

sample was introduced in the third quarter of 2017. The sample consists of approximately 19,500 firms and is a subsample of firms from the larger Service Annual Survey (SAS) approved under OMB Number 0607-0422. Each quarter the QSS sample is updated to reflect the addition of new businesses and the removal of firms that have gone out-of-business. Starting with survey year 2023, which will be collected in calendar year 2024, the SAS will be integrated into the Annual Integrated Economic Survey (AIES) approved under OMB Number 0607-1024.

The Bureau of Economic Analysis uses the survey results as input to its quarterly Gross Domestic Product (GDP) and GDP by industry estimates. The estimates provide the Federal Reserve Board and Council of Economic Advisors with timely information to assess current economic performance. The Centers for Medicare and Medicaid Services use the QSS estimates to develop hospital-spending estimates for the National Accounts. Other government and private stakeholders also benefit from a better understanding of important cyclical components of the U.S. service economy.

II. Method of Collection

We will collect this information by internet, mail, and telephone follow-up. A significant number of QSS respondents receive an initial email with their username and authentication code for submission by internet. The remaining respondents are either mailed only their username and authentication code for submission by internet or mailed a full form. Respondents that report via the internet in any given quarter have the option to choose how they want to receive forms in the future, *i.e.*, email or mailed form.
