

response programs, offer law enforcement and security personnel the greatest opportunity to disrupt or dissuade acts of terrorism before they occur. Additionally, licensees' timely submission of suspicious activity reports to the NRC supports one of the agency's primary mission essential functions of threat assessment for licensed facilities, materials, and shipping activities.

Following the publication of the final rule and RG 5.87, the NRC staff conducted several pre-implementation workshops with licensees. The NRC staff also participated in industry-led forums and symposiums in May and June 2023. In these meetings industry raised questions about RG 5.87 and identified potential inconsistencies and areas where additional clarification would be beneficial to licensees to implement the Enhanced Weapons rule effectively and efficiently. The NRC staff has reviewed the issues raised by industry and agrees that further clarification, revision, and supplementation of the guidance contained in RG 5.87 will be of value. Accordingly, the NRC staff is proposing to conduct limited-scope revisions to RG 5.87 to address these issues, including providing notice and opportunity for public comment on the proposed revisions.

To assist with stakeholder review of the limited scope changes to DG-5082, staff notes the following changes have been proposed:

Section B, "Discussion" Topics

- "Reason for Issuance"—updated to clarify rationale for RG changes.
- "Reporting Timeliness and Order of Precedence," item number 4 and Note—updated to clarify Federal Aviation Administration (FAA) facility.
- "Reporting Timeliness and Order of Precedence," paragraphs 2–5—updated to clarify FAA reporting requirements.

Section C, "Staff Regulatory Guidance"

- Position 5.2, "Challenges to Licensee's Security Systems and Procedures—Facilities," paragraph 3—clarifies exceptions to the reporting requirements.

Appendix A, "Suspicious Aviation-Related Activities"

- A-2.1, "Coordination with the FAA, paragraph 2"—modified expectations regarding licensee's ongoing awareness of Notice to Airman advisories.
- A-3, "Assessing Potentially Suspicious Aviation-Related Activity"—modified the applicable FAA facility to

be notified of suspicious aviation-related activity.

The staff is also issuing for public comment a regulatory analysis (ADAMS Accession No. ML23200A284). The staff developed a regulatory analysis to assess the value of issuing or revising an RG as well as alternative courses of action.

As noted in the **Federal Register** on December 9, 2022 (87 FR 75671), this document is being published in the "Proposed Rules" section of the **Federal Register** to comply with publication requirements under 1 CFR chapter I.

III. Backfitting, Forward Fitting, and Issue Finality

Issuance of DG-5082 as a final RG would not constitute backfitting as that term is defined in 10 CFR 50.109, "Backfitting," 10 CFR 70.76, "Backfitting," or 10 CFR 72.62, "Backfitting," and as described in NRC Management Directive (MD) 8.4, "Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests," nor does the NRC staff intend to use the guidance to affect the issue finality of an approval under 10 CFR part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants." The staff also does not intend to use the guidance to support NRC staff actions in a manner that constitutes forward fitting as that term is defined and described in MD 8.4 because reporting requirements are not included within the scope of the NRC's backfitting or issue finality rules or forward fitting policy.

IV. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the "Regulatory Guide" series.
