Food and Nutrition Service

Title: Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) Breastfeeding Award of Excellence.

OMB Control Number: 0584–0591.

Summary of Collection: The Healthy, Hunger-Free Kids Act of 2010 (HHFKA) (*Pub. L. 111–296*, Sec 231) requires the U.S. Department of Agriculture (USDA) to implement a program to recognize exemplary breastfeeding support practices at Women, Infants, and Children (WIC) local agencies and clinics. The WIC program, of which the breastfeeding award of excellence is a part, is authorized by the Child Nutrition Act of 1966 (*42 U.S.C. 1787*). The WIC Program provides breastfeeding promotion and support for pregnant and postpartum mothers as a part of its mission to improve the health of the approximately 6 million Americans it serves each month. Breastfeeding is a priority in WIC and WIC mothers are strongly encouraged to breastfeed their infants unless medically contraindicated.

Need and Use of the Information: While HHFKA mandates that the USDA provide a program to recognize exemplary breastfeeding support practices, it is voluntary for the WIC local agencies and clinics to apply for an award. Information is collected from the WIC local agencies to apply for an award and used by the WIC state agencies to evaluate the applications. The award application period is open once annually and has been designed to allow local WIC agencies at different stages of progress in breastfeeding promotion and support program development to apply for an award. The information collection will meet the HHFKA requirement to implement a program to recognize exemplary breastfeeding support practices at WIC local agencies and clinics. The information collected through this program will be used to evaluate components of existing breastfeeding programs and support within WIC local agencies, to recognize local WIC agencies that provide exemplary breastfeeding programs and support services, and to provide examples of model programs to motivate local agencies and clinics to strengthen their breastfeeding promotion and support activities.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 239.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 514.

Ruth Brown,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2023–0068]

Addition of Belarus to the List of Regions Affected With Highly Pathogenic Avian Influenza

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that we added Belarus to the list of regions that the Animal and Plant Health Inspection Service considers to be affected by highly pathogenic avian influenza (HPAI). This action follows our imposition of HPAI-related restrictions on avian commodities originating from or transiting Belarus, as a result of reports of HPAI in that country.

DATES: Belarus was added to the list of regions APHIS considers to be affected with HPAI, effective on August 22, 2023.

FOR FURTHER INFORMATION CONTACT: Dr. Heather Sriranganathan, APHIS Veterinary Services, Regionalization Evaluation Services, 4700 River Road, Riverdale, MD 20747; phone: (717) 818–3582; email: AskRegionalization@usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 94 (referred to below as the regulations) govern the importation of certain animals and animal products into the United States to prevent the introduction of various animal diseases, including Newcastle disease and highly pathogenic avian influenza (HPAI). The regulations prohibit or restrict the importation of live poultry, poultry meat, and other poultry products from regions where these diseases are considered to exist.

Section 94.6 of the regulations contains requirements governing the importation into the United States of carcasses, meat, parts or products of carcasses, and eggs (other than hatching eggs) of poultry, game birds, or other birds from regions of the world where HPAI exists or is reasonably believed to exist. HPAI is an extremely infectious and potentially fatal form of avian

influenza in birds and poultry that, once established, can spread rapidly from flock to flock. The Animal and Plant Health Inspection Service (APHIS) maintains a list of restricted regions it considers affected with HPAI of any subtype on the APHIS website at <https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/animal-health-status-of-regions>.

APHIS receives notice of HPAI outbreaks from veterinary officials of the exporting country, from the World Organization for Animal Health (WOAH),¹ or from other sources the Administrator determines to be reliable.

On August 22, 2023, APHIS added Belarus to the list of regions where HPAI exists based on credible media and interagency reports of HPAI outbreaks in poultry in Belarus. On that same day, APHIS issued an import alert notifying stakeholders that APHIS imposed restrictions on the importation of poultry, commercial birds, ratites, avian hatching eggs, unprocessed avian products and byproducts, and certain fresh poultry commodities from Belarus to mitigate risk of HPAI introduction into the United States.

With the publication of this notice, we are informing the public that we added Belarus to the list of regions APHIS considers affected with HPAI of any subtype, effective August 22, 2023. This notice serves as an official record and public notification of this action.

Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this action as not a major rule, as defined by 5 U.S.C. 804(2).

Authority: 7 U.S.C. 1633, 7701–7772, 7781–7786, and 8301–8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

Done in Washington, DC, this 30th day of October 2023.

Michael Watson,

Administrator, Animal and Plant Health Inspection Service.
