now all CCL items require export, reexport, and transfer (in-country) licenses if destined for or within Russia or Belarus. 87 FR 22130 (Apr. 14, 2022).

[6] 87 FR 13048 (Mar. 8, 2022).

[7] Publicly available flight tracking information shows, for example, that on March 7, 2022, serial number (''SN'') 40874 flew from Yerevan, Armenia to Kazan, Russia; SN 40233 flew from Istanbul, Turkey to Kazan, Russia; and SN 40236 flew from Sharm el-Sheikh, Egypt to Moscow, Russia.

[8] Engaging in conduct prohibited by a denial order violates the Regulations. 15 CFR 764.2(a) and (k).

[9] Publicly available flight tracking information shows that on December 3, 2022, SN 42059 flew from Sharm el-Sheikh, Egypt to Orenberg, Russia and on December 2, 2022, SN 40874 flew from Hurghada, Egypt to Moscow, Russia. In addition, on November 29, 2022, SN 35700 flew from Bokhtar, Tajikistan to Moscow, Russia.

RA–73314	42233	737–8KN (B738)	Bokhtar, TJ/Orsk, RU	June 12, 2023.

C. Pegas Touristik as a Related Person

OEE's investigation and open source documents establish that Russia-based Pegas Touristik is related to Nordwind ''by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business.'' Multiple press reports, including from Russian outlets, identify Pegas Touristik, a tour company headquartered in Moscow, as Nordwind's owner.[10] A May 2023 Russian corporate profile for Pegas Touristik lists as its founder an individual who is also reported to be Nordwind's founder (''Person A''). Additionally, a February 3, 2022 article in Kommersant, a national distributed daily newspaper in Russia, states in part that ''in addition to [controlling] NordWind and Pegas Fly, Person A is also the founder of the tour operator Pegas Touristik.'' The same article also indicates that the general director of Pegas Touristik is the wife of Person A. OEE's on-going investigation and corporate registration documents reveal additional overlap in personnel, addresses, and management with Pegas Touristik.

Moreover, OEE has reason to believe that Pegas Touristik has made additional efforts to evade export controls on Russia in part by entering into charter agreements with a Turkish airline that started shortly after the imposition of stringent Russia-related export controls described, *supra,* for international flights into Russia on U.S-origin aircraft without the required BIS authorization. As noted, *supra,* aircraft registered in, owned, or controlled by, *or under charter* or lease by Russia or a national of Russia are ineligible for license exception AVS.[11]

III. Findings

Under the applicable standard set forth in Section 766.24 of the Regulations and my review of the entire record, I find that the evidence presented by BIS convincingly demonstrates that Nordwind has acted in violation of the Regulations and the TDO; that such violations have been significant, deliberate and covert; and that given the foregoing and the nature of the matters under investigation, there is a likelihood of imminent violations. Therefore, renewal of the TDO is necessary in the public interest to prevent imminent violation of the Regulations and to give notice to companies and individuals in the United States and abroad that they should avoid dealing with Nordwind, in connection with export and reexport transactions involving items subject to the Regulations and in connection with any other activity subject to the Regulations. Additionally, I find that Pegas Touristik meets the criteria set out in Section 766.23 and should be added to the TDO as a related person.

IV. Order

It is therefore ordered:

First, Nordwind Airlines, with an address at Leningradskaya str., building 25, office 27. 28, Moscow region, Khimki city, 141402, Russia; Pegas Touristik a/k/a Pegas Touristik OOO, with addresses at 5 building 1 Volokolamsk Highway, Moscow, Russian Federation, 125080, and Yenigöl, Nergiz Sk. No:94/1, Muratpaşa/ Antalya, Türkiye, 07230, when acting for or on their behalf, any successors or assigns, agents, or employees (each a ''Denied Person'' and collectively the ''Denied Persons'') may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the EAR, or in any other activity subject to the EAR including, but not limited to:

A. Applying for, obtaining, or using any license (except directly related to safety of flight), license exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations, or engaging in any other activity subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the EAR, or from any other activity subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations.

Second, that no person may, directly or indirectly, do any of the following:

A. Export, reexport, or transfer (in-country) to or on behalf of a Denied Person any item subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by a Denied Person of the ownership, possession, or control of any item subject to the EAR that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby a Denied Person acquires or attempts to acquire such ownership, possession or control except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from a Denied Person of any item subject to the EAR that has been exported from the United States except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations;

D. Obtain from a Denied Person in the United States any item subject to the EAR with knowledge or reason to know that the item will be, or is intended to be, exported from the United States except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations; or

E. Engage in any transaction to service any item subject to the EAR that has been or will be exported from the United States and which is owned, possessed or controlled by a Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by a Denied Person if such service involves the use of any item subject to the EAR that has been or will be exported from the United States

[10] *https://seatguru.com/airlines/Nordwind_Airlines/information.php.*

[11] 15 CFR 746.8(c)(5).

except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations. For purposes of this paragraph, servicing means installation, maintenance, repair, modification, or testing.

Third, that, after notice and opportunity for comment as provided in section 766.23 of the EAR, any other person, firm, corporation, or business organization related to Nordwind by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order.

In accordance with the provisions of Sections 766.24(e) of the EAR, Nordwind may, at any time, appeal this Order by filing a full written statement in support of the appeal with the Office of the Administrative Law Judge, U.S. Coast Guard ALJ Docketing Center, 40 South Gay Street, Baltimore, Maryland 21202–4022.

In accordance with the provisions of Sections 766.23(c)(2) and 766.24(e)(3) of the EAR, Pegas Touristik may, at any time, appeal their inclusion as a related person by filing a full written statement in support of the appeal with the Office of the Administrative Law Judge, U.S. Coast Guard ALJ Docketing Center, 40 South Gay Street, Baltimore, Maryland 21202–4022.

In accordance with the provisions of Section 766.24(d) of the EAR, BIS may seek renewal of this Order by filing a written request not later than 20 days before the expiration date. A renewal request may be opposed by Nordwind as provided in Section 766.24(d), by filing a written submission with the Assistant Secretary of Commerce for Export Enforcement, which must be received not later than seven days before the expiration date of the Order.

A copy of this Order shall be provided to Nordwind and Pegas Touristik and shall be published in the **Federal Register**.

This Order is effective immediately and shall remain in effect for 180 days.

Dated: June 15, 2023.

Matthew S. Axelrod,

Assistant Secretary of Commerce for Export Enforcement.

BILLING CODE 3510–DT–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Siberian Airlines d/b/a S7 Airlines, 633104, Novosibirskaya obl., g. Ob, prospekt Mozzherina, d. 10 ofis 201; Order Renewing Temporary Denial of Export Privileges

Pursuant to Section 766.24 of the Export Administration Regulations, 15 CFR parts 730–774 (2021) (''EAR'' or ''the Regulations''),[1] I hereby grant the request of the Office of Export Enforcement (''OEE'') to renew the temporary denial order (''TDO'') issued in this matter on December 20, 2022. I find that renewal of this order is necessary in the public interest to prevent an imminent violation of the Regulations.

I. Procedural History

On June 24, 2022, I signed an order denying the export privileges of Siberian Airlines d/b/a S7 Airlines (''Siberian'') for a period of 180 days on the ground that issuance of the order was necessary in the public interest to prevent an imminent violation of the Regulations. The order was issued *ex parte* pursuant to Section 766.24(a) of the Regulations and was effective upon issuance.[2] This temporary denial order was subsequently renewed in accordance with Section 766.24(d) of the Regulations.[3] The renewal order issued on December 20, 2022, and was effective upon issuance.[4]

On May 18, 2023, BIS, through OEE, submitted a written request for renewal of the TDO that issued on December 20, 2022. The written request was made more than 20 days before the TDO's scheduled expiration. A copy of the renewal request was sent to Siberian in accordance with Sections 766.5 and 766.24(d) of the Regulations. No opposition to the renewal of the TDO has been received.

II. Renewal of the TDO

A. Legal Standard

Pursuant to Section 766.24, BIS may issue an order temporarily denying a respondent's export privileges upon a showing that the order is necessary in the public interest to prevent an ''imminent violation'' of the Regulations, or any order, license or authorization issued thereunder. 15 CFR 766.24(b)(1) and 766.24(d). ''A violation may be 'imminent' either in time or degree of likelihood.'' 15 CFR 766.24(b)(3). BIS may show ''either that a violation is about to occur, or that the general circumstances of the matter under investigation or case under criminal or administrative charges demonstrate a likelihood of future violations.'' *Id.* As to the likelihood of future violations, BIS may show that the violation under investigation or charge ''is significant, deliberate, covert and/or likely to occur again, rather than technical or negligent[.]'' *Id.* A ''lack of information establishing the precise time a violation may occur does not preclude a finding that a violation is imminent, so long as there is sufficient reason to believe the likelihood of a violation.'' *Id.*

B. The TDO and BIS's Request for Renewal

The U.S. Commerce Department, through BIS, responded to the Russian Federation's (''Russia's'') further invasion of Ukraine by implementing a sweeping series of stringent export controls that severely restrict Russia's access to technologies and other items that it needs to sustain its aggressive military capabilities. These controls primarily target Russia's defense, aerospace, and maritime sectors and are intended to cut off Russia's access to vital technological inputs, atrophy key sectors of its industrial base, and undercut Russia's strategic ambitions to exert influence on the world stage. Effective February 24, 2022, BIS imposed expansive controls on aviation-related (*e.g.,* Commerce Control List Categories 7 and 9) items to Russia, including a license requirement for the export, reexport or transfer (in-country)

[1] On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which includes the Export Control Reform Act of 2018, 50 U.S.C. 4801–4852 (''ECRA''). While Section 1766 of ECRA repeals the provisions of the Export Administration Act, 50 U.S.C. App. 2401 *et seq.* (''EAA''), (except for three sections which are inapplicable here), Section 1768 of ECRA provides, in pertinent part, that all orders, rules, regulations, and other forms of administrative action that were made or issued under the EAA, including as continued in effect pursuant to to the International Emergency Economic Powers Act, 50 U.S.C. 1701 *et seq.* (''IEEPA''), and were in effect as of ECRA's date of enactment (August 13, 2018), shall continue in effect according to their terms until modified, superseded, set aside, or revoked through action undertaken pursuant to the authority provided under ECRA. Moreover, Section 1761(a)(5) of ECRA authorizes the issuance of temporary denial orders. 50 U.S.C. 4820(a)(5).

[2] The TDO was published in the **Federal Register** on June 29, 2022 (87 FR 38709).

[3] Section 766.24(d) provides that BIS may seek renewal of a temporary denial order for additional 180-day renewal periods, if it believes that renewal is necessary in the public interest to prevent an imminent violation. Renewal requests are to be made in writing no later than 20 days before the scheduled expiration date of a temporary denial order.

[4] The December 20, 2022 renewal order was published in the **Federal Register** on December 23, 2022 (87 FR 78921).

to Russia of any aircraft or aircraft parts specified in Export Control Classification Number (ECCN) 9A991 (Section 746.8(a)(1) of the EAR).[5] BIS will review any export or reexport license applications for such items under a policy of denial. *See* Section 746.8(b). Effective March 2, 2022, BIS excluded any aircraft registered in, owned, or controlled by, or under charter or lease by Russia or a national of Russia from being eligible for license exception Aircraft, Vessels, and Spacecraft (AVS) (Section 740.15 of the EAR).[6] Accordingly, any U.S.-origin aircraft or foreign aircraft that includes more than 25% controlled U.S.-origin content, and that is registered in, owned, or controlled by, or under charter or lease by Russia or a national of Russia, is subject to a license requirement before it can travel to Russia.

OEE's request for renewal is based upon the facts underlying the issuance of the initial TDO, the renewal order subsequently issued in this matter, and evidence developed during this investigation. These facts and evidence demonstrate that Siberian continues to act in blatant disregard for U.S. export controls and the TDO. Specifically, the initial TDO, issued on June 24, 2022, was based on evidence that Siberian engaged in conduct prohibited by the Regulations by operating multiple aircraft subject to the EAR and classified under ECCN 9A991.b on flights into Russia after March 2, 2022 from destinations including, but not limited to, Atyrau, Kazakhstan, Bishkek, Kyrgyzstan, and Urgench, Uzbekistan, without the required BIS authorization.[7]

As discussed in the December 20, 2022 renewal order, evidence presented by BIS indicated that, after the renewal order issued, Siberian continued to operate aircraft subject to the EAR and classified under ECCN 9A991.b on flights into Russia in violation of the Regulations and the TDO itself.[8] Specifically, the December 20, 2022 renewal order detailed Siberian's continued operation of aircraft subject to the EAR, including, but not limited to, on flights into Russia from Bangkok, Thailand, Antalya Turkey, and Tashkent, Uzbekistan.[9]

In its May 18, 2023 request for renewal of the TDO, BIS has submitted evidence that Siberian continues to operate in violation of the December 20, 2022 TDO and/or the Regulations by operating aircraft subject to the EAR and classified under ECCN 9A991.b into Russia. Specifically, BIS's evidence and related investigation indicates that after the issuance of the TDO, Siberian continued to fly aircraft into Russia in violation of the EAR, including flights from Bangkok, Thailand, Antalya, Turkey, Istanbul, Turkey, Fergana, Uzbekistan, and Tashkent, Uzbekistan. Information about those flights includes, but is not limited to, the following:

Tail No.	Serial No.	Aircraft type	Departure/arrival cities	Dates

RA–73670	41710	737–8LP (B738)	Fergana, UZ/Novosibirsk, RU	June 10, 2023.

III. Findings

Under the applicable standard set forth in Section 766.24 of the Regulations and my review of the entire record, I find that the evidence presented by BIS convincingly demonstrates that Siberian has acted in violation of the Regulations and the TDO; that such violations have been significant, deliberate and covert; and that given the foregoing and the nature of the matters under investigation, there is a likelihood of imminent violations. Therefore, renewal of the TDO is necessary in the public interest to prevent imminent violation of the Regulations and to give notice to companies and individuals in the United States and abroad that they should avoid dealing with Siberian, in connection with export and reexport transactions involving items subject to the Regulations and in connection with any other activity subject to the Regulations.

IV. Order

It is therefore ordered:

First, Siberian Airlines d/b/a S7 Airlines, 633104, Novosibirskaya obl., g. Ob, prospekt Mozzherina, d. 10 ofis 201, when acting for or on their behalf, any successors or assigns, agents, or employees may not, directly or indirectly, participate in any way in any transaction involving any commodity,

[5] 87 FR 12226 (Mar. 3, 2022). Additionally, BIS published a final rule effective April 8, 2022, which imposed licensing requirements on items controlled on the Commerce Control List (''CCL'') under Categories 0–2 that are destined for Russia or Belarus. Accordingly, now all CCL items require export, reexport, and transfer (in-country) licenses if destined for or within Russia or Belarus. 87 FR 22130 (Apr. 14, 2022).

[6] 87 FR 13048 (Mar. 8, 2022).

[7] Publicly available flight tracking information shows, for example, that on March 10, 2022, serial number (''SN'') 41400 flew from Atyrau, Kazakhstan to Moscow, Russia. On May 1, 2022, SN 41707 flew from Bishkek, Kyrgyzstan to Novosibirsk, Russia and, on March 4, 2022, SN 41841 flew from Urgench, Uzbekistan to Moscow, Russia.

[8] Engaging in conduct prohibited by a denial order violates the Regulations. 15 CFR 764.1(a) and (k).

[9] Publicly available flight tracking information shows, for example, that on November 30, 2022, SN 41709 flew from Bangkok, Thailand to Irkutsk, Russia. SN 41707 flew from Antalya, Turkey to Novosibirisk, Russia on November 19, 2022, and from Urgench, Uzbekistan to Moscow, Russia on December 10, 2022.

software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the EAR, or in any other activity subject to the EAR including, but not limited to:

A. Applying for, obtaining, or using any license (except directly related to safety of flight), license exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations, or engaging in any other activity subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the EAR, or from any other activity subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations.

Second, that no person may, directly or indirectly, do any of the following:

A. Export, reexport, or transfer (in-country) to or on behalf of Siberian any item subject to the EAR except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by Siberian of the ownership, possession, or control of any item subject to the EAR that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby Siberian acquires or attempts to acquire such ownership, possession or control except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from Siberian of any item subject to the EAR that has been exported from the United States except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations;

D. Obtain from Siberian in the United States any item subject to the EAR with knowledge or reason to know that the item will be, or is intended to be, exported from the United States except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations; or

E. Engage in any transaction to service any item subject to the EAR that has been or will be exported from the United States and which is owned, possessed or controlled by Siberian, or service any item, of whatever origin, that is owned, possessed or controlled by Siberian if such service involves the use of any item subject to the EAR that has been or will be exported from the United States except directly related to safety of flight and authorized by BIS pursuant to Section 764.3(a)(2) of the Regulations. For purposes of this paragraph, servicing means installation, maintenance, repair, modification, or testing.

Third, that, after notice and opportunity for comment as provided in section 766.23 of the EAR, any other person, firm, corporation, or business organization related to Siberian by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order.

In accordance with the provisions of Sections 766.24(e) of the EAR, Siberian may, at any time, appeal this Order by filing a full written statement in support of the appeal with the Office of the Administrative Law Judge, U.S. Coast Guard ALJ Docketing Center, 40 South Gay Street, Baltimore, Maryland 21202–4022.

In accordance with the provisions of Section 766.24(d) of the EAR, BIS may seek renewal of this Order by filing a written request not later than 20 days before the expiration date. A renewal request may be opposed by Siberian as provided in Section 766.24(d), by filing a written submission with the Assistant Secretary of Commerce for Export Enforcement, which must be received not later than seven days before the expiration date of the Order.

A copy of this Order shall be provided to Siberian, and shall be published in the **Federal Register**.

This Order is effective immediately and shall remain in effect for 180 days.

Dated: June 15, 2023.

Matthew S. Axelrod,

Assistant Secretary of Commerce for Export Enforcement.

Carbon and Alloy Steel Cut-to-Length Plate From the Republic of Korea: Preliminary Results of Antidumping Duty Administrative Review; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is conducting an administrative review of the antidumping duty order on carbon and alloy steel cut-to-length plate (CTL plate) from the Republic of Korea (Korea). The period of review (POR) is May 1, 2021, through April 30, 2022. The review covers one producer and/or exporter of the subject merchandise, POSCO, POSCO International Corporation and its affiliated companies (collectively, the POSCO single entity). We preliminarily determine that sales of subject merchandise by the POSCO single entity were not made at prices below normal value (NV). Interested parties are invited to comment on these preliminary results.

DATES: Applicable June 21, 2023.

FOR FURTHER INFORMATION CONTACT: Jaron Moore or William Horn, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3640 or (202) 482–4868, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 14, 2022, based on timely requests for review, in accordance with 19 CFR 351.221(c)(1)(i), we published the initiation of an administrative review on CTL plate from Korea produced and/or exported by POSCO.[1]

On December 12, 2022, we extended the preliminary results of this review to no later than May 31, 2023.[2] For a complete description of the events that followed the initiation of this review, *see* the Preliminary Decision Memorandum.[3]

[1] *See Initiation of Antidumping and Countervailing Duty Administration Reviews,* 87 FR 42144 (July 14, 2022) (*Initiation Notice*).

[2] *See* Memorandum, ''Extension of Deadline for the Preliminary Results of the 2021–2022 Antidumping Duty Administrative Review,'' dated December 12, 2022.

Continued

Scope of the Order [4]

The merchandise subject to the *Order* is CTL plate. The product is currently classified under the Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the *Order* may also enter under the following HTSUS subheadings: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500, 7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110, 7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7206.11.1000, 7226.11.9060, 7229.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180. The HTSUS subheadings are provided for convenience and customs purposes only; the written product description of the scope of the *Order* is dispositive.

For a complete description of the merchandise subject to the *Order, see* the Preliminary Decision Memorandum.

Methodology

Commerce is conducting this review in accordance with section 751(a)(1)(B) and (2) of the Tariff Act of 1930, as amended (the Act). Constructed export price is calculated in accordance with section 772 of the Act. NV is calculated in accordance with section 773 of the Act.

For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed at *https://access.trade.gov/public/FRNoticesListLayout.aspx.* A list of the topics discussed in the Preliminary Decision Memorandum is attached as an appendix to this notice.

Preliminary Results of the Review

As a result of our analysis of the record information, we preliminarily determine a weighted-average dumping margin of 0.00 percent for the POSCO single entity [5] for the period May 1, 2021, through April 30, 2022.[6] Therefore, Commerce preliminarily determines that the POSCO single entity made no sales of subject merchandise at prices below NV.

Disclosure and Public Comment

Commerce intends to disclose the calculations performed in connection with these preliminary results to interested parties with an administrative protective order within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance. Interested parties may submit case briefs to Commerce no later than 30 days after the date of publication of this notice.[7] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than seven days after the date for filing case briefs.[8] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this review are encouraged to submit with each argument: (1) a statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

All submissions to Commerce must be filed electronically using ACCESS and must also be served on interested parties.[9] An electronically filed document must be received successfully in its entirety by Commerce's electronic records system, ACCESS, by 5:00 p.m. Eastern Time on the date that the document is due. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.[10]

Interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance within 30 days of publication of this notice.[11] Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; (3) whether any participant is a foreign national, and (4) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case and rebuttal briefs. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Final Results of Review

Unless the deadline is extended pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2), Commerce intends to issue the final results of this administrative review, including the results of its analysis of issues raised in any written briefs, not later than 120 days after the date of publication of this notice.

Assessment Rates

Pursuant to section 751(a)(2)(A) of the Act and 19 CFR 351.212(b)(1), Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries covered by this review. Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this administrative review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Administrative Review: Certain Carbon and Alloy Steel Cut-To-Length Plate from the Republic of Korea,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See Certain Carbon and Alloy Steel Cut-to-Length Plate from Austria, Belgium, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, and Taiwan: Amended Final Affirmative Antidumping Determinations for France, the Federal Republic of Germany, the Republic of Korea and Taiwan, and Antidumping Duty Orders,* 82 FR 24096 (May 25, 2017) (*Order*).

[5] Commerce continues to find that POSCO, POSCO International Corporation, POSCO MS, and certain distributors and service centers (Taechang Steel Co., Ltd. and Winsteel Co., Ltd.) are affiliated pursuant to section 771(33)(E) of the Act, and further that these companies should be treated as a single entity (collectively, the POSCO single entity) pursuant to 19 CFR 351.401(f). *See* Preliminary Decision Memorandum.

[6] *See* Preliminary Decision Memorandum.

[7] *See* 19 CFR 351.309(c)(1)(ii).

[8] *See* 19 CFR 351.309(d); *see also Temporary Rule Modifying AD/CVD Service Requirements Due to COVID–19,* 85 FR 17006 (March 26, 2020); and *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID–19; Extension of Effective Period,* 85 FR 41363 (July 10, 2020) (collectively, *Temporary Rule*).

[9] *See* 19 CFR 351.303(b) and 19 CFR 351.303(f).

[10] *See Temporary Rule.*

[11] *See* 19 CFR 351.310(c).

Commerce will calculate importer-specific antidumping duty assessment rates when a respondent's weighted-average dumping margin is not zero or *de minimis* (*i.e.,* less than 0.5 percent). Pursuant to 19 CFR 351.212(b)(1), where the respondent reported the entered value of its U.S. sales, we will calculate importer-specific *ad valorem* antidumping duty assessment rates based on the ratio of the total amount of dumping calculated for the examined sales to each importer to the total entered value of those sales. Where the respondent did not report entered value, we will calculate importer-specific assessment rates on the basis of the ratio of the total amount of dumping calculated for the examined sales to each importer to the total quantity of those sales.[12] We will also calculate an estimated *ad valorem* importer-specific assessment rate with which to assess whether the per-unit assessment rate is *de minimis.* We will instruct CBP to assess antidumping duties on all appropriate entries covered by this review when the importer-specific *ad valorem* assessment rate calculated in the final results of this review is not zero or *de minimis.* Where either the respondent's *ad valorem* weighted-average dumping margin is zero or *de minimis,* or an importer-specific *ad valorem* assessment rate is zero or *de minimis,*[13] we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

Commerce's ''reseller policy'' will apply to entries of subject merchandise during the POR produced by the POSCO single entity for which the POSCO single entity did not know that the merchandise it sold to the intermediary (*e.g.,* a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.[14]

Cash Deposit Requirements

The following deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the POSCO single entity will be equal to the weighted-average dumping margin established in the final results of this review, except if the rate is *de minimis* within the meaning of 19 CFR 351.106(c)(1) (*i.e.,* less than 0.50 percent), in which case the cash deposit rate will be zero; (2) for merchandise exported by a company not covered in this review but covered in a prior completed segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently-completed segment; (3) if the exporter is not a firm covered in this review, a prior review, or the less-than-fair-value investigation, but the producer is, the cash deposit rate will be the rate established for the most recently-completed segment for the producer of the merchandise; and (4) the cash deposit rate for all other producers and exporters will continue to be 7.10 percent, the all-others rate established in the less-than-fair-value investigation.[15]

These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of the antidumping duties by the amount of the countervailing duties.

Notification to Interested Parties

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(4).

Dated: May 31, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Appendix—List of Topics Discussed in the Preliminary Decision Memorandum

[FR Doc. 2023–13128 Filed 6–20–23; 8:45 am]

BILLING CODE 3510–DS–P

[12] In these preliminary results, Commerce applied the assessment rate calculation method adopted in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Proceedings: Final Modification,* 77 FR 8101 (February 14, 2012).

[13] *See* 19 CFR 351.106(c)(2).

National Oceanic and Atmospheric Administration

[RTID 0648–XD091]

Taking and Importing Marine Mammals; Taking Marine Mammals Incidental to Geophysical Surveys Related to Oil and Gas Activities in the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of issuance of Letter of Authorization.

SUMMARY: In accordance with the Marine Mammal Protection Act (MMPA), as amended, its implementing regulations, and NMFS' MMPA Regulations for Taking Marine Mammals Incidental to Geophysical Surveys Related to Oil and Gas Activities in the Gulf of Mexico, notification is hereby given that a Letter of Authorization (LOA) has been issued to Chevron U.S.A. Inc. (Chevron) for the take of marine mammals incidental to geophysical survey activity in the Gulf of Mexico.

DATES: The LOA is effective from August 10, 2023, through January 2, 2024.

ADDRESSES: The LOA, LOA request, and supporting documentation are available online at: *https://www.fisheries.noaa.gov/action/incidental-take-authorization-oil-and-gas-industry-geophysical-survey-activity-gulf-mexico.* In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Ben Laws, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than

commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined ''negligible impact'' in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

Except with respect to certain activities not pertinent here, the MMPA defines ''harassment'' as: any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

On January 19, 2021, we issued a final rule with regulations to govern the unintentional taking of marine mammals incidental to geophysical survey activities conducted by oil and gas industry operators, and those persons authorized to conduct activities on their behalf (collectively ''industry operators''), in Federal waters of the U.S. Gulf of Mexico (GOM) over the course of 5 years (86 FR 5322, January 19, 2021). The rule was based on our findings that the total taking from the specified activities over the 5-year period will have a negligible impact on the affected species or stock(s) of marine mammals and will not have an unmitigable adverse impact on the availability of those species or stocks for subsistence uses. The rule became effective on April 19, 2021.

Our regulations at 50 CFR 217.180 *et seq.* allow for the issuance of LOAs to industry operators for the incidental take of marine mammals during geophysical survey activities and prescribe the permissible methods of taking and other means of effecting the least practicable adverse impact on marine mammal species or stocks and their habitat (often referred to as mitigation), as well as requirements pertaining to the monitoring and reporting of such taking. Under 50 CFR 217.186(e), issuance of an LOA shall be based on a determination that the level of taking will be consistent with the findings made for the total taking allowable under these regulations and a determination that the amount of take authorized under the LOA is of no more than small numbers.

Summary of Request and Analysis

Chevron plans to conduct a 3D ocean bottom node (OBN) survey over Walker Ridge Lease Blocks 758, 759, and 802, and the surrounding approximately 90 lease blocks, with approximate water depths ranging from approximately 2,000 to 2,400 meters (m). See Chevron's LOA application for a map of the area. Chevron anticipates using a single dual source vessel, towing airgun array sources consisting of 42 elements, with a total volume of 5,380 cubic inches (in^3). Please see Chevron's application for additional detail.

Consistent with the preamble to the final rule, the survey effort proposed by Chevron in its LOA request was used to develop LOA-specific take estimates based on the acoustic exposure modeling results described in the preamble (86 FR 5398, January 19, 2021). In order to generate the appropriate take number for authorization, the following information was considered: (1) survey type; (2) location (by modeling zone); [1] (3) number of days; and (4) season.[2] The acoustic exposure modeling performed in support of the rule provides 24-hour exposure estimates for each species, specific to each modeled survey type in each zone and season.

No 3D OBN surveys were included in the modeled survey types, and use of existing proxies (*i.e.,* 2D, 3D NAZ, 3D WAZ, Coil) is generally conservative for use in evaluation of 3D OBN survey effort, largely due to the greater area covered by the modeled proxies. Summary descriptions of these modeled survey geometries are available in the preamble to the proposed rule (83 FR 29212, 29220, June 22, 2018). Coil was selected as the best available proxy survey type in this case because the spatial coverage of the planned survey is most similar to the coil survey pattern. The planned 3D OBN survey will involve a single source vessel sailing along closely spaced survey lines that are approximately 100–150 m apart and approximately 40 kilometers (km) in length. The coil survey pattern was assumed to cover approximately 144 kilometers squared (km^2) per day (compared with approximately 795 km^2, 199 km^2, and 845 km^2 per day for the 2D, 3D NAZ, and 3D WAZ survey patterns, respectively). Among the different parameters of the modeled survey patterns (*e.g.,* area covered, line spacing, number of sources, shot interval, total simulated pulses), NMFS considers area covered per day to be most influential on daily modeled exposures exceeding Level B harassment criteria. Although Chevron is not proposing to perform a survey using the coil geometry, its planned 3D OBN survey is expected to cover approximately 10 km^2 per day, meaning that the coil proxy is most representative of the effort planned by Chevron in terms of predicted Level B harassment exposures.

All available acoustic exposure modeling results assume use of a 72-element, 8,000 in^3 array. Thus, take numbers authorized through the LOA are considered conservative due to differences in the airgun array (43 elements, 5,380 in^3), as compared to the source modeled for the rule.

The survey will take place over approximately 90 days, including 75 days of sound source operation. The entire survey would occur within Zone 7. Chevron plans to conduct 25 survey days in the ''Summer'' season and 50 days in the ''Winter'' season.

For some species, take estimates based solely on the modeling yielded results that are not realistically likely to occur when considered in light of other relevant information available during the rulemaking process regarding marine mammal occurrence in the GOM. The approach used in the acoustic exposure modeling, in which seven modeling zones were defined over the U.S. GOM, necessarily averages fine-scale information about marine mammal distribution over the large area of each modeling zone. Thus, although the modeling conducted for the rule is a natural starting point for estimating take, the rule acknowledged that other information could be considered (see, *e.g.,* 86 FR 5442, January 19, 2021), discussing the need to provide flexibility and make efficient use of previous public and agency review of other information and identifying that additional public review is not necessary unless the model or inputs used differ substantively from those that were previously reviewed by NMFS and the public. For this survey, NMFS has

[1] For purposes of acoustic exposure modeling, the GOM was divided into seven zones. Zone 1 is not included in the geographic scope of the rule.

[2] For purposes of acoustic exposure modeling, seasons include Winter (December–March) and Summer (April–November).

other relevant information reviewed during the rulemaking that indicates use of the acoustic exposure modeling to generate a take estimate for one marine mammal species produces results inconsistent with what is known regarding its occurrence in the GOM. Accordingly, we have adjusted the calculated take estimates for the species as described below.

Killer whales are the most rarely encountered species in the GOM, typically in deep waters of the central GOM (Roberts *et al.,* 2015; Maze-Foley and Mullin, 2006). The approach used in the acoustic exposure modeling, in which seven modeling zones were defined over the U.S. GOM, necessarily averages fine-scale information about marine mammal distribution over the large area of each modeling zone. NMFS has determined that the approach results in unrealistic projections regarding the likelihood of encountering killer whales.

As discussed in the final rule, the density models produced by Roberts *et al.* (2016) provide the best available scientific information regarding predicted density patterns of cetaceans in the U.S. GOM. The predictions represent the output of models derived from multi-year observations and associated environmental parameters that incorporate corrections for detection bias. However, in the case of killer whales, the model is informed by few data, as indicated by the coefficient of variation associated with the abundance predicted by the model (0.41, the second-highest of any GOM species model; Roberts *et al.,* 2016). The model's authors noted the expected non-uniform distribution of this rarely-encountered species (as discussed above) and expressed that, due to the limited data available to inform the model, it ''should be viewed cautiously'' (Roberts *et al.,* 2015).

NOAA surveys in the GOM from 1992–2009 reported only 16 sightings of killer whales, with an additional 3 encounters during more recent survey effort from 2017–18 (Waring *et al.,* 2013; *https://www.boem.gov/gommapps*). Two other species were also observed on fewer than 20 occasions during the 1992–2009 NOAA surveys (Fraser's dolphin and false killer whale).[3] However, observational data collected by protected species observers (PSOs) on industry geophysical survey vessels from 2002–2015 distinguish the killer whale in terms of rarity. During this period, killer whales were encountered on only 10 occasions, whereas the next most rarely encountered species (Fraser's dolphin) was recorded on 69 occasions (Barkaszi and Kelly, 2019). The false killer whale and pygmy killer whale were the next most rarely encountered species, with 110 records each. The killer whale was the species with the lowest detection frequency during each period over which PSO data were synthesized (2002–2008 and 2009–2015). This information qualitatively informed our rulemaking process, as discussed at 86 FR 5334 (January 19, 2021), and similarly informs our analysis here.

The rarity of encounters during seismic surveys is not likely to be the product of high bias on the probability of detection. Unlike certain cryptic species with high detection bias, such as *Kogia* spp. or beaked whales, or deep-diving species with high availability bias, such as beaked whales or sperm whales, killer whales are typically available for detection when present and are easily observed. Roberts *et al.* (2015) stated that availability is not a major factor affecting detectability of killer whales from shipboard surveys, as they are not a particularly long-diving species. Baird *et al.* (2005) reported that mean dive durations for 41 fish-eating killer whales for dives greater than or equal to 1 minute in duration was 2.3–2.4 minutes, and Hooker *et al.* (2012) reported that killer whales spent 78 percent of their time at depths between 0–10 m. Similarly, Kvadsheim *et al.* (2012) reported data from a study of 4 killer whales, noting that the whales performed 20 times as many dives 1–30 m in depth than to deeper waters, with an average depth during those most common dives of approximately 3 m.

In summary, killer whales are the most rarely encountered species in the GOM and typically occur only in particularly deep water (>700 m). This survey would take place in deep waters that would overlap with depths in which killer whales typically occur. While this information is reflected through the density model informing the acoustic exposure modeling results, there is relatively high uncertainty associated with the model for this species, and the acoustic exposure modeling applies mean distribution data over areas where the species is in fact less likely to occur. NMFS' determination in reflection of the data discussed above, which informed the final rule, is that use of the generic acoustic exposure modeling results for killer whales will generally result in estimated take numbers that are inconsistent with the assumptions made in the rule regarding expected killer whale take (86 FR 5403, January 19, 2021).

In past authorizations, NMFS has often addressed situations involving the low likelihood of encountering a rare species, such as killer whales in the GOM, through authorization of take of a single group of average size (*i.e.,* representing a single potential encounter). See 83 FR 63268, December 7, 2018. See also 86 FR 29090, May 28, 2021 and 85 FR 55645, September 9, 2020. For the reasons expressed above, NMFS determined that a single encounter of killer whales is more likely than the model-generated estimates and has authorized take associated with a single group encounter (*i.e.,* up to seven animals).

Based on the results of our analysis, NMFS has determined that the level of taking expected for this survey and authorized through the LOA is consistent with the findings made for the total taking allowable under the regulations. See Table 1 in this notice and Table 9 of the rule (86 FR 5322, January 19, 2021).

Small Numbers Determination

Under the GOM rule, NMFS may not authorize incidental take of marine mammals in an LOA if it will exceed ''small numbers.'' In short, when an acceptable estimate of the individual marine mammals taken is available, if the estimated number of individual animals taken is up to, but not greater than, one-third of the best available abundance estimate, NMFS will determine that the numbers of marine mammals taken of a species or stock are small. For more information please see NMFS' discussion of the MMPA's small numbers requirement provided in the final rule (86 FR 5438, January 19, 2021).

The take numbers for authorization are determined as described above in the Summary of Request and Analysis section. Subsequently, the total incidents of harassment for each species are multiplied by scalar ratios to produce a derived product that better reflects the number of individuals likely to be taken within a survey (as compared to the total number of instances of take), accounting for the likelihood that some individual marine mammals may be taken on more than 1 day (see 86 FR 5404, January 19, 2021). The output of this scaling, where appropriate, is incorporated into adjusted total take estimates that are the basis for NMFS' small numbers determinations, as depicted in Table 1.

This product is used by NMFS in making the necessary small numbers determinations through comparison

[3] However, note that these species have been observed over a greater range of water depths in the GOM than have killer whales.

with the best available abundance estimates (see discussion at 86 FR 5391, January 19, 2021). For this comparison, NMFS' approach is to use the maximum theoretical population, determined through review of current stock assessment reports (SAR; *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessments*) and model-predicted abundance information (*https://seamap.env.duke.edu/models/Duke/GOM/*). For the latter, for taxa where a density surface model could be produced, we use the maximum mean seasonal (*i.e.,* 3-month) abundance prediction for purposes of comparison as a precautionary smoothing of month-to-month fluctuations and in consideration of a corresponding lack of data in the literature regarding seasonal distribution of marine mammals in the GOM. Information supporting the small numbers determinations is provided in Table 1.

TABLE 1—TAKE ANALYSIS

Species	Authorized take	Scaled take [1]	Abundance [2]	Percent abundance
Rice's whale [3]	0	n/a	51	n/a
Sperm whale	371	156.9	2,207	7.1
Kogia spp.	[4] 206	60.0	4,373	1.8
Beaked whales	3,338	337.2	3,768	8.9
Rough-toothed dolphin	590	169.3	4,853	3.5
Bottlenose dolphin	[5] 21	6.0	176,108	0.0
Clymene dolphin	1,533	439.9	11,895	3.7
Atlantic spotted dolphin	0	n/a	74,785	n/a
Pantropical spotted dolphin	15,216	4,366.9	102,361	4.3
Spinner dolphin	357	102.5	25,114	0.4
Striped dolphin	796	228.5	5,229	4.4
Fraser's dolphin	257	73.8	1,665	4.4
Risso's dolphin	252	74.3	3,764	2.0
Melon-headed whale	1,014	299.3	7,003	4.3
Pygmy killer whale	488	144.0	2,126	6.8
False killer whale	553	163.0	3,204	5.1
Killer whale	7	n/a	267	2.6
Short-finned pilot whale	80	23.7	1,981	1.2

[1] Scalar ratios were applied to ''Authorized Take'' values as described at 86 FR 5322, 5404 (January 19, 2021) to derive scaled take numbers shown here.

[2] Best abundance estimate. For most taxa, the best abundance estimate for purposes of comparison with take estimates is considered here to be the model-predicted abundance (Roberts *et al.,* 2016). For those taxa where a density surface model predicting abundance by month was produced, the maximum mean seasonal abundance was used. For those taxa where abundance is not predicted by month, only mean annual abundance is available. For Rice's whale and killer whale, the larger estimated SAR abundance estimate is used.

[3] The final rule refers to the GOM Bryde's whale (*Balaenoptera edeni*). These whales were subsequently described as a new species, Rice's whale (*Balaenoptera ricei*) (Rosel *et al.,* 2021).

[4] Includes 19 takes by Level A harassment and 187 takes by Level B harassment. Scalar ratio is applied to takes by Level B harassment only; small numbers determination made on basis of scaled Level B harassment take plus authorized Level A harassment take.

[5] Modeled take of 16 increased to account for potential encounter with group of average size (Maze-Foley and Mullin, 2006).

Based on the analysis contained herein of Chevron's proposed survey activity described in its LOA application and the anticipated take of marine mammals, NMFS finds that small numbers of marine mammals will be taken relative to the affected species or stock sizes (*i.e.,* less than one-third of the best available abundance estimate) and therefore the taking is of no more than small numbers.

Authorization

NMFS has determined that the level of taking for this LOA request is consistent with the findings made for the total taking allowable under the incidental take regulations and that the amount of take authorized under the LOA is of no more than small numbers. Accordingly, we have issued an LOA to Chevron authorizing the take of marine mammals incidental to its geophysical survey activity, as described above.

Dated: June 15, 2023.

Kimberly Damon-Randall,

Director, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD032]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Site Characterization Surveys Offshore From Massachusetts to New Jersey for Vineyard Northeast, LLC

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; proposed incidental harassment authorization (IHA); request for comments on proposed authorization and possible renewal.

SUMMARY: NMFS has received a request from Vineyard Northeast, LLC (Vineyard Northeast) for authorization to take marine mammals incidental to marine site characterization surveys offshore from Massachusetts to New Jersey in the Bureau of Ocean Energy Management (BOEM) Commercial Lease of Submerged Lands for Renewable Energy Development on the Outer Continental Shelf Lease Areas OCS–A 0522 and OCS–A 0544 (Lease Areas) and associated offshore export cable corridor (OECC) routes.

DATES: Comments and information must be received no later than July 21, 2023.

ADDRESSES: Comments should be addressed to Jolie Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service. Written

comments should be submitted via email to *ITP.Taylor@noaa.gov*.

Instructions: NMFS is not responsible for comments sent by any other method, to any other address or individual, or received after the end of the comment period. Comments, including all attachments, must not exceed a 25-megabyte file size. All comments received are a part of the public record and will generally be posted online at *https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act* without change. All personal identifying information (*e.g.,* name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Jessica Taylor, Office of Protected Resources, NMFS, (301) 427–8401. Electronic copies of the original application and supporting documents (including NMFS **Federal Register** notices of the original proposed and final authorizations, and the previous IHA), as well as a list of the references cited in this document, may be obtained online at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-other-energy-activities-renewable*. In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The activities described in Vineyard Northeast's request and the acoustic sources proposed for use are identical to what was previously analyzed in support of the IHA issued by NMFS to Vineyard Northeast for 2022 site characterization surveys (2022 IHA) (87 FR 30872, May 20, 2022; 87 FR 52913, August 30, 2022), although the survey duration and project area will be a subset of the survey effort authorized for the 2022 IHA as a portion of this effort has been completed. All proposed mitigation, monitoring, and reporting requirements remain the same. While Vineyard Northeast's planned activity would qualify for renewal of the 2022 IHA, due to the availability of updated marine mammal density data (*https://seamap.env.duke.edu/models/Duke/EC/*), which NMFS has determined represents the best available scientific data, NMFS has determined to proceed with a new IHA process rather than a renewal, providing a 30-day period for the public to comment on this proposed action.

Pursuant to the Marine Mammal Protection Act (MMPA), NMFS is requesting comments on its proposal to issue an IHA to allow Vineyard Northeast to incidentally take marine mammals during the specified activities. NMFS is also requesting comments on a possible 1-year Renewal IHA that could be issued under certain circumstances and if all requirements are met, as described in Request for Public Comments at the end of this notice. NMFS will consider public comments prior to making any final decision on the issuance of the requested MMPA authorization and agency responses will be summarized in the final notice of our decision.

The MMPA prohibits the ''take'' of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed incidental take authorization may be provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other ''means of effecting the least practicable adverse impact'' on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stocks for taking for certain subsistence uses (referred to in shorthand as ''mitigation''); and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, NMFS must review our proposed action (*i.e.,* the issuance of an IHA) with respect to potential impacts on the human environment. This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216–6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has preliminarily determined that the issuance of the proposed IHA qualifies to be categorically excluded from further NEPA review.

We will review all comments submitted in response to this notification prior to concluding our NEPA process or making a final decision on the IHA request.

Summary of Request

On April 17, 2023, NMFS received a request from Vineyard Northeast for an IHA to take marine mammals incidental to high resolution geophysical (HRG) marine site characterization surveys offshore from Massachusetts to New Jersey in the areas of BOEM Commercial Lease of Submerged Lands for Renewable Energy Development on the OCS–A 0522 (Lease Area), OCS–A 0544 (Lease Area), and associated offshore export cable corridor (OECC) routes. Following NMFS' review of the application, Vineyard Northeast submitted a revised request on May 25, 2023. The application (the 2023 request) was deemed adequate and complete on May 25, 2023. Vineyard Northeast's request is for take of 19 species (comprising 20 stocks) of marine mammals, by Level B harassment only. Neither Vineyard Northeast nor NMFS expect serious injury or mortality to result from this activity and, therefore, an IHA is appropriate. Take by Level A harassment (injury) is unlikely, even absent mitigation, based on the characteristics of the signals produced by the acoustic sources planned for use.

NMFS has previously issued a similar IHA to Vineyard Northeast. On December 17, 2021, NMFS received a request from Vineyard Northeast for an IHA to take marine mammals incidental to marine site characterization surveys offshore from Massachusetts to New Jersey, in the area of Commercial Lease of Submerged Lands for Renewable Energy Development on the Outer Continental Shelf Lease Areas OCS–A 0522 and OCS–A 0544 (Lease Areas) and potential OECC routes to landfall locations. Vineyard Northeast requested authorization to take small numbers of 19 species (comprising 20 stocks) of marine mammals by Level B harassment only. NMFS published a notice of the proposed IHA in the **Federal Register**

on May 20, 2022 (87 FR 30872). After a 30-day public comment period and consideration of all public comments received, we subsequently issued the 2022 IHA, which is effective from July 27, 2022, to July 26, 2023 (87 FR 52913, August 30, 2022).

Vineyard Northeast completed a subset of the survey work under the 2022 IHA and submitted a preliminary monitoring report, which demonstrates that they conducted the required marine mammal mitigation and monitoring, and did not exceed the authorized levels of take under the previous IHA issued for surveys offshore from Massachusetts to New Jersey (See 87 FR 52913, August 30, 2022). These monitoring results are available to the public on our website: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-other-energy-activities-renewable*.

The 2023 request is nearly identical to the 2022 IHA, with the exception that the survey effort is a subset of the original effort authorized for the 2022 IHA. However, Duke University's Marine Geospatial Ecology Laboratory released updated marine mammal density information (June 20, 2022) for all species in the project area (*https://seamap.env.duke.edu/models/Duke/EC/*) after issuance of the 2022 IHA, and NMFS determined it would issue a proposed IHA rather than undertake the renewal process. In evaluating the 2023 request and to the extent deemed appropriate, NMFS also relies on the information presented in notices associated with issuance of the 2022 IHA (87 FR 30872, May 30 2022; 87 FR 52913, August 30, 2022).

Description of the Proposed Activity and Anticipated Impacts

Overview

Vineyard Northeast proposes to conduct HRG surveys in the BOEM Lease Areas OCS–A 0522 and 0544 and along potential submarine OECC's from southern Massachusetts to southern New Jersey. The purpose of the proposed surveys is to obtain an assessment of seabed (geophysical, geotechnical, and geohazard), ecological, and archeological conditions within the footprint of the planned offshore wind facility development area. Surveys are also conducted to inform and support engineering design and to map unexploded ordnance. Survey equipment would be deployed from multiple vessels during site characterization activities in the project area, and up to two vessels would operate at a time in the lease areas and along the OECCs. During survey effort, the vessel would operate at a maximum speed of 4 knots (4.6 miles or 7.4 km per hour). Underwater sound, resulting from Vineyard Northeast's activities, has the potential to result in incidental take of marine mammals in the form of Level B harassment.

Dates and Duration

The proposed activity is estimated to require 467 survey days (37,360 km of trackline) using a maximum of 4 concurrently operating survey vessels, and is expected to be carried out over the course of the 1-year period beginning from the date of issuance of this IHA. A ''survey day'' is defined as a 24-hour (hr) activity period in which active HRG acoustic sources are used. This schedule is inclusive of any inclement weather downtime and crew transfers. The number of survey days was calculated as the number of days needed to reach the overall level of effort required to meet survey objectives assuming any single vessel covers, on average, 80 km (49.7 miles) of survey trackline per 24 hours of operations. By the time the 2022 IHA expires, Vineyard Northeast expects to have completed 302 vessel days (24,160 km of trackline) of the original planned survey effort (869 vessel days; 69,520 km of trackline). Vineyard Northeast has estimated survey effort to require 100 vessel days (8,000 km of trackline) less than originally anticipated in association with the 2022 IHA (87 FR 52913, August 30, 2022).

Specific Geographic Region

Vineyard Northeast's proposed activities would occur in both Federal offshore waters (including Lease Areas OCS–A 0522 and OCS–A 0544) and along potential OECCs in both Federal and State nearshore waters of Massachusetts, Rhode Island, Connecticut, New York, and New Jersey, as shown in Figure 1. As compared to the 2022 IHA (87 FR 52913, August 30, 2022), Vineyard Northeast revised their project area to be more representative of the actual area in which HRG surveys would occur. The revised project area description is based upon updated information received from the Vineyard Northeast site investigation team.

The Lease Area OCS–A 0522 is approximately 536 square kilometers (km^2) (132,370 acres) and located 24 kilometers (km) (15 miles; mi) from the southeast corner of Martha's Vineyard, within the Massachusetts Wind Energy Area (WEA). The 174 km^2 (43,056 acre) Lease Area OCS–A 0544 is located approximately 38 km (24 mi) from Long Island, New York, within BOEM's Mid-Atlantic Planning Area. Surveys outside of the Lease Areas would extend from southern Massachusetts to southern New Jersey, including the Massachusetts/Rhode Island WEA as well as the northern portion of the Mid-Atlantic planning area. Total survey area would be approximately 33,814 km^2 (8,355,621.4 acres). Water depth across the proposed survey area ranges from approximately 35 to 60 meters (m) (115 to 197 feet [ft]) in the Lease Areas. Average water depth along the proposed OECCs is approximately 38 m (123.8 ft).

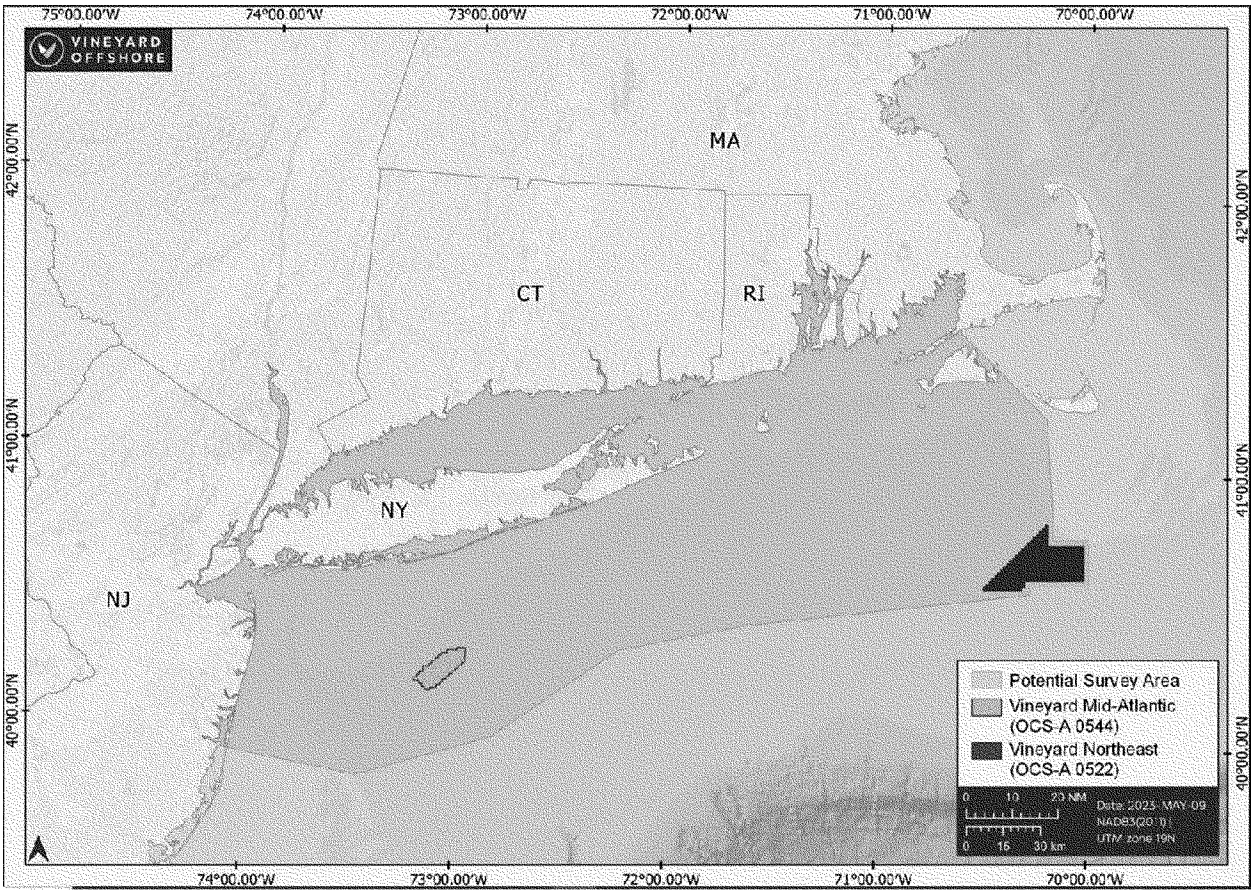

Figure 1 -- Map of the Proposed Survey Area

Detailed Description of the Action

A detailed description of the proposed survey activities can be found in the previous **Federal Register** notices (87 FR 30872, May 20, 2022; 87 FR 52913, August 30, 2022) and supplementary documents, available online at: *https://www.fisheries.noaa.gov/action/incidental-take-authorization-vineyard-northeast-llc-marine-site-characterization-surveys*. The specific geographic region and nature of the activities, including the types of HRG equipment planned for use (side scan sonar, multibeam echosounder, magnetometers and gradiometers, parametric sub-bottom profiler (SBP), compressed high intensity radar pulse (CHIRP) SBP, boomers, and sparkers; daily trackline distances (80 km per day); and the number of survey vessels (up to two in a Lease Area and up to two along OECC routes, including nearshore survey areas) are identical or nearly identical to those described in those previous notices.

Description of Marine Mammals

A description of the marine mammals in the proposed survey area can be found in the previous documents and notices for the 2022 IHA (87 FR 30872, May 20, 2022; 87 FR 52913, August 30, 2022), which remains applicable to this proposed IHA. NMFS reviewed the most recent draft Stock Assessment Reports (SARs, found on NMFS' website at *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessments,* up-to-date information on relevant Unusual Mortality Events (UMEs; *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-unusual-mortality-events*), and recent scientific literature and determined that no new information affects our original analysis of impacts under the 2022 IHA.

NMFS notes that, since issuance of the 2022 IHA, a new SAR is available for the North Atlantic right whale. Estimated abundance for the species declined from 368 to 338. However, this change does not affect our analysis of impacts, as described under the 2022 IHA.

Potential Effects on Marine Mammals and Their Habitat

A description of the potential effects of the specified activities on marine mammals and their habitat can be found in the documents supporting the 2022 IHA (87 FR 30872, May 20, 2022; 87 FR 52913, August 30, 2022). At present, there is no new information on potential effects that would influence our analysis.

Estimated Take

A detailed description of the methods used to estimate take anticipated to occur incidental to the project is found in the previous **Federal Register** notices (87 FR 30872, May 20, 2022; 87 FR 52913, August 30, 2022). The methods of estimating take are identical to those used in the 2022 IHA. Vineyard Northeast updated the marine mammal densities based on new information (Roberts *et al.,* 2016; Roberts *et al.,* 2023), available online at: *https://seamap.env.duke.edu/models/Duke/EC/*. We refer the reader to Table 8 in Vineyard Northeast's 2023 IHA request for the specific density values used in the analysis. The IHA request is

available online at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-other-energy-activities-renewable*.

The take that NMFS proposes to authorize can be found in Table 1, which presents the results of Vineyard Northeast's density-based calculations for the survey area. For comparative purposes, we have provided the 2022 IHA authorized Level B harassment take (87 FR 52913, August 30, 2022). NMFS notes that take by Level A harassment was not requested, nor does NMFS anticipate that it could occur. Therefore, NMFS has not proposed to authorize any take by Level A harassment. Mortality or serious injury is neither anticipated to occur nor proposed for authorization.

TABLE 1—SUMMARY OF TAKE NUMBERS PROPOSED FOR AUTHORIZATION

Species	Scientific name	Stock	Abundance	2022 IHA authorized take	2023 Proposed IHA	
					Take proposed for authorization [1]	Max percent population
Blue whale	*Balaenoptera musculus*	Western North Atlantic	402	1	1	0.25
North Atlantic Right Whale	*Eubalaena glacialis*	Western North Atlantic	338	40	12	3.6
Humpback Whale	*Megaptera novaeangliae*	Gulf of Maine	1,396	47	12	0.86
Fin Whale	*Balaenoptera physalus*	Western North Atlantic	6,802	77	20	0.29
Sei Whale	*Balaenoptera borealis*	Nova Scotia	6,292	5	5	0.08
Minke whale	*Balaenoptera acutorostrata*	Canadian Eastern Coastal	21,968	42	46	0.21
Sperm whale	*Physeter macrocephalus*	North Atlantic	4,349	12	2	0.05
Long-finned pilot whale [1]	*Globicephala melas*	Western North Atlantic	39,215	405	17	0.04
Killer whale [2]	*Orcinus orca*	Western North Atlantic	UNK	2	[3] 4	[4] 5.9
False killer whale [2]	*Pseudorca crassidens*	Western North Atlantic	1,791	5	5	0.28
Atlantic spotted dolphin [3]	*Stenella frontalis*	Western North Atlantic	39,921	29	29	0.07
Atlantic white-sided dolphin	*Lagenorhynchus acutus*	Western North Atlantic	93,233	1,124	129	0.14
Bottlenose dolphin	*Tursiops truncatus*	Western North Atlantic Northern Migratory Coastal.	6,639	151	45	0.68
		Western North Atlantic Offshore.	62,851	569	169	0.27
Common dolphin	*Delphinus delphis*	Western North Atlantic	172,974	13,904	7,472	4.3
Risso's dolphin	*Grampus griseus*	Western North Atlantic	35,215	101	9	0.03
White-beaked dolphin [2]	*Lagenorhynchus albirostris*	Western North Atlantic	536,016	30	30	0.006
Harbor porpoise	*Phocoena phocoena*	Gulf of Maine/Bay of Fundy	95,543	2,033	347	0.36
Harbor seal [5]	*Phoca vitulina*	Western North Atlantic	61,336	939	939	1.5
Gray seal [5]	*Halichoerus grypus*	Western North Atlantic	[6] 27,300	418	418	1.5

[1] Roberts et al. (2023) only provides density estimates for pilot whales as a guild. Given the project's location, NMFS assumes that all take will be of long-finned pilot whales.
[2] Rare (or unlikely to occur) species.
[3] Adjusted according to average group size (Kraus *et al.,* 2016; Palka *et al.,* 2017).
[4] Based upon minimum population estimate of 67 individual killer whales identified in the Northwestern Atlantic Ocean (Lawson and Stevens, 2014).
[5] Roberts et al. (2023) only provides density estimates for seals without differentiating by species. In order to determine the species-specific density-based exposure estimates for seals, Vineyard Northeast used the following approach. Vineyard Northeast summed the SAR N_{best} abundance estimates (Hayes *et al.,* 2022) for the 2 seal species and divided the total by the estimate for each species to get the proportion of the total for each species. Vineyard Northeast then multiplied these proportions by the total estimated exposure for the seal guild density (Roberts et al., 2023) to get the species-specific density-based exposure estimates. NMFS accepts this approach.
[6] NMFS' stock abundance estimate (and associated PBR value) applies to U.S. population only. Total stock abundance (including animals in Canada) is approximately 451,600.

Description of Proposed Mitigation, Monitoring and Reporting Measures

The mitigation, monitoring, and reporting measures proposed here are identical to those included in the **Federal Register** notice announcing the final 2022 IHA and the discussion of the least practicable adverse impact included in that document remains accurate. These mitigation, monitoring, and reporting measures are described below. As described in the previous **Federal Register** notices (87 FR 30872, May 20, 2022; 87 FR 52913, August 30, 2022), NMFS determined that issuance of the 2022 IHA to Vineyard Northeast was within the scope of the NOAA Fisheries Greater Atlantic Regional Office (GARFO) programmatic consultation regarding geophysical surveys along the U.S. Atlantic coast in the three Atlantic Renewable Energy Regions (NOAA GARFO, 2021; *https://www.fisheries.noaa.gov/new-england-mid-atlantic/consultations/section-7-take-reporting-programmatics-greater-atlantic#offshore-wind-site-assessment-and-site-characterization-activities-programmatic-consultation*). NMFS similarly concludes that the currently proposed survey activities are within scope of the consultation, and thus will require adherence to the relevant Project Design Criteria (PDC) (specifically PDCs 4, 5, and 7).

Additionally, on August 1, 2022, NMFS announced proposed changes to the existing North Atlantic right whale vessel speed regulations to further reduce the likelihood of mortalities and serious injuries to endangered North Atlantic right whales from vessel collisions, which are a leading cause of the species' decline and a primary factor in an ongoing Unusual Mortality Event (87 FR 46921). Should a final vessel speed rule be issued and become effective during the effective period of this IHA (or any other MMPA incidental take authorization), the authorization holder would be required to comply with any and all applicable requirements contained within the final rule. Specifically, where measures in any final vessel speed rule are more protective or restrictive than those in this or any other MMPA authorization, authorization holders would be required to comply with the requirements of the rule. Alternatively, where measures in this or any other MMPA authorization are more restrictive or protective than those in any final vessel speed rule, the measures in the MMPA authorization must be followed. The responsibility to comply with the applicable requirements of any vessel speed rule would become effective immediately upon the effective date of any final vessel speed rule and, when notice is published of the effective date, NMFS would also notify Vineyard Northeast if the measures in the speed rule were to supersede any of the measures in the MMPA authorization.

Establishment of Shutdown Zones (SZ)—Marine mammal SZs must be

established around the HRG survey equipment and monitored by NMFS-approved protected species observers (PSO) during HRG surveys as follows:

- 500-m SZ for North Atlantic right whales during use of specified acoustic sources (impulsive: sparkers and boomers; non-impulsive: non-parametric sub-bottom profilers); and,
- 100-m SZ for all other marine mammals (excluding North Atlantic right whales) during operation of the sparker and boomer. The only exception for this is for pinnipeds (seals) and small delphinids (*i.e.,* those from the genera *Delphinus, Lagenorhynchus, Stenella* or *Tursiops*).

If a marine mammal is detected approaching or entering the SZs during the HRG survey, the vessel operator would adhere to the shutdown procedures described below to minimize noise impacts on the animals. During use of acoustic sources with the potential to result in marine mammal harassment (sparkers, boomers, and non-parametric sub-bottom profilers; *i.e.,* anytime the acoustic source is active, including ramp-up), occurrences of marine mammals within the monitoring zone (but outside the SZs) must be communicated to the vessel operator to prepare for potential shutdown of the acoustic source.

Visual Monitoring—Monitoring must be conducted by qualified PSOs who are trained biologists, with minimum qualifications described in the **Federal Register** notices for the 2022 project (87 FR 30872, May 20, 2022; 87 FR 52913, August 30, 2022). Vineyard Northeast must have one PSO on duty during the day and a minimum of two NMFS-approved PSOs must be on duty and conducting visual observations when HRG equipment is in use at night. Visual monitoring must begin no less than 30 minutes prior to ramp-up of HRG equipment and continue until 30 minutes after use of the acoustic source. PSOs must establish and monitor the applicable clearance zones, SZs, and vessel separation distances as described in the 2022 IHA (87 FR 52913, August 30, 2022). PSOs must coordinate to ensure 360-degree visual coverage around the vessel from the most appropriate observation posts, and must conduct observations while free from distractions and in a consistent, systematic, and diligent manner. PSOs are required to estimate distances to observed marine mammals. It is the responsibility of the Lead PSO on duty to communicate the presence of marine mammals as well as to communicate action(s) that are necessary to ensure mitigation and monitoring requirements are implemented as appropriate.

Pre-Start Clearance—Marine mammal clearance zones (CZs) must be established around the HRG survey equipment and monitored by NMFS-approved PSOs prior to use of boomers, sparkers, and non-parametric sub-bottom profilers as follows:

- 500-m CZ for all Endangered Species Act-listed species; and
- 100-m CZ for all other marine mammals.

Prior to initiating HRG survey activities, Vineyard Northeast must implement a 30-minute pre-start clearance period. The operator must notify a designated PSO of the planned start of ramp-up where the notification time should not be less than 60 minutes prior to the planned ramp-up to allow the PSOs to monitor the CZs for 30 minutes prior to the initiation of ramp-up. Prior to ramp-up beginning, Vineyard Northeast must receive confirmation from the PSO that the CZs are clear prior to preceding. Any PSO on duty has the authority to delay the start of survey operations if a marine mammal is detected within the applicable pre-start clearance zones.

During this 30-minute period, the entire CZ must be visible. The exception to this would be in situations where ramp-up must occur during periods of poor visibility (inclusive of nighttime) as long as appropriate visual monitoring has occurred with no detections of marine mammals in 30 minutes prior to the beginning of ramp-up.

If a marine mammal is observed within the relevant CZs during the pre-start clearance period, initiation of HRG survey equipment must not begin until the animal(s) has been observed exiting the respective CZ, or, until an additional period has elapsed with no further sighting (*i.e.,* minimum 15 minutes for small odontocetes and seals; 30 minutes for all other species). The pre-start clearance requirement includes small delphinids. PSOs must also continue to monitor the zone for 30 minutes after survey equipment is shut down or survey activity has concluded.

Ramp-Up of Survey Equipment—When technically feasible, a ramp-up procedure must be used for geophysical survey equipment capable of adjusting energy levels at the start or re-start of survey activities. The ramp-up procedure must be used at the beginning of HRG survey activities in order to provide additional protection to marine mammals near the project area by allowing them to detect the presence of the survey and vacate the area prior to the commencement of survey equipment operation at full power. Ramp-up of the survey equipment must not begin until the relevant SZs have been cleared by the PSOs, as described above. HRG equipment operators must ramp up acoustic sources to half power for 5 minutes and then proceed to full power. If any marine mammals are detected within the SZs prior to or during ramp-up, the HRG equipment must be shut down (as described below).

Shutdown Procedures—If an HRG source is active and a marine mammal is observed within or entering a relevant SZ (as described above), an immediate shutdown of the HRG survey equipment is required. When shutdown is called for by a PSO, the acoustic source must be immediately deactivated and any dispute resolved only following deactivation. Any PSO on duty has the authority to delay the start of survey operations or to call for shutdown of the acoustic source if a marine mammal is detected within the applicable SZ. The vessel operator must establish and maintain clear lines of communication directly between PSOs on duty and crew controlling the HRG source(s) to ensure that shutdown commands are conveyed swiftly while allowing PSOs to maintain watch. Subsequent restart of the HRG equipment may only occur after the marine mammal has been observed exiting the relevant SZ, or, until an additional period has elapsed with no further sighting of the animal within the relevant SZ.

Upon implementation of shutdown, the HRG source may be reactivated after the marine mammal that triggered the shutdown has been observed exiting the applicable SZ or, following a clearance period of 15 minutes for small odontocetes (*i.e.,* harbor porpoise) and 30 minutes for all other species with no further observation of the marine mammal(s) within the relevant SZ. If the HRG equipment is shut down for brief periods (*i.e.,* less than 30 minutes) for reasons other than mitigation (*e.g.,* mechanical or electronic failure) the equipment may be reactivated as soon as is practicable at full operational level, without 30 minutes of pre-clearance, only if PSOs have maintained constant visual observation during the shutdown and no visual detections of marine mammals occurred within the applicable SZs during that time. For a shutdown of 30 minutes or longer, or if visual observation was not continued diligently during the pause, pre-clearance observation is required, as described above.

The shutdown requirement is waived for pinnipeds (seals) and certain genera of small delphinids (*i.e., Delphinus, Lagenorhynchus, Stenella,* or *Tursiops*) under certain circumstances. If a delphinid(s) from these genera is

visually detected within the SZ, shutdown would not be required. If there is uncertainty regarding identification of a marine mammal species (*i.e.,* whether the observed marine mammal(s) belongs to one of the delphinid genera for which shutdown is waived), PSOs must use best professional judgment in making the decision to call for a shutdown.

If a species for which authorization has not been granted, or a species for which authorization has been granted but the authorized number of takes have been met, approaches or is observed within the area encompassing the Level B harassment isopleth (178 m), shutdown must occur.

Vessel Strike Avoidance—Vineyard Northeast must comply with vessel strike avoidance measures as described in the **Federal Register** notice for the 2022 IHA (87 FR 52913, August 30, 2022). This includes speed restrictions (10 knots or less) when mother/calf pairs, pods, or large assemblages of cetaceans are spotted near a vessel; species-specific vessel separation distances; appropriate vessel actions when a marine mammal is sighted (*e.g.,* avoid excessive speed, remain parallel to animal's course, *etc.*); and monitoring of the NMFS North Atlantic Right Whale reporting system and WhaleAlert daily.

Throughout all phases of the survey activities, Vineyard Northeast must monitor NOAA Fisheries North Atlantic right whale reporting systems for the establishment of a dynamic management area (DMA). If NMFS establishes a DMA in the surrounding area, including the project area or export cable routes being surveyed, Vineyard Northeast is required to abide by the 10-knot speed restriction.

Training—Project-specific training is required for all vessel crew prior to the start of survey activities.

Reporting—PSOs must record specific information as described in the **Federal Register** notice of the issuance of the 2022 IHA (87 FR 52913, August 30, 2022). Within 90 days after completion of survey activities, Vineyard Northeast must provide NMFS with a monitoring report, which must include summaries of recorded takes and estimates of the number of marine mammals that may have been harassed.

In the event of a ship strike or discovery of an injured or dead marine mammal, Vineyard Northeast must report the incident to the Office of Protected Resources (OPR), NMFS and to the New England/Mid-Atlantic Regional Stranding Coordinator as soon as feasible. The report must include the information listed in the **Federal Register** notice of the issuance of the initial IHA (87 FR 52913, August 30, 2022).

Preliminary Determinations

Vineyard Northeast's HRG survey activities are a subset but otherwise unchanged from those analyzed in support of the 2022 IHA. The effects of the activity, taking into consideration the proposed mitigation and related monitoring measures, remain unchanged from those evaluated in support of the 2022 IHA, regardless of the minor increase in estimated take for one species (minke whale). NMFS expects that all potential takes would be short-term Level B behavioral harassment in the form of temporary avoidance of the area or decreased foraging, reactions that are considered to be of low severity and with no lasting biological consequences (*e.g.,* Southall *et al.,* 2007). In addition to being temporary, the maximum harassment zone around a survey vessel is 178 m from use of the Applied Acoustics AA251 Boomer. Although this distance is assumed for all survey activity evaluated here and in estimating take numbers proposed for authorization, in reality, much of the survey activity would involve use of acoustic sources with a reduced acoustic harassment zone (4 m for the Edge Tech Chirp 216 or 141 m for the GeoMarine Geo Spark 2000), producing expected effects of particularly low severity. Therefore, the ensonified area surrounding each vessel is relatively small compared to the overall distribution of the animals in the area and the available habitat.

The proposed survey area overlaps or is in close proximity to feeding biologically important areas (BIA)s for North Atlantic right whales (Cape Cod Bay and Massachusetts Bay BIA, February-April/Great South Channel and Georges Bank Shelf Break BIA, April-June), humpback whales (March-December), fin whales (year-round/March-October), sei whales (May-November), and minke whales (March-November), as well as overlaps the migratory BIA for North Atlantic right whales (November 1-April 30) (LaBrecque *et al.,* 2015). In addition, the proposed survey area overlaps with the area south of Martha's Vineyard and Nantucket, referred to as ''South of the Islands,'' which has been identified as relatively new year-round core North Atlantic right whale foraging habitat (Oleson *et al.,* 2020; Quintana-Rizzo *et al.,* 2021). As prey species are mobile and broadly distributed throughout the survey area, marine mammals that are temporarily displaced during survey activities are expected to be able to resume foraging once they have moved away from areas with disturbing levels of underwater noise, thus we do not expect biologically significant impacts to feeding behavior. In addition, most of these feeding BIAs are extensive and sufficiently large (*e.g.,* 3,149 km^2 and 12,247 km^2 for North Atlantic right whales; 47,701 km^2 for humpback whales; 18,015 km^2 and 2,933 km^2 for fin whales; 56,609 km^2 for sei whales; 54,341 for minke whales), and the acoustic footprint of the proposed survey is sufficiently small that feeding opportunities for these species would not be reduced appreciably. Due to the temporary nature of the disturbance and the availability of similar habitat and resources in the surrounding area, the impacts to marine mammals and the food sources that they utilize are not expected to cause significant or long-term consequences for individual marine mammals or their populations. Even considering the increased estimated take for one species (minke whales), the impacts of these lower severity exposures are not expected to accrue to a degree that the fitness of any individuals would be impacted and, therefore, no impacts on the annual rates of recruitment or survival would result.

As previously discussed in the 2022 IHA (87 FR 52913, August 30, 2022), impacts from the survey are expected to be localized to the specific area of activity and only during periods when Vineyard Northeast's acoustic sources are active. There are no rookeries, mating or calving grounds known to be biologically important to marine mammals within the proposed survey area.

As noted for the 2022 IHA (87 FR 52913, August 30, 2022), the proposed survey area overlaps a migratory corridor BIA and migratory route SMAs (Port of New Jersey/New York and Block Island) for North Atlantic right whales. As the survey activities would be temporary and the spatial acoustic footprint produced by the survey would be very small relative to the spatial extent of the available migratory habitat in the BIA (269,448 km^2), NMFS does not expect North Atlantic right whale migration to be impacted by the survey. Required vessel strike avoidance measures would also decrease risk of ship strike during migration; no ship strike is expected to occur during Vineyard Northeast's proposed activities. Vineyard Northeast would be required to comply with seasonal speed restrictions of these SMAs, and in any dynamic management area (DMA), should NMFS establish one (or more) in the proposed survey area. Additionally,

Vineyard Northeast requested and NMFS proposes to authorize only 12 takes by Level B harassment of NARWs. This amount is less than the 40 Level B harassment takes authorized in the 2022 IHA due to the updated Duke University density data (Roberts *et al.,* 2023) and reduced survey area.

Although take by Level B harassment of North Atlantic right whales has been proposed for authorization by NMFS, we anticipate a very low level of harassment, should it occur, because Vineyard Northeast is required to maintain a shutdown zone of 500 m if a North Atlantic right whale is observed. The takes proposed for authorization account for any missed animals wherein the survey equipment is not shut down immediately. As shutdown would be called for immediately upon detection (if the whale is within 500 m), it is likely the exposure time would be very limited and received levels would not be much above the harassment threshold. Further, the 500-m shutdown zone for right whales is conservative, considering the distance to the Level B harassment isopleth for the most impactful acoustic source (*i.e.,* Applied Acoustics AA251 Boomer—which may not be used on all survey days) is estimated to be 178 m, and thereby minimizes the potential for behavioral harassment of this species. As noted previously, Level A harassment is not expected due to the small permanent threshold shift (PTS) zones associated with HRG equipment types proposed for use. NMFS does not anticipate North Atlantic right whale takes that would result from Vineyard Northeast's activities would impact annual rates of recruitment or survival. Thus, any takes that occur would not result in population level impacts.

We also note that our findings for other species with active UMEs that were previously described for the 2022 IHA (87 FR 52913, August 30, 2022) remain applicable to this project. In addition, our analysis of survey effects on species with BIAs that overlap with the proposed survey area remains unchanged. Therefore, in conclusion, there is no new information suggesting that our analysis or findings should change.

Based on the information contained here and in the referenced documents, NMFS has preliminarily determined the following: (1) the required mitigation measures would effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the proposed authorized takes would have a negligible impact on the affected marine mammal species or stocks; (3) the proposed authorized takes represent small numbers of marine mammals relative to the affected stock abundances; (4) Vineyard Northeast's activities would not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action, and (5) appropriate monitoring and reporting requirements are included.

Endangered Species Act

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS OPR consults internally whenever we propose to authorize take for endangered or threatened species.

NMFS is proposing to authorize the incidental take of five species of marine mammals which are listed under the ESA, including the North Atlantic right, fin, sei, blue, and sperm whale, and has determined that this activity falls within the scope of activities analyzed in NMFS GARFO's programmatic consultation regarding geophysical surveys along the U.S. Atlantic coast in the three Atlantic Renewable Energy Regions (completed June 29, 2021; revised September 2021).

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes to issue an IHA to Vineyard Northeast for conducting high-resolution geophysical site characterization surveys offshore of Massachusetts to southern New Jersey for a period of 1 year, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. A draft of the proposed IHA can be found at *https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act.*

Request for Public Comments

We request comment on our analyses (included in both this document and the referenced documents supporting the 2022 IHA; Incidental Take Authorization (ITA) application; issued IHA; and **Federal Register** notices including 87 FR 30872, May 20, 2022; 87 FR 52913, August 30, 2022), the proposed authorization, and any other aspect of this notice of proposed IHA for the proposed site characterization surveys. We also request comment on the potential for renewal of this proposed IHA as described in the paragraph below. Please include with your comments any supporting data or literature citations to help inform our final decision on the request for MMPA authorization.

On a case-by-case basis, NMFS may issue a one-time, 1-year renewal IHA following notice to the public providing an additional 15 days for public comments when (1) up to another year of identical or nearly identical activities as described in the Description of the Proposed Activity and Anticipated Impacts section of this notice is planned or (2) the activities as described in the Description of the Proposed Activity and Anticipated Impacts section of this notice would not be completed by the time the IHA expires and a renewal would allow for completion of the activities beyond that described in the *Dates and Duration* section of this notice, provided all of the following conditions are met:

- A request for renewal is received no later than 60 days prior to the needed renewal IHA effective date (recognizing that the renewal IHA expiration date cannot extend beyond 1 year from expiration of the initial IHA);
- The request for renewal must include the following:

(1) An explanation that the activities to be conducted under the requested renewal IHA are identical to the activities analyzed under the initial IHA, are a subset of the activities, or include changes so minor (*e.g.,* reduction in pile size) that the changes do not affect the previous analyses, mitigation and monitoring requirements, or take estimates (with the exception of reducing the type or amount of take);

(2) A preliminary monitoring report showing the results of the required monitoring to date and an explanation showing that the monitoring results do not indicate impacts of a scale or nature not previously analyzed or authorized; and

- Upon review of the request for renewal, the status of the affected species or stocks, and any other pertinent information, NMFS determines that there are no more than minor changes in the activities, the mitigation and monitoring measures will remain the same and appropriate, and the findings in the initial IHA remain valid.

Dated: June 14, 2023.

Kimberly Damon-Randall,

Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Analysis of and Participation in Ocean Exploration Video Products

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Information Collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before August 21, 2023.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at *NOAA.PRA@noaa.gov.* Please reference OMB Control Number 0648–0748 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Abby Letts, LTJG/NOAA, NOAA Ocean Exploration, Joint Hydrographic Center, 24 Colovos Rd., Durham, NH 03824, (301) 325–3792; *abby.letts@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision and extension to an existing information collection.

NOAA Ocean Exploration (OE) is the only federal organization dedicated to ocean exploration. By using unique capabilities in terms of personnel, technology, infrastructure, and exploration missions, OE is reducing unknowns in deep-ocean areas and providing high-value environmental intelligence needed by NOAA and the nation to address both current and emerging science and management needs. Through live video and data streams, online coverage, training opportunities, and events, we allow scientists, resource managers, students, members of the general public, and others to actively experience ocean exploration, allowing broader scientific participation, and cultivating the next generation of ocean explorers, and engaging the public in exploration activities. To better understand our ocean, our office makes exploration data available to the public. This allows us, collectively, to more effectively maintain ocean health, sustainably manage our marine resources, accelerate our national economy, and build a better appreciation of the value and importance of the ocean in our everyday lives. It is only through leveraging resources internally and externally that we can truly achieve our mission.

Since the inception of NOAA's exploration program in 2001, OE data management has been guided by the 2000 President's Panel Report recommendations which prioritized rapid and unrestricted data sharing as one of five critical exploration program components. More recently, Public Law 111–11 [Section XII Ocean Exploration] reinforced and expanded OER data management objectives, continuing to stress the importance of sharing unique exploration data and information to improve public understanding of the oceans, and for research and management purposes.

Telepresence satellite communication from the ship to shore brings the unknown ocean to the screens of both scientists and the general public in their homes, schools or offices in near real time. With technology constantly evolving, it is important to address the needs of the shore based scientists and public to maintain a high level of participation. We use voluntary surveys to identify the needs of users of data, best approaches to leverage expertise of shore based participants for meaningful public engagement focused on ocean exploration.

The five forms used to collect information are as follows: (1) Sailing Contact Information. This form is sent to the few scientists that directly sail on NOAA Ship *Okeanos Explorer.* The ship's operational officer needs certain information such as: if a sailing individual has securely submitted their proper medical documents to NOAA's Office of Marine and Aviation Operations; if the person is up to date with required security documents, such as a passport, if the ship is traveling to a foreign port; any dietary restrictions so that the person will be served food that is safe. (2) *Okeanos Explorer* Participation Assessment. This voluntary form is sent to the scientists that sailed on any *Okeanos Explorer* cruise funded by NOAA's Office of Ocean Exploration and Research to record any feedback they wish to provide to the office about their experience. The office uses their feedback in assessments for improving the utility and experience of these scientific guests sailing on the *Okeanos Explorer.* (3) EX Collaboration Tools Feedback. This voluntary form is sent to members of the marine scientific community at the beginning of a fiscal year to ask if members would like to participate in any of the upcoming cruises and to what degree, such as simply asking to be included in emailed updates or if they want to be on a direct line to the ship for remotely operated vehicle dive operations. (4) Citizen Scientist. This voluntary form is available to general members of the public and is used for members to improve the annotation efforts when watching short video clips of 30 seconds to 5 minutes. (5) Science Lead Solicitation. This voluntary form will be used to solicit interest from the scientific community to serve as a Science Lead on one of NOAA Ocean Exploration's expeditions.

The first forms described above will include minor revisions, and the fifth form is a new addition. The Sailing Contact Information form will be revised to include updated informational attachments (*e.g.,* links to updated COVID guidance, medical clearance, and underwater cultural heritage protocols) and updated expedition names and dates for a given calendar year. The *Okeanos Explorer* Participation Assessment will be revised to replace some technical/scientific questions with questions that relate to communication, leadership, and workplace climate. The EX Collaboration Tools form will be revised to include updated informational attachments (*e.g.,* underwater cultural heritage protocols) and updated expedition names and dates for a calendar year. The Citizen Scientist form will be updated for expedition names and dates for a calendar year.

II. Method of Collection

Information is collected electronically.

III. Data

OMB Control Number: 0648–0748.

Form Number(s): None.

Type of Review: Regular submission [revision and extension of an approved information collection].

Affected Public: Individuals or households; business or other for-profit organizations; not-for-profit institutions; Federal government.

Estimated Number of Respondents: 1,000.

Estimated Time per Response: 10 minutes.

Estimated Total Annual Burden Hours: 668 hours.

Estimated Total Annual Cost to Public: $0.

Respondent's Obligation: Voluntary or required to obtain services or benefits.

Legal Authority: Public Law 111–11, Section XII Ocean Exploration.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD089]

Schedules for Atlantic Shark Identification Workshops and Protected Species Safe Handling, Release, and Identification Workshops

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public workshops.

SUMMARY: Free Atlantic Shark Identification Workshops and Safe Handling, Release, and Identification Workshops will be held in July, August, and September of 2023. Certain fishermen and shark dealers are required to attend a workshop to meet regulatory requirements and to maintain valid permits. Specifically, the Atlantic Shark Identification Workshop is mandatory for all federally permitted Atlantic shark dealers. The Safe Handling, Release, and Identification Workshop is mandatory for vessel owners and operators who use bottom longline, pelagic longline, or gillnet gear, and who have also been issued shark or swordfish limited access permits. Additional free workshops will be conducted later in 2023 and will be announced in a future notice. In addition, NMFS has implemented online recertification workshops for persons who have already taken an in-person training.

DATES: The Atlantic Shark Identification Workshops will be held on July 20, 2023 and September 14, 2023. The Safe Handling, Release, and Identification Workshops will be held on July 7, 2023, August 24, 2023, and September 6, 2023.

ADDRESSES: The Atlantic Shark Identification Workshops will be held in Medford, NY and Virginia Beach, VA. The Safe Handling, Release, and Identification Workshops will be held in Ronkonkoma, NY, Vero Beach, FL, and Kenner, LA.

FOR FURTHER INFORMATION CONTACT: Tiffany Weidner by email at *tiffany.weidner@noaa.gov* or by phone at 301–427–8550.

SUPPLEMENTARY INFORMATION: Atlantic highly migratory species (HMS) fisheries are managed under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*). The 2006 Consolidated Atlantic HMS Fishery Management Plan and its amendments are implemented by regulations at 50 CFR part 635. Section 635.8 describes the requirements for the Atlantic Shark Identification Workshops and Safe Handling, Release, and Identification Workshops. The workshop schedules, registration information, and a list of frequently asked questions regarding the Atlantic Shark Identification and Safe Handling, Release, and Identification workshops are available online at: *https://www.fisheries.noaa.gov/atlantic-highly-migratory-species/atlantic-shark-identification-workshops* and *https://www.fisheries.noaa.gov/atlantic-highly-migratory-species/safe-handling-release-and-identification-workshops.*

Atlantic Shark Identification Workshops

Since January 1, 2008, Atlantic shark dealers have been prohibited from receiving, purchasing, trading, or bartering for Atlantic sharks unless a valid Atlantic Shark Identification Workshop certificate is on the premises of each business listed under the shark dealer permit that first receives Atlantic sharks (71 FR 58057, October 2, 2006). Dealers who attend and successfully complete a workshop are issued a certificate for each place of business that is permitted to receive sharks. These certificate(s) are valid for 3 years. Thus, certificates that were initially issued in 2020 will expire in 2023.

Currently, permitted dealers may send a proxy to an Atlantic Shark Identification Workshop. However, if a dealer opts to send a proxy, the dealer must designate a proxy for each place of business covered by the dealer's permit that first receives Atlantic sharks. Only one certificate will be issued to each proxy. A proxy must be a person who is currently employed by a place of business covered by the dealer's permit; is a primary participant in the identification, weighing, and/or first receipt of fish as they are offloaded from a vessel; and who fills out dealer reports. Atlantic shark dealers are prohibited from renewing a Federal shark dealer permit unless a valid Atlantic Shark Identification Workshop certificate for each business location that first receives Atlantic sharks has been submitted with the permit renewal application. Additionally, a copy of a valid dealer or proxy Atlantic Shark Identification Workshop certificate must be in any trucks or other conveyances that are extensions of a dealer's place of business.

Workshop Dates, Times, and Locations

1. July 20, 2023, 12 p.m.–4 p.m., The Comfort Inn, 2695 Route 112, Medford, NY 11763.

2. September 14, 2023, 12 p.m.–4 p.m., Courtyard by Marriott-Virginia Beach Norfolk, 5700 Greenwich Road, Virginia Beach, VA 23462.

Registration

To register for a scheduled Atlantic Shark Identification Workshop, please contact Eric Sander at *ericssharkguide@yahoo.com* or at 386–852–8588. Pre-registration is highly recommended, but not required.

Registration Materials

To ensure that workshop certificates are linked to the correct permits, participants will need to bring the following specific items to the workshop:

- Atlantic shark dealer permit holders must bring proof that the attendee is an owner or agent of the business (such as articles of incorporation), a copy of the applicable permit, and proof of identification.
- Atlantic shark dealer proxies must bring documentation from the permitted dealer acknowledging that the proxy is attending the workshop on behalf of the permitted Atlantic shark dealer for a specific business location, a copy of the appropriate valid permit, and proof of identification.

Workshop Objectives

The Atlantic Shark Identification Workshops are designed to reduce the number of unknown and improperly identified sharks reported in the dealer reporting form and increase the accuracy of species-specific dealer-reported information. Reducing the number of unknown and improperly identified sharks will improve quota monitoring and the data used in stock assessments. These workshops will train shark dealer permit holders or their proxies to properly identify Atlantic shark carcasses.

Safe Handling, Release, and Identification Workshops

Since January 1, 2007, shark limited access and swordfish limited access permit holders who fish with longline or gillnet gear have been required to submit a copy of their Safe Handling, Release, and Identification Workshop certificate in order to renew either permit (71 FR 58057, October 2, 2006). These certificate(s) are valid for 3 years. Certificates issued in 2020 will expire in 2023. As such, vessel owners who have not already attended a workshop and received a NMFS certificate, or vessel owners whose certificate(s) will expire prior to the next permit renewal, must attend a workshop to fish with, or renew, their swordfish and shark limited access permits. Additionally, new shark and swordfish limited access permit applicants who intend to fish with longline or gillnet gear must attend a Safe Handling, Release, and Identification Workshop and submit a copy of their workshop certificate before either of the permits will be issued.

In addition to vessel owners, at least one operator on board vessels issued a limited access swordfish or shark permit that uses longline or gillnet gear is required to attend a Safe Handling, Release, and Identification Workshop and receive a certificate. Vessels that have been issued a limited access swordfish or shark permit and that use longline or gillnet gear may not fish unless both the vessel owner and operator have valid workshop certificates on board at all times. Vessel operators who have not already attended a workshop and received a NMFS certificate, or vessel operators whose certificate(s) will expire prior to their next fishing trip, must attend a workshop to operate a vessel with swordfish and shark limited access permits on which longline or gillnet gear is used.

Workshop Dates, Times, and Locations

1. July 7, 2023, 9 a.m.–5 p.m., Courtyard by Marriott, 5000 Express Drive South, Ronkonkoma, NY 11779.

2. August 24, 2023, 9 a.m.–5 p.m., Holiday Inn Ocean Breeze, 3384 Ocean Drive, Vero Beach, FL 32963.

3. September 6, 2023, 9 a.m.–5 p.m., Hilton New Orleans Airport, 901 Airline Drive, Kenner, LA 70062.

Registration

To register for a scheduled Safe Handling, Release, and Identification Workshop, please contact Angler Conservation Education at 386–682–0158. Pre-registration is highly recommended, but not required.

Registration Materials

To ensure that workshop certificates are linked to the correct permits, participants will need to bring the following specific items with them to the workshop:

- Individual vessel owners must bring a copy of the appropriate swordfish and/or shark permit(s), a copy of the vessel registration or documentation, and proof of identification;
- Representatives of a business-owned or co-owned vessel must bring proof that the individual is an agent of the business (such as articles of incorporation), a copy of the applicable swordfish and/or shark permit(s), and proof of identification; and
- Vessel operators must bring proof of identification.

Workshop Objectives

The Safe Handling, Release, and Identification Workshops are designed to teach longline and gillnet fishermen the required techniques for the safe handling and release of entangled and/or hooked protected species, such as sea turtles, marine mammals, smalltooth sawfish, Atlantic sturgeon, and prohibited sharks. In an effort to improve reporting, the proper identification of protected species and prohibited sharks will also be taught at these workshops. Additionally, individuals attending these workshops will gain a better understanding of the requirements for participating in these fisheries. The overall goal of these workshops is to provide participants with the skills needed to reduce the mortality of protected species and prohibited sharks, which may prevent additional regulations on these fisheries in the future.

Online Recertification Workshops

NMFS implemented an online option for shark dealers and longline and gillnet fishermen to renew their certificates in December 2021. To be eligible for online recertification workshops, dealers and fishermen need to have previously attended an in-person workshop. Information about the courses is available online at *https://www.fisheries.noaa.gov/atlantic-highly-migratory-species/atlantic-shark-identification-workshops* and *https://www.fisheries.noaa.gov/atlantic-highly-migratory-species/safe-handling-release-and-identification-workshops.* To access the course please visit: *https://hmsworkshop.fisheries.noaa.gov/start.*

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 15, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Privacy Act of 1974; System of Records

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled, Office of Inspector General.

ACTION: Notice of new privacy act system of records.

SUMMARY: In accordance with the Privacy Act of 1974 and OMB Circular A–108, the U.S. AbilityOne Commission, Office of Inspector General proposes to establish a new U.S. AbilityOne Commission, Office of Inspector General system of records titled, AbilityOne/OIG–001 Case Management System. This system of records will allow U.S. AbilityOne Commission, Office of Inspector General to collect and maintain records on individuals who may be complainants, subjects, witnesses, and others who may be identified during an investigation. The records and information collected and maintained in this system are used to document the processing of allegations of violations of criminal, civil, and administrative laws and regulations relating to U.S. AbilityOne Commission/OIG programs, operations, and employees, as well as contractors and other individuals and entities associated with U.S. AbilityOne Commission/OIG. Additionally, the U.S. AbilityOne Commission, Office of Inspector General is issuing a Notice of Proposed Rulemaking to exempt this system from certain provisions of the Privacy Act.

DATES: Submit comments on or before July 21, 2023. This new system will be effective July 21, 2023.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal Rulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: U.S. AbilityOne Commission Office of Inspector General, 355 E Street SW (OIG Suite 335), Washington, DC 20024.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: For general questions, please contact: Kamil Ali, Attorney-Advisor, U.S. AbilityOne Commission Office of Inspector General, 355 E Street SW (OIG Suite 335), Washington, DC 20024. (202) 603–2248, *kali@oig.abilityone.gov.* For privacy questions, please contact: Mr. Kamil Ali, Attorney-Advisor, U.S. AbilityOne Commission Office of Inspector General, 355 E Street SW (OIG Suite 335), Washington, DC 20024. Phone: (202) 603–2248, Email: *kali@oig.abilityone.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the U.S. AbilityOne Commission, Office of Inspector General (AbilityOne/OIG) proposes to establish a new system of records titled, ''AbilityOne/OIG–001 Case Management System of Records.'' This system of records will allow the U.S. AbilityOne Commission Office of the Inspector General to collect and maintain records on individuals who may be complainants, subjects, witnesses, and others who may be identified during the course of an investigation. The U.S. AbilityOne Inspector General is responsible for conducting and supervising independent and objective audits, inspections, and investigations of the programs and operations of the Commission. OIG promotes economy, efficiency, and effectiveness within the AbilityOne/OIG and prevents and detects fraud, waste, and abuse in its programs and operations. OIG's Office of Investigations investigates allegations of criminal, civil, and administrative misconduct involving U.S. AbilityOne Commission employees, contractors, and Commission programs and activities. This includes investigating for violations of criminal laws by entities regulated by U.S. AbilityOne Commission, regardless of whether they receive Federal funds. These investigations can result in criminal prosecutions, fines, civil monetary penalties, and administrative sanctions.

The AbilityOne/OIG–001 Case Management System system of records assists the OIG with receiving and processing complaints of violations of criminal, civil, and administrative laws and regulations relating to U.S. AbilityOne Commission employees, contractors, regulated persons, and other individuals and entities associated with AbilityOne. The system includes both paper investigative files and OIG's electronic case management and tracking information system which also generates reports. The case management system allows OIG to manage information provided during its investigations, and, in the process, to facilitate its management of investigations and investigative resources. Through this system, OIG can create a record showing disposition of allegations; track actions taken by management regarding misconduct; track legal actions taken following referrals to the U.S. Department of Justice for prosecution or civil action; provide a system for creating and reporting statistical information; and track government property and other resources used in investigative activities.

Additionally, the U.S. AbilityOne Commission, Office of Inspector General is issuing a Notice of Proposed Rulemaking to exempt this system from certain provisions of the Privacy Act.

II. Privacy Act

The Privacy Act (5 U.S.C. 552a) governs the means by which the Federal Government collects, maintains, and uses personally identifiable information (PII) in a System of Records. A ''System of Records'' is a group of any records under the control of a federal agency from which information about individuals is retrieved by name or other personal identifier. The Privacy Act requires each agency to publish in the **Federal Register** a System of Records notice (SORN) identifying and describing each System of Records the agency maintains, including the purposes for which the agency uses PII in the system, the routine uses for which the agency discloses such information outside the agency, and how individuals to whom a Privacy Act

record pertains can exercise their rights under the Privacy Act (*e.g.,* to determine if the system contains information about them and to contest inaccurate information).

In accordance with 5 U.S.C. 552a(r), U.S. AbilityOne Commission OIG has provided a report of this system of records to the Office of Management and Budget and to Congress. Below is the description of the AbilityOne/OIG–001 Case Management System, System of Records.

SYSTEM NAME AND NUMBER:

AbilityOne Commission/Office of Inspector General (AbilityOne/OIG)-001 Case Management System, System of Records.

SECURITY CLASSIFICATION:

Unclassified—Sensitive.

SYSTEM LOCATION:

Records are maintained at the U.S. AbilityOne Commission OIG Headquarters in Washington, DC.

SYSTEM MANAGER(S):

Case Management System Administrator; 355 E St. SW (Suite 355), Washington, DC 20024; Phone number 844–496–1536.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Inspector General Act of 1978, 5 U.S.C. 401–424; 5 U.S.C. app. 3.

PURPOSE(S) OF THE SYSTEM:

The records and information collected and maintained in this system are used to document the processing of allegations of violations of criminal, civil, and administrative laws and regulations relating to U.S. AbilityOne Commission programs, operations, and employees, as well as contractors and other individuals and entities associated with U.S. AbilityOne Commission; monitor case assignments, status, disposition, and results; manage investigations and information provided during the course of such investigations; track actions taken by management regarding misconduct and other allegations; track legal actions taken following referrals to the Department of Justice for prosecution or litigation; create and report statistical information; and manage property records establishing chain of custody of evidence.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals filing complaints of criminal, civil, or administrative violations, including, but not limited to, fraud, waste, or mismanagement; individuals alleged to have been involved in such violations; individuals identified as having been adversely affected by matters investigated by the OIG; individuals who have been identified as possibly relevant to, or who are contacted as part of, an OIG investigation, including: (A) current and former employees of the U.S. AbilityOne Commission, other Federal agencies, and U.S. AbilityOne Commission contractors, grantees, and persons whose association with current and former employees relate to alleged violations under investigation; and, (B) witnesses, complainants, confidential informants, suspects, defendants, or parties who have been identified by the OIG, other U.S. AbilityOne Commission components, other agencies, or members of the general public in connection with authorized OIG functions; and OIG employees performing investigative functions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Categories of records in this system may include:

- Investigative agent name and contact information;
- Individual's name and aliases;
- Date of birth;
- Social Security Number;
- Telephone and cell phone numbers;
- Physical and mailing addresses;
- Electronic mail addresses;
- Physical description;
- Citizenship;
- Photographs;
- Job title, employment position, and other employment data;
- Individual Eligibility Evaluations and other medical documentation;
- Any other personal information relevant to the subject matter of an OIG investigation;
- Investigative files containing complaints and allegations, witness statements; transcripts of electronic monitoring; subpoenas and legal opinions and advice; reports of investigation; reports of criminal, civil, and administrative actions taken as a result of the investigation; and other relevant evidence;
- Property receipts establishing chain of custody of evidence.

RECORD SOURCE CATEGORIES:

Records are obtained from sources including, but not limited to, the individual record subjects; U.S. AbilityOne Commission employees, grantees, and contractors; employees of Federal, State, local, and foreign agencies; and other persons and entities.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside U.S. AbilityOne Commission as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

1. To other Federal, State, local, or foreign agencies or administrations, and licensing and professional discipline authorities, having interest or jurisdiction in the matter.

2. To third parties in the course of an investigation, when necessary to obtain pertinent information.

3. To any person when disclosure of the record is needed to enable the recipient of the record to take action to recover money or property of U.S. AbilityOne Commission or OIG, when such recovery will accrue to the benefit of the United States, or when disclosure of the record is needed to enable the recipient of the record to take appropriate disciplinary or corrective action to maintain the integrity of AbilityOne programs or operations.

4. To complainants and/or victims to the extent necessary to provide such persons with information and explanations concerning the progress and/or results of the investigation or case arising from the matters of which they complained and/or of which they were a victim.

5. To media and the public when the public interest requires, unless it is determined by OIG counsel that release of specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

6. To an individual or individuals who are in danger or in situations involving an imminent danger of death or physical injury.

7. To either the House of Congress, or, to the extent of matter within its jurisdiction, any committee thereof, any joint committee of congress or subcommittee of any such joint committee.

8. To another agency or to an instrumentality of any governmental jurisdiction within or under the control of United States for a civil or criminal law enforcement activity if the head of the agency or the instrumentality has made a written request to U.S. AbilityOne Commission OIG specifying the particular portion of the record desired and the law enforcement activity for which the record is sought.

9. To the Department of Justice when (a) the agency, or any component thereof; or (b) any employee of the agency in his or her official capacity; or (c) any employee of the agency in his or her individual capacity where the Department of Justice has agreed to

represent the employee; or (d) the United States, where the agency determines that litigation is likely to affect the agency or any of its components, is a party to litigation or has an interest in such litigation, and the use of such records by the Department of Justice is deemed by the agency to be relevant and necessary to the litigation, provided, however, that in each case, the agency determines that disclosure of the records to the Department of Justice is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

10. To a court or adjudicative body before which agency is authorized to appear, when (a) the agency, or any component thereof; or (b) any employee of the agency in his or her official capacity; or (c) any employee of the agency in his or her individual capacity where the agency has agreed to represent the employee; or (d) the United States, where the agency determines that litigation is likely to affect the agency or any of its components, is a party to litigation or has an interest in such litigation, and the agency determines that use of such records is relevant and necessary to the litigation, provided, however, that in each case, the agency determines that disclosure of the records to the Department of Justice is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

11. To a congressional office in response to an inquiry of records of an individual from the congressional office made at the request of the individual.

12. To other agencies and the Council of Inspectors General on Integrity and Efficiency (CIGIE) for purposes of conducting and reviewing peer reviews of the OIG to ensure adequate internal safeguards and management procedures exist or to ensure that standards applicable to Government audits, investigations, or other agency activities are applied and followed.

13. To appropriate agencies, entities, and persons when (1) U.S. AbilityOne Commission OIG suspects or has confirmed that there has been a breach of the system of records, (2) U.S. AbilityOne Commission OIG has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, U.S. AbilityOne Commission OIG (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with U.S. AbilityOne Commission OIG's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

14. To another Federal agency or Federal entity, when U.S. AbilityOne Commission OIG determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records in this system are stored electronically and/or on paper in secure facilities. Electronic records may be stored on magnetic disc, tape, digital media, and CD–ROM.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are primarily organized and retrieved by case numbers. Paper media are retrievable alphabetically by name of subject or complainant, by case number, and/or by special agent name and/or employee identifying number. Electronic media are retrieved by the name or identifying number for a complainant, subject, victim, or witness; by case number; by special agent name or other personal identifier; or by field office designation.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records for closed cases are kept for 15 years.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access is restricted to agency personnel whose responsibilities require access. Access to the database is password protected with two factor authentication.

RECORD ACCESS PROCEDURES:

Under the Privacy Act, individuals may request access to records about themselves. If an agency or a person, who is not the individual who is the subject of the records, requests access to records about an individual, the written consent of the individual who is the subject of the records is required. Requesters may submit requests for records under the Privacy Act in the following ways: (1) by mail to Ms. Kimberly Zeich, Executive Director, U.S. AbilityOne Commission 355 E Street SW (Suite 325), Washington, DC 20024; or (2) via email to *foia@abilityone.gov.* Requesters must provide the information that is necessary to identify the records, including the following: Requester's full name; present mailing address; home telephone; work telephone; name of subject, if other than requester; requester relationship to subject; description of type of information or specific records; and purpose of requesting information. Requesters should be as specific as possible about the records being requested including enough file-related or event-related information such as the subject matter and date and any information to permit an organized, non-random search for documents.

CONTESTING RECORD PROCEDURES:

Individuals seeking to contest or amend records maintained on himself or herself must clearly and concisely state that information is being contested, and the proposed amendment to the information sought. Requests to amend a record must follow the Record Access Procedures above.

NOTIFICATION PROCEDURE SECTIONS:

Same as Record Access Procedures.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

Pursuant to 5 U.S.C. 552a(j)(2), this system is exempt from the following provisions of the Privacy Act: 5 U.S.C. 552a (c)(3)–(4); (d); (e)(1)–(3); (e)(4)(G)–(I); (e)(5); (e)(8); and (f)–(g); and from 41 CFR 51–9.1, § 51–9.2, § 51–9.3, § 51–9.4, and § 51–9.7.

Pursuant to 5 U.S.C. 552a(k)(2), this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d). (e)(4)(G)–(I) and (f);; and from 41 CFR 51–9.1, § 51–9.2, § 51–9.3, § 51–9.4, and § 51–9.7.

Exemptions from the subsections are justified for because application of these provision would present a serious impediment to law enforcement. Access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, of the existence of that investigation; of the nature and scope of the information and evidence obtained as to his activities; of the identity of confidential sources, witnesses, and law enforcement personnel, and of information that may enable the subject to avoid detection or apprehension. These factors would present a serious impediment to effective law enforcement where they prevent the successful completion of the

investigation, endanger the physical safety of confidential sources, witnesses, and law enforcement personnel, and/or lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony. In addition, granting access to such information could disclose security-sensitive or confidential business information or information that would constitute an unwarranted invasion of the personal privacy of third parties. Finally, access to the records could result in the release of properly classified information which would compromise the national defense or disrupt foreign policy. Amendment of the records would interfere with ongoing investigations and law enforcement activities and impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. It is not possible to detect relevance or necessity of specific information in the early stages of a civil, criminal or other law enforcement investigation, case, or matter, including investigations in which use is made of properly classified information. Relevance and necessity are questions of judgment and timing, and it is only after the information is evaluated that the relevance and necessity of such information can be established.

Michael R. Jurkowski,

Acting Director, Business Operations.

BILLING CODE 6353–01–P

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 22–1]

Notice of Prehearing Conference

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: Notice of prehearing conference for *In the Matter of Leachco, Inc.;* CPSC Docket No. 22–1.

DATES: Thursday, June 29, 2023 at 11:00 a.m. Eastern Time.

ADDRESSES: This event will be held remotely.

FOR FURTHER INFORMATION CONTACT: Alberta E. Mills, Consumer Product Safety Commission, Office of the General Counsel, Division of the Secretariat, *cpsc-os@cpsc.gov;* 240–863–8938; 301–504–7479.

SUPPLEMENTARY INFORMATION: The text of the Presiding Officer's June 15, 2023 Order Scheduling Prehearing Conference appears below.

Authority: Consumer Product Safety Act, 15 U.S.C. 2064.

Dated: June 15, 2023.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Office of the Chief Administrative Law Judge, 1331 Pennsylvania Ave. NW, Suite 520N, Washington, DC 20004–1710, Telephone: 202–434–9950, Fax: 202–434–9949,

June 15, 2023

In the Matter of LEACHCO, INC., CPSC Docket No. 22–1

Respondent.

ORDER SCHEDULING PREHEARING CONFERENCE

An initial prehearing conference was held on April 22, 2022. A second prehearing conference was held on September 7, 2022.

On June 9, 2023, Respondent filed a motion for summary decision. Respondent also requested oral argument on the motion. Complaint Counsel has said he does not believe oral argument is necessary, but that he would be available for argument and that argument would not affect the current prehearing schedule agreed to by the parties.

Upon consultation, the parties agreed to convene a third prehearing conference for oral argument. Other relevant matters, such as the status of discovery motions, matters to be included in the final prehearing order, and any other prehearing issues the parties need to address may also be discussed. *See* 16 CFR 1025.21(c) (2022).

Each party shall be permitted 20 minutes for argument. As movant, Respondent shall be permitted to reserve five (5) minutes of its time for rebuttal.

A third prehearing conference shall be held as follows:

Date: Thursday, June 29, 2022.

Time: 11:00 a.m. Eastern Daylight Time.

Means: Zoom [link provided to those listed in Distribution].

The CPSC is working to secure a court reporter for the prehearing conference. I direct that notice of this conference be published in the **Federal Register**. 16 CFR 1025.21(b) (2022).

Michael G. Young

Administrative Law Judge

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID: USA–2023–HQ–0007]

Submission for OMB Review; Comment Request

AGENCY: U.S. Army Corps of Engineers (USACE), Department of the Army, Department of Defense (DoD).

ACTION: 30-Day information collection notice.

SUMMARY: The DoD has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by July 21, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Angela Duncan, 571–372–7574, *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Stakeholder and Community Coastal Storm Hazard Surveys; OMB Control Number 0710–CCFR.

Type of Request: New.

Number of Respondents: 3,050.

Responses per Respondent: 1.

Annual Responses: 3,050.

Average Burden per Response: 30 minutes.

Annual Burden Hours: 1,525.

Needs and Uses: Information from the surveys described here is needed to support research that was appropriated in the Consolidated Appropriations Act, 2021 (Pub. L. 116–260). In the explanatory statement on Division D of the Act, Energy and Water Development and Related Agencies Appropriations Act, 2021, the Regional Sediment Management program was appropriated additional funding to address research and development for compound coastal flooding to ''enhance the resiliency of coastal communities and mitigate socioeconomic and environmental consequences of extreme coastal hazards.'' This includes funds provided to support cooperative efforts between the Corps and academia to address compound flooding issues. The explanatory statement can be accessed at the following link: *https://www.govinfo.gov/content/pkg/CREC-2020-12-21/pdf/CREC-2020-12-21-house-bk4.pdf.* This Congressional funding resulted in a $5 million joint effort between the U.S. Army Corps of Engineers—Engineer Research and Development Center (ERDC) and the University of Alabama under the Cooperative Agreement ''Coastal Compound Flooding under Uncertainties: Physically-based and Data Driven Modeling Framework.'' Research tasks 9 and 10 of this cooperative agreement seek to address the Congressional directive to connect enhanced flood forecasting with community resilience.

This research effort seeks to inform improved modeling of compound coastal storm events, including improved simulation of impacts to communities and of protective action-taking. The proposed tasks contained in the Broad Agency Agreement with the University of Alabama seek to identify effective flood risk communication tools that influence coastal residents' risk mitigation actions and to better understand key community stakeholder communication of hazards. Execution of these tasks requires the University of Alabama Principal Investigator and research team to gather information through three community and stakeholder surveys. Findings from their analysis will inform coastal storm hazard modeling and risk communication for better outcomes from storm events, meeting the Appropriations Bill directive described above.

Affected Public: Individuals or households.

Frequency: One-time collection.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Mr. Matthew Oreska.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number, and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

DoD Clearance Officer: Ms. Angela Duncan.

Requests for copies of the information collection proposal should be sent to Ms. Duncan at *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

Dated: June 13, 2023.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2023–OS–0053]

Proposed Collection; Comment Request

AGENCY: Office of the Under Secretary of Defense for Personnel and Readiness (OUSD(P&R)), Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Office of the Deputy Assistant Secretary of Defense for Military Community and Family Policy announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by August 21, 2023.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: https://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, 4800 Mark Center Drive, Mailbox #24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *https://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments,

please write to Military Community and Family Policy, Office of Military Family Readiness, ATTN: Dianna Ganote, Alexandria, VA 22350; *dianna.m.ganote.civ@mail.mil* or by telephone: (571) 372–3990.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Department of Defense Consent to Conduct Installation Records Checks (IRC); DD Form 3058; OMB Control Number 0704–0586.

Needs and Uses: The information collection requirement is necessary as part of a criminal history background investigation on individuals working, volunteering, or residing on a military installation who provide care and services to children in DoD programs. The query of records from the installation includes: the Family Advocacy Central Registry, the military law enforcement records, and the Defense Central Index of Investigations (DCII). The query of records will assist the department in obtaining or maintaining an employment suitability or fitness determination for those individuals working with children on military installations. Programs impacted are referenced within the 34 U.S. Code 20351 (Crime Control Act of 1990) and include impacted individuals such as employees, DoD contractors, providers, adults residing in a family child care home, volunteers, and others with regular recurring contact with children.

Affected Public: Individuals or households.

Annual Burden Hours: 2,333.

Number of Respondents: 14,000.

Responses per Respondent: 1.

Annual Responses: 14,000.

Average Burden per Response: 10 minutes.

Frequency: As required.

Respondents are DoD contractors, family childcare providers, family childcare adult family members residing in the home, and specified volunteers who provide childcare services for children. This form will be initiated by DoD staff and will be maintained in the initiating DoD offices and/or appropriate human resources or security offices.

Dated: June 13, 2023.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2023–OS–0054]

Proposed Collection; Comment Request

AGENCY: Office of the Under Secretary of Defense for Personnel and Readiness (OUSD(P&R)), Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Office of the Deputy Assistant Secretary of Defense for Military Community and Family Policy announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by August 21, 2023.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: https://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, 4800 Mark Center Drive, Mailbox #24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *https://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to Military Community and Family Policy, Office of Military Family Readiness, ATTN: Sean O'Hare, Alexandria, VA 22350; *sean.p.ohare3.civ@mail.mil* or by telephone: (571) 372–0866.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: DoD Child Development Program (CDP)—Family Information; Department of Defense Child Development Program Request for Care Record (DD Form 2606) & Application for Department of Defense Child Care Fees (DD Form 2652); OMB Control Number 0704–0515.

Needs and Uses: The DoD requires the information in the proposed collection for program planning and management purposes. This includes two collection instruments: DD Form 2606, ''Department of Defense Child Development Program Request for Care Record,'' which is required for all patrons to apply for childcare and collects general information regarding the sponsor and family, and DD Form 2652 ''Application for Department of Defense Child Care Fees,'' which is utilized for patrons to apply for DoD childcare subsidies based on total family income.

Affected Public: Individuals or households.

Annual Burden Hours:

DD 2606: 1,042.

DD 2652: 4,167.

Total: 5,209.

Number of Respondents:

DD 2606: 12,500.

DD 2652: 50,000.

Total: 62,500.

Responses per Respondent: 1.

Annual Responses:

DD 2606: 12,500.

DD 2652: 50,000.

Total: 62,500.

Average Burden per Response: 5 minutes.

Frequency: Biennially.

Respondents for the information collection through DD Form 2606 and DD Form 2652 are patrons requesting childcare and patrons enrolled in Child Development Programs (CDPs). The DoD CDP requires the information in the proposed collections for program planning, management purposes and the determination of child care fees.

The DD Form 2606 is used to collect information for the type of care needed and sponsor status which determines eligibility and priority for child development program services. It is also used to assist management in the planning of present and future program requirements. The information from the DD Form 2652 is used to determine total

family income to determine child care fees for families enrolled in the DoD CDP.

Dated: June 13, 2023.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Request for Project Proposals Pursuant to Section 165 of the Water Resources Development Act of 2020, Pilot Program for Continuing Authority Projects in Small or Disadvantaged Communities

AGENCY: U.S. Army Corps of Engineers, Department of the Army, DoD.

ACTION: Notice; request for pilot project proposals.

SUMMARY: Section 165 of the Water Resources Development Act of 2020 directs the Secretary of the Army to implement a pilot program for carrying out projects under a continuing authority program for economically disadvantaged communities at 100% Federal cost. The Department of the Army is requesting pilot project proposals. The Secretary is authorized to select up to 20 pilot projects.

DATES: Proposals are to be submitted no later than August 21, 2023.

ADDRESSES: You may submit proposals in writing using any of these methods:

- *Mail:* HQ, U.S. Army Corps of Engineers, ATTN: Ms. Amy Babey, at 441 G Street NW, Washington, DC 20314.
- *Email: wrda20cap165a@usace.army.mil.* Please include Section 165 Project Proposal in the subject line of the message.

Due to security requirements, we cannot receive proposals by hand delivery or courier.

FOR FURTHER INFORMATION CONTACT: Ms. Amy Babey at *wrda20cap165a@usace.army.mil* or by phone at 502–645–7199.

SUPPLEMENTARY INFORMATION: Section 165 of the Water Resources Development Act of 2020 requires the Secretary to implement a pilot program for carrying out up to 20 projects under a continuing authority program for economically disadvantaged communities at 100 percent Federal cost. Additional information on the section 165 pilot program can be found in the Assistant Secretary of the Army for Civil Works (ASA(CW)) policy guidance issued on 12 June 2023. A copy of the guidance can be obtained at *https://www.usace.army.mil/Missions/Civil-Works/Project-Planning/Legislative-Links/wrda_2020/.*

The term ''economically disadvantaged community'' means as defined in the ASA(CW) memorandum, Implementation Guidance for Section 160 of the Water Resources Development Act of 2020, Definition of Economically Disadvantaged Community, dated 14 March 2023. A copy of the guidance can be obtained at *https://usace.contentdm.oclc.org/utils/getfile/collection/p16021coll5/id/36002.*

The term ''continuing authority program'' (CAP) means any of the following:

1. Section 14 of the Flood Control Act of 1946 (33 U.S.C. 701r).
2. Section 3 of the Act of August 13, 1946 (33 U.S.C. 426g). This authority is commonly identified as ''Section 103'' by the U.S. Army Corps of Engineers (USACE).
3. Section 107 of the River and Harbor Act of 1960 (33 U.S.C. 577).
4. Section 111 of the River and Harbor Act of 1968 (33 U.S.C. 426i).
5. Section 204 of the Water Resources Development Act of 1992 (33 U.S.C. 2326).
6. Section 205 of the Flood Control Act of 1948 (33 U.S.C. 701s).
7. Section 206 of the Water Resources Development Act of 1996 (33 U.S.C. 2330).
8. Section 2 of the Act of August 28, 1937 (33 U.S.C. 701g). This authority is commonly identified as ''Section 208'' by USACE.
9. Section 1135 of the Water Resources Development Act of 1986 (33 U.S.C. 2309a).

Notwithstanding the cost share authorized for the applicable CAP section, pursuant to section 165(a), the Federal share of the cost of a project selected under this authority shall be 100 percent. Therefore, the maximum total Federal cost of a project implemented under Section 165(a) will be the sum of the applicable statutory per project Federal participation limit (see table below) plus the amount that the non-Federal interest would pay as its cost share.

Authority	Statutory per project federal participation limit
Section 14	$10,000,000
Section 103	10,000,000
Section 107	10,000,000
Section 111	12,500,000
Section 204	10,000,000
Section 205	10,000,000
Section 206	10,000,000
Section 208	500,000
Section 1135	10,000,000

Non-Federal Interest Requirements

1. Provide all required lands, easements, rights-of-way, relocations, and disposal areas (LERRDs) required for the project.
2. Perform and pay for all costs associated with any required hazardous, toxic, and radioactive wastes (HTRW) cleanup and response in, on, or under any real property interest required for the project.
3. Operate and maintain the project at full non-Federal expense (except for a project for commercial navigation).
4. Hold and save the United States free from all damages arising from the project that are not due to the fault or negligence of the United States or its contractors.
5. For a project for navigation, provide all required local service facilities.
6. Pay all costs of planning, design, and construction that exceed the sum of the statutory per project Federal participation limit for the applicable CAP section plus the amount that the non-Federal interest would normally provide as its cost share.

Project Proposals

All information provided in a proposal is public information. Therefore, information that is confidential business information, information that should not be disclosed because of statutory restrictions, or other information that a non-Federal interest would not want to appear publicly should not be included in the submittal. Proposals to convert an active CAP or specifically authorized study or project to a Section 165 pilot program study or project will not be considered. The authority to initiate a project under the pilot program terminates on December 27, 2030.

Entities submitting proposals for a project must include the following information:

1. Name, location, and description of the proposed project.
2. Description of the Economically Disadvantaged Community. The proposal must include a map and a narrative description of the economically disadvantaged community that will be benefited by the proposed project. The narrative description must include sufficient information to validate the community's classification as economically disadvantaged. The narrative must also describe the type

and complexity of the urbanization in the community and identify any existing infrastructure in the community that is related to the purpose of the proposed project.

3. Description of the non-Federal interest for the proposed project. The description must include sufficient information to validate the non-Federal interest's eligibility as an applicant for the pilot program.

4. A letter of intent to partner with USACE in conducting a study, completing a design, constructing the project, and the long-term operation and maintenance of the constructed project. The letter of intent must include information demonstrating the non-Federal interest ability to be a partner in the study and project.

5. Description of the need for the proposed project and what the project would provide to the disadvantaged community.

6. For a project for flood risk management or coastal storm risk management (CSRM) purposes, the proposal must include a description of the history of flooding and the population at risk in the economically disadvantaged community. The narrative should include the dates of flood events and describe the property damages and life loss attributable to each event. It should also include a qualitative description or range of how deep the water was and how fast it was flowing. The description should identify any characteristics of the population that have a bearing on risk, such as the total number of people subject to flooding or a coastal storm, low per capita income, or unemployment rate above the national average.

7. A proposal for a project for CSRM purposes must include assurance of local willingness and capability to establish conditions of public use and access to beaches and shores. The proposal must identify whether the proposed project may result in a CSRM project that benefits beaches or shores the majority of which are private. In such cases, the applicant must provide assurance in the proposal that it is capable and willing to establish sufficient conditions of public use and access as a condition of Federal financial participation in a project.

8. For a project for ecosystem restoration, the proposal must describe the degraded habitat targeted for restoration and the causes of the degradation. Regionally and nationally significant habitat or natural resources should be identified.

9. For a project under section 14, the proposal must describe the ownership and function of the facility to be protected and the nature of the damage caused by flooding adjacent to the facility.

10. For a project under section 111, the proposal must describe the shoreline damage and identify the Federal navigation project responsible for the damage.

11. For a project for commercial navigation under Section 107, the proposal must describe existing facilities, vessel traffic, and the navigation problem the proposed project will address.

Michael L. Connor,

Assistant Secretary of the Army (Civil Works).

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Inland Waterways Users Board Meeting Notice

AGENCY: U.S. Army Corps of Engineers, Department of the Army, DoD.

ACTION: Notice of open Federal advisory committee meeting.

SUMMARY: The Department of the Army is publishing this notice to announce the Federal advisory committee meeting of the U.S. Army Corps of Engineers, Inland Waterways Users Board (Board). This meeting is open to the public. For additional information about the Board, please visit the committee's website at *https://www.iwr.usace.army.mil/Missions/Navigation/Inland-Waterways-Users-Board/.*

DATES: The Army Corps of Engineers, Inland Waterways Users Board will conduct a meeting from 9 a.m. to 2 p.m. CDT on July 20, 2023.

ADDRESSES: The Inland Waterways Users Board meeting will be conducted at the Paducah-McCracken County Convention and Expo Center, 415 Park Street, Paducah, Kentucky 42001, 270–408–1346. The online virtual portion of the Inland Waterways Users Board meeting can be accessed at *https://usace1.webex.com/meet/ndc.nav,* Public Call-in: USA Toll-Free 844–800–2712, USA Caller Paid/International Toll: 1–669–234–1177 Access Code: 199 117 3596, Security Code 1234.

FOR FURTHER INFORMATION CONTACT: Mr. Mark R. Pointon, the Designated Federal Officer (DFO) for the committee, in writing at the Institute for Water Resources, U.S. Army Corps of Engineers, ATTN: CEIWR–GN, 7701 Telegraph Road, Casey Building, Alexandria, VA 22315–3868; by telephone at 703–428–6438; and by email at *Mark.Pointon@usace.army.mil.* Alternatively, contact Mr. Steven D. Riley, an Alternate Designated Federal Officer (ADFO), in writing at the Institute for Water Resources, U.S. Army Corps of Engineers, ATTN: CEIWR–NDC, 7701 Telegraph Road, Casey Building, Alexandria, VA 22315–3868; by telephone at 703–659–3097; and by email at *Steven.D.Riley@usace.army.mil.*

SUPPLEMENTARY INFORMATION: This committee meeting is being held under the provisions of Chapter 10 of title 5, United States Code (U.S.C.) (commonly known as the ''Federal Advisory Committee Act'' or ''FACA''), section 552b of title 5, U.S.C. (commonly known as the ''Government in the Sunshine Act''), and sections 102–3.140 and 102–3.150 of title 41, Code of Federal Regulations (CFR).

Purpose of the Meeting: The Board is chartered to provide independent advice and recommendations to the Secretary of the Army on construction and rehabilitation project investments on the commercial navigation features of the inland waterways system of the United States. At this meeting, the Board will receive briefings and presentations regarding the investments, projects, and status of the inland waterways system of the United States and conduct discussions and deliberations on those matters. The Board is interested in written and verbal comments from the public relevant to these purposes.

Agenda: At this meeting the agenda will include the status of the Inland Waterways Trust Fund (IWTF); Fiscal Year (FY) 2024 Budget funding for Navigation; status of Inner Harbor Navigation Canal (IHNC) Lock and Bayou Sorrel Lock activities; updates of inland waterways projects for the Mississippi River-Illinois Waterway Navigation and Ecosystem Sustainability Program (NESP), McClellan-Kerr Arkansas River Navigation System (MKARNS) Three Rivers, Arkansas, and the Gulf Intracoastal Waterway (GIWW) Brazos River Floodgates and Colorado River Locks; status of the ongoing construction activities for the Upper Ohio River Montgomery Lock, Monongahela River Locks and Dams 2, 3, and 4, Chickamauga Lock and Kentucky Lock projects.

Availability of Materials for the Meeting. A copy of the agenda or any updates to the agenda for the July 20, 2023, meeting will be available. The final version will be available at the

meeting. All materials will be posted to the website for the meeting.

Public Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b, as amended, and 41 CFR 102–3.140 through 102–3.1 65, and subject to the availability of space, this meeting is open to the public. Registration of members of the public who wish to participate in the meeting will begin at 8:30 a.m. on the day of the meeting. Participation is on a first-to-arrive basis. Any interested person may participate in the meeting, file written comments or statements with the committee, or make verbal comments during the public meeting, at the times, and in the manner, permitted by the committee, as set forth below.

Special Accommodations: Individuals requiring any special accommodations related to the public meeting or seeking additional information about the procedures, should contact Mr. Mark Pointon, the committee DFO, or Mr. Steven Riley, an ADFO, at the email addresses or telephone numbers listed in the **FOR FURTHER INFORMATION CONTACT** section, at least five (5) business days prior to the meeting so that appropriate arrangements can be made.

Written Comments or Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the Board about its mission and/or the topics to be addressed in this public meeting. Written comments or statements should be submitted to Mr. Pointon, the committee DFO, or Mr. Riley, a committee ADFO, via electronic mail, the preferred mode of submission, at the addresses listed in the **FOR FURTHER INFORMATION CONTACT** section in the following formats: Adobe Acrobat or Microsoft Word. The comment or statement must include the author's name, title, affiliation, address, and daytime telephone number. Written comments or statements being submitted in response to the agenda set forth in this notice must be received by the committee DFO or ADFO at least five (5) business days prior to the meeting so that they may be made available to the Board for its consideration prior to the meeting. Written comments or statements received after this date may not be provided to the Board until its next meeting. Please note that because the Board operates under the provisions of the Federal Advisory Committee Act, as amended, all written comments will be treated as public documents and will be made available for public inspection.

Verbal Comments: Members of the public will be permitted to make verbal comments during the public meeting only at the time and in the manner allowed herein. If a member of the public is interested in making a verbal comment at the open meeting, that individual must submit a request, with a brief statement of the subject matter to be addressed by the comment, at least three business (3) days in advance to the committee DFO or ADFO, via electronic mail, the preferred mode of submission, at the addresses listed in the **FOR FURTHER INFORMATION CONTACT** section. The committee DFO and ADFO will log each request to make a comment, in the order received, and determine whether the subject matter of each comment is relevant to the Board's mission and/or the topics to be addressed in this public meeting. A 15-minute period near the end of the meeting will be available for verbal public comments. Members of the public who have requested to make a verbal comment and whose comments have been deemed relevant under the process described above, will be allotted no more than three (3) minutes during this period, and will be invited to speak in the order in which their requests were received by the DFO and ADFO.

Thomas P. Smith,

Chief, Operations and Regulatory Division, Directorate of Civil Works, U.S. Army Corp of Engineers.

BILLING CODE 3720–58–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2023–SCC–0060]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; School Pulse Panel 2023–24 Data Collection

AGENCY: National Center for Education Statistics (NCES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before July 21, 2023.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Carrie Clarady, 202–245–6347.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: School Pulse Panel 2023–24 Data Collection.

OMB Control Number: 1850–0975.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 53,955.

Total Estimated Number of Annual Burden Hours: 10,175.

Abstract: The School Pulse Panel (SPP) is a data collection originally designed to collect voluntary responses from a nationally representative sample of public schools to better understand how schools, students, and educators are responding to the ongoing stressors of the coronavirus pandemic. It is conducted by the National Center for Education Statistics (NCES), part of the Institute of Education Sciences (IES), within the United States Department of Education, in cooperation with the U.S. Census Bureau. Due to the immediate need to collect information from schools during the pandemic to satisfy the requirement of Executive Order 14000, an emergency clearance was issued to

develop and field the first several monthly collections of the SPP in 2021, and a full review of the SPP data collection was completed in 2022 (OMB# 1850–0969). SPP's innovative design and timely dissemination of findings have been used and cited frequently among Department of Education senior leadership, the White House Domestic Policy Counsel, the USDA's Food and Nutrition Service, the Centers for Disease Control and Prevention, Congressional deliberations, and the media. The ongoing, growing interest by stakeholders has resulted in the request for dedicated funding to create an established NCES quick-turnaround data collection vehicle, with the goal of standing up a post-pandemic panel to begin with the 2023–24 school year.

The initial proposal for the next SPP study extended the collection to also collect data from school districts, but this has been canceled due to lack of funding. For the 23–24 school year, the survey may ask school staff about a range of topics, including but not limited to instructional mode offered; enrollment counts of subgroups of students for various subject interests; strategies to address learning recovery; safe and healthy school mitigation strategies; mental health services; use of technology; information on staffing, nutrition services, absenteeism, usage of federal funds, facilities, and overall principal and school staff experiences. Some new content will be rotated in and out monthly.

As in previous waves, for SPP 2023–24 roughly 8,000 (4,000 in an initial sample and 4,000 in a reserve sample) public elementary, middle, high, and combined-grade schools will be randomly selected to participate in a panel. The goal is national representation from 1,200 responding schools to report national estimates. School staff will be asked to provide requested data as frequently as monthly during the 23–24 school year. This approach provides the ability to collect detailed information on various topics while also assessing changes over time for items that are repeated. Given the high demand for data collection, the content of the survey will change monthly.

This request is to conduct the SPP 2023–24 main study data collection activities, including instruments for the first quarter of monthly collections. These materials completed a 60-day public comment period in June 2023. They are now being published for 30 additional days of public comment. Some documents have been revised for the 30-day public comment period. Subsequent quarterly content submissions will be submitted for 30-day public comment periods.

Dated: June 15, 2023.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2023–SCC–0107]

Agency Information Collection Activities; Comment Request; School Ambassador Fellowship Application

AGENCY: Office of Elementary and Secondary Education (OESE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a new information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before August 21, 2023.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2023–SCC–0107. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the regulations.gov site is not available to the public for any reason, the Department will temporarily accept comments at *ICDocketMgr@ed.gov*. Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. Please note that comments submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Manager of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W203, Washington, DC 20202–8240.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Orman Feres, 202–453–6921.

SUPPLEMENTARY INFORMATION: The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: School Ambassador Fellowship Application.

OMB Control Number: 1810–NEW.

Type of Review: A new ICR.

Respondents/Affected Public: Individuals and Households.

Total Estimated Number of Annual Responses: 6,000.

Total Estimated Number of Annual Burden Hours: 14,250.

Abstract: The Office of Elementary and Secondary Education (OESE) in the US Department of Education (ED) requests clearance for a new information collection for the School Ambassador Fellowship program. The U.S. Department of Education established the School Ambassador Fellowship to enable outstanding teachers, administrators, and other school leaders, such as school counselors, psychologists, social workers, and librarians to bring their school and classroom expertise to the Department and to expand their knowledge of the national dialogue about education. The School Ambassador Fellowship is a professional learning community designed to improve educational outcomes for students by leveraging the expertise of school-based practitioners

in the creation, evaluation, and dissemination of information around national education initiatives. The Intergovernmental Personnel Act (IPA) mobility program regulations (5 CFR part 334), revised effective May 29, 1997, allow federal agencies to facilitate cooperation between the Federal Government and the non-Federal entity through the temporary assignment of skilled personnel. In order to identify the most skilled personnel for the position of Ambassador Fellow we are requesting OMB approval to collect School Ambassador Fellowship applications.

Dated: June 14, 2023.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

SUPPLEMENTARY INFORMATION: The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden.

It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Nondiscrimination on the Basis of Sex in Education Programs or Activities Receiving Federal Financial Assistance.

OMB Control Number: 1870–0505.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: Private Sector; State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 24,785.

Total Estimated Number of Annual Burden Hours: 598,982.

Abstract: The U.S. Department of Education (the Department) published a Notice of Proposed Rulemaking for the Nondiscrimination on the Basis of Sex in Education Programs or Activities Receiving Federal Financial Assistance (title IX NPRM) to propose amendments to the Department's implementing regulations for title IX of the Education Amendments of 1972. The Department's proposed regulations would require a recipient to maintain various documents regarding its title IX activities for a period of at least seven years. These requirements are specified in proposed 34 CFR 106.8(f). Recipients impacted by the proposed regulations include local educational agencies, institutes of higher education and other entities that receive Federal grant funds from the Department. The information collected would allow recipients and the Department to assess on a longitudinal basis whether a recipient is complying with the Department's title IX regulations when it is has information about sex discrimination, the prevalence of sex discrimination affecting access to a recipient's education program or activity, and whether additional or different training is necessary for the recipient to fulfill its obligations under title IX.

Dated: June 15, 2023.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

[FR Doc. 2023–13181 Filed 6–20–23; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Northern New Mexico

AGENCY: Office of Environmental Management, Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces an in-person/virtual hybrid open meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Northern New Mexico. The Federal Advisory Committee Act requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Wednesday, July 19, 2023; 1 to 5 p.m. MDT.

ADDRESSES: This hybrid meeting will be open to the public in person and via WebEx. To attend virtually, please contact the Northern New Mexico Citizens Advisory Board (NNMCAB) Executive Director (below) no later than 5 p.m. MDT on Friday, July 14, 2023.

Cities of Gold Hotel, Tribal Room, 10 Cities of Gold Road, Santa Fe, NM 87506.

FOR FURTHER INFORMATION CONTACT: Menice B. Santistevan, NNMCAB Executive Director, by Phone: (505) 699–0631 or Email: *menice.santistevan@em.doe.gov.*

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to provide advice and recommendations concerning the following EM site-specific issues: clean-up activities and environmental restoration; waste and nuclear materials management and disposition; excess facilities; future land use and long-term stewardship. The Board may also be asked to provide advice and recommendations on any EM program components.

Tentative Agenda:

- Surface Water and Storm Water Monitoring Presentation
- Agency Updates

Public Participation: The in-person/online virtual hybrid meeting is open to the public in person or virtually, via WebEx. Written statements may be filed with the Board no later than 5 p.m. MDT on Friday, July 14, 2023, or within seven days after the meeting by sending them to the NNMCAB Executive Director at the aforementioned email address. Written public comments received prior to the meeting will be read into the record. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to submit public comments should follow as directed above.

Minutes: Minutes will be available by emailing or calling Menice Santistevan, NNMCAB Executive Director, at *menice.santistevan@em.doe.gov* or at (505) 699–0631.

Signed in Washington, DC, on June 14, 2023.

LaTanya Butler,

Deputy Committee Management Officer.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. AD10–12–014]

Increasing Market and Planning Efficiency through Improved Software; Second Supplemental Notice of Technical Conference on Increasing Real-Time and Day-Ahead Market and Planning Efficiency Through Improved Software

As first announced in the Notice of Technical Conference issued in this proceeding on February 7, 2023, Commission staff will convene a technical conference on June 27, 28, and 29, 2023 to discuss opportunities for increasing real-time and day-ahead market and planning efficiency of the bulk power system through improved software. Attached to this Second Supplemental Notice is the agenda for the technical conference and speakers' summaries of their presentations.

While the intent of the technical conference is not to focus on any specific matters before the Commission, some conference discussions might include topics at issue in proceedings that are currently pending before the Commission, including topics related to capacity valuation methodologies for renewable, hybrid, or storage resources. These proceedings include, but are not limited to:

PJM Interconnection, L.L.C., Docket No. EL21–83–000
California Independent System Operator Corp., Docket No. ER21–2455–004
New York Independent System Operator, Inc., Docket No. ER21–2460–003
ISO New England, Inc., Docket No. ER22–983–002
PJM Interconnection, L.L.C., Docket No. ER22–962–003
Southwest Power Pool, Inc., Docket No. ER22–1697–001
Midcontinent Independent System Operator, Inc., Docket No. ER22–1640–000
ISO New England, Inc., Docket No. EL22–42–000
Southwest Power Pool, Inc., Docket No. ER22–379–000
PJM Interconnection, L.L.C., Docket No. ER22–1200–000
California Independent System Operator Corp., Docket No. ER23–1485–000
California Independent System Operator Corp., Docket No. ER23–1533–000
California Independent System Operator Corp., Docket No. ER23–1534–000
Midcontinent Independent System Operator, Inc., Docket No. EL23–28
Midcontinent Independent System Operator, Inc., Docket No. ER23–1195
Midcontinent Independent System Operator, Inc., Docket No. EL23–46

The conference will take place in a hybrid format, with presenters and attendees allowed to participate either in-person or virtually. Further details on both in-person and virtual participation will be available on the conference web page.[1] Foreign nationals attending in-person must register through the Commission's website on or before June 2, 2023. We also encourage all other in-person attendees to also register through the Commission's website on or before June 2, 2023, to help ensure Commission staff can provide sufficient physical and virtual facilities and to communicate with attendees in the case of unanticipated emergencies or other changes to the conference schedule or location. Access to the conference (virtual or in-person) may not be available to those who do not register.

The Commission will accept comments following the conference, with a deadline of July 28, 2023.

There is an ''eSubscription'' link on the Commission's website that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

FERC conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations please send an email to *accessibility@ferc.gov* or call toll free (866) 208–3372 (voice) or (202) 502–8659 (TTY), or send a fax to (202) 208–2106 with the required accommodations.

For further information about these conferences, please contact:

Sarah McKinley (Logistical Information), Office of External Affairs, (202) 502–8004, *Sarah.McKinley@ferc.gov*
Alexander Smith (Technical Information), Office of Energy Policy and Innovation, (202) 502–6601, *Alexander.Smith@ferc.gov*

Dated: June 14, 2023.

Debbie-Anne A. Reese,

Deputy Secretary.

Technical Conference: Increasing Real-Time and Day-Ahead Market Efficiency Through Improved Software

Agenda

AD10–12–014

June 27–29, 2023

Tuesday, June 27, 2023

9:15 a.m. Introduction

Elizabeth Topping, Federal Energy Regulatory Commission (*Washington, DC*)

9:30 a.m. Session T1 (*Commission Meeting Room*)

Probabilistic Energy Adequacy Assessment under Extreme Weather Events
- Jinye Zhao, ISO New England (*Holyoke, MA*)
- Stephen George, ISO New England (*Holyoke, MA*)
- Ke Ma, ISO New England (*Holyoke, MA*)
- Steven Judd, ISO New England (*Holyoke, MA*)
- Eamonn Lannoye, EPRI (*Dublin, Ireland*)
- Juan Carlos Martin, EPRI (*Madrid, Spain*)

Transmission Outage Probability Estimation Based on Real-Time Weather Forecast
- Mingguo Hong, ISO New England (*Holyoke, MA*)
- Xiaochuan Luo, ISO New England (*Holyoke, MA*)
- Slava Maslennikov, ISO New England (*Holyoke, MA*)
- Tongxin Zheng, ISO New England (*Holyoke, MA*)

Overview of MISO and PJM Hybrid Multiple Configuration Resource Model Implementation Within PROBE Software
- Qun Gu, PowerGEM (Clifton Park, NY)
- Boris Gisin, PowerGEM (Clifton Park, NY)
- Anthony Giacomoni, PJM Interconnection (Audubon, PA)
- Chuck Hansen, Midcontinent ISO (Carmel, IN)

Optimizing Combined Cycle Units in PJM's Wholesale Energy Markets using a Hybrid Multiple Configuration Resource Model
- Anthony Giacomoni, PJM Interconnection (Audubon, PA)
- Danial Nazemi, PJM Interconnection (Audubon, PA)
- Qun Gu, PowerGEM (Clifton Park, NY)
- Boris Gisin, PowerGEM (Clifton Park, NY)

11:30 a.m. Lunch

12:30 p.m. Session T2 (*Commission Meeting Room*)

Enhancements to Ramp Rate Dependent Spinning Reserve Modeling
- Shubo Zhang, New York ISO (*Rensselaer, NY*)
- John L. Meyer, New York ISO (*Rensselaer, NY*)
- Iiro Harjunkoski, Hitachi Energy (*Mannheim, Germany*)

Determining Dynamic Operating Reserve Requirements for Reliability and Efficient Market Outcomes: Tradeoffs and Price Formation Challenges
- Matthew Musto, New York ISO (*Rensselaer, NY*)
- Kanchan Upadhyay, New York ISO (*Rensselaer, NY*)
- Edward O Lo, Hitachi Energy (*San Jose, CA*)

Operational Experience with Nodal Procurement of Flexible Ramping Product
- Guillermo Bautista-Alderete, California ISO (Folsom, CA)
- George Angelidis, California ISO (Folsom, CA)
- Yu Wan, California ISO (Folsom, CA)

[1] *https://www.ferc.gov/news-events/events/increasing-real-time-and-day-ahead-market-and-planning-efficiency-through.*

Kun Zhao, California ISO (Folsom, CA)

Impact of DERs on Load Distribution Factors in Forecasting
Khaled Abdul-Rahman, California ISO (*Folsom, CA*)
Hani Alarian, California ISO (*Folsom, CA*)
Trevor Ludlow, California ISO (*Folsom, CA*)
Chiranjeevi Madvesh, California ISO (*Folsom, CA*)

Increased Congestion in SPP and Optimization in the Day Ahead Market with Gurobi
Seth Mayfield, Southwest Power Pool (*Little Rock, AR*)
Yasser Bahbaz, Southwest Power Pool (*Little Rock, AR*)

3:00 p.m. Break

3:30 p.m. Session T3 (*Commission Meeting Room*)

MISO Operations Risk Assessment and Uncertainty Management
Congcong Wang, Midcontinent ISO (*Carmel, IN*)
Long Zhao, Midcontinent ISO (*Carmel, IN*)
Jason Howard, Midcontinent ISO (*Carmel, IN*)

Market Simulation Tools and Uncertainty Quantification Methods to Support Operational Uncertainty Management
Nazif Faqiry, Midcontinent ISO (*Carmel, IN*)
Arezou Ghesmati, Midcontinent ISO (*Carmel, IN*)
Bing Huang, Midcontinent ISO (*Carmel, IN*)
Yonghong Chen, Midcontinent ISO (*Carmel, IN*)
Bernard Knueven, National Renewable Energy Laboratory (*Golden, CO*)

Pumped Storage Optimization in Real-time Markets under Uncertainty
Bing Huang, Midcontinent ISO (*Carmel, IN*)
Arezou Ghesmati, Midcontinent ISO (*Carmel, IN*)
Yonghong Chen, Midcontinent ISO (*Carmel, IN*)
Ross Baldick, University of Texas at Austin (*Austin, TX*)

Forecasting Aggregate Electricity Demand on a 5-minute Basis using Machine Learning
Yinghua Wu, PJM Interconnection (*Audubon, PA*)
Laura Walter, PJM Interconnection (*Audubon, PA*)
Anthony Giacomoni, PJM Interconnection (*Audubon, PA*)

Long-Term Outlook for the ERCOT Grid
Pengwei Du, Electric Reliability Corporation of Texas (*Austin, TX*)

6:00 p.m. Adjourn

Wednesday, June 28, 2023

9:00 a.m. Session W–A1 (*Commission Meeting Room*)

Uncertainty-Informed Renewable Energy Scheduling: A Scalable Bilevel Framework
Dongwei Zhao, Massachusetts Institute of Technology (*Cambridge, MA*)
Vladimir Dvorkin, Massachusetts Institute of Technology (*Cambridge, MA*)
Stefanos Delikaraoglou, Axpo Solutions AG (*Zurich, Switzerland*)
Alberto J. Lamadrid L., Lehigh University (*Bethlehem, PA*)
Audun Botterud, Massachusetts Institute of Technology (*Cambridge, MA*)

Enhancing Power System Resilience and Efficiency through Proactive Security Assessments and the Use of powerSAS.m: A Robust, Efficient, and Scalable Security Analysis Tool for Large-Scale Systems
Yang Liu, Argonne National Laboratory (*Lemont, IL*)
Feng Qiu, Argonne National Laboratory (*Lemont, IL*)
Jianzhe Liu, Argonne National Laboratory (*Lemont, IL*)

Stochastic Unit Commitment and Market Clearing in Julia with UnitCommitment.jl
Alinson Santos Xavier, Argonne National Laboratory (*Lemont, IL*)
Ogün Yurdakul, Technische Universität Berlin (*Berlin, Germany*)
Aleksandr M. Kazachkov, University of Florida (*Gainesville, FL*)
Jun He, Purdue University (*West Lafayette, IN*)
Feng Qiu, Argonne National Laboratory (*Lemont, IL*)

Reduced-order Decomposition and Coordination Approach for Markov-based Stochastic UC with High Penetration Level of Wind and BESS
Niranjan Raghunathan, University of Connecticut (*Storrs, CT*)
Peter B. Luh, University of Connecticut and National Taiwan University (*Alexandria, VA*)
Zongjie Wang, University of Connecticut (*Storrs, CT*)
Mikhail A. Bragin, University of California, Riverside (*Riverside, CA*)
Bing Yan, Rochester Institute of Technology (*Rochester, NY*)
Meng Yue, Brookhaven National Laboratories (*Upton, NY*)
Tianqiao Zhao, Brookhaven National Laboratories, (*Upton, NY*)

Learn to Branch and Dive for Large-scale Unit Commitment Problem
Jingtao Qin, University of California, Riverside (*Riverside, CA*)
Nanpeng Yu, University of California, Riverside (*Riverside, CA*)
Mikhail Bragin, University of Connecticut (*Storrs, CT*)

9:00 a.m. Session W–B1 (*Hearing Room One*)

Stochastic Nodal Adequacy Pricing Platform (SNAP)
Richard D. Tabors, Tabors Caramanis Rudkevich (*Newton, MA*)
Aleksandr Rudkevich, Newton Energy Group (*Newton, MA*)
Russel Philbrick, Polaris Systems Optimization (*Seattle, WA*)
Selin Yanikara, Newton Energy Group (*Newton, MA*)

Assessing Nodal Adequacy of Large Power Systems
F. Selin Yanikara, Newton Energy Group (*Newton, MA*)
Russ Philbrick, Polaris Systems Optimization (*Seattle, WA*)
Aleksandr M. Rudkevich, Newton Energy Group (*Newton, MA*)
Sophie Edelman, The Brattle Group (*New York, NY*)

Comparison of Flexibility Reserve and ORDC for Increasing System Flexibility
Phillip de Mello, Electric Power Research Institute (Niskayuna, NY)
Erik Ela, Electric Power Research Institute (Boulder, CO)
Nikita Singhal, Electric Power Research Institute (Palo Alto, CA)
Alexandre Moreira da Silva, Lawrence Berkeley National Laboratory (Berkeley, CA)
Miguel Heleno, Lawrence Berkeley National Laboratory (Berkeley, CA)

ABSCORES, A Novel Application of Banking Scoring and Rating for Electricity Systems
Alberto J. Lamadrid L., Lehigh University (*Bethlehem, PA*)
Audun Botterud, Massachusetts Institute of Technology (*Cambridge, MA*)
Jhi-Young Joo, Lawrence Livermore National Laboratory (*Livermore, CA*)
Shijia Zhao, Argonne National Laboratory (*Lemont, IL*)

Recent Developments in the Day-ahead and Real-time Electricity Market Design and Software Caused by the Higher Energy Costs and Emerging Technologies—European Experience
Petr Svoboda, Unicorn Systems A.S. (*Prague, Czech Republic*)

11:30 a.m. Lunch

12:30 p.m. Session W–A2 (*Commission Meeting Room*)

System Resilience through Electricity System Restoration and Related Services
Douglas Wilson, General Electric (*Edinburgh, United Kingdom*)
James Yu, ScottishPower Energy Networks (*Glasgow, United Kingdom*)
Ian Macpherson, ScottishPower Energy Networks (*Glasgow, United Kingdom*)
Marta Laterza, General Electric (*Glasgow, United Kingdom*)
Marcos Santos, General Electric (*Glasgow, United Kingdom*)
Richard Davey, General Electric (*Glasgow, United Kingdom*)

Coordinated Cross-Border Capacity Calculation Through The FARAO Open-Source Toolbox
Violette Berge, Artelys Canada (*Montréal, Canada*)
Nicolas Omont, Artelys (*Paris, France*)

Advanced Scenario Selection Methods for Probabilistic Transmission Planning Assessments
Eknath Vittal, Electric Power Research Institute (*Palo Alto, CA*)
Anish Gaikwad, Electric Power Research Institute (*Palo Alto, CA*)
Parag Mitra, Electric Power Research Institute (*Palo Alto, CA*)

Incorporating Climate Projections into Grid Models: Bridging the Data Gap to Capture Weather Dependent Representative and Extreme Events and Corresponding Uncertainties
Zhi Zhou, Argonne National Laboratory (*Lemont, IL*)
Neal Mann, Argonne National Laboratory (*Lemont, IL*)
Yanwen Xu, University of Illinois at Chicago, Urbana-Champaign (*Champaign, IL*)
Zuguang Gao, University of Chicago (*Chicago, IL*)
Akintomide Akinsanola, University of Illinois at Chicago (*Chicago, IL*)
Todd Levin, Argonne National Laboratory (*Lemont, IL*)
Jonghwan Kwon, Argonne National Laboratory (*Lemont, IL*)
Audun Botterud, Senior Energy Systems Engineer, Argonne National Laboratory (*Lemont, IL*)

12:30 p.m. Session W–B2 (*Hearing Room One*)

Enhancing Decision Support for Electricity Markets with Machine Learning
Yury Dvorkin, Johns Hopkins University (*Baltimore, MD*)
Robert Ferrando, University of Arizona (*Tucson, AZ*)
Laurent Pagnier, University of Arizona (*Tucson, AZ*)
Zhirui Liang, Johns Hopkins University (*Baltimore, MD*)
Daniel Bienstock, Columbia University (*New York, NY*)
Michael Chertkov, University of Arizona (*Tucson, AZ*)

Boosting Power System Operation Economics via Closed-loop Predict-and-Optimize
Lei Wu, Stevens Institute of Technology (*Hoboken, NJ*)
Xianbang Chen, Stevens Institute of Technology (*Hoboken, NJ*)

Synergistic Integration of Machine Learning and Mathematical Optimization for Sub-hourly Unit Commitment
Jianghua Wu, University of Connecticut (*Storrs, CT*)
Zongjie Wang, University of Connecticut (*Storrs, CT*)
Yonghong Chen, MIDCONTINENT ISO (*Carmel, IN*)
Bing Yan, Rochester Institute of Technology (*Rochester, NY*)
Mikhail Bragin, University of California, Riverside (*Riverside, CA*)

Privacy-Preserving Synthetic Dataset Generation for Power Systems Research
Vladimir Dvorkin, Massachusetts Institute of Technology (*Cambridge, MA*)
Audun Botterud, Massachusetts Institute of Technology (*Cambridge, MA*)

2:30 p.m. Break

3:00 p.m. Session W–A3 (*Commission Meeting Room*)

Parallel Interior-Point Solver for Security Constrained ACOPF problems on SIMD/GPU Architectures
Mihai Anitescu, Argonne National Laboratory (*Lemont, IL*)
François Pacaud, Ecole des Mines (*Paris, France*)
Michel Schanen, Argonne National Laboratory (*Lemont, IL*)
Sungho Shin, Argonne National Laboratory (*Lemont, IL*)
Daniel Adrian Maldonado, Argonne National Laboratory (*Lemont, IL*)

The Need for More Rigorous Calculation of Shadow Prices and LMPs
Xiaoming Feng, Hitachi Energy (*Raleigh, NC*)

Real-Time Market Enhancements for Reliability and Efficiency
Mort Webster, Pennsylvania State University (*University Park, PA*)
Anthony Giacomoni, PJM Interconnection (*Audubon, PA*)
Aravind Retna Kumar, Pennsylvania State University (*University Park, PA*)
Sushant Varghese, Pennsylvania State University (*University Park, PA*)
Shailesh Wasti, Pennsylvania State University (*University Park, PA*)

Economics of Grid-Supported Electric Power Markets: A Fundamental Reconsideration
Leigh Tesfatsion, Iowa State University (*Ames, IA*)

3:00 p.m. Session W–B3 (*Hearing Room One*)

Simulation of Wholesale Electricity Markets with Capacity Expansion and Production Cost Models to Understand Feedback between Short-Term Market Procedures and Long-Term Investment Incentives
Jesse Holzer, Pacific Northwest National Laboratory (*Richland, WA*)
Abhishek Somani, Pacific Northwest National Laboratory (*Richland, WA*)
Brent Eldridge, Pacific Northwest National Laboratory (*Bel Air, MD*)
Diane Baldwin, Pacific Northwest National Laboratory (*Richland, WA*)

Making the Right Resource Choice Requires Making the Right Model Choice
Rodney Kizito, Ascend Analytics (*Wheaton, MD*)
Gary W. Dorris, Ascend Analytics, CEO (*Boulder, CO*)
David Millar, Ascend Analytics (*Boulder, CO*)

Transmission Shortage Pricing By MW-Mile Based Demand Curve
Sina Gharebaghi, Pennsylvania State University (*University Park, PA*)
Xiaoming Feng, Hitachi Energy (*Raleigh, NC*)

Grid OS—A Modern Software Portfolio for Grid Orchestration
Renan Giovanini, General Electric (*Edinburgh, UK*)
Joseph Franz, General Electric (*Melbourne, FL*)

5:00 p.m. Adjourn

Thursday, June 29, 2023

9:30 a.m. Session H1 (*Commission Meeting Room*)

Integration of DER Aggregations in ISO-Scale SCUC Models
Brent Eldridge, Pacific Northwest National Laboratory (*Bel Air, MD*)
Jesse Holzer, Pacific Northwest National Laboratory (*Richland, WA*)
Abhishek Somani, Pacific Northwest National Laboratory (*Richland, WA*)
Eran Schweitzer, Pacific Northwest National Laboratory (*Richland, WA*)
Rabayet Sadnan, Pacific Northwest National Laboratory (*Richland, WA*)
Nawaf Nazir, Pacific Northwest National Laboratory (*Richland, WA*)

Soumya Kundu, Pacific Northwest National Laboratory (*Richland, WA*)

Current-Voltage AC Optimal Power Flow for Unbalanced Distribution Network
Mojdeh Khorsand Hedman, Arizona State University (*Tempe, AZ*)
Zahra Soltani, Arizona State University (*Tempe, AZ*)
Shanshan Ma, Arizona State University (*Las Vegas, NV*)

Empowering Electricity Markets through Distributed Energy Resources and Smart Building Setpoint Optimization: A Graph Neural Network-Based Deep Reinforcement Learning Approach
You Lin, Massachusetts Institute of Technology (Cambridge, MA)
Audun Botterud, Massachusetts Institute of Technology (*Cambridge, MA*)
Daisy Green, Massachusetts Institute of Technology (*Cambridge, MA*)
Leslie Norford, Massachusetts Institute of Technology (*Cambridge, MA*)
Jeremy Gregory, Massachusetts Institute of Technology (*Cambridge, MA*)

Multi-timescale Operations of Nuclear-Renewable Hybrid Energy Systems for Reserve and Thermal Products Provision
Jie Zhang, University of Texas at Dallas (*Richardson, TX*)
Jubeyer Rahman, University of Texas at Dallas (*Richardson, TX*)

11:30 a.m. Lunch

12:30 p.m. Session H2 (*Commission Meeting Room*)

Optimizing Stand-Alone Battery Storage Operations Scheduling Under Uncertainties in German Residential Electricity Market Using Stochastic Dual Dynamic Programming
Pattanun Chanpiwat, University of Maryland & Aalto University (*College Park, MD; Espoo, Finland*)
Fabricio Oliveira, Aalto University (*Espoo, Finland*)
Steven A. Gabriel, University of Maryland (*College Park, MD*)

Integration of Hybrid Storage Resources into Wholesale Electricity Markets
Nikita Singhal, Electric Power Research Institute (*Palo Alto, CA*)
Rajni Kant Bansal, Johns Hopkins University (*Baltimore, MD*)
Erik Ela, Electric Power Research Institute (*Palo Alto, CA*)
Julie Mulvaney Kemp, Lawrence Berkeley National Laboratory (*Berkeley, CA*)
Miguel Heleno, Lawrence Berkeley National Laboratory (*Berkeley, CA*)

Predicting Strategic Energy Storage Behaviors
Yuexin Bian, University of California (*San Diego, CA*)
Ningkun Zheng, Columbia University (*New York City, NY*)
Yang Zheng, University of California—San Diego (*San Diego, CA*)
Bolun Xu, Columbia University (*New York, NY*)
Yuanyuan Shi, University of California—San Diego (*San Diego, CA*)

Energy Storage Participation Algorithm Competition (ESPA-Comp)
Brent Eldridge, Pacific Northwest National Laboratory (*Bel Air, MD*)
Jesse Holzer, Pacific Northwest National Laboratory (*r*)
Abhishek Somani, Pacific Northwest National Laboratory (*Richland, WA*)
Kostas Oikonomou, Pacific Northwest National Laboratory (*Richland, WA*)
Brittany Tarufelli, Pacific Northwest National Laboratory (*Laramie, WY*)
Li He, Pacific Northwest National Laboratory (*Richland, WA*)

2:30 p.m. Break

3:00 p.m. Session H3 (*Commission Meeting Room*)

Congestion Mitigation with Transmission Reconfigurations in the Evergy Footprint
Pablo A. Ruiz, NewGrid (*Somerville, MA*)
Derek Brown, Evergy (*Topeka, KS*)
Jeremy Harris, Evergy (*Topeka, KS*)
German Lorenzon, NewGrid (*Somerville, MA*)
Grant Wilkerson, Evergy (*Kansas City, MO*)

Optimal Transmission Expansion Planning with Grid Enhancing Technologies
Swaroop Srinivasrao Guggilam, Electric Power Research Institute (*Knoxville, TN*)
Alberto Del Rosso, Electric Power Research Institute (*Knoxville, TN*)

The Key Role of Extended ACOPF-based Decision Making for Supporting Clean, Cost-Effective and Reliable/Resilient Electricity Services
Maria Ilic, Carnegie Mellon University (*Pittsburgh, PA*)
Rupamathi Jaddivada, SmartGridz (*Boston, MA*)
Jeffrey Lang, Massachusetts Institute of Technology (*Cambridge, MA*)
Eric Allen, SmartGridz (*Boston, MA*)

Data & API Standards for Clean Energy Solutions and Digital Innovation
Priya Barua, Clean Energy Buyers Institute (*Washington, DC*)
Ben Gerber, M–RETS (*Minneapolis, MN*)

Mine Production Scheduling under Time-of-Use Power Rates with Renewable Energy Sources
Daniel Bienstock, Columbia University (*New York, NY*)
Amy Mcbrayer, South Dakota School of Mines (*Rapid City, SD*)
Andrea Brickey, South Dakota School of Mines (*Rapid City, SD*)
Alexandra Newman, Colorado School of Mines (*Golden, CO*)

5:30 p.m. Adjourn

Conference Abstracts

Day 1—Tuesday, June 27

Session T1 (Tuesday, June 27, 9:30 a.m.) Commission Meeting Room

Probabilistic Energy Adequacy Assessment Under Extreme Weather Events

Dr. Jinye Zhao, Technical Manager, ISO New England (Holyoke, MA)
Stephen George, Director, ISO New England (Holyoke, MA)
Dr. Ke Ma, Senior Analyst, ISO New England (Holyoke, MA)
Steven Judd, Manager, ISO New England (Holyoke, MA)
Dr. Eamonn Lannoye, Program Manager, Electric Power Research Institute (Dublin, Ireland)
Juan Carlos Martin, Senior Engineer, Electric Power Research Institute (Madrid, Spain)

As intermittent and limited energy resources become a larger portion of the region's generation resource mix, and as the region's demand becomes increasingly electrified, it has become increasingly important to understand the operational risks associated with future weather extremes. To better inform the region's understanding of these risks, ISO New England in collaboration with EPRI, has developed a probabilistic energy adequacy assessment framework. This approach of stress testing the system's energy adequacy focuses on generating comprehensive extreme weather scenarios for the New England region and performing risk analyses across these scenarios. The framework offers a tailored approach to identify unique energy adequacy risks faced by the New England power system and enables us to analyze related stressors under extreme events.

Transmission Outage Probability Estimation Based on Real-Time Weather Forecast

Dr. Mingguo Hong, Principal Analyst, ISO New England (Holyoke, MA)
Dr. Xiaochuan Luo, Manager, ISO New England (Holyoke, MA)

Dr. Slava Maslennikov, Technical Manager, ISO New England (Holyoke, MA)
Dr. Tongxin Zheng, Director, ISO New England (Holyoke, MA)

Extreme weather patterns including both winter and summer storms have been posing increasing threats to power transmission security in the New England area. Being able to accurately predict their impacts will benefit both power system operation and planning. In recent years, the ISO New England has been developing machine-learning algorithms for estimating the probability of transmission line outage in real-time, given weather forecast variables such as wind, temperature, snow, and rain precipitation, etc. This presentation will share our study findings and on-going software implementation experience.

Overview of MISO and PJM Hybrid Multiple Configuration Resource Model Implementation Within PROBE Software

Dr. Anthony Giacomoni, Manager, Advanced Analytics, PJM Interconnection (Audubon, PA)
Dr. Danial Nazemi, Operations Research Engineer II, PJM Interconnection (Audubon, PA)
Dr. Qun Gu, Principal Consultant, PowerGEM (Clifton Park, NY)
Dr. Boris Gisin, President, PowerGEM (Clifton Park, NY)

For the past three years, PJM, MISO and PowerGEM have been working jointly on developing an advanced SCUC algorithm to prepare for the full-scale implementation of a Multiple Configuration Resource (MCR) model in their energy markets. PJM currently uses aggregate models for MCRs that do not accurately capture their true operating characteristics. Often MCRs may need to overestimate costs to ensure cost recovery, underestimate costs to ensure selection or offer reduced operating ranges to be able to accurately reflect their operating capabilities. This presentation will focus on the impacts to PJM's energy markets from optimizing the multiple configurations and components of their combined cycle units. The optimization of multiple configurations and components is very challenging due to the additional integer variables and constraints that impact the solution time and may lead to performance challenges. A prototype full-scale MCR model has been implemented in the PROBE Day-Ahead software, which is currently a critical component of PJM's Day-Ahead Market (DAM) clearing process. The prototype MCR model has the ability to perform energy and ancillary service co-optimization for combined cycle units with multiple configurations and components. The developed model has no practical limits on the number of configurations that each unit can have and the model allows for simultaneously enforcing configuration and component level constraints. Benefits of the new model include enhanced modeling flexibility and accuracy, which allows combined cycle participants to submit bids that align with their units' physical operating constraints, better alignment with the real-time model and market outcomes with increased social benefits. To quantify the impacts of the MCR model on PJM's energy markets, PJM gathered configuration and component data from a large number of combined cycle units in its footprint. Simulations using one year of historical DAM data were then performed to measure the impacts of the MCR model on the clearing engine's computational performance and market outcomes. Results clearly demonstrate significant potential bid production cost savings of over $100 million per year with a very modest increase in solution time. The MCR model is currently being implemented in PJM's DAM for the optimization of synchronous condensers. It is planned that after successful implementation of the MCR model for synchronous condensers the same model will be implemented for combined cycle units and possibly for hybrid resources as well.

Session T2 (Tuesday, June 27, 12:30 p.m.) (Commission Meeting Room)

Enhancements to Ramp Rate Dependent Spinning Reserve Modeling

Dr. Shubo Zhang, Energy Market Engineer, New York ISO (Rensselaer, NY)
John L. Meyer, Senior Energy Market Engineer, New York ISO (Rensselaer, NY)
Iiro Harjunkoski, Researcher, Hitachi Energy (Mannheim, Germany)

In a joint effort between the NYISO and Hitachi Energy, a Ramp Rate Dependent (RRD) formulation of spinning reserve scheduling that utilizes Multiple Response Rates (MRR) across a Combined Cycle Gas Turbine (CCGT) generator or other dispatchable resource's range of output has been developed. To provide more flexibility to Market Participants, a ''Limited Participation'' conceptual strategy is also included that would allow a CCGT or other dispatchable resource to selectively provide spinning reserves or regulation for a certain range of output. This presentation will discuss the market basis and design of Limited Participation in spinning reserves and regulation, in the context of Ramp Rate Dependent Spinning Reserve Modeling.

Determining Dynamic Operating Reserve Requirements for Reliability and Efficient Market Outcomes: Tradeoffs and Price Formation Challenges

Matthew Musto, Technical Specialist—Market Solutions Engineering, NYISO (Rensselaer, NY)
Kanchan Upadhyay, Senior Energy Market Engineer—Market Solutions Engineering, NYISO (Rensselaer, NY)
Edward O Lo, Consultant, Hitachi Energy (San Jose, CA)

With increasing intermittent resources in the generation mix, the need for more economic responsiveness and operational flexibility while maintaining system reliability is growing. The NYISO and Hitachi Energy have been working on advanced design and techniques for calculating operating reserve requirements dynamically for each reserve region while simultaneously optimizing the dispatch solution in the market clearing engine. A key benefit of the dynamic reserves formulation is the functionality to determine the least-cost generation and reserve mix to meet load. This dynamic determination of reserve requirements in New York Control Area (NYCA) and all reserve regions within the NYCA creates new tradeoffs between energy schedules and reserve requirements. This presentation will discuss these tradeoffs and highlight the associated price formation challenge.

Operational Experience with Nodal Procurement of Flexible Ramping Product

Dr. Guillermo Bautista-Alderete, Director, Market Analysis & Forecasting, California ISO (Folsom, CA)
George Angelidis, Executive Principal—Power Systems and Market Technology, California ISO (Folsom, CA)
Yu Wan, Power Systems Engineer, California ISO (Folsom, CA)
Kun Zhao, Market Engineering Specialist Lead, California ISO (Folsom, CA)

The CAISO's market procures flexible ramping capacity to manage weather-based uncertainty realized in real time. The CAISO introduced this product in 2016 using a procurement requirement at the system level. Using a system-level procurement requirement, the market frequently procured flexible ramping capacity from locations impacted by

congestion, thereby stranding the flexible ramping capacity. The CAISO has enhanced the design of the flexible ramping product using a formulation that observes transmission constraints. This approach considers congestion management as part of the procurement of flexible ramping capacity helping to ensure the CAISO can deploy this capacity when uncertainty arises. This new design poses additional complexity because the market clearing process now considers transmission constraints for energy and for flexible ramping capacity. The CAISO will provide an update on the performance of its flexible ramping product under this new design.

Impact of DERs on Load Distribution Factors in Forecasting

Dr. Khaled Abdul-Rahman, Vice President, Power System and Market Technology, California ISO (Folsom, CA)
Hani Alarian, Executive Director of Power Systems Technology Operations, California ISO (Folsom, CA)
Trevor Ludlow, Specialist Lead of Power Systems Technology Operations, California ISO (Folsom, CA)
Chiranjeevi Madvesh, Lead Engineer of Power Systems Technology Operations, California ISO (Folsom, CA)

The calculation of load distributing factors (LDFs) is traditionally performed based on a collection of historical state estimator calculated values and stored in libraries for use when simulating power system operations in look-ahead market and reliability applications. The inherit assumption is that bus loads are accurately estimated from the aggregate system load forecast using LDFs, and generation quantities are deterministically known. Accordingly, it is assumed that there is a strong correlation between the system load and individual bus loads. However, the proliferation of behind-the-meter distributed energy resources, solar rooftops, batteries, hybrid resources, as well as the use of behind the-meter demand response utility programs, and electric vehicles introduces a non-conforming load component at locations that were previously conforming loads.

This issue requires a more accurate forecast of non-conforming loads by taking into consideration the probabilistic nature of bus loads and variable/intermittent generation. The CAISO's enhanced LDF forecast algorithm takes into account not just the average hour of the day and the day of the week but includes machine learning ability to distinguish between flows that scales up with load in both a non-linear and linear fashion. It also includes a new fusion-forecasting model that improves forecasting accuracy. Additionally, the CAISO's algorithm uses data engineering and preprocessing options to increase the accuracy of the proposed model. The CAISO analyzes load data to verify that the proposed methodology provides higher forecasting accuracy with lower error indices.

Increased Congestion in SPP and Optimization in the Day Ahead Market With Gurobi

Seth Mayfield, Manager of Market Support & Analysis, Southwest Power Pool (Little Rock, AR)
Yasser Bahbaz, Director of Markets Development, Southwest Power Pool (Little Rock, AR)

SPP has seen substantial increased congestion in recent years. These trends have numerous reliability and economic impact. In the Day-Ahead Market, SPP has noticed high transmission activation leading to longer optimization runtimes. High activations results in large increases in the mathematical growth, which then results in slower Mixed Integer Program (MIP) runtimes. Other factors include increasing market rules complexity (such as uncertainty product) and additional market resource registrations. SPP performed a study where we evaluate swapping our existing optimization engine (IBM's CPlex) with Gurobi's optimization engine. The study reran every approved DAMKT SCUC operating day for 2021 (365 cases). Gurobi solved the cases 41% faster than CPlex using Gurobi without tuning. A very light discussion with Gurobi resulted in a few tuning suggestions which pushed the runtime reduction to 43%. SPP is in the process of acquiring Gurobi licenses and will work with our software vendor to incorporate the engine into our market. Phase 1 will include simultaneously running both CPlex and Gurobi as we believe this will give us the best/fastest results for each day. It is expected that there will be a transition to using more Gurobi instances than CPlex as time goes on.

Session T3 (Tuesday, June 27, 3:30 p.m.) (Commission Meeting Room)

MISO Operations Risk Assessment and Uncertainty Management

Dr. Congcong Wang, Lead, Operations Risk Assessment, Midcontinent ISO (Carmel, IN)
Dr Long Zhao, Senior Advisor of Operations Risk Assessment, Midcontinent ISO (Carmel, IN)
Jason Howard, Director of Operations Risk Management, Midcontinent ISO (Carmel, IN)

Fleet transition is driving a new risk profile at MISO. Uncertainty and Variability are increasing in their intensity, diversity, and volatility. While probabilistic forecasting has made progress for wind and solar, its integration into operations and markets is uneven. Furthermore, uncertainty comes in more sources than just renewable energy such as generation and transmission outages, fuel scarcity especially during extreme weather events, resulting in challenges for the RTO to manage the aggregated or net uncertainty. This presentation will outline MISO's operations risk assessment and uncertainty management initiatives including: (1) Characterize Risks—transform traditional deterministic renewable, load and ''net'' load forecasts to probabilistic forecasts in production systems; and assess generation and fuel risks to better capture the unknowns; (2) Integrate risks into Operations Situational Awareness and Operations Planning—provide control room a dynamic and geographically granular visualization of operating reserve margin; and visibility of weather driven operations risks; (3) Automate risk management through market products with dynamic reserve requirements—assess net uncertainty across different timeframes; and predict risks to establish a daily target for procuring market-based reserves using analytical and meteorological techniques. This work is done in collaboration with R&D through the joint Uncertainty Roadmap.

Market Simulation Tools and Uncertainty Quantification Methods To Support Operational Uncertainty Management

Dr. Nazif Faqiry, R&D Engineer, Midcontinent ISO (Carmel, IN)
Dr. Arezou Ghesmati, R&D Engineer, Midcontinent ISO (Carmel, IN)
Dr. Bing Huang, R&D Engineer, Midcontinent ISO (Carmel, IN)
Dr. Yonghong Chen, Consulting Advisor, Midcontinent ISO (Carmel, IN)
Dr. Bernard Knueven, Research Scientist, National Renewable Energy Laboratory (Golden, CO)

Portfolio evolution and more frequent extreme weather events are introducing more challenges to MISO Market Operations with new risk profiles. To improve market efficiency and generate efficient price signals for operational and investment decisions, it is increasingly important to align market

design with reliability and risk management needs. This work presents the Electrical Grid Research & Engineering (EGRET) market simulation tool adapted and enhanced at MISO to evaluate existing and future system, and a novel netload ramp uncertainty prediction and scenario generation method to support stochastic simulation and reserve requirement settings. First, it presents a multi-periods market simulation tool and its capabilities, including rolling real-time unit commitment and economic dispatch (UCED), followed by the results of 8 GW solar penetration study. Then, it presents a novel method that is developed to predict and generate scenarios for uncertainties across different lead times. The scenarios can be used as inputs to the market simulation tool for stochastic simulation. The two parts together may lead to multi-scenario stochastic unit commitment in the future. In the near term, the stochastic market simulation can help to validate market design and operational procedures. The uncertainty predication and scenario generation may help operational situational awareness and better define reserve requirements and operational margins.

Pumped Storage Optimization in Real-Time Markets Under Uncertainty

Bing Huang, Research Engineer, Midcontinent ISO (Carmel, IN)
Arezou Ghesmati, R&D Scientist, Midcontinent ISO (Carmel, IN)
Yonghong Chen, Consulting Advisor, Midcontinent ISO (Carmel, IN)
Ross Baldick, Emeritus Professor, University of Texas at Austin (Austin, TX)

Pumped storage hydro units (PSHU) can provide flexibility to power systems and may especially be valuable with increasing shares of intermittent renewable resources. However, the scheduling of PSHUs, particularly in the real-time market, has not been thoroughly studied. To enhance the use of PSH resources and leverage their flexibility, it is important to incorporate the uncertainties to properly address the risks in the real-time market operation. In this work, first a deterministic PSHU model that incorporates the state of charge in the Day-ahead market optimization is introduced. Second, two pumped storage hydro (PSH) models that use probabilistic price forecasts are proposed for Look-ahead commitment (LAC) in the real-time market operation. A risk neutral stochastic PSH model and a risk averse robust optimization PSH model are developed using the probabilistic price forecasts to capture the real-time market uncertainties. Numerical studies in Mid-continent Independent System Operator (MISO) system demonstrate that the proposed models improve market efficiency and reduce PSH real time risk compared to the current approach. Probabilistic forecast for Real Time Locational Marginal Price (RT–LMP) is created and embedded into the proposed stochastic and robust optimization models, a statistically robust approach is used to generate scenarios for reflecting the temporal inter-dependence of the LMP forecast uncertainties.

Forecasting Aggregate Electricity Demand on a 5-Minute Basis Using Machine Learning

Dr. Yinghua Wu, Senior Lead Data Scientist, PJM Interconnection (Audubon, PA)
Laura Walter, Senior Lead Data Scientist, PJM Interconnection (Audubon, PA)
Dr. Anthony Giacomoni, Manager—Advanced Analytics, PJM Interconnection (Audubon, PA)

PJM currently has two load forecasts used in dispatch and real-time operations. These forecasts are comprised of the short-term forecast, which is the forecasted hourly average load for the next seven days, and the very short-term load forecast, which is the forecasted 5-minute load averages for the next six hours. The very short-term load forecast is constantly fed into the real-time dispatch software for optimal power flow calculations and real-time market pricing. It is of crucial importance that these forecasts closely match the actual load in the near future to maintain system frequency and voltage. If not, dispatchers must take action to quickly intervene and adjust the load up or down. The load profiles generally follow temporal patterns, but are also driven by weather and other usage patterns. Given the recent rapid growth of machine learning technologies, this presentation will survey a collection of some of the most representative and innovative methods that are suitable to time series predictions such as load forecasting, *e.g.,* gradient boosting, recurrent neural network, causal convolution, etc. We will also revisit some traditional methods such as generalized linear models and automatic regressive moving average (ARMA) methods to explore whether they can capture the load shape in short horizons. We will survey and analyze these new technologies for their power of prediction to see if these methods provide the potential to improve on current forecasting practices.

Long-Term Outlook for the ERCOT Grid

Pengwei Du, Supervisor—Economic Analysis & Long Term Planning Studies, The Electric Reliability Council of Texas (Austin, Texas)

The bulk transmission network within ERCOT consists of the 60-kilovolt (kV) and higher transmission lines and associated equipment. ERCOT conducts a forward-looking study to understand long-term reliability and economics need to ensure continued system reliability and efficiency. This talk will present the key challenges and findings from the most recent long-term system assessment planning study, which accounts for the inherent uncertainty of planning the system in the 10- to 15-year planning horizon.

Day 2—Wednesday, June 28

Session W–A1 (Wednesday, June 28, 9:00 a.m.) (Commission Meeting Room)

Uncertainty-Informed Renewable Energy Scheduling: A Scalable Bilevel Framework

Dr. Dongwei Zhao, Postdoctoral Associate, Massachusetts Institute of Technology (Cambridge, MA)
Dr. Vladimir Dvorkin, Postdoctoral Fellow, Massachusetts Institute of Technology (Cambridge, MA)
Dr. Stefanos Delikaraoglou, Data Scientist, Axpo Solutions AG (Zurich, Switzerland)
Dr. Alberto J. Lamadrid L., Associate Professor, Lehigh University (Bethlehem, PA)
Dr. Audun Botterud, Principal Research Scientist, Massachusetts Institute of Technology (Cambridge, MA)

The fast-growing variable renewable energy sources (VRES) in electricity markets are creating challenges to uncertainty management. This work addresses these challenges by adopting an uncertainty-informed adjustment toward VRES bidding quantities in the day-ahead market and minimizing expected system costs under the sequential market-clearing structure. However, implementing this mechanism requires solving a bilevel optimization problem, which is computationally difficult for practical large-scale systems. To overcome this challenge, we propose a novel technique based on strong duality and McCormick envelopes. This approach relaxes the original problem to a linear program, enabling efficient computation for large-scale systems. We conduct case studies on the 1576-bus NYISO systems and compare our bilevel VRES-adjustment model with the myopic strategy where VRES producers bid the forecast value in the day-ahead market. The results

demonstrate that under a future high VRES penetration level (*e.g.,* 40%), our bilevel framework can significantly reduce the expected system cost and the volatility of the market prices, participants' revenues, and real-time re-dispatch adjustments, by efficiently optimizing VRES quantities in the day-ahead market. Furthermore, we found that increasing transmission ability may incur a much higher system cost under the myopic strategy while a lower cost under the bilevel model) because of the lack of flexible generators or reserves in real time to deal with uncertainty.

Enhancing Power System Resilience and Efficiency Through Proactive Security Assessments and the Use of powerSAS.m: A Robust, Efficient, and Scalable Security Analysis Tool for Large-Scale Systems

Dr. Yang Liu, Postdoctoral Appointee, Argonne National Laboratory (Lemont, IL)
Dr. Feng Qiu, Principal Computational Scientist, Argonne National Laboratory (Lemont, IL)
Dr. Jianzhe Liu, Energy Systems Scientist, Argonne National Laboratory (Lemont, IL)

Power system security assessment is directly related to increasing real-time and day-ahead market and planning efficiency because it helps ensure the reliable and secure operation of the power system, which is essential for efficient market and planning activities. Without proper security assessments, the power system is vulnerable to a variety of threats, including cyber attacks, natural disasters, and equipment failures, which can disrupt the operation of the system and lead to market inefficiencies and planning uncertainties. By performing security assessments and identifying potential vulnerabilities, system operators can take proactive measures to mitigate risks and improve the reliability and efficiency of the power system, which, in turn, supports the goals of real-time and day-ahead market and planning efficiency. Additionally, advanced software tools and models can be used to support security assessments, enabling operators to better anticipate and respond to potential security threats and further improve the efficiency and reliability of the power system. Existing tools (commercial or open-source) work fine for routine security analysis under normal operating conditions. However, in resilience analysis, which studies the system security and reliability under stressed scenarios, existing tools often experience various numerical issues, significantly impacting operators' assessment of system resilience. A recent example is the non-convergence issues with PSS/E, one of the best commercial power system analysis tools used in the DOE Puerto Rico resilience project led by Argonne. The numerical issues forced the team to give up more advanced analysis. A robust and efficient security analysis tool is imperative for resilience study in large-scale systems. In this talk, we will introduce a recently released open-source power system security analysis tool called powerSAS.m. The powerSAS.m is a robust, efficient, and scalable power grid analysis framework based on semi-analytical solutions (SAS) technology. The talk will cover the following two critical aspects and discuss how they are directly related to increasing real-time and day-ahead market and planning efficiency. First, we will introduce the fundamentals of the SAS technology and the major functionalities of the powerSAS.m, including (1) Steady-state analysis, including power flow, continuation power flow, and contingency analysis. (2) Dynamic security analysis, including voltage stability analysis, transient stability analysis, and flexible user-defined simulation. (3) Hybrid extended-term simulation provides adaptive quasi-steady-state-dynamic hybrid simulation in extended term with high accuracy and efficiency. We will also introduce some ongoing functionalities, including the SAS-based electromagnetic transient (EMT) simulation and multi-scale simulations. Second, we will present some use cases to demonstrate the key features and performance of the SAS technology and powerSAS.m tool, including: (1) High numerical robustness. Backed by the SAS approach, the PowerSAS tool provides much better convergence than the tools using traditional Newton-type algebraic equation solvers when solving algebraic equations/ordinary differential equations/differential-algebraic equations. (2) Enhanced computational efficiency and scalability. Due to the analytical nature, PowerSAS provides model-adaptive high-accuracy approximation, which brings significantly extended effective range and much larger steps for steady-state/dynamic analysis. PowerSAS has been used to solve large-scale system cases with 200,000+ buses.

Stochastic Unit Commitment and Market Clearing in Julia With UnitCommitment.jl

Dr. Alinson Santos Xavier, Computational Scientist, Argonne National Laboratory (Lemont, IL)
Ogün Yurdakul, Ph.D. Candidate, Technische Universität Berlin (Berlin, Germany)
Dr. Aleksandr M. Kazachkov, Assistant Professor, University of Florida (Gainesville, FL)
Jun He, Professor, Purdue University (West Lafayette, IN)
Dr. Feng Qiu, Principal Computational Scientist, Argonne National Laboratory (Lemont, IL)

UnitCommitment.jl (UC.jl) is a comprehensive open-source optimization package for the Security-Constrained Unit Commitment Problem (SCUC), providing an extensible and fully-documented data format for the problem, Julia/JuMP implementations of state-of-the-art mathematical formulations and solution methods, as well as a diverse collection of realistic and large-scale benchmark instances. This talk focuses on two major features recently introduced to the package. Firstly, the package now supports modeling and optimizing two-stage stochastic versions of the problem, in addition to the deterministic SCUC. Compared to existing implementations, UC.jl allows a broader set of network parameters to be treated as uncertain, including not only demands and generation limits, but also production costs, network topology, transmission limits, among others. Benchmark scripts are provided to accurately evaluate the performance of different stochastic solution methods. Secondly, the package now includes various functionalities for market clearing, such as the computation of generator payments and locational marginal prices (LMPs) using different methods proposed in the literature. In this talk, we will discuss the usage of these new features, technical challenges associated with them, and the potential simulations or studies that they enable.

Reduced-Order Decomposition and Coordination Approach for Markov-Based Stochastic UC With High Penetration Level of Wind and BESS

Niranjan Raghunathan, Ph.D. Student, University of Connecticut (Storrs, CT)
Dr. Peter B. Luh, Professor, University of Connecticut and National Taiwan University (Alexandria, VA)
Dr. Zongjie Wang, Professor, University of Connecticut (Storrs, CT)
Dr. Mikhail A. Bragin, Professor, University of California, Riverside (Riverside, CA)
Dr. Bing Yan, Professor, Rochester Institute of Technology (Rochester, NY)
Dr. Meng Yue, Research Staff Electrical Engineer, Brookhaven National Laboratories (Upton, NY)

Dr. Tianqiao Zhao, Renewable Energy Group, Brookhaven National Laboratories (Upton, NY)

With the growing need to achieve carbon neutrality, integrating renewable energy (*e.g.,* wind and solar) and battery energy storage systems (BESSs) into the grid is an urgent and challenging enterprise. At the day-ahead stage, unit commitment (UC) decisions need to account for uncertainties of geographically distributed renewable generation. BESS integration can help mitigate intermittence and reduce curtailment by storing energy during high renewable generation periods and releasing energy when needed, thus improving the cost efficiency of grid operation. Therefore, ensuring economic and reliable grid operations with the significant rise in renewable energy penetration necessitates the consideration of spatially distributed uncertainties and BESS in UC. To achieve this, a risk-neutral approach (*i.e.,* scenario-based stochastic UC and Markov-based stochastic UC) is preferred over risk-averse approaches (*e.g.,* robust optimization and interval optimization), as the latter yields overly conservative solutions. Between the risk-neutral approaches, Markov-based approaches have two advantages over scenario-based approaches: (1) Due to the Markov property, where stochastic information at the next time step depends only on the information at the current time step, the uncertainty can be compactly modeled by wind generation states at each time step and state transitions between subsequent time steps. Consequently, the overall number of possible states and transitions in the Markov model increases linearly with the number of intervals in the optimization horizon, whereas the number of possible scenarios increases exponentially. (2) Reduced Markov models preserve the volatility of wind generation, the underlying spatio-temporal correlation structure, and low-probability, high-impact events more effectively in uncertainty sets compared to scenarios. Therefore, the problem is formulated as Markov-based stochastic UC. With distributed wind, however, the number of possible wind states grows exponentially with the number of wind farms in different locations considered, posing major computational difficulties. To reduce complexity, an innovative decomposition and coordination framework is developed, where approximate area subproblems are formulated by utilizing area-perspective, reduced-order Markov models. In these models, the variability of local (in-area) windfarms is emphasized while that of nonlocal (out-of-area) windfarms is approximated by using Principal Component Analysis (PCA) to reduce dimensionality while preserving the maximum amount of variation. This is a reasonable approximation because variations at the local level have more impact on the behavior of local units and power flow through local transmission lines compared to variations at distant locations. The objective of an approximate area subproblem is to optimize in-area resources based on its area-perspective Markov model. The approximate area subproblems are solved iteratively while their solutions are coordinated using Surrogate Absolute-Value Lagrangian Relaxation (SAVLR), a state-of-the-art dual method with faster convergence than traditional Lagrangian Relaxation (LR)-based methods. To improve performance, an online filtering method for removing redundant transmission capacity constraints at each iteration is implemented in parallel by utilizing multiple cores. The solutions are validated using Monte Carlo simulations. Testing results based on the 118-bus system with 5 distributed wind farms show the effectiveness of the method in finding low-cost and robust UC solutions in a timely manner for multiple cases with different volatilities of wind generation and simulated extreme weather events. Analysis of the operation of BESSs shows that they absorb excess energy during high wind periods and release the energy during low wind periods, thus reducing wind curtailment and overall costs.

Learn To Branch and Dive for Large-Scale Unit Commitment Problem

Jingtao Qin, Research Assistant, University of California, Riverside (Riverside, CA)
Nanpeng Yu, Associate Professor, University of California, Riverside (Riverside, CA)
Mikhail Bragin, Assistant Research Professor, University of Connecticut (Storrs, CT)

Unit commitment (UC) problems are typically formulated as mixed-integer program (MIP) and solved by the branch-and-bound (B\&B) paradigm. The recent advances in graph neural network (GNN) motivate the application of GNN in learning to dive and branch for B\&B algorithm in modern MIP solvers. Existing GNN models are mostly constructed from B\&B trees, which are computationally expensive when dealing with large-scale UC problems. In this paper, we propose a physical network information-based hierarchical graph convolution model for neural diving that leverages the underlying features of various components of power systems to find high-quality variable assignments. Furthermore, we adopt the B\&B tree-based graph convolution model for neural branching to select the optimal variables for branching at each node of the B\&B tree. Finally, we integrate neural diving and neural branching into a modern MIP solver to establish a novel neural MIP solver that is specially designed for large-scale UC problems. Numeral studies show that our proposed model has better performance and scalability than the baseline B\&B tree-based model on neural diving. Moreover, the neural MIP solver yields the lowest MIPGap for all testing days after combining it with our proposed neural diving model and baseline neural branching model.

Session W–B1 (Wednesday, June 28, 9:00 a.m.) (Hearing Room One)

Stochastic Nodal Adequacy Pricing Platform (SNAP)

Dr Richard D. Tabors, Partner and President, Tabors Caramanis Rudkevich (Newton, MA)
Dr. Aleksandr Rudkevich, President, Newton Energy Group (Newton, MA)
Russel Philbrick, President, Polaris Systems Optimization (Seattle, WA)
Dr. Selin Yanikara, Analyst, Newton Energy Group (Newton, MA)

The Stochastic Nodal Adequacy Pricing Platform (SNAP) software system provides an implemented methodology to calculate the probability and value of RESOURCE INADEQUACY of electricity supply on an hourly basis for a period of one to five days ahead of real time. The stochasticity of SNAP is driven by the stochastic weather forecasts available and provided by IBM The Weather Company on a i5 day forward basis for a 4x4km grid worldwide (SNAP uses at most 5). Forecasts are developed from 76 different numerical weather prediction models (and their ensemble members) as inputs to their forecast system. Bayesian model averaging is used to correct for systematic errors (bias). Results are rearranged to create 100 synthetic weather system scenarios through the use of Ensemble Copula Quantile-Coupling technique. The result is a probabilistic forecast within which each of the scenarios is equally likely. As the electric supply system moves toward greater dependence on renewable sources both in front of and behind the meter and as weather conditions are evolving, the stochastics of weather have become a, if not the

driving force in forecasting power system adequacy. SNAP is developed as an information/assist tool for operational planning at the utility system level. SNAP has been developed with funding from the Department of Energy's ARPA–E PERFORM program. SNAP uses the individual components of the weather forecast scenarios to create 100 probabilistic scenarios of the output of individual wind and solar locations as well forecasting of demand incorporating behind the meter generation. Based on the probability of renewable supply, demand, and the probability of outage of traditional supply sources and transmission, SNAP runs 100,000 Monte Carlo SCED/SCUC runs of the commercially available cloud-based ENELYTIX software system to identify the existence of resource inadequacy, the nodal location of that inadequacy, its cause and potential solutions. The objective is to present the structure of the computational and analytic processes that allow for running and evaluation of 100,000 scenarios for each individual forecast hour. The presentation will discuss the cloud-based structure the allows the analysis to be completed in under 50 minutes using 500 virtual machines at a costs of $120 at spot rates.

Assessing Nodal Adequacy of Large Power Systems

Dr. F. Selin Yanikara, Energy Analyst, Newton Energy Group (Newton, MA)
Russ Philbrick, President, Polaris Systems Optimization (Seattle, WA)
Aleksandr M. Rudkevich, President, Newton Energy Group (Newton, MA)
Sophie Edelman, Electricity Research Analyst, The Brattle Group (New York, New York)

Extreme weather events, increasing electrification, and integration of wind and solar power pose significant challenges for reliable operation of the power grid. Quantitative evaluation of these impacts is critical for making efficient policy and investment decisions and in designing markets and engineering controls. This presentation will summarize the theoretical foundation for nodal probabilistic assessment of resource adequacy and its applications to modern electrical systems with a significant penetration of weather dependent variable energy resources and storage technologies. In addition, this presentation will address the need for, and will present, new adequacy metrics that reflect an economically justified contribution of each system asset—generation, transmission, or demand resource to system adequacy. The analysis relies on the Monte Carlo based methodology using new computationally efficient and statistically accurate methods. We illustrate the numerical results and computational performance of our approach using the ENELYTIX® powered by PSO SaaS and our standard dataset for the ERCOT market.

Comparison of Flexibility Reserve and ORDC for Increasing System Flexibility

Phillip de Mello, Senior Technical Leader, Electric Power Research Institute (Palo Alto, CA)
Erik Ela, Program Manager, Electric Power Research Institute (Boulder, CO)
Nikita Singhal, Technical Leader, Electric Power Research Institute (Palo Alto, CA)
Alexandre Moreira da Silva, Research Scientist, Lawrence Berkeley National Laboratory (Berkeley, CA)
Miguel Heleno, Research Scientist/Engineer, Lawrence Berkeley National Laboratory (Berkeley, CA)

Power system composition changes are making flexible resources more important to balance the increasing variability and uncertainty. System operators often look to increase the amount of flexibility available to give real time operations greater control. Two common methods for increasing flexibility are to create new reserve products that are targeted towards flexibility and ramping capability or using an extended operating reserve demand curve (ORDC) to procure more of an existing reserve when the additional value exceeds costs. Detailed operation simulations to mimic day ahead and real time markets were conducted to compare flexibility reserves and ORDCs. Benefits to reliability were measured by a reduction in shortages of reserves and energy experienced across the system. The extra reserves generally increased the costs of running the system, but it was lower than the penalty prices of the shortages relieved. Some periods showed a reduction of system costs with added reserves, suggesting that more efficient designs of reserves could not only increase system reliability but also reduce costs. Both methods increase the flexibility on the system, but function differently in typical deployments in current ISO/RTO practice. The different parameters defining each technique was explored to understand how their differences manifest in improving reliability. Most differences reflect the tradeoff between flexibility in designing a new product versus ease of implementation of procuring more of an existing product. The key difference of the techniques results due to the sharing of generator ramp rates between different reserve products. Most existing implementations require dedicated capacity for each reserve product but often do not require dedicated ramp capability. Using a new flexibility reserve that can share ramp rates will typically be able to schedule more reserve for a certain available generator capacity than applying an ORDC to an existing product. This impacts the cost and effectiveness of those reserves particularly in periods of system stress. Toggling the ramp sharing constraint can be used to make either implementation perform similarly as the other.

ABSCORES, A Novel Application of Banking Scoring and Rating for Electricity Systems

Alberto J. Lamadrid L., Associate Professor, Lehigh University (Bethlehem, PA)
Audun Botterud, Principal Research Scientist, Massachusetts Institute of Technology (Cambridge, MA)
Jhi-Young Joo, Research Scientist, Lawrence Livermore National Laboratory (Livermore, CA)
Shijia Zhao, Energy Systems Scientist, Argonne National Laboratory (Lemont, IL)

This presentation discusses the basis for the establishment of an Electric Assets Risk Bureau. We are developing different scores customized according to the application required. We study the use of financial models to determine the risk associated to individual assets in the system. We present a model focused on managing operational risk, and outline the methodology for risk metrics applied to high impact, low probability (HILP) events. We distinguish between, first, public risk, related to the physical provision of supporting services required for the stability of the electricity system (*i.e.,* ancillary services); and second, financial risk, derived from positions taken by participants with pecuniary repercussions. A key paradigm of our framework is a focus on implementability of the approach (under existing regulatory structures) and a method for dispute resolution given potential decisions taken with the metrics proposed.

Recent Developments in the Day-Ahead and Real-Time Electricity Market Design and Software Caused by the Higher Energy Costs and Emerging Technologies—European Experience

Petr Svoboda, Engineer, Unicorn Systems a.s. (Prague, Czech Republic)

Europe has been dealing with the imbalance of production and

consumption for years. This has led to the development of the single de-regulated electricity market to solve the barriers between the individual states and provide the most cost-effective way to ensure secure, sustainable, and affordable energy supply to the customers. Recent changes in the market caused by the increase of the energy costs and emergence of the new technologies have caused the fundamental shifts in the market design and software enabling its operations. In our presentation we would like to discuss the latest developments in the areas of: 1. New algorithms of transmission capacity calculation that have proven to increase the efficiency of capacity usage and relevant economic welfare. 2. Development of the HVDC interconnectors and their impact on the market efficiency and transmission costs. 3. 15-minute day-ahead markets. 4. Emergence of the integrated real-time markets, new reserve products and multi-interval market clearing. 5. Introduction of the flexibility instruments to the energy markets. 6. Successful implementation of the hourly renewable certificates as the next step towards clean energy transition.

Session W–A2 (Wednesday, June 28, 12:30 p.m.) (Commission Meeting Room)

System Resilience Through Electricity System Restoration and Related Services

Douglas Wilson, Principal Analytics Engineer, GE (Edinburgh, United Kingdom)
James Yu, Head of Future Networks, ScottishPower Energy Networks (Glasgow, United Kingdom)
Ian Macpherson, Senior Innovation Manager, ScottishPower Energy Networks (Glasgow, United Kingdom)
Marta Laterza, Power Systems Engineer, General Electric (Glasgow, United Kingdom)
Marcos Santos, Senior Power Systems Engineer, General Electric (Glasgow, United Kingdom)
Richard Davey, Senior Project Manager, General Electric (Glasgow, United Kingdom)

Electricity system restoration following a partial or system-wide outage is an essential service in the power system. There is a need to apply new resources based on renewable resources to replace the services that up to now have depended on fossil fuel generation. This presentation describes a project led by SP Energy Networks in collaboration with GE to demonstrate a co-ordinated restoration approach in the distribution grid using a novel control approach applied to a controlled zone with multiple resources. Live trials of the approach in the SP Energy Networks power system are presented, as well as results of testing the approach extensively in a hardware-in-the-loop environment. The emerging weaknesses of the traditional methodology were recognised in UK electricity regulation, which was recently changed to include a requirement for 60% of customer load to be restored within 24 hours on a regional basis, with all supplies restored within 5 days (Electricity System Restoration Standard, 2021). Previous restoration requirements were less onerous on the timeframes and did not define geographic requirements. Since some regions now lack large transmission-connected blackstart-capable plant for the traditional top-down restoration approach, there is a need to harness the capabilities that renewable and distributed generation and storage can offer to address the deficit of system restoration capability. The new service being developed and trialled involves starting distributed generation and growing an island with customer load within the distribution network. This island can be sustained by automated control through managed load pickup as well unplanned disturbances with existing distributed energy resources, battery storage and demand response providing the control capability to keep the island in balance. The blackstart zone may then be reconnected to the transmission network if this is energised and can then contribute to managing the power balance as the restoration of the wider system continues. If appropriate, neighbouring islands can be connected together, and the resulting larger island is capable of greater block load pickup of active and reactive loads. One of the distinctive benefits of the approach taken is that it uses diverse resources of existing generation, storage and demand response capability that is present and operational in the network for other day-to-day purposes. These resources can be harnessed to provide the new electricity system restoration services with few additional power assets. Inherently, some devices can provide faster response than others, and large instantaneous power, and some may be able to sustain an energy supply while others have limited energy resource. Voltage support and short circuit current are also considerations. A diversity of renewable resources is useful to mitigate against individual resources being unavailable *e.g.* low wind or low solar conditions. A key requirement for the co-ordination of an electricity system restoration zone is a wide area monitoring and control system that manages the power balancing and switching of the network to automate the process of growing and sustaining the power island. The approach being trialled includes a SCADA/distribution management system with the topology information for network switching, together with a synchrophasor based wide area control system that manages the balancing, frequency control and resynchronization alignment of the network. Since the island is small in comparison to the normal interconnection, a rapid response to disturbances is required to maintain a stable frequency. Once a distribution zone is instrumented with the measurement, communication and control equipment to deliver the service, it is possible to use the same infrastructure to offer further services to manage grid stability in the more common circumstance of disturbances during grid-connected operation.

Coordinated Cross-Border Capacity Calculation Through The FARAO Open-Source Toolbox

Violette Berge, Vice President, Artelys Canada (Montréal, Canada)
Dr. Nicolas Omont, Vice President of Operations, Artelys (Paris, France)

Cross-borders exchanges have taken a major role in European strategy to achieve climate goals. The European Commission set a target of 15% interconnections in 2030, meaning that each country should have the physical capability to export at least 15% of their production. Increasing exchanges makes short term planning more complex. In this context, the French TSO (RTE) released an open-source toolbox FARAO to perform Coordinated Capacity Calculation (CCC) and ensure the security of supply. Artelys is a consultancy expert in power systems optimization and carries out various projects around TSO operational coordination in Europe. FARAO performs the optimization of both preventive and curative remedial actions, including HVDC lines, phase-shifter transformers and counter-trading but also topological actions. It is operationally used for the exchanges between Italy and its northern neighbors as well as between France, Spain and Portugal. Artelys will present the algorithms of the FARAO toolbox and how they are actually used to enable greater operational coordination amongst the countries.

Advanced Scenario Selection Methods for Probabilistic Transmission Planning Assessments

Dr. Eknath Vittal, Principal Technical Leader, EPRI (Palo Alto, CA)
Anish Gaikwad, Senior Program Manager, Electric Power Research Institute (Palo Alto, CA)
Parag Mitra, Senior Technical Leader, Electric Power Research Institute (Palo Alto, CA)

Given the temporal and spatial characteristics of extreme weather events, developing transmission planning scenarios, *i.e.,* snapshots of instantaneous operational conditions, is a challenging problem. It requires a multi-model assessment that links long-term planning models that capture the operational performance of the system (resource adequacy and production cost modeling) to the future meteorological projections that will inform the impacts of weather and extreme events. Scenario generation and analysis is computationally and labor intensive. Identifying snapshot conditions for future system states can be challenge. This presentation will highlight and detail an EPRI application that helps transmission planners identify critical power flow conditions from operational simulations such as production cost simulations. The EPRI High-Level Screening (HiLS) for Data Analytics tool allows planners to apply statistical analysis to large dataset that capture the operational performance of the system. The tool allows for the data to be organized into clusters of similar operating conditions reducing the dimensionality of the state space. As an example, an operational simulation of 8760 hours can be reduced to 10 operating hours that capture 95% of the variability seen over the course of the year. As uncertainty and variability increase on both the generation and load, developing methods and processes to understand the conditions that present the most challenging reliability and stability conditions will be critical. The HiLS tools, provides transmission planners a platform that can help them organize and visualize data representing future operational conditions of the system that considers both load variability and generator availability.

Incorporating Climate Projections Into Grid Models: Bridging the Data Gap To Capture Weather Dependent Representative and Extreme Events and Corresponding Uncertainties

Dr. Zhi Zhou, Principal Computational Scientist, Argonne National Laboratory (Lemont, IL)
Dr. Neal Mann, Energy Systems Engineer, Argonne National Laboratory (Lemont, IL)
Yanwen Xu, Graduate Student, University of Illinois at Chicago, Urbana-Champaign (Champaign, IL)
Zuguang Gao, Graduate Student, University of Chicago (Chicago, IL)
Dr. Akintomide Akinsanola, Assistant Professor, University of Illinois at Chicago (Chicago, IL)
Dr. Todd Levin, Team Lead, Argonne National Laboratory (Lemont, IL)
Dr. Jonghwan Kwon, Energy Systems Engineer, Argonne National Laboratory (Lemont, IL)
Dr. Audun Botterud, Senior Energy Systems Engineer, Argonne National Laboratory (Lemont, IL)

It is crucial to consider high-fidelity weather data and climate projections in grid models in order to capture future weather trends, extremes, and uncertainties. However, traditional power system studies often overlook many of these considerations and rely solely on historical weather data. To address this challenge, we develop a computationally manageable framework to process high-quality representations of climate data for use with power system models. The framework includes a three-stage architecture to select representative regions and periods, and also identify periods of extreme weather conditions after translating climate data (temperature, wind-speed, etc.) into grid inputs (load, power generation profiles and outage probabilities). The framework also models and represents uncertainty of future weather events based on ensembles of climate model simulations. The outcome of the framework is a set of processed grid inputs in time series format that capture the impact of climate features on the system. This includes grid inputs directly converted from weather variables at the cell level, as well as those from representative regions and time periods, those representing the impact from extreme weather events, and their associated uncertainties. We apply this computational framework to translate downscaled climate projections generated by three different global climate models, encompassing over 60 different weather variables at 12-km geographic and 3-hour temporal resolution for all North America. We then demonstrate how consideration of high-quality climate-driven grid inputs in electricity system models impacts optimal long-term planning decisions. Capturing future weather conditions and associated uncertainties is becoming important as power systems, and their associated markets, are being impacted by both efforts to decarbonize the effects of a changing climate. These are also important considerations when updating market designs to maintain reliability and economic efficiency as the underlying power system evolves. In addition, capturing weather uncertainty is critical for risk-aware decision making. Therefore, this work provides a valuable resource for power system modelers by bridging the gap between climate models and grid models to help ensure that long-term system planning decisions are informed by the impacts of future climate conditions.

Session W–B2 (Wednesday, June 28, 12:30 p.m.) (Hearing Room One)

Enhancing Decision Support for Electricity Markets With Machine Learning

Yury Dvorkin, Faculty, Johns Hopkins University (Baltimore, MD)
Robert Ferrando, Graduate Assistant, University of Arizona (Tucson, AZ)
Laurent Pagnier, Assistant Professor, University of Arizona (Tucson, AZ)
Zhirui Liang, Ph.D. Student, Johns Hopkins University (Baltimore, MD)
Daniel Bienstock, Professor, Columbia University (New York, NY)
Michael Chertkov, Professor, University of Arizona (Tucson, AZ)

This presentation describes how machine learning can be leveraged to enhance computational speed of day-ahead and real-time unit commitment and optimal power flow routines, which are at the core of market-clearing procedures in US ISOs. Our machine learning architecture embeds both power flow physics and market design properties (*e.g.,* cost recovery and revenue adequacy) into the training stage, which increases accuracy of computations and preserves a relationship between primal (dispatch) and dual (prices) variables. The accuracy and scalability of the proposed method is tested on a realistic 1814-bus NYISO system with current and future renewable energy penetration levels. We also demonstrate ~100x gain in computations relative to traditional optimization approaches.

Synergistic Integration of Machine Learning and Mathematical Optimization for Sub-Hourly Unit Commitment

Jianghua Wu, Ph.D. Candidate, University of Connecticut (Vernon, CT)
Dr. Zongjie Wang, Assistant Professor, University of Connecticut (Storrs, CT)
Dr. Yonghong Chen, Consulting Advisor, Midcontinent ISO (Carmel, IN)

Dr. Bing Yan, Assistant Professor, Rochester Institute of Technology (Rochester, NY)
Dr. Mikhail Bragin, Assistant Project Scientist, University of California, Riverside (Riverside, CA)

The integration of intermittent renewables into power systems presents significant challenges for operators due to increased uncertainties and greater intra-hour net load variability. Sub-hourly Unit Commitment (UC) has been suggested as a solution to quickly respond to changes in electricity supply and demand, which is more complicated than hourly UC because of a higher number of time periods, and higher dependencies among coupled periods. Traditional optimization methods could be time-consuming while machine learning (ML) may have additional feasibility concerns. To address these challenges, a hybrid approach based on synergistic integration of ML and optimization is developed. This novel approach adopts our recent decomposition and coordination Surrogate Absolute-Value Lagrangian Relaxation (SAVLR) method with efficient coordination and accelerated convergence. ML is then used to quickly predict SAVLR subproblem solutions. Compared to those of the original overall problem, subproblem solutions are much easier to learn. Nevertheless, predicting ''good'' subproblem solutions is still challenging because of the ''jumps'' of binary decisions and many types of unit-level constraints. To overcome these issues, a generic ML model, embedding recurrent neural networks (RNNs) and the Attention mechanism in the encoder-and-decoder structure, is developed. Because of the features of RNNs and Attention, this generic model can learn different subproblem solutions to reduce the training effort, and can provide time-based predictions to capture dependencies. In addition, to resolve the limitation of ML in handling constraints, a rule-based feasibility layer is incorporated in the predicting process, ensuring feasibility with respect to unit-level constraints. Testing on the IEEE 118-bus system demonstrates the effectiveness of our approach, providing feasible and accurate subproblem solutions quickly, and obtaining near-optimal overall solutions efficiently.

Boosting Power System Operation Economics Via Closed-Loop Predict-and-Optimize

Dr. Lei Wu, Anson Wood Burchard Chair Professor, Stevens Institute of Technology (Hoboken, NJ)
Xianbang Chen, Ph.D. Candidate, Stevens Institute of Technology (Hoboken, NJ)

By and large, power system operations are implemented by Independent System Operators (ISO) in an open-loop predict-then-optimize (O–PO) process. First, the uncertainty realizations (*e.g.,* renewable energy availability) are predicted as accurately as possible. Taking the predictions as inputs, day-ahead unit commitment and real-time economic dispatch problems are then optimally resolved for determining the operation plan (*i.e.,* optimization). The operation goal is to achieve the minimum system operation cost, *i.e.,* the optimal operation economics. However, the operation economics could suffer from the open-loop process because its predictions may be myopic to the optimizations, *i.e.,* the predictions seek to improve the immediate statistical prediction errors (*i.e.,* accuracy-oriented) instead of the ultimate operation economics. To this end, we propose to improve operation economics by closing the open loop between the prediction and the optimization, *i.e.,* a closed-loop predict-and-optimize (C–PO) idea. Specifically, two C–PO frameworks are designed, including a feature-driven C–PO framework and a bilevel mixed-integer program (MIP) C–PO framework. Their core is to feed the induced operation cost back for training the predictor and measuring the prediction quality with the operation cost (*i.e.,* cost-oriented). As a result, the prediction and the optimization can be implemented jointly in a single framework. Based on real-world data, the feature-driven C–PO is compared to the traditional O–PO, showing noticeable improvement in operation economics, although with slightly compromised prediction accuracy for certain cases. The experiments on a large-size system show that the C–PO has potential in a real-world application. The bilevel MIP C–PO is more versatile than the feature-driven C–PO. Based on an IEEE 118-bus system, the bilevel MIP C–PO is compared to the state-of-the-art methods of handling uncertainties, *i.e.,* stochastic programming and robust optimization. The case studies show that the bilevel MIP C–PO is economically competitive with the state-of-the-art methods but is more compatible with the current operational practice.

Privacy-Preserving Synthetic Dataset Generation for Power Systems Research

Dr. Vladimir Dvorkin, Postdoctoral Fellow, Massachusetts Institute of Technology (Cambridge, MA)
Dr. Audun Botterud, Principal Research Scientist, Massachusetts Institute of Technology (Cambridge, MA)

Power systems research heavily relies on the availability of real-world power system datasets (network parameters, time series, etc.). However, data owners, such as system operators, are often hesitant to share their data due to valid security and privacy concerns. To overcome these challenges, we have developed state-of-the-art algorithms that enable the synthetic generation of optimization and machine learning datasets for the power systems industry. Our algorithms take real-world datasets as input and output their synthetic, perturbed versions that maintain the accuracy of the original data on specific problem classes, such as power system dispatch and wind power forecasting. Importantly, the original data remains undisclosed, effectively controlling the privacy risk in data releases. To ensure privacy preservation, we employ rigorous perturbation techniques of differential privacy that strictly control the amount of privacy loss. Furthermore, we preserve the accuracy of original data through post-processing convex optimization. Our algorithms have many applications, including synthetic generation of transmission parameters and renewable generation records. We have open-sourced our algorithms to encourage their use by interested parties. For more information, please visit our GitHub repository at *https://github.com/wdvorkin/SyntheticData.*

Session W–A3 (Wednesday, June 28, 3:30 p.m.) (Commission Meeting Room)

Parallel Interior-Point Solver for Security Constrained ACOPF Problems on SIMD/GPU Architectures

Dr. Mihai Anitescu, Senior Mathematician, Argonne National Laboratory (Lemont, IL)
François Pacaud, Assistant Professor, Ecole des Mines (Paris, France)
Michel Schanen, Computer Scientist, Argonne National Laboratory (Lemont, IL)
Sungho Shin, Postdoctoral Scientist, Argonne National Laboratory (Lemont, IL)
Daniel Adrian Maldonado, Assistant Energy Systems Scientist, Argonne National Laboratory (Lemont, IL)

We investigate how to port the standard interior-point method for security constrained ACOPF problems, which are block-structured nonlinear programs with state equations, on SIMD/GPU architectures. Computationally, we decompose the interior-point algorithm into two

successive operations: the evaluation of the derivatives and the solution of the associated Karush-Kuhn-Tucker (KKT) linear system. Our method accelerates both operations using two levels of parallelism. First, we distribute the computations on multiple processes using coarse parallelism. Second, each process uses a SIMD/GPU accelerator locally to accelerate the operations using fine-grained parallelism. The KKT system is reduced by eliminating the inequalities and the state variables from the corresponding equations, to a dense matrix encoding the sensitivities of the problem's degrees of freedom, drastically minimizing the memory exchange. Our experiments on SIMD/GPU with security-constrained AC optimal power flow problem show that the method can achieve a 50x speed-up compared to the state-of-the-art method.

The Need for More Rigorous Calculation of Shadow Prices and LMPs

Dr. Xiaoming Feng, Research Fellow, Hitachi Energy (Raleigh, NC)

LMPs (locational Marginal Prices) are used in nodal electricity markets to determine payments or charges to market participants. Due to the great monetary impact, it is imperative LMP is defined rigorously and calculated consistently. It has been observed the current method of shadow price and LMP calculation could produce values that are non-unique under certain conditions, which might signal non-economic incentives to the market. We start with formal definitions for shadow price and LMP and present the properties of the perturbation functions and their computational consequences. We use simple examples to illustrate the discrepancy between theoretical shadow price and the shadow price calculated by state-of-the-art optimization solvers. From the discussion, we make the case for more rigorous calculation of both shadow prices and LMPs.

Real-Time Market Enhancements for Reliability and Efficiency

Dr. Mort Webster, Professor of Energy Engineering, Pennsylvania State University (University Park, PA)
Dr. Anthony Giacomoni, Manager, Advanced Analytics, PJM Interconnection (Audubon, PA)
Aravind Retna Kumar, Ph.D. Candidate, Pennsylvania State University (University Park, PA)
Sushant Varghese, Ph.D. Candidate, Pennsylvania State University (University Park, PA)
Shailesh Wasti, Ph.D. Candidate, Pennsylvania State University (University Park, PA)

The projected trends in the U.S. power system, increasing wind and solar generation and retiring fossil fuel generation, will increase the net load variability and forecast uncertainty over the next several decades. There has been considerable research focusing on how to provide more flexibility to the power system. Within this line of research, numerous market design proposals have been explored: multi-interval dispatch, ramp products, stochastic market clearing, an increase in flexible resources (virtual power plants (VPP), energy storage). Although flexibility is often cited as an objective the outcomes of concern are reliability (unserved demand and reserve shortages), efficiency (reducing bid production cost and uplift payments), curtailment of renewable generation, and incentives for future flexible resources (*i.e.,* price formation). In the U.S., Independent System Operator (ISO) and Regional Transmission Organization (RTO) real-time market clearing and operations have the following properties: they operate on a rolling horizon basis throughout the operating day, face changing forecasts throughout the day with forecast errors, and frequently solve a real-time unit commitment (RUC), which is separate from the real-time dispatch. In contrast, most of the analysis and academic literature on market design enhancements neglect one or more of these characteristics in their analysis framework. The separation of commitment from dispatch raises the question: which market enhancement in which clearing engine? In this work, we present a simulation framework for the PJM wholesale energy markets with a rolling horizon and forecast errors. Specifically, we simulate the solution of the day-ahead market, followed by PJM's Intermediate-Term Security Constrained Economic Dispatch (IT–SCED) (real-time commitment process) every 15 minutes and PJM's Real-Time Security Constrained Economic Dispatch (RT–SCED) (real-time dispatch) every 5 minutes throughout the operating day. Net load forecasts change every 5 minutes. We use this framework to simulate several of the commonly discussed market enhancements applied to either IT–SCED, RT–SCED, or both. We consider multi-interval dispatch, ramp products, and stochastic market clearing. Our results demonstrate that market design changes are most successful if they addresses both commitment (bringing enough capacity and operating range online) and dispatch (using the online operating range effectively).

Economics of Grid-Supported Electric Power Markets: A Fundamental Reconsideration

Dr. Leigh Tesfatsion, Research Professor of Economics, Courtesy Research Professor of Electrical & Computer Engineering, Iowa State University (Ames, IA)

U.S. RTO/ISO-managed wholesale power markets operating over high-voltage AC transmission grids are transitioning from heavy reliance on fossil-fuel based power to greater reliance on renewable power. This presentation highlights four conceptually-problematic economic presumptions reflected in the legacy core design of these markets that are hindering this transition. The key problematic presumption is the static conceptualization of the basic transacted product as grid-delivered energy (MWh) competitively priced at designated grid delivery locations during successive operating periods, supported by ancillary services. The presentation then discusses an alternative conceptually-consistent ''Linked Swing-Contract Market Design'' that appears well-suited for the scalable support of increasingly decarbonized grid operations with more active participation by demand-side resources. This alternative design entails a fundamental switch to a dynamic insurance focus on advance reserve procurement permitting continual balancing of real-time net load. Reserve consists of the guaranteed availability of diverse power-path production capabilities for possible RTO/ISO dispatch during future operating periods, as protection against volumetric grid risk. Each reserve offer submitted by a dispatchable power resource m to a forward reserve market M(T) for a future operating period T is a two-part pricing swing-contract in firm or option form that permits m to ensure its revenue sufficiency.

Session W–B3 (Wednesday, June 28, 3:30 p.m.) (Hearing Room One)

Simulation of Wholesale Electricity Markets With Capacity Expansion and Production Cost Models To Understand Feedback Between Short Term Market Procedures and Long Term Investment Incentives

Dr. Jesse Holzer, Mathematician, Pacific Northwest National Laboratory (Richland, WA)
Dr. Abhishek Somani, Electrical Engineer, Pacific Northwest National Laboratory (Richland, WA)
Dr. Brent Eldridge, Electrical Engineer, Pacific Northwest National Laboratory (Bel Air, MD)

Diane Baldwin, Project Manager, Pacific Northwest National Laboratory (Richland, WA)

Wholesale electricity markets are undergoing rapid changes, including variability and uncertainty and low prices from wind and solar, load flexibility and price responsiveness, distributed energy resources, energy storage, and revenue adequacy concerns. In response to these changes, enhancements to electricity market procedures have been proposed, including new reserve product, sloped reserve demand curves, multi-settlement forward markets, and stochastic modeling in market clearing optimization engines. These enhancements have the potential to improve operational outcomes in the short term time scale of hours to days by enabling better market responses to the changing market conditions. But they also affect the long run incentives for investment in grid equipment that ultimately result in the mix and capacity of various grid technologies. This mix in turn influences short term market conditions. We use linked models of capacity expansion and production cost to explore this feedback between short term and long term market conditions and to shed light on how this feedback affects the assessment of market enhancements to address changing market conditions.

Making the Right Resource Choice Requires Making the Right Model Choice

Dr. Rodney Kizito, Senior Manager, Ascend Analytics (Boulder, CO)
Gary W. Dorris, Ph.D., CEO, Ascend Analytics (Boulder, CO)
David Millar, Director of Consulting Services, Ascend Analytics (Boulder, CO)

Production cost modeling simulates the operation of electric systems. It provides a lens into a highly uncertain future, allowing utilities to craft strategy and make critical decisions for their customers, shareholders, and stakeholders. The power and acuity of this lens will determine what resources will be deemed the most economic to provide a reliable, lower-carbon supply portfolio. Resource planning using production cost models that simulate the operation of power systems, once a straightforward exercise of deciding how many new power plants would be needed to meet future load growth, has become a much more complicated and challenging enterprise. The dramatic decline in the cost of renewables and storage technologies and the societal push for decarbonization means planners must model more complex and uncertain portfolio options. Renewables and their meteorologically determined fuel supply are creating new dynamics that highlight the need for more powerful modeling tools to capture the increasing variability in the power supply and the ensuing effect on market price volatility. This presentation highlights the benefits of using a new class of resource planning models to plan for a decarbonized future. Utilities, regulators, independent system operators, and other industry stakeholders rely heavily on modeling to support decision making for the allocation of scarce capital resources, as well as to ensure that the right resources are available to maintain a high level of reliability and resilience. This presentation argues that the older generations of models that remain widely in use today fail to capture the emerging dynamics of a power grid supplied primarily by renewable energy. For this reason, industry decision makers are unknowingly burdened by ''model-limited choice,'' which can lead to imprudent investments in assets liable to become functionally useless and ultimately disallowed. This presentation also provides a new terminology to classify a model's ability to capture the new market dynamics, high-definition production cost models (HD PCMs) versus traditional production cost models (PCMs). HD PCMs use simulation to capture the stochastic nature of load and electricity production generated by renew able energy sources, as well as to drill down to a 5-minute level of temporal and spatial (*i.e.,* nodal) granularity to capture the flexibility requirements of renewable integration. Further, HD PCMs mimic real-world uncertainty by simulating imperfect foresight of future system conditions between the day-ahead forecast and the real-time dispatch. Traditional PCMs are highly simplified because they were developed when computing power was a significant limitation. Today, resource planners can take advantage of the rapid increase in computing power provided by distributed computing to upgrade their analytical platforms to enable HD PCMs that provide more robust analysis.

Transmission Shortage Pricing By MW-Mile Based Demand Curve

Sina Gharebaghi, Graduate Research Assistant, Pennsylvania State University, Hitachi Energy (University Park, PA)
Dr. Xiaoming Feng, Research Fellow, Hitachi Energy (Raleigh, NC)

ISOs use transmission demand curves (TDC) in security constrained unit commitment (SCUC) to relax transmission constraints when no feasible solution exists with hard transmission constraints. TDC is a penalty curve administratively specified as a function of the amount of MW violation of the transmission line's limits. Use of TDCs to ensure non-empty feasible solution space can result in excessively high LMP when multiple TDCs are active. Researchers have studied a transmission constraint screening approach to remove 'redundant constraints' of serially connected transmission lines before the pricing run to avoid the accumulation of high shadow prices over multiple redundant constraints for LMP calculation. The screening approach alleviates to a large degree the occurrence of excessive LMP but has subtle and significant unintended consequences with respect to SCUC solution stability. We propose an alternative approach using MW-Mile based TDC to solve the transmission constraint violation problem and eliminate the root cause of excessive LMP without the need to remove redundant constraints. We discuss the economic justification of the MW-Mile based TDC approach and its advantage of solution stability with illustrative examples.

Grid OS—A Modern Software Portfolio for Grid Orchestration

Renan Giovanini, Ph.D., MBA, Transmission Product Marketing Director, General Electric (Edinburgh, United Kingdom)
Joseph Franz, Senior Marketing Manager, General Electric (Melbourne, FL)

The 21st century has brought new challenges for Transmission and Distribution Operators that were hardly perceived in the turn of the century. There have been fast increases in bulk and micro renewable resources in conjunction with international agreements on CO_2 emission targets. Severe droughts, and more frequent floods happening in the same country are driving needs also. An increasing number of changing weather patterns creating disruptions at several levels. Data tsunami has been created due to increasing types and number of sensors installed in the field. The grid itself was initially designed in the early 1900s based on a uni-directional flow requirement now is called to become bi-directional. Previous electric software solutions were created very organically since late 1970s/early 1980s addressing

use-cases from that era. New tools were created over time, but always bolted-on to existent solutions. Energy Management Systems became more and more complex and started to present challenges in terms of scalability and maintainability leading to increasing staff and costs. Previous well defined siloes between Generation, Transmission and Distribution are becoming more blurred. In order to address all of these challenges, utilities and software companies started a journey to re-invent itself. Based on the most recent digital technologies, these companies created new modular and composable solution prepared for ultra-scaling and immense amounts of data ready to leverage the most modern mathematical algorithms and artificial intelligence methods available to date for assisted and automated control. The need for project executions in months as opposed to years has been taken carefully in consideration, creating a software solution ready for faster time-to-value. These solutions are already in production at a few customers and a number of new use-cases are currently under proof-of-concept, development or available for productization. The presentation will cover some of these latest software developments and highlight regulatory challenges to slowing the adoption of these technologies by utilities: 1. A new market system prepared to validate & clear more frequent and increasing number of bids with smaller amounts of power; 2. Digital twin technologies such as digital dynamic line ratings ready to integrate electrical and weather data to provide real-time and forecast ampacity for transmission lines integrated to real-time and look-ahead security assessment systems; 3. Advanced forecasting solutions based on AI for (1) renewable power production at T&D levels and (2) outage predictions for improved crew allocation and faster restoration times; 4. Optimal system restoration management in real-time in assisted and automated modes; 5. Exploration of Distributed Energy Resource to supply grid services at transmission level such as grid stabilization and blackstart restoration.

Day 3—Thursday, June 29

Session H1 (Thursday, June 29, 9:30 a.m.) (Commission Meeting Room)

Integration of DER Aggregations in ISO-Scale SCUC Models

Dr. Brent Eldridge, Electrical Engineer, Pacific Northwest National Laboratory (Bel Air, MD)
Jesse Holzer, Mathematician, Pacific Northwest National Laboratory (Richland, WA)
Abhishek Somani, Economist, Pacific Northwest National Laboratory (Richland, WA)
Eran Schweitzer, Electrical Engineer, Pacific Northwest National Laboratory (Richland, WA)
Rabayet Sadnan, Electrical Engineer, Pacific Northwest National Laboratory (Richland, WA)
Nawaf Nazir, Electrical Engineer, Pacific Northwest National Laboratory (Richland, WA)
Soumya Kundu, Electrical Engineer, Pacific Northwest National Laboratory (Richland, WA)

FERC issued Order 2222 in September 2020, which will require all ISOs in the U.S. to implement participation models for DER aggregators. Among other requirements, this rule required ISOs to lower the participation threshold for wholesale market participation to 0.1 MW. Wider participation of these resources can bring significant benefits to the grid, such as by locating energy supply closer to demand, opening up more participation from the demand side, and providing an additional flexibility source to balance intermittent renewables. However, DER aggregations will have unique characteristics that may pose challenges to the large-scale security-constrained unit commitment (SCUC) software used by ISOs. This presentation will focus on the formulation of a new mathematical model to represent the internal constraints of a DER aggregator and the study design that is intended to better understand the challenges associated with DER integration.

Current-Voltage AC Optimal Power Flow for Unbalanced Distribution Network

Dr. Mojdeh Khorsand Hedman, Assistant Professor, Arizona State University (Tempe, AZ)
Zahra Soltani, Ph.D. Candidate, Arizona State University (Tempe, AZ)
Dr. Shanshan Ma, Postdoctoral Research Scholar, Arizona State University (Las Vegas, NV)

With proliferation of distributed energy resources (DERs), distribution management systems (DMSs) need to be advanced in order to enhance the reliability and efficiency of modern distribution systems. This work proposes novel nonlinear and convex AC optimal power flow (ACOPF) models based on current-voltage (IVACOPF) formulation for an unbalanced distribution system with DERs. In the proposed formulation, untransposed distribution lines, shunt elements of distribution lines, and detailed representation of distribution transformers and DERs are modeled. The proposed nonlinear IVACOPF model is linearized and convexified using the Taylor series. The performance of the proposed nonlinear and convex IVACOPF approaches is compared with OpenDSS and the widely used LinDistFlow method for modeling unbalanced distribution systems. The proposed accurate convex IVACOPF model has multiple applications for distribution system management, planning, and operation. Applications of the proposed model on two key parts of advanced DMS, (i) DERs scheduling and (ii) simultaneous topology processor and state estimation, will be presented. Two models are developed including Quadratic Programming (QP) and linear programming (LP) for performing the distribution state estimation. The performance of the methods is compared. The proposed models are tested using distribution feeder of an electric utility in Arizona.

Empowering Electricity Markets Through Distributed Energy Resources and Smart Building Setpoint Optimization: A Graph Neural Network-Based Deep Reinforcement Learning Approach

Dr. You Lin, Postdoctoral Associate, Massachusetts Institute of Technology (Cambridge, MA)
Dr. Audun Botterud, Principal Research Scientist, Massachusetts Institute of Technology (Cambridge, MA)
Dr. Daisy Green, Postdoctoral Associate, Massachusetts Institute of Technology (Cambridge, MA)
Dr. Leslie Norford, Professor, Massachusetts Institute of Technology (Cambridge, MA)
Dr. Jeremy Gregory, Executive Director of Climate and Sustainability Consortium, Massachusetts Institute of Technology (Cambridge, MA)

Smart buildings play a pivotal role in the electricity market by boosting energy efficiency and demand flexibility by implementing advanced control strategies. In this study, a setpoint optimization model is proposed using a graph neural network-based deep reinforcement learning (DRL) algorithm that considers thermal exchanges among various zones within buildings. By intelligently scheduling the day-ahead temperature setpoints and adjusting the real-time setpoints in response to dynamic conditions and price signals, DRL-based controllers can optimize energy consumption while reducing overall costs. This strategic energy

management not only benefits building occupants but also bolsters the electricity grid through load balancing and the provision of essential grid services. Through the testbed of MIT campus buildings, it is demonstrated that smart buildings employing DRL for setpoint optimization contribute to a more efficient, reliable, and sustainable electricity market.

Multi-Timescale Operations of Nuclear-Renewable Hybrid Energy Systems for Reserve and Thermal Products Provision

Jie Zhang, Associate Professor, University of Texas at Dallas (Richardson, TX)
Jubeyer Rahman, Ph.D. Student, University of Texas at Dallas (Richardson, TX)

This talk will present an optimal operation strategy of a nuclear-renewable hybrid energy system (N–R HES), in conjunction with a district heating network, which is developed within a comprehensive multi-timescale electricity market framework. The grid-connected N–R HES is simulated to explore the capabilities and benefits of N–R HES of providing energy products, different reserve products, and thermal products. An N–R HES optimization and control strategy is formulated to exploit the benefits from the hybrid energy system in terms of both energy and ancillary services. A case study is performed on the customized NREL–118 bus test system with high renewable penetrations, based on a multitimescale (*i.e.,* three-cycle) production cost model. Both day-ahead and real-time market clearing prices are determined from the market model simulation. The results show that the N–R HES can contribute to the reserve requirements and also meet the thermal load, thereby increasing the economic efficiency of N–R HES (with increased revenue ranging from 1.55% to 35.25% at certain cases) compared to the baseline case where reserve and thermal power exports are not optimized.

Session H2 (Thursday, June 29, 12:30 p.m.) (Commission Meeting Room)

Optimizing Stand-Alone Battery Storage Operations Scheduling Under Uncertainties in German Residential Electricity Market Using Stochastic Dual Dynamic Programming

Pattanun Chanpiwat, Doctoral Candidate, University of Maryland (College Park, MD) & Aalto University (Espoo, Finland) (Silver Spring, MD)
Fabricio Oliveira, Ph.D., Associate Professor, Aalto University (Espoo, Finland)
Steven A. Gabriel, Ph.D., Full Professor, University of Maryland (College Park, MD)

We present a new variation of the stochastic dual dynamic programming (SDDP) algorithm for solving multistage, convex stochastic programming problems considering uncertainties such as electricity prices, variable renewable energy generation, and residential demand in the electricity market. We approximate the convex expected-cost-to-go functions via a linear policy graph, to obtain optimal operational strategies for the battery storage usage of residential households. We develop a heuristic algorithm (*i.e.,* executable on edge-computing devices located at the households) of a residential electricity network with a flexible structure that allows residents to efficiently hedge their electricity consumption via community-shared battery storage while accounting for uncertainties and limitations of the energy system. We provide an economic assessment and insights into battery storage scheduling strategies and the model capabilities through case studies on a test network model of Southern German residential households. The results are compared with other mathematical models including a multistage stochastic convex optimization model with the assumptions of a perfect information case and/or a business-as-usual case.

Integration of Hybrid Storage Resources Into Wholesale Electricity Markets

Dr. Nikita Singhal, Technical Leader, Electric Power Research Institute (Palo Alto, CA)
Rajni Kant Bansal, Ph.D. Candidate, Johns Hopkins University (Baltimore, MD)
Dr. Erik Ela, Program Manager, Electric Power Research Institute (Palo Alto, CA)
Dr. Julie Mulvaney Kemp, Research Scientist, Lawrence Berkeley National Laboratory (Berkeley, CA)
Dr. Miguel Heleno, Research Scientist, Lawrence Berkeley National Laboratory (Berkeley, CA)

Electric storage resources and other technologies that are co-located and share a common point of interconnection are presently being incorporated into bulk power systems in increasing numbers, with more hybrid storage resources planned and under study within interconnection queues. Such hybrid storage resources are predominantly seen being combined with variable energy resources and are either being operated as two separate resources or as a single integrated resource. Market designers and system operators are presently researching ways to effectively integrate hybrid storage resources into their existing system operations and scheduling processes given the ambiguity around their impacts, particularly when high levels of hybrid resources are present. This research explores advanced market participation modeling options for integrating utility-scale hybrid storage resources into market clearing software in addition to discussing the economic and reliability implications of the different modeling options. This includes the consecutive impact of the participation models on the market clearing software solution and the dispatch and revenue of hybrid battery projects. The alternate participation models evaluated in this research include two separate resources ISO-managed co-located participation model, single integrated resource self-managed hybrid participation model and two separate resources ISO-managed linked co-located participation model.

Predicting Strategic Energy Storage Behaviors

Yuexin Bian, Ph.D. Student, University of California, San Diego (San Diego, CA)
Ningkun Zheng, Ph.D. Student, Columbia University (New York City, NY)
Yang Zheng, Assistant Professor, University of California, San Diego (San Diego, CA)
Bolun Xu, Assistant Professor, Columbia University (New York, NY)
Yuanyuan Shi, Assistant Professor, University of California, San Diego (San Diego, CA)

Energy storage are strategic participants in electricity markets to arbitrage price differences. Future power system operators must understand and predict strategic storage arbitrage behaviors for market power monitoring and capacity adequacy planning. This paper proposes a novel data-driven approach that incorporates prior model knowledge for predicting the behaviors of strategic storage participants. We propose a gradient-descent method to find the storage model parameters given the historical price signals and observations. We prove that the identified model parameters will converge to the true user parameters under a class of quadratic objective and linear equality-constrained storage models. We demonstrate the effectiveness of our approach through numerical experiments with synthetic and real-world storage behavior data. The proposed approach significantly

improves the accuracy of storage model identification and behavior forecasting compared to previous blackbox data-driven approaches.

Energy Storage Participation Algorithm Competition (ESPA-Comp)

Dr. Brent Eldridge, Electrical Engineer, Pacific Northwest National Laboratory (Bel Air, MD)
Jesse Holzer, Mathematician, Pacific Northwest National Laboratory (Richland, WA)
Abhishek Somani, Economist, Pacific Northwest National Laboratory (Richland, WA)
Kostas Oikonomou, Electrical Engineer, Pacific Northwest National Laboratory (Richland, WA)
Brittany Tarufelli, Economist, Pacific Northwest National Laboratory (Laramie, WY)
Li He, Electrical Engineer, Pacific Northwest National Laboratory (Richland, WA)

Energy Storage Participation Algorithm Competition (ESPA-Comp) is an upcoming pilot competition that will challenge participants to develop innovative algorithms for energy storage participation in wholesale electricity markets. Energy storage technologies will play a critical role in making sure we have access to reliable and low-cost electricity. However, optimizing energy storage systems in wholesale electricity markets is a complex task that requires sophisticated algorithms to accurately predict electricity prices and account for the physical constraints of energy storage technologies. ESPA-Comp aims to bring together researchers, engineers, and students with expertise in AI/ML, optimization, and economics to develop algorithms that can effectively address these challenges. In this competition, participants will ''operate'' an energy storage resource in a simulated wholesale electricity market and will be awarded based on the profits they earn. Participants will need to submit algorithms that generate strategic offer curves, taking into account factors like weather, market competition, and network congestion. Competition results will help us to understand how different market designs can affect storage incentives and support the efficient use of storage resources.

Session H3 (Thursday, June 29, 3:00 p.m.) (Commission Meeting Room)

Congestion Mitigation With Transmission Reconfigurations in the Evergy Footprint

Dr. Pablo A. Ruiz, CEO and CTO, NewGrid, Inc. (Somerville, MA)
Derek Brown, Regulatory Affairs Manager, Evergy (Topeka, KS)
Jeremy Harris, Transmission Operations Planning Manager, Evergy (Topeka, KS)
German Lorenzon, Senior Engineer, NewGrid (Somerville, MA)
Grant Wilkerson, Director of Business Development, Evergy (Kansas City, MO)

Transmission needs are becoming more variable and are rising rapidly, as shown by significant increases in congestion management costs and in the frequency of transmission overloads. Further, transmission capability has been critical during recent extreme events, to support power transfers from less affected areas to the more affected ones. Topology optimization software is a grid-enhancing technology that identifies reconfiguration options to re-route power flow around transmission bottlenecks employing less utilized facilities and satisfying reliability criteria. These reconfigurations provide cost savings to power customers and increase the transmission network performance from both reliability and market efficiency perspectives. At the same time, the use of reconfigurations remains limited. For example, the usual practice in the Southwest Power Pool is to employ known reconfigurations as a last resort, after resource redispatch is exhausted and constraints are breached. This presentation will discuss the reliability and cost saving impacts of reconfigurations implemented in the Evergy footprint to mitigate congestion under the current SPP practice, as well as illustrate additional benefits that could be obtained if topology optimization opportunities were used proactively to address congestion.

Optimal Transmission Expansion Planning With Grid Enhancing Technologies

Swaroop Srinivasrao Guggilam, Senior Engineer, Electric Power Research Institute (Knoxville, TN)
Alberto Del Rosso, Program Manager, Electric Power Research Institute (Knoxville, TN)

The power system is evolving with a rapid increase in demand. It provokes rethinking ways to increase generation and expand the system's capacity to support it. This combination of fast-paced demand growth and supply has made the planning and expansion of the transmission system challenging in recent years. The futuristic hyperactive power system grid needs to be versatile. The grid should be able to host a variety of renewable energy resources, adapt to various system conditions, be highly secured under extreme events, and be dynamically responsive to make the power system reliable. All this is to be achieved at minimal cost to the customers and efficiently. The traditional transmission solutions will continue to be the backbone of the power system transmission grid, but upcoming state-of-the-art grid-enhancing technologies can significantly aid in supporting these ever-changing power system grid requirements with optimal cost and improved efficiency. Various grid-enhancing technologies include power flow control devices such as SmartValve devices and phase shift transformers, dynamic and adaptive transmission line ratings, and optimal topology control. The increasing penetration of distributed energy resources such as batteries also activates a different avenue to pursue being able to support transmission expansion planning needs. The term around the battery as a viable alternative is coined as a non-wire alternative solution. In many utilities, it's necessary to assess the non-wire alternative solutions such as batteries to meet FERC requirements. Developing and analyzing these various modern transmission solutions that work in tandem is challenging. One needs proper technical characterization of these technologies and assess the technology readiness. One also needs to evaluate its performance under normal and extreme conditions, the flexibility to deploy and install these technologies, calculate capital and operational costs, understand different available control options for these devices, and analyze potential limitations. Suitable analytical methods and high-performing software tools are needed to run the optimization simulations to enable integration and efficient use of these grid-enhancing technologies. EPRI has developed a software tool called CPLANET (Controlled PLANning Expansion Tool) that helps identify effective and low-cost solutions for mitigating thermal overloads in a power system over various operating scenarios. An optimal solution is determined from a given set of candidate projects, including various grid-enhancing technologies and traditional transmission expansion projects such as installing new transmission lines or upgrading existing substations. The software uses a mixed-integer linear programming formulation in the optimization engine to identify the least-cost solution for the grid's various physical and operating needs. The scope and goal of this presentation are to discuss the ongoing efforts at EPRI's forefront around grid-enhancing technologies. Showcase the current capabilities of the CPLANET tool and

discuss case studies and share existing challenges and future goals.

The Key Role of Extended ACOPF-Based Decision Making for Supporting Clean, Cost-Effective and Reliable/Resilient Electricity Services

Maria Iilic, Professor Emerita, Carnegie Mellon University (Pittsburgh, PA)
Rupamathi Jaddivada, Director of Innovation, SmartGridz (Boston, MA)
Jeffrey Lang, Vitesse Professor, Massachusetts Institute of Technology (Cambridge, MA)
Eric Allen, Director of Engineering, SmartGridz (Boston, MA)

Societal objectives are rapidly moving towards decarbonized, affordable, and reliable/resilient electricity services. In this talk we first revisit these objectives by identifying basic changes and the related challenges taking place. In particular, decarbonization requires planning and operations of the changing electric energy systems so that seamless integration of clean resources, ranging across wind, solar, nuclear, geothermal, and hydro, is enabled. Notably, this must be done with an eye on generation adequacy. Also, these new resources present locational issues (NIMBY) in operating the existing power grid. Finally, the end users still must be served without interruptions and without being exposed to wide-spread blackouts. Similar challenges are related to ensuring cost-effective and reliable/resilient services. Second, we show how an extended (robust, adaptive, multi-temporal) ACOPF is essential for meeting these societal challenges. Pretty much any of the new software needed (for wind integration, resilient service, and preventing blackouts) requires effective optimization tools for identifying the main bottlenecks/obstacles to physical implementation and for advising operators and planners regarding the most effective remedial actions (new investments and/or flexible utilization). We illustrate potential benefits from utilizing ACOPF as a basic means of supporting software tools needed for meeting the societal challenges. We offer a taxonomy of such badly needed tools and illustrate the role of extended ACOPF estimated benefits on several real-world systems based on our work to-date.

Data & API Standards for Clean Energy Solutions and Digital Innovation

Priya Barua, Director of Market Policy and Innovation, Clean Energy Buyers Institute (Washington, DC)
Ben Gerber, President & CEO, M–RETS (Minneapolis, MN)

There is an opportunity for energy attribute certificate (EAC) issuing bodies in the U.S. and abroad to enable next generation carbon-free electricity (CFE) procurement solutions that accelerate grid decarbonization investments by capturing more attributes and better serving as a digital ''platform of platforms''. Energy customers who buy clean energy rely on EACs to assert ownership claims over each megawatt-hour of CFE they procure for auditing, reporting, and marketing purposes. EAC issuing bodies promote CFE procurement integrity and validation by issuing, tracking, and canceling EACs, which each represent a unique standardized tradable instrument representing one megawatt-hour of verified CFE generation. By adopting open data and automated programming interface (API) standards, EAC issuing bodies can improve data access and solutions for customers. This session will explore opportunities for EAC issuing bodies to establish consistent, modern automated programming interfaces (APIs), template legal agreements, and other tools that will make it easier for data providers to deliver data and for users to update the status of EACs through connected digital trading platforms— enabling innovation for CFE procurement solutions.

Mine Production Scheduling Under Time-of-Use Power Rates With Renewable Energy Sources

Dr. Daniel Bienstock, Professor, Columbia University (New York, NY)
Amy Mcbrayer, Ph.D. Candidate, South Dakota School of Mines (Rapid City, SD)
Andrea Brickey, Professor, South Dakota School of Mines (Rapid City, SD)
Alexandra Newman, Professor, Colorado School of Mines (Golden, CO)

Renewable energy use on active and reclaimed mine lands has increased dramatically in recent years. With mining companies focused on increasing efficiencies, reducing carbon intensity, and developing sustainable mining practices, opportunity exists to integrate data on electricity usage and demand into mine production schedules to capitalize on alternative energy sources and to take advantage of favorable pricing strategies. Utilizing real data from an active coal mine that has already integrated electric equipment into their loading fleet, we show the impacts of (i) seasonal power price fluctuations on a medium-term production schedule; and, (ii) hourly power price fluctuations on a short-term extraction schedule. Results reveal the economic potential both for: (i) the integration of renewable energy sources on reclaimed and active mine lands; and (ii), the corresponding synchronization of a production schedule with time-of-use energy pricing contracts.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER23–2130–000]

Glover Creek Solar, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Glover Creek Solar, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is July 5, 2023.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to

view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502–6595 or *OPP@ferc.gov*.

Dated: June 14, 2023.

Federal Energy Regulatory Commission

[Docket No. ER23–2133–000]

PGR 2022 Lessee 9, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of PGR 2022 Lessee 9, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is July 5, 2023.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: June 14, 2023.

Debbie-Anne A. Reese,

Deputy Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–ORD–2015–0765; FRL–10950–01–ORD]

Value of Information (VOI) Under the Board of Scientific Counselors (BOSC)—July 2023

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: The U.S. Environmental Protection Agency (EPA) has selected technical experts to serve as Special Government Employees (SGEs) on a review panel under the authority of the Board of Scientific Counselors (BOSC), a federal advisory committee to the Office of Research and Development (ORD). Selected experts will participate in the review of the Office of Research and Development (ORD)'s draft report on a case study that uses value of information (VOI) analysis to weigh the public health and economic trade-offs associated with the timeliness, uncertainty, and costs of the draft EPA Transcriptomic Assessment Product (ETAP). The ETAP is a proposed ORD assessment product that utilizes a standardized short-term *in vivo* study design and data analysis procedures to develop a transcriptomic-based reference values for data poor chemicals.

DATES: The meeting will be held on Tuesday, July 25, 2023, from 11 a.m. to 5 p.m., and Wednesday, July 26, 2023, from 11 a.m. to 5 p.m. All times noted are Eastern Time and approximate. The meeting may adjourn early if all business is finished. Attendees should register by July 18, 2023, at *https://EPA-VOI_July_meeting.eventbrite.com.* Requests for making oral presentations at the meeting will be accepted up to one business day before the meeting. Comments may be submitted through Friday, July 21, 2023.

ADDRESSES: Instructions on how to connect to the videoconference via Zoom will be provided upon registration at: *https://EPA-VOI_July_meeting.eventbrite.com.* Please note that no Zoom information for the meeting will be provided without registration.

- *www.regulations.gov:* Follow the on-line instructions for submitting comments.
- *Email:* Send comments by electronic mail (email) to: *ORD.Docket@epa.gov,* Attention Docket ID No. EPA–HQ–ORD–2015–0765.
- *Fax:* Fax comments to: (202) 566–0224, Attention Docket ID No. EPA–HQ–ORD–2015–0765.
- *Mail:* Send comments by mail to: Board of Scientific Counselors (BOSC) Executive Committee Docket, Mail Code: 2822T, 1301 Constitution Ave. NW, Washington, DC 20004, Attention Docket ID No. EPA–HQ–ORD–2015–0765.
- *Hand Delivery or Courier:* Deliver comments to: EPA Docket Center (EPA/DC), Room 3334, William Jefferson Clinton West Building, 1301 Constitution Ave. NW, Washington, DC, Attention Docket ID No. EPA–HQ–ORD–2015–0765. *Note:* This is not a mailing address. Deliveries are only accepted during the docket's normal

hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *www.regulations.gov* including any personal information provided unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *www.regulations.gov* or email. The *www.regulations.gov* website is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *www.regulations.gov* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about the EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/dockets/.*

FOR FURTHER INFORMATION CONTACT: The Designated Federal Officer (DFO), Tom Tracy, via phone/voicemail at: 919–541–4334; or via email at: *tracy.tom@epa.gov.*

SUPPLEMENTARY INFORMATION:

General Information: The meeting is open to the public. Any member of the public interested in receiving a draft agenda, attending the meeting, or making a presentation at the meeting may contact Tom Tracy, the Designated Federal (DFO), via any of the contact methods listed in the **FOR FURTHER INFORMATION CONTACT** section above. Individuals making an oral presentation will be limited to a total of three minutes.

For security purposes, all attendees must provide their names to the DFO by registering online at *https://EPA-VOI_July_meeting.eventbrite.com* by July 21, 2023, and must go through a metal detector, sign in with the security desk, and show REAL ID Act-compliant government-issued photo identification to enter the building. Attendees are encouraged to arrive at least 15 minutes prior to the start of the meeting to allow enough time for security screening. Proposed agenda items for the meeting include but are not limited to the following: Review of charge questions, overview of the report outlining the case study that uses VOI analysis to weigh the public health and economic trade-offs associated with the timeliness, uncertainty, and costs of the draft EPA Transcriptomic Assessment Product (ETAP), and subcommittee deliberations.

Information on Services for Individuals with Disabilities: For information on access or services for individuals with disabilities, please contact Tom Tracy (202) 564–6518 or *tracy.tom@epa.gov.* To request accommodation of a disability, please contact Tom Tracy, preferably at least ten days prior to the meeting, to give the EPA as much time as possible to process your request.

Mary Ross,

Director, Office of Science Advisor, Policy, and Engagement.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2023–0061; FRL–10581–05–OCSPP]

Certain New Chemicals; Receipt and Status Information for May 2023

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is required under the Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, to make information publicly available and to publish information in the **Federal Register** pertaining to submissions under TSCA section 5, including notice of receipt of a Premanufacture notice (PMN), Significant New Use Notice (SNUN) or Microbial Commercial Activity Notice (MCAN), including an amended notice or test information; an exemption application (Biotech exemption); an application for a test marketing exemption (TME), both pending and/or concluded; a notice of commencement (NOC) of manufacture (including import) for new chemical substances; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review. This document covers the period from 5/1/2023 to 5/31/2023.

DATES: Comments identified by the specific case number provided in this document must be received on or before July 21, 2023.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2023–0061, through the *Federal eRulemaking Portal* at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: *For technical information contact:* Jim Rahai, Project Management and Operations Division (MC 7407M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–8593; email address: *rahai.jim@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. What action is the Agency taking?

This document provides the receipt and status reports for the period from 5/01/2023 to 5/31/2023. The Agency is providing notice of receipt of PMNs, SNUNs, and MCANs (including amended notices and test information); an exemption application under 40 CFR part 725 (Biotech exemption); TMEs, both pending and/or concluded; NOCs to manufacture a new chemical substance; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review.

EPA is also providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/

MCAN notices on its website at: *https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices.* This information is updated on a weekly basis.

B. What is the Agency's authority for taking this action?

Under the TSCA, 15 U.S.C. 2601 *et seq.,* a chemical substance may be either an ''existing'' chemical substance or a ''new'' chemical substance. Any chemical substance that is not on EPA's TSCA Inventory of Chemical Substances (TSCA Inventory) is classified as a ''new chemical substance,'' while a chemical substance that is listed on the TSCA Inventory is classified as an ''existing chemical substance.'' (See TSCA section 3(11).) For more information about the TSCA Inventory please go to: *https://www.epa.gov/tsca-inventory.*

Any person who intends to manufacture (including import) a new chemical substance for a non-exempt commercial purpose, or to manufacture or process a chemical substance in a non-exempt manner for a use that EPA has determined is a significant new use, is required by TSCA section 5 to provide EPA with a PMN, MCAN, or SNUN, as appropriate, before initiating the activity. EPA will review the notice, make a risk determination on the chemical substance or significant new use, and take appropriate action as described in TSCA section 5(a)(3).

TSCA section 5(h)(1) authorizes EPA to allow persons, upon application and under appropriate restrictions, to manufacture or process a new chemical substance, or a chemical substance subject to a significant new use rule (SNUR) issued under TSCA section 5(a)(2), for ''test marketing'' purposes, upon a showing that the manufacture, processing, distribution in commerce, use, and disposal of the chemical will not present an unreasonable risk of injury to health or the environment. This is referred to as a test marketing exemption, or TME. For more information about the requirements applicable to a new chemical go to: *https://www.epa.gov/chemicals-under-tsca.*

Under TSCA sections 5 and 8 and EPA regulations, EPA is required to publish in the **Federal Register** certain information, including notice of receipt of a PMN/SNUN/MCAN (including amended notices and test information); an exemption application under 40 CFR part 725 (biotech exemption); an application for a TME, both pending and concluded; NOCs to manufacture a new chemical substance; and a periodic status report on the new chemical substances that are currently under EPA review or have recently concluded review.

C. Does this action apply to me?

This action provides information that is directed to the public in general.

D. Does this action have any incremental economic impacts or paperwork burdens?

No.

E. What should I consider as I prepare my comments for EPA?

1. *Submitting confidential business information (CBI).* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *https://www.epa.gov/dockets/commenting-epa-dockets.*

II. Status Reports

In the past, EPA has published individual notices reflecting the status of TSCA section 5 filings received, pending, or concluded. In 1995, the Agency modified its approach and streamlined the information published in the **Federal Register** after providing notice of such changes to the public and an opportunity to comment (see the **Federal Register** of May 12, 1995 (60 FR 25798) (FRL–4942–7)). Since the passage of the Lautenberg amendments to TSCA in 2016, public interest in information on the status of section 5 cases under EPA review and, in particular, the final determination of such cases, has increased. In an effort to be responsive to the regulated community, the users of this information, and the general public, to comply with the requirements of TSCA, to conserve EPA resources and to streamline the process and make it more timely, EPA is providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCAN notices on its website at: *https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices.* This information is updated on a weekly basis.

III. Receipt Reports

For the PMN/SNUN/MCANs that have passed an initial screening by EPA during this period, Table I provides the following information (to the extent that such information is not subject to a CBI claim) on the notices screened by EPA during this period: The EPA case number assigned to the notice that indicates whether the submission is an initial submission, or an amendment, a notation of which version was received, the date the notice was received by EPA, the submitting manufacturer (*i.e.,* domestic producer or importer), the potential uses identified by the manufacturer in the notice, and the chemical substance identity.

As used in each of the tables in this unit, (S) indicates that the information in the table is the specific information provided by the submitter, and (G) indicates that this information in the table is generic information because the specific information provided by the submitter was claimed as CBI. Submissions which are initial submissions will not have a letter following the case number. Submissions which are amendments to previous submissions will have a case number followed by the letter ''A'' (*i.e.,* P–18–1234A). The version column designates submissions in sequence as ''1'', ''2'', ''3'', etc. Note that in some cases, an initial submission is not numbered as version 1; this is because earlier version(s) were rejected as incomplete or invalid submissions. Note also that future versions of the following tables may adjust slightly as the Agency works to automate population of the data in the tables.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 05/01/2023 TO 05/31/2023

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
P–21–0168A	4	05/10/2023	CBI	(G) Colorant	(G) Metal, [heteropolycyclic]-, [[[(hydroxyalkyl)amino]sulfonyl]alkyl] sulfonyl(sulfoalkyl)sulfonyl derivs., ammonium sodium salts.
P–22–0014A	5	05/03/2023	Colonial Chemical, Inc.	(G) Precursor	(G) Sodium bis(chloropropanediol) phosphate.
P–22–0053A	4	05/11/2023	CBI	(G) Additive in agricultural formulations	(S) Ethanol, 2-amino-, compds. with polyethylene glycol hydrogen sulfate C10–16-alkyl ether.
P–22–0078A	5	05/09/2023	CBI	(S) Dispersing agent for pesticide formulators.	(G) Oxirane, 2-methyl-, polymer with oxirane, mono-isoalkyl ethers, phosphates, salt.
P–22–0095A	4	05/05/2023	Locus Fermentation Solutions.	(G) Surfactant for commercial, industrial, consumer applications.	(G) Glycolipids, sophorose-contg., yeast-fermented, from glycerides and carbohydrates.
P–22–0096A	4	05/05/2023	Locus Fermentation Solutions.	(G) Surfactant for commercial, industrial, consumer applications.	(G) Glycolipids, sophorose-contg., yeast-fermented, from glycerides and carbohydrates.
P–22–0097A	4	05/05/2023	Locus Fermentation Solutions.	(G) Surfactant for commercial, industrial, consumer applications.	(G) Glycolipids, sophorose-contg., yeast-fermented, from glycerides and carbohydrates.
P–22–0098A	4	05/05/2023	Locus Fermentation Solutions.	(G) Surfactant for commercial, industrial, consumer applications.	(G) Glycolipids, sophorose-contg., yeast-fermented, from glycerides and carbohydrates.
P–22–0099A	4	05/05/2023	Locus Fermentation Solutions.	(G) Surfactant for commercial, industrial, consumer applications.	(G) Glycolipids, sophorose-contg., yeast-fermented, from glycerides and carbohydrates.
P–22–0100A	4	05/05/2023	Locus Fermentation Solutions.	(G) Surfactant for commercial, industrial, consumer applications.	(G) Glycolipids, sophorose-contg., yeast-fermented, from glycerides and carbohydrates.
P–22–0130A	4	05/17/2023	Integrity Bio-chemical, LLC.	(S) Surfactant—surface tension reducing agent for use in production enhancement in oil wells (industrial), emulsifier, surface reduction household and industrial detergents, emulsifier, wetting agent personal care, cosmetic, and pet care grooming products, wetting agent—agriculture, surfactants—as raw materials for use in the manufacture of industrial products and consumer and household products.	(S) Maltodextrin, octanoate.
P–22–0131A	4	05/17/2023	Integrity Bio-chemical, LLC.	(S) Surfactant—surface tension reducing agent for use in production enhancement in oil wells (industrial), emulsifier, surface reduction household and industrial detergents, emulsifier, wetting agent personal care, cosmetic, and pet care grooming products, wetting agent—agriculture, surfactants—as raw materials for use in the manufacture of industrial products and consumer and household products.	(S) Maltodextrin, hexadecanoate.
P–22–0132A	4	05/17/2023	Integrity Bio-chemical, LLC.	(S) Surfactant—surface tension reducing agent for use in production enhancement in oil wells (industrial), emulsifier, surface reduction household and industrial detergents, emulsifier, wetting agent personal care, cosmetic, and pet care grooming products, wetting agent—agriculture, surfactants—as raw materials for use in the manufacture of industrial products and consumer and household products.	(S) Maltodextrin, decanoate.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 05/01/2023 TO 05/31/2023—Continued

P–22–0133A	4	05/17/2023	Integrity Bio-chemical, LLC.	(S) Surfactant—surface tension reducing agent for use in production enhancement in oil wells (industrial), emulsifier, surface reduction household and industrial detergents, emulsifier, wetting agent personal care, cosmetic, and pet care grooming products, wetting agent—agriculture, surfactants—as raw materials for use in the manufacture of industrial products and consumer and household products.	(S) Maltodextrin, octadecanoate.
P–22–0134A	4	05/17/2023	Integrity Bio-chemical, LLC.	(S) Surfactant—surface tension reducing agent for use in production enhancement in oil wells (industrial), emulsifier, surface reduction household and industrial detergents, emulsifier, wetting agent personal care, cosmetic, and pet care grooming products, wetting agent—agriculture, surfactants—as raw materials for use in the manufacture of industrial products and consumer and household products.	(S) Maltodextrin, dodecanoate.
P–22–0135A	4	05/17/2023	Integrity Bio-chemical, LLC.	(S) Surfactant—surface tension reducing agent for use in production enhancement in oil wells (industrial), emulsifier, surface reduction, household and industrial detergents, emulsifier, wetting agent personal care, cosmetic, and pet care grooming products, wetting agent—agriculture, surfactants—as raw materials for use in the manufacture of industrial products and consumer and household products.	(S) Maltodextrin, tetradecanoate.
P–22–0151A	5	05/08/2023	CBI	(G) Surfactant for commercial applications.	(G) Glycolipids, sophorose-contg., yeast-fermented, from glycerides and carbohydrates.
P–23–0070A	3	05/04/2023	CBI	(G) Surfactant for cleaning products, pet shampoo, hand cleansing, laundry, and dishwasher detergent.	(S) Fatty Acids, C8–14, methyl-2-sulfoethyl esters, sodium salts.
P–23–0079	4	05/09/2023	Lawter	(G) Non-reactive resin to improve ink performance Establishes a good flow and disperse pigment and has lithographic properties.	(S) rosin, maleated, polymer with benzoic acid, glycerol, propylene glycol and 3a,4,7,7a-tetrahydro-1,3-isobenzofurandione.
P–23–0105A	3	05/02/2023	Heebut Materials, LLC.	(G) Plastic and rubber additive	(G) Multi-Walled Carbon Nanotube.
P–23–0118	3	04/27/2023	CBI	(G) Reactant	(G) Glycerides from fermentation of genetically modified microorganism, ethoxylated, reaction products with ethanol, polycyclic isocyanate.
P–23–0127	2	05/18/2023	CBI	(S) Ingredient in laundry detergent that is used for degradation of stains on fabric.	(G) Polysaccharide Lyase.
P–23–0128	2	05/17/2023	CBI	(G) Textile softening applications	(S) Fatty acids, C16–18, reaction products with diethanolamine.
P–23–0129	3	05/16/2023	Polymer Additives, Inc.	(G) Used as an intermediate and will be consumed internally by Valtris to make the end product which is intended to market to customers.	(G) Soy or rapeseed fatty acid, benzyl esters.
P–23–0133	1	05/08/2023	CBI	(G) Component in asphalt	(G) Fatty acids reaction products with alcoholamine reaction by-products, salts.
P–23–0135	1	05/12/2023	CBI	(G) Destructive use	(G) Alken-1-ol, 1-acetate.
P–23–0136	1	05/17/2023	CBI	(G) Component in asphalt	(G) Fatty acids, reaction products with hexamethylenediamine and 12-hydroxyoctadecanoic acid.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 05/01/2023 TO 05/31/2023—Continued

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
P–23–0140 ...	2	05/23/2023	CBI	(G) Additive for consumer and commercial products.	(G) Polysaccharide, (hydroxytrialkylammonio)alkyl ether, chloride.
P–23–0141 ...	1	05/23/2023	Hach Company	(G) Buffer solution for free chlorine determination.	(S) 2-Butenedioic acid (2Z)-, potassium salt (1:?).
SN–16–0013A	5	05/08/2023	CBI	(G) Surfactant	(G) Polyfluorinated alkyl quaternary ammonium chloride.
SN–20–0003A	10	05/08/2023	CBI	(S) An anionic fluorosurfactant used in firefighting foam concentrates such as AFFF (Aqueous Film Forming Foam) and AR–AFFF (Alcohol Resistant Aqueous Fim Forming Foam).	(S) 1-Propanesulfonic acid, 2-methyl-2-[[1-oxo-3-[(3,3,4,4,5,5,6,6,7,7,8,8,8-tridecafluorooctyl)thio]propyl]amino]-, sodium salt (1:1).
SN–21–0011A	3	05/11/2023	CBI	(G) Solvent	(S) 2-Propanol, 1-[bis(2-hydroxyethyl)amino]-.

In Table II of this unit, EPA provides the following information (to the extent that such information is not claimed as CBI) on the NOCs that have passed an initial screening by EPA during this period: The EPA case number assigned to the NOC including whether the submission was an initial or amended submission, the date the NOC was received by EPA, the date of commencement provided by the submitter in the NOC, a notation of the type of amendment (*e.g.,* amendment to generic name, specific name, technical contact information, etc.) and chemical substance identity.

TABLE II—NOCS APPROVED * FROM 05/01/2023 TO 05/31/2023

Case No.	Received date	Commencement date	If amendment, type of amendment	Chemical substance
P–19–0185 ..	05/11/2023	04/03/2023	N	(S) Benzoic acid, 2-chloro-3-methyl-, sodium salt (1:1).
P–95–0224 ..	05/16/2023	04/28/1995	N	(S) 2-propenoic acid,2-methyl-,2-(dimethylamino)ethyl ester, polymer with 1-ethenylhexahydro-2h-azepin-2-one & vinylpyrrolidone.

* The term 'Approved' indicates that a submission has passed a quick initial screen ensuring all required information and documents have been provided with the submission.

In Table III of this unit, EPA provides the following information (to the extent such information is not subject to a CBI claim) on the test information that has been received during this time period: The EPA case number assigned to the test information; the date the test information was received by EPA, the type of test information submitted, and chemical substance identity.

TABLE III—TEST INFORMATION RECEIVED FROM 05/01/2023 TO 05/31/2023

Case No.	Received date	Type of test information	Chemical substance
P–23–0124 ..	05/24/2023	Acute Oral Toxicity/Pathogenicity (OCSPP Test Guideline 885.3050); Bacterial Reverse Mutation Test (OECD Test Guideline 471).	(G) Sulfonium, tricabocyclic-, 2-heteroatom-substituted-(halocarbocyclic)carboxylate (1:1).

If you are interested in information that is not included in these tables, you may contact EPA's technical information contact or general information contact as described under **FOR FURTHER INFORMATION CONTACT** to access additional non-CBI information that may be available.

Authority: 15 U.S.C. 2601 *et seq.*

Dated: June 14, 2023.

Pamela Myrick,

Director, Project Management and Operations Division, Office of Pollution Prevention and Toxics.

EPA Transcriptomic Assessment Product (ETAP) Panel Under the Board of Scientific Counselors (BOSC)—July 2023

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: The U.S. Environmental Protection Agency (EPA) has selected technical experts to serve as Special Government Employees (SGEs) on a review panel under the authority of the Board of Scientific Counselors (BOSC), a federal advisory committee to the Office of Research and Development (ORD). Selected experts will review ORD's draft documents detailing scientific studies supporting the development of transcriptomic-based reference values and their implementation as a new EPA Transcriptomic Assessment Product (ETAP). The ETAP is a proposed ORD assessment product that utilizes a standardized short-term *in vivo* study

design and data analysis procedures to develop transcriptomic-based reference values for data poor chemicals.

DATES: The meeting will be held on Tuesday, July 11, 2023, from 9 a.m. to 5 p.m. and Wednesday, July 12, 2023, from 9 a.m. to 5 p.m. All times noted are Eastern Time and approximate. The meeting may adjourn early if all business is finished. Attendees should register by July 3, 2023, at *https://EPA-ETAP_July_meeting.eventbrite.com.* Requests for making oral presentations at the meeting will be accepted through July 3, 2023. Comments may be submitted through Friday, July 7, 2023.

ADDRESSES: The meeting will be held at the EPA's Research Triangle Park Main Campus Facility, 109 T.W. Alexander Drive, Research Triangle Park, North Carolina 27711. Submit your comments to Docket ID No. EPA–HQ–ORD–2015–0765 by one of the following methods:

- *www.regulations.gov:* Follow the on-line instructions for submitting comments.
- *Email:* Send comments by electronic mail (email) to: *ORD.Docket@epa.gov,* Attention Docket ID No. EPA–HQ–ORD–2015–0765.
- *Fax:* Fax comments to: (202) 566–0224, Attention Docket ID No. EPA–HQ–ORD–2015–0765.
- *Mail:* Send comments by mail to: Board of Scientific Counselors (BOSC) Executive Committee Docket, Mail Code: 2822T, 1301 Constitution Ave. NW, Washington, DC 20004, Attention Docket ID No. EPA–HQ–ORD–2015–0765.
- *Hand Delivery or Courier:* Deliver comments to: EPA Docket Center (EPA/DC), Room 3334, William Jefferson Clinton West Building, 1301 Constitution Ave. NW, Washington, DC, Attention Docket ID No. EPA–HQ–ORD–2015–0765. Note: This is not a mailing address. Deliveries are only accepted during the docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *www.regulations.gov* including any personal information provided unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *www.regulations.gov* or email. The *www.regulations.gov* website is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about the EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/dockets/.*

FOR FURTHER INFORMATION CONTACT: The Designated Federal Officer (DFO), Tom Tracy, via phone/voicemail at: 919–541–4334; or via email at: *tracy.tom@epa.gov.*

SUPPLEMENTARY INFORMATION:

General Information: The meeting is open to the public. Any member of the public interested in receiving a draft agenda, attending the meeting, or making a presentation at the meeting may contact Tom Tracy, the Designated Federal (DFO), via any of the contact methods listed in the **FOR FURTHER INFORMATION CONTACT** section above. Individuals making an oral presentation will be limited to a total of three minutes.

For security purposes, all attendees must provide their names to the DFO by registering online at *https://EPA-ETAP_July_meeting.eventbrite.com* by July 7, 2023, and must go through a metal detector, sign in with the security desk, and show REAL ID Act-compliant government-issued photo identification to enter the building. Attendees are encouraged to arrive at least 15 minutes prior to the start of the meeting to allow enough time for security screening. Proposed agenda items for the meeting include but are not limited to the following: Review of charge questions, overview of the report outlining scientific studies supporting the development of transcriptomic-based reference values, overview of the report outlining implementation of the proposed EPA Transcriptomic Assessment Product, overview of the socio-economic case study of the proposed EPA Transcriptomic Assessment Product, and subcommittee deliberations.

Information on Services for Individuals with Disabilities: For information on access or services for individuals with disabilities, please contact Tom Tracy (202) 564–6518 or *tracy.tom@epa.gov.* To request accommodation of a disability, please contact Tom Tracy, preferably at least ten days prior to the meeting, to give the EPA as much time as possible to process your request.

Mary Ross,

Director, Office of Science Advisor, Policy, and Engagement.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2022–0417; FRL–11041–01–OMS]

Notice of Objections to Chlorpyrifos; Notice of Intent To Cancel Pesticide Registrations; Notice of Public Hearing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of objections and public hearing.

SUMMARY: The Environmental Protection Agency (EPA or Agency) has received objections and hearing requests in response to its issuance of a Notice of Intent to Cancel registrations of three pesticide products containing the insecticide chlorpyrifos due to the Agency's revocation of all tolerances for chlorpyrifos. The EPA will hold a public hearing to receive evidence related to the proposed cancellation of the chlorpyrifos product registrations.

DATES: A public hearing will be held beginning at 9 a.m. January 8, 2024, and continue as necessary through January 11, 2024.

ADDRESSES: The public hearing will take place in the EPA Administrative Courtroom, EPA East Building, Room 1152, 1201 Constitution Ave. NW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Mary Angeles, Headquarters Hearing Clerk, Office of Administrative Law Judges, 1200 Pennsylvania Ave. NW, Mail Code 1900R, Washington, DC 20460; telephone number: (202) 564–6281; email address: *angeles.mary@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, farm worker and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. How can I get copies of this document and other related information?

The regulatory docket for this action, identified by docket identification number EPA–HQ–OPP–2022–0417, is available electronically at *https://www.regulations.gov* or in hard copy at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the EPA Docket Center, (EPA/DC) EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744.

The adjudication docket for the proceeding in which petitioners have requested a public hearing, captioned *In re Chlorpyrifos; Notice of Intent to Cancel Pesticide Registrations* and identified by docket number FIFRA–HQ–2023–0001, is available electronically on the website of the EPA's Office of Administrative Law Judges at: *https://yosemite.epa.gov/oarm/alj/alj_web_docket.nsf/Active+Dockets?OpenView.*

II. Public Hearing to be Held on Objections to EPA's Notice of Intent to Cancel Pesticide Registrations

EPA previously published (87 FR 76474, Dec. 14, 2022) a Notice of Intent to Cancel (NOIC) the registration of the following three pesticide products pursuant to its authority under Section 6(b) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), 7 U.S.C. 136d(b):

- EPA Reg. No. 93182–3 Chlorpyrifos Technical.
- EPA Reg. No. 93182–7 Pilot 4E Chlorpyrifos Agricultural Insecticide.
- EPA Reg. No. 93182–8 Pilot 15G Chlorpyrifos Agricultural Insecticide.

Section 6(b) of FIFRA provides that any person adversely affected by the NOIC may request a hearing on the proposed cancellation within 30 days of the registrant receiving the notice or of the notice's publication, whichever comes later. 7 U.S.C. 136d(d). On January 13, 2023, Gharda Chemicals International, Inc., the registrant for the pesticide products proposed for cancellation, filed an objection to the NOIC and requested a hearing. Also on January 13, 2023, the following 19 entities jointly filed an objection to the NOIC and requested a hearing: Red River Valley Sugarbeet Growers Association, U.S. Beet Sugar Association, American Sugarbeet Growers Association, Southern Minnesota Beet Sugar Cooperative, American Crystal Sugar Company, Minn-Dak Farmers Cooperative, American Farm Bureau Federation, American Soybean Association, Iowa Soybean Association, Minnesota Soybean Growers Association, Missouri Soybean Association, Nebraska Soybean Association, South Dakota Soybean Association, North Dakota Soybean Growers Association, National Association of Wheat Growers, Cherry Marketing Institute, Florida Fruit and Vegetable Association, Georgia Fruit and Vegetable Growers Association, and National Cotton Council of America.

The hearing requests commenced a proceeding under Section 6(d) of FIFRA, 7 U.S.C. 136d(d), and the EPA's procedural rules, 40 CFR 164, before the EPA's Office of Administrative Law Judges. The proceeding includes a public hearing that will be held to receive evidence from the parties relevant and material to issues raised by the petitioners' objections to the proposed cancellation of the listed chlorpyrifos pesticide product registrations.

As set forth in **DATES** and **ADDRESSES**, the hearing will begin at 9 a.m. January 8, 2024, and continue as necessary through January 11, 2024, in the EPA Administrative Courtroom, EPA East Building, Room 1152, 1201 Constitution Ave. NW, Washington, DC 20460. Anyone wishing to attend the hearing must notify Mary Angeles, Headquarters Hearing Clerk, Office of Administrative Law Judges, by email no later than January 2, 2024, at the email address listed under **FOR FURTHER INFORMATION CONTACT**. A notice of intent to attend the hearing shall include the individual's name, email address, telephone number, and any organization they represent. On the day of the hearing, attendees must present government-issued identification to enter EPA facilities. Attendees may face further restrictions on entry based on the community level of COVID–19 at the time of the hearing.

Authority: 7 U.S.C. 136 *et seq.;* 40 CFR 164.

Susan Biro,

Chief Administrative Law Judge.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2023–0226; 10963–01–OAR]

Proposed Baseline Approval of the Contact-Handled Transuranic Waste Characterization Program Implemented at the Department of Energy's Argonne National Laboratory, Lemont, Illinois

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability; opening of a 45-day public comment period.

SUMMARY: The Environmental Protection Agency (EPA or the Agency) is announcing the availability of, and soliciting public comments on, the proposed ''baseline'' approval of the contact-handled (CH) transuranic (TRU) debris waste characterization program implemented by the Central Characterization Program (CCP) at the U.S. Department of Energy's (DOE) Argonne National Laboratory in Lemont, IL. The inspections supporting this proposed baseline approval took place from November 15–17, 2022 remotely and on site in Lemont, IL. EPA identified no findings or concerns and proposes to approve the ANL–CCP CH TRU debris waste characterization program. EPA's report documenting the inspection results and proposed baseline approval is available for review in the public docket listed in the **ADDRESSES** section of this document. Until the Agency finalizes its baseline approval decision, the DOE Carlsbad Field Office may not certify ANL–CCP's CH waste characterization program and the site may not ship transuranic waste to the Waste Isolation Pilot Plant for disposal.

DATES: Comments must be received on or before August 7, 2023.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2023–0226, to the *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. EPA may publish any comment received to its public docket. Do not electronically submit any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is

restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit: *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Jerry Ellis (202–564–2766) or Edward Feltcorn (202–343–9422). Radiation Protection Division, Center for Waste Management and Regulations, Mail Code 6608T, U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, Washington, DC 20460; email addresses: *ellis.jerry@epa.gov* or *feltcorn.ed@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in electronic media that you mail to EPA, mark the outside of the electronic media as CBI and then identify electronically within the files what specific information is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When submitting comments, remember to:

- Identify the rulemaking by docket number EPA–HQ–OAR–2023–0226 and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions: The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified.

II. Background

The DOE operates the Waste Isolation Pilot Plant (WIPP) facility near Carlsbad in southeastern New Mexico as a deep geologic repository for disposal of defense-related TRU radioactive waste. TRU waste contains more than 100 nanocuries of alpha-emitting TRU isotopes, with half-lives greater than twenty years, per gram of waste. Much of the existing TRU waste, which may also be contaminated with hazardous chemicals, consists of items contaminated during the production of nuclear weapons, such as debris waste (rags, equipment, tools) and solid waste (sludges, soil). Legacy weapons production facilities, including ANL, that have generated TRU waste for shipment to and disposal at WIPP are expected use approved waste characterization programs.

EPA's inspection and approval processes for waste generator sites, including quality assurance and waste characterization programs, are described at 40 CFR 194.8. The Agency has discretion in establishing technical priorities, the ability to accommodate variation in the site's waste characterization capabilities, and flexibility in scheduling site waste characterization inspections.

In accordance with the conditions in the WIPP compliance certification and relevant regulatory provisions, including 40 CFR 194.8, EPA conducts ''baseline'' inspections at waste generator sites, as well as subsequent inspections to confirm continued compliance. As part of a baseline inspection, EPA evaluates each waste characterization process component (equipment, procedures and personnel training and experience) for adequacy and appropriateness in characterizing TRU waste intended for disposal at the WIPP. During the inspection, the site demonstrates its capabilities to characterize TRU waste and its ability to comply with the regulatory limits and tracking requirements under § 194.24. The baseline inspection can result in approval with limitations and conditions or may require follow-up inspection(s) before approval. Within the approval documentation, EPA specifies what subsequent program changes should be reported to the Agency, referred to as Tier 1 (T1) or Tier 2 (T2) changes, depending largely on the anticipated effect of the changes on data quality.

A T1 designation requires that the DOE Carlsbad Field Office (CBFO) provide to EPA documentation on proposed changes to the approved components of an individual site-specific waste characterization process (such as radioassay equipment), which the Agency must approve before the change can be implemented. T2 designated changes are minor changes to the approved components of individual waste characterization processes (such as visual examination procedures) which must also be reported to EPA, but the site may implement such changes without awaiting Agency approval. The inspections conducted to evaluate T1 or T2 changes are under the authority of EPA's WIPP compliance certification conditions and regulations, including 40 CFR 194.8 and 194.24(h). In addition to follow-up inspections, EPA may opt to conduct continued compliance inspections at TRU waste sites with a baseline approval under the authority of the WIPP compliance certification regulations, including § 194.24(h).

In accordance with 40 CFR 194.8, EPA issues a **Federal Register** notice proposing a baseline compliance decision, dockets the inspection report for public review, and seeks public comment on the proposed decision for a minimum period of 45 days. The report describes the waste characterization processes the Agency inspected at the site, as well as their compliance with 40 CFR 194.8 and 194.24 requirements.

A. Proposed Baseline Decision

This notice announces EPA's proposed baseline approval of the CH TRU waste characterization program implemented by the CCP at the DOE's Argonne National Laboratory. In accordance with 40 CFR 194.8(b), EPA conducted Baseline Inspection No. ANL–CCP–CH–Baseline–2022 on November 15–17, 2022, remotely and at Argonne National Laboratory. Upon EPA's final approval, the DOE may emplace ANL–CCP CH TRU waste in the WIPP.

ANL is located in Lemont, Illinois, approximately 25 miles southwest of downtown Chicago. Originally founded

in 1946 as the first national laboratory, ANL grew from conducting initial experiments performed at the University of Chicago to producing plutonium for nuclear weapons. Since then, ANL has supported research and development of nuclear reactors and related systems, materials, and components for civilian and national defense programs. This work historically included development of essentially all domestic reactor systems in use today for isotope production, power generation and naval submarine propulsion, as well as applications for weapons destruction, defense waste management, defense safeguards and security and space propulsion. Currently, ANL is a multi-disciplinary research laboratory that performs basic and applied work in engineering, chemistry, physics, materials and environmental studies. Transuranic waste-generating activities at ANL consist mainly of cleaning out buildings or other areas previously used for a variety of research activities.

EPA is proposing to approve the ANL–CCP waste characterization program implemented to characterize CH TRU waste as documented in the accompanying inspection report. Specifically, the proposed approval includes:

(1) The AK (Acceptable Knowledge) process for ANL CH TRU waste.

(2) The MILCC5 (Mobile ISOCS Large Container Counter No. 5) NDA (Non-destructive assay) system and processes for characterizing CH TRU waste.

(3) The VE (Visual Examination) process to identify waste material parameters and the physical form of CH TRU waste.

Any changes to the waste characterization activities after the date of the baseline inspection must be reported to and, if applicable, approved by EPA according to Table 1 below. All T1 changes must be submitted for approval before their implementation and will be evaluated by EPA. Upon approval, the Agency will post the results of the evaluations in EPA's general WIPP docket at *regulations.gov* (Docket No. EPA–HQ–OAR–2001–0012). ANL–CCP must submit T2 changes at the end of the fiscal year quarter in which they were implemented.

EPA's final approval decision regarding the ANL–CCP CH waste characterization program will be conveyed to the DOE separately by letter following EPA's review of public comments received in response to this notice and proposed approval discussed in the inspection report. This information will be provided through EPA's WIPP docket provided for this action at *regulations.gov* (Docket No. EPA–HQ–OAR–2023–0226), in accordance with 40 CFR 194.8(b)(3).

TABLE 1

[Based on November 15–17, 2022, Baseline Inspection ANL–CCP–CH–Baseline–2022]

Process elements	ANL–CCP CH waste characterization process—T1 changes	ANL–CCP CH waste characterization process—T2 changes *
Acceptable Knowledge (AK).	Implementation of payload management.	Submission of a list of active ANL–CCP CH AK experts and site project managers Notification to EPA upon availability of or substantive modification ** to: • AK summary reports (e.g., CCP–AK–ANLE–002) • AK accuracy reports (annually, at a minimum) • Waste stream profile forms and any associated change notices • Add container memoranda • Site AK procedures requiring CBFO approval *** • Enhanced AK documents such as CCP–TP–005, Attachment 9 forms and AK Assessment, CCE and Basis of Knowledge memoranda (including addition of new figures or attachments).
Nondestructive Assay (NDA).	New equipment or substantive physical modifications ** to approved equipment. Extension of or changes to approved calibration ranges for approved equipment. Measurement geometries other than 55-gallon drums.	Submission of a list of ANL–CCP NDA operators, expert analysts and independent technical reviewers that performed work during the previous quarter Notification to EPA upon substantive modification ** to: • Software for approved equipment • Operating ranges upon CBFO approval • Site NDA procedures requiring CBFO approval. ***
Visual Examination (VE).	VE for non-debris waste ..... VE by any process other than ANL–CCP VE operators observing ANL waste handlers package the waste in a glovebox, as demonstrated during the 2022 baseline inspection.	Submission of a list of ANL–CCP VE operators, VE experts and independent technical reviewers that performed work during the previous quarter Notification to EPA upon substantive modification ** to site VE procedures requiring CBFO approval. ***
Real-time Radiography (RTR).	Implementation of RTR.	

* ANL–CCP will report all T2 changes to EPA every three months.

** ''Substantive modification'' refers to a change with the potential to affect ANL–CCP's CH waste characterization processes or documentation of them, excluding changes that are solely related to the environment, safety and health; nuclear safety; or the Resource Conservation and Recovery Act; or that are editorial in nature or are required to address administrative concerns. EPA may request copies of new references that the DOE adds during a document revision.

*** Site procedures include any procedures used by ANL–CCP personnel that require Carlsbad Field Office (CBFO) approval. This includes ANL–CCP-specific procedures as well as applicable CCP-wide procedure.

III. Availability of the Baseline Inspection Report and Proposed Approval for Public Comment

EPA has placed the report discussing the results of the inspection of the CH TRU waste characterization program at ANL in the public docket as described in the **ADDRESSES** section of this document. In accordance with 40 CFR 194.8, the Agency is providing the public 45 days to comment on this and EPA's proposed decision to approve the ANL–CCP CH TRU waste characterization program. The Agency will accept public comment on this

notice and supplemental information as described in Section I above. At the end of the public comment period, EPA will evaluate all relevant public comments and, as the Agency may deem appropriate and necessary, revise the report and proposed approval or take other appropriate action. If EPA concludes that there are no unresolved issues after the public comment period, the Agency will issue an approval letter and the final report. The letter of approval will authorize the DOE to approve the ANL–CCP waste characterization program implemented to characterize CH TRU waste at ANL.

Information on the approval decision will be filed in the official public docket opened for this action on *www.regulations.gov,* Docket ID No. EPA–HQ–OAR–2023–0226 (as listed in the **ADDRESSES** section of this document).

Jonathan Edwards,

Director, Office of Radiation and Indoor Air.

BILLING CODE 6560–50–P

FEDERAL RESERVE SYSTEM

Privacy Act of 1974; System of Records

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of a modified system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, notice is given that the Board of Governors of the Federal Reserve System (Board) proposes to modify an existing system of records entitled BGFRS–20, ''FRB—Survey of Consumer Finances'' to account for changes necessitated by title III of the Foundations for Evidence-Based Policymaking Act of 2018 (Evidence Act). BGFRS–20 is a system of records that covers the Survey of Consumer Finances (SCF), which is a voluntary triennial survey of a representative sample of households that collects information on household finances, income, employment, attitudes and demographics.

DATES: Comments must be received on or before July 21, 2023. This modified system of records will become effective July 21, 2023, without further notice, unless comments dictate otherwise.

The Office of Management and Budget (OMB), which has oversight responsibility under the Privacy Act, requires a 30-day period prior to publication in the **Federal Register** in which to review the system and to provide any comments to the agency. The public is then given a 30-day period in which to comment, in accordance with 5 U.S.C. 552a(e)(4) and (11).

ADDRESSES: You may submit comments, identified by *BGFRS–20 ''FRB—Survey of Consumer Finances,''* by any of the following methods:

- *Agency Website: https://www.federalreserve.gov.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include SORN name and number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

In general, all public comments will be made available on the Board's website at *www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm* as submitted, and will not be modified to remove confidential, contact or any identifiable information. Public comments may also be viewed electronically or in paper in Room M–4365A, 2001 C St. NW Washington, DC 20551, between 9:00 a.m. and 5:00 p.m. during Federal business weekdays.

FOR FURTHER INFORMATION CONTACT: David B. Husband, Senior Counsel, (202) 530–6270, or *david.b.husband@frb.gov;* Legal Division, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551. For users of telephone systems via text telephone (TTY) or any TTY-based Telecommunications Relay Services, please call 711 from any telephone, anywhere in the United States.

SUPPLEMENTARY INFORMATION: The Board is modifying this system of records in response to the passage of title III of the Foundations for Evidence-Based Policymaking Act of 2018 (Evidence Act), which reauthorized and expanded the Confidential Information Protection and Statistical Efficiency Act (CIPSEA). Under CIPSEA as amended, OMB is tasked with creating a Standard Application Process (SAP) to permit entities and individuals to apply to access confidential data assets accessed or acquired under CIPSEA by a statistical agency or unit for the purposes of developing evidence. The Board is therefore amending this SORN to permit access to information in the system of records for the purpose of developing evidence.

Specifically, the Board is adding a new routine use to permit access to protected information (the Survey of Consumer Finances (SCF)) by individuals for the purpose of developing evidence, subject to appropriate control, supervision, and agreement to comply with all relevant legal provisions. These include requirements and standards issued by the Office of Management and Budget (OMB) in accordance with the Standard Application Process laid out in M–23–04 or any successor document. The Board is deleting the existing system-specific routine uses because the routine uses do not describe intended sharing of SCF data but rather describe administrative and technical safeguards and thus has moved that language to the administrative and technical safeguards section. The Board is also revising the administrative, technical, and physical safeguards to reflect that access may be granted to outside entities or individuals for the purposes of developing evidence, subject to appropriate controls, supervision, and agreement to comply with all relevant legal provisions. The Board is also adding Routine Use G to permit sharing with contractors and taking the opportunity to update the system location, the system manager, the authority for maintenance of the system, the purpose of the system, and the policies and practices for storage of records.

The Board is also making technical changes to BGFRS–20 consistent with the template laid out in OMB Circular No. A–108. Accordingly, the Board has made technical corrections and non-substantive language revisions to the following sections: ''Policies and Practices for Storage of Records,'' ''Policies and Practices for Retrieval of Records,'' ''Policies and Practices for Retention and Disposal of Records,'' ''Administrative, Technical and Physical Safeguards,'' ''Record Access Procedures,'' ''Contesting Record Procedures,'' and ''Notification Procedures.'' The Board has also created and populated the following new sections: ''Security Classification'' and ''History.''

SYSTEM NAME AND NUMBER:

BGFRS–20, ''FRB—Survey of Consumer Finances''.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Board of Governors of the Federal Reserve System, 502 S Sharp Street, Baltimore, MD 21201 and U.S. Census

Bureau, Bowie Computer Center, 17101 Melford Boulevard, Bowie, MD 20715. Information is also collected and maintained on behalf of the Board, by National Opinion Research Center at the University of Chicago (NORC) at 1808 Swift Drive, Oak Brook, IL 60523.

SYSTEM MANAGER(S):

Alice H. Volz, Chief, Microeconomics Survey Section, Research and Statistics Division, Board of Governors of the Federal Reserve System, 20th Street and Constitution Ave NW, Washington, DC 20551, 202–452–3080, or *alice.h.volz@frb.gov.*

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 2A and 12A of the Federal Reserve Act (12 U.S.C. 225a and 263) and the Confidential Information Protection and Statistical Efficiency Act of 2018 (44 U.S.C. 3561–3583).

PURPOSE(S) OF THE SYSTEM:

The Microeconomic Survey Section, a recognized statistical unit of the U.S. government, collects and maintains the Survey of Consumer Finance (SCF) records for statistical purposes only in accordance with CIPSEA. The SCF records are used to structure, conduct, and process the SCF. The SCF is a key part of the national statistical system and it provides a basis for a wide variety of government, academic, and other statistical research.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who voluntarily respond to the SCF.

CATEGORIES OF RECORDS IN THE SYSTEM:

NORC, the independent contractor for survey data collection, holds three types of files for the SCF:

(a) Answers given by survey participants in the course of the administration of the survey questionnaire. No identifying information is included in this category.

(b) Answers given by interviewers to questions about the administration, or attempted administration, of the survey interview, and answers given by interviewers to questions about the area around the sample addresses. No identifying information is included in this category.

(c) A control file containing the name, address, other identifying or locating characteristics of members of the survey sample, and technical information describing survey participation.

The Board holds five types of files:

(a) All information included in NORC (a) and NORC (b).

(b) A control file containing general geographic characteristics and technical information describing survey participation. No identifying information is included in this category.

(c) For a part of the survey sample, information from statistical records derived from individual tax returns, which includes a Social Security Number and date of birth, but otherwise contains no other identifying information.

(d) Files of information matched to the survey data by high-level characteristics, such as general location, occupation, banking market, etc. No identifying information is included in this category.

RECORD SOURCE CATEGORIES:

Survey participants provide the information. Survey interviewers provide other information about the steps taken to obtain an interview, the progress of the interview, and the general characteristics of the neighborhood of the sample address. NORC provides technical sample design information for a geographically based part of the survey sample. Statistical records for sample members in the other part of the sample are derived from individual tax returns, which are obtained from the Statistics of Income Division of the Internal Revenue Service.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

Data collected as a part of the SCF are protected under the Confidential Information Protection and Statistical Efficiency Act of 2018 (CIPSEA). To the extent that disclosure is permitted under CIPSEA, records may be disclosed for general routine uses C, G, I, and J. These general routine uses are located at *https://www.federalreserve.gov/files/SORN-page-general-routine-uses-of-board-systems-of-records.pdf* and are published in the **Federal Register** at 83 FR 43872 at 43873–74 (August 28, 2018). In addition, records may also be disclosed to permit outside entities or individuals to access information for the purposes of developing evidence subject to appropriate controls, supervision, and agreement to comply with all relevant legal provisions. These include requirements and standards issued by the Office of Management and Budget in accordance with the Standard Application Process laid out in M–23–04 or any successor document.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are stored in electronic form and some historical records are kept in paper.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records of answers provided by survey participants or interviewers can be retrieved by an identification number (which is generated for administrative purposes). Control file records can be retrieved by all categories of identifying information and above noted identification number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

All input information is retained at least six months after the accuracy of the database has been verified and destroyed when no longer needed for administrative or reference purposes. The final version of the SCF data set is one statistically altered to protect the identity of the survey participants; this data set is placed in the public domain. A data set without these alterations is retained as a restricted version within the Microeconomics Surveys Section at the Federal Reserve Board.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access to records is limited to those whose official duties, consistent with CIPSEA, require it, or to outside entities or individuals for the purposes of developing evidence, subject to appropriate controls, supervision, and agreement to comply with all relevant legal provisions. All records are secured by such controls as required to comply with CIPSEA. Electronic files are stored on secure servers. The system has the ability to track individual user actions within the system. The audit and accountability controls are based on NIST and Board standards which, in turn, are based on applicable laws and regulations. The controls assist in detecting security violations and performance or other issues in the system. Users are classified into different roles and common access and usage rights are established for each role. User roles are used to delineate between the different types of access requirements such that users are restricted to data that is required in the performance of their duties. Periodic assessments and reviews are conducted to evaluate the overall security of the system and data, determine whether users still require access, have the appropriate role, and whether there have been any unauthorized changes. The survey contractor uses information in the system to devise and execute a plan to request an interview with all members of the survey sample; access to such information is available only to those involved in the sample design and its implementation in the field. Upon

completion of the data collection, access by the contractor is limited to the specific information necessary to complete the initial processing of the data and to respond to requests from survey participants.

RECORD ACCESS PROCEDURES:

The Privacy Act allows individuals the right to access records maintained about them in a Board system of records. Your request for access must: (1) contain a statement that the request is made pursuant to the Privacy Act of 1974; (2) provide either the name of the Board system of records expected to contain the record requested or a concise description of the system of records; (3) provide the information necessary to verify your identity; and (4) provide any other information that may assist in the rapid identification of the record you seek.

The Board handles all Privacy Act requests as both a Privacy Act request and as a Freedom of Information Act request. The Board does not charge fees to a requestor seeking to access or amend his/her Privacy Act records.

You may submit your Privacy Act request to the—Secretary of the Board, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

You may also submit your Privacy Act request electronically by filling out the required information at: *https://foia.federalreserve.gov/.*

CONTESTING RECORD PROCEDURES:

The Privacy Act allows individuals to seek amendment of information that is erroneous, irrelevant, untimely, or incomplete and is maintained in a system of records that pertains to them. To request an amendment to your record, you should clearly mark the request as a ''Privacy Act Amendment Request.'' You have the burden of proof for demonstrating the appropriateness of the requested amendment and you must provide relevant and convincing evidence in support of your request.

Your request for amendment must: (1) provide the name of the specific Board system of records containing the record you seek to amend; (2) identify the specific portion of the record you seek to amend; (3) describe the nature of and reasons for each requested amendment; (4) explain why you believe the record is not accurate, relevant, timely, or complete; and (5) unless you have already done so in a related Privacy Act request for access or amendment, provide the necessary information to verify your identity.

NOTIFICATION PROCEDURES:

Same as ''Access procedures'' above. You may also follow this procedure in order to request an accounting of previous disclosures of records pertaining to you as provided for by 5 U.S.C. 552a(c).

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

This SORN was previously published in the **Federal Register** at 73 FR 24984 at 24987 (May 6, 2008). The SORN was also amended to incorporate two new routine uses required by OMB at 83 FR 43872 (August 28, 2018).

BILLING CODE P

FEDERAL RESERVE SYSTEM

Privacy Act of 1974; System of Records

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of a new system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, notice is given that the Board of Governors of the Federal Reserve System (Board) proposes to establish a new system of records, entitled BGFRS–45, ''FRB—Debt Collection Records.'' BGFRS–45 includes records concerning debts owed to the Board or to the United States (including but not limited to restitution collectible by the United States) that arise out of the Board's operations or other activities, and records concerning the Board's efforts to collect these debts. The Board will create, collect, and maintain these records to support its debt collection efforts, and to facilitate compliance with statutory and regulatory requirements.

DATES: Comments must be received on or before July 21, 2023. This new system of records will become effective July 21, 2023, without further notice, unless comments dictate otherwise.

The Office of Management and Budget (OMB), which has oversight responsibility under the Privacy Act, requires a 30-day period prior to publication in the **Federal Register** in which to review the system and to provide any comments to the agency. The public is then given a 30-day period in which to comment, in accordance with 5 U.S.C. 552a(e)(4) and (11).

ADDRESSES: You may submit comments, identified by *BGFRS–45 ''FRB—Debt Collection Records,''* by any of the following methods:

- *Agency Website: https://www.federalreserve.gov.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include SORN name and number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

In general, all public comments will be made available on the Board's website at *www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm* as submitted, and will not be modified to remove confidential, contact or any identifiable information. Public comments may also be viewed electronically or in paper in Room M–4365A, 2001 C St. NW, Washington, DC 20551, between 9:00 a.m. and 5:00 p.m. during Federal business weekdays.

FOR FURTHER INFORMATION CONTACT: David B. Husband, Senior Counsel, (202) 530–6270, or *david.b.husband@frb.gov;* Legal Division, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551. For users of telephone systems via text telephone (TTY) or any TTY-based Telecommunications Relay Services, please call 711 from any telephone, anywhere in the United States.

SUPPLEMENTARY INFORMATION: In 2019, the Board adopted regulations providing for the collection of debts owing to the United States arising out of the Board's operations or its enforcement and other regulatory activities. *See* 84 FR 15502 (April 16, 2019) and codified at 12 CFR part 267, ''Procedures for Debt Collection.'' Prior to the adoption of these regulations, the Board's debt collection processes focused on salary offset from current Board employees and were addressed via the Board's payroll processes. Building upon this adoption of new procedures and after reviewing the Board's existing debt collection processes, the Board has determined to expand its collection processes beyond current employees, to include persons indebted either to the Board or the United States (including but not limited to restitution or

disgorgement debts collectible by the United States) in connection with the Board's operations or activities. The Board is therefore proposing to establish a new system of records for the maintenance and operation of the Board's expanded debt collection activities.

SYSTEM NAME AND NUMBER:

BGFRS–45, ''FRB—Debt Collection Records''.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

SYSTEM MANAGER(S):

Cynthia Francis, Senior Manager—Accounting, Division of Financial Management, (202) 452–2386, or *cynthia.h.francis@frb.gov* and Joshua Chadwick, Senior Special Counsel—Enforcement and Litigation, Legal Division, (202) 263–4835, or *joshua.p.chadwick@frb.gov.* Both managers are located at the Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 10 and 11 of the Federal Reserve Act (12 U.S.C. 244 and 248), 12 CFR part 267, Federal Debt Collection Improvement Act, 5 U.S.C. 5514, 31 U.S.C. 3711–3720D, and Executive Order 9397.

PURPOSE(S) OF THE SYSTEM:

The Board maintains these records for debt collection purposes to reduce the debts owed to the Board arising out of its operations and activities, to protect the programmatic and financial integrity of the Board's operations and activities, and to facilitate compliance with regulatory and statutory requirements.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons indebted to the Board or the United States (including but not limited to restitution or disgorgement debts collectible by the United States) in connection with the Board's operations or activities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records documenting the basis for the person's debts; the amount of the debt, payments on the debt (potentially including associated banking information), and accruals on the person's debts; and internal and external correspondence concerning the person's debts. Sensitive personally identifying information in the system could include debtors' Social Security or tax identification numbers, dates of birth, bank account information, tax records, financial information, educational records, insurance records, payroll records, and pension records.

RECORD SOURCE CATEGORIES:

Information is provided by other Board components whose activities are connected to the debt, the Board's payroll department, debtors, third parties holding information about debtors, materials produced in litigation, public records and databases compiling information from such records, and the U.S. Treasury Department or other Federal agencies.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

General routine uses A, B, C, D, E, F, G, H, I, and J apply to this system. These general routine uses are located at *https://www.federalreserve.gov/files/SORN-page-general-routine-uses-of-board-systems-of-records.pdf* and are published in the **Federal Register** at 83 FR 43872 at 43873–74 (August 28, 2018). Records may also be used:

1. to disclose information to the U.S. Social Security Administration to report wages paid and FICA or other tax deductions;

2. to disclose information to the U.S. Internal Revenue Service and to state, local, tribal, and territorial governments for tax purposes;

3. to disclose information to the U.S. Office of Personnel Management in connection with programs administered by that office;

4. to disclose information to an employee, agent, contractor, or administrator of any Federal Reserve System, or Federal Government employee benefit or savings plan, any information necessary to carry out any function authorized under such plan, or to carry out the coordination or audit of such plan;

5. to disclose information to a Federal agency, Federal court, or a debtor's obligor for the purpose of collecting a debt owed to the Federal Government (including restitution collectible by the United States) through administrative or salary offset or the offset of tax refunds or other Federal payments, or by other legally authorized means;

6. to disclose relevant information to other Federal agencies conducting computer matching programs to eliminate fraud and abuse and to detect unauthorized overpayments made to individuals.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Paper records in this system are stored in locked file cabinets with access limited to staff with a need to know. Electronic records are stored on a secure server with access limited to staff with a need to know.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records maintained can be retrieved by name.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records relating to a debt will be retained for at least six years after final payment of the debt.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Paper records are secured by lock and key and electronic files are stored on secure servers. The system has the ability to track individual user actions within the system. The audit and accountability controls are based on NIST and Board standards which, in turn, are based on applicable laws and regulations. The controls assist in detecting security violations and performance or other issues in the system. Access to the system is restricted to authorized users who require access for official business purposes. Users are classified into different roles and common access and usage rights are established for each role. User roles are used to delineate between the different types of access requirements such that users are restricted to data that is required in the performance of their duties. Periodic assessments and reviews are conducted to determine whether users still require access and have the appropriate role, and whether there have been any unauthorized changes.

RECORD ACCESS PROCEDURES:

The Privacy Act allows individuals the right to access records maintained about them in a Board system of records. Your request for access must: (1) contain a statement that the request is made pursuant to the Privacy Act of 1974; (2) provide either the name of the Board system of records expected to contain the record requested or a concise description of the system of records; (3) provide the information necessary to verify your identity; and (4) provide any other information that may assist in the rapid identification of the record you seek.

Current or former Board employees may make a request for access by contacting the Board office that maintains the record. The Board

handles all Privacy Act requests as both a Privacy Act request and as a Freedom of Information Act request. The Board does not charge fees to a requestor seeking to access or amend his/her Privacy Act records.

You may submit your Privacy Act request to the—Secretary of the Board, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

You may also submit your Privacy Act request electronically by filling out the required information at: *https://foia.federalreserve.gov/.*

CONTESTING RECORD PROCEDURES:

The Privacy Act allows individuals to seek amendment of information that is erroneous, irrelevant, untimely, or incomplete and is maintained in a system of records that pertains to them. To request an amendment to your record, you should clearly mark the request as a ''Privacy Act Amendment Request.'' You have the burden of proof for demonstrating the appropriateness of the requested amendment and you must provide relevant and convincing evidence in support of your request.

Your request for amendment must: (1) provide the name of the specific Board system of records containing the record you seek to amend; (2) identify the specific portion of the record you seek to amend; (3) describe the nature of and reasons for each requested amendment; (4) explain why you believe the record is not accurate, relevant, timely, or complete; and (5) unless you have already done so in a related Privacy Act request for access or amendment, provide the necessary information to verify your identity.

NOTIFICATION PROCEDURES:

Same as ''Access procedures'' above. You may also follow this procedure in order to request an accounting of previous disclosures of records pertaining to you as provided for by 5 U.S.C. 552a(c).

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

BILLING CODE P

FEDERAL RESERVE SYSTEM

Privacy Act of 1974; System of Records

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of a modified system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, notice is given that the Board of Governors of the Federal Reserve System (Board) proposes to modify an existing system of records, entitled BGFRS–9, ''FRB—Supplier Files.'' BGFRS–9 includes the supplier information form, W–9 tax identification document, and any other information pertaining to a supplier's status.

DATES: Comments must be received on or before July 21, 2023. This new system of records will become effective July 21, 2023, without further notice, unless comments dictate otherwise.

The Office of Management and Budget (OMB), which has oversight responsibility under the Privacy Act, requires a 30-day period prior to publication in the **Federal Register** in which to review the system and to provide any comments to the agency. The public is then given a 30-day period in which to comment, in accordance with 5 U.S.C. 552a(e)(4) and (11).

ADDRESSES: You may submit comments, identified by *BGFRS–9 ''FRB—Supplier Files,''* by any of the following methods:

- *Agency Website: https://www.federalreserve.gov.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include SORN name and number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

In general, all public comments will be made available on the Board's website at *www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm* as submitted, and will not be modified to remove confidential, contact or any identifiable information. Public comments may also be viewed electronically or in paper in Room M–4365A, 2001 C St. NW Washington, DC 20551, between 9:00 a.m. and 5:00 p.m. during Federal business weekdays.

FOR FURTHER INFORMATION CONTACT: David B. Husband, Senior Counsel, (202) 530–6270, or *david.b.husband@frb.gov;* Legal Division, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551. For users of telephone systems via text telephone (TTY) or any TTY-based Telecommunications Relay Services, please call 711 from any telephone, anywhere in the United States.

SUPPLEMENTARY INFORMATION: The Board is replacing its enterprise business system (EBS) and is making minor modifications to the system. The Board is modifying the records source categories section to reflect that the new system will no longer store information related to travel expenses and updating the category of records section to explicitly include wire bank information. The Board is also updating the records retention section to reflect that the records can be destroyed six years after final payment or cancellation, but longer retention is authorized if required for business use. Finally, the Board is also making minor updates to the system manager and system location as well as the storage and retrieval of records sections. The Board is also updating the ''Routine Uses'' section to incorporate a link to the Board's general routine uses. The Board is not amending or establishing any new routine uses.

The Board is also making technical changes to BGFRS–9 consistent with the template laid out in OMB Circular No. A–108. Accordingly, the Board has made technical corrections and non-substantive revisions to the following categories: ''Policies and Practices for Storage of Records,'' ''Policies and Practices for Retrieval of Records,'' ''Policies and Practices for Retention and Disposal of Records,'' ''Administrative, Technical and Physical Safeguards,'' ''Record Access Procedures,'' ''Contesting Record Procedures,'' and ''Notification Procedures.'' The Board has also added new fields for ''Security Classification'' and ''History.''

SYSTEM NAME AND NUMBER:

BGFRS–9 ''FRB—Supplier Files''.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551. Some data will be hosted by third-party vendors, in government clouds managed by Workday and Coupa, located at 6110, Stoneridge Mall Road, Pleasanton, CA 94588 and 1855 S

Grant Street, San Mateo, CA 94402 respectively.

SYSTEM MANAGER(S):

Stefani Nick, Manager Procurement Policy and Compliance, Division of Financial Management, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551, 202–452–2509 or *stefani.m.nick@frb.gov.*

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 10 and 11 of the Federal Reserve Act (12 U.S.C. 244 and 248), and Executive Order 9397.

PURPOSE(S) OF THE SYSTEM:

These records are collected and maintained to assist the Board in tracking and paying suppliers and completing reports for the Internal Revenue Service.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who supply contracted goods and/or services to the Board, speakers, applicants, or other individuals to whom the Board provides reimbursement for fees, travel or other expenses (collectively referred to as ''suppliers'').

CATEGORIES OF RECORDS IN THE SYSTEM:

Supplier Information Form, W–9 Tax Identification Document, and any other information pertaining to the supplier's status. The Supplier Information Form contains the following information: individual's name, social security number or taxpayer identification number, address, telephone/fax numbers, email address, contact name/telephone number, supplier classification (such as vendor, speaker, or applicant), and EFT or wire bank information.

RECORD SOURCE CATEGORIES:

Information is provided by the individual to whom the record pertains and information from contract documents.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

General routine uses A, C, D, G, I, and J, apply to this system. These general routine uses are located at *https://www.federalreserve.gov/files/SORN-page-general-routine-uses-of-board-systems-of-records.pdf* and are published in the **Federal Register** at 83 FR 43872 at 43873–74 (August 28, 2018). Records may also be used to disclose information to the Internal Revenue Service to report payments that may be considered income to the suppliers.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Paper records in this system are stored in locked file cabinets with access limited to staff with a need to know. Electronic records are stored on a secure server with access limited to staff with a need to know.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Paper records can be retrieved by a supplier's name. Electronic records can be retrieved by name, social security number, taxpayer identification number, purchase order number, or other identifier.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Destroy six years after final payment or cancellation, but longer retention is authorized if required for business use. The final payment of cancellation is based on the final payment of the contract, and not each individual payment to the vendor.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Paper records are secured by lock and key and electronic files are stored on secure servers. The system has the ability to track individual user actions within the system. The audit and accountability controls are based on NIST and Board standards which, in turn, are based on applicable laws and regulations. The controls assist in detecting security violations and performance or other issues in the system. Access to the system is restricted to authorized users within the Board who require access for official business purposes. Users are classified into different roles and common access and usage rights are established for each role. User roles are used to delineate between the different types of access requirements such that users are restricted to data that is required in the performance of their duties. Periodic assessments and reviews are conducted to determine whether users still require access, have the appropriate role, and whether there have been any unauthorized changes.

RECORD ACCESS PROCEDURES:

The Privacy Act allows individuals the right to access records maintained about them in a Board system of records. Your request for access must: (1) contain a statement that the request is made pursuant to the Privacy Act of 1974; (2) provide either the name of the Board system of records expected to contain the record requested or a concise description of the system of records; (3) provide the information necessary to verify your identity; and (4) provide any other information that may assist in the rapid identification of the record you seek.

The Board handles all Privacy Act requests as both a Privacy Act request and as a Freedom of Information Act request. The Board does not charge fees to a requestor seeking to access or amend his/her Privacy Act records.

You may submit your Privacy Act request to the—Secretary of the Board, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

You may also submit your Privacy Act request electronically by filling out the required information at: *https://foia.federalreserve.gov/.*

CONTESTING RECORD PROCEDURES:

The Privacy Act allows individuals to seek amendment of information that is erroneous, irrelevant, untimely, or incomplete and is maintained in a system of records that pertains to them. To request an amendment to your record, you should clearly mark the request as a ''Privacy Act Amendment Request.'' You have the burden of proof for demonstrating the appropriateness of the requested amendment and you must provide relevant and convincing evidence in support of your request.

Your request for amendment must: (1) provide the name of the specific Board system of records containing the record you seek to amend; (2) identify the specific portion of the record you seek to amend; (3) describe the nature of and reasons for each requested amendment; (4) explain why you believe the record is not accurate, relevant, timely, or complete; and (5) unless you have already done so in a related Privacy Act request for access or amendment, provide the necessary information to verify your identity.

NOTIFICATION PROCEDURES:

Same as ''Access procedures'' above. You may also follow this procedure in order to request an accounting of previous disclosures of records pertaining to you as provided for by 5 U.S.C. 552a(c).

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

This SORN was previously published in the **Federal Register** at 73 FR 24984 at 24994–995 (May 6, 2008). The SORN was also amended to incorporate two

new routine uses required by OMB at 83 FR 43872 (August 28, 2018).

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10418]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by August 21, 2023.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: ____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10418 Medical Loss Ratio Annual Reports, MLR Notices, and Recordkeeping Requirements

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Revision of a currently approved collection of information; *Title of Information Collection:* Medical Loss Ratio Annual Reports, MLR Notices, and Recordkeeping Requirements; *Use:* Under section 2718 of the Affordable Care Act and implementing regulation at 45 CFR part 158, a health insurance issuer (issuer) offering group or individual health insurance coverage must submit a report to the Secretary concerning the amount the issuer spends each year on claims, quality improvement expenses, non-claims costs, Federal and State taxes and licensing and regulatory fees, the amount of earned premium, and beginning with the 2014 reporting year, the amounts related to the transitional reinsurance and risk adjustment programs established under sections 1341 and 1343, respectively, of the Affordable Care Act. An issuer must provide an annual rebate if the amount it spends on certain costs compared to its premium revenue (excluding Federal and States taxes and licensing and regulatory fees) does not meet a certain ratio, referred to as the medical loss ratio (MLR). Each issuer is required to submit annually MLR data, including information about any rebates it must provide, on a form prescribed by CMS, for each State in which the issuer conducts business. Each issuer is also required to provide a rebate notice to each policyholder that is owed a rebate and each subscriber of policyholders that are owed a rebate for any given MLR reporting year. Additionally, each issuer is required to maintain for a period of seven years all documents, records and other evidence that support the data included in each issuer's annual report to the Secretary.

Based upon CMS' experience in the MLR data collection and evaluation process, CMS is updating its annual burden hour estimates to reflect the actual numbers of submissions, rebates and rebate notices. The 2022 MLR Reporting Form and Instructions reflect changes for the 2020 reporting year and beyond. For 2022, it is expected that issuers will submit fewer reports and on average, send fewer notices and rebate checks in the mail to policyholders and subscribers, which will reduce burden on issuers. It is estimated that there will be a net decrease in total burden from 232,427 to 170,091. *Form Number:* CMS–10418 (OMB Control Number: 0938–1164); *Frequency:* Annually; *Affected Public:* Private Sector, Business or other for-profit and not-for-profit institutions; *Number of Respondents:* 480; *Number of Responses:* 1,677 *Total Annual Hours:* 170,091. (For policy questions regarding this collection contact Jiyun Lim at 301–492–4172.)

Dated: June 14, 2023.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2022–D–2275]

Oncology Drug Products Used With Certain In Vitro Diagnostic Tests: Pilot Program; Guidance for Industry, Clinical Laboratories, and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a final guidance for industry, clinical laboratories, and FDA staff entitled ''Oncology Drug Products Used with Certain In Vitro Diagnostic Tests: Pilot Program.'' FDA is issuing this guidance to announce and describe FDA's voluntary pilot program for certain oncology drug products regulated by FDA's Center for Drug Evaluation and Research (CDER) used with certain in vitro diagnostic tests. FDA intends to pilot a new approach to provide greater transparency regarding performance characteristics that certain tests for oncology biomarkers should meet. Through this transparency FDA seeks to support better and more consistent performance of certain laboratory-developed tests (LDTs) used to identify patients for treatment with certain oncology drug products, resulting in better drug selection and improved care for patients with cancer. The guidance has been implemented without prior comment, but remains subject to comment in accordance with the Agency's good guidance practices.

DATES: The announcement of the guidance is published in the **Federal Register** on June 21, 2023.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2022–D–2275 for ''Oncology Drug Products Used with Certain In Vitro Diagnostic Tests: Pilot Program.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for single copies of the guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002; or to the Office of Policy, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Brittany Schuck, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5422, Silver Spring, MD 20993–0002, 301–796–5199 or Reena Philip, Oncology Center of Excellence, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993, 301–796–6179.

SUPPLEMENTARY INFORMATION:

I. Background

We are announcing the availability of a guidance for industry, clinical laboratories, and FDA staff entitled ''Oncology Drug Products Used with Certain In Vitro Diagnostic Tests: Pilot Program.'' We are issuing this guidance consistent with our good guidance practices (GGP) regulation (§ 10.115 (21 CFR 10.115)). We are implementing this guidance without prior public comment because we have determined that prior public participation is not feasible or appropriate (§ 10.115(g)(2)). The pilot is intended to provide greater transparency regarding performance characteristics that certain tests for oncology biomarkers should meet. Although this guidance document is being implemented without prior public comment, it remains subject to comment in accordance with FDA's GGP regulation.

An in vitro companion diagnostic test (also known as an in vitro companion diagnostic device) provides information that is essential for the safe and effective use of a corresponding therapeutic product. FDA is issuing this guidance to announce and describe FDA's voluntary pilot program for drug product sponsors with regard to certain CDER-regulated oncology drug products for which FDA determines that use of an in vitro diagnostic test is needed to identify the intended patient population, and corresponding clinical trial assay(s) that use the same technology as a previously FDA-authorized companion diagnostic test for any indication for which there is a well-validated reference method, well-validated comparator method, and/or well-characterized materials that can be used to support test accuracy. This pilot is intended for tests for which FDA believes it is appropriate to extrapolate clinical validity of the test(s) used to select patients in a drug trial to other tests of the same type with similar analytical performance. In this pilot, FDA will evaluate no more than nine sponsors for possible acceptance into the pilot based on evaluation of the factors described in the guidance. Sponsors who are interested in being considered for the voluntary pilot program and who affirm their commitment to provide information set forth in the guidance if FDA subsequently requests that they do so should submit correspondence titled ''Statement of interest in participation in the Oncology Drug Products Used with Certain In Vitro Diagnostic Tests: Pilot Program'' to their Investigational New Drug (IND) applications, New Drug Applications (NDA), or Biologic License Applications (BLA), as appropriate.

Under this pilot, if FDA concludes that the drug product meets the applicable standards for its approval, FDA intends to rely on the same pivotal clinical trial(s) that support approval of the drug product to establish the clinical validity for the clinical trial assays (CTAs) used in those trial(s). Further, FDA intends to recommend minimum analytical performance characteristics for other tests that, when established through properly conducted validation studies, FDA believes would support extrapolation of the clinical validity of the CTA(s) to additional tests of the same type. If FDA approves an oncology drug product enrolled in this pilot program, FDA intends to recommend minimum performance characteristics for in vitro diagnostic tests to identify patients for treatment with those drug products, and make this information publicly available on FDA's website.

The guidance represents the current thinking of FDA on ''Oncology Drug Products Used with Certain In Vitro Diagnostic Tests: Pilot Program.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at *https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/guidance-documents-medical-devices-and-radiation-emitting-products.* This guidance document is also available at *https://www.regulations.gov, https://www.fda.gov/regulatory-information/search-fda-guidance-documents,* or *https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs.* Persons unable to download an electronic copy of ''Oncology Drug Products Used with Certain In Vitro Diagnostic Tests: Pilot Program'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number 22001 and complete title to identify the guidance you are requesting.

III. Paperwork Reduction Act of 1995

For this pilot, FDA will request information from no more than 9 sponsors. Initial statements of interest from sponsors interested in being evaluated for participation in the pilot, as described in the guidance, are not ''information'' in accordance with 5 CFR 1320.3(h)(1). Thus, this guidance contains no new collection of information.

While this guidance contains no new collection of information, to the extent the guidance does refer to previously approved FDA collections of information, clearance by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521) is not required for this guidance. The previously approved collections of information are subject to review by OMB under the PRA. The collections of information in the following FDA regulations, guidance, and forms have been approved by OMB as listed in the following table:

21 CFR part; guidance; or FDA form	Topic	OMB control No.
807, subpart E	Premarket notification	0910–0120
814, subparts A through E	Premarket approval	0910–0231
860, subpart D	De Novo classification process	0910–0844
312	Investigational new drug applications	0910–0014
314	New drug applications	0910–0001
601	Biologic license applications	0910–0338

Dated: June 14, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2022–N–2687]

Daylen Diaz: Final Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is issuing an order under the Federal Food, Drug, and Cosmetic Act (FD&C Act) permanently debarring Daylen Diaz from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Daylen Diaz was convicted of a felony under Federal law for conduct relating to the development or approval, including the process for development or approval, of any drug product under the FD&C Act. Daylen Diaz was given notice of the proposed permanent debarment and was given an opportunity to request a hearing to show why she should not be debarred. As of February 26, 2023 (30 days after receipt of the notice), Ms. Diaz had not responded. Ms. Diaz' failure to respond and request a hearing within the prescribed timeframe constitutes a waiver of her right to a hearing concerning this action.

DATES: This order is applicable June 21, 2023.

ADDRESSES: Any application by Daylen Diaz for special termination of debarment under section 306(d)(4) of the FD&C Act (21 U.S.C. 335a(d)(4)) may be submitted as follows:

Electronic Submissions

■ *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. An application submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your application will be made public, you are solely responsible for ensuring that your application does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your application, that information will be posted on *https://www.regulations.gov*.

■ If you want to submit an application with confidential information that you do not wish to be made available to the public, submit the application as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

■ *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

■ For a written/paper application submitted to the Dockets Management Staff, FDA will post your application, as well as any attachments, except for information submitted, marked, and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All applications must include the Docket No. FDA–2022–N–2687. Received applications will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

■ Confidential Submissions—To submit an application with confidential information that you do not wish to be made publicly available, submit your application only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of your application. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your application and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf*.

Docket: For access to the docket, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852 between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500. Publicly available submissions may be seen in the docket.

FOR FURTHER INFORMATION CONTACT: Jaime Espinosa, Division of Compliance and Enforcement, Office of Policy, Compliance, and Enforcement, Office of Regulatory Affairs, Food and Drug Administration, 240–402–8743, or *debarments@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

Section 306(a)(2)(A) of the FD&C Act (21 U.S.C. 335a(a)(2)(A)) requires debarment of an individual from providing services in any capacity to a person that has an approved or pending drug product application if FDA finds that the individual has been convicted of a felony under Federal law for conduct relating to the development or approval, including the process of development or approval, of any drug product under the FD&C Act. On October 18, 2022, Ms. Diaz was convicted as defined in section 306(l)(1) of the FD&C Act in the U.S. District Court for the Southern District of Florida, Miami Division, when the court accepted her plea of guilty and entered judgment against her for one count of conspiracy to commit mail fraud and wire fraud in violation of 18 U.S.C. 1349.

The factual basis for this conviction is as follows: As contained in the Information, entered into the docket on March 16, 2021, and the Factual Proffer in support of Ms. Diaz' guilty plea, entered into the docket on August 8, 2022, both from her case, Ms. Diaz was a research assistant and assistant study coordinator employed at Tellus Clinical Research, Inc. (Tellus). Tellus was a medical research clinic that conducted clinical trials on behalf of pharmaceutical company sponsors. Sponsor 1 was a drug manufacturer that developed drugs for commercial distribution in the United States. Contract Research Organization 1 (CRO 1) was an organization that hired clinical investigators and managed clinical trials for sponsors. On or about December 23, 2013, CRO 1 entered into a contract with Tellus and one of Ms.

Diaz' co-conspirators in which Tellus and Ms. Diaz' co-conspirator agreed to serve as study site and clinical investigator, respectively, for a clinical trial initiated by sponsor 1 (IBS study 1) designed to evaluate a drug intended to treat irritable bowel syndrome in female patients. On or about September 5, 2014, CRO 1 entered into a contract to conduct a second clinical trial initiated by sponsor 1 (IBS study 2), which evaluated the same drug in the same population over the course of 52 weeks. Sponsor 2 was a drug manufacturer that developed drugs for commercial distribution in the United States. On or about January 5, 2015, sponsor 2 entered into a contract with Tellus and one of Ms. Diaz' co-conspirators in which they agreed to serve as study site and clinical investigator, respectively, for a clinical trial initiated by sponsor 2 (the diabetes study). The diabetes study was designed to evaluate the safety and efficacy of an experimental injectable drug intended to treat subjects with kidney damage from diabetes.

Ms. Diaz served as an assistant study coordinator for IBS study 1, IBS study 2, and the diabetes study (collectively, the ''Studies''). As an assistant study coordinator for the Studies, Ms. Diaz was responsible for administering procedures to subjects in the Studies and preparing honest and accurate written records, including records known as ''case histories,'' describing the participation of subjects in the Studies. Ms. Diaz along with her co-conspirators caused false information to be entered in subject case histories to make it appear that subjects had, among other things, satisfied the eligibility criteria to participate in the Studies, provided informed consent to participate in the Studies, received physical examinations, received or been administered the investigational drug for the Studies, and received payments for visits to Tellus when, in truth and in fact, and as Ms. Diaz well knew, such events had not occurred. For example, on or about April 6, 2015, Ms. Diaz initialed case history documentation for a study subject, K.L., falsely representing that K.L. was a study subject participating in IBS study 2, that K.L. visited Tellus, that Ms. Diaz obtained K.L.'s urine and blood for analysis as required by the protocol governing IBS study 2, that Ms. Diaz had performed an electrocardiogram on K.L., and that Ms. Diaz dispensed IBS study 2 medication to K.L. In truth and in fact, Ms. Diaz knew that K.L. was not participating in IBS study 2 and these representations were false. In addition, Ms. Diaz knew that IBS study 2 subjects were required to make daily phone calls to an ''e-diary'' (a toll-free number maintained by a third party) and report their personal experience with the IBS study 2 drug. In furtherance of the conspiracy, Ms. Diaz along with her co-conspirators knowingly placed telephone calls to the e-diary system, using the subjects' individual PIN numbers, for purposes of reporting fabricated data on behalf of IBS study 2 subjects. Ms. Diaz along with her co-conspirators placed these fraudulent telephone calls on behalf of more than 10 subjects in IBS study 2.

Ms. Diaz also participated in falsifying and fabricating data in connection with the diabetes study. For example, on May 13, 2015, Ms. Diaz initialed case history documentation for subject S.D., falsely representing that S.D. has visited Tellus, that Ms. Diaz trained S.D. on the appropriate handling of the investigational drug, and that S.D. self-administered the study drug by injection. In truth and in fact, Ms. Diaz knew that S.D. had not visited Tellus or received the study drug, and these representations were false. Ms. Diaz, along with her co-conspirators, also enrolled subjects in the diabetes study who did not meet the eligibility criteria or participate in the trial. Further, Ms. Diaz observed her co-conspirator dispense diabetes study medication into the garbage, but falsely represent in case history documentation that the medication had been administered to study subject S.D.

As a result of this conviction, FDA sent Ms. Diaz by certified mail on January 20, 2023, a notice proposing to permanently debar her from providing services in any capacity to a person that has an approved or pending drug product application. The proposal was based on a finding, under section 306(a)(2)(A) of the FD&C Act, that Ms. Diaz was convicted, as set forth in section 306(l)(1) of the FD&C Act, of a felony under Federal law for conduct relating to the development or approval, including the process of development or approval, of any drug product under the FD&C Act. The proposal also offered Ms. Diaz an opportunity to request a hearing, providing her 30 days from the date of receipt of the letter in which to file the request, and advised her that failure to request a hearing constituted an election not to use the opportunity for a hearing and a waiver of any contentions concerning this action. Ms. Diaz received the proposal on January 27, 2023. She did not request a hearing within the timeframe prescribed by regulation and has, therefore, waived her opportunity for a hearing and any contentions concerning her debarment (21 CFR part 12).

II. Findings and Order

Therefore, the Assistant Commissioner, Office of Human and Animal Food Operations, under section 306(a)(2)(A) of the FD&C Act, under authority delegated to the Assistant Commissioner, finds that Ms. Diaz has been convicted of a felony under Federal law for conduct relating to the development or approval, including the process of development or approval, of any drug product under the FD&C Act.

As a result of the foregoing finding, Ms. Diaz is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application, effective (see **DATES**) (see sections 306(a)(2)(A) and 306(c)(2)(A)(ii) of the FD&C Act). Any person with an approved or pending drug product application who knowingly employs or retains as a consultant or contractor, or otherwise uses the services of Ms. Diaz in any capacity during her debarment, will be subject to civil money penalties (section 307(a)(6) of the FD&C Act (21 U.S.C. 335b(a)(6))). If Ms. Diaz provides services in any capacity to a person with an approved or pending drug product application during her period of debarment, she will be subject to civil money penalties (section 307(a)(7) of the FD&C Act (21 U.S.C. 335b(a)(7))). In addition, FDA will not accept or review any abbreviated new drug application from Ms. Diaz during her period of debarment, other than in connection with an audit under section 306 of the FD&C Act (section 306(c)(1)(B) of the FD&C Act (21 U.S.C. 335a(c)(1)(B))). Note that, for purposes of sections 306 and 307 of the FD&C Act (21 U.S.C. 335a and 335b), a ''drug product'' is defined as a ''drug subject to regulation under section 505, 512, or 802 of this Act (21 U.S.C. 355, 360b, 382) or under section 351 of the Public Health Service Act (42 U.S.C. 262)'' (section 201(dd) of the FD&C Act (21 U.S.C. 321(dd))).

Dated: June 14, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2023–N–0008]

Circulatory System Devices Panel of the Medical Devices Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) announces a forthcoming public advisory committee meeting of the Circulatory System Devices Panel of the Medical Devices Advisory Committee. The general function of the committee is to provide advice and recommendations to the Agency on FDA's regulatory issues. The meeting will be open to the public.

DATES: The meeting will take place virtually on August 22 and 23, 2023, from 9 a.m. to 6 p.m. Eastern Time.

ADDRESSES: All meeting participants will be heard, viewed, captioned, and recorded for this advisory committee meeting via an online teleconferencing and/or video conferencing platform. Answers to commonly asked questions, including information regarding special accommodations due to a disability, may be accessed at: *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm.*

FOR FURTHER INFORMATION CONTACT: Jarrod Collier, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5214, Silver Spring, MD 20993–0002, *Jarrod.Collier@fda.hhs.gov,* 240–672–5763, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area). A notice in the **Federal Register** about last-minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the Agency's website at *https://www.fda.gov/AdvisoryCommittees/default.htm* and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before the meeting.

SUPPLEMENTARY INFORMATION:

Agenda: The meeting presentations will be heard, viewed, captioned, and recorded through an online teleconferencing platform. On both days, the committee will discuss, make recommendations, and vote on devices indicated to reduce blood pressure in patients with hypertension. On August 22, 2023, the committee will discuss, make recommendations, and vote on information regarding the premarket approval application (PMA) for the ReCor Paradise Ultrasound Renal Denervation System by ReCor, Inc. The proposed indication for use statement is as follows: The ReCor Paradise Ultrasound Renal Denervation System is indicated to reduce blood pressure in adult (≥ 22 years of age) patients with uncontrolled hypertension, who may be inadequately responsive to, or who are intolerant to, antihypertensive medications, which is intended to be used in renal arteries of diameters ranging from 3.0 to 8.0 mm.

On August 23, 2023, the committee will discuss, make recommendations, and vote on information regarding the PMA for the Medtronic Symplicity Spyral Renal Denervation System by Medtronic, Inc. The proposed indication for use statement is as follows: The Symplicity Spyral multielectrode renal denervation catheter and the Symplicity G3 RF Generator are indicated for the reduction of blood pressure in patients with uncontrolled hypertension despite the use of antihypertensive medications or in patients in whom blood pressure lowering therapy is poorly tolerated.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available on FDA's website at the time of the advisory committee meeting, and the background material will be posted on FDA's website after the meeting. Background material and the link to the online teleconference meeting room will be available at *https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm.* Scroll down and select the appropriate advisory committee meeting link. The meeting will include slide presentations with audio components to allow the presentation of materials in a manner that most closely resembles an in-person advisory committee meeting.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person on or before August 1, 2023. Oral presentations from the public will be scheduled on August 22 and 23, 2023 between approximately 1:30 p.m. and 2:30 p.m. Eastern Time. Those individuals interested in making formal oral presentations should notify the contact person (see **FOR FURTHER INFORMATION CONTACT**) and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before July 24, 2023. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by July 25, 2023.

For press inquiries, please contact the Office of Media Affairs at *fdaoma@fda.hhs.gov* or 301–796–4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Ann Marie Williams at *Annmarie.williams@fda.hhs.gov* or 240–507–6496 at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm* for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: June 14, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier: OS–0937–NEW]

Agency Information Collection Request; 30-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before July 21, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Sherrette Funn, *Sherrette.Funn@hhs.gov* or (202) 264–0041. When submitting comments or requesting information, please include the document identifier 0937—New–30D and project title for reference.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: FY2023 Teen Pregnancy Prevention Performance Measures.

Type of Collection: New.

OMB No. 0937–NEW–OASH—Office of Population Affairs (OPA).

Abstract: The Office of Population Affairs (OPA), in the Office of the Assistant Secretary for Health (OASH), U.S. Department of Health and Human Services (HHS), requests a new clearance for the collection of performance measures specifically for new FY2023Teen Pregnancy Prevention (TPP) Program grantees. In FY2023, OPA expects to award 5-year TPP cooperative agreements to up to 96 organizations across three Notice of Funding Opportunities (NOFOs). Collection of performance measures is a requirement of all TPP awards and is included in the NOFOs. The semiannual data collection will allow OPA to comply with federal accountability and performance requirements, inform stakeholders of grantee progress in meeting TPP program goals, provide OPA with metrics for monitoring FY2023 TPP grantees, and facilitate individual grantees' continuous quality improvement efforts within their projects. OPA requests clearance for three years.

ESTIMATED ANNUALIZED BURDEN TABLE

Type of respondent	Number of respondents	Number responses per respondent	Average burden per response (in hours)	Total burden hours
TPP Tier 1 & Tier 2 Rigorous Impact grantees	86	2	8	1,376
Tier 1 Grantees (Supportive Services Form)	70	2	15/60	35
Tier 2 Innovation Network Grantees	10	2	1	20
Total		2		1,431

National Center for Advancing Translational Sciences; Notice of Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The cooperative agreement applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Center for Advancing Translational Sciences Special Emphasis Panel; Translational Centers for Microphysiological Systems Review.

Date: July 17–18, 2023.

Time: 11:00 a.m. to 4:00 p.m.

Agenda: To review and evaluate cooperative agreement applications.

Place: National Center for Advancing Translational Sciences, National Institutes of Health, 6701 Democracy Boulevard, Room 1037, Bethesda, MD 20892.

Contact Person: Victor Henriquez, Ph.D., Scientific Review Officer, Office of Scientific Director, National Center for Advancing Translational Sciences, National Institutes of Health, 6701 Democracy Boulevard, Room 1080, Bethesda, MD 20892–4878, 301–451–2405, *henriquv@mail.nih.gov.*

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Biomedical Imaging and Bioengineering Notice of Proposed Reorganization

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Institute of Biomedical Imaging and Bioengineering (NIBIB) will host a public online forum to enable public discussion of the Institute's proposal to establish the Section on Mechanics and Tissue Remodeling Integrating Computational & Experimental Systems (MATRICES). The proposed reorganization will more accurately reflect the current structure by which the Intramural Research

Program is functioning and improve the coordination of the scientific activities within the Institute. The online forum will allow members of the public to review the reorganization proposal and submit comments.

DATES: The public online forum will become available on June 26, 2023, and will remain open for five calendar days, through June 30, 2023. Any interested person may file written comments by sending an email to *NIBIBorgchange@nih.gov*. The statement should include the individual's name, and when applicable, professional affiliation.

ADDRESSES: The public forum will be held online, at *https://www.nibib.nih.gov/about-nibib/proposed-org-changes* for the period of time listed above.

FOR FURTHER INFORMATION CONTACT: Frank Flannery, Management Analyst, National Institute of Biomedical Imaging and Bioengineering, NIH, (301) 451–0713, *NIBIBorgchange@nih.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to the NIH Reform Act of 2006 (42 U.S.C. 281(d)(4)), NIBIB will have a public hearing to discuss the proposed reorganization plans. This announcement and the public forum serve as that notice.

Ann G. Gawalt,

Acting Executive Officer, National Institute of Biomedical Imaging and Biomedical Engineering, National Institutes of Health.

National Institute of Biomedical Imaging and Bioengineering; Notice of Proposed Reorganization

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Institute of Biomedical Imaging and Bioengineering (NIBIB) will host a public online forum to enable public discussion of the Institute's proposal to establish the Section on Mechanics and Tissue Remodeling Integrating Computational & Experimental Systems (MATRICES). The proposed reorganization will more accurately reflect the current structure by which the Intramural Research Program is functioning and improve the coordination of the scientific activities within the Institute. The online forum will allow members of the public to review the reorganization proposal and submit comments.

DATES: The public hearing will take place on July 6, 2023, at 2 p.m. using NIBIB's social media accounts. Any interested party may also file written comments by sending an email to *NIBIBorgchange@nih.gov* prior or during the scheduled public hearing. The statement should include the individual's name, and when applicable, professional affiliation.

ADDRESSES: The following email address has been established for comments on the reorganization: *NIBIBorgchange@nih.gov*. The social media platforms that will be used and monitored during this hearing are:

- *Twitter: @NIBIBgov.*
- *Facebook: https://www.facebook.com/nibibgov/.*

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Fiscal Year (FY) 2023 Notice of Supplemental Funding Opportunity

AGENCY: Substance Abuse and Mental Health Services Administration, Department of Health and Human Services (HHS).

ACTION: Notice of intent to award supplemental funding.

SUMMARY: This notice is to inform the public that the Substance Abuse and Mental Health Services Administration (SAMHSA) is supporting one administrative supplement in scope of the parent award to the State Opioid Response (SOR)/Tribal Opioid Response (TOR) Technical Assistance Grant recipient, the American Academy of Addiction Psychiatry (AAAP) funded in FY 2022 under Notice of Funding Opportunity (NOFO) TI–22–007 to provide training and technical assistance to federally-recognized Tribes and Tribal organizations.

FOR FURTHER INFORMATION CONTACT: William Longinetti, Substance Abuse and Mental Health Services Administration, 5600 Fishers Lane, Rockville, MD 20857, telephone 240–276–1190; email: *William.longinetti@samhsa.hhs.gov*.

SUPPLEMENTARY INFORMATION:

Funding Opportunity Title: FY 2022 State Opioid Response (SOR)/Tribal Opioid Response (TOR) Technical Assistance TI–22–007.
Assistance Listing Number: 93.243.
Authority: Section 509 of the Public Health Service Act, as amended.

Justification: This is not a formal request for application. Assistance will only be provided to the American Academy of Addiction Psychiatry (AAAP) to provide webinar trainings and technical assistance based on the receipt of a satisfactory application and associated budget that is approved by a review group. AAAP has already established a network of TA providers, as well as linkages with Tribes and Tribal organizations, and this assistance will augment these preexisting resources and relationships.

Dated: June 15, 2023.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Fiscal Year (FY) 2023 Notice of Supplemental Funding Opportunity

AGENCY: Substance Abuse and Mental Health Services Administration, Department of Health and Human Services (HHS).

ACTION: Notice of intent to award supplemental funding.

SUMMARY: This notice is to inform the public that the Substance Abuse and Mental Health Services Administration (SAMHSA) is supporting administrative supplements (in the scope of the parent award) for the 60 eligible grant recipients funded in FY 2023 under the Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUBG). Recipients may receive an amount of between $25,000 and $2,089,193 for a total of $15,400,000. If all eligible SUBG recipients do not apply, remaining funds will be redistributed to applicants. These recipients have a project end date of September 30, 2024. The supplemental funding will be used for providing and/or obtaining training and technical assistance, or workforce development meetings and activities.

FOR FURTHER INFORMATION CONTACT: Spencer Clark, Chief, CSAT State Systems Partnership Branch, Substance Abuse and Mental Health Services Administration, 5600 Fishers Lane, Rockville, MD 20857, telephone 240–276–1027; email: *Spencer.Clark@samhsa.hhs.gov*.

SUPPLEMENTARY INFORMATION:

Funding Opportunity Title: FY 2023 Substance Use Prevention, Treatment, and Recovery Services Block Grant.

Assistance Listing Number: 93.959.

Authority: Section 1935 of the Public Health Service Act.

Justification: This supplemental funding is limited in eligibility to only the recipients of the Substance Use Prevention, Treatment, and Recovery Services Block Grant because it will be used to expand and enhance the training and technical assistance efforts of the recipients.

This is not a formal request for application. Assistance will only be provided to the 60 SUBG recipients funded in FY 2023 based on the receipt of a written statement from the Single State Agency (SSA) of the recipient's interest in receiving these funds to be used for the stated purposes.

Dated: June 15, 2023.

Ann Ferrero,

Public Health Analyst.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0087]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Application for Citizenship and Issuance of Certificate Under Section 322

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) invites the general public and other Federal agencies to comment upon this proposed revision of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until August 21, 2023.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0087 in the body of the letter, the agency name and Docket ID USCIS–2007–0019. Submit comments via the Federal eRulemaking Portal website at *https://www.regulations.gov* under e-Docket ID number USCIS–2007–0019.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2007–0019 in the search box. All submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *https://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Application for Citizenship and Issuance of Certificate Under Section 322.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* N–600K; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. Form N–600K is used by children who regularly reside in a foreign country to claim U.S. citizenship based on eligibility criteria met by their U.S. citizen parent(s) or grandparent(s). The form may be used by both biological and adopted children under age 18. USCIS uses information collected on this form to determine that the child has met all of the eligibility requirements for naturalization under section 322 of the Immigration and Nationality Act (INA). If determined eligible, USCIS will naturalize and issue the child a Certificate of Citizenship before the child reaches age 18.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection N–600K (Paper filed) is 2,187 and the estimated hour burden per response is 1.71 hours; the estimated total number of respondents for the information collection N–600K (online filing) is 2,860 and the estimated hour burden per response is 1.14 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 7,003 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $649,801.

Dated: June 14, 2023.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

RIN 1615–ZB71

Reconsideration and Rescission of Termination of the Designation of El Salvador for Temporary Protected Status; Extension of the Temporary Protected Status Designation for El Salvador

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice of Reconsideration and Rescission of Termination of the Designation of El Salvador for Temporary Protected Status (TPS) and Notice of Extension of TPS Designation for El Salvador.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security (Secretary) is rescinding the previous termination of the designation of El Salvador for TPS, which was published on January 18, 2018 and extending the designation of El Salvador for Temporary Protected Status (TPS) for 18 months, beginning on September 10, 2023, and ending on March 9, 2025. This extension allows existing TPS beneficiaries to retain TPS through March 9, 2025, so long as they otherwise continue to meet the eligibility requirements for TPS. Existing TPS beneficiaries who wish to extend their status through March 9, 2025, must re-register during the 60-day re-registration period as described in this notice.

DATES: The *Rescission of Termination of the Designation of El Salvador for TPS* took effect June 9, 2023.

Extension of Designation of El Salvador for TPS: The 18-month extension of TPS for El Salvador begins on September 10, 2023, and will remain in effect through March 9, 2025. The extension impacts existing beneficiaries of TPS under the designation of El Salvador.

Re-registration: The 60-day re-registration period for existing beneficiaries runs from July 12, 2023 through September 10, 2023.

FOR FURTHER INFORMATION CONTACT:

- You may contact Rená Cutlip-Mason, Chief, Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital Gateway Drive, Camp Springs, MD 20746, or by phone at 800–375–5283.
- For further information on TPS, including guidance on the registration process and additional information on eligibility, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* You can find specific information about El Salvador's TPS designation by selecting ''El Salvador'' from the menu on the left side of the TPS web page.
- If you have additional questions about TPS, please visit *uscis.gov/tools.* Our online virtual assistant, Emma, can answer many of your questions and point you to additional information on our website. If you are unable to find your answers there, you may also call our USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).
- Applicants seeking information about the status of their individual cases may check Case Status Online, available on the USCIS website at *uscis.gov,* or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.*
- Further information will also be available at local USCIS offices upon publication of this notice.

Purpose of This Action (TPS)

Through this notice, DHS announces the reconsideration and rescission of the termination of the designation of El Salvador for TPS and the Secretary's decision to extend the TPS designation for 18 months from September 10, 2023 through March 9, 2025. This notice also sets forth procedures necessary for nationals of El Salvador (or individuals having no nationality who last habitually resided in El Salvador) to re-register for TPS and to apply for renewal of their EADs with USCIS.

Re-registration is limited to individuals who have previously registered or re-registered for TPS under El Salvador's designation, whose applications were granted, and whose TPS has not been withdrawn for individual ineligibility for the benefit. Failure to re-register properly within the 60-day re-registration period may result in the withdrawal of your TPS following appropriate procedures. *See* 8 CFR 244.14.

For individuals who have already been granted TPS under El Salvador's designation, the 60-day re-registration period runs from July 12, 2023 through September 10, 2023. USCIS will issue new EADs with a March 9, 2025 expiration date to eligible Salvadoran TPS beneficiaries who timely re-register and apply for EADs.

Individuals who have an El Salvador TPS application (Form I–821) and Application for Employment Authorization (Form I–765) that were still pending as of June 21, 2023 do not need to file either application again. If USCIS approves an individual's pending Form I–821, USCIS will grant the individual TPS through March 9, 2025. Similarly, if USCIS approves a pending TPS-related Form I–765 filed in connection with a Form I–821, USCIS will issue the individual a new EAD that will be valid through the same date. If you have TPS and only a pending Form I–765, you must file the Form I–821 to re-register for TPS or risk having your TPS withdrawn for failure to timely re-register without good cause. There are currently approximately 239,000 beneficiaries under El Salvador's TPS designation who may be eligible to continue their TPS under the extension announced in this Notice.

What is Temporary Protected Status (TPS)?

- TPS is a temporary immigration status granted to eligible nationals of a foreign state designated for TPS under the INA, or to eligible individuals without nationality who last habitually resided in the designated foreign state before arrival in the United States, regardless of their country of birth.
- During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, and are authorized to obtain EADs so long as they continue to meet the requirements of TPS.
- TPS beneficiaries may also apply for and be granted travel authorization as a matter of DHS discretion.
- To qualify for TPS, beneficiaries must meet the eligibility standards at INA section 244(c)(1)–(2), 8 U.S.C. 1254a(c)(1)–(2).
- When the Secretary terminates a foreign state's TPS designation, beneficiaries return to one of the following:
  - The same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or terminated); or
  - Any other lawfully obtained immigration status or category they received while registered for TPS, as long as it is still valid beyond the date TPS terminates.

When was El Salvador designated for TPS?

El Salvador was initially designated for TPS on the basis of environmental disaster, following two separate massive earthquakes in 2001 [1] that resulted in a substantial disruption of living conditions, at the request of the country's government, and because El Salvador temporarily was unable to handle adequately the return of its nationals. *See Designation of El Salvador Under Temporary Protected Status Program,* 66 FR 14214 (Mar. 9, 2001). After its initial designation, El Salvador's TPS designation was extended 11 consecutive times [2] (for periods of 12 or 18 months at a time) under the same statutory basis of environmental disaster. The Secretary last extended TPS for El Salvador from July 8, 2016 through March 9, 2018.[3] Following the statutorily required review of the country conditions, former Secretary Nielsen announced the termination of TPS for El Salvador with an effective date of September 9, 2019.[4] As discussed below, this termination decision has been the subject of litigation and a court order. As a result, the termination has not taken effect.

[4] *Termination of the Designation of El Salvador for Temporary Protected Status,* 83 FR 2654 (Jan. 18, 2018).

Litigation Background Regarding Termination of Certain TPS Designations

In addition to El Salvador, in 2017–2018, TPS termination decisions were also announced for five other countries by the Secretary or Acting Secretary: Sudan, Nicaragua, Haiti, Nepal, and Honduras.[5] Lawsuits challenging the terminations were filed in the U.S. District Court for the Northern District of California in *Ramos* v. *Nielsen,* 326 F. Supp. 3d 1075 (N.D. Cal. 2018), and *Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019), and in the U.S. District Court for the Eastern District of New York in *Saget* v. *Trump,* 375 F. Supp. 3d 280 (E.D.N.Y. 2019).[6] In *Ramos,* the district court granted a preliminary injunction enjoining the terminations of TPS for El Salvador, Haiti, Sudan, and Nicaragua and directed DHS to maintain the *status quo* and to continue the TPS and TPS-related documentation of affected TPS beneficiaries under those countries' designations. The U.S. Government appealed, and a three-judge panel vacated the injunction. The appellate court, however, has granted rehearing en banc of the panel decision, vacating the panel's decision.[7] The district court's preliminary injunction thus remains in place. In *Bhattarai,* the district court has stayed proceedings until the *Ramos* appeal is decided and approved the parties' stipulation for the continuation of TPS and TPS-related documentation for eligible, affected beneficiaries of TPS for Honduras and Nepal during the stay and pendency of the *Ramos* appeal. In *Saget,* the district court granted a preliminary injunction enjoining termination of TPS for Haiti, and the Government appealed. However, following the new TPS designation of Haiti in August 2021, the district court dismissed the lawsuit based on the parties' stipulation to dismissal.[8] Beneficiaries under the TPS designations for El Salvador, Nicaragua, Sudan, Haiti, Honduras, and Nepal will retain their TPS while the preliminary injunction in *Ramos* remains in effect, and 120 days thereafter, provided that their TPS is not withdrawn because of individual ineligibility.[9]

DHS has taken actions to ensure its continued compliance with the court orders in *Ramos* and *Bhattarai.* DHS has published periodic notices to continue TPS and extend the validity of TPS-related documentation previously issued to beneficiaries under the TPS designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal.[10] The most recent such notice continued TPS and extended the TPS-related documents specified in the notice through June 30, 2024.[11] These extensions apply where the TPS beneficiary properly filed for re-registration during either the most recent DHS-announced registration period for their country, or any applicable previous DHS-announced re-registration periods for the beneficiary's country, or has a re-registration application that remains pending.[12] Although the notice published at 87 FR 68717 remains valid, individuals who wish to remain eligible for TPS under the extension of TPS for El Salvador announced in this notice through March 9, 2025, and any potential future extensions must apply for re-registration in accordance with the procedures announced in this notice.[13] Failure to timely re-register without good cause is a ground for TPS withdrawal. *See* INA section 244(c)(3)(C), 8 U.S.C. 1254a(c)(3)(C); 8 CFR 244.17.

What authority does the Secretary have to reconsider and rescind the termination of TPS for El Salvador and extend the prior designation?

Section 244(b)(1) of the INA, 8 U.S.C. 1254a(b)(1), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist.[14] The decision to designate any foreign state

[5] *Termination of the Designation of Sudan for Temporary Protected Status,* 82 FR 47228 (Oct. 11, 2017); *Termination of the Designation of Nicaragua for Temporary Protected Status,* 82 FR 59636 (Dec. 15, 2017); *Termination of the Designation of Haiti for Temporary Protected Status,* 83 FR 2648 (Jan. 18, 2018); *Termination of the Designation of Nepal for Temporary Protected Status,* 83 FR 23705 (May 22, 2018); *Termination of the Designation of Honduras for Temporary Protected Status,* 83 FR 26074 (June 5, 2018). Haiti and Sudan were later newly designated for TPS on August 3, 2021 and April 19, 2022, respectively, for 18 months. *See Designation of Haiti for Temporary Protected Status,* 86 FR 41863 (Aug. 3, 2021); *Designation of Sudan for Temporary Protected Status,* 87 FR 23202 (Apr. 19, 2022).

[6] *See Ramos* v. *Nielsen,* 336 F. Supp. 3d 1075 (N.D. Cal. 2018), *vacated,* 975 F.3d 872 (9th Cir. 2020), *reh'g en banc granted,* 59 F.4th 1010 (Feb. 10, 2023); *Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019) (staying proceedings until *Ramos* appeal decided and approved parties' stipulation for continued TPS and issuance of TPS-related documentation to eligible, affected beneficiaries of TPS for Honduras and Nepal during the stay and pendency of the appeal). In 2019, the U.S. District Court for the Eastern District of New York also enjoined the termination of the 2011 TPS designation for Haiti in *Saget* v. *Trump,* 375 F. Supp. 3d 280 (E.D.N.Y. 2019), and DHS cited to that order in previous notices continuing the affected beneficiaries' TPS and documentation. *See, e.g.,* 86 FR 50725, 50726 (Sept. 10, 2021). However, the *Saget* case was dismissed upon the court's approval of the parties' joint Stipulation of Dismissal for mootness following the Secretary's new 18-month designation of Haiti for TPS on August 3, 2021, and DHS' continuation of existing beneficiaries' TPS and related documentation under the Ramos injunction through Dec. 31, 2022. *See id.,* Order approving Stipulation of Dismissal, dated Oct. 15, 2021. Other litigation was filed relating to the terminations of El Salvador, Honduras, and Haiti. A Haiti-related case, *NAACP* v. *U.S. Dept. of Homeland Security,* No. 1:18–cv–00239 (D. Md. Jan. 24, 2018) was dismissed on May 22, 2021, subsequent to the same DHS designation. An El Salvador-related case, *Casa de Maryland,* v. *Biden,* No. GJH–18–00845 (D. Md. Mar. 23, 2018), is currently stayed until April 17, 2023. *Centro Presente* v. *Biden,* No. 1:18–cv–10340 (D. Mass. July 23, 2018), relating to El Salvador, Haiti, and Honduras, is currently stayed until April 14, 2023.

[7] *See Ramos* v. *Wolf,* 975 F.3d 872 (9th Cir. 2020), *petition for reh'g en banc granted,* 59 F.4th 1010 (Feb. 10, 2023) (No. 18–16981).

[8] *See Saget* v. *Trump,* 375 F. Supp. 3d 280 (E.D.N.Y. 2019) and Order approving Stipulation of Dismissal, dated Oct. 15, 2021.

[9] As noted, Haiti was newly designated for TPS on August 3, 2021 for 18 months. *See Designation of Haiti for Temporary Protected Status,* 86 FR 41863 (Aug. 3, 2021). On April 19, 2022, the Secretary also newly designated Sudan TPS. *See Designation of Sudan for Temporary Protected Status,* 87 FR 23202 (Apr. 19, 2022). Those designations cover all Haitian and Sudanese nationals who were eligible for TPS under the Haiti and Sudan TPS designations that were terminated in 2018 and 2017, respectively.

[10] 83 FR 54764 (Oct. 31, 2018); 84 FR 7103 (Mar. 1, 2019); 84 FR 20647 (May 10, 2019) (correction notice issued at 84 FR 23578 (May 22, 2019)); 84 FR 59403 (Nov. 4, 2019); 85 FR 79208 (Dec. 9, 2020); 86 FR 50725 (Sept. 10, 2021) (correction notice issued at 86 FR 52694 (Sept. 22, 2021)).

[11] *Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations of El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal,* 87 FR 68717 (Nov. 16, 2022).

[12] *Id.,* at 68719, note 5 (listing acceptable re-registration periods for each of the 6 countries).

[13] Through the re-registration process, which is generally conducted every 12 to 18 months while a foreign state is designated for TPS, USCIS determines whether each TPS beneficiary is continuing to maintain individual eligibility for TPS, including but not limited to, the requirements related to disqualifying criminal or security issues. Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal, 87 FR 68717, 68720 (Nov. 16, 2022) (noting potential future action for El Salvador TPS beneficiaries may include a requirement to re-register).

[14] Although the text of INA section 244(b)(1) continues to ascribe this power to the Attorney General, this authority is now held by the Secretary of Homeland Security by operation of the Homeland Security Act of 2002, Pub. L. 107–296, 116 Stat. 2135. *See, e.g.,* 6 U.S.C. 557; *Nielsen* v. *Preap,* 139 S. Ct. 954, 959 n.2 (2019). The Secretary may designate a country (or part of a country) for TPS on the basis of ongoing armed conflict such that returning would pose a serious threat to the personal safety of the country's nationals and habitual residents, environmental disaster (including an epidemic), or extraordinary and temporary conditions in the country that prevent the safe return of the country's nationals. For environmental disaster-based designations, certain other statutory requirements must be met, including that the foreign government must request TPS. A designation based on extraordinary and temporary conditions cannot be made if the Secretary finds that allowing the country's nationals to remain temporarily in the United States is contrary to the U.S. national interest. INA section 244(b)(1).

(or part thereof) is a discretionary decision, and there is no judicial review of any determination with respect to the designation, termination, or extension of a designation. *See* INA section 244(b)(5)(A); 8 U.S.C. 1254a(b)(5)(A).

At least 60 days before the expiration of a foreign state's TPS designation, the Secretary, after consultation with appropriate U.S. Government agencies, must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA section 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA section 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). If the Secretary does not determine that the foreign state no longer meets the conditions for TPS designation, the designation is extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA section 244(b)(3)(A), (C); 8 U.S.C. 1254a(b)(3)(A), (C).

On January 18, 2018, the Secretary of Homeland Security issued notice of her decision that El Salvador no longer continued to meet the conditions for TPS designation and announced the termination of TPS for El Salvador. The Secretary also announced an orderly transition period of 18 months, such that the termination was set to go into effect on September 9, 2019. On March 12, 2018, as noted above, plaintiffs in *Ramos* filed suit challenging the termination decision for El Salvador, as well as contemporaneous decisions to terminate TPS for Nicaragua, Sudan, and Haiti. On October 3, 2018, the U.S. District Court for the Northern District of California issued a preliminary injunction order in *Ramos,* preventing the termination decision from going into effect until the court reaches a decision on the merits of the plaintiffs' claims and further directing that DHS maintain the *status quo,* including continuing TPS and TPS-related documentation, such as Employment Authorization Documents (EADs), for affected beneficiaries. After reaching a stipulation with plaintiffs that no termination would go in effect for at least 120 days following the conclusion of any appeal, DHS has issued a series of **Federal Register** notices continuing TPS and TPS-related documentation for affected TPS beneficiaries, with the most recent continuation notice effective through June 30, 2024.[15] As a result, the announced termination of the TPS designation for El Salvador has never gone into effect, and TPS beneficiaries under that designation have retained their TPS, unless it has been individually withdrawn pursuant to INA section 244(c)(3), 8 U.S.C. 1254a(c)(3).

An agency has inherent (that is, statutorily implicit) authority to revisit its prior decisions unless Congress has expressly limited that authority.[16] The TPS statute does not limit the Secretary's inherent authority to reconsider any TPS-related determination, and upon reconsideration, to change the determination. *See* INA sections 244(b)(3), (b)(5)(A); 8 U.S.C. 1254a(b)(3), (b)(5)(A).

Why is the Secretary rescinding the previous decision to terminate the TPS designation for El Salvador?

After conducting an independent assessment of the country conditions in El Salvador as they existed in 2018 and exist today, the Secretary has determined that El Salvador's 2001 TPS designation should not have been terminated. As explained below, the conditions in El Salvador that gave rise to its TPS designation in 2001 persisted in 2018 and persist to this day. Accordingly, the Secretary is, upon reconsideration, vacating the 2018 decision terminating El Salvador's TPS designation and extending that designation for an additional 18 months.

El Salvador was initially designated for TPS in 2001 on environmental disaster grounds[17] following two separate earthquakes that occurred that year. El Salvador suffered catastrophic damage as a result of the 2001 earthquakes. Together, the earthquakes killed over 1,150 people,[18] injured over 8,000, and affected more than 1.5 million people[19] (approximately 25 percent of the population[20]). The earthquakes damaged or destroyed over 300,000 homes, 2,647 public schools and demolished critical infrastructure throughout the country.[21] The international community responded to the disaster with a significant amount of aid, with the United States initially providing $16 million in relief assistance and announcing another $52 million for reconstruction assistance.[22] Intergovernmental organizations and other governments also provided substantial aid, including a $20 million emergency loan from the Inter-American Development Bank (IDB), $4 million for World Food Programme (WFP) emergency operations, and $1.3 billion in pledges from various countries.[23]

While some progress on reconstruction projects had been made by 2018, many of the problems caused by the 2001 earthquakes persisted.[24] Since the disastrous effects of the earthquakes in 2001, El Salvador has

[24] A January 2016 report by a Salvadoran media outlet found individuals living in homes in San Salvador (El Salvador's capital city) which were declared uninhabitable due to structural damage from the 2001 earthquakes or their locations in areas at high risk from landslides or the potential collapse of walls. While schools have been reconstructed and repaired—including via the U.S. Agency for International Development's (USAID) Earthquake Reconstruction Program—in January 2016 a Salvadoran media outlet reported that certain buildings and schools damaged by the 2001 earthquakes had not yet been repaired or rebuilt. Joma, Susana, Edificios dañados por los terremotos aún son amenaza, El Diario de Hoy (El Sal.), Jan. 11, 2016; Contributions of the PDNA and DRF to Post-Disaster Recovery: El Salvador Case Study 2022, United Nations Development Programme, available at *https://www.undp.org/latin-america/publications/case-study-contributions-pdna-and-drf-post-disaster* (last visited: March 17, 2023).

been encumbered by several natural disasters, environmental challenges, high levels of violence, and economic instability, all of which significantly slowed its recovery and continued to render El Salvador unable to handle the return of its nationals at the time of the decision to terminate the designation.[25]

At the time of the determination to terminate the designation of TPS, DHS found that the social and economic conditions affected by the earthquakes had stabilized. That conclusion was in error and reflects an inadequate assessment of conditions in El Salvador leading up to the announcement of the decision to terminate. Although some social and economic progress had been made by 2018, frequent and significant environmental disasters occurred after the 2001 earthquakes causing additional challenges.[26] Recovery from the earthquakes continued to be slow and encumbered by hurricanes and tropical storms, heavy rains and flooding, volcanic and seismic activity, a coffee rust epidemic, a prolonged and severe drought, and an increase in various mosquito-borne diseases, among other things.

Numerous natural disasters have negatively affected El Salvador since the 2001 earthquakes and have adversely impacted its ability to adequately handle the return of its nationals granted TPS. In October 2005, for instance, the severe flooding caused by Tropical Storm Stan, coupled with the eruption of the Ilamatepec volcano in early October 2005, affected approximately half of the population of El Salvador.[27] In November 2009, Tropical Storm Ida caused severe damage and loss of life.[28] In October 2011, Tropical Storm 12–E caused flooding and mudslides across El Salvador.[29] In June 2013, Tropical Storm Barry caused flooding.[30] and the high waves produced by tropical storms in May 2015 forced evacuations and caused damage along the Salvadoran coastal line.[31] In October 2015, heavy rains produced flooding and landslides across El Salvador.[32] In 2016, El Salvador had the third highest percentage of people exposed to disaster risk in the world, with 88.7 percent of the land and 95.4 percent of the population at risk of multiple kinds of disasters.[33] In June 2017, several days of heavy rainfall caused floods and landslides; four people were killed, nearly 300 were displaced, and over 200 homes were damaged.[34] In early October 2017, Tropical Storm Nate impacted El Salvador, leaving one person dead and one missing.[35] In late October 2017, Tropical Storm Selma brought heavy rain and flooding that caused massive mudslides, overflowed rivers, and left debris on roads.[36]

These environmental disasters have had negative impacts on El Salvador's economic stability that were not considered in the 2018 termination decision.[37] The 2018 termination decision highlighted El Salvador's steady unemployment rate of 7 percent from 2014–2016 but failed to consider that it has the second slowest economic growth rate in Central America, leading to an underemployment rate of 36.8 percent in 2018.[38] According to the 2017 Global Climate Risk Index, El Salvador ranked as the 15th most affected country in the world by extreme weather events from 1996 to 2015, the most recent year for which data was available at the time the termination decision was made.[39] During this time, El Salvador averaged $282 million in damages per year—equivalent to 0.7 percent of its GDP.[40] In 2016, El Salvador was considered the 17th highest country in the world in terms of the impact of disasters on the gross domestic product.[41] An estimated

95.4 percent of its GDP is exposed to two or more natural hazards, making it the country with the second highest economic multi-hazard risk worldwide relative to its GDP.[42] In fact, earthquakes have been responsible for the greatest proportion of economic loss, with the 2001 earthquakes causing effects equivalent to 12 percent of El Salvador's GDP.[43] These facts highlight that El Salvador continued to face serious environmental obstacles at the time of the decision to terminate TPS.

In addition to the ongoing environmental and economic impacts from the 2001 earthquakes, high levels of violence have continued to render El Salvador unable to handle the return of those granted TPS. At the time of the decision to terminate TPS, DHS found that the social and economic conditions affected by the earthquakes had stabilized but did not sufficiently consider the combined impacts of the earthquakes and economic instability on rates of violence and general insecurity.[44] El Salvador's recovery had been (and continues to be) encumbered by staggering levels of violence—mainly related to gang activity and the state's response—as well as pervasive and high levels of gender-based violence. In 2018, El Salvador had one of the world's highest homicide rates and its security forces were widely reported as either ineffective or engaged in human rights violations and abuses, including the extrajudicial executions of alleged gang members, sexual assaults, and enforced disappearances.[45] Violent gang activity is particularly serious in El Salvador due to the country's economic and social challenges.[46] Young people are highly vulnerable to gang recruitment, with a quarter of Salvadoran youth not engaged in education, employment, or training.[47] Violent nonstate actors impact the ability of NGOs to operate by imposing restrictions in areas they control.[48] DHS also found that, in 2018, El Salvador was accepting the returns of its nationals who were removed for various reasons; however, it did not adequately consider that some of those who returned became targets for violent nonstate actors, leading to extortion, torture, and murder of deportees.[49]

As explained above, at the time of the decision to terminate TPS, El Salvador continued to experience ongoing environmental disasters, economic instability, and high rates of violence, that were either insufficiently considered or not considered in the termination decision. The termination decision failed to adequately assess conditions in El Salvador in 2018. Those conditions continued to substantially disrupt living conditions and temporarily affected the country's ability to adequately handle the return of its nationals residing in the United States. The Secretary has concluded that reconsideration and rescission of the termination of TPS is appropriate and timely, particularly given that the 2018 termination decision has not yet gone into effect due to the ongoing litigation and associated court orders.

What authority does the Secretary have to extend the designation of El Salvador for TPS?

As noted above, section 244(b) of the INA, 8 U.S.C. 1254a(b), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist and instructs the Secretary to periodically review the country conditions underpinning each designation and determine whether they still exist, leading to either termination or extension of the TPS designation. However, if the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA section 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). If the Secretary does not make a decision as to either extension or termination, then INA section 244(b)(3)(C) requires the automatic extension of the designation for six months (or 12 or 18 months in the Secretary's discretion).

Prior to the now-rescinded termination of the TPS designation for El Salvador, the most recent extension of the designation was due to end on March 9, 2018.[50] In light of the Secretary's reconsideration and rescission of the January 18, 2018 decision to terminate the TPS designation for El Salvador, there is no longer any standing secretarial determination that El Salvador ''no longer meets the conditions for designation'' under INA section 244(b)(1). Accordingly, pursuant to INA section 244(b)(3)(C), and in the absence of an affirmative decision by any Secretary to extend the designation for 12 or 18 months rather than the automatic six months triggered by the statue, the TPS designation for El Salvador shall have been extended in consecutive increments of six months between the date when the last designation extension was due to end on March 9, 2018, and the effective date of the TPS extension announced in this notice on September 10, 2023. Coupled with the existing *Ramos* order and corresponding **Federal Register** notices continuing TPS and TPS-related documentation for affected beneficiaries under the designation for El Salvador, this means that all such individuals whose TPS has not been finally withdrawn for individual ineligibility are deemed to have retained TPS since March 9, 2018, and may re-register under procedures announced in this Notice.

Why is the Secretary extending the TPS designation for El Salvador for TPS for 18 months through March 9, 2025?

DHS has reviewed country conditions in El Salvador. Based on the review, including input received from DOS and other U.S. Government agencies, the Secretary has determined that an 18-month TPS extension is warranted because the conditions supporting El Salvador's 2001 designation for TPS on the basis of environmental disaster remain.

As previously discussed, El Salvador was originally designated for TPS in 2001[51] following two separate

earthquakes. Recovery from these earthquakes has been impeded by El Salvador's ongoing environmental challenges, including its high vulnerability to ''more frequent occurrences of floods, droughts, and tropical storms, all of which disproportionally affect poor and vulnerable populations.'' [52] During the rainy season, which generally runs from June to November, El Salvador is impacted by extreme weather, which damages roads, property, and infrastructure; disrupts supplies, services, and utilities; and even causes loss of life.[53] Through the present, El Salvador continues to experience compounding environmental disasters, hindering recovery and rendering it unable to handle adequately the return of its nationals.

As recently as October 2022, Tropical Storm Julia passed over El Salvador, leaving extensive flooding and deadly mudslides due to oversaturated ground from an active rainy season.[54] El Salvador declared a 15-day state of national emergency in response to Tropical Storm Julia.[55] Approximately 120 shelters were activated for 2,837 people, and at least 10 individuals died.[56] Assessments indicated that 180,000 people who were already facing acute food insecurity were affected by heavy rains.[57] A trend analysis of food insecurity and disasters found that environmental degradation and natural disasters led to increased insecurity, and both of these factors have significantly impacted El Salvador since 2001.[58]

In October 2018, the Government of El Salvador published an updated report regarding the heavy rain situation in the country at that time. Seven rivers flooded and 1,409 homes were affected.[59] In May and June 2020, tropical storms Amanda and Cristóbal causing widespread floods and landslides throughout the country, causing loss of life and significant material damage.[60] Collectively, the storms also disrupted agricultural production, and caused acute food insecurity due to irregular rainfall, which was worsened by the impacts of the COVID–19 pandemic.[61] More than 149,000 people were directly affected the storms, and as a result, the WFP estimated that more than 330,000 people were facing severe food insecurity.[62] In November 2020, the Civil Protection Agency in El Salvador issued a national red alert due to the formation of Hurricane Eta, which sent more than 2,200 people to shelters.[63] As a result of Hurricane Eta, El Salvador experienced major flooding and soon after, experienced heavy rain and flooding from Hurricane Iota.[64] It also caused two deaths and significant agricultural damage across the country.[65] It is estimated that 17,000 people were internally displaced as a result of Hurricanes Eta and Iota.[66] These countrywide consecutive events led to an overwhelming increase in the number of identified people in need of humanitarian assistance from 643,000 before the start of the COVID–19 pandemic to 1.7 million.[67]

In addition to the numerous environmental disasters following the 2001 earthquakes, El Salvador continues to experience a frail macroeconomic environment, a high rate of unemployment, violence, and a poor security situation that continues to render the country temporarily unable to adequately handle the return of its nationals. El Salvador is plagued by intense violence involving criminal groups and gang warfare, as well as a deteriorating political crisis, due to the government's aggressive security strategies to combat gang violence. As reported in July 2020 by the International Crisis Group (ICG), El Salvador continues to be exposed to violence involving criminal groups, particularly Mara Salvatrucha (MS–13) and the 18th Street gang's two factions, the Revolutionaries and the Southerners.[68] At that time, authorities estimated that 60,000 active gang members operated in 94 percent of the country's municipalities.[69] Gang violence has hampered reconstruction efforts, with NGOs reporting that in gang-controlled territories, they must abide by curfews, stop work when ordered, and often require approval from gangs to work in those areas.[70]

Elected in 2019, President Nayib Bukele has attributed a plunge in homicides to a security policy of sending police and troops into gang-controlled neighborhoods.[71] However, El Salvador's overall decline in its homicide rate in 2020 and 2021[72] has also been attributed to a ''covert pact'' between the government and the largest gangs operating in the country—the collapse of which reportedly led to a spike in murders in late March 2022.[73]

President Bukele has been described as ''increasingly authoritarian, and his critics say the leader's threat to democracy has only grown.''[74] In a December 2021 report, the Congressional Research Service described a series of actions taken by President Bukele and his government as ''democratic backsliding''[75] and ''removing checks on presidential power.''[76] In March 2022, the government of El Salvador declared a 30-day state of emergency, suspending citizen's constitutional rights, in response to a spike in homicides, when El Salvador registered 62 murders in a single day, ''the bloodiest since the end of the country's civil war in 1992.''[77] This initial month-long crackdown on gangs has been regularly renewed since then, with the latest renewal announced in March 2023.[78] As of March 2023, more than 65,000 people had been arrested under these orders, and human rights groups claim that many of the of the mass detentions could amount to arbitrary detentions based on ''poorly substantiated investigations or crude profiling of the physical appearance or social background of those detained.''[79] Human Rights Watch reported that the government's emergency provisions suspended privacy rights, freedom of association and peaceful assembly, and some fair trial guarantees and other applicable legal protections.[80] Amnesty International has documented that authorities in El Salvador have dismantled judicial independence and committed torture and thousands of arbitrary detentions and violations of fair trial guarantees and other applicable legal protections.[81]

Since March 2022, police and soldiers have been conducting raids and arresting thousands at their home and in the street.[82] The number of arrests under the state of emergency increased to 50,000 as of mid-August 2022.[83] Official statistics and other government information has become increasingly difficult to access under the state of emergency, and authorities reportedly have changed ''what counts as a homicide.''[84] The discrepancy between reported homicide numbers and the actual numbers of bodies reportedly recovered from mass graves continues to be of concern.[85] Under President Bukele, significant human rights abuses and violations by security forces are widely reported to continue, including unlawful disappearances, torture, and extrajudicial killings of suspected gang members.[86]

The Internal Displacement Monitoring Centre (IDMC) noted in a 2018 report that ''[d]isplacement caused by crime and violence has, by any measure, risen to the level of a humanitarian crisis in El Salvador.''[87] In July 2018, internal forced displacement was officially recognized by the Supreme Court of El Salvador.[88] In January 2020, the Legislative Assembly approved the ''Special Law for the Comprehensive Care and Protection of People in a situation of Forced Internal Displacement,'' a fundamental instrument to provide care, protection, and lasting solutions to people internally displaced due to violence from organized crime and criminal gangs, as well as those who may be at risk of displacement.[89] In August 2021, the United Nations High Commissioner for Refugees (UNHCR) reported that communities in El Salvador are severely affected by gang violence, extortion, death threats, and sexual violence, as

well as other serious human rights violations.[90]

Gang violence and lack of access to effective protection has forced tens of thousands to flee internally since 2006.[91] Violence and lack of opportunities have forced people to leave their homes in search of protection, access to basic services and livelihood opportunities. COVID–19 has exacerbated the needs of internally displaced persons and those at risk of displacement by impacting their access to protection and livelihoods.[92] While President Bukele's tactics have caused a decrease in the rate of gang violence, severe gang violence persists, and the tactics used by the Bukele administration have failed to address the root causes of gang membership, including poverty and insecurity, which are exacerbated by the lingering effects of major environmental disasters. Impoverished individuals are less likely to move to safer areas due to lack of financial resources and the geographic areas where they can afford to live are more likely to be gang-impacted and environmentally degraded.[93]

In summary, while progress has been made in repairing damage caused by the 2001 earthquakes, El Salvador continues to experience numerous natural disasters that significantly disrupt living conditions and adversely impact its ability to adequately handle the return of those granted TPS. A weak macroeconomic environment, a high rate of unemployment, violence, and a poor security situation adversely impact the country's ability to fully recover and continue to render the country temporarily unable to adequately handle the return of its nationals.

Based upon this review and after consultation with appropriate U.S. Government agencies, the Secretary has determined that:

- At the time the Secretary's decision to terminate El Salvador's designation for TPS was announced on January 18, 2018, conditions in El Salvador continued to support the country's designation for TPS on the ground of environmental disaster; therefore, the termination should be rescinded and such rescission is timely given that the termination has not yet gone into effect. *See* INA section 244(b)(1)(B), 8 U.S.C. 1254a(b)(1)(B).
- The conditions supporting El Salvador's designation for TPS still continue to be met. *See* INA section 244(b)(3)(A) and (C), 8 U.S.C. 1254a(b)(3)(A) and (C).
- There has been an earthquake, flood, drought, epidemic, or other environmental disaster in El Salvador resulting in a substantial, but temporary, disruption of living conditions in the area affected; El Salvador is unable, temporarily, to handle adequately the return of its nationals; and El Salvador officially requested designation of TPS. *See* INA section 244(b)(1)(B), 8 U.S.C. 1254a(b)(1)(B);
- The designation of El Salvador for TPS should be extended for an 18-month period, beginning on September 10, 2023 and ending on March 9, 2025. *See* INA section 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C).

Notice of the Rescission of TPS Termination and Extension of the TPS Designation of El Salvador

Pursuant to my lawful authorities, including under sections 103(a) and 244 of the Immigration and Nationality Act, I am hereby rescinding the termination of the TPS designation of El Salvador announced in the **Federal Register** at 83 FR 2654 on January 18, 2018. Due to this rescission and pursuant to INA section 244(b)(3)(C), as well as the ongoing preliminary injunction in *Ramos* v. *Nielsen,* 336 F. Supp. 3d 1075 (N.D. Cal. 2018), the TPS designation of El Salvador has continued to automatically extend under the statute since July 8, 2016, without a standing secretarial determination as to whether TPS should be extended or terminated. TPS beneficiaries under the designation, whose TPS has not been finally withdrawn for individual ineligibility, therefore have continued to maintain their TPS since March 9, 2018.

By the authority vested in me as Secretary under INA section 244, 8 U.S.C. 1254a, I have determined, after consultation with the appropriate U.S. Government agencies, the statutory conditions supporting El Salvador's designation for TPS on the basis of environmental disaster continue to be met. *See* INA sections 244(b)(1)(B) and 244(b)(3)(A); 8 U.S.C. 1254a(b)(1)(B) and 1254a(b)(3)(A). On the basis of this determination, I am extending the existing designation of El Salvador for TPS for 18 months, beginning on September 10, 2023 and ending on March 9, 2025. *See* INA section 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C). Individuals holding TPS under the designation of El Salvador may file to reregister for TPS under the procedures announced in this notice if they wish to continue their TPS under this 18-month extension.

Alejandro N. Mayorkas,

Secretary, U.S. Department of Homeland Security.

Eligibility and Employment Authorization for TPS

Required Application Forms and Application Fees To Re-Register for TPS

To re-register for TPS based on the designation of El Salvador, you must submit a Form I–821, Application for Temporary Protected Status during the 60-day reregistration period that starts on July 12, 2023 and ends on September 10, 2023. There is no Form I–821 fee for re-registration. *See* 8 CFR 244.17. You may be required to pay the biometric services fee. If you can demonstrate an inability to pay the biometric services fee, you may request to have the fee waived. Please see additional information under the ''Biometric Services Fee'' section of this notice.

Individuals who have an El Salvador TPS application (Form I–821) that was still pending as of June 21, 2023 do not need to file the application again. If USCIS approves an individual's Form I–821, USCIS will grant the individual TPS through March 9, 2025.

Required Application Forms and Application Fees To Obtain an EAD

Every employee must provide their employer with documentation showing they have a legal right to work in the United States. TPS beneficiaries are authorized to work in the United States and are eligible for an EAD which proves their employment authorization. If you have an existing EAD issued under the TPS designation of El Salvador that has been auto-extended through June 30, 2024 by the notice published at 87 FR 68717, you may continue to use that EAD through that date. If you want to obtain a new EAD valid through March 9, 2025, you must file an Application for Employment Authorization (Form I–765) and pay the Form I–765 fee (or request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver).

You may, but are not required to, submit Form I–765, Application for

Employment Authorization, with your Form I–821 re-registration application. If you do not want a new EAD now, you can request one later by filing your I–765 and paying the fee (or requesting a fee waiver) at that time, provided you have TPS or a pending TPS application. If you have TPS and only a pending Form I–765, you must file the Form I–821 to reregister for TPS or risk having your TPS withdrawn for failure to reregister without good cause.

Information About Fees and Filing

USCIS offers the option to applicants for TPS under El Salvador's designation to file Form I–821 and related requests for EADs online or by mail. When filing a TPS application, applicants can also request an EAD by submitting a completed Form I–765, with their Form I–821.

Online filing: Form I–821 and I–765 are available for concurrent filing online.[94] To file these forms online, you must first create a USCIS online account.[95] However, if you are requesting a fee waiver, you cannot submit the applications online. You will need to file paper versions of the fee waiver request and the form for which you are requesting the fee waiver.

Mail filing: Mail your application for TPS to the proper address in Table 1.

Table 1—Mailing Addresses: Mail your completed Form I–821, Application for Temporary Protected Status and Form I–765, Application for Employment Authorization, Form I–912, Request for Fee Waiver, if applicable, and supporting documentation to the proper address in Table 1.

[95] *https://myaccount.uscis.gov/users/sign_up.*

TABLE 1—MAILING ADDRESSES—Continued

If you live in:	Then mail your application to:
• Montana. • Nebraska. • New Mexico. • New York. • North Dakota. • Oklahoma. • South Dakota. • Tennessee. • Utah. • Wisconsin. • Wyoming.	

If you were granted TPS by an immigration judge (IJ) or the Board of Immigration Appeals (BIA) and you wish to request an EAD, please mail your Form I–765 application to the appropriate mailing address in Table 1. When you are requesting an EAD based on an IJ/BIA grant of TPS, please include a copy of the IJ or BIA order granting you TPS with your application. This will help us verify your grant of TPS and process your application.

Supporting Documents

The filing instructions on the Form I–821 list all the documents needed to establish eligibility for TPS. You may also find information on the acceptable documentation and other requirements for applying (*i.e.,* registering) for TPS on the USCIS website at *https://www.uscis.gov/tps* under ''El Salvador.''

Travel

TPS beneficiaries may also apply for and be granted travel authorization as a matter of discretion. You must file for travel authorization if you wish to travel outside of the United States. If granted, travel authorization gives you permission to leave the United States and return during a specific period. To request travel authorization, you must file Form I–131, Application for Travel Document, available at *https://www.uscis.gov/i-131.* You may file Form I–131 together with your Form I–821 or separately. When filing the Form I–131, you must:

- Select Item Number 1.d. in Part 2 on the Form I–131; and
- Submit the fee for the Form I–131, or request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver.

If you are filing Form I–131 together with Form I–821, send your forms to the address listed in Table 1. If you are filing Form I–131 separately based on a pending or approved Form I–821, send your form to the address listed in Table 2 and include a copy of Form I–797 for the approved or pending Form I–821.

TABLE 2—MAILING ADDRESSES

Filing Form I–131 together with a Form I–821, Application for Temporary Protected Status	The address provided in Table 1.
Filing Form I–131 based on a pending or approved Form I–821, and you are using the U.S. Postal Service (USPS): You must include a copy of the receipt notice (Form I–797 or I–797C) showing we accepted or approved your Form I–821.	USCIS, Attn: I–131 TPS, P.O. Box 660167, Dallas, TX 75266–0867.
Filing Form I–131 based on a pending or approved Form I–821, and you are using FedEx, UPS, or DHL: You must include a copy of the receipt notice (Form I–797 or I–797C) showing we accepted or approved your Form I–821.	USCIS, Attn: I–131 TPS, 2501 S State Hwy. 121, Business Ste. 400, Lewisville, TX 75067.

Biometric Services Fee for TPS

Biometrics (such as fingerprints) are required for all applicants 14 years of age and older. Those applicants must submit a biometric services fee. As previously stated, if you are unable to pay the biometric services fee, you may request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver. For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* Fees for Form I–765 and biometric services are also described in 8 CFR 103.7(b)(1) (Oct. 1, 2020). If necessary, you may be required to visit an Application Support Center to have your biometrics captured. For additional information on the USCIS biometric screening process, please see the USCIS Customer Profile Management Service Privacy Impact Assessment, available at *https://www.dhs.gov/publication/dhsuscispia-060-customer-profile-management-service-cpms.*

Refiling a TPS Re-Registration Application After Receiving a Denial of a Fee Waiver Request

You should file as soon as possible within the 60-day re-registration period so USCIS can process your application and issue your EAD promptly, if one has been requested. Properly filing early will also allow you to have time to refile your application before the deadline, should USCIS deny your fee waiver request. The fee waiver denial notice will contain specific instructions about resubmitting your application. However, you are urged to refile within 45 days of the date on any USCIS fee waiver denial notice, if possible. See INA section 244(c)(3)(C); 8 U.S.C. 1254a(c)(3)(C); 8 CFR 244.17(b). For more information on good cause for late re-registration, visit the USCIS TPS web page at *www.uscis.gov/tps.*

Note: A re-registering TPS beneficiary age 14 and older must pay the biometric services fee (but not the Form I–821 fee), or request a fee waiver, when filing a TPS re-registration application. As discussed above, if you decide to wait to request an EAD, you do not have to file the Form I–765 or pay the

associated Form I–765 fee (or request a fee waiver) at the time of re-registration. You may wait to seek an EAD until after USCIS has approved your TPS re-registration application or at any later date you decide you want to request an EAD. To re-register for TPS, you only need to file the Form I–821 with the biometrics services fee, if applicable (or request a fee waiver).

General Employment-Related Information for TPS Applicants and Their Employers

How can I obtain information on the status of my TPS application and EAD request?

To get case status information about your TPS application, as well as the status of your TPS-based EAD request, you can check Case Status Online at uscis.gov, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.* If your Form I–765 has been pending for more than 90 days, and you still need assistance, you may ask a question about your case online at *https://egov.uscis.gov/e-request/Intro.do* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

When hired, what documentation may I show to my employer as evidence of identity and employment authorization when completing Form I–9?

You can find the Lists of Acceptable Documents on Form I–9, Employment Eligibility Verification, as well as the Acceptable Documents web page at *https://www.uscis.gov/i-9-central/acceptable-documents.* Employers must complete Form I–9 to verify the identity and employment authorization of all new employees. Within three days of hire, employees must present acceptable documents to their employers as evidence of identity and employment authorization to satisfy Form I–9 requirements.

You may present any document from List A (which provides evidence of both identity and employment authorization) or one document from List B (which provides evidence of your identity) together with one document from List C (which provides evidence of employment authorization), or you may present an acceptable receipt as described in the Form I–9 Instructions. Employers may not reject a document based on a future expiration date. You can find additional information about Form I–9 on the I–9 Central web page at *https://www.uscis.gov/I-9Central.* An EAD is an acceptable document under List A.

If I have an EAD based on another immigration status, can I obtain a new TPS-based EAD?

Yes, if you are eligible for TPS, you can obtain a new TPS-based EAD, regardless of whether you have an EAD or work authorization based on another immigration status. If you want to obtain a new TPS-based EAD valid through March 9, 2025, then you must file Form I–765, Application for Employment Authorization, and pay the associated fee (unless USCIS grants your fee waiver request).

Can my employer require that I provide any other documentation such as evidence of my status or proof of my Salvadoran citizenship or a Form I–797C showing that I registered for TPS for Form I–9 completion?

No. When completing Form I–9, employers must accept any documentation you choose to present from the Form I–9 Lists of Acceptable Documents that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers need not reverify List B identity documents. Employers may not request proof of Salvadoran citizenship or proof of registration for TPS when completing Form I–9 for new hires or reverifying the employment authorization of current employees. Refer to the ''Note to Employees'' section of this **Federal Register** notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or immigration status, or your national origin. Employers can refer to the compliance notice that DHS published on November 16, 2022, for information on how to complete the Form I–9 with TPS EADs that DHS extended through June 30, 2024.[96]

Note to All Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This **Federal Register** notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (Form I–9 and E-Verify), employers may call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Employer Hotline at 800–255–8155 (TTY 800–237–2515). IER offers language interpretation in numerous languages. Employers may also email IER at *IER@usdoj.gov.*

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls in English, Spanish and many other languages. Employees or job applicants may also call the IER Worker Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based on citizenship, immigration status, or national origin, including discrimination related to Form I–9 and E-Verify. The IER Worker Hotline provides language interpretation in numerous languages.

To comply with the law, employers must accept any document or combination of documents from the Lists of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt as described in the Form I–9 Instructions. Employers may not require extra or additional documentation beyond what is required for Form I–9 completion. Further, employers participating in E-Verify who receive an E-Verify case result of ''Tentative Nonconfirmation'' (mismatch) must promptly inform employees of the mismatch and give such employees an opportunity to take action to resolve the mismatch. A mismatch result means that the information entered into E-Verify from Form I–9 differs from records available to DHS.

Employers may not terminate, suspend, delay training, withhold or lower pay, or take any adverse action against an employee because of a mismatch while the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result is received when E-Verify cannot confirm an employee's employment eligibility. An employer may terminate employment based on a case result of FNC. Work-authorized employees who receive an FNC may call

[96] *Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal,* 87 FR 68717 (Nov. 16, 2022).

USCIS for assistance at 888–897–7781 (TTY 877–875–6028). For more information about E-Verify-related discrimination or to report an employer for discrimination in the E-Verify process based on citizenship, immigration status, or national origin, contact IER's Worker Hotline at 800–255–7688 (TTY 800–237–2515). Additional information about proper nondiscriminatory Form I–9 and E-Verify procedures is available on the IER website at *https://www.justice.gov/crt/immigrant-and-employee-rights-section* and the USCIS and E-Verify websites at *https://www.uscis.gov/i-9-central* and *https://www.e-verify.gov.*

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles)

This **Federal Register** Notice does not invalidate the compliance notice DHS issued on November 16, 2022, which extended the validity of certain TPS documentation through June 30, 2024 and does not require individuals to present a Form I–797, Notice of Action. While Federal Government agencies must follow the guidelines laid out by the Federal Government, State and local government agencies establish their own rules and guidelines when granting certain benefits. Each state may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are a TPS beneficiary, show you are authorized to work based on TPS or other status, or that may be used by DHS to determine if you have TPS or another immigration status. Examples of such documents are:

- Your current EAD with a TPS category code of A–12 or C–19, even if your country of birth noted on the EAD does not reflect the TPS designated country of El Salvador; or
- Your Form I–94, Arrival/Departure Record or Form I–797, Notice of Action, as shown in the **Federal Register** notice published at 87 FR 68717.

Check with the government agency requesting documentation regarding which document(s) the agency will accept. Some state and local government agencies use SAVE to confirm the current immigration status of applicants for public benefits.

While SAVE can verify that an individual has TPS, each state and local government agency's procedures govern whether they will accept an unexpired EAD, Form I–797, Form I–797C, or Form I–94. It may also assist the agency if you:

a. Give the agency a copy of the relevant **Federal Register** notice listing the TPS-related document, including any applicable auto-extension of the document, in addition to your recent TPS-related document with your A-number, USCIS number or Form I–94 number;

b. Explain that SAVE will be able to verify the continuation of your TPS using this information; and

c. Ask the agency to initiate a SAVE query with your information and follow through with additional verification steps, if necessary, to get a final SAVE response verifying your TPS.

You can also ask the agency to look for SAVE notices or contact SAVE if they have any questions about your immigration status or any automatic extension of TPS-related documentation. In most cases, SAVE provides an automated electronic response to benefit-granting agencies within seconds, but occasionally verification can be delayed.

You can check the status of your SAVE verification by using CaseCheck at *https://save.uscis.gov/casecheck/.* CaseCheck is a free service that lets you follow the progress of your SAVE verification case using your date of birth and one immigration identifier number (A-number, USCIS number, or Form I–94 number) or Verification Case Number. If an agency has denied your application based solely or in part on a SAVE response, the agency must offer you the opportunity to appeal the decision in accordance with the agency's procedures. If the agency has received and acted on or will act on a SAVE verification and you do not believe the SAVE response is correct, the SAVE website, *www.uscis.gov/save*, has detailed information on how to correct or update your immigration record, make an appointment, or submit a written request to correct records.

BILLING CODE 9111–97–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[CIS No. 2735–22; DHS Docket No. USCIS–2014–0006]

RIN 1615–ZB69

Reconsideration and Rescission of Termination of the Designation of Nicaragua for Temporary Protected Status; Extension of the Temporary Protected Status Designation for Nicaragua

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice of Reconsideration and Rescission of Termination of the Designation of Nicaragua for Temporary Protected Status (TPS) and Notice of Extension of TPS Designation for Nicaragua.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security (Secretary) is rescinding the previous termination of the designation of Nicaragua for TPS, which was published on December 15, 2017 and extending the designation of Nicaragua for Temporary Protected Status (TPS) for 18 months, beginning on January 6, 2024 and ending on July 5, 2025. This extension allows existing TPS beneficiaries to retain TPS through July 5, 2025, so long as they otherwise continue to meet the eligibility requirements for TPS. Existing TPS beneficiaries who wish to extend their status through July 5, 2025, must re-register during the 60-day re-registration period as described in this notice.

DATES: The *Rescission of Termination of the Designation of Nicaragua for TPS* took effect June 9, 2023.

Extension of Designation of Nicaragua for TPS: The 18-month extension of TPS for Nicaragua begins on January 6, 2024, and will remain in effect through July 5, 2025. The extension impacts existing beneficiaries of TPS under the designation of Nicaragua.

Re-registration: The 60-day re-registration period for existing beneficiaries runs from November 6, 2023, through January 5, 2024.

FOR FURTHER INFORMATION CONTACT:

- You may contact Rená Cutlip-Mason, Chief, Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital

Gateway Drive, Camp Springs, MD 20746, or by phone at 800–375–5283.

- For further information on TPS, including guidance on the registration process and additional information on eligibility, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* You can find specific information about Nicaragua's TPS designation by selecting ''Nicaragua'' from the menu on the left side of the TPS web page.
- If you have additional questions about TPS, please visit *uscis.gov/tools.* Our online virtual assistant, Emma, can answer many of your questions and point you to additional information on our website. If you are unable to find your answers there, you may also call our USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).
- Applicants seeking information about the status of their individual cases may check Case Status Online, available on the USCIS website at uscis.gov, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.*
- Further information will also be available at local USCIS offices upon publication of this notice.

Purpose of This Action (TPS)

Through this notice, DHS announces the reconsideration and rescission of the termination of the designation of Nicaragua for TPS and the Secretary's decision to extend the TPS designation for 18 months from January 6, 2024, through July 5, 2025. This notice also sets forth procedures necessary for nationals of Nicaragua (or individuals having no nationality who last habitually resided in Nicaragua) to re-register for TPS and to apply for renewal of their Employment Authorization Documents (EADs) with USCIS.

Re-registration is limited to individuals who have previously registered or re-registered for TPS under Nicaragua's designation, whose applications were granted, and whose TPS has not been withdrawn for individual ineligibility for the benefit. Failure to re-register properly within the 60-day re-registration period may result in the withdrawal of your TPS following appropriate procedures. *See* 8 CFR 244.14.

For individuals who have already been granted TPS under Nicaragua's designation, the 60-day re-registration period runs from November 6, 2023, through January 5, 2024. USCIS will issue new EADs with a July 5, 2025, expiration date to eligible Nicaraguan TPS beneficiaries who timely re-register and apply for EADs.

Individuals who have a Nicaragua TPS application (Form I–821) and Application for Employment Authorization (Form I–765) that were still pending as of June 21, 2023 do not need to file either application again. If USCIS approves an individual's pending Form I–821, USCIS will grant the individual TPS through July 5, 2025. Similarly, if USCIS approves a pending TPS-related Form I–765 filed in connection with a Form I–821, USCIS will issue the individual a new EAD that will be valid through the same date. If you have TPS and only a pending Form I–765, you must file the Form I–821 to re-register for TPS or risk having your TPS withdrawn for failure to timely re-register without good cause. There are currently approximately 4,000 beneficiaries under Nicaragua's TPS designation who may be eligible to continue their TPS under the extension announced in this Notice.

What is Temporary Protected Status (TPS)?

- TPS is a temporary immigration status granted to eligible nationals of a foreign state designated for TPS under the INA, or to eligible individuals without nationality who last habitually resided in the designated foreign state before arrival in the United States, regardless of their country of birth.
- During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, and are authorized to obtain EADs so long as they continue to meet the requirements of TPS.
- TPS beneficiaries may also apply for and be granted travel authorization as a matter of DHS discretion.
- To qualify for TPS, beneficiaries must meet the eligibility standards at INA section 244(c)(1)–(2), 8 U.S.C. 1254a(c)(1)–(2).
- When the Secretary terminates a foreign state's TPS designation, beneficiaries return to one of the following:
  - The same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or terminated); or
  - Any other lawfully obtained immigration status or category they received while registered for TPS, as long as it is still valid beyond the date TPS terminates.

When was Nicaragua designated for TPS?

Nicaragua was initially designated on the basis of environmental disaster that prevented nationals of Nicaragua from returning in safety following this environmental disaster, at the request of the country's government, and because Nicaragua was unable, temporarily, to handle adequately the return of its nationals. *See Designation of Nicaragua Under Temporary Protected Status,* 64 FR 526 (Jan. 5, 1999). Since its initial designation in 1999, TPS for Nicaragua was extended 13 consecutive times (for periods of 12 or 18 months at a time) under the same statutory basis of environmental disaster. The last such extension was due to expire on January 5, 2018.[1]

Following the statutorily required review of the country conditions, former Acting Secretary Elaine C. Duke announced the termination of TPS for Nicaragua, with an effective date of January 5, 2019. *See Termination of the Designation of Nicaragua for Temporary Protected Status,* 82 FR 59636 (Dec. 15, 2017); *see also* INA secs. 244(b)(3)(A) and (B); 8 U.S.C. 1254a(b)(3)(A) and (B). As discussed below, this termination decision has been the subject of litigation and a court order. As a result, the termination has not taken effect.

Litigation Background Regarding Termination of Certain TPS Designations

In addition to Nicaragua, in 2017–2018, TPS termination decisions were also announced for five other countries

[1] *Extension of the Designation of Nicaragua for Temporary Protected Status,* 81 FR 30325 (July 6, 2016).

by the Secretary or Acting Secretary: Sudan, El Salvador, Haiti, Nepal, and Honduras.[2] Lawsuits challenging the terminations were filed in the U.S. District Court for the Northern District of California in *Ramos* v. *Nielsen,* 326 F. Supp. 3d 1075 (N.D. Cal. 2018), and *Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019), and in the U.S. District Court for the Eastern District of New York in *Saget* v. *Trump,* 375 F. Supp. 3d 280 (E.D.N.Y. 2019).[3] In *Ramos,* the district court granted a preliminary injunction enjoining the terminations of TPS for El Salvador, Haiti, Sudan, and Nicaragua and directed DHS to maintain the *status quo* and to continue the TPS and TPS-related documentation of affected TPS beneficiaries under those countries' designations. The U.S. Government appealed, and a three-judge panel vacated the injunction. The appellate court, however, has granted rehearing en banc of the panel decision, vacating the panel's decision.[4] The district court's preliminary injunction thus remains in place. In *Bhattarai* the district court has stayed proceedings until the *Ramos* appeal is decided and approved the parties' stipulation for the continuation of TPS and TPS-related documentation for eligible, affected beneficiaries of TPS for Honduras and Nepal during the stay and pendency of the *Ramos* appeal. In *Saget,* the district court granted a preliminary injunction enjoining termination of TPS for Haiti, and the Government appealed. However, following the new TPS designation of Haiti in August 2021, the district court dismissed the lawsuit based on the parties' stipulation to dismissal.[5] Beneficiaries under the TPS designations for El Salvador, Nicaragua, Sudan, Haiti, Honduras, and Nepal will retain their TPS while the preliminary injunction in *Ramos* remains in effect, and 120 days thereafter, provided that their TPS is not withdrawn because of individual ineligibility.[6]

DHS has taken actions to ensure its continued compliance with the court orders in *Ramos* and *Bhattarai.* DHS has published periodic notices to continue TPS and extend the validity of TPS-related documentation previously issued to beneficiaries under the TPS designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal.[7] The most recent such notice continued TPS and extended the TPS-related documents specified in the notice through June 30, 2024.[8] These extensions apply where the TPS beneficiary properly filed for re-registration during either the most recent DHS-announced registration period for their country, or any applicable previous DHS-announced re-registration periods for the beneficiary's country, or has a re-registration application that remains pending.[9] Although the notice published at 87 FR 68717 remains valid, individuals who wish to remain eligible for TPS under the extension of TPS for Nicaragua announced in this notice through July 5, 2025, and any potential future extensions must apply for re-registration in accordance with the procedures announced in this notice.[10] Failure to timely re-register without good cause is a ground for TPS withdrawal. *See* INA sec. 244(c)(3)(C), 8 U.S.C. 1254a(c)(3)(C); 8 CFR 244.17.

What authority does the Secretary have to reconsider and rescind the termination of TPS for Nicaragua and extend the prior designation?

Section 244(b)(1) of the INA, 8 U.S.C. 1254a(b)(1), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist.[11] The decision to designate any foreign state (or part thereof) is a discretionary decision, and there is no judicial review of any determination with respect to the designation, termination, or extension of

[2] *Termination of the Designation of Sudan for Temporary Protected Status,* 82 FR 47228 (Oct. 11, 2017); *Termination of the Designation of El Salvador for Temporary Protected Status,* 83 FR 2654 (Jan. 18, 2018); *Termination of the Designation of Haiti for Temporary Protected Status,* 83 FR 2648 (Jan. 18, 2018); *Termination of the Designation of Nepal for Temporary Protected Status,* 83 FR 23705 (May 22, 2018); *Termination of the Designation of Honduras for Temporary Protected Status,* 83 FR 26074 (June 5, 2018). Haiti and Sudan were later newly designated for TPS on August 3, 2021 and April 19, 2022, respectively, for 18 months. *See Designation of Haiti for Temporary Protected Status,* 86 FR 41863 (Aug. 3, 2021); *Designation of Sudan for Temporary Protected Status,* 87 FR 23202 (Apr. 19, 2022).

[3] *See Ramos* v. *Nielsen,* 336 F.Supp.3d 1075 (N.D. Cal. Oct. 3, 2018) (''*Ramos*'') (district court granted preliminary injunction against terminations of TPS for El Salvador, Haiti, Sudan, and Nicaragua). On appeal, a three-judge panel of the U.S. Court of Appeals for the Ninth Circuit vacated the district court's injunction and remanded the case to the district court, but the plaintiffs filed a motion for rehearing en banc. *Ramos* v. *Wolf,* 975 F.3d 872 (9th Cir. 2020). The appellate court did not issue its directive to the district court to make its vacatur of the injunction effective, thus the injunction remained in place. On February 10, 2023, the Ninth Circuit issued an order granting rehearing en banc and vacated the previous ruling from its three-judge panel. 59 F.4th 1010 (9th Cir. 2023). En banc arguments are scheduled to be heard during the week of June 20, 2023. In the meantime, the injunction remains in place. *See also Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019) (district court stayed proceedings until *Ramos* appeal decided and approved parties' stipulation for continued TPS and issuance of TPS-related documentation to eligible, affected beneficiaries of TPS for Honduras and Nepal during the stay and pendency of the appeal, treatment similar to that provided *Ramos*-covered individuals). Other litigation was filed relating to the terminations of El Salvador, Honduras, and Haiti. The Haiti-related case, NAACP v. *U.S. Dep't of Homeland Sec.,* No. 1:18–cv–00239 (D. Md. Jan. 24, 2018) was dismissed on May 22, 2021, subsequent to the same DHS designation. Meanwhile, *Centro Presente* v. *Biden,* No. 1:18–cv–10340 (D. Mass. July 23, 2018), relating to El Salvador, Honduras, and Haiti, and *Casa de Maryland* v. *Biden,* No. 18–00845 (D. Md. Mar. 23, 2018), relating to El Salvador, are currently either stayed or subject to a pending stay motion.

[4] *Ramos* v. *Nielsen,* 336 F. Supp. 3d 1075 (N.D. Cal. 2018), *vacated,* 975 F.3d 872 (9th Cir. 2020), *pet. for reh'g en banc granted,* 59 F.4th 1010 (Feb. 10, 2023) (No. 18–16981). (''*Ramos*'').

[5] *See Saget* v. *Trump,* 375 F. Supp. 3d 280 (E.D.N.Y. 2019) and Order approving Stipulation of Dismissal, dated Oct. 15, 2021.

[6] As noted, Haiti was newly designated for TPS on August 3, 2021 for 18 months. *See Designation of Haiti for Temporary Protected Status,* 86 FR 41863 (Aug. 3, 2021). On April 19, 2022, the Secretary also newly designated Sudan TPS. *See Designation of Sudan for Temporary Protected Status,* 87 FR 23202 (Apr. 19, 2022). Those designations cover all Haitian and Sudanese nationals who were eligible for TPS under the Haiti and Sudan TPS designations that were terminated in 2018 and 2017, respectively.

[7] 83 FR 54764 (Oct. 31, 2018); 84 FR 7103 (Mar. 1, 2019); 84 FR 20647 (May 10, 2019) (correction notice issued at 84 FR 23578 (May 22, 2019)); 84 FR 59403 (Nov. 4, 2019); 85 FR 79208 (Dec. 9, 2020); 86 FR 50725 (Sept. 10, 2021) (correction notice issued at 86 FR 52694 (Sept. 22, 2021)).

[8] *Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations of El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal,* 87 FR 68717 (Nov. 16, 2022).

[9] *Id.,* at 68719.

[10] Through the re-registration process, which is generally conducted every 12 to 18 months while a foreign state is designated for TPS, USCIS determines whether each TPS beneficiary is continuing to maintain individual eligibility for TPS, including but not limited to, the requirements related to disqualifying criminal or security issues. *See Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal,* 87 FR 68717, 68720 (Nov. 16, 2022) (noting potential future action for TPS beneficiaries may include a requirement to re-register).

[11] Although the text of INA section 244(b)(1) continues to ascribe this power to the Attorney General, this authority is now held by the Secretary of Homeland Security by operation of the Homeland Security Act of 2002, Public Law 107–296, 116 Stat. 2135. *See, e.g.,* 6 U.S.C. 557; *Nielsen* v. *Preap,* 139 S. Ct. 954, 959 n.2 (2019). The Secretary may designate a country (or part of a country) for TPS on the basis of ongoing armed conflict such that returning would pose a serious threat to the personal safety of the country's nationals and habitual residents, environmental disaster (including an epidemic), or extraordinary and temporary conditions in the country that prevent the safe return of the country's nationals. For environmental disaster-based designations, certain other statutory requirements must be met, including that the foreign government must request TPS. A designation based on extraordinary and temporary conditions cannot be made if the Secretary finds that allowing the country's nationals to remain temporarily in the United States is contrary to the U.S. national interest. INA sec. 244(b)(1).

a designation. *See* INA sec. 244(b)(5)(A); 8 U.S.C. 1254a(b)(5)(A).

At least 60 days before the expiration of a foreign state's TPS designation, the Secretary, after consultation with appropriate U.S. Government agencies, must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). If the Secretary does not determine that the foreign state no longer meets the conditions for TPS designation, the designation is extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA sec. 244(b)(3)(A), (C); 8 U.S.C. 1254a(b)(3)(A), (C).

On December 15, 2017, the Acting Secretary of Homeland Security issued notice of her decision that Nicaragua no longer continued to meet the conditions for TPS designation and announced the termination of TPS for Nicaragua. The Secretary also announced an orderly transition period of 12 months, such that the termination was set to go into effect on January 5, 2019. On March 12, 2018, as noted above, plaintiffs in *Ramos* filed suit challenging the termination decision for Nicaragua, as well as contemporaneous decisions to terminate TPS for El Salvador, Sudan, and Haiti. On October 3, 2018, the U.S. District Court for the Northern District of California issued a preliminary injunction order in *Ramos,* preventing the termination decision from going into effect until the court reaches a decision on the merits of the plaintiffs' claims and further directing that DHS maintain the *status quo,* including continuing TPS and TPS-related documentation such as EADs for affected beneficiaries. After reaching a stipulation with plaintiffs that no termination would go in effect for at least 120 days following the conclusion of any appeal, DHS has issued a series of **Federal Register** notices continuing TPS and TPS-related documentation for affected TPS beneficiaries, with the most recent continuation notice effective through June 30, 2024.[12] As a result, the announced termination of the TPS designation for Nicaragua has never gone into effect, and TPS beneficiaries under that designation have retained their TPS, unless it has been individually withdrawn pursuant to INA section 244(c)(3), 8 U.S.C. 1254a(c)(3).

An agency has inherent (that is, statutorily implicit) authority to revisit its prior decisions unless Congress has expressly limited that authority.[13] The TPS statute does not limit the Secretary's inherent authority to reconsider any TPS-related determination, and upon reconsideration, to change the determination. *See* INA secs. 244(b)(3), (b)(5)(A); 8 U.S.C. 1254a(b)(3), (b)(5)(A).

Why is the Secretary rescinding the previous decision to terminate the TPS designation for Nicaragua?

After conducting an independent assessment of the country conditions in Nicaragua as they existed in 2017 and exist today, the Secretary has determined that Nicaragua's 1999 TPS designation should not have been terminated. As explained below, the conditions in Nicaragua that gave rise to its TPS designation in 1999 persisted in 2017 and persist to this day. Accordingly, the Secretary is, upon reconsideration, vacating the 2017 decision terminating Nicaragua's TPS designation and extending that designation for an additional 18 months.

Nicaragua was initially designated for TPS in 1999 on environmental disaster grounds following Hurricane Mitch, at the request of the country's government, and because Nicaragua was unable, temporarily to handle adequately the return of its nationals.[14] The hurricane, which struck in 1998, killed approximately 2,500 people and 885 were reported missing.[15] The devastation of Hurricane Mitch affected nearly 868,000 people.[16] Landslides and floods destroyed entire villages and caused extensive damages to the transportation network, housing, medical and educational facilities, water supply and sanitation facilities, and the agricultural sector.[17] Overall damage estimates ranged between $1.3–1.5 billion.[18]

At the time of the decision to terminate the designation of TPS, Nicaragua continued to experience significant challenges due to the destruction of the hurricane. While the international community and the Government of Nicaragua helped to repair the damage and destruction left behind by Hurricane Mitch and there were notable improvements in some sectors, several sectors including housing and infrastructure remained severely impacted. In 2017, Habitat for Humanity reported that Nicaragua had one of the highest housing deficits in Central America stating, ''The total deficit generates a need for 957,000 new houses and home improvements, and only 50 percent of the total need is covered between the private and public sectors.'' [19] Moreover, though a significant amount of aid was dedicated to repairing and improving road infrastructure following Hurricane Mitch, transportation infrastructure in Nicaragua remained poor and suffered from damage from tropical storms and hurricanes.[20]

Additionally, according to the 2017 Global Climate Risk Index, Nicaragua

[20] Nicaragua > *Infrastructure,* Jane's Sentinel Security Assessment—Central America And The Caribbean, Feb. 3, 2017, *http://janes.ihs.com/Janes/Display/1302302* (last visited Nov. 16, 2022).

ranked as the 4th most affected country in the world by extreme weather events from 1996 to 2015; during this time, Nicaragua averaged $234.7 million in damages per year, and witnessed over 3,200 total fatalities from extreme weather events.[21] Per the World Food Program, Nicaragua's vulnerability to natural disasters hinders its progress in addressing both poverty and food security.[22]

Since Hurricane Mitch, various hurricanes, tropical depressions, and tropical storms have made landfall in Nicaragua.[23] The conditions leading up to the decision to terminate show recurrent hydrometeorological and environmental events that delayed and prolonged Nicaragua's ability to recover. In 2016, heavy rains and wind once again caused damage and flooding in Nicaragua.[24] In July 2016, more than 8,900 people were affected, 3,900 people were evacuated, and nearly 1,700 homes were flooded due to heavy rains and flooding.[25] In November 2016, Hurricane Otto—a category 2 storm—damaged 817 and destroyed 120 homes and necessitated the evacuation of over 11,600 people.[26] Also, consecutive years of drought (from November 2013 to April 2016) [27] negatively impacted agriculture, fishing, and hydroelectric energy production in Nicaragua.[28]

The conditions in Nicaragua at the time of the TPS termination decision prevented Nicaraguan nationals from returning to Nicaragua in safety and negatively affected the country's ability to adequately handle the return of its nationals residing in the United States. As explained above, at the time of the decision to terminate TPS, Nicaragua continued to experience ongoing environmental disasters that were either insufficiently considered or not considered in the termination decision. The termination decision failed to adequately assess conditions in Nicaragua in 2017. Those conditions continued to substantially disrupt living conditions and temporarily affected the country's ability to adequately handle the return of its nationals residing in the United States. The Secretary has concluded that reconsideration is appropriate and timely, particularly given that the 2017 termination decision has not yet gone into effect due to the ongoing litigation and associated court orders.

What authority does the Secretary have to extend the designation of Nicaragua for TPS?

As noted above, section 244(b) of the INA, 8 U.S.C. 1254a(b), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist and instructs the Secretary to periodically review the country conditions underpinning each designation and determine whether they still exist, leading to either termination or extension of the TPS designation. However, if the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). If the Secretary does not make a decision as to either extension or termination, then INA section 244(b)(3)(C) requires the automatic extension of the designation for six months (or 12 or 18 months in the Secretary's discretion).

Prior to the now-rescinded termination of the TPS designation for Nicaragua, the most recent extension of the designation was due to end on January 5, 2018.[29] In light of the Secretary's reconsideration and rescission of the December 15, 2017 decision to terminate the TPS designation for Nicaragua, there is no longer any standing secretarial determination that Nicaragua ''no longer meets the conditions for designation'' under INA section 244(b)(1). Accordingly, pursuant to INA section 244(b)(3)(C), and in the absence of an affirmative decision by any Secretary to extend the designation for 12 or 18 months rather than the automatic six months triggered by the statue, the TPS designation for Nicaragua shall have been extended in consecutive increments of six months between the date when the last designation extension was due to end on January 5, 2018, and the effective date of the TPS extension announced in this notice on January 6, 2024. Coupled with the existing *Ramos* order and corresponding **Federal Register** notices continuing TPS

and TPS-related documentation for affected beneficiaries under the designation for Nicaragua, this means that all such individuals whose TPS has not been finally withdrawn for individual ineligibility are deemed to have retained TPS since January 5, 2018, and may re-register under procedures announced in this Notice.

Why is the Secretary extending the TPS designation for Nicaragua for TPS for 18 months through July 5, 2025?

DHS has reviewed country conditions in Nicaragua. Based on the review, including input received from the United States Department of State (DOS) and other U.S. Government agencies, the Secretary has determined that an 18-month TPS extension is warranted because the conditions supporting Nicaragua's 1999 designation for TPS on the basis of environmental disaster remain.

As previously discussed, Nicaragua was originally designated for TPS in 1999 [30] following Hurricane Mitch. Since the disastrous hurricane in 1998, Nicaragua has been encumbered by several significant natural disasters and environmental challenges.

Nicaragua continues to suffer from the residual effects of Hurricane Mitch, and subsequent disasters have caused additional damage and added to the country's fragility. ''In the last 20 years, Nicaragua has been hit by major, extreme weather events such as Hurricanes Mitch in 1998, Beta in 2005, Felix in 2007, and most recently by hurricanes Eta and Iota in November 2020 . . . The economic, social, housing, and infrastructure losses have been devastating for the region.'' [31] According to the International Federation of Red Cross and Red Crescent Societies (IFRC), Hurricane Eta and Hurricane Iota left severe damage in the region, including loss of lives.[32] The ''back-to-back major hurricanes affected 60 per cent of the national territory,'' [33] while ''[c]oastal areas such as the North Caribbean Coast Autonomous Region (RACCN), a rural area mostly inhabited by indigenous and Afro-descendant peoples, bore the brunt of the destruction.'' [34] More than 3 million people were exposed to these hurricanes, with an estimated 1.8 million people affected.[35] Damages from the hurricanes were estimated at $738 million[36] and limited access to safe drinking water and sanitation facilities, damaged staple crops, and worsened food insecurity for vulnerable individuals.[37]

On July 1, 2022, Tropical Storm Bonnie hit the Caribbean coast of Nicaragua.[38] The storm ''caused flash flooding, overflow in rivers and landslides in the North and South Caribbean Coast,'' [39] and ''affected 21 municipalities, flooding 300 homes, ripping off the roofs of 123 homes, and destroying 3 homes.'' [40] At least 3,000 people were evacuated,[41] and ''[t]ens of thousands of people across Nicaragua were left without power and more than 10,000 homes had no water.'' [42] In addition, 12 people were injured,[43] and four people were killed when they were ''swept away by rivers which had been turned into raging torrents by the heavy rains.'' [44]

On October 9, 2022, Hurricane Julia hit Nicaragua's central Caribbean coast.[45] Reports indicate that Hurricane Julia damaged hundreds of homes but left no reported casualties.[46] The director of Nicaragua's disaster system reported that more than 13,000 families had been evacuated, more than 800 houses had been flooded, and many roofs had been damaged.[47]

In addition to hurricanes, Nicaragua has also been impacted by other hydrometeorological events [48] and is also one of the countries in the Dry Corridor of Central America.[49] These environmental shocks have affected conditions throughout Nicaragua resulting in deaths, damage to homes and infrastructure, and loss of crops throughout the years.[50]

Continued

In addition to the numerous environmental disasters following the 1998 hurricane, Nicaragua is experiencing political instability and a humanitarian crisis that continue to render the country temporarily unable to adequately handle the return of its nationals.

The Nicaraguan government's harsh response to domestic dissent and political opponents began in 2018 when President Ortega proposed to reduce social security benefits in Nicaragua which triggered protests.[51] The government's response was repressive [52] and included an ''estimated 325–600 extrajudicial killings, as well as torture, political imprisonment, and suppression of the press, and led to thousands of citizens going into exile'' according to a 2019 Report of the High-Level Commission on Nicaragua of the Organization of the American States.[53] The Ortega government launched a new period of increased oppression beginning in May 2021, arresting dozens of government critics, including several revolutionary leaders who once fought alongside Ortega.[54]

In a September 2022 report, the Office of the United Nations High Commissioner for Human Rights (OHCHR) reported that the ''human rights situation in Nicaragua has progressively deteriorated since 2018.'' [55] The Associated Press noted in August 2022 that political stability in Nicaragua ''has never fully returned'' since the outbreak of protests in 2018 and the subsequent ''crackdown by security forces and allied civilian militias.'' [56] Moreover, OHCHR reported that it had noted ''a deterioration of the human rights situation'' in 2022, ''particularly regarding civil and political rights, in a context characterized by the absence of dialogue, the deepening of the political crisis, and the isolation of Nicaragua from the international ommunity.'' [57] As part of the government's authoritarian crackdown, it has shut down nearly 3,000 NGOs in 2022, reducing the number of organizations that would have assisted with disaster response and recovery efforts.[58] These actions along with insufficient investment in public works and other programs necessary for long-term socioeconomic development have impacted Nicaragua's ability to recover from Hurricane Mitch.

The resulting instability has caused a humanitarian crisis. Between 2018 and 2020, more than 108,000 Nicaraguans fled their country, according to UNHCR.[59] Further, UNHCR has reported that in 2021, new asylum applications worldwide by nationals of Nicaragua were among the most commonly registered and experienced a five-fold increase from 2020.[60] The UN High Commissioner for Human Rights stated that the ''sociopolitical, economic and human rights crises we are witnessing in Nicaragua are driving thousands of people from the safety of their homes. The number of Nicaraguans leaving the country is growing in unprecedented numbers, even higher than in the 1980s.'' [61] UNHCR discussed ''Conflict-Induced Displacement'' in Nicaragua stating that, ''[d]ue to the continuously deteriorating political and security situation coupled with ongoing state repression, thousands of people have been forced to flee their homes, hide in safe houses or leave the country altogether.'' [62]

As of June 2022, more than 260,000 Nicaraguans had been forced to flee their country, including 191,875 to Costa Rica, 30,937 to Mexico, 21,556 to the United States,[63] 8,124 to Guatemala, 6,774 to Spain, and 5,170 to Panama.'' [64] In early September 2022, reports indicated that Nicaraguans seeking asylum in Costa Rica were at its highest level since Nicaragua's political crisis exploded in April 2018.[65] Additionally, more than ''200,000 pending applications and another 50,000 people waiting for their appointment to make a

formal application'' to seek asylum in Costa Rica, ''Nicaraguans account for nearly nine out of 10 applicants.'' [66]

In summary, while progress has been made in repairing damage caused by the 1998 hurricane, Nicaragua continues to experience numerous natural disasters that significantly disrupt living conditions and adversely impact its ability to adequately handle the return of those granted TPS. Nicaragua is encumbered by the effects of several significant natural disasters, environmental challenges, political instability, and a resulting humanitarian crisis that adversely impact the country's ability to fully recover and continue to render the country temporarily unable to adequately handle the return of its nationals.

Based upon this review and after consultation with appropriate U.S. Government agencies, the Secretary has determined that:

- At the time the Secretary's decision to terminate Nicaragua's designation for TPS was announced on December 15, 2017, conditions in Nicaragua continued to support the country's designation for TPS on the ground of environmental disaster; therefore, the termination should be rescinded and such rescission is timely given that the termination has not yet gone into effect. *See* INA sec. 244(b)(1)(B), 8 U.S.C. 1254a(b)(1)(B).
- The conditions supporting Nicaragua's designation for TPS still continue to be met. *See* INA sec. 244(b)(3)(A) and (C), 8 U.S.C. 1254a(b)(3)(A) and (C).
- There has been an earthquake, flood, drought, epidemic, or other environmental disaster in Nicaragua resulting in a substantial, but temporary, disruption of living conditions in the area affected; Nicaragua is unable, temporarily, to handle adequately the return of its nationals; and Nicaragua officially requested designation of TPS. *See* INA sec. 244(b)(1)(B), 8 U.S.C. 1254a(b)(1)(B);
- The designation of Nicaragua for TPS should be extended for an 18-month period, beginning on January 6, 2024, and ending on July 5, 2025. *See* INA sec. 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C).

Notice of the Rescission of TPS Termination and Extension of the TPS Designation of Nicaragua

Pursuant to my lawful authorities, including under sections 103(a) and 244 of the Immigration and Nationality Act, I am hereby rescinding the termination of the TPS designation of Nicaragua announced in the **Federal Register** at 82 FR 59636 on December 15, 2017. Due to this rescission and pursuant to INA section 244(b)(3)(C), as well as the ongoing preliminary injunction in *Ramos* v. *Nielsen,* 336 F. Supp. 3d 1075 (N.D. Cal. 2018), the TPS designation of Nicaragua has continued to automatically extend under the statute since May 16, 2016, without a standing secretarial determination as to whether TPS should be extended or terminated. TPS beneficiaries under the designation, whose TPS has not been finally withdrawn for individual ineligibility, therefore have continued to maintain their TPS since January 5, 2018.

By the authority vested in me as Secretary under INA section 244, 8 U.S.C. 1254a, I have determined, after consultation with the appropriate U.S. Government agencies, the statutory conditions supporting Nicaragua's designation for TPS on the basis of environmental disaster continue to be met. *See* INA secs. 244(b)(1)(B) and 244(b)(3)(A); 8 U.S.C. 1254a(b)(1)(B) and 1254a(b)(3)(A). On the basis of this determination, I am extending the existing designation of Nicaragua for TPS for 18 months, beginning on January 6, 2024, and ending on July 5, 2025. *See* INA sec. 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C). Individuals holding TPS under the designation of Nicaragua may file to re-register for TPS under the procedures announced in this notice if they wish to continue their TPS under this 18-month extension.

Alejandro N. Mayorkas

Secretary, U.S. Department of Homeland Security.

Eligibility and Employment Authorization for TPS

Required Application Forms and Application Fees To Re-Register for TPS

To re-register for TPS based on the designation of Nicaragua, you must submit a Form I–821, Application for Temporary Protected Status during the 60-day reregistration period that starts on November 6, 2023, through January 5, 2024. There is no Form I–821 fee for re-registration. *See* 8 CFR 244.17. You may be required to pay the biometric services fee. If you can demonstrate an inability to pay the biometric services fee, you may request to have the fee waived. Please see additional information under the ''Biometric Services Fee'' section of this notice.

Individuals who have a Nicaragua TPS application (Form I–821) that was still pending as of June 21, 2023 do not need to file the application again. If USCIS approves an individual's Form I–821, USCIS will grant the individual TPS through July 5, 2025.

Required Application Forms and Application Fees To Obtain an EAD

Every employee must provide their employer with documentation showing they have a legal right to work in the United States. TPS beneficiaries are authorized to work in the United States and are eligible for an EAD which proves their employment authorization. If you have an existing EAD issued under the TPS designation of Nicaragua that has been auto-extended through June 30, 2024, by the notice published at 87 FR 68717, you may continue to use that EAD through that date. If you want to obtain a new EAD valid through July 5, 2025, you must file an Application for Employment Authorization (Form I–765) and pay the Form I–765 fee (or request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver).

You may, but are not required to, submit Form I–765, Application for Employment Authorization, with your Form I–821 re-registration application. If you do not want a new EAD now, you can request one later by filing your I–765 and paying the fee (or requesting a fee waiver) at that time, provided you have TPS or a pending TPS application. If you have TPS and only a pending Form I–765, you must file the Form I–821 to re-register for TPS or risk having your TPS withdrawn for failure to re-register without good cause.

Information About Fees and Filing

USCIS offers the option to applicants for TPS under Nicaragua's designation to file Form I–821 and related requests for EADs online or by mail. When filing a TPS application, applicants can also request an EAD by submitting a completed Form I–765, with their Form I–821.

Online filing: Forms I–821 and I–765 are available for concurrent filing online.[67] To file these forms online, you must first create a USCIS online account.[68] However, if you are requesting a fee waiver, you cannot submit the applications online. You will need to file paper versions of the fee waiver request and the form for which you are requesting the fee waiver.

Mail filing: Mail your application for TPS to the proper address in Table 1.

Table 1-Mailing Addresses

Mail your completed Form I–821, Application for Temporary Protected

[66] *Id.*

Status and Form I–765, Application for Employment Authorization, Form I–912, Request for Fee Waiver, if applicable, and supporting documentation to the proper address in Table 1.

TABLE 1—MAILING ADDRESSES

If you send your paper applications via:	Then mail your application to:
U.S. Postal Service (USPS):	USCIS, Attn: TPS Nicaragua, P.O. Box 4413, Chicago, IL 60680–4388.
FedEx, UPS, or DHL deliveries:	USCIS, Attn: TPS Nicaragua (Box 4413), 131 S. Dearborn St., 3rd Floor, Chicago, IL 60603–5517.

If you were granted TPS by an immigration judge (IJ) or the Board of Immigration Appeals (BIA) and you wish to request an EAD, please mail your Form I–765 application to the appropriate mailing address in Table 1. When you are requesting an EAD based on an IJ/BIA grant of TPS, please include a copy of the IJ or BIA order granting you TPS with your application. This will help us verify your grant of TPS and process your application.

Supporting Documents

The filing instructions on the Form I–821 list all the documents needed to establish eligibility for TPS. You may also find information on the acceptable documentation and other requirements for applying (*i.e.,* registering) for TPS on the USCIS website at *https://www.uscis.gov/tps* under ''Nicaragua.''

Travel

TPS beneficiaries may also apply for and be granted travel authorization as a matter of discretion. You must file for travel authorization if you wish to travel outside of the United States. If granted, travel authorization gives you permission to leave the United States and return during a specific period. To request travel authorization, you must file Form I–131, Application for Travel Document, available at *https://www.uscis.gov/i-131.* You may file Form I–131 together with your Form I–821 or separately. When filing the Form I–131, you must:

- Select Item Number 1.d. in Part 2 on the Form I–131; and
- Submit the fee for the Form I–131, or request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver.

If you are filing Form I–131 together with Form I–821, send your forms to the address listed in Table 1. If you are filing Form I–131 separately based on a pending or approved Form I–821, send your form to the address listed in Table 2 and include a copy of Form I–797 for the approved or pending Form I–821.

TABLE 2—MAILING ADDRESSES

Filing Form I–131 based on a pending or approved Form I–821, and you are using FedEx, UPS, or DHL: You must include a copy of the receipt notice (Form I–797 or I–797C) showing we accepted or approved your Form I–821.	USCIS, Attn: I–131 TPS, 2501 S. State Hwy. 121 Business, Ste. 400, Lewisville, TX 75067.

Biometric Services Fee for TPS

Biometrics (such as fingerprints) are required for all applicants 14 years of age and older. Those applicants must submit a biometric services fee. As previously stated, if you are unable to pay the biometric services fee, you may request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver. For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* Fees for Form I–765 and biometric services are also described in 8 CFR 103.7(b)(1) (Oct. 1, 2020). If necessary, you may be required to visit an Application Support Center to have your biometrics captured. For additional information on the USCIS biometric screening process, please see the USCIS Customer Profile Management Service Privacy Impact Assessment, available at *https://www.dhs.gov/publication/dhsuscispia-060-customer-profile-management-service-cpms.*

Refiling a TPS Re-Registration Application After Receiving a Denial of a Fee Waiver Request

You should file as soon as possible within the 60-day re-registration period so USCIS can process your application and issue your EAD promptly, if one has been requested. Properly filing early will also allow you to have time to refile your application before the deadline, should USCIS deny your fee waiver request. The fee waiver denial notice will contain specific instructions about resubmitting your application. However, you are urged to refile within 45 days of the date on any USCIS fee waiver denial notice, if possible. *See* INA sec. 244(c)(3)(C); 8 U.S.C. 1254a(c)(3)(C); 8 CFR 244.17(b). For more information on good cause for late re-registration, visit the USCIS TPS web page at *www.uscis.gov/tps.*

Note: A re-registering TPS beneficiary age 14 and older must pay the biometric services fee (but not the Form I–821 fee), or request a fee waiver, when filing a TPS re-registration application. As discussed above, if you decide to wait to request an EAD, you do not have to file the Form I–765 or pay the associated Form I–765 fee (or request a fee waiver) at the time of re-registration. You may wait to seek an EAD until after USCIS has approved your TPS re-registration application or at any later date you decide you want to request an EAD. To re-register for TPS, you only need to file the Form I–821 with the biometrics services fee, if applicable (or request a fee waiver).

General employment-related information for TPS applicants and their employers

How can I obtain information on the status of my TPS application and EAD request?

To get case status information about your TPS application, as well as the status of your TPS-based EAD request, you can check Case Status Online at uscis.gov, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.* If your Form I–765 has been pending for more than 90 days, and you still need assistance, you may ask a question about your case online at *https://egov.uscis.gov/e-request/Intro.do* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

When hired, what documentation may I show to my employer as evidence of identity and employment authorization when completing Form I–9?

You can find the Lists of Acceptable Documents on Form I–9, Employment Eligibility Verification, as well as the Acceptable Documents web page at *https://www.uscis.gov/i-9-central/acceptable-documents.* Employers must complete Form I–9 to verify the identity and employment authorization of all new employees. Within three days of hire, employees must present acceptable documents to their employers as evidence of identity and employment authorization to satisfy Form I–9 requirements.

You may present any document from List A (which provides evidence of both identity and employment authorization) or one document from List B (which provides evidence of your identity) together with one document from List C (which provides evidence of employment authorization), or you may present an acceptable receipt as described in the Form I–9 Instructions. Employers may not reject a document based on a future expiration date. You can find additional information about Form I–9 on the I–9 Central web page at *https://www.uscis.gov/I-9Central.* An EAD is an acceptable document under List A.

If I have an EAD based on another immigration status, can I obtain a new TPS-based EAD?

Yes, if you are eligible for TPS, you can obtain a new TPS-based EAD, regardless of whether you have an EAD or work authorization based on another immigration status. If you want to obtain a new TPS-based EAD valid through July 5, 2025, then you must file Form I–765, Application for Employment Authorization, and pay the associated fee (unless USCIS grants your fee waiver request).

Can my employer require that I provide any other documentation such as evidence of my status or proof of my Nicaraguan citizenship or a Form I–797C showing that I registered for TPS for Form I–9 completion?

No. When completing Form I–9, employers must accept any documentation you choose to present from the Form I–9 Lists of Acceptable Documents that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers need not reverify List B identity documents. Employers may not request proof of Nicaraguan citizenship or proof of registration for TPS when completing Form I–9 for new hires or reverifying the employment authorization of current employees. Refer to the ''Note to Employees'' section of this **Federal Register** notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or immigration status, or your national origin. Employers can refer to the compliance notice that DHS published on November 16, 2022, for information on how to complete the Form I–9 with TPS EADs that DHS extended through June 30, 2024.69

Note to All Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This **Federal Register** notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (Form I–9 and E-Verify), employers may call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Employer Hotline at 800–255–8155 (TTY 800–237–2515). IER offers language interpretation in numerous languages. Employers may also email IER at *IER@usdoj.gov.*

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls in English, Spanish and many other languages. Employees or job applicants may also call the IER Worker Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based on citizenship, immigration status, or national origin, including discrimination related to Form I–9 and E-Verify. The IER Worker Hotline provides language interpretation in numerous languages.

To comply with the law, employers must accept any document or combination of documents from the Lists of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt as described in the Form I–9 Instructions. Employers may not require extra or additional documentation beyond what is required for Form I–9 completion. Further, employers participating in E-Verify who receive an E-Verify case result of ''Tentative Nonconfirmation'' (mismatch) must promptly inform employees of the mismatch and give such employees an opportunity to take action to resolve the mismatch. A mismatch result means that the information entered into E-Verify from Form I–9 differs from records available to DHS.

Employers may not terminate, suspend, delay training, withhold or lower pay, or take any adverse action against an employee because of a mismatch while the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result is received when E-Verify cannot confirm an employee's employment eligibility. An employer may terminate employment based on a case result of FNC. Work-authorized employees who receive an FNC may call USCIS for assistance at 888–897–7781 (TTY 877–875–6028). For more information about E-Verify-related discrimination or to report an employer for discrimination in the E-Verify process based on citizenship, immigration status, or national origin, contact IER's Worker Hotline at 800–255–7688 (TTY 800–237–2515). Additional information about proper nondiscriminatory Form I–9 and E-Verify procedures is available on the IER website at *https://www.justice.gov/ier* and the USCIS and E-Verify websites at *https://www.uscis.gov/i-9-central* and *https://www.e-verify.gov.*

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles)

This **Federal Register** Notice does not invalidate the compliance notice DHS issued on November 16, 2022, which extended the validity of certain TPS documentation through June 30, 2024, and does not require individuals to present a Form I–797, Notice of Action. While Federal Government agencies must follow the guidelines laid out by the Federal Government, State and local government agencies establish their own rules and guidelines when granting certain benefits. Each state may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are a TPS beneficiary, show you are authorized to work based on TPS or other status, or that may be used by DHS to determine if you have TPS or another immigration status. Examples of such documents are:

- Your current EAD with a TPS category code of A–12 or C–19, even if your country of birth noted on the EAD does not reflect the TPS designated country of Nicaragua; or
- Your Form I–94, Arrival/Departure Record or Form I–797, Notice of Action, as shown in the **Federal Register** notice published at 87 FR 68717.

Check with the government agency requesting documentation regarding which document(s) the agency will accept. Some state and local government agencies use SAVE to confirm the current immigration status of applicants for public benefits.

While SAVE can verify that an individual has TPS, each state and local government agency's procedures govern whether they will accept an unexpired EAD, Form I–797, Form I–797C, or Form I–94. It may also assist the agency if you:

a. Give the agency a copy of the relevant **Federal Register** notice listing the TPS-related document, including any applicable auto-extension of the document, in addition to your recent TPS-related document with your A-number, USCIS number or Form I–94 number;

b. Explain that SAVE will be able to verify the continuation of your TPS using this information; and

c. Ask the agency to initiate a SAVE query with your information and follow through with additional verification steps, if necessary, to get a final SAVE response verifying your TPS.

You can also ask the agency to look for SAVE notices or contact SAVE if they have any questions about your immigration status or any automatic extension of TPS-related documentation. In most cases, SAVE provides an automated electronic response to benefit-granting agencies within seconds, but occasionally verification can be delayed.

You can check the status of your SAVE verification by using CaseCheck at https://
CaseCheck is a free service that lets you follow the progress of your SAVE verification case using your date of birth and one immigration identifier number (A-number, USCIS number, or Form I–94 number) or Verification Case Number. If an agency has denied your application based solely or in part on a SAVE response, the agency must offer you the opportunity to appeal the decision in accordance with the agency's procedures. If the agency has received and acted on or will act on a SAVE verification and you do not believe the SAVE response is correct, the SAVE website, *www.uscis.gov/save,* has detailed information on how to correct or update your immigration record, make an appointment, or submit a written request to correct records.

RIN 1615–ZB75

Reconsideration and Rescission of Termination of the Designation of Honduras for Temporary Protected Status; Extension of the Temporary Protected Status Designation for Honduras

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice of Reconsideration and Rescission of Termination of the Designation of Honduras for Temporary Protected Status (TPS) and Notice of Extension of TPS Designation for Honduras.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security (Secretary) is rescinding the previous termination of the designation of Honduras for TPS which was published on June 5, 2018 and extending the designation of Honduras for Temporary Protected Status (TPS) for 18 months, beginning on January 6, 2024, and ending on July 5, 2025. This extension allows existing TPS beneficiaries to retain TPS through July 5, 2025, so long as they otherwise continue to meet the eligibility requirements for TPS. Existing TPS beneficiaries who wish to extend their status through July 5, 2025, must re-register during the 60-day re-registration period as described in this notice.

DATES: The *Rescission of Termination of the Designation of Honduras for TPS* took effect June 9, 2023.

Extension of Designation of Honduras for TPS: The 18-month extension of TPS for Honduras begins on January 6, 2024, and will remain in effect through July 5, 2025. The extension impacts existing beneficiaries of TPS under the designation of Honduras.

Re-registration: The 60-day re-registration period for existing beneficiaries runs from November 6, 2023 through January 5, 2024.

FOR FURTHER INFORMATION CONTACT:

- You may contact René Cutlip-Mason, Chief, Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital Gateway Drive, Camp Springs, MD 20746, or by phone at 800–375–5283.
- For further information on TPS, including guidance on the registration process and additional information on eligibility, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* You can find specific information about Honduras's TPS designation by selecting ''Honduras'' from the menu on the left side of the TPS web page.
- If you have additional questions about TPS, please visit *uscis.gov/tools.* Our online virtual assistant, Emma, can answer many of your questions and point you to additional information on our website. If you are unable to find your answers there, you may also call our USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).
- Applicants seeking information about the status of their individual cases may check Case Status Online, available on the USCIS website at *uscis.gov*, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.*
- Further information will also be available at local USCIS offices upon publication of this notice.

Purpose of This Action (TPS)

Through this notice, DHS announces the reconsideration and rescission of the termination of the designation of Honduras for TPS and the Secretary's decision to extend the TPS designation for 18 months from January 6, 2024, through July 5, 2025. This notice also sets forth procedures necessary for nationals of Honduras (or individuals having no nationality who last habitually resided in Honduras) to re-register for TPS and to apply for renewal of their EADs with USCIS.

Re-registration is limited to individuals who have previously registered or re-registered for TPS under Honduras' designation, whose applications were granted, and whose TPS has not been withdrawn for individual ineligibility for the benefit. Failure to re-register properly within the 60-day re-registration period may result in the withdrawal of your TPS following appropriate procedures. *See* 8 CFR 244.14.

For individuals who have already been granted TPS under Honduras's designation, the 60-day re-registration period runs November 6, 2023 through January 5, 2024. USCIS will issue new EADs with a July 5, 2025, expiration date to eligible Honduran TPS beneficiaries who timely re-register and apply for EADs.

Individuals who have a Honduras TPS application (Form I–821) and Application for Employment Authorization (Form I–765) that were still pending as of June 21, 2023 do not need to file either application again. If USCIS approves an individual's pending Form I–821, USCIS will grant the individual TPS through July 5, 2025. Similarly, if USCIS approves a pending TPS-related Form I–765 filed in connection with a Form I–821, USCIS will issue the individual a new EAD that will be valid through the same date. If you have TPS and only a pending Form I–765, you must file the Form I–821 to re-register for TPS or risk having your TPS withdrawn for failure to timely reregister without good cause. There are currently approximately 76,000 beneficiaries under Honduras's TPS designation who may be eligible to continue their TPS under the extension announced in this Notice.

What is Temporary Protected Status (TPS)?

- TPS is a temporary immigration status granted to eligible nationals of a foreign state designated for TPS under the INA, or to eligible individuals without nationality who last habitually resided in the designated foreign state before arrival in the United States, regardless of their country of birth.
- During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, and are authorized to obtain EADs so long as they continue to meet the requirements of TPS.
- TPS beneficiaries may also apply for and be granted travel authorization as a matter of DHS discretion.
- To qualify for TPS, beneficiaries must meet the eligibility standards at INA section 244(c)(1)–(2), 8 U.S.C. 1254a(c)(1)–(2).
- When the Secretary terminates a foreign state's TPS designation, beneficiaries return to one of the following:
  - The same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or terminated); or
  - Any other lawfully obtained immigration status or category they received while registered for TPS, as long as it is still valid beyond the date TPS terminates.

When was Honduras designated for TPS?

Honduras was initially designated for TPS based on an environmental disaster that resulted in a substantial disruption of living conditions, in response to a request by the country's government, and because Honduras temporarily was unable to handle adequately the return of its nationals. *See Designation of Honduras Under Temporary Protected Status*, 64 FR 524 (Jan. 5, 1999). Since its initial designation in 1999, TPS for Honduras was extended thirteen consecutive times [1] by subsequent Attorneys General and Secretaries of Homeland Security until 2017. That year, former Acting Secretary Elaine Duke did not make a decision on extending or terminating Honduras's TPS designation by the statutory deadline, resulting in an automatic 6-month extension of the designation, through July 5, 2018.[2]

Following the statutorily required review of the country conditions, former Secretary Kirstjen M. Nielsen announced the termination of TPS for Honduras, with an effective date of January 5, 2020; *see* Termination of the Designation of Honduras for Temporary Protected Status; [3] *see also* INA secs. 244(b)(3)(A) and (B), 8 U.S.C. 1254a(b)(3)(A) and (B). As discussed below, this termination has been the

[2] *See* 82 FR 59630 (Dec. 15, 2017). If the Secretary makes no decision on extension or termination of a country's TPS designation by at least 60 days before the expiration of the existing TPS designation, then INA, section 244(b)(3)(C) requires that the designation be extended an additional six months (or 12 or 18 months in the Secretary's discretion).

[3] 83 FR 26074 (June 5, 2018).

subject of litigation and a court order that has prevented the termination from taking effect.

Litigation Background Regarding Termination of Certain TPS Designations

In addition to Honduras, in 2017–2018, TPS was also terminated for five additional countries by the Secretary or Acting Secretary: Sudan, Nicaragua, El Salvador, Haiti, and Nepal.[4] Lawsuits challenging the terminations were filed in the U.S. District Court for the Northern District of California in *Ramos* v. *Nielsen,* 326 F. Supp. 3d 1075 (N.D. Cal. 2018), and *Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019), and in the U.S. District Court for the Eastern District of New York in *Saget,* v. *Trump,* 375 F. Supp. 3d 280 (E.D.N.Y. 2019).[5] In *Ramos* the district court granted a preliminary injunction enjoining the terminations of TPS for El Salvador, Haiti, Sudan, and Nicaragua and directed DHS to maintain the *status quo* and to continue the TPS and TPS-related documentation of affected TPS beneficiaries under those countries' designations. The U.S. Government appealed, and a three-judge panel vacated the injunction. The appellate court, however, has granted rehearing en banc of the panel decision, vacating the panel's decision.[6] The court's preliminary injunction thus remains in place. In *Bhattarai*—which challenged the determination to terminate TPS for Honduras—the district court has stayed proceedings until the *Ramos* appeal is decided and approved the parties' stipulation for the continuation of TPS and TPS-related documentation for eligible, affected beneficiaries of TPS for Honduras and Nepal during the stay and pendency of the appeal. In *Saget,* the district court granted a preliminary injunction enjoining termination of TPS for Haiti, and the Government appealed.[7] Beneficiaries under the TPS designations for El Salvador, Nicaragua, Sudan, Haiti, Honduras, and Nepal will retain their TPS while the preliminary injunction in *Ramos* remains in effect, and 120 days thereafter, provided that their TPS is not withdrawn because of individual ineligibility.[8]

DHS has taken actions to ensure its continued compliance with the court orders in *Ramos* and *Bhattarai.* DHS has published periodic notices to continue TPS and extend the validity of TPS-related documentation previously issued to beneficiaries under the TPS designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal.[9] The most recent such notice continued TPS and extended the TPS-related documents specified in the notice through June 30, 2024.[10] These extensions of documentation apply where the TPS beneficiary properly filed for re-registration during either the most recent DHS-announced registration period for their country, or any applicable previous DHS-announced re-registration periods for the beneficiary's country, or has a re-registration application that remains pending.[11] Although the notice published at 87 FR 68717 remains valid, individuals who wish to remain eligible for TPS under the extension of TPS for Honduras announced in this notice through July 5, 2025, and any potential future extensions must apply for re-registration in accordance with the procedures announced in this notice.[12] Failure to timely re-register without good cause is a ground for TPS withdrawal. *See INA* section 244(c)(3)(C); 8 U.S.C. 12(c)(3)(C); 8 CFR 244.17.

What authority does the Secretary have to reconsider and rescind the termination of TPS for Honduras?

Section 244(b)(1) of the INA, 8 U.S.C. 1254a(b)(1), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist.[13] The

[4] *Termination of the Designation of Sudan for Temporary Protected Status,* 82 FR 47228 (Oct. 11, 2017); *Termination of the Designation of Nicaragua for Temporary Protected Status,* 82 FR 59636 (Dec. 15, 2017); *Termination of the Designation of El Salvador for Temporary Protected Status,* 83 FR 2654 (Jan. 18, 2018); *Termination of the Designation of Haiti for Temporary Protected Status,* 83 FR 2648 (Jan. 18, 2018); *Termination of the Designation of Nepal for Temporary Protected Status,* 83 FR 23705 (May 22, 2018). Haiti and Sudan were newly designated for TPS on August 3, 2021, and April 19, 2022, respectively, for 18 months. *See Designation of Haiti for Temporary Protected Status,* 86 FR 41863 (Aug. 3, 2021) and *Designation of Sudan for Temporary Protected Status,* 87 FR 23202 (Apr. 19, 2022).

[5] *See Ramos* v. *Nielsen,* 336 F. Supp. 3d 1075 (N.D. Cal. 2018), *vacated,* 975 F.3d 872 (9th Cir. 2020), *reh'g en banc granted,* 59 F.4th 1010 (Feb. 10, 2023); *Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019) (staying proceedings until *Ramos* appeal decided and approved parties' stipulation for continued TPS and issuance of TPS-related documentation to eligible, affected beneficiaries of TPS for Honduras and Nepal during the stay and pendency of the appeal). In 2019, the U.S. District Court for the Eastern District of New York also enjoined the termination of the 2011 TPS designation for Haiti in *Saget* v. *Trump,* 375 F. Supp. 3d 280 (E.D.N.Y. 2019), and DHS cited to that order in previous notices continuing the affected beneficiaries' TPS and documentation. *See, e.g.,* 86 FR 50725, 50726 (Sept. 10, 2021). However, the *Saget* case was dismissed upon the court's approval of the parties' joint Stipulation of Dismissal for mootness following the Secretary's new 18-month designation of Haiti for TPS on August 3, 2021, and DHS' continuation of existing beneficiaries' TPS and related documentation under the Ramos injunction through Dec. 31, 2022. *See id.,* Order approving Stipulation of Dismissal, dated Oct. 15, 2021. Other litigation was filed relating to the terminations of El Salvador, Honduras, and Haiti. A Haiti-related case, *NAACP* v. *U.S. Dept. of Homeland Security,* No. 1:18–cv–00239 (D. Md., Jan. 24, 2018) was dismissed on May 22, 2021, subsequent to the same DHS designation. An El Salvador-related case, *Casa de Maryland* v. *Biden,* No. GJH–18–00845 (D. Md. Mar. 23, 2018) is currently stayed until April 17, 2023. *Centro Presente* v. *Biden,* No. 1:18–cv–10340 (D. Mass. July 23, 2018), relating to El Salvador, Haiti, and Honduras, is currently stayed until April 14, 2023.

[6] *See Ramos* v. *Wolf,* 975 F.3d 872 (9th Cir. 2020), *petition for reh'g en banc granted,* 2023 WL 1880467 (Feb. 10, 2023) (No. 18–16981).

[7] *See Saget, et. al.,* v. *Trump, et. al.,* 375 F.Supp 280 (E.D.N.Y. April 11, 2019) and Order approving Stipulation of Dismissal, dated Oct. 15, 2021.

[8] As noted, Haiti was newly designated for TPS on August 3, 2021, for 18 months. *See Designation of Haiti for Temporary Protected Status,* 86 FR 41863 (Aug. 3, 2021). On April 19, 2022, the Secretary also newly designated Sudan TPS. *See Designation of Sudan for Temporary Protected Status,* 87 FR 23202 (Apr. 19, 2022). Plaintiffs in *Ramos* and *Bhattarai* remain eligible for TPS status based on DHS new and continued designations.

[9] 83 FR 54764 (Oct. 31, 2018); 84 FR 7103 (March 1, 2019); 84 FR 20647 (May 10, 2019) (correction notice issued at 84 FR 23578 (May 22, 2019)); 84 FR 59403 (Nov. 4, 2019); 85 FR 79208 (Dec. 9, 2020); and 86 FR 50725 (Sept. 10, 2021) (correction notice issued at 86 FR 52694 (Sept. 22, 2021). Those designations cover all Haitian and Sudanese nationals who were eligible for TPS under the Haiti and Sudan TPS designations that were terminated in 2018 and 2017, respectively.

[10] *Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations of El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal,* 87 FR 68717 (Nov. 16, 2022).

[11] *Id. See* fn. 1 for acceptable re-registration periods for TPS Honduras beneficiaries).

[12] Through the re-registration process, which is generally conducted every 12 to 18 months while a foreign state is designated for TPS, USCIS determines whether each TPS beneficiary is continuing to maintain individual eligibility for TPS, including but not limited to, the requirements related to disqualifying criminal or security issues. Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal, 87 FR 68717, 68720 (Nov. 16, 2022) (noting potential future action for Honduras TPS beneficiaries may include a requirement to re-register).

[13] Although the text of INA section 244(b)(1) continues to ascribe this power to the Attorney General, this authority is now held by the Secretary of Homeland Security by operation of the Homeland Security Act of 2002, Public Law 107296, 116 Stat. 2135. Congress transferred this authority from the Attorney General to the Secretary of Homeland Security. *See* Homeland Security Act of 2002, Public Law 107–296, 116 Stat. 2135. *See, e.g.,* 6 U.S.C. 557; *Nielsen* v. *Preap,* 139 S. Ct. 954, 959 n.2 (2019). The Secretary may designate a country (or part of a country) for TPS on the basis of ongoing armed conflict such that returning would pose a serious threat to the personal safety of the country's nationals and habitual residents, environmental disaster (including an epidemic), or extraordinary and temporary conditions in the country that prevent the safe return of the country's nationals. For environmental disaster-based designations, certain other statutory requirements must be met, including that the foreign government must request TPS. A designation based on extraordinary and temporary conditions cannot be made if the Secretary finds that allowing the

decision to designate any foreign state (or part thereof) is a discretionary decision, and there is no judicial review of any determination with respect to the designation, termination, or extension of a designation. *See* INA section 244(b)(5)(A); 8 U.S.C. 1254a(b)(5)(A).

At least 60 days before the expiration of a foreign state's TPS designation, the Secretary, after consultation with appropriate U.S. Government agencies, must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA section 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA section 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). If the Secretary does not determine that the foreign state no longer meets the conditions for TPS designation, the designation is extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA section 244(b)(3)(A), (C); 8 U.S.C. 1254a(b)(3)(A), (C).

On June 5, 2018, the Secretary of Homeland Security issued notice of her decision that Honduras no longer continued to meet the conditions for TPS designation and terminated TPS for Honduras stating that the conditions supporting Honduras's 1999 designation for TPS on the basis of environmental disaster due to the damage caused by Hurricane Mitch in October 1998 were no longer met. The Secretary also announced an orderly transition period of 18 months, such that the termination was set to go into effect on January 5, 2020. However, as noted above, plaintiffs in *Bhattarai* challenged the termination decisions for Honduras and Nepal. On March 12, 2019, the proceedings were stayed, and the parties stipulated that the termination decision would not go into effect during the pendency of the *Ramos* appeal and for at least 120 days thereafter. The district court also approved the parties' stipulation that TPS and TPS-related documentation of affected beneficiaries of the Honduras and Nepal TPS designations would continue under terms similar to those applied to the *Ramos*-covered beneficiaries. The order to stay proceedings and approval of the stipulation remain in effect.[14] DHS has since issued a series of **Federal Register** notices continuing TPS and TPS-related documentation for affected TPS beneficiaries, with the most recent notice effective through June 30, 2024.[15] As a result, the termination of the TPS designation for Honduras has never gone into effect, and TPS beneficiaries under that designation have retained their TPS, unless it has been individually withdrawn pursuant to INA section 244(c)(3), 8 U.S.C. 1254a(c)(3).

An agency has inherent (that is, statutorily implicit) authority to revisit its prior decisions within a reasonable period unless Congress has expressly limited that authority.[16] The TPS statute does not limit the Secretary's inherent authority to reconsider any TPS-related determination, and upon reconsideration, to change the determination. *See* INA sections 244(b)(3), (b)(5)(A); 8 U.S.C. 1254a(b)(3), (b)(5)(A).

Why is the Secretary rescinding the previous termination of the TPS designation for Honduras?

After conducting an independent assessment of the country conditions in Honduras as they existed in 2018 and exist today, the Secretary has determined that Honduras's 1999 designation should not have been terminated. As explained below, the conditions in Honduras that gave rise to its TPS designation in 1999 persisted in 2018 and continue to this day. Accordingly, the Secretary is, upon reconsideration, rescinding the 2018 decision terminating Honduras's TPS designation and extending that designation for an additional 18 months.

Honduras was initially designated for TPS in 1999[17] following the destruction wrought by Hurricane Mitch, which struck Honduras in October 1998, causing a substantial disruption of living conditions in Honduras.[18] In the Secretary's view, the determination to terminate Honduras's TPS designation erroneously concluded that the conditions giving rise to that designation had been ameliorated by 2018, such that Honduras was able to adequately handle the return of its nationals. Numerous environmental, political, and social crises since Hurricane Mitch, however, have prevented the country from recovering from the hurricane and continue to impair Honduras from ensuring the safe return of its nationals.

Although recovery efforts were implemented in the years after Hurricane Mitch, the effects of Hurricane Mitch set back Honduras economically and socially by as much as 20 years.[19] Since Hurricane Mitch, various hurricanes, tropical storms, and tropical depressions have made landfall in Honduras. These subsequent natural disasters, to which the termination decision gave inadequate attention, significantly impeded Hurricane Mitch-related reconstruction projects.

Hurricane Mitch caused a substantial disruption of living conditions in Honduras, resulting in, among other things, substantial housing, and food shortages. *See* 65 FR 30438 (May 11, 2000). The determination to terminate TPS for Honduras failed to recognize that many of these conditions persisted in 2018, exacerbated by subsequent environmental disasters and other problems. The termination determination did not consider that in the years prior to the determination, approximately 1.3 million people remained in need of humanitarian assistance[20] due in part to Hurricane

country's nationals to remain temporarily in the United States is contrary to the U.S. national interest. INA section 244(b)(1).

Mitch and subsequent environmental impacts. For example, over 2 million Hondurans—approximately 25% of the population—had been severely affected by drought, and over 460,000 were in need of food assistance.[21] By March 2017, consecutive years of drought had left many subsistence farmers in the Dry Corridor struggling to produce food.[22] In addition to impacting food security, UNOCHA reported that the drought had also ''contributed to the spread of mosquito-borne diseases, such as Zika, malaria, dengue and chikungunya.'' [23] Also contributing to illness was destruction from forest fires which increased by 40% in the first three months of 2017 compared to the same time period the previous year.[24] The termination decision failed to assess adequately or give sufficient weight to these health and safety issues that have persisted since Hurricane Mitch and impeded recovery from the hurricane.

The decision to terminate also did not appropriately consider that despite efforts and foreign assistance after Hurricane Mitch, Honduras was still experiencing a housing deficit. According to a 2016 study by Habitat for Humanity Honduras, Honduras had a housing deficit exceeding 1.3 million units.[25]

Aside from environmental impacts on the recovery from Hurricane Mitch, at the time of the decision to terminate TPS, Honduras continued to face challenges of violent crime, which have likewise made recovery from the hurricane more difficult.[26] In 2016, there were an estimated 174,000 internally displaced people in Honduras.[27] ''Internal displacement was generally caused by violence, national and transnational gang activity, human trafficking, and migrant smuggling.'' [28] Additionally, although Honduras's murder rate had been falling in recent years, Honduras remained ''one of the world's deadliest peacetime nations'' in 2017 with a murder rate of 59.1 killings per 100,000 people.[29] Extortion remained a critical problem and a major source of violence that impacted almost all segments of society, including bus and taxi companies, small businesses, and ordinary citizens.[30] Together, these factors negatively impacted Honduras's ability to adequately handle the return of its nationals granted TPS.

At the time of the TPS termination decision, the country continued to suffer from impacts of Hurricane Mitch and subsequent environmental events, including humanitarian needs, hunger, disease, housing deficits, and underdeveloped infrastructure, in addition to widespread violence. The enduring impact of Hurricane Mitch in Honduras at the time of the decision to terminate TPS continued to substantially disrupt living conditions. Those enduring conditions impacting Honduras's ability to recover from Hurricane Mitch along with Honduras's challenges with violent crime affected the country's ability to adequately handle the return of its nationals granted TPS residing in the United States. The Secretary has concluded that reconsideration and rescission of the termination of TPS is timely, particularly given that the 2018 termination decision has not yet gone into effect.

What authority does the Secretary have to extend the designation of Honduras for TPS?

As noted above, INA section 244(b), 8 U.S.C. 1254a(b), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist and instructs the Secretary to periodically review the country conditions underpinning each designation and determine whether they still exist, leading to either termination or extension of the TPS designation. However, if the Secretary does not make a decision as to either extension or termination, then INA section 244(b)(3)(C) requires the automatic extension of the designation for six months (or 12 or 18 months in the Secretary's discretion).

Prior to the now-rescinded termination of the TPS designation for Honduras, the most recent extension of the designation was due to end on July 5, 2018.[31] In light of the Secretary's reconsideration and rescission of the June 5, 2018 notice of termination of the TPS designation for Honduras, there is no longer any standing secretarial determination that Honduras ''no longer meets the conditions for designation'' under INA section 244(b)(1). Accordingly, with this rescission of the prior termination, pursuant to INA section 244(b)(3)(C), and in the absence of an affirmative decision by any Secretary to extend the designation for 12 or 18 months rather than the

[31] 82 FR 59631 (Dec. 15, 2017).

automatic six months triggered by the statute, the TPS designation for Honduras shall have been extended in consecutive increments of 6 months between the date when the last designation extension was due to end on July 5, 2018, and the effective date of the TPS extension announced in this Notice, January 6, 2024. Coupled with the existing *Bhattarai* order and corresponding **Federal Register** notices continuing the TPS and TPS-related documentation for affected beneficiaries under the designation for Honduras, this means that all such individuals whose TPS has not been finally withdrawn for individual ineligibility are deemed to have retained TPS since July 5, 2018, and may re-register under procedures announced in this notice.

Why is the Secretary extending the TPS designation for Honduras for TPS for 18 months through July 5, 2025?

DHS has reviewed country conditions in Honduras. Based on the review, including input received from DOS and other U.S. Government agencies, the Secretary has determined that an 18-month TPS extension is warranted because the environmental disaster conditions and substantial disruption of living conditions supporting Honduras's TPS designation remain.

Since Honduras was designated for TPS in January 1999, various natural disasters, and related environmental concerns—including hurricanes, tropical storms, flooding and heavy rain, severe drought, and mosquito-borne illnesses—have contributed to loss of life and damages to property and infrastructure in Honduras and prevented the country from fully recovering from Hurricane Mitch. Additionally, since the extension of TPS for Honduras in 2018,[32] violence and social and political concerns have adversely impacted living conditions and hindered recovery from environmental disasters in Honduras.[33] These subsequent natural disasters, violence, and social and political concerns continue to inflict damage on a population that has not fully recovered from Hurricane Mitch and impact Honduras's ability to adequately handle the return of its nationals granted TPS. Accordingly, the Secretary has concluded that the conditions that gave rise to Honduras's 1999 TPS designation persist, and an extension is therefore warranted. Since Hurricane Mitch, Honduras has been impacted by a ''repetitive cycle'' of storm-related damage to infrastructure and 16 of the 18 departments in the country recently reported damaged roads, collapsed bridges, devastated crops, flooded houses, and landslides.[34]

In 2019, Honduras experienced a severe drought that ''decimated staple-crop harvests of beans and maize by up to 80% in some areas,'' and led the government to declare a state of emergency.[35] In November 2020, within weeks of each other,[36] hurricanes Eta and Iota, both Category 4 storms,[37] struck Honduras. UNHCR noted that ''more than 4 million people were affected by Hurricanes Eta and Iota in Honduras alone,'' [38] about ''half the country's population.'' [39] ''In 2020, hurricanes Eta and Iota forced more than 55,000 to move into temporary shelters, according to the Red Cross.'' [40] In rural areas, the storms destroyed fields and slow receding water hindered sowing, impacting the livelihood of those who depend on seasonal crops. In urban areas, the storms greatly impacted populations already suffering socioeconomic effects of the COVID–19 pandemic, job losses, and increased violence.[41]

Among the storms affecting Honduras recently was Tropical Storm Julia, which ''wreaked havoc in 15 of the country's 18 departments.'' [42]Flooding related to Julia is estimated to have affected over 200,000 Hondurans.[43] Even a ''relatively weak'' hurricane like Julia reportedly can cause significant destruction in Honduras due to unaddressed damage to infrastructure from previous storms.[44]

Recent tropical storms, flooding, and subsequent landslides across the country in 2022 ''affected 188,000 people'' and sparked another government declared country-wide state of emergency, after 23,000 people were evacuated from homes and more than 12,300 people moved into housing shelters across eight departments.[45] As of August 2022, ''more than 16,000 public educational centers in Honduras lack adequate infrastructure. Some 5,700 centers lack drinking water, and 44% of schools do not have electricity.'' [46] ''Between 1 September and 10 October, 162 municipalities in 15 of the 18 departments in Honduras reported damage to basic and critical infrastructure, including over 3,500 damaged or destroyed houses (COPECO/Gov't of Honduras 11/10/2022).'' [47]

[32] The TPS designation of Honduras was statutorily automatically extended for 6 months (from January 6, 2018, through July 5, 2018) after the Secretary of Homeland Security did not make a determination on Honduras's designation 60 days prior to the previous expiration (January 5, 2018). Subsequently, on June 5, 2018, the Secretary published a determination to terminate TPS for Honduras, effective January 5, 2020.

The Food and Agriculture Organization of the United Nations (FAO) noted in April 2022 that ''[t]he number of acutely food-insecure people in Honduras has doubled in just over a year, due to the combined impact of COVID–19, poverty and climate-related disasters.'' [48] The United Nations estimated a similar impact, reporting that in early 2022, 2.8 million people in Honduras were in need of humanitarian assistance.[49] Recent reports indicate that food insecurity is worsening, with at least 2.6 million people in Crisis (IPC Phase 3) [50] or worse levels of food insecurity, which is more than a quarter of the population.[51] Environmental events have been a driving factor for food insecurity by ''affecting food production and availability and increasing staple food prices in markets,'' such that Honduras faced a ''Crisis (IPC Phase 3) food insecurity.'' [52]

In June 2022, *The Guardian* reported that pneumonia was ''one of the leading causes of child death in Honduras,'' and deaths of children ''caused by the disease are strongly linked to malnutrition, lack of safe water and sanitation, and inadequate access to healthcare.'' [53] Honduras reported the highest number of severe dengue fever cases in the Americas in both 2020 [54] and 2021.[55] In 2020, the risks of major infectious diseases including typhoid fever, dengue fever and malaria were also rated as high.[56] According to the U.S. Embassy in Honduras, ''medical care in Honduras varies greatly in quality and availability.'' [57] Outside of Honduras's two major cities, it is ''inadequate to address complex situations,'' ''facilities for advanced surgical procedures are not available,'' and ''ambulance services are limited in major cities and almost non-existent elsewhere.'' [58]

''Honduras is one of the most unequal, corrupt and violent countries in Latin America, where a handful of politically powerful clans control the economy while more than two-thirds of the population live in poverty.'' [59] In 2021, Honduras ''saw some of its worst political violence in the run-up to November's presidential elections . . . [in which] 68 candidates in various local and national races were killed.'' [60] The United States indicted the out-going president of Honduras, Juan Orlando Hernandez, (president of Honduras from 2014 through January 2022),[61] on federal drug and arms trafficking charges shortly after he left office,[62] and Honduras extradited him to the United States in April 2022 to face the charges.[63] The current president who took office on January 27, 2022, inherited the remnants of what U.S. prosecutors have called a ''narco state.'' [64]

In recent years, Honduras has been plagued by staggering levels of crime and violence—ranking as the murder capital of the world in 2012 and 2013.[65] Gangs that originated in the United States are engaged in violent fighting in Honduras. They ''have laid siege to communities'' and ''have plunged the country into a state of crisis''—''govern[ing] much of daily life for residents living in their areas of control, [as] stand-ins for a corrupt and ineffectual government.'' [66] A UNHCR representative stated in November 2021 that gangs in Honduras ''took advantage of the extreme vulnerability of victims of the hurricanes to tighten their control, imposing restrictions on movements [. . .] For many who were displaced by the storms, going back could be dangerous.'' [67] Honduras was Central America's most deadly country in 2021, with homicides slightly outpacing 2020, and falling below rates in 2019.[68]

In 2020, internally displaced Hondurans ''represented almost 80 percent of the internally displaced population in Central America and Mexico.'' [69] The United Nations Office for the Coordination of Humanitarian Affairs (UNOCHA) reported that

[69] World Report 2022—Honduras, Human Rights Watch, Jan. 13, 2022, available at: *https://www.hrw.org/world-report/2022/country-chapters/honduras#dbcb23.*

''Honduras registered 937,000 new displacements, ranking it among the top four countries in Latin America and the Caribbean for new disaster-triggered displacements . . . surpass[ing] countries such as South Sudan in the number of new displacements due to disasters and conflicts in 2020.'' [70] The United Nations High Commissioner for Refugees (UNHCR) reported in July 2022 that ''58,000 families abandon their homes in Honduras annually, being internally displaced due to the violence crisis in the country.'' [71]

In summary, Honduras's slow recovery after Hurricane Mitch and more recent environmental disasters, including hurricanes, tropical storms, flooding and heavy rain, severe drought, and mosquito-borne illness, continue to disrupt living conditions and render Honduras temporarily unable to handle the return of those granted TPS under the 1999 designation and are currently residing in the United States. Additionally, since the 2018 extension of TPS for Honduras,[72] violence, social and political concerns have adversely impacted living conditions and hindered recovery from environmental disasters in Honduras.

Based upon this review and after consultation with appropriate U.S. Government agencies, the Secretary has determined that:

- At the time the Secretary's determination to terminate Honduras's designation for TPS was announced on June 5, 2018, conditions in Honduras continued to support the country's designation for TPS based on environmental disaster grounds; therefore, the termination should be rescinded, and such rescission is timely given that the termination has not yet gone into effect. *See* INA section 244(b)(1)(B), 8 U.S.C. 1254a(b)(1)(B).
- The conditions supporting Honduras's designation for TPS continue to be met. *See* INA section 244(b)(3)(A) and (C), 8 U.S.C. 1254a(b)(3)(A) and (C).
- There has been an earthquake, flood, drought, epidemic, or other environmental disaster in Honduras resulting in a substantial, but temporary, disruption of living conditions in the area affected; Honduras is unable, temporarily, to handle adequately the return of its nationals; and Honduras officially requested designation of TPS. *See* INA section 244(b)(1)(B)(i), 8 U.S.C. 1254a(b)(1)(B)(i);
- The designation of Honduras for TPS should be extended for an 18-month period, beginning on January 6, 2024, and ending on July 5, 2025. *See* INA section 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C).

Notice of the Rescission of TPS Termination and Extension of the TPS Designation of Honduras

Pursuant to my lawful authorities, including under sections 103(a) and 244 of the INA, I am hereby rescinding the termination of the TPS designation of Honduras announced in the **Federal Register** at 83 FR 26074 (June 5, 2018). Due to this rescission and pursuant to section 244(b)(3)(C) of the INA as well as the court order in *Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019), the TPS designation of Honduras has continued to exist since July 5, 2018, without a standing secretarial determination as to whether TPS should be extended or terminated. TPS beneficiaries under the designation, whose TPS has not been finally withdrawn for individual ineligibility, therefore have continued to maintain their TPS since July 5, 2018.

By the authority vested in me as Secretary under INA section 244, 8 U.S.C. 1254a, I have determined, after consultation with the appropriate U.S. Government agencies, the statutory conditions supporting Honduras's designation for TPS on the basis of an environmental disaster continue to be met. *See* INA sections 244(b)(1)(B), 244(b)(3)(A); 8 U.S.C. 1254a(b)(1)(B), 1254a(b)(3)(A). On the basis of this determination, I am extending the existing designation of Honduras for TPS for 18 months, beginning on January 6, 2024, and ending on July 5, 2025. *See* INA section 244(b)(1)(B), (b)(3)(C); 8 U.S.C. 1254a(b)(1)(B), (b)(3)(C). Individuals holding TPS under the designation of Honduras may file to reregister for TPS under the procedures announced in this Notice if they wish to continue their TPS under this 18-month extension.

Alejandro N. Mayorkas,
Secretary, U.S. Department of Homeland Security.

Eligibility and Employment Authorization for TPS

Required Application Forms and Application Fees to Re-Register for TPS:

To re-register for TPS based on the designation of Honduras, you must submit a Form I–821, Application for Temporary Protected Status during the 60-day re-registration period that runs November 6, 2023 through January 5, 2024. There is no Form I–821 fee for re-registration. *See* 8 CFR 244.17. You may be required to pay the biometric services fee. If you can demonstrate an inability to pay the biometric services fee, you may request to have the fee waived. Please see additional information under the ''Biometric Services Fee'' section of this notice.

Individuals who have a Honduras TPS application (Form I–821) that was still pending as of June 21, 2023 do not need to file the application again. If USCIS approves an individual's Form I–821, USCIS will grant the individual TPS through July 5, 2025.

Required Application Forms and Application Fees To Obtain an EAD

Every employee must provide their employer with documentation showing they have a legal right to work in the United States. TPS beneficiaries are authorized to work in the United States and are eligible for an EAD which proves their employment authorization. If you have an existing EAD issued under the TPS designation of Honduras that has been auto-extended through June 30, 2024 by the notice published at 87 FR 68717, you may continue to use that EAD through that date. If you want to obtain a new EAD valid through July 5, 2025, you must file an Application for Employment Authorization (Form I–765) and pay the Form I–765 fee (or request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver).

You may, but are not required to, submit Form I–765, Application for Employment Authorization, with your Form I–821 re-registration application. If you do not want a new EAD now, you can request one later by filing your I–765 and paying the fee (or requesting a fee waiver) at that time, provided you have TPS or a pending TPS application. If you have TPS and only a pending Form I–765, you must file the Form I–821 to re-register for TPS or risk having

[70] *Honduras: Humanitarian Response Plan (August 2021–December 2022),* United Nations Office for the Coordination of Humanitarian Affairs (UNOCHA), Nov. 19, 2021, available at: *https://reliefweb.int/report/honduras/honduras-humanitarian-response-plan-august-2021-december-2022.*

[72] The TPS designation of Honduras was statutorily automatically extended for 6 months (from January 6, 2018, through July 5, 2018) after the Secretary of Homeland Security did not make a determination on Honduras's designation 60 days prior to the previous expiration (January 5, 2018). Subsequently, on June 5, 2018, the Secretary published a determination to terminate TPS for Honduras, effective January 5, 2020.

your TPS withdrawn for failure to reregister without good cause.

Information About Fees and Filing

USCIS offers the option to applicants for TPS under Honduras's designation to file Form I–821 and related requests for EADs online or by mail. When filing a TPS application, applicants can also request an EAD by submitting a completed Form I–765, with their Form I–821.

Online filing: Form I–821 and I–765 are available for concurrent filing online.[73] To file these forms online, you must first create a USCIS online account.[74] However, if you are requesting a fee waiver, you cannot submit the applications online. You will need to file paper versions of the fee waiver request and the form for which you are requesting the fee waiver.

Mail filing: Mail your application for TPS to the proper address in Table 1.

Table 1—Mailing Addresses

Mail your completed Form I–821, Application for Temporary Protected Status and Form I–765, Application for Employment Authorization, Form I–912, Request for Fee Waiver, if applicable, and supporting documentation to the proper address in Table 1.

TABLE 1—MAILING ADDRESSES

If you live in:	Then mail your application to:
• Alabama • Alaska • American Samoa • Arizona • Arkansas • California • Colorado • Guam • Hawaii • Idaho • Kentucky • Louisiana • Mississippi • Montana • Nevada • New Mexico • North Carolina • Northern Mariana Islands • Oklahoma • Oregon • Puerto Rico • Tennessee • Texas • Utah • Virgin Islands • Virginia • Washington • West Virginia • Wyoming.	USCIS Phoenix Lockbox. *U.S. Postal Service (USPS):* USCIS, Attn: TPS Honduras, P.O. Box 21800, Phoenix, AZ 85036–1800. *FedEx, UPS, or DHL:* USCIS, Attn: TPS Honduras (Box 21800), 2108 E. Elliot Rd., Tempe, AZ 85284–1806.

TABLE 1—MAILING ADDRESSES—Continued

If you live in:	Then mail your application to:
• South Dakota • Vermont • Wisconsin	

If you were granted TPS by an immigration judge (IJ) or the Board of Immigration Appeals (BIA) and you wish to request an EAD, please mail your Form I–765 application to the appropriate mailing address in Table 1. When you are requesting an EAD based on an IJ/BIA grant of TPS, please include a copy of the IJ or BIA order granting you TPS with your application. This will help us verify your grant of TPS and process your application.

Supporting Documents

The filing instructions on the Form I–821 list all the documents needed to establish eligibility for TPS. You may also find information on the acceptable documentation and other requirements for applying (*i.e.,* registering) for TPS on the USCIS website at *https://www.uscis.gov/tps* under ''Honduras.''

Travel

TPS beneficiaries may also apply for and be granted travel authorization as a matter of discretion. You must file for travel authorization if you wish to travel outside of the United States. If granted, travel authorization gives you permission to leave the United States and return during a specific period. To request travel authorization, you must file Form I–131, Application for Travel Document, available at *https://www.uscis.gov/i-131.* You may file Form I–131 together with your Form I–821 or separately. When filing the Form I–131, you must:

- Select Item Number 1.d. in Part 2 on the Form I–131; and
- Submit the fee for the Form I–131, or request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver.

If you are filing Form I–131 together with Form I–821, send your forms to the address listed in Table 1. If you are filing Form I–131 separately based on a pending or approved Form I–821, send your form to the address listed in Table 2 and include a copy of Form I–797 for the approved or pending Form I–821.

TABLE 2—MAILING ADDRESSES

If you are . . .	Mail to . . .
Filing Form I–131 together with a Form I–821, Application for Temporary Protected Status	The address provided in Table 1.
Filing Form I–131 based on a pending or approved Form I–821, and you are using the U.S. Postal Service (USPS): You must include a copy of the receipt notice (Form I–797 or I–797C) showing we accepted or approved your Form I–821.	USCIS, Attn: I–131 TPS, P.O. Box 660167, Dallas, TX 75266–0867.
Filing Form I–131 based on a pending or approved Form I–821, and you are using FedEx, UPS, or DHL: You must include a copy of the receipt notice (Form I–797 or I–797C) showing we accepted or approved your Form I–821.	USCIS, Attn: I–131 TPS, 2501 S State Hwy. 121 Business, Ste. 400, Lewisville, TX 75067.

Biometric Services Fee for TPS

Biometrics (such as fingerprints) are required for all applicants 14 years of age and older. Those applicants must submit a biometric services fee. As previously stated, if you are unable to pay the biometric services fee, you may request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver. For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* Fees for Form I–765 and biometric services are also described in 8 CFR 103.7(b)(1) (Oct. 1, 2020). If necessary, you may be required to visit an Application Support Center to have your biometrics captured. For additional information on the USCIS biometric screening process, please see the USCIS Customer Profile Management Service Privacy Impact Assessment, available at *https://www.dhs.gov/publication/dhsuscispia-060-customer-profile-management-service-cpms.*

Refiling a TPS Re-Registration Application After Receiving a Denial of a Fee Waiver Request

You should file as soon as possible within the 60-day re-registration period so USCIS can process your application and issue your EAD promptly, if one has been requested. Properly filing early will also allow you to have time to refile your application before the deadline, should USCIS deny your fee waiver request. The fee waiver denial notice will contain specific instructions about resubmitting your application. However, you are urged to refile within 45 days of the date on any USCIS fee waiver denial notice, if possible. *See* INA section 244(c)(3)(C); 8 U.S.C. 1254a(c)(3)(C); 8 CFR 244.17(b). For more information on good cause for late re-registration, visit the USCIS TPS web page at *www.uscis.gov/tps.*

Note: A re-registering TPS beneficiary age 14 and older must pay the biometric services fee (but not the Form I–821 fee), or request a fee waiver, when filing a TPS re-registration application. As discussed above, if you decide to wait to request an EAD, you do not have to file the Form I–765 or pay the associated Form I–765 fee (or request a fee waiver) at the time of re-registration. You may wait to seek an EAD until after USCIS has approved your TPS re-registration application or at any later date you decide you want to request an EAD. To re-register for TPS, you only need to file the Form I–821 with the biometrics services fee, if applicable, (or request a fee waiver).

General Employment-Related Information for TPS Applicants and Their Employers

How can I obtain information on the status of my TPS application and EAD request?

To get case status information about your TPS application, as well as the status of your TPS-based EAD request, you can check Case Status Online at

uscis.gov, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.* If your Form I–765 has been pending for more than 90 days, and you still need assistance, you may ask a question about your case online at *https://egov.uscis.gov/e-request/Intro.do* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

When hired, what documentation may I show to my employer as evidence of identity and employment authorization when completing Form I–9?

You can find the Lists of Acceptable Documents on Form I–9, Employment Eligibility Verification, as well as the Acceptable Documents web page at *https://www.uscis.gov/i-9-central/acceptable-documents.* Employers must complete Form I–9 to verify the identity and employment authorization of all new employees. Within three days of hire, employees must present acceptable documents to their employers as evidence of identity and employment authorization to satisfy Form I–9 requirements.

You may present any document from List A (which provides evidence of both identity and employment authorization) or one document from List B (which provides evidence of your identity) together with one document from List C (which provides evidence of employment authorization), or you may present an acceptable receipt as described in the Form I–9 Instructions. Employers may not reject a document based on a future expiration date. You can find additional information about Form I–9 on the I–9 Central web page at *https://www.uscis.gov/I-9Central.* An EAD is an acceptable document under List A.

If I have an EAD based on another immigration status, can I obtain a new TPS-based EAD?

Yes, if you are eligible for TPS, you can obtain a new TPS-based EAD, regardless of whether you have an EAD or work authorization based on another immigration status. If you want to obtain a new TPS-based EAD valid through July 5, 2025, then you must file Form I–765, Application for Employment Authorization, and pay the associated fee (unless USCIS grants your fee waiver request).

Can my employer require that I provide any other documentation such as evidence of my status or proof of my Honduran citizenship or a Form I–797C showing that I registered for TPS for Form I–9 completion?

No. When completing Form I–9, employers must accept any documentation you choose to present from the Form I–9 Lists of Acceptable Documents that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers need not reverify List B identity documents. Employers may not request proof of Honduran citizenship or proof of registration for TPS when completing Form I–9 for new hires or reverifying the employment authorization of current employees. Refer to the ''Note to Employees'' section of this **Federal Register** notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or immigration status, or your national origin. Employers can refer to the compliance notice that DHS published on November 16, 2022, for information on how to complete the Form I–9 with TPS EADs that DHS extended through June 30, 2024.[75]

Note to All Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This **Federal Register** notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (Form I–9 and E-Verify), employers may call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Employer Hotline at 800–255–8155 (TTY 800–237–2515). IER offers language interpretation in numerous languages. Employers may also email IER at *IER@usdoj.gov.*

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls in English, Spanish and many other languages. Employees or job applicants may also call the IER Worker Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based on citizenship, immigration status, or national origin, including discrimination related to Form I–9 and E-Verify. The IER Worker Hotline provides language interpretation in numerous languages.

To comply with the law, employers must accept any document or combination of documents from the Lists of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt as described in the Form I–9 Instructions. Employers may not require extra or additional documentation beyond what is required for Form I–9 completion. Further, employers participating in E-Verify who receive an E-Verify case result of ''Tentative Nonconfirmation'' (mismatch) must promptly inform employees of the mismatch and give such employees an opportunity to take action to resolve the mismatch. A mismatch result means that the information entered into E-Verify from Form I–9 differs from records available to DHS.

Employers may not terminate, suspend, delay training, withhold or lower pay, or take any adverse action against an employee because of a mismatch while the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result is received when E-Verify cannot confirm an employee's employment eligibility. An employer may terminate employment based on a case result of FNC. Work-authorized employees who receive an FNC may call USCIS for assistance at 888–897–7781 (TTY 877–875–6028). For more information about E-Verify-related discrimination or to report an employer for discrimination in the E-Verify process based on citizenship, immigration status, or national origin, contact IER's Worker Hotline at 800–255–7688 (TTY 800–237–2515). Additional information about proper nondiscriminatory Form I–9 and E-Verify procedures is available on the IER website at *https://www.justice.gov/crt/immigrant-and-employee-rights-section* and the USCIS and E-Verify websites at *https://www.uscis.gov/i-9-central* and *https://www.e-verify.gov.*

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles)

This **Federal Register** Notice does not invalidate the compliance notice DHS issued on November 16, 2022, which

[75] *Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal,* 87 FR 68717 (Nov. 16, 2022).

extended the validity of certain TPS documentation through June 30, 2024, and does not require individuals to present a Form I–797, Notice of Action. While Federal Government agencies must follow the guidelines laid out by the Federal Government, State and local government agencies establish their own rules and guidelines when granting certain benefits. Each state may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are a TPS beneficiary, show you are authorized to work based on TPS or other status, or that may be used by DHS to determine if you have TPS or another immigration status. Examples of such documents are:

- Your current EAD with a TPS category code of A–12 or C–19, even if your country of birth noted on the EAD does not reflect the TPS designated country of Honduras; or
- Your Form I–94, Arrival/Departure Record or Form I–797, Notice of Action, as shown in the **Federal Register** notice published at 87 FR 68717.

Check with the government agency requesting documentation regarding which document(s) the agency will accept. Some state and local government agencies use the SAVE program to confirm the current immigration status of applicants for public benefits.

While SAVE can verify that an individual has TPS, each state and local government agency's procedures govern whether they will accept an unexpired EAD, Form I–797, Form I–797C, or Form I–94. It may also assist the agency if you:

a. Give the agency a copy of the relevant **Federal Register** notice listing the TPS-related document, including any applicable auto-extension of the document, in addition to your recent TPS-related document with your A-number, USCIS number or Form I–94 number;

b. Explain that SAVE will be able to verify the continuation of your TPS using this information; and

c. Ask the agency to initiate a SAVE query with your information and follow through with additional verification steps, if necessary, to get a final SAVE response verifying your TPS.

You can also ask the agency to look for SAVE notices or contact SAVE if they have any questions about your immigration status or any automatic extension of TPS-related documentation. In most cases, SAVE provides an automated electronic response to benefit-granting agencies within seconds, but occasionally verification can be delayed.

You can check the status of your SAVE verification by using CaseCheck at *https://save.uscis.gov/casecheck/.* CaseCheck is a free service that lets you follow the progress of your SAVE verification case using your date of birth and one immigration identifier number (A-number, USCIS number, or Form I–94 number) or Verification Case Number. If an agency has denied your application based solely or in part on a SAVE response, the agency must offer you the opportunity to appeal the decision in accordance with the agency's procedures. If the agency has received and acted on or will act on a SAVE verification and you do not believe the SAVE response is correct, the SAVE website, *www.uscis.gov/save,* has detailed information on how to correct or update your immigration record, make an appointment, or submit a written request to correct records.

BILLING CODE 9111–97–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0003]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Application To Extend/Change Nonimmigrant Status

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until July 21, 2023.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be submitted via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2007–0038. All submissions received must include the OMB Control Number 1615–0003 in the body of the letter, the agency name and Docket ID USCIS–2007–0038.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, Telephone number (240) 721–3000 (This is not a toll-free number; comments are not accepted via telephone message.). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *http://www.uscis.gov,* or call the USCIS Contact Center at (800) 375–5283; TTY (800) 767–1833.

SUPPLEMENTARY INFORMATION:

Comments

The information collection notice was previously published in the **Federal Register** on January 30, 2023, at 88 FR 5903, allowing for a 60-day public comment period. USCIS did receive 5 comments in connection with the 60-day notice.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2007–0038 in the search box. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection Request:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Application to Extend/Change Nonimmigrant Status.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–539; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. This form will be used for nonimmigrants to apply for an extension of stay, for a change to another nonimmigrant classification, or for obtaining V nonimmigrant classification.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection Form I–539 (paper) is 217,000 and the estimated hour burden per response is 1.85 hours, the estimated total number of respondents for the information collection I–539 (electronic) is 93,000 and the estimated hour burden per response is 1 hour; and the estimated total number of respondents for the information collection I–539A is 114,044.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 534,365 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $69,874,000.

Dated: June 14, 2023.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0050]

Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: Request for Hearing on a Decision in Naturalization Proceedings Under Section 336

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until August 21, 2023.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0050 in the body of the letter, the agency name and Docket ID USCIS–2007–0020. Submit comments via the Federal eRulemaking Portal website at *https://www.regulations.gov* under e-Docket ID number USCIS–2007–0020.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2007–0020 in the search box. (4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Request for Hearing on a Decision in

Naturalization Proceedings under Section 336.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* N–336; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. Form N–336 is used by an individual whose Form N–400, Application for Naturalization was denied, to request a hearing before an immigration officer on the denial of the N–400. USCIS uses the information submitted on Form N–336 to locate the requestor's file and schedule a hearing in the correct jurisdiction. It allows USCIS to determine if there is an underlying Form N–400, Application for Naturalization that was denied, to warrant the filing of Form N–336. The information collected also allows USCIS to determine if a member of the U.S. armed forces has filed the appeal.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection N–336 (paper filed) is 3,788 and the estimated hour burden per response is 2.75 hours; the estimated total number of respondents for the information collection N–336 (filed online) is 1,263 and the estimated hour burden per response is 2.5 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 13,575 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $2,601,265.

Dated: June 14, 2023.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

U.S. Citizenship and Immigration Services

[CIS No. 2734–22; DHS Docket No. USCIS–2015–0003]

RIN 1615–ZB74

Reconsideration and Rescission of Termination of the Designation of Nepal for Temporary Protected Status; Extension of the Temporary Protected Status Designation for Nepal

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice of Reconsideration and Rescission of Termination of the Designation of Nepal for Temporary Protected Status (TPS) and Notice of Extension of TPS Designation for Nepal.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security (Secretary) is rescinding the previous termination of the designation of Nepal for TPS, which was published on May 22, 2018 and extending the designation of Nepal for Temporary Protected Status (TPS) for 18 months, beginning on December 25, 2023, and ending on June 24, 2025. This extension allows existing TPS beneficiaries to retain TPS through June 24, 2025, so long as they otherwise continue to meet the eligibility requirements for TPS. Existing TPS beneficiaries who wish to extend their status through June 24, 2025, must re-register during the 60-day re-registration period as described in this notice.

DATES: The *Rescission of Termination of the Designation of Nepal for TPS* is effective took effect June 9, 2023.

Extension of Designation of Nepal for TPS: The 18-month extension of TPS for Nepal begins on December 25, 2023 and will remain in effect through June 24, 2025. The extension impacts existing beneficiaries of TPS under the designation of Nepal.

Re-registration: The 60-day re-registration period for existing beneficiaries runs from October 24, 2023 through December 23, 2023.

FOR FURTHER INFORMATION CONTACT:

- You may contact René Cutlip-Mason, Chief, Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital Gateway Drive, Camp Springs, MD 20746, or by phone at 800–375–5283.
- For further information on TPS, including guidance on the registration process and additional information on eligibility, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* You can find specific information about Nepal's TPS designation by selecting Nepal from the menu on the left side of the TPS web page.
- If you have additional questions about TPS, please visit *uscis.gov/tools.* Our online virtual assistant, Emma, can answer many of your questions and point you to additional information on our website. If you are unable to find your answers there, you may also call our USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).
- Applicants seeking information about the status of their individual cases may check Case Status Online, available on the USCIS website at *uscis.gov*, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.*
- Further information will also be available at local USCIS offices upon publication of this notice.

Purpose of This Action (TPS)

Through this notice, DHS announces the reconsideration and rescission of the termination of the designation of Nepal for TPS, and the Secretary's decision to extend Nepal's designation for TPS for 18 months from December 25, 2023 through June 24, 2025. This notice also

sets forth procedures necessary for nationals of Nepal (or individuals having no nationality who last habitually resided in Nepal) to re-register for TPS and to apply for renewal of their EADs with USCIS.

Re-registration is limited to individuals who have previously registered or reregistered for TPS under Nepal's designation, whose applications were granted, and whose TPS has not been withdrawn for individual ineligibility for the benefit. Failure to re-register properly within the 60-day re-registration period may result in the withdrawal of your TPS following appropriate procedures. *See* 8 CFR 244.14.

For individuals who have already been granted TPS under Nepal's designation, the 60-day re-registration period runs from October 24, 2023 through December 23, 2023. USCIS will issue new EADs with a June 24, 2025 expiration date to eligible Nepalese TPS beneficiaries who timely re-register and apply for EADs.

Individuals who have a Nepal TPS application (Form I–821) and Application for Employment Authorization (Form I–765) that were still pending as of June 21, 2023 do not need to file either application again. If USCIS approves an individual's pending Form I–821, USCIS will grant the individual TPS through June 24, 2025. Similarly, if USCIS approves a pending TPS-related Form I–765 filed in connection with a Form I–821, USCIS will issue the individual a new EAD that will be valid through the same date. If you have TPS and only a pending Form I–765, you must file the Form I–821 to reregister for TPS or risk having your TPS withdrawn for failure to timely reregister without good cause. There are currently approximately 14,500 beneficiaries under Nepal's TPS designation who may be eligible to continue their TPS under the extension announced in this Notice.

What is Temporary Protected Status (TPS)?

- TPS is a temporary immigration status granted to eligible nationals of a foreign state designated for TPS under the INA, or to eligible individuals without nationality who last habitually resided in the designated foreign state before arrival in the United States, regardless of their country of birth.
- During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, and are authorized to obtain EADs so long as they continue to meet the requirements of TPS.
- TPS beneficiaries may also apply for and be granted travel authorization as a matter of DHS discretion.
- To qualify for TPS, beneficiaries must meet the eligibility standards at INA section 244(c)(1)–(2), 8 U.S.C. 1254a(c)(1)–(2).
- When the Secretary terminates a foreign state's TPS designation, beneficiaries return to one of the following:
  - The same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or terminated); or
  - Any other lawfully obtained immigration status or category they received while registered for TPS, as long as it is still valid beyond the date TPS terminates.

When was Nepal designated for TPS?

On June 24, 2015, former Secretary of Homeland Security Jeh Johnson designated Nepal for TPS on environmental disaster grounds as a result of the magnitude 7.8 earthquake that occurred on April 25, 2015 that resulted in a substantial disruption of living conditions, at the request of the country's government, and because Nepal was temporarily unable to adequately handle the return of its nationals. *See Designation of Nepal for Temporary Protected Status,* 80 FR 36346 (June 24, 2015). On October 26, 2016, former Secretary Johnson announced an 18-month extension of Nepal's TPS designation, effective December 25, 2016 through June 24, 2018.[1]

Following the statutorily required review of the country conditions, former Secretary Kirstjen M. Nielsen announced the termination of TPS for Nepal, with an effective date of June 24, 2019. *See* Termination of the Designation of Nepal for Temporary Protected Status, 83 FR 23705 (May 22, 2018); *see also* INA secs. 244(b)(3)(A) and (B), 8 U.S.C. 1254a(b)(3)(A) and (B). As discussed below, this termination has been the subject of litigation and a court order that has prevented the termination from taking effect.

Litigation Background Regarding Termination of Certain TPS Designations

In addition to Nepal, in 2017–2018, TPS was also terminated for five other countries by the Secretary or Acting Secretary: Sudan, El Salvador, Haiti, Nicaragua, and Honduras.[2] Lawsuits challenging the terminations were filed in the U.S. District Court for the Northern District of California in *Ramos* v. *Nielsen,* 326 F. Supp. 3d 1075 (N.D. Cal. 2018), and *Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019), and in the U.S. District Court for the Eastern District of New York in *Saget* v. *Trump,* 375 F. Supp 3d 280 (E.D.N.Y. 2019).[3] In *Ramos,* the district court granted a preliminary injunction enjoining the terminations of TPS for El Salvador, Haiti, Sudan, and Nicaragua and directed DHS to maintain the *status quo* and to continue the TPS and TPS-related documentation of affected TPS beneficiaries under those countries' designations. The U.S. Government appealed, and a three-judge panel vacated the injunction. The appellate court, however, has granted rehearing *en banc* of the panel decision, vacating the panel's decision.[4] The district court's preliminary injunction thus remains in place. In *Bhattarai*—which challenged the determination to terminate TPS for Nepal—the district court has stayed proceedings until the *Ramos* appeal is decided and approved the parties' stipulation for the

[1] *Extension of the Designation of Nepal for Temporary Protected Status,* 81 FR 74470 (October 26, 2016).

[2] Sudan (82 FR 47228) (Oct. 11, 2017), El Salvador (83 FR 2654) (Jan. 18, 2018), Haiti (83 FR 2648) (Jan. 18, 2018), Nicaragua (82 FR 59636) (Dec. 15, 2017), and Honduras (83 FR 26074) (June 05, 2018).

[3] See *Ramos* v. *Nielsen,* 336 F. Supp. 3d 1075 (N.D. Cal. 2018), *vacated,* 975 F.3d 872 (9th Cir. 2020), *reh'g en banc granted,* 59 F.4th 1010 (Feb. 10, 2023) (No. 18–16981) (''*Ramos*'').; *Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019) (staying proceedings until *Ramos* appeal decided and approved parties' stipulation for continued TPS and issuance of TPS-related documentation to eligible, affected beneficiaries of TPS for Honduras and Nepal during the stay and pendency of the appeal). In 2019, the U.S. District Court for the Eastern District of New York also enjoined the termination of the 2011 TPS designation for Haiti in *Saget* v. *Trump,* 375 F. Supp. 3d 280 (E.D.N.Y. 2019), and DHS cited to that order in previous notices continuing the affected beneficiaries' TPS and documentation. See, *e.g.,* 86 FR 50725, 50726 (Sept. 10, 2021). However, the *Saget* case was dismissed upon the court's approval of the parties' joint Stipulation of Dismissal for mootness following the Secretary's new 18-month designation of Haiti for TPS on August 3, 2021, and DHS' continuation of existing beneficiaries' TPS and related documentation under the *Ramos* injunction through Dec. 31, 2022. See id., Order approving Stipulation of Dismissal, dated Oct. 15, 2021. Other litigation was filed relating to the terminations of El Salvador, Honduras, and Haiti. A Haiti-related case, *NAACP* v. *U.S. Dept. of Homeland Security,* No. 1:18–cv–00239 (D. Md., Jan. 24, 2018) was dismissed on May 22, 2021, subsequent to the same DHS designation. An El Salvador related case, *Casa de Maryland.,* v. *Biden,* No. GJH–18–00845 (D. Md., Mar. 23, 2018), is currently stayed until April 17, 2023. *Centro Presente* v. *Biden,* No. 1:18–cv–10340 (D. Mass, July 23, 2018), relating to El Salvador, Haiti, and Honduras, is currently stayed until April 14, 2023.

[4] *See Ramos* v. *Wolf,* 975 F.3d 872 (9th Cir. 2020), *petition for reh'g en banc granted,* 59 F.4th 1010 (Feb. 10, 2023) (No. 18–16981) (''*Ramos*'').

continuation of TPS and TPS-related documentation for eligible, affected beneficiaries of TPS for Honduras and Nepal during the stay and pendency of the *Ramos* appeal. In *Saget,* the district court granted a preliminary injunction enjoining termination of TPS for Haiti, and the Government appealed. However, following the new TPS designation of Haiti in August 2021, the district court dismissed the lawsuit based on the parties' stipulation to dismissal.[5] Beneficiaries under the TPS designations for El Salvador, Nepal, Sudan, Haiti, Honduras, and Nepal will retain their TPS while the preliminary injunction in *Ramos* remains in effect, and for at least 120 days thereafter, provided that their TPS is not withdrawn because of individual ineligibility.[6]

DHS has taken actions to ensure its continued compliance with the court orders in *Ramos* and *Bhattarai.* DHS has published periodic notices to continue TPS and extend the validity of TPS-related documentation previously issued to beneficiaries under the TPS designations for El Salvador, Haiti, Nepal, Sudan, Honduras, and Nepal.[7] The most recent such notice continued TPS and extended the TPS-related documents specified in the notice through June 30, 2024.[8] These extensions apply where the TPS beneficiary properly filed for re-registration during either the most recent DHS-announced registration period for their country, or any applicable previous DHS-announced re-registration periods for the beneficiary's country, or has a re-registration application that remains pending.[9] Although the notice published at 87 FR 68717 remains valid, individuals who wish to remain eligible for TPS under the extension of TPS for Nepal announced in this notice through June 24, 2025 and any potential future extensions must apply for re-registration in accordance with the procedures announced in this notice.[10] Failure to timely re-reregister without good cause is a ground for TPS withdrawal. *See* INA section 244(c)(3)(C), 8 U.S.C. 1254a(c)(3)(C); 8 CFR 244.17.

What authority does the Secretary have to reconsider and rescind the termination of TPS for Nepal?

Section 244(b)(1) of the INA, 8 U.S.C. 1254a(b)(1), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist.[11] The decision to designate any foreign state (or part thereof) is a discretionary decision, and there is no judicial review of any determination with respect to the designation, termination, or extension of a designation. *See* INA section 244(b)(5)(A); 8 U.S.C. 1254a(b)(5)(A).

At least 60 days before the expiration of a foreign state's TPS designation, the Secretary, after consultation with appropriate U.S. Government agencies, must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA section 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA section 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). If the Secretary does not determine that the foreign state no longer meets the conditions for TPS designation, the designation is extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA section 244(b)(3)(A), (C); 8 U.S.C. 1254a(b)(3)(A), (C).

On May 22, 2018, the Secretary of Homeland Security issued notice of her decision that Nepal no longer continued to meet the conditions for TPS designation and terminated TPS for Nepal, indicating that the conditions for Nepal's 2015 designation for TPS on the basis of environmental disaster due to the damage caused by the 2015 earthquake were no longer met.[12] The Secretary also announced an orderly transition period of 12 months, such that the termination was set to go into effect on June 24, 2019. However, as noted above plaintiffs in *Bhattarai* filed suit challenging the termination decisions for Nepal and Honduras. On March 12, 2019, the proceedings were stayed and the parties stipulated that the termination decisions would not go into effect during the pendency of the *Ramos* appeal of similar issues and for at least 120 days thereafter. The district court also approved the parties' stipulation that TPS and TPS-related documentation of affected beneficiaries of the Nepal and Honduras TPS designations would continue under terms similar to those applied to the *Ramos*-covered beneficiaries. The order to stay proceedings and approval of the stipulation remain in effect.[13]

DHS has since issued a series of **Federal Register** notices continuing TPS and TPS-related documentation for affected TPS beneficiaries, with the most recent continuation notice effective through until June 30, 2024.[14] As a result, the termination of the TPS designation for Nepal has never gone into effect, and TPS beneficiaries under that designation have retained their TPS, unless it has been individually

[5] *See Saget* v. *Trump,* 375 F. Supp 3d 280 (E.D.N.Y. 2019) and Order approving Stipulation of Dismissal, dated Oct. 15, 2021.

[6] As noted, Haiti was newly designated for TPS on August 3, 2021 for 18 months. *See Designation of Haiti for Temporary Protected Status,* 86 FR 41863 (Aug. 3, 2021). On April 19, 2022, the Secretary also newly designated Sudan TPS. *See Designation of Sudan for Temporary Protected Status,* 87 FR 23202 (Apr. 19, 2022). Those designations cover all Haitian and Sudanese nationals who were eligible for TPS under the Haiti and Sudan TPS designations that were terminated in 2018 and 2017, respectively.

[7] 83 FR 54764 (Oct. 31, 2018); 84 FR 7103 (Mar. 1, 2019); 84 FR 20647(May 10, 2019) (correction notice issued at 84 FR 23578 (May 22, 2019)); 84 FR 59403 (Nov. 4, 2019); 85 FR 79208 (Dec. 9, 2020); and 86 FR 50725 (Sept. 10, 2021) (correction notice issued at 86 FR 52694 (Sept. 22, 2021).

[8] *Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations of El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal,* 87 FR 68717 (Nov. 16, 2022).

[9] *Id.,* at 68719 note 5 (listing acceptable re-registration periods for each of the 6 countries).

[10] Through the re-registration process, which is generally conducted every 12 to 18 months while a foreign state is designated for TPS, USCIS determines whether each TPS beneficiary is continuing to maintain individual eligibility for TPS, including but not limited to the requirements related to disqualifying criminal or security issues. Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal, 87 FR 68717, 68720 (Nov. 16, 2022) (noting potential future action for Nepal TPS beneficiaries may include a requirement to re-register).

[11] Although the text of INA section 244(b)(1) continues to ascribe this power to the Attorney General, this authority is now held by the Secretary of Homeland Security by operation of the Homeland Security Act of 2002, Public Law 107–296, 116 Stat. 2135. See, *e.g.,* 6 U.S.C. 557; *Nielsen* v. *Preap,* 139 S. Ct. 954, 959 n.2 (2019). The Secretary may designate a country (or part of a country) for TPS on the basis of ongoing armed conflict such that returning would pose a serious threat to the personal safety of the country's nationals and habitual residents, environmental disaster (including an epidemic), or extraordinary and temporary conditions in the country that prevent the safe return of the country's nationals. For environmental disaster-based designations, certain other statutory requirements must be met, including that the foreign government must request TPS. A designation based on extraordinary and temporary conditions cannot be made if the Secretary finds that allowing the country's nationals to remain temporarily in the United States is contrary to the U.S. national interest. INA section 244(b)(1).

[12] *Termination of the Designation of Nepal for Temporary Protected Status,* 83 FR 23705 (May 22, 2018).

[13] *Bhattarai* v. *Nielsen,* No. 19–cv–00731 (N.D. Cal. Mar. 12, 2019).

[14] *See* 84 FR 20647 (May 10, 2019) (correction notice issued at 84 FR 23578 (May 22, 2019)); (Nov. 4, 2019); (Dec. 9, 2020); and 86 FR 50725 (Sept. 10, 2021) (correction notice issued at 86 FR 52694 (Sept. 22, 2021)); and 87 FR 68717 (Nov. 16, 2022). DHS had published previous notices to comply with the earlier preliminary injunction order issued by the *Ramos* court. *See* 83 FR 54764 (Oct. 31, 2018); 84 FR 7103 (March 1, 2019).

withdrawn pursuant to INA § 244(c)(3), 8 U.S.C. 1254a(c)(3).

An agency has inherent (*i.e.* statutorily implicit) authority to revisit its prior decisions unless Congress has expressly limited that authority.[15] The TPS statute does not limit the Secretary's inherent authority to reconsider any TPS-related determination, and upon reconsideration, to change the determination. *See* INA sections 244(b)(3), (b)(5)(A); 8 U.S.C. 1254a(b)(3), (b)(5)(A).

Why is the Secretary rescinding the previous termination of the TPS designation for Nepal?

After conducting an independent assessment of the country conditions in Nepal as they existed in 2018 and exist today, the Secretary has determined that Nepal's 2015 TPS designation should not have been terminated. As explained below, the conditions in Nepal that gave rise to its TPS designation in 2015 persisted in 2018 and persist to this day. Accordingly, the Secretary is, upon reconsideration, rescinding the 2018 decision terminating Nepal's TPS designation and extending that designation for an additional 18 months.

On April 25, 2015, an earthquake of magnitude 7.8 struck Nepal, with the epicenter approximately 77 to 81 kilometers (km) northwest of Kathmandu, Nepal's capital.[16] Dozens of aftershocks followed, including one of magnitude 7.3 on May 12, 2015.[17] Over 8 million people—roughly 25% to 33% of Nepal's population—were affected in 39 of Nepal's 75 districts.[18] Over 2 million people lived in the 11 most critically hit districts.[19] In these districts, half of the population was estimated to be affected.[20] In response, Nepal was designated for TPS for 18 months effective June 24, 2015.[21]

At the time of the determination to terminate the designation of TPS, DHS found that Nepal had made progress in reconstruction and that the disruption in living conditions had decreased. While some progress had been made in these areas, Nepal continued to experience significant challenges due to the destruction caused by the earthquake and subsequent landslides that hampered reconstruction that were not sufficiently considered in the termination decision. These challenges include continued internal displacement and problems in allocation of reconstruction funds and assistance. Ongoing environmental disasters, like landslides, that Nepal continued to experience, were also not considered at the time of the termination decision. In 2017, Amnesty International found that delays in allocation of earthquake relief funds led to more than 70% of those living in the most seriously damaged districts continuing to live in temporary shelters.[22] This lack of adequate protection from environmental changes negatively impacted the health of earthquake survivors.[23] In both 2017 and 2018, the Department of State reported that the most vulnerable populations, such as internally displaced people, stateless individuals, indigenous people, and a large number of children remained in camps or informal settlements and/or faced discrimination in receiving reconstruction assistance while also acknowledging the government promoted their safe, voluntary return and had policies in place to help them.[24] A comprehensive report from Human Rights Watch corroborated ''the country is still far from recovery'' and that ''an already poor nation leaves its most impoverished citizens without the support that could, and should, be provided because of available resources.'' [25] The Kathmandu Post reported that ''a debilitating shortfall of necessary funds, an initial shortage of reconstruction materials as a result of the unofficial border blockade, the absence of a central coordinating body, frequent changes in leadership, and the politicization of reconstruction have resulted in snail paced-recovery efforts.'' [26] A 2017 assessment on vulnerabilities found that Nepal lacks comprehensive social vulnerability analyses and mapping which would directly influence disaster preparedness.[27] The assessment also found that ''Nepal's preparedness and policy interventions are not compatible with the existing hazard, exposure, and risk perception level'' and this ''leads to losses every year''.[28] In the weeks following the earthquake, more than 4,300 landslides were mapped using spaceborne and ground observations

[28] Id.

and the likelihood of landslides remained due to the cyclical monsoon season and unstable ground from the earthquake.[29] In fact, a 2017 study found that landslides triggered by large earthquakes contribute not only to earthquake losses but ''pose a major secondary hazard that can persist for months or years.'' [30] Even while Nepal worked to reconstruct damaged infrastructure and homes, it continued to experience earthquake aftershocks until August 24, 2017.[31] These assessments and reports highlight that while Nepal made some progress in reconstruction, it continued to face environmental obstacles at the time of the determination to terminate TPS that hindered meaningful progress.

The conditions in Nepal at the time of the TPS termination determination continued to substantially disrupt living conditions and negatively affected the country's ability to adequately handle the return of its nationals residing in the United States. At the time of the determination to terminate TPS, Nepal continued to experience challenges, including internal displacement, problems with reconstruction fund distribution, and ongoing environmental disasters, that were either insufficiently considered or not considered. The Secretary has concluded that reconsideration and rescission of the termination of TPS is timely, particularly given that the 2018 termination decision has not yet gone into effect.

What authority does the Secretary have to extend the designation of Nepal for TPS?

As noted above, section 244(b) of the INA, 8 U.S.C. 1254a(b), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist and instructs the Secretary to periodically review the country conditions underpinning each designation and determined whether they still exist, leading to either termination or extension of the TPS designation. However, if the Secretary does not make a decision as to either extension or termination, then INA section 244(b)(3)(C) requires the automatic extension of the designation for six months (or 12 or 18 months in the Secretary's discretion).

Prior to the now-rescinded termination of the TPS designation for Nepal, the most recent extension of the designation was due to end on June 24, 2018.[32] In light of the Secretary's reconsideration and rescission of the May 22, 2018 decision to terminate the TPS designation for Nepal, there is no longer any standing secretarial determination that Nepal ''no longer meets the conditions for designation'' under INA section 244(b)(1). Accordingly, with this rescission of the prior termination, pursuant to INA section 244(b)(3)(C), and in the absence of an affirmative decision by any Secretary to extend the designation for 12 or 18 months rather than the automatic six months triggered by the statute, the TPS designation for Nepal shall have been extended in consecutive increments of 6 months between the date when the last designation extension was due to end on June 24, 2018, and the effective date of the TPS extension announced in this notice, December 25, 2023. Coupled with the existing *Bhattarai* order and corresponding **Federal Register** notices continuing TPS and TPS-related documentation for affected beneficiaries under the designation for Nepal, this means that all such individuals whose TPS has not been finally withdrawn for individual ineligibility are deemed to have retained TPS since June 24, 2018 and may re-register under procedures announced in this notice.

Why is the Secretary extending the TPS designation for 18 months through June 24, 2025?

While Nepal had been making progress on its recovery in the years immediately following the 2015 earthquake, subsequent environmental disasters, and the associated macroeconomic shocks, have impeded the recovery process.

There continues to be a substantial disruption of living conditions, including earthquakes and other environmental events that continue to inflict damage on a population that has still not fully recovered from the earthquake in 2015, and this has impacted Nepal's ability to adequately handle the return of its nationals. Recent earthquakes have caused considerable damage throughout Nepal and impeded or reversed the progress the country had made since the 2015 earthquake. On November 9, 2022, a 5.6 magnitude earthquake in Western Nepal killed six people living in mud and brick houses in Doti District, 430 kilometers (270 miles) west of Kathmandu and affected 200 families.[33] Shortly thereafter, on November 12, 2022, a second strong earthquake followed in the Bajhang district.[34] The International Federation of Red Cross/Red Crescent Societies reported that as of November 14, 2022, affected people were living in the open and were in need of emergency shelter, as well as improved access to water, sanitation and hygiene, psychosocial support and protection services.[35] As recently as January 24, 2023, another 5.9 magnitude earthquake struck Bajura district in the Sudurpaschim province.[36] Reports indicate that this earthquake resulted in damage to approximately 400 houses and the displacement of over 40 families.[37] A 2018 World Bank study based on interviews with displaced persons from three villages indicated continuing vulnerabilities due to environmental degradation.[38] That study, conducted during the monsoon season in 2018 (June to October), found that there were ''[i]ncreased landslide risks due to road/tunnel constructions for hydropower projects'' and that [p]eople in hazard-prone areas need[ed] safe/adequate land through monsoon seasons.'' [39] It also found that ''[a]nalysis

Continued

demonstrate[ed] that no clear relocation plan for displaced people exist[ed], and that livelihood opportunities in new re-settlement areas receiv[ed] no attention.'' [40] Further, according to a 2021 study in open access journal *Progress in Disaster Science,* mapping showed that the landslide hazard in the fourteen worst-affected districts remained significantly higher than on the day of the earthquake in 2015.[41] While some areas experienced a degree of stabilization, new areas experienced landslides and others continued to develop risk of landslides.[42] The study emphasized that it should be expected that the levels of landslide risk in these areas will remain elevated for at least ''several more years.'' [43]

Both droughts and heavy monsoon floods, made more frequent by climate change, have drastically increased food insecurity in areas of the country that were most heavily affected by the 2015 earthquake while also significantly slowing Nepal's reconstruction efforts by causing increasingly severe damage to existing infrastructure.[44] In December 2022, UNICEF published a report indicating that the prolonged monsoon season triggered disasters, including floods and landslides, claiming more than 1,200 lives and affecting over 2,321 households across the country in the previous year.[45]

Furthermore, Nepal continues to experience housing insecurity after the 2015 earthquake that is evidence of the continued disruption in living conditions that temporarily impacts the country's ability to handle the return of its nationals granted TPS. Nepal's National Reconstruction Authority (NRA) was disbanded on December 26, 2021, despite the fact that it had not fully completed reconstruction of damage caused by the 2015 earthquake.[46] Local news reports indicate that a delay in the release of NRA funding led to incomplete settlements being built, leaving people without homes or with partly completed dwellings that lacked roofs and other necessities.[47] Incomplete rebuilding is more prevalent in areas where poor and vulnerable populations live.[48] This has led to many internally displaced persons (IDP) remaining in camps or informal settlements because their homes were not rebuilt or remain vulnerable to environmental disasters, or because they did not hold title to the homes they were living in at the time of the 2015 earthquake.[49]

In addition to the subsequent environmental events following the 2015 earthquake, Nepal continues to experience serious food insecurity, health-infrastructure concerns, and agricultural instability that render Nepal temporarily unable to handle the return of its nationals granted TPS. An August 2020 NIH article noted that Nepal's ''already strained health system was worsened'' by the 2015 earthquakes and highlighted the continuing impact of the earthquakes on vulnerable populations, which were further impacted by COVID.[50] Additionally, a 2021 Penn State Department of Agricultural Sciences study found that heavy monsoon rains compounded food insecurity in areas most affected by the 2015 earthquake, likely due to increased landslides, which damaged roads, disrupted distribution of food aid, and destroyed agricultural land and assets.[51]

In October 2022, Nepal experienced widespread damage in many regions as a result of flooding and landslides that occurred after heavy rainfall.[52] In Lumbini Province alone, more than 8,000 households were impacted by flooding with over 1,000 displaced.[53] As a result of floods, at least 33 people died, while at least 22 people remain missing.[54] The flooding and numerous landslides resulting from the storm destroyed critical infrastructure,

including sections of major highways and market access roads, all of which continue to further affect food security and impede post-earthquake recovery in these especially vulnerable areas.[55]

The destruction of agricultural lands and disruption of supply chains due to these road blockages have resulted in shortages and price increases of key staples. This has exacerbated recent dramatic rises in the price of key staples resulting from Russia's war on Ukraine,[56] which has resulted in global food, fuel, and fertilizer shortages and rising food prices around the world, which have impacted Nepal with particular severity.[57] The war has posed new threats to Nepal's food security and economy, both of which have struggled to stabilize under the impacts of the COVID–19 pandemic, environmental shocks, and above-average global food prices.[58] While food security conditions in Nepal have improved in recent years, ''nearly 3.9 million people—approximately 13 percent of the country's population—were experiencing food insecurity as of June 2022. . . Additionally, an estimated 33 percent of Nepali children ages 6–23 months did not meet the recommended minimum standards for dietary diversity and nutrient intake.'' [59]

The global fertilizer shortage resulting from the Ukraine conflict has left Nepal, a country heavily reliant on imports, unable to supply the necessary fertilizers for its farmers.[60] A significant portion of this year's agricultural productivity was lost before the planting season even began, with many farmers opting not to plant, given the challenges with obtaining sufficient fertilizer to make commercial farming feasible.[61]

Rising inflation, currently at a new, six-year high of 8.64 percent in September, and fuel prices that have remained about 50% higher this year have already contributed to growing food prices and heightened risk of food insecurity.[62] Prices have risen across nearly all commodities, and the cost of the household food basket is around 10% higher nationally than a year ago, and as much as 27% higher in some of the most isolated and disaster-affected regions, raising concerns about the immediate and longer-term impacts on Nepal's economic growth, stability, and food security.[63] High inflation rates and recent interest rate hikes by Nepal's central bank compound the effects of an ongoing liquidity crunch, constraining access to finance and hampering economic growth and completion of water projects that would address Nepal's environmental vulnerabilities.[64] Given the high level of household-level poverty and the high share of food spending—representing as much as two-thirds of the total income for poor families—the ongoing war and food inflation will continue to stress an already volatile food security and nutrition situation.[65] A 2021 UNICEF report indicated that 17.4 percent of Nepalese are poor on a multidimensional poverty index, so over one in six Nepalese—five million people—are under serious threat due to ongoing food inflation on top of previous economic and environmental stressors.[66]

Due to the triple threat of global economic effects, dire environmental shocks, and the lingering impacts of the COVID–19 pandemic, more poor households are expected to slip into poverty across the country, erasing years of hard-won development gains.[67] According to the International Food Policy Research Institute (IFPRI), Nepal's poverty rate is expected to rise by 4.5 percent, pushing more than 1.27 million people into poverty this year.[68] Labor migration emerges as a primary coping strategy for Nepalese during times of hardship, with households and the economy relying heavily on remittances.[69]

In summary, Nepal's slow recovery after the 2015 earthquake and more recent environmental disasters, including devastating floods, further earthquakes, and landslides, continue to

disrupt living conditions and render Nepal temporarily unable to handle the return of those granted TPS. Since the disastrous earthquake in 2015, Nepal has continued to be encumbered by significant environmental events that have hindered Nepal's recovery. The subsequent environmental disasters and the associated macroeconomic shocks have impeded the recovery process, and as a result, there continues to be a substantial disruption of living conditions. Soaring food and fuel prices further exacerbate the situation. Nepal continues to lack the infrastructure and capacity to adequately handle the return of Nepalese nationals (as well as others with no nationality who last habitually resided there) who were granted TPS under the 2015 designation and are currently residing in the United States.

Based upon this review and after consultation with appropriate U.S. Government agencies, the Secretary has determined that:

- The conditions supporting Nepal's designation for TPS continue to be met. *See* INA section 244(b)(3)(A) and (C), 8 U.S.C. 1254a(b)(3)(A) and (C).
- There has been an earthquake, flood, drought, epidemic, or other environmental disaster in Nepal resulting in a substantial, but temporary, disruption of living conditions in the area affected; Nepal is unable, temporarily, to handle adequately the return of its nationals; and Nepal has officially requested designation of TPS. *See* INA section 244(b)(1)(B)(i), 8 U.S.C. 1254a(b)(1)(B)(i);
- The designation of Nepal for TPS should be extended for an 18-month period, beginning on December 25, 2023, and ending on June 24, 2025. *See* INA section 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C).
- There are approximately 14,500 current Nepal TPS beneficiaries who are expected to be eligible to re-register for TPS under the extension.

Notice of the Rescission of TPS Termination and Extension and Redesignation of Nepal for TPS

Pursuant to my lawful authorities, including under sections 103(a) and 244 of the Immigration and Nationality Act, I am hereby rescinding the termination of the TPS designation of Nepal announced in the **Federal Register** at 83 FR 23705 (May 2018). Due to this rescission and pursuant to section 244(b)(3)(C) as well as the ongoing stay of proceedings order and approval of the parties' stipulation in *Bhattarai,* the TPS designation of Nepal has continued to exist since June 24, 2018, without a standing secretarial determination as to whether TPS should be extended or terminated. TPS beneficiaries under the designation, whose TPS has not been finally withdrawn for individual ineligibility, therefore have continued to maintain their TPS since June 24, 2018.

By the authority vested in me as Secretary under INA section 244, 8 U.S.C. 1254a, I have determined, after consultation with the appropriate U.S. Government agencies, the statutory conditions supporting Nepal's designation for TPS on the basis of environmental disaster are met. *See* INA section 244(b)(1)(B), 8 U.S.C. 1254a(b)(1)(B) and section 244(b)(3)(A); 8 U.S.C. 1254a(b)(3)(A). On the basis of this determination, I am extending the existing designation of Nepal for TPS for 18 months, beginning on December 25, 2023, and ending on June 24, 2025. *See* INA section 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C). Individuals holding TPS under the designation of Nepal may file to reregister for TPS under the procedures announced in this notice if they wish to continue their TPS under this 18-month extension.

Alejandro N. Mayorkas,

Secretary, U.S. Department of Homeland Security.

Eligibility and Employment Authorization for TPS

Required Application Forms and Application Fees to Re-Register for TPS

To re-register for TPS based on the designation of Nepal, you must submit a Form I–821, Application for Temporary Protected Status during the 60-day reregistration period that begins on October 24, 2023 and ends on December 23, 2023. There is no Form I–821 fee for re-registration. *See* 8 CFR 244.17. You may be required to pay the biometric services fee. If you can demonstrate an inability to pay the biometric services fee, you may request to have the fee waived. Please see additional information under the ''Biometric Services Fee'' section of this notice.

Individuals who have a Nepal TPS application (Form I–821) that was still pending as of June 21, 2023 do not need to file the application again. If USCIS approves an individual's Form I–821, USCIS will grant the individual TPS through June 24, 2025.

Required Application Forms and Application Fees to Obtain an EAD

Every employee must provide their employer with documentation showing they have a legal right to work in the United States. TPS beneficiaries are authorized to work in the United States and are eligible for an EAD which proves their employment authorization. If you have an existing EAD issued under the TPS designation of Nepal that has been auto-extended through June 30, 2024, by the notice published at 87 FR 68717, you may continue to use that EAD through that date. If you want to obtain a new EAD valid through June 24, 2025, you must file an Application for Employment Authorization (Form I–765) and pay the Form I–765 fee (or request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver).

You may, but are not required to, submit Form I–765, Application for Employment Authorization, with your Form I–821 re-registration application. If you do not want a new EAD now, you can request one later by filing your I–765 and paying the fee (or requesting a fee waiver) at that time, provided you have TPS or a pending TPS application. If you have TPS and only a pending Form I–765, you must file the Form I–821 to reregister for TPS or risk having your TPS withdrawn for failure to reregister without good cause.

Information About Fees and Filing

USCIS offers the option to applicants for TPS under Nepal's designation to file Form I–821 and related requests for EADs online or by mail. When filing a TPS application, applicants can also request an EAD by submitting a completed Form I–765, with their Form I–821.

Online filing: Form I–821 and I–765 are available for concurrent filing online.[70] To file these forms online, you must first create a USCIS online account.[71]

Mail filing: Mail your application for TPS to the proper address in Table 1.

Table 1—Mailing Addresses

Mail your completed Form I–821, Application for Temporary Protected Status and Form I–765, Application for Employment Authorization, Form I–912, Request for Fee Waiver, if applicable, and supporting documentation to the proper address in Table 1.

[70] Find information about online filing at ''Forms Available to File Online,'' *https://www.uscis.gov/file-online/forms-available-to-file-online.*

[71] *https://myaccount.uscis.gov/users/sign_up.*

TABLE 1—MAILING ADDRESSES

If you live in:	Then mail your application to:
• Connecticut • Delaware • District of Columbia • Maine • Maryland • Massachusetts • New Hampshire • New York • North Carolina • Pennsylvania • Rhode Island • Texas • Vermont • Virginia • West Virginia	USCIS Elgin Lockbox. U.S. Postal Service (USPS): USCIS, Attn: TPS Nepal, P.O. Box 4091, Carol Stream, IL 60197–4091. FedEx, UPS, or DHL: USCIS, Attn: TPS Nepal (Box 4091), 2500 Westfield Drive, Elgin, IL 60124–7836.
• Alabama • Alaska • American Samoa • Arizona • Arkansas • California • Colorado • Florida • Georgia • Guam • Hawaii • Idaho • Louisiana • Mississippi • Montana • Nevada • New Mexico • Northern Mariana Islands • Oklahoma • Oregon • Puerto Rico • South Carolina • Utah • Virgin Islands • Washington • Wyoming	USCIS Phoenix Lockbox. U.S. Postal Service (USPS): USCIS, Attn: TPS Nepal, P.O. Box 21800, Phoenix, AZ 85036–1800. FedEx, UPS, or DHL: USCIS, Attn: TPS Nepal (Box 21800), 2108 E. Elliot Rd., Tempe, AZ 85284–1806.
• Illinois • Indiana • Iowa • Kansas • Kentucky • Michigan • Minnesota • Missouri • Nebraska • North Dakota • Ohio • South Dakota • Tennessee • Wisconsin	USCIS Chicago Lockbox. U.S. Postal Service (USPS): USCIS, Attn: TPS Nepal, P.O. Box 6943, Chicago, IL 60680–6943. FedEx, UPS, or DHL: USCIS, Attn: TPS Nepal (Box 6943), 131 S. Dearborn St., 3rd Floor, Chicago, IL 60603–5517.

If you were granted TPS by an immigration judge (IJ) or the Board of Immigration Appeals (BIA) and you wish to request an EAD, please mail your Form I–765 application to the appropriate mailing address in Table 1. When you are requesting an EAD based on an IJ/BIA grant of TPS, please include a copy of the IJ or BIA order granting you TPS with your application. This will help us verify your grant of TPS and process your application.

Supporting Documents

The filing instructions on the Form I–821 list all the documents needed to establish eligibility for TPS. You may also find information on the acceptable documentation and other requirements for applying (*i.e.,* registering) for TPS on the USCIS website at *https://www.uscis.gov/tps* under ''Nepal.''

Travel

TPS beneficiaries may also apply for and be granted travel authorization as a matter of discretion. You must file for travel authorization if you wish to travel outside of the United States. If granted, travel authorization gives you permission to leave the United States

and return during a specific period. To request travel authorization, you must file Form I–131, Application for Travel Document, available at *https://www.uscis.gov/i-131.* You may file Form I–131 together with your Form I–821 or separately. When filing the Form I–131, you must:

- Select Item Number 1.d. in Part 2 on the Form I–131; and
- Submit the fee for the Form I–131, or request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver.

If you are filing Form I–131 together with Form I–821, send your forms to the address listed in Table 1. If you are filing Form I–131 separately based on a pending or approved Form I–821, send your form to the address listed in Table 2 and include a copy of Form I–797 for the approved or pending Form I–821.

TABLE 2—MAILING ADDRESSES

If you are	Mail to
Filing Form I–131 together with a Form I–821, Application for Temporary Protected Status.	The address provided in Table 1.
Filing Form I–131 based on a pending or approved Form I–821, and you are using the U.S. Postal Service (USPS): You must include a copy of the receipt notice (Form I–797 or I–797C) showing we accepted or approved your Form I–821.	USCIS, Attn: I–131 TPS, P.O. Box 660167, Dallas, TX 75266–0867.
Filing Form I–131 based on a pending or approved Form I–821, and you are using FedEx, UPS, or DHL: You must include a copy of the receipt notice (Form I–797 or I–797C) showing we accepted or approved your Form I–821.	USCIS, Attn: I–131 TPS, 2501 S. State Hwy. 121 Business, Ste. 400, Lewisville, TX 75067.

Biometric Services Fee for TPS:

Biometrics (such as fingerprints) are required for all applicants 14 years of age and older. Those applicants must submit a biometric services fee. As previously stated, if you are unable to pay the biometric services fee, you may request a fee waiver, which you may submit on Form I–912, Request for Fee Waiver. For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* If necessary, you may be required to visit an Application Support Center to have your biometrics captured. For additional information on the USCIS biometric screening process, please see the USCIS Customer Profile Management Service Privacy Impact Assessment, available at *https://www.dhs.gov/publication/dhsuscispia-060-customer-profile-management-service-cpms.*

Refiling a TPS Re-Registration Application After Receiving a Denial of a Fee Waiver Request

You should file as soon as possible within the 60-day re-registration period so USCIS can process your application and issue your EAD promptly, if one has been requested. Properly filing early will also allow you to have time to refile your application before the deadline, should USCIS deny your fee waiver request. The fee waiver denial notice will contain specific instructions about resubmitting your application. However, you are urged to refile within 45 days of the date on any USCIS fee waiver denial notice, if possible. See INA section 244(c)(3)(C); 8 U.S.C. 1254a(c)(3)(C); 8 CFR 244.17(b). For more information on good cause for late re-registration, visit the USCIS TPS web page at *www.uscis.gov/tps.*

Note: A re-registering TPS beneficiary age 14 and older must pay the biometric services fee (but not the Form I–821 fee), or request a fee waiver, when filing a TPS re-registration application. As discussed above, if you decide to wait to request an EAD, you do not have to file the Form I–765 or pay the associated Form I–765 fee (or request a fee waiver) at the time of re-registration. You may wait to seek an EAD until after USCIS has approved your TPS re-registration application or at any later date you decide you want to request an EAD. To re-register for TPS, you only need to file the Form I–821 with the biometrics services fee, if applicable, (or request a fee waiver).

General Employment-Related Information for TPS Applicants and Their Employers

How can I obtain information on the status of my TPS application and EAD request?

To get case status information about your TPS application, as well as the status of your TPS-based EAD request, you can check Case Status Online at uscis.gov, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.* If your Form I–765 has been pending for more than 90 days, and you still need assistance, you may ask a question about your case online at *https://egov.uscis.gov/e-request/Intro.do* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

When hired, what documentation may I show to my employer as evidence of identity and employment authorization when completing Form I–9?

You can find the Lists of Acceptable Documents on Form I–9, Employment Eligibility Verification, as well as the Acceptable Documents web page at *https://www.uscis.gov/i-9-central/acceptable-documents.* Employers must complete Form I–9 to verify the identity and employment authorization of all new employees. Within three days of hire, employees must present acceptable documents to their employers as evidence of identity and employment authorization to satisfy Form I–9 requirements.

You may present any document from List A (which provides evidence of both identity and employment authorization) or one document from List B (which provides evidence of your identity) together with one document from List C (which provides evidence of employment authorization), or you may present an acceptable receipt as described in the Form I–9 Instructions. Employers may not reject a document based on a future expiration date. You can find additional information about Form I–9 on the I–9 Central web page at *https://www.uscis.gov/I-9Central.* An EAD is an acceptable document under List A.

If I have an EAD based on another immigration status, can I obtain a new TPS-based EAD?

Yes, if you are eligible for TPS, you can obtain a new TPS-based EAD, regardless of whether you have an EAD or work authorization based on another immigration status. If you want to obtain a new TPS-based EAD valid through June 24, 2025, then you must file Form I–765, Application for Employment Authorization, and pay the associated fee (unless USCIS grants your fee waiver request).

Can my employer require that I provide any other documentation such as evidence of my status or proof of my Nepalese citizenship or a Form I–797C showing that I registered for TPS for Form I–9 completion?

No. When completing Form I–9, employers must accept any documentation you choose to present from the Form I–9 Lists of Acceptable Documents that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers need not reverify List B identity documents. Employers may not request proof of Nepalese citizenship or proof of registration for TPS when completing Form I–9 for new hires or reverifying the employment authorization of current employees. Refer to the ''Note to Employees'' section of this **Federal Register** notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or immigration status, or your national origin. Employers can refer to the compliance notice that DHS published on November 16, 2022, for information on how to complete the Form I–9 with TPS EADs that DHS extended through June 30, 2024.[72]

Note to All Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This **Federal Register** notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (Form I–9 and E-Verify), employers may call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Employer Hotline at 800–255–8155 (TTY 800–237–2515). IER offers language interpretation in numerous languages. Employers may also email IER at *IER@usdoj.gov.*

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls in English, Spanish and many other languages. Employees or job applicants may also call the IER Worker Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based on citizenship, immigration status, or national origin, including discrimination related to Form I–9 and E-Verify. The IER Worker Hotline provides language interpretation in numerous languages.

To comply with the law, employers must accept any document or combination of documents from the Lists of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt as described in the Form I–9 Instructions. Employers may not require extra or additional documentation beyond what is required for Form I–9 completion. Further, employers participating in E-Verify who receive an E-Verify case result of ''Tentative Nonconfirmation'' (mismatch) must promptly inform employees of the mismatch and give such employees an opportunity to take action to resolve the mismatch. A mismatch result means that the information entered into E-Verify from Form I–9 differs from records available to DHS.

Employers may not terminate, suspend, delay training, withhold or lower pay, or take any adverse action against an employee because of a mismatch while the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result is received when E-Verify cannot confirm an employee's employment eligibility. An employer may terminate employment based on a case result of FNC. Work-authorized employees who receive an FNC may call USCIS for assistance at 888–897–7781 (TTY 877–875–6028). For more information about E-Verify-related discrimination or to report an employer for discrimination in the E-Verify process based on citizenship, immigration status, or national origin, contact IER's Worker Hotline at 800–255–7688 (TTY 800–237–2515). Additional information about proper nondiscriminatory Form I–9 and E-Verify procedures is available on the IER website at *https://www.justice.gov/crt/immigrant-and-employee-rights-section* and the USCIS and E-Verify websites at *https://www.uscis.gov/i-9-central* and *https://www.e-verify.gov.*

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles)

This **Federal Register** Notice does not invalidate the compliance notice DHS issued on November 16, 2022, which extended the validity of certain TPS documentation through June 30, 2024 and does not require individuals to present a Form I–797, Notice of Action. While Federal Government agencies must follow the guidelines laid out by the Federal Government, State and local government agencies establish their own rules and guidelines when granting certain benefits. Each state may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are a TPS beneficiary, show you are authorized to work based on TPS or other status, or that may be used by DHS to determine if you have TPS or another immigration status. Examples of such documents are:

- Your current EAD with a TPS category code of A–12 or C–19, even if your country of birth noted on the EAD does not reflect the TPS designated country of Nepal; or
- Your Form I–94, Arrival/Departure Record or Form I–797, Notice of Action, as shown in the **Federal Register** notice published at 87 FR 68717.

Check with the government agency requesting documentation regarding which document(s) the agency will accept. Some state and local government agencies use the SAVE program to confirm the current immigration status of applicants for public benefits.

While SAVE can verify that an individual has TPS, each state and local government agency's procedures govern whether they will accept an unexpired EAD, Form I–797, Form I–797C, or Form I–94. It may also assist the agency if you:

a. Give the agency a copy of the relevant **Federal Register** notice listing the TPS-related document, including any applicable auto-extension of the document, in addition to your recent TPS-related document with your A-number, USCIS number or Form I–94 number;

b. Explain that SAVE will be able to verify the continuation of your TPS using this information; and

c. Ask the agency to initiate a SAVE query with your information and follow

[72] *Continuation of Documentation for Beneficiaries of Temporary Protected Status Designations for El Salvador, Haiti, Nicaragua, Sudan, Honduras, and Nepal,* 87 FR 68717 (Nov. 16, 2022).

through with additional verification steps, if necessary, to get a final SAVE response verifying your TPS.

You can also ask the agency to look for SAVE notices or contact SAVE if they have any questions about your immigration status or any automatic extension of TPS-related documentation. In most cases, SAVE provides an automated electronic response to benefit-granting agencies within seconds, but occasionally verification can be delayed.

You can check the status of your SAVE verification by using CaseCheck at *https://save.uscis.gov/casecheck/.* CaseCheck is a free service that lets you follow the progress of your SAVE verification case using your date of birth and one immigration identifier number (A-number, USCIS number, or Form I–94 number) or Verification Case Number. If an agency has denied your application based solely or in part on a SAVE response, the agency must offer you the opportunity to appeal the decision in accordance with the agency's procedures. If the agency has received and acted on or will act on a SAVE verification and you do not believe the SAVE response is correct, the SAVE website, *www.uscis.gov/save,* has detailed information on how to correct or update your immigration record, make an appointment, or submit a written request to correct records.

[FR Doc. 2023–13019 Filed 6–20–23; 8:45 am]

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7071–N–07]

60-Day Notice of Proposed Information Collection: Manufactured Home Construction and Safety Standards Act Park Model RV Exemption, OMB Control No. 2502–0616

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* August 21, 2023.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal.

Written comments and recommendations for the proposed information collection can be submitted within 60 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 60-day Review—Open for Public Comments'' or by using the search function. Interested persons are also invited to submit comments regarding this proposal by name and/or OMB Control Number and can be sent to: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410–5000 or email at *PaperworkReductionActOffice@hud.gov.*

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit: *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Manufactured Home Construction and Safety Standards Act Park Model RV Exemption Notice.

OMB Approval Number: 2502–0616.

OMB Expiration Date: January 31, 2024.

Type of Request: Revision of a currently approved collection.

Form Number: None.

Description of the need for the information and proposed use: For recreational vehicles that are exempt from HUD regulation as manufactured homes, HUD requires certification with either the American National Standards Institute's (ANSI) standard for Park Model Recreational Vehicles (PMRV), A119.5–15 or the National Fire Protection Association's NFPA 1192, Standard on Recreational Vehicles, 2015 Edition. PMRVs built to ANSI A119.5–15 may exceed the RV exemption's 400 square foot threshold; a manufacturer must post notice in the home that the structure is only designed for recreational purposes and is not designed as a primary residence or for permanent occupancy. The Recreation Vehicle Industry Association's (RVIA) current seal does not satisfy HUD's standard for the manufacturer's notice. HUD requirements provide specifics regarding the content and prominence of the notice and which requires the notice to be prominently displayed in the unit and delivered to the consumer before the sale transaction is complete, regardless of whether the transaction occurs online or in-person. PMRV manufacturers will satisfy this requirement with two printed sheets of paper per PMRV: One in the kitchen, and one delivered to the consumer before the transaction.

Respondents: Business or other for-profit.

Estimated Number of Respondents: 25.

Estimated Number of Responses: 4,480 per annum.

Frequency of Response: Approximately 179.

Average Hours per Response: 20 seconds.

Total Estimated Burden: 25 hours.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

Jeffrey D. Little,

General Deputy Assistant Secretary for Housing.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_AK_FRN_MO4500171970]

Filing of Plats of Survey: Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of official filing.

SUMMARY: The plats of survey of lands described in this notice are scheduled to be officially filed in the Bureau of Land Management (BLM), Alaska State Office, Anchorage, Alaska. The surveys, which were executed at the request of the Bureau of Indian Affairs (BIA), and BLM, are necessary for the management of these lands.

DATES: The BLM must receive protests by July 21, 2023.

ADDRESSES: You may buy a copy of the plats from the BLM Alaska Public Information Center, 222 W 7th Avenue, Mailstop 13, Anchorage, AK 99513. Please use this address when filing written protests. You may also view the plats at the BLM Alaska Public Information Center, Fitzgerald Federal Building, 222 W 7th Avenue, Anchorage, Alaska, at no cost.

FOR FURTHER INFORMATION CONTACT: Thomas O'Toole, Chief, Branch of Cadastral Survey, Alaska State Office, Bureau of Land Management, 222 W 7th Avenue, Anchorage, AK 99513; 907–271–4231; *totoole@blm.gov.* People who use a telecommunications device for the deaf may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the BLM during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The lands surveyed are:

COPPER RIVER MERIDIAN, ALASKA

U.S. Survey No. 14513, accepted May 23, 2023, situated in T. 17 S., R. 8 W.

U.S. Survey No. 14514, accepted May 23, 2023, situated in T. 18 S., R. 8 W.

U.S. Survey No. 14517, accepted May 23, 2023, situated in T. 17 S., R. 8 W.

U.S. Survey No. 14522, accepted May 23, 2023, situated in T. 17 S., R. 7 W.

T. 24 N., R. 35 W., accepted May 24, 2023.

T. 23 N., R. 36 W., accepted May 24, 2023.

A person or party who wishes to protest one or more plats of survey identified above must file a written notice of protest with the State Director for the BLM in Alaska. The protest may be filed by mailing to BLM State Director, Alaska State Office, Bureau of Land Management, 222 W 7th Avenue, Anchorage, AK 99513 or by delivering it in person to BLM Alaska Public Information Center, Fitzgerald Federal Building, 222 W 7th Avenue, Anchorage, Alaska. The notice of protest must identify the plat(s) of survey that the person or party wishes to protest. You must file the notice of protest before the scheduled date of official filing for the plat(s) of survey being protested. The BLM will not consider any notice of protest filed after the scheduled date of official filing. A notice of protest is considered filed on the date it is received by the State Director for the BLM in Alaska during regular business hours; if received after regular business hours, a notice of protest will be considered filed the next business day. A written statement of reasons in support of a protest, if not filed with the notice of protest, must be filed with the State Director for the BLM in Alaska within 30 calendar days after the notice of protest is filed.

If a notice of protest against a plat of survey is received prior to the scheduled date of official filing, the official filing of the plat of survey identified in the notice of protest will be stayed pending consideration of the protest. A plat of survey will not be officially filed until the dismissal or resolution of all protests of the plat.

Before including your address, phone number, email address, or other personally identifiable information in a notice of protest or statement of reasons, you should be aware that the documents you submit, including your personally identifiable information, may be made publicly available in their entirety at any time. While you can ask the BLM to withhold your personally identifiable information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 U.S.C. chap. 3.

Thomas O'Toole,

Chief Cadastral Surveyor, Alaska.

BILLING CODE 4331–10–P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–NER–NEEN–FR00000057; PPNENEEN00/PPMPSAS1Z.Y00000]

Selection of the Route of the New England National Scenic Trail and Publication of the Land Protection Plan

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: Pursuant to the National Trails System Act, the National Park Service is publishing notice of its selection of the New England National Scenic Trail route and a Land Protection Plan for said route. Congress established the trail in 2009, which has been in use as a long-distance trail since the 1950s.

DATES: The effective date of this route selection is June 21, 2023.

ADDRESSES: This **Federal Register** notice announces the route for the New England National Scenic Trail following the routes generally depicted on the map referenced in the Act. The legislative map depicting this route is available for inspection at the following locations: National Park Service, Land Resources Program Center, Interior Region 1, 1234 Market Street, 20th Floor, Philadelphia, PA 19107 and National Park Service, Department of the Interior, 1849 C Street NW, 2nd Floor, Room 2342 (MIB 2340), Washington, DC 20240. The route is depicted in more detail in the National Park Service Geographic Information System database as the ''NEEN_BND_NationalScenicTrailCenterline_ln,'' updated April 7, 2023, and listed as the Authoritative Feature Layer, published, and managed by the National Park Service, which is available at *https://www.arcgis.com/home/item.html?id=2732c458d1d64bfda9b0bbc82de8cc7e.*

FOR FURTHER INFORMATION CONTACT: Kelly Fellner, Superintendent; New England National Scenic Trail; National Park Service; One Armory Square, Suite 2, Springfield, MA 01105; via email at *kelly_fellner@nps.gov;* or via phone at (413) 734–8551.

SUPPLEMENTARY INFORMATION: In 2009, Congress established the New England National Scenic Trail as a component of the National Trails System as part of Public Law 111–11, Sect. 5202 (Act) which amended the National Trails System Act to include the trail. The law references the trail route as generally depicted on legislated Map No. T06/80,000, dated October 2007. The map indicates an extension to the Long Island Sound, which was approved as part of the designation. Prior to designation, the New England Trail had been continuous in its entirety and in use as a long-distance trail since the 1950s. Post designation, the Long Island Sound extension was completed, as well as other minor relocations to comply with landowner requests. The trail route has been largely unchanged since its ten-year anniversary in 2019.

Pursuant to 16 U.S.C. 1244(a) and 1246(a)(2), the Secretary of the Interior must select the route for the trail and publish notice of the availability of appropriate maps or descriptions in the **Federal Register**.

To guide the protection of this trail route, legislated trail partners in Connecticut and Massachusetts, the Connecticut Forest & Park Association and Appalachian Mountain Club respectively, conducted various land protection planning efforts and held workshops with interested stakeholders between 2018 and 2022, resulting in a trail protection strategy in each state. Stakeholders participating included state and local government agencies, nonprofit organizations, land trusts, and private entities. The National Park Service has combined these two strategies, including additional information required by policy and various **Federal Register** notices into a trailwide Land Protection Plan. This Land Protection Plan provides the local criteria, data, and prioritization process for working with willing sellers and partners to protect the trail using various methods. The plan is available at *https://www.nps.gov/neen/learn/management/land-protection-plan.htm.*

Gay Vietzke,

Regional Director, Interior Region 1.

Programmatic Environmental Assessment for Use of Electric Bicycles in the National Park System

AGENCY: National Park Service, Interior.

ACTION: Notice of availability; request for comment.

SUMMARY: The National Park Service (NPS) announces the availability of a programmatic environmental assessment (PEA) that evaluates, on a nationwide scale, use of electric bicycles (e-bikes) within the National Park System. We invite comments from the public and local, State, Tribal, and Federal agencies.

DATES: We will accept comments received or postmarked on or before 11:59 p.m. ET on July 21, 2023.

ADDRESSES:

Document availability: The PEA is available online at: *https://parkplanning.nps.gov/e-bikes.*

Comment Submission: You may submit written comments by one of the following methods:

- *Electronically: https://parkplanning.nps.gov/e-bikes.*
- *Mail or hand deliver to:* Electric Bicycle Programmatic EA, National Park Service, 1849 C Street NW, MS–2472 Washington, DC 20240.

Instructions: Comments will not be accepted by fax, email, or in any way other than those specified above. Comments delivered on external electronic storage devices (flash drives, compact discs, etc.) will not be accepted. Bulk comments in any format (hard copy or electronic) submitted on behalf of others will not be accepted.

FOR FURTHER INFORMATION CONTACT: Jay Calhoun, Chief, Division of Regulations, Jurisdiction, and Special Park Uses, National Park Service; *waso_regulations@nps.gov;* (202) 513–7112.

SUPPLEMENTARY INFORMATION: On December 2, 2020, the NPS promulgated a final rule (rule) governing use of e-bikes within the National Park System (85 FR 69175). On May 24, 2022, the U.S. District Court for the District of Columbia issued an opinion finding that the NPS had improperly relied upon a categorial exclusion to comply with the National Environmental Policy Act (NEPA) for the rule. The Court remanded the rule to the NPS and directed the NPS to conduct additional NEPA analysis for the rule. *Pub Emps. For Env't Responsibility* v. *Nat'l Park Serv.,* 605 F. Supp. 3d 28 (D.D.C. 2022). The rule remains in place pending the outcome of the required NEPA analysis. The PEA has been prepared consistent with the Court's May 24, 2022 opinion.

The PEA evaluates the environmental impacts, on a nationwide scale, of a no-action alternative and the proposed action (the rule). The no-action alternative assumes that the rule has not been promulgated and that there is no nationwide policy about the use of e-bikes. Under the no-action alternative, superintendents would have no specific authority to allow e-bike use in System units and no policy direction about how to use existing authorities to manage e-bikes. This would result in inconsistent management of e-bikes use across the National Park System. In most System units, visitors would likely be allowed to use e-bikes on public roads and parking lots where motor vehicle use is allowed. In some System units, e-bike use also could occur on administrative roads and trails. Under the proposed action (the rule), e-bikes are defined uniformly and subject to a standard set of operating requirements, while superintendents have the discretion to allow e-bike use in National Park System units on a case-by-case basis, on public roads, parking lots, administrative roads, and trails where traditional bicycle use is allowed. The proposed action has been identified as the NPS preferred alternative. The PEA analyzes impacts to soils, vegetation, visitor use and experience, and wildlife.

Availability of Public Comments

You may submit comments by one of the methods shown under **ADDRESSES**. Before including your address, phone

number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including the personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee we would be able to do so.

Lauren S. Imgrund,

Associate Director, Partnerships and Civic Engagement.

[FR Doc. 2023–13141 Filed 6–20–23; 8:45 am]

BILLING CODE 4312–52–P

DEPARTMENT OF JUSTICE

[CPCLO Order No. 003–2023]

Privacy Act of 1974; Systems of Records

AGENCY: United States Department of Justice.

ACTION: Notice of a new system of records.

SUMMARY: Pursuant to the Privacy Act of 1974 and Office of Management and Budget (OMB) Circular No. A–108, notice is hereby given that the Justice Management Division (hereinafter JMD), a component within the United States Department of Justice (DOJ or Department), proposes to develop a new system of records notice titled HAVANA Act Compensation Records, JUSTICE/DOJ–021. DOJ proposes to establish this system of records in connection with the provisions in the HAVANA Act to allow claimants to be compensated for qualifying physical injuries under the Act and the implementing regulations.

DATES: In accordance with 5 U.S.C. 552a(e)(4) and (11), this notice is effective upon publication, subject to a 30-day period in which to comment on the routine uses, described below. Please submit any comments by July 21, 2023.

ADDRESSES: The public, OMB, and Congress are invited to submit any comments by mail to the United States Department of Justice, Office of Privacy and Civil Liberties, ATTN: Privacy Analyst, 2 Constitution Square, 8W.300, 145 N St. NE, Washington, DC 20002; by facsimile at 202–307–0693; or by email at *privacy.compliance@usdoj.gov.* To ensure proper handling, please reference the above CPCLO Order No. on all correspondence.

FOR FURTHER INFORMATION CONTACT: Morton J. Posner, General Counsel, Justice Management Division, 2CON, 145 N St. NE, Washington, DC 20530, (202) 514–3452.

SUPPLEMENTARY INFORMATION: On October 8, 2021, President Biden signed the ''Helping American Victims Affected by Neurological Attacks'' (HAVANA) Act of 2021 (Pub. L. 117–46) (hereinafter, the HAVANA Act or the Act). In this statute, Congress authorized Federal agencies to make payments to certain affected current employees, former employees, and their dependents (hereinafter, ''claimants'') for qualifying injuries to the brain. This law requires the Department (and other agencies) to prescribe regulations implementing the HAVANA Act, and the Department intends to publish an interim final rule (IFR).

An individual wishing to make a claim under the HAVANA Act (hereinafter, a ''claimant'') will submit information about themselves and their claim to the Department. Those records will be used to determine a claimant's eligibility for payment under the HAVANA Act, track the progress of the claim, inform the claimant of the status of the claim, and to inform any decision arising out of an administrative appeal relating to the claim.

In accordance with 5 U.S.C. 552a(r), the Department has provided a report to OMB and Congress on this new system of records.

Dated: June 14, 2023.

Peter Winn,

Chief Privacy and Civil Liberties Officer, United States Department of Justice.

JUSTICE/DOJ–021

SYSTEM NAME AND NUMBER:

HAVANA Act Compensation Records, JUSTICE/DOJ–021.

SECURITY CLASSIFICATION:

The information in this system of records is unclassified.

SYSTEM LOCATION:

Original records will be kept at the Justice Management Division (JMD), 2CON, 145 N St. NE, Washington, DC 20530. The database(s) will be maintained internally and on the JMD server.

SYSTEM MANAGER(S):

Deputy Assistant Attorney General, Policy, Management, and Procurement, Justice Management Division, 950 Pennsylvania Avenue NW, Washington, DC 20530.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Authority for maintaining this system exists under the HAVANA Act of 2021, Public Law 117–46.

PURPOSE(S) OF THE SYSTEM:

Records maintained in this system will be used to determine a claimant's eligibility for payment under the HAVANA Act, track the progress of the claim, inform the claimant of the status of the claim, and to inform any decision arising out of an administrative appeal relating to the claim.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Department of Justice employees and their dependents, as defined in the HAVANA Act implementing regulations, who make claims under the Act (''claimants''), health care providers who submit supporting paperwork on behalf of the claimant, and other individuals appropriately submitting or referenced in supporting documentation, *e.g.,* witnesses to the associated incident and other health care providers.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records in the system may include names of claimants, claimants' dependents, health care providers, or other individuals covered in this system, dates of birth, contact information, employment information relating to the claim, date and location of the associated incident, medical information relating to the claim; and other records appropriately obtained or generated to process claims.

RECORD SOURCE CATEGORIES:

Information may be provided by individuals covered in this system, the Department of Justice or other United States Government agencies, physicians or other appropriate medical personnel, or medical board certification organizations.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b), all or a portion of the records or information contained in this system of records may be disclosed as a routine use pursuant to 5 U.S.C. 552a(b)(3) under the circumstances or for the purposes described below, to the extent such disclosures are compatible with the purposes for which the information was collected:

A. To the claimant's listed physician or other appropriate health care providers to the extent necessary to gather information required for the processing of the claimant's claim.

B. To any Federal agency or entity that the Department of Justice has reason to believe possesses information pertinent to claimant's claim, or with

whom the Department of Justice must coordinate to process the claim, or as is otherwise appropriate to ensure fair and equitable implementation of the HAVANA Act.

C. Where a record, either alone or in conjunction with other information, indicates a violation or potential violation of law—criminal, civil, or regulatory in nature—the relevant records may be referred to the appropriate law enforcement authority or other appropriate entity charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law.

D. In an appropriate proceeding before a court, grand jury, or administrative or adjudicative body, when the Department of Justice determines that the records are arguably relevant to the proceeding; or in an appropriate proceeding before an administrative or adjudicative body when the adjudicator determines the records to be relevant to the proceeding.

E. To an actual or potential party to litigation or the party's authorized representative for the purpose of negotiation or discussion of such matters as settlement, plea bargaining, or informal discovery proceedings.

F. To the news media and the public, including disclosures pursuant to 28 CFR 50.2, unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

G. To contractors, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the Federal Government, when necessary to accomplish an agency function related to this system of records.

H. To appropriate officials and employees of a Federal agency or entity that requires information relevant to the issuance of a grant or benefit.

I. To a former employee of the Department for purposes of facilitating communications with a former employee where the Department requires information or consultation assistance from the former employee regarding a matter within that person's former area of responsibility.

J. To a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of, and at the request of, the individual who is the subject of the record.

K. To the White House, including the President, Vice President, their staffs, and other entities of the Executive Office of the President, for Executive Branch coordination of activities which relate to or have an effect upon the constitutional, statutory, or other official or ceremonial duties of the President or Vice-President, to the extent that release of the specific information in the context of a particular case does not constitute an unwarranted invasion of personal privacy.

L. To the National Archives and Records Administration for purposes of records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

M. To appropriate agencies, entities, and persons when (1) the Department suspects or has confirmed that there has been a breach of the system of records; (2) the Department has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the Department (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Department's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

N. To another Federal agency or Federal entity, when the Department determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach, or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

O. To any agency, organization, or individual for the purpose of performing authorized audit or oversight operations of the JMD and meeting related reporting requirements.

P. To such recipients and under such circumstances and procedures as are mandated by Federal statute or treaty.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records in this system are maintained in restricted access folders, with access limited to those who have a need to know the information.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Data is retrieved by name of covered individuals, by case file identifier, by date or location of incident, or by claimant's Division or program office.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Files are retained in hard and electronic copies. The Department has drafted a Schedule for all DOJ Compensation programs, Compensation Programs Records, and has submitted the draft to NARA for review. The DOJ Compensation Programs Records schedule would include permanent records. Pending approval of that schedule, all HAVANA Act Compensation claim files and automated data pertaining to those claims will be retained in anticipation of a permanent retention schedule. If a more limited retention is approved, records will be handled accordingly.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Internet connections are protected by multiple firewalls. Security personnel conduct periodic vulnerability scans using DOJ-approved software to ensure security compliance and security logs are enabled for all computers to assist in troubleshooting and forensics analysis during incident investigations. Users of individual computers can only gain access to the data by a valid user identification and password or passcode. Access to electronic files is limited to personnel who have a need for the files to perform official duties.

Access to hard copy records is limited to personnel who have a need for the records to perform official duties and is safeguarded in access controlled areas. All files are maintained in a secure building.

RECORD ACCESS PROCEDURES:

All requests for access to records must be in writing and should be addressed to the Justice Management Division FOIA Contact, 950 Pennsylvania Avenue NW, Room 1111 RFK, Washington, DC 20530, or *JMDFOIA@usdoj.gov.* Any envelopes and letters should be clearly marked ''Privacy Act Access Request.'' The request must describe the records sought in sufficient detail to enable Department personnel to locate them with a reasonable amount of effort. The request must include a general description of the records sought and must include the requester's full name, current address, and date and place of birth. The request must be signed and either notarized or submitted under penalty of perjury.

Although no specific form is required, individuals may obtain forms for this purpose from the FOIA/Privacy Act Mail Referral Unit, United States Department of Justice, 950 Pennsylvania Avenue NW, Washington, DC 20530, or on the Department of Justice website at

https://www.justice.gov/oip/oip-request.html.

More information regarding the Department's procedures for accessing records in accordance with the Privacy Act can be found at 28 CFR part 16 Subpart D, ''Protection of Privacy and Access to Individual Records Under the Privacy Act of 1974.''

CONTESTING RECORD PROCEDURES:

Individuals seeking to contest or amend records maintained in this system of records must direct their requests to the address indicated in the ''RECORD ACCESS PROCEDURES'' paragraph, above. All requests to contest or amend records must be in writing and the envelope and letter should be clearly marked ''Privacy Act Amendment Request.'' All requests must state clearly and concisely what record is being contested, the reasons for contesting it, and the proposed amendment to the record.

More information regarding the Department's procedures for amending or contesting records in accordance with the Privacy Act can be found at 28 CFR 16.46, ''Requests for Amendment or Correction of Records.''

NOTIFICATION PROCEDURES:

Individuals may be notified if a record in this system of records pertains to them when the individuals request information utilizing the same procedures as those identified in the ''RECORD ACCESS PROCEDURES'' paragraph, above.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

BILLING CODE 4410–NW–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by the party listed below.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before July 21, 2023.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2023–0030 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2023–0030.

2. *Fax:* 202–693–9441.

3. *Email: petitioncomments@dol.gov.*

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, *Attention:* S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk in Suite 4E401. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor's COVID–19 policy. Special health precautions may be required.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2023–016–C.

Petitioner: Peter Shingara Jr. Mining, 315 Shingara Lane, Sunbury, Pennsylvania 17801.

Mine: No. 1 Slope Operation, MSHA ID No. 36–10008, located in Northumberland County, Pennsylvania.

Regulation Affected: 30 CFR 75.1202–1(a), Temporary notations, revisions, and supplements.

Modification Request: The petitioner requests a modification of 30 CFR 75.1202–1(a) to permit annual mine map revisions and supplements from the initial survey in lieu of the current interval of not more than 6 months.

The petitioner states that:

(a) The low production and slow rate of advance in anthracite mining make surveying on 6-month intervals impractical. In most cases, annual development is frequently limited to less than 500 feet of gangway advance with associated up-pitch development.

(b) The mine is non-mechanized and uses hand-loading methods of mining.

(c) Development above the active gangway is designed to mine into the level above the designated intervals thereby maintaining sufficient control between both surveyed gangways.

(d) Available mine engineering and surveying resources are limited in the mine area, making more than annual surveying difficult to achieve.

The petitioner proposes the following alternative method:

(a) The mine maps shall be revised and supplemented at intervals of not more than 12 months.

(b) The mine maps will continue to be updated by hand notations daily and subsequent surveys will be conducted prior to commencing retreat mining and whenever either a drilling program under 30 CFR 75.388 or plan for mining into inaccessible areas under 30 CFR 75.389 is required.

The petitioner asserts that the alternate method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to

the Mine Safety and Health Administration (MSHA) by the party listed below.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before July 21, 2023.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2023–0029 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2023–0029.
2. *Fax:* 202–693–9441.
3. *Email: petitioncomments@dol.gov.*
4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, *Attention:* S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk in Suite 4E401. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor's COVID–19 policy. Special health precautions may be required.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2023–015–C.

Petitioner: Peter Shingara Jr. Mining, 315 Shingara Lane, Sunbury, Pennsylvania 17801.

Mine: No. 1 Slope Operation, MSHA ID No. 36–10008, located in Northumberland County, Pennsylvania.

Regulation Affected: 30 CFR 75.1400, Hoisting equipment; general.

Modification Request: The petitioner requests a modification of 30 CFR 75.1400 to permit operating the gunboat used to transport persons without safety catches or other no less effective devices.

The petitioner states that:

(a) Safety catches or devices are not available for gunboats operating in steeply pitching and undulating slopes with numerous curves and knuckles present in the main haulage slopes of Anthracite mines.

(b) The mine's slopes range in length from 30 to 4,200 feet and vary in pitch from 12 to 75 degrees.

(c) Since a functional safety catch has not been developed, makeshift devices, if installed, could be activated on knuckles and curves, causing a tumbling effect on the conveyance. Such tumbling would increase the hazard to miners.

The petitioner proposes the following alternative method:

(a) The cage or steel gunboat shall be operated with secondary safety connections that are securely fastened around the gunboat and to the hoisting rope above the main connecting device.

(b) Hoisting ropes shall be used with safety factors that are greater than the 4 to 8 to 1 ratio recommended by the American National Standard for Wire Rope for Mines.

The petitioner asserts that the alternate method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor's COVID–19 policy. Special health precautions may be required.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2023–017–C.

Petitioner: Peter Shingara Jr. Mining, 315 Shingara Lane, Sunbury, Pennsylvania 17801.

Mine: No. 1 Slope Operation, MSHA ID No. 36–10008, located in Northumberland County, Pennsylvania.

Regulation Affected: 30 CFR 75.1200, Mine map.

Modification Request: The petitioner requests a modification of 30 CFR 75.1200—specifically clauses (d) and (i). The petitioner requests that the substitution of cross-sections be permitted, in lieu of contour lines through the intake slope, at locations of rock tunnel connections between coal veins, and at 1,000 feet intervals of advance from the intake slope. The petitioner also requests for limiting the required mappings of mine workings above and below to those present within 100 feet of the vein(s) being mined unless these veins are interconnected to other veins beyond the 100 feet limit, through rock tunnels.

The petitioner states that:

(a) Due to steep pitch encountered in mining anthracite coal veins, contour lines of elevations provide no useful information, and their depiction would make portions of the map illegible.

(b) Mining activities at the mine are either second mining of remnant pillars from previous mining or the mining of coal veins of lower quality in proximity to inaccessible and frequently flooded abandoned mine workings which may or may not be mapped.

(c) The mine workings above and below are usually inactive and abandoned and not subject to change during the life of the mine.

The petitioner proposes the following alternative method:

(a) Cross-sections shall be used in lieu of contour lines on mine maps to provide critical information relative to the spacing between veins and proximity to other mine workings which fluctuate considerably.

(b) All mapping for mines above and below shall be researched by a contract engineer for the presence of interconnecting rock tunnels between coal veins in relation to the mine and a hazard analysis done when mapping indicates the presence of known or potentially flooded workings.

(c) Mine workings found beyond 100 feet from the mine, when no rock tunnel connections are found, shall be recognized as presenting no hazard to the mine due to the pitch of the vein and rock separation.

(d) Where evidence indicates prior mining was conducted on a coal vein above or below the mine and there is no available mine map, the vein shall be considered to be mined and flooded, and appropriate precautions shall be taken, as required by 30 CFR 75.388.

(e) Where potential hazards exist and in-mine drilling capabilities limit penetration, surface boreholes shall be used to intercept the workings and the results analyzed prior to the beginning of mining in the affected area.

The petitioner asserts that the alternate method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2023–014–C.

Petitioner: Peter Shingara Jr. Mining, 315 Shingara Lane, Sunbury, Pennsylvania 17801.

Mine: No. 1 Slope Operation, MSHA ID No. 36–10008, located in Northumberland County, Pennsylvania.

Regulation Affected: 30 CFR 75.1002(a), Installation of electric equipment and conductors; permissibility.

Modification Request: The petitioner requests a modification of 30 CFR 75.1002(a) to permit use of non-permissible electric equipment, including drags and battery locomotives, within 150 feet of the pillar line.

The petitioner states that:

(a) The mine is a pitching anthracite mine.

(b) The use of drags on less than moderate pitching veins (less than 20 degrees pitch) is the only practical system of mining for the mine.

(c) Permissible drags are not commercially available and permissible locomotives are not commercially available, partly due to their small size.

(d) Because of low daily production rates and full timbering support, in-rushes of methane resulting from pillar falls are unlikely to occur.

(e) Recovery of the pillars above the first miner heading is usually accomplished on the advance within 150 feet of the section intake (gangway) and the remaining minable pillars are recovered from the deepest point of penetration outby.

The petitioner proposes the following alternative method:

(a) The equipment shall be operated in the working section's only intake entry (gangway) which is regularly traveled and examined.

(b) Methane testing shall occur on an hourly basis and the test results shall be recorded in the on-shift examination record.

(c) Equipment operation shall be suspended if the methane concentration at the equipment reaches 0.5 percent methane when found during a pre-shift examination or during operation.

(d) The required intake air flow of 5,000 cubic feet per minute shall be measured just outby the non-permissible equipment, with the ventilating air passing over the equipment to ventilate the pillar being mined.

(e) The electrical equipment shall be monitored during operation and shall be de-energized at the intersection of the working gangway and intake slope.

(f) Where more than one active line of pillar breast recovery exists, the locomotive may travel to a point just outby the deepest active chute/breast (room) workings or last open crosscut in developing set of entries.

The petitioner asserts that the alternate method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[NOTICE: 23–065]

Name of Information Collection: Pilot Testing of Telephone Interviewing Approaches To Assess Community Response to New, Quieter Boom Experiences

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of information collection.

SUMMARY: The National Aeronautics and Space Administration, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections.

DATES: Comments are due by August 21, 2023.

ADDRESSES: Written comments and recommendations for this information collection should be sent within 60 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.*

Find this information collection by selecting ''Currently under 60-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Bill Edwards-Bodmer, NASA Clearance Officer, NASA Headquarters, 300 E Street SW, JF0000, Washington, DC 20546, 757–864–7998, or *b.edwards-bodmer@nasa.gov*.

SUPPLEMENTARY INFORMATION:

I. Abstract

This information collection enabled NASA to pre-test methods to collect information from individuals to determine community response to the new, quieter sonic booms, prior to the start of flight testing the X-plane. No public exposure to any form of sonic boom occurred during the pre-testing phase.

The pre-test was conducted by telephone interview. NASA wanted to evaluate telephone surveys to assess prompt public response associated with experiencing low amplitude sonic booms over multiple, geographically dispersed communities. Responses were voluntary.

The new X-plane is designed to produce low amplitude sonic booms. Ultimately, flight testing of the X-plane is intended to (1) demonstrate and validate the technology necessary for civil supersonic flights that create low amplitude sonic booms, and (2) assess community response to the new, quieter, sonic booms.

II. Methods of Collection

Telephone.

III. Data

Title: Pilot Testing of Telephone Interviewing Approaches to Assess Community Response to New, Quieter Boom Experiences.

OMB Number: 2700–0166.

Type of review: Reinstatement.

Affected Public: Individuals.

Estimated Annual Number of Activities: 5,000.

Estimated Number of Respondents per Activity: 1.

Annual Responses: 5,000.

Estimated Time per Response: 3 minutes.

Estimated Total Annual Burden Hours: 250.

IV. Request for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

William Edwards-Bodmer,

NASA PRA Clearance Officer.

NATIONAL SCIENCE FOUNDATION

Proposal Review Panel for Computing & Communication Foundations; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name and Committee Code: Proposal Review Panel for Computing & Communication Foundations (#1192).

Date and Time: July 19, 2023–July 20, 2023, 8:00 a.m.–4:30 p.m. (Eastern).

Place: Halicioglu Data Science Institute, 234 Matthews Ln., La Jolla, CA 92093.

Type of Meeting: Part-Open.

Contact Persons: Dr. Sankar Basu, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; Telephone: (703) 292–8910.

Purpose of Meeting: To provide advice and recommendations concerning progress of the AI Institute for Learning-enabled Optimization at Scale (TILOS).

Agenda: To conduct an in-depth evaluation of performance, to assess progress towards goals, and to provide recommendations.

Day 1: July 19, 2023

8:00 a.m.—8:15 a.m. Introductions (Open)
8:15 a.m.–8:30 a.m. Welcome and Institute Overview (Open)
8:30 a.m.–10:00 a.m. Research Overview (Open)
10:00 a.m.–10:15 a.m. BREAK
10:15 a.m.–10:45 a.m. Executive Session for NSF Review Team (Closed)
10:45 a.m.–11:30 a.m. Education and Broad Impacts (Open)
11:30 a.m.–Noon Leadership and Collaboration (Open)
Noon–1:00 p.m. LUNCH, Poster Sessions in parallel (Open)
1:00 p.m.–1:45 p.m. NSF team meets w/ UCSD leadership (Closed) External visitors meet with Student (poster) Session (Open)
1:45 p.m.–2:15 p.m. Executive Session for NSF Review Team (Closed)
2:15 p.m.–3:00 p.m. Knowledge Transfer and Workforce Development (Open)
3:00 p.m.–3:15 p.m. Wrap up
3:15 p.m.–4:15 p.m. Executive Session for NSF Review Team (Closed)
4:15 p.m.–4:30 p.m. Written questions/ issues to TILOS by the Site Visit Team (Closed)

Day 2: July 20, 2023

8:00 a.m.–9:00 a.m. TILOS Response to issues raised by Site Visit Team (Closed)
9:30 a.m.–4:00 p.m. Site Visit Review Team prepares Site Visit Report (Closed)
4:00 p.m.–4:30 p.m. Presentation of Site Visit Report (Executive Summary) to TILOS team (Closed)
4:30 p.m. Site Visit concludes.

Reason for Closing: Topics to be discussed and evaluated during closed portions of the site review will include information of a proprietary or confidential nature, including technical information; and information on personnel. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: June 15, 2023.

Crystal Robinson,

Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[NRC–2023–0111]

Draft Interim Staff Guidance: Use of the Decommissioning Trust Fund During Operations for Major Radioactive Component Disposal

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft guidance; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft Interim Staff Guidance (ISG) ''Use of the Decommissioning Trust Fund During Operations for Major Radioactive Component Disposal.'' The purpose of this proposed ISG is to provide the NRC staff's regulatory position to licensees of nuclear power reactors regarding the use of funds from the decommissioning trust fund dedicated to the radiological decommissioning of a reactor facility for the disposal of major radioactive components (MRCs) while the facility is in an operational status. This proposed ISG may be used in connection with requests for exemption from NRC regulations related to the withdrawal of funds from reactor decommissioning trust funds (DTFs).

DATES: Submit comments by August 21, 2023. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0111. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Shawn Harwell, Office of Nuclear Material Safety and Safeguards, telephone: 301–415–1309; email: *Shawn.Harwell@nrc.gov* and Fred Miller, Office of Nuclear Material Safety and Safeguards, telephone: 301–415–6765; email: *Fred.Miller@nrc.gov.* Both are staff members of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2023–0111 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0111.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at

https://www.nrc.gov/reading-rm/adams.html. To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ISG, ''Use of the Decommissioning Trust Fund During Operations for Major Radioactive Component Disposal,'' is available in ADAMS under Accession No. ML23150A051.

• *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2023–0111 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

This proposed ISG is intended to provide clarifying guidance to facilitate stakeholder understanding of the NRC's position on the use of the decommissioning trust fund (DTF) during operations for major radioactive component (MRC) disposal.

The NRC's reactor licensing regulations in part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Domestic Licensing of Production and Utilization Facilities,'' establish requirements for providing assurance that funding will be available to radiologically decommission a reactor facility and terminate the part 50 license. Specifically, these requirements address, among other things, the amount of decommissioning funding to be provided, the methods to be used for assuring sufficient funding, and provisions restricting the use of the DTF during operations.
