Daniel J. Crooks III, Assistant General Counsel/Rules Administrator, Federal Bureau of Prisons, at the address above or at (202) 353-4885.

SUPPLEMENTARY INFORMATION: Title 28 of the Code of Federal Regulations, part 505, allows for assessment of a fee to cover the average cost of incarceration for Federal inmates. We calculate the cost of incarceration fee (COIF) by dividing the number representing the Bureau of Prisons (Bureau) facilities' monetary obligation (excluding activation costs) by the number of inmate-days incurred for the fiscal year, and then by multiplying the quotient by the number of days in the fiscal year.

Based on FY 2021 data, the average annual COIF for a Federal inmate housed in a Bureau or non-Bureau facility in FY 2021 was \$43,836 (\$120.10 per day). The average annual COIF for a Federal inmate housed in a Residential Reentry Center for FY 2021 was \$37,012 (\$101.40 per day). (Please note: There were 365 days in FY 2021.)

Based on FY 2022 data, the average annual COIF for a Federal inmate housed in a Bureau or non-Bureau facility in FY 2022 was \$42,672 (\$116.91 per day). The average annual COIF for a Federal inmate housed in a Residential Reentry Center for FY 2022 was \$39,197 (\$107.39 per day). (Please note: There were 365 days in FY 2022.)

James Wills,

Assistant Director/General Counsel, Federal Bureau of Prisons.

Title of Collection: The 2024 National Training, Education, and Workforce Survey.

OMB Control Number: 3145–0264.

Expiration Date: November 30, 2024.

Type of Request: Intent to seek approval to extend an information collection for three years.

Abstract: The *CHIPS Act of 2022, Public Law 117–167, § 10314*, requires the Director of NSF to provide a portfolio analysis of NSF’s investments in the skilled technical workforce. With the widespread integration of science and technology in society, including its central role in the economy, work has changed for individuals at all education levels, making skilled technical workers increasingly important to U.S. economic competitiveness, national security, and scientific progress. American workers who use science, technology, engineering, and mathematics (STEM) knowledge and skills in their jobs but do not require a bachelor’s degree or above comprise the skilled technical workforce (STW). While some limited federal data exist to quantify the number of skilled technical workers, the National Training, Education, and Workforce Survey (NTEWS) allows for a longitudinal analysis to measure the pathways of how individuals enter, maintain relevance, or seek advancement in STW occupations.

The NTEWS continues to be a voluntary response data collection sponsored by the National Center for
