

personnel and other participants, as necessary, to integrate their solution into a demonstration of a use case. Following successful demonstration, NIST will publish a description of each demonstration that includes information such as server architecture, device architecture, usability considerations, performance characteristics, and lessons learned that meets the security and privacy objectives of the *Accelerate Adoption of Digital Identities on Mobile Devices* project. These descriptions will be public information.

Under the terms of the NCCoE consortium CRADA, NIST will support development of interfaces among participants' products by providing IT infrastructure, laboratory facilities, office facilities, collaboration facilities, and staff support to component composition, security platform documentation, and demonstration activities.

The dates of the demonstration of *Accelerate Adoption of Digital Identities on Mobile Devices* project capability will be announced on the NCCoE website at least two weeks in advance at <https://www.nccoe.nist.gov/projects/digital-identities-mdl>. The expected outcome will demonstrate how the components of the *Accelerate Adoption of Digital Identities on Mobile Devices* project architecture can provide security and privacy capabilities to mitigate potential risks to digital identities throughout their lifecycle. Participating organizations will gain from the knowledge that their products are interoperable with other participants' offerings.

For additional information on the NCCoE governance, business processes, and NCCoE operational structure, visit the NCCoE website <https://nccoe.nist.gov/>.
