IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 70.17(a), the exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the interest of the public. Therefore, the Commission hereby grants TMI–2 Solutions an exemption from 10 CFR 70.24 during decommissioning.

For the Nuclear Regulatory Commission.

Jane E. Marshall,
Director, Division of Decommissioning,
Uranium Recovery and Waste Programs,
Office of Nuclear Material Safety and Safeguards.

TO WHOM IT MAY CONCERN:

The Office of Science and Technology Policy (OSTP), on behalf of the interagency Committee on Environmental Quality (CEQ), requests public input on the National Strategy for a Sustainable Ocean Economy (National Strategy). The National Strategy will describe the vision, goals, and high-level actions for a robust, equitable, secure, sustainable ocean economy enabled by healthy, resilient ocean ecosystems. It will build on current Federal, Tribal, Territorial, State, and regional sustainable ocean management practices and identify needs and opportunities to enhance these efforts with new and emerging science, technology, knowledge, and policy. Through this request for information (RFI), the Ocean Policy Committee seeks public input on what the goals and outcomes of the National Strategy should be, and how the Federal Government can best advance sustainable management of ocean, coastal, and Great Lakes resources and ecosystems of the United States.

DATES: Responses are due by 11:59 p.m. Eastern Time on August 28, 2023.

Submissions received after the deadline may not be taken into consideration.

SUPPLEMENTARY INFORMATION:
Background: The Nation’s ocean, coasts, and Great Lakes support strong local economies and provide good-paying jobs, healthy food, carbon storage, energy, recreation, culture and heritage, transportation, trade, mobility for our armed forces, natural protection from storm surge and floods, and numerous other benefits. But many of these benefits are not inexhaustible, and the ocean is vulnerable to the impacts of human activity. The myriad impacts of climate change, habitat and biodiversity loss, and ocean pollution, for example, continue to degrade the health, productivity, and resilience of ocean ecosystems and make clear the integral connection between a healthy ocean, coasts, and Great Lakes and the health, prosperity, security, and well-being of all Americans.

To address these continuing challenges, the Administration is committed to advancing the science, knowledge, tools, and activities that support sustainable policies, management, and practices as solutions. Because the challenges are numerous and their scale is great—for example, the country’s ocean, coastal, and Great Lakes areas cover as much area as the terrestrial United States—solving them will require a whole-of-country effort, with critical roles for Tribal Nations, local, State, and Territorial governments, the private sector, academia, non-governmental organizations, and people of all kinds who are developing new science and tools, recognizing the critical importance of Indigenous Knowledge, building new technologies, and employing policies, management, and practices that prioritize sustainable outcomes and reflect the resilience, interconnectedness, value, and productivity of natural systems. Ocean policies, management, and practices focused on achieving healthy communities, ecosystems, and economies are needed to provide abundant co-benefits, including good-paying jobs, thriving communities, and healthy ocean ecosystems that support future discovery and innovation. These solutions provide an opportunity to advance more equitable access to the benefits provided by the ocean to people, and to create and sustain a diverse workforce.

To engage the Nation in developing a vision, goals, and high-level actions for sustainable management of the ocean, coasts, and Great Lakes, the Ocean Policy Committee, a Congressionally mandated, Cabinet-level interagency committee charged with coordinating Federal ocean policy (https://www.noaa.gov/interagency-ocean-policy), will develop a National Strategy for a Sustainable Ocean Economy (National Strategy) in consultation with federally recognized Tribes and input from governments, civil society, the private sector, and the public. The National Strategy will: (1) describe a vision and goals for sustainable management of the U.S. ocean, coasts, and Great Lakes; (2) characterize and assess needs and opportunities to achieve the vision and goals; (3) identify existing and new high-level actions by Federal, Tribal, State, Territorial, regional, and local governments that can advance sustainable management; and (4) describe how those actions will be implemented to engage and build on the work of and partnerships with civil society, the private sector, and the public.

Examples of subject matter that may be addressed by the National Strategy include, but are not necessarily limited to: ocean food and human health; ocean energy and resources; ocean-based tourism; ocean transportation; new ocean industries; climate change; marine and coastal ecosystems; ocean pollution; equity and environmental justice; ocean literacy and skills; economic valuation of coastal and ocean natural capital; ocean science and technology; ocean finance; Indigenous Knowledge, ancestral and historical areas of importance, and national security.

At the Federal level, the National Strategy will take into account current actions related to the sustainability of the nation’s ocean, coasts, and Great Lakes, including, but not necessarily limited to: the Ocean Climate Action Plan (https://www.whitehouse.gov/wp-content/uploads/2023/03/Ocean-Climate-Action-Plan_Final.pdf), the National Nature Assessment (https://www.globalchange.gov/nna), and the National Strategy to Develop Statistics for Environmental-Economic Decisions (https://www.whitehouse.gov/ostp/news-updates/2023/01/19/fact-sheet-biden-harris-administration-releases-national-strategy-to-put-nature-on-the-nations-balance-sheet/). The Ocean Policy Committee is coordinating the development of the National Strategy in conjunction with the United States’
participation in the “High Level Panel for a Sustainable Ocean Economy” (Ocean Panel; https://oceanpanel.org), committing with 16 other nations to develop sustainable ocean plans for their marine areas under national jurisdiction. This initiative aims to advance the prosperity, health, and security of participating nations through the sustainable management of their marine areas, and to provide a range of examples that can be considered as potential models by other nations. The U.S. National Strategy will serve as a sustainable ocean plan for the purposes of the Ocean Panel initiative.

**Questions To Inform Development of the Strategy**

Respondents may provide information for one or as many topics below as they choose. Submissions should clearly indicate which questions are being addressed. An interagency work group under the Ocean Policy Committee and co-led by the Department of the Interior and the Department of the Navy, in partnership with the CEQ and OSTP, and other Federal agencies and entities, will develop the National Strategy with input from, Tribal Nations, local, State, and Territorial governments, the private sector, academia, non-governmental organizations, a wide range of stakeholders, and the public. The workgroup is seeking input from the public on high-level goals and how to achieve them in the following areas:

- **Sustainable Ocean Economy.** What should the national vision and high-level goals be for a sustainable ocean economy? Are there successful regional or local efforts that could be applied nation-wide? What elements or activities do you consider critical to a sustainable ocean economy? Are there other topics beyond those listed above (e.g., ocean food; ocean energy and resources; ocean-based tourism; ocean transportation; new ocean industries; climate change; marine and coastal ecosystems; ocean pollution; equity and environmental justice; ocean literacy and skills; economic valuation of the ocean’s natural capital; ocean science, technology; ocean finance; Indigenous Knowledge and ancestral and historical areas of importance; and national security) that should be addressed?
- **Ocean, Coasts, and Great Lakes Priorities.** What are your priorities for sustainable management of the ocean, coasts, and Great Lakes at a local, state, Tribal, territorial, regional, and/or national scale? What key challenges do you face in achieving them? Are your priorities for coastal, and Great Lakes management reflected in existing workplans, strategy documents, or other approved collection of information discussed below.

Under Section 16(a) of the Securities Exchange Act of 1934 (“Exchange Act”) (15 U.S.C. 78a et seq.) every person who is directly or indirectly the beneficial owner of more than 10 percent of any class of any equity security (other than an exempted security) which registered pursuant to Section 12 of the Exchange Act, or who is a director or an officer of the issuer of such security (collectively “reporting persons”), must file statements setting forth their security holdings in the issuer with the Commission. Form 5 (17 CFR 249.105) is an annual statement of beneficial ownership of securities. The information disclosure provided on Form 5 is mandatory. All information is provided to the public for review. We estimate that approximately 5,939 reporting persons file Form 5 annually and we estimate that it takes approximately one hour to prepare the form for a total of 5,939 annual burden hours.

An agency may conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: www.reginfo.gov. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by July 31, 2023 to (i) www.reginfo.gov/public/do/PRAMain and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: PRA_Mailbox@sec.gov.

J. Lynn Taylor,
Assistant Secretary.
