

ensure that cable operators and DBS providers present consumers with an easy-to-understand “all-in” subscription price, or whether we need to provide more detail about how cable operators and DBS providers must communicate the price for service and seek comment on these matters. We also considered whether, aside from line-item fees for broadcast television, sports programming (including regional sports programming), and entertainment programming, there are other video programming-related fees that are being categorized as taxes, fees, and surcharges, instead of included in the price for video service. We also considered whether there are also benefits to industry, such as leveling the playing field for MVPDs that do offer transparent pricing.

We expect to more fully consider the economic impact and alternatives for small entities following the review of comments and costs and benefits analyses filed in response to the NPRM. Our evaluation of this information will shape the final alternatives we consider, the final conclusion we reach, and any final actions we ultimately take in this proceeding to minimize any significant economic impact that may occur on small entities.
