

94.6 hours (4.73 hours × 20 prototypes) per establishment, per year. This translates to an estimated annual recordkeeping time cost to all mattress producers of 38,124 hours (94.6 hours × 403 establishments). The hourly compensation for the time required for record keeping is \$72.68 (for management, professional, and related occupations in goods-producing industries, Bureau of Labor Statistics, March 2023).¹ Accordingly, the annual total estimated cost for recordkeeping is approximately \$2,770,852 (38,124 hours × \$72.68 per hour). Pooling among establishments or using a prototype qualification for longer than 1 year will reduce the hours required and associated cost, however.

The total estimated annual cost to the 403 establishments for the burden hours associated with parts 1632 and 1633 is approximately \$3.5 million (\$761,541 + \$2,770,852 = \$3,532,393).

SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following currently approved collection of information:

A. Background

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB Number: 3041-0148.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Individuals and households, businesses and organizations, state, local, or tribal government.

Description of Collection: Executive Order 12862 (Sept. 11, 1993) encourages independent Federal agencies such as CPSC to provide service to the public that matches or exceeds the best service available in the private sector. To that end, CPSC seeks to renew OMB approval of a generic clearance to collect qualitative feedback on CPSC service delivery. Qualitative feedback means information that provides useful insights on perceptions and opinions but does not include statistical surveys that yield quantitative results that can be generalized to the population of study. This collection of information is necessary to enable CPSC to garner customer and stakeholder feedback in an efficient, timely manner, in accordance with CPSC's commitment to improving service delivery.

This feedback will provide insights into customer or stakeholder perceptions, experiences, and expectations; provide an early warning of issues with service; and help focus attention on areas where communication, training, or changes in operations might improve delivery of products or services. These collections will also allow for ongoing, collaborative, and actionable communications between CPSC and its customers and stakeholders.

B. Burden

Estimated Burden: CPSC will use a variety of instruments and platforms to collect information from respondents. CPSC estimates the burden of the collection of information is as follows:

¹ We updated this estimate from the June 20, 2023 notice (88 FR 39833) to use the more recent March 2023 Bureau of Labor Statistics.

ESTIMATED ANNUAL REPORTING BURDEN

Type of collection	Number of respondents	Annual frequency per response	Hours per response	Total hours
Qualitative Surveys (3)	600	1	.25	150
Focus Groups	200	1	4	800
Customer Satisfaction Surveys (3)	600	1	.25	150
Usability Tests	200	1	.5	100

Based on the above numbers, the total estimated burden for surveys, focus groups, and usability tests combined is estimated to be 1,200 hours annually. The total burden hours requested, 3,600, are based on the number of collections CPSC expects to conduct over the requested period for this clearance (1,200 hours annually x 3 years).

Assuming an hourly rate of \$43.07 (U.S. Bureau of Labor Statistics, "Employer Costs for Employee Compensation," All Civilian Workers, Total compensation, https://www.bls.gov/news.release/archives/ecec_06162023.pdf, March 2023) the estimated total burden cost is \$51,684 annually. This collection has no associated operating, maintenance, or capital costs.

If appropriate, CPSC will collect information electronically and/or use online collaboration tools to reduce burden. No similar data are gathered or maintained by CPSC, or available from other sources known to CPSC.

Burden on Small Entities: Small businesses or other small entities may be involved in these efforts, but CPSC will minimize the burden of information collections approved under this clearance by sampling, asking for readily available information, and using short, easy-to-complete information collection instruments.

Costs to Federal Government: The anticipated cost to the Federal Government is approximately \$51,574 annually. These costs are comprised of staff time for preparing questions, analyzing the responses, and conducting focus groups. CPSC estimates the total staff time could be four staff months annually. This is based on a GS-12 level salaried employee. The average annual wage rate for a mid-level salaried GS-12 employee in the Washington, DC metropolitan area (effective as of January 2023) is \$106,759 (GS-12, step 5). This represents 69.0 percent of total compensation (U.S. Bureau of Labor Statistics, "Employer Costs for Employee Compensation," March 2023, percentage of wages and salaries for all civilian employees, https://www.bls.gov/news.release/archives/ecec_06162023.pdf). Adding an

additional 31.0 percent for benefits brings average annual compensation for a mid-range salaried GS-12 employee to \$154,723. Assuming that approximately four staff months will be required annually, this results in an annual estimated cost of \$51,574.

C. Request for Comments

CPSC solicits written comments from all interested persons about the proposed collection of information. CPSC specifically solicits information relevant to the following topics:

- Whether the collection of information described is necessary for the proper performance of CPSC's functions, including whether the information would have practical utility;
- Whether the estimated burden of the proposed collection of information is accurate;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be minimized by use of automated, electronic, or other technological collection techniques, or other forms of information technology.
