SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following currently approved collection of information:

Title: Procedures for the Export of Noncomplying Products.

OMB Number: 3041–0003.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Exporters of products that do not comply with Commission requirements.

Estimated Number of Respondents: We estimate that approximately 9 notifications will be submitted by 7 firms per year. These numbers are commensurate with notification rates before the COVID–19-pandemic's disruption of trade.

Estimated Time per Response: CPSC estimates that the average time for each response is one hour.

Total Estimated Annual Burden: Based on CPSC's estimates that a total of 9 responses will be submitted each year, and that one hour will be required per response, CPSC estimates that the total annual burden of this collection is 9 hours. The annualized cost to respondents for the information collection is \$654.12 (9 hours × \$72.68/hr), as estimated from total

compensation data available from the U.S. Bureau of Labor Statistics.¹

General Description of Collection: The Commission has procedures that exporters must follow to notify the Commission of their intent to export products that are banned or fail to comply with an applicable CPSC safety standard, regulation, or statute. Respondents must comply with the requirements in 16 CFR part 1019 and file a statement with the Commission in accordance with these requirements.

Request for Comments:

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

- whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;
- whether the estimated burden of the proposed collection of information is accurate;
- whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.
