

• A request to invoice the filing fee required by 10 CFR 50.30(e) and 10 CFR 170.21.

The NRC staff determined that the application is acceptable for docketing under Docket Nos. 50–611 and 50–612. The NRC staff provided Kairos notice of the acceptance and docketing determinations by letter dated September 11, 2023 (ADAMS Accession No. ML23233A167).

The NRC staff will perform a detailed technical review of the construction permit application and document its safety findings in a safety evaluation report. Also, the NRC staff will perform an environmental review and document its findings in accordance with 10 CFR part 51, “Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions,” and the National Environmental Policy Act.

Docketing of the application does not preclude the NRC from requesting additional information from the applicant as the review proceeds, nor does it predict whether the Commission will grant or deny the application. The construction permit application will be referred to the Advisory Committee on Reactor Safeguards for review and report consistent with 10 CFR 50.58, “Hearings and report of the Advisory Committee on Reactor Safeguards.” If, after holding an evidentiary hearing, the Commission finds that the construction permit application meets the applicable standards of the Atomic Energy Act and the Commission’s regulations, and that any required notifications to other agencies and bodies have been made, the Commission will issue a construction permit, in the form and containing conditions and limitations that the Commission finds appropriate and necessary.

The Commission will announce, in a future **Federal Register** notice, the opportunity to petition for leave to intervene in a proceeding on the construction permit application.

Dated: September 11, 2023.
