

Malabar PO, LLC and Stellar Communities, LLC plan to mitigate for unavoidable periodic failure of one Audubon's crested caracara nest and impaired foraging in the project footprint with a contribution of \$12,555.00 (based on 27.9 ac of proposed impact at a cost of \$450 per ac) to the Fish and Wildlife Foundation of Florida's caracara conservation fund. This sum will be allocated to restore abandoned citrus groves to habitat suitable for caracara nesting and foraging. The area of abandoned citrus grove restored to suitable caracara habitat will be equal to the area of existing suitable habitat that will be impacted by the proposed action. The contribution to the fund must be completed prior to construction. Upon contribution of the \$12,555.00, a letter will be secured from the Foundation by the Service confirming that the full amount of mitigation has been contributed.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment, including your personal identifying information, may be made available to the public. While you may request that we withhold your personal identifying information, we cannot guarantee that we will be able to do so.

Our Preliminary Determination

The Service has made a preliminary determination that the applicants' proposed project, including the additional construction activities, operation, maintenance, vegetative management, and public use, would individually and cumulatively have a minor effect on Audubon's crested caracara and the human environment. Therefore, we have preliminarily determined that the proposed ESA section 10(a)(1)(B) permit would be a low-effect ITP that individually or cumulatively would have a minor effect on the eastern indigo snake and may qualify for application of a categorical exclusion pursuant to the Council on Environmental Quality's NEPA regulations, DOI's NEPA regulations, and the DOI Departmental Manual. A low-effect incidental take permit is one that would result in (1) minor or nonsignificant effects on species covered in the HCP; (2) nonsignificant effects on the human environment; and (3) impacts that, when added together with the impacts of other past, present, and reasonably foreseeable actions, would not result in significant

cumulative effects to the human environment.

Next Steps

The Service will evaluate the application and the comments to determine whether to issue the requested ITP. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding and other matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue ITP number PER2261354 to Malabar PO, LLC and Stellar Communities, LLC.
