

monitoring network documentation are also maintained by each state and local agency, in AQS electronic format where possible.

Although the state and local air pollution control agencies and tribal entities are responsible for the operation of the air monitoring networks, the EPA funds a portion of the total costs through federal grants. The costs shown in this renewal are the total costs incurred for the monitoring program regardless of the source of the funding. This practice of using the total cost is consistent with prior ICR submittals and renewals.

Form numbers: None.

Respondents/affected entities: State, Local, and Tribal Air Pollution Control Agencies.

Respondent's obligation to respond: Mandatory (40 CFR part 58).

Estimated number of respondents: 168 (total).

Frequency of response: Quarterly.

Total estimated burden: 1,449,968 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$181,278,444 (per year), includes \$70,147,486 annualized capital or operation & maintenance costs.

Changes in the estimates: This is a decrease of 321,694 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease is due to the consolidation of monitors into fewer sites, consolidation of PAMS network burden estimates to avoid double counting, termination of unnecessary monitors, and more efficient automated procedures (e.g., moving from manual samplers to automated continuous samplers) for measuring and reporting data. The decrease is offset somewhat by the additional burden and cost estimates included for asset management and sensors.
