Robert Johnson, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-7314; email: Robert.Johnson@nrc.gov.

SUPPLEMENTARY INFORMATION: Section 274b of the Atomic Energy Act of 1954, as amended, (AEA) provides the statutory basis by which the NRC may enter into an agreement with the governor of a State to discontinue portions of its regulatory authority to license and regulate byproduct materials, source materials, and certain quantities of special nuclear materials. States may assume the authority to regulate those materials after the NRC determines that a perspective State's radiation control program is adequate to protect public health and safety and compatible with the NRC's regulatory program. Through the Agreement State program, 39 States have signed agreements with the NRC. The NRC retains an oversight role for adequacy to protect public health and safety, and compatibility with the NRC's regulatory program.

Section 274j of the AEA, requires that the NRC periodically review each Agreement State to ensure that the Agreement State's regulatory programs are adequate and compatible. It is the policy of the NRC to evaluate the radiation control program's performance in an integrated manner, using performance indicators, to ensure that public health and safety is being adequately protected. The periodic review process for an Agreement State's regulatory program and the NRC's radioactive materials program is called the Integrated Materials Performance Evaluation Program (IMPEP).

The IMPEP review team presents the findings to a Management Review Board (MRB). The MRB Chair then makes the final determination regarding a radiation control program's overall performance in a public meeting. Information considered by the MRB Chair includes the proposed final IMPEP report which presents suggested performance indicator ratings and recommendations prepared by the IMPEP team, input from MRB members, and information provided by the radiation control program at the MRB meeting. For most IMPEP reviews, no action other than issuance of the final IMPEP report is needed. For those infrequent reviews where additional action is needed, the MRB Chair may consider Monitoring, Heightened
