

previous analysis was begun before the end of the grace period. For CO, PM<sub>10</sub> and PM<sub>2.5</sub> hot-spot analyses that start during the grace period, project sponsors can choose to use MOVES3 or MOVES4.

EPA encourages sponsors to use the consultation process to determine which option may be most appropriate for a given situation. Any new CO, PM<sub>10</sub> or PM<sub>2.5</sub> hot-spot analyses for conformity purposes begun after the end of the grace period must be based on MOVES4. EPA has guidance on how to conduct quantitative PM<sub>2.5</sub> and PM<sub>10</sub> hot-spot modeling for transportation conformity purposes, and on how to use MOVES for a CO hot-spot analysis. Until EPA updates these guidance documents, the MOVES3-based guidance still generally applies for MOVES4. See EPA's "Project-level Conformity" website, [www.epa.gov/state-and-local-transportation/project-level-conformity-and-hot-spot-analyses](http://www.epa.gov/state-and-local-transportation/project-level-conformity-and-hot-spot-analyses), for the latest information and guidance documents on how to conduct CO, PM<sub>10</sub> and PM<sub>2.5</sub> hot-spot modeling for transportation conformity purposes.

Any new, quantitative CO, PM<sub>10</sub> or PM<sub>2.5</sub> hot-spot analysis for conformity purposes begun after the end of the grace period using EPA's emissions model must use MOVES4. The interagency consultation process should be used if it is unclear whether these conditions are met. For questions about which model should be used in a project-level conformity determination, consult with your EPA Regional Office.

#### *E. FHWA's CO Categorical Hot-Spot Finding*

FHWA released the most recent CO categorical hot-spot finding for intersection projects on January 31, 2023, that was based on MOVES3.<sup>11</sup> During the MOVES4 grace period, a project sponsor outside of California may continue to rely on the categorical finding for applicable projects that are determined through interagency consultation to be covered by the finding's parameters. However, new CO hot-spot analyses for conformity purposes begun after the end of the MOVES4 grace period would not be able to rely on the MOVES3-based January 2023 CO categorical hot-spot finding.

#### *F. CO Hot-Spot Protocols That Were Previously Approved Into the SIP*

Section 93.123(a)(1) of the transportation conformity regulation allows areas to develop alternate

procedures for determining localized CO hot-spot analyses, when developed through interagency consultation and approved by the EPA Regional Administrator. Some states have chosen in the past to develop such procedures based on previous EPA emissions models.

During the MOVES4 grace period, areas with previously approved CO hot-spot protocols based on MOVES3 may continue to rely on these protocols. Once the MOVES4 two-year grace period ends, new CO hot-spot analyses for conformity purposes will need to be based on MOVES4. Previously approved SIP CO hot-spot protocols that are based on emissions models prior to MOVES3 can no longer be used for transportation conformity purposes.
