SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it.

The standard protects workers from the adverse health effects from occupational exposure to formaldehyde, including an itchy, runny, and stuffy nose; a dry or sore throat; eye irritation; headaches; and cancer of the lung, buccal cavity (mouth), and pharynx (throat). Formaldehyde solutions can damage the skin and burn the eyes.

The standard specifies a number of collections of information. The following is a brief description of the collections of information contained in the Formaldehyde Standard. The standard requires employers to conduct worker exposure monitoring to determine workers' exposure to formaldehyde, notify workers of their formaldehyde exposures, provide medical surveillance to workers, provide examining physicians with specific information, ensure that workers receive a copy of their medical examination results, maintain workers' exposure monitoring and medical records for specific periods, and provide

access to these records by the affected workers and their authorized representatives.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection, and transmission techniques.

III. Proposed Actions

OSHA is requesting an adjusted increase in the burden hours from 240,924 to 263,172 hours, for a total increase of 22,848 hours.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.
