SUPPLEMENTARY INFORMATION:

Purpose: Under the authority of the Help America Vote Act of 2002 (HAVA), the U.S. Election Assistance Commission (EAC) developed the Election Supporting Technology Evaluation Program (ESTEP). This Program establishes a protocol for testing critical election-supporting technologies to ensure their conformance with baseline Federal standards for security and accessibility. While participation in this Program is voluntary, EAC certification benefits the public and wider election technology field by supporting State and local election officials, increasing quality control and quality assurance of election-supporting technologies, and increasing voter confidence in the use of these systems.

This Manual establishes the minimum requirements for participation in this Program. If election-supporting technology manufacturers decide to participate, then they must conform to the Program Manual’s procedural requirements.
