I. Background

The Black Lung Benefits Act (the Act), 30 U.S.C. 901–944, requires coal mine operators to be insured (either by qualifying as a self-insurer or obtaining commercial insurance) for liabilities arising from the Act; failure to do so may result in civil money penalties. 30 U.S.C. 933. Accordingly, 20 CFR Part V, Subpart C, 726.208–.213 requires insurance carriers to report to the Division of Coal Mine Workers’ Compensation (DCMWC) each policy and endorsement issued, cancelled, or renewed with respect to operators in such a manner and on such form as DCMWC may require. These regulations also require carriers to file a separate report for each operator it insures. Carriers use Form CM–921, Notice of Issuance of Insurance Policy, to report issuance of insurance policies to operators. This information collection is currently approved for use through November 30, 2019. 30 U.S.C. 901 and 20 CFR 725.535 authorizes this information collection.

SUPPLEMENTARY INFORMATION:

Title of Collection: Survey of Science and Engineering Research Facilities.

OMB Approval Number: 3145-0101.

Summary of Collection: The National Science Foundation Survey of Science and Engineering Research Facilities is a Congressionally mandated (Pub. L. 99-159; NSF Act of 1950, as amended; America COMPETES Reauthorization Act of 2010), biennial survey that has been conducted since 1986. As required by law, the survey collects data on the amount, condition, and costs of the physical facilities used to conduct science and engineering research. Congress expected this survey to provide the data necessary to describe the status and needs of science and engineering research facilities.

Use of the Information: Analysis of the Facilities Survey data will provide updated information on the status of scientific and engineering research facilities and capabilities. Statistics on the square footage of R&D space available, the condition of R&D space, and the costs for new construction, repairs, and renovation of R&D space at higher education institutions by S&E field are produced from the survey. The sources of funding for new construction and repair and renovation projects are also published. The survey information can be used by Federal policy makers, planners, and budget analysts in making policy decisions, as well as by institutional academic officials, the scientific/engineering establishment, and state agencies and legislatures that fund universities.

Data are published in NSF's annual publication series *Survey of Science and Engineering Research Facilities*, available on the web at <http://nsf.gov/statistics/srvyfacilities/>.

Expected respondents: The Facilities Survey, is a census of institutions that performed at least \$1 million in separately accounted for science and engineering research and development in the previous year.
