SUPPLEMENTARY INFORMATION:

I. Abstract

The National Marine Fisheries Service (NMFS), Alaska Regional Office, is requesting renewal of the currently approved information collection for the Commercial Operator's Annual Report (COAR).

The COAR is a State of Alaska report that is required to be completed and submitted by direct marketers, catcher processors, catcher exporters, buyer exporters, shore-based processors, and floating processor permit holders pursuant to Alaska Administrative Code (5 AAC 39.130) and Federal regulations at 50 CFR 679. Under 50 CFR 679.5(p), NMFS requires motherships and catcher processors that are issued a Federal fisheries permit to annually complete and submit the appropriate sections of the COAR.

The COAR is used to gather statewide fish and shellfish information describing buying (ex-vessel) and production (wholesale or retail) activities. The information collected in the COAR is used to determine the value of Alaska's fisheries resources and products. NMFS uses the COAR database in annual Federal publications on the value of U.S. commercial fisheries, in the annual NMFS Stock

Assessment and Fishery Evaluation reports for the groundfish fisheries of the Bering Sea and Aleutian Islands and the Gulf of Alaska, and in periodic reports that describe the fisheries and that serve as reference documents to management agencies, the industry, and others.

The mothership and catcher processor data, when added to the COAR information collected from shoreside processors and stationary floating processors required under State of Alaska requirements, yield a complete data base of equivalent annual product value information for all respective processing sectors. The information also provides a consistent time series according to which groundfish resources may be managed more efficiently. Use of the information generated by the COAR is coordinated between NMFS and the Alaska Department of Fish and Game (ADF&G).

The COAR must be submitted by April 1 to the ADF&G for the previous year's activity for all operations that are required to submit a COAR. NMFS requires the owner of a mothership or catcher processor to annually complete and submit the appropriate forms of the COAR, whether the processor operated that year or not. If no receipt or production took place for that year, the owner submits only the COAR certification page.

The COAR requires submission of information on seafood purchasing, production, and both ex-vessel and wholesale values of seafood products. The buying information is reported by species, harvest area, area of purchase, condition of fisheries resources at the time of purchase, type of gear used in the harvest, pounds purchased, and ex-vessel value. The ex-vessel value includes any post-season adjustments or bonuses paid after the fish was purchased. The production information is reported by species, area of processing, process type (*e.g.*, frozen, canned, smoked), product type (*e.g.*, fillets, surimi, sections), net weight of the processed product, and the first wholesale value.

II. Method of Collection

The COAR may be submitted electronically through eLandings, the Interagency Electronic Reporting System (elandings.alaska.gov). The COAR is also available in fillable PDF, Microsoft Word, and Microsoft Excel formats on the ADF&G Commercial Fish Reporting web page at <https://www.adfg.alaska.gov/index.cfm?adfg=fishlicense.coar> and may be emailed or printed and mailed to the ADF&G.
