burden for this collection of
information, including the validity of
the methodology and assumptions used;

(3) Ways to enhance the quality,
utility, and clarity of the information to
be collected; and

(4) How might the agency minimize
the burden of the collection of

Abstract: The National Park Service
(NPS) is authorized by the National Park
Service Protection, Interpretation, and
Research in System (54 U.S.C. 100701)
statutes to collect information used to
enhance the management and planning
of parks and their resources. The
Climate Change Response Program

(administered through the Natural
Resource Stewardship and Science
directorates) and the U.S. Fish and
Wildlife Service (FWS) Human
Dimensions Branch (administered
through the Natural Resource Program
Center within the National Wildlife
Refuge System) are partnering to
conduct a voluntary, on-site survey to
understand park and refuge visitors’
attitudes, perceptions, and beliefs about
climate-related topics.

The National Park System and the
National Wildlife Refuge System protect
places, resources, and experiences of
importance to the American public. But
climate change has serious implications
for the protection of landscapes,
ecosystems, recreational opportunities,
and visitor experiences in parks and
refuges. Thus, the NPS and FWS seek to
better understand visitors’
understanding and concerns about
climate change.

The NPS and FWS administer high-
quality programs of interpretation and
education and communication about
pressing, climate-related topics is
increasingly necessary. Audience
analysis is important for guiding such
efforts. The results of this survey will
provide insight into topics, methods,
and/or communications media of most
interest to park and refuge visitors.
