SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Overcoming Barriers to Safe Firearms Storage Among Different Groups; OMB Control Number 0704–OBFS.

Needs and Uses: The Defense Suicide Prevention Office (DSPO) has contracted with Center for Naval Analyses (CNA) to conduct a study titled “Overcoming Barriers to Safe Firearms Storage Among Different Groups.” The goal of the study is to assist the services in meeting the requirements set forth in Department of Defense (DoD) Instruction 6490.16 that all suicide prevention activities are developed from a relevant evidence-base and have an evaluation capability prior to implementation. DSPO wants to craft safe firearm storage messages that will be persuasive to servicemembers of varying races and genders in response to changing demographics of firearm owners and suicides completed using a firearm in the civilian sector. To do so, CNA has developed a survey that will address the following issues:

- What are the barriers to safe firearm storage practices among different groups?
- Do different demographic groups respond to messages differently, and if so, how should messaging be targeted? For example, would these servicemembers respond more positively if their demographic group were featured in safety appeals?
- What principles could be introduced to OSD lethal means safety messaging to make it better resonate across demographic groups?

This survey will provide unique information to help DoD (a) determine what attitudinal and other barriers prevent service members from adopting safe firearms storage practices, (b) decide which aspects of a safe storage message are most persuasive in overcoming those barriers, and (c) learn whether female and black service members respond differently to safe storage messaging. The findings from the survey will support DoD Instruction 6400.09’s instruction to focus suicide prevention efforts on research-based programs, policies, and practices. They will also assist in executing data-informed actions to reduce and stop self-directed harm (Section 1.2.b), promoting an understanding of lethal means safety among the military community (Section 4.3.b), and addressing the needs of high-risk groups (Section 4.7.a.).

Responses per Respondent: 1.
Annual Responses: 1,500.
Average Burden per Response: 15 minutes.
