

Aquatic Resource Delineation Datasheets

In order for the Corps to determine the amount and extent of aquatic resources at a site, the Corps must geographically delineate aquatic resources in accordance with established regulations, policy, and guidance. The aquatic resource delineation datasheets fall into two main categories: (1) the ENG 6119 (0–9) series, which are our automated wetland determination data sheets (ADS) and (2) the Ordinary High Water Mark (OHWM) field identification datasheet.

To delineate wetlands, the Corps uses the 1987 Corps of Engineers Wetlands Delineation Manual (Corps Manual) and the most current applicable regional supplements. There are ten wetland data sheets in total but these really are one single collection that is split into 10 regional sub-forms. The ADSs streamline the information collection process by incorporating reference material and analytical processes directly into the form, which is provided as a Microsoft Excel document rather than the PDF form included in the regional supplements. Additionally, the ADSs automate data analysis using information input by the respondent (e.g., the “dominance test” for wetland vegetation), which will reduce the time and effort required to complete these processes.

Non-tidal, non-wetland waters of the United States, which are defined in 33 CFR part 328, must be delineated to the extent of the ordinary high water mark (OHWM), which is defined at 33 CFR 328.3(c)(4) and 33 CFR 329.11(a)(1). Regulatory Guidance Letter (RGL) 05–05 provides guidance on identification of OHWM. In 2022, the Corps released a draft Engineer Research and Development Center Technical Report, “National Ordinary High Water Mark Field Delineation Manual for Rivers and Streams” (Draft National Manual), which is the first national manual that provides and describes indicators and a methodology which will help improve consistency in the identification and delineation of the OHWM by (1) providing consistent definitions of OHWM indicators; (2) outlining a clear, step-by-step process for identifying the OHWM using a Weight-of-Evidence approach; and (3) providing a datasheet for logging information at a site. As part of the development of the Draft National Manual, the Corps developed a Data Sheet (ENG 6250) for facilitating documentation of the OHWM.

SUPPLEMENTARY INFORMATION: The AARO Contact Form for Authorized Reporting information collection will be used to gather contact information, to include Personally Identifiable Information (PII), from members of the public. The collection is necessary to enable the All-domain Anomaly Resolution Office (AARO), Office of the Secretary of Defense, Department of Defense, to meet its statutory requirements. FY23 NDAA, Section 1673, "Unidentified Anomalous Phenomena Reporting Procedures" requires that the Secretary of Defense "issue clear public guidance for how to securely access the mechanism for authorized reporting" no later than 180 days from enactment, which was June 2023. Furthermore, Section 1683 of the FY23 NDAA requires AARO to produce a Historical Record Report detailing the historical record of the United States government relating to unidentified anomalous phenomena (UAP). To meet this requirement, AARO relies on the "AARO Contact Form" to receive reports from individuals with knowledge of potential UAP programs.

Title; Associated Form; and OMB Number: AARO Contact Form for Authorized Reporting; OMB Control Number 0704-0674.

Needs and Uses: The AARO Contact Form for Authorized Reporting information collection will be used to gather contact information, to include Personally Identifiable Information (PII) from members of the public. The collection is necessary to enable the All-domain Anomaly Resolution Office (AARO), Office of the Secretary of Defense, Department of Defense, to meet its statutory requirements.

The proposed information collection, *AARO Contact Form for Authorized Reporting*, enables AARO to comply with Section 1673 of the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023 (FY23 NDAA), which directs AARO to establish a secure mechanism for authorized reporting of U.S. Government programs and activities related unidentified anomalous phenomena (UAP). The form will collect contact information from current and former U.S. Government employees, service members, and contractors who wish to make an authorized report to AARO. The collection is necessary to enable persons wanting to make a report to contact AARO directly.
