SUPPLEMENTARY INFORMATION: The CyberCorps® Scholarship for Service (SFS) Program was established by the National Science Foundation, in collaboration with the U.S. Office of Personnel Management and the Department of Homeland Security, in accordance with the Cybersecurity Enhancement Act of 2014 (Pub. L.: 113-274), as amended by the National Defense Authorization Act and CHIPS and Science Act and codified at 15 U.S.C. 7442. This initiative reflects the critical need for Information Technology (IT) professionals, industrial control system security professionals, and

security managers in government. The goals of the SFS Program are to: (1) increase the number of qualified and diverse cybersecurity candidates for government cybersecurity positions; (2) improve the national capacity for the education of cybersecurity professionals and research and development workforce; (3) hire, monitor, and retain high-quality CyberCorps® graduates in the cybersecurity mission of Federal Government; and (4) strengthen partnerships between institutions of higher education and Federal, state, local, and tribal governments. OPM partners with NSF in this program by aiding in matching SFS students to potential agencies, coordinating students' transition into government employment, monitoring students' compliance with program requirements, and assessing whether the program helps meet the personnel needs of the federal government for information infrastructure protection.

The SFS Program provides funds to institutions of higher education for student scholarships in support of education in areas relevant to cybersecurity and cybersecurity-related aspects of other related fields as appropriate, including artificial intelligence, quantum computing, and aerospace. Students identified by their institutions for SFS Scholarships must meet selection criteria based on prior academic performance, likelihood of success in obtaining the degree, and suitability for government employment. Each scholarship recipient, as a condition of receiving a scholarship under the program, enters into an agreement under which the recipient agrees to work during the summer between academic terms, and work for a period equal to the length of the scholarship, following receipt of the student's degree, in a position related to cybersecurity and in the cyber security mission of—
