The spreadsheet also contains the data upon which the allocations are based, including the 2023 state emissions budgets that EPA has computed according to the prorating procedure in the regulations. The spreadsheet is an update of an earlier version included in the docket for the final Good Neighbor Plan which showed the allocations for the 2024 and 2025 control periods as well as illustrative allocations for the 2023 control period. All allocations have been determined according to the allocation methodology finalized in the Good Neighbor Plan rulemaking.<sup>10</sup> EPA is not requesting comment on the allocations, the underlying data, or the allocation methodology.

In accordance with the deadlines set forth in the regulations, EPA will record allocations of CSAPR NO<sub>x</sub> Ozone Season Group 3 allowances to existing units for the 2023 control period by September 5, 2023.<sup>11</sup> EPA will also record allocations to existing units for the 2024 control period by that same date except in instances where a state has provided EPA with timely notice of the state's intent to submit a SIP revision with state-determined allowance allocations replacing EPA's default allocations for the 2024 control period.<sup>12</sup> However, in the case of any source that has not yet fully complied with the Good Neighbor Plan's requirements concerning the recall of CSAPR NO<sub>x</sub> Ozone Season Group 2 allowances allocated for control periods after 2022, recordation of CSAPR NO<sub>x</sub> Ozone Season Group 3 allowances will be deferred until the source has fully complied with the recall requirements.<sup>13</sup> EPA will record allocations of CSAPR NO<sub>x</sub> Ozone Season Group 3 allowances to existing units for the 2025 control period by July 1, 2024.<sup>14</sup>

EPA notes that an allocation or lack of allocation of emission allowances to a given unit under a CSAPR trading program does not constitute a determination that the trading program does or does not apply to the unit.<sup>15</sup> EPA also notes that allocations are

subject to potential correction or termination under the regulations.<sup>16</sup>
