SUPPLEMENTARY INFORMATION:

Section A. Background

On October 20, 1999, the Commission issued its final Rule¹ pursuant to the Children’s Online Privacy Protection Act, 15 U.S.C. 6501 *et seq.*, which became effective on April 21, 2000.² On December 19, 2012, the Commission amended the Rule, and these amendments became effective on July 1, 2013.³ The Rule requires certain website operators, among other things, to post privacy policies, provide notice, and obtain verifiable parental consent, prior to collecting, using, or disclosing personal information from children under the age of 13. The Rule enumerates methods for obtaining verifiable parental consent, while also allowing interested parties to file a written request for Commission approval of parental consent methods not currently enumerated.⁴ To be considered, parties must submit a detailed description of the proposed parental consent method, together with an analysis of how the method meets the requirements for parental consent described in 16 CFR 312.5(b)(1).

Pursuant to 16 CFR 312.12(a), the ESRB group has submitted a proposed parental consent method to the Commission for approval. The ESRB group proposes a consent mechanism that uses facial age estimation technology, which analyzes the geometry of the consenting person’s face to confirm the person is an adult. The full text of its application is available on the Commission’s website at www.ftc.gov and on the docket for this project at www.regulations.gov.

Section B. Questions on the Parental Consent Method

The Commission is seeking comment on the proposed parental consent method and is particularly interested in receiving comment on the questions that follow. These questions are designed to assist the Commission’s consideration of the application and should not be construed as a limitation on the issues on which public comment may be submitted. Responses to these questions should cite the number of the question being answered. For all comments submitted, please provide any data, statistics, or any other evidence, upon which those comments are based.

1. Is this method already covered by existing methods enumerated in 16 CFR 312.5(b)(2)?

2. If this is a new method, provide comments on whether the proposed

parental consent method meets the requirements for parental consent laid out in 16 CFR 312.5(b)(1). Specifically, the Commission is looking for comments on whether the proposed parental consent method is reasonably calculated, considering available technology, to ensure that the person providing consent is the child’s parent.

3. Does this proposed method pose a risk to consumers’ personal information, including consumers’ biometric information? If so, is that risk outweighed by the benefit to consumers and businesses of using this method?

4. Does this proposed method pose a risk of disproportionate error rates or other outcomes for particular demographic groups? If so, is that risk outweighed by the benefit to consumers and businesses of using this method?

Section C. Invitation To Comment

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before August 21, 2023. Write “Application for Parental Consent Method, Project No. P235402” on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including the <https://www.regulations.gov> website.

Citation Method

In the docket for the personal protective equipment in construction rulemaking, found at <http://www.regulations.gov>, every submission was assigned a document identification (ID) number that consists of the docket number (OSHA–2019–0003) followed by an additional four-digit number (e.g., OSHA–2019–0003–0002). In this notice of proposed rulemaking, citations to items in the docket are referenced by author or title and date, where appropriate. This information can be used to search for a supporting document in the docket at <http://www.regulations.gov>. For example, the citation for the OSHA Publication *Personal Protective Equipment is (Personal Protective Equipment, OSHA 3151–12R, 2004)*. Some citations include one or more attachments (see, e.g., NABTU, January 5, 2017, Attachment 1). When citing exhibits in the docket, OSHA references the author or title of the document, the date, the attachment number or other attachment identifier, if necessary for clarity, and page numbers (designated “p.”). In a citation that contains two or more documents, the citations are separated by semicolons. OSHA may also cite items that appear in another docket. When that is the case, OSHA includes the full document ID number for the corresponding docket (e.g., OSHA–2010–0034–4247).
