SUPPLEMENTARY INFORMATION:

I. Introduction

By letter dated September 13, 2022, RER applied for a source material license from the NRC for RER's proposed REE separation and processing demonstration plant to be located near Upton, Wyoming. In the Demonstration Plant, RER proposes to use its proprietary process to extract and concentrate neodymium-praseodymium (NdPr) and other rare earth oxides (REOs) from an approximately 907 metric-ton (1,000-ton) exploration sample obtained from RER's Bear Lodge site in the Black Hills National Forest in Wyoming. During processing, thorium in the exploration sample would be concentrated to a level necessitating a source material license from the NRC in accordance with the provisions of part 40 of title 10 of the *Code of Federal*
