

management criteria by regional fishery management councils, states, and NMFS. The tag report cards are necessary to provide tags to the volunteer angler, record when and where the fish was tagged, the species, its estimated length and weight, tag number, and information on the tagger for follow-ups if the tagged fish is recovered. Failure to obtain these data would make management decisions very difficult and would be contrary to the NMFS Marine Recreational Fishing policy objectives. Anglers are made aware of the tagging program through several forms of media: newspaper and magazine articles, through both The Billfish Foundation and the Southeast Fisheries Science Center websites, peer review papers, and by word of mouth.
