As part of our continuing effort to

Federal agencies on the proposed ICR
that is described below. We are
especially interested in public comment
addressing the following:

(1) Whether or not the collection of
information is necessary for the proper
performance of the functions of the
agency, including whether or not the
information will have practical utility;

(2) The accuracy of our estimate of the
burden for this collection of
information, including the validity of
the methodology and assumptions used;

(3) Ways to enhance the quality,
utility, and clarity of the information to
be collected; and

(4) How might the agency minimize
the burden of the collection of
information on those who are to
respond, including through the use of
appropriate automated, electronic,
mechanical, or other technological
collection techniques or other forms of
information technology, *e.g.*, permitting
electronic submission of response.

Comments that you submit in
response to this notice are a matter of
public record. We will include or
summarize each comment in our request
to OMB to approve this ICR. Before
including your address, phone number,
email address, or other personal

do so.

Abstract: The National Park Service
(NPS) is authorized by the System Unit
Resource Protection Act (54 U.S.C.
100721) to collect information that can
be used to assess the economic value of
lost resources that cannot be restored or

replaced. The NPS Environmental
Quality Division will request approval
to conduct a survey to determine the
economic value associated with the
preservation (avoided loss) of individual
members of a wildlife species
population. The survey will provide
estimates of the full value of protecting
individual animals from intentional or
accidental loss. These value estimates
are not currently available to the NPS
and are necessary for park management
decisions.
