Federal Register

Vol. 88, No. 207

Friday, October 27, 2023

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Doc. No. AMS-DA-23-0061]

Notice of Request for Extension and Revision of a Currently Approved Information Collection

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Agricultural Marketing Service's (AMS) intention to request approval, from the Office of Management and Budget (OMB), for an extension of and revision to the currently approved information collection for report forms under the Federal milk marketing order program.

DATES: Comments on this notice must be received by December 26, 2023 to be assured of consideration.

ADDRESSES: Interested persons are invited to submit comments concerning this notice by using the electronic process available at <https://www.regulations.gov>. All comments should reference the document number and the date and the page number of this issue of the **Federal Register**. Written comments may be submitted via mail to the Office of Deputy Administrator, Dairy Program, AMS, USDA, 1400 Independence Avenue SW, Room 2530 South, Stop 0225, Washington, DC 20250-0225. All comments received will be posted without change, including any personal information provided, at <https://www.regulations.gov> and will be included in the record and made available for the public inspection. Please do not include personally identifiable information (such as name, address, or other contact information) or confidential business information that

you do not want publicly disclosed. Comments may be submitted anonymously.

FOR FURTHER INFORMATION CONTACT:

Janel L. Barsi, Director, Operations and Accountability Division, Dairy Program, Agricultural Marketing Service, U.S. Department of Agriculture, Room 2530, South Building, 1400 Independence Avenue SW, Washington, DC 20250-0230; Email: Janel.Barsi@usda.gov.

SUPPLEMENTARY INFORMATION:

Title: Report Forms under Federal Milk Orders (From Milk Handlers and Milk Marketing Cooperatives).

OMB Number: 0581-0032.

Expiration Date of Approval: February 29, 2024.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: Federal milk marketing order regulations (7 CFR parts 1000-1199) authorized under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), require milk handlers to report in detail the receipts and utilization of milk and milk products handled at each of their plants that are regulated by a Federal order. The data are needed to administer the classified pricing system and related requirements of each Federal order.

A Federal milk marketing order (hereinafter, Order) is a regulation issued by the Secretary of Agriculture that places certain requirements on the handling of milk in the area it covers. Each order is established under the authority of the Act. The Order requires that handlers of milk for a marketing area pay not less than certain minimum class prices according to how the milk is used. These prices are established under each Order after a public hearing at which evidence is received on the supply and demand conditions for milk in the market. An Order requires that payments for milk be pooled and paid to individual farmers or cooperative associations of farmers on the basis of a uniform or average price. Thus, all eligible farmers (producers) share in the market wide use-values of milk by regulated handlers.

Milk Orders help ensure adequate supplies of milk and dairy products for consumers and adequate returns to producers.

The Orders also provide for the public dissemination of market statistics and

other information for the benefit of producers, handlers, and consumers.

Formal rulemaking amendments to the Orders must be approved in referenda conducted by the Secretary.

During 2022, 23,108 dairy farmers delivered over 151.6 billion pounds of milk to handlers regulated under the milk orders. This volume represents 67 percent of all milk marketed in the U.S. and 68 percent of the milk of bottling quality (Grade A) sold in the country. The value of this milk delivered to Federal milk order handlers at minimum order blend prices was over \$35.9 billion. Producer deliveries of milk used in Class I products (mainly fluid milk products) totaled 41.0 billion pounds, 27 percent of total producer deliveries.

Each Order is administered by a USDA market administrator. The market administrator is authorized to levy assessments on regulated handlers to carry out the market administrator's duties and responsibilities under the Orders. Additional duties of the market administrators are to prescribe reports required of each handler, to assure that handlers pay producers and associations of producers according to the provisions of the Order. The market administrator employs a staff that verifies handlers' reports by examining records to determine that the required payments are made to producers. Most reports required from handlers are submitted monthly to the market administrator.

The forms used by the market administrators are required by the respective Orders that are authorized by the Act. The forms are used to establish the quantity of milk received by handlers, the pooling status of the handlers, the class-use of the milk used by the handler, and the butterfat content and amounts of other components of the milk.

The forms covered under this information collection require the minimum information necessary to effectively carry out the requirements of the Orders, and their use is necessary to fulfill the intent of the Act as expressed in the Orders and in the rules and regulations issued under the Orders. The information collected is used only by authorized employees of the market administrator and authorized representatives of the USDA, including AMS Dairy Programs' headquarters staff.

Estimated of Burden: Public reporting burden for this collection of information

is estimated to average 0.50 hours per response.

Respondents: Milk handlers and milk marketing cooperatives.

Estimated Number of Respondents: 679.

Estimated Total Annual Responses: 15,980.

Estimated Number of Responses per Respondent: 186.

Estimated Total Annual Burden on Respondents: 18,050 (rounded).

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received on this information collection will be summarized and included in the final request for OMB approval. All comments will become a matter of public record, including any personal information provided.

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to

respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by November 27, 2023 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal and Plant Health Inspection Service

Title: National Animal Health Monitoring System Backyard Animal Keeping 2024 Study.

OMB control number: 0579-XXXX.

Summary of collection: Under the Animal Health Protection Act of 2002 (7 U.S.C. 8301 *et seq.*), the Secretary of Agriculture is authorized to protect the health of livestock, poultry, and aquaculture populations in the United States by preventing the introduction and interstate spread of contagious, infectious, or communicable diseases of livestock, poultry, and aquatic animals and for eradicating such diseases within the United States when feasible. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS). APHIS is the only Federal agency responsible for collecting data on livestock and poultry health. As part of this mission, APHIS operates the National Animal Health Monitoring System (NAHMS) which collects statistically valid and scientifically sound data on the prevalence and economic importance of livestock, poultry, and aquaculture diseases and practices. NAHMS' studies have evolved into a collaborative government and industry initiative to help determine the most effective means of preventing and controlling diseases of livestock and poultry. NAHMS will conduct a national data collection for backyard animal keeping through a

national study, Backyard Animal Keeping 2024.

APHIS will conduct two surveys using electronic questionnaires. The first survey will obtain national estimates of ownership of poultry, pigs, rabbits, and goats, and provide baseline information on ownership practices. A second survey will be performed to estimate the prevalence of chicken, pig, rabbit, and goat ownership in two of the four cities previously studied in the NAHMS Poultry 2010 study, as well as describe respondents' beliefs about chicken ownership. The study results will also be used to learn more about backyard animal keeping and food security status.

Need and use of the information: Information collected will enable APHIS to obtain national estimates of the percentage of households that own poultry, pigs, rabbits, and goats in urban and non-urban areas of the United States; describe animal management practices, such as information sources owners use to learn about animal health, access to veterinary care, length of ownership, and biosecurity practices including those relevant to antimicrobial stewardship; for households that both own and do not own poultry, pigs, rabbits, and goats, describe opinions of backyard and urban ownership of chickens, and, for non-owners only, describe any contact with live poultry and intention to own any one of these species of interest in the future; estimate the prevalence of chicken, pig, rabbit, and goat ownership in two of the cities surveyed on urban chicken ownership in 2012 (Denver, Colorado and Miami, Florida), and describe respondents' beliefs about chicken ownership to determine changes in prevalence and beliefs between 2012 and 2024; and conduct a preliminary evaluation of the relationship between backyard animal keeping and food security status. Without the aforementioned data collection, the United States' ability to collect and analyze information on the national prevalence of these species of interest and to obtain data on animal management practices and biosecurity practices would be reduced or nonexistent.

Description of respondents: Households or individuals.

Number of respondents: 112,745.

Frequency of responses: Reporting: Other (one time).
