Prior to approving issuance of an allowance, VA must find all of the following:

Each fiscal year, VA will provide a percentage increase (rounded to the nearest dollar) in the casket and urn flat-rate allowances equal to the percentage by which the CPI (all items, United States city average) for the 12-month period (June to June) preceding the beginning of the fiscal year for which the percentage increase is made exceeds the CPI for the 12-month period preceding the 12-month period described in this paragraph (e). VA will only make cost-of-living increases to the flat rate allowances when the CPI has increased.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Air Plan Revisions; California; Sacramento Metropolitan Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to partially approve and partially disapprove a revision to the Sacramento Metropolitan Air Quality Management District (SMAQMD) portion of the California State Implementation Plan (SIP). The revision concerns SMAQMD’s demonstration regarding reasonably available control technology (RACT) requirements and negative declarations for the 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS or “standards”) in the portion of the Sacramento Metropolitan nonattainment area under the jurisdiction of the SMAQMD. We are also correcting sections in the Code of Federal Regulations (CFR) to reflect the current status of certain provisions of the SMAQMD portions of the California SIP related to the 1997 8-hour ozone NAAQS.

DATES: This rule is effective July 31, 2023.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2023–0036. All documents in the docket are listed on the https://www.regulations.gov website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

We proposed to partially approve SMAQMD’s 2017 RACT SIP and negative declarations because we determined that, except for the RACT element for non-CTG major sources of NOX, they complied with the relevant CAA requirements. We proposed to partially disapprove SMAQMD’s 2017 RACT SIP because several of the District rules relied upon to implement RACT for non-CTG major sources of NOX contain provisions that are not consistent with EPA’s Startup, Shutdown, and Malfunction (SSM) Policy. District Rule 413 (Stationary Gas Turbines) contains a provision that explicitly exempts affected units from complying with rule standards during periods of startup and shutdown and does not provide for an alternative emissions limitation during such periods. District Rule 411 (NOX from Boilers, Process Heaters, and Steam Generators) and Rule 419 (NOX from Miscellaneous Combustion Units) both contain monitoring provisions that preclude the use of specified data for
