

with suggestions for survey questions. These suggestions were carefully considered, and where appropriate, incorporated into the survey questionnaire.

To test question understanding and clarity of instructions, a pre-test of the draft survey was also conducted with participation of five EV owners. Following completion of the survey, one hour long cognitive interviews were conducted with each of the pre-testers to collect information on their survey experience and other feedback for improving the survey. Overall, the pre-testers reported that the survey was clear, and they did not have any major issues with understanding the survey questions/instructions.
