

begin a technical review (ADAMS Accession No. ML22098A092).

If the NRC approves the decommissioning plan, the NRC will amend NRC License No. R-98. However, prior to doing so, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and the NRC's regulations. The NRC's findings will be documented in a safety evaluation report. The proposed action appears to qualify for a categorical exclusion under 10 CFR 51.22; therefore a separate environmental assessment will not be prepared in relation to this action.

### III. Notice and Solicitation of Comments

In accordance with section 10 CFR 20.1405, the Commission is providing notice and soliciting comments from local and State governments in the vicinity of the site and any Federally recognized Indian tribe that could be affected by the decommissioning activities for the Aerotest Radiography and Research Reactor. This notice and solicitation of comments is published pursuant to 10 CFR 20.1405, which provides for publication in the **Federal Register** and in a forum, such as local newspapers, letters to State or local organizations, or other appropriate forum, that is readily accessible to individuals in the vicinity of the site. Comments should be provided within 30 days of the date of this notice.

Further, in accordance with 10 CFR 50.82(b)(5), notice is also provided to interested persons of the Commission's intent to approve the decommissioning plan by amendment, subject to such conditions and limitations as it deems appropriate and necessary, if the plan demonstrates that decommissioning of the Aerotest Radiography and Research Reactor will be performed in accordance with the applicable NRC regulations, and will not be inimical to the common defense and security or to the health and safety of the public.

Dated: July 24, 2023.

###### B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC-2023-0063, in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <https://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

## II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized below.

1. *The title of the information collection:* NRC Form 749, "Manual License Verification Report"/License Verification System.  
 2. *OMB approval number:* 3150-0223.  
 3. *Type of submission:* Extension.  
 4. *The form number, if applicable:* NRC Form 749.

5. *How often the collection is required or requested:* On occasion. Licensees subject to part 37 of title 10 of the *Code of Federal Regulations*, "Physical Protection of Byproduct Material," license verification requirements must verify the legitimacy of the license with the issuing agency prior to transferring radioactive materials in quantities of concern.

6. *Who will be required or asked to respond:* Licensees are required to complete a license verification under the circumstances noted in 5 above. A License Verification System (LVS) is available to provide an electronic method for fulfilling this requirement. In cases where a licensee is unable to use the LVS to perform a verification, they will provide NRC Form 749 for manual license verification.

7. *The estimated number of annual responses:* 5,278 (589 manual license verification + 4,689 LVS).

8. *The estimated number of annual respondents:* 5,278 (589 manual license verification + 4,689 LVS).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 297 (59 manual license verification + 238 LVS)

10. *Abstract:* When a licensee is unable to use the License Verification System to perform their license verification prior to transferring radioactive materials in quantities of concern, a manual process is available, in which licensees submit the NRC

Form 749, "Manual License Verification Report." The form provides the information necessary for the license issuing agencies to perform the verification on behalf of the licensee transferring the radioactive materials.

## III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.

2. Is the estimate of the burden of the information collection accurate? Please explain your answer.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated: July 25, 2023.
