DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-23-1307; Docket No. CDC-2023-0058]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled *Shigella Hypothesis Generating Questionnaire (SHGQ)*. The SHGQ supports shigellosis cluster and outbreak investigations. CDC will collect state and local health department furnished shigellosis case data.

DATES: CDC must receive written comments on or before September 12, 2023.

ADDRESSES: You may submit comments, identified by Docket No. CDC-2023-0058 by either of the following methods:

- **Federal eRulemaking Portal:** www.regulations.gov. Follow the instructions for submitting comments.

- **Mail:** Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to www.regulations.gov.

Please note: Submit all comments through the Federal eRulemaking portal (www.regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329; Telephone: 404-639-7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including

whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

Shigella Hypothesis Generating Questionnaire (SHGQ) (OMB Control No. 0920-1307, Exp. 11/30/2023)—Extension—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Shigella are a family of bacteria that cause the diarrheal disease shigellosis. It is estimated that *Shigella* causes about 450,000 cases of diarrhea in the United States annually, with increasing evidence of antimicrobial resistance. From 2009 through 2021, there have been 1,252 outbreaks of shigellosis in the United States, with most of these outbreaks attributed to person to person spread. Outbreaks of shigellosis have been reported in a range of settings such as community-wide, daycares, schools, restaurants, and retirement homes. Outbreaks of shigellosis have impacted a range of populations such as children, men who have sex with men, people experiencing homelessness, tight knit religious communities, international travelers, and refugees/displaced persons. Finally, outbreaks of shigellosis have been attributed to a range of

transmission modes including person-to-person/no common source, sexual person-to person contact, contaminated food, and contaminated water. As part of *Shigella* outbreak investigations, it is common for state and local health departments to conduct comprehensive interviews with cases and contacts to identify how individuals became sick with shigellosis, to identify individuals who could have come into contact with an individual sick with shigellosis, and to identify strategies to control the cluster or outbreak. As person-to-person contact is the most common mode of transmission for shigellosis, and shigellosis is highly contagious, it can be challenging to identify how individuals could have become ill. As a result, comprehensive hypothesis generating questionnaires focused on a

range of settings, activities, and potential modes of transmission are needed to guide prevention and control activities.

The Shigella Hypothesis Generating Questionnaire (SHGQ) will be administered by state and local public health officials via telephone interviews or self-administered web-based surveys with cases of shigellosis or their proxy who are part of a shigellosis cluster or outbreak. The SHGQ will collect information on demographics characteristics, household information and family member event and activity attendance, clinical signs and symptoms, medical care and treatment information, travel history, contact with international travelers or other ill individuals, event and activity attendance, limited food and water

exposure, work, visit, and volunteer locations, childcare and school attendance, and recent sexual partner(s) and activity. This interview/survey activity is consistent with the state's existing authority to investigate reports of notifiable diseases for routine surveillance purposes; therefore, formal consent to participate in the activity is not required. However, cases may choose not to participate and may choose not to answer any question they do not wish to answer. It will take health department personnel approximately 45 minutes to administer the questionnaire to an estimated 1,500 patient respondents. This results in an estimated annual burden to the public of 1,125 hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Shigellosis case patients identified as part of outbreak or cluster investigations.	Shigella Hypothesis Generating Questionnaire.	1,500	1	45/60	1,125
Total					1,125

Agency Information Collection
Activities: Proposed Collection;
Comment Request

AGENCY: Centers for Medicare &
Medicaid Services, Health and Human
Services (HHS).
ACTION: Notice.

SUMMARY: The Centers for Medicare &
Medicaid Services (CMS) is announcing
an opportunity for the public to
comment on CMS' intention to collect
information from the public. Under the
Paperwork Reduction Act of 1995 (the
PRA), federal agencies are required to
publish notice in the **Federal Register**

concerning each proposed collection of
information (including each proposed
extension or reinstatement of an existing
collection of information) and to allow
60 days for public comment on the
proposed action. Interested persons are
invited to send comments regarding our
burden estimates or any other aspect of
this collection of information, including
the necessity and utility of the proposed
information collection for the proper
performance of the agency's functions,
the accuracy of the estimated burden,
ways to enhance the quality, utility, and
clarity of the information to be
collected, and the use of automated
collection techniques or other forms of
information technology to minimize the
information collection burden.

DATES: Comments must be received by
September 12, 2023.

ADDRESSES: When commenting, please
reference the document identifier or
OMB control number. To be assured
consideration, comments and
recommendations must be submitted in
any one of the following ways:

1. *Electronically.* You may send your
comments electronically to [https://
www.regulations.gov](https://www.regulations.gov). Follow the
instructions for “Comment or
Submission” or “More Search Options”
to find the information collection

document(s) that are accepting
comments.

2. *By regular mail.* You may mail
written comments to the following
address: CMS, Office of Strategic
Operations and Regulatory Affairs,
Division of Regulations Development,
Attention: Document Identifier/OMB
Control Number: ____, Room C4–26–05,
7500 Security Boulevard, Baltimore,
Maryland 21244–1850.

To obtain copies of a supporting
statement and any related forms for the
proposed collection(s) summarized in
this notice, please access the CMS PRA
website by copying and pasting the
following web address into your web
browser: [https://www.cms.gov/
