Pages 6401–7266

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.govinfo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 89, No. 22

Thursday, February 1, 2024

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 1005, 1006, and 1007

[Doc. No. AMS-DA-23-0003; 23-J-0019]

Milk in the Appalachian, Florida, and Southeast Marketing Areas; Amendments to Marketing Agreements and to Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends the transportation credit balancing fund provisions for the Appalachian and Southeast Federal milk marketing orders and establishes distributing plant delivery credits in the Appalachian, Florida, and Southeast Federal milk marketing orders. More than the required number of producers in the three impacted marketing areas have approved the issuance of the final order.

DATES: This rule is effective March 1, 2024.

ADDRESSES: To review the hearing record and relevant materials, please see <https://www.ams.usda.gov/rules-regulations/milk-appalachian-southeast-and-florida-areas-hearing-proposed-amendments>.

FOR FURTHER INFORMATION CONTACT: Erin Taylor, USDA/AMS/Dairy Programs, Order Formulation and Enforcement Branch, STOP 0231—Room 2530, 1400 Independence Avenue SW, Washington, DC 20250-0231, Telephone: (202) 720-7183, Email: Erin.Taylor@usda.gov.

SUPPLEMENTARY INFORMATION: This rule, in accordance with 7 CFR 900.14(c), is the Secretary’s final rule in this proceeding and adopts the amendments detailed in the proposed rule published in the **Federal Register** on December 1, 2023 (88 FR 84038).

This final rule amends the transportation credit balancing fund (TCBF) provisions in the Appalachian and Southeast Federal milk marketing orders (FMMOs or orders) by (1) updating the components of the mileage rate calculation; (2) revising the months of mandatory and discretionary payment; (3) revising the non-reimbursed mileage factor; and (4) increasing the maximum assessment rate on Class I milk. This final rule also establishes distributing plant delivery credit (DPDC) provisions in the Appalachian, Florida, and Southeast FMMOs that will make marketwide service payments to qualifying handlers and cooperatives for milk shipments to pool distributing plants from farms that are year-round, consistent suppliers. As required by regulation, AMS conducted a vote where more than two-thirds of the participating producers approved the amended orders. Thus, AMS is issuing this final rule implementing new and amended provisions.

This administrative action is governed by sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Orders 12866, 13175, 13563, and 14094. This action falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Orders 12866, 13563, and 14094 review.

The amendments adopted in this final rule have been reviewed under Executive Order 12988, Civil Justice Reform. They are not intended to have a retroactive effect and will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Agricultural Marketing Agreement Act of 1937, as amended (7

U.S.C. 601–674) (AMAA), provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the AMAA, any handler subject to an order may request modification or exemption from such order by filing a petition with the United States Department of Agriculture (USDA) stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with the law. A handler is afforded the opportunity for a hearing on the petition. After a hearing, USDA would rule on the petition. The AMAA provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review USDA’s ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Regulatory Flexibility Act and Paperwork Reduction Act

In accordance with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agricultural Marketing Service has considered the economic impact of this action on small entities and has certified this final rule will not have a significant economic impact on a substantial number of small entities. The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions so that small businesses will not be unduly or disproportionately burdened. Marketing orders and amendments thereto are unique in that they are normally brought about through group action of essentially small entities for their own benefit. A small dairy farm as defined by the Small Business Administration (SBA) (13 CFR 121.201) is one that has an annual gross revenue of \$3.75 million or less, and a small dairy products manufacturer is one that has no more than the number of employees listed in the chart below:

NAICS code	NAICS U.S. industry title	Size standards in number of employees
311511	Fluid Milk Manufacturing	1,150
311512	Creamery Butter Manufacturing	750
311513	Cheese Manufacturing	1,250
311514	Dry, Condensed, and Evaporated Dairy Product Manufacturing	1,000

To determine which dairy farms are “small businesses,” the \$3.75 million per year income limit was used to establish a milk marketing threshold of 1,220,703 pounds per month. Although this threshold does not factor in additional monies that may be received by dairy producers, it should be an accurate standard for most “small” dairy farmers. To determine a handler’s size, if the plant is part of a larger company operating multiple plants that collectively exceed the 750-employee limit for creamery butter; the 1,000-employee limit for dry, condensed, and evaporated dairy product manufacturing; the 1,150-employee limit for fluid milk manufacturing; or the 1,250-employee limit for cheese manufacturing; the plant was considered a large business even if the local plant does not exceed the 750-, 1,000-, 1,150-, or 1,250-employee limits, respectively.

During March 2023, the milk of 2,191 dairy farms was pooled on the Appalachian (1,359), Florida (83), and Southeast (749) FMMOs. Of the totals, 1,233 farms on the Appalachian FMMO (91 percent), 37 on the Florida FMMO (45 percent), and 658 on the Southeast FMMO (88 percent) were considered small businesses.

During March 2023, there were a total of 17 plants associated with the Appalachian FMMO (16 pool distributing plants and 1 pool supply plant), 7 plants associated with the Florida FMMO (all pool distributing plants), and 16 plants associated with the Southeast FMMO (15 pool distributing plants and 1 pool supply plant). The number of plants meeting the small business criteria under the Appalachian, Florida, and Southeast FMMOs were estimated to be 2 (13 percent), 2 (29 percent), and 2 (13 percent), respectively.

Currently, the Appalachian and Southeast orders provide transportation credit balancing fund (TCBF) payments on supplemental shipments of milk for Class I use provided the milk was from producers located outside of the marketing areas who are not regular suppliers to the market. Producer milk received at a pool distributing plant eligible for a transportation credit under the orders is defined as bulk milk received directly from a dairy farmer (1) from whom not more than 50 percent of the dairy farmer’s milk production, in aggregate, is received as producer milk during the immediately preceding months of March through May of each order; and (2) who produced milk on a farm not located within the specified marketing areas of either order. Milk deliveries from producers located

outside the marketing area who are consistent suppliers to the market, or from producers located inside the marketing areas, is not eligible for transportation credits.

This final rule amends the Appalachian and Southeast TCBF provisions. Specifically, the amendments amend the non-reimbursed mileage level from 85 miles to 15 percent of total miles and update components of the mileage rate factor to reflect more current market transportation costs.

The amendments also will increase the maximum TCBF assessment rates for the Appalachian and Southeast orders. Specifically, the maximum transportation credit assessment rate for the Appalachian and Southeast orders will increase to \$0.30 and \$0.60 per hundredweight (cwt), respectively. The increases are intended to minimize the proration and depletion of each order’s TCBF to provide more adequate TCBF payments.

This final rule also adopts DPDCs in the Appalachian, Florida, and Southeast FMMOs to provide transportation assistance to handlers and cooperatives procuring year-round, consistent milk supplies for the region. Currently, there are no provisions in any of the three southeastern FMMOs to provide transportation assistance to handlers and cooperatives for these types of milk deliveries.

The DPDCs adopted in this final rule will operate similar to the TCBF program: (1) DPDCs will be funded through an assessment on Class I producer milk; (2) DPDCs will be payable to handlers and cooperatives for procuring year-round milk supplies as determined by location and delivery criteria; (3) DPDC payment provisions will be identical to those for TCBF payments; and (4) DPDC provisions are designed to safeguard against excess assessment collections and prevent persistent and pervasive uneconomic milk movements for the purpose of receiving a DPDC payment.

The TCBF and DPDC provisions are applied identically to large and small handlers and cooperatives regulated by the Appalachian, Florida, and Southeast FMMOs. Since the amendments will apply to all regulated cooperatives and handlers regardless of their size, the amendments should not have a significant economic impact on a substantial number of small entities.

A review of reporting requirements was completed under the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35). It was determined that these amendments will have no impact on reporting, recordkeeping, or other

compliance requirements because those requirements will remain unchanged. No new forms are proposed, and no additional reporting requirements will be necessary.

This final rule does not require additional information collection that requires clearance by the OMB beyond currently approved information collection. The primary sources of data used to complete the forms are routinely used in most business transactions. Forms require only a minimal amount of information which can be supplied without data processing equipment or a trained statistical staff. Thus, since the information is already provided, no new information collection requirements are needed, and the current information collection and reporting burden is relatively small. Requiring the same reports for all handlers does not significantly disadvantage any handler that is smaller than the industry average.

The Agricultural Marketing Service is committed to complying with the E-Government Act, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

No other burdens are expected to fall on the dairy industry as a result of overlapping Federal rules. This rulemaking proceeding does not duplicate, overlap, or conflict with any existing Federal rules.

Prior Documents in This Proceeding

Notice of Hearing: Published in the **Federal Register** on January 30, 2023 (88 FR 5800).

Recommended Decision: Published in the **Federal Register** on July 18, 2023 (88 FR 46016).

Final Decision: Published in the **Federal Register** on December 1, 2023 (88 FR 84038).

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) Findings Upon the Basis of the Hearing Record

The amendments to the order are based on the record of a public hearing held in Franklin, Tennessee, February 28–March 2, 2023, pursuant to a notice of hearing published January 30, 2023 (88 FR 5800). The hearing was held

pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure (7 CFR part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is determined that:

(1) The said orders as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the AMAA;

(2) The parity prices of milk, as determined pursuant to section 2 of the AMAA, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the aforesaid marketing area. The minimum prices specified in the orders as hereby amended are such prices as will reflect the aforesaid factors, ensure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said orders as hereby amended regulate the handling of milk in the same manner as, and are applicable only to persons in the respective classes of industrial or commercial activity specified in, marketing agreements upon which a hearing has been held.

(b) Additional Findings

The amendments to these orders are known to handlers. The final decision containing the amendments to these orders was issued and published in the **Federal Register** (88 FR 84038) on December 1, 2023.

(c) Determinations

It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the AMAA) of more than 50 percent of the milk marketed within the specified marketing areas to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the AMAA;

(2) The issuance of this order amending the Appalachian, Florida, and Southeast orders is the only practical means pursuant to the declared policy of the AMAA of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of this order amending the Appalachian, Florida, and Southeast FMMOs is favored by at least two-thirds of the producers who were engaged in the production of milk for sale in the respective marketing areas.

List of Subjects in 7 CFR Parts 1005, 1006, and 1007

Milk marketing orders.

Order Amending the Order Regulating the Handling of Milk in the Appalachian, Florida, and Southeast Marketing Areas

It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Appalachian, Florida, and Southeast marketing areas shall be in conformity to and in compliance with the terms and conditions of the orders, as amended, and as hereby amended, as follows:

PART 1005—MILK IN THE APPALACHIAN MARKETING AREA

■ 1. The authority citation for part 1005 continues to read as follows:

Authority: 7 U.S.C. 601–674, and 7253.

- 2. Amend § 1005.30 by:
 - a. Redesignating paragraphs (a)(5) through (9) as paragraphs (a)(7) through (11), respectively;
 - b. Adding new paragraphs (a)(5) and (6);
 - c. Redesignating paragraph (c)(3) as (c)(4) and revising it; and
 - d. Adding new paragraph (c)(3).

The additions and revision read as follows:

§ 1005.30 Reports of receipts and utilization.

(a) * * *

(5) Receipts of producer milk described in § 1005.84(e), including the identity of the individual producers whose milk is eligible for the distributing plant delivery credit pursuant to that paragraph and the date that such milk was received;

(6) For handlers submitting distributing plant delivery credit requests, transfers of bulk unconcentrated milk to nonpool plants, including the dates that such milk was transferred;

* * * * *

(c) * * *

(3) With respect to milk for which a cooperative association is requesting a distributing plant delivery credit pursuant to § 1005.84, all of the information required in paragraphs (a)(5) and (6) of this section.

(4) With respect to milk for which a cooperative association is requesting a transportation credit pursuant to § 1005.82, all of the information required in paragraphs (a)(7) through (9) of this section.

* * * * *

■ 3. Amend § 1005.32 by revising paragraph (a) to read as follows:

§ 1005.32 Other reports.

(a) On or before the 20th day after the end of each month, each handler described in § 1000.9(a) and (c) of this chapter shall report to the market administrator any adjustments to distributing plant delivery credit requests as reported pursuant to § 1005.30(a)(5) and (6), and any adjustments to transportation credit requests as reported pursuant to § 1005.30(a)(7) through (9).

* * * * *

■ 4. Amend § 1005.81 by revising the first sentence of paragraph (a) to read as follows:

§ 1005.81 Payments to the transportation credit balancing fund.

(a) On or before the 12th day after the end of the month (except as provided in § 1000.90 of this chapter), each handler operating a pool plant and each handler specified in § 1000.9(c) of this chapter shall pay to the market administrator a transportation credit balancing fund assessment determined by multiplying the pounds of Class I producer milk assigned pursuant to § 1005.44 by \$0.30 per hundredweight or such lesser amount as the market administrator deems necessary to maintain a balance in the fund equal to the total transportation credits disbursed during the prior June–February period. * * *

* * * * *

■ 5. Amend § 1005.82 by:

- a. Revising the first sentence of paragraph (a)(1), the first sentence of paragraph (b), and paragraph (d)(3)(iii); and
- b. Adding paragraph (d)(3)(viii).

The revisions and addition read as follows:

§ 1005.82 Payments from the transportation credit balancing fund.

(a) * * *

(1) On or before the 13th day (except as provided in § 1000.90 of this chapter) after the end of each of the months of January and July through December and any other month in which transportation credits are in effect pursuant to paragraph (b) of this section, the market administrator shall pay to each handler that received, and reported pursuant to § 1005.30(a)(7), bulk milk transferred from a plant fully regulated under another Federal order as described in paragraph (c)(1) of this section or that received, and reported pursuant to § 1005.30(a)(8), milk directly from producers' farms as specified in paragraph (c)(2) of this section, a preliminary amount determined pursuant to paragraph (d) of this section to the extent that funds are

available in the transportation credit balancing fund. * * *

* * * * *

(b) The market administrator may extend the period during which transportation credits are in effect (*i.e.*, the transportation credit period) to the month of February or June if a written request to do so is received fifteen (15) days prior to the beginning of the month for which the request is made and, after conducting an independent investigation, finds that such extension is necessary to assure the market of an adequate supply of milk for fluid use.

* * *

(d) * * *

(3) * * *

(iii) Subtract 15 percent (15%) of the miles from the mileage so determined;

* * * * *

(viii) The market administrator may revise the factor described in paragraph (d)(3)(iii) of this section (the mileage adjustment factor) if a written request to do so is received fifteen (15) days prior to the beginning of the month for which the request is made and, after conducting an independent investigation, finds that such revision is necessary to assure orderly marketing, efficient handling of milk in the marketing area, and an adequate supply of milk for fluid use. The market administrator may increase the mileage adjustment factor by as much as ten percentage points, up to twenty-five percent (25%) or decrease it by as much as ten percentage points, to a minimum of five percent (5%). Before making such a finding, the market administrator shall notify all handlers in the market that a revision is being considered and invite written data, comments, and arguments. Any decision to revise the mileage rate factor must be issued in writing prior to the first day of the month for which the revision is to be effective.

■ 6. Amend § 1005.83 by revising paragraphs (a)(2) through (5) to read as follows:

§ 1005.83 Mileage rate for the transportation credit balancing fund.

(a) * * *

(2) From the result in paragraph (a)(1) of this section subtract \$2.26 per gallon;

(3) Divide the result in paragraph (a)(2) of this section by 6.2, and round down to three decimal places to compute the fuel cost adjustment factor;

(4) Add the result in paragraph (a)(3) of this section to \$3.67;

(5) Divide the result in paragraph (a)(4) of this section by 497;

* * * * *

■ 7. Add § 1005.84 before the undesignated center heading “Administrative Assessment and Marketing Service Deduction” to read as follows:

§ 1005.84 Distributing plant delivery credits.

(a) *Distributing plant delivery credit fund.* The market administrator shall maintain a separate fund known as the Distributing Plant Delivery Credit Fund into which shall be deposited the payments made by handlers pursuant to paragraph (b) of this section and out of which shall be made the payments due handlers pursuant to paragraph (d) of this section. Payments due a handler shall be offset against payments due from the handler.

(b) *Payments to the distributing plant delivery credit fund.* On or before the 12th day after the end of the month (except as provided in § 1000.90 of this chapter), each handler operating a pool plant and each handler specified in § 1000.9(c) of this chapter shall pay to the market administrator a distributing plant delivery credit fund assessment determined by multiplying the pounds of Class I producer milk assigned pursuant to § 1005.44 by a per hundredweight assessment rate of \$0.60 or such lesser amount as the market administrator deems necessary to maintain a balance in the fund equal to the total distributing plant delivery credit disbursed during the prior calendar year. If the distributing plant delivery credit fund is in an overfunded position, the market administrator may completely waive the distributing plant delivery credit assessment for one or more months. In determining the distributing plant delivery credit assessment rate, in the event that during any month of that previous calendar year the fund balance was insufficient to cover the amount of credits that were due, the assessment should be based upon the amount of credits that would have been disbursed had the fund balance been sufficient.

(c) *Assessment rate announcement.* The market administrator shall announce publicly on or before the 23rd day of the month (except as provided in § 1000.90 of this chapter), the assessment rate per hundredweight pursuant to paragraph (b) of this section for the following month.

(d) *Payments from the distributing plant delivery credit fund.* Payments from the distributing plant delivery credit fund to handlers and cooperative associations requesting distributing plant delivery credits shall be made as follows:

(1) On or before the 13th day (except as provided in § 1000.90 of this chapter) after the end of each month, the market administrator shall pay to each handler that received, and reported pursuant to § 1005.30(a)(5), bulk unconcentrated milk directly from producers’ farms, or receipts of bulk unconcentrated milk by transfer from a pool supply plant as defined in § 1005.7(c) or (d), a preliminary amount determined pursuant to paragraph (f) of this section to the extent that funds are available in the distributing plant delivery credit fund. If an insufficient balance exists to pay all of the credits computed pursuant to this section, the market administrator shall distribute the balance available in the distributing plant delivery credit fund by reducing payments pro rata using the percentage derived by dividing the balance in the fund by the total credits that are due for the month. The credits resulting from this initial proration shall be subject to audit adjustment pursuant to paragraph (d)(3) of this section.

(2) The market administrator shall accept adjusted requests for distributing plant delivery credits on or before the 20th day of the month following the month for which such credits were requested pursuant to § 1005.32(a). After such date, a preliminary audit will be conducted by the market administrator, who will recalculate any necessary proration of distributing plant delivery credit payments for the preceding month pursuant to the process provided in paragraph (d)(1) of this section. Handlers will be promptly notified of an overpayment of credits based upon this final computation and remedial payments to or from the distributing plant delivery credit fund will be made on or before the next payment date for the following month.

(3) Distributing plant delivery credits paid pursuant to paragraphs (d)(1) and (2) of this section shall be subject to final verification by the market administrator pursuant to § 1000.77 of this chapter. Adjusted payments to or from the distributing plant delivery credit fund will remain subject to the final proration established pursuant to paragraph (d)(2) of this section.

(4) In the event that a qualified cooperative association is the responsible party for whose account such milk is received and written documentation of this fact is provided to the market administrator pursuant to § 1005.30(c)(3) prior to the date payment is due, the distributing plant delivery credits for such milk computed pursuant to this section shall be made to such cooperative association rather

than to the operator of the pool plant at which the milk was received.

(5) The market administrator shall provide monthly, to producers who are not members of a qualified cooperative association, a statement of the amount per hundredweight of distributing plant delivery credit which the distributing plant handler receiving their milk is entitled to claim.

(e) *Eligible milk.* Distributing plant delivery credits shall apply to the following milk:

(1) Bulk unconcentrated fluid milk received directly from dairy farms at a pool distributing plant as producer milk subject to the following conditions:

(i) The farm on which the milk was produced is located within the specified marketing areas of the order in this part or the marketing area of Federal Order 1007 (7 CFR part 1007).

(ii) The farm on which the milk was produced is located in the following counties:

(A) Illinois: Alexander, Bond, Champaign, Christian, Clark, Clay, Clinton, Coles, Crawford, Cumberland, Douglas, Edgar, Edwards, Effingham, Fayette, Franklin, Gallatin, Hamilton, Hardin, Jackson, Jasper, Jefferson, Johnson, Lawrence, Macon, Marion, Massac, Monroe, Montgomery, Moultrie, Perry, Piatt, Pope, Pulaski, Randolph, Richland, St Clair, Saline, Shelby, Union, Vermilion, Wabash, Washington, Wayne, White, and Williamson.

(B) Indiana: Bartholomew, Boone, Brown, Clay, Clinton, Dearborn, Decatur, Delaware, Fayette, Fountain, Franklin, Hamilton, Hancock, Hendricks, Henry, Jackson, Jefferson, Jennings, Johnson, Lawrence, Madison, Marion, Monroe, Montgomery, Morgan, Ohio, Owen, Parke, Putnam, Randolph, Ripley, Rush, Shelby, Switzerland, Tippecanoe, Tipton, Union, Vermillion, Vigo, Warren, and Wayne.

(C) Kentucky: Boone, Boyd, Bracken, Campbell, Floyd, Grant, Greenup, Harrison, Johnson, Kenton, Lawrence, Lewis, Magoffin, Martin, Mason, Pendleton, Pike, and Robertson.

(D) Maryland: Allegany, Frederick, Garrett, Montgomery, and Washington.

(E) Ohio: Adams, Athens, Brown, Butler, Clark, Clermont, Clinton, Darke, Fairfield, Fayette, Franklin, Gallia, Greene, Hamilton, Highland, Hocking, Jackson, Lawrence, Madison, Meigs, Miami, Montgomery, Morgan, Perry, Pickaway, Pike, Preble, Ross, Scioto, Vinton, Warren, Washington.

(F) Pennsylvania: Bedford, Fayette, Franklin, Fulton, Greene, and Somerset.

(G) Virginia counties: Albemarle, Amelia, Appomattox, Arlington, Brunswick, Buckingham, Caroline, Charles City, Charlotte, Chesterfield,

Clarke, Culpeper, Cumberland, Dinwiddie, Essex, Fairfax, Fauquier, Fluvanna, Frederick, Gloucester, Goochland, Greene, Greensville, Halifax, Hanover, Henrico, Isle Of Wight, James City, King And Queen, King George, King William, Lancaster, Loudoun, Louisa, Lunenburg, Madison, Mathews, Mecklenburg, Middlesex, Nelson, New Kent, Northumberland, Nottoway, Orange, Page, Powhatan, Prince Edward, Prince George, Prince William, Rappahannock, Richmond, Shenandoah, Southampton, Spotsylvania, Stafford, Surry, Sussex, Warren, Westmoreland, York.

(H) Virginia cities: Alexandria City, Charlottesville City, Chesapeake City, Colonial Heights City, Emporia City, Fairfax City, Falls Church City, Franklin City, Fredericksburg City, Hampton City, Hopewell City, Manassas City, Manassas Park City, Newport News City, Norfolk City, Petersburg City, Poquoson City, Portsmouth City, Richmond City, Suffolk City, Virginia Beach City, Williamsburg City, and Winchester City.

(I) West Virginia: Barbour, Berkeley, Boone, Braxton, Cabell, Calhoun, Clay, Doddridge, Fayette, Gilmer, Grant, Greenbrier, Hampshire, Hardy, Harrison, Jackson, Jefferson, Kanawha, Lewis, Lincoln, Logan, Marion, Mason, Mineral, Mingo, Monongalia, Monroe, Morgan, Nicholas, Pendleton, Pleasants, Pocahontas, Preston, Putnam, Raleigh, Randolph, Ritchie, Roane, Summers, Taylor, Tucker, Tyler, Upshur, Wayne, Webster, Wetzell, Wirt, Wood, and Wyoming.

(iii) The market administrator may include additional counties from the states listed in paragraph (e)(1)(ii) of this section upon the request of a pool handler and provision of satisfactory proof that the county is a source of regular supply of milk to order distributing plants.

(iv) Producer milk eligible for a payment under this section cannot be eligible for payment from the transportation credit balancing fund as specified in § 1005.82(c)(2).

(v) The quantity of milk described herein shall be reduced by the quantity of any bulk unconcentrated fluid milk products transferred from a pool distributing plant to a nonpool plant or transferred to a pool supply plant on the same calendar day as producer milk was received at such plant for which a distributing plant delivery credit is requested.

(2) Bulk unconcentrated fluid milk transferred from a pool plant regulated pursuant to § 1005.7(c) or (d) to a pool distributing plant regulated pursuant to § 1005.7(a) or (b). The quantity of milk

described herein shall be reduced by the quantity of any bulk unconcentrated fluid milk products transferred from a pool distributing plant to a nonpool plant or transferred to a pool supply plant on the same calendar day as milk was received by transfer from a pool supply plant at such pool distributing plant for which a distributing plant delivery credit is requested.

(f) *Credit computation.* Distributing plant delivery credits shall be computed as follows:

(1) With respect to milk delivered directly from the farm to a distributing plant:

(i) Determine the shortest hard-surface highway distance between the shipping farm's county seat and the receiving plant and multiply the miles by an adjustment rate of not greater than ninety-five percent (95%) and not less than seventy-five percent (75%);

(ii) Subtract the Class I price specified in § 1000.50(a) of this chapter for the county in which the shipping farm is located from the Class I price applicable for the county in which the receiving pool distributing plant is located;

(iii) Multiply the adjusted miles so computed in paragraph (f)(1)(i) of this section by the monthly mileage rate factor for the month computed pursuant to paragraph (h) of this section;

(iv) Subtract any positive difference in Class I prices computed in paragraph (f)(1)(ii) of this section from the rate determined in paragraph (f)(1)(iii) of this section;

(v) Multiply the remainder computed in paragraph (f)(1)(iv) of this section by the hundredweight of milk described in paragraph (e)(1) of this section.

(2) With respect to milk delivered from a pool supply plant to a distributing plant:

(i) Determine the shortest hard-surface highway distance between the transferring pool plant and the receiving plant, and multiply the miles by an adjustment rate not greater than ninety-five percent (95%) and not less than seventy-five percent (75%);

(ii) Subtract the Class I price specified in § 1000.50(a) of this chapter for the transferring pool plant from the Class I price applicable for the county in which the receiving pool distributing plant is located;

(iii) Multiply the adjusted miles so computed in paragraph (f)(2)(i) of this section by the mileage rate factor for the month computed pursuant to paragraph (h) of this section;

(iv) Subtract any positive difference in Class I prices computed in paragraph (f)(2)(ii) of this section from the rate determined in paragraph (f)(2)(iii) of this section;

(v) Multiply the remainder computed in paragraph (f)(2)(iv) of this section by the hundredweight of milk described in paragraph (e)(2) of this section.

(g) *Mileage percentage rate adjustment.* The monthly percentage rate adjustment within the range of permissible percentage adjustments provided in paragraphs (f)(1)(i) and (f)(2)(i) of this section shall be determined by the market administrator, and publicly announced prior to the month for which effective. In determining the percentage adjustment to the actual mileages of milk delivered from farms and milk transferred from pool plants the market administrator shall evaluate the general supply and demand for milk in the marketing area, any previous occurrences of sustained uneconomic movements of milk, and the balances in the distributing plant delivery credit fund. The adjustment percentage pursuant to paragraphs (f)(1)(i) and (f)(2)(i) of this section to the actual miles used for computing distributing plant delivery credits and announced by the market administrator shall always be the same percentage.

(h) *Mileage rate for the distributing plant delivery credit fund.* The mileage rate for the distributing plant delivery credit fund shall be the mileage rate computed by the market administrator pursuant to § 1005.83.

(i) *Oversight of milk movements.* The market administrator shall regularly monitor and evaluate the requests for distributing plant delivery credits to determine that such credits are not encouraging uneconomic movements of milk, and that the credits continue to assure orderly marketing and efficient handling of milk in the marketing area. In making such determinations, the market administrator will include in the evaluation the general supply and demand for milk. If the market administrator finds that uneconomic movements are occurring, and such movements are persistent and pervasive, or are not being made in a way that assures orderly marketing and efficient handling of milk in the marketing area, after good cause shown, the market administrator may disallow the payments of distributing plant delivery credit on such milk. Before making such a finding, the market administrator shall give the handler of such milk sufficient notice that an investigation is being considered and shall provide notice that the handler has the opportunity to explain why such movements were necessary, or the opportunity to correct such movements prior to the disallowance of any distributing plant delivery credits. Any disallowance of distributing plant delivery credit

pursuant to this provision shall remain confidential between the market administrator and the handler.

PART 1006—MILK IN THE FLORIDA MARKETING AREA

■ 8. The authority citation for part 1006 continues to read as follows:

Authority: 7 U.S.C. 601–674, and 7253.

■ 9. Amend § 1006.30 by:
 ■ a. Redesignating paragraphs (a)(5) and (6) as paragraphs (a)(7) and (8), respectively;

■ b. Adding new paragraphs (a)(5) and (6); and

■ c. Adding paragraph (c)(3).

The additions read as follows:

§ 1006.30 Reports of receipts and utilization.

(a) * * *

(5) Receipts of producer milk described in § 1006.84(e), including the identity of the individual producers whose milk is eligible for the distributing plant delivery credit pursuant to that paragraph and the date that such milk was received;

(6) For handlers submitting distributing plant delivery credit requests, transfers of bulk unconcentrated milk to nonpool plants, including the dates that such milk was transferred.

* * * * *

(c) * * *

(3) With respect to milk for which a cooperative association is requesting a distributing plant delivery credit pursuant to § 1006.84, all of the information required in paragraphs (a)(5) and (6) of this section.

* * * * *

■ 10. Revise § 1006.32 to read as follows:

§ 1006.32 Other reports.

(a) On or before the 20th day after the end of each month, each handler described in § 1000.9(a) and (c) of this chapter shall report to the market administrator any adjustments to distributing plant delivery credit requests as reported pursuant to § 1006.30(a)(5) and (6).

(b) In addition to the reports required pursuant to §§ 1006.30 and 1006.31 and paragraph (a) of this section, each handler shall report any information the market administrator deems necessary to verify or establish each handler's obligation under the order.

■ 11. Add an undesignated center heading preceding the undesignated center heading “Administrative Assessment and Marketing Service Deduction” to read as follows:
Marketwide Service Payments.

■ 12. Add § 1006.84 preceding the undesignated center heading “Administrative Assessment and Marketing Service Deduction” to read as follows:

§ 1006.84 Distributing plant delivery credits.

(a) *Distributing plant delivery credit fund.* The market administrator shall maintain a separate fund known as the Distributing Plant Delivery Credit Fund into which shall be deposited the payments made by handlers pursuant to paragraph (b) of this section and out of which shall be made the payments due handlers pursuant to § 1005.84(b) of this chapter. Payments due a handler shall be offset against payments due from the handler.

(b) *Payments to the distributing plant delivery credit fund.* On or before the 12th day after the end of the month (except as provided in § 1000.90 of this chapter), each handler operating a pool plant and each handler specified in § 1000.9(c) of this chapter shall pay to the market administrator a distributing plant delivery credit fund assessment determined by multiplying the pounds of Class I producer milk assigned pursuant to § 1006.44 by a per hundredweight assessment rate of \$0.85 or such lesser amount as the market administrator deems necessary to maintain a balance in the fund equal to the total distributing plant delivery credit disbursed during the prior calendar year. If the distributing plant delivery credit fund is in an overfunded position, the market administrator may completely waive the distributing plant delivery credit assessment for one or more months. In determining the distributing plant delivery credit assessment rate, in the event that during any month of that previous calendar year the fund balance was insufficient to cover the amount of credits that were due, the assessment should be based upon the amount of credits that would have been disbursed had the fund balance been sufficient.

(c) *Assessment rate announcement.* The market administrator shall announce publicly on or before the 23rd day of the month (except as provided in § 1000.90 of this chapter) the assessment rate per hundredweight pursuant to paragraph (b) of this section for the following month.

(d) *Payments from the distributing plant delivery credit fund.* Payments from the distributing plant delivery credit fund to handlers and cooperative associations requesting distributing plant delivery credits shall be made as follows:

(1) On or before the 13th day (except as provided in § 1000.90 of this chapter) after the end of each month, the market administrator shall pay to each handler that received, and reported pursuant to § 1006.30(a)(5), bulk unconcentrated milk directly from producers' farms, or receipts of bulk unconcentrated milk by transfer from a pool supply plant as defined in § 1006.7(c) or (d), a preliminary amount determined pursuant to paragraph (f) of this section to the extent that funds are available in the distributing plant delivery credit fund. If an insufficient balance exists to pay all of the credits computed pursuant to this section, the market administrator shall distribute the balance available in the distributing plant delivery credit fund by reducing payments pro rata using the percentage derived by dividing the balance in the fund by the total credits that are due for the month. The credits resulting from this initial proration shall be subject to audit adjustment pursuant to paragraph (d)(3) of this section.

(2) The market administrator shall accept adjusted requests for distributing plant delivery credits on or before the 20th day of the month following the month for which such credits were requested pursuant to § 1006.32(a). After such date, a preliminary audit will be conducted by the market administrator, who will recalculate any necessary proration of distributing plant delivery credit payments for the preceding month pursuant to the process provided in paragraph (d)(1) of this section. Handlers will be promptly notified of an overpayment of credits based upon this final computation and remedial payments to or from the distributing plant delivery credit fund will be made on or before the next payment date for the following month.

(3) Distributing plant delivery credits paid pursuant to paragraphs (d)(1) and (2) of this section shall be subject to final verification by the market administrator pursuant to § 1000.77 of this chapter. Adjusted payments to or from the distributing plant delivery credit fund will remain subject to the final proration established pursuant to paragraph (d)(2) of this section.

(4) In the event that a qualified cooperative association is the responsible party for whose account such milk is received and written documentation of this fact is provided to the market administrator pursuant to § 1006.30(c)(3) prior to the date payment is due, the distributing plant delivery credits for such milk computed pursuant to this section shall be made to such cooperative association rather

than to the operator of the pool plant at which the milk was received.

(5) The market administrator shall provide monthly, to producers who are not members of a qualified cooperative association, a statement of the amount per hundredweight of distributing plant delivery credit which the distributing plant handler receiving their milk is entitled to claim.

(e) *Eligible milk.* Distributing plant delivery credits shall apply to the following milk:

(1) Bulk unconcentrated fluid milk received at a pool distributing plant as producer milk directly from dairy farms located within the marketing area; or located within the Georgia counties of Appling, Atkinson, Bacon, Baker, Ben Hill, Berrien, Brooks, Calhoun, Charlton, Chattahoochee, Clay, Clinch, Coffee, Cook, Colquitt, Crisp, Decatur, Dodge, Dooley, Dougherty, Early, Echols, Grady, Irwin, Lanier, Lee, Lowndes, Jeff Davis, Macon, Marion, Miller, Mitchell, Pierce, Pulaski, Quitman, Randolph, Schley, Seminole, Stewart, Sumter, Telfair, Terrel, Thomas, Tift, Turner, Ware, Webster, Wilcox, and Worth, and received at pool distributing plants. The quantity of milk described herein shall be reduced by the quantity of any bulk unconcentrated fluid milk products transferred from a pool distributing plant to a nonpool plant or transferred to a pool supply plant on the same calendar day as producer milk was received at such plant for which a distributing plant delivery credit is requested.

(2) Bulk unconcentrated fluid milk transferred from a pool plant regulated pursuant to § 1006.7(c) or (d) to a pool distributing plant regulated pursuant to § 1006.7(a) or (b). The quantity of milk described herein shall be reduced by the quantity of any bulk unconcentrated fluid milk products transferred from a pool distributing plant to a nonpool plant or transferred to a pool supply plant on the same calendar day as milk was received by transfer from a pool supply plant at such pool distributing plant for which a distributing plant delivery credit is requested.

(f) *Credit computation.* Distributing plant delivery credits shall be computed as follows:

(1) With respect to milk delivered directly from the farm to a distributing plant:

(i) Determine the shortest hard-surface highway distance between the shipping farm's county seat and the receiving plant and multiply the miles by an adjustment rate of not greater than ninety-five percent (95%) and not less than seventy-five percent (75%);

(ii) Subtract the Class I price specified in § 1000.50(a) of this chapter for the county in which the shipping farm is located from the Class I price applicable for the county in which the receiving pool distributing plant is located;

(iii) Multiply the adjusted miles so computed in (f)(1)(i) of this section by the monthly mileage rate factor for the month computed pursuant to paragraph (h) of this section;

(iv) Subtract any positive difference in Class I prices computed in paragraph (f)(1)(ii) of this section from the rate determined in paragraph (f)(1)(iii) of this section;

(v) Multiply the remainder computed in paragraph (f)(1)(iv) of this section by the hundredweight of milk described in paragraph (e)(1) of this section;

(2) With respect to milk delivered from a pool supply plant to a distributing plant:

(i) Determine the shortest hard-surface highway distance between the transferring pool plant and the receiving plant, and multiply the miles by an adjustment rate of not greater than ninety-five percent (95%) and not less than seventy-five percent (75%);

(ii) Subtract the Class I price specified in § 1000.50(a) of this chapter for the transferring pool plant from the Class I price applicable for the county in which the receiving pool distributing plant is located;

(iii) Multiply the adjusted miles so computed in paragraph (f)(2)(i) of this section by the mileage rate factor for the month computed pursuant to paragraph (h) of this section;

(iv) Subtract any positive difference in Class I prices computed in paragraph (f)(2)(ii) from the rate determined in paragraph (f)(2)(iii) of this section;

(v) Multiply the remainder computed in paragraph (f)(2)(iv) of this section by the hundredweight of milk described in paragraph (e)(2) of this section.

(g) *Mileage percentage rate adjustment.* The monthly percentage rate adjustment within the range of permissible percentage adjustments provided in paragraphs (f)(1)(i) and (f)(2)(i) of this section shall be determined by the market administrator, and publicly announced prior to the month for which effective. In determining the percentage adjustment to the actual mileages of milk delivered from farms and milk transferred from pool plants the market administrator shall evaluate the general supply and demand for milk in the marketing area, any previous occurrences of sustained uneconomic movements of milk, and the balances in the distributing plant delivery credit fund. The adjustment percentage pursuant to paragraphs

(f)(1)(i) and (f)(2)(i) to of this section the actual miles used for computing distributing plant credits and announced by the market administrator shall always be the same percentage.

(h) Mileage rate for the distributing plant delivery credit fund. The market administrator shall compute a mileage rate factor each month as follows:

(1) Compute the simple average rounded down to three decimal places for the most recent four (4) weeks of the Diesel Price per Gallon as reported by the Energy Information Administration of the United States Department of Energy for the Lower Atlantic and Gulf Coast Districts combined;

(2) From the result in paragraph (h)(1) of this section subtract \$2.26 per gallon;

(3) Divide the result in paragraph (h)(2) of this section by 6.2, and round down to three decimal places to compute the fuel cost adjustment factor;

(4) Add the result in paragraph (h)(3) of this section to \$3.67;

(5) Divide the result in paragraph (h)(4) of this section by 497;

(6) Round the result in paragraph (h)(5) of this section down to five decimal places to compute the mileage rate.

(i) Oversight of milk movements. The market administrator shall regularly monitor and evaluate the requests for distributing plant delivery credits to determine that such credits are not encouraging uneconomic movements of milk, and the credits continue to assure orderly marketing and efficient handling of milk in the marketing area. In making such determinations the market administrator will include in the evaluation the general supply and demands for milk. If the market administrator finds that uneconomic movements are occurring, and such movements are persistent and pervasive, or are not being made in a way that assures orderly marketing and efficient handling of milk in the marketing area, after good cause shown, the market administrator may disallow the payments of distributing plant delivery credit on such milk. Before making such a finding, the market administrator shall give the handler on such milk sufficient notice that an investigation is being considered and shall provide notice that the handler has the opportunity to explain why such movements were necessary, or the opportunity to correct such movements prior to the disallowance of any distributing plant delivery credits. Any disallowance of distributing plant delivery credit pursuant to this provision shall remain confidential between the market administrator and the handler.

PART 1007—MILK IN THE SOUTHEAST MARKETING AREA

■ 13. The authority citation for part 1007 continues to read as follows:

Authority: 7 U.S.C. 601–674, and 7253.

■ 14. Amend § 1007.30 by:

■ a. Redesignating paragraphs (a)(5) through (9) as paragraphs (a)(7) through (11), respectively;

■ b. Adding new paragraphs (a)(5) and (6);

■ c. Redesignating paragraph (c)(3) as paragraph (c)(4) and revising it; and

■ d. Adding new paragraph (c)(3).

The revisions and additions read as follows.

§ 1007.30 Reports of receipts and utilization.

(a) * * *

(5) Receipts of producer milk described in § 1007.84(e), including the identity of the individual producers whose milk is eligible for the distributing plant delivery credit pursuant to that paragraph and the date that such milk was received;

(6) For handlers submitting distributing plant delivery credit requests, transfers of bulk unconcentrated milk to nonpool plants, including the dates that such milk was transferred;

* * * * *

(c) * * *

(3) With respect to milk for which a cooperative association is requesting a distributing plant delivery credit pursuant to § 1007.84, all of the information required in paragraphs (a)(5) and (6) of this section.

(4) With respect to milk for which a cooperative association is requesting a transportation credit pursuant to § 1007.82, all of the information required in paragraphs (a)(7) through (9) of this section.

* * * * *

■ 15. Amend § 1007.32 by revising paragraph (a) to read as follows:

§ 1007.32 Other reports.

(a) On or before the 20th day after the end of each month, each handler described in § 1000.9(a) and (c) of this chapter shall report to the market administrator any adjustments to distributing plant delivery credit requests as reported pursuant to § 1007.30(a)(5) and (6) and any adjustments to transportation credit requests as reported pursuant to § 1007.30(a)(7) through (9) of this part.

* * * * *

■ 16. Amend § 1007.81 by revising the first sentence of paragraph (a) to read as follows:

§ 1007.81 Payments to the transportation credit balancing fund.

(a) On or before the 12th day after the end of the month (except as provided in § 1000.90 of this chapter), each handler operating a pool plant and each handler specified in § 1000.9(c) of this chapter shall pay to the market administrator a transportation credit balancing fund assessment determined by multiplying the pounds of Class I producer milk assigned pursuant to § 1007.44 by \$0.60 per hundredweight or such lesser amount as the market administrator deems necessary to maintain a balance in the fund equal to the total transportation credits disbursed during the prior June through February period to reflect any changes in the current mileage rate versus the mileage rate(s) in effect during the prior June through February period. * * *

* * * * *

■ 17. Amend § 1007.82 by:

■ a. Revising the first sentence of paragraph (a)(1), the first sentence of paragraph (b), and paragraph (d)(3)(iii); and

■ b. Adding paragraph (d)(3)(viii).

The revisions and addition read as follows:

§ 1007.82 Payments from the transportation credit balancing fund.

(a) * * *

(1) On or before the 13th day (except as provided in § 1000.90) after the end of each of the months of January, and July through December and any other month in which transportation credits are in effect pursuant to paragraph (b) of this section, the market administrator shall pay to each handler that received, and reported pursuant to § 1007.30(a)(7), bulk milk transferred from a plant fully regulated under another Federal order as described in paragraph (c)(1) of this section or that received, and reported pursuant to § 1007.30(a)(8), milk directly from producers' farms as specified in paragraph (c)(2) of this section, a preliminary amount determined pursuant to paragraph (d) of this section to the extent that funds are available in the transportation credit balancing fund. * * *

(b) The market administrator may extend the period during which transportation credits are in effect (i.e., the transportation credit period) to the month of February or June if a written request to do so is received fifteen (15) days prior to the beginning of the month for which the request is made and, after conducting an independent investigation, finds that such extension is necessary to assure the market of an

adequate supply of milk for fluid use.

* * *

* * * * *

(d) * * *

(3) * * *

(iii) Subtract 15 percent (15%) of the miles from the mileage so determined;

* * * * *

(viii) The market administrator may revise the factor described in (3)(iii) of this section (the mileage adjustment factor) if a written request to do so is received fifteen (15) days prior to the beginning of the month for which the request is made and, (15) days prior to the beginning of the month for which the request is made and, after conducting an independent investigation, finds that such revision is necessary to assure orderly marketing, efficient handling of milk in the marketing area, and an adequate supply of milk for fluid use. The market administrator may increase the mileage adjustment factor by as much as ten percentage points (10%) up to twenty-five percent (25%) or decrease it by as much as ten percentage points (10%), to a minimum of five percent (5%). Before making such a finding, the market administrator shall notify all handlers in the market that a revision is being considered and invite written data, comments, and arguments. Any decision to revise the mileage rate factor must be issued in writing prior to the first day of the month for which the revision is to be effective.

■ 18. Amend § 1007.83 by revising paragraphs (a)(2) through (5) to read as follows:

§ 1007.83 Mileage rate for the transportation credit balancing fund.

(a) * * *

(2) From the result in paragraph (a)(1) of this section subtract \$2.26 per gallon;

(3) Divide the result in paragraph (a)(2) of this section by 6.2, and round down to three decimal places to compute the fuel cost adjustment factor;

(4) Add the result in paragraph (a)(3) of this section to \$3.67;

(5) Divide the result in paragraph (a)(4) of this section by 497;

* * * * *

■ 19. Add § 1007.84 before the undesignated center heading “Administrative Assessment and Marketing Service Deduction” to read as follows:

§ 1007.84 Distributing plant delivery credits.

(a) *Distributing plant delivery credit fund.* The market administrator shall maintain a separate fund known as the Distributing Plant Delivery Credit Fund

into which shall be deposited the payments made by handlers pursuant to paragraph (b) of this section and out of which shall be made the payments due handlers pursuant to paragraph (d) of this section. Payments due a handler shall be offset against payments due from the handler.

(b) *Payments to the distributing plant delivery credit fund.* On or before the 12th day after the end of the month (except as provided in § 1000.90 of this chapter), each handler operating a pool plant and each handler specified in § 1000.9(c) of this chapter shall pay to the market administrator a distributing plant delivery credit fund assessment determined by multiplying the pounds of Class I producer milk assigned pursuant to § 1007.44 by a per hundredweight assessment rate of \$0.50 or such lesser amount as the market administrator deems necessary to maintain a balance in the fund equal to the total distributing plant delivery credit disbursed during the prior calendar year. If the distributing plant delivery credit fund is in an overfunded position, the market administrator may completely waive the distributing plant delivery credit assessment for one or more months. In determining the distributing plant delivery credit assessment rate, in the event that during any month of that previous calendar year the fund balance was insufficient to cover the amount of credits that were due, the assessment should be based upon the amount of credits that would have been disbursed had the fund balance been sufficient.

(c) *Assessment rate announcement.* The market administrator shall announce publicly on or before the 23rd day of the month (except as provided in § 1000.90 of this chapter), the assessment rate per hundredweight pursuant to paragraph (b) of this section for the following month.

(d) *Payments from the distributing plant delivery credit fund.* Payments from the distributing plant delivery credit fund to handlers and cooperative associations requesting distributing plant delivery credits shall be made as follows:

(1) On or before the 13th day (except as provided in § 1000.90 of this chapter) after the end of each month, the market administrator shall pay to each handler that received, and reported pursuant to § 1007.30(a)(5), bulk unconcentrated milk directly from producers’ farms, or receipts of bulk unconcentrated milk by transfer from a pool supply plant as defined in § 1007.7(c) or (d), a preliminary amount determined pursuant to paragraph (f) of this section to the extent that funds are available in

the distributing plant delivery credit fund. If an insufficient balance exists to pay all of the credits computed pursuant to this section, the market administrator shall distribute the balance available in the distributing plant delivery credit fund by reducing payments pro rata using the percentage derived by dividing the balance in the fund by the total credits that are due for the month. The credits resulting from this initial proration shall be subject to audit adjustment pursuant to paragraph (d)(3) of this section.

(2) The market administrator shall accept adjusted requests for distributing plant delivery credits on or before the 20th day of the month following the month for which such credits were requested pursuant to § 1007.32(a). After such date, a preliminary audit will be conducted by the market administrator, who will recalculate any necessary proration of distributing plant delivery credit payments for the preceding month pursuant to the process provided in paragraph (d)(1) of this section. Handlers will be promptly notified of an overpayment of credits based upon this final computation and remedial payments to or from the distributing plant delivery credit fund will be made on or before the next payment date for the following month.

(3) Distributing plant delivery credits paid pursuant to paragraphs (d)(1) and (2) of this section shall be subject to final verification by the market administrator pursuant to § 1000.77 of this chapter. Adjusted payments to or from the distributing plant delivery credit fund will remain subject to the final proration established pursuant to paragraph (d)(2) of this section.

(4) In the event that a qualified cooperative association is the responsible party for whose account such milk is received and written documentation of this fact is provided to the market administrator pursuant to § 1007.30(c)(3) prior to the date payment is due, the distributing plant delivery credits for such milk computed pursuant to this section shall be made to such cooperative association rather than to the operator of the pool plant at which the milk was received.

(5) The market administrator shall provide monthly to producers who are not members of a qualified cooperative association a statement of the amount per hundredweight of distributing plant delivery credit which the distributing plant handler receiving their milk is entitled to claim.

(e) *Eligible milk.* Distributing plant delivery credits shall apply to the following milk:

(1) Bulk unconcentrated fluid milk received directly from dairy farms at a pool distributing plant as producer milk subject to the following conditions:

(i) The farm on which the milk was produced is located within the specified marketing areas of the order in this part or the marketing area of Federal Order 1005 (7 CFR part 1005).

(ii) The farm on which the milk was produced is located in the following counties in the State of:

(A) Illinois: Alexander, Bond, Clay, Clinton, Crawford, Edwards, Effingham, Fayette, Franklin, Gallatin, Hamilton, Hardin, Jackson, Jasper, Jefferson, Johnson, Lawrence, Marion, Massac, Monroe, Montgomery, Perry, Pope, Pulaski, Randolph, Richland, St Clair, Saline, Union, Washington, Wayne, White, Williamson, Calhoun, Greene, Jersey, Macoupin, Madison, and Wabash.

(B) Kansas: Allen, Anderson, Bourbon, Chautauqua, Cherokee, Coffey, Crawford, Douglas, Elk, Franklin, Greenwood, Jefferson, Johnson, Labette, Leavenworth, Linn, Lyon, Miami, Montgomery, Neosho, Osage, Shawnee, Wabaunsee, Wilson, Woodson, and Wyandotte

(C) Missouri: Audrain, Bates, Benton, Boone, Callaway, Camden, Cass, Clay, Cole, Cooper, Franklin, Gasconade, Henry, Hickory, Howard, Jackson, Jefferson, Johnson, Lafayette, Lincoln, Maries, Miller, Moniteau, Montgomery, Morgan, Osage, Pettis, Phelps, Pike, Platte, Pulaski, Ray, St Charles, St Clair, Ste Genevieve, St Louis, St. Louis City, Saline, and Warren

(D) Oklahoma: Adair, Atoka, Bryan, Cherokee, Choctaw, Coal, Craig, Creek, Delaware, Haskell, Hughes, Latimer, Le Flore, McCurtain, Mcintosh, Mayes, Muskogee, Nowata, Okfuskee, Okmulgee, Osage, Ottawa, Pawnee, Pittsburg, Pushmataha, Rogers, Sequoyah, Tulsa, Wagoner, and Washington

(E) Texas: Anderson, Angelina, Bowie, Camp, Cass, Chambers, Cherokee, Delta, Fannin, Franklin, Galveston, Gregg, Hardin, Harris, Harrison, Henderson, Hopkins, Houston, Hunt, Jasper, Jefferson, Kaufman, Lamar, Liberty, Marion, Montgomery, Morris, Nacogdoches, Newton, Orange, Panola, Polk, Rains, Red River, Rusk, Sabine, San Augustine, San Jacinto, Shelby, Smith, Titus, Trinity, Tyler, Upshur, Van Zandt, Walker, and Wood.

(iii) The Market Administrator may include additional counties from the states listed in paragraph (e)(1)(ii) of this section upon the request of a pool handler and provision of satisfactory proof that the county is a source of

regular supply of milk to order distributing plants.

(iv) Producer milk eligible for a payment under this section cannot be eligible for payment from the transportation credit balancing fund as specified in § 1007.82(c)(2).

(v) The quantity of milk described herein shall be reduced by the quantity of any bulk unconcentrated fluid milk products transferred from a pool distributing plant to a nonpool plant or transferred to a pool supply plant on the same calendar day as producer milk was received at such plant for which a distributing plant delivery credit is requested.

(2) Bulk unconcentrated fluid milk transferred from a pool supply plant regulated pursuant to § 1007.7(c) or (d) to a pool distributing plant regulated pursuant to § 1007.7(a) or (b). The quantity of milk described herein shall be reduced by the quantity of any bulk unconcentrated fluid milk products transferred from a pool distributing plant to a nonpool plant or transferred to a pool supply plant on the same calendar day as milk was received by transfer from a pool supply plant at such pool distributing plant for which a distributing plant delivery credit is requested.

(f) *Credit computation.* Distributing plant delivery credits shall be computed as follows:

(1) With respect to milk delivered directly from the farm to a distributing plant:

(i) Determine the shortest hard-surface highway distance between the shipping farm's county seat and the receiving plant, and multiply the miles by an adjustment rate of not greater than ninety-five percent (95%) and not less than seventy-five percent (75%);

(ii) Subtract the Class I price specified in § 1000.50(a) of this chapter for the county in which the shipping farm is located from the Class I price applicable for the county in which the receiving pool distributing plant is located;

(iii) Multiply the adjusted miles so computed in (f)(1)(i) of this section by the monthly mileage rate factor for the month computed pursuant to paragraph (h) of this section;

(iv) Subtract any positive difference in Class I prices computed in paragraph (f)(1)(ii) of this section from the rate determined in paragraph (f)(1)(iii) of this section;

(v) Multiply the remainder computed in paragraph (f)(1)(iv) of this section by the hundredweight of milk described in paragraph (e)(1) of this section;

(2) With respect to milk delivered from a pool supply plant to a distributing plant:

(i) Determine the shortest hard-surface highway distance between the transferring pool plant and the receiving plant, and multiply the miles by an adjustment rate of not greater than ninety-five (95%) percent and not less than seventy-five (75%) percent;

(ii) Subtract the Class I price specified in § 1000.50(a) of this chapter for the transferring pool plant from the Class I price applicable for the county in which the receiving pool distributing plant is located;

(iii) Multiply the adjusted miles so computed in paragraph (f)(2)(i) of this section by the mileage rate factor for the month computed pursuant to paragraph (h) of this section;

(iv) Subtract any positive difference in Class I prices computed in paragraph (f)(2)(ii) of this section from the rate determined in paragraph (f)(2)(iii) of this section;

(v) Multiply the remainder computed in paragraph (f)(2)(iv) of this section by the hundredweight of milk described in paragraph (e)(2) of this section;

(g) *Mileage percentage rate adjustment.* The monthly percentage rate adjustment within the range of permissible percentage adjustments provided in paragraphs (f)(1)(i) and (f)(2)(i) of this section shall be determined by the market administrator, and publicly announced prior to the month for which effective. In determining the percentage adjustment to the actual mileages of milk delivered from farms and milk transferred from pool plants the market administrator shall evaluate the general supply and demand for milk in the marketing area, any previous occurrences of sustained uneconomic movements of milk, and the balances in the distributing plant delivery credit fund. The adjustment percentage pursuant to paragraphs (f)(1) and (2) of this section to the actual miles used for computing distributing plant delivery credits and announced by the market administrator shall always be the same percentage.

(h) *Mileage rate for the distributing plant delivery credit fund.* The mileage rate for the distributing plant delivery credit fund shall be the mileage rate computed by the market administrator pursuant to § 1007.83.

(i) *Oversight of milk movements.* The market administrator shall regularly monitor and evaluate the requests for distributing plant delivery credits to determine that such credits are not encouraging uneconomic movements of milk, and the credits continue to assure orderly marketing and efficient handling of milk in the marketing area. In making such determinations the market administrator will include in the

evaluation the general supply and demand for milk. If the market administrator finds that uneconomic movements are occurring, and such movements are persistent and pervasive, or are not being made in a way that assures orderly marketing and efficient handling of milk in the marketing area, after good cause shown, the market administrator may disallow the payments of distributing plant delivery credit on such milk. Before making such a finding, the market administrator shall give the handler on such milk sufficient notice that an investigation is being considered and shall provide notice that the handler has the opportunity to explain why such movements were necessary, or the opportunity to correct such movements prior to the disallowance of any distributing plant delivery credits. Any disallowance of distributing plant delivery credit pursuant to this provision shall remain confidential between the market administrator and the handler.

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

BILLING CODE 3410-02-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2023-1895; Project Identifier MCAI-2023-00652-T; Amendment 39-22649; AD 2023-26-06]

RIN 2120-AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Airbus SAS A300 B4-600, B4-600R, and F4-600R series airplanes, and Model A300 C4-605R Variant F airplanes (collectively called Model A300-600 series airplanes). This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. This AD requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is

issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective March 7, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of March 7, 2024.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA-2023-1895; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For material incorporated by reference in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu*; website *easa.europa.eu*. You may find this material on the EASA website at *ad.easa.europa.eu*.

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195. It is also available in the AD docket at *regulations.gov* under Docket No. FAA-2023-1895.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 206-231-3225; email *dan.rodina@faa.gov*.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus SAS Model A300-600 series airplanes. The NPRM published in the **Federal Register** on October 2, 2023 (88 FR 67685). The NPRM was prompted by AD 2023-0091, dated May 5, 2023, issued by EASA, which is the Technical Agent for the Member States of the European Union (EASA AD 2023-0091) (also referred to as the MCAI). The MCAI states that new or more restrictive airworthiness limitations have been developed.

EASA AD 2023-0091 specifies that it requires certain tasks (limitations) already in Airbus A300-600

Airworthiness Limitations Section (ALS), Part 2 DT-ALI, Revision 03, that is required by EASA AD 2019-0090, dated April 26, 2019 (which corresponds to FAA AD 2019-21-01, Amendment 39-19767 (84 FR 56935, October 24, 2019) (AD 2019-21-01)), and that incorporation of EASA AD 2023-0091 invalidates (terminates) prior instructions for those tasks. This AD would therefore terminate the limitations required by paragraph (g) of AD 2019-21-01, for the tasks identified in the service information referred to in EASA AD 2023-0091 only.

In the NPRM, the FAA proposed to require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in EASA AD 2023-0091. The FAA is issuing this AD to address fatigue cracking, damage, or corrosion in principal structural elements, which could result in reduced structural integrity of the airplane.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA-2023-1895.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from FedEx and DonZel Culver. Both commenters supported the NPRM without change.

Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 14 CFR Part 51

EASA AD 2023-0091 specifies new or more restrictive airworthiness limitations for airplane structures and safe life limits. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 128 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, the agency estimates the average total cost per operator to be \$7,650 (90 work-hours × \$85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2023–26–06 Airbus SAS: Amendment 39–22649; Docket No. FAA–2023–1895; Project Identifier MCAI–2023–00652–T.

(a) Effective Date

This airworthiness directive (AD) is effective March 7, 2024.

(b) Affected ADs

This AD affects AD 2019–21–01, Amendment 39–19767 (84 FR 56935, October 24, 2019) (AD 2019–21–01).

(c) Applicability

This AD applies to all Airbus SAS airplanes identified in paragraphs (c)(1) through (4) of this AD, certificated in any category.

- (1) Model A300 B4–601, B4–603, B4–620, and B4–622 airplanes.
- (2) Model A300 B4–605R and B4–622R airplanes.
- (3) Model A300 F4–605R and F4–622R airplanes.
- (4) Model A300 C4–605R Variant F airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address fatigue cracking, damage, or corrosion in principal structural elements, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2023–0091, dated May 5, 2023 (EASA AD 2023–0091).

(h) Exceptions to EASA AD 2023–0091

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2023–0091.

(2) Where paragraph (3) of EASA AD 2023–0091 specifies "Within 12 months after the effective date of this AD, revise the AMP," this AD requires replacing those words with "Within 90 days after the effective date of this AD, revise the existing maintenance or inspection program, as applicable."

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA 2023–0091 is at the applicable "associated thresholds" as incorporated by the requirements of paragraph (3) of EASA AD 2023–0091, or within 90 days after the effective date of this AD, whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraph (4) of EASA AD 2023–0091.

(5) This AD does not adopt the "Remarks" section of EASA AD 2023–0091.

(i) Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (e.g., inspections) or intervals are allowed unless they are approved as specified in the provisions of the "Ref. Publications" section of EASA AD 2023–0091.

(j) Terminating Action for AD 2019–21–01

Accomplishing the actions required by this AD terminates the corresponding requirements of AD 2019–21–01 for the tasks identified in the service information referenced in EASA AD 2023–0091 only.

(k) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the International Validation Branch, send it to the attention of the person identified in paragraph (l) of this AD. Information may be emailed to: 9-AVS-AIR-730-AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(l) Additional Information

For more information about this AD, contact Dan Rodina, Aviation Safety

Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 206-231-3225; email dan.rodina@faa.gov.

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2023-0091, dated May 5, 2023.

(ii) [Reserved]

(3) For EASA AD 2023-0091, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; website easa.europa.eu. You may find this EASA AD on the EASA website at ad.easa.europa.eu.

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on January 2, 2024.

Caitlin Locke,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2023-1041; Project Identifier AD-2022-01223-T; Amendment 39-22657; AD 2024-01-06]

RIN 2120-AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain The Boeing Company Model 737-600, 737-700, and 737-800 series airplanes. This AD was prompted by an evaluation by the design approval holder (DAH) indicating the fuselage skin repairs at the double row of fasteners centered on certain stringers have inadequate inspection requirements for continuing airworthiness following repair accomplishment. This AD is intended to complete certain programs to support

the airplane reaching its limit of validity (LOV). This AD requires repetitive inspections for cracks of skin repairs at Stringer S-17, and corrective actions if necessary. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective March 7, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of March 7, 2024.

ADDRESSES:

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA-2023-1041; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For service information identified in this final rule, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110-SK57, Seal Beach, CA 90740-5600; telephone 562-797-1717; website myboeingfleet.com.

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195. It is also available at regulations.gov under Docket No. FAA-2023-1041.

FOR FURTHER INFORMATION CONTACT: Bill Ashforth, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 206-231-3520; email Bill.Ashforth@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain The Boeing Company (Boeing) Model 737-600, 737-700, and 737-800 series airplanes. The NPRM was published in the **Federal Register** on May 25, 2023 (88 FR 33849). The NPRM was prompted by an evaluation by the DAH indicating the fuselage skin repairs at the double row of fasteners centered on certain stringers have inadequate inspection requirements for continuing airworthiness following

repair accomplishment, which could result in fatigue cracking of the repair going undetected.

In the NPRM, the FAA proposed to require repetitive inspections for cracking of the skin repairs at S-17, and corrective actions if necessary. The FAA is issuing this AD to address this fatigue cracking, which, if not addressed, could grow to a critical length and result in rapid decompression and loss of the airplane's structural integrity.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from the Air Line Pilots Association, International (ALPA) who supported the NPRM without change.

The FAA also received comments from Aviation Partners Boeing (APB), Boeing, Southwest Airlines (Southwest), and SunExpress Airline (SunExpress).

Compliance With AMOC Procedures

APB determined that the incorporation of supplemental type certificate (STC) ST00830SE for installation of split scimitar winglets affects compliance with the mandated actions in the proposed rule, but the extent of the impact to compliance is not fully known at this time. APB noted that paragraph (h) of the proposed AD would replace the provisions in Boeing Service Bulletin 737-53A1217 R1 that specify contacting Boeing for an alternative method of compliance (AMOC) for alternative inspections and corrective actions, and instead would require using a method approved in accordance with paragraph (i) of the proposed AD. APB stated that for affected airplanes with these winglets, approval of any alternative inspections and corrective actions for Zone 3 and Zone 4 repairs must be obtained from the Manager, AIR-520 Continued Operational Safety Branch, FAA, through the means described in paragraph (i)(1) of the proposed AD. APB asserted that Boeing does not have delegation to approve repairs in areas affected by the configuration of STC ST00830SE and cannot use ODA approval as specified in paragraph (i)(3) of the proposed AD.

The FAA acknowledges APB's comment. Paragraph (h)(1) of this AD states that AMOC approval be obtained using a method approved in accordance with the procedures specified in "paragraph (i)" of this AD, and does not limit approvals to the provisions of paragraph (i)(1) or (3) of this AD. Therefore, no change to this AD is necessary.

Request To Correct Service Bulletin Reference

Boeing reported that the Background section of the NPRM incorrectly identified the original service information as Boeing Service Bulletin “737–53A1217,” but that document was not an alert service bulletin and should have been identified as Service Bulletin “737–53–1217.”

The FAA agrees; no change to the final rule is necessary because that reference is not used.

Request To Specify Service Bulletin Revision Level

The NPRM’s Background section explained that certain existing post-repair inspections are inadequate to address the unsafe condition, and that the actions in paragraph (g) of the proposed AD would apply only to airplanes on which a repair has been done as specified in “Boeing Alert Service Bulletin 737–53A1217.” Boeing requested that the statement be clarified by adding the revision level and date of the service bulletin. Boeing further stated that Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022, was issued to add the post-repair inspections to airplanes on which a repair has been done.

The FAA disagrees. In this context, the revision level and date of the service bulletin were intentionally omitted so the Background section of the NPRM would refer to any repair—including a repair done using a method other than the service bulletin (at any revision level). No change is necessary to this final rule.

Request To Revise Unsafe Condition

Boeing requested changes to paragraph (e) of the proposed AD, which implied the unsafe condition is the potential for cracking. Boeing stated that the proposed AD would require only post-repair inspections, and asserted that the unsafe condition is actually the lack of post-repair inspections because it could result in undetected post-repair fatigue cracks.

The FAA agrees and has incorporated the relevant changes.

Request To Revise Compliance Time

Southwest and SunExpress stated that Boeing Alert Service Bulletin 737–

53A1217 provides no grace period for airplanes that have exceeded the threshold, and requested that the proposed AD be revised to provide a grace period or optional threshold value.

The FAA notes that paragraph (g) of this AD mandates only Tables 3 through 6 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022. For those actions, the service bulletin specifies a compliance time of 50,000 total flight cycles, with a grace period of 4,000 flight cycles after the repair. Therefore, no change is necessary to the AD.

Request To Clarify Configuration Description

Southwest requested clarification of the affected airplanes and corresponding requirements for Tables 1 through 3 of Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022. Southwest noted that paragraphs 1.A.1. and 1.D. define Groups 1 through 3, Configuration 3, as “airplanes that have installed a repair,” but tables 1 through 3 of paragraph 1.E list conditions for airplanes that both have and have not accomplished a repair.

The FAA provides the following clarification. The tables apply to any airplanes that have performed a repair, whether the repair was done in accordance with “SB 737–53–1217 Original Issue” or in accordance with some other method. So the condition “Airplanes that have not accomplished a repair in accordance with ‘SB 737–53–1217 Original Issue’ applies to airplanes that have been repaired using some method other than ‘SB 737–53–1217 Original Issue.’” Groups 1 through 3, Configuration 3, include any airplane on which a repair has been accomplished in one of the zones specified in the service information. No changes to this AD are necessary as a result of this comment.

Request To Use BMS 3–35 or BMS 3–23 Compound

Southwest noted that Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022, specifies the use of BMS 3–23 corrosion-inhibiting compound (CIC) for repairs.

Southwest requested that the proposed AD be revised to allow the use of BMS 3–35 CIC due to the faster drying time compared to BMS 3–23 CIC. Southwest stated that Boeing Corrosion Prevention Manual (CPM) 20–60–00 and Boeing Service Request (SR) SWA–SWA–10–1232–02B approve BMS 3–35 for use on all Boeing commercial airplanes including those no longer in production.

The FAA agrees that either BMS 3–35 or BMS 3–23 CIC is acceptable because both provide an adequate level of safety. Paragraph (h)(2) of this AD has been added to allow use of either CIC.

Conclusion

The FAA reviewed the relevant data, considered the received comments, and determined that air safety requires adopting this AD as proposed, with limited changes as previously stated. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022. This service information specifies procedures for, among other actions, repetitive internal and external detailed inspections, low frequency eddy current (LFEC) inspections, and medium frequency eddy current (MFEC) inspections for cracks of the skin repair of S–17, station (STA) 360 to STA 380, and STA 888 to STA 907, left and right sides of the airplane. Corrective actions include repair. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in ADDRESSES.

Costs of Compliance

The FAA estimates that this AD affects 106 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
External Post Repair Inspection ...	56 work-hours × \$85 per hour = \$4,760 per inspection cycle.	\$0	\$4,760 per inspection cycle.	\$504,560 per inspection cycle.

ESTIMATED COSTS—Continued

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Internal Post Repair Inspections ..	52 work-hours × \$85 per hour = \$4,420 per inspection cycle.	0	\$4,420 per inspection cycle.	\$468,520 per inspection cycle.

The FAA has received no definitive data on which to base the cost estimates for the repairs specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024–01–06 The Boeing Company:
Amendment 39–22657; Docket No. FAA–2023–1041; Project Identifier AD–2022–01223–T.

(a) Effective Date

This airworthiness directive (AD) is effective March 7, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 737–600, 737–700, and 737–800 series airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by an evaluation by the design approval holder (DAH) indicating the fuselage skin repairs at the double row of fasteners centered on certain stringers have inadequate inspection requirements for continuing airworthiness following repair accomplishment, which could result in fatigue cracking of the repair going undetected. The FAA is issuing this AD to address the inadequacy of post-repair inspection requirements at certain repair fastener locations centered on stringer S–17L and S–17R, at station (STA) 360 to STA 380 and at STA 888 to STA 907. Such inspection inadequacy could result in post-repair fatigue cracks going undetected. Fatigue cracking, if not addressed, could grow to a critical length, which could result in rapid decompression and loss of structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: For Group 1 through 3, Configuration 3

airplanes as identified in Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022, at the applicable times specified in Tables 3 through 6 of paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022, do all applicable actions identified as "RC" (required for compliance) in, and in accordance with, the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022.

(h) Exceptions to Service Information Specifications

(1) Where Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022, specifies contacting Boeing for repair instructions or for alternative inspections: This AD requires doing the repair, or doing the alternative inspections and applicable on-condition actions, using a method approved in accordance with the procedures specified in paragraph (i) of this AD.

(2) Where Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022, specifies using corrosion inhibiting compound (CIC) compound BMS 3–23, this AD also allows use of CIC compound BMS 3–35.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520 Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Manager, AIR–520 Continued Operational Safety Branch, FAA, send it to the attention of the person identified in paragraph (j) of this AD. Information may be emailed to: 9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR–520 Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) Except as specified by paragraph (h) of this AD: For service information that

contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (i)(4)(i) and (ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or substep is labeled “RC Exempt,” then the RC requirement is removed from that step or substep. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator’s maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(j) Related Information

For more information about this AD, contact Bill Ashforth, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3520; email Bill.Ashforth@faa.gov.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Service Bulletin 737–53A1217, Revision 1, dated September 8, 2022.

(ii) [Reserved]

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website myboeingfleet.com.

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on January 6, 2024.

Caitlin Locke,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all The Boeing Company Model 777 airplanes. This AD was prompted by an evaluation by the design approval holder (DAH) that found the force limiter assemblies for the lateral control mechanism are not breaking out within the maximum design force requirements. This AD requires replacing affected force limiter assemblies and prohibits the installation of affected parts. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective March 7, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of March 7, 2024.

ADDRESSES:

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA–2023–0429; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For service information identified in this final rule, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website myboeingfleet.com.

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at

regulations.gov under Docket No. FAA–2023–0429.

FOR FURTHER INFORMATION CONTACT:

Anthony Caldejon, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3534; email Anthony.V.Caldejon@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all The Boeing Company Model 777 airplanes. The NPRM published in the **Federal Register** on March 27, 2023 (88 FR 18099). The NPRM was prompted by an evaluation by the DAH that found the force limiter assemblies for the lateral control mechanism are not breaking out within the maximum design force requirements. In the NPRM, the FAA proposed to require identifying and replacing affected force limiter assemblies, and to prohibit the installation of affected parts.

The FAA is issuing this AD to address the force limiter assemblies not breaking out within the maximum design force requirements. The unsafe condition, combined with a lateral control system jam or restriction, could result in the loss of lateral control from the wheel and potentially affect continued safe flight and landing.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from the Air Line Pilots Association, International, who supported the NPRM without change.

The FAA received additional comments from Aerologic, All Nippon Airways, American Airlines, Boeing, China Airlines, FedEx, Omni Air International (Omni Air), Swiss International Air Lines (Swiss Air), Turkish Airlines, and United Airlines. The following presents those comments and the FAA’s response to each comment.

Request To Revise Requirements for Certain Line Numbers

Aerologic, All Nippon Airways, American Airlines, Boeing, Omni Air, United Airlines, and Swiss Air requested changes to the proposed AD to provide relief for airplane line numbers prior to 1531. Aerologic, Boeing, and American Airlines also requested changes to provide relief for airplane lines number after 1707. Boeing stated that the suspect affected force limiter assemblies were delivered only

on airplane line numbers 1531 through 1707, and the risk of rotability on other line numbers is low.

Boeing requested that a records inspection be added for airplane line numbers prior to 1531 to determine prior replacement of a force limiter assembly, and to require installation of a force limiter assembly P/N 253W1263-3 only if any force limiter assembly P/N 253W1263-1 had been replaced. Boeing stated that if no prior replacement of a force limiter assembly has been recorded on an airplane before line number 1531, the risk of having an affected part installed is low. Boeing reported that no force limiter assembly P/N 253W1263-1 has been purchased since 2012 and contended that the use of force limiter assembly P/N 253W1263-1 for rotatable parts is extremely low. Boeing also noted that force limiter assemblies P/N 253W1263-3 are already installed on airplane line numbers 1708 and subsequent and cannot be replaced by force limiter assemblies P/N 253W1263-1 in accordance with the drawing interchangeability.

Omni Air proposed alternative requirements for airplane line numbers prior to 1531: repetitive operational checks of the wheel jam breakout mechanism in accordance with MPD task 27-190-00, and replacement with a force limiter assembly P/N 253W1263-3 for a failed operational check or as terminating action. Omni Air also proposed a one-time operational check of the wheel jam breakout mechanism in accordance with the MPD task if there are no concerns about the force limiter assembly being replaced since the last check. Omni stated that Boeing found that force limiter assemblies P/N 253W1263-1 delivered on airplane line numbers prior to 1531 were functioning properly.

Aerologic interpreted the effectivity of the Requirements Bulletin to be based on production testing of the force limiter assembly break-out forces changing the amount of applied corrosion inhibiting compound (CIC) causing the unsafe condition. Therefore, Aerologic stated that Boeing should be able to identify affected force limiter assemblies P/N 253W1263-1 either by serial number or batch number and differentiate acceptable and unsafe parts. Therefore, Aerologic requested that the FAA issue a separate AD action to test the break-out forces of force limiter assemblies P/N 253W1263-1 on airplanes not identified in the Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021. Aerologic proposed requiring a check of the serial number of the force limiter

assembly on all Model 777 airplanes to determine which affected units should be replaced. Also, Aerologic proposed on-wing testing of the breakout force as an alternative to the proposed replacement of all force limiter assemblies P/N 253W1263-1 on all Model 777 airplanes because the actions would not be possible within the proposed compliance time of the NPRM.

All Nippon Airways questioned whether the intent of the proposed AD is to eliminate all force limiter assemblies P/N 253W1263-1, since Boeing has determined that replacement is not necessary if that part passed the functional test on delivery. All Nippon Airways suggested that operators will be significantly affected under the unrealistic proposed compliance time of 12 months and requested that the AD requirements be revised so that only the target units identified in Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021, are required to be replaced.

American Airlines proposed creating two groups of airplanes: Group 1, for Model 777 airplanes with line numbers 1531 through 1707 (the effectivity of Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021), and Group 2, for Model 777 airplanes not identified in the Requirements Bulletin. American Airlines stated that it has had zero replacements of P/N 253W1263-1 in 24 years of service of its fleet, which are all prior to line number 1531. American Airlines also stated that the illustrated parts catalog (IPC) shows that P/N 253W1263-1 is interchangeable one-way forward only with P/N 253W1263-3. American Airlines further recommended creating subgroups for Group 2. For subgroup 2a, airplanes for which it can conclusively be shown that the force limiter assembly P/N 253W1263-1 has never been replaced, no further action would be required. And for subgroup 2b, airplanes for which it cannot be conclusively shown that the force limiter assembly P/N 253W1263-1 was never replaced, the AD would require replacement with force limiter assembly P/N 253W1263-3.

Swiss Air requested that the proposed AD allow a records review on airplanes prior to line number 1531 to determine whether an assembly with force limiter assembly P/N 253W1263-1 was installed. Swiss Air further requested that the proposed AD allow testing of force limiter assemblies with P/N 253W1263-1 with unknown history to measure the break-out force and allow return to service if the force is within the drawing requirements. United

Airlines also requested that testing verifying serviceability on airplanes with line numbers prior to 1531 be considered acceptable.

The FAA partially agrees with the requests. The FAA agrees to exclude airplane line numbers prior to 1531 and after 1707 from the replacement requirement if any installed force limiter assembly P/N 253W1263-1 had not been previously replaced. Limiting the replacement requirement in this way was the original intent of the AD. The FAA disagrees, however, with Aerologic's request to revise paragraph (c) of this AD to limit the AD requirements to airplanes having line numbers in the effectivity of Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021. The NPRM, under "Differences Between This Proposed AD and the Service Information," stated that the applicability of the AD differed from the effectivity of Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021, because the affected parts are rotatable parts, and the FAA has determined that these parts could later be installed on airplanes that were initially delivered with acceptable parts, thereby subjecting those airplanes to the unsafe condition. Although the IPC states that force limiter assembly P/N 253W1263-3 cannot be replaced with P/N 253W1263-1, it is possible for an operator to do so. Therefore, paragraph (i) of this AD, "Parts Installation Prohibition," applies to all Model 777 airplanes.

The FAA disagrees to include testing as a method of verifying a functional force limiter assembly because the FAA has revised paragraph (g) of this AD so that it applies only to (1) airplanes identified in Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021, and (2) airplanes not identified in Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021, on which the force limiter assembly was replaced with P/N 253W1263-1. This should alleviate the demand for replacement force limiter assemblies P/N 253W1263-3. The FAA further disagrees to create a separate AD for airplane line numbers prior to 1531 because of the urgency of the unsafe condition and the delay that would be caused by additional rulemaking. The FAA has also determined that, in light of the changes to this AD, a separate AD is not necessary.

Request To Extend Compliance Time

Aerologic, All Nippon Airways, China Airlines, FedEx, Swiss Air, Turkish Airlines, and United Airlines expressed concern that long lead times (300 days,

per Boeing, as specified by FedEx, Turkish Airlines, and China Airlines) for the new force limiter assemblies P/N 253W1263-3 would make it difficult to replace force limiter assemblies P/N 253W1263-1 within 12 months.

The FAA acknowledges that it could be difficult to replace all force limiter assemblies P/N 253W1263-1 within the 12-month compliance period because of the long lead time of procurement and the large quantity of spares having P/N 253W1263-3 necessary to be available to satisfy the global fleet. The FAA disagrees, however, to revise the compliance time because the replacement requirement is limited to force limiter assemblies P/N 253W1263-1 only on airplane line numbers 1531 through 1707 and on airplanes on which the original force limiter assembly had been replaced. However, an operator unable to meet the compliance time required by this AD may request approval of an alternative method of compliance (AMOC) under the provisions of paragraph (j) of this AD, if sufficient data are submitted to substantiate that such an extension would provide an acceptable level of safety. The FAA has not changed this AD further.

Request To Clarify Effect of Unsafe Condition

Boeing requested that the proposed AD be revised to clarify the unsafe condition and its potential safety impact, which, Boeing asserted, could be inferred as a loss of lateral control during normal flight conditions. Boeing stated that the unsafe condition occurs only with an affected force limiter assembly and a jam/restriction of the lateral controls, when the pilot needs to override a lateral control restriction. Boeing therefore requested that the Background section of the NPRM be

revised to state that if a jam/restriction occurs on one side of the lateral controls on an airplane with an affected force limiter assembly, the pilot may not be able to override the jam preventing lateral control from the wheel. Boeing further requested that the proposed AD be revised to clarify that the unsafe condition could result in the loss of lateral control from the wheel and potentially affect continued safe flight and landing only when combined with a lateral control system restriction.

The FAA concurs with the request and has revised relevant sections of this AD accordingly.

Request To Define “Installation” of Parts

American Airlines requested that the proposed AD be clarified to state that removal of a force limiter assembly P/N 253W1263-1 for other maintenance and reinstallation of that same part on the same airplane will not be considered as an installation as defined in paragraph (i) of the proposed AD, “Parts Installation Prohibition.”

The FAA infers that this additional clarification is requested to prevent the unnecessary removal and replacement of force limiter assemblies P/N 253W1263-1 that have been previously verified as being outside the suspect affected range and considered functional. The FAA acknowledges the commenter’s concern, and provides the following clarification of the requirement. Once the FAA has determined that an unsafe condition exists, the FAA generally ensures that that condition not be allowed to be introduced into the fleet. Although the word “install” is generally considered to be broader than the word “replace,” operators can interpret “install” in this AD as meaning “replace” while remaining within the intent of

paragraph (i) of this AD. By simply reinstalling a part removed during maintenance, the operator is not “installing” a different part. Therefore, this AD allows operators to remove a part and then re-install that same part for other maintenance activities not associated with this AD. The FAA has not changed this AD as a result of this comment.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021. This service information specifies procedures for replacing the lower and upper force limiter assemblies P/N 253W1263-1 with force limiter assemblies P/N 253W1263-3. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in

ADDRESSES.

Costs of Compliance

The FAA estimates that this AD affects 353 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replacement	7 work-hours × \$85 per hour = \$595	\$8,960	\$9,555	Up to \$3,372,915.

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of

the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and

procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a

substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024-01-07 The Boeing Company:

Amendment 39-22658; Docket No. FAA-2023-0429; Project Identifier AD-2022-00775-T.

(a) Effective Date

This airworthiness directive (AD) is effective March 7, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all The Boeing Company Model 777-200, -200LR, -300, -300ER, and 777F series airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight controls.

(e) Unsafe Condition

This AD was prompted by an evaluation by the design approval holder that the force limiter assemblies for the lateral control mechanism are not breaking out within the maximum design force requirements. The FAA is issuing this AD to address the force limiter assemblies not breaking out within the maximum design force requirements. The unsafe condition, combined with a lateral

control system jam or restriction, could result in the loss of lateral control from the wheel and potentially affect continued safe flight and landing.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

For airplanes identified in paragraphs (g)(1) and (2) of this AD: Except as specified by paragraph (h) of this AD, at the applicable times specified in the “Compliance” paragraph of Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021.

(1) Airplanes identified in Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021.

(2) Airplanes not identified in Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021, that have an original airworthiness certificate or original export certificate of airworthiness issued on or before the effective date of this AD, and on which a force limiter assembly P/N 253W1263-1 or P/N 253W1263-3 installed in production has been replaced with P/N 253W1263-1.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin 777-27A0124 RB, dated October 27, 2021, which is referred to in Boeing Alert Requirements Bulletin 77-27A0124 RB, dated October 27, 2021.

(h) Exceptions to Service Information Specifications

Where the Compliance Time columns of the tables in the “Compliance” paragraph of Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021, use the phrase “the original issue date of Requirements Bulletin 777-27A0124 RB,” this AD requires using “the effective date of this AD.”

(i) Parts Installation Prohibition

As of the effective date of this AD, no person may install a force limiter assembly, P/N 253W1263-1, on any airplane.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR-520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: 9-ANMSeattle-ACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector,

or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR-520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(k) Related Information

For more information about this AD, contact Anthony Caldejon, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 206-231-3534; email Anthony.V.Caldejon@faa.gov.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Requirements Bulletin 777-27A0124 RB, dated October 27, 2021.

(ii) [Reserved]

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110-SK57, Seal Beach, CA 90740-5600; telephone 562-797-1717; website myboeingfleet.com.

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locationsoremailfr.inspection@nara.gov.

Issued on January 6, 2024.

Caitlin Locke,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA-2023-2004; Project Identifier MCAI-2023-00977-T; Amendment 39-22656; AD 2024-01-05]

RIN 2120-AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022-01-07, which applied to certain Airbus SAS Model A350-941 and -1041 airplanes. AD 2022-01-07 required revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. This AD retains the actions required by AD 2022-01-07 and also requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective March 7, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of March 7, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of March 8, 2022 (87 FR 5391, February 1, 2022).

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA-2023-2004; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

For information on the availability of this material at the FAA, call 206-231-3195. It is also available in the AD docket at *regulations.gov* under Docket No. FAA-2023-2004.

FOR FURTHER INFORMATION CONTACT: Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 562-627-5357; email *dat.v.le@faa.gov*.

SUPPLEMENTARY INFORMATION:**Background**

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2022-01-07, Amendment 39-21895 (87 FR 5391, February 1, 2022) (AD 2022-01-07). AD 2022-01-07 applied to certain Airbus SAS Model A350-941 and -1041 airplanes. AD 2022-01-07 required revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA issued AD 2022-01-07 to address the potential of ignition sources inside fuel tanks, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

The NPRM published in the **Federal Register** on October 26, 2023 (88 FR 73545). The NPRM was prompted by AD 2023-0162, dated August 17, 2023, issued by EASA, which is the Technical Agent for the Member States of the European Union (EASA AD 2023-0162) (also referred to as the MCAI). The MCAI states that new or more restrictive airworthiness limitations have been developed.

In the NPRM, the FAA proposed to retain the actions required by AD 2022-01-07 and also require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in EASA AD 2023-0162. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA-2023-2004.

Discussion of Final Airworthiness Directive**Comments**

The FAA received comments from Air Line Pilots Association, International (ALPA) who supported the NPRM without change. The FAA also received a comment from an anonymous commenter who expressed appreciation for FAA's dedication to aviation safety. No changes to the AD were requested; therefore, the FAA infers that the commenter supported the NPRM.

Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 14 CFR Part 51

The FAA reviewed EASA AD 2023-0162. This service information specifies new or more restrictive airworthiness limitations related to fuel tank ignition prevention and fuel tank flammability reduction.

This AD also requires EASA AD 2021-0209, dated September 15, 2021, which the Director of the Federal Register approved for incorporation by reference as of March 8, 2022 (87 FR 5391, February 1, 2022).

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 31 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has

determined that a per-operator estimate is more accurate than a per-airplane estimate.

The FAA estimates the total cost per operator for the new actions to be \$7,650 (90 work-hours × \$85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2022–01–07, Amendment 39–21895 (87 FR 5391, February 1, 2022); and

■ b. Adding the following new Airworthiness Directive:

2024–01–05 Airbus SAS: Amendment 39–22656; Docket No. FAA–2023–2004; Project Identifier MCAI–2023–00977–T.

(a) Effective Date

This airworthiness directive (AD) is effective March 7, 2024.

(b) Affected ADs

This AD replaces AD 2022–01–07, Amendment 39–21895 (87 FR 5391, February 1, 2022) (AD 2022–01–07).

(c) Applicability

This AD applies all Airbus SAS Model A350–941 and –1041 airplanes, certificated in any category, with an original airworthiness certificate or original export certificate of airworthiness issued on or before June 1, 2023.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address the potential of ignition sources inside fuel tanks, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Revision of the Existing Maintenance or Inspection Program, With AD 2022–01–07, With No Changes

This paragraph restates the requirements of paragraph (g) of AD 2022–01–07, with no changes. For airplanes with an original airworthiness certificate or original export certificate of airworthiness issued on or before June 30, 2021: Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2021–0209, dated September 15, 2021 (EASA AD 2021–0209). Accomplishing the revision of the existing maintenance or inspection program required by paragraph (j) of this AD terminates the requirements of this paragraph.

(h) Retained Exceptions to EASA AD 2021–0209, With No Changes

This paragraph restates the exceptions specified in paragraph (h) of AD 2022–01–07, with no changes.

(1) The requirements specified in paragraphs (1) and (2) of EASA AD 2021–0209 do not apply to this AD.

(2) Paragraph (3) of EASA AD 2021–0209 specifies revising "the AMP [aircraft maintenance program]" within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, to incorporate the "limitations, tasks and associated thresholds and intervals" specified in paragraph (3) of EASA AD 2021–0209 within 90 days after March 8, 2022 (the effective date of AD 2022–01–07).

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2021–0209 is at the applicable "associated thresholds" specified in paragraph (3) of EASA AD 2021–0209, or within 90 days after March 8, 2022 (the effective date of AD 2022–01–07), whichever occurs later.

(4) The provisions specified in paragraphs (4) and (5) of EASA AD 2021–0209 do not apply to this AD.

(5) The "Remarks" section of EASA AD 2021–0209 does not apply to this AD.

(i) Retained Restrictions on Alternative Actions, Intervals, and Critical Design Configuration Control Limitations (CDCCLs), With No Changes

This paragraph restates the requirements of paragraph (i) of AD 2022–01–07, with no changes. Except as required by paragraph (j) of this AD, after the maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (e.g., inspections), intervals, and CDCCLs are allowed unless they are approved as specified in the provisions of the "Ref. Publications" section of EASA AD 2021–0209.

(j) New Revision of the Existing Maintenance or Inspection Program

Except as specified in paragraph (k) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2023–0162, dated August 17, 2023 (EASA AD 2023–0162). Accomplishing the revision of the existing maintenance or inspection program required by this paragraph terminates the requirements of paragraph (g) of this AD.

(k) Exceptions to EASA AD 2023–0162

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2023–0162.

(2) Where paragraph (3) of EASA AD 2023–0162 specifies "Within 12 months after the effective date of this AD, revise the AMP," this AD requires replacing those words with "Within 90 days after the effective date of this AD, revise the existing maintenance or inspection program, as applicable."

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2023–0162 is at the applicable "limitations" and "associated thresholds" as

incorporated by the requirements of paragraph (3) of EASA AD 2023–0162, or within 90 days after the effective date of this AD, whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (4) and (5) of EASA AD 2023–0162.

(5) This AD does not adopt the “Remarks” section of EASA AD 2023–0162.

(l) New Provisions for Alternative Actions, Intervals, and CDCCLs

After the existing maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (e.g., inspections), intervals, and CDCCLs are allowed unless they are approved as specified in the provisions of the “Ref. Publications” section of EASA AD 2023–0162.

(m) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (n) of this AD or email to: 9-AVS-AIR-730-AMOC@faa.gov. If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Airbus SAS’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(n) Additional Information

For more information about this AD, contact Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 562–627–5357; email dat.v.le@faa.gov.

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on March 7, 2024.

(i) European Union Aviation Safety Agency (EASA) AD 2023–0162, dated August 17, 2023.

(ii) [Reserved]

(4) The following service information was approved for IBR on March 8, 2022 (87 FR 5391, February 1, 2022).

(i) European Union Aviation Safety Agency (EASA) AD 2021–0209, dated September 15, 2021.

(ii) [Reserved]

(5) For EASA AD 2023–0162 and EASA AD 2021–0209, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone: +49 221 8999 000; email: ADs@easa.europa.eu; website: easa.europa.eu. You may find these EASA ADs on the EASA website: ad.easa.europa.eu.

(6) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(7) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on January 26, 2024.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0657; Project Identifier AD–2022–01351–T; Amendment 39–22652; AD 2024–01–01]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain The Boeing Company (Boeing) Model 787–8, 787–9, and 787–10 airplanes. This AD was prompted by reports of undetected water leaks from the faucet control module (FCM) migrating below the passenger floor in multiple lavatory locations during flight, and into the electronic equipment bay(s). This AD requires repetitive general visual inspections of the area under all lavatory washbasins for evidence of intermittent and active leaks at the FCM and applicable on-condition actions. The FAA is issuing this AD to address the unsafe condition on these products. **DATES:** This AD is effective March 7, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of March 7, 2024.

ADDRESSES:

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA–2023–0657; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For service information identified in this final rule, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website myboeingfleet.com.

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at regulations.gov under Docket No. FAA–2023–0657.

FOR FURTHER INFORMATION CONTACT:

Courtney Tuck, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3986; email Courtney.K.Tuck@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Boeing Model 787–8, 787–9, and 787–10 airplanes. The NPRM published in the **Federal Register** on April 10, 2023 (88 FR 21120). The NPRM was prompted by reports of undetected water leaks from the FCM migrating below the passenger floor in multiple lavatory locations during flight, and into the electronic equipment bay(s). In the NPRM, the FAA advised that the FCMs are located under the sinks in each lavatory and have an O-ring seal at the top of the FCM mixing chamber; a small amount of water leaking past the O-ring has been identified as the source of the leak.

In the NPRM, the FAA proposed to require repetitive general visual inspections of the area under all lavatory washbasins for evidence of intermittent and active leaks at the FCM and applicable on-condition actions, including replacing the affected FCM.

The FAA is issuing this AD to address undetected water leaks, which could damage flight critical equipment. The unsafe condition, if not addressed, could result in loss of multiple line replaceable units (LRUs) and subsequent loss of continued safe flight and landing.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from Boeing and the Air Line Pilots Association, International, who supported the NPRM without change.

The FAA received additional comments from United Airlines (UAL), American Airlines (American), and All Nippon Airways (ANA). The following presents the comments received on the NPRM and the FAA's response to each comment.

Request To Allow Alternative Cleaning Material

UAL noted that the proposed AD would require complying with the actions in table 1 of Boeing Alert Requirements Bulletin B787-81205-SB250290-00 RB, Issue 001, dated November 1, 2022, which then references the procedures in Service Bulletin B787-81205-SB250290-00 Issue 001 or later approved issues for each action. UAL stated that the service bulletin contains a cleaning action that refers to a Jamco component maintenance manual (CMM) as an accepted procedure. UAL further stated that the instructions in the Jamco CMM for removing scale specify using a corrosive solution that can produce harmful fumes. As a result, UAL asked to use a milder product as an alternative.

Both the requirements bulletin and the service bulletin state that where the instructions refer to another document, operators may use accepted alternative procedures. Where the instructions state a procedure must be done in accordance with a Boeing document, then operators will need an alternative method of compliance (AMOC) to use a different procedure. Because the cleaning procedure mentioned by the commenter refers to the Jamco CMM, operators may use accepted alternative procedures, including a different accepted cleaning product, without obtaining an AMOC. No change to the AD is necessary as a result of this comment.

Request To Limit Inspection Area

In the NPRM, the FAA proposed to require visual inspections at all lavatory locations. American and ANA requested that the FAA limit the inspection to the

area under the lavatory washbasins located in the door 1 and door 3 area near the electronic equipment bays. American added that leaks in other locations do not have the potential to cause damage to the LRUs and thus do not affect safe operation of the airplane.

The FAA disagrees with the commenters' request. The unsafe condition exists when two FCMs leak simultaneously, involving the loss of flight-critical equipment at different locations. This could occur at door 1, 2, 3, or 4. Further, it is possible to have multiple persistent and simultaneous latent leaks from different lavatories on the same airplane. Therefore, it is necessary to inspect the lavatories at all locations, not just those near the electronic equipment bays.

Request To Reference Master Minimum Equipment List (MMEL) Item 38-10-01A

American requested that the FAA state that MMEL item 38-10-01A (which allows individual components of the potable water system to be inoperative provided associated components are deactivated or isolated and associated system components are verified to not have leaks) remains valid and applicable as a method to deactivate the water supply to a discrepant FCM.

The FAA agrees that this AD does not conflict with an operator's ability to dispatch an airplane with an inoperable potable water system under MMEL item 38-10-01A. The FAA has not changed this AD in this regard.

Request To Limit Actions for Intermittent Leaks

ANA requested that the FAA revise the proposed AD to not require corrective action if intermittent leaks are found from the FCM. ANA stated that if evidence of intermittent leaks are found at the FCM, the source of the leak isn't necessarily the FCM, and therefore it should not be necessary to replace the FCM or deactivate the water supply to the FCM.

The FAA disagrees. Intermittent leaks may have a long latency period and be difficult to detect, but they can still cause the unsafe condition identified in this AD and therefore must be addressed. Operators with a method other than replacement of the FCM, which provides an acceptable level of safety, may request approval to use an AMOC. The FAA did not change this AD as a result of this request.

Additional Changes to This Final Rule

After the NPRM was published, Boeing notified the FAA that certain airplanes were modified in production

and delivered with a redesigned FCM that is not subject to the unsafe condition. The FAA has determined the actions required by this AD are not necessary on those airplanes and has therefore revised the applicability of this AD to only include airplanes that were delivered with the affected FCM.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for the changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin B787-81205-SB250290-00 RB, Issue 001, dated November 1, 2022. This service information specifies procedures for a repetitive general visual inspection of the area under all lavatory washbasins for evidence of intermittent and active leaks at the FCM and applicable on-condition actions. On-condition actions include replacing the affected FCM with new or serviceable FCM at affected lavatory washbasin(s), and doing a leak test. If a leak is found, the service information specifies doing applicable corrective action, repeating the leak test, and making sure no leak is found.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in ADDRESSES.

Differences Between This AD and the Service Information

The effectivity of Boeing Alert Requirements Bulletin B787-81205-SB250290-00 RB, Issue 001, dated November 1, 2022, is Model 787-8, -9, and -10 airplanes, line numbers 6 through 9996. As the FAA stated in the NPRM, the agency would consider revising the applicability of the final rule to exclude airplanes with a redesigned FCM that eliminates the need for the actions required by this AD. Therefore, the applicability of this AD does not include those line-numbered airplanes with a redesigned FCM installed in production.

Interim Action

This AD is an interim action. The FAA is considering additional rulemaking regarding the redesigned

FCM that addresses the unsafe condition identified in this AD.

Costs of Compliance

The FAA estimates that this AD affects 140 airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	1 work-hour × \$85 per hour = \$85 per inspection cycle	\$0	\$85 per inspection cycle	\$11,900

The FAA estimates the following costs to do any necessary replacements that would be required based on the

results of the inspection. The agency has no way of determining the number of

aircraft that might need these replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacement	1 work-hour × \$85 per hour = \$85	\$6,021	\$6,106

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024–01–01 The Boeing Company:
Amendment 39–22652; Docket No. FAA–2023–0657; Project Identifier AD–2022–01351–T.

(a) Effective Date

This airworthiness directive (AD) is effective March 7, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 787–8, 787–9, and 787–10 airplanes, certificated in any category, having line numbers 6 through 687 inclusive, 689 through 954 inclusive, 956 through 970 inclusive, 972 through 982 inclusive, 984 through 989 inclusive, 991 through 996 inclusive, 999, 1001 through 1008 inclusive, 1012, 1013, 1016 through 1019 inclusive, 1021, 1022, 1024 through 1026 inclusive,

1029 through 1032 inclusive, 1038, 1040, 1041, 1044, 1045, 1047, 1048, 1054 through 1062 inclusive, 1071, 1072, 1074, 1075, 1082, 1085, 1087, 1091, 1094, 1095, 1098, 1099, 1103, 1109, 1112 through 1114 inclusive, 1117, 1118, 1121, 1122, 1125, 1126, 1128 through 1134 inclusive, 1136 through 1145 inclusive, 1147, 1148, 1151, 1161, and 1167.

(d) Subject

Air Transport Association (ATA) of America Code 38, Water/waste.

(e) Unsafe Condition

This AD was prompted by reports of undetected water leaks from the faucet control module migrating below the passenger floor in multiple lavatory locations during flight, and into the electronic equipment bay(s). The FAA is issuing this AD to address undetected water leaks, which could damage flight critical equipment. The unsafe condition, if not addressed, could result in loss of multiple line replaceable units and subsequent loss of continued safe flight and landing.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified by paragraph (h) of this AD: At the applicable times specified in the “Compliance” paragraph of Boeing Alert Requirements Bulletin B787–81205–SB250290–00 RB, Issue 001, dated November 1, 2022, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin B787–81205–SB250290–00 RB, Issue 001, dated November 1, 2022.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin B787–81205–SB250290–00, Issue 001, dated November 1, 2022, which is referred to in Boeing Alert Requirements

Bulletin B787–81205–SB250290–00, Issue 001, dated November 1, 2022.

(h) Exceptions to Service Information Specifications

Where the Compliance Time column of the table in the “Compliance” paragraph of Boeing Alert Requirements Bulletin B787–81205–SB250290–00 RB, Issue 001, dated November 1, 2022, uses the phrase “the Issue 001 date of the Requirements Bulletin B787–81205–SB250290–00 RB,” this AD requires using “the effective date of this AD.”

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520 Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j) of this AD. Information may be emailed to: 9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR–520 Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(j) Related Information

For more information about this AD, contact Courtney Tuck, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3986; email Courtney.K.Tuck@faa.gov.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Requirements Bulletin B787–81205–SB250290–00 RB, Issue 001, dated November 1, 2022.

(ii) [Reserved]

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website myboeingfleet.com.

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th

St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on January 3, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2020–26–08, which applied to The Boeing Company Model 787–8, 787–9, and 787–10 airplanes powered by Rolls-Royce Trent 1000 engines. AD 2020–26–08 required repetitive inspections of the inner fixed structure (IFS) forward upper fire seal and thermal insulation blankets in the forward upper area of the thrust reverser (TR) for damage and applicable on-condition actions. Since the FAA issued AD 2020–26–08, the FAA determined that a new upper splitter fairing assembly is needed to prevent damage to the fire seal and thermal insulation blanket. This AD continues to require the actions specified in AD 2020–26–08 and requires determining if an affected part number of the upper splitter fairing assembly is installed on the engine, replacing an affected upper splitter fairing assembly part number with a new upper splitter fairing assembly part number, inspecting the IFS forward upper fire seal and thermal insulation blanket for any damage, and applicable on-condition actions. This AD also prohibits the installation of affected parts. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective March 7, 2024.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of March 7, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of January 27, 2021 (85 FR 83755, December 23, 2020).

ADDRESSES:

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA–2023–1037; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at regulations.gov under Docket No. FAA–2023–1037.

FOR FURTHER INFORMATION CONTACT: Tak Kobayashi, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; telephone 206–231–3553; email takahisa.kobayashi@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2020–26–08, Amendment 39–21363 (85 FR 83755, December 23, 2020) (AD 2020–26–08). AD 2020–26–08 applied to The Boeing Company Model 787–8, 787–9, and 787–10 airplanes powered by Rolls-Royce Trent 1000 engines. AD 2020–26–08 required repetitive inspections of the IFS forward upper fire seal and thermal insulation blankets in the forward upper area of the TR for damage and applicable on-condition actions.

The NPRM published in the **Federal Register** on May 25, 2023 (88 FR 33851). The NPRM was prompted by a

determination that a new upper splitter fairing assembly part number (P/N) KH99185 should be required to prevent damage to the fire seal and thermal insulation blanket. In the NPRM, the FAA proposed to continue to require the actions specified in AD 2020–26–08 and require determining if upper splitter fairing assembly P/N KH60375 is installed on the engine, replacing upper splitter fairing assembly P/N KH60375 with a new upper splitter fairing assembly part number, inspecting the IFS forward upper fire seal and thermal insulation blanket for any damage, and applicable on-condition actions.

The FAA issued a supplemental NPRM (SNPRM) to amend 14 CFR part 39 to supersede AD 2020–26–08. The SNPRM published in the **Federal Register** on October 31, 2023 (88 FR 74372). The SNPRM was prompted by the FAA identifying an additional affected upper splitter fairing assembly, P/N KH11560, that must be replaced to address the unsafe condition. In the SNPRM, the FAA revised the NPRM by proposing replacement of the additional upper splitter fairing assembly. The FAA is issuing this AD to address the damage to the IFS forward upper fire seal and the thermal insulation blankets of the TR due to airflow through structural gapping that could occur at the interface between the leading edge of the IFS and the engine splitter structure during flight. Failure of the IFS forward upper fire seal could cause the loss of seal pressurization and degrade the ability to detect and extinguish an engine fire, resulting in an uncontrolled fire. Damage to the TR insulation blanket could result in

thermal damage to the TR inner wall, the subsequent release of engine exhaust components, and consequent damage to critical areas of the airplane. Furthermore, damage to the TR inner wall and IFS forward upper fire seal could compromise the integrity of the firewall and its ability to contain an engine fire, resulting in an uncontrolled fire.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from The Air Line Pilots Association, International and The Boeing Company, who both supported the SNPRM without change.

Conclusion

The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the SNPRM.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin B787–81205–SB720007–00 RB, Issue 001, dated December 12, 2022. This service information specifies replacing the upper splitter fairing assembly with a new upper splitter fairing assembly with ramp fairing incorporated and doing a general visual inspection of the IFS forward upper fire seal and thermal insulation blanket of the left and right

TR halves for any damage. This service information also specifies applicable on-condition actions, including replacing the IFS forward upper fire seal and thermal insulation blanket of each TR half if damage is found. The procedures in the service information apply to each affected engine.

The FAA also reviewed Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 002, dated December 21, 2021. This service information contains procedures for repetitive inspections of the IFS forward upper fire seal and thermal insulation blanket of the left and right TR halves for any damage. This service information also specifies applicable on-condition actions, including replacing the IFS forward upper fire seal and thermal insulation blanket of each TR half if damage is found. The procedures in the service information apply to each affected engine.

This AD also requires Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 001, dated March 31, 2020, which the Director of the Federal Register approved for incorporation by reference as of January 27, 2021 (85 FR 83755, December 23, 2020).

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Costs of Compliance

The FAA estimates that this AD affects 13 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection (retained actions from AD 2020–26–08).	2 work-hours × \$85 per hour = \$170 per inspection cycle.	\$0	\$170 per inspection cycle.	\$2,210 per inspection cycle.
Inspection or records review (new action)	1 work-hour × \$85 per hour = \$85	0	\$85	\$1,105.
Replacement of each upper splitter fairing assembly (new action).	71 work-hours × \$85 per hour = \$6,035	230,000	\$236,035	\$3,068,455.
Inspection (new action)	2 work-hours × \$85 per hour = \$170	0	\$170	\$2,210.

The FAA estimates the following costs to do any necessary replacements that would be required based on the

results of the inspection. The agency has no way of determining the number of

aircraft that might need these replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Fire seal replacement	2 work-hours × \$85 per hour = \$170 per TR half	\$1,383 per TR half.	\$1,553 per TR half (4 TR halves per airplane).
Thermal insulation blanket replacement.	1 work-hour × \$85 per hour = \$85 per TR half	\$18,214 per TR half	\$18,299 per TR half.

According to the manufacturer, some of the costs of this AD may be covered under warranty by Goodrich, thereby reducing the cost impact on affected operators. The FAA does not control warranty coverage for affected operators. As a result, the FAA has included all known costs in the cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by:
 - a. Removing Airworthiness Directive 2020–26–08, Amendment 39–21363 (85 FR 83755, December 23, 2020); and
 - b. Adding the following new Airworthiness Directive:

2024–01–04 The Boeing Company:
Amendment 39–22655; Docket No. FAA–2023–1037; Project Identifier AD–2023–00511–T.

(a) Effective Date

This airworthiness directive (AD) is effective March 7, 2024.

(b) Affected ADs

This AD replaces AD 2020–26–08, Amendment 39–21363 (85 FR 83755, December 23, 2020) (AD 2020–26–08).

(c) Applicability

This AD applies to The Boeing Company Model 787–8, 787–9, and 787–10 airplanes, certificated in any category, with Rolls-Royce Trent 1000 engines installed.

(d) Subject

Air Transport Association (ATA) of America Code 72, Turbine/turboprop engine.

(e) Unsafe Condition

This AD was prompted by reports of Rolls-Royce Trent 1000 powered airplanes having damage to the thrust reverser inner fixed structure (IFS) forward upper fire seal and damage to thermal insulation blankets in the forward upper area of the thrust reverser (TR). The FAA is issuing this AD to address the damage to the IFS forward upper fire seal and the thermal insulation blankets of the TR due to airflow through structural gapping that could occur at the interface between the leading edge of the IFS and the engine splitter structure during flight. Failure of the IFS forward upper fire seal could cause the loss of seal pressurization and degrade the ability to detect and extinguish an engine fire, resulting in an uncontrolled fire. Damage to the TR insulation blanket could result in thermal damage to the TR inner wall, the subsequent release of engine exhaust components, and consequent damage to critical areas of the airplane. Furthermore, damage to the TR inner wall and IFS forward upper fire seal could compromise the integrity of the firewall and its ability to contain an engine fire, resulting in an uncontrolled fire.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Actions, With Additional Service Information, Revised Affected Airplanes, and New Terminating Action

This paragraph restates the requirements of paragraph (g) of AD 2020–26–08, with additional service information, revised affected airplanes, and new terminating action. For airplanes with an original airworthiness certificate or original export certificate of airworthiness issued on or before the effective date of this AD and for airplanes listed in the "Effectivity" section of Boeing Alert Requirements Bulletin B787–81205–SB720007–00 RB, Issue 001, dated December 12, 2022: Except as specified by paragraph (h) of this AD, at the applicable times specified in the "Compliance" paragraph of Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 001, dated March 31, 2020, or Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 002, dated December 21, 2021, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 001, dated March 31, 2020, or Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 002, dated December 21, 2021. Accomplishing the actions required by paragraph (i)(2) of this AD terminates the actions required by this paragraph.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by paragraph (g) of this AD can be found in Boeing Alert Service Bulletin B787–81205–SB780041–00, Issue 001, dated March 31, 2020, which is referred to in Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 001, dated March 31, 2020; or in Boeing Alert Service Bulletin B787–81205–SB780041–00, Issue 002, dated December 21, 2021, which is referred to in Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 002, dated December 21, 2021.

(h) Retained Exceptions to Service Information Specifications for Paragraph (g) of This AD, With Additional Service Information

This paragraph restates the exceptions specified in paragraph (h) of AD 2020–26–08, with additional service information. Where Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 001, dated March 31, 2020, or Boeing Alert Requirements Bulletin B787–81205–SB780041–00 RB, Issue 002, dated December 21, 2021, uses the phrase "the Issue 001 date of Requirements Bulletin B787–81205–SB780041–00 RB," this AD requires using January 27, 2021, (the effective date of AD 2020–26–08).

(i) New Required Actions

(1) For airplanes with original airworthiness certificate or original export certificate of airworthiness issued on or before the effective date of this AD and for airplanes listed in the "Effectivity" section of Boeing Alert Requirements Bulletin B787–81205–SB720007–00 RB, Issue 001, dated December 12, 2022: Within 7 years after the effective date of this AD, or within 7 years

after the date of issuance of the original airworthiness certificate or original export certificate of airworthiness, whichever occurs later, inspect the airplane to determine the part number of the upper splitter fairing assembly installed on each engine. A review of airplane maintenance records is acceptable in lieu of this inspection if the part number of the upper splitter fairing assembly can be conclusively determined from that review. For engines on which no upper splitter fairing assembly part number (P/N) KH60375 or P/N KH11560 is installed, the actions required by paragraph (g) of this AD are no longer required for that engine.

(2) If, during any inspection or records review required by paragraph (i)(1) of this AD, an upper splitter fairing assembly P/N KH60375 or P/N KH11560 is found on any engine of an airplane: Except as specified by paragraph (j) of this AD, at the applicable times specified in the "Compliance" paragraph of Boeing Alert Requirements Bulletin B787-81205-SB720007-00 RB, Issue 001, dated December 12, 2022, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin B787-81205-SB720007-00 RB, Issue 001, dated December 12, 2022, for each affected engine. Accomplishing the actions required by this paragraph on all affected engines of an airplane terminates the actions required by paragraph (g) of this AD for that airplane.

Note 2 to paragraph (i)(2): Guidance for accomplishing the actions required by paragraph (i)(2) of this AD can be found in Boeing Alert Service Bulletin B787-81205-SB720007-00, Issue 001, dated December 12, 2022, which is referred to in Boeing Alert Requirements Bulletin B787-81205-SB720007-00 RB, Issue 001, dated December 12, 2022.

(j) Exceptions to Service Information Specifications for Paragraph (i)(2) of This AD

(1) Where the Compliance Time column of table 5 in the "Compliance" paragraph of Boeing Alert Requirements Bulletin B787-81205-SB720007-00 RB, Issue 001, dated December 12, 2022, uses the phrase "the Issue 001 date of Requirements Bulletin B787-81205-SB720007-00 RB," this AD requires using "the effective date of this AD."

(2) Where the service information referenced in Boeing Alert Requirements Bulletin B787-81205-SB720007-00 RB, Issue 001, dated December 12, 2022, specifies to remove the existing upper splitter fairing assembly P/N KH60375, this AD requires removing the existing upper splitter fairing assembly P/N KH60375 or P/N KH11560.

(k) Parts Installation Prohibition

(1) For airplanes with an original airworthiness certificate or original export certificate of airworthiness issued after the effective date of this AD, except for airplanes listed in Boeing Alert Requirements Bulletin B787-81205-SB720007-00 RB, Issue 001, dated December 12, 2022: As of the effective date of this AD, no person may install an engine with an upper splitter fairing assembly P/N KH60375 or P/N KH11560 on any airplane.

(2) For airplanes with original airworthiness certificate or original export certificate of airworthiness issued on or before the effective date of this AD and for airplanes listed in Boeing Alert Requirements Bulletin B787-81205-SB720007-00 RB, Issue 001, dated December 12, 2022, on which, during the actions required by paragraph (i)(1) of this AD, no upper splitter fairing assembly P/N KH60375 or P/N KH11560 was installed on both engines: After accomplishing the inspection or records review required by paragraph (i)(1) of this AD, no person may install an engine with an upper splitter fairing assembly P/N KH60375 or P/N KH11560 for replacement of an engine on those airplanes.

(l) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR-520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of AIR-520, Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to 9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR-520, Continued Operational Safety Branch, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(m) Related Information

For more information about this AD, contact Tak Kobayashi, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; telephone 206-231-3553; email takahisa.kobayashi@faa.gov.

(n) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on March 7, 2024.

(i) Boeing Alert Requirements Bulletin B787-81205-SB720007-00 RB, Issue 001, dated December 12, 2022.

(ii) Boeing Alert Requirements Bulletin B787-81205-SB780041-00 RB, Issue 002, dated December 21, 2021.

(4) The following service information was approved for IBR on January 27, 2021 (85 FR 83755, December 23, 2020).

(i) Boeing Alert Requirements Bulletin B787-81205-SB780041-00 RB, Issue 001, dated March 31, 2020.

(ii) [Reserved]

(5) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Boulevard, MC 110-SK57, Seal Beach, CA 90740-5600; telephone 562-797-1717; website myboeingfleet.com.

(6) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

(7) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on January 6, 2024.

Caitlin Locke,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2023-2118; Airspace Docket No. 23-AGL-31]

RIN 2120-AA66

Amendment of Class E Airspace; Harrison, OH

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the Class E airspace at Harrison, OH. This action is the result of an airspace review conducted due to the decommissioning of the Cincinnati very high frequency omnidirectional range (VOR) as part of the VOR Minimum Operating Network (MON) Program. The geographic coordinates of the airport are also being updated to coincide with the FAA's aeronautical database. This action brings the airspace into compliance with FAA orders to support instrument flight rule (IFR) operations.

DATES: Effective 0901 UTC, May 16, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the Notice of Proposed Rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

FOR FURTHER INFORMATION CONTACT: Jeffrey Claypool, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222-5711.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends the Class E airspace extending upward from 700 feet above the surface at Cincinnati West Airport, Harrison, OH, to support IFR operations at this airport.

History

The FAA published an NPRM for Docket No. FAA-2023-2118 in the **Federal Register** (88 FR 76152; November 6, 2023) proposing to amend the Class E airspace at Harrison, OH. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Incorporation by Reference

Class E airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This

document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to 14 CFR part 71 modifies the Class E airspace extending upward from 700 feet above the surface to within a 7.1-mile (increased from a 6.4-mile) radius of Cincinnati West Airport, Harrison, OH; removes the exclusionary language as it is not required; removes the city associated with the airport in the legal description header to comply with changes to FAA Order JO 7400.2P, Procedures for Handling Airspace Matters; and updates the geographic coordinates of the airport to coincide with the FAA's aeronautical database.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5-6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AGL OH E5 Harrison, OH [Amended]

Cincinnati West Airport, OH
(Lat. 39°15'33" N, long 84°46'28" W)

That airspace extending upward from 700 feet above the surface within a 7.1-mile radius of Cincinnati West Airport.

* * * * *

Issued in Fort Worth, Texas, on January 29, 2024.

Martin A. Skinner,

Acting Manager, Operations Support Group, ATO Central Service Center.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends the Class E airspace extending upward from 700 feet above the surface at Litchfield Municipal Airport, Litchfield, MN, to support IFR operations at this airport.

History

The FAA published an NPRM for Docket No. FAA-2023-2117 in the **Federal Register** (88 FR 76156;

November 6, 2023) proposing to amend the Class E airspace at Litchfield, MN. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Incorporation by Reference

Class E airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to 14 CFR part 71 modifies the Class E airspace extending upward from 700 feet above the surface to within a 6.4-mile (increased from a 6.3-mile) radius of Litchfield Municipal Airport, Litchfield, MN; and removes the Darwin VORTAC and associated extension from the airspace legal description.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures,"

paragraph 5-6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AGL MN E5 Litchfield, MN [Amended]

Litchfield Municipal Airport, MN
(Lat. 45°05'50" N, long 94°30'26" W)

That airspace extending upward from 700 feet above the surface within a 6.4-mile radius of Litchfield Municipal Airport.

* * * * *

Issued in Fort Worth, Texas, on January 29, 2024.

Martin A. Skinner,

Acting Manager, Operations Support Group, ATO Central Service Center.

BILLING CODE 4910-13-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Part 493

[CMS-3326-CN]

RIN 0938-AT47

Clinical Laboratory Improvement Amendments of 1988 (CLIA) Fees; Histocompatibility, Personnel, and Alternative Sanctions for Certificate of Waiver Laboratories; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS) and Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Final rule; correction.

SUMMARY: This document corrects technical and typographical errors in the final rule that appeared in the December 28, 2023, *Federal Register* entitled, “Clinical Laboratory Improvement Amendments of 1988 (CLIA) Fees; Histocompatibility, Personnel, and Alternative Sanctions for Certificate of Waiver Laboratories” (referred to hereafter as the “December 2023 final rule”).

DATES: This correction is effective January 27, 2024.

FOR FURTHER INFORMATION CONTACT: Penny Keller, CMS, (410) 786-2035; or Heather Stang, CDC, (404) 498-2769.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2023-28170 of December 28, 2023, the December 2023 final rule (88 FR 89976), there were technical and typographical errors that are identified and corrected in this correcting document. These corrections are effective as if they had been included in the December 2023 final rule.

II. Summary of Errors in the Regulation Text

On page 90040, in the revision for § 493.1423(b)(7)(i), we inadvertently omitted two redesignated paragraph references for individuals who meet the regulatory qualifications to perform blood gas analysis. We are correcting the revision for § 493.1423(b)(7)(i) to include references to § 493.1423(b)(5) and (6).

On page 90043, in amendatory instruction 30, we inadvertently omitted the specific paragraph references for the changes to paragraph (e), which were set out in the amendment text. We are

correcting the instruction to specify paragraphs (e)(1) through (4).

On page 90044, in the revisions for § 493.1483(b)(3), we inadvertently omitted the December 28, 2024 effective date.

On page 90044, in amendatory instruction 37, we inadvertently included an incorrect effective date. The December 2023 final rule contained two separate effective dates, January 27, 2024, and December 28, 2024 and we erroneously included the December 28, 2024, effective date rather than the January 27, 2024, effective date.

III. Waiver of Proposed Rulemaking and Delay in Effective Date

Under 5 U.S.C. 553(b) of the Administrative Procedure Act (APA), the agency is required to publish a notice of the proposed rulemaking in the *Federal Register* before the provisions of a rule take effect. Section 553(d) of the APA ordinarily requires a 30-day delay in effective date of final rules after the date of their publication in the *Federal Register*.

Section 553(b)(B) of the APA authorizes an agency to dispense with normal rulemaking requirements for good cause if the agency makes a finding that the notice and comment process is impracticable, unnecessary, or contrary to the public interest. In addition, section 553(d)(3) of the APA allows the agency to avoid the 30-day delay in effective date where such delay is contrary to the public interest and an agency includes a statement of support.

We believe this correcting document does not constitute a rule that would be subject to the notice and comment or delayed effective date requirements. This document merely corrects technical and typographical errors in the December 2023 final rule but does not make substantive changes to the policies that were adopted in the December 2023 final rule. Instead, this correcting document is intended to ensure that the information in the December 2023 final rule accurately reflects the policies adopted in that document.

In addition, even if this were a rule to which the notice and comment procedures and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the corrections in this document into the December 2023 final rule or delaying the effective date would be contrary to the public interest because it is in the public’s interest to ensure that the December 2023 final rule accurately reflects the policies finalized

in that final rule. Furthermore, such procedures would be unnecessary, as we are not altering our policies, but rather, we are simply correctly implementing the policies we finalized. This final rule correction is intended to ensure that the December 2023 final rule accurately reflects those policies. Therefore, we believe we have good cause to waive the notice and comment and delayed effective date requirements.

IV. Correction of Errors in the Regulation Text

In FR Doc. 2023-28170 of Thursday, December 28, 2023 (88 FR 89976), we are making the following corrections:

§ 493.1423 [Corrected]

■ 1. On page 90040, in the third column, in § 493.1423(b)(7)(i), “(i) Be qualified under paragraph (b)(1), (2), (3), or (4) of this section; or” is corrected to read “(i) Be qualified under paragraph (b)(1), (2), (3), (4), (5), or (6) of this section; or”.

§ 493.1461 [Corrected]

■ 2. On page 90043, in the third column, amendment 30, the instruction “Effective December 28, 2024, amend § 493.1461 by revising paragraphs (c), (d)(3)(i), and (e) to read as follows:” is corrected to read “Effective December 28, 2024, amend § 493.1461 by revising paragraphs (c), (d)(3)(i), and (e)(1) through (4) to read as follows:”.

§ 493.1483 [Corrected]

■ 3. On page 90044, in the second column, in § 493.1483(b)(3), “(3) Notwithstanding any other provision of this section, an individual is considered qualified as a cytotechnologist under this section if they were qualified and serving as a cytotechnologist in a CLIA-certified laboratory as of [effective date of the final rule], and have done so continuously since December 28, 2024” is corrected to read “(3) Notwithstanding any other provision of this section, an individual is considered qualified as a cytotechnologist under this section if they were qualified and serving as a cytotechnologist in a CLIA-certified laboratory as of December 28, 2024, and have done so continuously since December 28, 2024”.

§ 493.1804 [Corrected]

■ 4. On page 90044, in the third column, amendment 37, the instruction “Effective December 28, 2024, amend § 493.1804 by revising paragraph (c)(1) to read as follows:” is corrected to read “Effective January 27, 2024, amend

§ 493.1804 by revising paragraph (c)(1) to read as follows:”.

Elizabeth J. Gramling, Executive Secretary to the Department, Department of Health and Human Services. [FR Doc. 2024-01942 Filed 1-26-24; 5:15 pm] BILLING CODE 4120-01-P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

45 CFR Part 2500

RIN 3045-AA83

AmeriCorps Statement of Organization

AGENCY: Corporation for National and Community Service.

ACTION: Final rule.

SUMMARY: The Corporation for National and Community Service (CNCS), which operates as AmeriCorps, is finalizing a rule to provide general information to the public about its structure and purpose, as required by the Administrative Procedure Act. While AmeriCorps already provides

information about its organizational structure on its public-facing website (americorps.gov), this rule would comply with the statutory requirement that agencies publish in the Federal Register their descriptions of organization. This rule will also increase transparency regarding AmeriCorps’ operations by mapping out its existing program regulations, thereby providing an overview of the Agency’s programs.

DATES: This rule is effective March 4, 2024.

FOR FURTHER INFORMATION CONTACT:

Elizabeth Appel, Office of General Counsel, at (202) 967-5070, or eappel@americorps.gov.

SUPPLEMENTARY INFORMATION:

I. Background

AmeriCorps, the operating name for the Corporation for National and Community Service, is a Federal agency that engages millions of Americans in service. AmeriCorps members and AmeriCorps Seniors volunteers serve directly with nonprofit, tribal, faith-

based, or community organizations to tackle some of our nation’s most pressing challenges. Although AmeriCorps already provides information about its organizational structure on its website, americorps.gov, this rule complies with the statutory requirement that agencies “publish in the Federal Register” their descriptions of organization. See 5 U.S.C. 552(a)(1)(A). This rule will also increase transparency regarding AmeriCorps’ operations by mapping out its existing program regulations, thereby providing an overview of the Agency’s programs.

This rule adds AmeriCorps’ organizational information to Code of Federal Regulations (CFR) part 2500. Part 2500 already includes information about AmeriCorps being CNCS’s operating name and information about AmeriCorps’ logos. This rule redesignates, without substantive change, the operating name and logo sections to new sections later in the CFR part and adds subpart designations. The following is a breakdown of the new and redesignated sections:

Table with 3 columns: Current 45 CFR section, New 45 CFR section, and Description of change. It lists redesignations for sections 2500.1 through 2500.32.

The new sections describe AmeriCorps’:

- Statutory basis and origination;
• Purpose, to administer the programs established under the national service laws; and mission, to improve lives, strengthen communities, and foster civic engagement through service and volunteering;
• Organization, including the roles of the Chief Executive Officer and the Board of Directors;
• Headquarters, including leadership positions; and region offices, referring to AmeriCorps’ website for details on contact information;
• Four main national service programs: AmeriCorps NCCC, AmeriCorps Seniors, AmeriCorps State and National, and AmeriCorps VISTA; and

- Focus areas, which include, but are not limited to, disaster services, economic opportunity, education, environmental stewardship, healthy futures, and veterans and military families.

Edits to the sections addressing AmeriCorps’ logos specify the logos’ fonts and the direction of the flag in the logos and make minor grammatical changes.

II. Responses to Comments on Proposed Rule and Changes to Proposed Rule

AmeriCorps published the proposed rule on May 2, 2023. See 88 FR 27423. AmeriCorps received three written comment submissions prior to the July 3, 2023, deadline for public comments. All three comments expressed opposition to AmeriCorps’ regional

structure under the Office of Regional Operations and the logos and branding that resulted from the “Transformation and Sustainability Plan” that AmeriCorps adopted several years ago. Commenters recounted multiple challenges with the regional structure that replaced the State Office structure. AmeriCorps currently operates through the regional structure and strives to address grantees’ concerns or the difficulties they face within that structure. However, because the rule merely describes the regional structure under which AmeriCorps currently operates, AmeriCorps is not reconsidering its structure at this time, and is proceeding with finalization of the description contained in the rule. However, AmeriCorps appreciates the

commenters' input on the structure and welcomes ongoing communications to continually improve operations within the regional structure.

All three comments also expressed some opposition to the logos and branding, stating—among other reasons—that the logo and branding cause confusion. AmeriCorps appreciates the comments around the potential brand confusion; however, because no substantive change was proposed for the sections related to logos and branding (only a redesignation of section numbers), AmeriCorps is maintaining the current rule with finalization of the proposed section redesignations.

The only changes to the proposed rule that the final rule makes are minor wording changes for clarity and additional explanation of AmeriCorps NCCC. In § 2500.10, regarding the general organization of the Agency, the final rule clarifies that the Chief Executive Officer is responsible for exercising powers and discharging duties set out in the National and Community Service Act of 1990, as amended, 42 U.S.C. 12501 *et seq.* (NCSA), and that the Board is responsible for discharging duties set out in the NCSA. In §§ 2500.10(c) and 2500.12, the final rule clarifies that there are two separate sets of regions under AmeriCorps' structure: one for AmeriCorps NCCC and one for AmeriCorps' Office of Regional Operations. In § 2500.20, the final rule adds references to a newly operational sub-program, NCCC Forest Corps, and the Agency's Disaster Services Unit.

III. Regulatory Analyses

A. Executive Orders 12866 and 13563

Executive Orders (E.O.) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. The Office of Information and Regulatory Affairs in the Office of Management and Budget has determined that this is not a significant regulatory action.

B. Congressional Review Act (Small Business Regulatory Enforcement Fairness Act of 1996, Title II, Subtitle E)

As required by the Congressional Review Act (5 U.S.C. 801–808), before an interim or final rule takes effect, AmeriCorps will submit an interim or final rule report to the U.S. House of Representatives, U.S. Senate, and to the Comptroller General of the U.S. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. The Office of Information and Regulatory Affairs in the Office of Management and Budget determined this is not a major rule under 5 U.S.C. 804 because this rule will not result in (1) an annual effect on the economy of \$100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local Government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic and export markets.

C. Regulatory Flexibility Act

As required by the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*), AmeriCorps certifies that this rule, if adopted, will not have a significant economic impact on a substantial number of small entities. Therefore, AmeriCorps has not performed the initial regulatory flexibility analysis that is required under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) for rules that are expected to have such results.

D. Unfunded Mandates Reform Act of 1995

For purposes of Title II of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531–1538, as well as Executive Order 12875, this regulatory action does not contain any Federal mandate that may result in increased expenditures in either Federal, State, local, or Tribal Governments in the aggregate, or impose an annual burden exceeding \$100 million on the private sector.

E. Paperwork Reduction Act

Under the Paperwork Reduction Act (PRA), an agency may not conduct or sponsor a collection of information unless the collections of information display valid control numbers. This rule does not include any information collections requiring approval by the Office of Management and Budget.

F. Executive Order 13132, Federalism

Executive Order 13132, Federalism, prohibits an agency from publishing any rule that has federalism implications if the rule imposes substantial direct compliance costs on State and local governments and is not required by statute, or the rule preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This rulemaking does not have any federalism implications, as described above.

G. Takings (E.O. 12630)

This rule does not affect a taking of private property or otherwise have taking implications under Executive Order 12630 because this rule does not affect individual property rights protected by the Fifth Amendment or involve a compensable “taking.” A takings implication assessment is not required.

H. Civil Justice Reform (E.O. 12988)

This rule complies with the requirements of Executive Order 12988. Specifically, this rulemaking: (a) meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and (b) meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

I. Consultation With Indian Tribes (E.O. 13175)

AmeriCorps recognizes the inherent sovereignty of Indian Tribes and their right to self-governance. We have evaluated this rulemaking under our consultation policy and the criteria in E.O. 13175 and determined that this rule does not impose substantial direct effects on federally recognized Tribes.

List of Subjects in 45 CFR Part 2500

Organization and functions (Government agencies).

■ For the reasons discussed in the preamble, under the authority of 42 U.S.C. 12651c(c), the Corporation for National and Community Service revises 45 CFR part 2500 to read as follows:

PART 2500—AMERICORPS STATEMENT OF ORGANIZATION, AGENCY OPERATING NAME, AND LOGOS

Subpart A—Introduction

Sec.
2500.1 Creation and authority.
2500.2 Agency operating name.

2500.3 Purpose and mission.

Subpart B—Organization

2500.10 General.

2500.11 AmeriCorps leadership.

2500.12 Region offices.

Subpart C—Programs

2500.20 Program descriptions.

2500.21 Focus areas.

Subpart D—Logos

2500.30 Description of logos.

2500.31 Retirement of logos.

2500.32 Authority to affix logos.

Authority: 5 U.S.C. 552(a)(1); 42 U.S.C. 4950, *et seq.*, as amended; 42 U.S.C. 12501 *et seq.*, as amended; section 203(c), Pub. L. 103–82, 107 Stat. 892; Proc. 6662, 59 FR 16507, 3 CFR, 1994 Comp., p. 22).

Subpart A—Introduction

§ 2500.1 Creation and authority.

The National and Community Service Trust Act of 1993 established the Corporation for National and Community Service (CNCS) as a Federal agency, organized in the form of a Government corporation within the Executive Branch, to administer the national service programs authorized by the National and Community Service Act of 1990. CNCS also administers the national service programs authorized by the Domestic Volunteer Service Act of 1973, as amended, and previously administered by the former Federal ACTION Agency.

§ 2500.2 Agency operating name.

(a) The Corporation for National and Community Service has adopted AmeriCorps as its official agency operating name.

(b) Use of AmeriCorps as the agency operating name incorporates the Corporation for National and Community Service by reference.

§ 2500.3 Purpose and mission.

AmeriCorps' purpose is to administer the programs established under the national service laws. AmeriCorps' mission is to improve lives, strengthen communities, and foster civic engagement through service and volunteering.

Subpart B—Organization

§ 2500.10 General.

(a) The Chief Executive Officer (CEO) is the head of AmeriCorps. The CEO has authority and control over AmeriCorps personnel, except those in the Agency's Office of Inspector General, and is responsible for exercising the powers and discharging the duties authorized by the National and Community Service Act of 1990, as amended, that are not

otherwise reserved to the Board of Directors.

(b) The Board of Directors is responsible for discharging the duties authorized to it by the National and Community Service Act of 1990, as amended.

(c) AmeriCorps consists of headquarters and two sets of regions: Office of Regional Operations regions and AmeriCorps NCCC regions.

§ 2500.11 AmeriCorps leadership.

(a) AmeriCorps' leadership conducts overall planning, coordination of programs, and all supporting internal operations. AmeriCorps leadership includes, but is not limited to, the following AmeriCorps officials:

- (1) CEO.
- (2) Chief of Staff.
- (3) General Counsel.
- (4) Chief Operating Officer.
- (5) Chief Financial Officer.
- (6) Chief Program Officer.
- (7) Chief Diversity and Inclusion Officer.
- (8) Directors of AmeriCorps programs and offices.

(b) AmeriCorps' public website contains current information on Agency leadership at www.americorps.gov/about/our-team/our-leadership.

§ 2500.12 Region offices.

AmeriCorps' Office of Regional Operations and AmeriCorps NCCC each have a regional structure.

(a) AmeriCorps' Region Offices, within the Office of Regional Operations, serve assigned States and Territories across eight regions. The AmeriCorps website contains contact information for each of these Region Offices at www.americorps.gov/contact/region-offices.

(b) AmeriCorps National Civilian Community Corps (NCCC) has a campus facility in each of its regions, which serve the States and Territories. The AmeriCorps website contains contact information for each of the NCCC regions at www.americorps.gov/contact/americanorps-nccc-regions.

Subpart C—Programs

§ 2500.20 Program descriptions.

(a) AmeriCorps operates four main national service programs: AmeriCorps NCCC, AmeriCorps Seniors, AmeriCorps State and National, and AmeriCorps VISTA. Additional information on each of these programs and additional AmeriCorps programs is available at www.americorps.gov.

(1) AmeriCorps NCCC is a full-time residential service program for individuals aged 18 to 24 (unless

otherwise authorized), as defined by statute. Individuals serving in the NCCC program complete team-based service projects that respond to priority national and community needs. AmeriCorps NCCC program staff recruit, train, and manage volunteers (called "members") and partner with organizations that serve as project sponsors. FEMA Corps is a sub-program that AmeriCorps NCCC manages in partnership with the Federal Emergency Management Agency. It places members in service positions to perform disaster public assistance, planning, preparedness, and recovery activities. The NCCC Forest Corps is a sub-program that AmeriCorps NCCC manages in partnership with the U.S. Forest Service. It places members in service positions to perform wildfire mitigation, reforestation, and climate resiliency activities. Finally, NCCC houses the agency's Disaster Services Unit (DSU), the entity which coordinates with FEMA to secure funding to mobilize AmeriCorps NCCC and AmeriCorps State and National members under a federally declared disaster.

(2) AmeriCorps Seniors focuses on providing service opportunities for individuals aged 55 years or older. It operates four national service programs: the Foster Grandparent Program, Senior Companion Program, RSVP, and the Senior Demonstration Program. Under each of these programs, AmeriCorps Seniors provides grants to sponsoring organizations to meet priority national and community needs. The sponsoring organizations then recruit and enlist local volunteers, and address performance measures as required by grant terms and conditions.

(3) AmeriCorps State and National provides grants to States, Territories, Indian Tribes, public and private nonprofit organizations, local governments, and institutions of higher education to carry out national service programs, offering a wide range of service opportunities. In addition to grant funds to support direct programming, AmeriCorps State and National also provides general operating funding for State service commissions.

(4) AmeriCorps VISTA is a program for individuals aged 18 and older to participate in full-time service to strengthen and supplement efforts to eliminate and alleviate poverty and poverty-related problems in the United States. AmeriCorps VISTA partners with local organizations to recruit, select, train, and assign volunteers ("members") to work on projects at a sponsoring organization or one of its project sites.

(b) In addition to its four main national service programs, AmeriCorps also operates several additional programs and activities. These include the Martin Luther King, Jr., Day of Service; the September 11th Day of Service and Remembrance; the Volunteer Generation Fund; and other national service programs that AmeriCorps establishes through agreements with other Federal agencies.

§ 2500.21 Focus areas.

Through its programs, AmeriCorps provides funding and volunteer opportunities to address pressing unmet human, educational, environmental,

and public safety needs of the United States, without displacing existing workers, and to meet the additional purposes set out in the national service laws. AmeriCorps' focus areas include, but are not limited to, disaster services, economic opportunity, education, environmental stewardship, healthy futures, and veterans and military families.

Subpart D—Logos

§ 2500.30 Description of logos.

(a) The AmeriCorps logo (Logo) is the key element in agency identification. It provides a visual representation of the

Agency's role to unite America by bringing people together to serve communities. It is symbolic of the way AmeriCorps members and volunteers lift and improve communities through service and volunteering. This Logo links the graphic communications of all Agency programs.

(b) The Logo is an image of a solid circle containing an A where the right-hand pillar is a solid block line and the left-hand pillar is represented by a flagpole with the flag in motion, appearing to fly from the left to the right and forming the A as the flag intersects with the other pillar. AmeriCorps appears in bold to the right of the mark.

Figure 1 to paragraph (b)

(c) The AmeriCorps Seniors logo (Seniors Logo) identifies the highlighted

AmeriCorps Seniors programs and represents the Agency's commitment to

programs and volunteer opportunities for older Americans.

Figure 2 to paragraph (c)

(d) The Seniors Logo contains the word Seniors beneath AmeriCorps, to the right of the circle containing the A.

§ 2500.31 Retirement of logos.

The agency officially retired the day-to-day use of all pre-existing logos,

emblems, and other insignia, except the Days of Service logos, but does not relinquish the legal rights to any retired logos.

§ 2500.32 Authority to affix logos.

Restrictions on the use of AmeriCorps logos are found in 45 CFR 2540.500 through 2540.560.

Fernando Laguarda,
General Counsel.

BILLING CODE 6050-28-P

Proposed Rules

Federal Register

Vol. 89, No. 22

Thursday, February 1, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 890

[Docket ID: OPM–2023–0037]

RIN 3206–AO47

Federal Employees Health Benefits Program: Modification of Effective Date of Coverage for Employees With an Initial Opportunity To Enroll

AGENCY: Office of Personnel
Management.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of Personnel Management (OPM) proposes to modify the Federal Employees Health Benefits (FEHB) regulations to allow for coverage to take effect as soon as an employee becomes eligible for coverage under the FEHB Program. This rulemaking is also applicable to the Postal Service Health Benefits (PSHB) Program within the FEHB Program. The proposed changes would allow FEHB and PSHB coverage to become effective at the beginning of the pay period that the employee in pay status has an initial opportunity to enroll. This change would occur when the employee becomes eligible for FEHB or PSHB coverage, provided an appropriate request to enroll is received by the employing office within the initial pay period that the employee becomes eligible.

DATES: Comments must be received on or before April 1, 2024.

ADDRESSES: You may submit comments, identified by docket number and/or Regulation Identifier Number (RIN) and title, by the following method:

- *Federal Rulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments.

All submissions received must include the agency name and docket number or RIN for this document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing at <https://www.regulations.gov> as they are

received, without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT:

Meredith Gitangu, Senior Policy Analyst, meredith.gitangu@opm.gov, (202) 606–2678.

SUPPLEMENTARY INFORMATION:

FEHB Program Background

The FEHB Program was established in 1960 and is the largest employer-sponsored health insurance program in the United States. There are approximately 8.2 million covered individuals in the FEHB Program. Covered individuals, as defined in 5 CFR 890.101, include employees of the Federal Government, annuitants, members of their families, former spouses, and statutorily eligible groups enumerated in 5 U.S.C. 8901; and tribal employees of tribal employers, pursuant to 25 U.S.C. 1647b. Currently, Postal Service employees, Postal Service annuitants, and their family members are also eligible for health benefits under the FEHB Program pursuant to 39 U.S.C. 1005. Section 101 of the Postal Service Reform Act (PSRA) added new section 8903c to chapter 89 of title 5, United States Code, and directed OPM to establish the PSHB Program within the FEHB Program for Postal Service employees, Postal Service annuitants, and their eligible family members. Under 5 U.S.C. 8903c(c)(3), except as otherwise set forth in 5 U.S.C. 8903c, the provisions of chapter 89 “applicable to health benefits plans offered by carriers under section 8903 or 8903a shall apply to plans offered under the” PSHB Program.

Health benefits plans under the FEHB Program cover a wide range of health services including routine physical exams, primary and specialist doctors’ visits, inpatient hospital care, surgery, laboratory and diagnostic tests, prescription drugs, and mental health services. Required benefits are listed in broad categories in the FEHB statute at 5 U.S.C. 8904 and include hospital benefits, surgical benefits, medical care and treatment, and obstetrical benefits, among others. The benefits, coverage, and premium details of each plan in the FEHB Program are negotiated with OPM each year.

Authority for This Rulemaking

OPM administers the FEHB Program in accordance with Title 5 Chapter 89, United States Code and implementing regulations (5 CFR parts 890 and 892 and 48 CFR chapter 16). The authority to modify the effective coverage date for employees with an initial opportunity to enroll is under OPM’s authority at 5 U.S.C. 8913 to prescribe regulations necessary to carry out administration of the FEHB Program. Based on agency feedback and OPM’s own analysis, which are discussed in more detail in the next section, we are proposing changes to regulations that would allow for coverage to be effective sooner for eligible employees and act as a recruitment and retention tool that positions the Federal Government as a model employer.

Discussion of the Proposed Changes

Modification of Effective Date of Coverage for Employees With an Initial Opportunity To Enroll

OPM proposes to modify its FEHB enrollment regulations regarding the effective date of coverage for employees with an initial opportunity to enroll. An initial opportunity to enroll is the time period in which employees are allowed to elect enrollment in FEHB and may occur in the following circumstances: as a new employee, when an employee changes from an excluded position to a position eligible for FEHB coverage, or a temporary employee who completes one year of service and is eligible to enroll under 5 U.S.C. 8906a. Currently, under 5 CFR 890.301(a), an employee “may elect to enroll or not enroll [in FEHB] within 60 days after becoming eligible” for FEHB coverage. Coverage is effective on the first day of the first pay period that begins after the date the employing office receives an appropriate request to enroll, and that follows a pay period that the employee is in pay status as described in 5 CFR 890.301(b). OPM is proposing to allow newly eligible employees the opportunity to have their FEHB coverage effective at the beginning of the pay period the employee becomes eligible, provided they are in pay status; have an initial opportunity to enroll in FEHB coverage; and have submitted, with their employing office having received, an appropriate request to enroll in FEHB coverage during that first

pay period of eligibility. An appropriate request is defined in 5 CFR 890.101(a) as a properly completed health benefits election form, such as Standard Form 2809, or an alternative method acceptable to both the employing office and OPM.

In 5 CFR 890.101, a pay period is defined as “the biweekly pay period established pursuant to section 5504 of title 5, United States Code, for the employees to whom that section applies and the regular pay period for employees not covered by that section.” Across most Federal agencies, the general standard is for two-week pay periods to begin on Sunday and run until Saturday of the following week. Recognizing there may be some variance in agency approaches and seeking to ensure an equitable application of the rule to employees, OPM seeks comments on current business processes to effectuate and document an employee’s entry on duty. For example, what is the process if a new employee arrives for orientation on Monday, August 28, 2023, and the start of the pay period is Sunday, August 27, 2023?

Changes proposed in this rulemaking, if finalized, would be required to be applied by the employing office to all employees with an initial opportunity to enroll, not solely to new employees or only on an individual, case-by-case basis. For example, if an employing office receives appropriate requests to enroll from two employees with an initial opportunity to enroll within the pay period these employees become eligible, the employing office may not allow one of the eligible employees’ coverage retroactive to the start of the pay period when they become eligible and force the other eligible employee to wait until the first day of the next pay period. All employing offices are required to implement the proposed changes to achieve an equitable result for all eligible employees. OPM seeks comment on this approach to avoid circumstances where employees of one agency could be offered the earliest possible effective date of coverage based on the agency’s capabilities but an employee at another agency is not offered the same effective date of coverage because that agency’s systems and processes are not updated accordingly. OPM also invites comments on any administrative or operational differences in applying the proposed changes to new employees and other employees with an initial opportunity to enroll (*i.e.*, employee who experiences a qualifying life event).

OPM estimates approximately 230,000 employees with an initial opportunity to enroll submit

appropriate requests and are newly enrolled in FEHB each year. The most common example of an employee with an initial opportunity to enroll is in the case of new employees. Another example of an employee with an initial opportunity to enroll would be in the case of an employee excluded from coverage, as described in 5 CFR 890.102(c), who moves from a position that was excluded from coverage to a position that conveys coverage. Using the example of a new employee, under the current regulatory structure, the new employee who submits an FEHB enrollment request on their start date, or sometime during the first pay period the new employee is in pay status, must wait until the first day of the following pay period for FEHB coverage to become effective. A gap in coverage may result if the new employee has not extended previous group coverage under any applicable rules permitting such extension or does not have individual coverage. Gaps in coverage may further result in costly medical expenditures that must be borne by the individual. OPM takes its agency responsibilities under recent Executive Order 14070¹ earnestly and, in furtherance of the E.O. goals, has identified modification of the effective date of FEHB as an action that expands access to quality coverage. The changes proposed in this rulemaking can work to ensure more timely access to health insurance which may in turn assist in reducing financial burdens for care received while uninsured and removing barriers to consistent care for services such as mental health services, vaccines, and contraceptives. OPM believes that permitting health insurance coverage to become effective at the start of employment could reduce the risk of new employees enduring coverage gaps and potentially costly medical bills associated with such gaps and also act as an attractive recruitment tool in building a well-qualified, robust workforce.

This proposed rule would align the FEHB Program with the practices of some nonfederal employers that provide first-day coverage and the current practices of the Federal Employees’ Group Life Insurance (FEGLI) Program. Under FEGLI regulations at 5 CFR 870.501, FEGLI Basic coverage begins on the day the new employee enters on duty in pay status. Health insurance is an influential factor on employee recruitment, retention, and satisfaction, and is a benefit offering critical

¹ See E.O. 14070 (available at: <https://www.federalregister.gov/documents/2022/04/08/2022-07716/continuing-to-strengthen-americans-access-to-affordable-quality-health-coverage>).

coverage, in sometimes life or death circumstances; therefore, OPM prioritizes the FEHB Program for proposed effective date changes. This proposed rule would not impact the effective date of coverage for Federal Employees Dental and Vision Insurance Program (FEDVIP) under 5 CFR 894.504 or Federal Long Term Care Insurance Program (FLTCIP) under 5 CFR 875.404. OPM invites comment on whether similar modifications to the effective date of the FEDVIP would be beneficial.

Under this proposed rule, FEHB coverage could become effective at the beginning of the initial pay period in which the employee with an initial opportunity to enroll meets the criteria of becoming eligible for FEHB coverage, being in pay status, and providing an appropriate request to enroll that is received by the employing office within the initial pay period the employee becomes eligible. If the appropriate request to enroll is not received by the employing office within the initial pay period the employee becomes eligible, then the newly eligible employee still has the remainder of the 60 days to enroll in FEHB. However, the effective date then becomes the first day of the first pay period that begins after the date the employing office receives an appropriate request to enroll or change the enrollment and that follows a pay period during any part of which the employee is in pay status. The following examples illustrate the scenarios described in this paragraph for a new employee entering on duty and for an excluded employee that becomes newly eligible for coverage:

Example 1. The pay period begins on Sunday, August 27, 2023, and runs until Saturday, September 9, 2023. A new employee enters on duty and commences pay status at an agency on Monday, August 28, 2023. The new employee submits an appropriate request to enroll, including family member eligibility documentation, and it is received by the employing office on Tuesday, September 5, 2023, which is within the initial pay period of the employee’s initial opportunity to enroll. FEHB coverage for the new employee and their eligible family member(s) would be effective retroactively to Sunday, August 27, 2023.

Example 2. The pay period begins on Sunday, August 27, 2023, and runs until Saturday, September 9, 2023. A new employee enters on duty and commences pay status at an agency on Monday, August 28, 2023. The new employee submits an appropriate request to enroll, including family member eligibility documentation, and it is received by the employing office on

Tuesday, September 12, 2023, which is not within the initial pay period of the employee's initial opportunity to enroll. FEHB coverage for the new employee and their eligible family member(s) is effective Sunday, September 24, 2023, which is the first day of the first pay period that begins after the date the employing office receives an appropriate request to enroll.

Example 3: The pay period begins on Sunday, August 27, 2023, and runs until Saturday, September 9, 2023. An employee formerly in a position that was excluded from coverage moves to a position that conveys coverage and is a newly eligible employee in pay status on Monday, August 28, 2023. The newly eligible employee submits an appropriate request to enroll, including family member eligibility documentation, and it is received by the employing office on Tuesday, September 5, 2023, which is within the initial pay period of the newly eligible employee's initial opportunity to enroll. FEHB coverage for the newly eligible employee and their eligible family member(s) would be effective retroactively to Sunday, August 27, 2023.

Example 4: The pay period begins on Sunday, August 27, 2023, and runs until Saturday, September 9, 2023. An employee formerly in a position that was excluded from coverage moves to a position that conveys coverage and is a newly eligible employee in pay status on Monday, August 28, 2023. The newly eligible employee submits an appropriate request to enroll, including family member eligibility documentation, and it is received by the employing office on Tuesday, September 12, 2023, which is not within the initial pay period of the newly eligible employee's initial opportunity to enroll. FEHB coverage for the newly eligible employee and their eligible family member(s) is effective Sunday, September 24, 2023, which is the first day of the first pay period that begins after the date the employing office receives an appropriate request to enroll.

OPM seeks comment on effectuating the proposed changes, including whether it is preferable to begin coverage effective retroactively to the start of the pay period in which the employee becomes eligible or to begin coverage effective retroactively to the date of entry on duty in pay status or other initial opportunity to enroll.

Employing offices would be required to implement the new requirements when this rulemaking is finalized and have their enrollment and payroll systems accommodate coverage effective

retroactive to the start of the initial pay period in which the employee becomes eligible and is in pay status, and the appropriate request to enroll is received by the employing office. While some employing offices have the current system capability to implement this change immediately upon finalization of this rulemaking, others may not. As a result, OPM is allowing additional time for compliance by proposing that all employing offices implement the changes outlined in this rulemaking no later than 18 months after the publication date of the final rule. Those employing offices that can implement sooner are encouraged to do so.

Proposed Changes by Section

OPM proposes to amend the FEHB regulations at 5 CFR 890.301 to permit FEHB coverage to become effective at the beginning of the initial pay period that the employee with an initial opportunity to enroll becomes eligible for FEHB coverage and is in pay status, provided an appropriate request to enroll is received by the employing office within the initial pay period the employee becomes eligible. This proposed rule would redesignate 5 CFR 890.301(b) as paragraph (b)(1) to allow the addition of a new paragraph (b)(2) that outlines the changes discussed in the previous section. Specifically, paragraph (b)(2) pertains to employees with an initial opportunity to enroll, allowing for FEHB coverage to be effective the same pay period the employee becomes eligible.

Under existing regulations at 5 CFR 890.301(a), an employee with an initial opportunity to enroll may elect to enroll or not to enroll within 60 days after becoming eligible. This rulemaking does not change the eligibility period, and instead proposes that FEHB coverage for employees with an initial opportunity to enroll will be effective retroactively to the start of the initial pay period the employee first becomes eligible and is in pay status if the employee submits, and the employing office receives, the appropriate request to enroll within the initial pay period the employee becomes eligible. If the employee does not submit and the employing office does not receive an appropriate request to enroll within the initial pay period the employee first becomes eligible, then coverage will be effective on the first day of the first pay period that begins after the date the employing office receives an appropriate request to enroll or change the enrollment and that follows a pay period that the employee

is in pay status. OPM guidance² directs employing offices to request proof of family member eligibility during the initial opportunity to enroll.

In addition to other aspects of this proposed rule, OPM is requesting information on leading practices from other employers on when health insurance coverage begins. OPM recognizes that employees, during their initial opportunity to enroll, may experience an immediate need for coverage. Additionally, as employees, during their initial opportunity to enroll, weigh and evaluate different plans and coverage options, employees may not be able to make a decision during their first pay period, and may utilize the full enrollment period. OPM specifically invites comments on the effective date of coverage and if that effective date should be tied to when, during the enrollment period, the election form is submitted and received (*i.e.*, retroactive to the start of the pay period or prospective to the start of the next pay period). If based on responses, OPM determines that it would be advisable to adopt a different approach than that proposed here, OPM anticipates that it would likely issue a revised proposal for comment on specific aspects of implementing the alternate approach.

Expected Impact of Proposed Changes

OPM held stakeholder meetings with agencies and non-governmental entities including Tribal Benefits Officers and FEHB Carriers to solicit feedback on the implications and operational aspects of proposed changes in this rulemaking. While some stakeholders welcomed the proposed changes, others raised operational concerns and the potential cost burdens due to implementation. One potential impact of this rulemaking is the cost employing offices may incur to update enrollment and payroll systems to accommodate the changes. The estimated level of effort for OPM to implement the regulation changes would be about 40 hours of focused work for two GS 15 director level and two GS 14 supervisor level Federal employees to perform system tests and update business processes at an estimated cost of approximately \$22,085 in employee resources.³ OPM

² U.S. Office of Personnel Management, Benefits Administration Letter (BAL) 21-202, *Family Member Eligibility Verification for Federal Employees Health Benefits (FEHB) Program Coverage* (available at <https://www.opm.gov/retirement-center/publications-forms/benefits-administration-letters/2021/21-202.pdf>).

³ The cost of employee resources is calculated using the 2023 GS scale for the Locality Pay Area of Washington-Baltimore-Arlington, DC-MD-VA-WV-PA for GS 15, step 1 (\$74.60 per hour) and GS

considered several deadlines as an alternative to the 18-month compliance timeline but settled on the current timeline based on stakeholder feedback received during the rule drafting process. That feedback revealed that agencies use a variety of systems and processes that cannot easily be updated on the same timeline. Therefore, OPM is proposing to ease this burden by delaying the effective date of compliance to 18 months after the final rule is effective. To supplement our analysis and inform our final decision on the compliance date, OPM is seeking comments on the feasibility of implementing changes to the effective date of FEHB coverage, including human resource and payroll system capability to process FEHB coverage with an effective date as of when the employee becomes eligible (*i.e.*, the day of entry on duty or a change in employment status that results in an employee being newly eligible for FEHB coverage) and the level of effort, estimated cost, and anticipated timeline needed to implement the changes in this rulemaking. OPM also invites comments on the ability of systems to prorate premiums for coverage with an effective date other than the start of a pay period.

While we acknowledge the concerns raised, OPM believes the value of offering FEHB coverage as soon as employees are eligible exceeds the burden of implementing the proposed changes. An expected benefit of this proposed rule is that affected employees will gain access to health insurance plans in a more expedient manner and, therefore, potentially lowering the possibility of uninsured employees personally incurring high-cost medical bills for care received during a gap in health insurance coverage. Federal employees, especially those in positions to be first responders, medical professionals, and representatives on foreign soil, serve a critical need when serving in their position and may be at an increased risk of injury and illness. Having health insurance as soon as they are eligible offers comfort and security. OPM has received stakeholder feedback that the proposed changes have been requested by some new hires and may also have a positive effect in recruiting persons with disabilities to the Federal workforce. OPM seeks comments on the implications, positive or negative, on employee recruitment and retention as

well as any effects on administrative processing.

Because it is specific to the FEHB Program and a subset of Federal employees and their eligible family members, OPM does not believe this rulemaking will have a large impact on the broader health insurance markets. For many carriers, FEHB generally constitutes a small percentage of business of the overall health insurance carrier's book of business. For the 2024 plan year, the FEHB Program has 67 participating carriers offering a total of 156 plan choices. OPM illustrates the potential impact of the rule under the assumption of 100% participation of the newly eligible employee population and a uniform plan selection for the additional two weeks of coverage that would become available to newly eligible employees as a result of the proposed rule. Total premiums for 2024 are estimated to be \$64.5 billion which, across all enrollment types (Self, Self Plus One, Self and Family), equates to \$15,851 per subscriber. Assuming bi-weekly pay periods, the added premium cost would be \$610 per employee with an initial opportunity to enroll for an estimated total cost of \$140.2 million per year for the approximately 230,000 newly eligible employees affected by this rulemaking. However, participation may be substantially lower than 100%, for example because individuals may have existing health insurance coverage covering the relevant time period, or newly eligible individuals may choose plans with different average premiums. OPM lacks data to precisely estimate impacts along these lines. However, OPM believes this will be highly utilized, and assumes that the rule will result in effects equivalent to 80% of these potential effects. This implies effects along these lines of approximately \$112.2 million per year. OPM seeks public comment on methods or data to inform these estimates.

Regulatory Review

Executive Orders 13563, 12866, and 14094 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis must be prepared for major rules with effects of \$200 million or more in any one year. This rulemaking does not reach that threshold but has otherwise been designated as a "significant regulatory action" under section 3(f) of Executive Order 12866, as

supplemented by Executive Orders 13563 and 14094.

Regulatory Flexibility Act

The Director of OPM certifies that this regulation will not have a significant economic impact on a substantial number of small entities.

Federalism

OPM examined this rulemaking in accordance with Executive Order 13132, Federalism, and determined that it will not have any negative impact on the rights, roles and responsibilities of State, local, or tribal governments.

Civil Justice Reform

This regulation meets the applicable standard set forth in Executive Order 12988.

Unfunded Mandates Reform Act of 1995

This rulemaking will not result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more in any year and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Paperwork Reduction Act

Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number.

This proposed rule involves, but does not make any changes to, an OMB approved collection of information subject to the PRA for the FEHB Program, OMB No. 3206-0160, Health Benefits Election Form. The public reporting burden for this collection is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The total burden hour estimate for this form is 9,000 hours. The system of records notice for this collection is: OPM/Central-23, "FEHB Program Enrollment Records," available at <https://www.federalregister.gov/d/2021-01259>. Additional information regarding this collection—including all current background materials—can be found at

14, step 1 (\$63.43 per hour), adjusting each upward by 100% to account for overhead and benefits: $\$74.60 \times 2 \times 40 \times 2 = \$11,936$ and $63.43 \times 2 \times 40 \times 2 = \$10,149$, for a total of \$22,085 in employee costs.

<https://www.reginfo.gov/public/do/PRAMain> by using the search function to enter either the title of the collection or the OMB Control Number.

Accordingly, OPM proposes to amend 5 CFR part 890 as follows:

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

■ 1. The authority citation for part 890 continues to read as follows:

Authority: 5 U.S.C. 8913; Sec. 890.102 also issued under sections 11202(f), 11232(e), and 11246 (b) of Pub. L. 105–33, 111 Stat. 251; Sec. 890.111 also issued under 36 U.S.C. 5522; Sec. 890.112 also issued under 2 U.S.C. 2051; Sec. 890.113 also issued under section 1110 of Pub. L. 116–92, 133 Stat. 1198 (5 U.S.C. 8702 note); Sec. 890.301 also issued under 26 U.S.C. 9801; Sec. 890.302(b) also issued under 42 U.S.C. 300gg–14; Sec. 890.803 also issued under 50 U.S.C. 3516 (formerly 50 U.S.C. 403p) and 22 U.S.C. 4069c and 4069c–1; subpart L also issued under section 599C of Pub. L. 101–513, 104 Stat. 2064 (5 U.S.C. 5561 note); subpart M also issued under 10 U.S.C. 1108 and 25 U.S.C. 1647b; and subpart P issued under 5 U.S.C. 8903c.

Subpart C—Enrollment

■ 2. Amend § 890.301 by:

■ a. Removing the paragraph heading “*Effective date—generally*” in paragraph (b) and adding in its place “*Effective dates*”;

■ b. Redesignating paragraph (b) introductory text as paragraph (b)(1); and

■ c. Adding paragraph (b)(2).

The addition reads as follows:

§ 890.301 Opportunities for employees to enroll or change enrollment; effective dates.

* * * * *

(b) * * *

(1) * * *

(2) Enrollment for an employee will take effect at the beginning of the initial pay period in which the following criteria are met:

- (i) The employee is newly eligible and has an initial opportunity to enroll;
- (ii) The employee is in pay status; and
- (iii) The employee submitted to the employing office, and the employing office received, the appropriate request,

as defined in § 890.101, to enroll within the initial pay period of the initial opportunity to enroll.

BILLING CODE 6325–63–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

[Doc. No. AMS–SC–23–0041]

Oranges, Grapefruit, Tangerines, and Pummelos Grown in Florida; Increased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would implement a recommendation from the Citrus Administrative Committee (Committee) to increase the assessment rate established for the 2023–2024 fiscal year and subsequent fiscal periods from \$0.015 to \$0.02 per 4/5-bushel carton or equivalent for Florida citrus handled under the marketing order. The proposed assessment rate would remain in effect indefinitely unless modified, suspended, or terminated.

DATES: Comments must be received by March 4, 2024.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule. Comments can be sent to the Docket Clerk, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237. Comments can also be sent to the Docket Clerk electronically by Email: MarketingOrderComment@usda.gov or via the internet: <https://www.regulations.gov>. Comments should reference the document number, the date and page number of this issue of the **Federal Register**. Comments submitted in response to this proposed rule will be included in the record and will be made available to the public and can be viewed at: <https://www.regulations.gov>. Please be advised that the identity of the individuals or entities submitting the comments will be made public on the internet at the address provided above.

FOR FURTHER INFORMATION CONTACT: Jennie M. Varela, Marketing Specialist, or Christian D. Nissen, Branch Chief, Southeast Region Branch, Market Development Division, Specialty Crops Program, AMS, USDA; Telephone: (863)

324–3375, Fax: (863) 291–8614, or Email: Jennie.Varela@usda.gov or Christian.Nissen@usda.gov.

Small businesses may request information on complying with this regulation by contacting Richard Lower, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, Fax: (202) 720–8938, or Email: Richard.Lower@usda.gov.

SUPPLEMENTARY INFORMATION: This action, pursuant to 5 U.S.C. 553, proposes to amend regulations issued to carry out a marketing order as defined in 7 CFR 900.2(j). This proposed rule is issued under Marketing Order No. 905 as amended (7 CFR part 905), regulating the handling of oranges, grapefruit, tangerines, and pummelos grown in Florida. Part 905 (referred to as “the Order”) is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the “Act.” The Committee locally administers the Order and is comprised of growers and handlers of fresh citrus operating within the area of production, and one public member.

The Agricultural Marketing Service (AMS) is issuing this proposed rule in conformance with Executive Orders 12866, 13563, and 14094. Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 14094 reaffirms and supplements Executive Order 12866 and 13563 and directs agencies to conduct proactive outreach to engage interested and affected parties through a variety of means, such as through field offices, and alternative platforms and media. This action falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Order 12866, 13563, and 14094 review.

This proposed rule has been reviewed under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, which requires agencies to consider whether their rulemaking actions would have Tribal implications. AMS has

determined that this proposed rule is unlikely to have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the Order now in effect, Florida citrus handlers are subject to assessments. Funds to administer the Order are derived from such assessments. It is intended that the assessment rate would be applicable to all assessable fruit for the 2023–2024 fiscal period, and continue until amended, suspended, or terminated.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the United States Department of Agriculture (USDA) a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed no later than 20 days after the date of the entry of the ruling.

This proposed rule would increase the assessment rate for Florida citrus handled under the Order from \$0.015 per 4/5-bushel carton or equivalent, the rate that was initially established for the 2018–2019 fiscal year and subsequent fiscal years, to \$0.02 per 4/5-bushel carton or equivalent.

Section 905.41 authorizes the Committee, with the approval of AMS, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members are familiar with the Committee's needs and with the costs of goods and services in their local area and are, thus, in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 2018–2019 fiscal year and subsequent fiscal periods, the Committee recommended, and AMS

approved, an assessment rate of \$0.015 per 4/5-bushel carton of citrus or equivalent. That rate continues in effect from fiscal period to fiscal period until modified, suspended, or terminated by AMS upon recommendation and information submitted by the Committee or other information available to AMS. This proposed rule would increase the assessment rate from \$0.015 to \$0.02 per 4/5-bushel carton of citrus or equivalent for the 2023–2024 fiscal year and subsequent fiscal periods.

The Committee met on August 8, 2023, and recommended 2023–2024 fiscal period expenditures of \$124,624 and an assessment rate of \$0.02 per 4/5-bushel carton of citrus or equivalent handled for the 2023–2024 fiscal year and subsequent fiscal periods. In comparison, last year's budgeted expenditures were \$122,680. The proposed assessment rate of \$0.02 is \$0.005 higher than the rate currently in effect. The Committee recommended increasing the assessment rate to better align assessment revenue with budgeted expenses. The Committee projects handler receipts of approximately 6,700,000 4/5-bushel cartons of citrus or equivalent for the 2023–2024 fiscal year, which is about 4,764,544 cartons more than was handled for the 2022–2023 fiscal year.

The total expenditures recommended by the Committee for the 2023–2024 fiscal period are approximately \$124,624. The major budgeted expenditures include \$99,624 for management; \$10,000 for auditing; and \$5,000 for data from the Division of Fruits and Vegetables. By comparison, budgeted expenditures for these activities in the 2022–2023 fiscal period were \$97,680; \$10,000; and \$5,000, respectively. At the current assessment rate of \$0.015, the expected 6,700,000 4/5-bushel cartons or equivalent of assessable Florida citrus would generate \$100,500 in assessment revenue (6,700,000 cartons multiplied by \$0.015 assessment rate), short of the Committee's anticipated expenditures of \$124,624 for the 2023–2024 fiscal period. By increasing the assessment rate by \$0.005 to \$0.02, assessment income would generate \$134,000 (6,700,000 cartons multiplied by \$0.02 assessment rate) for the 2023–2024 fiscal year. This amount would be appropriate to ensure that the Committee has sufficient revenue to fully fund its recommended 2023–2024 fiscal period budgeted expenditures.

The Committee derived the recommended assessment rate by considering anticipated expenses, an estimated 6,700,000 4/5-bushel cartons

or equivalent of assessable Florida citrus, and the amount of funds available in reserve. Income derived from handler assessments (\$134,000) would be adequate to cover budgeted expenses (\$124,624). Funds available in the reserve (currently about \$165,000) are expected to be kept within the maximum permitted by the Order (approximately two fiscal periods' expenses as authorized in § 905.42).

The proposed assessment rate would continue in effect indefinitely unless modified, suspended, or terminated by AMS upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate would be in effect for an indefinite period, the Committee would continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Committee meetings are available from the Committee or AMS. Committee meetings are open to the public and interested persons may express their views at these meetings. AMS will evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed, and further rulemaking would be undertaken as necessary. The Committee's 2023–2024 budget, and those for subsequent fiscal periods, will be reviewed and, as appropriate, approved by AMS.

Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), AMS has considered the economic impact of this proposed rule on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf.

There are 14 handlers of Florida citrus who are subject to regulation under the Order and approximately 500 citrus producers in the regulated area. At the time this analysis was prepared, the Small Business Administration (SBA) defined small agricultural growers as those having annual receipts of no more than \$4,000,000 for orange producers or

\$4,250,000 for other citrus producers, and small agricultural service firms, including handlers, are defined as those whose annual receipts are less than \$34,000,000 (13 CFR 121.201).

According to data from the National Agricultural Statistics Service (NASS), the weighted average packing house door equivalent price for fresh Florida oranges for the 2022–2023 season was approximately \$10.54 per carton with total shipments of around 3,224,000 cartons. Based on this information, the majority of orange handlers have average annual receipts of significantly less than \$34,000,000 (\$10.54 multiplied by 3,224,000 cartons equals \$33,980,960, divided by 14 handlers equals \$2,427,211 per handler). The weighted average packing house door price for other Florida citrus for the 2022–2023 season was \$19.12 per carton with total shipments of 2,804,000 cartons. Based on this information, the majority of other citrus handlers have average annual receipts of significantly less than \$34,000,000 (\$19.12 multiplied by 2,804,000 cartons equals \$53,612,480, divided by 14 handlers equals \$3,829,463 per handler).

In addition, based on the NASS data, the weighted average orange grower price for the 2022–2023 season was estimated at \$9.45 per carton of fresh oranges. Based on grower price, shipment data, and the total number of Florida orange growers, the average annual grower revenue is well below \$4,000,000 (\$9.45 multiplied by 3,224,000 cartons equals \$30,466,800, divided by 500 growers equals \$60,934 per grower). The weighted average other citrus grower price for the 2022–2023 season was estimated at \$16.28 per carton of fresh citrus. Based on grower price, shipment data, and the total number of Florida citrus growers, the average annual grower revenue is well below \$4,250,000 (\$16.28 multiplied by 2,804,000 cartons equals \$45,649,120, divided by 500 growers equals \$91,298 per grower). Thus, the majority of Florida citrus handlers and growers may be classified as small entities.

This proposed rule would increase the assessment rate for the 2023–2024 fiscal year and subsequent fiscal years from \$0.015 to \$0.02 per 4/5-bushel carton of citrus or equivalent. The Committee recommended 2023–2024 expenditures of \$124,624 and an assessment rate of \$0.02 per 4/5-bushel carton. The proposed assessment rate of \$0.02 is \$0.005 more than the previous rate. The quantity of assessable Florida citrus for the 2023–2024 season is estimated at 6,700,000 4/5-bushel cartons or equivalent. Thus, the \$0.02 rate should provide \$134,000 in

assessment income (6,700,000 cartons multiplied by \$0.02 assessment rate). Income derived from handler assessments would be adequate to cover budgeted expenses.

The major expenditures recommended by the Committee for the 2023–2024 fiscal year include \$99,624 for management; \$10,000 for auditing; and \$5,000 for data from the Division of Fruits and Vegetables. Budgeted expenses for these same items in the 2022–2023 fiscal period were \$97,680; \$10,000; and \$5,000, respectively.

The Committee recommended increasing the assessment rate to cover anticipated expenses for the 2023–2024 fiscal period. Shipments for the 2023–2024 season are projected to be 6,700,000 4/5-bushel cartons or equivalent, about 2 million more than estimated for the previous year. At the current assessment rate of \$0.015, assessment income would equal \$100,500 (6,700,000 cartons multiplied by \$0.015 assessment rate), an amount below the Committee's anticipated expenditures of \$124,624 for the 2023–2024 fiscal period. By increasing the assessment rate by \$0.005, assessment income would be approximately \$134,000 (6,700,000 cartons multiplied by \$0.02 assessment rate). This amount should provide sufficient funds to meet anticipated expenses for the 2023–2024 fiscal period.

Prior to arriving at this budget and assessment rate, the Committee considered maintaining the current assessment rate of \$0.015. However, the Committee would need to further draw down reserves to meet its expenses. The Committee had to use some of its reserves in the 2022–2023 fiscal period after a hurricane damaged the crop, and Committee members did not want to utilize additional funds from reserves to meet 2023–2024 expenses. Consequently, the alternative of maintaining the current assessment rate was rejected.

A review of historical information and preliminary information pertaining to the upcoming fiscal period indicates the average grower price for the 2023–2024 season should be approximately \$11.00 per 4/5-bushel carton of citrus or equivalent. Therefore, the estimated assessment revenue for the 2023–2024 crop year as a percentage of total grower revenue would be about 0.18 percent (\$0.02 divided by \$11.00 multiplied by 100).

This proposed rule would increase the assessment obligation imposed on handlers. Assessments are applied uniformly on all handlers, and some of the costs may be passed on to producers. However, these costs are

expected to be offset by the benefits derived by the operations of the Order.

The Committee's meetings are widely publicized throughout the Florida citrus industry and all interested persons are invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the August 8, 2023, meeting was a public meeting and all entities, both large and small, were able to express views on this issue. Finally, interested persons are invited to submit comments on this proposed rule, including the regulatory impacts of this action on small businesses.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Order's information collection requirements have been previously approved by OMB and assigned OMB No. 0581–0189 Fruit Crops. No changes in those requirements would be necessary as a result of this proposed rule. Should any changes become necessary, they would be submitted to OMB for approval.

This proposed rule would not impose any additional reporting or recordkeeping requirements on either small or large Florida citrus handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

AMS is committed to complying with the E-Government Act to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

AMS has not identified any relevant Federal rules that duplicate, overlap, or conflict with this proposed rule.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <https://www.ams.usda.gov/rules-regulations/moa/small-businesses>. Any questions about the compliance guide should be sent to Richard Lower at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendations submitted by the Board and other available information, AMS has determined that this proposed rule is consistent with and would effectuate the purposes of the Act.

A 30-day comment period is provided to allow interested persons to comment on this proposed rule. All written comments timely received will be

considered before a final determination is made on this rulemaking.

List of Subjects in 7 CFR Part 905

Grapefruit, Marketing agreements, Oranges, Pummelos, Reporting and recordkeeping requirements, Tangelos, Tangerines.

For the reasons set forth in the preamble, the Agricultural Marketing Service proposes to amend 7 CFR part 905 as follows:

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND PUMMELOS GROWN IN FLORIDA

■ 1. The authority citation for 7 CFR part 905 continues to read as follows:

Authority: 7 U.S.C. 601–674.

■ 2. Section 905.235 is revised to read as follows:

§ 905.235 Assessment rate.

On and after August 1, 2023, an assessment rate of \$0.02 per 4/5-bushel carton or equivalent is established for Florida citrus covered under the Order.

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

[FR Doc. 2024–02024 Filed 1–31–24; 8:45 am]

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. FAA–2023–2435; Notice No. 25–23–07–SC]

Special Conditions: Gulfstream Aerospace Corporation Model GVIII–G700 and GVIII–G800 Series Airplanes; Dynamic Test Requirements for Single- and Multiple-Occupant Side-Facing Seats With or Without Airbag Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes special conditions for the Gulfstream Aerospace Corporation (Gulfstream) Model GVIII–G700 and GVIII–G800 series airplanes. These airplanes will have a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards for transport category airplanes. This design feature is side-facing seats oriented in the aircraft with the occupant facing 90 degrees to the direction of aircraft travel. The applicable airworthiness

regulations do not contain adequate or appropriate safety standards for this design feature. These proposed special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: Send comments on or before February 21, 2024.

ADDRESSES: Send comments identified by Docket No. FAA–2023–2435 using any of the following methods:

Federal eRegulations Portal: Go to <https://www.regulations.gov/> and follow the online instructions for sending your comments electronically.

Mail: Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

Hand Delivery or Courier: Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: Fax comments to Docket Operations at 202–493–2251.

Docket: Background documents or comments received may be read at <https://www.regulations.gov/> at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Myra Kuck, Cabin Safety, AIR–624, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service, Federal Aviation Administration, Aircraft Certification Policy and Standards, 3960 Paramount Blvd., Suite 100, Lakewood, CA 90712; telephone and fax 405–666–1059; email Myra.J.Kuck@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the proposed special conditions, explain the reason for any recommended change, and include supporting data.

On December 31, 2019, Gulfstream applied for an amendment to Type Certificate No. T00015AT to include the new Model GVIII–G700 and GVIII–G800 series airplanes. While the comment

period provided by the FAA for proposed special conditions has typically been thirty days, the FAA is providing twenty days in this instance, due to the relative similarity of these conditions with the terms of previously issued special conditions, and due to the pendency of the anticipated delivery date for the affected airplane models, per the criteria in 14 CFR 11.38.

The FAA will consider all comments received by the closing date for comments, and will consider comments filed late if it is possible to do so without incurring delay. The FAA may change these special conditions based on the comments received.

Privacy

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in title 14, Code of Federal Regulations (14 CFR) 11.35, the FAA will post all comments received without change to <https://www.regulations.gov/>, including any personal information you provide. The FAA will also post a report summarizing each substantive verbal contact received about these special conditions.

Confidential Business Information

Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to these proposed special conditions contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to these special conditions, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and the indicated comments will not be placed in the public docket of these special conditions. Send submissions containing CBI to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section above. Comments the FAA receives, which are not specifically designated as CBI, will be placed in the public docket for these special conditions.

Background

As noted above, on December 31, 2019, Gulfstream applied for an amendment to Type Certificate No.

T00015AT to include the new Model GVIII-G700 and GVIII-G800 series airplanes. These airplanes, which will be derivatives of the Model GVI currently approved under Type Certificate No. T00015AT, are twin-engine, transport-category airplanes, with seating for 19 passengers, and a maximum take-off weight of 107,600 pounds (GVIII-G700) and 105,600 pounds (GVIII-G800).

Type Certification Basis

Under the provisions of title 14, Code of Federal Regulations (14 CFR) 21.101, Gulfstream must show that the Model GVIII-G700 and GVIII-G800 series airplanes meet the applicable provisions of the regulations listed in Type Certificate No. T00015AT, or the applicable regulations in effect on the date of application for the change, except for earlier amendments as agreed upon by the FAA.

If the Administrator finds that the applicable airworthiness regulations (e.g., 14 CFR part 25) do not contain adequate or appropriate safety standards for the Gulfstream Model GVIII-G700 and GVIII-G800 series airplanes because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Gulfstream Model GVIII-G700 and GVIII-G800 series airplanes must comply with the exhaust-emission requirements of 14 CFR part 34, and the noise-certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with 14 CFR 11.38, and they become part of the type certification basis under § 21.101.

Novel or Unusual Design Features

The Gulfstream Model GVIII-G700 and GVIII-G800 airplanes will incorporate the following novel or unusual design feature:

Side-facing seats, oriented in the aircraft with the occupant facing 90 degrees to the direction of aircraft travel,

with or without incorporation of an airbag systems or inflatables.

Discussion

On June 16, 1988, Title 14, Code of Federal Regulations (14 CFR) part 25 was amended to revise the emergency landing conditions that must be considered in the design of transport category airplanes. This amendment (25-64) revised the static load conditions in § 25.561 and added a new § 25.562 that required dynamic testing for all seats approved for occupancy during takeoff and landing. The intent of Amendment 25-64 was to provide an improved level of safety for occupants on transport category airplanes; however, because most seating on transport category airplanes is forward-facing the pass/fail criteria developed in Amendment 25-64 focused primarily on these seats.

Prior to 2012, the FAA granted exemptions² for the multiple-place side-facing-seat installations because the existing test methods and acceptance criteria did not produce a level of safety equivalent to the level of safety provided for forward-and aft-facing seats. These exemptions were subject to many conditions that reflected the injury-evaluation criteria and mitigation strategies available at the time of the exemption issuance. The FAA also issued special conditions to address single-place side-facing seats because it determined, at the time, that those conditions provided the same level of safety as for forward- and aft-facing seats.

Due to the novelty of side-facing seats in transport category airplanes, acceptable safety measures for § 25.562 were unknown. The FAA conducted research to develop an acceptable method of compliance with §§ 25.562 and 25.785(b) for side-facing seat installations. That research has identified injury considerations and evaluation criteria in addition to those previously used to approve side-facing seats (see published report DOT/FAA/AR-09/41, July 2011³). One particular concern that was identified during the FAA's research program but not addressed in special conditions prior to 2012 was the significant leg injuries that can occur to occupants of both single- and multiple-place side-facing seats. Because this type of injury does not occur on forward- and aft-facing seats, the FAA determined that to achieve the level of safety envisioned in

Amendment 25-64, additional requirements would be needed as compared to previously issued special conditions. Nonetheless, the research has now allowed the development of a single set of special conditions that is applicable to all fully side-facing seats.

On November 5, 2012, the FAA released PS-ANM-25-03-R1, "Technical Criteria for Approving Side-Facing Seats," to update existing FAA certification policy on §§ 25.562 and 25.785(a) and (b) at Amendment 25-64 for single- and multiple-place side-facing seats. This policy addresses both the technical criteria for approving side-facing seats and the implementation of those criteria. The FAA methodology detailed in PS-ANM-25-03-R1 has been used to develop these proposed special conditions. Some of the conditions issued for previous exemptions are still relevant and are included in these proposed special conditions; however, others have been replaced by different criteria that reflect current research findings described above, as well as design features from the Gulfstream GVII model side-facing seat design.

The proposed special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these proposed special conditions are applicable to the Gulfstream Model GVIII-G700 and GVIII-G800 series airplanes. Should Gulfstream apply at a later date for a change to the type certificate to include another model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would apply to the other model as well.

Conclusion

This action affects only a certain novel or unusual design feature on Gulfstream Model GVIII-G700 and GVIII-G800 series of airplanes. It is not a rule of general applicability.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

Authority Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701, 44702, and 44704.

³ Document available <https://www.tc.faa.gov/its/worldpac/techrpt/ar09-41.pdf>.

The Proposed Special Conditions

▪ Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for Gulfstream Model GVIII–G700 and GVIII–G800 series airplanes.

In addition to the airworthiness standards in §§ 25.562 and 25.785, the FAA proposes the following special conditions as part of the type certification basis for the Gulfstream Model GVIII–G700 and GVIII–G800 series aircraft. Items 1 through 3 are applicable to all side-facing seat installations on these airplanes, whereas item 4 would impose requirements applicable to side-facing seats equipped with an airbag system in the shoulder belt, and item 5 would impose requirements applicable to side-facing seats equipped with leg-flail airbag systems.

1. Additional requirements applicable to tests or rational analysis conducted to show compliance with §§ 25.562 and 25.785 for side-facing seats:

a. The longitudinal test(s) conducted in accordance with § 25.562(b)(2) to show compliance with the seat-strength requirements of § 25.562(c)(7) and (8), and these special conditions must have an ES–2re anthropomorphic test dummy (ATD) (49 CFR part 572 subpart U) or equivalent, or a Hybrid-II ATD (49 CFR part 572, subpart B as specified in § 25.562) or equivalent, occupying each seat position and including all items contactable by the occupant (*e.g.*, armrest, interior wall, or furnishing) if those items are necessary to restrain the occupant. If included, the floor representation and contactable items must be located such that their relative position, with respect to the center of the nearest seat place, is the same at the start of the test as before floor misalignment is applied. For example, if floor misalignment rotates the centerline of the seat place nearest the contactable item 8 degrees clockwise about the aircraft x-axis, then the item and floor representations must be rotated by 8 degrees clockwise also to maintain the same relative position to the seat place, as shown in Figure 1. Each ATD's relative position to the seat after application of floor misalignment must be the same as before misalignment is applied. The ATD pelvis must remain supported by the seat pan, and the restraint system must remain on the pelvis and shoulder of the ATD until rebound begins. No injury-criteria evaluation is necessary for tests conducted only to assess seat-strength requirements.

b. The longitudinal test(s) conducted in accordance with § 25.562(b)(2), to show compliance with the injury assessments required by § 25.562(c) and these special conditions, may be conducted separately from the test(s) to show structural integrity. Structural-assessment tests must be conducted as specified in paragraph 1a, above, and the injury-assessment test must be conducted without yaw or floor misalignment. Injury assessments may be accomplished by testing with ES–2re ATD (49 CFR part 572 subpart U) or equivalent at all places. Alternatively, these assessments may be accomplished by multiple tests that use an ES–2re at the seat place being evaluated, and a Hybrid-II ATD (49 CFR part 572, subpart B, as specified in § 25.562) or equivalent used in all seat places forward of the one being assessed, to evaluate occupant interaction. Seat places aft of the one being assessed may be unoccupied. If a seat installation includes adjacent items that are contactable by the occupant, the injury potential of that contact must be assessed. To make this assessment, tests may be conducted that include the actual item, located, and attached in a representative fashion. Alternatively, the injury potential may be assessed by a combination of tests with items having the same geometry as the actual item, but having stiffness characteristics that would create the worst case for injury (injuries due to both contact with the item and lack of support from the item).

c. If a seat is installed aft of structure (*e.g.*, an interior wall or furnishing) that does not have a homogeneous surface contactable by the occupant, additional analysis and/or test(s) may be required to demonstrate that the injury criteria are met for the area which an occupant could contact. For example, different yaw angles could result in different injury considerations and may require additional analysis or separate test(s) to evaluate.

d. To accommodate a range of occupant heights (5th percentile female to 95th percentile male), the surface of items contactable by the occupant must be homogenous 7.3 inches (185 mm) above and 7.9 inches (200 mm) below the point (center of area) that is contacted by the 50th percentile male size ATD's head during the longitudinal test(s) conducted in accordance with paragraphs a, b, and c, above. Otherwise, additional head-injury criteria (HIC) assessment tests may be necessary. Any surface (inflatable or otherwise) that provides support for the occupant of any seat place must provide that support in a consistent manner regardless of occupant stature. For example, if an inflatable shoulder belt is

used to mitigate injury risk, then it must be demonstrated by inspection to bear against the range of occupants in a similar manner before and after inflation. Likewise, the means of limiting lower-leg flail must be demonstrated by inspection to provide protection for the range of occupants in a similar manner.

e. For longitudinal test(s) conducted in accordance with § 25.562(b)(2) and these special conditions, the ATDs must be positioned, clothed, and have lateral instrumentation configured as follows:

(1) ATD positioning:

Lower the ATD vertically into the seat while simultaneously (see Figure 2 for illustration):

(a) Aligning the midsagittal plane (a vertical plane through the midline of the body; dividing the body into right and left halves) with approximately the middle of the seat place.

(b) Applying a horizontal x-axis direction (in the ATD coordinate system) force of about 20 pounds (lbs) (89 Newtons [N]) to the bottom of the feet of the ATD with the legs straight, to compress the seat back cushion.

(c) Keeping the legs nearly horizontal by supporting them just behind the ankles

(d) Once all lifting devices have been removed from the ATD:

(i) Rock it slightly to settle it in the seat.

(ii) Gently lower the ankles of the ATD bending the legs at the knee joints. Do not allow the pelvis of the ATD to be moved when the lower legs are lowered. The seat back cushion must remain compressed. Separate the knees by about 4 inches (100 mm).

(iii) Set the ES–2re's head at approximately the midpoint of the available range of z-axis rotation (to align the head and torso midsagittal planes).

(iv) Position the ES–2re's arms at the joint's mechanical detent that puts them at approximately a 40-degree angle with respect to the torso. Position the Hybrid-II ATD hands on top of its upper legs.

(v) Position the feet such that the centerlines of the lower legs are approximately parallel to a lateral vertical plane (in the aircraft coordinate system).

(2) ATD clothing: Clothe each ATD in form-fitting, mid-calf-length (minimum) pants and shoes (size 11E) weighing about 2.5 lb (1.1 Kg) total. The color of the clothing should be in contrast to the color of the restraint system. The ES–2re jacket is sufficient for torso clothing, although a form-fitting shirt may be used in addition if desired.

(3) ES–2re ATD lateral instrumentation: The rib-module linear

slides are directional, *i.e.*, deflection occurs in either a positive or negative ATD y-axis direction. The modules must be installed such that the moving end of the rib module is toward the front of the aircraft. The three abdominal-force sensors must be installed such that they are on the side of the ATD toward the front of the aircraft.

f. The combined horizontal/vertical test, required by § 25.562(b)(1) and these special conditions, must be conducted with a Hybrid II ATD (49 CFR part 572 subpart B as specified in § 25.562), or equivalent, occupying each seat position.

g. Restraint systems:

(1) If inflatable restraint systems are used, they must be active during all dynamic tests conducted to show compliance with § 25.562.

(2) The design and installation of seat-belt buckles must prevent unbuckling due to applied inertial forces or impact of the hands/arms of the occupant during an emergency landing.

2. Additional performance measures applicable to tests and rational analysis conducted to show compliance with §§ 25.562 and 25.785 for side-facing seats:

a. Body-to-body contact: Contact between the head, pelvis, torso, or shoulder area of one ATD with the adjacent-seated ATD's head, pelvis, torso, or shoulder area is not allowed. Contact during rebound is allowed.

b. Thoracic: The deflection of any of the ES-2re ATD upper, middle, and lower ribs must not exceed 1.73 inches (44 mm). Data must be processed as defined in Federal Motor Vehicle Safety Standards (FMVSS) 571.214.

c. Abdominal: The sum of the measured ES-2re ATD front, middle, and rear abdominal forces must not exceed 562 lbs (2,500 N). Data must be processed as defined in FMVSS 571.214.

d. Pelvic: The pubic symphysis force measured by the ES-2re ATD must not exceed 1,350 lbs (6,000 N). Data must be processed as defined in FMVSS 571.214.

e. Leg: Axial rotation of the upper-leg (femur) must be limited to 35 degrees in either direction from the nominal seated position.

f. Neck: As measured by the ES-2re ATD and filtered at CFC 600 as defined in SAE J211:

(1) The upper-neck tension force at the occipital condyle (O.C.) location must be less than 405 lb (1,800 N).

(2) The upper-neck compression force at the O.C. location must be less than 405 lb (1,800 N).

(3) The upper-neck bending torque about the ATD x-axis at the O.C. location must be less than 1,018 in-lb (115 Nm).

(4) The upper-neck resultant shear force at the O.C. location must be less than 186 lb (825 N).

g. Occupant (ES-2re ATD) retention: The upper-torso restraint straps (if present) must remain on the ATD's shoulder during the impact. The pelvic restraint must remain on the ES-2re ATD's pelvis during the impact. The pelvic restraint must remain on the ES-2re ATD's pelvis during rebound unless the following criteria are met. A 250 lb. lap belt tension limit based upon the findings in Civil Aerospace Medical Institute (CAMI) report DOT/FAA/AM-17/02. The data should be filtered at CFC 60 as defined in SAE J211. In order to complete the evaluation using this tension criteria, three things are needed.

1. A clear indication of when the belt moves above the pelvis. Loose clothing can make it difficult to determine where the top of the pelvis is, and in turn make it hard to discern exactly when the belt moved above it. This can be improved by marking the top of the pelvis clearly and by positioning the cameras so that the position of the belt, relative to the top of the pelvis can be observed throughout the test (see Figure 3).

2. A measurement of the belt tension during the time when the belt moves above the pelvis. The webbing transducer should be placed to measure the total tension in the forward lap belt segment. If a split (combined body-centered and conventional) leading belt is used, the tension should be measured in the common section so that it reflects the contribution of each segment. Since this placement typically produces contact between the ATD and the transducer, it is important to use a webbing transducer that is not sensitive to contact.

3. Useful video and belt load data must be recorded until significant ATD rebound motion stops. Extra recording time is necessary because submarining usually occurs later in the test than other injury criteria maximums. To completely capture ATD rebound, the necessary time could exceed 500 ms.

h. Occupant (ES-2re ATD) support:

(1) Pelvis excursion: The load-bearing portion of the bottom of the ATD pelvis must not translate beyond the edges of its seat's bottom seat-cushion supporting structure.

(2) Upper-torso support: The lateral flexion of the ATD torso must not exceed 40 degrees from the normal upright position during the impact.

3. For all airbag systems in the shoulder harness and for leg flail, the following apply:

a. Show that the airbag system will deploy and provide protection under crash conditions where it is necessary to prevent serious injury.

b. The means of protection must take into consideration a range of stature from a 2-year-old child to a 95th percentile male.

c. The airbag system must provide adequate protection for each occupant regardless of the number of occupants of the seat assembly, considering that unoccupied seats may have an active airbag system.

d. It must be shown that the airbag system is not susceptible to inadvertent deployment as a result of wear and tear, or inertial loads resulting from in-flight or ground maneuvers (including gusts and hard landings), and other operating and environmental conditions (vibrations, moisture, etc.) likely to occur in service.

e. Deployment of the airbag system must not introduce injury mechanisms to the seated occupant, or result in injuries that could impede rapid egress. This assessment should include an occupant whose seat belt is loosely fastened.

f. It must be shown that inadvertent deployment of the airbag system, during the most critical part of the flight, will either meet the requirement of § 25.1309(b) or not cause a hazard to the airplane or its occupants.

g. It must be shown that the airbag system will not impede rapid egress of occupants 10 seconds after airbag deployment.

h. The airbag system must be protected from lightning and high-intensity radiated fields (HIRF). The threats to the airplane specified in existing regulations regarding lightning, § 25.1316, and HIRF, § 25.1317, are adopted by reference for the purpose of measuring lightning and HIRF protection.

i. The airbag system must function properly after loss of normal aircraft electrical power, and after a transverse separation of the fuselage at the most critical location. A separation at the location of the airbag system does not have to be considered.

j. It must be shown that the airbag system will not release hazardous quantities of gas or particulate matter into the cabin.

k. The airbag system installation must be protected from the effects of fire such that no hazard to occupants will result.

l. A means must be available for a crewmember to verify the integrity of the airbag system prior to each flight, or

it must be demonstrated to reliably operate between inspection intervals. The FAA considers that the loss of the airbag-system deployment function alone (*i.e.*, independent of the conditional event that requires the airbag-system deployment) is a major-failure condition.

m. The inflatable material may not have an average burn rate of greater than 2.5 inches/minute when tested using the horizontal flammability test defined in part 25, appendix F, part I, paragraph (b)(5).

n. The airbag system, once deployed, must not adversely affect the emergency-lighting system (*i.e.*, block floor proximity lights to the extent that the lights no longer meet their intended function).

o. The airbag system must perform its intended function after impact from other proximate assemblies (*e.g.*, life raft) that may become detached under the loads specified in §§ 25.561 and 25.562.

4. For seats with an airbag system in the shoulder belts, the following apply:

a. The airbag system in the shoulder belt must provide a consistent approach to energy absorption throughout that range of occupants. The airbag system must be included in each of the certification tests as it would be installed in the airplane. In addition, the following situations must be considered:

(1) The seat occupant is holding an infant.

(2) The seat occupant is a pregnant woman.

b. The design must prevent the airbag system in the shoulder belt from being either incorrectly buckled or incorrectly installed, such that the airbag system in the shoulder belt would not properly deploy. Alternatively, it must be shown that such deployment is not hazardous to the occupant, and will provide the required injury protection.

5. For seats using an airbag system to meet the leg-flail conditions of 2.e. the following apply:

a. At some buttock popliteal length and effective seat bottom depth the lower legs will not be able to make a 90-degree angle with the upper leg; at this

point the lower leg flail would not occur. The leg flail airbag system must provide a consistent approach to prevention of leg flail throughout that range of occupants whose lower legs can make a 90-degree angle with the upper legs when seated upright in the seat. Items that need to be considered include, but are not limited to the range of occupants' popliteal height, the range of occupants' buttock popliteal length, the design of the seat effective height above the floor, and the effective depth of the seat bottom cushion.

b. For all g-levels, if the design of the leg flail limited device does absorb some of the impact energy and returns only a portion to the legs (a qualitative assessment), then a rebound leg flail of greater than 35 degrees is acceptable.

c. Threshold test severity must be shown to be non-injurious (less than the post-mortem human subject (PMHS) low-g research testing) for g-levels up to the point where the leg flail airbag is designed to deploy.

BILLING CODE 4910-13-C

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2024-0043; Project
Identifier MCAI-2023-00985-E]

RIN 2120-AA64

Airworthiness Directives; Rolls-Royce Deutschland Ltd & Co KG Engines

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking
(NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all Rolls-Royce Deutschland Ltd & Co KG (RRD) Model Trent 1000-A, Trent 1000-AE, Trent 1000-C, Trent 1000-CE, Trent 1000-D, Trent 1000-E, Trent 1000-G, and Trent 1000-H engines. This proposed AD was prompted by reports of cracking and separation of certain low-pressure turbine (LPT) stage 1 blade assemblies. This proposed AD would require initial and repetitive inspections of affected LPT stage 1 blade assemblies for cracking or separation and, depending on the results of the inspections, reduction of the inspection interval or replacement of the LPT stage 1 blade set and disk. This proposed AD would also prohibit the installation of an LPT disk or blade set assembly unless it is considered a serviceable part, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this NPRM by March 18, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.

- *Fax:* (202) 493-2251.

- *Mail:* U.S. Department of

Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA-2024-0043; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For service information identified in this NPRM, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADS@easa.europa.eu*; website: *easa.europa.eu*. You may find this material on the EASA website at *ad.easa.europa.eu*.

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222-5110.

FOR FURTHER INFORMATION CONTACT: Sungmo Cho, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (781) 238-7241; email: *sungmo.d.cho@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include "Docket No. FAA-2024-0043; Project Identifier MCAI-2023-00985-E" at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and

actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as "PROPIN." The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Sungmo Cho, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2023-0165, dated August 22, 2023 (EASA AD 2023-0165) (also referred to as the MCAI), to address an unsafe condition for all RRD Model Trent 1000-A, Trent 1000-AE, Trent 1000-C, Trent 1000-CE, Trent 1000-D, Trent 1000-E, Trent 1000-G, and Trent 1000-H engines. The MCAI states that manufacturer inspections detected cracking and separation of blade pairs in the weld region of certain LPT stage 1 blade assemblies. A blade assembly consists of a pair of blades welded together at the outer shroud. There are 85 LPT stage 1 blade assemblies in one set. Such cracking and separation could cause failure of affected parts and damage to the LPT module.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA-2024-0043.

Related Service Information Under 1 CFR Part 51

The FAA reviewed EASA AD 2023-0165, which specifies procedures for inspection of affected LPT stage 1 blade assembly outer shrouds and replacement of the LPT stage 1 blade set and disk. EASA AD 2023-0165 also specifies a reduction of the repetitive inspection intervals if cracking or separation is detected and meets certain criteria. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

FAA’s Determination

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in EASA AD 2023–0165 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA’s ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has since coordinated with other manufacturers and CAAs to use this process. As a result, the FAA proposes to incorporate EASA AD 2023–0165 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2023–0165 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular

section in the EASA AD does not mean that operators need comply only with that section. For example, where the AD requirement refers to “all required actions within the compliance times,” compliance with this AD requirement is not limited to the section titled “Required Action(s) and Compliance Time(s)” in EASA AD 2023–0165. Service information required by the EASA AD for compliance will be available at *regulations.gov* under Docket No. FAA–2024–0043 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 28 engines installed on airplanes of U.S. registry.

The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspect LPT stage 1 blade outer shroud	4 work-hours × \$85 per hour = \$340	\$0	\$340	\$9,520

The FAA estimates the following costs to do any necessary replacements that would be required based on the

results of the proposed inspection. The agency has no way of determining the

number of engines that might need these replacements.

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replace LPT stage 1 blade set	10 work-hours × \$85 per hour = \$850	\$466,480	\$467,330
Replace LPT stage 1 disk	10 work-hours × \$85 per hour = \$850	256,908	257,758

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Rolls-Royce Deutschland Ltd & Co KG:
Docket No. FAA-2024-0043; Project
Identifier MCAI-2023-00985-E.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by March 18, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Rolls-Royce Deutschland Ltd & Co KG Model Trent 1000; Rolls-Royce Deutschland Ltd & Co KG Trent 1000-A, Trent 1000-AE, Trent 1000-C, Trent 1000-CE, Trent 1000-D, Trent 1000-E, Trent 1000-G, and Trent 1000-H engines.

(d) Subject

Joint Aircraft System Component (JASC)
Code 7250, Turbine Section.

(e) Unsafe Condition

This AD was prompted by reports of cracking and separation of certain low-pressure turbine (LPT) stage 1 blade assemblies. The FAA is issuing this AD to prevent failure of the LPT stage 1 blades. The unsafe condition, if not addressed, could result in high energy debris release, damage to the airplane, and reduced control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraphs (h) and (i) of this AD: Perform all required actions within the compliance times specified in, and in accordance with, European Union Aviation Safety Agency AD 2023-0165, dated August 22, 2023 (EASA AD 2023-0165).

(h) Exceptions to EASA AD 2023-0165

(1) Where EASA AD 2023-0165 refers to its effective date, this AD requires using the effective date of this AD.

(2) This AD does not adopt the Remarks paragraph of EASA AD 2023-0165.

(3) Where the service information referenced in EASA AD 2023-0165 specifies discarding the removed LP turbine stage 1 blade set, this AD requires removing the affected part from service.

(4) Where the service information referenced in EASA AD 2023-0165 specifies to quarantine the removed LP turbine stage 1 rotor disk, this AD requires removing the affected part from service.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2023-0165 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR-520 Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if

requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the AIR-520 Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k) of this AD and email to: *ANE-AD-AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local Flight Standards District Office/certificate holding district office.

(k) Additional Information

For more information about this AD, contact Sungmo Cho, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (781) 238-7241; email: *sungmo.d.cho@faa.gov*.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2023-0165, dated August 22, 2023.

(ii) [Reserved]

(3) For EASA AD 2023-0165, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu*; website: *easa.europa.eu*. You may find this EASA AD on the EASA website at *ad.easa.europa.eu*.

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222-5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov*.

Issued on January 26, 2024.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120-AA64

Airworthiness Directives; Britten-Norman Aircraft, Ltd. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all Britten-Norman Aircraft, Ltd. Model BN-2, BN-2A, BN-2A-2, BN-2A-3, BN-2A-6, BN-2A-8, BN-2A-9, BN-2A-20, BN-2A-21, BN-2A-26, BN-2A-27, BN-2B-20, BN-2B-21, BN-2B-26, BN-2B27, BN-2T, BN2T-4R, and BN2T-4S airplanes; and Model BN2A MK. III, BN2A MK. III-2, and BN2A MK. III-3 airplanes. This proposed AD was prompted by reports of electrical cable (Coiled Kord) and flight control cables interference with the control column. This proposed AD would require inspecting for interference between the control column, rudder pedal adjuster cable, and any wiring (including the Coiled Kord) concurrently with performing a flight control full and free movement inspection, and taking corrective actions if necessary. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this NPRM by March 18, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.

- *Fax:* (202) 493-2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA-2024-0044; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory

continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For service information identified in this NPRM, contact Britten-Norman Aircraft Ltd., Bembridge Airport, Bembridge, Isle of Wight, PO35 5PR United Kingdom; phone: +44 20 3371 4000; email: customer.support@britten-norman.com; website: britten-norman.com/approvals-technical-publications.

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222-5110.

Penelope Trease, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (303) 342-1094; email: penelope.trease@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA-2024-0044; Project Identifier MCAI-2023-00629-A” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to regulations.gov, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as

private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Penelope Trease, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom (UK), has issued CAA UK AD G-2022-0017, dated September 20, 2022 (also referred to as the MCAI), to correct an unsafe condition on all Britten-Norman Aircraft Ltd. Model BN2 series Islander airplanes; and Model BN2A Mark III Trislander airplanes. The MCAI states that there have been occurrences of flight control restriction in pitch during the pilot’s full and free flight control checks prior to take-off. Investigations into these occurrences revealed interference between the routing of the Coiled Kord, flight control cables, and control column, which could restrict the full and free movement of the flight controls. An incorrectly routed Coiled Kord could snag the rudder pedal adjustment cable, draw it towards the control column tube where it could snag the aileron control stop, and restrict movement of the control column tube. This increased load on the rudder pedal adjustment cable could unlock the adjustment mechanism, permitting the rudder pedals to freely move forward and aft. One of the investigations also revealed that a correctly routed Coiled Kord was entangled with an incorrectly routed rudder pedal adjustment cable, which resulted in snagging the aileron control stop. In order to address this condition, the MCAI requires an inspection using Britten-Norman Service Bulletin SB 398, Issue 2, dated May 30, 2022 (Britten-Norman SB 398, Issue 2), to ensure the Coiled Kord is correctly routed behind the instrument panel and that the rudder pedal adjustment cable and Coiled Kord are not interfering with each other.

The FAA is proposing this AD to address this unsafe condition. Interference between the Coiled Kord, flight control cables, and the control column, if not addressed, could result in

loss of control of the airplane during flight.

You may examine the MCAI in the AD docket at regulations.gov under Docket No. FAA-2024-0044.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Britten-Norman SB 398, Issue 2, which specifies procedures for inspecting the cable routing behind the instrument panel to determine if the cables and wiring to the instrument panel, wiring in the surrounding area, the rudder pedal adjuster cable, and the Coiled Kord are routed securely and there is clearance to allow full and free movement of the flight controls, and if interference is found, securely tying the cables so they are clear of the control column for its full range of motion. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

FAA’s Determination

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI and service information referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in the MCAI except as discussed under “Differences Between this Proposed AD and the MCAI.”

Differences Between This Proposed AD and the MCAI

The MCAI specifies that if any interference is found during the inspection for interference between the control column, rudder pedal adjuster cable, and any wiring (including the Coiled Kord) while performing a flight control full and free movement check, complete the operator feedback form in Appendix A of Britten-Norman SB 398, Issue 2, and return it to Britten-Norman Aircraft, Ltd. That action would not be required by this proposed AD.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 72 airplanes of U.S. registry.

The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Table with 5 columns: Action, Labor cost, Parts cost, Cost per product, Cost on U.S. operators. Row 1: Inspect for interference and full and free movement. Labor cost: 1 work-hour x \$85 per hour = \$85. Parts cost: \$0. Cost per product: \$85. Cost on U.S. operators: \$6,120.

The FAA estimates the following costs to do any necessary actions that would be required based on the results

of the proposed inspection. The agency has no way of determining the number

of airplanes that might need these actions:

ON-CONDITION COSTS

Table with 4 columns: Action, Labor cost, Parts cost, Cost per product. Row 1: Correct Koiled Kord cable routing. Labor cost: Up to 3 work-hours x \$85 per hour = \$255. Parts cost: \$0. Cost per product: Up to \$255.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Britten-Norman Aircraft, Ltd.: Docket No. FAA-2024-0044; Project Identifier MCAI-2023-00629-A.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by March 18, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Britten-Norman Aircraft Ltd airplanes, all serial numbers, certificated in any category, identified in paragraphs (c)(1) and (2) of this AD.

(1) Model BN-2, BN-2A, BN-2A-2, BN-2A-3, BN-2A-6, BN-2A-8, BN-2A-9, BN-2A-20, BN-2A-21, BN-2A-26, BN-2A-27, BN-2B-20, BN-2B-21, BN-2B-26, BN-2B-27, BN-2T, BN2T-4R, and BN2T-4S airplanes.

(2) Model BN2A MK. III, BN2A MK. III-2, and BN2A MK. III-3 airplanes.

(d) Subject

Joint Aircraft System Component (JASC) Code 2797, Flight Control System Wiring.

(e) Unsafe Condition

This AD was prompted by reports of electrical cable (Koiled Kord) and flight control cables interference with the control column. The FAA is issuing this AD to address interference between the Koiled Kord, flight control cables, and the control column, which could restrict the full and free movement of the flight controls. This unsafe condition, if not addressed, could result in loss of control of the airplane during flight.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definition

For the purposes of this AD, a Koiled Kord is the coiled electrical cable that carries the wires from switches on the control yoke, through the control column tube, to the rear of the instrument panel. It exits the control column tube behind the instrument panel and continues to a terminal block.

(h) Required Actions

(1) Within 100 hours time-in-service (TIS) after the effective date of this AD, inspect for interference between the control column, rudder pedal adjuster cable, and any other wiring, including the Koiled Kord, in accordance with Sections 6 and 7(1) of Britten-Norman Service Bulletin SB 398, Issue 2, dated May 30, 2022 (Britten-Norman SB 398, Issue 2), while concurrently

performing a control column full and free movement inspection, in accordance with Section 8 of Britten-Norman SB 398, Issue 2, to inspect for free play, friction, binding, non-linear forces, and any remaining interference.

(2) If interference between the control column, the rudder pedal adjuster cable, and any other wiring, including the Coiled Kord, or any free play, friction, binding, non-linear forces, or any remaining interference was found during the inspections required by paragraph (h)(1) of this AD, before further flight, securely tie any interfering electrical cables clear of the control column for its full range of motion and perform a final full and free movement inspection in accordance with Section 8 of Britten-Norman SB 398, Issue 2, to inspect for free play, friction, binding, non-linear forces, and any remaining interference. If there is any free play, friction, binding, non-linear forces, or any remaining interference, before further flight resolve these issues in accordance with a method approved by the Manager, International Validation Branch, FAA; or the Civil Aviation Authority United Kingdom (CAA UK); or Britten-Norman Aircraft Ltd.'s CAA UK Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(i) Alternative Methods of Compliance (AMOCs)

The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (j)(2) of this AD or email to: 9-AVS-AIR-730-AMOC@faa.gov. If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local Flight Standards District Office/certificate holding district office.

(j) Additional Information

(1) Refer to CAA UK AD G-2022-0017, dated September 20, 2022, for related information. This CAA UK AD may be found in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2024-0044.

(2) For more information about this AD, contact Penelope Trease, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (303) 342-1094; email: penelope.trease@faa.gov.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Britten-Norman Service Bulletin SB 398, Issue 2, dated May 30, 2022.

(ii) [Reserved]

(3) For service information identified in this AD, contact Britten-Norman Aircraft Ltd., Bembridge Airport, Bembridge, Isle of Wight, PO35 5PR United Kingdom; phone: +44 20 3371 4000; email: customer.support@britten-norman.com; website: britten-norman.com/approvals-technical-publications.

BILLING CODE 4910-13-P

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 541

[Docket No. BOP-1171-P]

RIN 1120-AB71

Inmate Discipline Program: Disciplinary Segregation and Prohibited Act Code Changes

AGENCY: Bureau of Prisons, Justice.

ACTION: Proposed rule.

SUMMARY: In this document, the Bureau of Prisons (Bureau) proposes to amend, clarify, and streamline inmate discipline regulations to conform with current practice; to adopt recommendations of the January 2016 U.S. Department of Justice Report and Recommendations Concerning the Use of Restrictive Housing to reduce the potential length of the disciplinary segregation sanction; and to amend and clarify the list of prohibited act codes.

DATES: Electronic comments must be submitted, and written comments must be postmarked, no later than 11:59 p.m. on April 1, 2024.

ADDRESSES: Please submit electronic comments through the [regulations.gov](https://www.regulations.gov) website, or mail written comments to the Legislative & Correctional Issues Branch, Office of General Counsel, Bureau of Prisons, 320 First Street NW, Washington, DC 20534.

FOR FURTHER INFORMATION CONTACT: Daniel J. Crooks III, Assistant General Counsel/Rules Administrator, Federal

Bureau of Prisons, at the address above or at (202) 353-4885.

SUPPLEMENTARY INFORMATION: Please note that all comments received are considered part of the public record and made available for public inspection online at www.regulations.gov. If you want to submit personal identifying information (such as your name, address, etc.) as part of your comment, but do not want it to be posted online, you must include the phrase “PERSONAL IDENTIFYING INFORMATION” in the first paragraph of your comment. You must also locate all the personal identifying information you do not want posted online in the first paragraph of your comment and identify what information you want redacted.

If you want to submit confidential business information as part of your comment but do not want it to be posted online, you must include the phrase “CONFIDENTIAL BUSINESS INFORMATION” in the first paragraph of your comment. You must also prominently identify confidential business information to be redacted within the comment. If a comment contains so much confidential business information that it cannot be effectively redacted, all or part of that comment may not be posted to www.regulations.gov.

Personal identifying information identified and located as set forth above will be placed in the agency’s public docket file, but not posted online. Confidential business information identified and located as set forth above will not be placed in the public docket file. If you wish to inspect the agency’s public docket file in person by appointment, please see the **FOR FURTHER INFORMATION CONTACT** paragraph.

I. Background

In this document, the Bureau of Prisons (Bureau) proposes to amend, clarify, and streamline inmate discipline regulations in 28 CFR part 541 to conform with current practice; to adopt recommendations of the U.S. Department of Justice Report and Recommendations Concerning the Use of Restrictive Housing (January 2016)¹ (hereinafter “Report”) to reduce the potential length of the disciplinary

¹ U.S. Department of Justice Report & Recommendation Concerning the Use of Restrictive Housing, U.S. Department of Justice, Office of Justice Programs (January 2016), available at <https://www.ojp.gov/ncjrs/virtual-library/abstracts/us-department-justice-report-and-recommendations-concerning-use>.

segregation sanction; and to amend and clarify the list of prohibited act codes.

A. Clarifying Changes

Section 541.1 currently indicates that the purpose of the subpart is to describe the inmate discipline program. We first propose to add introductory language clarifying that the subpart does not create a private right of action or otherwise permit civil claims for alleged violations. We next propose to make non-substantive alterations in this section to clarify that inmate discipline helps ensure the safety, security, and orderly operation of correctional facilities as well as the protection of the public by sanctioning inmates who commit prohibited acts. We also retain language indicating that the subpart describes the inmate discipline program and ensures that sanctions will not be imposed in a capricious or retaliatory manner. Finally, we reiterate that, consistent with the Rehabilitation Act of 1973, for all discipline cases, the Unit Discipline Committee or Disciplinary Hearing Officer shall consider the individual inmate's mental health and disabilities when determining the appropriateness of sanctions.

Section 541.2 states that the Bureau's inmate discipline program applies to sentenced and unsentenced inmates in Bureau custody and those designated to any prison, institution, or facility in which persons are held in custody by direction of, or under an agreement with, the Bureau of Prisons. Although this language implicitly includes inmates designated to Bureau contract facilities, the Bureau proposes to make this inclusion explicit.

We propose to alter this section to indicate that, for the purposes of these regulations, "staff" indicates staff authorized by the Bureau to implement the inmate discipline program as described in this subpart, and that the inmate discipline program applies to sentenced and unsentenced inmates in Bureau custody or in any facility, including community confinement facilities, in which persons are held in custody by the direction of, or under an agreement with, the Bureau.

Section 541.3 describes prohibited acts and available sanctions. The current regulation divides prohibited acts into four separate categories based on severity: Greatest; High; Moderate; and Low. We now propose to eliminate the "Low" category to eliminate prohibited act codes that were underutilized. The revised list of prohibited acts is explained in more detail below.

B. Prohibited Act Codes

The Bureau proposes to make several changes to 28 CFR 541.3 Table 1 to § 541.3—Prohibited Acts and Available Sanctions, as follows:

Clarification of code 101, regarding assaulting any person, or an armed assault on the institution's secure perimeter (to be used only when serious physical injury has been attempted or accomplished).

We propose to clarify the language of this code to indicate that the prohibited conduct is the attempted or accomplished assault and/or battery of any person involving serious physical injury, or an armed assault on the institution's secure perimeter. No changes will be made to the substance or application of this code.

Expansion of code 102, regarding escape.

We propose to expand this code, which currently includes "escape from escort; escape from any secure or non-secure institution, including community confinement; escape from unescorted community program or activity;" and "escape from outside a secure institution," to clarify that this code prohibits any unauthorized departure from custody, including, but not limited to, unauthorized departure from the buildings, lands, property or perimeter (inside or outside) of any secure or non-secure facility; unauthorized departure from community confinement, work detail, program or activity (whether escorted or unescorted); and unauthorized departure from any authorized location regardless of electronic monitoring devices.

Escape from a work detail is currently included in prohibited act code 200, which we now propose to delete, as the language in that code will be encompassed by revised code 102. In the July 26, 2005, proposed rule on the subject, the Bureau explained that code 200 was created to allow for a less severe sanction than that imposed for any other type of escape if an inmate voluntarily chooses to minimize his prohibited act by returning (70 FR 43093). However, in the intervening years, the Bureau has found that allowing for a less severe sanction for escapes with voluntary return has resulted in greater incidences of inmate escapes and attempts to escape in order to procure contraband to introduce into Bureau facilities.

Therefore, to deter any unauthorized departure from Bureau custody, regardless of whether the inmate chooses to voluntarily return, and to emphasize the severity of the prohibited act, we propose to delete code 200 and

include escapes from work details within code 102 in the Greatest Severity Level.

Clarification of code 103, regarding setting a fire.

We propose to clarify the language of this code to prohibit causing ignition or combustion (including, but not limited to, fire or explosion) that either threatens serious bodily harm or is done in furtherance of another Greatest Severity Level prohibited act. No changes will be made to the substance or application of this code.

Clarification of code 104, regarding possession, manufacture, or introduction of a gun, firearm, weapon, sharpened instrument, knife, dangerous chemical, explosive, ammunition, or any instrument that has been modified in order to be used as a weapon.

We propose to clarify the language of this code to prohibit possession, manufacture, or introduction of any item that has been weaponized. Such an item can include firearms, sharpened instruments, unauthorized blades, explosives, ammunition, unauthorized chemicals, or any other object that has been modified in order to be used as a weapon.

Combining codes 105 and 106, regarding rioting and encouraging others to riot.

We propose to combine code 105, rioting, and 106, encouraging others to riot, into one code 105 that clarifies the prohibited act as rioting; promoting rioting; or encouraging others to participate in a riot. In this code, we also define the term "riot" as a disturbance with two or more people that involves violence or threats of violence or damage to government property, for the purpose of preventing or coercing official action.

Expansion of code 108, regarding hazardous tools.

We propose to expand this code, which currently includes "possession, manufacture, introduction or loss" of hazardous tools, to also include "use" of a hazardous tool. We also propose to include in the list of hazardous tool examples those "items necessary in the use of these devices." Making these changes would allow for discipline if telltale evidence of such items as a cellphone, electronic device, or escape paraphernalia were not found, but items which could only be used with prohibited items are found to have been used.

Separation of codes 110, 111, 112, 113, regarding drugs, narcotics, and marijuana, from those regarding alcohol and intoxicants.

We propose to make a technical amendment involving prohibited act

codes 110, 111, 112, and 113, all of which currently cover the prohibited acts of refusing to be tested for, introducing, or making, using, or possessing drugs or alcohol/intoxicants not prescribed by medical staff. Having one set of prohibited acts that relates to both drugs and alcohol/intoxicants together has made it difficult for the Bureau to effectively track the number of incident reports related solely to drugs or solely to alcohol/intoxicants.

We therefore propose to separate the one set of prohibited activities into two: one group of codes relating to drugs, and the other to alcohol/intoxicants. To accomplish this, we created four new prohibited act codes: 116, 117, 118, and 119. Codes 110 through 113 will now relate solely to drugs, and codes 116 through 119 will repeat the activities described in 110 through 113, but with regard to alcohol/intoxicants. The wording of the codes has not otherwise changed.

Combination of codes 114, 205, 206, 229, and 300, regarding non-consensual, sexually explicit conduct up to and including assault.

We propose to combine codes 114, 205, 206, 229, and 300 to clarify that the behavior we seek to prohibit encompasses additional non-consensual, sexually explicit conduct, including “sexual assault.” Instead, we propose to clarify that code 114 prohibits sexually explicit conduct involving force, threat of force, or threat of harm; or sexually explicit conduct without consent or through coercion; or attempts thereof. Revised code 114 would encompass sexually explicit conduct that staff have observed and instructed an inmate to cease.

In this code, we further define the term “sexually explicit conduct” as it is described in 18 U.S.C. 2256(2)(A): verbal or written sexual proposals or threats; actual or simulated sexual intercourse, including but not limited to genital-genital, oral-genital, anal-genital, or oral-anal, whether between persons of the same or opposite sex; bestiality; masturbation; sadistic or masochistic abuse; or lascivious exhibition of the anus, genitals, or pubic area of any person.

There has been a general increase over several years in the occurrence of these prohibited acts, particularly as aimed at staff. This behavior, especially towards staff, rises to the greatest level of severity because it results in the existence of a sexually hostile work environment for staff. Accordingly, we seek to increase the severity level for these behaviors to underscore the level of seriousness of this conduct, to deter this type of activity, and to promote a

healthy work environment for Bureau staff.

As conforming amendments, the Bureau proposes to delete codes 205 (engaging in sexual acts), 206 (making sexual proposals or threats to another), 229 (sexual assault of any person, involving non-consensual touching without force or threat of force), and 300 (indecent exposure) because the conduct those codes prohibit would be encompassed under revised code 114.

Addition of code 194, regarding unauthorized use of social media and fund transfer services.

We propose to add a Greatest Severity Level prohibited act code (194) for accessing, using, or maintaining social media accounts (including, but not limited to the following: Facebook, Twitter, Instagram, Snapchat, TikTok, etc. or any successor), or directing others to establish or maintain social media accounts on the inmate’s behalf for the purpose of committing or aiding in the commission of a criminal act; of committing or aiding in the commission of any Greatest category prohibited act; or of circumventing authorized communications monitoring for the purpose of committing or aiding in the commission of a criminal act or of any Greatest category prohibited act. This code also prohibits inmates’ use of fund transfer services such as CashApp, as explained in more detail below.

In determining whether the Bureau can restrict inmate access to social media accounts, the appropriate standard to consider is whether such a restriction is reasonably related to legitimate penological interests. *See, e.g., Aguiar v. Recktenwald*, No. 3:13–2616, 2015 WL 5829727, at *8 (M.D. Pa. Sept. 30, 2015) (citing *Solan v. Zickefoose*, 530 F. App’x 109, 110 (3d Cir. 2013), *cert. dismissed*, 134 S. Ct. 1499 (2014), reconsideration denied, 134 S. Ct. 1927 (2014) (quoting *Turner v. Safley*, 482 U.S. 78, 89 (1987)). In *Aguiar*, the court articulated the *Turner* factors demonstrated by the Bureau’s policy of restricting social media use by inmates, as follows:

The first *Turner* factor requires a valid, rational connection between the prison regulation and the legitimate governmental interest articulated to justify it. Here, the record supports a rational connection between controlling indirect communications with outsiders through effectuating the deactivation of inmates’ Facebook accounts, and the articulated goal of promoting the security of the prison institution and the protection of the community The policy . . . of restricting inmates from accessing social media platforms as a means to communicate with unauthorized contacts, “is content neutral and does not work to exclude any particular message or

expression.” *McIntyre v. Bayer*, 243 F.3d 548 (9th Cir. 2000)

If the prison facility acquiesced upon discovering that an inmate’s Facebook account was being operated to convey content from the inmate himself, it would open the door to inmates communicating with a virtually unlimited number of individuals. Those Facebook contacts could include other confined inmates, gang members with whom the inmate may be affiliated with and prohibited from contacting, or perhaps more disturbingly victims of the inmate’s crimes or other individuals who may be subject to deliberate intimidation by the inmate (or by the inmate’s contact who controls the account, harassing the victim in effective anonymity). The uncontroverted evidence indicates that administrators have determined, in their sound discretion, that permitting inmates to maintain Facebook accounts through third parties would jeopardize the security and order of the facility and would circumvent established policies regulating communication that enhance prison security. . . .

With regard to the second factor, *Aguiar’s* First Amendment right to communication or association has not been impermissibly denied, as the challenged policy leaves ample alternatives to communicate with friends and family. Specifically, *Aguiar* retains the use of other methods of communication with outsiders through prison visitation, postal mail, telephone, and TRULINCS messaging. . . . Specifically, the First Amendment does not require “that the government provide telephones, videoconferencing, email, or any of the other marvelous forms of technology that allow instantaneous communication across geographical distances; the First Amendment is a limit on the exercise of governmental power, not a source of positive obligation.” *Holloway v. Magness*, No. 5:07–00088, 2011 WL 204891, at *7 (E.D. Ark. Jan. 21, 2011).

The third *Turner* factor considers the impact that the accommodation of the asserted constitutional right will have on Defendants. Here, the Court has considered the consequence of accommodating the asserted constitutional right on the allocation of prison resources generally, the other inmates, and the prison administration. “When accommodation of an asserted right will have a significant ‘ripple effect’ on fellow inmates or prison staff, courts should be particularly deferential to the informed discretion of corrections officials.” *Turner*, 482 U.S. at 89. Permitting inmates to effectively curate the content posted on their Facebook pages through an authorized agent would impose insurmountable burdens on prison staff tasked with monitoring inmates’ communications, would require incredible prison resources to effectively regulate, and would undermine the infrastructure of communication policies designed to safeguard prison operations. In toto, these considerations demonstrate a substantial burden on prison officials and resources as an impact of accommodating *Aguiar’s* access to Facebook.

The fourth *Turner* factor, the availability of other alternatives to effectuate the BOP’s

objective, weights in favor of the BOP, as Aguiar has not offered any meaningful alternatives to Defendants' current arrangement of disclosing to Facebook inmates whose Facebook accounts are updated by third parties in violation of Facebook's user agreement, and more generally of discouraging inmates from gaining access to social media platforms in order to communicate with unauthorized contacts.

In sum, the *Turner* factors weigh in favor of the BOP's informal policy of restricting inmates from maintaining social media platforms such as Facebook, as the decision to notify Facebook upon discovering an inmate with an active Facebook account does not impermissibly curtail an inmate's right to communicate with persons outside the prison. As Aguiar has not alleged the deprivation of a constitutional right, Defendants are entitled to qualified immunity with respect to these First Amendment claims.

Aguiar v. Recktenwald, 2015 WL 5829727, at *9. In addition, several states currently have provisions in law or policies prohibiting prisoners from accessing social media. See, e.g., Ala. Code 14-11-70 (2013); Texas Department of Criminal Justice Offender Orientation Handbook, Ch. 1, III. N., p. 24 (Apr. 2016); New Mexico Corrections Department Policy CD-044005, internet Use, page 5, M.1. (May 20, 2015); North Carolina Department of Public Safety, Prisons, Policy & Procedures, General, B.0300 Inmate Conduct Rules (y)(2) (July 10, 2013).

We further propose to include language necessary to enable the Bureau to target and eliminate inmates' use of fund transfer services like CashApp. When inmates use these services to send and receive money, Bureau staff are unable to monitor those transfers. CashApp and similar applications employ encryption technology that enables inmates to avoid detection, allowing them to use these platforms for unlawful purposes such as money laundering. Without the ability to closely monitor fund transfers using CashApp and similar applications, Bureau staff are unable to advise and assist other federal, state, and local law enforcement entities with identifying criminal or potentially criminal activity in which a particular inmate is engaged. Thus, inclusion of this language will provide us with a tool to disincentive an inmate's use of these fund transfer services and to hold inmates accountable for violating the prohibition against such use.

Addition of code 195, regarding use of video visits to commit or aid in the commission of a criminal act or any other Greatest category prohibited act.

We propose to add a Greatest Severity Level prohibited act code (195) for use

of video visits to commit or aid in the commission of a criminal act or any other Greatest category prohibited act. The Bureau adds this code to account for advances in technology that have allowed for the use of video visiting by inmates as an alternative to telephonic communication and visiting room visitation. This code is necessary to discipline for infractions similarly to current code 196, "use of the mail for an illegal purpose or to commit or further a Greatest category prohibited act;" and 197, "use of the telephone for an illegal purpose or to commit or further a Greatest category prohibited act."

Expansion of code 196, regarding use of the mail for an illegal purpose.

Current code 196 allows for discipline for use of the mail for an illegal purpose or to commit or further a Greatest category prohibited act. We propose to expand this code to include misuse of any form of electronic mail and messaging, including messaging through the TRULINCS system. The Bureau makes this addition to account for advances in technology that have allowed for the use of electronic mail by inmates as an alternative to written correspondence and telephone communication. This change is necessary to discipline for infractions similarly to current code 196, "use of the mail for an illegal purpose or to commit or further a Greatest category prohibited act;" and 197, "use of the telephone for an illegal purpose or to commit or further a Greatest category prohibited act."

Clarification of code 201, regarding fighting.

We propose to modify this code to clarify that the term "fighting" is defined as a hostile physical or verbal encounter between two or more persons. This is more descriptive than the previous code description, which was simply "fighting with another person." No other changes are made in the substance or application of this code.

Addition of code 202, regarding possession of forms used in fraudulent filing.

We propose to create a new code 202 prohibiting possession of any forms that may be used in the fraudulent filing of Uniform Commercial Code (UCC) liens and prohibiting any attempt to publicly disclose the private information of others for unlawful purposes.

For several years, inmates have been filing fraudulent liens against Bureau staff, typically alleging that a particular Bureau staff member is financially indebted to the inmate because of something the Bureau staff did or did not do. Inmates frequently file these

liens under the purported authority of the UCC, which has been adopted by most states.

Under the UCC, a creditor files a financing statement with the required state office. This financing statement creates a lien. To remove the lien, the creditor must file a formal amendment. When Bureau legal staff learn that a lien has been filed against a staff member, they file a demand letter requesting to have the lien removed. If the inmate refuses to remove the lien, the Bureau staff may file a document contesting the lien. Specifically, the UCC provides a debtor the opportunity to file a correction on a record that is believed to be inaccurately or wrongfully filed. The filing of a correction statement does not invalidate the original financing statement but does serve to alert anyone searching the records for the debtor's name that this financing statement is contested.

Filing fraudulent liens or attempting to disclose the private information of others is prohibited by the Court Security Improvement Act of 2007 (Pub. L. 110-177, Jan. 7, 2008). That Act added two new provisions to the Federal Criminal Code: 18 U.S.C. 1521, which established a criminal offense for filing, attempting to file, or conspiring to file, a false lien or encumbrance against the real or personal property of a Federal Judge or Federal law enforcement officer; and 18 U.S.C. 119, which established a criminal offense for making publicly available "restricted personal information" about a covered person" with the intent to threaten, intimidate, or incite a crime of violence against such person. Such information, as defined in that section, includes an individual's Social Security number, home address, home phone number, mobile phone number, personal email, or home fax number. The definition of "covered persons" in 18 U.S.C. 119(b)(2) includes court officers, jurors, witnesses, informants, and Federal law enforcement officers, which includes Bureau of Prisons staff.

The Bureau's current regulations explain, in 28 CFR 500.1(h), that contraband is material prohibited by law, regulation, or policy that can reasonably be expected to cause physical injury or adversely affect the safety, security or good order of the facility or protection of the public. The filing of fraudulent liens and the possession of documents that contain another's restricted personal information impacts the security and good order of Bureau facilities.

Federal courts have upheld prohibition of UCC forms and documents related to UCC filings, as

contraband. For instance, in *Edmonds v. Sobina*, 296 F. App'x 214 (3d Cir. 2008), the court held that discipline imposed upon a federal inmate in unauthorized possession of UCC filing forms did not implicate any constitutionally protected liberty interest. 296 F. App'x 217–18. The court upheld the Bureau's policy of restricting possession of such items as contraband, indicating that this restriction did not violate the inmate's First Amendment right to possess legal materials. *Id.*; see also *Monroe v. Beard*, 536 F.3d 198 at 207–09 (3d Cir. 2008) (upholding Pennsylvania DOC prohibition of UCC forms, indicating that possession of such forms “demonstrates the considerable ‘ripple effect’ that accommodating the plaintiff's right to possess these items may have on DOC resources and on guards and DOC employees if other inmates were to successfully file false liens.”); *Dantzler v. Beard*, No. 09–275, 2010 WL 1008294, *10 (W.D. Pa. Mar. 15, 2010) (Pennsylvania Department of Corrections confiscation of an inmate's UCC materials “did not violate his procedural due process rights because, as a matter of law, Plaintiff has no property rights in UCC materials.”); *Lawson v. Stephens*, No. 7:15–173, 2018 WL 10731584, at *1 (N.D. Tex. June 22, 2018) (Texas Department of Correction policy restricting inmate possession of UCC materials “does not violate plaintiff's First Amendment right to possess legal materials”); *Torres v. Fla. Dep't of Corr.*, 742 F. App'x 403 (11th Cir. 2018) (Florida Department of Corrections “rule permitting confiscation of inmate's UCC forms was reasonably related to legitimate penological interest in preventing prisoners from filing fraudulent UCC liens, and thus the rule did not violate inmate's First Amendment rights.”).

Additionally, in *United States v. Martin*, 356 F. Supp. 2d 621 (W.D. Va. 2005), the court held that imposition of a permanent injunction barring federal inmates from filing financing statement or liens without prior court approval was warranted, where inmates had filed meritless financing statements against federal judges and Bureau officials for purpose of intimidation and harassment, and where inmates continued to try to file liens against other federal officials involved in their cases after the government filed suit. *Id.* at 628–29.

For these reasons, the Bureau now proposes to prohibit inmate possession of any forms that may be used in the fraudulent filing of UCC liens and any attempt to publicly disclose the private information of others for unlawful purposes.

Clarification of code 203, regarding threatening.

Current code 203 prohibits threatening another with bodily harm or any other offense. The Bureau now proposes to modify this code to clarify the prohibited conduct as communicating an intent to jeopardize the safety, security, and orderly operation of a Bureau facility, protection of the public, or the person or property of another. No substantive or application changes are made to this code.

Clarification of code 204, regarding extortion and blackmail.

Current code 204 prohibits extortion; blackmail; protection; demanding or receiving money or anything of value in return for protection against others, to avoid bodily harm, or under threat of informing. The Bureau now proposes to modify this code to clarify the prohibited conduct as extortion, blackmail, or otherwise demanding or receiving anything of value using actual or threatened force, violence, fear, or intimidation. No change is made to the substance or application of this rule.

Reservation of code 205, regarding sexual acts.

We propose to delete this code as explained above.

Reservation of code 206, regarding making sexual proposals or threats to another.

We propose to delete this code as explained above.

Addition of code 210, regarding possession of sexually explicit material.

We propose to create a new code 210 prohibiting possession of sexually explicit material. Possession of sexually explicit and sexually provocative images, writings, or other materials can pose a danger to the security of the institution. Also, the presence of these materials in Bureau facilities creates a sexualized work environment, which is potentially disturbing to staff conducting routine searches of inmate property. This is particularly a concern when inmates openly display sexually provocative images in their cells. Furthermore, this is also a concern for inmates under specific correctional management plans relating to sexual offenses or under treatment for disorders related to sexual dysfunction, as ongoing possession of sexually explicit images or documents is a risk factor for recidivism and counterproductive to rehabilitation.

Current Bureau regulations in 28 CFR part 540 prohibit inmates from receiving sexually explicit material. See, e.g., 28 CFR 540.14(d)(7) (correspondence may be rejected if it is “[s]exually explicit material (for example, personal

photographs) which by its nature or content poses a threat to an individual's personal safety or security, or to institution good order”); 28 CFR 540.71(b)(7) (an incoming publication may be rejected if it “is sexually explicit material which by its nature or content poses a threat to the security, good order, or discipline of the institution, or facilitates criminal activity.”).

Additionally, 28 CFR 540.72 explains the statutory restriction requiring return of commercially published information or material that is sexually explicit or features nudity. This derives from repeated Congressional mandates against making such information or material available to inmates. See 18 U.S.C. 4042 note (“Sexually Explicit Commercially Published Material”).² In section 540.72(b)(4), “sexually explicit” is defined as “a pictorial depiction of actual or simulated sexual acts including sexual intercourse, oral sex, or masturbation.”

As indicated above in relation to revised code 114, the Bureau recognizes the definition of “sexually explicit conduct” in 18 U.S.C. 2256(2)(A), which is as follows:

. . . “sexually explicit conduct” means actual or simulated—

- (i) sexual intercourse, including genital-genital, oral-genital, anal-genital, or oral-anal, whether between persons of the same or opposite sex;
- (ii) bestiality;
- (iii) masturbation;
- (iv) sadistic or masochistic abuse; or
- (v) lascivious exhibition of the anus, genitals, or pubic area of any person;

As indicated, the Bureau defines “materials” as any pictorial depiction, to include photos, drawings, digitally or computer-manipulated image, or other visual depictions (*i.e.*, collages, posters). Therefore, this code seeks to prohibit inmate possession of visual depictions of actual or simulated sexual

² Public Law 107–77, Title VI, sec. 614, Nov. 28, 2001, 115 Stat. 801, provided that:

Hereafter, none of the funds appropriated or otherwise made available to the Federal Bureau of Prisons may be used to distribute or make available any commercially published information or material to a prisoner when it is made known to the Federal official having authority to obligate or expend such funds that such information or material is sexually explicit or features nudity.

Similar provisions were contained in the following prior Appropriations Acts:

Public Law 106–553, § 1(a)(2) [§ 614], Dec. 21, 2000, 114 Stat. 2762A–106.

Public Law 106–113, Div. B, § 1000(a)(1) [Title VI, § 615], Nov. 29, 1999, 113 Stat. 1501A–54.

Public Law 105–277, Div. A, § 101(b) [Title VI, § 614], Oct. 21, 1998, 112 Stat. 2681–113.

Public Law 105–119, Title VI, § 614, Nov. 26, 1997, 111 Stat. 2518.

Public Law 104–208, Div. A, § 101(a) [Title VI, § 614], Sept. 30, 1996, 110 Stat. 3009–66.

intercourse, bestiality, masturbation, sadistic or masochistic abuse, or lascivious exhibition of the anus, genitals, or pubic area of any person.

By adding this code, we seek to reduce currently prohibited behaviors to clarify that the possession of sexually explicit material poses a potential harm to staff by creating and maintaining a sexually hostile work environment, and to the community when sexual offenders persist in conduct contrary to rehabilitation goals.

Combination of current code 212, regarding group demonstrations; current High Severity Level code 213, encouraging others to refuse to work or to participate in a work stoppage; and current Moderate Severity Level code 336, circulating a petition.

We propose to combine current code 212, regarding group demonstrations, current High Severity Level code 213, encouraging others to refuse to work or to participate in a work stoppage, and current Moderate Severity Level code 336, circulating a petition. Each of these codes describes prohibited conduct which may be described as participating in or promoting others to participate in unauthorized conduct as a group. Therefore, we propose to create a new code 212, which would prohibit participating or promoting others to participate with two or more persons in unauthorized behavior, whether planned or unplanned (including, but not limited to, unauthorized work stoppage or refusal to work or eat, group demonstrations, sit-ins, creating or circulating a petition, etc.).

Prohibiting participation by two or more inmates in authorized behavior, such as circulating petitions, for instance, to maintain control over group activity by prisoners is a reasonable response to a legitimate penological concern. See *Duamutef v. O'Keefe*, 98 F.3d 22, 24 (2d Cir. 1996) (explaining that as long as individual grievance procedures are available, prisons may bar circulation of petitions); *Wolfel v. Morris*, 972 F.2d 712, 716 (6th Cir. 1992) (“[I]t seems clear that a prison does not violate a prisoner’s rights by refusing to allow circulation of petitions.”). If the group behavior is coupled with a demonstrated and evidenced threat to the safety, security, or good order of the facility or protection of the public, the penological concern is heightened and the necessity of disciplining such activity is even greater.

The appropriate, legally authorized method for inmates to formally grieve prison conditions is through the Administrative Remedy Program, described in 28 CFR part 542. Under this Program, every inmate can raise

individual complaints and receive three levels of review (at the institution, Region, and Central Office levels).

Inmate petitions, group demonstrations, sit-ins, and other such group behavior are prohibited because these behaviors involve multiple inmates with goals of contravening prison operations and management, and as such, these activities pose a special risk of disruption that does not exist through the sanctioned, individual administrative remedy complaint system. Such unauthorized group conduct threatens the safety, security, and good order of the facility and the protection of the public. This behavior not only poses serious security risks, but also undermines the effectiveness and legitimacy of the Administrative Remedy Program

Clarification of code 216, regarding giving or offering an official or staff member a bribe, or anything of value.

We propose to make a minor modification to this code to clarify that the prohibited conduct is giving or offering a staff member something of value to persuade or induce favor or action, not simply giving anything of value without such an expectation. This is a more accurate statement of the problematic conduct. We do not propose to make substantive or application changes to this code.

Clarification of code 218, regarding destroying property.

Currently, code 218 prohibits destroying, altering, or damaging government property, or the property of another person, having a value in excess of \$100.00, or destroying, altering, damaging life-safety devices (e.g., fire alarm) regardless of financial value. We propose to make minor edits to the language of this code to clarify that the prohibited conduct is destroying, altering, or damaging any of the following: property valued over \$100.00 belonging to the government or another person; or property necessary for the protection of life and/or safety (e.g., fire alarms), regardless of financial value. This proposal does not make substantive changes or changes in application of the code.

Modification of code 219, regarding stealing and theft (including data obtained through the unauthorized use or access to any media or equipment on which electronic data is stored).

We propose to modify High Severity Level prohibited act code 219 regarding stealing and theft to include theft of data obtained through unauthorized use or access to any media or equipment on which electronic data is stored. Inmates have previously been able to compromise certain electronic storage

systems to obtain unauthorized information to “check the paperwork” of other inmates—i.e., to find out confidential information about another inmate for the purpose of targeting that inmate based on that confidential information. Targeting of other inmates based on this confidential information, in turn, presents safety and security concerns for inmates and staff due to the possibility of violence or other unlawful acts being committed upon the inmate whose confidential information was stolen.

Modification of code 221, regarding being in an unauthorized area with a person of the opposite sex without staff permission.

We propose to modify the High Severity Level prohibited act code 221, being in an unauthorized area with a person of the opposite sex without staff permission, to clarify that inmates will be disciplined for being in an unauthorized area without staff permission with any other person, regardless of sex. This is a more accurate statement of the prohibited conduct and will not change the application of this code.

Modification of code 224, regarding assault that does not involve serious physical injury.

Currently, this code prohibits assaulting any person, but also contains a parenthetical explanation that the code should only be used when “less serious physical injury or contact has been attempted or accomplished.” Rather than leave it to the discretion of staff to determine whether injuries are “less serious,” we propose to modify this code to prohibit an assault of any person that does not involve serious physical injury, including non-consensual touching.

We also propose this modification to more clearly distinguish the behavior prohibited by this code, which is in the High Severity Level category, from the proposed revision to Greatest Severity Level code 101, which prohibits assault and/or battery of any person involving serious physical injury, or an armed assault on the institution’s secure perimeter.

The revised code 224 also prohibits non-consensual touching, which is currently encompassed by code 229, sexual assault of any person, involving non-consensual touching without force or threat of force. Code 229 will be reserved, as this prohibited conduct is proposed to be encompassed by revised code 224 and possibly revised code 114.

Modification of code 228, regarding tattooing or self-mutilation.

We propose to modify the High Severity Level prohibited act code 228,

tattooing or self-mutilation, to clarify that inmates will be disciplined for body modification, including but not limited to tattooing and piercing, and possession of any paraphernalia and/or tools for the use of any form of body modification. The code description will also include the caveat that this code shall not be applied to acts of self-directed violence (e.g., cutting).

This addition reflects the seriousness of the conduct, the disruptive nature of possession of such items, and the potential health concerns resulting from improper use. However, we also add the caveat that this code is not to be used in any instance involving self-directed violence or harm. This clarification reflects the Bureau's recognition that an inmate's mental health symptoms, including acute symptoms of withdrawal from drugs or other addictive substances, should not result in disciplinary sanctions.

Reservation of code 229, regarding sexual assault of any person, involving non-consensual touching without force or threat of force.

We propose to delete this code as explained above.

Addition of code 230, regarding possession and/or use of tobacco or related paraphernalia.

Currently, code 331 allows for discipline for possession, manufacture, introduction, or loss of a non-hazardous tool," including "smoking apparatus and tobacco in any form where prohibited . . ." [Emphasis added]. We propose to remove the phrase "smoking apparatus and tobacco in any form where prohibited" and transfer it into new code 230. We also propose to clarify that smoking apparatus and tobacco in any form may include, but is not limited to, such items as vape devices and other non-conventional forms of delivery.

Increasing the severity level of possession and/or use of tobacco or related paraphernalia underscores the seriousness of the offense. This is necessary because since the last revision of the prohibited act codes, 28 CFR 551.163 codified the prohibition of possession of smoking apparatus and tobacco in any form, unless as part of an authorized religious activity.

Furthermore, since the last revision of this code, the use of alternate forms of delivery, such as vape pens, has become more prevalent among inmates in Bureau facilities, leading to further introduction of this type of prohibited contraband and increased security issues.

Modification of code 231, regarding requesting, demanding, pressuring, or otherwise intentionally creating a

situation, which causes an inmate to produce or display his/her own court documents for any unauthorized purpose to another inmate.

We propose to make two modifications to code 231. We first propose to amend the language of the offense code to more accurately focus on the coercive behavior involved when an inmate seeks to obtain another inmate's personal court documents and information for unauthorized purposes. We also propose to include language clarifying that some documents beyond "court documents" should be included as part of this code. Sensitive information about a particular inmate (including Walsh Act information) may appear on court documents or on non-court documents, including, but not limited to, PATTERN scoresheets. We therefore propose to revise the code to clarify that the prohibited conduct is requesting, demanding, pressuring, or otherwise creating a situation that causes an inmate to produce or display their own court documents or other documents (e.g., PATTERN scoresheets) that contain information about the inmate's current or prior offense(s) for any unauthorized purpose to another inmate.

Addition of code 232, regarding introduction of any unauthorized non-hazardous item or contraband.

We propose to add a new High Severity Level prohibited act code 232, to underscore the seriousness of introducing unauthorized items (i.e., contraband) into a correctional setting. Introduction of unauthorized items cannot be monitored for their potential in creating a hazardous environment for both staff and inmates; even seemingly harmless, non-Bureau-purchased items like cosmetic products or cleaning supplies may contain harmful chemicals or other dangerous substances that pose health, safety, and security risks to all individuals within the correctional setting.

Another institutional security consideration involves the unintended consequences of introduction of certain contraband into a correctional facility, including the creation or perpetuation of an unauthorized series of financial transactions. One example includes an inmate obtaining cosmetic items and dietary supplements and then marking up the price substantially to sell to other inmates who are unable to purchase such items through the official commissary. Then, the inmate who purchases the contraband from another inmate may owe a debt, which, if left unpaid, can create the precise type of volatile situation that may cause

violence to erupt and risk the safety of both inmates and staff.

This new code is designed to thwart contraband introduction and minimize the risks to the health and safety of Bureau inmates, staff, and members of the public.

Addition of code 235, regarding communicating gang affiliation, participating in gang-related activities, and possession of paraphernalia indicating gang affiliation.

We propose to increase the severity level of current code 335, communicating gang affiliation, participating in gang-related activities, or possession of paraphernalia indicating gang affiliation, from the Moderate Severity Level category to the High Severity Level category. This change is proposed to underscore the seriousness of the offense, as the existence of gangs jeopardizes the safety, security, and good order of Bureau facilities.

Addition of code 294, regarding unauthorized use of social media.

We propose to create a new High Severity Level prohibited act code (294) for accessing, using, or maintaining social media, or directing others to establish or maintain social media accounts on the inmate's behalf (including, but not limited to the following: Facebook, Twitter, Instagram, Snapchat, TikTok, etc. or any successor). In contrast to proposed code 194, code 294 acts will *not* involve commission or aid in the commission of any criminal act or any Greatest category prohibited act.

Addition of code 295, regarding use of video visits for abuses other than criminal activity.

We propose to create a new High Severity Level prohibited act code which prohibits use of video visits for abuses other than criminal activity, including, but not limited to, conduct that circumvents established video visit session monitoring procedures; conduct that permits communication with individuals other than the authorized visitors; conduct that would be unauthorized if it were to occur in an in-person visiting room; or use of the video session to commit or further another High category prohibited act.

We propose the addition of this code to deter abuses of any video visiting system in place at a Bureau facility, such as sharing passwords, not logging off the system, nudity; and/or use of visual and/or verbal communicated actions by the inmate or approved contact such as hand/body gestures outside of general sign language. General sign language is not limited to American Sign language and includes

“home signs”—*i.e.*, communicative gestures invented or created by a Deaf person within their own family—as well as other visual or tactual communication forms that might be used by certified Deaf interpreters or other individuals who are Deaf or Hard of Hearing. General sign language does not include gang signs/signals, sexual acts/gestures/innuendos, prohibited substance/drug use, etc.

The Bureau adds this code to account for advances in technology that have allowed for the use of video visiting by inmates as an alternative to telephonic communication and visiting room visitation. This code is necessary for infractions similar to those addressed by codes 296 and 297, which address similar conduct for use of the mail and telephone for such abuses “other than criminal activity which circumvent” monitoring or to “commit or further a High category prohibited act.”

Expansion of code 296, regarding use of the mail for abuses other than criminal activity.

Current code 296 allows for discipline for use of the mail for abuses other than criminal activity that circumvent mail monitoring procedures (*e.g.*, use of the mail to commit or further a High category prohibited act, special mail abuse; writing letters in code; directing others to send, sending, or receiving a letter or mail through unauthorized means; sending mail for other inmates without authorization; sending correspondence to a specific address with directions or intent to have the correspondence sent to an unauthorized person; and using a fictitious return address in an attempt to send or receive unauthorized correspondence).

We propose to expand this code to include misuse of any form of electronic mail and messaging, including, but not limited to, messaging through the TRULINCS system. The Bureau makes this addition to account for advances in technology that have allowed for the use of electronic mail by inmates as an alternative to written correspondence and telephone communication. This change is necessary to discipline for infractions similarly to current code 296, and 297, “Use of the telephone for abuses other than illegal activity which circumvent the ability of staff to monitor frequency of telephone use, content of the call, or the number called; or to commit or further a High category prohibited act.”

Reservation of code 300, regarding indecent exposure.

We propose to delete this code as explained above.

Clarification of code 313, regarding lying or providing a false statement to a staff member.

We propose to modify this code to clarify that the prohibited conduct is providing a false statement to a staff member and includes feigning illness. This is a more accurate description of the prohibited behavior. Adding feigning illness to this code will serve to deter false inmate reports of illness, which not only subvert the inmate’s rehabilitative programming requirements, but also have the potential to unnecessarily burden both staff and medical professionals and cause unnecessary expenditures.

Combination of code 324, regarding gambling, with code 325, preparing and conducting a gambling pool, and code 326, possession of gambling paraphernalia.

We propose to combine these three codes into one code 324, describing the prohibited conduct as gambling, possession of gambling paraphernalia, or preparing or conducting a gambling pool. The previous separation of these three types of conduct was unnecessary, as the conduct described is interconnected.

Clarification of code 331 to remove reference to smoking “where prohibited.”

Currently, code 331 prohibits possession, manufacture, introduction, or loss of a non-hazardous tool, equipment, supplies, or other non-hazardous contraband (tools not likely to be used in an escape or escape attempt, or to serve as a weapon capable of doing serious bodily harm to others, or not hazardous to institutional security or personal safety) (other non-hazardous contraband includes such items as food, cosmetics, cleaning supplies, *smoking apparatus and tobacco in any form where prohibited*, and unauthorized nutritional/dietary supplements)” [Emphasis added].

We propose to remove the phrase “smoking apparatus and tobacco in any form where prohibited” and increase the severity level of this prohibited conduct to create High Severity code 230. We also eliminate/delete code 332—Smoking where prohibited, because smoking apparatus is prohibited and smoking is functionally disallowed for inmates unless part of an authorized religious activity. See 28 CFR 551.162–.163.

We also propose to streamline the conduct description in this code to prohibit possession, manufacture or loss of a non-hazardous *item* or contraband, further explaining in the parenthetical that the term “non-hazardous item or contraband” includes, but is not limited

to, items not likely to be used in an escape; items not likely to serve as a weapon capable of doing serious bodily harm to others; items not hazardous to institutional security or personal safety; unauthorized food, cosmetics, cleaning supplies, and unauthorized nutritional/dietary supplements.

Reservation of code 332, regarding smoking where prohibited.

We propose to delete this code as explained above.

Reservation of code 335, regarding communicating gang affiliation; participating in gang related activities; possession of paraphernalia indicating gang affiliation.

We propose to delete this code as explained above.

Addition of code 337, increasing severity level for code 404, regarding using abusive or obscene language.

We propose to increase the severity level of Low Severity Level code 404, using abusive or obscene language, to Moderate Severity Level prohibited act code 338. This code will be moved to the 300 level because, as will be explained below, we propose to eliminate the Low Severity Level prohibited act code (400) series entirely. We note that this code does not apply to use of abusive or obscene language uttered or written by an inmate with a relevant disability (*e.g.*, Tourette Syndrome).”

Addition of code 338, increasing severity level for codes 407 & 409, regarding conduct with a visitor in violation of Bureau regulations and unauthorized physical contact (e.g., kissing, embracing).

We propose to increase the severity level of Low Severity Level code 407 and 409 for inappropriate conduct in the visiting room. These codes would combine to become Moderate Severity Level prohibited act code 338, “unauthorized conduct in the visiting room (*e.g.*, kissing, embracing, etc.).” Also, as explained below, we propose to eliminate the Low Severity Level prohibited act code (400) series entirely. These changes will be further explained below.

Addition of electronic mail to code 396, regarding use of the mail for abuses other than criminal activity.

Current code 396 allows for discipline for use of the mail for abuses other than criminal activity that do not circumvent mail monitoring; or use of the mail to commit or further a Moderate category prohibited act. We propose to add “electronic mail” to this code to account for advances in technology that have allowed for the use of electronic mail by inmates as an alternative to written correspondence and telephone

communication. The term “electronic mail” shall include any form of electronic mail and messaging, including, but not limited to, messaging through the TRULINCS system. This change is necessary for infractions similar to those addressed by code 396, for misuse of the mail.

Reservation of code 397, regarding use of the telephone for abuses other than illegal activity which do not circumvent the ability of staff to monitor frequency of telephone use, content of the call, or the number called; or to commit or further a Moderate category prohibited act.

We propose to delete this prohibited act code because it has been misused to prohibit conduct that actually has already circumvented the ability of staff to monitor telephone use, rather than activity that has the potential to circumvent monitoring.

This code had been misunderstood as a less-severe version of code 297, which allows for discipline of conduct that circumvents monitoring for an illegal purpose. Inmates have been identified as having committed prohibited acts that would result in circumvention of telephone monitoring but did not actually result in circumvention of monitoring. These inmates were then downgraded or shown leniency by being charged with a 397-level code instead of the appropriate 297-level code. For this reason, we eliminate the 397 code to avoid confusion and to clarify that inmates should be disciplined for any conduct that may circumvent the ability of staff to monitor communications, regardless of whether monitoring is actually circumvented.

Reservation of the Low Severity Level prohibited act codes (400 series).

We propose to delete the Low Severity Level prohibited act code (400) series entirely. Currently, there are six active codes listed, which we propose to remove for the following reasons:

“402 Malingering, feigning illness.” We propose to remove this prohibited

act code because malingering does not typically require disciplinary action. However, because feigning an illness equates to lying or providing a false statement to a staff member, we have incorporated that portion of this code into code 313 above.

“404 Using abusive or obscene language.” As described earlier, we propose to increase the severity level of Low Severity Level code 404, using abusive or obscene language, to Moderate Severity Level prohibited act code 337. Further, because we have significantly reduced the level of disciplinary segregation sanction that may be imposed for the Moderate Severity Level prohibited act codes, it must be noted that moving this conduct from the “Low” to the “Moderate” category does not change the severity of potential sanctions that may be imposed. Further, staff will be instructed that the inmate’s level of misconduct must be greater than that previously triggering an incident report for a “Low” prohibited act code.

“407 Conduct with a visitor in violation of Bureau regulations” and “409 Unauthorized physical contact (e.g., kissing, embracing).” As described earlier, we propose to increase the severity level of Low Severity Level code 407 and 409 for inappropriate conduct in the visiting room. These codes would combine to become Moderate Severity Level prohibited act code 338, “unauthorized conduct in the visiting room (e.g., kissing, embracing, etc.).”

Because we have significantly reduced the level of disciplinary segregation sanction that may be imposed for the Moderate Severity Level prohibited act codes, it must be noted that moving this conduct from the “Low” to the “Moderate” category does not change the severity of potential sanctions that may be imposed. Because we increase the seriousness of the offense, staff will be instructed that the inmate’s level of misconduct must be

greater than that previously triggering an incident report for either of the two previous 400-level “Low” prohibited act codes.

“498 Interfering with a staff member in the performance of duties most like another Low Severity prohibited act” and “499 Conduct which disrupts or interferes with the security or orderly running of the institution or the Bureau of Prisons most like another Low Severity prohibited act.” Both of these codes indicate that they are “to be used only when another charge of Low Severity is not accurate. The offending conduct must be charged as ‘most like’ one of the listed Low Severity prohibited acts.” We propose to eliminate these codes because they are vague and because the conduct described is more accurately specified by other codes listed in the Greatest, High, and Moderate Severity prohibited act codes.

Because we propose to delete the Low Severity Level, we likewise propose to delete language relating to the Low Severity Level in Table 2 to § 541.3—Additional Available Sanctions for Repeated Prohibited Acts Within the Same Severity Level.

Modifications to the disciplinary segregation sanction.

In the mid-2000s, the Bureau experienced a spike in prison violence, including the murder of a correctional officer. In response, the Bureau implemented several additional measures, including harsher penalties for inmates who violated disciplinary rules. In particular, this approach resulted in regulation changes that increased the length of maximum possible time for the penalties of disciplinary segregation time (75 FR 76263, December 8, 2010; effective on March 1, 2011).

Maximum terms of segregation under current Bureau regulations are as follows:

Severity level	First offense	Subsequent offense(s) (days)
Greatest (100)	12 months (365 days)	545
High (200)	6 months (180 days)	365
Moderate (300)	3 months (90 days)	180
Low (400)	Not permitted	30

After 2011, the Bureau experienced a decline in its restrictive housing population, which coincided with a reduction in inmate-on-staff assaults at

Bureau facilities. The chart below compares the number of inmates in segregation to the total prison population between January 2012 and

August 2021, illustrating the decline in restrictive housing population.

OVERVIEW OF BUREAU’S RESTRICTIVE HOUSING
 [Adapted from Bureau’s SENTRY Recordkeeping System]

Type of housing	01/28/12	08/05/21	Change	
			Total reduction	% Decline
All Bureau inmates	175,244	138,235	37,009	21.12
Total in Restrictive Housing	13,196	10,236	2,960	22.43
Special Housing Units (SHU)	11,106	9,361	1,745	15.71
Special Management Unit (SMU)	1,647	533	1,114	67.64
Administrative Maximum (ADX)	443	342	101	22.80

As a result of the decline in imposition of the disciplinary segregation sanction, the Report recommended that the Bureau reduce the maximum time an inmate can be placed in segregation as a sanction for

a disciplinary infraction. The Report recommended elimination of the disciplinary segregation sanction for all 400-level prohibited acts, and for an inmate’s first adjudicated violation of all 300-level prohibited acts, and that the

Bureau reclassify some 300-level prohibited acts as 200-level acts due to the more serious nature of these offenses. The following chart illustrates the recommendations of the Report:

Offense type	Current maximum penalties		Proposed maximum penalties	
	First offense (days)	Subsequent (days)	First offense (days)	Subsequent (days)
100-Level	365	545	60	90
200-Level (High)	180	365	30	60
300-Level	0	180	0	15
400-Level (Low)	0	30		

Therefore, the Bureau now proposes that maximum penalties for disciplinary segregation sanctions for Greatest, High, and Moderate prohibited act codes be decreased as suggested in the Report (see chart above). This would effectively undo the change to disciplinary segregation sanction maximums made by the final rule of 2011.

This change would result in changes to 28 CFR 541.3, Table 1 to § 541.3—Prohibited Acts and Available Sanctions, in the “Available Sanctions” listed for each severity level prohibited acts category. The disciplinary segregation sanction is listed in each “Available Sanctions” sub-table as item C. and would be modified according to the chart shown above. Likewise, 28 CFR 541.3 Table 2 to § 541.3—Additional Available Sanctions for Repeated Prohibited Acts Within the Same Severity Level, would be similarly modified to reflect the chart shown above.

Changes to Loss of Privilege Sanctions.

In 28 CFR 541.3 Table 1 to § 541.3—Prohibited Acts and Available Sanctions, each severity level of prohibited act codes is followed by a table listing available sanctions that may be imposed on inmates if they are found to have committed those acts by DHOs. One such sanction found in each table is the “loss of privileges” sanction. In each “available sanctions” list, the “loss of privileges” sanction is followed by a

descriptive parenthetical, as follows: “Loss of privileges (e.g., visiting, telephone, commissary, movies, recreation).”

We now propose to add to that descriptive parenthetical the following additional examples of privileges that may be removed as a potential sanction: video visits, electronic device(s), and the use of electronic mail and messaging of any kind, including, but not limited to, through the TRULINCS system. We add these terms to accommodate advances in technology and to clarify that the Bureau views these items as privileges for inmates. However, the Bureau emphasizes that none of these sanctions should affect an inmate’s right to counsel and the ability of an inmate to meet or otherwise communicate with counsel. Accordingly, the Bureau clarifies that no employee may impose as a sanction any measure whatsoever that restricts an inmate’s right of access to counsel.

Amendments to Table 2 to § 541.3—Additional Available Sanctions for Repeated Prohibited Acts Within the Same Severity Level.

In addition to eliminating references to Low Severity Level (400-series) prohibited acts as described above, we propose the following changes to Table 2: First, we propose to change second column heading from “Time period for prior offense (same code)” to “Time period for Prior Offense (same severity level).” We make this change because it

has been misinterpreted as applying only to commission of the same specific code conduct. Instead, the application is intended to apply to commission of any prior offense within the same severity level as the first or second offense. In other words, if an inmate was found to have violated code 396, some staff mistakenly assumed that if the same inmate then violated code 334, the available sanctions in the table would not apply. This proposed change is meant to clarify that if an inmate is found to have committed a prohibited act in any severity level, and then commits any other prohibited act within the same severity level, whether it is the same actual code number or not, the inmate may be subject to additional sanctions for this additional prohibited conduct.

Second, we modify the time periods for additional available sanctions in each severity level to decrease the amount of disciplinary segregation time, as described above.

Third, to correct an oversight in changes made to conform to the requirements of the First Step Act of 2018, we amend Table 2 to indicate that if an inmate commits the same Moderate Severity Level (300-series) offense, thereby violating the same prohibited act code within six months, up to seven days of FSA Earned Time Credits may be forfeited; and if an inmate commits a third violation of the same Moderate Severity Level prohibited act code

within six months, the inmate may forfeit up to fourteen days of FSA Earned Time Credits. This amendment is consistent with the Bureau's regulations regarding FSA Earned Time Credit, as published at 87 FR 2705 (Jan. 19, 2022). No substantive changes are made to the sanctions as published in that regulation; rather, language relating to subsequent offenses of the same prohibited act code has been moved from Table 1 to Table 2, which is the correct location.

Amendments to 28 CFR 541.5, regarding the discipline process.

Currently, 28 CFR 541.5(a), describing the incident report, explains that the disciplinary process begins when staff reasonably believe the inmate has committed a prohibited act. We make a minor stylistic edit to the language regarding the composition of the incident report but make no substantive changes to this section. Likewise, we make similar stylistic edits to language in subparagraph (b) describing the investigation process, but do not change the substance of this regulation, or its application.

Amendments to 28 CFR 541.7, regarding unit discipline committee review.

We propose to clarify when the Unit Discipline Committee (UDC) will review the incident report. Currently, 28 CFR 541.7(c) indicates that the UDC ordinarily reviews the incident report "within five work days after it is issued, not counting the day it was issued, weekends, and holidays." Inmates and staff found that description confusing and problematic, due to disparity between the time staff become aware of incidents and when incident reports are actually issued. At times, incident reports cannot be issued immediately for various reasons, including time and attention needed to resolve the situation that led to the incident in question.

Therefore, we propose to clarify that the UDC will ordinarily review the incident report within five work days "after the day staff become aware of the inmate's involvement in the incident, not counting the day staff became aware of the inmate's involvement, weekends, or holidays." This will result in more immediate action and less confusion regarding discipline.

We also propose to make a minor change to 28 CFR 541.7(f), to clarify that the UDC may not impose monetary restitution as a sanction for inmate disciplinary infractions. Subparagraph (f) of 28 CFR 541.7 currently indicates that the UDC may impose "any of the available sanctions listed in Tables 1 and 2, except loss of good conduct sentence credit, disciplinary

segregation, or monetary fines." We propose to add "monetary restitution" to this list in order to clarify for staff that this is a sanction that may only be imposed at the DHO level. This is not a change to current practice or the substance of regulation, but rather a technical correction.

Clarification of 28 CFR 541.8, regarding hearings by Discipline Hearing Officers.

We make a minor change to the language of 28 CFR 541.8(a)(3) to clarify that the incident report may be referred back to the UDC for further investigation, review, disposition, or other action as recommended or necessary. This more accurately states the purpose of this section, but makes no substantive changes or changes in application.

II. Regulatory Analyses

Executive Orders 12866, 13563, and 14094 (Regulatory Review)

The Department has determined that this rulemaking is a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, but it is not a section 3(f)(1) significant action. Accordingly, this proposed rule has been submitted to the Office of Management and Budget ("OMB") for review. This proposed rule has been drafted and reviewed in accordance with Executive Order 12866, "Regulatory Planning and Review," section 1(b), Principles of Regulation; in accordance with Executive Order 13563, "Improving Regulation and Regulatory Review," section 1(b), General Principles of Regulation, and in accordance with Executive Order 14094, "Modernizing Regulatory Review".

Executive Order 12988 (Plain Language)

This proposed rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988, "Civil Justice Reform."

Executive Order 13132 (Federalism)

This regulation will not have substantial direct effects on the States, on the relationship between the national government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, under Executive Order 13132, we determine that this regulation does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Regulatory Flexibility Act

The Director of the Bureau of Prisons, under the Regulatory Flexibility Act (5

U.S.C. 605(b)), reviewed this regulation and certifies that it will not have a significant economic impact upon a substantial number of small entities for the following reasons: This regulation pertains to the correctional management of inmates committed to the custody of the Attorney General or the Director of the Bureau of Prisons. Its economic impact is limited to the Bureau's appropriated funds.

Since January 2012, the Bureau has reduced the total number of inmates in restrictive housing by nearly 25 percent. The Department estimates that the changes made by this proposed rule will result in additional substantial reductions in the Bureau's restrictive housing population. Although it is impossible to quantify the exact size of the future reductions, the Department notes that other state and local correctional systems implementing reforms, including those jurisdictions discussed earlier in this Report, have reported reductions in their restrictive housing populations in recent years by nearly 50 percent or more.

Unfunded Mandates Reform Act of 1995

This regulation will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Congressional Review Act

This rule is not a major rule as defined by 5 U.S.C. 804 of the Congressional Review Act. This regulation will not result in an annual effect on the economy of \$100,000,000 or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

List of Subjects in 28 CFR Part 541

Prisoners.

Colette S. Peters,

Director, Federal Bureau of Prisons.

Under rulemaking authority vested in the Attorney General in 5 U.S.C. 301; 28 U.S.C. 509, 510 and delegated to the Director, Bureau of Prisons, we propose to amend 28 CFR part 541 as follows:

PART 541—INMATE DISCIPLINE AND SPECIAL HOUSING UNITS

■ 1. The authority citation for part 541 continues to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 3621, 3622, 3624, 4001, 4042, 4081, 4082 (Repealed in part as to offenses committed on or after November 1, 1987), 4161–4166 (Repealed as to offenses committed on or after November 1, 1987), 5006–5024 (Repealed October 12, 1984 as to offenses committed after that date), 5039; 28 U.S.C. 509, 510.

Subpart A—Inmate Discipline Program

■ 2. Revise § 541.1 to read as follows:

§ 541.1 Purpose.

(a) Nothing in this subpart shall be construed to create a private right of action or otherwise permit civil claims for alleged violations.

(b) The purpose of the inmate discipline program is to help ensure the safety, security, and orderly operation of correctional facilities, and the protection of the public, by sanctioning inmates who commit prohibited acts.

(c) The purpose of this subpart is to describe the inmate discipline program of the Federal Bureau of Prisons (Bureau), authorized by 18 U.S.C. 4042(a)(3), and to ensure that disciplinary sanctions will not be imposed in a capricious or retaliatory manner.

(d) Consistent with the Rehabilitation Act of 1973, for all discipline cases, the Unit Discipline Committee or Disciplinary Hearing Officer shall consider the individual inmate's mental health and disabilities when determining the appropriateness of sanctions.

■ 3. Revise § 541.2 to read as follows:

§ 541.2 Application.

(a) Staff authorized to implement the Inmate Discipline Program. For the purposes of this subpart, “staff” means staff authorized by the Bureau to implement the inmate discipline program as described in this subpart. Residential Reentry Center employees are staff authorized to implement the Inmate Discipline Program.

(b) Application of the Inmate Discipline Program. This program applies to sentenced and unsentenced inmates in:

- (1) Bureau custody; and
- (2) Any prison, institution, or facility, including community confinement facilities, in which persons are held in custody by direction of, or under an agreement with, the Bureau of Prisons.

■ 4. Revise § 541.3 to read as follows:

§ 541.3 Prohibited acts and available sanctions.

(a) *Prohibited acts.* The list of prohibited acts is divided into three separate categories based on severity: Greatest; High; and Moderate.

(b) *Available sanctions.* The list of available sanctions for committing prohibited acts is listed in Table 1 to this section—Prohibited Acts and Available Sanctions. If you commit repetitive prohibited acts, we can impose increased sanctions, as listed in Table 2 to this section—Additional Available Sanctions for Repeated Prohibited Acts Within the Same Severity Level. No Bureau employee may impose as a sanction any measure whatsoever that restricts an inmate's right of access to counsel.

Table 1 to § 541.3—Prohibited Acts and Available Sanctions

Greatest Severity Level Prohibited Acts

101 An attempted or accomplished assault and/or battery of any person involving serious physical injury, or an armed assault on the institution's secure perimeter.

102 Escape (unauthorized departure from custody), including, but not limited to, any of the following: unauthorized departure from the buildings, lands, property or perimeter (inside or outside) of any secure or non-secure facility; unauthorized departure from community confinement, work detail, program or activity (whether escorted or unescorted); and unauthorized departure from any authorized location regardless of electronic monitoring devices.

103 Causing ignition or combustion (including, but not limited to, fire or explosion) which threatens serious bodily harm; or is done in furtherance of another Greatest Severity Level prohibited act.

104 Possession, manufacture, or introduction of any item that has been weaponized (including, but not limited to, firearms, sharpened instruments, unauthorized blades, explosives, ammunition, unauthorized chemicals, or any other item that has been modified in order to be used as a weapon).

105 Rioting; promoting rioting; or encouraging others to participate in a riot (“riot” is defined as a disturbance with two or more people which involves violence or threats of violence or damage to government property, for the purpose of preventing or coercing official action).

106 (Not to be used).

107 Taking hostage(s).

108 Use, possession, manufacture, introduction, or loss of a hazardous

item, including, but not limited to, items which may facilitate escape; cause serious bodily harm to others; or are otherwise hazardous to institutional security or personal safety (e.g., hacksaw blade, body armor, maps which could facilitate escape, handmade rope, or other escape paraphernalia, portable telephone, pager, other electronic device or items necessary in the use of these devices).

109 (Not to be used).

110 Refusing to provide a urine sample or take part in any narcotics or drug testing.

111 Introduction or manufacture of any narcotics, marijuana, drugs, or related paraphernalia, not prescribed for the individual by authorized medical staff.

112 Use of any narcotics, marijuana, drugs, or related paraphernalia, not prescribed for the individual by authorized medical staff.

113 Possession of any narcotics, marijuana, drugs, or related paraphernalia, not currently prescribed for the individual by authorized medical staff.

114 Sexually explicit conduct involving force, threat of force, or threat of harm; or sexually explicit conduct without consent or through coercion; or attempts thereof. This definition encompasses, but is not limited to, conduct that rises to the level of assault and sexually explicit conduct that staff have observed and instructed an inmate to cease. The term “sexually explicit conduct” means actual or simulated—

(i) sexual intercourse, including genital-genital, oral-genital, anal-genital, or oral-anal, whether between persons of the same or opposite sex;

(ii) bestiality;

(iii) masturbation;

(iv) sadistic or masochistic abuse; or

(v) lascivious exhibition of the anus, genitals, or pubic area of any person.

115 Destroying and/or disposing of any item during a search or attempt to search.

116 Refusing to breathe into a breathalyzer or take part in any alcohol or intoxicant testing.

117 Introduction or manufacture of any alcohol, intoxicants, or related paraphernalia not prescribed for the individual by authorized medical staff.

118 Use of any alcohol, intoxicants, or related paraphernalia not currently prescribed for the individual by authorized medical staff.

119 Possession of any alcohol, intoxicants, or related paraphernalia not currently prescribed for the individual by authorized medical staff.

194 Accessing, using, or maintaining social media accounts (including, but

not limited to the following: Facebook, Twitter, Instagram, Snapchat, TikTok, etc.), or directing others to establish or maintain social media accounts on the inmate's behalf for the purpose of committing or aiding in the commission of a criminal act; of committing or aiding in the commission of any Greatest category prohibited act; or of circumventing authorized communications monitoring for the purpose of committing or aiding in the commission of a criminal act or of any Greatest category prohibited act. This code also prohibits inmates' use of fund transfer services such as CashApp, as explained in more detail below.

195 Use of video visits to commit or aid in the commission of a criminal act or any Greatest category prohibited act.

196 Use of the mail or any form of electronic mail and messaging (including messaging through the TRULINCS system), for an illegal purpose or to commit or further a Greatest Severity Level prohibited act.

197 Use of the telephone for an illegal purpose or to commit or further a Greatest category prohibited act.

198 Interfering with a staff member in the performance of duties most like another Greatest severity prohibited act. This charge is to be used only when another charge of Greatest severity is not accurate. The offending conduct must be charged as "most like" one of the listed Greatest severity prohibited acts.

199 Conduct which disrupts or interferes with the security or orderly running of the institution or the Bureau of Prisons most like another Greatest severity prohibited act. This charge is to be used only when another charge of Greatest severity is not accurate. The offending conduct must be charged as "most like" one of the listed Greatest severity prohibited acts.

Available Sanctions for Greatest Severity Level Prohibited Acts

A. Recommend parole date rescission or retardation.

B. Forfeit and/or withhold earned statutory good time or non-vested good conduct time (up to 100%) and/or terminate or disallow extra good time (an extra good time or good conduct time sanction may not be suspended).

B.1. Disallow ordinarily between 50% and 75% (27–41 days) of good conduct time credit available for year (a good conduct time sanction may not be suspended).

B.2 Forfeit up to 41 days of earned First Step Act (FSA) Time Credits (see 28 CFR part 523, subpart E) for each prohibited act committed.

C. Disciplinary segregation (up to 60 days).

D. Make monetary restitution.

E. Monetary fine.

F. Loss of privileges (e.g., visiting, video visits, telephone, commissary, movies, recreation, electronic device(s), electronic mail, electronic messaging through the TRULINCS system).

G. Change housing (quarters).

H. Remove from program and/or group activity.

I. Loss of job.

J. Impound inmate's personal property.

K. Confiscate contraband.

L. Restrict to quarters.

M. Extra duty.

High Severity Level Prohibited Acts

200 (Not to be used).

201 Fighting, defined as a hostile physical or verbal encounter between two or more persons.

202 Possession of any forms that may be used in the fraudulent filing of Uniform Commercial Code liens, or attempting to publicly disclose the private information of others for unlawful purposes.

203 Communicating intent to jeopardize the safety, security, and orderly operation of a Bureau facility, the public, or the person or property of another.

204 Extortion, blackmail, or otherwise demanding or receiving anything of value through use of actual or threatened force, violence, fear, or intimidation.

205 (Not to be used).

206 (Not to be used).

207 Wearing a disguise or a mask.

208 Possession of any unauthorized locking device, or lock pick, or tampering with or blocking any lock device (includes keys), or destroying, altering, interfering with, improperly using, or damaging any security device, mechanism, or procedure.

209 Adulteration of any food or drink.

210 Possession of sexually explicit material.

211 Possessing any officer's or staff clothing.

212 Participating or promoting others to participate with two or more persons in unauthorized behavior, whether planned or unplanned (including, but not limited to, group demonstrations, sit-ins, refusing to eat, creating or circulating a petition, refusal to work, work stoppage, etc.).

213 (Not to be used).

214 (Not to be used).

215 (Not to be used).

216 Giving or offering a staff member something of value to persuade or induce favor or action.

217 Giving money to, or receiving money from, any person for the purpose

of introducing contraband or any other illegal or prohibited purpose.

218 Destroying, altering, or damaging any of the following: property valued over \$100.00 belonging to the government or another person; property necessary for the protection of life and/or safety (e.g., fire alarms), regardless of financial value.

219 Stealing; theft (including data obtained through the unauthorized use or access to any media or equipment on which electronic data is stored).

220 Demonstrating, practicing, or using martial arts, boxing (except for use of a punching bag), wrestling, or other forms of physical encounter, or military exercises or drill (except for drill authorized by staff).

221 Being in an unauthorized area with another person without staff permission.

222 (Not to be used).

223 (Not to be used).

224 An assault of any person not involving serious physical injury, including non-consensual touching.

225 Stalking another person through repeated behavior which harasses, alarms, or annoys the person, after having been previously warned to stop such conduct.

226 Possession of stolen property.

227 Refusing to participate in a required physical test or examination unrelated to testing for drug abuse (e.g., DNA, HIV, tuberculosis).

228 Body modification (including, but not limited to tattooing and piercing); and possession of any paraphernalia and/or tools for the use of any form of body modification.) This code shall not be applied to acts of self-directed violence (e.g., cutting), nor shall it apply to any instance in which an inmate self-directs violence or harm.

229 (Not to be used).

230 Possession or use of smoking apparatus and tobacco in any form (including, but not limited to, vape devices and other non-conventional forms of delivery), or related paraphernalia.

231 Requesting, demanding, or pressuring an inmate to produce or display his/her own court documents or other documents (e.g., PATTERN scoresheets) that contain information about the inmate's current or prior offense(s) for any unauthorized purpose to another inmate.

232 Introduction of any unauthorized non-hazardous item or contraband. ("Non-hazardous items or contraband" include, but are not limited to, items not likely to facilitate escape; cause serious bodily harm to others; or otherwise be hazardous to institutional security or personal safety, e.g., food,

cosmetics, cleaning supplies, unauthorized nutritional/dietary supplements.)

235 Communicating gang affiliation; participating in gang related activities; possession of paraphernalia indicating gang affiliation.

294 Accessing, using, or maintaining social media, or directing others to establish or maintain social media accounts on the inmate's behalf (including, but not limited to the following: Facebook, Twitter, Instagram, Snapchat, TikTok, etc. or any successor).

295 Use of video visits for abuses other than criminal activity, including, but not limited to, conduct which circumvents established video visit session monitoring procedures; conduct which permits communication with individuals other than the authorized visitors; conduct which would be unauthorized if it were to occur in an in-person visiting room; or use of the video session to commit or further a High category prohibited act.

296 Use of the mail, including electronic mail and messaging (e.g., messaging through the TRULINCS system) for abuses other than criminal activity which circumvent mail monitoring procedures (e.g., use of the mail or email to commit or further a High category prohibited act, special mail abuse; writing letters or messages in code; directing others to send, sending, or receiving a letter, mail or email through unauthorized means; sending mail or email for other inmates without authorization; sending correspondence to a specific address or forwarding service with directions to have the correspondence forwarded; and using a fictitious return address in an attempt to send or receive unauthorized correspondence).

297 Use of the telephone for abuses other than illegal activity which circumvent the ability of staff to monitor frequency of telephone use, content of the call, or the number called; or to commit or further a High category prohibited act.

298 Interfering with a staff member in the performance of duties most like another High severity prohibited act. This charge is to be used only when another charge of High severity is not accurate. The offending conduct must be charged as "most like" one of the listed High severity prohibited acts.

299 Conduct which disrupts or interferes with the security or orderly running of the institution or the Bureau of Prisons most like another High severity prohibited act. This charge is to be used only when another charge of High severity is not accurate. The

offending conduct must be charged as "most like" one of the listed High severity prohibited acts.

Available Sanctions for High Severity Level Prohibited Acts

A. Recommend parole date rescission or retardation.

B. Forfeit and/or withhold earned statutory good time or non-vested good conduct time up to 50% or up to 60 days, whichever is less, and/or terminate or disallow extra good time (an extra good time or good conduct time sanction may not be suspended).

B.1 Disallow ordinarily between 25% and 50% (14–27 days) of good conduct time credit available for year (a good conduct time sanction may not be suspended).

B.2 Forfeit up to 27 days of earned FSA Time Credits for each prohibited act committed.

C. Disciplinary segregation (up to 30 days).

D. Make monetary restitution.

E. Monetary fine.

F. Loss of privileges (e.g., visiting, video visits, telephone, commissary, movies, recreation, electronic device(s), electronic mail, electronic mail and messaging through the TRULINCS system).

G. Change housing (quarters).

H. Remove from program and/or group activity.

I. Loss of job.

J. Impound inmate's personal property.

K. Confiscate contraband.

L. Restrict to quarters.

M. Extra duty.

Moderate Severity Level Prohibited Acts

300 (Not to be used).

301 (Not to be used).

302 Misuse of authorized medication.

303 Possession of money or currency, unless specifically authorized, or in excess of the amount authorized.

304 Loaning of property or anything of value for profit or increased return.

305 Possession of anything not authorized for retention or receipt by the inmate, and not issued to him through regular channels.

306 Refusing to work or to accept a program assignment.

307 Refusing to obey an order of any staff member (may be categorized and charged in terms of greater severity, according to the nature of the order being disobeyed, e.g., failure to obey an order which furthers a riot would be charged as 105, Rioting; refusing to obey an order which furthers a fight would be charged as 201, Fighting; refusing to

provide a urine sample when ordered as part of a drug-abuse test would be charged as 110).

308 Violating a condition of a furlough.

309 Violating a condition of a community program.

310 Unexcused absence from work or any program assignment.

311 Failing to perform work as instructed by the supervisor.

312 Insolence towards a staff member.

313 Providing a false statement to a staff member, to include feigning illness.

314 Counterfeiting, forging, or unauthorized reproduction of any document, article of identification, money, security, or official paper (may be categorized in terms of greater severity according to the nature of the item being reproduced, e.g., counterfeiting release papers to effect escape, Code 102).

315 Participating in an unauthorized meeting or gathering.

316 Being in an unauthorized area without staff authorization.

317 Failure to follow safety or sanitation regulations (including safety regulations, chemical instructions, tools, MSDS sheets, OSHA standards).

318 Using any equipment or machinery without staff authorization.

319 Using any equipment or machinery contrary to instructions or posted safety standards.

320 Failing to stand count.

321 Interfering with the taking of count.

322 (Not to be used).

323 (Not to be used).

324 Gambling; possession of gambling paraphernalia; or preparing or conducting a gambling pool.

325 (Not to be used).

326 (Not to be used).

327 Unauthorized contacts with the public.

328 Giving money or anything of value to, or accepting money or anything of value from, another inmate or any other person without staff authorization.

329 Destroying, altering, or damaging government property, or the property of another person, having a value of \$100.00 or less.

330 Being unsanitary or untidy; failing to keep one's person or quarters in accordance with posted standards.

331 Possession, manufacture, or loss of a non-hazardous item or contraband ("non-hazardous item or contraband" includes, but is not limited to, items not likely to be used in an escape; items not likely to serve as a weapon capable of doing serious bodily harm to others;

items not hazardous to institutional security or personal safety; unauthorized food, cosmetics, cleaning supplies, and unauthorized nutritional/dietary supplements).

332 (Not to be used).

333 Fraudulent or deceptive completion of a skills test (e.g., cheating on a GED, or other educational or vocational skills test).

334 Conducting a business; conducting or directing an investment transaction without staff authorization.

335 (Not to be used).

336 (Not to be used).

337 Using obscene or abusive language directed at another person or people.

338 Unauthorized conduct in the visiting room (e.g., kissing, embracing, etc.).

396 Use of the mail, including electronic mail and messaging, for abuses other than criminal activity which do not circumvent mail or email monitoring; or use of the mail or email to commit or further a Moderate category prohibited act.

397 (Not to be used).

398 Interfering with a staff member in the performance of duties most like another Moderate severity prohibited act. This charge is to be used only when another charge of Moderate severity is not accurate. The offending conduct must be charged as “most like” one of the listed Moderate severity prohibited acts.

399 Conduct which disrupts or interferes with the security or orderly running of the institution or the Bureau of Prisons most like another Moderate severity prohibited act. This charge is to be used only when another charge of Moderate severity is not accurate. The offending conduct must be charged as “most like” one of the listed Moderate severity prohibited acts.

Available Sanctions for Moderate Severity Level Prohibited Acts

A. Recommend parole date rescission or retardation.

B. Forfeit and/or withhold earned statutory good time or non-vested good conduct time up to 25% or up to 30 days, whichever is less, and/or terminate or disallow extra good time

(an extra good time or good conduct time sanction may not be suspended).

B.1 Disallow ordinarily up to 25% (1–14 days) of good conduct time credit available for year (a good conduct time sanction may not be suspended).

B.2 Forfeit up to 27 days of earned FSA Time Credits for each prohibited act committed.

C. Disciplinary segregation (up to 15 days).

D. Make monetary restitution.

E. Monetary fine.

F. Loss of privileges (e.g., visiting, video visits, telephone, commissary, movies, recreation, electronic device(s), electronic mail, electronic mail and messaging through the TRULINCS system).

G. Change housing (quarters).

H. Remove from program and/or group activity.

I. Loss of job.

J. Impound inmate’s personal property.

K. Confiscate contraband.

L. Restrict to quarters.

M. Extra duty.

Low Severity Level Prohibited Acts

(None).

Available Sanctions for Low Severity Level Prohibited Acts

(None).

TABLE 2 TO § 541.3—ADDITIONAL AVAILABLE SANCTIONS FOR REPEATED PROHIBITED ACTS WITHIN THE SAME SEVERITY LEVEL

Prohibited act severity level	Time period for prior offense (same severity level) (months)	Frequency of repeated offense	Additional available sanctions
Moderate Severity (300 level).	6	2nd offense	1. Disciplinary segregation (up to 15 days). 2. Forfeit earned SGT or non-vested GCT up to 371/2% or up to 45 days, whichever is less, and/or terminate or disallow EGT (an EGT sanction may not be suspended). 3. Forfeit up to 7 days of earned FSA Time Credits (only where the inmate is found to have committed a second violation of the same prohibited act within 6 months).
		3rd or more offense within 6 months.	1. Any available High Severity Level sanction (200 series). 2. Forfeit up to 14 days of FSA Time Credits (only where the inmate is found to have committed a third violation of the same prohibited act within 6 months).
High Severity (200 level).	10	2nd offense	1. Disciplinary segregation (up to 60 days). 2. Forfeit earned SGT or non-vested GCT up to 75% or up to 90 days, whichever is less, and/or terminate or disallow EGT (an EGT sanction may not be suspended).
		3rd or more offense.	Any available Greatest severity level sanction (100 series).
Greatest Severity (100 level).	24	2nd or more offense.	Disciplinary segregation (up to 90 days).

§ 541.4 [Amended]

■ 5. Amend § 541.4 by removing paragraph (b)(4).

■ 6. Amend § 541.5 by revising paragraphs (a), (b) introductory text, (b)(2) and (3) to read as follows:

§ 541.5 Discipline process.

(a) *Incident report.* The discipline process starts when staff witness or

reasonably believe that you committed a prohibited act. An incident report describing the incident and the prohibited act(s) you are charged with committing will be issued to you, which you will ordinarily receive within 24 hours of staff becoming aware of your involvement in the incident.

(b) *Investigation.* After you receive an incident report, it will be investigated.

* * * * *

(2) *Statement.* When asked for your statement, you may give an explanation of the incident, request any witnesses be interviewed, or request that other evidence be obtained and reviewed. However, the investigation of the incident report may be suspended before requesting your statement if it is being investigated for possible criminal prosecution.

(3) *Informally resolving the incident report.* The incident report may be informally resolved at any stage of the disciplinary process, for Moderate Severity Level prohibited acts, or as otherwise required by law or these regulations. The incident report will not be removed from your discipline records, unless it is informally resolved or expunged.

■ 7. Amend § 541.7 by revising the section introductory text, paragraphs (c) and (f) to read as follows:

§ 541.7 Unit Discipline Committee (UDC) review of the incident report.

A Unit Discipline Committee (UDC) will review the incident report once the investigation is complete. The UDC's review involves the following:

* * * * *

(c) *Timing.* The UDC will ordinarily review the incident report within five work days after the day staff became aware of the inmate's involvement in the incident, not counting the day staff become aware of the inmate's involvement, weekends, or holidays. UDC review of the incident report may also be suspended if it is being investigated for possible criminal prosecution.

* * * * *

(f) *Sanctions.* If you committed a prohibited act(s), the UDC can impose any of the available sanctions listed in Tables 1 and 2, except loss of good conduct sentence credit, FSA Time Credits, disciplinary segregation, monetary restitution, or monetary fines.

* * * * *

■ 8. Amend § 541.8 by revising paragraph (a)(3) to read as follows:

§ 541.8 Discipline Hearing Officer (DHO) hearing.

* * * * *

(a) * * *
* * * * *

(3) The incident report will be referred back for further investigation, review, disposition, or other action as recommended or necessary.

* * * * *

BILLING CODE 4410-05-P

DEPARTMENT OF EDUCATION

34 CFR Chapter VI

[ED-2024-OPE-0002]

Proposed Priorities, Requirements, and Definition—Augustus F. Hawkins Centers of Excellence Program

AGENCY: Office of Postsecondary Education, Department of Education.

ACTION: Proposed priorities, requirements, and definition.

SUMMARY: The Department of Education (Department) proposes priorities, requirements, and definition for use in the Augustus F. Hawkins Centers of Excellence (Hawkins) Program, Assistance Listing Number 84.428A. The Department may use one or more of these priorities, requirements, and definition for competitions in fiscal year (FY) 2024 and later years. We intend for these priorities, requirements, and definition to help increase the number of, and retain, well-prepared teachers from diverse backgrounds, resulting in a more diverse teacher workforce prepared to teach in our Nation's underserved elementary and secondary schools and close student opportunity and achievement gaps.

DATES: We must receive your comments on or before March 4, 2024.

ADDRESSES: Comments must be submitted via the Federal eRulemaking Portal at www.regulations.gov. However, if you require an accommodation or cannot otherwise submit your comments via www.regulations.gov, please contact one of the program contact persons listed under **FOR**

FURTHER INFORMATION CONTACT. The Department will not accept comments submitted by fax or by email, or comments submitted after the comment period closes. To ensure the Department does not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

Federal eRulemaking Portal: Go to www.regulations.gov to submit your comments electronically. Information on using Regulations.gov, including instructions for accessing agency

documents, submitting comments, and viewing the docket, is available on the site under "FAQ."

Note: The Department's policy is generally to make comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at www.regulations.gov. Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: Dr. Vicki Robinson, U.S. Department of Education, 400 Maryland Avenue SW, 5th Floor, Washington, DC 20202. Telephone: (202) 453-7907. Email: Vicki.Robinson@ed.gov. You may also contact Ashley Hillary, U.S. Department of Education, 400 Maryland Avenue SW, 5th floor, Washington, DC 20202. Telephone: (202) 453-7880. Email: Ashley.Hillary@ed.gov.

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7-1-1.

SUPPLEMENTARY INFORMATION:

Invitation to Comment: We invite you to submit comments regarding the proposed priorities, requirements, and definition. To ensure that your comments have maximum effect in developing the final priorities, requirements, and definition, we urge you to identify clearly the specific section of the proposed priorities, requirements, and definition that each comment addresses.

We invite you to assist us in complying with the specific requirements of Executive Orders 12866, 13563, and 14094 and their overall requirement of reducing regulatory burden that might result from these proposed priorities, requirements, and definition. Please let us know of any further ways we could reduce potential costs or increase potential benefits while preserving the effective and efficient administration of the program.

During and after the comment period, you may inspect public comments about the proposed priorities, requirements, and definition by accessing Regulations.gov. To inspect comments in person, please contact one of the persons listed under **FOR FURTHER INFORMATION CONTACT.**

Assistance to Individuals with Disabilities in Reviewing the Rulemaking Record: On request we will provide an appropriate accommodation or auxiliary aid to an individual with a disability who needs assistance to review the comments or other

documents in the public rulemaking record for these proposed priorities, requirements, and definition. If you want to schedule an appointment for this type of accommodation or auxiliary aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Purpose of Program: The Hawkins Program, authorized under part B of title II of the Higher Education Act of 1965, as amended (HEA), is designed to support comprehensive, high-quality State-accredited teacher preparation programs by creating centers of excellence at Historically Black Colleges and Universities (HBCUs); Tribal Colleges or Universities (TCUs); or Minority Serving Institutions (MSIs), such as Hispanic-Serving Institutions (HSIs). The Hawkins Program will help increase the number of, and retain, well-prepared teachers from diverse backgrounds, resulting in a more diverse teacher workforce prepared to teach in our Nation's highest-need elementary and secondary schools and close student opportunity and achievement gaps. This program focuses on the various aspects of the teacher preparation pipeline, including the recruitment, preparation, support, placement, and retention and retraining of teachers for and in high-need schools to support underserved students. Through this program, the Secretary seeks to fund applicants that propose to incorporate evidence-based practices into their teacher preparation program.

Program Authority: 20 U.S.C. 1033–1033a.

Proposed Priorities

Background: There is significant inequity in students' access to well-prepared, experienced, and effective teachers,¹ particularly for students from low-income backgrounds, students of color, children or students with disabilities, and English learners (ELs).² Providing all students with consistent access to a well-prepared, effective, and diverse educator workforce who provide high-quality instruction and support to all children and youth is essential to closing opportunity and achievement gaps. Teachers who entered the profession through the least comprehensive teacher preparation pathway are two to three times more

likely to leave their school or the profession compared to those who entered through a comprehensive pathway.³ Research demonstrates that high rates of turnover harm student achievement,⁴ and that the quality of a school's leadership is among the most important predictors of teacher turnover, with more effective principals being more likely to retain their best teachers.⁵

The Hawkins Program is critical in enabling the Department to meet its goal of supporting a diverse teacher workforce to improve student opportunities, achievement and outcomes, and address the educator shortage, by providing expanded access to comprehensive, high-quality, and affordable educator preparation programs. To increase and retain the number of well-prepared teachers from diverse backgrounds, and improve their preparation, recruitment, retention and placement, the Department proposes the following three priorities. We may use one or more of these priorities in any year in which this program is in effect.

Proposed Priority 1: Increase Evidence-Based, Comprehensive Pre-service Clinical Experiences Through Teacher Preparation Programs.

Background: The Department proposes this priority to assist centers of excellence at eligible institutions of higher education (IHEs) in expanding their pre-service clinical experiences through comprehensive teacher preparation programs. The priority would advance comprehensive, high-quality teacher preparation by creating partnerships with local high-need districts and schools, in order to form meaningful clinical practice partnerships and help address teacher shortages. These clinical practice partnerships can both provide a preparation opportunity and serve as a pathway to hiring well-prepared teacher candidates from backgrounds that are underrepresented in the profession, including teacher candidates of color. High-quality, evidence-based clinical experience can also lead to increased teacher retention as research

³ Ingersoll, R., & May, H. (2011). Recruitment, retention and the minority teacher shortage. CPRE Research Report #RR-69. Philadelphia, PA: Consortium for Policy Research in Education, University of Pennsylvania.

⁴ Carver-Thomas, D., and Darling-Hammond, L. (2017). Teacher Turnover: Why It Matters and What We Can Do About It, Learning Policy Institute, <https://learningpolicyinstitute.org/product/teacher-turnover-report>.

⁵ Grissom, J. (2018). Strong principals retain effective teachers—and don't retain ineffective ones, The Brookings Institution, <https://www.brookings.edu/articles/strong-principals-retain-effective-teachers-and-dont-retain-ineffective-ones/>.

demonstrates that teachers prepared in classrooms similar to those they teach in after graduation are more likely to remain in the classroom.⁶ Furthermore, extensive, high-quality, evidence-based, clinical experience is one of three “aspects of preparation that have the highest potential for effects on outcomes for students.”⁷

There are several ways educator preparation programs can partner with school districts and schools to provide these kinds of clinical experiences. For example, a number of school districts are partnering with teacher preparation programs to provide clinical experiences that are mutually beneficial for teacher candidates and teachers of record, and their students. Teacher candidates, in addition to completing the required elements of evidence-based clinical experience, may also serve in schools in roles that support students and teachers as their academic schedules allow and as they complete their other requirements for teacher certification. Teacher residencies and Grow Your Own programs, which may be supported through registered teacher apprenticeship programs, can support teacher candidates serving in these roles and cover the costs associated with extensive clinical experience. Other examples of educator preparation programs supporting high need schools in this way can be found here: www.ed.gov/coronavirus/factsheets/teacher-shortage.

Proposed Priority 1:

To meet this priority, an eligible applicant must propose projects that are evidence-based (as defined in 34 CFR 77.1) comprehensive teacher preparation programs that provide extensive clinical experience. Applicants with existing programs must describe their record in graduating highly skilled, well-prepared, and diverse teachers and describe how the proposed project will refine or enhance existing programs. Applicants proposing new programs must describe how their new program is evidence-based and designed to achieve the intended outcomes of the Hawkins Program. Applicants must also address how they will—

(a) Examine the sources of inequity and inadequacy in resources and

² www.ed.gov/raisethebar/Eliminating-Educator-Shortages-through-Increasing-Educator-Diversity.

opportunity and implement pedagogical practices in teacher preparation programs that are inclusive with regard to race, ethnicity, culture, language, gender, and disability status and that prepare teachers to create inclusive, supportive, equitable, unbiased, and identity-safe learning environments for their students;

(b) Prepare teacher candidates to integrate rigorous academic content, including through the effective use of technology, and instructional techniques and strategies consistent with universal design for learning principles;

(c) Prepare teacher candidates to design and deliver instruction in ways that are engaging and provide their students with opportunities to think critically and solve complex problems, apply learning in authentic and real-world settings, communicate and collaborate effectively, and develop growth mindsets. Teacher candidate pedagogy should include how to incorporate project-based, work-based, or other experiential learning opportunities in curriculum development;

(d) Prepare teacher candidates to build meaningful and trusting relationships with students and their families to support in-home, community-based, and in-school learning; and

(e) Provide sustained and high-quality pre-service clinical experiences, including teaching assistant initiatives, that facilitate the pathway to the teaching credential for those with paraprofessional experience or high-quality school leader induction and support in the first three years of school leadership for principals and other school leaders. In providing such experiences, applicants must consider opportunities to provide pre-service clinical experience earlier in the teacher preparation program, as is practicable, and in ways that benefit students and teachers. These clinical experiences must be designed to—

(1) Integrate pedagogy and classroom practice and promote effective teaching skills in academic content areas;

(2) Be tightly aligned with course work with clear, relevant, and strong links between theory and practice;

(3) Group teacher candidates in cohorts to facilitate reflection of practice and professional collaboration;

(4) Closely supervise interaction between teacher candidates and faculty, experienced teachers, principals, and other administrators in high-need schools or hard-to-staff schools; and

(5) Provide high-quality-teacher mentoring.

Proposed Priority 2: Projects that are Designed to Increase and Retain the Number of Well-Prepared Teachers from Diverse Backgrounds.

Background: The Department proposes this priority to increase teacher diversity by supporting teacher candidates from backgrounds that are underrepresented in the profession. While the majority of U.S. public school students are children of color,⁸ only 20 percent of teachers are people of color and 40 percent of the Nation's public schools do not have a single teacher of color on record.⁹ Research shows that teachers of color benefit all students and can have a significant positive impact on students of color.¹⁰ When students of color are instructed by teachers of color, higher levels of student achievement,¹¹ student encouragement, students forming aspirations (e.g., through role modeling), teacher recommendations (for example, to gifted and talented programs), and rigorous course-taking¹² have all been observed. Research also demonstrates that teachers of color can be positive role models for all students in breaking down negative stereotypes and preparing students to live and work in a multiracial society.¹³ A more diverse teacher workforce also increases the likelihood that students of color will have access to culturally and linguistically relevant teaching and learning and positive relationships.¹⁴ Thus, supporting teachers of color can be a critical strategy for advancing educational equity for students of color and addressing one of the root causes of

⁸ <https://nces.ed.gov/programs/coe/indicator/cge/racial-ethnic-enrollment>.

institutional barriers to equity in the academic environment.¹⁵

Proposed Priority 2:

To meet this priority, applicants must propose projects that are designed to increase the number of well-prepared teachers and the diversity of the teacher workforce with a focus on increasing and retaining a diverse teacher workforce, and improving the preparation, recruitment, retention, and placement of such teachers.

Applicants addressing this priority must describe—

(a) How their project will integrate multiple services or initiatives across academic and student affairs, such as academic advising, counseling, stipends, child-care, structured/guided pathways from teacher candidates' first year in the preparation program through successful employment placement, career services, or student financial aid, such as scholarships, with the goal of increasing program completion and credential attainment;

(b) Their plan for identifying and supporting teacher candidates from backgrounds that are underrepresented in the profession, including teacher candidates of color. This plan must span the beginning of the preparation program through graduation, and include a plan to improve program entry rates, as applicable, graduation rates, passage rates for certification and licensure exams, and rates of successful employment placement between teacher candidate subgroups and an institution's overall teacher candidate population; and

(c) Their proposed initiatives to promote the retention of teachers from backgrounds that are underrepresented in the profession, including teachers of color, prepared through the program, which may include induction programs, such as teacher or school leader induction programs, or mentorship programs that provide school and district leaders with the support they need to persist in their professions.

Proposed Priority 3—Increasing the Number of Bilingual and/or Multilingual Teachers with Full Certification.

Background: The Department proposes this priority to increase teacher diversity by expanding the number of bilingual and multilingual teachers with full teacher certification. In addition to the need for more teachers of color, a parallel challenge in the Nation's public schools lies in the shortage of multilingual teachers prepared to teach a growing population

¹⁵ www2.ed.gov/rschstat/eval/highered/racial-diversity/state-racial-diversity-workforce.pdf.

of English Learners (ELs). ELs are the fastest growing student demographic, with more than ten percent of students identified as ELs currently.¹⁶ Additionally, about one-quarter of all students speak a language other than English at home, whereas only 1 in 8 teachers do.¹⁷ Despite that, more than half of the States nationwide are experiencing bilingual and multilingual teacher shortages and a quarter of the States do not require certification or endorsements for teachers who teach ELs.¹⁸

The bilingual and multilingual teacher shortage has the potential to have a negative impact on all students, but especially ELs. These shortages may be among the reasons why ELs have some of the lowest achievement levels and graduation rates.¹⁹ During the pandemic, ELs were also likely to lose instructional time, thus experiencing setbacks in their language acquisition goals.²⁰ Research demonstrates that ELs who are taught in bilingual settings, such as dual-language immersion programs, by well-prepared bilingual teachers have stronger academic outcomes and better English-language acquisition trajectories than ELs who are taught in English only, which underscores the need to close the multilingual teacher shortage gap.²¹ Additionally, ELs who learn in bilingual settings in which they can maintain their native languages while learning English have stronger social and emotional development, cross-cultural skills, and problem-solving skills.²²

Bilingual and multilingual learning environments can also mitigate linguistic barriers that limit family

engagement, as bilingual and multilingual teachers are more likely to communicate with linguistically diverse families and ensure they have equitable access to learn about their students' education.²³ Bilingual and multilingual teachers' assets are critical to creating inclusive school and family partnerships where linguistically diverse families can meaningfully participate in their child's education.²⁴

Proposed Priority 3:

To meet this priority, applicants must propose projects that are designed to prepare effective and experienced bilingual and/or multilingual teachers for high-need schools by increasing the number of teachers across elementary and secondary schools who are fully certified to provide academic language instruction in a language other than English, including for English Learners (ELs). These projects must prepare teacher candidates to lead students toward linguistic fluency and academic achievement in more than one language. Applicants must describe how—

(a) Their project will integrate multiple services or initiatives across academic and student affairs, such as academic advising, counseling, stipends, child-care, structured/guided pathways from teacher candidates' first year in the preparation program through successful employment placement, career services, and student financial aid, such as scholarships, and provide the necessary knowledge and skills so that teacher candidates can serve students from many different language backgrounds; and

(b) Their plan for recruiting, supporting, and retaining bilingual and/or multilingual teacher candidates, including those who may have a teaching credential but have not been teaching in bilingual and/or multilingual education settings; aspiring teachers; and teaching assistants who are interested in becoming bilingual and/or multilingual teachers.

Types of Priorities

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

²³ Hopkins, M., & Schutz, K.M. (2019). Bilingual teacher leadership: Supporting linguistically responsive practices and parent engagement in schools. *NABE Journal of Research and Practice*, 9(2), 96–109.

²⁴ Newcomer, S.N., & Puzio, K. (2016). "Cultivando confianza": A bilingual community of practice negotiates restrictive language policies. *International Journal of Bilingual Education and Bilingualism*, 19(4), 347–369.

Absolute priority: Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

Proposed Requirements

The Department proposes the following requirements for this program. We may apply one or more of these requirements in any year in which this program is in effect.

Proposed Requirement 1—Draft Written Agreement with Clinical Practice Partner(s).

An applicant must provide a Draft Written Agreement (DWA) that identifies the partnership between: (1) at least one eligible IHE with a state accredited teacher preparation program, and (2) a high-need local educational agency (LEA) or consortium of high-need LEAs, or with a high-need school or consortium of high-need schools. The agreement with partners is intended to ensure that the parties joining the project are committed to fulfilling the purpose of the clinical practice by either creating new partnerships or expanding existing partnerships, and that teacher candidates will not become the teacher of record prior to completing the certification program, including pre-service clinical experience, and, for any candidates who entered the program without a bachelor's degree, obtaining a bachelor's. Grantees will finalize the DWA into a Final Written Agreement (FWA) within 120 days of grant award notification.

Proposed Requirement 2—Supplement-Not-Supplant.

Grant funds must be used so that they supplement and, to the extent practical, increase the funds that would otherwise be available for the activities to be carried out under this grant.

Proposed Requirement 3—Indirect Cost Rate Information.

A grantee's indirect cost reimbursement is limited to 8 percent of a modified total direct cost base. For

Proposed Definition

The Department proposes the following definition for this program. We may apply this definition in any year in which this program is in effect.

Pre-service means the period of training for a person who does not have a prior teaching certification or license and who is enrolled in a State-approved teacher education program at an institution of higher education, prior to becoming the teacher of record.

Final Priorities, Requirements, and Definition

We will announce the final priorities, requirements, and definition in a document in the **Federal Register**. We will determine the final priorities, requirements, and definition after considering public comments on the proposed priorities, requirements, and definition and other information available to the Department. This document does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This document does *not* solicit applications. In any year in which we choose to use one or more of these priorities, requirements, and definition, we invite applications through a notice in the **Federal Register**.

Executive Orders 12866, 13563, and 14094

Regulatory Impact Analysis

Under Executive Order 12866, the Office of Management and Budget (OMB) determines whether this regulatory action is “significant” and, therefore, subject to the requirements of the Executive order and subject to review by OMB. Section 3(f) of Executive Order 12866, as amended by Executive Order 14094, defines a “significant regulatory action” as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of \$200 million or more (adjusted every three years by the Administrator of Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or Tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise legal or policy issues for which centralized review would meaningfully further the President’s priorities, or the principles set forth in this Executive order, as specifically authorized in a timely manner by the Administrator of OIRA in each case.

This proposed regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866, as amended by Executive Order 14094.

We have also reviewed this proposed regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866, as amended by Executive Order 14094. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include “identifying changing future compliance costs that might result from technological

innovation or anticipated behavioral changes.”

We are issuing these proposed priorities, requirements, and definition only on a reasoned determination that their benefits would justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that would maximize net benefits. Based on the analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

The potential costs associated with these priorities, requirements, and definition would be minimal, while the potential benefits are significant. The Department believes that this proposed regulatory action would not impose significant costs on eligible entities. Participation in this program is voluntary, and the costs imposed on applicants by this regulatory action would be limited to paperwork burden related to preparing an application. The potential benefits of implementing the program would outweigh the costs incurred by applicants, and the costs of carrying out activities associated with the application would be paid for with program funds. For these reasons, we have determined that the costs of implementation would not be burdensome for eligible applicants, including small entities.

We also have determined that this regulatory action would not unduly interfere with State, local, and Tribal governments in the exercise of their governmental functions.

In accordance with these Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department’s programs and activities.

Clarity of the Regulations

Executive Order 12866 and the Presidential memorandum “Plain Language in Government Writing” require each agency to write regulations that are easy to understand. The Secretary invites comments on how to make these proposed priorities, requirements, and definition easier to understand, including answers to questions such as the following:

- Are the requirements in the proposed priorities, requirements, and definition clearly stated?
- Do the proposed priorities, requirements, and definition contain technical terms or other wording that interferes with their clarity?

- Does the format of the proposed priorities, requirements, and definition (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce their clarity?

- Would the proposed priorities, requirements, and definition be easier to understand if we divided them into more (but shorter) sections?

- Could the description of the proposed priorities, requirements, and definition in the **SUPPLEMENTARY INFORMATION** section of this preamble be more helpful in making the proposed priorities, requirements, and definition easier to understand? If so, how?

- What else could we do to make the proposed priorities, requirements, and definition easier to understand?

To send any comments that concern how the Department could make these proposed priorities, requirements, and definition easier to understand, see the instructions in the **ADDRESSES** section.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for this program.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed priorities, requirements, and definition would not have a significant economic impact on a substantial number of small entities.

The small entities that this proposed regulatory action would affect are IHEs that meet the eligibility requirements described in section 241(1) of the HEA. The Secretary believes that the costs imposed on applicants by the proposed priorities, requirements, and definition would be limited to paperwork burden related to preparing an application and that the benefits would outweigh any costs incurred by applicants.

Participation in this program is voluntary. For this reason, the proposed priorities, requirements, and definition would impose no burden on small entities unless they applied for funding under the program. We expect that in determining whether to apply for Hawkins Program funds, an eligible applicant would evaluate the requirements of preparing an application and any associated costs, and weigh them against the benefits likely to be achieved by receiving a

Hawkins Program grant. Eligible applicants most likely would apply only if they determine that the likely benefits exceed the costs of preparing an application. The likely benefits include the potential receipt of a grant as well as other benefits that may accrue to an entity through its development of an application, such as the use of that application to seek funding from other sources to address the teacher shortage present in the Nation's high need-need public schools.

This proposed regulatory action would not have a significant economic impact on a small entity once it receives a grant because it would be able to meet the costs of compliance using the funds provided under this program. We invite comments from eligible small entities as to whether they believe this proposed regulatory action would have a significant economic impact on them and, if so, request evidence to support that belief.

Paperwork Reduction Act of 1995

These proposed priorities, requirements, and definition do not contain any information collection requirements.

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at www.govinfo.gov. At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit

your search to documents published by the Department.

BILLING CODE 4000–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2023–0096; FRL–11663–01–R4]

Air Plan Approval; Florida; Revisions to the State Implementation Plan Conformity Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a State Implementation Plan (SIP) revision submitted by the Florida Department of Environmental Protection (FDEP) through a letter dated August 12, 2022. The revision updates the general conformity portion of the conformity rule in Florida's SIP. EPA is proposing to approve these changes pursuant to the Clean Air Act (CAA or Act).

DATES: Comments must be received on or before March 4, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2023–0096 at regulations.gov. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from Regulations.gov. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Josue Ortiz Borrero, Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Mr. Ortiz can be reached via phone number (404) 562–8085 or via electronic mail at ortizborrero.josue@epa.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

General conformity is a requirement of CAA section 176(c). General conformity prohibits Federal actions within nonattainment and maintenance areas unless the emissions from the actions conform to the applicable SIP, Tribal Implementation Plan (TIP), or Federal Implementation Plan (FIP) for the area.¹ Conformity to an implementation plan means conformity to an implementation plan's purpose of eliminating or reducing the severity and number of violations of the national ambient air quality standards (NAAQS or standards) and achieving expeditious attainment of such standards. See section 176(c)(1). Under general conformity, Federal actions cannot: (1) Cause or contribute to any new violation of any standard in any area; (2) increase the frequency or severity of any existing violation of any air quality standard in any area; or (3) delay timely attainment of any standard, any required interim emission reductions, or any other milestones, in any area. *Id.*

EPA promulgated two sets of conformity regulations in November 1993 to implement section 176(c) of the CAA. First, EPA promulgated transportation conformity regulations, which apply to highways and mass transit, on November 24, 1993. See 58 FR 62188. These regulations establish the criteria and procedures for determining whether transportation plans, programs, and projects funded under 23 U.S.C. or the Federal Transit Act (40 U.S.C. chapter 53) conform with implementation plans. EPA subsequently revised the transportation conformity regulations several times.

¹ “Federal action” is defined at 40 CFR 93.152 as “any activity engaged in by a department, agency, or instrumentality of the Federal government, or any activity that a department, agency or instrumentality of the Federal government supports in any way, provides financial assistance for, licenses, permits, or approves, other than activities related to transportation plans, programs, and projects developed, funded, or approved under title 23 U.S.C. or the Federal Transit Act (49 U.S.C. 1601 *et seq.*). Where the Federal action is a permit, license, or other approval for some aspect of a non-Federal undertaking, the relevant activity is the part, portion, or phase of the non-Federal undertaking that requires the Federal permit, license, or approval.”

See 69 FR 40004 (July 1, 2004); 70 FR 24280 (May 6, 2005); 71 FR 12468 (March 10, 2006); and 73 FR 4420 (January 24, 2008). Second, on November 30, 1993, EPA promulgated the general conformity regulations at 40 CFR part 51, subpart W and 40 CFR part 93, subpart B, which applied to all other Federal actions to ensure they conformed with implementation plans. See 58 FR 63214. EPA has revised its general conformity regulations twice. See 71 FR 40420 (July 17, 2006) and 75 FR 17254 (April 5, 2010). As part of the 2010 revisions, EPA revised its general conformity regulations to remove rules from 40 CFR part 51, subpart W that were duplicative of those in 40 CFR part 93, subpart B. See 75 FR 17254 (April 5, 2010).²

Florida Rule 62–204.500, Florida Administrative Code (F.A.C.), *Conformity*, addresses general conformity in paragraph (1). EPA incorporated Rule 62–204.500 into the Florida SIP in a direct final rule on August 11, 2003. See 68 FR 47468. Since then, Florida has amended Rule 62–204.500, and those changes are the subject of this notice of proposed rulemaking (NPRM).³

II. EPA's Analysis of Florida's Submittal

Florida's August 12, 2022, SIP revision updates Rule 62–204.500, *Conformity*. Specifically, the SIP revision changes the “General Conformity” section at paragraph (1) by updating cross-references.

Florida's SIP revision updates two cross-references in paragraph (1) of Rule 62–204.500. Specifically, the revision replaces two cross-references that refer to 40 CFR part 51, subpart W, with references to 40 CFR part 93, subpart B. The SIP-approved version of paragraph (1), states that it applies to state review of all Federal general conformity determinations submitted to the state pursuant to 40 CFR part 51, subpart W. It also states that pursuant to 40 CFR part 51, subpart W, Federal agencies are required to make conformity determinations to ensure that certain Federal actions are consistent with the SIP. As mentioned in Section I of this notice, EPA removed rules from 40 CFR

part 51, subpart W that were duplicative of those in 40 CFR part 93, subpart B. Because the SIP-approved version of Rule 62–204.500 relies on the duplicative rules that EPA removed from 40 CFR part 51, the SIP-approved rule is outdated. EPA is proposing to approve the changes to paragraph (1) because they update the cross-references to the correct location of the implementing requirements for general conformity.

III. Incorporation by Reference

In this document, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, and as discussed in Section II of this preamble, the EPA is proposing to incorporate by reference Florida Rule 62–204.500, F.A.C., *Conformity*, state effective on October 23, 2016, except for 62–204.500(1)(a), 62–204.500(1)(b), 62–204.500(1)(c), and 62–204.500(1)(d). The EPA has made, and will continue to make, the SIP generally available through www.regulations.gov and at the EPA Region 4 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Proposed Action

For the reasons discussed above, EPA is proposing to approve the August 12, 2022, Florida SIP revision updating Rule 62–204.500, *Conformity*, in the Florida SIP.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this proposed action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

² For more information on general conformity, see <https://www.epa.gov/general-conformity>.

³ The August 12, 2022, submittal transmits several changes to other Florida SIP-approved rules. These changes are not addressed in this proposed rulemaking and will be considered by EPA in separate rulemakings. In addition, EPA will not act on subsections 62–204.500(1)(a)–(1)(d), F.A.C., because they were withdrawn from EPA consideration in a letter dated January 5, 2024, which is in the docket for this proposed rulemaking.

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and

- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the proposed rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address “disproportionately high and adverse human health or environmental effects” of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. EPA defines environmental justice (EJ) as “the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.” EPA further defines the term fair treatment to mean that “no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.”

The FDEP did not evaluate EJ considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither

prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in this proposed action. Due to the nature of the action being proposed here, this proposed action is expected to have a neutral to positive impact on the air quality of the affected area. Consideration of EJ is not required as part of this proposed action, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving EJ for people of color, low-income populations, and Indigenous peoples.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Authority: 42 U.S.C. 7401 *et seq.*

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 0, 1, and 16

[GN Docket No. 22–69; FCC 23–100; FR ID 197453]

Implement the Infrastructure Investment and Jobs Act: Prevention and Elimination of Digital Discrimination

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) proposes rules regarding affirmative obligations for broadband providers, through: annual reports that facilitate greater transparency regarding substantial broadband projects recently completed by providers, and internal compliance programs requiring periodic evaluation of the demographics of communities served—and not served—by such recently completed projects, as well as pending and planned substantial projects. The Commission also seeks comment on establishing an Office of Civil Rights.

DATES: Comments are due on or before March 4, 2024, and reply comments are due on or before April 1, 2024. Written comments on the Paperwork Reduction Act proposed information collection requirements must be submitted by the

public and other interested parties on or before April 1, 2024.

ADDRESSES: You may submit comments, identified by GN Docket No. 22–69, by any of the following methods:

- *Federal Communications Commission’s Website:* <http://apps.fcc.gov/ecfs/>. Follow the instructions for submitting comments.

- *People With Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: FCC504@fcc.gov or phone: 202–418–0530 or TTY: 202–418–0432.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document. Send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to PRA@fcc.gov or Nicole.Ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT:

Wireline Competition Bureau, Competition Policy Division, Aurélie Mathieu, at (202) 418–2194, Aurelie.Mathieu@fcc.gov. For additional information concerning the Paperwork Reduction Act information collection requirements contained in this document, send an email to PRA@fcc.gov or contact Nicole Ongele, Nicole.Ongele@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s Further Notice of Proposed Rulemaking (*Further Notice*) in GN Docket No. 22–69, FCC 23–100, adopted on November 15, 2023, and released on November 20, 2023.

The full text of this document is available for download at <https://docs.fcc.gov/public/attachments/FCC-23-100A1.pdf>. To request materials in accessible formats for people with disabilities (*e.g.*, braille, large print, electronic files, audio format, etc.), send an email to FCC504@fcc.gov or call the Consumer & Governmental Affairs Bureau at (202) 418–0530 (voice) or (202) 418–0432 (TTY).

Providing Accountability Through Transparency Act: The Providing Accountability Through Transparency Act, Public Law 118–9, requires each agency, in providing notice of a rulemaking, to post online a brief plain-language summary of the proposed rule. The required summary of this Further Notice of Proposed Rulemaking is available at <https://www.fcc.gov/proposed-rulemakings>.

Initial Paperwork Reduction Act of 1995 Analysis: This document contains proposed information collection requirements. The Commission, as part

of its continuing effort to reduce paperwork burdens, invites the general public to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. Public and agency comments are due April 1, 2024.

Pursuant to §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS). See *Electronic Filing of Documents in Rulemaking Proceedings*, 63 FR 24121 (1998).

- *Electronic Filers*: Comments may be filed electronically using the internet by accessing the ECFS: <http://apps.fcc.gov/ecfs/>.

- *Paper Filers*: Parties who choose to file by paper must file an original and one copy of each filing.

- Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701. U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.

- Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. See *FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy*, Public Notice, DA 20–304 (March 19, 2020), <https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy>.

People With Disabilities: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

The proceeding this document initiates shall be treated as a “permit-but-disclose” proceeding in accordance with the Commission's *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written

presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (e.g., .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

This document may contain potential new or revised information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. Public and agency comments are due April 1, 2024.

Comments should address: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of

information on the respondents, including the use of automated collection techniques or other forms of information technology; and (e) way to further reduce the information collection burden on small business concerns with fewer than 25 employees. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the Commission seeks specific comment on how it might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Synopsis

1. In this *Further Notice* we take additional steps to fulfill our statutory mandate to facilitate equal access to broadband internet access service by preventing digital discrimination of access. We seek further, focused comments on affirmative obligations that might be undertaken by broadband service access providers (providers) to expand broadband access and address possible digital discrimination of access. Our digital discrimination of access rules apply to “covered entities” which is broader than broadband providers, but at this time our proposed annual report and compliance program are limited to broadband providers as defined in 47 CFR 54.1600(b). The proposals in this *Further Notice* complement rules we adopt today by focusing on providers' day-to-day business practices that might, in some instances, differentially impact consumers' access to broadband on prohibited bases. Our proposals are intended to make fully transparent to the public what communities are served, and what communities are not served, by large-scale broadband deployment, upgrade, and maintenance projects completed or substantially completed by each provider over the preceding calendar year. We propose to require the reporting of this information on a state-by-state or territory-by-territory basis in a yearly supplement to the Broadband Data Collection (BDC) so the public can see not only where broadband service is available, but where and how providers are currently investing in their broadband networks and what communities are benefiting from those investments. Our proposals would also require providers to establish formal compliance programs related to digital discrimination of access and to conduct regular, internal assessments of what communities are served (and not served) by recently completed, pending, and planned large-scale broadband projects and whether their relevant policies and practices

might differentially impact consumers' access to broadband service. Such regular assessments, we believe, will help "smoke out" policies and practices that might impede equal access to broadband service without sufficient technical or economic justification as providers pressure test the asserted justifications for policies and practices producing such effects. Affirmative obligations such as these are not foreign to the Commission. Most recently, for example, the Commission has adopted affirmative obligations for voice service providers to better police their own networks against illegal robocalls and protect consumers from widespread fraud, and we believe that targeted affirmative and effective measures can similarly combat discriminatory practices in the context of our duty under section 60506 to prevent and identify steps to eliminate digital discrimination of access.

2. In this *Further Notice*, we propose two sets of affirmative obligations for broadband providers in furtherance of our mandate to facilitate equal access to broadband internet access service, including by preventing digital discrimination of access. Under our proposal, each broadband provider would be required to: (1) submit an annual, publicly-available supplement to the BDC describing, on a state-by-state or territory-by-territory basis, any large-scale broadband deployment, upgrade, and maintenance projects that were completed or substantially completed during the preceding calendar year and the communities served by such projects; and (2) establish a mandatory internal compliance program requiring regular internal assessment of (a) what communities are served by recent, pending, and planned large-scale projects and (b) whether the provider's broadband-related policies and practices might differentially impact consumers' access to broadband based on a listed characteristic and without adequate technical or economic justification.

3. *Legal Authority*. We seek general comment on our authority to require providers to implement affirmative obligations. Section 60506 directs the Commission to adopt rules to prevent digital discrimination of access and identify necessary steps to eliminate such discrimination. Does section 60506 authorize the Commission to impose affirmative obligations on providers? Does the Communications Act provide the Commission such authority, irrespective of whether section 60506 is part of the Communications Act? Does section 4(i) of the Communications Act provide the Commission either direct or

ancillary authority to do so? Besides these legal authorities, are there other sources for our authority to implement affirmative obligations of the types set forth below?

Annual Report

4. We propose requiring that providers submit an annual, publicly-available supplement to the BDC describing their recent broadband investments in each state and territory. This supplemental report would identify and describe, on a state-by-state or territory-by-territory basis, all fixed or mobile broadband deployment, upgrade, and maintenance projects completed or substantially completed in the preceding calendar year, that are expected to affect the availability or quality of broadband service at 500 or more housing units. A "housing unit" is defined as a single family house, townhome, mobile home or trailer, apartment, group of rooms, or single room that is occupied as a separate living quarters, or, if vacant, is intended for occupancy as a separate living quarters. The report would categorize each such project as a deployment, upgrade, or maintenance project (or some combination thereof) and would identify the number of housing units affected by the project through numerical bands (such as 500–999, 1000–4999, 5000–9999, etc.). The report would identify through the census tract affected by the project, and would provide a brief narrative description of the project and the geographic area served by the project to provide greater precision and clarity regarding what the project is designed to accomplish and what communities are served by the project. The primary goal of requiring this report would be to increase transparency regarding what substantial investments providers are currently making in their networks, what communities are being served—or not served—by those investments, and how they are being served. The information provided in the annual supplement to the BDC would allow the Commission, state and local broadband regulators, public interest organizations, and other stakeholders to review on a jurisdiction-by-jurisdiction basis what major deployment, upgrade, and maintenance projects covered entities have completed or substantially completed within the states and territories of their footprint and what communities are and are not served by those projects. We believe this information would assist in the development of broadband policy, in the strengthening of advocacy for broadband expansion, and in the

targeting of our efforts to enforce our digital discrimination of access rules.

5. In the *Notice of Proposed Rulemaking*, 88 FR 3681, we sought comment on what self-assessment or reporting obligations we should require of providers. In response, the Leadership Conference on Civil and Human Rights suggested that we look to other sources of civil rights law to develop affirmative obligations, Microsoft recommended that providers use Commission data to formulate plans to address digital discrimination of access, and several commenters recommended self-reporting requirements. Based on the comments received in the record, we believe our steps in this *Further Notice* are consistent with recommendations for self-reporting and will result in useful data to stakeholders. We seek comment on this approach.

Components of the Report

6. We propose that each annual report must address the following components to provide a comprehensive picture of each major deployment, maintenance, and upgrade project completed or substantially completed for each state and territory within its service area or footprint: (1) the nature of each project completed or substantially completed in the calendar year immediately preceding the submission of the report (*i.e.*, deployment, upgrade, maintenance, or a combination thereof); (2) the number of housing units affected by the project (*i.e.*, the number of housing units whose broadband availability or quality is positively impacted by the project) by census tract (utilizing the system presently used in the BDC); and (3) a narrative description of the project and of the areas served by the project, to allow for greater precision and clarity regarding what the project is designed to accomplish and what communities are served by the project.

7. We seek general comment on the pros and cons of an annual report in the context of this proceeding. What are the short-term and long-term benefits of this proposal? Is there a more appropriate way to collect this information other than an annual report? Is there a way we can utilize existing data in connection with or in place of the proposed annual report to promote transparency regarding broadband investments? How could regulators leverage these reports to address potential disparities in broadband access? Are there other stakeholders that would benefit from such a report? Are there other uses for such a report that would foster the equal access policy of section 60506? Are there other potential benefits or

challenges in implementing an annual reporting requirement?

8. We also invite comment on the proposed components of the annual report, discussed in turn below. Are they sufficient? Are there other components that are necessary to meet our transparency goal. Are any of the proposed components in conflict or tension with the equal access goal of section 60506? What other reasons or justifications might exist for excluding one or more of the proposed components of the report? Would there be challenges in implementing this proposal and if so, how can the challenges be addressed? We seek comment on how to strike the right balance between gathering sufficient information and avoiding undue burdens on reporting entities when implementing this annual report requirement.

9. *Nature of the projects.* In identifying the nature of the projects completed or substantially completed in the report, our proposal would require that providers identify any broadband deployment, upgrade, or maintenance projects undertaken within the specified period and affecting 500 or more housing units. We believe that deployment, maintenance, and upgrade projects are the type of investments that most broadly and directly affect consumer access to broadband service and, thus, should be reported in order to facilitate greater transparency regarding where such investments are being made. We seek comment on this proposal. We propose to deem a project *completed* when all the tasks and objectives have been successfully completed, all deliverables have been produced, all milestones have been met, and there is no outstanding work or tasks to be done. We also seek comment on what should be considered a substantially completed project. For example, should we define substantially completed as being a project for which, at the providers' discretion, either 85% of the impacted locations are covered, or for which 85% of the most recent budget with commercial approval has been spent? Should the difference between the definitions of substantially completed and completed be based on providers expected timeline for a project?

10. *Housing units affected.* We propose that the reporting requirement apply to projects affecting 500 or more housing units. We propose to use the definition of a "housing unit" in Commission rule 802.223, which defines the term as "a single family house, townhome, mobile home or trailer, apartment, group of rooms, or

single room that is occupied as a separate living quarters, or, if vacant, is intended for occupancy as a separate living quarters." An "economic unit" consists of all adult individuals contributing to and sharing in the income and expenses of a household. We seek comment on this definition. Based on this proposed definition, we seek comment on what number of housing units should trigger the requirement to report on a particular project. Is the number 500 reasonable in light of our transparency goal? Should the same threshold number of housing units apply to deployment, upgrade, and maintenance projects? Should different thresholds be applied to each category? Once the 500 housing unit threshold is met, is categorizing housing units in metric bands (e.g., 500–999, 1000–4999, 5000–9999) an effective method to report the scope of the deployment, maintenance, or upgrade projects? We specifically seek comment on the potential impacts on rural and Tribal areas. Should there be special considerations for rural and Tribal areas? If so, how can we ensure that these areas are being considered?

11. *Geographic area of the project.* We seek comment on requiring providers to report the geographic area of each major deployment, upgrade, and maintenance project by census tract. Would reporting projects at the level of the census tract be appropriate? What benefits and burdens would be associated with reporting data at the census tract level? Would census block be too granular? Should providers be required or permitted to report impacted locations in the same manner as they report deployed locations in the BDC? Since the BDC allows providers to report availability data in the form of polygon shapefiles, or as broadband serviceable location fabric (fabric), would adopting either one of these metrics reduce the burden on filers? In what format do covered entities routinely store data on deployments, upgrades, and maintenance projects? To the extent covered entities do not routinely collect and store such information, we seek comment on how to specify a single methodology for doing so.

12. We also seek comment on whether there are more precise metrics to identify the location of projects in rural and Tribal areas than the proposed census tract metric. Are there any additional issues specific to rural and Tribal areas that we should consider in completion of these annual reports? Would a census block requirement be workable? Would it encompass rural and Tribal areas more efficiently? Should providers be required to identify

whether the impacted area is rural or Tribal and, if so, how should they do that? Should covered entities be required to specifically describe their projects in Tribal areas, irrespective of the number of housing units served by the project?

13. *Narrative description of project.* We propose that providers use the narrative description to provide information regarding each project sufficient to determine what the project was designed to accomplish, why it was undertaken, and what communities within the designed census tracts it was intended to serve. In particular, the designation of a project as a deployment, upgrade, or maintenance project may not sufficiently explain what the project was intended to accomplish (e.g., upgrade service from DSL to fiber) or the specific communities within the designated census tracts that will be served by the project (e.g., naming the neighborhoods served or providing the geographic boundaries of the project). By requiring the narrative description of the project, we intend to allow greater precision and clarity about the nature of the project and the communities served, without being overly prescriptive. We seek comment on this proposal. Should we be more prescriptive about the narrative descriptions required? Should we require, for example, that providers describe the demographics of the communities served by these projects and/or the dates the projects were completed or substantially completed? Is there other narrative information we should require in order for the reporting requirement to serve its intended purpose of providing greater transparency regarding recent broadband investments? More generally, is a report of the type we propose necessary or helpful in light of the data already being collected through the BDC?

Annual Report Filing Timeline

14. We propose to require providers to file their annual report as a supplement to the BDC report due in March of each year and that it cover projects completed or substantially completed in the calendar year immediately preceding the submission of the report. We seek comment on this proposal. We seek comment on this filing timetable and whether it provides sufficient time for providers to gather and review the information required in the report. We also seek comment on whether submitting the annual report as a supplement to the year-end BDC filing is the most reasonable and efficient approach. Should these deadlines be

staggered? If so, how much time should be allotted between the filing of the year-end BDC report and the annual, major projects report?

Availability of Annual Reports

15. We propose to make the results of these annual reports available to the public. As discussed above, we tentatively conclude that significant benefits would flow from making these reports public, such as increasing transparency regarding substantial investments by providers, informing broadband policy at the Federal, state and local level, strengthening advocacy for expanded broadband access, and targeting the Commission's efforts to enforce the rules we adopt today. We seek comment on our proposal to make these reports public. What is the best method for releasing these reports to the public? Should these reports be easily accessible on the provider's website or should they be made available by another means? We also seek comment on the benefits or burdens of making the reports available to the public. Are there confidentiality concerns we need to consider with respect to the information in question? If so, what measures would be necessary to protect the legitimate confidentiality interests of providers?

Supplements to Existing Commission-Issues Reports

16. We also seek comment on whether the Commission should publish certain data from the proposed annual reports in the Commission's existing reports, such as the Communications Marketplace Report or the broadband progress report required by section 706 of the Telecommunications Act of 1996 (Section 706 Report). We note that the Commission has already initiated the inquiry for the next Section 706 Report. Although we propose that the annual reports be publicly available, as supplements to the annual BDC filings, would including certain data in either of these existing Commission reports provide greater transparency to consumers and communities? If so, what data should be included? Should we include the entirety of the proposed annual reports, or limit the data to a more narrow set of data points? Should we expand the information published in the Communications Marketplace Report or the Section 706 Report beyond the proposed annual reports to include summaries of filed digital discrimination of access informal complaints, any findings of digital discrimination of access, or steps the Commission has taken to address equal access? Would including this additional information in either these Commission-

issued reports enhance transparency and make the proposed annual reports fully available and accessible to more stakeholders?

Intersection With Other Broadband Data

17. We seek comment on how providers can leverage existing data sources, such as the existing BDC, in compiling these reports. To the extent we can model the requirements for this report off the BDC, how would that be helpful to providers? We assume that providers would prefer to use the same criteria and data fields that are used in the BDC to the extent possible. We seek comment on whether this is true.

18. Are the relevant criteria and data fields used in the BDC too broad or narrow for our present purposes? Is there a need for additional data to be collected or for different metrics to be used? Given that providers are aware of their deployment and report the impact of deployments as part of the BDC, what would be the additional burden of providing annual reports? Are there policies or procedures we can adopt to reduce the burden on providers?

19. We tentatively conclude that the annual reports proposed above should be certified by the provider as true and correct, just as occurs with respect to BDC submissions. We propose that the same experts who certify the BDC submissions also be required to certify the proposed annual report: (1) a corporate officer, and (2) an engineer. We seek comment on this proposal. Should we consider a different certification process? Is it necessary that both a corporate officer and an engineer certify reports containing the elements we have outlined above? Might other officers or employees of the provider be better informed to certify the contents of this annual report? We seek detailed comment on these matters.

Exceptions

20. We seek comment on whether any providers should be exempted from the requirement to submit an annual report based on their size, footprint, or service area. Should we exempt providers that primarily serve consumers at the rural and Tribal level and, if so, why? What other providers should be exempted from submitting an annual report and why?

Record Retention

21. It is important that records sufficient to determine the veracity of the proposed annual reports be retained for some period of time following submission of the reports. We seek comment on what records should be

retained and for how long they should be retained in order to accomplish this verification purpose. We also seek comment on whether records related to the proposed annual reports should be retained for any purpose other than verification of the information contained in such reports.

Compliance Program

22. In addition to the annual report, we propose to require each provider to adopt and maintain a formal internal compliance program designed to ensure regular assessment of whether and how the provider's policies and practices advance and impede equal access to broadband internet access service in its service area. In proposing to require such compliance programs, our goals are to ensure close internal scrutiny of policies and practices that might impede equal access to broadband and to promote accountability with regard to such policies and practices. In order to facilitate candid internal evaluation and assessment of a provider's policies and practices affecting broadband access, we do *not* propose to require providers to make publicly available any reports or other documentation of such internal evaluations and assessments. However, in order to ensure compliance with the requirement to conduct such evaluations and assessments, and/or in connection with a Commission investigation into alleged digital discrimination of access, the Commission reserves the right to require production of such reports and documentation subject to the Commission's existing confidentiality rules. We seek comment on this proposal.

Components of Compliance Program

23. *Effective Compliance Program.* We propose to model our mandatory internal compliance program on previously established effective compliance programs, while not being overly prescriptive regarding how the compliance program is designed. Such models teach us that effective compliance programs should include, at a minimum: (1) development and implementation of written policies and procedures; (2) designation of a compliance officer and/or compliance committee; (3) conducting effective training and education regarding the purposes and operation of the compliance program; (4) developing effective lines of reporting and communication; (5) conducting internal monitoring and auditing; (6) enforcing standards through well-publicized disciplinary guidelines; and (7) responding promptly to detected

problems through corrective action. We seek comment on whether these should be mandatory components of the compliance programs we propose to require. Which of these elements of an effective compliance programs should we require? Which elements should we not require, if any? Are there additional elements we should consider adding in order to ensure that the compliance programs effectively advance their intended purpose of facilitating equal access to broadband? Although we seek comment on each of these elements, we note that our goal is to grant each broadband provider the flexibility to develop and maintain a plan that contains the required elements and serves our intended purposes without prescribing a particular formula as to how each required element should be implemented. We seek comment on whether such flexibility will be beneficial or detrimental to the implementation of effective internal compliance programs by providers.

24. Implementing Written Policies and Procedures. We seek comment on requiring providers to implement internal written policies and procedures with the goal of preventing digital discrimination of access and promoting equal access to broadband internet access service. In the compliance program, are written policies and procedures necessary? What should those internal written policies and procedures include? Who should be knowledgeable about the rules and practices within the organization? How often should these written rules and procedures be reviewed, revised, and updated? Are there any available models that providers can look to when devising their internal policies and procedures to prevent digital discrimination of access and promote equal access?

25. Designating a Compliance Officer and/or Compliance Committee. We seek comment on requiring service providers to appoint a designated compliance officer or establish a compliance committee to ensure compliance with the program's requirements and timely cooperation with the Commission upon request. Is it necessary to designate a compliance officer or establish a compliance committee for the successful implementation of the compliance program? What should the qualifications of the selected compliance officer and compliance committee members be? What should the structure of a compliance committee be, how often should it meet, and what should be its functions? Should the designated compliance officer be required to provide that certification?

26. Conducting Effective Training on Commission Rules. We seek comment on requiring service providers to conduct periodic training for relevant employees on the Commission's digital discrimination of access rules. Who should conduct the training, who should be required to take the training, and how often should they be required to do so? How should the substantive content of the training be developed and what should it cover? Should the content of the training be certified or approved by the Commission in some manner? If so, how often should such certification or approval take place? Providers likely already have compliance programs and employee trainings to maintain compliance with regulatory requirements at many levels. What would be the additional burden for providers to incorporate compliance with digital discrimination of access rules into their existing compliance programs?

27. Developing Effective Lines of Reporting and Communication. We propose requiring broadband providers to put in place mechanisms and processes that: (1) encourage the internal reporting of matters that may constitute, or lead to, digital discrimination of access or otherwise impede equal access to broadband service; (2) channel those concerns to the compliance officer and/or compliance committee for evaluation and response, if warranted; and (3) ensure effective "up the chain" reporting by compliance officers and committees so senior officers are made aware of these matters and can take appropriate action to prevent their recurrence. We seek comment on this proposal. What system(s) can providers implement to encourage employees to raise concerns about potentially problematic conduct? What should be the reporting chain above the compliance officer and compliance committee to ensure that equal access concerns are given the highest possible priority by the provider? Are there other mechanisms and processes that we should require to achieve effective lines of reporting and communication regarding equal-access-related matters?

28. Conducting Internal Monitoring and Auditing. We seek comment on requiring broadband providers to perform periodic reviews of the compliance program and respond quickly to correct problems when they are detected. Who should conduct such periodic reviews and how often should they be conducted? What systems can providers put in place to evaluate the overall effectiveness of the program and

its compliance with the requirements we ultimately adopt for such programs?

29. Responding Promptly to Detected Problems and Undertaking Corrective Action. We seek comment on what requirements we should adopt regarding the handling of problems reported by the compliance officer or committee to senior management, especially when no corrective action has been taken. What obligations would a compliance officer or committee have under those circumstances? What recourse would a compliance officer or committee have if a provider routinely fails to address reported violations of our rules? Should we require, in such instances, that the compliance officer report the matter to the Commission? Could a compliance officer truthfully certify that a compliance program consistent with our rules has been maintained throughout the certification period if reported violations of our rules are routinely ignored by the provider? We seek comment on these matters.

Evaluations of Recently Completed, Pending, and Planned Projects

30. We seek comment on requiring providers to conduct annually an internal evaluation of recently completed, pending, and planned deployment, upgrade, and maintenance projects affecting 500 or more housing units. With respect to each such project, the internal evaluation should consist of a comparison of the demographics of the communities served by that project with the demographics of the Metropolitan Statistical Area (MSA) encompassing those served communities. The Centers for Disease Control and Prevention define MSA as "a geographic entity based on a county or a group of counties with at least one urbanized area with a population of at least 50,000 and adjacent counties with economic ties to the central area." While the purpose of our proposal to require submission of annual reports to the Commission is to promote greater transparency regarding what communities are served by recently completed projects, the goal of our proposal to require periodic internal evaluation of large-scale projects is to facilitate close internal scrutiny of the provider's policies and practices affecting broadband access, determine whether those policies and practices advance or impede equal access to broadband service, and promote accountability regarding policies and practices that impede (or threaten to impede) equal access without adequate justification. Moreover, while our proposal regarding annual reporting would apply only to recently completed (or substantially completed) projects of

a certain size, our proposal with respect to periodic internal evaluations would also apply to pending and planned projects. We seek comment on this proposal, and we specifically seek comment on: (1) how we should define “pending” projects and “planned” projects under this proposal; and (2) whether MSAs are the appropriate geographic comparator for the internal evaluation of covered projects.

31. We do not propose to prescribe the manner in which providers compare the demographics of served communities with the demographics of the MSAs encompassing those communities. We would require only that such comparisons be conducted with analytical rigor and in good faith using official data and reports of the U.S. Census Bureau, and that they be reasonably designed to uncover meaningful disparities between the reported demographics of served communities and the reported demographics of the MSAs encompassing those served communities. According to the Census Bureau, an MSA consists of one or more counties that contain a city of 50,000 or more inhabitants, or contain a Census Bureau-defined urbanized area (UA) and have a total population of at least 100,000 (75,000 in New England). While we would never expect precise numerical alignment with respect to any single project, we believe that routinely conducting these comparisons will give providers a better sense of what communities are being served (and not served) by their projects over time, and will help to “smoke out” policies and practices that discriminate without adequate justification. We seek comment on this proposal.

Evaluations of Policies and Practices

32. *Evaluation and Assessment of Policies and Practices.* We seek comment on requiring providers to: (1) periodically evaluate their policies and practices affecting broadband access to determine whether they differentially impact consumers’ access to broadband internet access service based on income level, race, ethnicity, color, religion, or national origin, or otherwise impede equal access to broadband internet access service; and (2) report to senior management annually, and in writing, regarding the results of such evaluation. As noted above, the proposed requirement that providers periodically determine the demographics of communities served by designated broadband projects is intended to permit an assessment, over time, of whether the provider’s broadband-related policies are effectively impeding

equal access to broadband service. Those assessments should lead to critical examination of whether any policies and practices impeding such equal access are necessary and justified by legitimate business considerations and whether alternative policies and practices might reasonably be adopted and implemented in their place. We propose that compliance officers and/or committees be required to conduct such annual assessments and report annually to senior management, in writing, the results of such evaluations and assessments. This process will require providers to closely scrutinize policies and practices producing disparate impacts on prohibited bases or otherwise impeding equal access to broadband service. We believe these requirements are necessary to ensure that equal access to broadband service remains a top priority for providers, in fulfillment of Congress’s instruction that the Commission “take steps to ensure that *all people of the United States* benefit from equal access to broadband internet access service.” We seek comment on this proposal.

Certification

33. *Certification of Completion.* We propose requiring providers to submit, in conjunction with the annual report proposed above, a certification that a compliance program satisfying all requirements finally adopted by the Commission was in place during the calendar year covered by the annual report. We propose that the certification be attested to by an officer and engineer as occurs with respect to the BDC, and that the provider’s designated compliance officer (or the chair of the compliance committee) certify the same to the certifying officer and engineer. We seek comment on this proposal, including whether the designated compliance officer (or chair of the compliance committee) should be required to provide a certification directly to the Commission.

Exemptions

34. We also seek comment on whether any providers should be exempted from the proposed requirement to implement and maintain an internal compliance program meeting specified standards based on their size, footprint, or niche service area. Should we exempt providers that primarily serve consumers at the rural and Tribal level and, if so, why? What other providers should be exempted from these requirements, under what circumstances, and why? We seek comment on requiring providers who are entitled to an exemption under our

rules to file a certification of exemption in lieu of a certification of compliance in conjunction with the annual report.

Recording and Retention Requirements

35. We seek comment on what records providers should be required to retain, and for how long, relating to the internal assessments of the projects described in the preceding paragraphs. Once a summary report of the internal assessment for a specific project is completed, should the provider be required to retain the underlying documents for some period of time? Should there be different retention periods for the summary reports than for the underlying documents?

Office of Civil Rights

36. We seek further, focused comment on establishing an Office of Civil Rights, as both advocates and broadband service providers have urged. In particular, we seek comment on the potential benefits establishing such an office. For example, would such an office be helpful in developing and maintaining the expertise to evaluate the effects of Commission policy initiatives on historically marginalized communities? Could it assist in determining when prohibited discrimination has occurred and aid in developing remedies for such discrimination? Might it help in evaluating claims and possible patterns of digital discrimination of access? And could it aid in monitoring informal complaints alleging digital discrimination of access and other forms of prohibited discrimination, as well as in the mediation process we have outlined in the Order? Why or why not? What other benefits might be associated with establishing an Office of Civil Rights? For example, could it work with broadband service providers to proactively mitigate potential instances of prohibited discrimination? Could such an office collaborate with broadband service providers and Federal and state governments to develop broadband adoption and digital literacy skills training that could be used on a nationwide basis? Could such an office be employed to address other substantive Commission policy issues and processes beyond matters arising under section 60506? If so, what other issues might an Office of Civil Rights oversee or how could it support other bureaus and offices in the Commission? Finally, what are the potential challenges associated with establishing an Office of Civil Rights? How should the Commission address these challenges? What are the costs associated with establishing an Office of

Civil Rights? How should the Commission structure and staff such an office? What other structural and organizational changes would be required to establish such an office?

Other Efforts To Promote Digital Equity and Inclusion

37. *Digital Equity*. The Commission, as part of its continuing effort to advance digital equity for all, including people of color, persons with disabilities, persons who live in rural or Tribal areas, and others who have been historically underserved, marginalized, and adversely affected by persistent poverty and inequality, invites comments on any equity-related considerations and benefits (if any) that may be associated with the proposals and issues discussed herein. We define the term “equity” consistent with Executive Order 13985 as the consistent and systematic fair, just, and impartial treatment of all individuals, including individuals who belong to underserved communities that have been denied such treatment, such as Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders and other persons of color; members of religious minorities; lesbian, gay, bisexual, transgender, and queer (LGBTQ+) persons; persons with disabilities; persons who live in rural areas; and persons otherwise adversely affected by persistent poverty or inequality. Specifically, we seek comment on how our proposals may promote or inhibit advances in diversity, equity, inclusion, and accessibility, as well as the scope of the Commission’s relevant legal authority.

Procedural Matters

38. We have also prepared an Initial Regulatory Flexibility Analysis (IRFA) concerning the potential impact of the rule and policy changes contained in the *Further Notice*. Comments must be filed by the deadlines for comments on the *Further Notice* indicated on the first page of this document and must have a separate and distinct heading designating them as responses to the IRFA.

39. *Paperwork Reduction Act*. The *Further Notice* also may contain proposed new and revised information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and OMB to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, pursuant to the Small Business Paperwork Relief Act of 2002,

Public Law 107–198, *see* 44 U.S.C. 3506(c)(4), we seek specific comment on how we might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Ordering Clauses

40. *It is further ordered* that the Commission’s Office of the Secretary *shall send* a copy of this *Report and Order* and *Further Notice of Proposed Rulemaking*, including the Final Regulatory Flexibility Analysis and Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

Initial Regulatory Flexibility Analysis

41. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities by the policies and rules proposed in this *Further Notice of Proposed Rulemaking (Further Notice)*. The Commission requests written public comments on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments provided on the first page of the *Further Notice*. The Commission will send a copy of the *Further Notice*, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *Further Notice* and IRFA (or summaries thereof) will be published in the **Federal Register**.

Need for, and Objectives of, the Proposed Rules

42. In the *Further Notice*, the Commission takes additional steps to advance its efforts to fulfill the congressional direction in section 60506 of the Infrastructure Act to facilitate equal access to broadband internet access service by preventing digital discrimination of access, proposing rules that will address disparities in broadband availability and service offerings. Specifically, the *Further Notice* seeks comment on affirmative obligations that might be undertaken by broadband providers by complementing proposed rules adopted in the *Report and Order*, with a focus on broadband providers’ day-to-day business practices that might, in some instances, differentially impact consumers’ access to broadband on prohibited bases. The *Further Notice* also proposes to require the reporting of this information on a state-by-state or territory-by-territory basis in a yearly supplement to the BDC so the public can see not only where

broadband coverage is provided, but where and how providers are currently investing in their broadband networks and what communities are benefiting from those investments. Additionally, the *Further Notice* proposes to require providers to establish formal compliance programs related to digital discrimination of access and to conduct regular, internal assessments of what communities are served (and not served) by recently completed, pending, and planned large-scale broadband projects and whether their relevant policies and practices might differentially impact consumers’ access to broadband service.

Legal Basis

43. The proposed action is authorized pursuant to sections 1, 2, 4(i)–(j), 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i)–(j), 303(r), and section 60506 of the Infrastructure Investment and Jobs Act, Public Law 117–58, 135 Stat. 429, 1245–46 (2021), codified at 47 U.S.C. 1754.

Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

44. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules and by the rule revisions on which the *Further Notice* seeks comment, if adopted. The RFA generally defines the term “small entity” as having the same meaning as the terms “small business,” “small organization,” and “small governmental jurisdiction.” In addition, the term “small business” has the same meaning as the term “small-business concern” under the Small Business Act. A “small-business concern” is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

45. *Small Businesses, Small Organizations, Small Governmental Jurisdictions*. Our actions, over time, may affect small entities that are not easily categorized at present. We therefore describe, at the outset, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the Small Business Administration’s (SBA) Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United

States, which translates to 32.5 million businesses.

46. Next, the type of small entity described as a “small organization” is generally “any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.” The Internal Revenue Service (IRS) uses a revenue benchmark of \$50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2020, there were approximately 447,689 small exempt organizations in the U.S. reporting revenues of \$50,000 or less according to the registration and tax data for exempt organizations available from the IRS.

47. Finally, the small entity described as a “small governmental jurisdiction” is defined generally as “governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.” U.S. Census Bureau data from the 2017 Census of Governments indicate there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number, there were 36,931 general purpose governments (county, municipal, and town or township) with populations of less than 50,000 and 12,040 special purpose governments— independent school districts with enrollment populations of less than 50,000. Accordingly, based on the 2017 U.S. Census of Governments data, we estimate that at least 48,971 entities fall into the category of “small governmental jurisdictions.”

48. *Wired Telecommunications Carriers*. The U.S. Census Bureau defines this industry as establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired communications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution, and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry. Wired Telecommunications Carriers are

also referred to as wireline carriers or fixed local service providers.

49. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 5,183 providers that reported they were engaged in the provision of fixed local services. Of these providers, the Commission estimates that 4,737 providers have 1,500 or fewer employees. Consequently, using the SBA’s small business size standard, most of these providers can be considered small entities.

50. *Local Exchange Carriers (LECs)*. Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. Providers of these services include both incumbent and competitive local exchange service providers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. Wired Telecommunications Carriers are also referred to as wireline carriers or fixed local service providers. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 5,183 providers that reported they were fixed local exchange service providers. Of these providers, the Commission estimates that 4,737 providers have 1,500 or fewer employees. Consequently, using the SBA’s small business size standard, most of these providers can be considered small entities.

51. *Incumbent Local Exchange Carriers (Incumbent LECs)*. Neither the Commission nor the SBA have developed a small business size standard specifically for incumbent local exchange carriers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies

firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 1,227 providers that reported they were incumbent local exchange service providers. Of these providers, the Commission estimates that 929 providers have 1,500 or fewer employees. Consequently, using the SBA’s small business size standard, the Commission estimates that the majority of incumbent local exchange carriers can be considered small entities.

52. *Competitive Local Exchange Carriers (LECs)*. Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. Providers of these services include several types of competitive local exchange service providers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 3,956 providers that reported they were competitive local exchange service providers. Of these providers, the Commission estimates that 3,808 providers have 1,500 or fewer employees. Consequently, using the SBA’s small business size standard, most of these providers can be considered small entities.

53. We have included small incumbent LECs in this present RFA analysis. As noted above, a “small business” under the RFA is one that, *inter alia*, meets the pertinent small-business size standard (*e.g.*, a telephone communications business having 1,500 or fewer employees) and “is not dominant in its field of operation.” The SBA’s Office of Advocacy contends that, for RFA purposes, small incumbent LECs are not dominant in their field of operation because any such dominance is not “national” in scope. We have therefore included small incumbent LECs in this RFA analysis, although we emphasize that this RFA action has no

effect on Commission analyses and determinations in other, non-RFA contexts.

54. *Interexchange Carriers (IXCs)*. Neither the Commission nor the SBA have developed a small business size standard specifically for Interexchange Carriers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 151 providers that reported they were engaged in the provision of interexchange services. Of these providers, the Commission estimates that 131 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, the Commission estimates that the majority of providers in this industry can be considered small entities.

55. *Cable System Operators (Telecom Act Standard)*. The Communications Act of 1934, as amended, contains a size standard for a "small cable operator," which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than one percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed \$250,000,000." For purposes of the Telecom Act Standard, the Commission determined that a cable system operator that serves fewer than 677,000 subscribers, either directly or through affiliates, will meet the definition of a small cable operator based on the cable subscriber count established in a 2001 Public Notice. Based on industry data, only six cable system operators have more than 677,000 subscribers. Accordingly, the Commission estimates that the majority of cable system operators are small under this size standard. We note however, that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million. Therefore, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

56. *Other Toll Carriers*. Neither the Commission nor the SBA has developed a definition for small businesses specifically applicable to Other Toll Carriers. This category includes toll carriers that do not fall within the categories of interexchange carriers, operator service providers, prepaid calling card providers, satellite service carriers, or toll resellers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 115 providers that reported they were engaged in the provision of other toll services. Of these providers, the Commission estimates that 113 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

57. *Wireless Telecommunications Carriers (except Satellite)*. This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 797 providers that reported they were engaged in the provision of wireless services. Of these providers, the Commission estimates that 715 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

58. *Satellite Telecommunications*. This industry comprises firms "primarily engaged in providing telecommunications services to other

establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications." Satellite telecommunications service providers include satellite and earth station operators. The SBA small business size standard for this industry classifies a business with \$38.5 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 275 firms in this industry operated for the entire year. Of this number, 242 firms had revenue of less than \$25 million.¹ Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 71 providers that reported they were engaged in the provision of satellite telecommunications services. Of these providers, the Commission estimates that approximately 48 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, a little more than of these providers can be considered small entities.

59. *Local Resellers*. Neither the Commission nor the SBA have developed a small business size standard specifically for Local Resellers. Telecommunications Resellers is the closest industry with a SBA small business size standard. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. The SBA small business size standard for Telecommunications Resellers classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that 1,386 firms in this industry provided resale services for the entire year. Of that number, 1,375 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31,

¹ *Id.* The available U.S. Census Bureau data does not provide a more precise estimate of the number of firms that meet the SBA size standard. We also note that according to the U.S. Census Bureau glossary, the terms receipts and revenues are used interchangeably, see https://www.census.gov/glossary/#term_ReceiptsRevenueServices.

2020, there were 293 providers that reported they were engaged in the provision of local resale services. Of these providers, the Commission estimates that 289 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

60. *Toll Resellers.* Neither the Commission nor the SBA have developed a small business size standard specifically for Toll Resellers. Telecommunications Resellers is the closest industry with an SBA small business size standard. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. The SBA small business size standard for Telecommunications Resellers classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that 1,386 firms in this industry provided resale services for the entire year. Of that number, 1,375 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 457 providers that reported they were engaged in the provision of toll services. Of these providers, the Commission estimates that 438 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

61. *All Other Telecommunications.* This industry is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Providers of internet services (e.g. dial-up ISPs) or voice over internet protocol (VoIP) services, via client-supplied telecommunications connections are also included in this

industry. The SBA small business size standard for this industry classifies firms with annual receipts of \$35 million or less as small. U.S. Census Bureau data for 2017 show that there were 1,079 firms in this industry that operated for the entire year. Of those firms, 1,039 had revenue of less than \$25 million. Based on this data, the Commission estimates that the majority of "All Other Telecommunications" firms can be considered small.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

62. The *Further Notice* proposes two sets of affirmative obligations for broadband providers in furtherance of our mandate to facilitate equal access to broadband internet access service, including by preventing digital discrimination of access by requiring broadband providers to: (1) submit an annual, publicly available supplement to the Broadband Data Collection (BDC) describing, on a state-by-state or territory-by-territory basis, any large-scale broadband deployment, upgrade, and maintenance projects that were completed or substantially completed during the preceding calendar year and the communities served by such projects; and (2) establish a mandatory internal compliance program requiring regular internal assessment of (a) what communities are served by recent, pending and planned large-scale projects and (b) whether the provider's broadband-related policies and practices might differentially impact consumers' access to broadband without adequate technical or economic justification.

63. The *Further Notice* proposes to require the annual report as a supplement to the year-end BDC, and we assume that broadband providers would use the same criteria and data fields that are used in the BDC. The Commission seeks comment on whether the experts who certify the BDC submissions should also be required to certify the proposed annual report. The Commission also proposes that each provider adopt and maintain a formal internal compliance program that includes, at a minimum, elements from previously effective compliance programs: (1) developing and implementing written policies and procedures; (2) designating a compliance officer and/or compliance committee; (3) conducting effective training and education regarding the purposes and operation of the compliance program; (4) developing effective lines of reporting and communication; and (5) conducting internal monitoring and auditing. We

propose to grant each broadband provider the flexibility to develop and maintain a plan that contains the required elements and serves our intended purposes without prescribing a particular formula as to how each required element should be implemented.

Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

64. The RFA requires an agency to describe any significant, specifically small business, alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): "(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rules for such small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities."

65. The *Further Notice* seeks comment on whether any of the proposed filing, recordkeeping and reporting requirements can be minimized for small entities. For example, we request comment on whether existing data may be used with or in place of the proposed annual report to promote transparency in broadband investments. We also seek comment on whether any broadband providers should be exempted from the requirement to submit an annual report or to implement and maintain an internal compliance program based on their size, footprint, or service area, including rural and Tribal areas. Finally, the Commission seeks comment on whether any of the costs associated with our digital discrimination of access compliance requirements can be alleviated for small entities.

Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

None.

Federal Communications Commission.

Marlene Dortch,

Secretary.

[FR Doc. 2024-01996 Filed 1-31-24; 8:45 am]

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

[ET Docket No. 13–115 and RM–11341; FCC 23–76; FR ID 198084]

Allocation of Spectrum for Non-Federal Space Launch Operations

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document the Commission proposes to adopt three footnotes to the Table of Frequency Allocations to address the use of spectrum by manned and unmanned spacecraft during space missions. The Commission also seeks further comment on whether to include new spectrum allocations in specific bands for communications with cargo and crew capsules and payload communications with the International Space Station (ISS) and other crewed space stations. In addition, the Commission seeks further comment on expanding the use of the 2360–2395 MHz band, both in the context of additional uses to the band as well as expanding use in the band beyond the three frequencies currently designated for telemetry and telecommand operations of launch vehicles.

DATES: Comments are due on or before March 4, 2024 and reply comments are due on or before April 1, 2024.

ADDRESSES: Pursuant to §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS). See Electronic Filing of Documents in Rulemaking Proceedings, 63 FR 24121 (1998). You may submit comments, identified by ET Docket No. 13–115 and RM–11341, by any of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: <https://www.fcc.gov/ecfs/>.

- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing.

Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

- Commercial overnight mail (other than U.S. Postal Service Express Mail

and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.

- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.

- Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. See *FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy*, Public Notice, 35 FCC Rcd 2788, 2788–89 (OS 2020), <https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy>.

People with Disabilities: To request materials in accessible formats for people with disabilities (braille, large print, computer diskettes, audio recordings), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

FOR FURTHER INFORMATION CONTACT:

Nicholas Oros of the Office of Engineering and Technology, at Nicholas.Oros@fcc.gov or 202–418–0636; Linda Chang of the Wireless Telecommunications Bureau at Linda.Chang@fcc.gov or 202–418–1339; or Julia Malette of the Space Bureau at Julia.Malette@fcc.gov or 202–418–2453.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Second Further Notice of Proposed Rulemaking (FNPRM), ET Docket No. 13–115 and RM–11341; FCC 23–76, adopted on September 21, 2023 and released on September 22, 2023. The full text of this document is available for public inspection and can be downloaded at: <https://docs.fcc.gov/public/attachments/FCC-23-76A1.pdf>.

Alternative formats are available for people with disabilities (Braille, large print, electronic files, audio format) by sending an email to fcc504@fcc.gov or calling the Commission's Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

The proceeding this Notice initiates shall be treated as a “permit-but-disclose” proceeding in accordance with the Commission's *ex parte* rules.¹ Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the

presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (e.g., .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

Procedural Matters

Paperwork Reduction Act. This document may contain proposed modified information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4)), we seek specific comment on how we might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Initial Regulatory Flexibility Analysis. As required by the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the

¹ 47 CFR 1.1200 *et seq.*

possible significant economic impact on a substantial number of small entities of the proposals addressed in this *Second Further Notice of Proposed Rulemaking*. The IRFA is set forth in Appendix E of the FCC document found at <https://docs.fcc.gov/public/attachments/FCC-23-76A1.pdf>. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines for comments on the *Second Further Notice of Proposed Rulemaking*, and should have a separate and distinct heading designating them as responses to the IRFA.

Accessing Materials

Providing Accountability Through Transparency Act: The Providing Accountability Through Transparency Act requires each agency, in providing notice of a rulemaking, to post online a brief plain-language summary of the proposed rule. Accordingly, the Commission will publish the required summary of the Second Further Notice of Proposed Rulemaking at <https://www.fcc.gov/proposed-rulemakings>.

Synopsis

NASA Footnotes

NTIA has requested that the Commission add three footnotes to the Allocation Table to address the use of spectrum by manned and unmanned spacecraft during space missions. The text of these requested footnotes is as follows:

USxxx Use of the bands 2290–2293 MHz and 2297–2300 MHz by Federal and non-Federal space stations may be authorized on a primary basis for the specific purpose of emergency transmissions from manned spacecraft used in the exploration and use of outer space, including the Moon and other celestial bodies. This allocation is restricted to emergency transmissions from manned spacecraft when experiencing emergency situations. Additionally, the bands 2025–2110 MHz and 2110–2120 MHz may also be authorized on a primary basis for transmissions of related commands to the spacecraft. Such operations should be conducted in accordance with Recommendation ITU–R SA.1863.

USyyy In the band 2213.5–2218.5 MHz, non-Federal space stations operating in the space operation service providing transportation service of crew to and from the International Space Station, may be authorized on a primary basis to transmit in the space-to-Earth direction, to authorized receiving stations, subject to such conditions as may be applied on a case-by-case basis. Such transmissions shall not cause harmful interference to authorized Federal stations. The power flux-density at the Earth's surface from such emissions from these non-Federal stations shall not exceed -144 to -154 dBW/m²/4 kHz, depending on the angle of

arrival, in accordance with ITU Radio Regulation No. 21.16.

USzzz In the band 2200.2–2206.2 MHz, non-Federal space stations operating in the space operation service may be authorized on a primary basis to transmit to the International Space Station (ISS) while within 30 km of the ISS, subject to such conditions as may be applied on a case-by-case basis. Such transmissions shall not cause harmful interference to authorized Federal stations. The power-flux-density of such emissions at the Earth's surface from these non-Federal stations shall not exceed -144 to -154 dBW/m²/4 kHz, depending on the angle of arrival, in accordance with ITU Radio Regulation No. 21.16. ITU Radio Regulation No. 5.392 also applies.

Draft footnote USxxx applies to emergency transmissions to and from manned spacecraft in two portions of the 2200–2290 MHz band as well as the 2025–2110 MHz and 2110–2120 MHz bands. The Commission proposes to add this footnote to the allocations table recognizing the importance of emergency communications to safeguard human life during manned space missions. The Commission seeks comment on this proposal. Because emergency communications from manned spacecraft are likely to occur infrequently the Commission tentatively concludes that making this spectrum available for this purpose will not present a significant interference risk to other users of these bands. As the 2200–2290 MHz band has a space operation allocation in the space-to-earth direction, permitting transmissions from spacecraft is appropriate. The 2025–2110 MHz band has a primary Federal space operations allocation in the Earth-to-space direction which is consistent with making transmissions to manned spacecraft. The 2110–2120 MHz band has a primary space research service (deep space) (Earth-to-space) allocation at Goldstone California. Given that use of the 2110–2120 MHz for space transmissions is currently limited to this one location, should USXXX have a similar limitation on use of this band? Should any other restrictions be placed on the use of these bands for emergency communications for manned spacecraft to avoid harmful interference from occurring to other users of these bands?

Draft footnote USyyy applies to transmissions to ground stations by non-Federal spacecraft transporting crew to and from the International Space Station (ISS). NASA currently has contracts with SpaceX and Boeing to shuttle crew members to the ISS. There is currently a federal Space Operation space-to-Earth allocation for the 2200–2290 MHz band, but the non-federal Space Operation allocation for this band is limited to use for pre-launch testing and space launch

operations and therefore does not permit transmissions by crew transport spacecraft after the launch phase of the mission. Given the importance of reliable communications in safeguarding human life during manned space missions, the Commission proposes to add this footnote to the Allocation Table. The Commission tentatively concludes that the power flux limits on these transmissions will prevent interference from occurring to receivers on the earth's surface from these transmissions. The Commission seeks comment on this proposal.

Draft footnote USzzz applies to spacecraft that are transmitting in portions of the 2200–2290 MHz band within 30 kilometers of the ISS. NASA has contracts with commercial companies to transport both supplies and crew to the ISS. These spacecraft need to communicate with the ISS when they are docking. As the Space Operation allocation for the 2200–2290 MHz band is limited to use for pre-launch testing and space launch operations, there is no allocation that permits these non-Federal spacecraft to communicate with the ISS in this band. The Commission proposes to add this footnote to the Allocation Table in recognition of the importance of these space missions as well as the limited number of such missions which should present a minimal risk of interference occurring to other users of the band. As with USyyy, the Commission tentatively concludes that the power flux limits on these transmissions will prevent interference from occurring to receivers on the earth's surface from these transmissions. The Commission seeks comment on this proposal.

NASA has adopted a transition plan that envisions deorbiting the ISS in early 2031. Prior to deorbiting the ISS, NASA intends to purchase crew time from at least two Commercial LEO Destinations (CLDs)—*i.e.*, private space stations. As the projected lifetime of the ISS is now less than eight years, the Commission seeks comment on whether the new proposed footnotes USyyy and USzzz should be limited to spacecraft traveling to the ISS. Should these footnotes also apply to future manned space stations that are operated by commercial entities? Should they be limited to manned space stations only in low earth orbit or apply more generally to manned space stations anywhere beyond the Earth's atmosphere?

Space Operation

In this *FNPRM* the Commission continues its efforts to support the expanding activities of the commercial

space sector that benefit the public interest. Specifically, the Commission focuses on the question of spectrum allocation and licensing processes for certain post-space launch activities, particularly with respect to certain space operations communications currently addressed through experimental licensing, such as crew or cargo capsules destined for the International Space Station (ISS), or similar operations planned for the future, such as spectrum requirements for commercial crewed space stations. Commenters also raised a number of issues that overlap the topics currently being considered in the *Space Innovation; Facilitating Capabilities for In-space Servicing, Assembly, and Manufacturing* proceeding (FCC 22–66, IB Dockets 22–271, 22–272). This broader range of topics will be addressed separately and concurrently with that proceeding, as noted in the accompanying *Second Report and Order*.

Spectrum Allocation for Certain Post-Space Launch Payload Operations. The Commission seeks further comment on whether to include new spectrum allocations in specific bands for communications with cargo and crew capsules and payload communications with the ISS and other crewed space stations. In the *FNPRM* the Commission sought comment on whether there are improvements to the licensing process that could facilitate more routine licensing for certain payload activities currently addressed through experimental licensing. Specifically, the Commission noted the current use by SpaceX of S-band frequencies for cargo and crew capsules and links with the ISS as well as use by Orbital Sciences Corporation, a Northrop Grumman Systems Corporation Affiliate, of 2287.5 MHz (space-to-Earth) as well as 2287.5 MHz for links between the Cygnus spacecraft and TDRSS, and 2203.2 MHz for links between the Cygnus and the ISS. The Commission sought comment on whether any changes to the Table of Frequency Allocations being adopted or proposed for the 2025–2110 MHz and 2200–2290 MHz frequency bands were needed to provide for these cargo and crew capsule communications, what are the spectrum requirements for such operations, and if there are other frequency bands that the Commission should also consider for such uses.

In response, SpaceX noted that it has, through the STA process, used the 2025–2110 MHz band for its Dragon capsule to communicate with the ISS and TDRSS, and supports an expanded approach for 2200–2290 MHz band, which would alleviate the need for

seeking an STA to cover communication between SpaceX's Dragon and the ISS and TDRSS. Northrop Grumman also noted its use of the 2200–2290 MHz band for ISS-related communications and supports the inclusion of payload operations in the allocation for this band, which is used by its Cygnus mission. Northrop Grumman also suggested that the Commission adopt a fleet licensing process for payload activities, in specific for ISS-related activities, such as its Cygnus mission.

Other commenters supported allocations in the S-band as well as the L-band and X-band for OOS and RPO operations generally. Industry Participants assert that slightly expanding the 2200–2290 MHz and 2025–2110 MHz allocations to include RPO alongside space launch and reentry “would provide a safer space environment for time-critical RPO communications, where failure can result in loss of spacecraft, termination of a mission, and potentially loss of human lives.” They also note that commercial operators have already invested in technology that supports OOS operations in the S-band. Black Sky suggests opening the band for all on-orbit missions to put the U.S. industry on an equal footing with international operators. Spaceflight recommended that the Commission consider 8025–8400 MHz (X-band) and 1610–1626.5 MHz (L-band) for secondary allocation for payload operations specifically. In response to Spaceflight's suggestion for allocation in the L-band, Globalstar asserts that allocation for inter satellite links and space-to-space communication between a launch vehicle and satellites in the L-band is unnecessary and should continue to be authorized only on an experimental basis. In particular Globalstar focuses on the Big LEO band where Globalstar operates and has concerns of harmful interference. Federal agencies were generally opposed to changing the status of the S-band for payload operations as discussed in the accompanying *Second Report and Order*, however NTIA, NASA, DOD, and DOC note that the 2360–2395 MHz band could be used as an alternative to expanding allocation in 2200–2290 MHz band. The Commission considers this alternative in further discussion below.

As discussed in the accompanying *Second Report and Order*, the Commission concludes that deliberations for providing S-band, or other possible bands (such as L-band and X-band suggestions by Spaceflight), allocation for OOS/RPO more generally be continued via the ongoing ISAM

proceeding. However, the Commission seeks further comment on possible necessary changes to the Table of Frequency Allocations to account for space-to-space communications between a crew or cargo capsule and crewed space stations, including in bands outside the S-band. Do the three footnotes requested by NTIA meet this need? Should the Commission adopt an allocation for ISS-related space-to-space communications in this proceeding? Should the Commission expand such an allocation to account for future crewed space stations and operations not connected to the ISS? Should the rules addressing these operations be included in part 25 of the FCC's rules?

Suborbital Spaceflight Operations. Additionally, the Commission seeks further comment on spectrum allocation and licensing needs related to suborbital spaceflight. Are there aspects of suborbital commercial spaceflight that fall outside of the definition the Commission has adopted for space launch operations that requires further licensing and spectrum allocation considerations? In response to the *FNPRM*, Virgin Galactic noted its use, through experimental licensing, of the VHF band, L-band, and S-band for its suborbital flights and suggested that the Commission develop and adopt rules allowing allocation for commercial spaceflight operations in these bands. Specifically, Virgin Galactic has operated in the 123.225 MHz, 123.275 MHz, 123.375 MHz, 123.450 MHz, and 123.525 MHz (VHF) frequencies, the 1445.5 MHz, 1451.5 MHz, 1462.5 MHz, 1470.5 MHz 1480.5 MHz (L-band) frequencies, and the 2360–2390 MHz (S-band) frequencies. Communications in these bands have included telemetry as well as video and voice communications. The *Second Report and Order* the Commission adopted has limited use of the S-band to telemetry and tracking communications for launch under part 26. Should the Commission establish allocations beyond experimental or STA licensing for voice or video communications for these types of crewed suborbital spaceflight operations?

In further considering communication related to crewed suborbital operations the Commission notes the importance of safety of life communications. Currently, operators who obtain experimental licensing approvals or STAs for these activities are communicating on a non-protected, non-interference basis and must cease operations in the event interference with a primary or secondary allocated operator occurs. The Commission seeks comment on how it should ensure a

more permanent level of protection for suborbital spaceflight operation communications, while recognizing the need to avoid harmful interference with other important operations in already encumbered bands. Should any of the portions of the VHF, L-band, or S-band that have been authorized experimentally for communications beyond telemetry be allocated for suborbital spaceflight operations on a primary or secondary basis? Are there other bands beyond those the Commission is considering today that might be suitable for these operations?

Use of 2360–2395 MHz Band or Other Bands for Commercial Space Launch

Three frequencies in the 2360–2395 MHz band are available for both Federal and non-Federal telemetry and telecommand operations of launch vehicles. Beyond these three frequencies, the band is assigned primarily for aeronautical telemetry and telecommand operations for flight testing of aircraft and missiles. In the *FNPRM*, the Commission requested comment on changes that it could take in administering the 2360–2395 MHz space launch rules. For example, the Commission sought comment on whether it should administer the 2360–2395 MHz space launch use, which is currently regulated under subpart J of the Commission's part 87 rules, under the same rule part as the commercial space launch rules applicable to the 2200–2290 MHz band adopted in the *Second R&O* or retain the current part 87 designation.

In response to the *FNPRM*, certain commenters filed in support of expanding space launch use in the 2360–2395 MHz band. For example, SpaceX argues that uses of the band should extend to the full range of space operations, while Virgin Galactic encourages the Commission to ensure that any primary allocation of the band, as well as associated service and technical rules, facilitate telemetry and video downlink, which it states is consistent with Virgin Galactic's use of the spectrum to monitor the health and safety of its spaceflight participants and crew. NTIA, NASA, and DOD advocate the use of the 2360–2395 MHz band as an alternative to the 2200–2290 MHz and 2025–2110 MHz bands, arguing that the three existing frequencies in the 2360–2395 MHz band provide additional spectrum.

AFTRCC, however, argues that there should not be an expansion of the band and urges the Commission to limit the allocation in that band to just the three channels already allocated for space launches, and avoid proposing

allocations for space operations that include bands needed for flight testing and space launches. In support, AFTRCC asserts that space launches create large interference cones to flight test operations, and that even a few seconds of interference could disrupt the most critical portions of a flight test and would add a significant risk factor to aircraft flight tests in this band. Similarly, Boeing advises that the Commission should exercise caution with respect to the use of additional portions of the 2360–2395 MHz band for launch operations or in-orbit activities. Boeing asserts that the greater 2360–2395 MHz band is heavily used to support non-federal flight test operations in locations throughout the United States, and that use of the band by commercial aircraft manufacturers is intensive and increasing.

The Commission seeks further comment on expanding the use of the 2360–2395 MHz band, both in the context of additional uses to the band as well as expanding use in the band beyond the three frequencies currently designated. While the Commission is aware that this band is heavily used for flight test purposes and agrees that it should proceed cautiously with respect to measures that have the potential to introduce additional interference to operations in the band, the Commission also recognizes that the 2200–2290 MHz and 2025–2110 MHz bands may not accommodate the increasing numbers of operations in the future. While the Commission finds that providing space launch operators with increased certainty regarding access to the 2200–2290 MHz and 2025–2110 MHz band is in the public interest and that careful coordination will be effective in enabling use of these bands, the record supports further review of additional spectrum options. Accordingly, the Commission seeks to better understand the current use of the 2360–2395 MHz band. The Commission seeks information on how both flight testing and launch operations in the band are coordinated and conducted, and whether there are measures that could help increase use by space launch operations without increasing the risk of interference to flight test operations. For example, space launch operations in the band are subject to pre-grant frequency coordination, but do not have a coordination requirement once an authorization is granted. Would revising the 2360–2395 MHz band rules to apply provisions that are now applicable to the 2200–2290 MHz and 2025–2110 MHz band, including the per launch coordination requirement, help to

facilitate increased use of space launch operations in the 2360–2395 MHz band?

Further, the Commission received limited comment on how to administer rules relating to the 2360–2395 MHz band, in particular comment regarding whether and how to harmonize existing 2360–2395 MHz licensing and technical rules with rules now applicable to the 2200–2290 MHz and 2025–2110 MHz band. Accordingly, the Commission seeks further comment on certain 2360–2395 MHz issues that were first raised in the *FNPRM*. The Commission requests additional comment on how best to administer the space launch rules for this band. Should the Commission incorporate the 2360–2395 MHz space launch use into new part 26 or should it retain the part 87 designation? If the Commission administers the 2360–2395 MHz space launch use under the new rule part, should the Commission revise its rules to apply the same non-exclusive licensing scheme the Commission adopts today or retain the existing licensing framework provided under the current part 87 flight testing rules? In that event, should the Commission continue to apply the technical rules currently applicable to these services? The Commission also notes that space launch telemetry and telecommand operations in the 2360–2395 MHz band occur under a Mobile allocation. The Commission seeks further comment on whether it should add a primary Space Operation allocation to the band, subject to the same restrictions as apply to such operations under the Mobile allocation as specified in footnote US276 of the U.S. Table. Further, Industry Participants state that, while they appreciate the suggestion of increased 2360–2395 MHz band use in light of congestion in the S-band, the International Table of Frequency Allocations reserves this band for Fixed Service, Mobile Service, Amateur, and Radiolocation services, and consequently it would be necessary to modify that allocation to permit use of that band at the international level. Industry Participants state that a failure to obtain such a modification would be a hardship for on-orbit operators seeking mission support from non-U.S. ground stations. The Commission requests comment regarding this issue.

With respect to additional spectrum options for space launch operations, Virgin Galactic suggests that the Commission expand the use of the 1435–1525 MHz band for telemetry and safety of flight during spaceflight operations. As in the case of the 2360–2395 MHz band, the 1435–1525 MHz band is assigned primarily for

aeronautical telemetry and telecommand functions associated with flight testing. Space launch and reentry operations are permissible uses of the band. AFTRCC, however, argues that this band is the “workhorse spectrum” for aeronautical flight testing, and that interference with sensitive flight test equipment risks pilot safety and the success of test maneuvers. Accordingly, says AFTRCC, this band should be reserved for aeronautical mobile telemetry uses. The Commission seeks comment on whether the 1435–1525 MHz band can effectively accommodate space launch operations, or whether such use should be discouraged despite being permissible under our rules. As in the case with the 2360–2395 MHz band above, the Commission seeks information regarding the current usage of this band, how operations are conducted and coordinated, and whether there are measures that may be taken to successfully integrate space launch use along with flight test operations. Would per launch coordination including an enhanced scheduling mechanism be helpful? To the extent that commenters agree that space launch activities can occur along with flight test operations, the

Commission request that commenters also speak to any changes—similar to those discussed above for the 2360–2395 MHz band—the Commission should make to harmonize any space launch use in this band with rules applicable to the 2200–2290 MHz and 2025–2110 MHz bands. However, in the event that commenters believe that increased use of either of these bands for space launch uses should not be accommodated, the Commission requests comment on other spectrum bands that may be appropriate candidates.

Ordering Clauses

Accordingly, *it is ordered* that pursuant to Sections 1, 2, 4(i), 5(c), 301, 303(c), 303(f), and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 155(c), 301, 303(c), 303(f), and 303(r), and section 1.411 of the Commission’s rules, 47 CFR 1.411, this *Second Report and Order and Second Further Notice of Proposed Rulemaking is hereby adopted*.

It is further ordered that the Office of the Secretary, Reference Information Center, *shall send* a copy of the *Second Report and Order and Second Further*

Notice of Proposed Rulemaking including the Final Regulatory Flexibility Analysis and the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

Federal Communications Commission.

Marlene Dortch,
Secretary.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 2 as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

■ 1. The authority citation for part 2 continues to read as follows:

Authority: 47 U.S.C. 154, 302a, 303, and 336, unless otherwise noted.

■ 2. Amend § 2.106 paragraph (a) by revising the Table of Frequency Allocations, pages 36 and 37 to read as follows:

§ 2.106 Table of Frequency Allocations.

■ 3. Amend § 2.106 by adding (c)(96)(i) through (iii) to read as follows:

(c) * * *
(96) * * *

(i) USxxx Use of the bands 2290–2293 MHz and 2297–2300 MHz by Federal and non-Federal space stations may be authorized on a primary basis for the specific purpose of emergency transmissions from manned spacecraft used in the exploration and use of outer space, including the Moon and other celestial bodies. This allocation is restricted to emergency transmissions from manned spacecraft when experiencing emergency situations. Additionally, the bands 2025–2110 MHz and 2110–2120 MHz may also be authorized on a primary basis for transmissions of related commands to the spacecraft. Such operations should

be conducted in accordance with Recommendation ITU–R SA.1863.

(ii) USyyy In the band 2213.5–2218.5 MHz, non-Federal space stations operating in the space operation service providing transportation service of crew to and from the International Space Station, may be authorized on a primary basis to transmit in the space-to-Earth direction, to authorized receiving stations, subject to such conditions as may be applied on a case-by-case basis. Such transmissions shall not cause harmful interference to authorized Federal stations. The power flux-density at the Earth’s surface from such emissions from these non-Federal stations shall not exceed – 144 to – 154 dBW/m²/4 kHz, depending on the angle of arrival, in accordance with ITU Radio Regulation No. 21.16.

(iii) USzzz In the band 2200.2–2206.2 MHz, non-Federal space stations operating in the space operation service may be authorized on a primary basis to transmit to the International Space Station (ISS) while within 30 km of the ISS, subject to such conditions as may be applied on a case-by-case basis. Such transmissions shall not cause harmful interference to authorized Federal stations. The power-flux-density of such emissions at the Earth’s surface from these non-Federal stations shall not exceed – 144 to – 154 dBW/m²/4 kHz, depending on the angle of arrival, in accordance with ITU Radio Regulation No. 21.16. ITU Radio Regulation No. 5.392 also applies.

Thursday, February 1, 2024

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[S-214-2023]

Approval of Subzone Status; Helena Industries, LLC; Cordele, Georgia

On November 8, 2023, the Executive Secretary of the Foreign-Trade Zones (FTZ) Board docketed an application submitted by Georgia Foreign-Trade Zone, Inc., grantee of FTZ 26, requesting subzone status subject to the existing activation limit of FTZ 26, on behalf of Helena Industries, LLC, in Cordele, Georgia.

The application was processed in accordance with the FTZ Act and Regulations, including notice in the **Federal Register** inviting public comment (88 FR 77952, November 14, 2023; correction 88 FR 80272, November 17, 2023). The FTZ staff examiner reviewed the application and determined that it meets the criteria for approval. Pursuant to the authority delegated to the FTZ Board Executive

Secretary (15 CFR 400.36(f)), the application to establish Subzone 26X was approved on January 29, 2024, subject to the FTZ Act and the Board's regulations, including section 400.13, and further subject to FTZ 26's 2,000-acre activation limit.

Dated: January 29, 2024.

Elizabeth Whiteman,

Executive Secretary.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Five-Year (Sunset) Reviews

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In accordance with the Tariff Act of 1930, as amended (the Act), the U.S. Department of Commerce (Commerce) is automatically initiating the five-year reviews (Sunset Reviews) of the antidumping duty and countervailing duty (AD/CVD) order(s) and suspended investigation(s) listed below. The U.S. International Trade Commission (ITC) is publishing concurrently with this notice its notice of *Institution of Five-Year Reviews* which covers the same order(s) and suspended investigation(s).

DATES: Applicable February 1, 2024.

FOR FURTHER INFORMATION CONTACT:

Commerce official identified in the *Initiation of Review* section below at AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230. For information from the ITC, contact Mary Messer, Office of Investigations, U.S. International Trade Commission at (202) 205-3193.

SUPPLEMENTARY INFORMATION:

Background

Commerce's procedures for the conduct of Sunset Reviews are set forth in its *Procedures for Conducting Five-Year (Sunset) Reviews of Antidumping and Countervailing Duty Orders*, 63 FR 13516 (March 20, 1998) and 70 FR 62061 (October 28, 2005). Guidance on methodological or analytical issues relevant to Commerce's conduct of Sunset Reviews is set forth in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Duty Proceedings; Final Modification*, 77 FR 8101 (February 14, 2012).

Initiation of Review

In accordance with section 751(c) of the Act and 19 CFR 351.218(c), we are initiating the Sunset Reviews of the following antidumping and countervailing duty order(s) and suspended investigation(s):

DOC case No.	ITC case No.	Country	Product	Commerce contact
A-570-979 ...	731-TA-1190	China	Crystalline Silicon Photovoltaic Cells and Modules (2nd Review).	Thomas Martin, (202) 482-3936.

Filing Information

As a courtesy, we are making information related to sunset proceedings, including copies of the pertinent statute and Commerce’s regulations, Commerce’s schedule for Sunset Reviews, a listing of past revocations and continuations, and current service lists, available to the public on Commerce’s website at the following address: <https://enforcement.trade.gov/sunset/>. All submissions in these Sunset Reviews must be filed in accordance with Commerce’s regulations regarding format, translation, and service of documents. These rules, including electronic filing requirements via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), can be found at 19 CFR 351.303.

In accordance with section 782(b) of the Act, any party submitting factual information in an AD/CVD proceeding must certify the accuracy and completeness of that information. Parties must use the certification formats provided in 19 CFR 351.303(g). Commerce intends to reject factual submissions if the submitting party does not comply with applicable revised certification requirements.

Letters of Appearance and Administrative Protective Orders

Pursuant to 19 CFR 351.103(d), Commerce will maintain and make available a public service list for these proceedings. Parties wishing to participate in any of these five-year reviews must file letters of appearance as discussed at 19 CFR 351.103(d). To facilitate the timely preparation of the public service list, it is requested that those seeking recognition as interested parties to a proceeding submit an entry of appearance within 10 days of the publication of the Notice of Initiation. Because deadlines in Sunset Reviews can be very short, we urge interested parties who want access to proprietary

information under administrative protective order (APO) to file an APO application immediately following publication in the **Federal Register** of this notice of initiation. Commerce’s regulations on submission of proprietary information and eligibility to receive access to business proprietary information under APO can be found at 19 CFR 351.304–306. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).¹

Information Required From Interested Parties

Domestic interested parties, as defined in section 771(9)(C), (D), (E), (F), and (G) of the Act and 19 CFR 351.102(b), wishing to participate in a Sunset Review must respond not later than 15 days after the date of publication in the **Federal Register** of this notice of initiation by filing a notice of intent to participate. The required contents of the notice of intent to participate are set forth at 19 CFR 351.218(d)(1)(ii). In accordance with Commerce’s regulations, if we do not receive a notice of intent to participate from at least one domestic interested party by the 15-day deadline, Commerce will automatically revoke the order without further review.²

If we receive an order-specific notice of intent to participate from a domestic interested party, Commerce’s regulations provide that *all parties* wishing to participate in a Sunset Review must file complete substantive responses not later than 30 days after the date of publication in the **Federal Register** of this notice of initiation. The required contents of a substantive response, on an order-specific basis, are set forth at 19 CFR 351.218(d)(3). Note that certain information requirements differ for respondent and domestic parties. Also, note that Commerce’s information requirements are distinct from the ITC’s information requirements. Consult Commerce’s regulations for information regarding Commerce’s conduct of Sunset Reviews.

Consult Commerce’s regulations at 19 CFR part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at Commerce.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218(c).

Dated: January 18, 2024.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Advance Notification of Sunset Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

Background

Every five years, pursuant to the Tariff Act of 1930, as amended (the Act), the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission automatically initiate and conduct reviews to determine whether revocation of a countervailing or antidumping duty order or termination of an investigation suspended under section 704 or 734 of the Act would be likely to lead to continuation or recurrence of dumping or a countervailable subsidy (as the case may be) and of material injury.

Upcoming Sunset Reviews for March 2024

Pursuant to section 751(c) of the Act, the following Sunset Reviews are scheduled for initiation in March 2024 and will appear in that month’s *Notice of Initiation of Five-Year Sunset Reviews* (Sunset Review).

		Department contact
Antidumping Duty Proceedings		
Pasta from Italy, A–475–818 (5th Review)		Jacqueline Arrowsmith, (202) 482–5255.
Pasta from Turkey, A–489–805 (5th Review)		Jacqueline Arrowsmith, (202) 482–5255.

¹ *Administrative Protective Order, Service, and Other Procedures in Antidumping and*

Countervailing Duty Proceedings; Final Rule, 88 FR 67069 (September 29, 2023).

² See 19 CFR 351.218(d)(1)(iii).

	Department contact
Countervailing Duty Proceedings	
Pasta from Italy, C-475-819 (5th Review)	Mary Kolberg, C-489-806 (5th Review).
Pasta From Turkey, (202) 482-1785	Mary Kolberg, (202) 482-1785.

Suspended Investigations

No Sunset Review of suspended investigations is scheduled for initiation in March 2024.

Commerce's procedures for the conduct of Sunset Review are set forth in 19 CFR 351.218. The *Notice of Initiation of Five-Year (Sunset) Review* provides further information regarding what is required of all parties to participate in Sunset Review.

Pursuant to 19 CFR 351.103(c), Commerce will maintain and make available a service list for these proceedings. To facilitate the timely preparation of the service list(s), it is requested that those seeking recognition as interested parties to a proceeding contact Commerce in writing within 10 days of the publication of the Notice of Initiation.

Please note that if Commerce receives a Notice of Intent to Participate from a member of the domestic industry within 15 days of the date of initiation, the review will continue.

Thereafter, any interested party wishing to participate in the Sunset Review must provide substantive comments in response to the notice of initiation no later than 30 days after the date of initiation. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).¹

This notice is not required by statute but is published as a service to the international trading community.

Dated: January 18, 2024.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Certain Corrosion-Resistant Steel Products From the Republic of Korea: Final Results and Partial Rescission of Countervailing Duty Administrative Review; 2021

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that countervailable subsidies are being provided to producers and exporters of certain corrosion-resistant steel products from the Republic of Korea. The period of review (POR) is January 1, 2021, through December 31, 2021.

DATES: Applicable February 1, 2024.

FOR FURTHER INFORMATION CONTACT: Robert Palmer, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-9068.

SUPPLEMENTARY INFORMATION

Background

Commerce published the preliminary results of this administrative review on July 31, 2023.¹ For a description of the events that occurred since the *Preliminary Results*, see the Issues and Decision Memorandum.²

*Scope of the Order*³

The products covered by this *Order* are certain corrosion-resistant steel

¹ See *Certain Corrosion-Resistant Steel Products from the Republic of Korea: Preliminary Results and Partial Rescission of Countervailing Duty Administrative Review*; 2021, 88 FR 49440 (July 31, 2023) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

² See Memorandum, "Issues and Decision Memorandum for the Final Results and Partial Rescission of the 2021 Administrative Review of the Countervailing Duty Order on Certain Corrosion-Resistant Steel Products from the Republic of Korea," dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

³ See *Certain Corrosion-Resistant Steel Products from India, Italy, the People's Republic of China, the Republic of Korea and Taiwan: Amended Final Affirmative Antidumping Determination for India*

products. For a complete description of the scope of this *Order*, see the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in interested parties' case briefs are addressed in the Issues and Decision Memorandum accompanying this notice. A list of the issues raised by parties, and to which Commerce responded in the Issues and Decision Memorandum, is provided in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Changes Since the Preliminary Results

Based on a review of the record and comments received from interested parties regarding our *Preliminary Results*, and for the reasons explained in the Issues and Decision Memorandum, we made certain revisions to the subsidy calculations for KG Dongbu Steel Co., Ltd. (KG Dongbu). As a result of the changes to KG Dongbu's final subsidy rate, the final subsidy rate for the three non-selected companies under review also changed.⁴

Methodology

Commerce conducted this review in accordance with section 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act). For each of the subsidy programs found countervailable, we find that there is a subsidy, *i.e.*, a government-provided financial contribution that gives rise to a benefit to the recipient, and that the subsidy is specific.⁵ For a description of the methodology underlying all of Commerce's

and Taiwan, and Antidumping Duty Orders, 81 FR 48390 (July 25, 2016) (*Order*).

⁴ For details on the changes made since the *Preliminary Results*, see the Issues and Decision Memorandum.

⁵ See sections 771(5)(B) and (D) of the Act regarding financial contribution; section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.

¹ *Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings: Final Rule*, 88 FR 67069 (September 29, 2023).

conclusions, see the Issues and Decision Memorandum.

Partial Rescission of Review

Commerce’s practice is to rescind an administrative review of a countervailing duty order, pursuant to 19 CFR 351.213(d)(3), when there are no reviewable entries of subject merchandise during the POR for which liquidation is suspended.⁶ Normally, upon completion of an administrative review, the suspended entries are liquidated at the countervailing duty assessment rate calculated for the review period.⁷ Therefore, for an administrative review of a company to be conducted, there must be a reviewable, suspended entry that Commerce can instruct U.S. Customs and Border Protection (CBP) to liquidate at the countervailing duty assessment rate calculated for the review period.

In the *Preliminary Results*, we found the following four companies subject to this review did not have reviewable

entries during the POR for which liquidation is suspended: (1) SeAH Steel Corporation; (2) POSCO International; (3) POSCO Steeleon; and (4) Hyundai Steel Co., Ltd. Accordingly, pursuant to 19 CFR 351.213(d)(3), we stated our intention to rescind the review with respect to these companies in the final results.⁸ Because there is no evidence on the record that these four companies had entries, exports, or sales of subject merchandise during the POR, and no party filed comments with respect to our preliminary determination regarding these companies, we are rescinding this review with respect to these four companies consistent with 19 CFR 351.213(d)(3).

Companies Not Selected for Individual Review

There are three companies for which a review was requested, but which were not selected as mandatory respondents or found to be cross-owned with a

mandatory respondent. These companies are: (1) POSCO; (2) POSCO Coated & Color Steel Co., Ltd.; and (3) SeAH Coated Metal. For these three companies, because the rates calculated for mandatory respondents KG Dongbu and Hyundai Steel Company were above *de minimis* and not based entirely on facts available, we applied a final subsidy rate based on a weighted average of the rates calculated for the two mandatory respondents using the publicly ranged sales data they submitted on the record. This methodology for establishing the subsidy rate for the non-selected companies is consistent with our practice and with section 705(c)(5)(A) of the Act.

Final Results of Review

We determine that, for the period January 1, 2021, through December 31, 2021, the following total net countervailable subsidy rates exist:

Producer/exporter	Subsidy rate (percent <i>ad valorem</i>)
KG Dongbu Steel Co., Ltd	6.48
Hyundai Steel Company	0.82
Review-Specific Rate Applicable to Non-Selected Companies:	
POSCO	1.60
POSCO Coated & Color Steel Co., Ltd	1.60
SeAH Coated Metal	1.60

Disclosure

Commerce intends to disclose the calculations performed for these final results of review within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rate

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(2), Commerce has determined, and CBP shall assess, countervailing duties on all appropriate entries of subject merchandise in accordance with the final results of this review, for the above-listed companies at the applicable *ad valorem* assessment rates listed. Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International

Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Cash Deposit Rates

In accordance with section 751(a)(1) of the Act, Commerce intends to instruct CBP to collect cash deposits of estimated countervailing duties in the amounts shown for each of the respective companies listed above on shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. For all non-reviewed firms, we will instruct CBP to continue to collect cash deposits of estimated countervailing duties at the most recent company-specific or all-others rate applicable to the company, as appropriate. These cash deposits,

effective upon the publication of the final results of this review, shall remain in effect until further notice.

Administrative Protective Order

This notice also serves as a final reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

These final results are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

⁶ See, e.g., *Lightweight Thermal Paper from the People’s Republic of China: Notice of Rescission of Countervailing Duty Administrative Review*; 2015, 82 FR 14349 (March 20, 2017); and *Circular Welded*

[A–583–854]

Certain Steel Nails From Taiwan: Final Results of Antidumping Duty Administrative Review, Final Determination of No Shipments, and Final Determination of No Reviewable Sales; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that certain steel nails from Taiwan were sold in the United States at less than normal value during the period of review (POR), July 1, 2021, through June 30, 2022. Commerce also determines that certain companies under review

made no shipments of certain steel nails from Taiwan or had no reviewable sales during the POR.

DATES: Applicable February 1, 2024.

FOR FURTHER INFORMATION CONTACT: Faris Montgomery, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1537.

SUPPLEMENTARY INFORMATION:

Background

On August 3, 2023, Commerce published the preliminary results in the 2021–2022 administrative review of the antidumping duty order on certain steel nails from Taiwan and invited interested parties to comment.¹ The review covers 140 companies, including three mandatory respondents, four companies claiming no shipments of subject merchandise during the POR, three companies claiming no reviewable sales during the POR, and 130 companies not selected for individual examination.² A summary of the events that occurred since publication of the *Preliminary Results*, as well as a full discussion of the issues raised by parties for these final results, are included in the Issues and Decision Memorandum.³ Commerce conducted this administrative review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order⁴

The merchandise covered by this *Order* are certain steel nails from Taiwan. The certain steel nails subject to the *Order* are currently classifiable under Harmonized Tariff Schedule of

¹ See *Certain Steel Nails from Taiwan: Preliminary Results of Antidumping Duty Administrative Review, Preliminary Determination of No Shipments, Preliminary Determination of No Reviewable Sales, and Partial Rescission of Review; 2021–2022*, 88 FR 51291 (August 3, 2023) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

² *Id.* The mandatory respondents in this review are: Your Standing International, Inc. (YSI); Shang Jeng Nail Co., Ltd. (Shang Jeng); and World Kun Company Limited (World Kun). We note that Concord International Engineering & Trading Co., Ltd. was selected as a mandatory respondent, but claimed to have no reviewable sales in its questionnaire responses.

³ See Memorandum, “Issues and Decision Memorandum for the Final Results of the Antidumping Duty Administrative Review of Certain Steel Nails from Taiwan; 2021–2022,” dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

⁴ See *Certain Steel Nails from the Republic of Korea, Malaysia, the Sultanate of Oman, Taiwan, and the Socialist Republic of Vietnam: Antidumping Duty Orders*, 80 FR 39994 (July 13, 2015) (*Order*).

the United States (HTSUS) subheadings 7317.00.55.02, 7317.00.55.03, 7317.00.55.05, 7317.00.55.07, 7317.00.55.08, 7317.00.55.11, 7317.00.55.18, 7317.00.55.19, 7317.00.55.20, 7317.00.55.30, 7317.00.55.40, 7317.00.55.50, 7317.00.55.60, 7317.00.55.70, 7317.00.55.80, 7317.00.55.90, 7317.00.65.30, 7317.00.65.60 and 7317.00.75.00. Certain steel nails subject to this *Order* also may be classified under HTSUS subheadings 7907.00.60.00, 8206.00.00.00 or other HTSUS subheadings. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this *Order* is dispositive. For a complete description of the scope of the *Order*, see the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in parties' case and rebuttal briefs are addressed in the Issues and Decision Memorandum and are listed in appendix I to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Changes Since the Preliminary Results

Based on our findings at verification, Commerce made certain changes to the margin calculations for YSI. The Issues and Decision Memorandum contains descriptions of these changes.

Final Determination of No Shipments

In the *Preliminary Results*, Commerce determined that the following companies had no shipments of subject merchandise during the POR: Astrotech Steels Private Limited (Astrotech); Region Systems Sdn. Bhd (Region Systems); Region Industries Co., Ltd. (Region Industries); and Region International Co., Ltd (Region International).⁵ As we have not received any information to contradict this determination, consistent with our practice, we will instruct U.S. Customs and Border Protection (CBP) to liquidate any existing entries of subject merchandise produced by these four companies, but exported by other parties, at the all-others rate if there is

⁵ See *Preliminary Results*, 88 FR at 51292.

no rate for the intermediate company(ies) involved in the transaction.

Final Determination of No Reviewable Sales

In the *Preliminary Results*, Commerce determined that resellers Create Trading Co., Ltd. (Create Trading), Wiresmith Industrial Co., Ltd. (Wiresmith), and Concord International Engineering & Trading Co., Ltd. (Concord International) had no reviewable sales of subject merchandise during the POR.⁶ As we find that there is no evidence on the record of this review which warrants a different determination, we continue to find that these three companies had no reviewable sales during the POR. As discussed further in the “Assessment Rates” section below, we will instruct CBP to liquidate any existing entries of subject merchandise produced by Create Trading, Wiresmith, and Concord International’s respective unaffiliated suppliers and attributed to Create Trading, Wiresmith, and Concord International at the rate applicable to

the unaffiliated producers, or the all-others rate if there is no rate for the unaffiliated producers.⁷

Facts Available

Pursuant to section 776(a)(1) and 776(a)(2)(A)–(C) of the Act, we are relying upon facts otherwise available to assign estimated dumping margins to mandatory respondents Shang Jeng and World Kun because both companies were unresponsive to our requests for information, and thereby withheld necessary information that was requested by Commerce, failed to provide the information requested by the specified deadlines in the form and manner requested, and significantly impeded the conduct of the review. Further, Commerce finds that Shang Jeng and World Kun failed to cooperate by not acting to the best of their ability to comply with requests for information and, thus, Commerce is applying an adverse inference in selecting among the facts available, in accordance with section 776(b) of the Act. As adverse facts available, we are assigning these

companies a rate of 78.17 percent, which is the highest rate applied in any segment of this proceeding.

Rate for Non-Selected Companies

As we stated in the *Preliminary Results*, the weighted-average dumping margin for YSI is not zero, *de minimis*, or based entirely on facts otherwise available, whereas other selected mandatory respondents’ weighted-average dumping margins are based entirely on facts available. Commerce, therefore, assigned a weighted-average dumping margin to the non-examined companies that is equal to the weighted-average dumping margin for YSI in accordance with its practice. This determination is unchanged for the final results.

Final Results of Review

We have determined the following dumping margins for the firms listed below for the period July 1, 2021, through June 30, 2022:

Exporter/producer	Weighted-average dumping margin (percent)
Your Standing International, Inc	26.28
Shang Jeng Nail Co., Ltd	78.17
World Kun Company Limited	78.17
Companies under Review Not Selected for Individual Examination ⁸	26.28

Disclosure

We intend to disclose the calculations performed for YSI within five days of the date of publication of this notice to parties in this proceeding, in accordance with 19 CFR 351.224(b).

Assessment Rates

Commerce has determined, and CBP shall assess, antidumping duties on all appropriate entries in this review, in accordance with section 751(a)(2)(C) of the Act and 19 CFR 351.212(b). Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of these final results in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request

for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Pursuant to 19 CFR 351.212(b)(1), because YSI’s weighted-average dumping margin is not zero or *de minimis* within the meaning of 19 CFR 351.106(c)(1), we calculated importer-specific antidumping duty assessment rates on the basis of the ratio of the total amount of dumping calculated for each importer’s examined sales to the total entered value of those sales.⁹ Where we do not have entered values for all U.S. sales to a particular importer, we calculated an importer-specific, per-unit assessment rate on the basis of the ratio of the total amount of dumping calculated for the importer’s examined sales to the total quantity of those sales. To determine whether an importer-specific, per-unit assessment rate is *de minimis*, in accordance with 19 CFR 351.106(c)(2), we also will calculate an

importer-specific *ad valorem* ratio based on estimated entered values. Where an importer-specific assessment rate is zero or *de minimis*, we intend to instruct CBP to liquidate appropriate entries without regard to antidumping duties.¹⁰

For entries of subject merchandise during the POR produced by an individually examined respondent for which it did not know its merchandise was destined for the United States, we intend to instruct CBP to liquidate such entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.¹¹

In addition, because we found no shipments of subject merchandise for Astrotech, Region Systems, Region Industries, and Region International in the final results, any suspended entries made under that exporter’s case number (*i.e.*, at that exporter’s rate) will be liquidated at the all-others rate if there

⁶ *Id.*

⁷ See *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954, 23954 (May 6, 2003) (*Assessment of Antidumping Duties*); see also *Certain Pasta from Turkey: Notice of Preliminary Results of Antidumping Duty Administrative Review*, 76 FR 23974, 23977 (April 29, 2011), unchanged in *Pasta*

from Turkey: *Notice of Final Results of the 14th Antidumping Duty Administrative Review*, 76 FR 68399 (November 4, 2011).

⁸ See appendix II for a list of these companies.

⁹ See 19 CFR 351.212(b)(1).

¹⁰ See 19 CFR 351.106(c)(2); see also *Antidumping Proceeding: Calculation of the*

Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Proceedings: Final Modification, 77 FR 8101, 8103 (February 14, 2012).

¹¹ See *Assessment of Antidumping Duties*, 68 FR at 23954.

is no rate for the intermediate company(ies) involved in the transaction.

Because we continue to find Concord International, Create Trading, and WireSmith had no reviewable entries during the POR in the final results, any suspended entries of subject merchandise associated with these companies will be liquidated at the rate applicable to the unaffiliated producers, or the all-others rate if there is no rate for the unaffiliated producers.

For the companies which were not selected for individual examination listed in appendix II, we assigned an antidumping duty assessment rate equal to the weighted-average dumping margin determined for these companies in the final results of review (*i.e.*, the margin for the sole cooperating mandatory respondent YSI).

Cash Deposit Requirements

The following cash deposit requirements will be in effect for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for YSI, Shang Jeng, World Kun, and the companies listed in appendix II will be equal to the appropriate dumping margin established in the final results of this administrative review; (2) for previously reviewed or investigated companies not covered in this review, the cash deposit rate will continue to be the company-specific rate published for the most recently-completed segment of this proceeding in which the company was reviewed; (3) if the exporter is not a firm covered in this review, a prior completed review, or the less-than-fair value (LTFV) investigation, but the producer is, then the cash deposit rate will be the company-specific rate established for the most recently-completed segment of this proceeding for the producer of subject merchandise; and (4) the cash deposit rate for all other producers and exporters will continue to be 2.16 percent, the all-others rate established in the LTFV investigation, as amended.¹² These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility

¹² See *Certain Steel Nails from Taiwan: Notice of Court Decision Not in Harmony With Final Determination in Less Than Fair Value Investigation and Notice of Amended Final Determination*, 82 FR 55090 (November 20, 2017).

under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as a final reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing these final results of administrative review in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.221(b)(5).

Dated: January 26, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

[FR Doc. 2024-02003 Filed 1-31-24; 8:45 am]

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Notice of Availability of Draft Programmatic Environmental Assessment for Modernization and Internal Expansion of Existing Semiconductor Fabrication Facilities Under the CHIPS Incentives Program

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice; availability of a Draft Programmatic Environmental Assessment; extension of comment period.

SUMMARY: The National Institute of Standards and Technology (NIST) is extending the period for submitting comments on the Draft Programmatic Environmental Assessment (PEA) for the modernization and internal expansion of existing semiconductor fabrication facilities under the CHIPS Incentives Program. The original deadline for public comments was January 25, 2024. NIST is extending the deadline until February 9, 2024.

DATES: The comment period for the notice published December 27, 2023, at 88 FR 89372, is extended. Comments must be received on or before February 9, 2024. Comments received after January 25, 2024, and before publication of this notice are deemed to be timely. Those who have already submitted comments need not resubmit.

ADDRESSES: The PEA is available for download and review at <https://www.nist.gov/chips/national-environmental-policy-act-nepa>, under the heading “NEPA Public Involvement.”

You may submit comments on the PEA by the following methods:
Electronic Submission: Submit all electronic public comments via email to ChipsNEPA@chips.gov citing “Modernization PEA” in the subject line. NIST will accept comments in attached Word or PDF formats or within the body of the email.

By mail: Comments can also be mailed to the CHIPS Incentives Program at: Department of Commerce; HCHB Room 7419; ATTN: CPO Environmental Division; 1401 Constitution Ave NW, Washington, DC 20230.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NIST. All comments received are a part of the public record; commenters should not include

personal identifying information (*e.g.*, name, address, etc.), confidential business information, or otherwise sensitive information. NIST will accept anonymous comments. The most helpful comments include a specific recommendation, explain the reason for any recommended change, and provide supporting information. NIST will consider all relevant comments received on or before the closing date.

FOR FURTHER INFORMATION CONTACT: David Frenkel, NIST, telephone number 240-204-1960, email David.Frenkel@chips.gov.

SUPPLEMENTARY INFORMATION: In a **Federal Register** notice dated December 27, 2023 (88 FR 89372), NIST announced the availability of the Draft PEA for the modernization and internal expansion of existing semiconductor fabrication facilities under the CHIPS Incentives Program. NIST has prepared the draft PEA in accordance with the National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) and the Council on Environmental Quality’s (CEQ) NEPA implementing regulations (40 CFR parts 1500 through 1508). The PEA addresses financial assistance for the modernization or internal expansion of existing current-generation and mature-node commercial facilities within their existing footprint throughout the U.S.

The original deadline for public comments was January 25, 2024. NIST has received a request for an extension of the comment period due to the length and technical content of the document. NIST is therefore extending the deadline until February 9, 2024.

Authority: This notice is provided pursuant to NEPA and CEQ’s NEPA implementing regulations (40 CFR 1506.6).

Tamiko Ford,

NIST Executive Secretariat.

[FR Doc. 2024-02042 Filed 1-31-24; 8:45 am]

BILLING CODE 3510-13-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

CHIPS Manufacturing USA Institute

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice of Intent (NOI).

SUMMARY: The CHIPS Research and Development Office (CHIPS R&D) intends to announce an open competition for a new Manufacturing

USA Institute. The expected competition will seek to establish one (1) Manufacturing USA Institute focused on the topic of digital twins for semiconductor manufacturing, packaging, and assembly and the validation of such digital twins in a physical prototyping facility. This NOI is provided to allow potential applicants sufficient time to develop meaningful collaborations among industry, academic, Federal laboratory, and state/local government partners.

FOR FURTHER INFORMATION CONTACT: All inquiries may be directed to Mahesh Mani (301-975-2000) via email to research@chips.gov, with a subject line stating: 'MFG USA CHIPS Institute Competition.' All answers, which will be provided at the sole discretion of CHIPS R&D, will be posted on the NIST competition website at <https://www.nist.gov/chips/chips-RD-funding-opportunities>.

SUPPLEMENTARY INFORMATION:

Purpose. The CHIPS Research and Development Office (CHIPS R&D) intends to announce an open competition for a new Manufacturing USA Institute, pursuant to 15 U.S.C. 4656(f). The expected competition will seek to establish one (1) Manufacturing USA Institute focused on the topic of digital twins for semiconductor manufacturing, packaging, and assembly and the validation of such digital twins in a physical prototyping facility. This CHIPS Manufacturing USA Institute will be established and operate in accordance with 15 U.S.C. 278s, as amended. For general planning purposes, the minimum expected NIST commitment will be approximately \$200 million over a 5-year period. CHIPS R&D expects to leverage private sector and other non-Federal investments on a substantially greater than 1:1 basis.

This NOI is provided to allow potential applicants sufficient time to develop meaningful collaborations among industry, academic, Federal laboratory, and state/local government partners. Details in this NOI should also inform discussions at a planned February 2024 CHIPS Manufacturing USA Institute Industry Day where the government will solicit feedback on the NIST plans and timelines for the Institute. CHIPS R&D expects to announce the competition via a Notice of Funding Opportunity (NOFO) on [Grants.gov](https://www.grants.gov) at <https://www.grants.gov> in the second quarter of calendar year 2024. CHIPS R&D reserves the right to refine program structure, cost, co-investment requirements, and other program details in the eventual NOFO.

In the event of inconsistencies between the NOI and the NOFO, the NOFO shall take precedence.

Background

Program Background: The CHIPS and Science Act appropriated approximately \$50 billion to the Department of Commerce—\$39 billion in incentives to onshore semiconductor manufacturing and \$11 billion to advance U.S. leadership in semiconductor R&D. Congress authorized NIST to establish not more than three Manufacturing USA Institutes focused on semiconductor manufacturing. Manufacturing USA Institutes are public-private partnerships that bring together industry of all sizes, universities and community colleges, federal agencies, and state organizations to accelerate innovation by investing in industrially relevant technologies that advance specific technology sectors. Institutes may address the full spectrum of advanced manufacturing challenges, such as innovation for manufacturing processes, novel materials, cross cutting enabling technology, supply chain integration methodology and education and workforce development.

After receiving extensive public input, CHIPS R&D determined that a single institute with both regionally-focused programs and meaningful cross-region participation will best meet the CHIPS R&D program goals of strengthening U.S. technology leadership, accelerating ideas to market, and realizing a robust semiconductor workforce. Despite substantial existing investment in proprietary digital twin technology, the United States lacks a comprehensive environment for collaborative development and validation of semiconductor industry digital twins. In establishing a single institute with national reach, CHIPS R&D seeks to enable the seamless integration of digital twin models into U.S. semiconductor manufacturing, advanced packaging, and assembly, enabling rapid adoption of innovations and enhancing domestic competitiveness for decades. The CHIPS Manufacturing USA Institute will foster a collaborative environment to significantly expand innovation, bring tangible benefits to manufacturers of all sizes, strengthen diverse research institutions, and ensure a national reach in workforce development.

CHIPS Manufacturing USA Institute Objectives: CHIPS R&D expects that the NOFO soliciting proposals will seek to achieve the following objectives:

1. Significantly reduce U.S. chip development and manufacturing costs, such as by improving capacity planning,

optimizing production, and enabling real-time process adjustments.

2. Improve development cycle time and accelerate adoption of innovative semiconductor manufacturing technologies, including breakthrough tools, manufacturing equipment, materials, and manufacturing processes validated at the shared facility.

3. Advance digital twin-enabled curricula and best practices for training the semiconductor workforce nationwide.

4. Create a digital twin marketplace for industry, including entrepreneurs, to access digital models and manufacturing process flows and to de-risk digital twin development and implementation.

CHIPS R&D expects to solicit proposals demonstrating strong industry leadership capable of catalyzing collaboration in software development relevant to digital twins (including but not limited to electronic design automation tools), semiconductor manufacturing, advanced packaging, and assembly. Expected activities include establishing a shared physical facility where companies can experiment while protecting proprietary information; enabling industry-relevant research projects; leveraging a shared marketplace that enables data aggregation across companies, while protecting proprietary data, to make powerful digital twins available at low cost; and operating an education and workforce development program, which may include partnerships with educational institutions.

Competition Information: Once the open competition has been announced, further information may be found at <https://www.nist.gov/chips/chips-RD-funding-opportunities>.

System for Award Management: In anticipation of the NOFO, CHIPS R&D encourages potential applicants to complete the following steps, which are required to submit applications for Federal assistance:

- Register with the System for Award Management (SAM) at <https://www.sam.gov>. CHIPS R&D strongly encourages applicants to register for SAM.gov as early as possible. While this process ordinarily takes between three days and two weeks, in some circumstances it can take six or more months to complete due to information verification requirements. Recipients will be required to maintain an active registration in SAM and re-validate registration annually.

- Register for a [Grants.gov](https://www.grants.gov) (<https://www.grants.gov>) account. It is advisable also to go to “manage subscriptions” on [Grants.gov](https://www.grants.gov) and sign

up to receive automatic updates when amendments to a funding opportunity are posted.

Disclaimer. This NOI does not constitute a solicitation. No applications may be submitted in response to this NOI. Any inconsistency between information within this NOI and the eventual NOFO announcing the CHIPS Manufacturing USA Institute award competition shall be resolved in favor of the NOFO.

Authority: DOC CHIPS activities were authorized by Title XCIX—Creating Helpful Incentives to Produce Semiconductors for America of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (Pub. L. 116–283, often referred to as the CHIPS Act).

Tamiko Ford,

NIST Executive Secretariat.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

CHIPS National Advanced Packaging Manufacturing Program (NAPMP) Materials and Substrates Research and Development

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice of Intent (NOI).

SUMMARY: The CHIPS Research and Development Office (CHIPS R&D) intends to announce, via a Notice of Funding Opportunity (NOFO), an open competition for new research and development (R&D) activities to establish and accelerate domestic capacity for advanced packaging substrates and substrate materials, a key technology for manufacturing semiconductors. CHIPS R&D anticipates making available up to approximately \$300,000,000 for multiple awards in amounts up to approximately \$100,000,000 per award, not including voluntary co-investment, over up to 5 years and made through cooperative agreements or other transactions. The purpose of this NOI is to offer preliminary information to potential applicants, facilitating the development of meaningful partnerships and strong, responsive proposals.

FOR FURTHER INFORMATION CONTACT: All inquiries may be directed to Chris Greer (301–975–2000) via email to research@chips.gov, with a subject line stating: ‘2024–NIST–CHIPS–NAPMP–01

Questions.’ All answers, which will be provided at the sole discretion of CHIPS R&D, will be posted on the NIST competition website at <https://www.nist.gov/chips/chips-RD-funding-opportunities>.

SUPPLEMENTARY INFORMATION:

Purpose. The CHIPS Research and Development Office (CHIPS R&D) intends to announce, via a Notice of Funding Opportunity (NOFO), an open competition for new research and development (R&D) activities to establish and accelerate domestic capacity for advanced packaging substrates and substrate materials, a key technology for manufacturing semiconductors. CHIPS R&D anticipates making available up to approximately \$300,000,000 for multiple awards in amounts up to approximately \$100,000,000 per award, not including voluntary co-investment, over up to 5 years and made through cooperative agreements or other transactions. Co-investment (cost share) is not required in this program. CHIPS R&D will, however, give preference to applications that demonstrate committed co-investment in their application.

The purpose of this NOI is to offer preliminary information to potential applicants, facilitating the development of meaningful partnerships and strong, responsive proposals. CHIPS R&D intends to announce the competition no later than March 2024 by posting the NOFO on [Grants.gov](https://www.grants.gov) at <https://www.grants.gov>. More information about the expected CHIPS R&D NAPMP Materials and Substrates competition will then be available at the CHIPS for America website at <https://www.nist.gov/chips/chips-RD-funding-opportunities>.

Background. Emerging technologies like artificial intelligence, advanced telecommunications, biomedical devices, and autonomous vehicles require leap-ahead advances in microelectronics capabilities. Improving all aspects of system performance to support the breadth of new semiconductor applications will require advanced packaging and related capabilities, such as heterogeneous integration, to address the need to integrate multi-component-assemblies with large numbers of interconnects to achieve a degree of integration that blurs the line between chip and package.

In particular, the ability to “scale-down and scale-out” will be critical, where “scale-down” refers to shrinking the size of the features on the package and “scale-out” refers to increasing the number of chips assembled on the substrate.

Materials and substrates are foundational to achieving the necessary advancements. Moreover, materials and substrates R&D, particularly applied R&D, is critical to expanding the U.S. packaging ecosystem.

CHIPS R&D Mission and Goals: The CHIPS and Science Act appropriated approximately \$50 billion to the Department of Commerce—\$39 billion in incentives to onshore semiconductor manufacturing and \$11 billion to advance U.S. leadership in semiconductor R&D. Within CHIPS for America, the mission of CHIPS R&D is to accelerate the development and commercial deployment of foundational semiconductor technologies by establishing, connecting, and providing access to domestic research efforts, tools, resources, workers, and facilities. NAPMP, one of multiple CHIPS R&D initiatives, seeks to drive U.S. leadership in advanced packaging and provide the technology and skilled workforce needed for packaging manufacturing in the United States.

Within a decade, NAPMP-funded activities, coupled with CHIPS manufacturing incentives, will establish a vibrant, self-sustaining, profitable, onshore packaging industry where advanced node chips manufactured in the United States and abroad can be packaged in appropriate volumes within the United States and innovative designs and architectures are enabled through leading-edge packaging capabilities. In combination with other CHIPS for America education and workforce efforts, NAPMP-funded activities produce the diverse and capable workforce needed for the success of the domestic packaging sector.

Materials and Substrates NOFO Objectives: Three major R&D areas have the potential to make a significant impact on domestic advanced packaging capabilities: organic materials and substrates (including fan-out); glass materials and substrates; and semiconductor-based substrates. Within these areas, CHIPS R&D intends to fund R&D activities that establish and promote relevant domestic capability and capacity, with the following objectives:

1. Accelerate domestic R&D and innovation in advanced packaging materials and substrates;
2. Transition domestic materials and substrate innovation into U.S. manufacturing, such that these technologies are available to U.S. manufacturers and customers, including to significantly benefit U.S. economic and national security;

3. Support the establishment of a robust, sustainable, domestic capacity for advanced packaging materials and substrate R&D, prototyping, commercialization, and manufacturing; and

4. Promote a skilled and diverse pipeline of workers for a sustainable domestic advanced packaging industry.

Funded activities are expected to include, but not necessarily be limited to, basic and applied research, substrate and demonstration device development and production, commercial viability and domestic manufacturing preparation, integrated workforce education and training, and pilot-level substrate production.

To ensure that funded R&D meets the above objectives, CHIPS R&D expects to define aggressive technical targets (*e.g.*, substrate wiring, via pitches, and number of levels on both sides of the substrate) for applicants to achieve. CHIPS R&D will also encourage proposals for advanced substrates that incorporate one or more passive or active components embedded in the substrate for enhanced functionality. Whereas traditional boards, silicon or glass interposers and small area substrates are not expected to be in scope for this NOFO, composite substrates using fan-out wafer-level packaging, including flexible and biocompatible substrates, are expected to be entertained. CHIPS R&D will further expect that substrates be compatible with direct attach at fine pitch of advanced node CMOS, legacy nodes, and non-silicon dielets. Substrate proposals will be strongly encouraged to incorporate embedded substrate features and active and passive devices and through substrate vias. CHIPS R&D will further expect applicants to define non-technical targets related to advanced packaging education and workforce development and to demonstrating both the commercial viability and the potential for the domestic production of innovations funded under the NOFO.

Eligibility: CHIPS R&D expects eligible applicants and subrecipients will include for-profit organizations; non-profit organizations; accredited institutions of higher education including community and technical colleges; state, local, territorial, and Indian tribal governments.

Applicants must be incorporated in the United States (including U.S. territories). Eligible applicants may only submit one concept paper and one full application under this NOFO. Full applications will only be accepted from applicants invited after the concept paper stage. Entities may not be

included as subrecipients on more than two applications.

Entities that operate Federally Funded Research and Development Centers (FFRDCs) may be eligible to receive this funding as sub-subrecipients to an eligible applicant to the extent allowed by law, based on the unique and specific needs of the project.

Foreign organizations may participate as members of a project team, as sub-subrecipients or contractors, subject to CHIPS R&D approval based on a written justification that the foreign partner's involvement is essential to advancing program objectives, among other considerations.

R&D Collaboration: CHIPS R&D expects that applicants assembling teams comprising one or more subrecipients may be best suited to collectively provide the full range of expertise and capabilities needed to achieve the program objectives and to successfully strengthen U.S. materials and substrates innovation. Equally important, these types of partnerships can promote inventiveness, clarify future demand, improve transparency and security, solidify business and domestic manufacturing plans (including plans for technology adoption by defense and commercial partners), help educate the future workforce, mitigate the risk of future chip shortages or oversupply, and support a more productive, efficient, and self-sustaining semiconductor ecosystem.

CHIPS R&D therefore encourages applications that demonstrate collaboration across the innovation, manufacturing, supply chain, and customer landscape.

Application Process and Award Information: The envisioned application process consists of a mandatory concept paper and a required full application. CHIPS R&D anticipates a due date for concept papers of approximately 35 days after the date of NOFO publication. Full applications will only be accepted from applicants invited to apply after the concept paper stage. Submissions from entities other than those specifically invited to submit a full application will not be reviewed or considered in any way.

To provide the public with an opportunity to learn more about the NOFO before the concept paper deadline, CHIPS R&D expects to host a Proposers Day after NOFO release to familiarize potential applicants with the NOFO objectives and program structure. CHIPS R&D will announce details regarding the date and location of the Proposers Day via the CHIPS R&D website at <https://www.nist.gov/chips/>

chips-RD-funding-opportunities. This event will be for informational purposes only. Attendance is not a prerequisite for submitting a concept paper or application.

Competition Information: Once the open competition has been announced, further information may be found at <https://www.nist.gov/chips/chips-RD-funding-opportunities>.

System for Award Management: In anticipation of the NOFO, CHIPS R&D encourages potential applicants to complete the following steps, which are required to submit applications for Federal assistance:

- Register with the System for Award Management (SAM) at <https://www.sam.gov>. CHIPS R&D strongly encourages applicants to register for SAM.gov as early as possible. While this process ordinarily takes between three days and two weeks, in some circumstances it can take six or more months to complete due to information verification requirements. Recipients will be required to maintain an active registration in SAM and re-validate registration annually.

BILLING CODE 3510–13–P

COMMODITY FUTURES TRADING COMMISSION

Agency Information Collection Activities Under OMB Review

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (“PRA”), this notice announces that the Information Collection Request (“ICR”) abstracted below has been forwarded to the Office of Information and Regulatory Affairs (“OIRA”), of the Office of Management and Budget (“OMB”), for review and comment. The ICR describes the nature of the information collection and its expected costs and burden.

DATES: Comments must be submitted on or before March 4, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be submitted within 30 days of this notice’s publication to OIRA, at <https://www.reginfo.gov/public/do/PRAMain>. Please find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the website’s search function. Comments can be entered electronically by clicking on the “comment” button next to the information collection on the “OIRA Information Collections Under Review” page, or the “View ICR—Agency Submission” page. A copy of the supporting statement for the collection of information discussed herein may be obtained by visiting <https://www.reginfo.gov/public/do/PRAMain>.

In addition to the submission of comments to <https://Reginfo.gov> as indicated above, a copy of all comments submitted to OIRA may also be submitted to the Commodity Futures Trading Commission (the “Commission” or “CFTC”) by clicking on the “Submit Comment” box next to the descriptive entry for OMB Control No. 3038–0082, at <https://comments.cftc.gov/FederalRegister/PublicInfo.aspx>.

Or by either of the following methods:

- *Mail:* Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581.

- *Hand Delivery/Courier:* Same as Mail above.

Please submit your comments using only one method.

All comments must be submitted in English, or if not, accompanied by an English translation. Comments submitted to the Commission should include only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according

to the procedures established in § 145.9 of the Commission’s regulations.¹ The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from <https://www.cftc.gov> that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the ICR will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT: Christina McGlosson, Acting Director, Whistleblower Office, Commodity Futures Trading Commission, (202) 418–5051; email: cmcglosson@cftc.gov, and refer to OMB Control No. 3038–0082.

SUPPLEMENTARY INFORMATION:

Title: The Whistleblower Provision of section 23 of the Commodity Exchange Act (OMB Control No. 3038–0082). This is a request for extension of a currently approved information collection.

Abstract: 17 CFR 165.3(a) requires the submission of information to the Commission on a Form TCR. The Form TCR, “Tip, Complaint, or Referral,” and the instructions thereto, are designed to capture basic identifying information about a complainant and elicit sufficient information to determine whether the conduct alleged suggests a violation of the Commodity Exchange Act. 17 CFR 165.7(b)(1) requires the submission of information to the Commission on a Form WB–APP. The Form WB–APP, “Application for Award for Original Information Provided Pursuant to Section 23 of the Commodity Exchange Act,” and the instructions thereto, are designed to elicit sufficient information to determine whether and to what extent a claimant qualifies for a whistleblower award.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.² On November 21, 2023, the Commission published in the **Federal Register** notice of the proposed extension of this information collection and provided 60 days for public comment on the proposed extension, 88 FR 81064 (“60-Day Notice”). The Commission received one comment requesting individual staff feedback on

¹ 17 CFR 145.9.

² 44 U.S.C. 3512, 5 CFR 1320.5(b)(2)(i) and 1320.8(b)(3)(vi). See also 46 FR 63035 (Dec. 30, 1981).

each submission received, in addition to the automated reply currently sent by the CFTC as notice of receipt. We appreciate the comment but would like to clarify that determinations on the submitted applications (including their supplements) are provided in due course according to the procedures outlined in 17 CFR part 165. Given the non-public nature of investigations, it would not be feasible for the CFTC to provide individual feedback on each submission received.

Burden Statement: The respondent burden for this collection is estimated to be as follows:

Estimated Number of Respondents: 1800 per year.

Estimated Average Burden Hours per Respondent: 0.5 hour.

Estimated Total Annual Burden Hours: 900 hours.

Frequency of Collection: Once.

There are no capital costs or operating and maintenance costs associated with this collection.

(Authority: 44 U.S.C. 3501 *et seq.*)

Dated: January 29, 2024.

Robert Sidman,

Deputy Secretary of the Commission.

BILLING CODE 6351–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 5679–041]

Energy Stream, LLC; Notice of Intent To Prepare an Environmental Assessment

On July 15, 2022, Energy Stream, LLC filed an application for a subsequent license for the 512-kilowatt M.S.C. Hydroelectric Project (M.S.C. Project or project; FERC No. 5679). The M.S.C. Project is located on the Quinebaug River, in Windham County, Connecticut.

In accordance with the Commission’s regulations, on November 14, 2023, Commission staff issued a notice that the project was ready for environmental analysis (REA notice). Based on the information in the record, including comments filed on the REA notice, staff does not anticipate that licensing the project would constitute a major federal action significantly affecting the quality of the human environment. Therefore, staff intends to prepare an Environmental Assessment (EA) on the application to license the M.S.C. Project. The EA will be issued and circulated for review by all interested parties. All

comments filed on the EA will be analyzed by staff and considered in the Commission's final licensing decision.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members, and others to access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

The application will be processed according to the following schedule. Revisions to the schedule may be made as appropriate.

Milestone	Target date
Commission issues EA	July 2024. ¹
Comments on EA	August 2024.

Questions regarding this notice may be directed to John Baummer at (202) 502-6837 or john.baummer@ferc.gov.

Dated: January 26, 2024.

Debbie-Anne Reese,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 516–513]

Dominion Energy South Carolina, Inc.; Notice of Availability of Final Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory

Commission's (Commission or FERC) regulations, 18 CFR part 380, Commission staff reviewed Dominion Energy South Carolina's (licensee) application for a Non-project Use of Project Lands and Waters of the Saluda Hydroelectric Project No. 516 and have prepared an Environmental Assessment (EA) for a proposed water withdraw. The licensee proposes to allow the City of West Columbia, South Carolina (City), the use of Saluda Hydroelectric project lands and waters to expand the use of the City's existing raw water withdrawal facility. The City would replace two pumps within their exiting raw water intake facility, excavate and install a larger conveyance pipe, and increase its maximum withdrawal from Lake Murry from an approved 48 million gallons per day (mgd) to 72 mgd, an increase of 24 mgd. The Saluda project is located on the Saluda River in Richland, Lexington, Saluda, and Newberry counties, South Carolina. The proposed action is located at the existing raw water pump facility in Lexington County. The project does not occupy federal lands.

The final EA contains Commission staff's analysis of the potential environmental effects of the proposed water withdraw, alternatives to the proposed action, and concludes that the proposed water withdraw, with appropriate environmental protective measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The final EA may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number (P-516-513) in the docket number field to access the document. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at 1-866-208-3676, or for TTY, (202) 502-8659.

You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[CP24-37-000]

Columbia Gulf Transmission, LLC; Notice of Application and Establishing Intervention Deadline

Take notice that on January 16, 2024, Columbia Gulf Transmission, LLC (Columbia Gulf), 700 Louisiana Street, Suite 1300, Houston, Texas, 77002-2700, filed an application under section 7(b) of the Natural Gas Act (NGA), and part 157 of the Commission's regulations requesting authorization for its Amoco South Pecan Lake Abandonment Project (Project). The Project consists of the abandonment of approximately 21 miles of obsolete pipeline and related appurtenances, located in Cameron Parish, Louisiana. Columbia Gulf states that the Project will eliminate the need for future operating and maintenance expenditures on outdated facilities that are no longer needed to satisfy current firm service obligations. Columbia Gulf states that abandonment of these facilities will not change the certificated capacity of Columbia Gulf's system and will not result in the termination or reduction of service to existing customers of Columbia Gulf. Columbia Gulf estimates the total cost of the Project to be \$16,600,000, all as more fully set forth in the application which

is on file with the Commission and open for public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (www.ferc.gov) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. Public access to records formerly available in the Commission's physical Public Reference Room, which was located at the Commission's headquarters, 888 First Street NE, Washington, DC 20426, are now available via the Commission's website. For assistance, contact the Federal Energy Regulatory Commission at FercOnlineSupport@ferc.gov or call toll-free, (886) 208-3676 or TTY (202) 502-8659.

Any questions regarding the proposed project should be directed to David A. Alonzo, Manager, Project Authorizations, Columbia Gulf Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002-2700, by phone at (832) 320-5477, or by email at david_alonzo@tcenergy.com.

Pursuant to section 157.9 of the Commission's Rules of Practice and Procedure,¹ within 90 days of this Notice the Commission staff will either: complete its environmental review and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file comments on the project, you can protest the filing, and you can file a motion to intervene

in the proceeding. There is no fee or cost for filing comments or intervening. The deadline for filing a motion to intervene is 5:00 p.m. Eastern Time on February 16, 2024. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Comments

Any person wishing to comment on the project may do so. Comments may include statements of support or objections, to the project as a whole or specific aspects of the project. The more specific your comments, the more useful they will be.

Protests

Pursuant to sections 157.10(a)(4)² and 385.211³ of the Commission's regulations under the NGA, any person⁴ may file a protest to the application. Protests must comply with the requirements specified in section 385.2001⁵ of the Commission's regulations. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

To ensure that your comments or protests are timely and properly recorded, please submit your comments on or before February 16, 2024.

There are three methods you can use to submit your comments or protests to the Commission. In all instances, please reference the Project docket number CP24-37-000 in your submission.

(1) You may file your comments electronically by using the eComment feature, which is located on the Commission's website at www.ferc.gov under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project;

(2) You may file your comments or protests electronically by using the

eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Comment on a Filing"; or

(3) You can file a paper copy of your comments or protests by mailing them to the following address below. Your written comments must reference the Project docket number (CP24-37-000).

To file via USPS: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of comments (options 1 and 2 above) and has eFiling staff available to assist you at (202) 502-8258 or FercOnlineSupport@ferc.gov.

Persons who comment on the environmental review of this project will be placed on the Commission's environmental mailing list, and will receive notification when the environmental documents (EA or EIS) are issued for this project and will be notified of meetings associated with the Commission's environmental review process.

The Commission considers all comments received about the project in determining the appropriate action to be taken. However, the filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding. For instructions on how to intervene, see below.

Interventions

Any person, which includes individuals, organizations, businesses, municipalities, and other entities,⁶ has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and

¹ 18 CFR (Code of Federal Regulations) 157.9.

² 18 CFR 157.10(a)(4).

³ 18 CFR 385.211.

⁴ Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

⁵ 18 CFR 385.2001.

⁶ 18 CFR 385.102(d).

Procedure⁷ and the regulations under the NGA⁸ by the intervention deadline for the project, which is February 16, 2024. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at <https://www.ferc.gov/resources/guides/how-to-intervene.asp>.

There are two ways to submit your motion to intervene. In both instances, please reference the Project docket number CP24-37-000 in your submission.

(1) You may file your motion to intervene by using the Commission's eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Intervention." The eFiling feature includes a document-less intervention option; for more information, visit <https://www.ferc.gov/docs-filing/efiling/document-less-intervention.pdf>; or

(2) You can file a paper copy of your motion to intervene, along with three copies, by mailing the documents to the address below. Your motion to intervene must reference the Project docket number CP24-37-000.

To file via USPS: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of motions to intervene (option 1 above) and has eFiling staff available to assist you at (202) 502-8258 or FercOnlineSupport@ferc.gov.

Protests and motions to intervene must be served on the applicant either by mail or email at: to David A. Alonzo, Manager, Project Authorizations, Columbia Gulf Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002-2700, or at david_alonzo@tcenergy.com. Any subsequent

submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online. Service can be via email with a link to the document.

All timely, unopposed⁹ motions to intervene are automatically granted by operation of Rule 214(c)(1).¹⁰ Motions to intervene that are filed after the intervention deadline are untimely, and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations.¹¹ A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to www.ferc.gov/docs-filing/esubscription.asp.

Intervention Deadline: 5 p.m. Eastern Time on February 16, 2024.

Dated: January 26, 2024.

Federal Energy Regulatory Commission

[Docket No. CP24-46-000]

ANR Pipeline Company; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on January 19, 2024, ANR Pipeline Company (ANR), 700 Louisiana Street, Suite 1300, Houston, Texas 77002-2700, filed in the above referenced docket, a prior notice request pursuant to sections 157.205 and 157.216 of the Commission's regulations under the Natural Gas Act (NGA), and ANR's blanket certificate issued in Docket No. CP82-480-000, for authorization to abandon one natural gas storage injection/withdrawal and the associated pipeline and appurtenances at its Lincoln-Freeman Storage Field. All of the above facilities are located in Clare County, Michigan (2024 Lincoln Well Abandonment Project). The project will allow ANR to abandon well Lincoln 61 that it has determined does not provide significant value through its poor flow performance, and to maintain current integrity standards. The estimated cost for the project is \$383,000.00, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (www.ferc.gov) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. Public access to records formerly available in the Commission's physical Public Reference Room, which was located at the Commission's headquarters, 888 First Street NE, Washington, DC 20426, are now available via the Commission's website. For assistance, contact the Federal Energy Regulatory Commission at FercOnlineSupport@ferc.gov or call toll-free, (866) 208-3676 or TTY (202) 502-8659.

Any questions concerning this request should be directed to David A. Alonzo, Manager of Project Authorizations, ANR Pipeline Company, 700 Louisiana Street, Suite 1300, Houston, Texas 77002-2700, at (832) 320-5477, or david_alonzo@tcenergy.com.

⁷ 18 CFR 385.214.

⁸ 18 CFR 157.10.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5 p.m. Eastern Time on March 26, 2024. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or *OPP@ferc.gov*.

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,¹ any person² or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,³ and must be submitted by the protest deadline, which is March 26, 2024. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to

subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure⁴ and the regulations under the NGA⁵ by the intervention deadline for the project, which is March 26, 2024. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at <https://www.ferc.gov/resources/guides/how-to/intervene.asp>.

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before March 26, 2024. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP24-46-000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the

Commission's eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Protest", "Intervention", or "Comment on a Filing"; or⁶

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP24-46-000.

To file via USPS: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other method: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502-8258 or *FercOnlineSupport@ferc.gov*.

Protests and motions to intervene must be served on the applicant either by mail or email (with a link to the document) at: David A. Alonzo, Manager of Project Authorizations, ANR Pipeline Company, 700 Louisiana Street, Suite 1300, Houston, Texas 77002-2700, or david_alonzo@tcenergy.com. Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of

⁶ Additionally, you may file your comments electronically by using the eComment feature, which is located on the Commission's website at www.ferc.gov under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 1888-043]

York Haven Power Company, LLC; Notice of Intent To Prepare an Environmental Assessment

On January 26, 2023, as supplemented on October 5 and 20, 2023, York Haven Power Company, LLC filed an application for a non-capacity amendment for the York Haven Hydroelectric Project No. 1888. The project is located on the Susquehanna River in Lancaster and York counties, Pennsylvania. The project does not occupy Federal lands.

The licensee proposes to amend its license to allow for the construction and operation of an inland nature-like fishway versus the in-river nature-like fishway currently required by the license. Amending the license would allow the licensee to incorporate the amended terms of the project's Settlement Agreement, which now requires an inland nature-like fishway. In addition, the licensee is proposing to amend Article 404 of its license to expand the window for tree clearing activities associated with construction of the fishway (August 16 to May 14, as opposed to November 15 to March 31 as currently stated in Article 404). A Notice of Application Accepted for Filing and Soliciting Comments, Motions to Intervene, and Protests was issued on April 13, 2023. No comments were received; however, one motion to intervene was filed by Constellation Energy Generation, LLC.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the proposed action. The planned schedule for the completion of the EA is May 2024.¹ Revisions to the schedule may be made as appropriate. The EA will be

issued and made available for review by all interested parties. All comments filed on the EA will be reviewed by staff and considered in the Commission's final decision on the proceeding.

With this notice, the Commission is inviting Federal, State, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal to cooperate in the preparation of the EA planned to be issued May 2024. Agencies wishing to cooperate, or further discuss the benefits, responsibilities, and obligations of the cooperating agency role, should contact staff listed at the bottom of this notice by February 16, 2024. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. See 94 FERC ¶ 61,076 (2001).

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members, and others to access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Any questions regarding this notice may be directed to Joy Kurtz at 202-502-6760 or joy.kurtz@ferc.gov.

Dated: January 26, 2024.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP24-38-000]

MountainWest Pipeline, LLC; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on January 16, 2024, MountainWest Pipeline, LLC (MWP), 333 South State Street, Salt Lake City, Utah 84111, filed in the above referenced docket, a prior notice request pursuant to sections 157.205, 157.208(b), and 157.211 of the Commission's regulations under the Natural Gas Act (NGA), and MWP's

blanket certificate issued in Docket No. CP82-491-000,¹ for authorization for its Unita Basin Expansion Project in Duchesne and Uintah Counties, Utah. Specifically, MWP proposes to: (1) upgrade the Altamont and Bluebell Meter Stations (MS); (2) modify the Myton MS; (3) modify the Brundage Mountain MS; (4) modify the 40-47 Junction; (5) modify the Fidler Compressor Station; and (6) pay Western Midstream to install one electric compressor unit within its Chipeta Processing Plant. The Project is fully subscribed and will provide an additional 113,300 dekatherms per day of year-round firm transportation capacity from existing receipt meter allocation points in the Uinta Basin. The estimated cost to construct the project is \$11,100,000, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (www.ferc.gov) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. Public access to records formerly available in the Commission's physical Public Reference Room, which was located at the Commission's headquarters, 888 First Street NE, Washington, DC 20426, are now available via the Commission's website. For assistance, contact the Federal Energy Regulatory Commission at FercOnlineSupport@ferc.gov or call toll-free, (886) 208-3676 or TTY (202) 502-8659.

Any questions concerning this request should be directed to Greg Williams, Regulatory Analyst Lead, MountainWest Pipeline, LLC, 333 South State Street, Salt Lake City, Utah 84111, or call (801) 209-6764, or via email to greg.williams@williams.com.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5 p.m.

¹ *Mountain Fuel Resources, Inc.*, 20 FERC ¶ 62,580 (1982).

¹ 42 U.S.C. 4336a(g)(1)(B) requires lead Federal agencies to complete EAs within 1 year of the agency's decision to prepare an EA.

Eastern Time on March 26, 2024. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,² any person³ or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,⁴ and must be submitted by the protest deadline, which is March 26, 2024. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure⁵ and the regulations under the NGA⁶ by the intervention deadline for the project, which is March 26, 2024.

As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at <https://www.ferc.gov/resources/guides/how-to/intervene.asp>.

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before March 26, 2024. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP24-38-000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Protest", "Intervention", or "Comment on a Filing"; or⁷

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP24-38-000.

To file via USPS: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other method: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502-8258 or FercOnlineSupport@ferc.gov.

Protests and motions to intervene must be served on the applicant either by mail or email (with a link to the document) at: Greg Williams, Regulatory Analyst Lead, MountainWest Pipeline, LLC, 333 South State Street, Salt Lake City, Utah 84111 or via email to greg.williams@williams.com. Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to www.ferc.gov/docs-filing/subscription.asp.

which is located on the Commission's website at www.ferc.gov under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project.

² 18 CFR 157.205.

³ Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

⁴ 18 CFR 157.205(e).

⁵ 18 CFR 385.214.

⁶ 18 CFR 157.10.

⁷ Additionally, you may file your comments electronically by using the eComment feature,

Dated: January 26, 2024.

Debbie-Anne A. Reese,
Acting Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP24-44-000]

ANR Storage Company; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on January 18, 2024, ANR Storage Company (ANR Storage), 700 Louisiana Street, Suite 1300, Houston, Texas 77002-2700, filed in the above referenced docket, a prior notice request pursuant to sections 157.205, and 157.216(b) of the Commission's regulations under the Natural Gas Act (NGA), and ANR Storage's blanket certificate issued in Docket No. CP82-523-000, for authorization to abandon one injection/withdrawal well, and the connecting pipeline and appurtenances at its Excelsior 6 Storage Field. All of the above facilities are located in Kalkaska County, Michigan (2024 Excelsior Well Abandonment Project). ANR Storage states the project will: (1) reduce public risk of unintended gas release from deteriorating wellhead and pipeline; (2) reduce the risk of customer gas being lost from reservoirs due to deteriorating subsurface conditions; and (3) eliminate the need for future expenditures associated with these assets, all without affecting ANR Storage's existing storage services. The estimated cost for the project is \$416,000, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (www.ferc.gov) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. Public access to records formerly available in the Commission's physical Public Reference Room, which was located at the Commission's headquarters, 888 First Street NE, Washington, DC 20426, are now available via the Commission's website. For assistance, contact the Federal

Energy Regulatory Commission at FercOnlineSupport@ferc.gov or call toll-free, (866) 208-3676 or TTY (202) 502-8659.

Any questions concerning this request should be directed to John Ryan, Legal Counsel, ANR Storage Company, 700 Louisiana Street Suite 1300 Houston, Texas 77002-2700, or phone at (832) 320-5879, or by email at john_ryan@tcenergy.com.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5 p.m. Eastern Time on March 26, 2024. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,¹ any person² or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,³ and must be submitted by the protest deadline, which is March 26,

¹ 18 CFR 157.205.

² Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

³ 18 CFR 157.205(e).

2024. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure⁴ and the regulations under the NGA⁵ by the intervention deadline for the project, which is March 26, 2024. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at <https://www.ferc.gov/resources/guides/how-to/intervene.asp>.

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before March 26, 2024. The filing of a comment alone will not serve to make the filer a party to the

⁴ 18 CFR 385.214.

⁵ 18 CFR 157.10.

proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP24-44-000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Protest", "Intervention", or "Comment on a Filing"; or⁶

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP24-44-000.

To file via USPS: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other method: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502-8258 or FercOnlineSupport@ferc.gov.

Protests and motions to intervene must be served on the applicant either by mail or email (with a link to the document) at: John Ryan, Legal Counsel, ANR Storage Company, 700 Louisiana Street, Suite 1300, Houston, Texas 77002-2700, or by john_ryan@tcenergy.com.

Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208-

FERC, or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to www.ferc.gov/docs-filing/esubscription.asp.

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPPT-2010-0572; FRL-9099-01-OCSPPI]

Agency Information Collection Activities; Proposed Renewal of an Existing ICR Collection and Request for Comment; Chemical-Specific Rules Under the Toxic Substances Control Act; Certain Nanoscale Materials

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA), this document announces the availability of and solicits public comment on the following Information Collection Request (ICR) that EPA is planning to submit to the Office of Management and Budget (OMB): "Chemical-Specific Rules under the Toxic Substances Control Act (TSCA) Section 8(a); Certain Nanoscale Materials," identified by EPA ICR No. 2517.04 and OMB Control No. 2070-0194. This ICR represents the renewal of an existing ICR that is currently approved through September 30, 2024. Before submitting the ICR to OMB for review and approval under the PRA, EPA is soliciting comments on specific aspects of the information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

DATES: Comments must be received on or before April 1, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPPT-2010-0572, through the Federal eRulemaking Portal at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

Katherine Sleasman, Mission Support Division (7602M), Office of Program Support, Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; telephone number: (202) 566-1204; email address: sleasman.katherine@epa.gov.

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What information collection activity or ICR does this action apply to?

Title: Chemical-Specific Rules under the Toxic Substances Control Act Section 8(a); Certain Nanoscale Materials.

⁶ Additionally, you may file your comments electronically by using the eComment feature, which is located on the Commission's website at www.ferc.gov under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project.

EPA ICR No.: 2517.04.

OMB Control No.: 2070–0194.

ICR status: This ICR is currently approved through September 30, 2024. Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This information collection request (ICR) covers reporting and recordkeeping requirements for persons who manufacture or process chemical substances as nanoscale materials under the authority of section 8(a) of the Toxic Substances Control Act (TSCA) and implementing regulations in 40 CFR part 704.20.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 107.5 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/affected entities: Entities potentially affected are those that manufacture or process chemical substances as nanoscale materials and is related to a final rule issued under the authority of section 8(a) of the Toxic Substances Control Act (TSCA). The following North American Industrial Classification System (NAICS) codes have been provided to assist in determining whether this action might apply to certain entities:

- 325 Chemical Manufacturers and Processors;
- 325130 Synthetic Dye and Pigment Manufacturing;
- 324110 Petroleum Refineries;
- 325180 Other Basic Inorganic Chemical Manufacturing;
- 331221 Rolled Steel Shape Manufacturing;
- 334413 Semiconductor and Related Device Manufacturing;
- 335991 Carbon and Graphite Product Manufacturing;
- 423220 Home Furnishing Merchant Wholesalers;

- 423330 Roofing, Sliding, and Insulation Material Merchant Wholesalers; and
- 423510 Metal Service Centers and Other Metal Merchant Wholesalers.

Respondent's obligation to respond: Mandatory. TSCA section 8(a) and 40 CFR 704.20.

Forms: EPA Form 9600–07.

Frequency of response: Occasional.

Total estimated number of potential respondents: 9.

Total estimated average number of responses for each respondent: 1.7.

Total estimated annual burden hours: 961 hours.

Total estimated annual costs: \$69,197, which includes an estimated cost of \$0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is a decrease of 39,128 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's adjustments in the estimation methodology of the costs and burden. The adjustments made to the estimation methodology include:

- Burden estimates based on expected submissions, not on actual submissions received by the Agency, while the reporting covered in this period is based on actual submissions received by the Agency. This significant change accounts for the almost all the decrease in burden and cost estimates.

- Burden estimates estimated separately for manufactures and processors, while the reporting covered in this period calculates a weighted burden for any given respondent without separating the manufacturers from the processors. This approach was deemed reasonable given that the Agency received only 27 submissions related to TSCA 8(a) nanomaterials in the three-year ICR period.

In addition, OMB has requested that EPA adopt the 18-question format for ICR Supporting Statements that is used by other federal agencies and departments which is based on the submission instructions established by OMB, replacing the alternate format that has been used by EPA. Although this Supporting Statement has been modified to reflect the 18-question format, the change in format has not changed the information collection activities or related estimated burden and costs.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as

appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

CONTACT.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2011–0855; FRL–11667–01–OCSPP]

EPA Document in Support of the Paraquat Interim Registration Review Decision; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In July 2021, the Environmental Protection Agency (EPA or the Agency) completed the Paraquat Dichloride Interim Registration Review Decision (Paraquat ID). The Paraquat ID finalized certain portions of EPA's analysis of paraquat's risks and benefits and determined that certain mitigation measures were necessary for paraquat to meet the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) standard for registration. In September 2021, the California Rural Legal Assistance Foundation, *et al.* (Petitioners) filed a Petition for Review of the Paraquat ID in the U.S. Court of Appeals for the Ninth Circuit. As part of that litigation, EPA has further considered several substantive issues raised by the Petitioners in relation to the Paraquat ID, including concerns related to human health and EPA's balancing of risks and benefits. This document announces the availability of and solicits public comment on a document that presents EPA's preliminary reconsideration of the issues raised by Petitioners in relation to the Paraquat ID.

DATES: Comments must be received on or before April 1, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2011–0855,

online through <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Alex Hazlehurst, Pesticide Re-Evaluation Division (7508M), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; telephone number: (202) 566-2249; email address: hazlehurst.alexander@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit CBI to EPA through email or <https://www.regulations.gov>. If you wish to include CBI in your comment, please follow the applicable instructions at <https://www.epa.gov/dockets/commenting-epa-dockets#rules> and clearly mark the information that you claim to be CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting comments, see the commenting tips at <https://www.epa.gov/dockets/comments.html>.

II. What action is the Agency taking?

This notice announces the availability of a document outlining the Agency's preliminary reconsideration of the several issues identified by Petitioners in relation to the Paraquat ID. See *California Rural Legal Assistance Foundation, et al. v. USEPA*, Case No. 21-71287 (9th Cir.) Those issues include concerns raised about the Agency's assessment of whether

paraquat poses a risk of Parkinson's Disease; its analysis of respiratory and dermal exposures, as well as exposures to direct and indirect paraquat drift; the analysis of benefits; the consideration of health-related costs; and the required balancing of paraquat's risks and benefits. This document, titled "EPA'S Preliminary Supplemental Consideration of Certain Issues in Support of its Interim Registration Review Decision for Paraquat," is available in the docket at <https://www.regulations.gov>, under docket number EPA-HQ-OPP-2011-0855.

The Agency will review and consider all significant comments on this document that are submitted during the public comment period. Following EPA's consideration of those comments, EPA intends to issue a final document (or documents) by January 17, 2025, consistent with its obligations in the pending litigation.

Authority: 7 U.S.C. 136 *et seq.*

Dated: January 25, 2024.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-0120; FR ID 199012]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might "further reduce the information collection burden for small business concerns with fewer than 25 employees."

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before March 4, 2024.

ADDRESSES: Comments should be sent to www.reginfo.gov/public/do/PRAMain.

Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. Your comment must be submitted into www.reginfo.gov per the above instructions for it to be considered. In addition to submitting in www.reginfo.gov also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to PRA@fcc.gov and to Cathy.Williams@fcc.gov. Include in the comments the OMB control number as shown in the

SUPPLEMENTARY INFORMATION below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418-2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page <http://www.reginfo.gov/public/do/PRAMain>, (2) look for the section of the web page called "Currently Under Review," (3) click on the downward-pointing arrow in the "Select Agency" box below the "Currently Under Review" heading, (4) select "Federal Communications Commission" from the list of agencies presented in the "Select Agency" box, (5) click the "Submit" button to the right of the "Select Agency" box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of

information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.”

OMB Control Number: 3060-0120.

Title: Broadcast EEO Model Program Report, FCC Form 396-A.

Form Number: FCC-396-A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, not-for-profit institutions.

Number of Respondents and

Responses: 5,000 respondents, 5,000 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain benefits. The statutory authority for this collection of information is contained in section 154(i) and 303 of the Communications Act of 1934, as amended.

Total Annual Burden: 5,000 hours.

Total Annual Cost: No cost.

Needs and Uses: The Broadcast Equal Employment Opportunity (EEO) Model Program Report, FCC Form 396-A, is filed in conjunction with applicants seeking authority to: construct a new broadcast station; to obtain assignment of construction permit or license; and/or seeking authority to acquire control of an entity holding a construction permit or license. This program report is designed to assist the applicant in establishing an effective EEO program for its stations.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6715-01-P

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000-0163; Docket No. 2024-0053; Sequence No. 3]

Information Collection; Small Business Size Rerepresentation

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, and the Office of Management and Budget (OMB) regulations, DoD, GSA, and NASA invite the public to comment on an extension concerning small business size rerepresentation. DoD, GSA, and NASA invite comments on: whether the proposed collection of information is necessary for the proper performance of the functions of Federal Government acquisitions, including whether the information will have practical utility; the accuracy of the estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including the use of automated collection techniques or other forms of information technology. OMB has approved this information collection for use through June 30, 2024. DoD, GSA, and NASA propose that

OMB extend its approval for use for three additional years beyond the current expiration date.

DATES: DoD, GSA, and NASA will consider all comments received by April 1, 2024.

ADDRESSES: DoD, GSA, and NASA invite interested persons to submit comments on this collection through <https://www.regulations.gov> and follow the instructions on the site. This website provides the ability to type short comments directly into the comment field or attach a file for lengthier comments. If there are difficulties submitting comments, contact the GSA Regulatory Secretariat Division at 202-501-4755 or GSARegSec@gsa.gov.

Instructions: All items submitted must cite OMB Control No. 9000-0163, Small Business Size Rerepresentation. Comments received generally will be posted without change to <https://www.regulations.gov>, including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check www.regulations.gov, approximately two-to-three days after submission to verify posting.

FOR FURTHER INFORMATION CONTACT: Zenaida Delgado, Procurement Analyst, at telephone 202-969-7207, or zenaida.delgado@gsa.gov.

SUPPLEMENTARY INFORMATION:

A. OMB Control Number, Title, and Any Associated Form(s)

OMB Control No. 9000-0163, Small Business Size Rerepresentation.

B. Need and Uses

This clearance covers the information that contractors must submit to comply with the following Federal Acquisition Regulation (FAR) requirements:

- FAR 52.219-28, Post-Award Small Business Program

Rerepresentation. This clause requires contractors that originally represented themselves as a small business for a contract award to rerepresent their size and socioeconomic status at the prime contract level by updating their representations in the Representations and Certifications section of the System for Award Management (SAM). Contractors are also required to notify the contracting officer by email, or otherwise in writing, that the rerepresentations have been made, and provide the date on which they were made.

Small business contractors are required to rerepresent their size and socioeconomic status upon occurrence of any of the following:

- (a) For the NAICS code(s) in the contract—

(1) Within 30 days after execution of a novation agreement or within 30 days after modification of the contract to include FAR clause 52.219–28 if the novation agreement was executed prior to inclusion of this clause in the contract.

(2) Within 30 days after a merger or acquisition of the contractor that does not require novation or within 30 days after modification of the contract to include the clause at 52.219–28 if the merger or acquisition occurred prior to inclusion of this clause in the contract;

(3) For long-term contracts—

(i) Within 60 to 120 days prior to the end of the fifth year of the contract; and

(ii) Within 60 to 120 days prior to the date specified in the contract for exercising any option thereafter.

(b) When contracting officers explicitly require it for an order issued under a multiple-award contract.

The collected information is used by the Small Business Administration, Congress, Federal agencies and the general public for various reasons such as determining if agencies are meeting statutory goals, set-aside determinations, and market research.

C. Annual Burden

Respondents: 3,482.

Total Annual Responses: 5,098.

Total Burden Hours: 2,549.

Obtaining Copies: Requesters may obtain a copy of the information collection documents from the GSA Regulatory Secretariat Division by calling 202–501–4755 or emailing GSARegSec@gsa.gov. Please cite OMB Control No. 9000–0163, Small Business Size Rerepresentation.

Janet Fry,

Director, Federal Acquisition Policy Division, Office of Governmentwide Acquisition Policy, Office of Acquisition Policy, Office of Governmentwide Policy.

[FR Doc. 2024–02009 Filed 1–31–24; 8:45 am]

BILLING CODE 6820–EP–P

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090–0322; Docket No. 2023–0001; Sequence No. 10]

Submission for OMB Review; General Services Administration Acquisition Regulation; Prohibition on Certain Supply Chain Services or Equipment Under Lease Acquisitions and Commercial Solution Openings

AGENCY: Office of the Chief Acquisition Officer, General Services Administration (GSA).

ACTION: Notice of request for comments.

SUMMARY: Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division will be submitting to the Office of Management and Budget (OMB) a request to review and approve a revision of a previously approved information collection requirement for Prohibition to Certain Telecommunications and Video Surveillance Services or Equipment under Lease Acquisitions and Commercial Solution Openings. The revision now includes new information to be collected related to supply chain risk information sharing and exclusion or removal orders consistent with the Federal Acquisition Supply Chain Security Act of 2018.

DATES: Submit comments on or before March 4, 2024.

ADDRESSES: Written comments and recommendations for this information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under Review—Open for Public Comments”; or by using the search function.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen Carroll, Procurement Analyst, General Services Acquisition Policy Division, 817–253–7858 or via email at gsarpolicy@gsa.gov.

SUPPLEMENTARY INFORMATION:

A. Purpose

There are two purposes. The first (“889”) supports implementation of section 889 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Pub. L. 115–232) under lease acquisitions and commercial solution openings. This section prohibits agencies from procuring, obtaining, extending or renewing a contract with contractors that will provide or use covered telecommunication equipment or services as a substantial or essential component of any system, or as a critical technology as part of any system on or after August 13, 2020 unless an exception applies.

The second (“FASCSCA Orders”) supports implementation of supply chain risk information sharing and exclusion or removal orders consistent with the Federal Acquisition Supply Chain Security Act of 2018 and a final rule issued by the Federal Acquisition Security Council. The implementation of supply chain risk information sharing and exclusion or removal orders FAR interim rule requires complying with exclusion or removal orders (“FASCSCA Orders”) and sharing certain supply chain risk information with the Federal

Acquisition Security Council (FASC) when applicable FASCSCA orders are issued from one or a combination of the following FASCSCA orders-issuing agencies: Department of Homeland Security (DHS), the Department of Defense (DoD), and/or the Office of the Director of National Intelligence (DNI). Only DHS may issue orders applicable to GSA (*i.e.*, civilian agencies).

For 889, the requirement is implemented in the Federal Acquisition Regulation (FAR) through the provision at FAR 52.204–24, Representation Regarding Certain Telecommunications and Video Surveillance Services or Equipment and the clause at FAR 52.204–25, Prohibition on Contracting for Certain Telecommunications and Video Surveillance Services or Equipment.

For FASCSCA Orders, the requirement is implemented in the FAR through the provision at FAR 52.204–29, Federal Acquisition Supply Chain Security Act Orders-Representation and Disclosures and the clause at FAR 52.204–30, Federal Acquisition Supply Chain Security Act Orders-Prohibition.

B. Annual Reporting Burden

1. FAR 52.204–24 for GSA Lease Acquisitions

Respondents: 3,100.

Responses Per Respondent: 1.

Total Responses: 3,000.

Hours per Response: 1.5.

Total Burden Hours: 4,650.

2. FAR 52.204–25 for GSA Lease Acquisitions

Respondents: 62.

Responses per Respondent: 1.

Total Responses: 62.

Hours per Response: 1.5.

Total Burden Hours: 93.

3. FAR 52.204–29 for GSA Lease Acquisitions

Respondents: 186.

Responses per Respondent: 1.

Total Responses: 186.

Hours per Response: 2.

Total Burden Hours: 372.

4. FAR 52.204–30 for GSA Lease Acquisitions

Respondents: 124.

Responses per Respondent: 1.

Total Responses: 124.

Hours per Response: 2.

Total Burden Hours: 248.

Note: GSA solicits and awards so few CSO procurements (on average less than 5 per year), the burden is negligible and therefore not included in this estimate.

C. Public Comments

A 60-day notice was published in the **Federal Register** at 88 FR 82894 on

November 27, 2023. No comments were received.

Obtaining Copies of Proposals:

Requesters may obtain a copy of the information collection documents from the GSA Regulatory Secretariat Division, by calling 202-501-4755 or emailing GSARegSec@gsa.gov. Please cite "Information Collection 3090-0322", in all correspondence.

Jeffrey Koses,

Senior Procurement Executive, Office of Acquisition Policy, Office of Government-wide Policy.

[FR Doc. 2024-02040 Filed 1-31-24; 8:45 am]

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Inpatient Severe Maternal Morbidity Measure Technical Specifications

AGENCY: Agency for Healthcare Research and Quality, U.S. Department of Health and Human Services.

ACTION: Notice of Request for Information.

SUMMARY: The Agency for Healthcare Research and Quality (AHRQ) Center for Quality Improvement and Patient Safety (CQIPS) Division of Quality Measurement and Improvement (QMI) invites public comment in response to this Request for Information (RFI). The AHRQ Quality Indicators (QI) program maintains inpatient quality indicators (https://qualityindicators.ahrq.gov/measures/IQI_TechSpecTechSpec) and patient safety indicators (https://qualityindicators.ahrq.gov/measures/PSI_TechSpec), several of which are relevant to maternal health care. Specifically, the QI program maintains measures of obstetric trauma, birth trauma, and cesarean delivery calculated at the hospital level using administrative data. However, severe maternal morbidity during an inpatient stay may result from a host of complications, such as sepsis, cardiac failure, stroke, respiratory distress, and renal failure. While state-level rates of severe maternal morbidity are available from AHRQ (<https://datatools.ahrq.gov/hcup-fast-stats/?tab=special-emphasis&dash=92>), experts have noted some shortcomings of this measure. This RFI seeks comments on the usability, feasibility, and likely uptake of a measure of severe maternal morbidity to be validated, refined, and maintained by the QI program, with the goal of providing data for maternal

health service improvements. While a measure of severe maternal morbidity is currently available from AHRQ and the Health Resources and Service Administration (HRSA), several experts have suggested that this algorithm could benefit from refinements.

DATES: Comments on this notice must be received at the address provided below within 30 days of publication of this notice, no later than March 4, 2024.

ADDRESSES: Interested parties may submit comments electronically to askahrq@ahrq.hhs.gov. When submitting comments or requesting information, please include the document identifier number and project title "Inpatient Severe Maternal Morbidity Measure Technical Specifications" for reference.

FOR FURTHER INFORMATION CONTACT:

Questions may be addressed to Judy George, Program Lead for the AHRQ Quality Indicators, Judy.george@ahrq.hhs.gov.

SUPPLEMENTARY INFORMATION: Maternal health, including maternal behavioral health, is a national priority in the United States. Strengthening data collection and evaluation is part of the first goal of the White House Blueprint for Addressing the Maternal Health Crisis (<https://www.whitehouse.gov/wp-content/uploads/2022/06/Maternal-Health-Blueprint.pdf>), which is to increase access to and coverage of comprehensive high-quality maternal health services, including behavioral health services. Unexpected complications and outcomes around labor and delivery may lead to short- or long-term consequences to women's health (<https://pubmed.ncbi.nlm.nih.gov/27560600/>), which have been defined as severe maternal morbidity (<https://www.cdc.gov/reproductivehealth/maternalinfanthealth/severematernalmorbidity.html#html>). National and state rates of severe maternal morbidity are currently available on AHRQ's Healthcare Cost and Utilization Project (HCUP) Fast Stats dashboard (<https://datatools.ahrq.gov/hcup-fast-stats/?tab=special-emphasis&dash=92>). However, there are measurement concerns for some of indicators included in this measure (eclampsia, disseminated intravascular coagulation, and blood transfusions) and additional validation and refinement may be warranted.

In collaboration with federal partners from the Department of Health and Human Services, AHRQ is exploring potential refinements to this measure of severe maternal morbidity for use at an

area level (e.g., county, state) using administrative data. AHRQ aims to assess the validity and reliability of potential refinements to this severe maternal morbidity measure. In addition, AHRQ is considering incorporating a measure of severe maternal morbidity into its measure portfolio, including the production of technical specifications and the dissemination of software to calculate this measure through the AHRQ QI program.

Many users of quality measures, such as state and local governments, largely rely on administrative data that lack the robust clinical information found in electronic health records (EHRs). For example, Centers for Medicaid and Medicare Services (CMS) has developed Electronic Clinical Quality Measures (ECQMs) for severe obstetric complications which relies upon EHR data. AHRQ aims to provide measurement resources that are broadly accessible across organizations, including for those lacking access to extensive clinical data.

To support measurement resources that are broadly accessible across organizations, AHRQ requests public comment on the usability, feasibility, and likely uptake of an inpatient severe maternal morbidity measure, produced through the QI program using administrative data, with the intent of promoting maternal health service improvements at an area level (e.g., county, state). AHRQ invites stakeholders representing consumers, state/regional/local health departments, accountable care organizations, community health centers, birthing centers, providers/health systems, critical access/rural hospitals, professional associations, payers, rural and community health groups, community health workers, doulas, maternal health advocacy groups, researchers, and other members of the public to comment.

Specific questions of interest include, but are not limited to:

1. If you are currently measuring severe maternal morbidity in your organization, what measure(s) are you or your organization using? How do you use these measures? What data sources are you using? Please specify organization type in your answer.
2. If you or your organization are not currently measuring severe maternal morbidity, what quantitative data would you need to make maternal health service improvements? Please specify organization type in your answer.
3. At what level—state, county, or some other level—would information be

most helpful for improving maternal health services? In what ways?

4. The measure currently used by AHRQ for severe maternal morbidity uses 21 indicators (<https://www.cdc.gov/reproductivehealth/maternalinfanthealth/smm/severe-morbidity-ICD.htm>) identified with ICD-10CM10CM/PCS codes in administrative data. Considering these indicators,

a. What codes might be missing? Are there changes you would you recommend?

b. In what ways would the changes that you propose make a severe maternal morbidity measure more useful to your organization?

c. Would a measure with the refinements you propose be useful for surveillance? Population health management? Clinical quality improvement? Program evaluation? Research? Public reporting or accountability programs? In what ways?

5. What other measures of maternal health and/or morbidity would your organization find useful/effective for improving maternal health services, including any potential measures for use in either the prenatal or postpartum time periods?

AHRQ is interested in all of the questions listed above, but respondents are welcome to address as many or as few as they choose and to address additional areas of interest not listed. It is helpful to identify the question to which a particular answer corresponds.

This RFI is for planning purposes only and should not be construed as a policy, solicitation for applications, or as an obligation on the part of the Government to provide support for any ideas in response to it. AHRQ will use the information submitted in response to this RFI at its discretion and will not provide comments to any respondent's submission. However, responses to this RFI may be reflected in future solicitation(s) or policies. The information provided will be analyzed and may appear in reports.

Dated: January 29, 2024.

Marquita Cullom,

Associate Director.

[FR Doc. 2024-02021 Filed 1-31-24; 8:45 am]

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Reorganization of the National Center for Environmental Health

AGENCY: Centers for Disease Control and Prevention (CDC), the Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: CDC has modified its structure. This notice announces the reorganization of the National Center for Environmental Health (NCEH). NCEH retitled three branches and established the Environmental Public Health Tracking Branch.

DATES: This reorganization was approved by the Director of CDC on January 26, 2024 and became effective January 26, 2024.

FOR FURTHER INFORMATION CONTACT:

D'Artonya Graham, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Office of the Director, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS TW-2, Atlanta, GA 30329; Telephone 770-488-4401; Email: reorgs@cdc.gov.

SUPPLEMENTARY INFORMATION: Part C (Centers for Disease Control and Prevention) of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (45 FR 67772-76, dated October 14, 1980, and corrected at 45 FR 69296, October 20, 1980, as amended most recently at 88 FR 69188-69190, dated October 5, 2023) is amended to reflect the reorganization of the National Center for Environmental Health, Centers for Disease Control and Prevention. Specifically, the changes are as follows:

I. Under Part C, Section C-B, Organization and Functions, make the following changes:

- Update the functional statements and retitle all references to the Asthma and Community Health Branch (CNCC) to the Asthma and Air Quality Branch (CNCC)
- Update the functional statements and retitle all references to the Lead Poisoning Prevention and Environmental Health Tracking Branch (CNCD) to the Lead Poisoning Prevention and Surveillance Branch (CNCD)
- Update the functional statements and retitle the Emergency Management, Radiation, and Chemical Branch (CNCE) to the Emerging

Environmental Hazards and Health Effects Branch (CNCE)

II. Under Part C, Section C-B, Organization and Functions, after the Emerging Environmental Hazards and Health Effects Branch insert the following organizational unit:

- Environmental Public Health Tracking Branch (CNCG)

III. Under Part C, Section C-B, Organization and Functions, insert the following:

Asthma and Air Quality Branch (CNCC) (1) develops, implements, and evaluates asthma programs and strategies that are part of the National Asthma Control Program to reduce asthma morbidity and mortality; (2) conducts epidemiologic research and investigations of asthma morbidity and mortality; (3) develops program, conducts epidemiologic analysis and supports other activities to address social determinants of health related to asthma disparities; (4) supports surveillance activities for asthma, and other respiratory diseases, as appropriate, to quantify burden and guide programs; (5) identifies the evidence for, promotes, and tracks interventions that reduce the burden of asthma, focusing on populations with a disproportionate burden of the disease; (6) develops and disseminates training, tools, communication products, and other resources to strengthen and sustain asthma control activities and technical capacity among national, state, tribal, local, territorial and other program partners; (7) provides technical consultation to state, local, private, international, and other federal agencies on asthma control, surveillance, epidemiology, and evaluation (including economic evaluation); (8) disseminates and promotes information from surveillance and health studies related to asthma control; (9) conducts epidemiologic research and investigations of the potential health effects of ambient air pollutants, including wildfire smoke; (10) designs and evaluates behavioral, communication, policy, technological, and community design interventions to reduce exposures to air pollution and improve health; (11) supports activities to reduce indoor air pollution; (12) develops and coordinates training and decision support tools to strengthen and sustain air pollution activities and technical capacity among national, state, tribal, local, and territorial program partners; (13) provides technical consultation to federal, state, tribal, local, territorial, private, and international agencies on environmental issues related to air pollutants; (14)

disseminates, communicates, and promotes information to protect communities from adverse health impacts from air pollution; and (15) coordinates asthma- and air quality-related activities throughout CDC.

Lead Poisoning Prevention and Surveillance Branch (CNCD) (1) establishes, monitors, and evaluates goals and objectives for a national childhood lead poisoning prevention program and blood lead surveillance system for CDC; (2) develops and implements an integrated national program to eliminate childhood lead poisoning through partnerships with U.S. Department of Housing and Urban Development, U.S. Environmental Protection Agency, other federal agencies, and national organizations; (3) coordinates efforts of federal, state, local, tribal and territorial agencies that have programs related to childhood lead exposure and prevention to achieve national objectives and performance standards related to eliminating childhood lead poisoning; (4) supports state, local, tribal and territorial health agencies, and other stakeholders, in planning, developing, and implementing childhood lead poisoning prevention programs and blood lead surveillance systems; (5) collects, analyzes, and disseminates data on blood lead levels in U.S. children; (6) develops, conducts, and evaluates epidemiologic research on childhood lead poisoning including risk factors, geographic distribution, and trends; (7) works collaboratively across, NCEH, CDC and with external partners to build capacity for science, innovation, and translation research to accelerate progress towards national lead poisoning prevention goals; (8) develops and implements, in concert with other federal agencies, national organizations, and other appropriate groups, a training agenda for public health professionals related to childhood lead poisoning prevention and surveillance activities; (9) administers the CDC/NCEH Federal Advisory Committee relevant to lead poisoning prevention; and (10) coordinates lead poisoning prevention and surveillance activities through the Division, Center, and with other components of CDC and external stakeholders, as appropriate.

Emerging Environmental Hazards and Health Effects Branch (CCNCE) (1) promotes public health protection from environmental hazards and exposures, as well as environmental health disasters—both natural and technological—through education, training, and information dissemination to the general public as well as the public health and clinician

communities; (2) serves as the CDC lead to prepare for and respond to natural, nuclear/radiological, and chemical emergencies; (3) provides CDC leadership to protect public health and safety through independent oversight of the Army destruction mission including stockpiled weapons and recovered chemical weapons; (4) addresses environmental health emerging hazards by conducting surveillance, public health response, and environmental epidemiologic investigations and studies; (5) responds to outbreak or cluster investigations of non-infectious etiology; and (6) builds the environmental epidemiology capacity of domestic and international public health partners.

Environmental Public Health Tracking Branch (CNCG) (1) develops and maintains the National Environmental Public Health Tracking Network, the cornerstone of the Environmental Public Health Tracking Program, which connects environmental and health data at the national, state, and local levels to drive innovative, cutting-edge programs and solutions that protect and improve the health of communities across the country; (2) collects, integrates, analyzes, and disseminates non-infectious disease, environmental, and sociodemographic data from a collective of partners at the national, state, and local levels; (3) delivers health, exposure, and hazards data, information summaries, and tools to enable analysis, visualization, and reporting of insights drawn from data; (4) provides timely, local, accessible information that drives actions to improve community health; and (5) empowers environmental and public health practitioners, healthcare providers, community members, policy makers, and others to make information-driven decisions that affect their health.

Delegations of Authority

All delegations and redelegations of authority made to officials and employees of affected organizational components will continue in them or their successors pending further redelegation, provided they are consistent with this reorganization.

(Authority: 44 U.S.C. 3101)

Robin Bailey, Jr.,

Chief Operating Officer, Centers for Disease Control and Prevention.

Name of Committee: Cell Biology Integrated Review Group; Maximizing Investigators' Research Award—D Study Section.

Date: February 27–28, 2024.

Time: 9:00 a.m. to 8:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Anne Marie Strohecker, Ph.D., Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (202) 924-4186, stroheckeram@csr.nih.gov.

Name of Committee: Biological Chemistry and Macromolecular Biophysics Integrated Review Group; Macromolecular Structure and Function A Study Section.

Date: February 27–28, 2024.

Time: 9:00 a.m. to 8:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Hybrid Meeting).

Contact Person: Ian Frederick Thorpe, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 903K, Bethesda, MD 20892, (301) 480-8662, ian.thorpe@nih.gov.

Name of Committee: Applied Immunology and Disease Control Integrated Review Group; Interspecies Microbial Interactions and Infectious Study Section.

Date: February 27, 2024.

Time: 10:00 a.m. to 9:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Subhamoy Pal, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 594-0926, subhamoy.pal@nih.gov.

Name of Committee: Endocrinology, Metabolism, Nutrition and Reproductive Sciences Integrated Review Group; Pathophysiology of Obesity and Metabolic Disease Study Section.

Date: February 27–28, 2024.

Time: 10:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Heather Marie Brockway, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 813H, Bethesda, MD 20892, (301) 594-5228, brockwayhm@csr.nih.gov.

Name of Committee: Healthcare Delivery and Methodologies Integrated Review Group;

Community Influences on Health Behavior Study Section.

Date: February 27–28, 2024.

Time: 10:00 a.m. to 8:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Annie Laurie McRee, DRPH, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 100, Bethesda, MD 20892, (301) 827-7396, mcreeal@csr.nih.gov.

Name of Committee: Musculoskeletal, Oral and Skin Sciences Integrated Review Group; Skeletal Muscle and Exercise Physiology Study Section.

Date: February 27–28, 2024.

Time: 10:00 a.m. to 10:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Carmen Bertoni, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 805B, Bethesda, MD 20892, (301) 867-5309, bertonic2@csr.nih.gov.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Current List of HHS-Certified Laboratories and Instrumented Initial Testing Facilities Which Meet Minimum Standards To Engage in Urine and Oral Fluid Drug Testing for Federal Agencies

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (HHS) notifies Federal agencies of the laboratories and Instrumented Initial Testing Facilities (IITFs) currently certified to meet the standards of the Mandatory Guidelines for Federal Workplace Drug Testing Programs using Urine or Oral Fluid (Mandatory Guidelines).

FOR FURTHER INFORMATION CONTACT:

Anastasia Flanagan, Division of Workplace Programs, SAMHSA/CSAP, 5600 Fishers Lane, Room 16N06B, Rockville, Maryland 20857; 240-276-2600 (voice); Anastasia.Flanagan@samhsa.hhs.gov (email).

SUPPLEMENTARY INFORMATION: In accordance with section 9.19 of the Mandatory Guidelines, a notice listing all currently HHS-certified laboratories and IITFs is published in the **Federal Register** during the first week of each month. If any laboratory or IITF certification is suspended or revoked, the laboratory or IITF will be omitted from subsequent lists until such time as it is restored to full certification under the Mandatory Guidelines.

If any laboratory or IITF has withdrawn from the HHS National Laboratory Certification Program (NLCP) during the past month, it will be listed at the end and will be omitted from the monthly listing thereafter.

This notice is also available on the internet at <https://www.samhsa.gov/workplace/resources/drug-testing/certified-lab-list>.

The Department of Health and Human Services (HHS) notifies Federal agencies of the laboratories and Instrumented Initial Testing Facilities (IITFs) currently certified to meet the standards of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines) using Urine and of the laboratories currently certified to meet the standards of the Mandatory Guidelines using Oral Fluid.

The Mandatory Guidelines using Urine were first published in the **Federal Register** on April 11, 1988 (53

FR 11970), and subsequently revised in the **Federal Register** on June 9, 1994 (59 FR 29908); September 30, 1997 (62 FR 51118); April 13, 2004 (69 FR 19644); November 25, 2008 (73 FR 71858); December 10, 2008 (73 FR 75122); April 30, 2010 (75 FR 22809); and on January 23, 2017 (82 FR 7920).

The Mandatory Guidelines using Oral Fluid were first published in the **Federal Register** on October 25, 2019 (84 FR 57554) with an effective date of January 1, 2020.

The Mandatory Guidelines were initially developed in accordance with Executive Order 12564 and section 503 of Public Law 100-71 and allowed urine drug testing only. The Mandatory Guidelines using Urine have since been revised, and new Mandatory Guidelines allowing for oral fluid drug testing have been published. The Mandatory Guidelines require strict standards that laboratories and IITFs must meet in order to conduct drug and specimen validity tests on specimens for Federal agencies. HHS does not allow IITFs to conduct oral fluid testing.

To become certified, an applicant laboratory or IITF must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification, a laboratory or IITF must participate in a quarterly performance testing program plus undergo periodic, on-site inspections.

Laboratories and IITFs in the applicant stage of certification are not to be considered as meeting the minimum requirements described in the HHS Mandatory Guidelines using Urine and/or Oral Fluid. An HHS-certified laboratory or IITF must have its letter of certification from HHS/SAMHSA (formerly: HHS/NIDA), which attests that the test facility has met minimum standards. HHS does not allow IITFs to conduct oral fluid testing.

HHS-Certified Laboratories Approved To Conduct Oral Fluid Drug Testing

In accordance with the Mandatory Guidelines using Oral Fluid dated October 25, 2019 (84 FR 57554), the following HHS-certified laboratories meet the minimum standards to conduct drug and specimen validity tests on oral fluid specimens:

At this time, there are no laboratories certified to conduct drug and specimen validity tests on oral fluid specimens.

HHS-Certified Instrumented Initial Testing Facilities Approved To Conduct Urine Drug Testing

In accordance with the Mandatory Guidelines using Urine dated January 23, 2017 (82 FR 7920), the following HHS-certified IITFs meet the minimum

standards to conduct drug and specimen validity tests on urine specimens:

Dynacare,* 6628 50th Street NW, Edmonton, AB Canada T6B 2N7, 780-784-1190 (Formerly: Gamma-Dynacare Medical Laboratories).

HHS-Certified Laboratories Approved To Conduct Urine Drug Testing

In accordance with the Mandatory Guidelines using Urine dated January 23, 2017 (82 FR 7920), the following HHS-certified laboratories meet the minimum standards to conduct drug and specimen validity tests on urine specimens:

Alere Toxicology Services, 1111 Newton St., Gretna, LA 70053, 504-361-8989/800-433-3823 (Formerly: Kroll Laboratory Specialists, Inc., Laboratory Specialists, Inc.).

Alere Toxicology Services, 450 Southlake Blvd., Richmond, VA 23236, 804-378-9130 (Formerly: Kroll Laboratory Specialists, Inc., Scientific Testing Laboratories, Inc.; Kroll Scientific Testing Laboratories, Inc.).

Clinical Reference Laboratory, Inc., 8433 Quivira Road, Lenexa, KS 66215-2802, 800-445-6917.

Desert Tox, LLC, 5425 E Bell Rd., Suite 125, Scottsdale, AZ 85254, 602-457-5411/623-748-5045.

DrugScan, Inc., 200 Precision Road, Suite 200, Horsham, PA 19044, 800-235-4890.

Dynacare,* 245 Pall Mall Street, London, ONT, Canada N6A 1P4, 519-679-1630 (Formerly: Gamma-Dynacare Medical Laboratories).

ElSohly Laboratories, Inc., 5 Industrial Park Drive, Oxford, MS 38655, 662-236-2609.

LabOne, Inc. d/b/a Quest Diagnostics, 10101 Renner Blvd., Lenexa, KS 66219, 913-888-3927/800-873-8845 (Formerly: Quest Diagnostics Incorporated; LabOne, Inc.; Center for Laboratory Services, a Division of LabOne, Inc.).

Laboratory Corporation of America, 1225 NE 2nd Ave., Portland, OR 97232, 503-413-5295/800-950-5295 (Formerly: Legacy Laboratory Services Toxicology MetroLab).

Laboratory Corporation of America Holdings, 7207 N Gessner Road, Houston, TX 77040, 713-856-8288/800-800-2387.

Laboratory Corporation of America Holdings, 69 First Ave., Raritan, NJ 08869, 908-526-2400/800-437-4986 (Formerly: Roche Biomedical Laboratories, Inc.).

Laboratory Corporation of America Holdings, 1904 TW Alexander Drive, Research Triangle Park, NC 27709,

919-572-6900/800-833-3984 (Formerly: LabCorp Occupational Testing Services, Inc.; CompuChem Laboratories, Inc.; CompuChem Laboratories, Inc., A Subsidiary of Roche Biomedical Laboratory; Roche CompuChem Laboratories, Inc., A Member of the Roche Group).

Laboratory Corporation of America Holdings, 1120 Main Street, Southaven, MS 38671, 866-827-8042/800-233-6339 (Formerly: LabCorp Occupational Testing Services, Inc.; MedExpress/National Laboratory Center).

MedTox Laboratories, Inc., 402 W County Road D, St. Paul, MN 55112, 651-636-7466/800-832-3244.

Minneapolis Veterans Affairs Medical Center, Forensic Toxicology Laboratory, 1 Veterans Drive, Minneapolis, MN 55417, 612-725-2088. Testing for Veterans Affairs (VA) Employees Only.

Omega Laboratories, Inc.,* 2150 Dunwin Drive, Unit 1 & 2, Mississauga, ON, Canada L5L 5M8, 289-919-3188.

Pacific Toxicology Laboratories, 9348 DeSoto Ave., Chatsworth, CA 91311, 800-328-6942 (Formerly: Centinela Hospital Airport Toxicology Laboratory).

Phamatech, Inc., 15175 Innovation Drive, San Diego, CA 92128, 888-635-5840.

Quest Diagnostics Incorporated, 400 Egypt Road, Norristown, PA 19403, 610-631-4600/877-642-2216 (Formerly: SmithKline Beecham Clinical Laboratories; SmithKline Bio-Science Laboratories).

U.S. Army Forensic Toxicology Drug Testing Laboratory, 2490 Wilson St., Fort George G. Meade, MD 20755-5235, 301-677-7085, Testing for Department of Defense (DoD) Employees Only.

* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory (61 FR 37015) as meeting the minimum standards of the Mandatory Guidelines published in the **Federal Register** on January 23, 2017 (82 FR 7920). After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in the NLCP certification maintenance program.

Anastasia D. Flanagan,
Public Health Advisor, Division of Workplace Programs.

BILLING CODE 4160-20-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG-2023-0928]

Shipping Safety Fairways Environmental Impact Public Scoping Meetings

AGENCY: Coast Guard, DHS.

ACTION: Notice.

SUMMARY: The Coast Guard announced a series of public meetings to solicit feedback on the potential environmental impact of shipping safety fairways along the Atlantic coast. The time of two of the meetings has been changed. This notice announces the new times for the Norfolk and virtual public meetings. The email address for the Coast Guard's point of contact with regard to the Atlantic coast fairways has also been updated.

FOR FURTHER INFORMATION CONTACT: For information about this document call or email Maureen Kallgren, Coast Guard; telephone 202-372-1561, email Maureen.R.Kallgren2@uscg.mil.

SUPPLEMENTARY INFORMATION: The notice published on January 23, 2024, announced a series of public meetings. 89 FR 4320. The February 12 meeting at the Jordan Newby Branch at Broad Creek of Norfolk Public Library has been moved to 6 p.m.-8 p.m. EST. The virtual meeting will take place on February 15 from 4 p.m.-6 p.m. EST at <https://www.zoomgov.com/j/1616731053>.

This notice is issued under authority found in 42 U.S.C. 4332.

Dated: January 26, 2024.

Steven E. Ramassini,
Chief, Office of Navigation Systems.

BILLING CODE 9110-04-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2024-0002; Internal Agency Docket No. FEMA-B-2275]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency; Department of Homeland Security.

ACTION: Notice; correction.

SUMMARY: On August 7, 2023, FEMA published in the **Federal Register** a proposed flood hazard determination notice that contained an erroneous table. This notice provides corrections to that table to be used in lieu of the erroneous information. The table provided here represents the proposed flood hazard determinations and communities affected for Hays County, Texas and Incorporated Areas.

DATES: Comments are to be submitted on or before May 1, 2024.

ADDRESSES: The Preliminary Flood Insurance Rate Map (FIRM), and where applicable, the Flood Insurance Study (FIS) report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

You may submit comments, identified by Docket No. FEMA-B-2275, to Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400

C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed in the table below, in accordance with Section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of

the SRP may only be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at https://floodsrp.org/pdfs/srp_fact_sheet.pdf.

The communities affected by the flood hazard determinations are provided in the table below. Any request for reconsideration of the revised flood hazard determinations shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations will also be considered before the FIRM and FIS report are made final.

Correction

In the proposed flood hazard determination notice published at 88 FR 29923 in the October 12, 2022, issue of the **Federal Register**, FEMA published a table titled “Hays County, Texas and Incorporated Areas”. This table contained inaccurate information as to the communities affected by the proposed flood hazard determinations, featured in the table. In this document, FEMA is publishing a table containing the accurate information. The information provided below should be used in lieu of that previously published.

(Catalog of Federal Domestic Assistance No. 97.022, “Flood Insurance.”)

Nicholas A. Shufro,
Deputy Assistant Administrator for Risk Management, Federal Emergency Management Agency, Department of Homeland Security.

Community	Community map repository address

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS-2024-0003]

Faith-Based Security Advisory Council

AGENCY: The Office of Partnership and Engagement (OPE), The Department of Homeland Security (DHS).

ACTION: Notice of new taskings for the Faith-Based Security Advisory Council (FBSAC).

SUMMARY: On January 5, 2024, the Secretary of DHS, Alejandro N. Mayorkas, issued a memorandum tasking the Faith-Based Security Advisory Council (FBSAC) to establish two subcommittees further outlined below. This notice is not a solicitation for membership.

FOR FURTHER INFORMATION CONTACT: Sameer Hossain, Designated Federal Officer, Faith-Based Security Advisory Council of Department of Homeland Security, at FBSAC@hq.dhs.gov or 202-891-2876.

SUPPLEMENTARY INFORMATION: The FBSAC provides organizationally independent, strategic, timely, specific, and actionable advice to the Secretary through the OPE Assistant Secretary, who serves as the DHS Faith-Based Organizations Security Coordinator on security and preparedness matters related to places of worship, faith communities, and faith-based organizations. The Council consists of members who are: faith-based organization security officials; faith-based organization leaders; faith leaders; state and local public safety, law enforcement, and emergency management leaders; and a representative from the Department of Justice or Federal Bureau of Investigation.

The Secretary has requested that the FBSAC form new subcommittees to study and provide recommendations in the following critical areas for the Department:

1. Countering Transnational Repression (TNR), providing recommendations on how DHS can partner with faith-based organizations to develop a strategy to protect faith-based community stakeholders from incidents of TNR; provide process recommendations that faith-based leaders and security professionals can implement to inform faith-based communities about ongoing TNR threats and resources; an effective way to

encourage faith-based communities to report TNR threats; and assessments for faith-based leaders and security professional on how well safety and security resources are working in terms of community utilization and effective mitigation of TNR incidents.

2. Countering and responding to Targeted Violence and Terrorism, providing recommendations on how DHS can partner with faith-based organizations to survey existing multi-faith initiatives nationwide to establish a “best practices toolkit” on how faith-based organizations and institutions can build resiliency against threats of targeted violence and terrorism; examples of faith-based entities that have prevented targeted violence and terrorism utilizing safety and security resources; best practices from those examples that other faith communities can adopt; examples of how faith communities utilized federal government resources in the immediate aftermath and long-term; and avenues for DHS to assist with community building to increase resilience across faith groups in the event of an act of targeted violence.

Schedule: The subcommittees findings and recommendations will be submitted to the FBSAC for its deliberation and vote during a public meeting within 150 days of January 5, 2024.

Dated: January 18, 2024.

Sameer Hossain,

Designated Federal Officer, Faith-Based Security Advisory Council, U.S. Department of Homeland Security.

BILLING CODE 9112-FN-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-6447-N-01]

Notice of Federal Advisory Committee Meetings; Manufactured Housing Consensus Committee

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development (HUD).

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda for two Manufactured Housing Consensus Committees (MHCC) teleconference meetings. The meetings are open to the public. The agenda for each meeting provides opportunity for citizens to comment on the business before the MHCC.

DATES:

The first meeting will be held on Thursday, February 15, 2024, 11 a.m. to 4 p.m. Eastern Standard Time (EST).

The second meeting will be held on Friday, February 16, 2024, 11 a.m. to 2 p.m. Eastern Standard Time (EST).

ADDRESSES: The February meetings will be held via teleconference.

The teleconference number for the meeting(s) is:

Phone: 1 301 715 8592 or 1 646 931 3860.

Meeting ID: 873 3743 1136.

To access the webinar, use the

following link: <https://us06web.zoom.us/j/87337431136>.

FOR FURTHER INFORMATION CONTACT:

Teresa B. Payne, Administrator, Office of Manufactured Housing Programs, Department of Housing and Urban Development, 451 7th Street SW, Room 9166, Washington, DC 20410, telephone (202) 708-6423 (this is not a toll-free number), email mhcc@hud.gov. Individuals can dial 7-1-1 to access the Telecommunications Relay Service (TRS), which permits users to make text-based calls, including Text Telephone (TTY) and Speech to Speech (STS) calls. Individuals who require an alternative aid or service to communicate effectively with HUD should email the point of contact listed above and provide a brief description of their preferred method of communication.

SUPPLEMENTARY INFORMATION:**Background**

Notice of these meetings is provided in accordance with the Federal Advisory Committee Act, 5 U.S.C. 1009(a)(2) through implementing regulations at 41 CFR 102-3.150. The MHCC was established by the National Manufactured Housing Construction and Safety Standards Act of 1974, 42 U.S.C. 5403(a)(3), as amended by the Manufactured Housing Improvement Act of 2000 (Pub. L. 106-569). According to 42 U.S.C. 5403, as amended, the purposes of the MHCC are to:

- Provide periodic recommendations to the Secretary to adopt, revise, and interpret the Federal manufactured housing construction and safety standards in accordance with this subsection;

- Provide periodic recommendations to the Secretary to adopt, revise, and interpret the procedural and enforcement regulations, including regulations specifying the permissible scope and conduct of monitoring in accordance with subsection (b);

- Be organized and carry out its business in a manner that guarantees a

fair opportunity for the expression and consideration of various positions and for public participation.

The MHCC is deemed an advisory committee not composed of Federal employees.

Public Comment

Citizens wishing to make comments on the business of the MHCC are encouraged to register by or before Monday, February 5, 2024, by contacting the Administering Organization (AO), Home Innovation Research Labs; Attention: Kevin Kauffman, 400 Prince Georges Blvd., Upper Marlboro, MD 20774, or email to mhcc@homeinnovation.com or call 1-888-602-4663. Written comments are encouraged. All written comments must be provided to mhcc@homeinnovation.com no later than Monday, February 12, 2024. Advance registration for both meetings is strongly encouraged.

Please note, written comments submitted will not be read during the meeting but will be provided to the MHCC members prior to the meeting. The MHCC will also provide an opportunity for oral public comments on specific matters before the MHCC at each meeting. The total amount of time for oral comments will be 30 minutes, in two 15-minute periods, with each commenter limited to two minutes to ensure pertinent Committee business is completed and all public comments can be expressed. The Committee will not respond to individual written or oral statements; however, it will take all public comments into account in its deliberations. The MHCC strives to accommodate citizen comments to the extent possible within the time constraints of the meeting agenda.

Noting the complexity of the Department of Energy's (DOE's) Energy Conservation Rule as it works to align energy conservation standards with its Manufactured Housing Construction and Safety Standards, HUD is scheduling two meetings of the MHCC to allow robust discussion, analysis, and consideration of the notice of proposed rulemaking, Energy Conservation Program: Energy Conservations Standards for Manufactured Housing; Enforcement published by DOE on December 23, 2024 at 88 FR 88844 (the "DOE NPR"). These meetings are scheduled for two days to provide sufficient time for thorough consideration. HUD, therefore, strongly encourages active participation by committee members, stakeholders, and other interested parties.

Tentative Agenda for the February 2024 Meetings

Day 1, Thursday, February 15, 2024

- 11:00–11:05 a.m. Call to Order—Chair, Vice Chair, and *Teresa Payne*, Designated Federal Officer (DFO)
- 11:05–11:15 a.m. Welcome and Opening Remarks
- A. Roll Call—*Kevin Kauffman*, Administering Organization (AO)
- a. Introductions
- b. Manufactured Housing Consensus Committee (MHCC) Members
- c. U.S. Department of Housing and Urban Development (HUD) Staff
- B. Administrative Announcements—*Teresa Payne*, DFO, and *Kevin Kauffman*, AO
- 11:15–11:20 a.m. Approve Draft Minutes from October 18–20, 2022, and November 15–17, 2022, Manufactured Housing Consensus Committee (MHCC) Meetings
- 11:20–11:50 a.m. Public Comment Period (Public Encouraged to Sign Up with AO)
- 11:50 p.m.–1:30 p.m. Review and consider the DOE NPR and prepare recommendations to HUD.
- 1:30–1:45 p.m. *Break*
- 1:45–2:15 p.m. Public Comment Period (Public Encouraged to Sign Up with AO)
- 2:15–3:50 p.m. Continued review and consideration the DOE NPR and prepare recommendations to HUD.
- 3:50–4:00 p.m. Daily Wrap Up—DFO and AO
- 4:00 p.m. *Adjourn for the Day*

Day 2, Friday, February 16, 2024

- 11:00–11:05 a.m. Call to Order—Chairperson, Vice Chairperson, and *Teresa Payne*, Designated Federal Officer (DFO)
- 11:05–11:15 a.m. Welcome and Opening Remarks
- A. Roll Call—*Kevin Kauffman*, Administering Organization (AO)
- a. Introductions
- b. Manufactured Housing Consensus Committee (MHCC) Members
- c. U.S. Department of Housing and Urban Development (HUD) Staff
- B. Administrative Announcements—*Teresa Payne*, DFO, and *Kevin Kauffman*, AO
- 11:15–11:30 a.m. Public Comment Period (Public Encouraged to Sign Up with AO)
- 11:30 a.m.–12:45 p.m. Continued review and consideration of the DOE NPR and prepare recommendations to HUD.
- 12:45–1:00 p.m. *Break*
- 1:00–1:15 p.m. Public Comment Period (Public Encouraged to Sign Up with AO)

1:15–1:50 p.m. Continued review and consideration of the DOE NPR and prepare recommendations to HUD.

1:50–2:00 p.m. Daily Wrap Up—DFO and AO

2:00 p.m. *Adjournment*

Julia R. Gordon,

Assistant Secretary for Housing, Federal Housing Commissioner.

[FR Doc. 2024–01951 Filed 1–31–24; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R6–ES–2021–0056; FF06E21000 245 FXES1140600000]

Endangered and Threatened Wildlife and Plants; Proposed Amendment to Programmatic Safe Harbor Agreement and Candidate Conservation Agreement With Assurances for Kansas Aquatic Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are announcing the availability of documents associated with an application to amend an enhancement of survival permit (permit) under the Endangered Species Act. The Kansas Department of Wildlife and Parks has applied to amend the existing *Programmatic Safe Harbor Agreement and Candidate Conservation Agreement with Assurances for 15 Aquatic Species in Kansas* (SHA/CCAA) by adding 6 additional covered species: Lake sturgeon (*Acipenser fulvescens*), sicklefin chub (*Macrhybopsis meeki*), sturgeon chub (*Macrhybopsis gelida*), snuffbox mussel (*Epioblasma triquetra*), spectaclecase (*Cumberlandia monodonta*), and Ouachita kidneyshell (*Ptychobranthus occidentalis*). The documents available for review and comment are the applicant's proposed amended programmatic SHA/CCAA, which is part of the permit amendment application, and our draft environmental action statement and low-effect screening form, which support a categorical exclusion for the amendment under the National Environmental Policy Act. We invite comments from the public and Federal, Tribal, State, and local governments.

DATES: We will accept comments received or postmarked on or before March 4, 2024. Comments submitted online at <https://www.regulations.gov>

(see **ADDRESSES**) must be received by 11:59 p.m. eastern time on March 4, 2024.

ADDRESSES:

Obtaining Documents: The documents this notice announces, as well as any comments and other materials that we receive, will be available for public inspection online in Docket No. FWS–R6–ES–2021–0056 at <https://www.regulations.gov>.

Submitting Comments: To submit written comments, please use one of the following methods, and note that your information request or comments are in reference to the Kansas Aquatic SHA/CCAA amendment.

- *Online:* <https://www.regulations.gov>. Follow the instructions for submitting comments on Docket Number FWS–R6–ES–2021–0056.

- *U.S. Mail:* Public Comments Processing, Attn: Docket No. FWS–R6–ES–2021–0056; U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike; Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT:

Gibran Suleiman, by phone at 785–539–3474, extension 114, or by email at gibran_suleiman@fws.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), have received an application from the Kansas Department of Wildlife and Parks (KDWP, applicant) to amend their existing 50-year enhancement of survival permit (permit) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The amendment requests the addition of 6 species to the 15 species already covered by the applicant's approved programmatic safe harbor agreement (SHA) and candidate conservation agreement with assurances (CCAA) on non-Federal lands in the State of Kansas. The documents available for review and comment are the applicant's proposed amended programmatic SHA/CCAA, which is part of the permit amendment application, and our draft environmental action statement and low-effect screening form for the amendment request, which support a categorical exclusion under the National

Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*). We invite comments on documents from the public and Federal, Tribal, State, and local governments.

Background

Via a **Federal Register** notice published on September 15, 2021 (86 FR 51366), we announced the availability of KDWP's original application for an enhancement of survival permit with a 50-year term, which included a proposed programmatic SHA/CCAA for 14 aquatic species in Kansas, and our draft environmental action statement and low-effect screening form, which supported a categorical exclusion under NEPA. The comment period was open until October 15, 2021. After considering the application, associated materials, and the 15 public comments received, we issued the requested permit. On October 12, 2022, we announced via a **Federal Register** notice (87 FR 62114) the availability of KDWP's subsequent application to amend their enhancement of survival permit to include one additional covered species, the western fanshell (*Cyprogenia aberti*). The comment period for the amendment was open until November 14, 2022, and we issued the requested amended permit after considering the application, associated materials, and the three public comments received. To provide background information, we have made the original 2021 proposed programmatic SHA and CCAA, and the 2022 amendment, along with related documents and comments, available for review in <https://www.regulations.gov> under Docket No. FWS–R6–ES–2021–0056. However, we will not be taking further comments on those documents.

Safe Harbor Agreements and Candidate Conservation Agreements With Assurances

An SHA is an agreement between the Service, partners, and landowners for voluntary management of non-Federal lands to contribute towards recovery of ESA-listed species in a manner that is consistent with the Service's policy on SHAs (64 FR 32717, June 17, 1999) and applicable regulations. A CCAA is an agreement between the Service, partners, and landowners for voluntary management of non-Federal lands to remove or reduce key threats to species that may become listed under the ESA, in a manner that is consistent with the Service's policy on CCAAs (81 FR 95164, December 27, 2016) and applicable regulations. In return for

implementing conservation measures in a SHA/CCAA, the Service gives participants assurances that the Service will not impose land, water, or resource use restrictions or conservation requirements on ESA-listed species, or those that may become listed, beyond those agreed to in the SHA/CCAA.

Applicant's Proposed Amendment to Programmatic Safe Harbor Agreement/Candidate Conservation Agreement With Assurances

KDWP's purpose in amending its programmatic SHA/CCAA is to add the lake sturgeon, sicklefin chub, sturgeon chub, snuffbox mussel, spectaclecase, and Ouachita kidneyshell, to facilitate the reintroduction and implementation of conservation measures for the species on non-Federal lands in Kansas. The documents available for review and comment are the proposed amended programmatic SHA/CCAA, which is part of the permit application, and our draft environmental action statement and low-effect screening form, which support a categorical exclusion under NEPA.

To enroll in the programmatic SHA/CCAA, a non-Federal landowner would enter into a landowner agreement with KDWP to enroll all or a portion of their property under the SHA and/or CCAA. Upon signature by both parties, KDWP would issue a certificate of inclusion to the non-Federal landowner, extending assurances and take authorization to the participating landowner for the appropriate covered species. The requested permit duration is for 50 years, starting on December 15, 2021 (the date of original permit issuance). Proposed conservation measures include the introduction, reintroduction, augmentation (release of individuals to supplement an existing population), or translocation of the covered species, and protection or enhancement of aquatic, wetland, riparian, or adjacent upland habitats for the covered species. Conservation measures would be site specific, and would be developed by the participating landowner and KDWP. Incidental take of covered species may occur as a result of the implementation of conservation measures or ongoing land management activities on the enrolled lands.

Covered Species

The addition of the 6 species to the 15 species in the existing agreement would bring the total number of species covered under the CCAA/SHA to 21. All 21 species are in the table below.

Species name	Scientific name	Federal listing status	Federal Register listing citation
Safe Harbor Agreement Covered Species			
<i>Fishes:</i>			
Arkansas River shiner	<i>Notropis girardi</i>	Threatened	63 FR 64772; November 13, 1998.
Neosho madtom	<i>Noturus placidus</i>	Threatened	55 FR 21148; May 22, 1990.
Neosho mucket	<i>Lampsilis rafinesqueana</i>	Endangered	78 FR 57076; September 17, 2013.
Peppered chub	<i>Macrhybopsis tetranema</i>	Endangered	87 FR 11188; February 28, 2022.
Topeka shiner	<i>Notropis topeka</i>	Endangered	63 FR 69008; December 15, 1998.
<i>Mussels:</i>			
Rabbitsfoot	<i>Quadrula cylindrica cylindrica</i>	Threatened	78 FR 57076; September 17, 2013.
Western fanshell	<i>Cyprogenia aberti</i>	Threatened	88 FR 41724; June 27, 2023.
Snuffbox mussel	<i>Epioblasma triquetra</i>	Endangered	77 FR 8631; February 14, 2012.
Spectaclecase	<i>Cumberlandia monodonta</i>	Endangered	77 FR 14914; March 13, 2012.
Candidate Conservation Agreement With Assurances Covered Species			
<i>Reptiles:</i>			
Alligator snapping turtle	<i>Macrochelys temminckii</i>	Proposed Threatened	86 FR 62434; November 9, 2021.
<i>Fishes:</i>			
Hornyhead chub	<i>Nocomis biguttatus</i>	Unlisted	N/A.
Plains minnow	<i>Hybognathus placitus</i>	Unlisted	N/A.
Silver chub	<i>Macrhybopsis storeriana</i>	Unlisted	N/A.
Lake sturgeon	<i>Acipenser fulvescens</i>	Unlisted	N/A.
Sicklefin chub	<i>Macrhybopsis meeki</i>	Unlisted	N/A.
Sturgeon chub	<i>Macrhybopsis gelida</i>	Unlisted	N/A.
<i>Mussels:</i>			
Butterfly mussel	<i>Ellipsaria lineolata</i>	Unlisted	N/A.
Cylindrical papershell	<i>Anodontoides ferussacianus</i>	Unlisted	N/A.
Flat floater	<i>Anodonta suborbiculata</i>	Unlisted	N/A.
Fluted shell	<i>Lasmigona costata</i>	Unlisted	N/A.
Ouachita kidneyshell	<i>Ptychobranthus occidentalis</i>	Unlisted	N/A.

Public Availability of Comments

Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Authority

We provide this notice under section 10(c) of the ESA (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22 and 17.32) and NEPA (42 U.S.C. 4321 *et seq.*) and its

implementing regulations (40 CFR 1500–1508 and 43 CFR 46).

Marjorie Nelson,

Acting Assistant Regional Director, Ecological Services, Mountain-Prairie Region.

Fish and Wildlife Service

[FWS–R8–ES–2024–0002; FXES1114080000–245–FF08EVEN00]

Endangered and Threatened Wildlife and Plants; Proposed Safe Harbor Agreement and Proposed Categorical Exclusion; Los Robles Ranch, Santa Barbara County, CA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; receipt of permit application.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of an application for an enhancement of survival permit pursuant to the Endangered Species Act. As part of the application, the applicant submitted a proposed safe harbor

agreement. The Service prepared a draft screening form in accordance with the National Environmental Policy Act to evaluate the potential effects of the specific project to the natural and human environment. We invite the public and local, State, Tribal, and Federal agencies to comment on these documents. Before issuing the requested permit, we will take into consideration any information that we receive during the public comment period.

DATES: Written comments should be received on or before March 4, 2024.

ADDRESSES:

Obtaining Documents: You may obtain copies of the documents, and any comments and other materials that we receive, in Docket No. FWS–R8–ES–2024–0002 at <https://www.regulations.gov>.

Submitting Comments: You may submit comments on the documents, and any comments and other materials that we receive, by one of the following methods:

- *Online:* <https://www.regulations.gov>. Search for and submit comments on Docket No. FWS–R8–ES–2024–0002.
- *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS–R8–

ES-2024-0002; U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike; Falls Church, VA 22041-3803.

FOR FURTHER INFORMATION CONTACT: Eric Morrisette, Fish and Wildlife Biologist, via email at eric_morrisette@fws.gov, by telephone at 805-644-1766, or by mail to the U.S. Fish and Wildlife Service, 2493 Portola Road, Suite B, Ventura, CA 93003. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of an application for an enhancement of survival permit pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). As part of the application, the applicant developed and submitted the proposed *Safe Harbor Agreement for the California Tiger Salamander and Western Spadefoot at Los Robles Ranch in Santa Barbara County, California* (SHA), which describes activities associated with the maintenance, enhancement, and restoration of habitat; ongoing legal land use such as ranching or farming; and other covered activities, including the potential future return of any enrolled lands to the baseline condition. The Service prepared a draft low-effect screening form and environmental action statement in accordance with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) to evaluate the potential effects to the natural and human environment.

If the requested enhancement of survival permit is approved, it would authorize the applicant to incidentally take the federally endangered Santa Barbara County distinct population segment (DPS) of the California tiger salamander (*Ambystoma californiense*) and the federally "at-risk" western spadefoot (*Spea hammondi*) during implementation of activities associated with the maintenance, enhancement, and restoration of habitat; ongoing legal land use such as ranching or farming; and other covered activities, including the potential future return of any enrolled lands to the baseline (pre-agreement) condition. We invite public comment on these documents.

Background

The Service listed the Santa Barbara County DPS of the California tiger salamander as endangered on September 21, 2000 (65 FR 57242). The western spadefoot has no current official status under the ESA, but is under review for listing and is referred to as an at-risk species. Section 9 of the ESA prohibits "take" of fish and wildlife species listed as threatened or endangered (16 U.S.C. 1538), where take is defined to include the following activities: "to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct" (16 U.S.C. 1532). Under section 10(a) of the ESA, we may issue permits to authorize take of listed fish and wildlife species. Regulations governing incidental take permits for endangered and threatened species are in the Code of Federal Regulations (CFR) at 50 CFR 17.22 and 17.32, respectively.

Under a SHA, participating landowners voluntarily undertake conservation and management activities on their properties to benefit species listed under the ESA. Enhancement of survival permits are issued to applicants in association with approved SHAs to authorize take of the covered species from covered activities on the enrolled lands that are identified in the SHA. Covered activities are those beneficial or otherwise lawful actions that could cause take of a covered species and for which take is authorized by a permit under 50 CFR 17.22a(c). Under a SHA, the Service may authorize incidental taking of a covered species at a level that enables the participating landowner ultimately to return the enrolled property back to agreed-upon baseline conditions. Through the SHA and the associated enhancement of survival permit, the Service also provides assurances to enrolled property owners that additional land, water, and/or natural resource use restrictions will not be imposed as a result of their voluntary conservation actions.

Applicant's Proposed Activities

The proposed action involves the issuance of an enhancement of survival permit to the applicant in association with the implementation of the SHA. The enhancement of survival permit would authorize incidental take that may result from the implementation of the proposed conservation and management activities on the enrolled property during a 30-year permit term, with an option to return the property to the baseline condition at the conclusion of the permit.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public view, we cannot guarantee that we will be able to do so.

Authority

We provide this notice under section 10(c) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22 and 17.32) and the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1506.6).

Stephen P. Henry,

Field Supervisor, Ventura Fish and Wildlife Office, Ventura, California.

BILLING CODE 4312–52–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–592 and 731–TA–1400 (Review)]

Plastic Decorative Ribbon From China; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 (“the Act”), as amended, to determine whether revocation of the antidumping and countervailing duty orders on plastic decorative ribbon from China would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted February 1, 2024. To be assured of consideration, the deadline for responses is March 4, 2024. Comments on the adequacy of responses may be filed with the Commission by April 10, 2024.

FOR FURTHER INFORMATION CONTACT: Alexis Yim (202–708–1446), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission’s TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office

of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On March 22, 2019, the Department of Commerce (“Commerce”) issued antidumping and countervailing duty orders on imports of plastic decorative ribbon from China (84 FR 10786). The Commission is conducting reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Country* in these reviews is China.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determinations, the Commission defined a single *Domestic Like Product* including all plastic decorative ribbon corresponding to Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations, the Commission defined the *Domestic Industry* to include all domestic producers of plastic decorative ribbon.

(5) The *Order Date* is the date that the antidumping and countervailing duty orders under review became effective. In

these reviews, the *Order Date* is March 22, 2019.

(6) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21

days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is on or before 5:15 p.m. on March 4, 2024. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is on or before 5:15 p.m. on April 10, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the

proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 24-5-590, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information to be Provided in Response to This Notice of Institution: As used below, the term "firm" includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the "NOI worksheet" Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping and countervailing duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in § 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in § 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in the *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries since the *Order Date*.

(7) A list of 3-5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the following information on your firm's operations on that product during calendar year 2023, except as noted (report quantity data in pounds and value data in U.S. dollars, f.o.b. plant).

If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from the *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in pounds and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from the *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from the *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in the *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in pounds and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in the *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in the *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in the *Subject Country* since the *Order Date*, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad).

Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in the *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: January 26, 2024.

Lisa R. Barton,

Secretary to the Commission.

[FR Doc. 2024-01907 Filed 1-31-24; 8:45 am]

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-593-596 and 731-TA-1401-1406 (Review)]

Large Diameter Welded Pipe From Canada, China, Greece, India, South Korea, and Turkey; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 ("the Act"), as amended, to determine whether revocation of the countervailing duty orders on large diameter welded pipe from China, India, South Korea, and Turkey and the antidumping duty orders on large diameter welded pipe from Canada, China, Greece, India, South Korea, and Turkey would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted February 1, 2024. To be assured of consideration, the deadline for responses is March 4, 2024. Comments on the adequacy of responses may be filed with the Commission by April 10, 2024.

FOR FURTHER INFORMATION CONTACT:

Nitin Joshi (202-708-1669), Office of Investigations, U.S. International Trade

Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On March 6, 2019, the Department of Commerce ("Commerce") issued antidumping and countervailing duty orders on imports of large diameter welded pipe from China and India (84 FR 8075-8077, 8079-8081, and 8083-8086). On May 2, 2019, the Department of Commerce ("Commerce") issued countervailing duty orders on imports of large diameter welded pipe from South Korea and Turkey (84 FR 18771-18775) and antidumping duty orders on imports of large diameter welded pipe from Canada, Greece, South Korea, and Turkey (84 FR 18767-18771, 18775-18777, and 18799-18801). The Commission is conducting reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are Canada, China, Greece, India, South Korea, and Turkey.

(3) The *Domestic Like Product* is the domestically produced product or

products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original affirmative determinations, the Commission defined two *Domestic Like Products*: large diameter welded carbon and alloy steel line pipe and large diameter welded carbon and alloy steel structural pipe. One Commissioner defined the *Domestic Like Product* differently.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original affirmative determinations, the Commission defined the *Domestic Industry* to include all domestic producers other than Evraz Oregon of each type of *Domestic Like Product* in the definitions of the two *Domestic Industries* producing large diameter welded carbon and alloy steel line pipe and large diameter welded carbon and alloy steel structural pipe. The Commission excluded Evraz Oregon as a related party from the *Domestic Industries* producing large diameter welded carbon and alloy steel line pipe and large diameter welded carbon and alloy steel structural pipe in its original determinations. One Commissioner defined the *Domestic Industry* differently.

(5) The *Order Dates* are the dates that the orders under review became effective. In the reviews concerning China and India, the *Order Date* is March 6, 2019. In the reviews concerning Canada, Greece, South Korea, and Turkey, the *Order Date* is May 2, 2019.

(6) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons,

or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for

developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is on or before 5:15 p.m. on March 4, 2024. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is on or before 5:15 p.m. on April 10, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 24–5–589, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments

regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information to be Provided in Response to This Notice of Institution: Please provide the requested information separately for each *Domestic Like Product*, as defined by the Commission in its original determinations, and for each of the products identified by Commerce as *Subject Merchandise*. If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject Merchandise* from more than one *Subject Country*; or produce *Subject Merchandise* in more than one *Subject Country*, you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country*. As used below, the term “firm” includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the “NOI worksheet” Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Products*, a U.S. union or worker group, a U.S. importer of the *Subject*

Merchandise, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping and countervailing duty orders on the *Domestic Industries* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in § 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industries*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Products*. Identify any known related parties and the nature of the relationship as defined in § 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries since the *Order Dates*.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Products* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Products* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Products*, provide the following information on your firm's operations on that product during calendar year 2023, except as noted (report quantity data in short tons and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Products* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Products* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Products* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Products* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Products* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in short tons and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in short tons and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Products* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* since the *Order Dates*, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Products* produced in the United States, *Subject Merchandise*

produced in each *Subject Country*, and such merchandise from other countries.

(13) (Optional) A statement of whether you agree with the above definitions of the *Domestic Like Products* and *Domestic Industries*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of Title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: January 26, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024-01933 Filed 1-31-24; 8:45 am]

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-1370]

Certain Power Converter Modules and Computing Systems Containing the Same; Notice of Commission Decision Not To Review an Initial Determination Granting an Unopposed Motion To Amend the Complaint and Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination ("ID") (Order No. 18) of the presiding Administrative Law Judge ("ALJ") granting an unopposed motion to amend the complaint and notice of investigation to add DET Logistics (USA) Corporation ("DET") of Fremont, California, as a respondent.

FOR FURTHER INFORMATION CONTACT: Houda Morad, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 708-4716. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email EDIS3Help@usitc.gov. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the

Commission's TDD terminal on (202) 205-1810.

SUPPLEMENTARY INFORMATION: On August 17, 2023, the Commission instituted this investigation under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 ("section 337"), based on a complaint filed by Vicor Corporation of Andover, Massachusetts. *See* 88 FR 56050-51 (Aug. 17, 2023). The complaint, as supplemented, alleges a violation of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain power converter modules and computing systems containing the same by reason of the infringement of certain claims of U.S. Patent Nos. 9,166,481; 9,516,761; and 10,199,950. *See id.* The notice of investigation names the following respondents: Delta Electronics, Inc. of Taipei, Taiwan; Delta Electronics (Americas) Ltd. of Fremont, California; Delta Electronics (USA) Inc. of Plano, Texas; Cynotec Co., Ltd. of Hsinchu, Taiwan; Quanta Computer Inc. and Quanta Cloud Technology Inc., both of Taoyuan City, Taiwan; Quanta Cloud Technology USA LLC of San Jose, California; Quanta Computer USA Inc. of Fremont, California; Hon Hai Precision Industry Co. Ltd. (d/b/a, Foxconn Technology Group) of Taipei City, Taiwan; Foxconn Industrial internet Co. Ltd. of Shenzhen, China; FII USA Inc. (a/k/a Foxconn Industrial, internet USA Inc.) of Milwaukee, Wisconsin; Ingrasys Technology Inc. of Taoyuan City, Taiwan; and Ingrasys Technology USA Inc. of Fremont, California. *See id.* The Office of Unfair Import Investigations is also a party to the investigation. *See id.*

On December 21, 2023, Complainant filed an unopposed motion to amend the complaint and notice of investigation to add DET as a respondent. No response to the motion was received.

On January 2, 2024, the ALJ issued the subject ID (Order No. 18) granting the motion. The ID finds that, under Commission Rule 210.14(b), 19 CFR 210.14(b), "good cause exists to allow the proposed amendment" because "Vicor was able to identify DET's role in the supply chain . . . only after having received confidential information from the Delta Respondents during discovery." *See* ID at 2. In addition, the ID finds that "[t]he proposed amendment . . . will not prejudice the public interest or the rights of the parties to this investigation." *See id.*

No petition for review of the subject ID was filed.

The Commission has determined not to review the subject ID. The complaint and notice of investigation are amended to add DET as a respondent.

The Commission vote for this determination took place on January 26, 2024.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: January 29, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-1110 (Third Review)]

Sodium Hexametaphosphate From China; Institution of a Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted a review pursuant to the Tariff Act of 1930 ("the Act"), as amended, to determine whether revocation of the antidumping duty order on sodium hexametaphosphate from China would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted February 1, 2024. To be assured of consideration, the deadline for responses is March 4, 2024. Comments on the adequacy of responses may be filed with the Commission by April 10, 2024.

FOR FURTHER INFORMATION CONTACT: Kenneth Gatten (202-708-1447), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the

Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On March 19, 2008, the Department of Commerce ("Commerce") issued an antidumping duty order on imports of sodium hexametaphosphate from China (73 FR 14772). Commerce issued a continuation of the antidumping duty order on imports of sodium hexametaphosphate from China following Commerce's and the Commission's first five-year reviews, effective July 17, 2013 (78 FR 42754) and second five-year reviews, effective March 1, 2019 (84 FR 7021). The Commission is now conducting a third five-year review pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the order would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct a full or expedited review. The Commission's determination in any expedited review will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to this review:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year review, as defined by Commerce.

(2) The *Subject Country* in this review is China.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determination and its expedited first and second five-year review determinations, the Commission defined the *Domestic Like Product* consisting of sodium hexametaphosphate, coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion

of the total domestic production of the product. In its original determination and its expedited first and second five-year review determinations, the Commission defined the *Domestic Industry* consisting of all domestic producers of sodium hexametaphosphate.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202-205-3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to

§ 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on March 4, 2024. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct an expedited or full review. The deadline for filing such comments is 5:15 p.m. on April 10, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's

procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 24–5–591, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determination in the review.

Information To Be Provided in Response to This Notice of Institution: As used below, the term "firm" includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the "NOI worksheet" Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping duty order on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in section 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in the *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries after 2017.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the

following information on your firm's operations on that product during calendar year 2023, except as noted (report quantity data in metric tons and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from the *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in metric tons and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping duties) of

U.S. commercial shipments of *Subject Merchandise* imported from the *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from the *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in the *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in metric tons and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in the *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in the *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in the *Subject Country* after 2017, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand

abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in the *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: January 26, 2024.

Lisa Barton,

Secretary to the Commission.

Sunshine Act Meetings

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: February 9, 2024 at 11:00 a.m.

PLACE: Room 101, 500 E Street SW, Washington, DC 20436, Telephone: (202) 205-2000.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. *Agendas for future meetings:* none.
2. Minutes.
3. Ratification List.
4. Commission vote on Inv. Nos. 701-TA-703 and 731-TA-1661-1663 (Preliminary)(Glass Wine Bottles from Chile, China, and Mexico). The Commission currently is scheduled to complete and file its determinations on February 12, 2024; views of the Commission currently are scheduled to be completed and filed on February 20, 2023.

5. *Outstanding action jackets:* none.

CONTACT PERSON FOR MORE INFORMATION: Sharon Bellamy, Supervisory Hearings and Information Officer, 202-205-2000.

The Commission is holding the meeting under the Government in the Sunshine Act, 5 U.S.C. 552(b). In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be

carried over to the agenda of the following meeting.

By order of the Commission.

Issued: January 30, 2024.

Sharon Bellamy,

Supervisory Hearings and Information Officer.

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-481 and 731-TA-1190 (Second Review)]

Crystalline Silicon Photovoltaic Cells and Modules From China; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 (“the Act”), as amended, to determine whether revocation of the antidumping and countervailing duty orders on crystalline silicon photovoltaic cells and modules from China would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted February 1, 2024. To be assured of consideration, the deadline for responses is March 4, 2024. Comments on the adequacy of responses may be filed with the Commission by April 10, 2024.

FOR FURTHER INFORMATION CONTACT: Andres Andrade (202-205-2078), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission’s TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission’s electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On December 7, 2012, the Department of Commerce (“Commerce”) issued antidumping and

countervailing duty orders on imports of crystalline silicon photovoltaic cells and modules from China (77 FR 73017–73021). Following the first five-year reviews by Commerce and the Commission, effective March 20, 2019, Commerce issued a continuation of the antidumping and countervailing duty orders on imports of crystalline silicon photovoltaic cells and modules from China (84 FR 10299–10301). The Commission is now conducting second reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission’s Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission’s determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Country* in these reviews is China.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determinations and first five-year review determinations, the Commission defined a single *Domestic Like Product*, crystalline silicon photovoltaic cells and modules, corresponding to Commerce’s scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations and its first five-year review determinations, the Commission defined a single *Domestic Industry* as all producers of crystalline silicon photovoltaic cells and modules. One firm was excluded from the *Domestic Industry* under the related parties provision in the original determinations.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission’s rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission’s designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202-205-3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission’s rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized

applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on March 4, 2024. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is 5:15 p.m. on April 10, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of

service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 24–5–588, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information To Be Provided in Response to This Notice of Institution: As used below, the term "firm" includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the "NOI worksheet" Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how,

including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping and countervailing duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in section 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in the *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries after 2017.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the following information on your firm's operations on that product during calendar year 2023, except as noted (report quantity data in kilowatts and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for

the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from the *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in kilowatts and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from the *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of

Subject Merchandise imported from the *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in the *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in kilowatts and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in the *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in the *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in the *Subject Country* after 2017, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product*

produced in the United States, *Subject Merchandise* produced in the *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: January 26, 2024.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

[OMB Number 1110-0015]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension of a Previously Approved Collection; Hate Crime Incident Report

AGENCY: Federal Bureau of Investigation, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Federal Bureau of Investigation, Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until April 1, 2024.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Edward L. Abraham, Crime and Law Enforcement Statistics Unit Chief, FBI, CJIS Division, Module D-1, 1000 Custer Hollow Road, Clarksburg, West Virginia 26306, elabraham@fbi.gov, 304-625-4830.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should

address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Abstract: Under title 28 U.S.C. 534, subsections (a) and (c); the Hate Crime Statistics Act, 34 U.S.C. 41305, modified

by the Matthew Shepard and James Byrd, Jr., Hate Crimes Prevention Act (2009), Public Law, section 4708; and the Uniform Federal Crime Reporting Act of 1988, 34 U.S.C. 41303, this information collection requests hate crime data from LEAs in order for the FBI’s Uniform Crime Reporting (UCR) Program to serve as the national clearinghouse for the collection and dissemination of hate crime data and to publish these statistics annually in various data releases. The hate crime data provide information about the bias motivation, offenses, victims, offenders, and locations of hate crime incidents.

Overview of This Information Collection

- (1) *Type of Information Collection:* Extension of a currently approved collection.
- (2) *The Title of the Form/Collection:* Hate Crime Incident Report.
- (3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form number is 1–700. The applicable component within the DOJ is the CJIS Division, FBI.

(4) *Affected public who will be asked or required to respond, as well as the obligation to respond:* Affected Public Primary: Federal, state, local, tribal, university/college, and territorial law enforcement agencies (LEAs). The obligation to respond is voluntary.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated number of LEAs submitting monthly data to the FBI’s UCR Program is 15,588. Annually, those LEAs submit a total of 187,056 responses (15,588 LEAs × 12 months = 187,056 annual responses). The estimated time it takes for an average response is seven minutes.

(6) *An estimate of the total annual burden (in hours) associated with the collection:* The estimated annual public burden associated with the Hate Crime Data Collection is 21,823 hours [(187,056 annual responses × 7 minutes per response)/60 minutes per hour = 21,823.2 total annual hours].

(7) *An estimate of the total annual cost burden associated with the collection, if applicable:* \$0.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency	Total annual responses	Time per response (min.)	Total annual burden (hours)
Report	15,588	1/month	187,056	7	21,823.2
Unduplicated Totals	15,588	1/month	187,056	7	21,823

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: January 29, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2024–01979 Filed 1–31–24; 8:45 am]

BILLING CODE 4410–02–P

SUMMARY: The Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations govern the application, processing, and disposition of petitions for modification of mandatory safety standards. Any mine operator or representative of miners may petition for an alternative method of complying with an existing safety standard. MSHA reviews the content of each submitted petition, assesses the mine in question, and ultimately issues a decision on the petition. This notice includes a list of petitions for modification that were granted after MSHA’s review and investigation, between July 1, 2023, and December 31, 2023.

ADDRESSES: Copies of the final decisions are posted on MSHA’s website at <https://www.msha.gov/regulations/rulemaking/petitions-modification>. The public may inspect the petitions and final decisions in person at MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Arlington, Virginia, between 9:00 a.m. and 5:00 p.m. Monday through Friday,

except federal holidays. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor’s COVID–19 policy. Special health precautions may be required.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), Petitionsformodification@dol.gov (email), or 202–693–9441 (fax). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

I. Introduction

Under section 101(c) of the Federal Mine Safety and Health Act of 1977, any mine operator or representative of miners may petition to use an alternative approach to comply with a mandatory safety standard. In response, the Secretary of Labor (Secretary) or his or her designee may modify the application of a mandatory safety standard to that mine if the Secretary determines that: (1) An alternative method exists that will guarantee no

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Notice.

less protection for the miners affected than that provided by the standard; or (2) the application of the standard will result in a diminution of safety to the affected miners.

MSHA bases the final decision on the petitioner's statements, any comments and information submitted by interested persons, and a field investigation of the conditions at the mine. In some instances, MSHA may approve a petition for modification on the condition that the mine operator complies with other requirements noted in the decision. In other instances, MSHA may deny, dismiss, or revoke a petition for modification. In accordance with 30 CFR 44.5, MSHA publishes every final action granting a petition for modification.

II. Granted Petitions for Modification

On the basis of the findings of MSHA's investigation, and as designee of the Secretary, MSHA granted or partially granted the petitions for modification below. Since the previous **Federal Register** notice (88 FR 56052) included petitions granted through June 30, 2023, the following are petitions granted between July 1, 2023, and December 31, 2023. The granted petitions are shown in the order that MSHA received them.

- *Docket Number:* M–2022–032–C.

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2007–0043]

TUV SUD America, Inc.: Grant of Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the final decision to expand the scope of recognition for TUV SUD America, Inc. (TUVAM) as a Nationally Recognized Testing Laboratory (NRTL).

DATES: The expansion of the scope of recognition becomes effective on February 1, 2024.

FOR FURTHER INFORMATION CONTACT:

Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor; telephone: (202) 693–1999; email: meilinger.francis2@dol.gov.

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor; telephone: (202) 693–1911; email: robinson.kevin@dol.gov. OSHA's web page includes information about

the NRTL Program (see <http://www.osha.gov/dts/otpca/nrtl/index.html>).

SUPPLEMENTARY INFORMATION:

I. Notice of Final Decision

OSHA hereby gives notice of the expansion of the scope of recognition for TUV SUD America Inc. (TUVAM). TUVAM’s expansion covers the addition of three test standards to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition. Each NRTL’s scope of recognition includes (1) the type of products the NRTL may test, with each type specified by its applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL’s scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes an application by a NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in Appendix A, 29 CFR 1910.7. This appendix requires that the agency

publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides its preliminary finding. In the second notice, the agency provides the final decision on the application. These notices set forth the NRTL’s scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including TUVAM, which details the NRTL’s scope of recognition. These pages are available from the OSHA website at: <https://www.osha.gov/nationally-recognized-testing-laboratory-program>.

TUVAM submitted an application, dated November 22, 2021 (OSHA–2007–0043–0049), to expand their recognition to include three additional test standards to the NRTL scope of recognition. OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information. OSHA did not perform any on-site reviews in relation to this application.

OSHA published the preliminary notice announcing TUVAM’s expansion application in the **Federal Register** on November 7, 2023 (88 FR 76860). The agency requested comments by November 22, 2023, and it received one comment in response to this notice. The comment, OSHA–2007–0043–0053 questioned whether TUVAM has the capability of meeting the testing requirement in clause 13.1 of UL 2054. In response to this comment, OSHA reviewed the documentation submitted

with the application and determined that TUVAM meets the OSHA requirements for the full testing capability for UL 2054. OSHA now is proceeding with this final notice to grant expansion of TUVAM’s NRTL scope of recognition.

To review copies of all public documents pertaining to TUVAM’s application, go to <http://www.regulations.gov> or contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor at (202) 693–2350. Docket No. OSHA–2007–0043 contains all materials in the record concerning TUVAM’s recognition. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 for assistance in locating docket submissions.

II. Final Decision and Order

OSHA staff examined TUVAM’s expansion application and examined other pertinent information. Based on its review of this evidence, OSHA finds that TUVAM meets the requirements of 29 CFR 1910.7 for expansion of its recognition, subject to the limitations and conditions listed in this notice. OSHA, therefore, is proceeding with this final notice to grant TUVAM’s expanded scope of recognition. OSHA limits the expansion of TUVAM’s recognition to include the testing and certification of products for demonstration of conformance to the test standards shown below in Table 1.

TABLE 1—LIST OF APPROPRIATE TEST STANDARDS FOR INCLUSION IN TUVAM’S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 1973	Batteries for Use in Stationary, Vehicle Auxiliary Power and Light Electric Rail (LER) Applications.
UL 2054	Household and Commercial Batteries.
UL 2271	Batteries for Use in Light Electric Vehicle (LEV) Applications.

OSHA’s recognition of any NRTL for a particular test standard is limited to equipment or materials for which OSHA standards require third-party testing and certification before using them in the workplace. Consequently, if a test standard also covers any products for which OSHA does not require such testing and certification, a NRTL’s scope of recognition does not include these products.

The American National Standards Institute (ANSI) may approve the test standards listed above as American National Standards. However, for convenience, OSHA may use the designation of the standards-developing organization for the standard as opposed

to the ANSI designation. Under the NRTL Program’s policy (see OSHA Instruction CPL 01–00–004, Chapter 2, Section VIII), any NRTL recognized for a particular test standard may use either the proprietary version of the test standard or the ANSI version of that standard. Contact ANSI to determine whether a test standard is currently ANSI-approved.

A. Conditions

Recognition is contingent on continued compliance with 29 CFR 1910.7, including but not limited to, abiding by the following conditions of recognition:

1. TUVAM must inform OSHA as soon as possible, in writing, of any

change of ownership, facilities, or key personnel, and of any major change in its operations as a NRTL, and provide details of the change(s);

2. TUVAM must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and

3. TUVAM must continue to meet the requirements for recognition, including all previously published conditions on TUVAM’s scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of TUVAM as a NRTL, subject to the limitations and conditions specified above.

III. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW, Washington, DC 20210, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8-2020 (85 FR 58393; Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC, on January 26, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2024-01978 Filed 1-31-24; 8:45 am]

BILLING CODE 4510-26-P

NATIONAL CREDIT UNION ADMINISTRATION

Privacy Act of 1974; System of Records

AGENCY: National Credit Union Administration.

ACTION: Rescindment of systems of records notices.

SUMMARY: The National Credit Union Administration (NCUA) is issuing a public notice of its intent to rescind two Privacy Act systems of records notices. These systems have been superseded by Government-wide systems of records notices. This notice formally rescinds the two systems of records notices identified below.

DATES: These changes take effect on February 1, 2024.

ADDRESSES: You may submit comments by any of the following methods, but please send comments by one method only:

- *Mail:* Address to Melane Conyers-Ausbrooks, Secretary of the Board, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314-3428.

- *Hand Delivery/Courier:* Same as mail address.

FOR FURTHER INFORMATION CONTACT: Jennifer Harrison, Attorney-Advisor, Office of General Counsel, (703) 518-6540.

SUPPLEMENTARY INFORMATION: Pursuant to the provisions of the Privacy Act of 1974, the NCUA is rescinding the following two systems of records notices from its system of records inventory. As part of a routine review, the NCUA determined that these systems of records notices have been superseded by government-wide system of records notices. A government-wide system of

records is a system of records in which one agency has regulatory authority over the records in the custody of multiple agencies and that agency has the responsibility for publishing a system of records notice that applies to all records regardless of their custodial location. The original publication of these system of records notices is covered below in the History section.

1. NCUA-7, Employee Injury File. This system of records notice has been superseded by a Government-wide system of records notice, DOL/GOVT-1, Office of Workers' Compensation Programs, Federal Employees' Compensation Act File (published at 81 FR 25776 on April 29, 2016).

2. NCUA-14, PaymentNet J.P. Morgan Chase Bank PaymentNet. This system of records notice has been superseded by two Government-wide system of records notices, GSA/GOVT-3, Travel Charge Card Program (published at 78 FR 20108 on April 3, 2013), and GSA/GOVT-6, GSA SmartPay Purchase Charge Card Program (published at 73 FR 22376 on April 25, 2008).

SYSTEM NAME AND NUMBER:

1. NCUA-7, Employee Injury File.
2. NCUA-14, PaymentNet J.P. Morgan Chase Bank PaymentNet.

HISTORY:

1. NCUA-7, Employee Injury File, originally published at 65 FR 3486 (Jan. 21, 2000), modifications published at 71 FR 77807 (Dec. 27, 2006) and 75 FR 41539 (July 16, 2010).

2. NCUA-14, J.P. Morgan Chase Bank PaymentNet, originally published at 71 FR 77807 (Dec. 27, 2006); modification published at 75 FR 41539 (July 16, 2010).

By the National Credit Union Administration Board on January 23, 2024.

Melane Conyers-Ausbrooks,
Secretary of the Board.

NATIONAL FOUNDATION OF THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Special Meeting of the National Museum and Library Services Board

AGENCY: Institute of Museum and Library Services (IMLS), National Foundation of the Arts and the Humanities (NFAH).

ACTION: Notice of meeting.

SUMMARY: The National Museum and Library Services Board, which advises

the Director of the Institute of Museum and Library Services in awarding national awards and medals, will meet by teleconference on February 29, 2024, to review nominations for the 2024 National Medal for Museum and Library Service.

DATES: The meeting will be held on Thursday, February 29, from 3 p.m. eastern time until adjourned.

ADDRESSES: The meeting will convene virtually.

FOR FURTHER INFORMATION CONTACT:

Katherine Maas, Chief of Staff and Alternate Designated Federal Officer, Institute of Museum and Library Services, Suite 4000, 955 L'Enfant Plaza North SW, Washington, DC 20024; (202) 653-4798; kmaas@imls.gov.

SUPPLEMENTARY INFORMATION: The National Museum and Library Services Board is meeting pursuant to the National Museum and Library Service Act, 20 U.S.C. 9105a, and the Federal Advisory Committee Act (FACA) as amended, 5 U.S.C. app. to review nominations for the 2024 National Medal for Museum and Library Service.

The meeting will be closed to the public pursuant to subsections (c)(4), (c)(6) and (c)(9) of section 552b of title 5, United States Code, as amended. The closed meeting will consider information that may disclose: Trade secrets and commercial or financial information obtained from a person and privileged or confidential; and information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action.

Dated: January 29, 2024.

Brianna Ingram,

Paralegal Specialist.

BILLING CODE 7555-01-P

PENSION BENEFIT GUARANTY CORPORATION

Proposed Submission of Information of Collections for OMB Review; Comment Request; Reportable Events; Notice of Failure To Make Required Contributions

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of intention to request extension of OMB approval of an information collection.

SUMMARY: The Pension Benefit Guaranty Corporation (PBGC) intends to request that the Office of Management and Budget (OMB) extend approval, under the Paperwork Reduction Act, of collections of information under PBGC's regulation on Reportable Events and Certain Other Notification Requirements (OMB control numbers 1212-0013 and 1212-0041, expiring July 31, 2024) without modifications. This notice informs the public of PBGC's intent and solicits public comment on the collections of information.

DATES: Comments must be submitted on or before April 1, 2024 to be assured of consideration.

ADDRESSES: Comments may be submitted by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Email:* paperwork.comments@pbgc.gov. Refer to Disclosure of Termination Information in the subject line.
- *Mail or Hand Delivery:* Regulatory Affairs Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 445 12th Street SW, Washington, DC 20024-2101.

Commenters are strongly encouraged to submit comments electronically.

Commenters who submit comments on paper by mail should allow sufficient time for mailed comments to be received before the close of the comment period.

All submissions received must include the agency's name (Pension Benefit Guaranty Corporation, or PBGC) and refer to Disclosure of Termination Information. All comments received will be posted without change to PBGC's website, <http://www.pbgc.gov>, including any personal information provided. Do not submit comments that include any personally identifiable information or confidential business information.

Copies of the collection of information may be obtained without charge by writing to the Disclosure Division, (disclosure@pbgc.gov), Office of the General Counsel, Pension Benefit Guaranty Corporation, 445 12th Street SW, Washington, DC 20024-2101; or, calling 202-229-4040 during normal business hours. If you are deaf or hard of hearing or have a speech disability, please dial 7-1-1 to access telecommunications relay services.

FOR FURTHER INFORMATION CONTACT: Monica O'Donnell (odonnell.monica@pbgc.gov), Attorney, Regulatory Affairs Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 445 12th Street SW, Washington, DC 20024-2101; 202-229-8706. If you are deaf, hard of hearing or have a speech disability, please dial 7-1-1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: Section 4043 of the Employee Retirement Income Security Act of 1974 (ERISA) requires plan administrators and plan sponsors to report certain plan and employer events to PBGC. The reporting requirements give PBGC notice of events that indicate plan or employer financial problems. PBGC uses the information provided to determine what, if any, action it needs to take. For example, PBGC might need to institute proceedings to terminate a plan (placing it in a trusteeship) under section 4042 of ERISA to ensure the continued payment of benefits to plan participants and their beneficiaries or to prevent unreasonable increases in PBGC's losses.

The provisions of section 4043 of ERISA have been implemented in PBGC's regulation on Reportable Events and Certain Other Notification Requirements (29 CFR part 4043).

Form 10

Subparts B and C of the regulation deal with reportable events. PBGC has issued Forms 10 and 10-Advance and

related instructions under subparts B and C (approved under OMB control number 1212-0013). The existing collection of information was approved through July 31, 2024, under OMB control number 1212-0013. PBGC intends to request that OMB extend its approval of this collection for 3 years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

PBGC estimates that it will receive 438 reportable event notices per year under subparts B and C of the reportable events regulation using Forms 10 and 10-Advance and that the average annual burden of this collection of information is 1,377 hours and \$326,310.

Form 200

Section 303(k) of the Employee Retirement Income Security Act of 1974 (ERISA) and section 430(k) of the Internal Revenue Code of 1986 (Code) impose a lien in favor of an underfunded single-employer plan that is covered by PBGC's termination insurance program is (1) any person fails to make a required payment when due, and (2) the unpaid balance of that payment (including interest), when added to the aggregated unpaid balance of all proceedings for which payment was not made when due (including interest), exceeds \$1 million. (For this purpose, a plan is underfunded if its funding target attainment percentage is less than 100 percent.) The lien is upon all property and rights to property belonging to the person or persons that are liable for required contributions (*i.e.*, a contributing sponsor and each member of the controlled group of which that contributing sponsor is a member).

Only PBGC (or, at its direction, the plan's contributing sponsor or a member of the same controlled group) may perfect and enforce this lien. ERISA and the Code require persons that fail to make payments to notify PBGC within 10 days of the due date whenever there is a failure to make a required payment and the total of the unpaid balances (including interest) exceeds \$1 million.

PBGC Form 200, Notice of Failure to Make Required Contributions, and related instructions implement the statutory notification requirement. Submission of Form 200 is required by 29 CFR 4043.81 (Subpart D of PBGC's regulation on Reportable Events and Other Notification Requirements, 29 CFR part 4043). OMB has approved this collection of information under OMB control number 1212-0041, which expires July 31, 2024. PBGC intends to

request that OMB extend its approval of this collection for 3 years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

PBGC estimates that it will receive 60 Form 200 filings per year and that the average annual burden of this collection of information is 60 hours and \$43,500.

PBGC is soliciting public comments to—

- Evaluate whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collections of information, including the validity of the methodologies and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Issued in Washington, DC.

Hilary Duke,

Assistant General Counsel for Regulatory Affairs, Pension Benefit Guaranty Corporation.

BILLING CODE 7709-02-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-663, OMB Control No. 3235-0724]

Proposed Collection; Comment Request; Extension: Supplier Diversity Business Management System

Upon Written Request, Copies Available

From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is soliciting comments on the existing collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of

Management and Budget ("OMB") for approval.

The Commission is required under Section 342 of the Dodd Frank Wall Street and Reform Act to develop standards and processes for ensuring the fair inclusion of minority-owned and women-owned businesses in all of the Commission's business activities. To help implement this requirement, the Office of Minority and Women Inclusion (OMWI) developed and maintains an electronic Supplier Diversity Business Management System (SDBMS) to collect up-to-date business information and capabilities statements from diverse suppliers interested in doing business with the Commission. This information allows the Commission to update and more effectively manage its current internal repository. It also allows the Commission to measure the effectiveness of its technical assistance and outreach efforts, and target areas where additional program efforts are necessary.

The Commission invites comment on SDBMS. Information is collected in SDBMS via web-based, e-filed, dynamic form-based technology. The company point of contact completes a profile consisting of basic contact data and information on the capabilities of the business. The profile includes a series of questions, some of which are based on the data that the individual enters. Drop-down lists are included where appropriate to increase ease of use.

Title of Collection: Supplier Diversity Business Management System.

Type of Review: Request for Extension.

Estimated Number of Respondents Annually: 300.

Estimated Burden Hours per Respondent: 30 minutes.

Estimated Total Annual Burden Hours: 150 hours.

Request for Comments: The comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Written comments are invited on: (a) whether this collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information

technology. Consideration will be given to comments and suggestions submitted by April 1, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549 or send an email to: PRA_Mailbox@sec.gov.

Dated: January 29, 2024.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94-409, that the Securities and Exchange Commission Small Business Capital Formation Advisory Committee will hold a public meeting on Tuesday, February 27, 2024, at the Commission's headquarters and via videoconference.

PLACE: The meeting will be hybrid, with some Committee members attending by remote means (videoconference) and others in-person at the Commission's headquarters, 100 F Street NE, Washington, DC 20549, in the Multi-Purpose Room LL-006. Members of the public may watch the webcast of the meeting on the Commission's website at www.sec.gov.

STATUS: The meeting will begin at 10:00 a.m. (ET) and will be open to the public via webcast on the Commission's website at www.sec.gov. This Sunshine Act notice is being issued because a majority of the Commission may attend the meeting.

MATTERS TO BE CONSIDERED: The agenda for the meeting includes matters relating to rules and regulations affecting small and emerging businesses and their investors under the federal securities laws.

CONTACT PERSON FOR MORE INFORMATION: For further information; please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551-5400.

Authority: 5 U.S.C. 552b.

Dated: January 29, 2024.
Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-99433; File No. SR-NASDAQ-2023-022]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change, as Modified by Amendment No. 2, To Create a New, Non-Trading Limited Underwriter Membership Class and Impose Related Requirements for Principal Underwriting Activity

January 26, 2024.

On July 12, 2023, The Nasdaq Stock Market LLC (“Exchange”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b-4 thereunder,² a proposed rule change to create a new, non-trading limited underwriter membership class and impose related requirements for principal underwriting activity in connection with a company applying for initial listing on the exchange with a transaction involving an underwriter. The proposed rule change was published for comment in the **Federal Register** on July 31, 2023.³

On September 12, 2023, pursuant to Section 19(b)(2) of the Act,⁴ the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.⁵ On September 29, 2023, the Commission instituted proceedings under Section 19(b)(2)(B) of Act ⁶ to determine whether to approve or disapprove the proposed rule change.⁷ On September 29, 2023, the Exchange filed Amendment No. 1 to the

proposed rule change, which amended and replaced the proposed rule change in its entirety.⁸ On January 22, 2024, the Exchange filed Amendment No. 2 to the proposed rule change which amended and replaced the proposed rule change, as modified by Amendment No. 1, in its entirety.⁹ The Commission has received no comment letters on the proposed rule change.

Section 19(b)(2) of the Act ¹⁰ provides that, after initiating proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The proposed rule change was published for comment in the **Federal Register** on July 31, 2023.¹¹ The 180th day after publication of the proposed rule change is January 27, 2024. The Commission is extending the time period for approving or disapproving the proposed rule change, as modified by Amendment No. 2, for an additional 60 days.

The Commission finds it appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change, as modified by Amendment No. 2, so that it has sufficient time to consider the proposed rule change, as modified by Amendment No. 2. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,¹² designates March 27, 2024, as the date by which the Commission shall either approve or disapprove the proposed rule change, as modified by Amendment No. 2 (File No. SR-NASDAQ-2023-022).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹³

Sherry R. Haywood,
Assistant Secretary.

BILLING CODE 8026-09-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2015-0117; FMCSA-2017-0181; FMCSA-2019-0036; FMCSA-2019-0206]

Qualification of Drivers; Exemption Applications; Epilepsy and Seizure Disorders

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew exemptions for four individuals from the requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) that interstate commercial motor vehicle (CMV) drivers have "no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause loss of consciousness or any loss of ability to control a CMV." The exemptions enable these individuals who have had one or more seizures and are taking anti-seizure medication to continue to operate CMVs in interstate commerce.

DATES: The exemptions are applicable on February 19, 2024. The exemptions expire on February 19, 2026. Comments must be received on or before March 4, 2024.

ADDRESSES: You may submit comments identified by the Federal Docket Management System Docket No. FMCSA-2015-0117, Docket No. FMCSA-2017-0181, Docket No. FMCSA-2019-0036, or Docket No. FMCSA-2019-0206 using any of the following methods:

- *Federal eRulemaking Portal:* Go to www.regulations.gov/, insert the docket number (FMCSA-2015-0117, FMCSA-2017-0181, FMCSA-2019-0036, or FMCSA-2019-0206) in the keyword box and click "Search." Next, sort the results by "Posted (Newer-Older)," choose the first notice listed, and click on the "Comment" button. Follow the online instructions for submitting comments.

- *Mail:* Dockets Operations; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Washington, DC 20590-0001.

- *Hand Delivery:* West Building Ground Floor, 1200 New Jersey Avenue SE, Washington, DC 20590-0001 between 9 a.m. and 5 p.m. ET Monday through Friday, except Federal Holidays.

- *Fax:* (202) 493-2251.

To avoid duplication, please use only one of these four methods. See the "Public Participation" portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, FMCSA, DOT, 1200 New Jersey Avenue SE, Washington, DC 20590-0001, (202) 366-4001, fmcsamedical@dot.gov. Office hours are from 8:30 a.m. to 5 p.m. ET Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Dockets Operations, (202) 366-9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (Docket No. FMCSA-2015-0117, Docket No. FMCSA-2017-0181, Docket No. FMCSA-2019-0036, or Docket No. FMCSA-2019-0206), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body

of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to www.regulations.gov/, insert the docket number (FMCSA–2015–0117, FMCSA–2017–0181, FMCSA–2019–0036, or FMCSA–2019–0206) in the keyword box and click “Search.” Next, sort the results by “Posted (Newer-Older),” choose the first notice listed, click the “Comment” button, and type your comment into the text box on the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. FMCSA will consider all comments and material received during the comment period.

B. Viewing Comments

To view comments go to www.regulations.gov. Insert the docket number (FMCSA–2015–0117, FMCSA–2017–0181, FMCSA–2019–0036, or FMCSA–2019–0206) in the keyword box and click “Search.” Next, sort the results by “Posted (Newer-Older),” choose the first notice listed, and click “Browse Comments.” If you do not have access to the internet, you may view the docket online by visiting Dockets Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. ET Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

C. Privacy Act

In accordance with 49 U.S.C. 31315(b)(6), DOT solicits comments from the public on the exemption request. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov. As described in the system of records notice DOT/ALL 14 (Federal Docket Management System), which can be reviewed at <https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices>, the comments are searchable by the name of the submitter.

II. Background

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a

level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statutes also allow the Agency to renew exemptions at the end of the 5-year period. However, FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver’s medical certification.

The physical qualification standard for drivers regarding epilepsy found in 49 CFR 391.41(b)(8) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause the loss of consciousness or any loss of ability to control a CMV.

In addition to the regulations, FMCSA has published advisory criteria¹ to assist Medical Examiners in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce.

The four individuals listed in this notice have requested renewal of their exemptions from the epilepsy and seizure disorders prohibition in § 391.41(b)(8), in accordance with FMCSA procedures. Accordingly, FMCSA has evaluated these applications for renewal on their merits and decided to extend each exemption for a renewable 2-year period.

III. Request for Comments

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b), FMCSA will take immediate steps to revoke the exemption of a driver.

IV. Basis for Renewing Exemptions

In accordance with 49 U.S.C. 31136(e) and 31315(b), each of the four applicants has satisfied the renewal conditions for obtaining an exemption from the epilepsy and seizure disorders prohibition. The four drivers in this notice remain in good standing with the Agency, have maintained their medical

monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period. In addition, for commercial driver’s license (CDL) holders, the Commercial Driver’s License Information System and the Motor Carrier Management Information System are searched for crash and violation data. For non-CDL holders, the Agency reviews the driving records from the State Driver’s Licensing Agency. These factors provide an adequate basis for predicting each driver’s ability to continue to safely operate a CMV in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each renewal applicant for a period of 2 years is likely to achieve a level of safety equal to that existing without the exemption.

As of February 19, 2024, and in accordance with 49 U.S.C. 31136(e) and 31315(b), the following four individuals have satisfied the renewal conditions for obtaining an exemption from the epilepsy and seizure disorders prohibition in the FMCSRs for interstate CMV drivers:

Daniel Bretz (PA)
Gary Gress (PA)
Cory Wagner (IL)
Randy Wentz (PA)

The drivers were included in docket number FMCSA–2015–0117, FMCSA–2017–0181, FMCSA–2019–0036, or FMCSA–2019–0206. Their exemptions are applicable as of February 19, 2024 and will expire on February 19, 2026.

V. Conditions and Requirements

The exemptions are extended subject to the following conditions: (1) each driver must remain seizure-free and maintain a stable treatment during the 2-year exemption period; (2) each driver must submit annual reports from their treating physicians attesting to the stability of treatment and that the driver has remained seizure-free; (3) each driver must undergo an annual medical examination by a certified ME, as defined by § 390.5; and (4) each driver must provide a copy of the annual medical certification to the employer for retention in the driver’s qualification file, or keep a copy of his/her driver’s qualification file if he/she is self-employed. The driver must also have a copy of the exemption when driving, for presentation to a duly authorized Federal, State, or local enforcement official. The exemption will be rescinded if: (1) the person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than

¹ These criteria may be found in Appendix A to Part 391—Medical Advisory Criteria, section H. *Epilepsy*: § 391.41(b)(8), paragraphs 3, 4, and 5, which is available on the internet at <https://www.gpo.gov/fdsys/pkg/CFR-2015-title49-vol5/pdf/CFR-2015-title49-vol5-part391-appA.pdf>.

was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).

VI. Preemption

During the period the exemption is in effect, no State shall enforce any law or regulation that conflicts with this exemption with respect to a person operating under the exemption.

VII. Conclusion

Based on its evaluation of the four exemption applications, FMCSA renews the exemptions of the aforementioned drivers from the epilepsy and seizure disorders prohibition in § 391.41(b)(8). In accordance with 49 U.S.C. 31136(e) and 31315(b), each exemption will be valid for 2 years unless revoked earlier by FMCSA.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2010-0043]

Northern Indiana Commuter Transportation District's Request To Amend Its Positive Train Control System

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of availability and request for comments.

SUMMARY: This document provides the public with notice that, on January 24, 2024, the Northern Indiana Commuter Transportation District (NICD) submitted a request for amendment (RFA) to its FRA-certified positive train control (PTC) system. FRA is publishing this notice and inviting public comment on the railroad's RFA to its PTC system.

DATES: FRA will consider comments received by February 21, 2024. FRA may consider comments received after that date to the extent practicable and without delaying implementation of valuable or necessary modifications to a PTC system.

ADDRESSES:

Comments: Comments may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and the

applicable docket number. The relevant PTC docket number for this host railroad is Docket No. FRA-2010-0043. For convenience, all active PTC dockets are hyperlinked on FRA's website at <https://railroads.dot.gov/research-development/program-areas/train-control/ptc/railroads-ptc-dockets>. All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information.

FOR FURTHER INFORMATION CONTACT:

Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, telephone: 816-516-7168, email: Gabe.Neal@dot.gov.

SUPPLEMENTARY INFORMATION: In general, title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad's PTC system complies with title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC system or the associated FRA-approved PTC Safety Plan (PTCSP), a host railroad must submit, and obtain FRA's approval of, an RFA to its PTC system or PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA's regulations provide that FRA will publish a notice in the **Federal Register** and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that, on January 24, 2024, NICD submitted an RFA to its Interoperable Electronic Train Management System (I-ETMS), which seeks FRA's approval for NICD to temporarily disable its PTC system's current Back Office System (BOS) during the implementation of the Railcomm BOS. That RFA is available in Docket No. FRA-2010-0043.

Interested parties are invited to comment on NICD's RFA by submitting written comments or data. During FRA's review of this railroad's RFA, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. See 49 CFR 236.1021; see also 49 CFR 236.1011(e). Under 49 CFR 236.1021, FRA maintains the authority to approve, approve with conditions, or deny a railroad's RFA at FRA's sole discretion.

Privacy Act Notice

In accordance with 49 CFR 211.3, FRA solicits comments from the public

to better inform its decisions. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.transportation.gov/privacy>. See <https://www.regulations.gov/privacy-notice> for the privacy notice of www.regulations.gov. To facilitate comment tracking, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. If you wish to provide comments containing proprietary or confidential information, please contact FRA for alternate submission instructions.

Issued in Washington, DC.

Carolyn R. Hayward-Williams,

Director, Office of Railroad Systems and Technology.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2010-0030]

Massachusetts Bay Transportation Authority's Request To Amend Its Positive Train Control System

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of availability and request for comments.

SUMMARY: This document provides the public with notice that, on January 24, 2024, the Massachusetts Bay Transportation Authority (MBTA) submitted a request for amendment (RFA) to its FRA-certified positive train control (PTC) system. FRA is publishing this notice and inviting public comment on the railroad's RFA to its PTC system.

DATES: FRA will consider comments received by February 21, 2024. FRA may consider comments received after that date to the extent practicable and without delaying implementation of valuable or necessary modifications to a PTC system.

ADDRESSES:

Comments: Comments may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and the applicable docket number. The relevant PTC docket number for this host

railroad is Docket No. FRA–2010–0030. For convenience, all active PTC dockets are hyperlinked on FRA’s website at <https://railroads.dot.gov/research-development/program-areas/train-control/ptc/railroads-ptc-dockets>. All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information.

FOR FURTHER INFORMATION CONTACT:

Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, telephone: 816–516–7168, email: Gabe.Neal@dot.gov.

SUPPLEMENTARY INFORMATION: In general, title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad’s PTC system complies with title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC system or the associated FRA-approved PTC Safety Plan (PTCSP), a host railroad must submit, and obtain FRA’s approval of, an RFA to its PTC system or PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA’s regulations provide that FRA will publish a notice in the **Federal Register** and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that, on January 24, 2024, MBTA submitted an RFA to its Advanced Civil Speed Enforcement System II (ACSES II), which seeks FRA’s approval for MBTA to temporarily disable its ACSES II while it conducts certain planned work to implement an automatic train control system on MBTA’s North Side Lines. That RFA is available in Docket No. FRA–2010–0030.

Interested parties are invited to comment on MBTA’s RFA by submitting written comments or data. During FRA’s review of this railroad’s RFA, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. See 49 CFR 236.1021; see also 49 CFR 236.1011(e). Under 49 CFR 236.1021, FRA maintains the authority to approve, approve with conditions, or deny a railroad’s RFA at FRA’s sole discretion.

Privacy Act Notice

In accordance with 49 CFR 211.3, FRA solicits comments from the public to better inform its decisions. DOT posts

these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.transportation.gov/privacy>. See <https://www.regulations.gov/privacy-notice> for the privacy notice of www.regulations.gov. To facilitate comment tracking, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. If you wish to provide comments containing proprietary or confidential information, please contact FRA for alternate submission instructions.

Issued in Washington, DC.

Carolyn R. Hayward-Williams,

Director, Office of Railroad Systems and Technology.

BILLING CODE 4910–06–P

DEPARTMENT OF THE TREASURY

Alcohol and Tobacco Tax and Trade Bureau

[Docket No. TTB–2024–0003]

Proposed Information Collections; Comment Request (No. 92)

AGENCY: Alcohol and Tobacco Tax and Trade Bureau (TTB); Treasury.

ACTION: Notice and request for comments.

SUMMARY: As part of our continuing effort to reduce paperwork and respondent burden, and as required by the Paperwork Reduction Act of 1995, we invite comments on the continuing or proposed information collections listed below in this document.

DATES: We must receive your written comments on or before April 1, 2024.

ADDRESSES: You may send comments on the information collections described in this document using one of these two methods:

- *Internet*—To submit comments electronically, use the comment form for this document posted on the “*Regulations.gov*” e-rulemaking website at <https://www.regulations.gov> within Docket No. TTB–2024–0003.

- *Mail*—Send comments to the Paperwork Reduction Act Officer, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005.

Please submit separate comments for each specific information collection described in this document. You must

reference the information collection’s title, form or recordkeeping requirement number (if any), and OMB control number in your comment.

You may view copies of this document, the relevant TTB forms, and any comments received at <https://www.regulations.gov> within Docket No. TTB–2023–0005. TTB has posted a link to that docket on its website at <https://www.ttb.gov/rrd/information-collection-notices>. You also may obtain paper copies of this document, the listed forms, and any comments received by contacting TTB’s Paperwork Reduction Act Officer at the addresses or telephone number shown below.

FOR FURTHER INFORMATION CONTACT:

Michael Hoover, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005; 202–453–1039, ext. 135; or complete the Regulations and Rulings Division contact form at <https://www.ttb.gov/contact-rrd>.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Department of the Treasury and its Alcohol and Tobacco Tax and Trade Bureau (TTB), as part of a continuing effort to reduce paperwork and respondent burden, invite the general public and other Federal agencies to comment on the proposed or continuing information collections described below, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Comments submitted in response to this document will be included or summarized in our request for Office of Management and Budget (OMB) approval of the relevant information collection. All comments are part of the public record and subject to disclosure. Please do not include any confidential or inappropriate material in your comments.

We invite comments on: (a) Whether an information collection is necessary for the proper performance of the agency’s functions, including whether the information has practical utility; (b) the accuracy of the agency’s estimate of the information collection’s burden; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the information collection’s burden on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide the requested information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information has a valid OMB control number.

Information Collections Open for Comment

Currently, we are seeking comments on the following forms, letterhead applications or notices, recordkeeping requirements, questionnaires, or surveys:

OMB Control No. 1513-0019

Title: Application for Amended Permit under the Federal Alcohol Administration Act.

TTB Form Number: TTB F 5100.18.

Abstract: The Federal Alcohol Administration Act (FAA Act), at 27 U.S.C. 203, requires that persons apply for and receive a permit to: (1) Import distilled spirits, wine, or malt beverages into the United States; (2) distill spirits or produce wine, rectify or blend distilled spirits or wine, or bottle and/or warehouse distilled spirits; or (3) purchase distilled spirits, wine, or malt beverages for resale at wholesale. The FAA Act, at 27 U.S.C. 204, also imposes certain requirements for such permits and authorizes the Secretary of the Treasury (the Secretary) to prescribe regulations for all permit applications. The TTB regulations in 27 CFR part 1 provide for the amendment of an existing permit using form TTB F 5100.18 when changes occur to the name, trade name, address, ownership, or control of the permitted business. The collected information allows TTB to determine if amended permit applicants meet the FAA Act's statutory eligibility criteria for a permit.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents, responses, and burden hours associated with this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

- *Number of Respondents:* 9,000.
- *Average Responses per Respondent:* 1 per year.
- *Number of Responses:* 9,000.
- *Average per-Response Burden:* 22 minutes.
- *Total Burden:* 3,300 hours.

OMB Control No. 1513-0028

Title: Application for an Industrial Alcohol Under Permit.

TTB Form Number: TTB F 5150.22.

Abstract: The Internal Revenue Code (IRC) at 26 U.S.C. 5271 requires persons to obtain a permit before they: (1) Procure or use tax-free distilled spirits; (2) procure, deal in, or use specially denatured distilled spirits; or (3) recover specially denatured or completely denatured distilled spirits. That section also prescribes the reasons a permit may be denied or suspended. It also authorizes the Secretary to issue regulations regarding new and amended permit applications. Under that IRC authority, TTB has issued regulations regarding industrial alcohol user permits, which are contained in 27 CFR part 20, Distribution and Use of Denatured Alcohol and Rum, and 27 CFR part 22, Distribution and Use of Tax-Free Alcohol. Specifically, the TTB regulations require persons who desire to use tax-free alcohol withdraw or to deal in, use, or recover specially denatured alcohol (alcohol or rum) to apply for and receive an industrial alcohol user permit using TTB F 5150.22 before beginning such activities or when amending an existing permit. TTB uses the collected information to protect the revenue by determining the eligibility of the applicant to engage in operations involving industrial alcohol, the location of the proposed operations, and whether those operations will be conducted in compliance with Federal laws and regulations.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits; State, local, and Tribal governments.

- *Number of Respondents:* 2,710.
- *Average Responses per Respondent:* 1 per year.
- *Number of Responses:* 2,710.
- *Average per-Response Burden:* 0.8 hours.
- *Total Burden:* 2,168 hours.

OMB Control No. 1513-0033

Title: Report—Manufacturer of Tobacco Products or Cigarette Papers and Tubes; Report—Manufacturer of Processed Tobacco.

TTB Form Numbers: TTB F 5210.5; TTB F 5250.1.

Abstract: The IRC at 26 U.S.C. 5722 requires manufacturers of tobacco products, cigarette papers and tubes, and processed tobacco to make reports containing such information, in such form, at such times, and for such periods as the Secretary prescribes by

regulation. The TTB regulations prescribe the use of TTB F 5210.5 to report information about tobacco products and cigarette papers and tubes manufactured, received, and removed each month, and the use of TTB F 5250.1 to report information about processed tobacco manufactured, received, and removed each month. TTB uses the collected information to determine whether the manufacturers of such articles are properly paying Federal excise taxes due and are in compliance with the applicable Federal law and regulations.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

- *Number of Respondents:* 235.
- *Average Responses per Respondent:* 12 per year.
- *Number of Responses:* 2,820.
- *Average per-Response Burden:* 1 hour.
- *Total Burden:* 2,820 hours.

OMB Control No. 1513-0034

Title: Schedule of Tobacco Products, Cigarette Papers, or Tubes Withdrawn from the Market.

TTB Form Number: TTB F 5200.7.

Abstract: The IRC at 26 U.S.C. 5705 provides that a manufacturer, importer, or export warehouse proprietor may receive credit for, or refund of, the Federal excise taxes paid on tobacco products, cigarette papers, or cigarette tubes withdrawn from the market upon providing satisfactory proof of the withdrawal. Under that IRC authority, the TTB regulations provide for the use of TTB F 5200.7 to identify tobacco products, cigarette papers, or cigarette tubes to be withdrawn from the market and the location of those articles. The form also documents the taxpayer's planned disposition of the articles (destroyed, reduced to materials, or returned to bond), and TTB's decision to witness or not witness that disposition. Taxpayers then file the completed form to support their subsequent claim for credit or refund of the excise taxes paid on the withdrawn articles. The collected information is necessary to protect the revenue as it allows TTB to determine if such claims are valid.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

- *Number of Respondents:* 50.
- *Average Responses per Respondent:* 5 per year.
- *Number of Responses:* 250.
- *Average per-Response Burden:* 0.75 hour.
- *Total Burden:* 187.5 hours.

OMB Control No. 1513–0069

Title: Tobacco Products Manufacturers—Supporting Records for Removals for the Use of the United States.

Abstract: While tobacco products and cigarette papers and tubes made in the United States are generally subject to Federal excise under the IRC at 26 U.S.C. 5701, the IRC also provides at 26 U.S.C. 5704(b) that manufacturers may remove tobacco products and cigarette papers and tubes without payment of that tax “for use of the United States” under regulations issued by the Secretary. As such, the TTB regulations at 27 CFR 45.51 require manufacturers removing such articles for use of the United States to keep records documenting certain information, including the kind and quantity of articles removed or returned and the name and address of the receiving or returning Federal agency. The required records, which may consist of usual and customary commercial records such as invoices, are necessary to ensure that tobacco products and cigarette papers and tubes removed without payment of tax are delivered to a Federal agency for an authorized tax-exempt use.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

- *Number of Respondents:* 205.
- *Average Responses per Respondent:* 1 per year.
- *Number of Responses:* 205.
- *Average per-Response Burden:* 1 hour.
- *Total Burden:* 205 hours.

OMB Control No. 1513–0073

Title: Manufacturers of Nonbeverage Products—Records to Support Claims for Drawback.

TTB Recordkeeping Number: TTB REC 5530/2.

Abstract: While the IRC at 26 U.S.C. 5001 imposes Federal excise tax on distilled spirits produced or imported

into the United States, sections 5111–5114 allow manufacturers of certain “nonbeverage” products—medicines, medicinal preparations, food products, flavors, flavoring extracts, or perfume—to claim drawback (refund) of all but \$1.00 per proof gallon of the excise tax paid on the distilled spirits contained in or used in the production of such products. Under those IRC authorities, TTB has issued regulations in 27 CFR part 17 governing nonbeverage product drawback claims, which includes requirements to keep source records supporting such claims. The required records, which may consist of usual and customary business records, document the distilled spirits received, taxes paid, date and quantity used, amount of alcohol recovered, other ingredients received and used (to validate formula compliance), quantity of intermediate products transferred to other plants, and the disposition or purchaser of the products. The collected information is necessary to protect the revenue as it helps prevent payment of incorrect or fraudulent claims and the diversion to beverage use of distilled spirits subject to nonbeverage drawback.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents, responses, and burden hours associated with this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

- *Number of Respondents:* 670.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 670.
- *Average per-Response Burden:* 1 hour.
- *Total Burden:* 670 hours.

OMB Control No. 1513–0075

Title: Proprietors or Claimants Exporting Liquors.

TTB Recordkeeping Number: TTB REC 5900/1.

Abstract: Under the IRC at 26 U.S.C. 5053, 5214, and 5362, distilled spirits, wine, and beer may be exported without payment of Federal excise tax. In addition, under the IRC at 26 U.S.C. 5055 and 5062, taxpaid distilled spirits, wine, and beer may be exported and the exporter may claim drawback (refund) on the excise taxes paid. Exporters must complete various TTB and Customs information collections to show that the products were in fact exported. Specific

to this information collection, the TTB alcohol export regulations in 27 CFR part 28 require proprietors and drawback claimants to maintain for 3 years record copies of all pertinent forms and commercial records that document the exportation of non-taxpaid alcohol beverages and taxpaid alcohol beverages for which drawback will be claimed. The collected information is necessary to protect the revenue as it allows TTB to verify the exportation of untaxpaid alcohol beverages and taxpaid alcohol beverages on which drawback will be claimed.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

- *Number of Respondents:* 750.
- *Average Responses per Respondent:* 1 per year.
- *Number of Responses:* 750.
- *Average per-Response Burden:* 1 hour.
- *Total Burden:* 750 hours.

OMB Control No. 1513–0099

Title: Administrative Remedies—Requests for Closing Agreements.

Abstract: The IRC at 26 U.S.C. 7121 authorizes the Secretary to enter into a written agreement with any person, or their agent, relating to the liability of that person for any internal revenue tax for any taxable period. Under that authority, TTB has issued regulations pertaining to such “closing agreements,” which require a taxpayer or their agent to submit a written request to TTB to enter into such an agreement to resolve excise tax matters. TTB uses the information collected in the request and any attached supporting documentation to determine whether the Bureau should pursue a closing agreement with the taxpayer. Closing agreements allow TTB and a taxpayer to resolve tax liability matters prior to any adversarial legal or administrative proceedings.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

- *Number of Respondents:* 10.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 10.

- *Average per-Response Burden:* 1 hour.
- *Total Burden:* 10 hours.

OMB Control No. 1513-0101

Title: Marks and Notices on Packages of Tobacco Products.

TTB Recordkeeping Number: TTB REC 5210/13.

Abstract: The IRC at 26 U.S.C. 5723(b) requires packages of tobacco products (cigars, cigarettes, smokeless tobacco (snuff and chewing tobacco), pipe tobacco, and roll-your-own tobacco) and cigarette paper or tubes to bear the marks and notices required by regulation. Under that authority, the TTB regulations in 27 CFR parts 40, 41, 44, and 45 require packages or, in certain cases, containers, of domestic and imported tobacco products and cigarette papers and tubes to bear certain marks identifying the product, its producer, place of production, excise tax class, and its quantity or weight, depending on the basis of the tax. The TTB regulations also require certain tax-exemption notices to appear on packages or shipping containers of tobacco products and cigarette papers or tubes intended for export or for use of the United States as such articles may be removed without tax payment or with benefit of tax drawback. The required marks and notices are necessary to protect the revenue as they identify tobacco-related articles, the applicable Federal excise tax classification, and the responsible taxpayers, and help prevent the diversion of untaxed articles into the domestic market.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is decreasing the estimated number of annual respondents, responses, and burden hours associated with this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

- *Number of Respondents:* 680.
- *Average Responses per Respondent:* 1 per year.
- *Number of Responses:* 680.
- *Average per-Response Burden:* 1 hour.
- *Total Burden:* 680 hours.

OMB Control No. 1513-0121

Title: Labeling of Major Food Allergens and Petitions for Exemption.

Abstract: The FAA Act at 27 U.S.C. 205(e) authorizes the Secretary to issue

regulations regarding the labeling of distilled spirits, certain wines, and certain beers in order to, among other things, prohibit consumer deception and ensure that labels provide consumers with adequate information as to the identity and quality of such products. Under that authority, the TTB regulations provide for the voluntary labeling of major food allergens used in the production of alcohol beverages.¹ Under the TTB regulations, if an alcohol beverage bottler declares on the label that any one of these allergens are contained in a product or used in its production, the bottler must declare all such allergens, including those used as fining or processing agents. However, the regulations allow a bottler to petition TTB for a labeling exemption for an allergen if evidence shows that, while used in the product's production, it is not present in the finished product at levels that would pose a risk to human health. This information collection provides a consistent means through which bottlers can alert consumers sensitive to these major food allergens to their presence in finished alcohol beverages.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents, responses, and burden hours associated with this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

- *Number of Respondents:* 750.
- *Average Responses per Respondent:* 1 per year.
- *Number of Responses:* 750.
- *Average per-Response Burden:* 0.8 hour.
- *Total Burden:* 600 hours.

Dated: January 29, 2024.

Amy R. Greenberg,

*Deputy Assistant Administrator,
Headquarters Operations.*

[FR Doc. 2024-01988 Filed 1-31-24; 8:45 am]

BILLING CODE 4810-31-P

¹ The major food allergens referenced here are those defined in the Food Allergen Labeling and Consumer Protection Act of 2004 (118 Stat. 905): milk, eggs, fish, crustacean shellfish, tree nuts, peanuts, wheat, and soybeans.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Revision of an Approved Collection; Comment Request; Record and Disclosure Requirements—Consumer Financial Protection Bureau Regulations B, E, M, Z, and DD and Board of Governors of the Federal Reserve System Regulation CC

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995 (PRA). In accordance with the requirements of the PRA, the OCC may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The OCC is soliciting comment concerning a revision to its information collection titled, "Record and Disclosure Requirements—Consumer Financial Protection Bureau Regulations B, E, M, Z, and DD and Board of Governors of the Federal Reserve System Regulation CC."

DATES: Comments must be received by April 1, 2024.

ADDRESSES: Commenters are encouraged to submit comments by email, if possible. You may submit comments by any of the following methods:

- *Email:* prainfo@occ.treas.gov.
- *Mail:* Chief Counsel's Office,

Attention: Comment Processing, Office of the Comptroller of the Currency, Attention: 1557-0176, 400 7th Street SW, Suite 3E-218, Washington, DC 20219.

- *Hand Delivery/Courier:* 400 7th Street SW, Suite 3E-218, Washington, DC 20219.

- *Fax:* (571) 293-4835.

Instructions: You must include "OCC" as the agency name and "1557-0176" in your comment. In general, the OCC will publish comments on www.reginfo.gov without change, including any business or personal information provided, such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public

disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

Following the close of this notice's 60-day comment period, the OCC will publish a second notice with a 30-day comment period. You may review comments and other related materials that pertain to this information collection beginning on the date of publication of the second notice for this collection by the method set forth in the next bullet.

- **Viewing Comments Electronically:** Go to www.reginfo.gov. Hover over the "Information Collection Review" tab and click on "Information Collection Review" from the drop-down menu. From the "Currently under Review" drop-down menu, select "Department of Treasury" and then click "submit." This information collection can be located by searching OMB control number "1557-0176" or "Record and Disclosure Requirements—Consumer Financial Protection Bureau Regulations B, E, M, Z, and DD and Board of Governors of the Federal Reserve System Regulation CC." Upon finding the appropriate information collection, click on the related "ICR Reference Number." On the next screen, select "View Supporting Statement and Other Documents" and then click on the link to any comment listed at the bottom of the screen.

- For assistance in navigating www.reginfo.gov, please contact the Regulatory Information Service Center at (202) 482-7340.

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, Clearance Officer, (202) 649-5490, Chief Counsel's Office, Office of the Comptroller of the Currency, 400 7th Street SW, Washington, DC 20219. If you are deaf, hard of hearing, or have a speech disability, please dial 7-1-1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501 *et seq.*), Federal agencies must obtain approval from the OMB for each collection of information that they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of title 44 generally requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the

collection to OMB for approval. To comply with this requirement, the OCC is publishing notice of the revision to the collection of information set forth in this document. The OCC asks OMB to approve this revised collection.

Title: Record and Disclosure Requirements—Consumer Financial Protection Bureau Regulations B, E, M, Z, and DD and Board of Governors of the Federal Reserve System Regulation CC.

OMB Control No.: 1557-0176.

Type of Review: Regular.

Affected Public: Businesses or other for-profit.

Frequency of Response: On occasion.

Description: This information collection covers Consumer Financial Protection Bureau (CFPB) Regulations B, E, M, Z, and DD and Board of Governors of the Federal Reserve System (FRB) Regulation CC. The CFPB and FRB regulations include the following provisions:

Regulation B—12 CFR 1002—Equal Credit Opportunity Act

This regulation prohibits lenders from discriminating against credit applicants on certain prohibited bases. The regulation also requires creditors to—(i) notify applicants of action taken on their credit application, (ii) report credit history in the names of both spouses on an account, (iii) retain records of credit applications, (iv) collect information about the applicant's race and other personal characteristics in applications for certain dwelling-related loans, and (v) provide applicants with copies of appraisal reports used in connection with credit transactions. The regulation was amended to implement changes to the Equal Credit Opportunity Act (ECOA) made by section 1071 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (88 FR 35150). Section 1071 requires covered financial institutions to collect and report data on applications for credit for small businesses. The regulation's revision includes additional information collection requirements that require the compilation and maintenance of reportable data, including notice requirements and reporting and recordkeeping requirements for small business lending data.¹

¹ However, the OCC is not reporting an estimate for burden associated with the small business lending rule, given that, as the CFPB has noted, the rule is stayed: "As a result of ongoing litigation, all deadlines for compliance with the small business lending rule currently are stayed for all covered financial institutions." CFPB, Small Business Lending under the Equal Credit Opportunity Act (Regulation B), available at <https://www.consumerfinance.gov/rules-policy/final-rules/>

Regulation E—12 CFR 1005—Electronic Fund Transfers (Except Prepaid Card Provisions 1557-0346)

This regulation carries out the purposes of the Electronic Fund Transfer Act (15 U.S.C. 1693 *et seq.*), which establishes the basic rights, liabilities, and responsibilities of consumers who use electronic fund transfers and remittance transfer services and of financial institutions or other persons that offer these services.

Regulation M—12 CFR 1013—Consumer Leasing

This regulation implements the consumer leasing provisions of the Truth in Lending Act, including, among other things, by requiring meaningful disclosure of leasing terms.

Regulation Z—12 CFR 1026—Truth in Lending

This regulation is intended to promote the informed use of consumer credit by requiring disclosures about its terms and cost to ensure that consumers are provided with greater and more timely information on the nature and costs of the residential real estate settlement process and to effect certain changes in the settlement process for residential real estate that will result in more effective advance disclosure to home buyers and sellers of settlement costs. The regulation gives consumers the right to cancel certain credit transactions that involve a lien on a consumer's principal dwelling, regulates certain credit card practices, and provides a means for fair and timely resolution of credit billing disputes. Other provisions of the regulation include rules specific to credit card accounts, certain dwelling-secured transactions, home-equity plans, and private education loans.

Regulation DD—12 CFR 1030—Truth in Savings

This regulation requires depository institutions to provide disclosures to enable consumers to make meaningful comparisons among accounts at depository institutions.

Regulation CC—12 CFR 229—Availability of Funds and Collection of Checks

This regulation includes timeframes to govern the availability of funds deposited into certain transaction accounts, rules to govern the collection and return of checks and electronic checks, and general provisions to govern the use of substitute checks.

Burden Estimates:

Estimated Number of Respondents:
1,005.

Estimated Total Annual Burden:
2,661,240 hours.

Comments: Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCCs estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Patrick T. Tierney,

Assistant Director, Office of the Comptroller of the Currency.

BILLING CODE 4810-33-P

DEPARTMENT OF VETERANS AFFAIRS**Privacy Act of 1974; System of Records**

AGENCY: Veterans Health Administration (VHA), Department of Veterans Affairs (VA).

ACTION: Notice of a modified system of records.

SUMMARY: Pursuant to the Privacy Act of 1974, notice is hereby given that the Department of Veterans Affairs (VA) is modifying the system of records entitled, "Caregiver Support Program—Caregiver Record Management Application (CARMA)—VA" (197VA10). This system is used to administer, monitor and track services delivered through VA's Caregiver Support Program including documentation of calls to the Caregiver Support Line.

DATES: Comments on this modified system of records must be received no later than 30 days after date of publication in the **Federal Register**. If no public comment is received during the period allowed for comment or

unless otherwise published in the **Federal Register** by VA, the modified system of records will become effective a minimum of 30 days after date of publication in the **Federal Register**. If VA receives public comments, VA shall review the comments to determine whether any changes to the notice are necessary.

ADDRESSES: Comments may be submitted through www.Regulations.gov or mailed to VA Privacy Service, 810 Vermont Avenue NW, (005X6F), Washington, DC 20420. Comments should indicate that they are submitted in response to "Caregiver Support Program-Caregiver Record Management Application (CARMA)—VA" (197VA10). Comments received will be available at www.Regulations.gov for public viewing, inspection or copies.

FOR FURTHER INFORMATION CONTACT: Stephania Griffin, Veterans Health Administration (VHA) Chief Privacy Officer, Department of Veterans Affairs, 810 Vermont Avenue NW, (105HIG) Washington, DC 20420, stephania.griffin@va.gov, telephone (704) 245-2492 (Note: This is not a toll-free number).

SUPPLEMENTARY INFORMATION: VA is modifying this system of records to identify changes that will more accurately describe the records maintained in the system. Modifications have been made to the following titled sections: System Manager; Purposes of the System; Categories of Records in the System; Record Source Categories; Routine Uses of Records Maintained in the System; Policies and Practices for Retrievability of Records; Policies and Practices for Retention and Disposal of Records; Physical, Procedural, and Administrative Safeguards; Record Access Procedure; Contesting Record Procedure; and Notification Procedure. VA is republishing the system notice in its entirety.

The System Manager is being updated to replace Deputy Chief Officer, Patient Care Services Office (10P4C), with Colleen M. Richardson, Psy.D, Executive Director, Caregiver Support Program (12CSP).

The Purpose of the System is being modified to include the explanation that this system may also be used for improving health care operations, such as producing various management and patient follow-up reports; program monitoring for epidemiological research and other health care related or program impact studies; statistical analysis, resource allocation, and planning and process improvement; providing clinical and administrative support to patient medical care and services; determining

entitlement and eligibility benefits; processing and adjudicating benefit claims; and general program oversight activities.

The Categories of Records in the System section has additional language regarding VA Form 10-305, "Your Rights to Seek Further Review of Program of Comprehensive Assistance for Family Caregivers (PCAFC) Decisions."

The Record Source Categories section has been expanded to include the Board of Veterans' Appeals and other VA staff offices.

The section for Routine Uses of Records Maintained in the System for this VA system of records notice has been amended.

Standardized Routine Uses #16 through #18 have been added to this system of records notice.

The following standard routine use is added and will be Routine Use #16, Equal Employment Opportunity Commission (EEOC): To the EEOC in connection with investigations of alleged or possible discriminatory practices, examination of Federal affirmative employment programs, or other functions of the Commission as authorized by law.

The following standard routine use is added and will be Routine Use #17, Federal Labor Relations Authority (FLRA): To the FLRA in connection with the investigation and resolution of allegations of unfair labor practices, the resolution of exceptions to arbitration awards when a question of material fact is raised, matters before the Federal Service Impasses Panel, and the investigation of representation petitions and the conduct or supervision of representation elections.

The following standard routine use is added and will be Routine Use #18, Merit Systems Protection Board (MSPB): To the MSPB in connection with appeals, special studies of the civil service and other merit systems, review of rules and regulations, investigation of alleged or possible prohibited personnel practices, and such other functions promulgated in 5 U.S.C. 1205 and 1206, or as authorized by law.

Routine Use #19 is added to promulgate the use of information for VA research which states, Researchers, for Research: To epidemiological and other research facilities approved by the Under Secretary for Health for research purposes determined to be necessary and proper, provided that the names and addresses of Veterans, their dependents and caregivers will not be disclosed unless those names and addresses are first provided to VA by the facilities making the request.

The Policies and Practices for Retrieval of Records section is being modified to exclude the Social Security number as an identifier to retrieve records on an individual.

The Policies and Practices for Retention and Disposal of Records is being modified to state that CARMA records are disposed of in accordance with the schedule approved by the Archivist of the United States, VHA Records Control Schedule (RCS) 10–1, Item Number 7900, Temporary; Destroy 75 years after enrollment.

Physical, Procedural, and Administrative Safeguards has been amended to include Amazon Web Services as a procedural safeguard for sensitive information.

The Record Access Procedure, Contesting Record Procedure and Notification Procedure have been modified to reflect standard language across VA systems of records.

The Report of Intent to Modify a System of Records Notice and an advance copy of the system notice have been sent to the appropriate Congressional committees and to the Director of the Office of Management and Budget (OMB) as required by 5 U.S.C. 552a(r) (Privacy Act) and guidelines issued by OMB (65 FR 77677), December 12, 2000.

Signing Authority

The Senior Agency Official for Privacy, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Kurt D. DelBene, Assistant Secretary for Information and Technology and Chief Information Officer, approved this document on December 18, 2023 for publication.

Dated: January 29, 2024.

Amy L. Rose,

Government Information Specialist, VA Privacy Service, Office of Compliance, Risk and Remediation, Office of Information and Technology, Department of Veterans Affairs.

SYSTEM NAME AND NUMBER:

“Caregiver Support Program—Caregiver Record Management Application (CARMA)–VA” (197VA10)

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

The Caregiver Record Management Application (CARMA) system is hosted in the Salesforce Gov Cloud. The Salesforce’s corporate address is 1 Market Street #300, San Francisco, CA 94105.

SYSTEM MANAGER(S):

Official responsible for policies and procedures: Colleen M. Richardson, Psy.D, Executive Director, Caregiver Support Program (12CSP), 810 Vermont Avenue NW, Washington, DC 20420, *colleen.richardson2@va.gov*, telephone number (202) 461–1635 (Note: This is not a toll-free number).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Caregivers and Veterans Omnibus Health Services Act of 2010, Public Law 111–163; 38 CFR 71.40; and 31 U.S.C. 3321.

PURPOSE(S) OF THE SYSTEM:

Records in this system of records are used to administer, monitor and track the services and benefits, sought and delivered through VA’s Caregiver Support Program, including the documentation of telephone calls to the Caregiver Support Line. The system and data contained therein is used to fully support the Program of Comprehensive Assistance for Family Caregivers (PCAFC) and allows for data assessment and comprehensive monitoring. The CARMA workflow management system is being used for Social Security number matching and other data field requirements. In addition, information in this system of records is used to respond to Congressional and/or internal and external stakeholders on the performance of the VA Caregiver Support Program. This system may also be used for the purpose of improving health care operations such as producing various management and patient follow-up reports; program monitoring for epidemiological research and other health care related or program impact studies; statistical analysis, resource allocation, and planning and process improvement; providing clinical and administrative support to patient medical care and services; determining entitlement and eligibility benefits; processing and adjudicating benefit claims; and general program oversight activities.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The records include Veterans and caregivers inquiring about, applying for, participating in and those who have previously applied for or participated in the PCAFC or the Program of General Caregiver Support Services (PGCSS) established by the Caregivers and Veterans Omnibus Health Services Act of 2010, Public Law 111–163, as well as individuals who contact or are contacted by VA’s Caregiver Support Line, Veterans, their spouses and

dependents as provided for in other provisions of title 38 U.S.C.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records in this system include: the Veteran and caregiver(s) name, Social Security number, gender, age, date of birth, address, phone number, and email address; VA eligibility related information, such as service connection, DD 214, “Certification of Release or Discharge from Active Duty”, Line of Duty documentation; PCAFC stipend payment information; written correspondence; VA Form 10–10CG, “Application for Comprehensive Assistance for Family Caregiver Program”; requests for information about PCAFC Decisions (VA Form 10–305, “Your Rights to Seek Further Review of Program of Comprehensive Assistance for Family Caregivers (PCAFC) Decisions”) and responses to such requests; Decision Notice Letters pertaining to eligibility for and participation in PCAFC and PGCSS; requests for further review and appeal of PCAFC decisions and related records in support of these claims and decisions, and correspondence with Caregiver Support Line, including referral information and VA staff remarks.

RECORD SOURCE CATEGORIES:

Records in this system of records may be provided by the applicant, applicant’s spouse or other family members or accredited representatives or friends; Veterans, caregivers, and other interested parties seeking or receiving information, benefits or services about VA’s Caregiver Support Program, including the Caregiver Support Line; VA employees; and VA systems including but not limited to Veterans Health Information System and Technology Architecture (Vista), VA Master Person Index, VHA Corporate Data Warehouse, and Enrollment System; Veterans Benefits Administration (VBA); the Board of Veterans’ Appeals (BVA); other VA staff offices; and State and Federal agencies.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To the extent that records contained in the system include information protected by 45 CFR parts 160 and 164, *i.e.*, individually identifiable health information of VHA or any of its business associates, and 38 U.S.C. 7332, *i.e.*, medical treatment information related to drug abuse, alcoholism or alcohol abuse, sickle cell anemia, or infection with the human immunodeficiency virus, that information cannot be disclosed under a

routine use unless there is also specific disclosure authority in both 38 U.S.C. 7332 and 45 CFR parts 160, 161, and 164.

1. Claims Representatives: To accredited service organizations, VA-approved claim agents, and attorneys acting under a declaration of representation, so that these individuals can aid claimants in the preparation, presentation, and prosecution of claims under the laws administered by VA upon the request of the claimant and provided that the disclosure is limited to information relevant to a claim, such as the name, address, the basis and nature of a claim, amount of benefit payment information, medical information, and military service and active duty separation information.

2. Law Enforcement: To a Federal, State, local, Territorial, Tribal, or foreign law enforcement authority or other appropriate entity charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing such law, provided that the disclosure is limited to information that, either alone or in conjunction with other information, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature. The disclosure of the names and addresses of Veterans and their dependents from VA records under this routine use must also comply with the provisions of 38 U.S.C. 5701.

3. Guardians, Courts, for Incompetent Veterans: To a court, magistrate, or administrative tribunal in matters of guardianship, inquests, and commitments; to private attorneys representing Veterans rated incompetent in conjunction with the issuance of Certificates of Incompetency; or to probation and parole officers in connection with court-required duties.

4. Guardians Ad Litem, for Representation: To a fiduciary or guardian ad litem in relation to his or her representation of a claimant in any legal proceeding as relevant and necessary to fulfill the duties of the fiduciary or guardian ad litem.

5. Attorneys, Insurers, Employers: To attorneys, insurance companies, employers, third parties liable or potentially liable under health plan contracts, and courts, boards, or commissions as relevant and necessary to aid VA in the preparation, presentation, and prosecution of claims authorized by law.

6. DoJ, Litigation, Administrative Proceeding: To the Department of Justice (DoJ), or in a proceeding before a court, adjudicative body, or other

administrative body before which VA is authorized to appear, when:

(a) VA or any component thereof;
(b) Any VA employee in his or her official capacity;

(c) Any VA employee in his or her individual capacity where DoJ has agreed to represent the employee; or

(d) The United States, where VA determines that litigation is likely to affect the agency or any of its components is a party to such proceedings or has an interest in such proceedings, and VA determines that use of such records is relevant and necessary to the proceedings.

7. National Archives and Records Administration (NARA): To National Archives and Records Administration (NARA) in records management inspections conducted under 44 U.S.C. 2904 and 2906, or other functions authorized by laws and policies governing NARA operations and VA records management responsibilities.

8. Treasury, for Withholding: To the Department of the Treasury for the collection of title 38 benefit overpayments, overdue indebtedness, or costs of services provided to an individual not entitled to such services, by the withholding of all or a portion of the person's Federal income tax refund, provided that the disclosure is limited to information concerning an individual's indebtedness by virtue of a person's participation in a benefits program administered by VA.

9. Consumer Reporting Agencies: To a consumer reporting agency for the purpose of locating the individual, obtaining a consumer report to determine the ability of the individual to repay an indebtedness to the United States, or assisting in the collection of such indebtedness, provided that the provisions of 38 U.S.C. 5701(g)(2) and (4) have been met, provided that the disclosure is limited to information that is reasonably necessary to identify such individual or concerning that individual's indebtedness to the United States by virtue of the person's participation in a benefits program administered by the Department.

10. Contractors: To contractors, grantees, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for VA, when reasonably necessary to accomplish an agency function related to the records.

11. Congress: To a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of, and at the request of, the individual who is the subject of the record.

12. Identity Theft Remediation, for Another Federal Agency: To other Federal agencies may be made to assist such agencies in preventing and detecting possible fraud or abuse by individuals in their operations and programs. This routine use permits disclosures by the Department to report a suspected incident of identity theft and provide information and/or documentation related to or in support of the reported incident.

13. Data Breach Response and Remediation, for VA: To appropriate agencies, entities, and persons when (1) VA suspects or has confirmed that there has been a breach of the system of records; (2) VA has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, VA (including its information systems, programs, and operations), the Federal Government or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with VA's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

14. Federal Agencies, for Computer Matches: To other Federal agencies for the purpose of conducting computer matches to obtain information to determine or verify eligibility of Veterans receiving VA benefits or medical care under title 38.

15. Data Breach Response and Remediation, for Another Federal Agency: To another Federal agency or Federal entity, when VA determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

16. Equal Employment Opportunity Commission (EEOC): To the EEOC in connection with investigations of alleged or possible discriminatory practices, examination of Federal affirmative employment programs, or other functions of the Commission as authorized by law.

17. Federal Labor Relations Authority (FLRA): To the FLRA in connection with the investigation and resolution of allegations of unfair labor practices, the resolution of exceptions to arbitration awards when a question of material fact is raised, matters before the Federal Service Impasses Panel, and the

investigation of representation petitions and the conduct or supervision of representation elections.

18. *Merit Systems Protection Board (MSPB)*: To the MSPB in connection with appeals, special studies of the civil service and other merit systems, review of rules and regulations, investigation of alleged or possible prohibited personnel practices, and such other functions promulgated in 5 U.S.C. 1205 and 1206, or as authorized by law.

19. *Researchers, for Research*: To epidemiological and other research facilities approved by the Under Secretary for Health for research purposes determined to be necessary and proper, provided that the names and addresses of Veterans, their dependents and caregivers will not be disclosed unless those names and addresses are first provided to VA by the facilities making the request.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

The CARMA system of records is hosted in the Salesforce Gov Cloud (GovCloud). The production environment (including application data) is backed up weekly to VA's Amazon Web Services (AWS) Cloud.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records in this system are retrieved by name, integration control number (ICN), correspondence tracking number, internal record number, facility number, or other assigned identifiers of the individuals on whom they are maintained.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records in this system are retained and disposed of in accordance with the schedule approved by the Archivist of the United States, VHA RCS 10-1, Item Number 7900, Temporary; Destroy 75 years after enrollment.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL, SAFEGUARDS:

1. On an annual basis, employees are required to sign a computer access agreement acknowledging their understanding of confidentiality requirements. In addition, all employees receive annual privacy awareness and information security training.

2. Access to electronic records is deactivated when no longer required for official duties. Recurring monitors are in place to ensure compliance with nationally and locally established security measures.

3. Strict control measures are enforced to ensure that access to and disclosure from all records are limited to VA and

the contractor's employees whose official duties warrant access to those files.

4. Access to the records in CARMA is restricted and requires approval prior to access. Restricted access will be provided to enable workflow management to administer, monitor and track services delivered through VA's Caregiver Support Program including, but not limited to, documentation of calls to the Caregiver Support Line.

5. The records in CARMA are safeguarded by the AWS GovCloud infrastructure that has been authorized at the high-impact level under the Federal Risk and Authorization Management Program. The secure site-to-site encrypted network connection is limited to access via the VA trusted internet connection.

RECORD ACCESS PROCEDURE:

Individuals seeking information on the existence and content of records in this system pertaining to them should contact the system manager in writing as indicated above or inquire in person at the nearest VA facility. A request for access to records must contain the requester's name, address, telephone number, signed by the requester, and describes the records sought in sufficient detail to enable VA personnel to locate them with a reasonable amount of effort.

CONTESTING RECORD PROCEDURES:

Individuals seeking to contest or amend records in this system pertaining to them should contact the system manager in writing as indicated above or inquire in person at the nearest VA facility. A request to contest or amend records must state clearly and concisely what record is being contested, the reasons for contesting it, and the proposed amendment to the record.

NOTIFICATION PROCEDURES:

Generalized notice is provided by the publication of this notice. For specific notice, see Record Access Procedure, above.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

86 FR 18588 (April 9, 2021).

BILLING CODE

DEPARTMENT OF VETERANS AFFAIRS

Scientific Merit Review Board, Health Services Research and Development Service; Federal Register Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. 10, that a meeting of the Health Services Research and Development Service Scientific (HSRD) Merit Review Board (hereinafter, "the Board") will be held on Monday, March 18, 2024, via WebEx from 12-1:30 p.m. EST. The meeting will be partially closed to the public, with an open portion from 12-12:15 p.m. EST. The closed portion, from 12:15-1:30 p.m. EST, will be used for discussion, examination of and reference to the research applications and scientific review. Discussions will involve reference to staff and consultant critiques of research proposals. Discussions will also cover the scientific merit of each proposal and the qualifications of the personnel conducting the studies, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Additionally, premature disclosure of research information could significantly obstruct implementation of proposed agency action regarding the research proposals. As provided by Public Law 92-463 subsection 10(d), and amended by Public Law 94-409, closing the committee meeting is in accordance with 5 U.S.C. 552b(c)(6) and (9)(B).

The objective of the Board is to provide for the fair and equitable selection of the most meritorious research projects for support by VA research funds and to offer advice for research program officials on program priorities and policies. The ultimate objective of the Board is to ensure that the VA HSRD program promotes functional independence and improves the quality of life for impaired and disabled Veterans.

Board members advise the Director of HSRD and the Chief Research and Development Officer on the scientific and technical merit, mission relevance and protection of human subjects of HSRD proposals. The Board does not consider grants, contracts or other forms of extramural research.

Members of the public may attend the open portion of the meeting via WebEx in listen-only mode, as the time-limited open agenda does not allow for public comment presentations. To attend the open portion of the meeting (12-12:15 p.m. EST), the public may join by

dialing the phone number (1-833-558-0712) and entering the meeting number/access code (2761 198 6545).

Written comments from members of the public must be sent to Tiffin Ross-Shepard, Designated Federal Officer, HSRD, Department of Veterans Affairs (14RDH), 810 Vermont Avenue NW, Washington, DC 20420, or to Tiffin.Ross-Shepard@va.gov at least five days before the meeting. The public comments will be shared with the Board members. The public may not attend the closed portion of the meeting, as disclosure of research information could significantly obstruct implementation of proposed agency action regarding the research proposals. As provided by Public Law 92-463 subsection 10(d), and amended by Public Law 94-409, closing the committee meeting is in accordance with title 5 U.S.C. 552b(c)(6) and (9)(B).

Dated: January 29, 2024.

LaTonya L. Small,

Federal Advisory Committee Management Officer.

BILLING CODE P

DEPARTMENT OF VETERANS AFFAIRS

Rehabilitation Research and Development Service Scientific Merit Review Board; Federal Register Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. ch. 10, that a meeting of the Rehabilitation Research and Development Service

(RR&D) Scientific Merit Review Board (hereinafter, "the Board") will be held on Wednesday, March 6, 2024, via Webex from 1-1:30 p.m. EST. The meeting will be partially closed to the public, with an open portion from 1-1:10. The closed portion, from 1:10-1:30 p.m., will be used for discussion, examination of and reference to the research applications and scientific review. Discussions will involve reference to staff and consultant critiques of research proposals. Discussions will also cover the scientific merit of each proposal and the qualifications of personnel conducting the studies, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Additionally, premature disclosure of research information could significantly obstruct implementation of proposed agency action regarding the research proposals. As provided by Public Law 92-463 subsection 10(d), and amended by Public Law 94-409, closing the committee meeting is in accordance with 5 U.S.C. 552b(c)(6) and (9)(B).

The objective of the Board is to provide for the fair and equitable selection of the most meritorious research projects for support by VA research funds and to offer advice for research program officials on program priorities and policies. The ultimate objective of the Board is to ensure that the VA RR&D program promotes functional independence and improves the quality of life for impaired and disabled Veterans.

Board members will advise the Director of RR&D and the Chief Research and Development Officer on the scientific and technical merit,

mission relevance and protection of human and animal subjects of the proposals submitted to RR&D. The Board does not consider grants, contracts or other forms of extramural research.

Members of the public may attend the open portion of the meeting via WebEx, from 1-1:10 p.m., in listen-only mode, as the time-limited open agenda does not allow for public comment presentations. To attend the open portion of the meeting, the public may dial the Webex phone number (1-833-558-0712), then enter the meeting access code (2764 419 8398).

Written comments from members of the public should be mailed to Kristy Benton-Grover, Designated Federal Officer, RR&D, Department of Veterans Affairs (14RDR), 810 Vermont Avenue NW, Washington, DC 20420, or to Kristy.Benton-Grover@va.gov at least five days before the meeting. The public comments will be shared with the Board members. The public may not attend the closed portion of the meeting as disclosure of research information could significantly obstruct implementation of proposed agency action regarding the research proposals. As provided by Public Law 92-463 subsection 10(d), and amended by Public Law 94-409, closing the committee meeting is in accordance with title 5 U.S.C. 552b(c)(6) and (9)(B).

Dated: January 29, 2024.

LaTonya L. Small,

Federal Advisory Committee Management Officer.

Community Reinvestment Act

AGENCY: Office of the Comptroller of the Currency, Treasury; Board of Governors of the Federal Reserve System; and Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency (OCC), Board of Governors of the Federal Reserve System (Board), and the Federal Deposit Insurance Corporation (FDIC) are adopting final amendments to their regulations implementing the Community Reinvestment Act of 1977 (CRA) to update how CRA activities qualify for consideration, where CRA activities are considered, and how CRA activities are evaluated.

DATES:

Effective date: This rule is effective on April 1, 2024, except for amendment nos. 29, 52, and 75, which are effective April 1, 2024, through January 1, 2031, and amendment nos. 7, 11, 18, 20, 25, 35, 39, 43, 45, 49, 58, 62, 66, 68, and 72, which are delayed indefinitely. The agencies will publish a document in the **Federal Register** announcing an effective date for the delayed amendments.

Applicability date: Sections _____.12 through _____.15, _____.17 through _____.30, and _____.42(a); the data collection and maintenance requirements in § _____.42(c) through (f); and appendices A through F of the common rule text as adopted by the OCC, Board, and FDIC are applicable on January 1, 2026. Section _____.42(b) and (g) through (i) and the reporting requirements in § _____.42(c) through (f) of the common rule text as adopted by the OCC, Board, and FDIC are applicable on January 1, 2027.

FOR FURTHER INFORMATION CONTACT:

OCC: Heidi M. Thomas, Senior Counsel, or Emily Boyes, Counsel, Chief Counsel's Office, (202) 649–5490; or Vonda Eanes, Director for CRA and Fair Lending Policy, or Cassandra Remmenga, CRA Modernization Program Manager, Bank Supervision Policy, (202) 649–5470, Office of the Comptroller of the Currency, 400 7th Street SW, Washington, DC 20219. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

Board: Taz George, Senior Supervisory Policy Analyst; Dorian Hawkins, Counsel; S. Caroline (Carrie) Johnson, Manager; Matthew Lambert, Senior Supervisory Analyst; Eric Lum, Senior Supervisory Analyst; Cayla Matsumoto, Supervisory Policy Analyst; or Lisa Robinson, Lead Supervisory Policy Analyst; Lorna Neill, Senior Counsel; Amal Patel, Senior Counsel; or Jaydee DiGiovanni, Counsel; Division of Consumer and Community Affairs or David Alexander, Special Counsel; Cody Gaffney, Senior Attorney; or Gavin Smith, Senior Counsel; Legal Division, Board of Governors of the Federal Reserve System at (202) 452–2412 or. For users of TDD–TTY, (202) 263–4869 or dial 711 from any telephone anywhere in the United States.

FDIC: Pamela A. Freeman, Senior Examination Specialist, Compliance and CRA Examinations Branch, Division of Depositor and Consumer Protection, (202) 898–3656; Patience R. Singleton, Senior Policy Analyst, Supervisory Policy Branch, Division of Depositor and Consumer Protection, (202) 898–6859; Sherry Ann Betancourt, Counsel, Legal Division, (202) 898–6560; Alys V. Brown, Senior Attorney, Legal Division, (202) 898–3565, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.

V. Regulatory Analysis**I. Summary of the Final Rule**

The CRA ¹ is a seminal piece of legislation that requires the OCC, the Board, and the FDIC (together referred to as the agencies, and each, individually, the agency) to assess a bank's ² record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the bank's safe and sound operation. Upon completing this examination, the statute requires the agencies to “prepare a written evaluation of the institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods.” ³ The statute further provides that each agency must consider a bank's CRA performance “in its evaluation of an application for a deposit facility by such institution.” ⁴ The agencies implement

¹ 12 U.S.C. 2901 *et seq.*

² For purposes of this **SUPPLEMENTARY INFORMATION**, the term “bank” includes insured national and State banks, Federal and State savings associations, Federal branches as defined in 12 CFR part 28, insured State branches as defined in 12 CFR 345.11(c), and State member banks as defined in 12 CFR part 208, except as provided in 12 CFR _____.11(c).

³ 12 U.S.C. 2906(a).

⁴ 12 U.S.C. 2903(a)(2).

the CRA and establish the framework and criteria by which the agencies assess a bank's performance through their individual CRA regulations, which are supplemented by supervisory guidance.⁵ Under the CRA regulations, the agencies apply different evaluation standards for banks of different asset sizes and types.

The agencies issued a notice of proposed rulemaking published in the **Federal Register** on June 3, 2022 (NPR, proposal, or the proposed rule),⁶ seeking comment on updates to their respective CRA regulations to achieve the following objectives:

- Strengthen the achievement of the core purpose of the statute;
- Adapt to changes in the banking industry, including the expanded role of mobile and online banking;
- Provide greater clarity and consistency in the application of the regulations;
- Tailor performance standards to account for differences in bank size and business models and local conditions;
- Tailor data collection and reporting requirements and use existing data whenever possible;
- Promote transparency and public engagement;
- Confirm that CRA and fair lending responsibilities are mutually reinforcing; and
- Promote a consistent regulatory approach that applies to banks regulated by all three agencies.⁷

The agencies believe that each objective is met through the promulgation of this final rule. Additional discussion of, and commenter feedback received regarding, the agencies' objectives can be found in section III.B of this **SUPPLEMENTARY INFORMATION**.

This section provides a summary of the final rule and highlights certain key elements and changes as compared to the proposal. For a more detailed discussion, including the agencies' considerations of the comments received, see sections III and IV of this **SUPPLEMENTARY INFORMATION**.

⁵ See 12 CFR parts 25 (OCC), 228 (Regulation BB) (Board), and 345 (FDIC). For clarity and to streamline references, citations to the agencies' existing common CRA regulations are provided in the following format: current 12 CFR ____ .xx. For example, references to 12 CFR 25.12 (OCC), 228.12 (Board), and 345.12 (FDIC) would be streamlined as follows: "current 12 CFR ____ .12." Likewise, references to the agencies' proposed and final common CRA regulations are provided in the following formats, respectively: "proposed § ____ .xx" and "final § ____ .xx."

⁶ 87 FR 33884 (June 3, 2022).

⁷ The agencies have revised this objective for the final rule, to recognize that the agencies currently have common regulations.

Bank Asset Size Categories and Limited Purpose Banks

The final rule implements a revised regulatory framework for the CRA that, like the current framework, is based on bank asset size and business model. This tailoring of the framework recognizes the capacity and resource differences among banks. Under the final rule, banks are classified as either a large bank, an intermediate bank, a small bank, or a limited purpose bank. Pursuant to the final rule: large banks are those with assets of at least \$2 billion as of December 31 in both of the prior two calendar years; intermediate banks are those with assets of at least \$600 million as of December 31 in both of the prior two calendar years and less than \$2 billion as of December 31 in either of the prior two calendar years; and small banks are those with assets of less than \$600 million as of December 31 in either of the prior two calendar years. These asset-size thresholds will be adjusted annually for inflation.

The final rule revises the definition of limited purpose bank to include both those banks currently considered "limited purpose banks" and those currently considered "wholesale banks," as those terms are defined under the current regulation and were defined under the proposal. Specifically, the final rule defines a limited purpose bank as a bank that is not in the business of extending certain loans, except on an incidental and accommodation basis, and for which a designation as a limited purpose bank is in effect. The final rule therefore does not reference "wholesale banks" because a separate definition is no longer necessary. The agencies have also clarified that limited purpose banks are not evaluated as small, intermediate, or large banks.

Evaluation Framework

Overview. The final rule's performance evaluation framework utilizes performance tests to evaluate a bank's performance in meeting the credit needs of its entire community. In finalizing this evaluation framework, the agencies seek to meet the objectives described above, including: strengthening the achievement of the core purpose of the statute; tailoring to account for differences in bank size, business model, and local conditions; and adapting to changes in the banking industry, including the rise of mobile and online banking. Depending on a bank's asset size or limited purpose bank designation, the agencies will evaluate banks under one or a combination of the following seven

performance tests: the Retail Lending Test; the Retail Services and Products Test; the Community Development Financing Test; the Community Development Services Test; the Intermediate Bank Community Development Test; the Small Bank Lending Test; and the Community Development Financing Test for Limited Purpose Banks. The agencies have also retained the strategic plan option, with revisions, as an alternative method for evaluation under the CRA.

The agencies will evaluate large banks under four performance tests: the Retail Lending Test, the Retail Services and Products Test, the Community Development Financing Test, and the Community Development Services Test. The agencies will evaluate intermediate banks under the Retail Lending Test and either the current community development test, referred to in the final rule as the Intermediate Bank Community Development Test, or, at the bank's option, the Community Development Financing Test. The agencies will evaluate small banks under either the current small bank test, referred to in the final rule as the Small Bank Lending Test or, at the bank's option, the Retail Lending Test. Finally, the agencies will evaluate limited purpose banks, under the Community Development Financing Test for Limited Purpose Banks.

The final rule also provides that relevant activities of a bank's operations subsidiaries or operating subsidiaries are included in a bank's performance evaluation. Relevant activities of other affiliates would be considered at a bank's option.

For each applicable performance test, the agencies will assign conclusions reflecting the bank's performance in its facility-based assessment areas, and in the case of the Retail Lending Test, certain other geographic areas. In most instances, including for small banks that opt to be evaluated under the Retail Lending Test, the agencies will assign one of five conclusions to the bank: "Outstanding"; "High Satisfactory"; "Low Satisfactory"; "Needs to Improve"; or "Substantial Noncompliance." For small banks evaluated under the Small Bank Lending Test, the agencies will assign one of four conclusions: "Outstanding"; "Satisfactory"; "Needs to Improve"; or "Substantial Noncompliance."

The conclusions assigned in connection with each of the applicable performance tests are combined to develop a bank's CRA ratings. The agencies may assign a bank one of the four ratings, as indicated in the statute: "Outstanding"; "Satisfactory"; "Needs

to Improve”; or “Substantial Noncompliance.”

For banks that are evaluated under more than one performance test, specific weights are applied to each performance test conclusion, with weighting varying by bank asset size. For large banks: the Retail Lending Test is weighted at 40 percent; the Retail Services and Products Test is weighted at 10 percent; the Community Development Financing Test is weighted at 40 percent; and the Community Development Services Test is weighted at 10 percent. Relative to the proposal, this large bank weighting reflects a decrease in the percentages assigned to the Retail Lending Test and the Retail Services and Products Test and a resulting increase in the percentage assigned to the Community Development Financing Test. For intermediate banks, each applicable performance test is weighted at 50 percent.

As noted above, banks of all sizes will maintain the option to elect to be evaluated under an approved strategic plan. Among other revisions, the final rule updates the standards for obtaining approval for such plans. The final rule clarifies the proposal to explain the circumstances in which banks must include the performance tests that would apply in the absence of a strategic plan, the modifications and additions that banks may make to those tests, and the justifications that banks must provide for their draft plans.

Retail Lending Test. The Retail Lending Test evaluates a bank’s record of helping to meet the credit needs of its entire community through the bank’s origination and purchase of home mortgage loans, multifamily loans, small business loans, and small farm loans, as well as through automobile lending if the bank is a majority automobile lender. Specifically, the Retail Lending Test includes an evaluation of how banks are serving low- and moderate-income individuals, small businesses, small farms, and low- and moderate-income census tracts in the bank’s facility-based assessment areas and, as applicable, retail lending assessment areas and outside retail lending areas. As noted above, under the final rule, intermediate and large banks are required to be evaluated under the Retail Lending Test, and small banks may opt to be evaluated under this performance test.

The Retail Lending Test includes two sets of metrics, as well as additional factors that are used to complement the use of metrics. First, the Retail Lending Volume Screen measures the volume of a bank’s retail lending relative to its deposit base in a facility-based

assessment area and compares that ratio to a Retail Lending Volume Threshold based on the aggregate ratio for all reporting banks with at least one branch in the same facility-based assessment area.

Second, the agencies evaluate the geographic distribution and borrower distribution of a bank’s major product lines in its Retail Lending Test Areas (facility-based assessment areas, retail lending assessment areas, and outside retail lending area) using a series of metrics and benchmarks. For example, for a bank’s closed-end home mortgage lending in a Retail Lending Test Area, the geographic distribution analysis evaluates the bank’s percentage of lending (1) in low-income census tracts and (2) in moderate-income census tracts, while the borrower distribution analysis evaluates the bank’s percentage of lending (3) to low-income borrowers and (4) to moderate-income borrowers. Under the final rule, the agencies evaluate the distribution of a large bank’s major product lines in its facility-based assessment areas, any retail lending assessment areas the bank is required to delineate, and its outside retail lending area. For intermediate banks, and small banks that opt to be evaluated under the Retail Lending Test, the agencies evaluate the distribution of the bank’s major product lines in its facility-based assessment areas and any outside retail lending area, if applicable. Regardless of the geographic area in which a bank is evaluated, for most major product lines, a bank’s performance relative to the retail lending distribution benchmarks is translated into a recommended conclusion using performance ranges that establish the level of performance needed to achieve a particular conclusion, such as “High Satisfactory.”

In addition, in the final rule the agencies consider a list of additional factors that are intended to account for circumstances in which the retail lending distribution metrics and benchmarks may not accurately or fully reflect a bank’s retail lending performance, or in which the benchmarks may not appropriately represent the credit needs and opportunities in an area.

In response to commenter feedback, the agencies sought ways to ensure that the final rule’s Retail Lending Test appropriately balances the agencies’ objectives. For example, the agencies adjusted some of the multipliers utilized as part of the Retail Lending Test to make “Outstanding” and “High Satisfactory” Retail Lending Test supporting conclusions more attainable relative to the proposal, while

maintaining an appropriate degree of rigor. Moreover, as compared to the proposal, the final rule reduces the number of product lines potentially evaluated under the Retail Lending Test from six to three (closed-end home mortgage loans, small business loans, and small farm loans) for most banks. In addition, the agencies will only evaluate a bank’s automobile loans if automobile loans represent a majority of the bank’s retail lending, or if the bank opts to have its automobile loans evaluated under the Retail Lending Test.

Retail Services and Products Test. The Retail Services and Products Test utilizes a tailored approach to evaluate the availability of a bank’s retail banking services and retail banking products and the responsiveness of those services and products to the credit needs of the bank’s entire community, including low- and moderate-income individuals, low- and moderate-income census tracts, small businesses, and small farms. Under the final rule, this performance test maintains the overall approach set out in the NPR, with certain modifications, and incorporates benchmarks to evaluate the availability of a bank’s branch and remote service facilities. In addition, the agencies will evaluate the digital and other delivery systems of some banks.

Evaluation of the retail banking services of a large bank with assets greater than \$10 billion includes a review of the bank’s branch availability and services, remote service facilities (including automated teller machines (ATMs)), and digital delivery systems and other delivery systems. The agencies will also consider the digital delivery systems and other delivery systems of large banks with assets less than or equal to \$10 billion if the bank does not operate any branches or, for banks that operate at least one branch, at the bank’s option.

Evaluation of a bank’s retail banking products includes a review of the responsiveness of the bank’s credit products and programs, and availability and usage of responsive deposit products. Both deposit products and credit products and programs are evaluated at the institution level and, in a change from the proposal, are given only positive consideration and may not negatively impact a bank’s Retail Services and Products Test conclusion. This aspect of the performance test is designed to evaluate a bank’s efforts to provide products that are responsive to the needs of low- and moderate-income communities. The agencies will not evaluate the availability and usage of responsive deposit products in connection with large banks with assets

less than or equal to \$10 billion, unless the bank opts in.

Community Development Financing Test. The Community Development Financing Test evaluates how well large banks and intermediate banks that opt into the performance test meet the community development financing needs in each facility-based assessment area, each State or multistate metropolitan statistical area (MSA), as applicable, and for the institution. The test is not assessed in retail lending assessment areas.

The Community Development Financing Test includes the following elements: (1) a community development financing metric used to evaluate the dollar volume of a bank's community development loans and investments relative to the bank's deposit base; (2) standardized benchmarks to aid in evaluating performance; and (3) an impact and responsiveness review to ensure consideration of community development loans and investments that are particularly impactful or responsive. The final rule also includes a metric for banks with assets greater than \$10 billion to measure the bank's community development investments relative to deposits. This metric is intended to ensure a focus on certain bank community development investments (including Federal Low-Income Housing Tax Credit (LIHTC) and New Market Tax Credit (NMTC) investments). This metric is applied at the institution level and may only contribute positively to a bank's Community Development Financing Test conclusion.

Community Development Services Test. The Community Development Services Test considers the importance of community development services in fostering partnerships among different stakeholders, building capacity, and creating conditions for effective community development, including in rural areas. The agencies will evaluate large banks under this performance test in facility-based assessment areas, in States, multistate MSAs, and nationwide.

Under the final rule, the evaluation includes a qualitative review of relevant community development services data, and an impact and responsiveness review to assess services that are particularly responsive to community needs. After considering commenter feedback, the performance test does not require a metric of community development service hours per full-time employee for banks with assets greater than \$10 billion. Moreover, the final rule maintains the existing requirement that volunteer services considered

under this performance test must be related to the provision of financial services or the expertise of bank staff and must have a community development purpose. The performance test will provide consideration for activities that promote financial literacy for low- or moderate-income individuals, households, and families, even if the activities benefit individuals, households, and families of other income levels as well.

Geographic Areas in Which a Bank's Activities Are Considered

Facility-based assessment areas. As under the current CRA regulations, the final rule maintains facility-based assessment areas as the cornerstone of the CRA evaluation framework. The final rule adopts the delineation requirements for facility-based assessment areas mostly as set out in the proposal with clarifying changes. Specifically, banks will continue to delineate facility-based assessment areas in the MSAs or nonmetropolitan areas of States in which the following facilities are located: main offices, branches, and deposit-taking remote service facilities. As under the proposal, large banks are required to delineate facility-based assessment areas composed of whole counties, while intermediate and small banks will continue to be permitted to delineate facility-based assessment areas consisting of partial counties. The final rule continues to provide that facility-based assessment areas may not reflect illegal discrimination and may not arbitrarily exclude low- or moderate-income census tracts.

Retail lending assessment areas. The final rule requires a large bank to delineate a new type of assessment area, referred to as retail lending assessment areas, in an MSA or the nonmetropolitan area of a State in which the large bank has a concentration of closed-end home mortgage or small business lending outside of its facility-based assessment area(s). Large banks are evaluated under the Retail Lending Test, but not the other performance tests, in retail lending assessment areas. Relative to the proposal, the final rule tailors the retail lending assessment area requirement by exempting large banks that conduct more than 80 percent of their retail lending within facility-based assessment areas.

Upon consideration of commenter feedback regarding the retail lending assessment area proposal, the final rule increases, relative to the proposal, the loan count thresholds that trigger the retail lending assessment area

delineation requirement to at least 150 closed-end home mortgage loans or at least 400 small business loans in each year of the prior two calendar years. The final rule also simplifies the evaluation of a large bank's retail lending performance by reducing the number of product lines potentially evaluated in a retail lending assessment area from six to two product lines, and only evaluating a product line if the bank exceeds the relevant loan count threshold.

Outside retail lending areas. Under the final rule, the agencies will evaluate the retail lending performance of all large banks, certain intermediate banks, and certain small banks that opt to be evaluated under the Retail Lending Test in the outside retail lending area, which consists of the nationwide area outside of the bank's facility-based assessment areas and applicable retail lending assessment areas, excluding certain nonmetropolitan counties. Evaluation in these areas is designed to facilitate a comprehensive evaluation of a bank's retail lending to low- and moderate-income individuals and communities under the Retail Lending Test, and to adapt to changes in the banking industry, such as mobile and online banking. For an intermediate bank or a small bank that opts to be evaluated under the Retail Lending Test, the agencies evaluate the bank's retail lending performance in the outside retail lending area on a mandatory basis if the bank conducts a majority of its retail lending outside of its facility-based assessment areas. If the intermediate or small bank does not conduct a majority of its retail lending outside of its facility-based assessment areas, the bank may opt to have its retail lending in its outside retail lending area evaluated.

Areas for eligible community development activities. Like the proposal, the final rule provides that all banks will receive consideration for any qualified community development loans, investments, or services, regardless of location. In assessing a large bank's Community Development Financing Test performance, the final rule includes a focus on performance within facility-based assessment areas. Specifically, when developing conclusions for a State, multistate MSA, or for the institution overall, the final rule combines two components through a weighted average calculation: (1) performance within the bank's facility-based assessment areas in the State, multistate MSA, or for the institution overall; and (2) performance across the entire State, multistate MSA, and for the institution. The weights of the two

components are based on the percentage of a bank's retail lending and deposits inside its facility-based assessment areas. For example, for a bank with a relatively low percentage of retail lending and deposits inside its facility-based assessment areas, the bank's performance within its facility-based assessment areas receives less weight than its performance across the entire State, multistate MSA, or nationwide area. In this way, the Community Development Financing Test recognizes differences in bank business models.

Categories of Community Development

Updated community development definition. Under the current CRA regulations, in evaluating a bank's CRA performance, banks may receive community development consideration for community development loans, investments, and services under various tests. The final rule updates the definition of community development to provide banks with additional clarity regarding the loans, investments, and services that the agencies have determined support community development. The agencies believe these activities are responsive to the needs of low- and moderate-income individuals and communities, designated distressed or underserved nonmetropolitan areas, Native Land Areas,⁸ small businesses, and small farms. Specifically, the agencies have defined the following eleven community development categories in the final rule:

- Affordable housing, which has five components: (1) rental housing in conjunction with a government affordable housing plan, program, initiative, tax credit, or subsidy; (2) multifamily rental housing with affordable rents; (3) one-to-four family rental housing with affordable rents in a nonmetropolitan area; (4) affordable owner-occupied housing for low- or moderate-income individuals; and (5) mortgage-backed securities.
- Economic development, which includes loans, investments, and services undertaken in conjunction or in syndication with government programs; loans, investments, and services provided to intermediaries; and other forms of assistance to small businesses and small farms. Unlike the proposal, this category includes direct loans to small businesses and small farms in conjunction or in syndication with government programs that meet a size and purpose test.

⁸ The final rule defines "Native Land Areas" in final § _____.12.

- Community supportive services, which includes activities that assist, benefit, or contribute to the health, stability, or well-being of low- or moderate-income individuals, and replaces the current rule's "community services targeted to low- or moderate-income individuals" category.

- Six categories of place-based activities, which replace the revitalization and stabilization activities component of the current rule. Each of the final place-based categories adopts a focus on targeted geographic areas and includes common place-based eligibility criteria that must be met. The six place-based categories are:

- Revitalization or stabilization activities;
- Essential community facilities;
- Essential community infrastructure;
- Recovery activities that promote the recovery of a designated disaster area;
- Disaster preparedness and weather resiliency activities; and
- Qualifying activities in Native Land Areas.

- Activities with minority depository institutions (MDIs), women's depository institutions (WDIs), low-income credit unions (LICUs), and community development financial institutions (CDFIs).

- Financial literacy, which retains the proposed approach of qualifying activities assisting individuals, families, and households of all income levels, including low- or moderate-income individuals, families, and households.

Illustrative list and confirmation process. To promote clarity and consistency, the final rule also provides that the agencies will issue, maintain, and periodically update a publicly available illustrative list of non-exhaustive examples of loans, investments, and services that qualify for community development consideration. In addition, the final rule includes a process through which banks can confirm with the appropriate Federal financial supervisory agency whether a particular loan, investment, or service is eligible for community development consideration.⁹

⁹ The CRA defines "appropriate Federal financial supervisory agency" as (1) the Comptroller of the Currency with respect to national banks and Federal savings associations (the deposits of which are insured by the Federal Deposit Insurance Corporation); (2) the Board of Governors of the Federal Reserve System with respect to State chartered banks which are members of the Federal Reserve System, bank holding companies, and savings and loan holding companies; (3) the Federal Deposit Insurance Corporation with respect to State chartered banks and savings banks which are not members of the Federal Reserve System and the deposits of which are insured by the Corporation, and State savings associations (the deposits of which are insured by the Federal Deposit Insurance Corporation). 12 U.S.C. 2902(1).

Impact and responsiveness review. To promote clarity and consistency in the final rule, the agencies will evaluate the extent to which a bank's community development loans, investments, and services are impactful and responsive in meeting community development needs, through the application of a non-exhaustive list of review factors. Such factors were referred to as impact review factors in the agencies' proposal but are referred to as impact and responsiveness factors in the final rule.

Data Collection, Maintenance, and Reporting

Consistent with the proposal, the agencies are not imposing any new data collection and reporting requirements for small and intermediate banks. For large banks, the final rule leverages existing data where possible and introduces updated data collection, maintenance, and reporting requirements to fill gaps in the current regulation and facilitate implementation of the final rule. For example, the final rule requires certain large banks to collect, maintain, and report data that would enable the agencies both to implement the metrics and benchmarks included in the Retail Lending Test and Community Development Financing Test, and to evaluate activities under the Retail Services and Products Test. These data requirements are intended to support greater clarity and consistency in the application of the CRA regulations and are tailored by bank size, such as by introducing certain data requirements only for those large banks with assets over \$10 billion dollars.

The final rule requires the agencies to publish on their respective websites certain information related to the distribution by borrower income level, race, and ethnicity of a large bank's home mortgage loan originations and applications in each of the bank's assessment areas. This disclosure would leverage existing data available under the Home Mortgage Disclosure Act (HMDA).¹⁰

Transition

Although the effective date of the final rule is April 1, 2024, the applicability date for the majority of the provisions is January 1, 2026. Specifically, the following provisions of the final rule will become applicable on January 1, 2026: final §§ _____.12 through _____.15; final §§ _____.17 through _____.30; final § _____.42(a); the data collection and maintenance requirements in final § _____.42(c) through (f); and appendices A through

¹⁰ 12 U.S.C. 2801 *et seq.*

F. Banks will have until January 1, 2027, to comply with the reporting requirements of § _____.42(b) through (f), with data reporting requirements every April 1 beginning in 2027. In final § _____.51, the agencies have also included transition provisions relating to: applicability of the current CRA regulations; HMDA data disclosures; CRA consideration of eligible loans, investments, services, or products; strategic plans; and a particular ratings standard relating to minimum performance requirements applicable to large banks. Until the applicability dates for these provisions, banks will follow the current CRA regulations, included as appendix G to the revised CRA regulations.

Transition to Section 1071 Data

As discussed in the section-by-section analysis of §§ _____.12, _____.22, and _____.42, the agencies have included amendments to transition to the use of Consumer Financial Protection Bureau's (CFPB) final rule under section 1071 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act)¹¹ (Section 1071 Final Rule)¹² small business and small farm lending data (section 1071 data) once the data are available. The section 1071 data would replace CRA small business and small farm lending data required to be collected, maintained, and reported pursuant to final § _____.42(a)(1) and (b)(1).

With respect to the agencies' transition to using section 1071 data, as indicated in the section-by-section analysis of § _____.12, the agencies have removed proposed references to section 1071 data in the final rule's regulatory text. Instead, each agency is adopting separate agency-specific amendatory text that provides for a transition to section 1071 data. These transition amendments implement the intent of the agencies articulated in the proposal to leverage section 1071 data while accounting for the current uncertainty surrounding the availability of that data. Specifically, when effective, these transition amendments will add appropriate references to the section 1071 rulemaking, remove references to Call Report-based small business and small farm data, and make other corresponding changes to the final rule regulatory text.

The agencies are not including an effective date for these section 1071-related transition amendments in the final rule. Instead, once the availability

of section 1071 data is clarified, the agencies will take steps to provide appropriate notice in the **Federal Register** of the effective date of the transition amendments. The agencies expect that the effective date will be on January 1 of the relevant year to align with the final rule's data collection and reporting, benchmark calculations, and performance analysis, which all are based on whole calendar years.

Implementation

The agencies expect to issue supervisory guidance, including examination procedures, to promote clarity and transparency regarding implementation of the final rule. In addition, the agencies will conduct outreach and training to facilitate implementation of the final rule. For instance, the agencies expect to develop data reporting guides and technical assistance materials to assist banks in understanding supervisory expectations with respect to the final rule's data reporting requirements. In addition, the agencies expect to develop templates, such as for the submission of digital and other delivery systems data as well as for responsive deposit products data, to increase consistency, and will continue to explore other tools to improve efficiency and reduce burden. The agencies are also planning to develop data tools for banks and the public that will increase familiarity with the operation of the performance tests and allow for monitoring of performance relative to benchmarks based on historical data.

Each of the topics highlighted through this *Summary of the Final Rule* are discussed in greater detail in the section-by-section analysis in section IV of this **SUPPLEMENTARY INFORMATION**. The agencies are setting forth in this **SUPPLEMENTARY INFORMATION** the final rule using common regulation text for ease of review. The agencies have also included agency-specific amendatory text¹³ where necessary to account for differing agency authority and terminology.¹⁴

¹³ The OCC notes that current 12 CFR part 25 includes subpart E, Prohibition Against Use of Interstate Branches Primarily for Deposit Production. This subpart implements section 109 of the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994, 12 U.S.C. 1835a, which only applies to certain national banks and Federal branches of a foreign bank. As proposed, this final rule redesignates this subpart as subpart F but does not amend it.

¹⁴ In addition to the changes described in this **SUPPLEMENTARY INFORMATION**, the agencies have made conforming and technical changes throughout the final rule. The agencies will evaluate at a later date other rules that cross-reference to the CRA regulations to identify conforming changes that may be appropriate.

II. Background

A. General Statutory Background

The CRA was passed by Congress as part of the Housing and Community Development Act of 1977¹⁵ and is designed to encourage regulated banks to help meet the credit needs of the communities in which they are chartered. Specifically, Congress found that (1) regulated financial institutions are required by law to demonstrate that their deposit facilities serve the convenience and needs of the communities in which they are chartered to do business; (2) the convenience and needs of communities include the need for credit services as well as deposit services; and (3) regulated financial institutions have a continuing and affirmative obligation to help meet the credit needs of the local communities in which they are chartered.¹⁶

The CRA requires the agencies to “assess the institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of such institution.”¹⁷ Upon completing this assessment, the statute requires the agencies to “prepare a written evaluation of the institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods.”¹⁸ The statute further provides that each agency must consider a bank's CRA performance “in its evaluation of an application for a deposit facility by such institution.”¹⁹

Since its enactment, Congress has amended the CRA several times, including through: the Financial Institutions Reform, Recovery, and Enforcement Act of 1989²⁰ (which required public disclosure of a bank's CRA written evaluation and rating); the Federal Deposit Insurance Corporation Improvement Act of 1991²¹ (which required the inclusion of a bank's CRA examination data in the determination of its CRA rating); the Resolution Trust Corporation Refinancing, Restructuring, and Improvement Act of 1991 (which permits the agencies to provide favorable consideration where the bank has donated, sold on favorable terms, or

made available rent-free any branch of the bank “located in any predominantly minority neighborhood to any minority depository institution or women’s depository institution”);²² the Housing and Community Development Act of 1992²³ (which included assessment of the record of nonminority-owned and nonwomen-owned banks in cooperating with minority-owned and women-owned banks and LICUs); the Riegle-Neal Interstate-Banking and Branching Efficiency Act of 1994²⁴ (which (1) required an agency to consider an out-of-State national bank’s or State bank’s CRA rating when determining whether to allow interstate branches, and (2) prescribed certain requirements for the contents of the written CRA evaluation for banks with interstate branches); and the Gramm-Leach-Bliley Act of 1999²⁵ (which, among other things, provided regulatory relief for smaller banks by reducing the frequency of their CRA examinations).

Additionally, Congress directed the agencies to publish regulations to carry out the CRA’s purposes.²⁶ In 1978, the agencies promulgated the first CRA regulations, which included evidence of prohibited discriminatory or other illegal credit practices as a performance factor as discussed further in the next section.²⁷ Since then, the agencies have together significantly revised and sought to clarify their CRA regulations twice—in 1995²⁸ and 2005²⁹—with the most substantive interagency update occurring in 1995. In addition, the agencies have periodically jointly published the Interagency Questions and Answers Regarding Community Reinvestment (Interagency Questions

and Answers)³⁰ to provide guidance on the CRA regulations.

B. CRA, Illegal Discrimination, and Fair Lending

The CRA was one of several laws enacted in the 1960s and 1970s to address fairness and financial inclusion in access to housing and credit.³¹ During this period Congress passed the Fair Housing Act³² to prohibit discrimination in the sale or rental of housing,³³ and the Equal Credit Opportunity Act (ECOA) in 1974³⁴ (amended in 1976), to prohibit creditors from discriminating against an applicant in any aspect of a credit transaction on the basis of race, color, religion, national origin, sex, marital status, and age, because all or part of the applicant’s income derives from any public assistance program, or because the applicant has in good faith exercised any right under the Consumer Credit Protection Act.³⁵ These fair lending, fair housing, and other similar laws provide the legal basis under Federal law for prohibiting discriminatory lending practices by creditors based on race, ethnicity, and other protected characteristics.³⁶

The agencies have long recognized that CRA and fair lending are mutually reinforcing. For example, starting with the original CRA regulations issued in 1978, the agencies have taken evidence of discrimination or other illegal credit practices into account when evaluating a bank’s CRA performance.³⁷ Other provisions in the original 1978 regulations similarly expressed the agencies’ view that the exclusion of certain segments of a bank’s community is “contrary to” and “in conflict with” the CRA’s purpose of requiring banks to

meet the credit needs of their entire communities.³⁸ Specifically, the agencies provided for “assessment of an institution’s lending patterns to see if the institution discriminates between geographic areas or excludes qualified borrowers from low- and moderate-income neighborhoods.”³⁹ Factors identified as warranting unfavorable treatment were “practices intended to discourage applications,” evidence of “violations of the Equal Credit Opportunity Act and the Fair Housing Act,” and “failure to provide usual services—such as not accepting mortgage applications—at certain branches.”⁴⁰

C. Overview of Current CRA Regulations and Guidance for Performance Evaluations

CRA Performance Evaluations

The current CRA regulations provide different methods to evaluate a bank’s CRA performance depending on the asset size and business strategy of the bank.⁴¹ Under the current framework:

- Small banks—currently, those with assets of less than \$376 million as of December 31 of either of the prior two calendar years—are evaluated under a lending test and may receive an “Outstanding” rating based only on their retail lending performance. Qualified investments, services, and delivery systems that enhance credit availability in a bank’s assessment areas may be considered for an “Outstanding” rating, but only if the bank meets or exceeds the lending test criteria in the small bank performance standards.

- Intermediate small banks—currently, those with assets of at least \$376 million as of December 31 of both of the prior two calendar years and less than \$1.503 billion as of December 31 of either of the prior two calendar years—are evaluated under the lending test for small banks and a community development test. The intermediate small bank community development test evaluates all community development activities together.

- Large banks—currently, those with assets of at least \$1.503 billion as of December 31 of both of the prior two calendar years—are evaluated under separate lending, investment, and

²² Public Law 102–233, 105 Stat. 1761 (Dec. 12, 1991).

²³ Public Law 102–550, 106 Stat. 3874 (Oct. 28, 1992).

²⁴ Public Law 103–328, 108 Stat. 2338 (Sept. 29, 1994).

²⁵ Public Law 106–102, 113 Stat. 1338 (Nov. 12, 1999).

²⁶ 12 U.S.C. 2905.

²⁷ 43 FR 47144 (Oct. 12, 1978). Congress also charged, in addition to the agencies, the Office of Thrift Supervision (OTS) and its predecessor agency, the Federal Home Loan Bank Board, with implementing the CRA. The OTS had CRA rulemaking and supervisory authority for all savings associations. Pursuant to Title III of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376, 1522 (2010) (Dodd-Frank Act), the OTS’s CRA rulemaking authority for all savings associations transferred to the OCC and the OTS’s CRA supervisory authority for State savings associations transferred to the FDIC. As a result, the OCC’s CRA regulation applies to both State and Federal savings associations, in addition to national banks, and the FDIC enforces the OCC’s CRA regulations with respect to State savings associations.

³⁹ *Id.*

⁴⁰ *Id.*

⁴¹ See generally current 12 CFR _____.21 through _____.27. The agencies annually adjust the CRA asset-size thresholds based on the annual percentage change in a measure of the Consumer Price Index for Urban Wage Earners and Clerical Workers. The current bank asset-size thresholds set forth in this SUPPLEMENTARY INFORMATION are accurate through December 31, 2023.

service tests. The lending and service tests consider both retail and community development activities, and the investment test focuses on qualified community development investments. To facilitate the agencies' CRA analysis, large banks are required to report annually certain data on community development loans, small business loans, and small farm loans (small banks and intermediate small banks are not required to report these data unless they opt into being evaluated under the large bank lending test).

- Designated wholesale banks (those engaged in only incidental retail lending) and limited purposes banks (those offering a narrow product line to a regional or broader market) are evaluated under a standalone community development test.

- Banks of any size may elect to be evaluated under a strategic plan that sets out measurable, annual goals for lending, investment, and service activities in order to achieve a "Satisfactory" or an "Outstanding" rating. A strategic plan must be developed with community input and approved by the appropriate Federal financial supervisory agency.

The agencies also consider applicable performance context information to develop their analysis and conclusions when conducting CRA examinations. Performance context comprises a broad range of economic, demographic, and bank- and community-specific information that examiners review to calibrate a bank's CRA evaluation to its communities.

Assessment Areas

The current CRA regulations require a bank to delineate one or more assessment areas in which the bank's record of meeting its CRA obligations is evaluated.⁴² The regulations require a bank to delineate assessment areas generally consisting of one or more MSAs or metropolitan divisions, or one or more contiguous political subdivisions⁴³ in which the bank has its main office, branches, and deposit-taking ATMs, as well as the surrounding geographies (*i.e.*, census tracts)⁴⁴ in which the bank has originated or purchased a substantial portion of its loans (including home mortgage loans, small business and small farm loans, and any other loans the bank chooses, such as consumer loans on which the

bank elects to have its performance assessed).

The statute instructs the agencies to assess a bank's record of meeting the credit needs of its "entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of such institution, and . . . [to] take such record into account in its evaluation of an application for a deposit facility by such institution."⁴⁵ The statute does not prescribe the delineation of assessment areas, but they are an important aspect of the regulation because the agencies use assessment areas to determine what constitutes a bank's "community" for purposes of the evaluation of a bank's CRA performance.

Qualifying Activities

The CRA regulations and the Interagency Questions and Answers provide detailed information, including applicable definitions and descriptions, respectively, regarding activities that are eligible for CRA consideration in the evaluation of a bank's CRA performance. Banks that are evaluated under a performance test that includes a review of their retail activities are assessed in connection with retail lending activity (*e.g.*, home mortgage loans, small business loans, small farm loans, and consumer loans)⁴⁶ and, where applicable, retail banking service activities (*e.g.*, the current distribution of a bank's branches in geographies of different income levels, and the availability and effectiveness of the bank's alternative systems for delivering banking services to low- and moderate-income geographies and individuals).⁴⁷

Banks evaluated under a performance test that includes a review of their community development activities are assessed with respect to community development lending, qualified investments, and community development services, which must have a primary purpose of community development.⁴⁸

Guidance for Performance Evaluations

In addition to information included in their CRA regulations, the agencies also provide information to the public regarding how CRA performance tests are applied, where CRA activities are considered, and what activities are eligible through publicly available CRA

performance evaluations,⁴⁹ the Interagency Questions and Answers, interagency CRA examination procedures,⁵⁰ and interagency instructions for writing performance evaluations.⁵¹

D. Stakeholder Feedback and Recent Agency Rulemaking Efforts

The financial services industry has undergone transformative changes since the CRA was enacted, including the removal of national bank interstate branching restrictions and the expanded role of mobile and online banking. Prior to publishing the NPR, and to better understand how these developments impact both consumer access to banking products and services and a bank's CRA performance, the agencies sought, received, and reviewed feedback from the banking industry, community groups, academics, and other stakeholders on several occasions.

Economic Growth and Regulatory Paperwork Reduction Act of 1996 (EGRPRA)

From 2013 to 2016, the agencies solicited feedback on the CRA as part of the EGRPRA review process.⁵² Stakeholders raised issues related to: assessment area definitions; incentives for banks to serve low- and moderate-income, unbanked, underbanked, and rural communities; regulatory burdens associated with recordkeeping and reporting requirements, and asset thresholds for the various CRA examination methods; the need for clarity regarding performance measures and better examiner training to ensure consistency and rigor in examinations; and refinement of CRA ratings methodology.⁵³

OCC CRA Advance Notice of Proposed Rulemaking and OCC and Federal Reserve Outreach Sessions

On September 5, 2018, the OCC published an advance notice of proposed rulemaking (ANPR) to solicit ideas for a new CRA regulatory framework.⁵⁴ More than 1,500 comment letters were submitted in response. The

⁴⁸ See current 12 CFR ____ .12(g) through (i) and (t); see also current 12 CFR ____ .21 through ____ .27.

OCC held more than 40 meetings and outreach events after its ANPR. To augment that input, the Board and the Federal Reserve Banks held about 30 outreach meetings with representatives of banks, community organizations, and the FDIC and OCC.⁵⁵

OCC–FDIC CRA Notice of Proposed Rulemaking and OCC CRA Final Rule

On December 12, 2019, the FDIC and the OCC issued a joint notice of proposed rulemaking to revise and update their CRA regulations.⁵⁶ In response, the FDIC and the OCC received over 7,500 comment letters.

On May 2020, the OCC issued a CRA final rule (OCC 2020 CRA Final Rule), retaining the most fundamental elements of the joint proposal but also making adjustments to reflect stakeholder input.⁵⁷ The OCC deferred establishing the metrics-framework for evaluating banks' CRA performance until it was able to assess additional data,⁵⁸ with the final rule having an October 1, 2020, effective date and January 1, 2023, and January 1, 2024, compliance dates for certain provisions.⁵⁹

Board CRA Advance Notice of Proposed Rulemaking

On September 21, 2020, the Board issued a CRA ANPR (Board CRA ANPR) requesting public comment on an approach to modernize the CRA regulations by strengthening, clarifying, and tailoring the regulations to reflect the current banking landscape and better meet the core purpose of the CRA.⁶⁰ The Board CRA ANPR sought feedback on ways to evaluate how banks meet the needs of low- and moderate-income communities and address inequities in credit access. The Board received over 600 comment letters in response.

Interagency Statement and Other Developments

On July 20, 2021, the agencies issued an interagency statement indicating their commitment to work collectively

to, in a consistent manner, strengthen and modernize their CRA regulations.⁶¹ On December 15, 2021, the OCC issued a final rule, effective January 1, 2022, to rescind the OCC 2020 CRA Final Rule and replace it with CRA regulations based on those that the agencies jointly issued in 1995, as amended. The OCC's final rule also integrated the OCC's CRA regulation for savings associations into its national bank CRA regulation at 12 CFR part 25.⁶²

E. The Agencies' Proposal

Community development definitions. The NPR included a proposal to revise the community development definitions to clarify eligibility criteria for a broad range of community development activities and incorporate certain guidance currently provided through the Interagency Questions and Answers. The agencies also proposed using a *primary purpose* standard for determining eligibility of community development activities, with *pro rata* consideration for certain affordable housing activities.

Qualifying activities confirmation and illustrative list of community development activities. The agencies proposed to maintain a publicly available illustrative, non-exhaustive list of community development activities eligible for CRA consideration, which the agencies would periodically update. In addition, the agencies proposed a process, open to banks, for confirming eligibility of community development activities in advance.

Impact review of community development activities. To promote clearer and more consistent evaluation procedures, the agencies proposed to include impact and responsiveness factors (referred to in the NPR as impact review factors) in the regulation. The impact review factors would inform the agencies' evaluation of the impact and responsiveness of a bank's activities under the proposed community development tests.

Assessment areas and areas for eligible community development activity. The agencies offered a series of proposals on delineating facility-based assessment areas for main offices, branches, and deposit-taking remote service facilities (to include ATMs). The NPR sought to maintain facility-based assessment areas as the cornerstone of

the CRA evaluation framework. Under the proposal, large banks would delineate assessment areas comprised of full counties, metropolitan divisions, or MSAs. Intermediate and small banks could continue to delineate partial county facility-based assessment areas, consistent with current practice.

The agencies also proposed that large banks would delineate retail lending assessment areas where the bank has concentrations of home mortgage and/or small business lending outside of its facility-based assessment areas. Under that aspect of the proposal, a large bank would delineate retail lending assessment areas where it had an annual lending volume of at least 100 home mortgage loan originations or at least 250 small business loan originations in an MSA or nonmetropolitan area of a State for two consecutive years.

The agencies also proposed to allow banks to receive CRA credit for any qualified community development activity, regardless of location, although performance within facility-based assessment areas would be emphasized.

Performance tests, standards, and ratings in general. The agencies proposed an evaluation framework that would include a Retail Lending Test, a Retail Services and Products Test, a Community Development Financing Test, and a Community Development Services Test. Under the proposal, large banks would be evaluated under all four tests. Intermediate banks would be evaluated under the Retail Lending Test and the status quo community development test, unless they opted into the Community Development Financing Test. Small banks would be evaluated under the status quo small bank lending test, unless they opted into the Retail Lending Test. Wholesale and limited purpose banks would be evaluated under a tailored version of the Community Development Financing Test.

Under this proposed framework, large banks would be banks that had average quarterly assets, computed annually, of at least \$2 billion in both of the prior two calendar years; intermediate banks would be banks that had average quarterly assets, computed annually, of at least \$600 million in both of the prior two calendar years and less than \$2 billion in either of the prior two calendar years; and small banks would be banks that had average quarterly assets, computed annually, of less than \$600 million in either of the prior two calendar years.⁶³ The agencies also

⁶² 86 FR 71328 (Dec. 15, 2021).

⁶³ Of particular relevance to the agencies' CRA regulations, the SBA revised the size standards applicable to small commercial banks and savings

proposed adding a new definition of “operations subsidiary” to the Board’s CRA regulation and “operating subsidiary” to the FDIC’s and OCC’s CRA regulations to identify those bank affiliates whose activities would be required to be attributed to a bank’s CRA performance (together, bank subsidiaries). The agencies proposed to maintain the current flexibilities that would allow a bank to choose to include or exclude the activities of other bank affiliates that are not considered bank subsidiaries. The NPR also discussed performance context, and the requirement for activity in accordance with safe and sound operations.

Retail Lending Test product categories and major product lines. The agencies proposed categories and standards for determining when a bank’s retail lending product lines are evaluated under the proposed Retail Lending Test. The agencies proposed the following retail lending product line categories: closed-end home mortgage, open-end home mortgage, multifamily, small business, and small farm lending. The agencies also proposed including automobile lending as an eligible retail lending product line. In addition, the agencies proposed a 15 percent major product line standard to determine when a retail lending product line would be evaluated.

Retail Services and Products Test. The agencies proposed to evaluate large banks under the Retail Services and Products Test, which would use a predominantly qualitative approach, incorporating quantitative measures as guidelines, as applicable. The agencies proposed that the evaluation of digital and other delivery systems would be required for large banks with assets of over \$10 billion, and not required for large banks with assets of \$10 billion or less.

Furthermore, the credit products and deposit products part of the proposed Retail Services and Products Test aimed to evaluate a bank’s efforts to offer products that are responsive to the needs of low- and moderate-income communities. The agencies proposed that the evaluation of deposit products responsive to the needs of low- or moderate-income individuals would be required for large banks with assets of over \$10 billion, and not required for large banks with assets of \$10 billion or less.

institutions, respectively, from \$600 million to \$750 million, based upon the average assets reported on such a financial institution’s four quarterly financial statements for the preceding year. The final rule had a May 2, 2022, effective date. See 87 FR 18627, 18830 (Mar. 31, 2022).

Community Development Financing Test. The agencies proposed to evaluate large banks as well as intermediate banks that opt into the test under the proposed Community Development Financing Test. As proposed, the Community Development Financing Test would consist of a Community Development Financing Metric, benchmarks, and an impact review. These components would be assessed at the facility-based assessment area, State, multistate MSA, and institution levels, and would inform conclusions at each of those levels.

Community Development Services Test. The agencies proposed to assess a large bank’s community development services, underscoring the importance of these activities for fostering partnerships among different stakeholders, building capacity, and creating the conditions for effective community development. The agencies proposed that in nonmetropolitan areas, banks may receive community development services consideration for volunteer activities that meet an identified community development need, even if unrelated to the provision of financial services. The proposed test would consist of a primarily qualitative assessment of the bank’s community development service activities. For large banks with assets of over \$10 billion, the agencies proposed also using a metric to measure the hours of community development services activity per full time employee of a bank.

Wholesale and limited purpose banks. The agencies proposed a Community Development Financing Test for Wholesale and Limited Purpose Banks, which would include a qualitative review of a bank’s community development lending and investments in each facility-based assessment area and an institution level-metric measuring a bank’s volume of activities relative to its capacity. The agencies also proposed giving wholesale and limited purpose banks the option to have examiners consider community development service activities that would qualify under the Community Development Services Test.

Strategic plans. The agencies proposed to maintain a strategic plan option as an alternative method for evaluation. Banks that elect to be evaluated under a strategic plan would continue to request approval for the plan from their appropriate Federal financial supervisory agency. The agencies proposed more specific criteria to ensure that all banks meet their CRA obligation to serve low- and moderate-income individuals and communities.

As proposed, banks approved to be evaluated under a strategic plan option would have the same assessment area requirements as other banks and would submit plans that include the same performance tests and standards that would otherwise apply unless the bank is substantially engaged in activities outside the scope of these performance tests. In seeking approval for a plan that does not adhere to requirements and standards that are applied to other banks, the plan would be required to include an explanation of why different standards would be more appropriate in meeting the credit needs of the bank’s communities.

Assigned conclusions and ratings. The agencies proposed to provide greater transparency and consistency on assigning ratings for a bank’s overall performance. The proposed approach would produce performance scores for each applicable test, at the State, multistate MSA, and institution levels based on a weighted average of assessment area conclusions, as well as consideration of additional test-specific factors at the State, multistate MSA, or institution level. These performance scores would be mapped to conclusion categories to assign test-specific conclusions at each level. The agencies further proposed to combine these performance scores across tests to assign ratings at each level.

The agencies proposed to determine a bank’s overall rating by taking a weighted average of the applicable performance test scores. For large banks, the agencies proposed the following weights: 45 percent for Retail Lending Test performance score; 15 percent for Retail Services and Products Test performance score; 30 percent for Community Development Financing Test performance score; and 10 percent for Community Development Services Test performance score. For intermediate banks, the agencies proposed to weight the Retail Lending test at 50 percent and the community development test, or if the bank opted into the Community Development Financing Test, at 50 percent.

The agencies also proposed updating the criteria to determine how discriminatory and other illegal practices would adversely affect a rating, as well as what rating level (State, multistate MSA, and institution) would be affected.

Performance standards for small and intermediate banks. The agencies proposed to continue evaluating small banks under the small bank performance standards in the current CRA framework. However, under the proposal, small banks could opt into the

Retail Lending Test and could continue to request additional consideration for other qualifying CRA activities. The agencies would evaluate intermediate banks under the proposed Retail Lending Test, and would evaluate an intermediate bank's community development activity pursuant to the criteria under the current intermediate small bank community development test. Intermediate banks could also opt to be evaluated under the proposed Community Development Financing Test.

Effect of CRA performance on applications. The agencies proposed no substantive changes to the regulatory provisions concerning the effect of CRA performance on bank applications, such as those for mergers, acquisitions, or consolidation of assets, deposit insurance requests, and the establishment of domestic branches.

Data collection, reporting, and disclosure. The agencies proposed to revise data collection and reporting requirements to increase the clarity, consistency, and transparency of the evaluation process through the use of standard metrics and benchmarks. The proposal recognized the importance of using existing data sources where possible, and tailoring data requirements, where appropriate.

In addition to leveraging existing data, however, the proposal would have required large banks to collect, maintain, and report additional data. The data requirements under the proposal for intermediate banks and small banks would remain the same as the current requirements. All large banks under the proposal would have new requirements for certain categories of data, (including community development financing data, branch location data, and remote service facility location data); however, some new data requirements would only apply to large banks with assets of over \$10 billion. The agencies also proposed updated standards for all large banks to report the delineation of their assessment areas.

Content and availability of public file, public notice by banks, publication of planned examination schedule, and public engagement. The agencies proposed to provide more transparent information to the public on CRA examinations and encourage communication between members of the public and banks. The agencies proposed to make a bank's CRA public file more accessible to the public by allowing any bank with a public website to include its CRA public file on its website. The agencies also proposed publishing a list of banks scheduled for

CRA examinations for the next two quarters at least 60 days in advance in order to provide additional notice to the public. Finally, the agencies proposed to establish a way for the public to provide feedback on community needs and opportunities in specific geographies.

Transition. The agencies proposed a phased-in timeline that would facilitate the transition from the current regulatory and supervisory framework to the updated CRA regulatory and supervisory framework.

III. General Comments Received

The agencies received approximately 950 unique comment letters regarding the proposal from a wide range of commenters, including: financial institutions; non-financial institution and financial institution trade associations; CDFIs; financial and non-financial businesses; community development organizations; consumer advocacy groups; civil rights groups; other nonprofit organizations; Federal, State, local, and tribal government commenters; tribal organizations; academics; individuals; and other interested parties. The agencies have carefully considered all the commenter feedback in developing the final rule.

Comments received by the agencies cover a wide-ranging set of topics across the entire proposal. General public comments on the NPR are summarized below. Comments relating to specific regulatory provisions of the agencies' proposal and the final rule are discussed in detail in the section-by-section analyses of the specific provisions on which commenters shared their views.

A. General Comments Regarding the NPR

Modernizing the CRA performance evaluation framework. Many commenters expressed appreciation for the agencies' unified efforts to modernize the CRA framework. Some commenters noted support for the objective of providing transparency and consistency for banks covered by CRA and the communities they serve. In addition, several commenters, expressed support for various aspects of the NPR, including the proposal's metrics-driven approach and attention to climate resiliency.

Some commenters stated that while the agencies' proposal is a step in the right direction, more could be done to improve the CRA regulations, such as requiring the agencies to consult with a diverse set of community representatives when evaluating an institution's CRA performance. A few commenters also suggested that the final rule should encourage both meaningful

action to help low- and moderate-income communities and collaboration between banks and financial technology (fintech) companies. Another commenter recommended that the agencies view the military community as a community deserving of CRA support. The commenter further stated that bank activities that serve the military community should generally receive CRA credit.

Other commenters opposed or expressed concerns about the proposal for various reasons, asserting that aspects of the NPR could result in, for example: decreased bank competition; undue burden and costs; less credit availability; gentrification of urban Black neighborhoods; and fewer services in low- and moderate-income communities.

Complexity of the proposed rule. Numerous commenters expressed concern that the agencies' proposal was too complex and difficult to understand—primarily related to the proposed performance test measures and ratings methodology requiring significant resources and costs to implement—and recommended that the agencies develop a simpler final rule to avoid unintended negative consequences. Some commenters recommended the agencies develop tools, guidance, and training for examiners and allow banks to consult with the agencies as needed.

Coordination of the CRA regulations with State and Federal agencies. A few commenters expressed concerns regarding the lack of coordination between the agencies, the CFPB, and the States and suggested the agencies work together with these other entities to improve consistency and further the mission of CRA. Other commenters noted that given shifts in the banking industry, the agencies should extend CRA regulations to nonbank lenders and, some commenters recommended, work with the CFPB to do so.

Length of the comment period and other rulemakings. Several commenters objected to the length of the comment period stating that it was too short and did not provide sufficient time for analysis and comment, with some commenters recommending that the agencies withdraw the proposal, issue a revised set of proposed rules, or open a new comment period. A few commenters suggested that the agencies should delay issuance of a final rule given uncertainty in the industry and the status of other rulemakings such as the CFPB's Section 1071 Final Rule and the agencies' separate rulemaking on capital requirements for certain banks.

Application of the proposed regulations to different business models. Some commenters expressed concern that the agencies' proposal did not address the needs of different business models and could create a one-size-fits-all approach that favors particular business models, which would not reflect the ever-changing banking landscape. These commenters indicated that the final rule should do more to recognize the inherently diffuse nature of digital banking and that more flexibility is necessary to account for different business models.

Promoting activities in local communities, including rural and underserved areas. Some commenters asserted that the NPR would be more effective in boosting reinvestment activity in underserved areas if the evaluations and ratings were more rigorous. Other commenters expressed concerns regarding the proposed use of metrics and certain data, suggesting that they could lead to disinvestment in hard to serve areas and overinvestment in urban areas due to the use of census data.

The agencies also received comments outlining different methods of promoting activities and investments at the local level, including specific recommendations: on how to promote investments in underserved rural and native communities; that the agencies should incentivize affordable small dollar loans and other products; and that the agencies should seek to end "rent-a-bank" partnerships.

A few other commenters suggested that the final rule should address the issue of appraisal bias to ensure lenders are fulfilling the needs of the communities they serve, and recommended that bank lenders should complete additional due diligence on the appraisers they work with.

The agencies also received several comments regarding the importance of performance context, suggesting that performance context and examiner discretion is necessary to understand the metrics embedded in the CRA exam.

Legal issues. Some commenters provided general comments raising legal concerns with the proposal. For example, some commenters stated that if the proposal is finalized as proposed, the final rule could be challenged as arbitrary and capricious because it was not supported by a reasoned analysis. Several commenters expressed the view that the agencies lack the authority to adopt the proposal. Finally, a commenter questioned the FDIC Board's authority to issue the NPR and to adopt a final rule based on certain aspects of the FDIC's organic statute and the FDIC

Board's composition at the time the NPR was issued.

Other comments. The agencies also received suggestions about how the agencies could evaluate the impact of the final rule, including five-year lookback reviews and an impact study. Commenter feedback also included noting that performance evaluations should be published as soon as reasonably possible. Some commenters urged the agencies to expand the coverage of CRA to credit unions to ensure low- and moderate-income communities are adequately served.

Final Rule

The agencies have carefully considered the general commenter feedback regarding ways in which the NPR could be improved and believe the final rule strikes the proper balance between the stated objectives, including to update the CRA regulations to strengthen the achievement of the core purpose of the statute and adapt to changes in the banking industry. For additional discussion regarding the agencies' objectives, see section III.B of this **SUPPLEMENTARY INFORMATION**. The agencies also carefully considered commenters' concerns regarding the complexity of the proposed rule and have made modifications to various aspects of the final rule to reduce complexity as explained in more detail in section IV of this **SUPPLEMENTARY INFORMATION**. In addition, with respect to the Retail Lending Test, the agencies believe that the final rule ensures that CRA evaluations of retail lending are appropriately robust and comprehensive, provides greater consistency and transparency, and reduces overall complexity relative to the approach set out in the NPR. The agencies note that any evaluation approach leveraging metrics and benchmarks that captures the different ways that banks may serve the credit needs of an area will necessarily entail a degree of complexity.

The agencies appreciate commenter feedback that the military community should be considered a community deserving of CRA support. The agencies believe that the final rule encourages banks to meet the credit needs of military communities. For example, the final rule codifies "military bank" as a defined term in final § ___.12, and clarifies the assessment area and evaluation approach to military banks in final §§ ___.16(d) and ___.21(a)(5), respectively.⁶⁴ In addition, the agencies are specifying in final § ___.28(d) that violations of the Military Lending Act

and Servicemembers Civil Relief Act may constitute discriminatory or other illegal credit practices that may adversely affect a bank's CRA performance. More generally, the agencies believe that many bank activities that serve the military community may receive community development consideration under the final rule. For further discussion of these provisions, see the section-by-section analyses of §§ ___.12, ___.16(d), ___.21(a)(5), and ___.28(d).

The agencies appreciate comments encouraging the agencies to coordinate with States, the CFPB, and other Federal regulators to improve consistency and efficiency of CRA examinations, and the agencies note that they currently, and will continue to, coordinate with other regulators when appropriate on CRA examinations. Further, the agencies are not able to extend the CRA regulations to cover nonbank lenders and credit unions. Such an expansion is outside the scope of this rulemaking and the agencies' current authority.

In response to comments regarding the length of the comment period, the agencies note that the NPR's comment period was 90 days, which is consistent with the requirements of the Administrative Procedure Act and provided sufficient time for public consideration and comment, as demonstrated by the number of detailed and thoughtful comments the agencies received on the proposal.

One of the objectives of the CRA proposal was to tailor performance standards to account for differences in bank size, business models, and local conditions. The agencies have carefully considered commenter feedback, and while the agencies believe the proposal provided flexibility to accommodate institutions with different business models, the agencies have made various changes in response to commenter feedback to provide additional flexibility in the final rule as outlined in the section-by-section analyses in section IV of this **SUPPLEMENTARY INFORMATION**. The agencies also note the final rule retains the strategic plan option for banks to adjust the performance tests or weighting based on their business model.

After carefully considering commenter suggestions on how to encourage reinvestment activity through rigorous evaluations and standards, the agencies are declining to adopt these specific commenter recommendations. The agencies believe the final rule's evaluation framework is appropriately rigorous and encourages reinvestment activity, while maintaining flexibility and allowing room for consideration of

⁶⁴ See also 12 U.S.C. 2902(4).

performance context. The agencies have considered the views from some commenters raising concerns on the potential negative impacts of the use of metrics and data in the proposal. As discussed further in section IV of this **SUPPLEMENTARY INFORMATION**, the agencies believe the use of metrics and data in the final rule is appropriately tailored to encourage, rather than deter, reinvestment in hard to serve areas. While the agencies appreciate commenters' suggestions on additional methods to encourage activities and investments at the local level, the agencies are declining to adopt these recommendations and believe the final rule adequately evaluates activities and investments in underserved and native communities. The agencies appreciate the comments highlighting the importance of performance context in CRA examinations, and the agencies are retaining the use of performance context in the final rule, as explained in the section-by-section analysis of § _____.21(d).

The agencies appreciate commenters' suggestions to address appraisal bias, and the agencies note that if such bias were found to evidence discrimination by an institution evaluated under CRA, the agencies may consider this as the basis for a downgrade as discussed in the section-by-section analysis of § _____.28.

The agencies believe that the NPR adequately explained the agencies' rationale for the proposed changes. The NPR contains detailed analysis of the current CRA regulations, the need for modernization, and an in-depth review of the proposed rule and alternatives the agencies considered, which are all supported by extensive data.

The agencies acknowledge that commenters provided general comments raising legal concerns with the proposal. The agencies note that the CRA authorizes the agencies to adopt regulations to carry out the purposes of the statute,⁶⁵ and requires the agencies to assess the institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of the bank.⁶⁶ The final rule furthers the purposes of the CRA and is consistent with the agencies' rulemaking authority. The agencies also considered the points raised by the commenter questioning the FDIC Board's authority but find no such impediment to adoption of the final rule. Legal issues concerning particular

aspects of the proposal are discussed in the section-by-section analysis in section IV of this **SUPPLEMENTARY INFORMATION**.

In response to comments regarding lookback reviews, the agencies often do reviews of their examinations after implementation of revised or new rules. While the agencies will keep these recommendations in mind, the agencies are not committing to adopt such recommendations in a specific timeframe or through a specified method. Regarding the development of tools, including for small banks, as noted in section I of this **SUPPLEMENTARY INFORMATION**, the agencies expect to develop various materials for banks including data reporting guides, data reporting templates, and technical assistance to assist banks in understanding supervisory expectations with respect to the final rule's performance evaluation standards and data reporting requirements. The agencies will continue to explore other tools to provide transparent information to the public, improve efficiency, and reduce burden.

B. General Comments Regarding the Agencies' CRA Modernization Objectives

As noted in section I of this **SUPPLEMENTARY INFORMATION**, the agencies' updates to their CRA regulations in this final rule are guided by eight objectives. These objectives were set out in the NPR, and some general comments received on the objectives are summarized below. Throughout this **SUPPLEMENTARY INFORMATION**, the agencies provide additional information and discussion regarding the ways in which this final rule accomplishes the objectives, including in the section-by-section analysis in section IV.

The Agencies' Proposal, Comments Received, and the Final Rule

Strengthen the achievement of the core purpose of the statute. As provided for in the statute, the CRA states that "[i]t is the purpose of this chapter to require each appropriate Federal financial supervisory agency to use its authority when examining financial institutions, to encourage such institutions to help meet the credit needs of the local communities in which they are chartered consistent with the safe and sound operation of such institutions."⁶⁷ The CRA requires the agencies to "assess the institution's record of meeting the credit needs of its entire community, including low- and

moderate-income neighborhoods, consistent with the safe and sound operation of such institution."⁶⁸

Commenter feedback on this objective included: support for updating the CRA regulations to achieve this purpose; that CRA modernization should result in a net increase in the quantity and quality of financial products and services available in low- and moderate-income areas; and, that the burden is on the agencies to demonstrate that modernization efforts would meet these baseline goals for reform. Additional commenter feedback included: that the sole criterion for extending CRA consideration to a business activity should be its direct, significant, and exclusive benefit to low- and moderate-income individuals; that by ignoring race during CRA exams, the agencies' proposal falls far short of this objective; and that to achieve the goal of serving communities with the greatest needs, the agencies must maintain a balance between the qualitative and quantitative aspects of the tests and, specifically, to align the twin tracks of CRA compliance and CDFI certification.

The agencies believe that the final rule updates the CRA regulations to strengthen the achievement of the core purpose of the statute. The agencies believe the final rule accomplishes this in various ways, for example, by: establishing a tailored and rigorous approach for the performance tests used to assess a bank's record of meeting the credit needs of its entire community; evaluating the responsiveness of certain bank's credit products and deposit products, including an impact and responsiveness review for community development activities; and including community development definitions that reflect an emphasis on activities that are responsive to community needs, especially the needs of low- and moderate-income individuals and communities. With respect to a commenter's assertion that the agencies should not ignore race during CRA examinations, the agencies note that the final rule retains the conditions that facility-based assessment areas are prohibited from reflecting illegal discrimination and must not arbitrarily exclude low- or moderate-income census tracts. Additionally, banks' performance under the CRA can be adversely affected by evidence of discriminatory or other illegal credit practices, including violations of ECOA and the Fair Housing Act. The agencies also believe the final rule appropriately balances the qualitative and quantitative aspects of the performance tests by

⁶⁵ See 12 U.S.C. 2905.

⁶⁶ 12 U.S.C. 2903(a)(1).

⁶⁷ 12 U.S.C. 2901(b).

⁶⁸ 12 U.S.C. 2903(a)(1).

incorporating standardized metrics and benchmarks in several of the performance tests, and retaining the ability for the agencies to consider performance context.

Adapt to changes in the banking industry, including the expanded role of mobile and online banking. Many commenters expressed general support for this objective with several of these commenters noting that now is the time to update the CRA regulations, given advances in banking technology. A few of these commenters also stated that the CRA has not kept up with the way consumers expect to use technology to access financial products and services and that the current CRA regulations and guidance do not recognize the wide diversity in business practices of banks or the changes in the financial services industry that have occurred since the CRA was enacted in 1977.

While some commenters believed the agencies met this objective, particularly in response to the expanded role of mobile and online banking, other commenters did not believe the proposal sufficiently met the objective, noting: efforts to modernize the CRA regulations should account for current and future ranges of banking and financial service business models; the NPR emphasizes physical bank branches, which the commenter asserted will require the agencies to update the CRA rule once digital banking becomes more common; the proposal may adversely impact how banks are able to respond to innovations in the marketplace, explaining that banks should have the ability to comply with the letter and spirit of the CRA within their chosen business models; the agencies should request additional authority from Congress to maintain the integrity and vibrancy of the CRA; and, CRA modernization must recognize and address the critical importance of digital equity for creating opportunities and upward mobility for low- and moderate-income, minority, and rural communities. Also, a commenter stated that adapting to advances in banking technology should be the one and only objective of CRA reform, and that the other seven objectives can be accomplished within the current regulatory framework and through more effective examinations.

The agencies believe that the final rule takes into account changes in the banking industry. For example, evaluating retail lending outside of facility-based assessment areas accounts for current and future ranges of banking business models. The agencies also believe that the final rule strikes the appropriate balance by maintaining the

importance of physical branches, while including consideration of digital and other delivery systems for large banks in recognition of the trend toward greater use of online and mobile banking. The section-by-section analysis provides additional discussion regarding the agencies' decision to maintain the importance of physical branches in this final rule. See section IV of this

SUPPLEMENTARY INFORMATION.

Provide greater clarity and consistency in the application of the CRA regulations. Some commenters expressed general support for this objective, with a commenter stating, for example, that the CRA regulations and supervision have become overly complex and unpredictable. Another commenter asserted that the proposal promotes this objective by establishing a framework that would lead to many positive changes but asserted that certain revisions to the proposal are required to effectively meet the objective.

The agencies believe that the final rule meets this objective in several ways, including, for example, by clarifying eligibility requirements for community development activities, providing that the agencies will maintain a publicly available illustrative list of non-exhaustive examples of qualifying activities, and updating certain performance tests to incorporate standardized metrics, benchmarks, and thresholds and performance ranges, as applicable.

Better tailor performance standards to account for differences in bank size, business models, and local conditions, and better tailor data collection and reporting requirements and use existing data whenever possible. Commenter sentiments on this objective included support for tailoring the performance standards and data requirements of the final rule, as well as concerns that the agencies' proposal failed to meet these objectives. The agencies believe the final rule tailors the performance standards based on bank size, business models, and local conditions in multiple ways. For example, small banks may continue to be evaluated under the Small Bank Lending Test, unless they opt into the Retail Lending Test; and intermediate and large banks, which have more resources than small banks, will be evaluated under the Retail Lending Test. The final rule also tailors data collection and reporting requirements because, as further explained in the section-by-section analysis of § ____.42, the new data collection and maintenance requirements in the final rule do not apply to small and intermediate banks,

and certain new requirements apply only to large banks with more than \$10 billion in assets.

Promote transparency and public engagement. Commenter feedback on this objective included statements that the CRA regulations must enhance community participation so that CRA activity is tied to community needs, and concerns that the proposal may not expand community participation. The agencies believe the final rule advances this objective. For example, as explained in more detail in the section-by-section analysis of § ____.46, the final rule specifically provides a process whereby the public can provide input on community credit needs and opportunities in connection with a bank's next scheduled CRA examination. Further, the strategic plan provision provides an opportunity for the public to provide input on a bank's strategic plan. See the section-by-section analysis of § ____.27.

Confirm that the CRA and fair lending responsibilities of banks are mutually reinforcing. The agencies received an array of comments on this objective. Some commenters, for example, asserted that robustly enforcing current and future CRA requirements relating to race and ethnicity, in addition to other relevant Federal, State, and local laws and regulations, is essential to addressing racial and ethnic inequality. Many commenters asserted that greater coordination between CRA examinations and fair lending examinations is needed, including, for example, through development of a CRA examination racial discrimination assessment that would identify disparate trends, such as in marketing, originations, pricing and terms, default rates, and collections. In turn, these commenters indicated that any adverse findings from this assessment should trigger and support fair lending examinations. A few commenters indicated that such CRA discrimination assessments should include an affordability analysis and an analysis of the quality of lending for all major product lines that includes, for example, a review of delinquency and default rates. Other commenters asserted that, in CRA examinations, the agencies should assess whether banks employ discriminatory algorithm-driven models or other assessment criteria that disproportionately screen out low- and moderate-income and minority consumers. Additional commenters indicated that, likewise, when a fair lending examination is pending, appropriate CRA follow-up activity and corrective action must ensue once it has concluded.

Several commenters suggested incorporating additional information related to discrimination into banks' CRA examinations. In this regard, a few commenters noted that public information about fair lending examinations included in CRA performance evaluations has typically been cursory. Several commenters specified that the agencies should use race-based HMDA data and, once available, race-based section 1071 data as a screen in CRA examinations for fair lending reviews. Some commenters suggested that the agencies should consider evidence of discrimination obtained by State and local agencies.

On fair lending examinations specifically, commenter feedback included: that the agencies should bolster fair lending reviews accompanying CRA exams for banks that perform poorly in the HMDA data analysis of lending by race; that fair lending examinations should solicit and rely on feedback from all relevant Federal and State agencies, as well as community group stakeholders; that both section 1071 data and HMDA data by race should be utilized in bank fair lending examinations; that fair lending examinations should include a quantitative analysis of lending to minority individuals and communities and incorporate an analysis of access to services; and that disparate impact related to climate change should be incorporated into the existing fair lending supervisory framework.

The agencies reiterate their view that CRA and fair lending requirements are mutually reinforcing. Both regimes recognize the importance of ensuring that the credit markets are inclusive. Accordingly, and as noted above and discussed further in the section-by-section analysis of § ____.16, the final rule retains the provisions that delineations of a bank's facility-based assessment areas are prohibited from reflecting illegal discrimination and must not arbitrarily exclude low- and moderate-income census tracts. As discussed further in the section-by-section analysis of § ____.23, the agencies are specifying in the final rule that all special purpose credit programs under ECOA can be a type of responsive credit program. As discussed further in the section-by-section analysis of § ____.28, the agencies are also retaining the provision that allows downgrading a bank for discriminatory or other illegal credit practices. For more information and discussion regarding the agencies' consideration of comments recommending adoption of additional race- and ethnicity-related provisions in the final rule, see section III.C of this

SUPPLEMENTARY INFORMATION. Moreover, although the agencies appreciate suggestions to enhance the rigor of fair lending examinations, such examinations are outside the scope of this rulemaking. The agencies are nevertheless committed to upholding their regulatory responsibilities for both fair lending and CRA examinations, and the agencies will seek to coordinate those examinations where practicable.

Additionally, and in furtherance of the agencies' objective to promote transparency, as discussed in the section-by-section analysis of § ____.42(j), the final rule requires the agencies to provide additional information to the public for large banks related to the distribution by borrower income, race, and ethnicity of the bank's home mortgage loan originations and applications in each of the bank's assessment areas. This disclosure would leverage existing data available under HMDA. As discussed in the section-by-section analysis of § ____.42(j), providing data about borrower and applicant race and ethnicity in this disclosure would have no independent impact on the conclusions or ratings of the bank and would not on its own reflect any fair lending finding or violation. Instead, this provision of the final rule is intended to enhance the transparency of information available to the public.

Promote a consistent regulatory approach that applies to banks regulated by all three agencies. Commenter feedback on this objective included support for a coordinated interagency approach to CRA modernization and a unified CRA rule, with a commenter stating that the CRA's purpose is more fully realized when the agencies work in concert. Some commenters expressed support for coordination between Federal and State CRA regulatory requirements and between Federal and State agencies for CRA exams.

The agencies appreciate these comments, believe the final rule meets this objective, and will continue to coordinate their implementation of the final rule as appropriate.

C. General Comments Regarding the Consideration of Race and Ethnicity in the CRA Regulatory Framework

Comments Received

The agencies received many comments regarding consideration of race and ethnicity in the CRA regulatory and supervisory framework from a wide range of commenters. General comments on this topic are summarized below, in this section of the **SUPPLEMENTARY**

INFORMATION. Furthermore, the agencies received comments regarding the consideration of race and ethnicity with respect to the agencies' proposed approach to an array of specific topics, such as: bank size categories;⁶⁹ assessment areas;⁷⁰ the Retail Lending Test;⁷¹ the Retail Services and Products Test, including the consideration of special purpose credit programs;⁷² affordable housing;⁷³ economic development;⁷⁴ activities with MDIs and CDFIs;⁷⁵ disaster preparedness and climate resiliency;⁷⁶ impact factors;⁷⁷ data on race and ethnicity in the CRA regulatory framework;⁷⁸ discriminatory or other illegal practices;⁷⁹ bank applications;⁸⁰ public files;⁸¹ and public engagement.⁸² The agencies have carefully considered this commenter feedback in developing the final rule.

Comments relating to specific regulatory provisions of the agencies' proposal and the final rule, referenced above, are discussed in detail in the section-by-section analyses of the specific provisions on which commenters shared their views. Those discussions cross-reference this section of the **SUPPLEMENTARY INFORMATION** where appropriate.

General comments. Many commenters providing input on the consideration of race and ethnicity under the CRA asserted that the agencies' proposal represented a missed opportunity to make racial equity a central focus of the CRA and to maximize what some commenters viewed as the statute's potential impact on advancing minority

access to lending, investment, and services through the mainstream financial system. Most of these commenters stated that the CRA was enacted as a response to the history of redlining, other systemic discrimination, and structural racism, and that the agencies' current and proposed CRA regulations do not adequately address the need to advance racial equality, reduce racial wealth and homeownership gaps, and address intergenerational poverty in minority communities. In this regard, commenter feedback included that there has been little progress in closing the racial wealth gap since the enactment of the CRA, and that the racial wealth gap has actually worsened since that time. Commenter feedback also included that approximately 98 percent of banks pass their CRA examinations and that expanded consideration of race and ethnicity would be appropriate to increase the rigor of CRA examinations. Additional views included that the agencies should use the CRA to broaden access to credit for racial and ethnic minorities in much the same way that the statute has broadened access to credit for low- and moderate-income individuals and communities.

Some of these commenters also urged greater consideration of race in a modernized CRA evaluation framework due to racial inequality related to land use policies, and unjust and inequitable lending practices, all of which, these commenters indicated, have contributed to persistent disparities in home ownership rates, wealth accumulation, and educational and health outcomes for racial and ethnic minorities. In this regard, some commenters drew attention particularly to the lack of affordable housing opportunities for racial and ethnic minorities in metropolitan and rural communities alike. For instance, one commenter asserted that racial and ethnic minorities who are more likely to live in low-cost neighborhoods as part of the legacy of historical residential segregation and decades of discriminatory real estate practices are not adequately served due to unmet demand for low-cost housing, including but not limited to small-dollar home mortgage loans. In addition to the housing concerns, another commenter asserted that low-income minority communities disproportionately do not have access to the banking services and products that they need to build wealth, and further stated that not requiring banks to better address these needs leads to increased potential for predatory lending and reduced wealth

in these communities. Some commenters also asserted that robustly enforcing current and future CRA requirements relating to race and ethnicity, in addition to other relevant Federal, State, and local laws and regulations, is essential to addressing racial and ethnic inequality.

A few commenters asserted that explicit consideration of race and ethnicity in the CRA evaluation framework would provide a buffer against displacement of minority consumers, which these commenters indicated leads to the loss of important local resources, such as healthcare and social services. In this regard, commenter feedback included: advocating for a greater focus on loans to minority consumers and not simply loans in minority communities, where the loans might be made largely to white consumers; an assertion that banks' lending practices in connection with minority consumers and minority communities were impacted by the lack of diversity among bank employees, particularly at senior and executive levels; an assertion that all banks should be positioned to work with non-English speaking consumers; and a recommendation that banks be given consideration for offering linguistically and culturally appropriate services and resources to consumers with limited English proficiency so that such consumers may access safe and affordable credit.

Some commenters suggested that the agencies adopt forms of quantitative analyses to consider race and ethnicity as part of CRA evaluations. For example, a commenter recommended that the agencies conduct periodic statistical analyses to identify areas where discrimination or ethnic and racial disparities in credit access exist. This commenter further recommended that in areas where significant disparities exist, the agencies should incorporate performance measures based on race and ethnicity into bank performance evaluations, with separate race- and ethnicity-based performance measures contributing to bank ratings on individual performance tests and overall.

On the subject of terminology, a commenter urged the agencies not to use the term "minority" in the CRA regulations but rather to use the term BIPOC (Black, Indigenous, and People of Color), which the commenter asserted better acknowledges different types of prejudice and discrimination.⁸³

⁸³ The agencies acknowledge the commenter suggestion to use the term "BIPOC" throughout the final rule but are electing to use the term

Comments on legal basis for express consideration of race and ethnicity in the CRA regulatory framework. Several commenters provided input supporting the permissibility of express consideration of race and ethnicity under the statute. Some of these commenters asserted that the CRA is a civil rights law and that, accordingly, the agencies have authority to expressly consider race and ethnicity in their CRA regulations to address redlining and other racial discrimination in banking. Moreover, several commenters stated that addressing racial inequities is a core "remedial" purpose of the CRA as part of a "suite" of laws enacted to address racial inequities in housing and credit. A few commenters pointed to the CRA's focus on encouraging banks to serve their "entire community"⁸⁴ suggesting that the agencies should therefore focus specifically on the minority constituencies who are part of the entire community in evaluating each bank's CRA performance. Another commenter provided legal analysis arguing that the agencies could incorporate express consideration of race and ethnicity in CRA regulations in various ways that the commenter stated were consistent with requirements applicable to race-based government action under the Equal Protection Clause of the U.S. Constitution. Relatedly, the commenter indicated that, to satisfy constitutional requirements and appropriately target the effects of discrimination, the agencies should conduct and periodically update a study to determine with specificity where, and regarding which financial products, discrimination continues to have an impact. Other commenters asserted that express references to race in the statute, such as the provision allowing investments with MDIs to count for CRA,⁸⁵ indicate that an explicit focus on race is within the purview of the CRA.

Conversely, a few commenters cautioned against expanding consideration of race and ethnicity in the CRA regulatory framework due to legal concerns. Some of these commenters expressed their perspective that the law is limited in its capacity to address racial equity, even though they view the CRA as a civil rights law and acknowledge that racial equity is central to equal opportunity, social cohesion, and prosperity. Another commenter

"minority," which is used expressly in the CRA statute, and to clarify, where practicable, when the agencies intend to refer specifically to racial and ethnic minorities. See 12 U.S.C. 2907(b)(3).

⁸⁴ See 12 U.S.C. 2903 and 2906.

⁸⁵ See, e.g., 12 U.S.C. 2903(b).

suggested that the CRA is a race-neutral law designed to combat race-based discriminatory policies and practices. Additionally, commenter feedback included that, although structural racism is a reality, incorporating racial equity into the CRA evaluation process could lead to both legal and practical issues and undermine the valuable contribution that CRA can make to low- and moderate-income consumers and communities.

Low- and moderate-income status and race. Many commenters advocating for greater consideration of race and ethnicity under the CRA indicated that, in addition to focusing on low- and moderate-income consumers and communities, the agencies should explicitly focus on minority consumers and communities. For example, a commenter asserted that racial discrimination will persist if income categorizations continue to be used to rate bank performance without considering race. Some commenters also noted that low- and moderate-income communities and minority communities are not the same, so closing racial wealth gaps requires express consideration of race. To illustrate this point, a commenter stated that about two-thirds of low-income communities are predominantly minority, but only about one-third of moderate-income neighborhoods are predominantly minority. Another commenter similarly indicated that nearly two-thirds of low- and moderate-income households are White, while nearly 40 percent of Black households and more than half of Hispanic households are not low- or moderate-income.

Consequently, many commenters urged that racial equity should be incorporated comprehensively into the agencies' CRA regulations, including through both incentives and affirmative obligations for banks to serve racial and ethnic minority consumers, businesses, and communities. Many of these commenters asserted that doing so would have a direct, positive impact on such minorities' economic inclusion, quality of life, and health outcomes. Closing the racial wealth gap, a commenter stated, would also make the U.S. economy substantially stronger. To facilitate the incorporation of racial equity into the CRA regulations, a commenter asserted that the agencies could employ the "other targeted population" framework already provided for in the Riegle Community Development and Regulatory Improvement Act's definition of "targeted populations," which the commenter explained can include either individuals who are low-income or

others who "lack adequate access to Financial Products or Financial Services in the entity's Target Market," to include certain minority groups.

Final Rule

The agencies have considered and appreciate the many comments asserting that the agencies should incorporate additional regulatory provisions regarding race and ethnicity into the CRA regulatory and supervisory framework. These comments raise important and significant considerations about financial inclusion, discrimination, and broader economic issues. The agencies have carefully considered these comments, including those summarized in this section and in the section-by-section analysis of the final rule (*see* section IV of this **SUPPLEMENTARY INFORMATION**), as well as the statutory purposes and text of the CRA. The agencies have also assessed other relevant legal and supervisory considerations, including, in particular, the constitutional considerations and implementation challenges associated with adopting regulatory provisions that expressly address race and ethnicity when implementing statutory text that does not expressly address race or ethnicity. Based upon these considerations, the agencies have determined not to include additional race- and ethnicity-related provisions other than what is adopted in this final rule and discussed in more detail throughout this Introduction and section IV of the **SUPPLEMENTARY INFORMATION**.

The agencies believe that the final rule strengthens the CRA's emphasis on encouraging banks to engage in activities that better achieve the core purpose of the CRA, and thereby meet the credit needs of their entire communities, including low- and moderate-income individuals and communities. Relatedly, the agencies continue to recognize that the CRA and fair lending requirements are mutually reinforcing, including by specifying in the final rule that special purpose credit programs under ECOA can be a type of responsive credit program, and by reaffirming that violations of the Fair Housing Act and ECOA can be the basis of a CRA rating downgrade. As noted, for example, in section III.B of this **SUPPLEMENTARY INFORMATION**, the final rule also retains the current rule's prohibition against banks delineating facility-based assessment areas in a manner that reflects illegal discrimination or arbitrarily excludes low- and moderate-income census tracts, and provides that the CRA performance of banks that engage in

discriminatory or other illegal credit practices can be adversely affected by such practices. For more information and discussion regarding how the final rule strengthens the achievement of the core purpose of the statute, and confirms that CRA and fair lending responsibilities are mutually reinforcing (*see* sections III.B and IV of this **SUPPLEMENTARY INFORMATION**).

IV. Section-by-Section Analysis

Section ____ .11 Authority, Purposes, and Scope

Current Approach and the Agencies' Proposal

Current § ____ .11 sets forth the authority, purposes, and scope of the CRA regulations. Paragraphs (a) and (c) of the section are agency-specific regulatory text, with paragraph (a) outlining the legal authority for each agency to implement the CRA and paragraph (c) providing the scope of each agency's CRA regulations. Common rule text in § ____ .11(b) provides that this part implements the CRA by establishing the framework and criteria by which the agencies assess a bank's record of helping to meet the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of the bank; and providing that the agencies take that record into account in considering certain applications.

Consistent with the current rule, proposed § ____ .11 sets forth the authority, purposes, and scope of the CRA regulations, with the authority and scope paragraphs (proposed § ____ .11(a) and (c)) including agency-specific regulatory text. Proposed § ____ .11(b) included technical, non-substantive edits to the current regulatory text, such as adding CRA's legal citation.

The OCC proposed to amend its authority section, § 25.11(a) by referencing part 25 in its entirety instead of each subpart, and by removing paragraph (a)(2), Office of Management and Budget (OMB) control number, as such information is unnecessary for regulatory text. The OCC also proposed technical edits to its scope section, § 25.11(c), to reflect the organization of the proposed common rule text.

The Board did not propose any amendments to its authority section, § 228.11(a), and proposed to amend its scope section, proposed § 228.11(c), to replace references to "special purpose banks" with "exempt banks" to avoid any potential confusion with the OCC's special purpose bank charter.

The FDIC proposed to amend its authority section, § 345.11(a), by removing paragraph (a)(2), OMB control number, as such information is unnecessary for regulatory text. The FDIC did not propose any amendments to its scope section in § 345.11(c).

Comments Received and Final Rule

The agencies did not receive comments specific to the language in proposed § _____.11(b) or the agency-specific language in proposed § _____.11(a) and (c). Therefore, the agencies are adopting § _____.11(b) as proposed, and the Board is adopting its agency-only provisions, paragraphs (a) and (c), as proposed.

The OCC adopts paragraph (a) as proposed, and paragraph (c) as proposed with technical edits. Specifically, the OCC has moved the definition of “appropriate Federal banking agency” in proposed § 25.11(c)(1)(iii) to final § 25.12 (Definitions), where it more appropriately belongs. As in the current rule and as proposed, “appropriate Federal banking agency” in the final rule means, with respect to subparts A (except in the definition of minority depository institution in § 25.12) through E and appendices A through G, the OCC with respect to a national bank or Federal savings association and the FDIC with respect to a State savings association.⁸⁶ In addition, the OCC has added Federal branches of foreign banks to paragraph (c)(1)(i), which lists the types of entities for which the OCC has authority to prescribe CRA regulations, to more accurately describe this authority. The OCC has also made minor technical edits to the listing of part 25 subparts in final paragraph (c).

The FDIC is adopting paragraph (a) as proposed and paragraph (c) with technical edits. In the proposed rule, the FDIC’s paragraph (c)(2) maintained references to current § 345.41. The FDIC is adopting paragraph (c)(2) to reflect the final rule’s new assessment area provisions. Thus, final paragraph (c)(2) provides that, for insured State branches of a foreign bank established and operating under the laws of any State, their facility-based assessment area and, as applicable, retail lending assessment areas and outside retail lending assessment area, are the community or communities located within the United States, served by the branch as described in § 345.16 and, applicable, §§ 345.17 and 345.18.

⁸⁶ Final subpart F of part 25, Prohibition Against Use of Interstate Branches Primarily for Deposit Production, applies only to certain national banks and Federal branches of a foreign bank and includes “OCC” instead of “appropriate Federal banking agency.”

Section _____.12 Definitions

In proposed § _____.12 (Definitions), the agencies proposed many terms defined in the current CRA regulations, some with substantive or technical revisions. The agencies also proposed new definitions that the agencies considered necessary to clarify and implement proposed revisions to the CRA evaluation framework, some of which reflect understandings of terms long used in the CRA evaluation framework or that are consistent with the Interagency Questions and Answers.

The agencies received numerous comments on some of these definitions. These comments and the definitions as included in the final rule are discussed below.

Affiliate

Under the current CRA regulations, the term “affiliate” means any company that controls, is controlled by, or is under common control with another company. The term “control” has the same meaning given to that term in section 2 of the Bank Holding Company Act, 12 U.S.C. 1841(a)(2), and a company is under common control with another company if both companies are directly or indirectly controlled by the same company.⁸⁷ The agencies proposed to retain their current definitions of “affiliate,” with the Board including one technical change to the definition in its regulation to add a reference to its bank holding company regulations, Regulation Y, 12 CFR part 225. Specifically, the Board proposed to define *affiliate* as any company that controls, is controlled by, or is under common control with another company. The term “control” has the meaning given to that term in 12 U.S.C. 1841(a)(2), as implemented by the Board in 12 CFR part 225, and a company is under common control with another company if both companies are directly or indirectly controlled by the same company. The FDIC and the OCC did not propose any revisions to the definition of “affiliate” in the agencies’ respective CRA regulations.⁸⁸

The agencies did not receive any comments on the proposed definitions of “affiliate” and adopt the definitions as proposed in the final rule. Accordingly, the Board is adopting the proposed definition of “affiliate” in the final rule, which will be contained solely in its CRA regulations. The FDIC and the OCC are retaining the current definition of “affiliate” in their respective CRA regulations, which

⁸⁷ See current 12 CFR _____.12(a).

⁸⁸ See current 12 CFR 25.12(a) (OCC) and 345.12(a) (FDIC).

define *affiliate* as any company that controls, is controlled by, or is under common control with another company. The term “control” has the same meaning given to that term in 12 U.S.C. 1841(a)(2), and a company is under common control with another company if both companies are directly or indirectly controlled by the same company.⁸⁹

Affordable Housing

The agencies proposed to add a definition of “affordable housing” to mean activities described in proposed § _____.13(b). See the section-by-section analysis of § _____.13(b) for a detailed discussion of affordable housing. The agencies did not receive any comments on the proposed “affordable housing” definition and adopt it as proposed in the final rule.

Area Median Income

The agencies proposed to retain the current definition of “area median income,”⁹⁰ with one conforming change to replace the term “geography” with “census tract,” but keep the same meaning (see the discussion of “census tract” in § _____.12 of this section-by-section analysis).⁹¹ Under the proposal, “area median income” would mean: (1) the median family income for the metropolitan statistical area (MSA), if a person or census tract is located in an MSA, or for the metropolitan division, if a person or census tract is located in an MSA that has been subdivided into metropolitan divisions; or (2) the statewide nonmetropolitan median family income, if a person or census tract is located outside an MSA.

The agencies did not receive any comments on the proposed “area median income” definition. However, the agencies are adopting the definition in the final rule as proposed with conforming and clarifying edits. First, in paragraph (1), the agencies have made a minor conforming change by replacing “metropolitan statistical area (MSA)” with “MSA.” Second, in paragraphs (1) and (2), the agencies have replaced the phrase “if a person” with “if an individual, family, household.” Third, in paragraph (1), the agencies have added the phrase “that has not been subdivided into metropolitan divisions” after “located in an MSA” to differentiate the first and second prongs of this paragraph. Fourth, in paragraph (2), as a conforming change, the

⁸⁹ See *id.*

⁹⁰ See current 12 CFR _____.12(b).

⁹¹ See current 12 CFR _____.12(k) (defining “geography” to mean “a census tract delineated by the United States Bureau of the Census in the most recent decennial census”).

agencies have replaced the phrase “outside an MSA” with “in a nonmetropolitan area.” Final § _____.12 defines “nonmetropolitan area” to mean any area that is not located in an MSA.

Accordingly, the final rule defines “area median income” to mean: (1) the median family income for the MSA, if an individual, family, household, or census tract is located in an MSA that has not been subdivided into metropolitan divisions, or for the metropolitan division, if an individual, family, household, or census tract is located in an MSA that has been subdivided into metropolitan divisions; or (2) the statewide nonmetropolitan median family income, if an individual, family, household, or census tract is located in a nonmetropolitan area.

Assets

The final rule includes a new definition for “assets,” not included in the proposal. This term means total assets as reported in Schedule RC of the Consolidated Reports of Condition and Income as filed under 12 U.S.C. 161, 324, 1464, or 1817, as applicable (Call Report), or as reported in Schedule RAL of the Report of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks (Report of Assets and Liabilities), as filed under 12 U.S.C. 1817(a), 3102(b), or 3105(c)(2), as applicable. Although the agencies did not propose this definition, they have added it to the final rule to clarify the intended meaning of this term in the CRA regulations.

Assessment Area

The current CRA regulations define “assessment area” to mean a geographic area delineated in accordance with 12 CFR _____.41.⁹² Current § _____.41 sets out the criteria for banks to delineate assessment areas. The agencies proposed to replace “assessment area” with three new terms in proposed § _____.12: “facility-based assessment area,” “retail lending assessment area,” and “outside retail lending area,” as these new terms are used in the proposal. These new definitions are discussed below. The agencies did not receive any comments concerning the removal of the “assessment area” definition and have removed this term in the final rule.

Bank

Under the current CRA regulations, the Board and FDIC have separate definitions for the term “bank.” Each agency defines “bank” to refer to the entities regulated by the agency for

which the agency evaluates CRA performance. The FDIC and Board did not propose changes to the current definitions of “bank” in their respective CRA regulations and received no comments on their proposed definitions of “bank.” Accordingly, the final rule retains the current definitions of “bank” in the FDIC’s and the Board’s regulations.⁹³

As such, for the FDIC, the term “bank” means a State nonmember bank, as that term is defined in section 3(e)(2) of the Federal Deposit Insurance Act (FDIA) (12 U.S.C. 1813(e)(2)), with federally insured deposits, except as defined in final § 345.11(c). The term “bank” also includes an insured State branch as defined in final § 345.11(c).

For the Board, the term “bank” means a State member bank as that term is defined in section 3(d)(2) of the FDIA (12 U.S.C. 1813(d)(2)), except as provided in final § 228.11(c)(3) and includes an uninsured State branch (other than a limited branch) of a foreign bank described in final § 228.11(c)(2). Accordingly, consistent with the Board’s current CRA regulations, the term “bank” in final § 228.12 includes an uninsured State branch (other than a limited branch) of a foreign bank that results from an acquisition described in section 5(a)(8) of the International Banking Act of 1978 (12 U.S.C. 3103(a)(8)). Also, generally consistent with the current CRA regulations, “bank” in final § 228.12 does not include banks that do not perform commercial or retail banking services by granting credit to the public in the ordinary course of business, other than as incident to their specialized operations and done on an accommodation basis.⁹⁴ This exception for banks that do not perform commercial or retail banking services aligns with the current CRA regulations, including that performing commercial and retail banking services solely “on an accommodation basis” will not qualify an entity as a “bank.”

The OCC’s current CRA regulation provides that “bank or savings association” means, except as provided in § 25.11(c), a national bank (including a Federal branch as defined in part 28) with federally insured deposits or a savings association. Further, the OCC

⁹³ The agencies’ definitions of “bank” are included in the agency-specific amendatory text, outside of the common rule text.

⁹⁴ See final § 228.12 (defining “bank” to exclude institutions described in final § 228.11(c)(3)). These institutions include bankers’ banks, as defined in 12 U.S.C. 24(Seventh), and banks that engage only in one or more of the following activities: providing cash management-controlled disbursement services or serving as correspondent banks, trust companies, or clearing agents.

regulation provides that “bank and savings association” means, except as provided in § 25.11(c), a national bank (including a Federal branch as defined in part 28) with federally insured deposits and a savings association.⁹⁵

For clarity and conciseness, the OCC proposed separate definitions of “bank” and “savings association,” without changing the substance of the current definitions. The OCC received no comments on this technical change and adopts the definitions as proposed in the final rule. As a result, in the final rule, “bank” means a national bank (including a Federal branch as defined in part 28) with federally insured deposits, except as provided in § 25.11(c); and “savings association” means a Federal savings association or a State savings association.

Bank Asset-Size Definitions

Current Approach

Under the current CRA regulations, the agencies define “small bank” to mean “a bank that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.503 billion.”⁹⁶ The agencies defined “intermediate small bank” to mean “a small bank with assets of at least \$376 million as of December 31 of both of the prior two calendar years and less than \$1,503 billion as of December 31 of either of the prior two calendar years.”⁹⁷ The agencies adjust these terms annually for inflation based on the year-to-year change in the average of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W), not seasonally adjusted, for each 12-month period ending in November, with rounding to the nearest million.⁹⁸ The current CRA regulations do not define the term “large bank,” but any bank with assets exceeding those defining an “intermediate small bank” is understood to be a large bank (otherwise referred to as a “large institution”).

The Agencies’ Proposal

The agencies proposed raising the asset-size threshold for the “small bank” definition to provide more clarity, consistency, and transparency in the

⁹⁵ See current 12 CFR 25.12(e). Pursuant to title III of the Dodd-Frank Act, and as described in footnote 2 of this SUPPLEMENTARY INFORMATION, the OCC’s CRA regulation applies to both State and Federal savings associations, in addition to national banks. The FDIC enforces the OCC’s CRA regulations with respect to State savings associations.

⁹⁶ The current asset-size threshold for a “small bank” reflects the annual dollar adjustment to the figures contained in current 12 CFR _____.12(u)(1). See current 12 CFR _____.12(u)(2).

⁹⁷ See current 12 CFR _____.12(u)(1).

⁹⁸ See current 12 CFR _____.12(u)(2).

⁹² See current 12 CFR _____.12(c).

evaluation process, and in recognition of the potential challenges associated with regulatory changes and data collection requirements for banks with more limited capacity. Under the proposal, a small bank would be a bank that had average assets of less than \$600 million in either of the prior two calendar years, based on the assets reported on its four quarterly Call Reports for each of those calendar years. The agencies also proposed to add a new definition for “intermediate bank” that would replace the current “intermediate small bank” definition. Under the proposal, intermediate bank would mean a bank that had average assets of at least \$600 million in both of the prior two calendar years and less than \$2 billion in either of the prior two calendar years, based on the assets reported on its four quarterly Call Reports for each of those calendar years. The agencies intended the proposed “intermediate bank” definition to comprise a category of banks that have meaningful capacity to engage in CRA-related activities under the proposed Retail Lending Test and conduct community development activities, but that might have more limited capacity regarding data collection and reporting requirements than large banks.

Finally, the agencies proposed to add a new “large bank” definition that would mean a bank that had average assets of at least \$2 billion in both of the prior two calendar years, based on the assets reported on its four quarterly Call Reports for each of those calendar years. This proposed definition reflects the agencies’ view that banks of this size generally have the capacity to conduct the range of activities that would be evaluated under each of the four performance tests proposed to apply to large banks.

The agencies proposed to make annual adjustments to the asset-size thresholds for all three categories of banks based on the same CPI-W inflation measure used in the current CRA regulations for small and intermediate banks.⁹⁹

As under the current CRA regulations, asset-size classification is relevant because it determines a bank’s CRA evaluation framework. Consistent with the proposal, under the final rule, large banks are evaluated under the Retail Lending Test in final § _____.22, the Retail Services and Products Test in final § _____.23, the Community Development Financing Test in final § _____.24, and the Community Development Services Test in final § _____.25. Intermediate banks are

evaluated under the Retail Lending Test in § _____.22, and either the current Intermediate Bank Community Development Test, in final § _____.30(a)(2),¹⁰⁰ or, at the bank’s option, the Community Development Financing Test in final § _____.24.¹⁰¹ Small banks are evaluated under the small bank lending test, in final § _____.29(a)(2),¹⁰² or, at the bank’s option, the Retail Lending Test in final § _____.22.

Comments Received

The agencies received numerous comments on the proposed “small bank,” “intermediate bank,” and “large bank” definitions. Given that the current and proposed definitions are interconnected, the agencies believe it is appropriate to discuss the comments collectively.

Many commenters expressed general support for the proposal to increase the asset-size thresholds for small, intermediate, and large banks. Many of these commenters indicated that the proposed thresholds are reasonable and would represent appropriate burden relief for banks that would qualify as small or intermediate banks under the proposed definitions. Several commenters stated that the proposed asset-size thresholds are appropriate to ensure that smaller banks with more limited staff and other resources are not subjected to the same performance expectations or data collection and reporting requirements as larger banks. Several other commenters supported the proposed asset-size thresholds based not only on other regulatory burden they anticipate under the proposal but also on the principle that community banks already experience significant regulatory burden unrelated to the CRA. Another commenter approved of the increased asset-size thresholds on the basis that they would permit smaller banks to expand to meet the needs of their communities without necessarily subjecting themselves to new CRA requirements that the commenter stated were likely to have onerous costs.

Many commenters specifically expressed support for increasing the asset-size threshold for a small bank to \$600 million. These commenters noted that the asset-size threshold would apply to approximately the same percentage of banks as were classified as

small banks when the agencies’ amended their CRA regulations in 2005. Several other commenters explained that the asset-size threshold increases would be a timely and welcome adjustment because of changes in the banking industry and the unprecedented growth of bank balance sheets and excess liquidity that has resulted from Federal Government stimulus in response to the COVID-19 pandemic. Another commenter indicated that raising the asset-size threshold as proposed was a timely action on the part of the agencies due to recent trends in inflation that are beyond banks’ control. One commenter stated that the current asset-size thresholds are too low and reflected prior conditions.

Many other commenters expressed opposition to the proposed asset-size threshold increases and advocated for the agencies to maintain the current thresholds. Some of these commenters stated that the proposed changes were inappropriate because reclassified banks would be subject to less rigorous performance standards and diminished agency oversight, which would minimize transparency and accountability and reduce those banks’ CRA obligations and reinvestment. Other commenters noted that raising the asset-size thresholds would result in missed opportunities for reclassified banks to expand and improve their CRA activity under more rigorous performance standards. These commenters also asserted that the proposed changes to the asset-size thresholds are not justified because banks already perform successfully under the current, lower thresholds for small, intermediate small, and large banks.

Many commenters focused on the number of banks that would be reclassified into a smaller asset-size category and the adverse effect this reclassification could have on community development financing, with a few commenters stating that increasing the small bank asset-size threshold would reduce the amount of community development activity, especially in smaller and more rural communities. Some commenters highlighted the agencies’ statement in the proposal that approximately 778 current intermediate small banks would be reclassified as small banks and 216 current large banks would be reclassified as intermediate banks.¹⁰³ These commenters expressed their belief that the reclassified banks would no longer be held accountable (or would

¹⁰⁰ In the proposal, the Intermediate Bank Community Development Test, referred to as the “intermediate bank community development evaluation,” is in proposed § _____.29(b).

¹⁰¹ See final § _____.30(a)(1).

¹⁰² In the proposal, the Small Bank Lending Test, referred to as the “status quo small bank lending test,” is in proposed § _____.29(a).

¹⁰³ See 87 FR 33884, 33924 (June 3, 2022).

⁹⁹ See current 12 CFR _____.12(u)(2).

be held accountable to a lesser degree) for community development financing activity. Many of these commenters suggested that this loss of accountability would cause significant reductions in community development financing, with some commenters citing estimated annual losses of \$1 billion to \$1.2 billion. These commenters argued that, if these forecasted losses in community development financing are remotely accurate, the change in asset-size thresholds would amount to a significant failure on the part of the agencies. Many commenters indicated that although the impact of reduced community development financing would be experienced in low- and moderate-income communities nationwide, the losses are likely to be most acute in less populated communities, such as rural, micropolitan, and small-town areas, where a substantial number of the reclassified banks are located. A few commenters specified that any loss of community development financing could adversely affect the availability of affordable housing and bank responsiveness to other important community needs.

Several commenters explained that reductions in community development financing as a result of asset-size threshold changes could adversely affect CDFIs by diminishing bank-CDFI relationships, and the flow of capital from banks to CDFIs—especially CDFIs located in smaller or rural communities. Noting that the agencies stated in the proposal that raising the asset-size thresholds would impact only two percent of bank assets in the banking system, some commenters indicated that a reclassified bank may be the only lender or one of a small number of banks with any presence in a geographic area.

Some commenters stated that reclassifying some current large banks as intermediate banks could negatively impact the availability of banking services in low- and moderate-income and rural communities because the proposed Retail Services and Products Test and Community Development Services Test would only apply to large banks. Several other commenters stated that reclassifying a large bank as an intermediate bank would effectively eliminate agency evaluation of applicable service considerations such as the operation of bank branches in their communities.

A few commenters expressed concerns about the impact of the agencies' proposal to revise asset-size thresholds on racial or ethnic minority communities. A commenter stated that

a number of Black communities would be significantly adversely impacted by the reclassification of certain large banks as intermediate banks and certain intermediate small banks as small banks. The commenter asserted that these changes would reduce these banks' incentives to engage with Black communities, given the specific performance tests that would be applicable to small banks and intermediate banks under the agencies' proposal. Another commenter raised concerns that small banks and intermediate banks would not be subject to a retail services test. In the commenter's view, an evaluation of retail services is critical to ensure that bank branches are located in both low- and moderate-income communities and minority communities.

A few commenters stated that raising the large bank asset-size threshold could result in diminished bank investment in New Markets Tax Credits (NMTC) and other community tax credit investments given that, under the proposal, intermediate and small banks would not have corresponding community development requirements. These commenters also indicated that relieving banks of these requirements could negatively impact overall demand for community tax credit investments, for which the majority of investors are CRA-motivated banks.

Many of the commenters opposing the proposed asset-size threshold increases asserted that regulatory relief for banks was not a sufficient justification for changes that would adversely impact local communities. Several commenters argued that the potential burden on banks from being classified as a larger institution would not outweigh the need for accountability and equity. Another commenter indicated that the agencies did not produce estimates or data indicating that the proposed regulatory approach would be so prohibitively burdensome that significant increases in asset-size thresholds were necessary.

Several other commenters stated that the agencies' proposal should, at a minimum, provide for the same range of community development financing activity for all current intermediate small banks and large banks as under the current CRA regulations. A commenter asserted that the proposal goes backwards with no justification for how the reduction in compliance burden for banks reclassified as smaller banks would offset the loss of reinvestment activity from a public benefits perspective. Some commenters added that the impacted banks are engaging in community development under the current asset-size thresholds

without any apparent deleterious impacts. Other commenters asserted that maintaining the current asset-size thresholds would be more consistent with the agencies' goal of strengthening the CRA framework.

A few commenters suggested that the current asset-size thresholds could remain in place and continue to be adjusted for inflation. A commenter indicated that, based on the application of inflation adjustments to the current asset-size thresholds, the proposed small bank asset-size threshold was too large in comparison. The commenter explained that if the agencies' proposed asset-size thresholds for small, intermediate, and large banks were adjusted for inflation, the asset-size thresholds would be approximately \$375 million for small banks and approximately \$1.5 billion for large banks.

A commenter opposed the proposed asset-size threshold changes on the grounds that the thresholds for intermediate and large banks are arbitrary and not based on any relevant data or analysis. The commenter also asserted that the proposed intermediate bank threshold is similarly unsupported and would subject reclassified intermediate banks to considerably increased compliance costs without commensurate benefit. Another commenter stated that the agencies did not provide documentation supporting the increase in the proposed asset-size thresholds.

Alternate asset-size thresholds. Many commenters recommended that the agencies adopt asset-size thresholds for small, intermediate, and large banks that are higher than those proposed. These commenters suggested asset-size thresholds of \$750 million to \$5 billion for intermediate banks and from \$2.5 billion to \$20 billion for large banks. Commenters asserted that higher asset-size thresholds are necessary to provide regulatory relief and limit the significant compliance burdens that the agencies' proposal would otherwise impose on smaller banks. A commenter stated that increasing the small bank asset-size threshold to \$750 million would avoid placing unnecessary regulatory burden on smaller mission-driven institutions. Another commenter stated that regulatory burden considerations justified a variety of small bank asset-size thresholds of up to \$3 billion. Another commenter stated that it lacked the financial and human resources to monitor performance under the proposed Retail Lending Test and requested a significantly higher asset-size threshold for large banks. Other commenters suggested asset-size

thresholds for large banks ranging from \$3.3 billion to \$20 billion, based on compliance burden as well as inflation adjustments.

A few commenters specifically drew attention to smaller banks' resource capacities in advocating for higher asset-size thresholds. A commenter suggested an asset-size threshold of \$750 million for small banks and an asset-size threshold of \$3 billion for large banks based on resource capacity. Another commenter expressed support for a large bank asset-size threshold of \$3 billion. Several other commenters recommended an asset-size threshold of \$1 billion for small banks and an asset-size threshold of \$5 billion for large banks to better reflect resource capacity and the ability to comply with the proposed performance test requirements. A commenter suggested that a \$1 billion asset-size threshold for small banks would prove beneficial to many community banks located in rural areas with few low- and moderate-income census tracts. A few commenters suggested that asset-size thresholds of \$1 billion and \$10 billion for small and large banks, respectively, would better reflect bank capacity and compliance resource availability. Another commenter stated that an asset-size threshold cap on intermediate banks of \$3 billion would be a better representation of the median large bank in its State and region. One commenter argued that setting the asset-size thresholds for small banks and intermediate banks at \$1 billion and \$3 billion, respectively, would provide significant regulatory relief for smaller banks and free up resources for the agencies to focus on the largest banks and banks with poor CRA performance. Similarly, another commenter stated that any bank with assets between \$1 billion and \$15 billion should be classified as an intermediate bank to reduce regulatory burden.

A commenter cited rapid growth in bank balance sheets due to bank consolidation and monetary and fiscal policy as reasons to further raise the small and intermediate bank asset-size thresholds, to a small bank threshold of \$750 million and a large bank threshold of \$2.5 billion. Another commenter cited similar reasons in support of a \$1 billion asset-size threshold for small banks. Another commenter suggested a small bank asset-size threshold ranging anywhere between \$2 billion and \$5 billion and a large bank asset-size threshold of \$10 billion due to the growth in bank balance sheets.

Further, some commenters stated that the asset-size thresholds should better reflect the distribution of small,

intermediate, and large banks when these categories were originally established. Many commenters stated that, to maintain a similar percentage distribution of banks in the intermediate bank category to the distribution of intermediate small banks when that category was established in 2005, an intermediate bank should be any bank with assets between \$600 million and \$3.3 billion. Another commenter agreed that the agencies should attempt to maintain a similar percentage distribution of intermediate-sized institutions as in 2005. The commenter also indicated that a large bank threshold of \$5 billion would likewise achieve this outcome. A different commenter suggested that any bank with assets between \$1 billion and \$5 billion should be categorized as an intermediate bank to adjust for inflation since the asset-size thresholds were originally set.

Some commenters noted that setting the intermediate bank asset-size threshold at \$10 billion would serve to eliminate the proposal's distinction between two tiers of large banks.¹⁰⁴ For example, a commenter stated that a \$10 billion asset-size threshold for large banks would eliminate the confusion associated with the agencies' proposal to designate two tiers of large banks in which only the largest large banks would have comprehensive data collection and reporting requirements. Another commenter suggested that the agencies create an additional "large community bank" evaluation tier for banks with \$2 billion to \$10 billion in assets; alternatively, the commenter suggested that the agencies expand the intermediate bank tier to banks with assets of \$10 billion or less.

Similarly, several commenters stated that the agencies should consider raising the asset-size threshold for large banks because the proposal is based on an incorrect perception that a bank with assets slightly over \$2 billion is the peer of a significantly larger regional bank with \$50 billion in assets—or an even larger institution with a nationwide presence. A few commenters also noted that financial regulators often consider a bank with less than \$10 billion in assets a "community bank" for supervisory purposes. A few other commenters concurred that banks with assets between \$2 billion and \$10 billion are typically considered to be community banks. Another commenter, recommending a large bank asset-size

threshold of \$5 billion, asserted that raising the asset-size threshold for large banks would minimize unfair comparison of larger intermediate-size institutions with significantly larger banks. One other commenter suggested raising the intermediate bank asset-size threshold so that more banks would have the option of being evaluated under the status quo community development test, as the agencies proposed for intermediate banks (referred to in the proposal as the intermediate bank community development evaluation).

A few commenters suggested that the agencies conform increased asset-size thresholds with other existing thresholds. A commenter stated that the agencies should set the asset-size threshold for small banks at \$750 million to conform with the U.S. Small Business Administration's (SBA) size standard for small banks.¹⁰⁵ The commenter also stated that the asset-size threshold for intermediate banks should be increased to \$2.5 billion, an amount that would more closely approximate the Board's threshold of \$3 billion to distinguish between small and large bank holding companies. Several commenters stated that the small bank asset-size threshold should be \$1 billion, to be consistent with the proposed definition of "community bank" in the 2012 FDIC Community Banking Study.¹⁰⁶ A few other commenters suggested that large banks should have assets of \$10 billion or more to maintain consistency with regulatory definitions in the Dodd-Frank Act. Another commenter suggested that the agencies follow the National Credit Union Administration's (NCUA) position that institutions that it supervises are "large" when they have greater than \$15 billion in assets.

Final Rule

The agencies considered commenters' concerns and recommendations related to the proposed asset-size thresholds. As a part of that process, the agencies observed that commenters did not coalesce around a particular asset-size framework that would address their respective concerns related to the proposed asset-size framework. In fact, the opposite was true, as commenters' recommendations as to how to structure the asset-size framework were varied and frequently unique. The agencies conclude that the myriad comments and recommendations reflect an absence of

¹⁰⁴ The proposed and final rule apply certain aspects of the final rule to large banks with assets greater than \$10 billion. See the section-by-section analysis discussion of §§ _____.22 and _____.42.

¹⁰⁵ See *infra* note 113.

¹⁰⁶ See FDIC, "Community Banking Study" (Dec. 2012), <https://www.fdic.gov/resources/community-banking/report/2012/2012-cbi-study-full.pdf>.

consensus around an asset-size framework that would address all, or a majority of, the commenters' concerns. The agencies continue to believe that the proposed framework strikes the appropriate balance between recognizing the capacity differences between banks of varying size and maintaining a strong CRA evaluation framework that benefits communities served by banks of all sizes and capacities.

The agencies also considered commenter input that the proposed asset-size thresholds are arbitrary and not based on relevant data analysis. The agencies believe increasing the asset-size threshold for small banks to \$600 million is appropriate based on an analysis of industry asset data, current CRA asset-size thresholds, supervisory experience with those thresholds, and bank asset-size standards employed by other agencies. First, as discussed in the proposal, the agencies analyzed Call Report and the FDIC's Summary of Deposits data to estimate how the proposed asset-size thresholds would redistribute banks throughout the proposed categories. The agencies estimated that the proposed change to the small bank asset threshold would result in approximately 778 banks, representing two percent of all deposits, transitioning from the current intermediate-small bank category to the proposed small bank category. The agencies further estimated that the proposed increase in the large bank asset-size threshold would result in approximately 216 banks representing approximately two percent of all deposits transitioning from the current large bank category to the proposed intermediate bank category.¹⁰⁷ The agencies communicated the findings of this analysis as a part of the proposal to ensure that the public was apprised of the potential redistribution of banks across the proposed framework.¹⁰⁸ Second, the agencies, over the multi-decade period since the CRA was enacted, have developed supervisory experience related to the asset-size thresholds and an understanding of the capacity of banks in each class of bank to engage in CRA activity, and incorporated that understanding into the consideration of the proposed asset-size thresholds. Based on this supervisory experience, the agencies calibrated the level of CRA requirements to bank size, consistent with the

statutory purpose and the agencies' objective of encouraging banks to meet the credit needs of their communities. Third, the agencies considered adopting the SBA's "small bank" definition, but ultimately elected to adopt the \$600 million asset-size threshold because it is better aligned with the CRA's policy goals, and the agencies believe that banks with assets between \$600 and \$850 million have the capacity to engage in community development activity.

The agencies believe that the asset-size framework in the final rule strengthens the agencies' implementation of the CRA statute and furthers the CRA statute's emphasis on assessing the records of banks of all asset sizes in meeting the credit needs of their entire communities, including low- and moderate-income neighborhoods. The final rule also implements the CRA statutory provisions that focus specifically on MDIs, WDIs, and LICUs.¹⁰⁹ As discussed above, CRA and fair lending laws such as ECOA and the Fair Housing Act are mutually reinforcing. Specifically, under the CRA, the agencies assess banks' records of helping meet the credit needs of the entire community,¹¹⁰ while fair lending laws serve to identify and address lending discrimination for protected classes, such as race and ethnicity.

Under the final rule, intermediate banks and small banks may receive additional consideration at the institution level for activities with MDIs, WDIs, and LICUs, which, as noted, reflects CRA statutory provisions. For example, under the final rule a small or intermediate bank can receive consideration for a capital investment, loan participation or other venture with an MDI. An intermediate bank or small bank that opts into the Retail Services and Products Test may receive CRA consideration for bank credit products and programs that are conducted in cooperation with MDIs and Special Purpose Credit Programs as examples of credit products and programs that are responsive to the needs of the communities in which the bank operates, including the needs of low- and moderate-income individuals, families, and households; small businesses; and small farms. The final rule also retains the current prohibition against banks, including intermediate banks and small banks, delineating

facility-based assessment areas in a manner that reflects illegal discrimination or that arbitrarily excludes low- and moderate-income census tracts; and retains the current provision regarding discriminatory or other illegal credit practices that can adversely affect a bank's CRA performance.

Further, both intermediate banks and small banks continue to have retail lending requirements. Under the final rule, intermediate banks are evaluated under the Retail Lending Test in final § ____.22, and either the Intermediate Bank Community Development Test in final § ____.30(a)(2) or, at the bank's option, the Community Development Financing Test in final § ____.24.¹¹¹ Likewise, under the final rule, small banks are evaluated under the Small Bank Lending Test, in final § ____.29(a)(2) or, at the bank's option, the Retail Lending Test in final § ____.22.¹¹²

Additional bank asset-size categories. A few commenters suggested that the agencies create a new category for banks with assets much higher than the proposed \$2 billion large bank asset-size threshold and apply the most demanding performance tests or data reporting and collection requirements solely to those banks. According to commenters, including a category for the largest banks would help the agencies to better tailor CRA requirements for smaller large banks. A commenter explained that the agencies could impose the most demanding requirements on "super large" banks with greater than \$50 billion in assets. Similarly, another commenter suggested the creation of a "mega bank" category for banks with assets greater than \$100 billion on which the agencies could impose unique performance test structures and standards. Another commenter questioned why the agencies did not apply the large bank requirements exclusively to banks with greater than \$100 billion in assets, a decision that according to the commenter, would capture 75 percent of total industry assets. One other commenter recommended that the agencies combine the proposed intermediate bank and large bank categories, so that there would only be categories for small and large banks in the final rule.

The agencies considered the commenters' concerns but are not adopting additional asset-size categories

¹⁰⁷ The agencies based these estimates on average assets from 2020 and 2021 Call Report data and the FDIC's 2021 Summary of Deposits data. These statistics included some banks with no CRA obligations, such as banker's banks.

¹⁰⁸ See 87 FR 33884, 33924 n. 162 (June 3, 2022).

¹⁰⁹ See 12 U.S.C. 2903(b) and 2907(a).

¹¹⁰ For more information and discussion regarding the agencies' consideration of comments recommending adoption of additional race- and ethnicity-related provisions in this final rule, see section III.C of this SUPPLEMENTARY INFORMATION.

¹¹¹ See the section-by-section analysis of final § ____.30.

¹¹² See the section-by-section analysis of final § ____.29.

for banks with assets significantly greater than the proposed asset-size threshold for large banks—e.g., “super large” or “mega bank” categories for institutions with assets over \$50 billion and \$100 billion, respectively. Applying certain aspects of the large bank performance test only to very large banks in the manner suggested by commenters would reduce the number of banks subject to certain aspects of the performance tests and could thereby discourage CRA activity by some banks. Similarly, the agencies did not adopt commenters’ suggestion to eliminate the intermediate bank category in the final rule. The agencies believe that the three size categories of banks in the final rule effectively balance bank capacity with the obligation of a bank to meet the needs of its community. Removing an asset-size category would reduce tailoring of the CRA performance tests based on bank capacity. Depending on which asset-size category were removed, for example, more banks might be classified as small banks, potentially countering the agencies’ goal of encouraging banks with a meaningful capacity to engage in community development activities, or more performance tests would apply to banks that potentially lack the capacity to meet those tests’ parameters, increasing regulatory burden.

SBA size standards for small banks. The agencies specifically requested feedback on whether they should adopt an asset-size threshold for small banks that differs from the SBA’s then small bank asset-size standard of \$750 million.¹¹³ Several commenters supported the agencies conforming to the SBA’s small bank asset-size standard, with some specifically stating that consistency across Federal agencies should be maintained wherever possible. In contrast, some commenters found the SBA’s small bank asset-size standard of \$750 million too high, for the same reasons provided by commenters who found the proposed size standards of \$600 million too high, as discussed above.

The agencies recognize that consistency across Federal agencies is

generally desirable, but the agencies believe that deviating from the SBA’s small bank asset-size standard is appropriate to meet the CRA’s statutory purpose. In particular, applying the SBA’s \$850 million small bank asset-size standard in the CRA framework would significantly increase the number of banks that would be classified as small banks. This might, in turn, result in less community development activity relative to the current CRA regulations or proposal because fewer banks would be evaluated under the status quo community development test.¹¹⁴ Such a development would be counter to the CRA statute’s purposes and the agencies’ CRA modernization objectives.

Inflation adjustments to asset-size thresholds. Several commenters expressed support for the agencies’ proposal to adjust the asset-size thresholds for small, intermediate, and large banks annually for inflation. However, a few commenters expressed concerns. A commenter stated that, although the proposed inflation adjustments may seem reasonable, they could have the unintended consequence of decreasing investments in low- and moderate-income communities when banks are reclassified to a smaller asset-size category. A few other commenters stated that inflation adjustments tied to the CPI-W do not take into account major changes, including consolidation, that have occurred in the banking industry over the past decade.

The agencies considered the commenters’ feedback and elected to maintain the proposed annual inflation adjustment methodology in the final rule. The agencies believe the proposed methodology, whereby asset-size thresholds would be adjusted annually for inflation based on the annual percentage change in the CPI-W, is preferable due to its alignment with the current CRA regulations’ annual inflation adjustments to the asset-size thresholds. With respect to commenters’ concerns about unintended consequences associated with banks moving into lower asset-size categories,

the agencies recognize that this is a potential outcome associated with employing an annual inflation adjustment to the asset-size thresholds. However, the agencies believe the benefits of employing an annual inflation adjustment mechanism outweigh this concern, because it mitigates the risk of needing to employ large or unpredictable increases to realign the asset-size thresholds with conditions in the banking industry. Further, utilizing *ad hoc* adjustments to the asset-size thresholds, which would be less predictable and less stable, could mean more movement of banks from one size category to another from year-to-year, which inherently creates uncertainty for banks and stakeholders. Moreover, if the agencies declined to include an annual inflation adjustment mechanism, a scenario could develop where institutions would graduate into higher size categories due to inflation regardless of whether their financial condition or capabilities to engage in CRA activity have changed. Finally, the agencies note that the annual asset-size threshold adjustment methodology is not designed to account for industry changes such as consolidation. Rather, the methodology is designed to ensure that the asset-size thresholds evolve with economic conditions.

Asset-size threshold alternatives. A few commenters cautioned against the agencies placing too much reliance on asset-size thresholds to determine which performance tests apply to a particular bank. These commenters stated that the agencies should consider various factors such as a bank’s business model, risk profile, areas of specialization, communities served, assessment area sizes, presence in an assessment area, staffing levels, and technology limitations. A few other commenters suggested that, under an “alternate prong” in the large bank definition, the agencies should designate a bank as a large bank if it makes a certain amount of loans in an evaluation period, even if its asset size would otherwise qualify it as a small or intermediate bank. These commenters asserted that this alternate prong would account for situations where a bank claims to be the “true lender” for loans that it makes with support from a third party.

The agencies considered commenter feedback that the final rule should include alternative formulations to determine which performance tests apply to a bank. The agencies believe that alternative formulations for the baseline determination of which performance tests apply to a bank, including adding factors such as risk

¹¹³ The SBA’s applicable asset-size standards are set forth in 13 CFR 121.201, Sector 52—Finance and Insurance, Subsector 522—Credit Intermediation and Related Activities (specifically, North American Industry Classification System (NAICS) codes 522110 and 522180). At the time of the proposed rule’s publication date, the SBA’s small bank asset-size threshold was \$750 million. The SBA revised this asset-size standard, as of December 19, 2022, from \$750 million to \$850 million in assets, determined by averaging the assets reported on the depository institution’s four quarterly financial statements for the preceding year. See 87 FR 69118, 69128 (Nov. 17, 2022).

¹¹⁴ Based on an analysis of current bank size characteristics, the agencies estimate that the \$600 million small bank asset-size threshold would result in approximately 609 banks that are required to comply with the CRA rule—representing approximately 13 percent of all banks—transitioning to the small bank category. However, if the agencies were to incorporate an \$850 million asset-size standard in the CRA regulations, the agencies estimate that this would lead to approximately 957 current intermediate small banks that are required to comply with the CRA rule, representing approximately 21 percent of all banks, transitioning from the current intermediate small bank category to the small bank category. Estimates are based on year-end assets from 2021 and 2022 Call Report data.

profile, areas of specialization, technology limitations, and others, would increase the complexity of the final rule and its administration without meaningfully furthering the agencies' CRA objectives. Therefore, the agencies are maintaining asset size as the sole factor for purposes of categorizing most institutions in the final rule. However, as discussed throughout this **SUPPLEMENTARY INFORMATION**, the agencies have incorporated performance context information into performance test metrics and benchmarks, as well as express consideration of qualitative factors in evaluating a bank's performance, which include, among others, business model.¹¹⁵ In addition, the agencies have retained a distinct evaluation approach for limited purpose banks,¹¹⁶ as well as the option for banks to be evaluated under a strategic plan.¹¹⁷

Asset-size threshold calculations. A commenter requested clarification regarding how the agencies propose to determine a bank's asset size. The commenter noted that the proposal defines a small bank as a bank that had average assets of less than \$600 million in either of the prior two calendar years, based on the assets reported on its four quarterly Call Reports for each of those calendar years. The commenter requested that the agencies clarify whether a bank must have average assets of less than \$600 million at each quarter-end versus the current method that considers year-end values.

After considering this comment, the agencies have decided to retain the asset-size calculation methodology in the current CRA regulations, which provides that asset size is calculated as of the end of a calendar year without reference to quarterly Call Report figures.¹¹⁸ This methodology is simpler than the proposed formula, it is widely understood,¹¹⁹ and retaining it will minimize complexity in the final rule.

¹¹⁵ See, e.g., final §§ _____.21(d) and _____.22(g) and the accompanying section-by-section analyses.

¹¹⁶ See final §§ _____.12 (definition of "limited purpose bank") and _____.26 and the accompanying section-by-section analyses.

¹¹⁷ See final § _____.27 and the accompanying section-by-section analysis.

¹¹⁸ As a result of retaining the current year-end asset-size calculation, the agencies estimate that the number of small banks will decrease from 3252 (NPR asset-size calculation methodology) to 3219 banks, the number of intermediate banks will increase from 883 (NPR asset-size calculation methodology) to 889, and the number of large banks will increase from 492 (NPR asset-size calculation methodology) to 519. Numbers are for banks that are required to comply with the CRA regulation; estimates are based on year-end assets from 2021 and 2022 Call Report data.

¹¹⁹ See current 12 CFR _____.12(u)(1).

For the reasons discussed above, the agencies are adopting the proposed definitions of "small bank," "intermediate bank," and "large bank" in the final rule, with two substantive changes. First, the agencies are adding the clause, "excluding a bank designated as a limited purpose bank"¹²⁰ pursuant to § _____.26, to each of the three definitions to clarify that a bank designated as a limited purpose bank that also falls into one of the asset-size categories is evaluated as a limited purpose bank and not a small, intermediate, or large bank, with the attendant requirements of the performance tests that would otherwise be applicable to such a bank.¹²¹ Second, the agencies have changed the asset-size calculation methodology to reflect assets held at year-end, instead of at each quarter-end, as proposed. The agencies have also made minor technical wording changes.

Accordingly, in the final rule, "small bank" means a bank, excluding a bank designated as a limited purpose bank pursuant to § _____.26, that had assets of less than \$600 million as of December 31 in either of the prior two calendar years. "Intermediate bank" means a bank, excluding a bank designated as a limited purpose bank pursuant to § _____.26, that had assets of at least \$600 million as of December 31 in both of the prior two calendar years and less than \$2 billion as of December 31 in either of the prior two calendar years. "Large bank" means a bank, excluding a bank designated as a limited purpose bank pursuant to § _____.26, that had assets of at least \$2 billion as of December 31 in both of the prior two calendar years. For all three definitions, the agencies adjust and publish the asset-size thresholds annually, based on the year-to-year change in the average of the CPI-W, not seasonally adjusted, for each 12-month period ending in November, with rounding to the nearest million.

As indicated above, and in the proposal, the agencies believe that these asset-size thresholds appropriately balance the agencies' objectives of meeting the CRA's purpose of encouraging banks to meet the credit needs of their communities and recognizing differences in bank capacity based on asset size.

In accordance with the Small Business Act¹²² and its implementing

¹²⁰ As discussed below, in the definition of "limited purpose bank," the agencies have combined limited purpose banks and wholesale banks into one category, "limited purpose banks."

¹²¹ For limited purpose bank evaluations, see final §§ _____.21(a)(4) and _____.26 and the accompanying section-by-section analyses.

¹²² 15 U.S.C. 632(a)(2)(C).

regulations,¹²³ the agencies sought and received approval from the SBA to deviate from the SBA's asset-size standard applicable to small depository institutions—*i.e.*, small banks.

Branch

Current Approach and the Agencies' Proposal

The agencies proposed to update the current definition of "branch" without materially changing the substantive meaning of this term. The current CRA regulations define "branch" to mean a staffed banking facility authorized as a branch, whether shared or unshared, including, for example, a mini-branch in a grocery store or a branch operated in conjunction with any other local business or nonprofit organization.¹²⁴ Under the proposal, "branch" would mean a staffed banking facility, whether shared or unshared, that is approved or authorized as a branch by the appropriate Federal financial supervisory agency and that is open to, and accepts deposits from, the general public.

As noted in the proposal, the agencies did not intend for the removal of the list of examples from the definition to change or narrow the meaning of the term "branch" and believed that these examples did not fully reflect the breadth of shared space locations that might exist, particularly as new bank business models emerge in the future. In addition, the agencies proposed to add the language "open to, and accepts deposits from, the general public" to the definition of "branch" to underscore that this definition would capture new bank business models, with different types of staffed physical locations, when those locations are open to the public and collect deposits from customers. Similarly, the agencies added that a branch must be approved or authorized as a branch by the agency to clarify that the agencies have varying processes for branch designation and that the name that a bank assigns to a facility is not determinative of whether an agency considers it a "branch" for CRA purposes. The agencies did not view these revisions as a change from the current standards.

For the reasons stated below, the agencies are adopting the proposed definition of "branch" in the final rule.

Comments Received

The agencies received several comments concerning the proposed definition of "branch." A commenter recommended that the agencies adopt a

¹²³ 13 CFR 121.903.

¹²⁴ See current 12 CFR _____.12(f).

flexible definition of “branch” that can adjust with changes in the industry. Other commenters offered views on what the agencies should and should not consider a branch for purposes of delineating a facility-based assessment area. A commenter requested that the agencies clarify whether the proposed definition of “branch” (and “remote service facility,” discussed below) would include a financial institution taking deposits at a school or community organization facility. Another commenter recommended stating explicitly, either in the regulation or in guidance, that a staffed physical location in a shared space in which a financial institution has partnered with a nonprofit organization is a branch. This commenter also suggested that the agencies specify that any examples of shared physical locations in the regulation are illustrative and not exhaustive. Another commenter requested that a trust office be specifically excluded from the definition of “branch” if the office is not open to or does not accept deposits from the general public.

Final Rule

After reviewing the comments received on this definition, the agencies are adopting the definition of “branch” as proposed. Accordingly, “branch” means a staffed banking facility, whether shared or unshared, that the appropriate Federal financial supervisory agency approved or authorized as a branch and that is open to, and accepts deposits from, the general public. The agencies believe the proposed definition of “branch” provides adequate flexibility to adapt to the continuous evolution of the banking industry by relying on the agencies’ authority to approve and authorize branches. As the banking industry evolves, the agencies have the authority to adjust their rules, regulations, and guidance to accommodate industry developments.

The agencies decline to opine on whether the scenarios presented by the commenters would qualify as a branch under the definition, because branching decisions are analyzed on a case-by-case basis and subject to the agencies’ respective statutory authority, regulations, and guidance, which may be modified in the future and render some or all of the examples contained in the list inaccurate.

The agencies do not believe that trust offices that are not open to the public or do not accept deposits from the general public need to be explicitly excluded from the definition of “branch,” because a trust office

exhibiting those characteristics would likely not satisfy the elements of the definition of “branch” in the final rule. However, as discussed above, branching decisions are fact-specific inquiries, so the agencies are not opining on whether trust offices are generally excluded under the definition of “branch” in the final rule.

Census Tract

The current rule defines “geography” to mean a census tract delineated by the U.S. Bureau of the Census in the most recent decennial census.¹²⁵ To simplify and clarify the CRA regulations, the agencies proposed to use the term “census tract” in place of the term “geography,” without changing the substantive meaning. As proposed, “census tract” would mean a census tract delineated by the U.S. Census Bureau in the most recent decennial census. In addition, the agencies proposed to substitute the word “census tract” for the word “geography” wherever “geography” appears in the regulatory text.

The agencies did not receive any comments concerning the proposed “census tract” definition and are adopting the definition as proposed with one change. The agencies are removing the phrase “in the most recent decennial census” from the definition in the final rule to conform this definition to current agency practice. The U.S. Census Bureau periodically updates census tract boundaries and numbering during the years between decennial censuses, and the Federal Financial Institutions Examination Council (FFIEC) compiles these changes to provide one update between decennial censuses, after five years. Under current practice, the agencies have been using the census tract boundaries and numbering posted on the FFIEC website. This practice balances between the benefit of using updated census tract definitions between decennial censuses and the benefit of having a substantial period of stability (five years) between adjustments to census tract delineations and numbering. The agencies believe that the revised definition would allow for the current practice of using inter-decennial changes to census tract delineations, which would not be possible under the proposed language because the definition would be confined to the census tract delineations included in the decennial census.

¹²⁵ See current 12 CFR ____.12(k) (“*Geography* means a census tract delineated by the United States Bureau of the Census in the most recent decennial census.”).

Accordingly, the final rule defines “census tract” to mean a census tract delineated by the U.S. Census Bureau.

The U.S. Census Bureau publishes census tract data and information at [census.gov](https://www.census.gov).¹²⁶

Closed-End Home Mortgage Loan

For a discussion of the definition of “closed-end home mortgage loan,” see the discussion below for *Mortgage-Related Definitions*.

Combination of Loan Dollars and Loan Count

To provide clarity and consistency, and to simplify the text of the CRA regulations, the agencies are adopting a new definition for “combination of loan dollars and loan count,” not included in the proposal, that means, when applied to a particular ratio, the average of: (1) the ratio calculated using loans measured in dollar volume; and (2) the ratio calculated using loans measured in number of loans. This term is employed in calculations for the Retail Lending Test in final § ____.22, as provided in final appendix A; the calculations for the Community Development Financing Test in final § ____.24, as provided in final sections II and IV of appendix B, and the Community Development Services Test in final § ____.25, as provided in final section IV of appendix B; and the Retail Services and Products Test in final § ____.23, as provided in final appendix C. These calculations are discussed in more detail in the section-by-section analysis of §§ ____.22 through ____.25.

For the Retail Lending Test in particular, the combined loan dollars and loan count approach for various calculations better tailors the Retail Lending Test to accommodate individual bank business models. The agencies determined that use of this combination helps to account for differences across product lines, bank strategies, and geographic areas, relative to an approach that uses only loan dollars or only loan count. Loan size can vary among different product lines (e.g., home mortgage loans versus automobile loans), and this approach seeks to balance the value of dollars invested in a community with the number of borrowers served. In particular, the agencies believe that both loan dollars and loan count reflect different aspects of how a bank has served the credit needs of a community. For example, in the agencies’ supervisory experience, employing a combination of loan dollars

¹²⁶ See U.S. Census Bureau, “TIGER/Line Shapefiles,” <https://www.census.gov/cgi-bin/geo/shapefiles/index.php>.

and loan count recognizes the continued importance of home mortgage lending to low-income and moderate-income communities, which has been a focus of the CRA, while also accounting for the importance of typically smaller dollar small business, small farm, and automobile lending to low- and moderate-income communities. The loan dollars represent the total amount of credit provided, while the loan count represents the number of borrowers served. The agencies believe this is a balanced approach that ensures consideration of lending that would be significant to the bank by either dollar or number.

Specifically, the agencies believe that use of this term will improve understanding and readability of the following calculations in the Retail Lending Test: (1) the retail lending assessment area 80 percent exemption threshold, as provided in final paragraph II.a.1 of appendix A; (2) the outside retail lending area 50 percent exemption threshold for intermediate banks, as provided in final paragraph II.a.2 of appendix A; (3) the 15 percent major product line threshold for facility-based assessment areas and outside retail lending areas, as provided in final paragraph II.b.1 of appendix A; (4) the standard for determining whether a bank is a majority automobile lender, as provided in final paragraph II.b.3 of appendix A; (5) weighted performance conclusions for major product lines in facility-based assessment areas, retail lending assessment areas, and outside retail lending areas to develop corresponding area performance conclusions, as provided in final paragraph VII.b of appendix A; and (6) weighted average performance scores for different areas in which banks are evaluated to develop performance test conclusions for States, multistate MSAs, and the institution, as provided in final paragraph VIII.b.2 of appendix A.

Similarly, the agencies believe that, for purposes of consistency throughout the final rule and to provide clarity, it is appropriate to incorporate the term into the calculations related to the Community Development Financing Test in final § _____.24 and the Community Development Services Test in final § _____.25, as provided in final appendix B, as well as the Retail Services and Products Test in final § _____.23, as provided in final appendix C. As with the Retail Lending Test in final § _____.22, this definition helps to improve understanding and readability in the calculations for the: (1) weighting of benchmarks in final paragraph II.o of appendix B; (2) combined score for facility-based assessment area

conclusions and the metrics and benchmarks analyses and the impact and responsiveness reviews in final paragraph II.p of appendix B; (3) the weighting of conclusions in final section IV of appendix B; and (4) the weighting of conclusions in final paragraph c of appendix C.

Community Development

The current CRA regulations include a detailed definition of “community development.”¹²⁷ The agencies proposed to move this definition, with substantive additions and clarifications, to a separate new section, proposed § _____.13, Community Development Definitions, and to define this term in § _____.12 by cross-referencing to proposed § _____.13. The agencies did not receive any comments on the proposed definition of “community development” and adopt it as proposed in the final rule. Final § _____.13, as discussed in the section-by-section analysis of § _____.13, describes activities that constitute community development, as proposed, but is retitled “Consideration of community development loans, community development investments, and community development services.”

Community Development Financial Institution

The agencies proposed to add the definition of “Community Development Financial Institution (CDFI)” to the CRA regulations. This term would have the same meaning given to that term in section 103(5)(A) of the Riegle Community Development and Regulatory Improvement Act of 1994 (RCDRIA) (12 U.S.C. 4701 *et seq.*).¹²⁸ The agencies proposed this definition to promote clarity in the CRA regulations and consistency across Federal programs addressing CDFIs, particularly the CDFI Fund established by RCDRIA.¹²⁹

The agencies did not receive any comments concerning the proposed definition of “Community Development

Financial Institution” and are adopting the definition as proposed in the final rule with several technical and clarifying edits. First, the agencies are replacing the phrase “has the same meaning given to that term” with “means an entity that satisfies the definition.” Second, the agencies are changing the cross-reference to the RCDRIA to the more specific “Community Development Banking and Financial Institutions Act of 1994,” which is title I, subtitle A of RCDRIA. Third, in conjunction with the revised cross-reference to the Community Development Banking and Financial Institutions Act of 1994, the agencies have revised the citation from “12 U.S.C. 4701 *et seq.*” to “12 U.S.C. 4702(5).” Finally, in order to clarify that references to CDFIs in the final rule pertain to those entities that are determined to be CDFIs by the U.S. Department of the Treasury’s CDFI Fund, the definition has been amended by adding the clause “and is certified by the U.S. Department of the Treasury’s Community Development Financial Institutions Fund as meeting the requirements set forth in 12 CFR 1805.201(b).” This definitional change affirms the agencies’ intent to ensure that, beyond MDIs, WDIs, and LICUs, the entities with which a bank may engage for automatic consideration of loans, investments, and services have undergone the U.S. Department of the Treasury’s CDFI certification process and meet requirements for maintaining that certification. The agencies consider this a critical guardrail to ensuring that community development on an inclusive community basis is the focus of bank loans, investments, and services in cooperation with these CDFIs. *See* discussion of CDFIs in the section-by-section analysis of § _____.13.

Accordingly, the final rule defines “Community Development Financial Institution (CDFI)” to mean an entity that satisfies the definition in section 103(5)(A) of the Community Development Banking and Financial Institutions Act of 1994 (12 U.S.C. 4702(5)) and is certified by the U.S. Department of the Treasury’s Community Development Financial Institutions Fund as meeting the requirements set forth in 12 CFR 1805.201(b).

Community Development Investment

The agencies proposed to replace the term “qualified investment” in the current CRA regulations¹³⁰ with the term “community development

¹²⁷ *See* current 12 CFR _____.12(g).

¹²⁸ Section 103(5)(A) of RCDRIA defines “CDFI” to mean a person (other than an individual) that: (1) has a primary mission of promoting community development; (2) serves an investment area or targeted population; (3) provides development services in conjunction with equity investments or loans, directly or through a subsidiary or affiliate; (4) maintains, through representation on its governing board or otherwise, accountability to residents of its investment area or targeted population; and (5) is not an agency or instrumentality of the United States, or of any State or political subdivision of a State. *See* 12 U.S.C. 4702(5)(A).

¹²⁹ *See* U.S. Dept. of the Treasury, “Community Development Financial Institutions Fund,” <https://www.cdfifund.gov/about>; *see also* 12 U.S.C. 4703.

¹³⁰ *See* current 12 CFR _____.12(t).

investment.”¹³¹ The current CRA regulations define “qualified investment” to mean “a lawful investment, deposit, membership share, or grant that has as its primary purpose community development.”¹³² The agencies believe the term “community development investment” is better aligned with the other types of community development activities discussed in the proposal—*i.e.*, community development loans and community development services. (The definitions for these terms are discussed below). The agencies based the proposed “community development investment” definition on the current “qualified investment” definition and incorporated several additions. First, the proposed “community development investment” definition clarified that a lawful investment includes a legally binding commitment to invest that is reported on Schedule RC–L of the Call Report if its primary purpose is community development. Second, the proposed definition expressly included a “monetary or in-kind donation” if its primary purpose is community development in order to increase certainty and clarity as to what activities would qualify under the definition. Finally, the agencies added a cross-reference to proposed § ____.13(a), Community Development Definitions.

The agencies did not receive any comments concerning the proposed definition of “community development investment” and are adopting the definition as proposed, with technical edits to conform to the changes made to § ____.13 in the final rule and adjust punctuation. Specifically, the agencies are changing “has a primary purpose of community development” to “supports community development” and revising the cross-reference to “§ ____.13(a)” to “§ ____.13.” A payment to a third party that is not an affiliate to perform community development service hours qualifies as a “monetary or in-kind donation” under the definition of “community development investment” in § ____.12.

Community Development Loan

The current CRA regulations define “community development loan” to mean a loan that: (1) has as its primary purpose community development; and

(2) except in the case of a wholesale or limited purpose bank, has not been reported or collected by the bank or an affiliate for consideration in the bank’s assessment as a home mortgage, small business, small farm, or consumer loan, unless the loan is for a multifamily dwelling (as defined in § 1003.2(n) of this title); and benefits the bank’s assessment area(s) or a broader statewide or regional area(s) that includes the bank’s assessment area(s).¹³³

The agencies proposed several revisions to this definition to add greater specificity and to reflect consideration of community development loans and retail loans under the proposed CRA evaluation framework. First, the proposed definition included the clause, “a legally binding commitment to extend credit, such as a standby letter of credit,” to clarify that these types of commitments could be considered “community development loans” if their primary purpose is community development pursuant to proposed § ____.13(a). Second, the agencies removed the reference to assessment areas because this part of the current definition caused uncertainty as to whether an otherwise eligible activity would qualify. Finally, the proposed definition reflected the proposed CRA framework’s consideration of certain loans solely under the proposed Retail Lending Test, with an option for certain intermediate banks to have a home mortgage loan, a small business loan, or a small farm loan considered as either a retail loan or a community development loan.

Specifically, the agencies proposed to define “community development loan” to mean a loan, including a legally binding commitment to extend credit, such as a standby letter of credit, that: (1) has a primary purpose of community development, as described in § ____.13(a); and (2) has not been considered by the bank, an operations subsidiary or operating subsidiary of the bank or an affiliate of the bank under the Retail Lending Test as an automobile loan, closed-end home mortgage loan, open-end home mortgage loan, small business loan, or small farm loan unless (1) the loan is for a multifamily dwelling (as defined in 12 CFR 1003.2(n)); or (2) in the case of an intermediate bank that is not required to report a home mortgage loan, a small business loan, or a small farm loan, the bank may opt to have the loan considered under the Retail Lending Test in § ____.22, or under the

intermediate bank community development performance standards in § ____.29(b)(2), or, if the bank opts in, the Community Development Financing Test in § ____.24.¹³⁴

The agencies did not receive any comments concerning the proposed “community development loan” definition and are adopting the definition in the final rule with changes to reflect revisions to the final rule regarding consideration of certain home mortgage loans, small business loans, and small farm loans as community development loans. First, the agencies are changing “has a primary purpose of community development” to “supports community development” and revising the cross-reference from “§ ____.13(a)” to “§ ____.13” to conform to the changes made to § ____.13 in the final rule. Next, the agencies removed proposed paragraph (2) and added text intended to clarify that a one-to-four family home mortgage loan for rental housing with affordable rents in nonmetropolitan areas under § ____.13(b)(3) (as discussed in the section-by-section analysis of final § ____.13(b)(3)) may be considered in a bank’s CRA evaluation under both the Retail Lending Test in § ____.22, if applicable, and under the applicable community development tests in the final rule. Under the final definition of “community development loan,” a small business loan or a small farm loan that has a community development purpose, as described in § ____.13, may also be considered in a bank’s CRA evaluation under both the Retail Lending Test in § ____.22, if applicable, and under the applicable community development test in the final rule. For example, as discussed in the section-by-section analysis of final § ____.13(c)(3), certain loans to small businesses and small farms may fall within the economic development category of community development.

The changes regarding consideration of certain home mortgage loans, small business loans, and small farm loans as community development loans are discussed in more detail in the section-by-section analyses of § ____.13(b) and (c).

Accordingly, the final rule defines “community development loan” as a loan, including a legally binding commitment to extend credit, such as a standby letter of credit, that supports community development, as described in § ____.13. A community development loan does not include any home mortgage loan considered under the Retail Lending Test in § ____.22, with the exception of one-to-four family

¹³¹ As discussed, the change in the final rule from “qualified investment” to “community development investment” is a change in nomenclature only; for purposes of simplifying the discussion, this **SUPPLEMENTARY INFORMATION** hereafter refers to “qualified investments” under the current rule as “community development investments.”

¹³² *Id.*

¹³³ See current 12 CFR ____.12(h).

¹³⁴ See proposed § ____.12.

home mortgage loans for rental housing with affordable rents in nonmetropolitan areas under § _____.13(b)(3).

Community Development Services

Current Approach and the Agencies' Proposal

The agencies proposed to replace the current term "community development service," with the term, "community development services," and revise the definition. The current CRA regulations define "community development service" to mean a service that: (1) has as its primary purpose community development; (2) is related to the provision of financial services; and (3) has not been considered in the evaluation of the bank's retail banking services under § _____.24(d).¹³⁵ Under current guidance, activities related to the provision of financial services include services of the type generally provided by the financial services industry, which often involves informing community members about obtaining or using credit.¹³⁶ Further, community development service includes, but is not limited to, serving on the board of directors for a community development organization, serving on a loan committee, developing or teaching financial literacy curricula for low- and moderate-income individuals, providing technical assistance on financial matters to a small business, and providing services reflecting a bank employee's professional expertise at the bank (e.g., human resources, information technology, legal).¹³⁷ Personal charitable activities provided by an employee or director outside the ordinary course of their employment do not qualify for community development consideration.¹³⁸ Instead, services must be performed in the capacity of a representative of the bank.¹³⁹

The agencies proposed to replace the current term "community development service," with the term, "community development services" and revise the definition. Specifically, the agencies proposed to define "community development services" to mean "activities described in § _____.25(d)." The agencies, generally, proposed in § _____.25(d) to incorporate the existing

definition of community development services while codifying existing guidance on the meaning of "related to the provision of financial services." Proposed § _____.25(d) defined community development services as: (1) activities that have a primary purpose of community development, as defined in proposed § _____.13(a)(1); (2) volunteer activities performed by bank board members or employees; and (3) activities related to the provision of financial services as described in proposed § _____.25(d)(3), unless otherwise indicated in proposed § _____.25(d)(4).¹⁴⁰ Proposed § _____.25(d)(2) excluded volunteer services performed by bank board members or employees of the bank who are not acting in their capacity as representatives of the bank. Proposed § _____.25(d)(3) provided that activities related to the provision of financial services are generally activities that relate to credit, deposit, and other personal and business financial services, and included a non-exhaustive list of examples. Proposed § _____.25(d)(4) provided that banks may receive community development services consideration for volunteer activities undertaken in nonmetropolitan areas that otherwise meet the criteria for one or more of the community development definitions, as described in § _____.13, even if unrelated to financial services. The agencies reasoned that banks operating in nonmetropolitan areas may have fewer opportunities to provide community development services related to the provision of financial services. Proposed § _____.25(d)(4) provided that examples of qualifying activities not related to financial services include, but are not limited, to assisting an affordable housing organization to construct homes; volunteering at an organization that provides community support such as a soup kitchen, a homeless shelter, or a shelter for victims of domestic violence; and organizing or otherwise assisting with a clothing drive or a food drive for a community service organization.

Comments Received

The agencies received numerous comments concerning the proposed definition of "community development services" that are discussed below.

Community development purpose for community development services. A few commenters stressed that the final rule should require community development services to have or be related to a community development purpose.

Related to the provision of financial services. As described above, proposed § _____.25(d)(3) provided that "[a]ctivities related to the provision of financial services" are those that relate to credit, deposit, and other personal and business financial services and included the following non-exhaustive list of examples: serving on the board of directors of an organization that has a primary purpose of community development; providing technical assistance on financial matters to nonprofit, government, or tribal organizations or agencies supporting community development activities; providing support for fundraising to organizations that have a primary purpose of community development; providing financial literacy education as described in proposed § _____.13(k); or providing services reflecting other areas of expertise at the bank, such as human resources, information technology, and legal services.

A few commenters supported the inclusion of volunteer activities reflecting expertise of the employee, such as human resources, legal services, and information technology. A few other commenters specifically noted that activities related to the provision of financial services should include financial literacy or financial education. One of these commenters also suggested the provision of financial services should include volunteering at Volunteer Income Tax Assistance sites managed by nonprofit organizations.

Performed on behalf of the bank. Regarding the proposed exclusion of volunteer activities by bank board members or employees of the bank who are not acting in their capacity as representatives of the bank, a commenter requested clarification that the proposed exclusion would not require the volunteer to act as an agent of the bank when serving on a community organization's board of directors. This commenter believed that if the volunteer must act as an agent, it could create a conflict of interest. Another commenter stated that banks should only receive CRA credit for volunteer activities performed during bank business hours.

Volunteer activities in nonmetropolitan areas. The agencies received many comments on the proposed expansion to allow CRA consideration for volunteer service hours in nonmetropolitan areas that are unrelated to the provision of financial services. Only a few commenters supported the provision as proposed. A majority of commenters on this topic opposed the inclusion of volunteer activities unrelated to the provision of

¹³⁵ Under current 12 CFR _____.24(d), the agencies evaluate "the availability and effectiveness of a bank's systems for delivering retail banking services. . . ." See also Q&A § _____.24(d)—1 and —2; Q&A § _____.24(d)(3)—1 and —2; and Q&A § _____.24(d)(4)—1.

¹³⁸ See Q&A § _____.12(i)—2.

¹³⁹ *Id.*

¹⁴⁰ See proposed § _____.25(d).

financial services in any location. A few commenters disputed the premise stated in the proposal that there are insufficient volunteer opportunities in nonmetropolitan areas, and one commenter urged the agencies to collect data to verify the premise before expanding to include services unrelated to the provision of financial services in nonmetropolitan areas. Several other commenters stated that although nonfinancial volunteer activities benefit communities, the inclusion of such services loses sight of the CRA's intent to provide financial services to underserved communities. These commenters believed that the CRA should increase services related to the provision of financial services and should not include all types of volunteer activities.

A few commenters supported the provision to include volunteer activities unrelated to the provision of financial services in all areas, not just nonmetropolitan areas. These commenters highlighted the benefit general volunteerism provides to low- and moderate-income communities and stressed that there is need in both metropolitan and nonmetropolitan areas. A few commenters said that limiting the provision of services unrelated to financial services to only nonmetropolitan areas would restrict community organizations from directing the service hours where needed. Another commenter believed the restriction would be inappropriate at this time because community organizations continue to experience challenges in recruiting volunteers as a result of the COVID-19 pandemic. Other commenters said the expansion to consider volunteer activities unrelated to the provision of financial services in all communities could help reduce the number of CRA "hot spots." A commenter conveyed that some bank employees are not well positioned for or comfortable providing services related to the provision of financial services. Another commenter questioned the delineation of nonmetropolitan versus metropolitan areas because the delineation would exclude certain rural areas that are on the outskirts of metropolitan areas.

A commenter stated bank employees volunteering services unrelated to financial services be given CRA consideration in all communities, at least in instances when it involves helping an affordable housing organization build homes for homeownership. In support of this position, the commenter highlighted the connection between the creation of affordable housing built for

homeownership and expanding credit and homeownership opportunities for low- and moderate-income communities.

If the agencies allow CRA consideration for volunteer service hours in nonmetropolitan areas that are unrelated to the provision of financial services, a few commenters offered other requirements or limitations to the evaluation of these service hours, such as weighting the provision of financial services more heavily than those unrelated to financial services; granting pro rata consideration for services unrelated to the provision of financial services based on the percent of low- and moderate-income recipients; establishing a limit for receiving CRA consideration for services unrelated to financial services; establishing a separate metric; limiting the expansion to those community development services that satisfy basic needs like shelter, safety, and food; or requiring the bank to show it made a demonstrated effort to provide the provision of financial services before it may receive credit for services unrelated to financial services.

Final Rule

In response to commenter feedback and for the reasons described below, the agencies are adopting a definition of "community development services" in § _____.12 that includes substantive changes as well as technical and conforming edits. Specifically, the final rule defines "community development services" to mean the performance of volunteer services by a bank's or affiliate's board members or employees, performed on behalf of the bank, where those services: (1) support community development, as described in § _____.13; and (2) are related to the provision of financial services, which include credit, deposit, and other personal and business financial services, or services that reflect a board member's or employee's expertise at the bank or affiliate, such as human resources, information technology, and legal services. The agencies agree with commenters that a community development purpose is fundamental to eligibility as a community development service. Thus, with non-substantive conforming edits, the agencies are adopting the proposed requirement that a community development service must support community development as described in § _____.13.

The agencies removed the examples of what qualifies as "related to the provision of financial services" from the final definition. Instead, the agencies believe the examples are more

appropriate for future agency guidance. In addition, the agencies will consider these examples as they develop the illustrative list described in final § _____.14. The agencies note that the removal of examples of community development services from the "community development services" definition in the final rule should not be interpreted as a statement on what qualifies or does not qualify as relating to the provision of financial services. The examples provided in the proposal and restated in the preceding discussion would still be considered "related to the provision of financial services."

Further, the agencies determined that references to specific programs, like the suggestion to identify Volunteer Income Tax Assistance sites as related to the provision of financial services, in the text of the regulation could be overly limiting and possibly inconsistent with the durability of the rule over time. Free tax preparation is likely to qualify as "related to the provision of financial services" and may receive community development service consideration if it otherwise meets the definition of community development services.

In response to commenter feedback that the proposed exclusion—excluding volunteer services performed by bank board members or employees of the bank who are not acting in their capacity as representatives of the bank—could be misinterpreted to require or establish an agency relationship, the agencies removed the exclusion. Instead, the agencies require that the services must be "performed on behalf of the bank." The agencies do not intend to require that an employee or director must be acting as a bank's agent in the legal sense of the term, nor do the agencies intend to suggest that volunteering on behalf of the bank necessarily creates an agency relationship.

The agencies also considered the comment that banks should only receive CRA credit for volunteer activities performed during bank business hours. The agencies believe that the nature of community development services may vary depending on community needs and seek to give banks flexibility to address those needs regardless of the timing of projects and other community development-related activities. Thus, consistent with the proposal, the final rule provides that a service may still qualify as "volunteer" where the service is performed during an employee's off-duty hours if that service otherwise meets the "community development services" definition. Conversely, volunteer activities conducted by an employee or board member in their

personal capacity are generally not considered performed on behalf of the bank if the activity is not sponsored or organized by the bank.

A service can also be considered “volunteer” for purposes of the “community development services” definition even if an employee is paid in the normal course of employment. For example, volunteer hours could include those hours associated with a bank employee performing an economic development service activity, such as completing tax returns for small businesses, during the employee’s work hours. Even though the bank pays the employee in the regular course of employment, the bank essentially donates those hours because the bank employee is performing economic development for the small business, rather than performing that employee’s regular bank duties.

The agencies have not adopted the proposal to include volunteer activities unrelated to the provision of financial services in nonmetropolitan areas. The agencies believe that volunteer service hours, even if unrelated to financial services, can provide a meaningful benefit in nonmetropolitan areas, but have determined that, by focusing on activities related to the provision of financial services, this provision is more consistent with the CRA’s statutory focus and also emphasizes activities that examiners have competency and expertise to evaluate. The removal of this proposed expansion in nonmetropolitan areas also is intended more generally to address commenter requests that the agencies reduce the final rule’s complexity.

Finally, the agencies made conforming edits to clarify that service hours performed by the employees or board members of a bank’s affiliate may qualify as community development services, as provided for in final § ___.21(b).

Consumer Loan

Current Approach

The current CRA regulations define “consumer loan” to mean a loan to one or more individuals for household, family, or other personal expenditures, but does not include a home mortgage, small business, or small farm loan. Further, “consumer loan” includes the following categories of loans: (1) a motor vehicle loan, which is a consumer loan extended for the purchase of and secured by a motor vehicle; (2) a credit card loan, which is a line of credit for household, family, or other personal expenditures that is accessed by a borrower’s use of a credit card, as this

term is defined in 12 CFR 1026.2; (3) an other secured consumer loan, which is a secured consumer loan that is not included in one of the other categories of consumer loans; and (4) an other unsecured consumer loan, which is an unsecured consumer loan that is not included in one of the other categories of consumer loans.¹⁴¹

The Agencies’ Proposal

The agencies proposed to modify the “consumer loan” definition to refine its scope, simplify and clarify it, and align it with revisions to related Call Report definitions as well as proposed revisions to the CRA regulations. Specifically, the proposed definition replaced the term “home mortgage” with “home mortgage loan” (both a closed-end home mortgage loan, and an open-end home mortgage loan) and a “multifamily loan” to use terms included in the proposal, discussed below. The proposal also modified the reference to “motor vehicle loan” to “automobile loan,” and specified that an automobile loan includes new or used passenger cars or other vehicles, providing examples, such as a minivan, a pickup truck, a sport-utility vehicle, a van, or a similar light truck for personal use, as defined in Schedule RC–C of the Call Report. The agencies proposed this change to conform with the proposal to add a definition for “automobile loan” to the CRA regulations, discussed above, and to align the term with the definition of “automobile loan” in Schedule RC–C of the Call Report. The proposed “consumer loan” definition also added “other revolving credit plan,” to mean a revolving credit plan that is not accessed by credit card. This change conforms to Call Report revisions, which now distinguishes between revolving and non-revolving credit rather than secured and unsecured credit. The proposal also combined the “other secured consumer loan” and “other unsecured consumer loan” categories into the “other consumer loan” category to simplify the definition.

Comments Received

The agencies received several comments related to the proposed “consumer loan” definition. A commenter supported the agencies’ inclusion of an automobile loan as a consumer loan. The commenter believed that including automobile loans as a type of consumer loan is important for areas where employment and economic opportunities are significant distances from where

individuals reside, and public transportation may not be available or reliable. Another commenter supported the proposed definition of “automobile loan,” likewise in the definition of “consumer loan,” because it eliminates uncertainty around direct versus indirect loan inclusion.

A commenter suggested that the agencies define “unsecured personal loans,” as they do with credit cards, separately from the general category of “other secured and unsecured loans,” because unsecured personal loans are a fairly uniform credit class.

Final Rule

The agencies are adopting the proposed definition of “consumer loan” in the final rule with several edits designed to simplify the definition and avoid the possibility of future misalignment of the definition with the Call Report. Specifically, “consumer loan” in the final rule means a loan to one or more individuals for household, family, or other personal expenditures and that is one of the following types of loans: (1) automobile loan as reported in Schedule RC–C of the Call Report; (2) credit card loan, as reported as “credit card” in Schedule RC–C of the Call Report; (3) other revolving credit plan, as reported in Schedule RC–C of the Call Report; and (4) other consumer loan, as reported in Schedule RC–C of the Call Report.

For clarity, the agencies have elected to refer only to these loans as reported in Schedule RC–C of the Call Report for each category of loan covered in the definition. Referring only to loans reported in schedule RC–C of the Call Report better aligns the categories of loans with how banks report those classes of loans on the Call Report. As a result, “automobile loan,” “credit card loan,” “other revolving credit plan,” and “other consumer loan” are now described as those loans reported in Schedule RC–C of the Call Report and do not include specific examples.¹⁴² The agencies appreciate commenter concerns about any generality associated with the term “other secured and unsecured loans,” labeled “other consumer loans” in the proposal. The final definition of “consumer loan” is designed to address those concerns not only with the addition of the new category of “other revolving credit plan,” but also with references to the loans reported in Schedule RC–C. To provide additional clarity about the scope of the term “consumer loan,” the agencies also revised the definition to

¹⁴¹ See current 12 CFR ___.12(j).

¹⁴² The agencies note that the Call Report uses the term “credit card” and not “credit card loan.”

make the list of categories of loans considered consumer loans exhaustive. With this change, the agencies made a technical edit to no longer exclude home mortgage loans, multifamily loans, small business loans, and small farm loans because these loans would not otherwise fall within the final definition of “consumer loan.”

County

The agencies proposed adding a definition for “county” and defining it to mean any county or statistically equivalent entity as defined by the U.S. Census Bureau. The agencies proposed this definition to increase clarity and consistency in the CRA regulations by aligning the term with the scope of the applicable U.S. Census Bureau definition.¹⁴³

The agencies did not receive any comments concerning this proposed definition and are adopting the definition with one conforming change and one technical change. The agencies are revising the definition to include the phrase, “county equivalent,” to provide additional clarity and further align the definition of “county” in the CRA regulations with the applicable terms used by the U.S. Census Bureau. The U.S. Census Bureau utilizes the term “county equivalents” to refer to those geographic areas comparable to counties—*i.e.*, parishes in Louisiana, boroughs, independent cities in certain States, Census Areas, cities in Alaska; municipios in Puerto Rico, districts and islands in American Samoa, municipalities in the Commonwealth of the Northern Mariana Islands, islands in the U.S. Virgin Islands, the District of Columbia, and Election Districts in Guam.¹⁴⁴ The agencies believe the addition of “county equivalent” clarifies that the definition of “county” captures those areas that are geographically comparable to counties, but are not identified as such, and that these areas will receive the same treatment under the CRA regulations.

The agencies are also referring to these terms as used by the U.S. Census Bureau, instead of as defined, and including a cross-reference to the authority of the U.S. Census Bureau to more accurately provide a source for these terms.

Accordingly, the definition of “county” in the final rule means any county, county equivalent, or

statistically equivalent entity as used by the U.S. Census Bureau pursuant to title 13 of the U.S. Code. The agencies have made conforming changes throughout the final rule to remove references to “county equivalent” that are now unnecessary.

Deposit Location

The agencies proposed to add a definition of “deposit location” to the CRA regulations as a clarifying corollary to the proposed definition of “deposits.” Specifically, the agencies proposed to define “deposit location” to mean: (1) for banks that collect and maintain deposits data as provided in proposed § _____.42, the census tract or county, as applicable, in which the consumer resides, or the census tract or county, as applicable, in which the business is located if it has a local account; (2) for banks that collect and maintain, but that do not report, deposits data as provided in proposed § _____.42, the census tract or county, as applicable, in which the consumer resides, or the census tract or county, as applicable, in which the business is located if it has a local account except that, for purposes of the Market Volume Benchmark and for all community development financing benchmarks, the county of the bank branch to which the deposits are assigned in the FDIC’s Summary of Deposits data; and (3) for banks that do not collect and maintain deposits data as provided in proposed § _____.42, the county of the bank branch to which the deposits are assigned in the Summary of Deposits.

Some commenters stated that the definition of “deposit location” for banks that collect and maintain deposits data under the proposal is vague. A commenter noted that the proposed definition would leave significant questions unresolved, including what it means for a business to be “located” in a place and whether a business can be “located” in multiple places.

The agencies are adopting the definition of “deposit location” with revisions consistent with the revisions to the definition of “deposits,” discussed below, as well as revisions to address commenter concerns. Specifically, the definition in the final rule removes the category of banks that collect and maintain, but do not report, deposits data. As explained in the discussion of the “deposits” definition, this category is no longer necessary. The agencies also agree with commenters’ suggestions that the proposed definition could be clarified, and does not clearly indicate where deposits are located. Therefore, the agencies are removing the references to census tracts and counties

from the part of the definition that applies to banks that collect, maintain, and report deposits data as provided in § _____.42, and replacing them with “the address on file with the bank for purposes of the Customer Identification Program required by 31 CFR 1020.220 or another documented address at which the depositor resides or is located.” The agencies also made a clarifying change to replace the terms “consumer” and “business” used in the proposal with “depositor” and a technical change to replace “branch” with “facility” to refer to the term used in the FDIC’s Summary of Deposits.

Accordingly, the final rule provides that “deposit location” means: (1) for banks that collect, maintain, and report deposits data as provided in § _____.42, the address on file with the bank for purposes of the Customer Identification Program required by 31 CFR 1020.220 or another documented address at which the depositor resides or is located; and (2) for banks that do not collect, maintain, and report deposits data as provided in § _____.42, the county of the bank facility to which the deposits are assigned in the FDIC’s Summary of Deposits data.

Depository Institution

The final rule includes a new definition for “depository institution,” not included in the proposal, to mean any institution subject to CRA, as described in 12 CFR 25.11, 228.11, and 345.11. The agencies are adopting this definition as a technical clarification to effectuate their intent that “bank” or “banks” in certain provisions of the proposal was meant to include institutions evaluated by any of the agencies under part 25, 228, or 345.¹⁴⁵ For example, in the Community Development Financing Test, the

¹⁴⁵ The agencies integrated the term “depository institution” or “large depository institution” into the final rule in final §§ _____.21(b)(1) (consideration of affiliate activities); _____.22(g)(1) (Retail Lending Test additional factors); _____.23(b)(2)(i)(B) (Retail Services and Products Test benchmark); _____.24(b)(2)(i) and (ii), (c)(2)(ii); (d)(2)(ii); and (e)(2)(ii) and (iv) (benchmarks related to the Community Development Financing Test); _____.26(f)(2)(ii) and (iv) (benchmarks related to the Community Development Financing Test for Limited Purpose Banks); _____.27(c)(4) (consideration of affiliate activities for strategic plans); _____.42(h) (aggregate disclosure statements); _____.44 (public notice by banks); the Market Volume Benchmark in appendix A, paragraph I.b; appendix B, paragraph I.a (numerator and denominator for final § _____.24 and final § _____.26 calculations); and the benchmarks in appendix B, as applicable. Throughout the remainder of this **SUPPLEMENTARY INFORMATION** the agencies use the terms “banks” and “large banks” to simplify the discussion. When discussing the above provisions, certain references to “banks” or “large banks” are references to all “depository institutions” or “large depository institutions,” as applicable.

¹⁴³ See U.S. Census Bureau, “Glossary,” <https://www.census.gov/glossary/?term=County%20and%20equivalent%20entity> (defining “county and equivalent entity”).

¹⁴⁴ See U.S. Census Bureau, “Geographic Levels,” <https://www.census.gov/programs-surveys/economic-census/guidance-geographies/levels.html>.

benchmarks would include the lending, investments, and deposits of all banks in the applicable geographic area regardless of regulator. The final rule replaces those references to the term “bank” with the term “depository institution” or “large depository institution,” discussed below. The agencies also made other conforming edits to integrate these terms into the final rule.¹⁴⁶

Deposits

The Agencies’ Proposal

The agencies proposed to add a definition of “deposits” to the CRA regulations to support and clarify the proposal to use deposits data for several evaluation metrics, benchmarks, and weights under the proposed performance tests. This definition would be based on whether a bank had to collect, maintain, or report deposits data. As discussed further in the section-by-section analysis of § _____.42, the agencies proposed to require large banks with assets greater than \$10 billion to collect, maintain, and report county-level deposits data based on the county in which the depositor’s address is located to allow for more precise measurement of a bank’s local deposits by county.¹⁴⁷ For these banks, the agencies proposed a definition of “deposits” based on deposits in domestic offices of individuals, partnerships, and corporations, and of commercial banks and other depository institutions in the United States as defined in Schedule RC–E of the Call Report, which constitute the majority of deposit dollars captured overall in the Call Report categories of Deposits in Domestic Offices. The proposed definition excluded U.S. Government deposits, State and local government deposits, domestically held deposits of foreign governments or official institutions, or domestically held deposits of foreign banks or other foreign financial institutions.

For banks that collect and maintain, but that do not report, deposits data as provided in proposed § _____.42, the proposal provided that “deposits” would have the same meaning as for banks that must report deposits data except that, for purposes of the Retail Lending Test’s Market Volume Benchmark and for all community development financing benchmarks, “deposits” would have the same

meaning as in the FDIC’s Summary of Deposits Reporting Instructions.

For banks that do not collect and maintain deposits data as provided in proposed § _____.42, the proposal provided that “deposits” would have the same meaning as in the FDIC’s Summary of Deposits Reporting Instructions.

Comments Received

Several commenters stated that the agencies should exclude corporate deposits from the definition of “deposits” and recommended defining “deposits” as the sum of total deposits intended primarily for personal, household, or family use, as reported on Schedule RC–E of the Call Report, items 6.a, 6.b, 7.a(1), and 7.b(1). One of the commenters made the same comment with specific reference to large banks. Another commenter explained that including corporate deposits in the proposed definition of “deposits” could reduce incentives for banks to address the community development needs of underserved communities, particularly rural communities, where few corporate deposits are attributed. This commenter also expressed concern that including corporate deposits could lead to distorted or inconsistent results due to fluctuations in corporate deposits that could in turn lead to CRA focus and resource challenges for banks. Another commenter explained that using the suggested items in the Call Report would more accurately reflect a bank’s capacity to engage in qualifying activities for individuals, small businesses, and small farms, because the items collect information on deposits maintained primarily for personal, household, or family use. The commenter further explained that use of these suggested items would also eliminate the potential for large corporate deposits to skew the allocation of deposits across different geographies, thereby better capturing the amount of deposits collected from specific assessment areas. Another commenter supported this position, referencing the proposal’s potential to exacerbate CRA hot spots in urban centers where deposits are concentrated, fluctuations in the working capital needs of corporate depositors, and the potential challenges of assigning a location for corporate deposits in locations spanning multiple geographies. If not removed, the commenter warned that corporate deposits could distort the calculation of the retail lending volume screen, the calculation of the Community Development Financing Metric, and the

weighting of banks’ performance conclusions across assessment areas.

Other commenters stated that the agencies should broaden the definition of “deposits” to include deposits from limited liability companies (LLCs) and trusts, and not just individuals, partnerships, and corporations. One of these commenters noted that LLC deposits are domestic deposits in substance and another commenter suggested that the definition be broadened to include deposits from all entities. The commenters stated that the agencies should specifically include these deposits in the final rule for clarification.

One of these commenters also requested the agencies clarify that the “deposits” definition does not include deposits from foreign persons or entities that are made in U.S. branches. The commenter explained that these deposits do not come from a bank’s assessment area and are not related to the CRA’s purpose of returning money to the community. The commenter also expressed concern that including these types of deposits in the definition may incentivize some banks to keep the funds outside of the United States entirely.

Another commenter indicated that the agencies should include State and local government deposits in the definition because banks can lend against these deposits and some State and local jurisdictions have developed public policies designed to promote reinvestment goals by tying their deposits to bank community performance. The organization stated that CRA rules should not undermine these local efforts by lowering the reinvestment bar for banks with which State and local governments do business.

Final Rule

The agencies are adopting the proposed definition of “deposits” in the final rule with substantive revisions and technical changes. Specifically, the agencies are collapsing the three categories of institutions under the proposed definition—(1) banks that collect, maintain, and report deposits data; (2) banks that collect and maintain, but do not report, deposits data; and (3) banks that do not collect and maintain deposits data—into two categories. Thus, under the final rule, the definition would address: (1) banks that collect, maintain, and report deposits data; and (2) banks that do not collect, maintain, and report that data. The agencies elected to simplify the definition of “deposits” in response to comments about both the overall

¹⁴⁶ For example, the agencies replaced references to the common rule text sections with specific pin cites to all three agencies final regulations as appropriate.

¹⁴⁷ See proposed § _____.42(a)(7) and (b)(5); see also final § _____.42(a)(7) and (b)(3) and the accompanying section-by-section analysis.

complexity of the proposal and the complexity of the provisions related to deposits data collection and reporting. Further, because the final rule provides that institutions that collect and maintain deposits data, whether required or opting to do so, must also report deposits data, the category for banks that collect and maintain but do not report is unnecessary. By removing this category, the agencies believe the final rule provides a less complex and more workable definition. The agencies are also making a technical change to refer to deposits as reported in the FDIC's Summary of Deposits as required under 12 CFR 304.3(c), instead of referring to the instructions, to more accurately provide a source for this term. The agencies have also replaced "U.S." with "United States."

The agencies have declined to remove corporate deposits from the "deposits" definition because the agencies believe that utilizing both personal and corporate deposits results in a more comprehensive representation of the community that an institution serves. The agencies understand concerns that including corporate deposits in the proposed "deposits" definition could reduce incentives for banks to address the community development needs of underserved communities, because, for example, reporting banks could have higher proportions of their deposits in other areas and, under the Community Development Financing Test, commensurately higher expectations for activity in those areas. However, the agencies believe that other aspects of the rule will encourage banks to focus more on these areas. Specifically, under § ____.15, the agencies consider whether an institution serves geographic areas with low levels of community development financing. Further, "targeted census tracts" are used in the final rule to consider whether certain place-based community development activities qualify, and the definition of this term, discussed below, includes underserved communities. Lastly, the agencies are addressing the concern related to CRA hot spots where deposits are concentrated by evaluating bank community development financing and retail lending outside of facility-based assessment areas.¹⁴⁸

The agencies also declined to modify the "deposits" definition to include deposits from LLCs and trusts. The agencies note that because LLCs are a form of corporation, they are captured under corporate deposits on the Call

Report.¹⁴⁹ Further, institutions holding trust account deposits have a fiduciary obligation to invest those deposits in accordance with the trust's instructions. As a result, those deposits are generally not available to be reinvested into the community and should not be included in "deposits."

The agencies also decided not to exclude deposits from foreign persons or entities that are made in U.S. branches. The exclusions in the deposit definition are limited to whole categories in the Call Report definition of deposit. Excluding foreign individuals or companies would exclude only a partial category in the Call Report. This partial exclusion would increase burden because these categories are known and understood by the industry and, the agencies believe, would not offer significant benefit. Second, as explained in the proposal, the agencies elected to exclude State and local government deposits, along with foreign government deposits, because these deposits are sometimes subject to restrictions and may be periodically rotated among different banks causing fluctuations in the level of deposits over time.¹⁵⁰ These government entities make up one whole category under the Call Report definition. This determination is based on the agencies' supervisory experience, which also considered that restricted funds may also misrepresent a bank's ability to reinvest funds in the local community.

The agencies have elected to maintain deposits data collection from banks with assets greater than \$10 billion and decline to expand this collection requirement to other banks. The agencies believe the collection of deposits data is important, but that data collection should be limited to large banks with assets greater than \$10 billion due to the burden associated with this requirement.¹⁵¹ Further, the agencies have declined to expand the use of the FDIC's Summary of Deposits data to all banks because of the limitations of Summary of Deposits data. In particular, Summary of Deposits data is tied to a bank's branches. As banks' business models continue to evolve, there is the possibility that branches will be less representative of the communities that banks serve. As a result, Summary of Deposits data may also be less representative of the communities a bank serves. The

agencies note, however, that banks that opt into deposits data collection and maintenance must report these data.¹⁵²

Accordingly, the definition of "deposits" in the final rule provides that: (1) for banks that collect, maintain, and report deposits data as provided in § ____.42, "deposits" means deposits in domestic offices of individuals, partnerships, and corporations, and of commercial banks and other depository institutions in the United States as defined in Schedule RC-E of the Call Report; deposits does not include U.S. Government deposits, State and local government deposits, domestically held deposits of foreign governments or official institutions, or domestically held deposits of foreign banks or other foreign financial institutions; and (2) for banks that do not collect, maintain, and report deposits data as provided in § ____.42, "deposits" means a bank's deposits as reported in the FDIC's Summary of Deposits as required under 12 CFR 304.3(c).

Digital Delivery System

The final rule includes a new definition for "digital delivery systems," not included in the proposal, to mean a channel through which banks offer retail banking services electronically, such as online banking or mobile banking. The agencies are adopting this definition to clarify the agencies' intended meaning of this term, which is to reflect the common understanding of this term. This term is used in § ____.23, Retail Services and Products Test. For additional discussion of digital delivery systems, see the section-by-section analysis of § ____.23.

Dispersion of Retail Lending

The agencies proposed to add a definition of "dispersion of retail lending" to § ____.12 in support of the proposal to assess a bank's retail lending performance in a facility-based assessment area based not only on a bank's Retail Lending Volume Screen (see proposed § ____.22(c)) and geographic and borrower distribution metrics (see proposed § ____.22(d)), but also in consideration of several other factors, including the dispersion of retail lending in the facility-based assessment area to determine whether there are gaps in lending in the facility-based assessment area that are not explained by performance context. Specifically, the agencies proposed to define "dispersion of retail lending" to mean how geographically diffuse or widely spread such lending is across

¹⁴⁹ See Call Report, Schedule RC-E.

¹⁵⁰ See 87 FR 33884, 33995 (June 3, 2022).

¹⁵¹ For additional discussion of this issue, see the discussion on deposits in the section-by-section analysis of § ____.42.

¹⁵² See final rule § ____.42(b)(3)(i) and the section-by-section analysis of § ____.42.

¹⁴⁸ See final §§ ____.17 through ____.19 and the accompanying section-by-section analyses.

census tracts of different income levels within a facility-based assessment area, retail lending assessment area, or outside retail lending area.

The agencies did not receive any comments on this definition. However, after further review, the agencies have elected not to adopt a definition of “dispersion of retail lending” in § _____.12 because this term is used only once, in § _____.22. Instead, the agencies have incorporated this concept into § _____.22(g) of the final rule.

Distressed or Underserved Nonmetropolitan Middle-Income Census Tract

In the current CRA regulations, the definition of “community development” includes activities that revitalize or stabilize “distressed or underserved nonmetropolitan middle-income geographies” as designated by the agencies based on: (1) rates of poverty, unemployment, and population loss; or (2) population size, density, and dispersion. Further, this provision states that activities revitalize and stabilize geographies designated based on population size, density, and dispersion if they help to meet essential community needs, including the needs of low- and moderate-income individuals.¹⁵³

The agencies proposed to include a definition of “distressed or underserved nonmetropolitan middle-income census tract” in § _____.12, based on the language in the current definition of “community development,” with certain edits. Specifically, the agencies proposed to add clarity and consistency by incorporating additional detail from the Interagency Questions and Answers into the proposed definition.¹⁵⁴ The agencies also proposed technical and conforming changes, such as replacing the term “geography” with the term “census tract,” reflecting the change to this term discussed above, and restructuring the definition. As proposed, “distressed or underserved nonmetropolitan middle-income census tract” would mean a census tract publicly designated as such by the agencies and compiled in a list published annually by the FFIEC. The agencies would designate a nonmetropolitan middle-income census tract as distressed if it is in a county that has: (1) an unemployment rate of at least 1.5 times the national average; (2) a poverty rate of 20 percent or more; or (3) a population loss of 10 percent or more between the previous and most recent decennial census or a net migration loss

of five percent or more over the five-year period preceding the most recent census. The agencies would designate a nonmetropolitan middle-income census tract as underserved if it meets the criteria for population size, density, and dispersion that indicate the area’s population is sufficiently small, thin, and distant from a population center that the census tract is likely to have difficulty financing the fixed costs of meeting essential community needs, based on the Urban Influence Codes established by the U.S. Department of Agriculture’s (USDA) Economic Research Service numbered “7,” “10,” “11,” or “12.”¹⁵⁵

The agencies did not receive any comments on the proposed definition of “distressed or underserved nonmetropolitan middle-income census tract,” and are adopting the definition as proposed with two technical changes, referencing the official name of the Board, and replacing the word “migration” with “population.”

Distribution of Retail Lending

The agencies proposed to add a definition of “distribution of retail lending” to § _____.12 to increase clarity and consistency regarding the evaluation of a bank’s retail lending under the proposed Retail Lending Test. As proposed, “distribution of retail lending” would refer to how retail lending is apportioned among borrowers of different income levels, businesses or farms of different sizes, or census tracts of different income levels. The agencies did not receive any comments on this definition. However, after further review, the agencies have elected not to adopt this definition in the final rule because the distribution analysis is explained extensively in the Retail Lending Test in the final rule.¹⁵⁶

Evaluation Period

The agencies proposed to add a definition of “evaluation period” to increase clarity and consistency in the CRA regulations. Specifically, proposed § _____.12 defined “evaluation period” to mean the period of time between CRA examinations, generally in calendar years, in accordance with the agency’s guidelines and procedures. The agencies received no comments concerning the proposed definition of “evaluation period.” Accordingly, the agencies are adopting this term in the final rule with several technical changes designed to enhance the clarity and accuracy of the

definition. Specifically, the agencies revised the phrase “period of time” to “the period” and moved the clause “generally in calendar years” so that it now follows “the period,” and replaced the phrase “time between CRA examinations” with “during which a bank conducted the activities that the [Agency] evaluates in a CRA examination.” Accordingly, “evaluation period,” in the final rule means the period, generally in calendar years, during which a bank conducted the activities that the agency evaluates in a CRA examination, in accordance with the agency’s guidelines and procedures.

Facility-Based Assessment Area

As discussed above, the agencies proposed to replace the term “assessment area” in § _____.12 with the terms “facility-based assessment area,” “retail lending assessment area,” and “outside retail lending area.” The agencies proposed to define “facility-based assessment area” to mean a geographic area delineated in accordance with § _____.16.¹⁵⁷ Section _____.16 describes the bases for delineating this type of assessment area. For information regarding facility-based assessment area delineation requirements in the final rule, see the section-by-section analysis of § _____.16.

A commenter suggested clarifying that an ATM not owned and operated exclusively by a bank would not trigger a new facility-based assessment area, consistent with the current regulation. The agencies agree that a non-proprietary remote service facility, such as a network ATM, does not constitute a bank facility because such ATMs are owned and operated by a third party and are not operated exclusively for the bank. Further, a bank participating in such an ATM network may have limited control over where an ATM is located. Therefore, such ATMs would not by themselves trigger a new facility-based assessment area.

For the reasons stated above, the agencies are adopting the “facility-based assessment area” definition as proposed in the final rule with a minor wording change. Specifically, the agencies replaced the phrase “in accordance with” with “pursuant to” in the final rule.

¹⁵⁷ Similarly, as discussed above, the current CRA regulations define “assessment area” to mean “a geographic area delineated in accordance with § _____.41”—the section of the current CRA regulations that describes the bases for delineating an assessment area. See current 12 CFR _____.12(c).

¹⁵³ See current 12 CFR _____.12(g)(4)(iii).

¹⁵⁴ See Q&A § _____.12(g)(4)(iii)—1.

¹⁵⁵ See U.S. Dept. of Agriculture, “Urban Influence Codes,” <https://www.ers.usda.gov/data-products/urban-influence-codes/>.

¹⁵⁶ See final § _____.22 and appendix A and accompanying section-by-section analysis.

High Opportunity Area The Agencies' Proposal

The agencies proposed to add a definition of "High Opportunity Area" to mean: (1) an area designated by the U.S. Department of Housing and Urban Development (HUD) as a "Difficult Development Area" (DDA); or (2) an area designated by a State or local Qualified Allocation Plan as a High Opportunity Area, and where the poverty rate falls below 10 percent (for metropolitan areas) or 15 percent (for nonmetropolitan areas).

As discussed further in the section-by-section analysis of § ____.15, the agencies proposed to define "High Opportunity Area" in relation to the proposal to conduct an impact review of community development activities.¹⁵⁸ One of the proposed factors that the agencies would consider in assessing the impact and responsiveness of a community development activity would be whether the activity "[d]irectly facilitate[s] the acquisition, construction, development, preservation, or improvement of affordable housing in High Opportunity Areas."¹⁵⁹ The proposed definition would align with the Federal Housing Finance Agency's (FHFA) definition of "High Opportunity Areas,"¹⁶⁰ and was intended to demarcate areas where efforts to increase affordable housing could be especially beneficial for low- and moderate-income individuals.

The agencies solicited comment on whether the proposed approach to use the FHFA's definition of "High Opportunity Areas" is appropriate, and whether there are other options for defining High Opportunity Areas.

Comments Received

Most commenters that provided input on this definition supported the proposal to align the "High Opportunity Areas" definition with the FHFA's definition, for example, because the high cost of housing in otherwise low poverty areas can absorb significant resources from large portions of the population. A commenter observed that low poverty rates are an important component of identifying high opportunity areas. This commenter supported limiting the variability of definitions promulgated in State Qualified Allocation Plans but

suggested there may also be other relevant opportunity or social vulnerability indices. Another commenter suggested the agencies clarify the definition to allow for variation in terminology used from State to State.

Some commenters offered various suggestions for expanding the "High Opportunity Areas" definition, such as to include Qualified Census Tracts to allow communities concerned about displacement of low- and moderate-income residents the ability to access CRA-motivated financing. Another commenter recommended expanding the definition to include Empowerment Zone and Enterprise Communities, transit-oriented areas, and census tracts where 40 percent or more of the homes meet the definition of affordable housing, and a different commenter suggested the definition should be expanded to include certain climate resilience factors. Another commenter stated that, in addition to aligning with the FHFA definition, the agencies should permit flexibility in how financial institutions identify affordable housing needs, gaps, and opportunities, utilizing data analytics tools.

A few commenters opposed the proposed "High Opportunity Areas" definition. Some of these commenters opposed using the FHFA's definition because it would include DDAs, which these commenters asserted were created to permit higher levels of housing tax credit subsidies in areas with high construction, land, and utility costs and are not directly related to higher income areas with low rates of poverty. Another commenter expressed some concern about including DDAs and suggested that the agencies consider eliminating DDAs or adding criteria to ensure that in-scope DDAs include features supporting economic mobility, such as strong transit connectivity of the housing to schools and childcare facilities, health facilities, employment centers, and green space. Similarly, another commenter stated that the proposed FHFA definition is limited to quantifiable poverty measures and State Qualification Allocation Plan definitions but may not address a more holistic view of "opportunity," and suggested that incorporating service-enriched housing could be a good counterbalance. A commenter also stated that the FHFA definition may be too restrictive for some communities and recommended that the agencies be open to other options where high cost of living relative to local wages and income demonstrates a need.

Final Rule

The agencies are adopting the definition of "High Opportunity Areas" in the final rule with substantive revisions. As discussed above, the agencies intended the proposed definition of "High Opportunity Area" to align with the FHFA's definition of "High Opportunity Area." However, the FHFA maintains a "High Opportunity Areas File" that designates the specific census tracts that qualify as high opportunity areas for purposes of residential economic diversity activities.¹⁶¹ In consideration of the fact that the FHFA maintains a "High Opportunity Areas File," the agencies believe it is prudent to defer to the FHFA's interpretation of its regulation and guidance in the identification of "High Opportunity Areas."¹⁶² Further, the agencies believe reliance on the FHFA's identification of "High Opportunity Areas" will eliminate any potential ambiguity in the definition.

For these reasons, the agencies have modified the proposed definition of "High Opportunity Area" to mean an area identified by the FHFA for purposes of the Duty to Serve Underserved Markets regulation in 12 CFR part 1282, subpart C. This definition generally includes geographic areas where the cost of residential development is high¹⁶³ and affordable housing opportunities can be limited.

While the agencies considered commenters' concerns about the definition and suggestions for alternatives, the agencies continue to believe the "High Opportunity Area" definition included in the final rule provides the best option for the purposes of the impact and responsiveness factor in § ____.15(b)(7) because, as defined by FHFA, these areas are intended to capture areas that provide strong opportunities for low- and moderate-income individuals, families, and households. The definition captures both DDAs and also areas designated as High Opportunity Areas where the poverty rate is low. The agencies agree that increasing affordable housing opportunities in these areas helps to provide low- or moderate-income individuals, families, and households with more choices to live in neighborhoods with economic

opportunities. The agencies considered various alternative options, including commenter suggestions to expand the definition to other types of geographic areas or exclude DDAs from the definition but continue to believe the definition provides a clear set of standards related to where additional affordable housing may be both needed and hard to develop and is in alignment with an already in-use Federal agency definition with readily available geographic classifications.

Home Mortgage Loan

For a discussion of the definition of “home mortgage loan,” see the discussion for *Mortgage-Related Definitions* in this section-by-section analysis of § _____.12.

Income Level

To increase clarity, the agencies proposed non-substantive and minor structural revisions to the current definition of “income level”¹⁶⁴ and, as in other definitions, to replace the term “geography” with the more precise term “census tract.” Specifically, the agencies proposed that “income level” include the following definitions:

- *Low-income* would mean: (1) for individuals within a census tract, an individual income that is less than 50 percent of the area median income; or (2) for a census tract, a median family income that is less than 50 percent of the area median income.
- *Moderate-income* would mean: (1) for individuals within a census tract, an individual income that is at least 50 percent and less than 80 percent of the area median income; or (2) for a census tract, a median family income that is at least 50 percent and less than 80 percent of the area median income.
- *Middle-income* would mean: (1) for individuals within a census tract, an individual income that is at least 80 percent and less than 120 percent of the area median income; or (2) for a census tract, a median family income that is at least 80 percent and less than 120 percent of the area median income.
- *Upper-income* would mean: (1) for individuals within a census tract, an individual income that is 120 percent or more of the area median income; or (2) for a census tract, a median family income that is 120 percent or more of the area median income.

Comments Received

The agencies received several comments on the proposed definition of “income level.” A commenter requested that the agencies include persons with

vision loss—and persons with disabilities in general—in the CRA regulation’s “low-income” population, explaining that persons with vision loss or other disabilities often experience high unemployment, average income that is lower than the general population, less access to technology and the internet, and are more likely to be persons of color. Another commenter suggested the agencies include persons with disabilities in the low- and moderate-income designation even if their incomes exceed that designation because of the financial vulnerabilities and high costs associated with living with a disability, such as the expenses of accessible van conversions, assistive technology, and home renovations.

Another commenter suggested that the agencies revise the income levels in an upward direction so that “low-income” is less than 60 percent of area median income, “moderate-income” is between 60 percent and 100 percent of area median income, “middle-income” is between 100 percent and 125 percent of area median income, and “upper-income” is more than 125 percent of area median income. The commenter stated that this upward revision of the income levels could provide additional support for middle-class home ownership and assist more middle-income households that have lost ground after the COVID-19 pandemic and due to high inflation and would be consistent with the change in the agencies’ special designation of distressed or underserved nonmetropolitan middle-income census tracts (a designation referencing between 80 percent and 120 percent of area median income) and in the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, which defines low-income as 80 percent of area median income and moderate-income as income “not in excess of area median income.”

Another commenter stated that it welcomes the agencies providing more examples on how to identify low- and moderate-income individuals and families, and requested that the agencies consider a broader, more flexible framework that uses enrollment status in the USDA National School Lunch Program and Medicaid as part of the definition of low- and moderate-income.

Final Rule

The agencies are adopting the proposed definition of “income levels” in the final rule with several revisions to the first prong of each income level. Specifically, the agencies removed the reference to “census tracts” because inclusion of the term is unnecessary.

The agencies also expanded the definition so that it applies to individuals, families, and households, instead of only individuals, as proposed. The agencies added families and households in recognition of the fact that the measurement of income would be incomplete if each income level excluded families or households.

Accordingly, the agencies are adopting the following definition of “income levels”:

- “Low-income,” which means: (1) for individuals, families, or households, income that is less than 50 percent of the area median income; or (2) for a census tract, a median family income that is less than 50 percent of the area median income.
- “Moderate-income,” which means: (1) for individuals, families, or households, an income that is at least 50 percent and less than 80 percent of the area median income; or (2) for a census tract, a median family income that is at least 50 percent and less than 80 percent of the area median income.
- “Middle-income,” which means: (1) for individuals, families, or households, an income that is at least 80 percent and less than 120 percent of the area median income; or (2) for a census tract, a median family income that is at least 80 percent and less than 120 percent of the area median income.
- “Upper-income,” which means: (1) for individuals, families, or households, an income that is 120 percent or more of the area median income; or (2) for a census tract, a median family income that is 120 percent or more of the area median income.

The agencies considered the commenters’ recommendations and suggestions to consider a broader and more flexible framework and to revise the income levels upwards but have elected to maintain the income levels as proposed in the final rule. The income levels in the proposed definition mirror the income levels in the current definition, so the income levels standards are well known and understood within the banking industry. Further, the agencies believe a framework that relies on quantitative income factors provides for the most workable definition and minimizes complexity.

Intermediate Bank

For a discussion of the definition of “intermediate bank,” see the discussion above for *Bank Asset-Size Definitions*.

Large Bank

For a discussion of the definition of “large bank,” see the discussion above for *Bank Asset-Size Definitions*.

¹⁶⁴ See current 12 CFR _____.12(m).

Large Depository Institution

The final rule includes a new definition for “large depository institution,” not included in the proposal, to mean any depository institution, excluding depository institutions designated as limited purpose banks or savings associations¹⁶⁵ pursuant to 12 CFR 25.26(a), or designated as limited purpose banks pursuant to 12 CFR 228.26(a) or 345.26(a), that meets the asset size threshold of a large bank. The agencies are adopting this definition as a technical clarification to effectuate their intent that “large bank” in certain proposed benchmarks in the Community Development Financing Test includes all large banks and savings associations evaluated under 12 CFR parts 25, 228, and 345. The agencies also made other conforming edits to integrate these terms into the final rule.¹⁶⁶

Limited Purpose Bank

The current CRA regulations define “limited purpose bank” to mean a bank that offers only a narrow product line (such as credit card or motor vehicle loans) to a regional or broader market and for which a designation as a limited purpose bank is in effect, in accordance with § _____.25(b).¹⁶⁷ The agencies proposed to revise the illustrative list of loan types from “credit card or motor vehicle loans” to “credit cards, other revolving consumer credit plans, other consumer loans, or other non-reported commercial and farm loans” and to change the cross-reference. The agencies proposed this change to more specifically identify the types of product lines that might be offered by a bank eligible for a “limited purpose bank” designation. Additionally, the agencies proposed to remove the reference to “motor vehicle loans” (replaced in the proposal by the proposed term “automobile loans,” as discussed above) as an illustrative type of a narrow retail product line, because the agencies proposed to evaluate automobile

lending under the proposed Retail Lending Test.

In addition, the current CRA regulations define “wholesale bank” to mean a bank that is not in the business of extending home mortgage, small business, small farm, or consumer loans to retail customers, and for which a designation as a wholesale bank is in effect, in accordance with § _____.25(b).¹⁶⁸ To determine whether a bank meets this definition, the agencies consider whether a bank holds itself out to the retail public as providing such loans; and may consider the bank’s revenues from extending such loans compared to its total revenue, including off-balance sheet activities.¹⁶⁹ The proposal included the same definition as the current rule, with a technical change to the cross-reference.

Comments Received

The agencies received a number of comments concerning the proposed definitions of “limited purpose bank” and “wholesale bank.” A few commenters stated that these definitions should be reevaluated so that a bank without a material amount of its balance sheet loan originations or loan volume subject to the proposed major product line standard could qualify for the designation. A group of commenters supported maintaining existing guidance for wholesale and limited purpose banks from the Interagency Questions and Answers, with a commenter specifically identifying guidance addressing the amount of unrelated lending in which a bank may engage while retaining its designation. Other commenters expressed concern with designating banks that engage in extensive credit card lending as wholesale or limited purpose banks. These commenters asserted that the proposal to apply the Community Development Financing Test for Wholesale or Limited Purpose Banks to wholesale or limited purpose banks (discussed in greater detail in the section-by-section analysis of § _____.26) would eliminate the possibility of these banks’ credit card lending being evaluated; this raised concerns for these commenters, who noted that credit card lending is an important source of credit to individuals and small businesses. Instead, most of these commenters urged the agencies to exclude credit card banks from the option to seek a wholesale or limited purpose bank designation or otherwise ensure the distribution of credit card loans is

evaluated pursuant to the proposed Retail Lending Test.

Final Rule

The agencies are adopting a revised “limited purpose bank” definition and eliminating the “wholesale bank” definition in the final rule. Specifically, the agencies have revised the “limited purpose bank” definition to be similar in structure to the current “wholesale bank” definition. To that end, the agencies are changing the definition of “limited purpose bank” from indicating that these banks offer only a narrow product line to indicating that these banks do not extend to retail customers the loan types evaluated under the final Retail Lending Test. Further, the agencies no longer believe it is necessary to impose the limitation that limited purpose banks may only operate in a “regional or broader market.” The removal of this language equips the definition with the ability to accommodate new or future market participants, such as fintech banks. Finally, the agencies are also adding language to indicate that these banks may extend to retail customers—*i.e.*, the retail public, including, but not limited to, individuals and businesses¹⁷⁰—those loan types evaluated under the final Retail Lending Test on an incidental and an accommodation basis without losing the limited purpose bank designation, as requested by some commenters.

Therefore, the final rule defines a “limited purpose bank” as a bank that is not in the business of extending closed-end home mortgage loans, small business loans, small farm loans, or automobile loans evaluated under § _____.22 to retail customers, except on an incidental and accommodation basis, and for which a designation as a limited purpose bank is in effect, in accordance with § _____.26. Because this definition, generally, includes banks considered either “limited purpose banks” or “wholesale banks” under the current or proposed regulations, a separate definition of “wholesale bank” is not necessary. Overall, the changes to “limited purpose bank” in the final rule and the removal of the term “wholesale bank” in the CRA regulations, are intended to improve clarity, minimize complexity, and provide for new and future market participants.

Because the current and proposed CRA regulations apply the same performance test to each bank type, the change in nomenclature does not

¹⁶⁵ As provided in the OCC’s agency-specific amendments, below, final 12 CFR part 25 generally replaces the term “bank” in the common rule text with the term “bank or savings association.” As such, in the definition of “large depository institution” the phrase “limited purpose” modifies both “banks” and “savings associations” and should be read as “limited purpose banks” and “limited purpose savings associations.” More generally, any modifiers that precede the terms “bank(s) or savings association(s)” or “bank(s) and savings association(s)” modify both “bank(s)” and “savings association(s).”

¹⁶⁶ See *supra* note 145.

¹⁶⁷ See current 12 CFR _____.12(n).

¹⁶⁸ See current 12 CFR _____.12(x).

¹⁶⁹ See Q&A § _____.12(x)—1.

¹⁷⁰ The meaning of retail customers is consistent with current guidance for wholesale banks. See Q&A § _____.12(x)—1.

substantively affect the application of performance tests. In other words, a wholesale bank under the proposal would have been subject to proposed § ____.26; a limited purpose bank (which includes wholesale banks under the proposed definition) under the final rule remains subject to the performance test in § ____.26. The agencies believe that most banks that meet the current definition of a “wholesale bank” or “limited purpose bank” will continue to meet the “limited purpose bank” definition in the final rule. However, the agencies acknowledge that a bank that primarily offers automobile loans (and therefore meets the majority-automobile-lender standard discussed below) may have qualified as a limited purpose bank under the current rule or the proposal but will not qualify as a limited purpose bank under the final rule because they are in the business of extending loans evaluated under § ____.22 to retail customers.

The agencies declined to revise the definition of “limited purpose bank” to exclude consumer credit card banks or evaluate credit card banks under the Retail Lending Test, as requested by some commenters. First, based on the agencies’ supervisory experience, credit card banks often have unique business models and do not have extensive branch systems. Second, evaluating credit card banks under the Retail Lending Test would require significant additional data collection from these banks. Credit card underwriting may not rely on a customer’s income, and banks do not have an obligation to collect and routinely update credit card customers’ income data. As a result, credit card customer data collected from these banks would not be complete and could vary widely among banks, posing significant challenges to performing the borrower distributions that are central to the Retail Lending Test. The agencies recognize, however, the importance of credit card lending to low- and moderate-income individuals, small businesses, and small farms. For further discussion of the evaluation of credit card and other non-automobile consumer loans under the final rule, see the section-by-section analyses of §§ ____.22(d) (Retail Lending Test; major product lines) and ____.23 (Retail Services and Products Test). In this regard, for example, the agencies note that small business credit card lending is included in the small business loan product line evaluated under the final Retail Lending Test.

In response to some commenters’ recommendations, the agencies note that guidance included in the Interagency Questions and Answers on

wholesale and limited purpose banks will no longer be relevant guidance for the final rule, unless the agencies specifically include this guidance in subsequent issuances.

Loan Location

Under the current CRA regulation, the definition of “loan location” provides that a consumer loan is located in the geography where the borrower resides; a home mortgage loan is located in the geography where the property to which the loan relates is located; and a small business or small farm loan is located in the geography where the main business facility or farm is located or where the loan proceeds otherwise will be applied, as indicated by the borrower.¹⁷¹ The agencies proposed technical revisions to this definition to add greater precision and clarity. As discussed above, the agencies proposed a conforming change across many definitions to replace the term “geography” with the more precise term “census tract.” Additionally, to clarify the point in time when a consumer loan’s location is assigned, the agencies proposed that the location of a consumer loan is based on where the borrower resides at the time the consumer submits the loan application. Further, the agencies proposed to clarify that a home mortgage loan’s location is based on where the property securing the loan is located, instead of where the property related to the loan is located.

The agencies did not receive any comments concerning the proposed “loan location” definition and are adopting the definition as proposed with the following changes. First, the agencies have replaced the term “consumer” with the term “borrower” in the first prong, to conform with the reference to “borrower” earlier in the sentence. Second, the agencies have included multifamily loan in the second prong to clarify the location of multifamily loans, which the agencies recognize was not specified in the proposal. Third, the agencies made a non-substantive change to the sentence structure of the third prong to remove the passive tense in one clause.

As adopted, the definition of “loan location” in the final rule provides that: (1) a consumer loan is located in the census tract where the borrower resides at the time that the borrower submits the loan application; (2) a home mortgage loan or a multifamily loan is located in the census tract where the property securing the loan is located; and (3) a small business loan or small farm loan is located in the census tract where the main business facility or farm

is located or where the borrower will otherwise apply the loan proceeds, as indicated by the borrower.

Loan Production Office

The current CRA regulations define “loan production office” to mean a staffed facility, other than a branch, that is open to the public and that provides lending-related services, such as loan information and applications.¹⁷² The agencies proposed to remove this definition given the limited focus on, and consideration of, loan production offices in the agencies’ proposal. The agencies did not receive any comments concerning the removal of this definition, and the agencies are removing this definition in the final rule as proposed.

Low Branch Access Census Tract; Very Low Branch Access Census Tract

The agencies proposed to define “low branch access census tract” to mean a census tract with one bank, thrift, or credit union branch, and a “very low branch access census tract” to mean a census tract with no bank, thrift, or credit union branches, within: (1) 10 miles of the census tract center of population or within the census tract in nonmetropolitan areas; (2) five miles of the census tract center of population or within the census tract in a census tract located in an MSA but primarily outside of the principal city components of the MSA; or (3) two miles of the census tract center of population or within the census tract in a census tract located in an MSA and primarily within the principal city components of the MSA.

The agencies proposed to evaluate a bank’s branch distribution in, among other geographic areas, “low branch access census tracts or very low branch access census tracts.”¹⁷³ Upon further consideration of comments received on this topic, the agencies have elected to not consider the availability of branches in low branch access census tracts or very low branch access census tracts in the Retail Services and Products Test. For additional discussion, see the section-by-section analysis of § ____.23, Retail Services and Products Test. As a result, the CRA regulations no longer require definitions of “low branch access census tracts” or “very low branch access census tracts” and the agencies are adopting the final rule without them.

Low-Cost Education Loan

Current § ____.21(e), *Low-cost education loans provided to low-income*

¹⁷² See current 12 CFR ____.12(p).

¹⁷³ See proposed § ____.23(b)(1)(i)(C)(i).

¹⁷¹ See current 12 CFR ____.12(o).

borrowers, provides that, for purposes of that paragraph, “low-cost education loans” means any education loan, as defined in section 140(a)(7) of the Truth in Lending Act (15 U.S.C. 1650(a)(7)) (including a loan under a State or local education loan program), originated by the bank for a student at an “institution of higher education,” as that term is generally defined in sections 101 and 102 of the Higher Education Act of 1965 (20 U.S.C. 1001 and 1002) and the implementing regulations published by the U.S. Department of Education, with interest rates and fees no greater than those of comparable education loans offered directly by the U.S. Department of Education. It further provides that such rates and fees are specified in section 455 of the Higher Education Act of 1965 (20 U.S.C. 1087e).

The agencies proposed to add this definition of “low-cost education loan” to § ____.12, with changes to update a citation, applying the definition only to private loans, as provided in section 140(a)(7) of the Truth in Lending Act (15 U.S.C. 1650(a)(8)), and other minor wording changes. This definition was needed for the proposal to consider the responsiveness of credit products and programs to the needs of low- and moderate-income individuals, including through low-cost education loans, in the proposed Retail and Products Service Test.¹⁷⁴ As with the current rule, this proposed definition leveraged the statutory definitions of related terms.

Specifically, the agencies proposed to define “low-cost education loan” to mean any private education loan, as defined in section 140(a)(7) of the Truth in Lending Act (15 U.S.C. 1650(a)(8)) (including a loan under a State or local education loan program), originated by the bank for a student at an “institution of higher education,” as generally defined in sections 101 and 102 of the Higher Education Act of 1965 (20 U.S.C. 1001 and 1002) and the implementing regulations published by the U.S. Department of Education, with interest rates and fees no greater than those of comparable education loans offered directly by the U.S. Department of Education. Such rates and fees are specified in section 455 of the Higher Education Act of 1965 (20 U.S.C. 1087e). The agencies did not receive any comments concerning the proposed

definition of “low-cost education loan” and adopt it as proposed in the final rule with one technical change to replace the reference to U.S. Department of Education regulations with the regulatory citation, 34 CFR part 600.

Low-Income Credit Union

The agencies proposed to add a definition for “low-income credit union (LICU)” in support of various proposed provisions related to community development. As discussed further in the section-by-section analysis of § ____.13, Consideration of community development loans, investments, and services, the agencies proposed to create a category of “community development” that would comprise activities with MDIs, WDI, LICUs, or CDFIs.¹⁷⁵ In addition, the agencies proposed to consider, as a factor in evaluating the impact and responsiveness of any community development activity, whether the activity supports an MDI, WDI, LICU, or Treasury Department-certified CDFI.¹⁷⁶

The agencies proposed to define LICU as having the same meaning given to that term in NCUA’s regulations, 12 CFR 701.34. The NCUA’s regulations provide, in part, that based on data obtained through examinations, the NCUA will notify a Federal credit union that it qualifies for designation as a LICU if a majority of its membership qualify as low-income members.¹⁷⁷

The agencies did not receive any comments concerning the proposed definition of “LICU” and adopt it as proposed in the final rule.

Low-Income Housing Tax Credit

The final rule includes a new definition for “Low-Income Housing Tax Credit (LIHTC),” not included in the proposal, to clarify that “Low-Income Housing Tax Credit” in the CRA regulations is a reference to a Federal program. This term is utilized in §§ ____.13, ____.15, and ____.42. Accordingly, the agencies are adopting a definition of “Low-Income Housing Tax Credit (LIHTC)” in the final rule to mean a Federal tax credit for housing persons of low income pursuant to section 42 of the Internal Revenue Code of 1986 (26 U.S.C. 42).

Major Product Line

The final rule includes a new definition for “major product line,” not included in § ____.12 of the proposal. In the proposal, the agencies described the concept of major product line in

§ ____.22. In the final rule, instead of including the concept solely in § ____.22, the agencies are also adding a definition for “major product line” in § ____.12 because the term is used outside of § ____.22 and the agencies recognized it was more appropriate as a defined term. However, in the final rule the agencies are modifying what constitutes a “major product line.” The new definition explains that “major product line” means a product line that the appropriate Federal financial supervisory agency evaluates in a particular Retail Lending Test Area, pursuant to § ____.22(d)(2) and paragraphs II.b.1 and II.b.2 to appendix A of the final rule. This definition is intended to identify the product lines with the greatest importance to the bank and its community and that, accordingly, are subject to evaluation under the Retail Lending Test. As described in the section-by-section analysis of § ____.22, Retail Lending Test, closed-end home mortgage loans, small business loans, and small farm loans are major product lines in a facility-based assessment area or outside retail lending area if the bank’s loans in the respective product line represent at least 15 percent of the bank’s reported loans and other loans considered across all product lines in the same geographic area during the evaluation period. This 15 percent standard is calculated based on a combination of loan dollars and loan count (see above for a discussion of the definition of “combination of loan dollars and loan count”). The same 15 percent standard is used to determine whether automobile loans are a major product line in a facility-based assessment area or outside retail lending area, if the bank is a majority automobile lender for the institution as a whole or opts into having its automobile lending evaluated. In addition, closed-end home mortgage loans and small business loans are a major product line in a particular calendar year for a retail lending assessment area if the product line meets or exceeds the threshold requiring delineation of a retail lending assessment area pursuant to § ____.17 (*i.e.*, 150 reported closed-end home mortgage loans, or 400 reported small business loans, in each of the prior two calendar years). As discussed in the section-by-section analysis of § ____.22, the agencies determined that it was not appropriate to include open-end home mortgage loans or multifamily loans in the major product line definition in the final rule, as the agencies proposed.

¹⁷⁴ See proposed § ____.23(c)(1). This aspect of the proposal was intended to incorporate into the CRA regulations the statutory requirement that the agencies consider low-cost education loans provided to low-income borrowers as a factor in evaluating a bank’s record of helping to meet the credit needs of its entire community. See 12 U.S.C. 2903(d). For further discussion, see the section-by-section analysis of § ____.23.

¹⁷⁵ See proposed § ____.13(j).

¹⁷⁶ See proposed § ____.15(b)(3).

¹⁷⁷ See 12 CFR 701.34(a)(1).

Majority Automobile Lender

The final rule includes a new definition for “majority automobile lender,” not included in the proposal, defined to mean a bank for which more than 50 percent of its home mortgage loans, multifamily loans, small business loans, small farm loans, and automobile loans were automobile loans, as determined pursuant to paragraph II.b.3 of appendix A. Paragraph II.b.3 of appendix A includes the provisions of the final rule that identify the banks for which evaluation of automobile lending is mandatory in each facility-based assessment area or in an outside retail lending area in which automobile lending represents a major product line.

As described in the section-by-section analysis of § ____.22, a bank is considered a majority automobile lender if its automobile loans originated and purchased over the combined two-calendar-year period preceding the first year of the evaluation period exceeded 50 percent, based on a combination of loan dollars and loan count, of the bank’s lending across specified categories. Specifically, the final rule calculates the 50 percent standard based on the following loan categories: home mortgage loans;¹⁷⁸ multifamily loans; small business loans; small farm loans; and automobile loans originated and purchased overall.

The agencies intend this new definition to be a clarifying change and have added it to make the regulatory text in § ____.22 and appendix A less complex and readable.

Metropolitan Area

The agencies proposed to add a definition of “metropolitan area” because the term is used throughout the rule to describe areas where the agencies will evaluate a bank. Specifically, the agencies proposed to define “metropolitan area” to mean any MSA, combined MSA, or metropolitan division as that term is defined by the Director of the Office of Management and Budget (Director of the OMB).¹⁷⁹

¹⁷⁸ See the definition of “home mortgage loan” in final § ____.12.

¹⁷⁹ The CRA statute defines the term “metropolitan area” to mean “any primary metropolitan statistical area, metropolitan statistical area, or consolidated metropolitan statistical area, as defined by the Director of the OMB, with a population of 250,000 or more, and any other area designated as such by the appropriate Federal financial supervisory agency.” 12 U.S.C. 2906(e)(2). The agencies did not propose to include “primary metropolitan statistical area” or “consolidated metropolitan area” because the Director of the OMB no longer uses these terms. The agencies exercised their discretion to define this term in the final rule to include all MSAs, without regard to whether it has a population of 250,000 or more.

The agencies did not receive any comments related to the proposed “metropolitan area” definition. However, the agencies are adopting this definition with several revisions. First, the agencies are removing reference to “combined MSA” from the definition because “combined MSA” is not a term defined by the Director of the OMB. Second, the agencies are removing reference to “metropolitan division” from the definition. Metropolitan divisions are parts of certain populous MSAs, so the agencies determined that the term is not necessary and that it added complexity to separately list both terms in the “metropolitan area” definition. For example, any county in a metropolitan division would also be in an MSA. Finally, the agencies are removing the phrase “as defined by the Director of the Office of Management and Budget” from the definition. As discussed below, the term “MSA” is defined in the final rule to mean a metropolitan statistical area defined by the Director of the OMB. Accordingly, “metropolitan area” in the final rule means any MSA.

Metropolitan Division

The current CRA regulations define “metropolitan division” to mean a metropolitan division as defined by the Director of the OMB.¹⁸⁰ The agencies proposed this same definition, with a minor technical change. Specifically, the agencies replaced the phrase “means a metropolitan division as defined” with the phrase “has the same meaning given to that term.” The agencies did not receive any comments related to the proposed definition of “metropolitan division,” and are adopting the definition as proposed in the final rule.

Military Bank

The agencies proposed to add a new definition of “military bank” in support of proposed § ____.16, which would provide an exception to certain facility-based assessment area delineation requirements for military banks.¹⁸¹ Specifically, the agencies proposed to define “military bank” to mean a bank whose business predominately consists of serving the needs of military personnel who serve or have served in the Armed Forces (including the U.S. Air Force, U.S. Army, U.S. Coast Guard, U.S. Marine Corps, and U.S. Navy) or dependents of military personnel, basing this definition on language in the

¹⁸⁰ See current 12 CFR ____.12(q).

¹⁸¹ See proposed § ____.16(d). See also the section-by-section analysis of § ____.16 for further discussion of this provision.

CRA statute.¹⁸² The agencies proposed this definition to increase clarity and consistency in the CRA regulations.

A commenter provided input on the proposed definition of “military bank.” Although expressing support for inclusion of a definition of “military bank,” the commenter expressed concern that the agencies’ proposed definition is too narrow and recommended that the word “predominantly” be defined to include “a bank whose most important customer group is military personnel or their dependents,” as in the OCC 2020 CRA Final Rule. The commenter noted that this qualification should lead to the extension of the “military bank” definition to all financial institutions with a commitment, mission, or business model to serve the military community exclusive of all other communities. The commenter also suggested that the definition of “military bank” should include on-base branches of financial institutions that do not otherwise fit within the definition so that branches on military bases could benefit from the CRA’s geographic assessment area exception without extending this treatment to the larger, non-military financial institution of which they are part. Further, this commenter expressed support for the proposed definition’s inclusion of those who serve or have served in the Armed Forces or dependents of military personnel. Finally, the commenter noted that the definition of “military bank” should include the U.S. Space Force, established in 2019, in the definition’s listing of military service branches.

The agencies have made substantive edits to the proposed definition of “military bank” in response to these comments. First, the agencies agree that “predominantly” should be defined to clarify that a “military bank” is a bank whose most important customer group is military personnel or their dependents. This added language is consistent with the interpretation of “predominantly” in the preamble to the 1979 CRA rulemaking¹⁸³ and codifies a decades-old interpretation that “predominantly” is not based on a numerical standard.¹⁸⁴ Additionally, the

¹⁸² See 12 U.S.C. 2902(4) (“A financial institution whose business predominately consists of serving the needs of military personnel who are not located in a defined geographic area may define its ‘entire community’ to include its entire deposit customer base without regard to geographic proximity.”). The agencies note that the statute uses the term “predominately,” however, the more common spelling is “predominantly,” and accordingly, the agencies have used that term instead.

¹⁸³ 44 FR 18163, 18164 (Mar. 27, 1979).

¹⁸⁴ *Id.*

agencies believe this final rule regulatory text comports with the language in the CRA statute. Second, the agencies agree with the commenter that the new U.S. Space Force should be included in the definition as a branch of the U.S. Armed Forces.

The agencies, however, declined to adopt the commenter's suggestion that the definition should include on-base branches of financial institutions that do not otherwise fit within the definition. The agencies believe such revision would be inconsistent with the CRA statute's provision regarding military banks, which refers to the business of the financial institution as predominantly consisting of serving the needs of military personnel, and not branches of a financial institution.¹⁸⁵

For the reasons stated above, the agencies are adopting a definition of "military bank" to mean a bank whose business predominantly consists of serving the needs of military personnel who serve or have served in the U.S. Armed Forces (including the U.S. Air Force, U.S. Army, U.S. Coast Guard, U.S. Marine Corps, U.S. Navy, and U.S. Space Force) or their dependents. A bank whose business predominantly consists of serving the needs of military personnel or their dependents means a bank whose most important customer group is military personnel or their dependents.

Minority Depository Institution

Current Approach and the Agencies' Proposal

The agencies proposed to add a definition of "minority depository institution (MDI)" to support the provisions in the proposal related to community development. As discussed above, and further in the section-by-section analysis of § _____.13(k), the agencies proposed to create a category of "community development" that would comprise activities with MDIs, WDIs, LICUs, or CDFIs.¹⁸⁶ In addition, the agencies proposed to consider, as a factor in evaluating the impact and responsiveness of any community development activity, whether the activity supports an MDI, WDI, LICU, or Treasury Department-certified CDFI.¹⁸⁷ The proposed definitions also account for a provision in the CRA statute providing that the amount of any bank contribution or loss in connection with donating, selling on favorable terms, or making available on a rent-free basis any

branch of the bank located in a predominantly minority neighborhood to an MDI or WDI may be a factor in determining whether the bank is meeting the credit needs of its community, which includes specific definitions of MDI and WDI.¹⁸⁸

The agencies structured the proposed "MDI" definition to provide two avenues through which an institution may qualify as an MDI. The agencies pursued this dual track structure to both ensure consistency with the CRA statute and incorporate the agencies' current policies for determining what institutions qualify as "minority-owned financial institutions" under 12 U.S.C. 2903(b). First, the agencies determined that the proposed "MDI" definition should incorporate the statutory definition of "minority depository institution" to ensure consistency with the CRA statute, which applies to certain transactions involving branches. Specifically, under 12 U.S.C. 2907 (*i.e.*, the statutory provision concerning donating, selling on favorable terms, or making certain branches available on a rent-free basis to a minority depository institution), "minority depository institution" is defined as a depository institution (as defined in 12 U.S.C. 1813(c)): (1) more than 50 percent of the ownership or control of which is held by 1 or more minority individuals; and (2) more than 50 percent of the net profit or loss of which accrues to 1 or more minority individuals. The agencies note that this definition is required for the narrow set of branching activities referenced in 12 U.S.C. 2907.

More broadly, 12 U.S.C. 2903 states that, in assessing an institution's record of helping to meet the credit needs of the entire community, the agencies may consider, "as a factor capital investment, loan participation, and other ventures undertaken by the institution in cooperation with *minority- and women-owned financial institutions* and LICUs provided that these activities help meet the credit needs of local communities in which such institutions and credit unions are chartered."¹⁸⁹ Unlike 12 U.S.C. 2907, 12 U.S.C. 2903 does not define the terms "minority-owned financial institution" or "women-owned financial institution." Given the absence of statutory definitions, the agencies, through their respective supervisory authority, have applied criteria for determining which institutions are considered minority- or women-owned financial institutions when interpreting

CRA.¹⁹⁰ Therefore, the second aspect of the proposed "MDI" definition was designed to capture those institutions that the agencies recognize as "minority-owned financial institutions" pursuant to their current policies.

Specifically, the agencies proposed to define an "MDI," for purposes other than the specified branch-related transactions under 12 U.S.C. 2907, as a bank that: (1) meets the definition under 12 U.S.C. 2907(b)(1);¹⁹¹ (2) is a minority depository institution as defined in section 308 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) (12 U.S.C. 1463 note);¹⁹² or (3) is considered to be a minority depository institution by the appropriate Federal banking agency. This proposed definition is derived in part from the definition of "minority depository institution" in the

¹⁹⁰ Generally, the agencies have considered institutions that qualify under their MDI policies to qualify under section 2903. See OCC, News Release 2013-94, "Comptroller Curry Tells Minority Depository Institutions OCC Rules Make It Easier for Minority Institutions to Raise Capital," "Policy Statement on Minority National Banks and Federal Savings Associations" (June 13, 2013), <https://www.occ.gov/news-issuances/news-releases/2013/nr-occ-2013-94.html> (permits a bank that no longer meet the minority ownership requirement to continue to be considered a minority depository institution if it primarily serves the credit and economic needs of the community in which it is chartered and serves a predominantly minority community); Board, SR 21-6/CA 21-4: "Highlighting the Federal Reserve System's Partnership for Progress Program for Minority Depository Institutions and Women's Depository Institutions" (Mar. 5, 2021), <https://www.federalreserve.gov/supervisionreg/srletters/SR2106.htm> (permits designation as a minority depository institution if the majority of a bank's board of directors consists of minority individuals and the community that the bank serves is predominantly minority); and FDIC, Statement of Policy Regarding Minority Depository Institutions, 86 FR 32728, 32732 (June 23, 2021) (permits designation as a minority depository institution if a majority of the bank's board of directors consists of minority individuals and the community that the bank serves is predominantly minority).

¹⁹¹ The agencies incorporated section 2907 into this second prong of the definition to ensure that banks are not limited to the engaging in the specified branch-related activities with institutions that meet the statutory definition but are not otherwise consistent with the agencies' MDI designation policies.

¹⁹² The agencies' MDI designation policies are based on section 308 of the FIRREA, and the agencies determined it was appropriate to expressly reference that statute in the definition for further consistency. Under section 308, "minority financial institution" means any depository institution that— (A) if a privately owned institution, 51 percent is owned by one or more socially and economically disadvantaged individuals; (B) if publicly owned, 51 percent of the stock is owned by one or more socially and economically disadvantaged individuals; and (C) in the case of a mutual institution where the majority of the Board of Directors, account holders, and the community which it services is predominantly minority. Further, under section 308, the term "minority" means any black American, Native American, Hispanic American, or Asian American.

¹⁸⁵ See 12 U.S.C. 2902(4).

¹⁸⁶ See proposed § _____.13(j).

¹⁸⁷ See proposed § _____.15(b)(3) and the accompanying section-by-section analysis of § _____.15.

¹⁸⁸ See 12 U.S.C. 2907.

¹⁸⁹ 12 U.S.C. 2903(b) (emphasis added).

Emergency Capital Investment Program¹⁹³ enacted as part of the Consolidated Appropriations Bill of 2021,¹⁹⁴ revised to be appropriate for the CRA. The agencies stated that using this statutory-based definition for purposes of CRA promotes further consistency across government programs.

Comments Received

A number of commenters addressed the proposed “MDI” definition. For example, a commenter supported a definition that would include both banks owned by minority individuals and minority-operated banks. According to the commenter, successful and growing banks need to raise outside capital, which could result in the bank no longer meeting the minority-owned definition and would therefore have the unintended consequence of keeping minority banks small.

In response to the agencies’ question on whether to include minority insured credit unions recognized by the NCUA in the “MDI” definition, most commenters stated that such credit unions should be included. In addition, some commenters recommended that State-insured MDI credit unions and Puerto Rico’s cooperativas also be included in this category. Commenters generally noted that such credit unions and related entities share the same purpose as MDIs, are insured and supervised, and accordingly should be treated the same as MDI banks. A commenter stated that this addition could expand the number of MDIs available to partner with banks on CRA activities. Although no commenters expressed opposition to including MDI credit unions in the definition, a commenter did suggest that smaller credit union MDIs could be included, but those with more than 50,000 members or more should be subject to additional scrutiny to ensure that 51 percent of its owners are people of color.

Final Rule

The agencies are adopting the proposed “MDI” definition in the final rule with several technical edits. First, in paragraph (1), the agencies removed the parenthetical, “(i.e., donating, selling on favorable terms (as determined by the [Agency]), or making available on a rent-free basis any branch of the bank, which is located in a predominately minority neighborhood).” This language

paraphrased the cited statute, 12 U.S.C. 2907(b)(1), and is therefore not necessary. Second, the agencies made non-substantive wording changes to the definition to improve its structure and readability and to promote consistency with the statutes cited in the definition. Accordingly, the final rule defines “minority depository institution (MDI)” to mean: (1) for purposes of activities conducted pursuant to 12 U.S.C. 2907(a), “minority depository institution” as defined in 12 U.S.C. 2907(b)(1); and (2) for all other purposes: (i) a “minority depository institution” as defined in 12 U.S.C. 2907(b)(1); (ii) a “minority depository institution” as defined in section 308 of the FIRREA (12 U.S.C. 1463 note); or (iii) a depository institution considered to be a minority depository institution by the appropriate Federal banking agency. For purposes of this definition, “appropriate Federal banking agency” has the meaning given to it in 12 U.S.C. 1813(q).

As also discussed in the section-by-section analysis of § _____.13(k), the agencies considered but are not including minority credit unions in the “MDI” definition. Unlike MDIs, which are independently reviewed by each agencies’ staff, credit unions self-certify MDI status and the NCUA does not verify or certify the accuracy of this status.¹⁹⁵ The agencies also note that there is a large overlap between minority credit unions and LICUs.¹⁹⁶ Thus, a large percentage of minority credit unions will be eligible under the rule for community development consideration based on their LICU status.

In response to comments about including banks that are owned by minority individuals and minority-operated banks in the “MDI” definition, the agencies recognize that banks have varied ownership structures and need to raise capital and have considered these issues when designating MDIs. The proposed and final rule both include as a component of the definition of “MDI” banks that are considered to be minority depository institutions by the appropriate Federal banking agency. This component of the definition provides flexibility and incorporates each agency’s applicable policies regarding the designation of MDIs.

¹⁹⁵ See 80 FR 36356, 36357 (June 24, 2015).

¹⁹⁶ See NCUA, “Minority Depository Institutions Annual Report to Congress,” 2 (2021), <https://ncua.gov/files/publications/2021-mdi-congressional-report.pdf> (approximately 81% of MDIs also held a designation as LICUs as Dec. 31, 2021 (i.e., 412 out of 509 MDIs)).

Mission-Driven Nonprofit Organization

The agencies are adding a new definition for “mission driven nonprofit organization,” not included in the proposal, to support this term’s use in §§ _____.13 and _____.42 in the final rule. Specifically, the final rule defines “mission-driven nonprofit organization” to mean an organization described in section 501(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 501(c)(3)) and exempt from taxation under section 501(a) of such Code that benefits or serves primarily low- or moderate-income individuals or communities, small businesses, or small farms.

The agencies are adopting this definition primarily to support revisions made in the final rule, based on consideration of comments, to expand the government plan eligibility criteria in the place-based community development categories to include plans, programs, or initiatives of mission-driven nonprofit organizations.¹⁹⁷ The final rule also provides services that are conducted with a mission-driven nonprofit organization as one example of a qualifying community supportive service in § _____.13(d). These aspects of the final rule are discussed in greater detail in the section-by-section analysis of § _____.13. The final rule also uses the term mission-driven nonprofit organization for consistency as an example of detail that could be provided about a community development loan or community development investment in final § _____.42.

The agencies included the first part of this definition to explicitly state that an organization must be a 501(c)(3) organization to qualify as a mission-driven nonprofit organization. Further, the definition specifies that these organizations benefit or serve primarily low- or moderate-income individuals, small businesses, or small farms. The agencies believe that, with these two core components, the definition of mission-driven nonprofit organization is appropriately tailored to capture entities that are dedicated to benefiting and serving low- and moderate-income individuals or communities, small businesses, or small farms while being sufficiently narrow not to permit a broad expansion of eligibility criteria under the place-based community development categories. The agencies also believe that this definition is consistent with the types of organizations that the agencies proposed would be partners with banks in conducting community development.

¹⁹⁷ See final § _____.13(e) through (j).

¹⁹³ See 12 U.S.C. 4703a.

¹⁹⁴ See Public Law 116–260, 134 Stat. 1182 (Dec. 27, 2020).

For example, the proposal included a discussion of nonprofit organizations in reference to the proposed affordable housing category of community development in proposed § _____.13(b), as well as in relation to community supportive services in proposed § _____.13(d).¹⁹⁸

MSA

Under the current CRA regulations, the agencies define “MSA” to mean a metropolitan statistical area as defined by the Director of the OMB.¹⁹⁹ The agencies proposed maintaining this definition but changing the defined term from “MSA” to “metropolitan statistical area (MSA)” and with minor technical wording changes. The agencies did not receive any comments on this proposed definition. However, after further consideration, the agencies are reverting back to the current defined term “MSA” in the final rule because “MSA” is the term known and understood by the industry. The agencies are also reverting the wording of the definition back to its current form to be consistent with the wording of other definitions and making minor technical changes to reference OMB delineation and to add OMB authority citations. Accordingly, the agencies are defining “MSA” to mean a metropolitan statistical area delineated by the Director of the Office of Management and Budget, pursuant to 44 U.S.C. 3504(e)(3) and (10), 31 U.S.C. 1104(d), and Executive Order 10253 (June 11, 1951).

Mortgage-Related Definitions

Under the current CRA regulations, the agencies define “home mortgage loan” to mean a closed-end mortgage loan or an open-end line of credit as defined under 12 CFR 1003.2 (Regulation C), the CFPB’s HMDA implementing regulations, that is not an excluded transaction under 12 CFR 1003.3(c)(1) through (10) and (13).²⁰⁰

¹⁹⁸ See proposed § _____.13(b)(2)(ii) and (d)(1); see also 87 FR 33884, 33896 (June 3, 2022).

¹⁹⁹ See current 12 CFR _____.12(r).

²⁰⁰ See current 12 CFR _____.12(l). Excluded transactions under 12 CFR 1003.3(c)(1) through (10) and (13) are as follows: (1) a closed-end mortgage loan or open-end line of credit originated or purchased by a financial institution acting in a fiduciary capacity; (2) a closed-end mortgage loan or open-end line of credit secured by a lien on unimproved land; (3) temporary financing; (4) the purchase of an interest in a pool of closed-end mortgage loans or open-end lines of credit; (5) the purchase solely of the right to service closed-end mortgage loans or open-end lines of credit; (6) the purchase of closed-end mortgage loans or open-end lines of credit as part of a merger or acquisition, or as part of the acquisition of all of the assets and liabilities of a branch office as defined in § 1003.2(c); (7) a closed-end mortgage loan or open-end line of credit, or an application for a closed-end mortgage loan or open-end line of credit, for

The agencies proposed to amend the current “home mortgage loan” definition to refer to an “open-end home mortgage loan” rather than an “open-end line of credit,” with no intent to change the meaning. The agencies also proposed to remove the cross-reference to the CFPB’s Regulation C and add new definitions for “closed-end home mortgage loan” and “open-end home mortgage loan,” which would have the same meanings given to “closed-end mortgage loan” and “open-end line of credit” in 12 CFR 1003.2(d) and (o), respectively, excluding multifamily loans as defined in proposed § _____.12.²⁰¹ “Closed-end home mortgage loan” is defined in 12 CFR 1003.2(d) to mean an extension of credit that is secured by a lien on a dwelling and that is not an open-end line of credit under the HMDA regulations. “Open-end line of credit” is defined in 12 CFR 1003.2(o) to mean an extension of credit that is secured by a lien on a dwelling and is an open-end credit plan as defined in CFPB’s Regulation Z, 12 CFR 1026.2(a)(20),²⁰² but without regard to whether the credit is consumer credit, as defined in 12 CFR 1026.2(a)(12),²⁰³ is extended by a creditor, as defined in 12

which the total dollar amount is less than \$500; (8) the purchase of a partial interest in a closed-end mortgage loan or open-end line of credit; (9) a closed-end mortgage loan or open-end line of credit used primarily for agricultural purposes; (10) a closed-end mortgage loan or open-end line of credit that is or will be made primarily for a business or commercial purpose, unless the closed-end mortgage loan or open-end line of credit is a home improvement loan under § 1003.2(i), a home purchase loan under § 1003.2(j), or a refinancing under § 1003.2(p); and (11) a transaction that provided or, in the case of an application, proposed to provide new funds to the applicant or borrower in advance of being consolidated in a New York State consolidation, extension, and modification agreement classified as a supplemental mortgage under New York Tax Law section 255; the transaction is excluded only if final action on the consolidation was taken in the same calendar year as final action on the new funds transaction.

²⁰¹ As discussed further below, the agencies proposed to define “multifamily loan” as “a loan for a ‘multifamily dwelling’ as defined in 12 CFR 1003.2(n).” Multifamily dwelling is defined in 12 CFR 1003.2(n) as “a dwelling, regardless of construction method, that contains five or more individual dwelling units.”

²⁰² “Open-end credit” means consumer credit extended by a creditor under a plan in which: (1) The creditor reasonably contemplates repeated transactions; (2) The creditor may impose a finance charge from time to time on an outstanding unpaid balance; and (3) The amount of credit that may be extended to the consumer during the term of the plan (up to any limit set by the creditor) is generally made available to the extent that any outstanding balance is repaid. See 12 CFR 1003.2(o) and 100.1026.2(a)(20).

²⁰³ “Consumer credit” means credit offered or extended to a consumer primarily for personal, family, or household purposes. See 12 CFR 1026.2(a)(12).

CFR 1026.2(a)(17),²⁰⁴ or is extended to a consumer, as defined in 12 CFR 1026.2(a)(11).²⁰⁵

The agencies proposed to add separate definitions for “closed-end home mortgage loan” and “open-end home mortgage loan,” because, as discussed further in the section-by-section analysis of § _____.22, given their distinct characteristics, these types of loans would be considered separately under the proposed Retail Lending Test. The agencies’ proposed definitions of these terms are consistent with the current “home mortgage loan” definition, which cross-references 12 CFR 1003.2 to define closed-end home mortgage loans and open-end lines of credit. The agencies excluded multifamily loans from the definitions of “closed-end home mortgage loan” and “open-end home mortgage loan” because the proposal included a separate definition for “multifamily loan” that covers different transactions (as discussed below in the section-by-section analysis). This exclusion was

²⁰⁴ “Creditor” means a person who regularly extends consumer credit that is subject to a finance charge or is payable by written agreement in more than four installments (not including a down payment), and to whom the obligation is initially payable, either on the face of the note or contract, or by agreement when there is no note or contract. For purposes of §§ 1026.4(c)(8) (Discounts), 1026.9(d) (Finance charge imposed at time of transaction), and 1026.12(e) (Prompt notification of returns and crediting of refunds), a person that honors a credit card. For purposes of subpart B, any card issuer that extends either open-end creditor credit that is not subject to a finance charge and is not payable by written agreement in more than four installments. For purposes of subpart B (except for the credit and charge card disclosures contained in §§ 1026.60 and 1026.9(e) and (f), the finance charge disclosures contained in §§ 1026.6(a)(1) and (b)(3)(i) and 1026.7(a)(4) through (7) and (b)(4) through (6) and the right of rescission set forth in § 1026.15) and subpart C, any card issuer that extends closed-end credit that is subject to a finance charge or is payable by written agreement in more than four installments. A person regularly extends consumer credit only if it extended credit (other than credit subject to the requirements of § 1026.32) more than 25 times (or more than 5 times for transactions secured by a dwelling) in the preceding calendar year. If a person did not meet these numerical standards in the preceding calendar year, the numerical standards shall be applied to the current calendar year. A person regularly extends consumer credit if, in any 12-month period, the person originates more than one credit extension that is subject to the requirements of § 1026.32 or one or more such credit extensions through a mortgage broker. See 12 CFR 1026.2(a)(17).

²⁰⁵ “Consumer” means a cardholder or natural person to whom consumer credit is offered or extended. However, for purposes of rescission under §§ 1026.15 and 1026.23, the term also includes a natural person in whose principal dwelling a security interest is or will be retained or acquired, if that person’s ownership interest in the dwelling is or will be subject to the security interest. For purposes of §§ 1026.20(c) through (e), 1026.36(c), 1026.39, and 1026.41, the term includes a confirmed successor in interest. See 12 CFR 1026.2(a)(11).

necessary because, under the proposal, the agencies could consider multifamily loans, unlike other closed-end home mortgage loans, under the Community Development Financing Test in § _____.24.²⁰⁶ The agencies also proposed this exclusion of multifamily loans because multifamily loans were a distinct category of retail loan which could qualify as a major product line under the Retail Lending Test in § _____.22.

A commenter requested that the excluded transaction language in the definition of “home mortgage loan” referencing 12 CFR 1003.3(c)(1) through (10) and (13) be narrowed to 12 CFR 1003.3(c)(1),²⁰⁷ (5),²⁰⁸ (7) through (10),²⁰⁹ and (13).²¹⁰ In particular, the commenter objected to the current definition’s exclusion of loans secured by unimproved land (12 CFR 1003.3(c)(2)), expressing the view that this would penalize financial institutions for lending to builders or individuals seeking to build in low- and moderate-income communities. Similarly, the commenter objected to the exclusion of temporary financing (12 CFR 1003.3(c)(3)), such as bridge financing or a loan for home construction, asserting that this could undermine a financial institution’s ability to finance the construction of homes in low- and moderate-income communities, even if the financing is only on a temporary basis. The commenter objected to excluding from the “home mortgage loan” definition purchased closed-end home mortgage loans and open-end lines of credit, whether as a pool of credits or through an acquisition or merger (12 CFR 1003.3(c)(4) and (6)), explaining that financial institutions are purchasing whole loans and servicing rights and not merely purchasing an investment vehicle, and that purchasing loan pools also permits financial institutions to meet the credit needs of their communities despite not having the resources to generate these loans one transaction at a time.

The agencies decline to revise the excluded transactions language. As under the current CRA regulations, the agencies intend to leverage HMDA data in the final rule, *i.e.*, data reported pursuant to 12 CFR part 1003, which allows for sufficient data for analysis while not increasing the data collection or reporting burden on these banks, as part of the CRA evaluation framework.

If the agencies narrowed the number of excluded transactions as requested by the commenter, HMDA reporters would be required to produce additional data that exceeds their current HMDA reporting obligations, which would both increase burden for banks and add complexity to CRA examinations.

Further, the agencies note that the exclusion of purchased closed-end home mortgage loans and open-end lines of credit from the “home mortgage loan” definition does not mean that they are not considered under the CRA regulations. For a more detailed discussion of the CRA regulations’ consideration of purchased loans, see the section-by-section analysis of final § _____.22, Retail Lending Test.

After consideration of commenters’ concerns and recommendations and further review of the proposed definitions in light of other aspects of the final rule, the agencies are adopting the definitions of “home mortgage loan,” “closed-end home mortgage loan,” and “open-end home mortgage loan” with technical changes. First, the agencies have moved the HMDA exclusions from the definition of “home mortgage loan” to the definitions of “closed-end home mortgage loan” and “open-end home mortgage loan,” where the exclusions are more appropriately located. Second, the agencies have removed the specific paragraph designations in the cross-references to the HMDA definitions so that they now read “12 CFR 1003.2” instead of 12 CFR 1003.2(d) and (o) so that these cross-references remain accurate if the CFPB modifies this section in the future.

Accordingly, under the final rule:

- “home mortgage loan” means a closed-end home mortgage loan or an open-end home mortgage loan as these terms are defined in final § _____.12;
- “closed-end home mortgage loan” has the same meaning given to the term “closed-end mortgage loan” in 12 CFR 1003.2, excluding loan transactions set forth in 12 CFR 1003.3(c)(1) through (10) and (13) and multifamily loans as defined in final § _____.12; and
- “open-end home mortgage loan” has the same meaning as given to the term “open-end line of credit” in 12 CFR 1003.2, excluding loan transactions set forth in 12 CFR 1003.3(c)(1) through (10) and (13) and multifamily loans as defined in final § _____.12.

Multifamily Loan

The agencies proposed to add a new definition of “multifamily loan” and define it to mean a loan for a “multifamily dwelling” as defined in 12 CFR 1003.2(n) in the CFPB’s Regulation C, which implements HMDA.

Multifamily dwelling is defined in 12 CFR 1003.2(n) to mean a dwelling, regardless of construction method, that contains five or more individual dwelling units. The agencies intended the proposed definition to correspond to the proposal to treat multifamily loans separately from closed-end and open-end home mortgage loans, given their distinct characteristics. The proposal for considering “multifamily loans” is discussed in detail in the section-by-section analyses of §§ _____.22 (Retail Lending Test) and _____.13(b) (affordable housing category of community development).

The agencies did not receive any comments on this definition and are adopting it as proposed, with two changes. First, the agencies are replacing “loan” with “an extension of credit that is secured by a lien” in the final rule to make this term consistent with HMDA. Second, the agencies have removed the specific paragraph designations in the cross-references to the CFPB’s definition so that it now reads “12 CFR 1003.2” instead of “12 CFR 1003.2(n).” Accordingly, “multifamily loan” is defined in the final rule to mean an extension of credit that is secured by a lien on a “multifamily dwelling” as defined in 12 CFR 1003.2.

Multistate MSA

The agencies proposed to add a new definition of “multistate metropolitan statistical area (multistate MSA)” and define it to have the same meaning given to that term by the Director of the OMB. As discussed in detail in the section-by-section analysis of § _____.28, under the proposal, the agencies would assign conclusions for a bank’s performance under each applicable performance test and ratings for a bank’s overall CRA performance across performance tests at the State, multistate MSA, and institution levels.²¹¹ The agencies did not receive any comments related to the proposed “multistate metropolitan statistical area” definition.

The agencies are adopting a definition of this term in the final rule with technical changes. First the agencies revised the definition to remove the cross-reference to the OMB definition and instead are defining the term to mean an MSA that crosses a State boundary, which is the agencies’ intended meaning of this term. The agencies made this revision to reflect the fact that “multistate metropolitan statistical area” is not a term defined by the Director of the OMB. Instead, the

²¹¹ See, e.g., proposed § _____.28 and appendices C, D, and E.

²⁰⁶ See proposed § _____.22(a)(5)(ii).

²⁰⁷ See 12 CFR 1003.3(c)(1).

²⁰⁸ See 12 CFR 1003.3(c)(5).

²⁰⁹ See 12 CFR 1003.3(c)(7) through (10).

²¹⁰ See 12 CFR 1003.3(c)(13).

Director of OMB defines the term “MSA,” and the final rule defines “MSA” by cross-referencing to this OMB definition. Second, consistent with the change discussed above under the definition of “MSA,” the agencies are replacing “metropolitan statistical area” with “MSA.” Thus, the resulting defined term will be “multistate MSA” instead of “multistate metropolitan statistical area.” Accordingly, “multistate MSA” is defined in the final rule to mean an MSA that crosses a State boundary.

Nationwide Area

The agencies proposed to add a new definition for “nationwide area” to support the proposal to evaluate a bank’s community development financing activities in a “nationwide area,” as discussed below in the section-by-section analyses of §§ _____.24 through _____.27; the proposal to evaluate large banks’ and certain intermediate banks’ retail lending performance in “outside retail lending areas,” as discussed in the section-by-section analysis of § _____.18, which would include the “nationwide area” outside of a bank’s assessment areas; the proposal’s impact and responsiveness review, as discussed in the section-by-section analysis of § _____.15; and the proposal’s data collection, maintenance, and reporting requirements, as discussed in the section-by-section analysis of § _____.42. Specifically, the agencies proposed that “nationwide area” would mean “the entire United States and its territories.”

The agencies received one comment requesting clarity on what the agencies meant by the term “nationwide area,” recommending that the agencies define this term to include the broader regional areas beyond defined multistate MSAs. In this way, the commenter theorized that banks could receive credit for financing activities like affordable housing in a particular region of the United States that cover multiple States but where that region is not a defined multistate MSA. This commenter misunderstands the scope of the proposed “nationwide area” definition. “Nationwide area” includes the entirety of the United States and its territories, and is not limited to multistate areas. The allocation of community development financing activities, including how an activity that benefits more than one State but not the entire nation will be attributed, is discussed in the section-by-section analysis of § _____.24. Thus, the agencies are adopting the definition of “nationwide area” as proposed in the final rule.

Native Land Area

The Agencies’ Proposal

The agencies proposed to add a new definition of “Native Land Area” to provide clarity in support of the proposal’s encouragement of activities that address the significant and unique community development challenges in these areas. The proposal sought to encourage these activities through the proposed establishment of a category of community development for qualifying activities in Native Land Areas,²¹² discussed in the section-by-section analysis of § _____.13(j), and by considering the impact and responsiveness of a bank’s community development activities that benefit Native communities, such as community development activities in Native Land Areas under § _____.13(j),²¹³ discussed in the section-by-section analysis of § _____.15(b)(8).

Native American land ownership is complex, and lands can have a complicated and intermingled mix of land ownership status involving various statutes, regulations, titles, and restrictions.²¹⁴ The agencies intended the proposed “Native Land Area” definition to be responsive to stakeholder feedback provided during outreach prior to the issuance of the proposal indicating support for a geographic definition broader than the definition of Indian country under 18 U.S.C. 1151, and to include lands such as Hawaiian Home Lands, as well as other lands typically considered Native and tribal lands with unique political status under established Federal Indian law. The proposed “Native Land Area” definition leveraged other Federal and State designations of Native and tribal lands, as well as the OCC 2020 CRA Final Rule, and included areas typically considered by the Bureau of Indian Affairs (BIA) and the U.S. Census Bureau as Native geographic areas. Accordingly, the proposed “Native Land Area” definition included all geographic areas delineated as U.S. Census Bureau American Indian/Alaska Native/Native Hawaiian (AIANNH) Areas and/or BIA Land Area Representations. For example, the proposed definition included State American Indian reservations established through a governor-appointed State liaison that provides the names and boundaries for

State-recognized American Indian reservations to the Census Bureau.

Specifically, under the proposal, “Native Land Area” would mean: (1) all land within the limits of any Indian reservation under the jurisdiction of the U.S. Government, as described in 18 U.S.C. 1151(a); (2) all dependent Indian communities within the borders of the United States whether within the original or subsequently acquired territory thereof, and whether within or without the limits of a State, as described in 18 U.S.C. 1151(b); (3) all Indian allotments, the Indian titles to which have not been extinguished, including rights-of-way running through the same, as defined in 18 U.S.C. 1151(c); (4) any land held in trust by the United States for Native Americans, as described in 38 U.S.C. 3765(1)(A); (5) reservations established by a State government for a tribe or tribes recognized by the State; (6) any Alaska Native Village as defined in 43 U.S.C. 1602(c); (7) lands that have the status of Hawaiian Home Lands as defined in section 204 of the Hawaiian Homes Commission Act, 1920 (42 Stat. 108), as amended; (8) areas defined by the U.S. Census Bureau as Alaska Native Village Statistical Areas, Oklahoma Tribal Statistical Areas, Tribal-Designated Statistical Areas, or American Indian Joint-Use Areas; and (9) land areas of State-recognized Indian tribes and heritage groups that are defined and recognized by individual States and included in the U.S. Census Bureau’s annual Boundary and Annexation Survey.

Comments Received

The agencies received many comments concerning the proposed “Native Land Area” definition, discussed below.

Geographic areas included in the definition. Some commenters expressed support for the geographic areas included in the proposed definition. For example, a commenter supported such an inclusive list given the past and ongoing discrimination against Indigenous people and communities. Another commenter recognized the proposal’s relatively comprehensive list of defined Native American lands, further indicating that accurately and comprehensively identifying Native lands is difficult because of the fragmented ownership of Native lands arising from historical Federal land allotment policies. This commenter also recommended that the agencies provide a single source file made available once the definition is agreed on. Another commenter expressed support for ensuring that all Native people in

²¹² See proposed § _____.13(l).

²¹³ See proposed § _____.15(b)(7).

²¹⁴ See, e.g., Congressional Research Service, “Tribal Land and Ownership Statuses: Overview and Selected Issues for Congress” (July 2021), <https://sgp.fas.org/crs/misc/R46647.pdf>.

Alaska and Hawaii would be covered under the definition.

In contrast, some commenters recommended broadening the definition to include additional geographic areas. Several other commenters supported the ability for tribes to designate lands eligible for CRA qualification, with some supporting the inclusion of “unceded” lands, *i.e.*, lands without a formal agreement with the government and controlled by non-tribal interests but that tribes consider historically Native lands, as part of the definition in light of prior Federal dispossession policies. Another commenter suggested that the definition should be connected to census geographies.

Several other comments recommended that the “Native Land Area” definition should include Native American Pacific Islands including Guam, American Samoa, and the Commonwealth of the Mariana Islands. A few commenters expressed support for adding tribal fee lands citing the loss of tribal lands due to earlier Federal policies aimed at dispossessing tribes, with one commenter stating that this would be consistent with the current Federal policy of encouraging tribal self-determination and with principles of tribal sovereignty. This commenter also noted that the process of gaining Federal trust status for tribal fee lands (which would then meet the definition of “Native Land Area” pursuant to proposed § ___.12, addressing lands held in trust) is expensive and time consuming.

Geographic areas outside of the proposed definition. Many commenters supported broadening the “Native Land Area” definition to include activities benefiting Native individuals and communities outside of proposed geographic areas. Several commenters asserted that activities benefiting Native Americans should qualify anywhere and cited that the majority of American Indian, Alaska Native, and Native Hawaiian people live outside the Native Land Areas covered by the proposed definition. A group of commenters further stated that the proposed definition would limit the ability of Native CDFIs, tribal governments, and other entities to secure CRA-qualified investments to support Native communities residing within their respective service areas but outside of the proposed “Native Land Area” definition. A commenter supported including service areas adjacent to reservations, where a large number of tribal members live or tribal programs are distributed, to help facilitate better community revitalization activities. However, alternatively, a commenter

asserted that qualification for activities should not extend past designated geographic areas.

Alternative approaches for designating geographic areas. A commenter suggested that, rather than focusing on activities in Native Land Areas, the agencies consider a metric-based determination for where activities could qualify, in conjunction with Native-led organizations and CDFIs, that would consider capital access in Native American communities. This commenter suggested that the agencies additionally include a weighting factor for banks investing in rural and remote Native American communities that might not have any credit or capital access. In support of these ideas, the commenter indicated that some populations covered in the “Native Land Area” definition have access to credit and successful economic development opportunities, while some Native American communities not in Native Land Areas as defined under the proposal do not. Another commenter asserted that the definition of “Native Land Area” should use an alternative geographic criterion for qualifying activities, instead including qualification for activities in census tracts with a greater than 40 percent Native American population and earning less than 100 percent of the average median family income.

Final Rule

The agencies are adopting the “Native Land Area” definition as proposed with a few technical changes. First, the agencies have revised paragraph (4) of the definition to include any land held in trust by the United States for tribes or Native Americans or tribally-held restricted fee land. This change more clearly effectuates the agencies’ intent in the proposal to include in the definition both individually- and tribally-owned restricted fee lands as well as land held in trust by the United States for both tribes and individuals. This change also aligns the definition with available BIA data, which covers both individually-held and tribally-held restricted fee and trust lands.²¹⁵ The agencies are also removing the cross-reference to “38 U.S.C. 3765(1)(A)” in paragraph (4) as redundant.²¹⁶ Finally, the agencies are making a technical change to paragraph (6), which covers Alaska Native villages, to use the term defined in the cited statute; as a result, the final rule

references “Any Native village, as defined in 43 U.S.C. 1602(c), in Alaska.”

The “Native Land Area” definition in the final rule is intended to align with existing and established Federal Indian law regarding lands and communities with unique political status. The final rule is also intended to be responsive to stakeholder feedback received at all stages of this rulemaking, indicating support for a comprehensive geographic definition of “Native Land Areas.” The final definition focuses on lands and communities that, as noted by commenters, have generally experienced little or no benefits from bank access or investments.

The agencies have carefully considered commenters’ suggestions for expanding the geographic areas included in the definition, and are sensitive to the many complexities underlying the development of a “Native Land Area” definition, including the impacts of varying historical policies regarding land ownership and political status.²¹⁷ However, the agencies are concerned that substantively expanding the “Native Land Area” definition could inadvertently create new precedent by incorporating lands without a similar unique political status as those lands included under the definition, and further could be impracticable where data is not currently collected, reported, or readily available. The agencies believe it is important for stakeholders and examiners to have access to and utilize a consistent and comparable data set.

The agencies also decline to expand the “Native Land Area” definition to incorporate areas outside of the proposed geographic areas where Native individuals may also reside, or to use alternative metrics for defining Native Land Areas. The agencies are concerned about precedential impact, as well as the practicality of implementation, such a change would have, particularly with a highly dispersed population. Further, complex land ownership structures associated with the lands falling within the final definition can make economic development in those lands particularly difficult, which the agencies believe support a more specific focus on those lands. The agencies note that activities benefiting Native individuals and

²¹⁵ See Bureau of Indian Affairs, Branch of Geospatial Support, “General Information for Geospatial Questions” (Sept. 5, 2023), <https://biamaps.geoplatform.gov/faq.html>.

²¹⁶ See 38 U.S.C. 3765(1)(A).

²¹⁷ See, e.g., U.S. Dept. of Interior, “Land Buy-Back Program for Tribal Nations,” <https://www.doi.gov/buybackprogram/fractionation> (discussing fractionation resulting from Federal allotment policies); Congressional Research Service, “Tribal Land and Ownership Statuses: Overview and Selected Issues for Congress” (July 2021), <https://sgp.fas.org/crs/misc/R46647.pdf> (discussing historical land policies).

communities outside a designated Native Land Area may qualify for CRA consideration under another community development purpose as provided in § _____.13. (For a detailed discussion of these community development categories under the final rule, see the section-by-section analysis of § _____.13.) For example, a loan to support the development of a multifamily housing project to benefit low- and moderate-income tribal individuals outside of a Native Land Area would qualify for consideration under § _____.13(b) (affordable housing) if a portion of the project's housing units are affordable.²¹⁸ The agencies also note that the final rule incorporates various impact and responsiveness review factors under § _____.15 for examiners to consider in evaluating a bank's community development activities. This includes an impact and responsiveness factor for areas with low levels of community development financing and activities serving low-income individuals and families that may apply to activities benefiting Native Americans living adjacent to or otherwise outside a Native Land Area.²¹⁹

Finally, as noted in the proposal, robust, publicly available data files ("shapefiles"), defining the boundaries of the geographic areas adopted in the final rule are actively maintained by the U.S. Census Bureau and BIA, respectively.²²⁰ The agencies anticipate making this data readily available to stakeholders as part of the agencies' regulatory implementation efforts, which, among other benefits, the agencies anticipate will facilitate stakeholders' ability to engage with confidence in CRA-eligible activities and enhance the transparency of the agencies' consideration of those activities.

In adopting the "Native Land Area" definition, the agencies sought to maintain consistency with established categories of Native Land Areas. On balance, the agencies believe the final rule's definition is as comprehensive as feasible to ensure alignment with current Federal Indian law and to support the rule with durable, publicly available data sources. This, in turn, will make identifying Native Land Areas practicable for stakeholders and

²¹⁸ See final § _____.13(b)(1) and (2), discussed in the section-by-section analysis of these provisions below.

²¹⁹ See final § _____.15(b)(2) and (7), discussed in the section-by-section analysis of these provisions below.

²²⁰ See U.S. Census Bureau, "AIANNH shapefile," <https://www2.census.gov/geo/tiger/TIGER2021/AIANNH/>; Bureau of Indian Affairs, "BIA Tract Viewer," <https://biamaps.geoplatform.gov/BIA-opendata/>.

facilitate their ability to engage in and track CRA-eligible activities.

New Markets Tax Credit

As a clarification, the final rule includes a definition for "New Markets Tax Credit (NMTC)," not included in the proposed rule, to mean a Federal tax credit pursuant to section 45D of the Internal Revenue Code of 1986 (26 U.S.C. 45D). The final rule uses this term in § _____.15(b)(10) as one of the impact and responsiveness factors and in § _____.42(a)(5)(ii) as part of the data collection of community development loans and community development investments, including whether the community development loan or community development investment is an investment in a project financed by NMTCs. The proposal used this term in proposed § _____.42 but did not define it.

Nonmetropolitan Area

The agencies proposed no changes to the current "nonmetropolitan area" ²²¹ definition, which would continue to mean any area that is not located in an MSA. The agencies did not receive any comments concerning the "nonmetropolitan area" definition and are adopting it as proposed in the final rule.

Open-End Home Mortgage Loan

For a discussion of the definition of "open-end mortgage loan," see the discussion above for *Mortgage-Related Definitions*.

Operations Subsidiary or Operating Subsidiary

The Board proposed to add a definition of "operations subsidiary" to its CRA regulations, and the OCC and FDIC proposed to add a definition of "operating subsidiary" to their respective CRA regulations. The agencies each proposed their own definitions because of differences in their supervisory authority. The agencies proposed these changes to identify those bank affiliates whose activities would be required to be attributed to a bank's CRA performance pursuant to proposed § _____.21, Performance Tests, standards, and ratings, and § _____.28, Assigned conclusions and ratings.²²²

Specifically, the Board proposed to define "operations subsidiary" to mean an organization designed to serve, in effect, as a separately incorporated department of the bank performing at locations at which the bank is authorized to engage in business,

functions that the bank is empowered to perform directly.²²³

The FDIC proposed to define "operating subsidiary" to mean an operating subsidiary as described in 12 CFR 5.34.²²⁴ The OCC proposed to define "operating subsidiary" to mean an operating subsidiary as described in 12 CFR 5.34 in the case of an operating subsidiary of a national bank or an operating subsidiary as described in 12 CFR 5.38 in the case of a savings association.²²⁵

Regarding comments concerning the definitions of "operations subsidiary" and "operating subsidiary," a commenter stated that the proposed definition of an "operations subsidiary" and "operating subsidiary" appear reasonable. The commenter stated that, generally, there should be uniformity in these and other definitions across all Federal agencies that receive financial institution data or reports. Another commenter recommended that the agencies avoid defining operations subsidiary and operating subsidiary too broadly. The commenter stated that it is not correct that financial institutions universally exercise "a high level of ownership, control, and management" of all affiliates, which in some circumstances may be considered as "subsidiaries." As an example, the commenter stated that numerous CDFI banks have nonprofit affiliates that provide substantial mission support, but these nonprofit organizations often have their own boards of directors, have been capitalized in a variety of ways, and control is exercised in different manners as well.

For the reasons stated below, the Board is adopting the proposed definition of "operations subsidiary," and the FDIC and OCC are adopting the proposed definitions of "operating subsidiary." The agencies believe that the proposed definitions of "operations subsidiary" and "operating subsidiary" are sufficiently consistent based on the agencies' respective statutory authorities and mandates. In addition, the agencies do not believe these proposed definitions are too broad. If an entity meets the definition of affiliate, and not the definition of operation subsidiary or operating subsidiary, it will not be treated as an operations subsidiary or operating subsidiary under the CRA regulations. Further, the agencies elected not to change these definitions because the description of these terms in the agencies' CRA regulation should

²²³ See proposed 12 CFR 228.12.

²²⁴ See proposed 12 CFR 345.12.

²²⁵ See proposed 12 CFR 25.12.

²²¹ See current 12 CFR _____.12(s).

²²² See proposed § _____.21(c).

not differ from the description of these terms in other contexts.

Other Delivery System

The agencies are adopting a new definition of “other delivery system,” not included in the proposal, to mean a “channel, other than branches, remote services facilities, or digital delivery systems, through which banks offer retail banking services.” This may include telephone banking, bank-by-mail, or bank-at-work.

For a more detailed discussion of the meaning of other delivery system, see the section-by-section analysis of § _____.23(b)(4).

Outside Retail Lending Area

As discussed above, the agencies proposed to replace the term “assessment area” in § _____.12 with the terms “facility-based assessment area,” “retail lending assessment areas,” and “outside retail lending areas.” The agencies proposed to define the new term “outside retail lending area” to mean the nationwide area outside of a bank’s facility-based assessment areas and, as applicable, retail lending assessment areas. The agencies proposed this new term as part of the proposed Retail Lending Test.²²⁶ In particular, under the proposed Retail Lending Test, the agencies would evaluate the retail lending performance of large banks and certain intermediate banks in areas outside of facility-based assessment areas and retail lending assessment areas, as applicable.

The final rule now includes a new section that describes the bases for delineating outside retail lending areas. Therefore, the more detailed proposed definition of outside retail lending areas is not necessary, and instead the final rule defines “outside retail lending area” to mean the area delineated pursuant to § _____.18. Comments pertaining to the proposed outside retail lending area provisions, as well as detailed information regarding the final rule’s outside retail lending area delineation requirements, are described in the section-by-section analysis of § _____.18.

Persistent Poverty County

The agencies included in proposed § _____.15(b)(1) a definition of “persistent poverty county” to mean a county or county-equivalent that had poverty rates of 20 percent or more for the past 30 years, as measured by the most recent decennial censuses. This definition appeared in proposed § _____.15(b) in connection with a list of factors (termed

“impact review” factors in the proposal) relevant for evaluating the impact and responsiveness of community development activities.

In the final rule, the agencies are moving the “persistent poverty county” definition to § _____.12 for ease of reference, as the term appears in both final § _____.15(b)(1) (finalized as an impact and responsiveness review factor) and the corresponding data collection provision in final § _____.42(a)(5) and (6). Further, consistent with the revision to the definition of “county,” discussed above, “county-equivalents” has been removed from the definition of “persistent poverty county” in the final rule. Lastly, the agencies are replacing the phrase “as measured by the most recent decennial censuses” with reference to a list of counties designated by the Board, FDIC, and OCC and published by the FFIEC. Among other things, this change will provide for statistical reliability while also allowing for regular data updates as conditions change. For a more detailed discussion of the definition of “persistent poverty county,” comments received on the definition, and the final impact and responsiveness review factor associated with this term, see the section-by-section analysis of § _____.15(b).

Accordingly, the agencies are adopting a definition of “persistent poverty county” in the final rule that means as a county that has had poverty rates of 20 percent or more for 30 years, as publicly designated by the Board, FDIC, and OCC, compiled in a list, and published annually by the FFIEC.

Product Line

The agencies are adopting a new definition of “product line” in the final rule, not included in the proposal. The final rule defines “product line” to mean a bank’s loans in one of the following, separate categories in a particular Retail Lending Test Area: (1) closed-end home mortgage loans; (2) small business loans; (3) small farm loans; and (4) automobile loans, if a bank is a majority automobile lender or opts to have its automobile loans evaluated pursuant to § _____.22. As discussed in greater detail in the section-by-section analysis of § _____.22, the definition of “product line” is intended to increase clarity regarding identifying those bank product lines that may potentially be subject to evaluation under the Retail Lending Test, as applicable.

Remote Service Facility

The Board’s and OCC’s current CRA regulations define the term “automated

teller machine (ATM)” to mean an automated, unstaffed banking facility owned or operated by, or operated exclusively for, the bank at which deposits are received, cash dispersed, or money lent.²²⁷ The FDIC’s CRA regulation instead contains a definition for “remote service facility,” which has the same definition as the Board’s and OCC’s definition of ATM but also includes a list of examples, specifically, automated teller machine, cash dispensing machine, point-of-sale terminal, or other remote electronic facility. The proposal would replace the Board’s and OCC’s “ATM” definitions with a definition of “remote service facility” that would include ATMs and update the FDIC’s existing definition of “remote service facility.”²²⁸

Specifically, the proposal defined “remote service facility” to mean an automated, virtually staffed, or unstaffed banking facility owned or operated by, or operated exclusively for, a bank, such as an ATM, interactive teller machine, cash dispensing machine, or other remote electronic facility at which deposits are received, cash dispersed, or money lent. The agencies believed the proposed definition better reflects changes in the way that banks deliver banking services.

The agencies requested feedback as to whether the proposed “remote service facility” definition includes sufficient specificity for the types of facilities and circumstances under which banks would be required to delineate facility-based assessment areas, or whether other changes to the CRA regulations are necessary to better clarify when the delineation of facility-based assessment areas would be required. A commenter suggested that the “remote service facility” definition should include ATMs that are not owned or operated by, or operated exclusively for financial institutions, noting the importance of low- and moderate-income individuals’ access to independent ATMs. Several commenters recommended that deposit-taking remote service facilities should include any bank partnerships with third parties involving remote or virtual banking services, with another commenter suggesting ATM networks operated by a third party. The agencies have declined to explicitly incorporate remote services facilities that are not owned or operated by, or operated exclusively for, a bank into the “remote service facility” definition because of the tenuous connections of these ATMs to a bank. The agencies do not believe that a non-proprietary remote service

²²⁷ See current 12 CFR 25.12(d) and 228.12(d).

²²⁸ See current 12 CFR 245.12(d).

²²⁶ See proposed § _____.22.

facility, such as a network ATM, constitutes a bank facility because such ATMs are owned and operated by a third party. Further, a bank participating in such an ATM network may have limited control over where an ATM is located. The agencies note that the current definition of “ATM” requires that the ATM be owned or operated by, or operated exclusively for, the bank.²²⁹

Therefore, the agencies are adopting the proposed definition of “remote service facility” in the final rule with two clarifying changes. First, the definition now provides that a remote service facility must be open to the general public. The agencies believe this substantive change clarifies that this definition only captures those remote deposit facilities that benefit the credit needs of the bank’s local community by having a public facing presence. Second, the definition in the final rule now provides that deposits are “accepted” instead of “received.” This change was made to describe the facility’s interaction more accurately with the public.

Accordingly, the final rule provides that “remote service facility” means an automated, virtually staffed, or unstaffed banking facility owned or operated by, or operated exclusively for, a bank, such as an automated teller machine (ATM), interactive teller machine, cash dispensing machine, or other remote electronic facility, that is open to the general public and at which deposits are accepted, cash dispersed, or money lent.

Reported Loan

To enhance clarity in the final rule, the agencies are adding a new definition of “reported loan,” not included in the proposal, defined to mean: (1) a home mortgage loan or a multifamily loan reported by a bank pursuant to HMDA, as implemented by 12 CFR part 1003; or (2) a small business loan or a small farm loan reported by a bank pursuant to § _____.42. This term is primarily used in the Retail Lending Test (final § _____.22 and appendix A) to specify where only reported loans are used in certain benchmarks. In addition, the term is used in defining when a retail lending assessment area must be delineated pursuant to final § _____.17. For a detailed discussion of the Retail Lending Test, see the section-by-section analysis of final § _____.22 (also addressing appendix A), and for a discussion of retail lending assessment areas, see the section-by-section analysis of § _____.17.

²²⁹ See current 12 CFR _____.12(d) (definition of “automated teller machine (ATM)”).

The agencies have included an amendment to transition the definition of “reported loan” to reference small business loans and small farm loans reported by a bank pursuant to the CFPB Section 1071 Final Rule after the section 1071 data is available.²³⁰

Retail Banking Products

The final rule includes a new definition of “retail banking products,” not included in the proposed rule, to clarify the agencies’ intended meaning of the term in final § _____.23 (Retail Services and Products Test). Specifically, the final rule defines “retail banking products” to mean credit and deposit products or programs that facilitate a lending or depository relationship between the bank and consumers, small businesses, or small farms. For additional discussion of retail banking products, see the section-by-section analysis of § _____.23.

Retail Banking Services

The agencies proposed to add a new definition of “retail banking services” to increase clarity and consistency in the CRA regulations, particularly with respect to the proposed Retail Services and Products Test.²³¹ The agencies proposed to define “retail banking services” to mean retail financial services provided by a bank to consumers, small businesses, and small farms, and to include a bank’s systems for delivering retail financial services. The agencies did not receive any comments concerning the proposed “retail banking service” definition and are adopting the definition as proposed in the final rule with a non-substantive wording change.

Retail Lending Assessment Area

As discussed above, the agencies proposed to replace the term “assessment area” in § _____.12 with the terms “facility-based assessment area,” “retail lending assessment areas,” and “outside retail lending areas.” The agencies proposed to define the term “retail lending assessment area” to mean a geographic area, separate and distinct from a facility-based assessment area, delineated in accordance with § _____.17. The agencies proposed this new term as part of the proposed Retail Lending Test.²³²

²³⁰ Specifically, the transition amendments included in this final rule will amend the definitions of “reported loan” to mean a small business loan or small farm loan reported by a bank pursuant to subpart B of 12 CFR part 1002. The agencies will provide notice of the effective date of these transition amendments in the **Federal Register** after section 1071 data is available.

²³¹ See proposed § _____.23.

²³² See proposed § _____.22.

The agencies did not receive any comments specific to the proposed definition of “retail lending assessment area.” However, the agencies received numerous comments regarding the retail lending assessment area approach, which are discussed in the section-by-section analysis of § _____.17. To be consistent with the “facility-based assessment area” and “outside retail lending area” definitions in the final rule, the agencies are revising the “retail lending assessment area” definition in the final rule. Specifically, the agencies are removing the phrase “separate and distinct from a facility-based assessment area” and replacing “in accordance with” with “pursuant to.” Accordingly, the final rule defines “retail lending assessment area” to mean “a geographic area delineated pursuant to § _____.17.” Detailed information regarding the final rule’s retail lending assessment area delineation requirements is included in the section-by-section analysis of § _____.17.

Retail Lending Test Area

In the final rule, the agencies are adding a new definition of “Retail Lending Test Area,” not included in the proposal, to mean a facility-based assessment area, a retail lending assessment area, or an outside retail lending area. The agencies believe this definition will increase the final rule’s consistency and improve its readability with respect to referencing retail lending assessment areas, facility-based assessment areas, and outside retail lending areas, both individually and collectively, for purposes of the Retail Lending Test.

Retail Loan

In relation to the proposed Retail Lending Test,²³³ the agencies proposed to add a new definition of “retail loan” to mean, for purposes of the Retail Lending Test in § _____.22, an automobile loan, closed-end home mortgage loan, open-end home mortgage loan, multifamily loan, small business loan, or small farm loan. For all other purposes, retail loan would mean a consumer loan, home mortgage loan, small business loan, or small farm loan. The agencies did not receive any comments concerning this proposed definition. However, after further review, the agencies have elected not to adopt a definition of “retail loan” in § _____.12 in the final rule. Instead, the agencies are adopting a definition of “product line” in the final rule, which

²³³ See proposed § _____.22.

references loan categories relevant to the Retail Lending Test.

Small Bank

For a discussion of the definition of “small bank,” see the discussion above for *Bank Asset-Size Definitions*.

Small Business and Small Farm

Current Approach and the Agencies’ Proposal

The agencies proposed to add definitions of “small business” and “small farm,” as they are not defined in the current CRA regulations. Instead, the current CRA regulations define “community development” to be activities that promote economic development by financing businesses or farms that meet the size eligibility standards of the SBA’s Development Company or Small Business Investment Company programs (13 CFR 121.301) or have gross annual revenues of \$1 million or less. The current regulations also consider the borrower distribution of small business loans and small farm loans to businesses and farms with gross annual revenues of \$1 million or less.

The proposal would define “small business” to mean “a business that had gross annual revenues for its preceding fiscal year of \$5 million or less” and “small farm” to mean “a farm that had gross annual revenues for its preceding fiscal year of \$5 million or less.” The agencies proposed these definitions to support the evaluation of retail lending under the proposed Retail Lending Test²³⁴ and community development loans and investments supporting small businesses and small farms that would be evaluated under the proposed Community Development Financing Test.²³⁵ These proposed definitions were consistent with the definitions for “small business” proposed by the CFPB in its section 1071 rulemaking.²³⁶

Comments Received

The agencies received numerous comments related to the proposed “small business” and “small farm” definitions. Some commenters expressed support for the proposed definitions, while other commenters recommended the agencies adopt the definitions with various changes or implement new definitions that incorporate different criteria.

Specifically, many commenters supported the proposal to adopt size standards for small businesses and small farms that would be consistent with the proposed small business size standard in the CFPB’s section 1071 rulemaking (*i.e.*, gross annual revenues of \$5 million or less for the preceding fiscal year). In general, these commenters asserted that consistent definitions across regulations and regulators would provide for reporting consistency and efficiency with less burden. Several other commenters stated that, although they believed that the gross annual revenues of \$5 million or less proposed by the CFPB was too high, they supported aligning the definitions with the CFPB’s section 1071 rulemaking even if the CFPB later adopted the larger size threshold in its Section 1071 Final Rule. Some commenters suggested that the small business size standard should be as consistent as possible with both the CFPB’s section 1071 rulemaking and the SBA’s small business size standards.

However, other commenters opposed the proposal to align the size standards for small businesses and small farms with the proposed small business size standard in the CFPB’s section 1071 rulemaking. Many of these commenters generally stated that the proposed small business and small farm size standards are unusually high because the vast majority of small businesses have gross annual revenues significantly below \$5 million. Moreover, a few of these commenters stated that CRA’s focus should be on the credit needs of the smallest businesses, with some commenters expressing concern that the proposed \$5 million threshold would result in capital being redirected to larger businesses. Several commenters also emphasized that aligning the “small business” and “small farm” definitions with the CFPB’s size standard would be inappropriate because section 1071 serves a different purpose than the CRA; namely, the threshold proposed by the CFPB establishes reporting requirements that would facilitate enforcement of fair lending laws. A few commenters also stated that it was not prudent for the agencies to propose a size standard based on a proposed rule.

Many commenters that opposed aligning the small business and small farm size standards with the CFPB’s section 1071 proposed small business size standard recommended a range of alternative thresholds for consideration. A commenter recommended that the agencies adopt the SBA’s small business size standards. Another commenter recommended that a small business

definition should encompass manufacturing businesses with 500 or fewer employees and other businesses with gross annual revenues up to \$8 million. One other commenter argued in favor of an \$8 million gross annual revenues threshold, asserting that this figure is the most common size standard threshold for average annual business receipts and would capture a majority of small businesses. Another commenter recommended that the agencies define “small business” and “small farm” based on loan size rather than gross annual revenues but did not specify an amount. One other commenter supported a threshold of gross annual revenues of \$1 million or less because many large banks only have system codes for gross annual revenues that indicate whether a business is above or below \$1 million, but not the actual threshold.

Other commenters requested clarifications of the definitions of “small business” and “small farm” or offered additional comments regarding these definitions. A commenter requested clarity on the treatment of revenues for affiliated businesses and guarantors, and how to calculate the revenues of small businesses or small farms when a line of credit is renewed (and updated revenue information is not collected). A few other commenters noted that defining small business and small farm by reference to gross annual revenues could create difficulty at the beginning of a calendar year, when borrowers may not have reliable revenue figures for the preceding year. Both commenters suggested that banks should be able to use prior-year revenue figures under these circumstances. Another commenter stated there should be clear guidance on how gross annual revenues should be determined to better provide reporting and examination consistency.

A commenter suggested that the agencies adopt a consistent definition of “small business” and “small farm” across the regulation, including for the borrower distribution metrics under the Retail Lending Test.²³⁷ A few commenters pointed out that even if the agencies align the “small business” and “small farm” definitions with the CFPB’s size standard in its section 1071 rulemaking, there would still be opportunity to improve consistency across banking regulations because

²³⁷ Under proposed § ____.22(d)(2)(iii)(D), the agencies would review bank lending to, among other borrowers, small businesses, and small farms with gross annual revenues of \$250,000 or less and small businesses and small farms with gross annual revenues of more than \$250,000 but less than or equal to \$1 million.

²³⁴ See proposed § ____.22.

²³⁵ See proposed §§ ____.13(c)(2) and (3); ____.24; and ____.26.

²³⁶ The CFPB section 1071 regulation does not separately define “small farm,” rather it includes them as types of small businesses identifiable by the of the NAICS codes 111–115. See 88 FR 35150, 35271, 35295 (May 31, 2023).

these definitions would not be reflected in Call Report requirements.

Final Rule

After considering the varied perspectives and recommendations on the proposed “small business” and “small farm” definitions, the agencies are adopting the definitions as proposed.²³⁸ The final rule defines “small business” to mean a business that had gross annual revenues for its preceding fiscal year of \$5 million or less and “small farm” to mean a farm that had gross annual revenues for its preceding fiscal year of \$5 million or less.²³⁹

The agencies declined to use the SBA’s small business size standards because they believe that these standards would not serve the CRA’s purposes well. The SBA small business size standards are based on gross annual revenues or the average number of employees for a wide range of business entities, resulting in over 1,000 North American Industry Classification System (NAICS) codes. In addition, the agencies also considered the fact that the SBA has recently increased many of its size standards and no longer employs a \$1 million average annual receipts size standard for any industry.²⁴⁰ In particular, many of the SBA’s gross annual revenues standards are much larger than the gross annual revenues thresholds included in the proposed “small business” and “small farm” definitions. The SBA’s size standards

for agricultural industries now range from \$2.25 million to \$34 million, and the size standards for non-agricultural industries now range from \$8 million to \$47 million.²⁴¹ Therefore, applying the SBA size standards under the CRA regulations would undermine the focus on smaller small businesses and farms.

Further, the agencies believe it is not appropriate to set a lower threshold, particularly when considering how the final rule will use the terms. A lower size standard may unduly restrict the type of lending and investment that the agencies have historically considered under economic development (*i.e.*, the current rule considers as loans and investments that support businesses and farms that meet the size eligibility standards of the SBA’s Development Company or Small Business Investment Company programs (13 CFR 121.301)).

In addition, the agencies believe that size standards that draw on a single data point—*i.e.*, gross annual revenues of \$5 million or less in the preceding year—are easy for institutions to understand and implement and minimize the data banks are required to collect and report. If the agencies adopted definitions that introduced additional criteria, as suggested by some commenters—*e.g.*, average number of employees, average revenue, or industry codes—institutions would be required to collect and report additional data points, which would increase banks’ collection and reporting burden.

The agencies also believe that \$5 million is the appropriate threshold for small businesses and small farms. As discussed above, commenters advocated for both lowering the threshold to focus the regulations on the smallest small business and raising the threshold to capture larger small businesses, but the agencies believe that the proposed “small business” and “small farm” definitions strike a proper balance. As such, the definitions in the final rule capture entities all along the small business spectrum, from the smallest small businesses and farms through larger small businesses and farms.

Further, a \$5 million threshold is consistent with the definition of “small business” in the CFPB’s section 1071 rulemaking. As explained in more detail below in the discussion of the definitions of “small business loans” and “small farm loans,” leveraging the CFPB’s “small business” definition for purposes of the Retail Lending Test will reduce the data collection and reporting burden under the CRA regulations because banks will not have to report

small business loan data to two different agencies with two different thresholds once the agencies transition to using section 1071 data.²⁴² In addition, as also explained below, aligning the CRA’s “small business” and “small farm” definitions with the CFPB’s “small business” definition will enable the agencies to expand and improve the analysis of CRA small business and small farm lending for all banks subject to the Retail Lending Test.

The agencies understand that the CFPB’s section 1071 rulemaking, although finalized, is not yet applicable, and, therefore, the agencies will not yet be able to leverage the CFPB’s section 1071 rulemaking’s “small business” definition for purposes of the Retail Lending Test at this time. However, the final rule’s “small business” and “small farm” definitions are also necessary for determining which loans, investments, or services meet the community development criteria under final § ____.13 for purposes of the Community Development Financing Test in § ____.24, the Community Development Services Test in § ____.25, and the Community Development Financing Test for Limited Purpose Banks in § ____.25, and for evaluating a bank’s retail banking services and retail banking products under the Retail Services and Products Test in final § ____.23. As explained above, the current regulations do not explicitly define “small business” and “small farm,” and defining “small business” and “small farm” to mean those businesses and farms with \$5 million or less in gross annual revenues is preferable to using the SBA’s small business size standards, which can be significantly larger, and would undermine the CRA’s focus on smaller small businesses and farms. Therefore, to be consistent throughout the CRA regulations, the agencies believe it is important to include this definition in the final rule.

With regard to commenters’ concerns related to the treatment of revenues, the agencies anticipate updating the CRA data collection and reporting guidance to reflect the new collection and reporting obligations related to the reporting of gross annual revenues. In developing that guidance, the agencies will consider the commenters’ suggestions and recommendations.

With respect to the commenter’s concern regarding the agencies proposing a size standard based on the

²⁴² As discussed in the section-by-section analysis of § ____.42, the agencies will eliminate the current CRA small business and small farm data collection and reporting requirements once the agencies transition to using section 1071 data.

²³⁸ The agencies requested and received permission from the SBA to use size standards for small businesses and small farms that differ from the SBA’s size standards, as required by 15 U.S.C. 632(a)(2)(C) and 13 CFR 121.903.

²³⁹ The final rule’s transition amendments will amend the definitions of “small business” and “small farm” to instead cross-reference to the definition of “small business” in the CFPB section 1071 regulation. This will allow the CRA Regulatory definitions to adjust if the CFPB increases the threshold in the CFPB section 1071 regulatory definition of “small business.” This is consistent with the agencies’ intent articulated in the preamble to the proposal and elsewhere in this final rule to conform these definitions with the definition in the CFPB section 1071 regulation. The agencies will provide the effective date of these amendments in the **Federal Register** once section 1071 data is available.

²⁴⁰ Through a series of rules that became effective on May 2, 2022, the SBA implemented revised size standards for 229 industries (all using average annual receipts standards) to increase eligibility for its Federal contracting and loan programs. *See* 87 FR 18607 (Mar. 31, 2022); 87 FR 18627 (Mar. 31, 2022); 87 FR 18646 (Mar. 31, 2022); 87 FR 18665 (Mar. 31, 2022). The SBA did not reduce any size standards—it either maintained or increased the size standards for all 229 industries, in many cases with size standard increases of 50 percent or more. Effective July 14, 2022, the SBA also increased size standards for 22 wholesale trade industries and 35 retail trade industries. 87 FR 35869 (June 14, 2022). *See* SBA Small Business Size Standards by NAICS Industry, 13 CFR 121.201.

²⁴¹ *See* SBA Small Business Size Standards by NAICS Industry, 13 CFR 121.201.

CFPB proposed rule under section 1071 of the Dodd-Frank Act (Section 1071 Proposed Rule),²⁴³ the agencies note that the \$5 million size standard for a small business or small farm was included in the proposal; the agencies did not cross-reference to the CFPB section 1071 rulemaking. Therefore, commenters were able to comment on the exact threshold proposed.

The agencies appreciate commenters' concern that inconsistencies with respect to size standards for small businesses and small farms would remain because the CRA definitions would not be reflected in the Call Report. However, revisions to Call Report requirements are outside the scope of this rulemaking.

Small Business Loan and Small Farm Loan

Current Approach

The current CRA regulations define "small business loan" to mean "a loan included in 'loans to small businesses,' as defined in the instructions for preparation of the Consolidated Report of Condition and Income."²⁴⁴ Likewise, "small farm loan" means "a loan included in 'loans to small farms,' as defined in the instructions for preparation of the Consolidated Report of Condition and Income."²⁴⁵ The current approach captures loans of \$1 million or less to businesses, and loans of \$500,000 or less to farms, as reported in the Call Report.²⁴⁶

The Agencies' Proposal

The agencies proposed to retain these definitions with two technical changes. First, the proposed "small business loan" and "small farm loan" definitions included a provision indicating that the proposed "small business loan" and "small farm loan" definitions should be read independently from the "small business" and "small farm" definitions. This distinction is relevant because, until the agencies transition to using small business lending data derived from the CFPB Section 1071 Final Rule, the CRA regulations need to continue to use the current rule's "small business loan" and "small farm loan" definitions in evaluating bank performance under the proposed Retail Lending Test in § _____.22. The agencies indicated in the proposal that once section 1071 data on small business loans become available, the agencies will transition to "small business loan" and "small farm loan" definitions that are consistent with the

definition of "small business" in the CFPB Section 1071 Final Rule.

Second, the agencies proposed to substitute "Consolidated Report of Condition and Income" in each definition for the shorter term, "Call Report," which would have the same meaning and be established as the term used throughout the regulation earlier in the regulatory text. (See the "assets" definition discussion above.)

With these technical changes, the agencies proposed to define "small business loan" to mean, notwithstanding the definition of "small business" in § _____.12, a loan included in "loans to small businesses" as defined in the instructions for preparation of the Call Report, and "small farm loan" to mean notwithstanding the definition of "small farm" in § _____.12, a loan included in "loans to small farms" as defined in the instructions for preparation of the Call Report."

Comments Received

The agencies received numerous comments related to the proposed "small business loan" and "small farm loan" definitions. Some commenters expressed support for the proposed definitions and intended transition to the CFPB section 1071 rulemaking definition of "small business," while other commenters recommended the agencies adopt definitions with various changes or implement entirely new definitions that incorporate different criteria.

Specifically, a few commenters stated that using the proposed small business size standard in the CFPB's section 1071 rulemaking will provide a more accurate picture of lending to small entities than the current threshold, which measures lending based on loan size as opposed to business revenue size.

However, other commenters opposed the proposed changes to the "small business loan" and "small farm loan" definitions and recommended continuing using the Call Report definitions, with a commenter stating that retaining these definitions is necessary to ensure that smaller dollar loans are targeted to businesses with capital gaps. Another commenter recommended continuing to use the current Call Report definitions of "loans to small businesses" and "loans to small farms," and reevaluating after a full year of section 1071 data are available. Some commenters contended that the proposed threshold would impose considerable new data collection and reporting requirements for community banks that elect to be evaluated under the proposed Retail Lending Test.

Another commenter proposed a hybrid approach that would define "small business loan" to include both: (1) a loan to a business with gross annual revenues of \$1 million or less; and (2) a commercial loan in an amount of \$1 million or less. Some commenters suggested using certain size standards adopted by the SBA and USDA to encourage lending to socially disadvantaged businesses and farms owned by persons of color. Another commenter questioned whether the "small business loan" and "small farm loan" definitions include loans made to individuals because of the use of the term "revenue" as opposed to "income." This commenter claimed that the exclusion of small business and small farm loans to individuals would cause underreporting and could negatively affect a bank's Retail Lending Test results, metrics, benchmarks, and possibly other areas. Further, the commenter suggested the "small business loan" and "small farm loan" definitions should include renewals and credit limit increases, as set forth in the Interagency Questions and Answers.²⁴⁷

Another commenter suggested that the agencies should not give CRA consideration for all loans to businesses that meet the SBA standards for small businesses. This commenter reasoned that the SBA standards for employee size represent too high a threshold to meaningfully segment the small business lending market.

Final Rule

The agencies appreciate the commenters' varied perspectives and recommendations related to the proposed "small business loan" and "small farm loan" definitions. However, after consideration of these comments, the agencies are adopting the "small business loan" and "small farm loan" definitions as proposed in the final rule, with technical changes, and have included amendments to transition to "small business loan" and "small farm loan" definitions leveraged off of the CFPB section 1071 regulation's "small business" definition once section 1071 data is available.²⁴⁸ Specifically, the final rule provides that "small business loan" and "small farm loan" mean those loans included in "loans to small businesses" or "loans to small farms" as

²⁴³ See 86 FR 56356 (Oct. 8, 2021).

²⁴⁴ See current 12 CFR _____.12(v).

²⁴⁵ See current 12 CFR _____.12(w).

²⁴⁶ See Call Report, Schedule RC-C, Part II.

²⁴⁷ See Q&A § _____.42(a)-5.
²⁴⁸ The final rule's transition amendments will amend the definitions of "small business loan" and "small farm loan" to mean a loan to a small business or small farm, respectively, as defined in § _____.12 of the CRA regulations. The agencies will provide notice of the effective date of this amendment in the **Federal Register** once section 1071 data is available.

reported in Schedule RC–C of the Call Report. The agencies are referring to these terms as reported in the Call Report, instead of as defined in the instructions, to more accurately provide a source for these terms. As indicated above, maintaining the current rule's definitions of “small business loan” and “small farm loan” based on the Call Report is necessary until the agencies transition to using section 1071 data.

Further, transitioning to section 1071 data will enable the agencies to use borrower and geographic distribution metrics and benchmarks that provide more insight into banks' performance relative to the demand for small business loans in a given geographic area. It also will allow for an analysis that uses an expanded data set measuring loans to small businesses of different revenue sizes, including—importantly—to the businesses and farms with gross annual revenues of \$250,000 or less, as discussed in the section-by-section analysis of § _____.22, the Retail Lending Test. In sum, these definitions will enable the agencies to expand and improve the analysis of CRA small business and small farm lending for all banks, as applicable, since section 1071 data will also enable expanded analysis for intermediate and small banks that are subject to reporting pursuant to the CFPB's section 1071 rulemaking. Further, because a large business may obtain small dollar loans, and a small business may obtain large dollar loans, the agencies believe the size of a business obtaining the loan is a better factor than the size of the loan to a business for determining whether a loan is made to a small business that warrants CRA consideration.

For the same reasons as noted in the “small business” and “small farm” definitions discussion, the agencies do not find it appropriate to adopt definitions of “small business loan” or “small farm loan” based on the SBA's small business size standards. As noted above, the SBA currently employs varying small business standards which are based on various factors, including industry, average annual receipts, and average number of employees. As a result, capturing all loans to businesses that qualify as small businesses under the SBA's standards would necessitate the collection and reporting of additional data, including NAICS codes to determine the industry in which a business operates, average employee headcount, and average receipts over a multi-year period. This would impose increased compliance and operational burden and costs in negotiating what, for many or most banks, would be a complicated overlay on their lending

activity (e.g., use of NAICS codes) that could reduce efficiencies in their small business and small farm lending programs.

In response to comments about the inclusion of loans to individuals as small business loans or small farm loans based on income of the individual as opposed to business revenues and how renewals and other credit limit increases are considered, the agencies intend to continue historical practices with respect to these issues. Specifically, pursuant to Call Report instructions and certain limitations, loans to sole proprietorships for commercial or agricultural purposes are included in the “small business loan” and “small farm loan” definitions, respectively. Banks have historically reported the gross annual revenues relied on in making credit decisions. This reporting included affiliate revenues when relied on, but never combined individual income with business revenues even if the bank relied on the individual income of a sole proprietor in making the credit decision. The agencies continue to believe this is appropriate, because irrespective of whether the bank relied on individual income in making a credit decision, it keeps the focus on the size of the business for purposes of considering the loan under the performance tests. Therefore, under the final rule, banks will report only the gross annual revenues of the business benefiting from the loan proceeds.²⁴⁹

It is also notable that once the transition to section 1071 data is complete, the small business loan data used for the Retail Lending Test will capture business credit transactions that are secured by real estate. For example, section 1071 data will capture business loans secured by an applicant's primary residence or residential investment property as collateral for inventory financing or working capital. Such loans would not be captured under HMDA because they do not involve a home purchase, home improvement, or refinancing and would not be captured in the Call Report definition of “loans to small businesses” because they are secured by residential real estate.

For the reasons discussed above, the agencies are adopting in the final rule a definition of “small business loan” that

²⁴⁹ The agencies intend to make one change from the current guidance regarding the treatment of affiliate revenues, pursuant to the final rule and any guidance issued, gross annual revenue reporting will be limited to the business revenues of the benefiting business regardless of whether affiliate revenues are considered in a credit decision to more accurately identify the size of a business under the performance tests.

means, notwithstanding the definition of “small business” in this section, a loan included in “loans to small businesses” as defined in the instructions for preparation of the Call Report. Similarly, the agencies are adopting in the final rule a definition of “small farm loan” that means, notwithstanding the definition of “small farm” in this section, a loan included in “loans to small farms” as defined in the instructions for preparation of the Call Report. Amendments included in the final rule will transition these definitions to reflect the final rule's definitions of “small business” and “small farm,” which leverages the definition of “small business” in the CFPB's section 1071 rulemaking, once small business data reported pursuant to that rulemaking becomes available and the agencies announce an effective date for this transition in the **Federal Register**.

State

To increase clarity and consistency in the CRA regulations, the agencies proposed to add a definition of “State” to mean a U.S. State or territory, and the District of Columbia. The agencies did not receive any comments on this definition and are adopting the definition as proposed in the final rule.

Targeted Census Tract

The agencies proposed to add a definition of “targeted census tract” for purposes of certain community development categories in proposed § _____.13. As proposed, this term would mean: (1) a low-income census tract or a moderate-income census tract; or (2) a distressed or underserved nonmetropolitan middle-income census tract. This definition was intended to reflect the current CRA regulations regarding community development activities now categorized as revitalization and stabilization activities,²⁵⁰ as well as accompanying guidance in the Interagency Questions and Answers regarding relevant geographic areas for these activities.²⁵¹ The agencies did not receive any comments concerning the proposed definition of “targeted census tract” and adopt it as proposed in the final rule.

Tribal Government

The final rule includes a new definition for “tribal government,” not included in the proposal, to clarify the agencies' intended meaning of “tribal government” where referenced in the

²⁵⁰ See current 12 CFR _____.12(g)(4).

²⁵¹ See generally 81 FR 48506, 48526–48528 (July 25, 2016).

final rule (*see, e.g.*, community development categories in proposed and final § _____.13 and the accompanying section-by-section analysis). As discussed above, the proposed and final community development place-based categories, including activities in Native Land Areas, include as eligibility criterion that activities be “conducted in conjunction with a Federal, State, local, or tribal government plan, program, or initiative.”²⁵² However, the proposal did not define “tribal government,” although the agencies sought feedback on various aspects of the government plan criterion. Some commenters addressed the types of entities that should be included in the government plan requirement, including tribal governments, associations, and other designees. A commenter expressed support for defining “tribal government” to mean the recognized governing body of any Indian, or Alaska Native tribe, band, nation, pueblo, village, community, component band, or component reservation, individually identified (including parenthetically) in the list most recently published pursuant to section 104 of the Federally Recognized Indian Tribe List Act of 1994.²⁵³

Based on comments and on further consideration, the agencies believe that a definition of “tribal government” will provide needed clarity and certainty for banks and other stakeholders seeking to determine whether activities meet the required eligibility criterion. Accordingly, the final rule defines “tribal government” to mean the recognized governing body of any Indian, or Alaska Native tribe, band, nation, pueblo, village, community, component band, or component reservation, individually identified (including parenthetically) in the list most recently published pursuant to section 104 of the Federally Recognized Indian Tribe List Act of 1994 (25 U.S.C. 5131). As with the definition of “Native Land Areas,” this definition is derived from and intended to align with existing Federal Indian law.

Wholesale Bank

As detailed in the “limited purpose bank” definition discussion above, the agencies are adopting the single term, “limited purpose bank,” and eliminating the “wholesale bank” definition in the final rule. This change is intended to improve clarity, minimize complexity, and provide for new and future market participants.

²⁵² See final § _____.13(j)(2)(i).

²⁵³ See Public Law 103–454, 108 Stat. 4791 (Nov. 2, 1994).

Women’s Depository Institution

The agencies proposed to define “women’s depository institution (WDI)” as having the same meaning given to that term in 12 U.S.C. 2907(b)(2). The cross-referenced provision of the CRA statute defines “WDI” to mean a depository institution, as defined in the FDI Act, with: (1) more than 50 percent of the ownership or control of which is held by 1 or more women; (2) more than 50 percent of the net profit or loss of which accrues to 1 or more women; and (3) a significant percentage of senior management positions of which are held by women. The agencies did not include an alternate definition of WDI because their policies with respect to designating WDI’s vary. The FDIC does not specifically designate or define WDIs under its MDI policy statement, however, it does recognize WDIs for purposes of the CRA. The Board defines WDI consistent with the CRA statute and institutions that meet the definition are eligible to access resources under the Federal Reserve System’s Partnership for Progress program.²⁵⁴ The OCC, in contrast, considers WDIs to be MDIs under its MDI Policy Statement, and, therefore, women-owned institutions that do not meet the statutory definition of WDI in section 2907 would be considered MDIs if the institution otherwise meets the requirements of the OCC’s MDI Policy Statement.

The agencies did not receive any comments on the proposed definition of WDI and are adopting the definition as proposed with non-substantive revisions for conformity with the structure of other definitions in final § _____.12. Accordingly, under the final rule, “Women’s depository institution (WDI)” means “women’s depository institution” as defined in 12 U.S.C. 2907(b)(2).

Section _____.13 Consideration of Community Development Loans, Community Development Investments, and Community Development Services

Current Approach and the Agencies’ Proposal

The current CRA regulations define “community development” as comprising four broad categories: affordable housing, community services, economic development, and revitalization and stabilization.²⁵⁵ The

²⁵⁴ See Board, SR 21–6/CA 21–4: “Highlighting the Federal Reserve System’s Partnership for Progress Program for Minority Depository Institutions and Women’s Depository Institutions” (Mar. 25, 2021), <https://www.federalreserve.gov/supervisionreg/srletters/SR2106.htm>.

²⁵⁵ See current 12 CFR _____.12(g).

agencies proposed to update the community development definition in current § _____.12 by creating a new § _____.13 that would define community development as including eleven different categories of activities and would establish standards for when community development activities would receive full and partial consideration. Proposed § _____.13 incorporated aspects of the current Interagency Questions and Answers into the regulation and established specific eligibility standards for a broad range of community development activities. Proposed § _____.13 was also designed to provide more clarity regarding the kinds of activities the agencies consider to be community development, as well as regarding eligibility for community development consideration.

Comments Received

Commenters provided general feedback on the agencies’ proposal to adopt a definition of community development with eleven categories of activities, as well as on the specific proposed categories (which are discussed in the section-by-section analysis of each individual category below). Many commenters were generally supportive of the proposal, with several noting that the proposed approach for defining community development would provide more clarity for all stakeholders on the types of activities that qualify and the eligibility requirements for different activity types. Several commenters were particularly supportive of adding new categories to the current community development definition, such as the proposed categories for disaster preparedness and climate resiliency activities, activities with MDIs, WDIs, LICUs, and CDFIs, and activities in Native Land Areas. Other commenters noted that proposed changes to the community development definition would increase the responsiveness of banks to community needs and expressed the view that the changes would help to more effectively target community development activities.

In contrast, a few commenters opposed the proposed changes to the community development definition. Commenter feedback included: that the activities that could be considered under the new categories could be considered under the four existing categories of community development; concern that the new community development categories were too rigid and complex, including that it would be difficult to obtain the data needed to show activities meet the new requirements; and that the definition of

community development would lead to a narrowing of what could qualify, which might result in fewer or less impactful activities in low- and moderate-income communities.

Additionally, several commenters provided suggestions for additional categories of activities that should be considered under community development, such as equitable media, activities focused on arts and culture, broadband and digital inclusion, activities benefiting military communities, and activities that are designed to support individuals with disabilities.

Final Rule

The agencies are adopting proposed § ____.13, with revisions from the proposal and retitled as “Consideration of community development loans, community development investments, and community development services.” The final rule updates the current definition of community development to provide banks with additional clarity regarding the loans, investments, and services that the agencies have determined support community development that is responsive to the needs of low- and moderate-income individuals and communities, certain distressed or underserved nonmetropolitan areas, and small businesses and small farms.

Consistent with the structure of the proposal, final § ____.13 adopts standards for when community development loans, community development investments, and community development services will receive full and partial consideration (final § ____.13(a)), and replaces the current definition of community development with the following eleven categories:

- Section ____.13(b) Affordable housing;
- Section ____.13(c) Economic development;
- Section ____.13(d) Community supportive services;
- Section ____.13(e) Revitalization or stabilization;
- Section ____.13(f) Essential community facilities;
- Section ____.13(g) Essential community infrastructure;
- Section ____.13(h) Recovery of designated disaster areas;
- Section ____.13(i) Disaster preparedness and weather resiliency;
- Section ____.13(j) Revitalization or stabilization, essential community facilities, essential community infrastructure, and disaster preparedness and weather resiliency in Native Land Areas;

Section ____.13(k) Activities with MDIs, WDIs, LICUs, or CDFIs; and Section ____.13(l) Financial literacy.

Final § ____.13(a) has been revised to clarify the standards within each category for determining full or partial consideration. Final § ____.13(b) through (l) have also been revised to address comments, improve clarity, and promote greater internal consistency. Revisions to these categories are discussed in greater detail in the corresponding section-by-section analyses below.

The final rule incorporates aspects of the guidance that is currently provided in the Interagency Questions and Answers and provides more specificity, relative to the current rule, on the kinds of activities that the agencies consider to be community development. By building on the current rule and expanding the categories of community development, the agencies believe that final § ____.13 will emphasize activities that are responsive to community needs, and especially the needs of low- and moderate-income individuals, families, and households and small businesses and small farms. Further, the agencies believe that the final rule will provide increased transparency and consistency by providing stakeholders with a better upfront understanding how loans, investments, and services supporting community development can receive consideration. Overall, the agencies believe that the final rule will reduce uncertainty and facilitate banks’ ability to identify community development opportunities.

In adopting final § ____.13, the agencies considered comments regarding each proposed category of community development, and on appropriate standards for providing full and partial consideration for community development activities. These comments and the final rule are discussed below in the section-by-section analyses of § ____.13(a) through (l). In addition, the agencies are adopting a variety of clarifying and conforming technical edits across final § ____.13. For example, across all community development categories, the agencies are revising the term “low- and moderate-income individuals” to “low- and moderate-income individuals, families, and households” for consistency across the various paragraphs in § ____.13, to provide more clarity and to comprehensively include the beneficiaries of different community development activities. Similarly, where appropriate, the final rule replaces “activities” with “loans, investments, and services,” consistent with revisions made elsewhere in the regulation to

more accurately capture the distinction between community development activities, and a bank’s loans, investments, and services that support those activities (for which CRA consideration is granted).

The agencies considered commenter feedback that revising community development to include eleven categories could be too rigid or complex, and comments that activities under proposed § ____.13(b) through (l) could be included under the four existing community development categories. The agencies believe, however, that additional community development categories, with specific eligibility requirements for each, will provide stakeholders with better clarity. Additionally, as previously noted and consistent with the proposal, the final rule incorporates existing guidance into the definition, which represents an evolution towards a more comprehensive and transparent regulation. The agencies note that, while banks subject to the rule are permitted to qualify loans, investments, and services under any applicable community development category, and that some activities may meet the criteria of multiple categories, activities may count only once for the purposes of calculating the Community Development Financing Metric.

The agencies also appreciate comments suggesting additional categories for inclusion under community development and note that these are generally discussed in the section-by-section analyses of final § ____.13(b) through (l). The agencies have considered these comments but believe that the adopted categories most clearly and specifically align with the scope of community development under the CRA regulations. The agencies note that loans, investments, and services supporting additional activities suggested by commenters could still receive consideration if they otherwise meet the required criteria under any category included in final § ____.13.

Finally, the agencies believe that the establishment in final § ____.14 of an illustrative list of qualifying community development activities and of a confirmation process, available if a bank wants to request review in advance, will help to provide additional clarity and transparency for banks regarding the consideration of community development loans, investments, and services. For more information, see the section-by-section analysis of § ____.14.

Section ____ .13(a) Full and Partial Credit for Community Development Loans, Community Development Investments, and Community Development Services

Current Approach

Under the current CRA rule, a bank may, depending on its size and business model, be evaluated for its community development lending, investments, and services under the lending, investment, or service tests, as applicable.²⁵⁶ To be eligible for CRA community development consideration, a loan, service, or investment must have community development as its primary purpose.²⁵⁷

The Interagency Questions and Answers explain that a loan, investment, or service is considered to have a primary purpose of community development “when it is designed for the express purpose of” the following:

- “Revitalizing or stabilizing low- or moderate-income areas, designated disaster areas, or underserved or distressed nonmetropolitan middle-income areas;”
- “Providing affordable housing for, or community services targeted to, low- or moderate-income persons;” or
- “Promoting economic development by financing small businesses or small farms that meet the requirements set forth in 12 CFR ____ .12(g).”²⁵⁸

The Interagency Questions and Answers explain that the agencies use one of two approaches to determine whether an activity is “designed for an express community development purpose.” An activity meets the primary purpose standard, and the entire activity may be eligible for CRA considerations if:

- “[A] majority of the dollars or beneficiaries of the activity are identifiable to one or more of the enumerated community development purposes;”²⁵⁹ or
- Less than a majority of the dollars or benefits is identifiable to one or more community development purposes, but: (1) “the express, bona fide intent of the activity . . . is primarily one or more of

the enumerated community development purposes”; (2) “the activity is specifically structured . . . to achieve the expressed community development purpose”; and (3) the activity accomplishes, or is reasonably certain to accomplish, the community development purpose involved.”²⁶⁰

Even where those standards have not been met, loans, investments, or services involving the provision of mixed-income housing that includes affordable housing may be deemed to have a primary purpose of community development as specified in the Interagency Questions and Answers.²⁶¹ Specifically, at a bank’s option, these activities may be considered to have a primary purpose of community development and be eligible for CRA credit on a pro rata basis; a bank may receive pro rata consideration for the portion of the activity that helps to provide affordable housing to low- or moderate-income individuals.²⁶² For example, a bank could receive CRA consideration for 20 percent of the dollar amount of a loan or investment for a mixed-income development, if 20 percent of the units are set aside for affordable housing for low- or moderate-income individuals.²⁶³

The Agencies’ Proposal

The agencies proposed to define the standards for determining whether a community development activity has a “primary purpose” of community development to clarify eligibility criteria for different community development loans, investments, or services (proposed § ____ .13(a)). To this end, proposed § ____ .13(a)(1) established specific standards based on the interagency guidance described above²⁶⁴ for eleven categories of community development. These categories were listed in proposed § ____ .13(a)(2) and described in detail in proposed § ____ .13(b) through (l). With the proposed categories, the agencies intended to reflect an emphasis on activities that are responsive to community needs, especially the needs of low- and moderate-income individuals and communities and small businesses and small farms.

Specifically, proposed § ____ .13(a) stated that “[a] bank may receive community development consideration for a loan, investment, or service that

has a primary purpose of community development.” The agencies proposed several ways in which an activity could be determined to have a primary purpose of community development.²⁶⁵ First, under proposed § ____ .13(a)(1)(i), if a majority of the dollars, applicable beneficiaries, or housing units of the activity were identifiable to one or more of the community development purposes listed in proposed § ____ .13(a)(2), then the activity would meet the requisite primary purpose standard and would receive full CRA credit.

Second, and alternatively, under proposed § ____ .13(a)(1)(i)(A), where an activity supported rental housing purchased, developed, financed, rehabilitated, improved, or preserved in conjunction with a Federal, State, local, or tribal government (*see* proposed § ____ .13(b)(1)), and fewer than 50 percent of the housing units supported by that activity were affordable, the activity would be considered to have a primary purpose of community development only in proportion to the percentage of total housing units in the development that were affordable.

Third, under proposed § ____ .13(a)(1)(i)(B), where an activity involved low-income housing tax credits to support affordable housing under proposed § ____ .13(b), the activity would be considered to have a primary purpose of community development for the full value of the investment, even if fewer than 50 percent of the housing units supported by that activity were affordable.

Finally, under proposed § ____ .13(a)(1)(ii), a loan, investment, or service would be considered to have a primary purpose of community development if the express bona fide intent of the activity was one or more of the proposed community development purposes and the activity was specifically structured to achieve, or was reasonably certain to accomplish, the community development purpose.

Pro rata consideration for other community development activities. Although the proposal did not specify any other application of partial credit, the agencies sought feedback on whether such consideration would be appropriate for other community development activities (for example, financing broadband infrastructure, health care facilities, or other essential infrastructure and community facilities). If so, the agencies also sought feedback on whether the activity should be eligible for partial consideration only if a minimum percentage of the

community development purpose it supported served low- or moderate-income individuals or census tracts or small businesses and small farms, such as 25 percent. Further, if partial consideration were provided for certain types of community development activities, the agencies sought feedback on whether to require a minimum percentage standard greater than 51 percent to receive full consideration—such as a threshold between 60 and 90 percent.

Comments Received

The agencies received several comments generally supporting the proposed standard for determining whether an activity has a “primary purpose” of community development. For example, one commenter offered the general comment that it found the proposed clarifications to the primary purpose standard to be helpful and clear. As discussed in this section, many comments focused on the specific components of the proposed primary purpose standard and provided responses to the questions on which the agencies requested feedback.

A majority of dollars, applicable beneficiaries or housing units are identifiable to one or more of the community development categories (proposed § ____ .13(a)(1)(i)). Many commenters supported the agencies’ proposal to determine that an activity has a primary purpose of community development if a majority of dollars, applicable beneficiaries or housing units of the activity are identifiable to one or more community development purposes set out in proposed § ____ .13(a)(2). A few commenters supported this aspect of the proposal without changes, while others asserted that CRA credit generally should not be granted unless the majority of beneficiaries are low- or moderate-income people and communities, or people and communities of color and indigenous people and communities.

The express, bona fide intent of the activity is one or more of the community development categories and the activity is specifically structured to achieve, or is reasonably certain to accomplish, the community development purpose (proposed § ____ .13(a)(1)(ii)). A few commenters expressed concern with the agencies’ proposal to determine that an activity has a primary purpose of community development if the express, bona fide intent of the activity is one or more of the community development categories or the activity is specifically structured to achieve, or is reasonably certain to accomplish, the community development purpose. One of these

commenters suggested that this could lead to abuses where only a small percentage of dollars are dedicated to community development. To mitigate this potential problem, the commenter suggested eliminating this basis for determining whether an activity has a primary purpose of community development or, alternatively, pairing this consideration with a minimum threshold for the percentage of the activity that corresponds with community development, such as 40 percent, below which no consideration would be available.

Another commenter asserted that the agencies should revise this prong to retain only the proposed language regarding whether “[t]he express, bona fide intent of the activity is one or more of the community development purposes.” This commenter stated that that language regarding the activity being “specifically structured to achieve” the community development purpose was redundant in light of the “intent” requirement. The commenter further expressed the view that determining whether an activity is “reasonably certain to accomplish” a community development purpose would result in bank and examiner speculation regarding the results of an activity. According to this commenter, the resulting uncertainty of both the “specifically structured to achieve” and “reasonably certain to accomplish” components of this proposed standard could be confusing and discourage innovative community development activities.

Affordable housing-related provisions (proposed § ____ .13(a)(1)(i)(A) and (B)). Many commenters addressed the two proposed clarifications to the primary purpose standard for affordable rental housing. As described above, these included: (1) a provision allowing for pro rata consideration of activities in conjunction with a Federal, State, local, or tribal government plan, program, initiative, tax credit, or subsidy, when fewer than 50 percent of housing units supported by the activity are affordable (proposed § ____ .13(a)(1)(i)(A)); and (2) a provision allowing for full consideration of any affordable housing activity involving low-income housing tax credits (proposed § ____ .13(a)(1)(i)(B)).

Subsidized affordable rental housing (proposed § ____ .13(a)(1)(i)(A)). Many commenters supported providing pro rata consideration for affordable rental housing activities based on the percentage of housing units that are affordable. Several commenters supporting pro rata consideration for affordable housing cited the benefits of

mixed-income housing for sustaining needed services and amenities in low- and moderate-income communities and for low- and moderate-income residents, as well as for promoting economic stability for low- and moderate-income individuals and communities. A commenter also noted that in rural areas, mixed-income housing is needed to accommodate projects of a sufficient scale to achieve development and operating efficiencies.

Some commenters expressed the view that the pro rata consideration proposal was too narrow. In this regard, commenter suggestions included changes to the proposal to enhance incentives for investments and loans in affordable housing, e.g., that the agencies should afford full credit for subsidized affordable housing if 20 percent of the units were affordable, a level some commenters stated would align with the eligibility thresholds of certain other Federal affordable housing programs. A few commenters noted, however that, when less than 20 percent of the units are affordable, affordability may be incidental to the project and immaterial to financing. Commenter feedback also included the view that properties developed without government funding should receive pro rata consideration if the percentage of units affordable to low- or moderate-income households were 50 percent or lower, and full consideration if the percentage of units affordable to low- or moderate-income households were greater than 50 percent.

A few commenters conveyed that the proposal for pro rata consideration was too broad. In this regard, for example, a commenter expressed concern that the proposal could lead to providing CRA consideration for projects that do not preserve long-term affordability for low- or moderate-income individuals. Instead, the commenter stated that pro rata consideration should be limited to affordable housing projects that are: (1) owned by mission-driven affordable housing nonprofit organizations or public entities; (2) restricted to remain affordable at the lesser of 80 percent of area median income or HUD’s Small Area Fair Market Rent;²⁶⁶ and (3) subject to compliance monitoring by a public entity. One commenter urged caution with pro rata consideration for affordable housing, stating that displacement pressure associated with new market rate housing in a low- and moderate-income community could

²⁶⁶ See, HUD, Office of Policy Development and Research, “Small Area Fair Market Rents,” <https://www.huduser.gov/portal/datasets/fmr/smallarea/index.html>.

offset the benefit of providing the additional affordable units. Another commenter suggested that banks should not receive credit for affordable housing lending if the percentage of affordable units falls meets only the minimum required under a local inclusionary ordinance.

LIHTCs (proposed § 13(a)(1)(i)(B)). Many of the commenters addressing the affordable housing component of the primary purpose standard strongly supported the proposal to provide full consideration for activities that involve LIHTCs to support affordable housing. A few commenters referenced the important role that LIHTC-financed projects have in addressing the need for affordable housing and noted that the LIHTC program drives most privately financed construction and rehabilitation of affordable housing. Other commenters asserted that the statutory and regulatory restrictions of the LIHTC program ensured that these activities were in the interest of public welfare.

Several commenters, however, suggested changes to this component. Some commenters stated that banks should receive full consideration for *investments* in mixed-income LIHTC projects, noting that the tax credits for investments under the LIHTC program is already prorated based on the percentage of units that are affordable. However, these commenters urged that *lending* to these projects should be prorated, asserting that lending to mixed-income LIHTC projects could include significant financing for market-rate housing, and expressed the view that banks should not get community development credit for this portion.

Several commenters suggested that full consideration for affordable housing projects should apply more broadly to include other types of affordable housing, in addition to LIHTC projects. A few commenters recommended that full consideration be given for investments through nonprofit organizations with a mission or primary purpose of providing affordable housing, regardless of the purpose of the underlying collateral. One of these commenters asserted that bank investments supporting affordable housing projects through community-based development organizations (CBDOs) with a history of serving the needs of low- and moderate-income people and communities should also receive full consideration. This commenter maintained that full consideration for these projects would be warranted regardless of the income levels targeted by the project because CBDOs have the “mission and

experience” to consider community mixed-income housing needs. Another commenter questioned why full consideration would not also be extended to all affordable housing developed with Federal housing subsidies, such as HUD’s HOME Investment Partnerships Program (HOME) or project-based section 8 rental assistance.

Pro rata consideration for other community development categories. As noted previously, the agencies sought commenter perspectives on whether a partial consideration framework should be extended to some, or all, community development categories, in addition to affordable rental housing. Some commenters supported limiting partial consideration to only affordable housing. These commenters noted several common reasons for this, including the documented benefits of mixed-income housing for low- and moderate-income individuals and communities; the additional financing challenges for affordable housing compared to other types of projects; and the concern that expanding partial consideration beyond housing could divert limited resources away from projects that target low- and moderate-income individuals or communities. One commenter stated that approximately one-third of the national population is low- and moderate-income, so many activities could receive approximately that amount of credit if pro rata consideration were based on the population of low- and moderate-income individuals, without specifically targeting this population. This commenter asserted that any percentage of low- and moderate-income beneficiaries set for pro rata consideration would have therefore have to be substantially higher than the share of the low- and moderate-income population to demonstrate that the activity had the actual intent of serving that population, at which point the level would approach the existing 50 percent threshold. Thus, the commenter believed that there is little to be gained and much to be lost in offering partial consideration outside of affordable housing activities, where income mixing is often part of an intentional strategy or necessary condition for creating new affordable homes.

Other commenters supported allowing partial credit for certain types of larger-scale community development projects that might benefit low- or moderate-income individuals and communities. In general, these commenters noted that some projects might not be limited to a specific geographic area and would still benefit

low- and moderate-income people and communities within the area affected. One commenter suggested that providing pro rata credit for a wider range of community development activities would acknowledge the complexities of delivering services to a large geographic area and could incentivize more financing in economically struggling or rural areas.

The community development activity most often cited by commenters urging more extensive partial consideration was expanding access to broadband, with commenters noting the critical need for these services that are lacking in many rural and low- and moderate-income communities. Examples of other community development activities referenced by commenters for partial credit included: (1) infrastructure and community facilities; (2) projects that increase access to transportation, health care or renewable energy; or (3) projects that help to revitalize vacant and abandoned land or buildings. One commenter expressed general opposition to partial consideration but conveyed support for exceptions for projects in rural areas, using access to broadband as an example.

Several commenters suggested that, if partial consideration is provided, certain guardrails should be in place to ensure that low- or moderate-income individuals and communities benefit. One commenter stated that partial consideration should be allowed only for activities that specifically target low- and moderate-income areas, and that merely benefiting these areas was not sufficient. A few commenters similarly expressed concerns about granting partial credit for activities that support community development but do not intentionally target benefits to low- and moderate-income people and communities; specifically they recommended that, for activities supporting community facilities and essential infrastructure to qualify for partial credit, the primary beneficiaries of the project should be low- and moderate-income persons or residents of low- and moderate-income communities. Another commenter supported partial credit for infrastructure projects that benefit “rural and other socially disadvantaged communities,” citing as an example the educational benefits to low- and moderate-income populations afforded by access to broadband. However, this commenter stated that no credit should be given to projects that would happen even without the incentive of CRA credit and that do not have a demonstrable benefit for low- or moderate-income communities. This

commenter further recommended that partial CRA credit be given in proportion with the demonstrated impact on low- and moderate-income communities, suggesting that this might be based on the income levels of the census tracts a project spans. Finally, a commenter suggested that partial consideration could be warranted for community development activities other than support for affordable housing, as communities might have other community development needs but recommended, however, that the community development activities, among other criteria: (1) “significantly improve” factors impacting the health of residents in low- and moderate-income communities; (2) be undertaken with a U.S. Treasury-certified CDFI; (3) be widely supported by the community; and (4) “contribute directly” to a range of potential community benefits.

Numerous other commenters favored expansion of partial consideration for all community development categories. Several commenters asserted that partial consideration would encourage banks to expand the geographic reach of their community development activities and encourage more community development activity that benefits low- and moderate-income individuals and communities. One commenter expressed the view that extending partial consideration to all community development categories would not dilute community development resources for low- or moderate-income communities and asserted that partial credit could incentivize more large-scale projects addressing infrastructure needs beyond affordable housing. Another commenter added that a partial credit framework would appropriately account for the complexities that can be associated with bringing services to geographically dispersed populations. Similarly, several commenters stated that partial consideration of community development activities would be particularly beneficial in rural areas, where the population is more widely dispersed and there are fewer low- or moderate-income tracts and individuals. One commenter expressed support for partial consideration for all community development activities but indicated that the “majority” standard for primary purpose should also be retained,²⁶⁷ since some banks might not have the capacity to document partial consideration levels with more specificity.

Threshold for partial consideration. Many commenters who supported

partial consideration for activities in some or all community development categories also thought that a minimum threshold for the percentage of the activity that serves low- or moderate-income individuals and geographic areas or small businesses and small farms should apply for a bank to be eligible to receive partial consideration for the activity. Numerous commenters suggested a minimum threshold ranging from 10 percent to over 50 percent for partial consideration eligibility, with a minimum of 25 percent being the threshold most frequently suggested. For example, a commenter suggested that a threshold of 10 percent would be appropriate, allowing for projects with complex development and construction markets, including higher-income markets.

A number of commenters asserted that no minimum threshold should be required for partial consideration eligibility, as long as some benefit of the activity to low- or moderate-income individuals or communities or small businesses or small farms could be documented. For example, a commenter stated that excluding loans or investments that do not meet a 50 percent threshold presents an incomplete picture of a bank’s overall community development activities. This commenter further asserted that a pro rata framework for all community development activities would further the CRA goals of expanding lending and investment in low- and moderate-income communities because all of a bank’s community development efforts would count.

Finally, regarding when full consideration of an activity should be given, some commenters expressed the view that, for an activity to receive full credit, the percentage of benefits to low- or moderate-income individuals or communities or small businesses and small farms should be higher than 51 percent (*see* discussion of comments on the “majority” standard above). The thresholds suggested by these commenters ranged from 60 percent to 80 percent for full consideration. For example, one commenter recommended a 75 percent threshold and cautioned against activities that do not in fact serve communities but sustain poverty over the long term, such as, among other examples, infrastructure projects that cause affordable housing losses. This commenter also urged the agencies to consider a standard based on whether the activity is supported or requested by the community itself. Another commenter suggested that a 60 percent threshold would strike an appropriate balance between incentivizing a focus

on low- and moderate-income needs and allowing for a range of projects that could benefit a wider range of residents, such as in a mixed-income community.

Final Rule

The agencies are finalizing the proposal to clarify eligibility criteria for different community development activities, with several changes and restructuring. The agencies carefully considered comments received regarding standards for determining whether an activity has the primary purpose of a community development. Based on the agencies’ review of the comments and supervisory experience, the agencies concluded that “primary purpose” does not accurately describe when a bank will receive full or partial credit and resulted in some confusion in this regard. Thus, under the final rule, the agencies are modifying the proposal that focused on a primary purpose standard by adopting specific standards for full and partial consideration of community development activities, to clarify when activities will receive such consideration. To streamline the regulation, the agencies are eliminating the list of community development categories in proposed § ____.13(a)(2) and instead adding new language in final § ____.13(a) that a bank may receive community development consideration for a loan, investment, or service that supports one of eleven categories of community development described in final § ____.13(b) through (l), as outlined above. The agencies also reorganized proposed § ____.13(a) into two distinct sections: final § ____.13(a)(1), which details the circumstances in which a bank receives full credit; and final § ____.13(a)(2), which details the circumstances in which a bank receives partial credit for a community development loan, investment, or service.

Also as noted above, the agencies are replacing “primary purpose” terminology and setting forth a framework consistent with the current and proposed primary purpose standard, but delineated for each category of community development to convey more clearly and transparently the parameters for community development loans, investments, and services to receive full or partial credit, as discussed in more detail below in the section-by-section analysis of final § ____.13(a)(1) and (2).

Overall, the agencies believe that the final rule provides meaningful clarification of the standards for consideration of community development loans, investments, and services, in response to comments and

²⁶⁷ See proposed § ____.13(a)(1)(i). See also Q&A § ____.12(h)–8.

on further deliberation by the agencies. The section-by-section analysis below provides additional detail.

Section ____ .13(a)(1) Full credit

The agencies are adopting final § ____ .13(a)(1) to identify four circumstances under which a bank will receive credit for the entire community development loan, investment, or service. More specifically, banks will receive full credit for these types of activities if they:

- Meet the majority standard in § ____ .13(a)(1)(i);
- Meet the bona fide intent standard in § ____ .13(a)(1)(ii);
- Involve an MDI, WDI, LICU, or CDFI as provided in § ____ .13(a)(1)(iii); or
- Involve LIHTCs as provided in § ____ .13(a)(1)(iv).

The agencies intend with this reorganization to address comments seeking clarification about standards for community development consideration. By categorizing and clarifying the types of community development activities that receive full credit, the agencies are emphasizing activities that are responsive to community needs.

Section ____ .13(a)(1)(i) Majority Standard

Similar to proposed § ____ .13(a)(1)(i), the agencies are finalizing a majority standard with additional criteria that more specifically address how the standard is applied with respect to each of the community development categories. Final § ____ .13(a)(1)(i)(A), states that any loan, investment, or service must support community development under one or more of the categories outlined in final § ____ .13(b) through (l). Further, final § ____ .13(a)(1)(i)(B) provides that the loan, investment, or service must meet one or more of the other criteria established under the majority standard that correspond to each of the community development purposes. Specifically, under § ____ .13(a)(1)(i)(B)(1), for a community development loan, investment or service that supports any of the categories of affordable housing under final § ____ .13(b)(1) through (3) to meet the majority standard, the majority of the housing units supported by the bank's loan, investment or service must be affordable to low- or moderate-income individuals. The agencies believe that, for these categories of community development, the housing unit standard for measuring whether the majority standard is met (or the appropriate proportion of partial credit) is objective and consistent with the impact that the

project will have on the community. Regarding other categories of community development, final § ____ .13(a)(1)(i)(B)(2) through (6) provide that a loan, investment, or service meets the majority standard if the majority of beneficiaries are, or the majority of dollars benefit or serve, the following:

- Low- and moderate-income individuals, with respect to affordable housing and community supportive services pursuant to final § ____ .13(b)(4) and (5) and (d), respectively;²⁶⁸
- Small businesses and small farms, with respect to economic development pursuant to final § ____ .13(c);²⁶⁹
- Residents of targeted census tracts, with respect to revitalization or stabilization, essential community facilities, essential community infrastructure, and disaster preparedness and weather resiliency pursuant to final § ____ .13(e) through (g) and (i);²⁷⁰
- Residents of designated disaster areas with respect to recovery of designated disaster areas pursuant to final § ____ .13(h);²⁷¹
- Residents of Native Land Areas, with respect to revitalization or stabilization, essential community facilities, essential community infrastructure, and disaster preparedness and weather resiliency in Native Land Areas pursuant to final § ____ .13(j).²⁷²

Lastly, final § ____ .13(a)(1)(i)(B)(7) provides that loans, investments, and services supporting community development under final § ____ .13(b)(l) meet the majority standard if they primarily support financial literacy.

The agencies considered comments that suggested establishing a threshold greater than a majority (*i.e.*, over 50 percent) (ranging from 60 to 80 percent) to receive full credit for a community development activity. However, the agencies believe that the majority standard, which has a longstanding history in the current rule, appropriately identifies those activities that primarily have a community development purpose, while acknowledging that many important community development initiatives and projects are not solely dedicated to the community development purposes in final § ____ .13(b) through (l).

While a few commenters suggested that the majority standard should be applied to beneficiaries that are racial

and ethnic minorities in addition to those elements that were identified in the proposal, the agencies did not add these beneficiaries to the majority standard, although the agencies expect that the clarified majority standard will better facilitate banks meeting the community development needs of their entire communities. For more information and discussion regarding the agencies' consideration of comments recommending adoption of additional race- and ethnicity-related provisions in this final rule, see section III.C of this **SUPPLEMENTARY INFORMATION.**

Section ____ .13(a)(1)(ii) Bona Fide Intent Standard

Consistent with proposed § ____ .13(a)(1)(ii), the agencies are adopting final § ____ .13(a)(1)(ii), with restructuring and a technical change from the proposal. The final rule confirms loans, investments, and services that meet the bona fide intent standard receive full community development credit. A loan, investment, or service meets the bona fide intent standard if:

- The housing units, beneficiaries, or proportion of dollars necessary to meet the majority standard are not reasonably quantifiable;²⁷³
- The loan, investment, or service has the express, bona fide intent of one or more of the community development purposes in final § ____ .13(b) through (l);²⁷⁴ and
- The loan, investment, or service is specifically structured to achieve one or more of the community development purposes in final § ____ .13(b) through (l).²⁷⁵

In addition to reorganizing final § ____ .13(a)(1)(ii) from the proposal for clarity and to confirm that a bank may receive full credit for meeting the bona fide intent standard, the agencies are clarifying that the bona fide intent standard applies when the "housing units, beneficiaries, or proportion of dollars necessary to meet the majority standard are not reasonably quantifiable." For example, this standard could be appropriate when considering a loan to an organization that has a bona fide intent of serving low- or moderate-income individuals but does not track data on the income of every individual served, such that demonstrating an activity meets the majority standard would be highly challenging. Additionally, the agencies removed the language in the proposal that the activity must also be

²⁶⁸ See final § ____ .13(a)(1)(i)(B)(2).

²⁶⁹ See final § ____ .13(a)(1)(i)(B)(3).

²⁷⁰ See final § ____ .13(a)(1)(i)(B)(4).

²⁷¹ See final § ____ .13(a)(1)(i)(B)(5).

²⁷² See final § ____ .13(a)(1)(i)(B)(6).

²⁷⁴ See final § ____ .13(a)(1)(ii)(B).

²⁷⁵ See final § ____ .13(a)(1)(ii)(C).

“reasonably certain to accomplish” a community development purpose. The agencies appreciated the commenter concern that the “reasonably certain to accomplish” criterion could produce uncertainty and inconsistency in application, based on conjectures regarding the outcomes of the activity. However, the agencies are retaining the criterion that an activity must be “specifically structured to achieve” a community development purpose, which the agencies believe helps to ensure that any activities that do not meet the majority standard appropriately receive consideration under the bona fide intent standard, as an activity focused on a community development purpose.

The agencies also considered the commenter suggestion that the bona fide intent standard should be removed from the final rule, but based on supervisory experience, believe that this would eliminate from consideration numerous beneficial initiatives that have a community development purpose, but do not meet the majority standard in final § _____.13(a)(1)(i). Further, the agencies believe the three required criteria for the bona fide intent standard will help to eliminate any potential abuse in the application of this standard. With the revisions to the language regarding the bona fide intent standard, the agencies believe that the standard is a balanced approach to encouraging community development activities, while eliminating from consideration any activities that are not predominantly focused on a community development purpose.

Section _____.13(a)(1)(iii) Community Development Related to MDIs, WDI, LICUs, and CDFIs

As the proposal did not specifically address how the primary purpose consideration would be applied with respect to a loan, investment, or service to an MDI, WDI, LICU, or CDFI that supports community development under proposed § _____.13(a)(2)(ix) and (j), the agencies added and are finalizing § _____.13(a)(1)(iii) to clarify that activities conducted in conjunction with these four types of entities are eligible for full credit. As discussed in more detail in the section-by-section analysis of final § _____.13(k), community development under final § _____.13(k) (renumbered from proposed § _____.13(j)) differs somewhat from the other types of community development under final § _____.13(b) through (j) and (l) in that the credit a bank receives is based exclusively on the entity to which the bank is providing the loan, investment, or service, rather than looking at a

measurable benefit using the corresponding dollars, beneficiaries, or housing units associated with the activity. The provision of full credit to these types of activities is also consistent with how the agencies currently consider loans, investments, and services that support MDIs, WDI, and LICUs.²⁷⁶

Section _____.13(a)(1)(iv) Community Development Related to LIHTC-Financed Projects

The agencies are adopting proposed § _____.13(a)(1)(i)(B), renumbered as final § _____.13(a)(1)(iv), with certain revisions for clarity. This provision clarifies the agencies’ intent, consistent with the current CRA framework, that a loan, investment or service involving a project financed by LIHTCs under final § _____.13(b)(1) will receive full community development credit. Under proposed § _____.13(a)(1)(i)(B), full consideration was limited to only investments in projects financed by LIHTCs. Many commenters supported providing full community development credit for all activities that involve LIHTCs to finance affordable housing. Therefore, in response to these commenters and considering past supervisory practice, the agencies adopted final § _____.13(a)(1)(iv), to state that a loan, investment or service involving LIHTCs to finance the development of affordable housing under final § _____.13(b)(1) will receive full community development credit.

The agencies considered commenter concerns that lending to mixed income housing projects that include units financed by LIHTCs could also include financing for market-rate housing that does not benefit or serve low- and moderate-income individuals. However, the agencies determined that granting full credit for these loans under § _____.13(a)(1)(iv) is appropriate for ensuring certainty regarding existing approaches to financing LIHTC projects, as full credit for these loans is consistent with current guidance.²⁷⁷ The agencies also considered that projects developed with LIHTCs have the expressed intent of providing affordable housing, regardless of the percentage of affordable units that are supported, and believe that providing credit for LIHTC-related lending aligns with the statutory purpose of encouraging banks to meet the credit needs of their communities, including

low- and moderate-income populations.²⁷⁸

The agencies also considered comments suggesting that full credit for loans, investments, or services should be extended to all affordable housing developed with Federal housing subsidies or to all affordable housing projects developed through CBDOs with a history of serving low- and moderate-income populations. The agencies recognize the importance of all Federal housing programs in financing affordable housing and the important role that CBDOs play in developing affordable housing. However, on further review of these suggestions, the agencies have determined that loans, investments, and services for projects financed by Federal housing subsidies or developed by CBDOs should not automatically receive full consideration because the scope and target of these subsidies and projects may vary greatly. While the agencies believe that most of the affordable housing projects developed in conjunction with Federal subsidies and CBDOs will likely warrant consideration as a community development activity, the agencies believe that they should be considered individually, and not universally provided full credit; rather, given the wide variety of subsidies and projects, the corresponding loans, investments, and services will be more appropriately considered under the full or partial credit criteria in final § _____.13(a)(1) and (2), as applicable to these types of projects.

Section _____.13(a)(2) Partial Credit

Partial consideration for affordable housing. A second category implemented as part of the restructuring reflected in final § _____.13(a) includes loans, investments, and services that will receive partial credit. The agencies are adopting proposed § _____.13(a)(1)(i)(A), renumbered as final § _____.13(a)(2), and reworded for clarity. Final § _____.13(a)(2) memorializes current interagency guidance related to the provision of mixed-income housing with an affordable housing set-aside required by a Federal, State, or local government.²⁷⁹ Under this construct, a bank will receive partial credit for any loan, investment, or service that supports affordable housing under final § _____.13(b)(1) and does not meet the majority standard under final § _____.13(a)(1)(i). This partial credit will

²⁷⁸ For further discussion of final rule provisions regarding LIHTCs, see the section-by-section analysis of § _____.15(b)(10) (impact and responsiveness review factor for investments in LIHTC).

²⁷⁹ See Q&A § _____.12(h)–8.

²⁷⁶ See current § _____.21(f) and Q&A § _____.21(f)–1.

²⁷⁷ See Q&A § _____.12(t)–4.

be calculated in proportion to the percentage of total housing units in any development that are affordable to low- or moderate-income individuals. For example, if a bank makes a \$10 million loan to finance a mixed-income housing development in which 10 percent of the units will be set aside as affordable housing for low- and moderate-income individuals according to a local government set-aside requirement, the bank may elect to treat \$1 million of such loan as a community development loan. This provision will provide flexibility for banks to engage in affordable housing even if rental housing purchased, developed, financed, rehabilitated, improved, or preserved in conjunction with a Federal, State, local, or tribal government affordable housing plan, program, initiative, tax credit, or subsidy does not include a majority of housing units that are affordable to low- or moderate-income individuals.

The final rule is intended to be responsive to the numerous commenters that supported the proposal to provide pro rata consideration for affordable rental housing based on the percentage of housing units that are affordable. While commenter suggestions included that banks receive full credit for subsidized affordable housing that represented at least 20 percent of the bank's financing, the agencies believe that such treatment could inappropriately dilute the consideration of community development loans and investments by providing significant amounts of credit for housing that is not affordable to low- and moderate-income people. The agencies have also decided not to provide partial credit to loans or investments in affordable housing projects that are developed without government support if less than 50 percent of the units are affordable. This type of affordable housing may not have protections to preserve the housing as affordable to low- and moderate-income individuals during the term of the loan or investment, which are typical of government-supported affordable housing.

As mentioned previously, the agencies considered comments suggesting that partial credit for affordable housing was too broad and should be limited to provide partial credit only for those projects that maintain at least 20 percent of the units as affordable. However, the agencies do not believe that such a limitation is necessary. The final rule restricts partial consideration to only rental housing in conjunction with a government affordable housing plan, program, initiative, tax credit, or subsidy

pursuant to § ____ .13(b)(1), which will help ensure that there is an intent of providing affordable housing and will limit the consideration of housing units that may be incidental. The agencies believe it is appropriate to defer to the Federal, State, local, or tribal government to set minimum standards for participating in affordable housing programs, plans, initiatives, tax credits, or subsidies that are responsive to their respective communities.

The agencies also contemplated the suggestion that banks should not receive credit for lending for affordable housing if the housing is associated with a local inclusionary zoning ordinance and provides only the minimum amount of affordable housing required. While the agencies acknowledge the compulsory nature of these ordinances and concerns with providing community development credit for loans and investments that support this housing, the agencies believe that affordable housing associated with inclusionary zoning should be included. The agencies recognize that inclusionary zoning represents an important tool utilized by local jurisdictions to create and preserve affordable housing for low- and moderate-income individuals, especially in higher-income areas. In addition, under the final rule, if affordable housing provided through these programs does not meet the majority standard, the credit afforded to a bank is limited to only the percentage of units that are considered affordable.

Partial consideration for other community development categories. As discussed above, the agencies received a wide range of comments in response to the request for feedback on whether partial credit should be extended to some, or all, community development categories, in addition to affordable housing. After consideration of these comments, the agencies are adopting final § ____ .13(a)(2) without extending partial credit to other categories of community development. The agencies share commenter concerns that expanding partial consideration beyond mixed-income rental housing could divert limited community development resources away from the projects that target low- or moderate-income people and communities, as well as small businesses and small farms. To this end, the agencies are not adopting suggestions that the final rule provide partial credit for certain larger-scale community development projects that have the potential to impact low- or moderate-income individuals and communities but are not primarily targeted to these populations. Unless these projects are associated with

LIHTCs or are conducted with MDIs, WDIs, LICUs, or CDFIs, the agencies believe that these projects should receive credit only when they meet the majority or bona fide intent standards. The full and partial credit criteria in § ____ .13(a) serve as sufficient guardrails to ensure that low- or moderate-income individuals and communities, as well as other underserved segments of the community identified in community development categories in § ____ .13(b) through (l), benefit.

The agencies also considered feedback from some commenters that supported some degree of expansion of the partial credit standard with certain qualifications, limitations, and additional criteria. However, the agencies determined that the consistent and transparent application of an expansion with these qualifications would be untenable, such as limiting partial credit to projects that would only happen without CRA recognition or that are widely supported by the community. The agencies also considered suggestions to allow partial consideration with a minimum threshold for the percentage (ranging from 10 to 50 percent and most often cited as 25 percent) of the activity that served low- or moderate-income individuals and geographic areas, small businesses, and small farms. The agencies carefully considered the many varying views on extending a partial credit framework to other community development categories, and the suggested thresholds for doing so. On balance, the agencies believe that applying the majority and bona fide intent standards to other categories of community development affords the consistency and clarity that can foster a predictable and transparent framework for bank partnerships and engagement in community development within the communities they serve. For the reasons discussed above, the agencies believe that government-related mixed-income affordable housing is distinguishable from other types of community development in ways that make a partial credit framework appropriate for facilitating bank involvement in these projects, consistent with government assessments of the affordable housing needs of their communities. Further, the agencies note that banks will receive full credit for any loan, investment, or service that is not entirely dedicated to a community development purpose, as long as it meets the majority or bona fide intent standard pursuant to § ____ .13(a)(1).

As mentioned previously, several commenters suggested the expansion of partial credit consideration for

broadband, noting that the need for this infrastructure is particularly critical in many rural and low- and moderate-income communities. The agencies have considered these comments but determined that outside of affordable housing, it is difficult to single out unique treatment for specific activities. Therefore, the agencies have decided to retain the final rule as proposed, and all activities beyond affordable housing will have to meet the majority or bona fide intent standard pursuant to § _____.13(a)(1). The agencies recognize that a need for broadband exists in rural and low- or moderate-income communities and seek to address this need under § _____.13(g), the community development category for essential community infrastructure, which allows consideration for infrastructure activities, including those expanding broadband access, that benefit or serve targeted census tracts (which includes low-income, moderate-income, or distressed or underserved middle-income nonmetropolitan tracts) and meets other specified criteria. For further discussion, including additional comments on broadband access and other types of essential community infrastructure, see the section-by-section analysis of § _____.13(g). The agencies intend that consideration for activities under several community development categories, including revitalization or stabilization, essential community facilities, essential community infrastructure, and disaster preparedness and weather resiliency²⁸⁰ that benefit or serve residents of targeted census tracts, including distressed and underserved nonmetropolitan middle-income census tracts, will help to address commenters' concern that partial credit is necessary to ensure that the community development needs of rural areas, which are often more widely dispersed and have fewer low- or moderate-income tracts and individuals, are met.

Section _____.13(b) Affordable Housing

In proposed § _____.13(b), the agencies proposed a definition for affordable housing that included four components: (1) affordable rental housing developed in conjunction with Federal, State, local, and tribal government programs; (2) multifamily rental housing with affordable rents; (3) activities supporting affordable low- or moderate-income homeownership; and (4) purchases of mortgage-backed securities that finance affordable housing. The agencies intended the proposed definition to clarify the eligibility of affordable

housing as well as to recognize the importance of promoting affordable housing for low- or moderate-income individuals.²⁸¹ Specifically, the agencies stated their belief that the proposal would, first, add greater clarity around the many types of subsidized activities that currently qualify for CRA consideration.²⁸² Second, the agencies sought to provide clear and consistent criteria in order to qualify affordable low- or moderate-income multifamily rental housing that does not involve a government plan, program, initiative, tax credit, or subsidy (also referred to in the agencies' proposal as "naturally occurring affordable housing" or "affordable multifamily rental housing").²⁸³ Third, the agencies stated their intention to ensure that activities that support affordable low- and moderate-income homeownership are sustainable and beneficial to low- or moderate-income individuals and communities.²⁸⁴ Finally, the agencies, through the proposal, sought to appropriately consider qualifying mortgage-backed security investments, so as to emphasize community development financing activities that are most responsive to low- or moderate-income community needs.²⁸⁵

Comments on the overall structure of the agencies' affordable housing proposal varied, with some commenters commending the breadth of housing activities included in the proposal, while others viewed the proposal as too narrow or rigid, or questioned whether the proposal would add burden on banks that may constrain banks' capacities to meet affordable housing needs.

Commenters also provided feedback on specific aspects of the affordable housing community development category proposal, including feedback on which affordable housing activities should be required to meet an agency-determined affordability standard, which affordability standard or standards the agencies should adopt, and what, if any, geographical considerations should be factored in when determining whether affordable housing activities should be eligible for community development consideration.

For the reasons discussed in this section, the agencies have adopted an approach to defining the affordable housing category of community development that aligns closely with the agencies' proposal, as well as key

aspects of current practice and interpretations under the CRA. Importantly, in response to commenter feedback, the agencies are adopting modifications to the affordable housing community development category to ensure that the criteria are sufficiently flexible to account for a variety of housing models that address community needs. The final rule adds a component for consideration of activities that finance one-to-four family rental housing with affordable rents in nonmetropolitan areas. In addition, the final rule incorporates revisions designed to clarify the eligibility of rental housing in conjunction with a government affordable housing program, initiative, tax credit or subsidy. The final rule also revises and clarifies the affordability standard for naturally occurring affordable housing, clarifies the requirements for affordable owner-occupied housing activity, and revises and clarifies the requirements for purchases of mortgage-backed securities.

Current Approach

The current CRA regulations define "community development" to include "affordable housing (including multifamily rental housing) for low- or moderate-income individuals."²⁸⁶ The agencies have stated in the Interagency Questions and Answers that, for housing to be considered community development, low- or moderate-income individuals must benefit or be likely to benefit from the housing.²⁸⁷ In this regard, the Interagency Questions and Answers provide that, for example, consideration for a "project that exclusively or predominately houses families that are not low- or moderate-income simply because the rents or housing prices are set according to a particular formula" would not be appropriate.²⁸⁸

Under the current regulation, single-family (*i.e.*, one-to-four family) home mortgage loans are generally considered as part of the large bank and small bank lending tests, but may be considered as community development loans under the community development test for intermediate small banks that do not report such loans under HMDA (at the bank's option and if for affordable housing).²⁸⁹ Multifamily affordable

²⁸⁴ See *id.* at 33897.

²⁸⁵ See *id.*

housing loans may qualify for both retail lending and community development consideration if those loans also meet the definition of a “community development loan.”²⁹⁰ Housing that is financed or supported by a government affordable housing program or a government subsidy is considered subsidized affordable housing and is generally viewed as qualifying under affordable housing if the government program or subsidy has a stated purpose of providing affordable housing to low- or moderate-income individuals. Multifamily housing with affordable rents that is not financed or supported by a government affordable housing program or a government subsidy, is generally considered unsubsidized affordable housing (and is also referred to in this **SUPPLEMENTARY INFORMATION** as naturally occurring affordable housing). Such housing can qualify as affordable housing under the current definition of “community development” if the rents are affordable to low- or moderate-income individuals, and if low- or moderate-income individuals benefit, or are likely to benefit, from this housing.²⁹¹ Current interagency guidance mentions certain information that examiners may consider in making this determination.²⁹²

Regarding affordability, no specific standard exists under the current regulatory framework for determining when a property or unit is considered affordable to low- or moderate-income individuals, for either multifamily or single-family housing.²⁹³ One approach used by some examiners is to calculate an affordable rent based on what a moderate-income renter could pay if they allocated 30 percent of their income to rent. Alternatively, some examiners use HUD’s Fair Market Rents as a standard for measuring affordability.²⁹⁴

Purchases of mortgage-backed securities qualify as affordable housing activity if they demonstrate a primary purpose of community development.²⁹⁵

²⁹⁵ See Q&A § ____ .12(t)–2.

Specifically, the security must contain a majority of single-family mortgage loans to low- or moderate-income borrowers, or of loans financing multifamily affordable housing, to qualify as an investment with a primary purpose of affordable housing.²⁹⁶

Overall Affordable Housing Category Structure

The Agencies’ Proposal

The NPR stated in proposed § ____ .13(a)(2)(i) that loans, investments, or services that “promote . . . [a]ffordable housing that benefits low- or moderate-income individuals” would have the requisite community development purpose for CRA consideration. This provision cross-referenced proposed § ____ .13(b) for greater detail about which activities qualify as “affordable housing that benefits low- or moderate-income individuals.” To this end, the agencies proposed four types of activities that would qualify under the affordable housing category of community development: (1) affordable rental housing developed in conjunction with Federal, State, local, and tribal government programs; (2) multifamily rental housing with affordable rents; (3) activities supporting affordable low- or moderate-income homeownership; and (4) purchases of mortgage-backed securities that finance affordable housing.

The agencies sought feedback on what changes, if any, should be made to ensure that the proposed affordable housing category is clearly defined and appropriately inclusive of activities that support affordable housing for low- or moderate-income individuals, including activities that involve complex or novel solutions such as community land trusts, shared equity models, and manufactured housing.

Comments Received

Structure of affordable housing category. Many commenters provided feedback on the overall structure of the proposed affordable housing category of community development. Several commenters suggested that the agencies should not distinguish between government-subsidized and naturally occurring affordable housing. These commenters supported combining the first and second components of the proposed affordable housing category into one, with a universally applied affordability standard. In this regard, some commenters suggested that creating separate affordable housing standards based on the presence or

absence of government support would be mistaken and urged the agencies to establish a uniform standard that would apply to all affordable multifamily housing—other than housing financed with LIHTCs—regardless of whether it has government support. These commenters proposed focusing on rent affordability as a percent of area median income, or the HUD Fair Market Rents standard, and a combination of other criteria such as: location in low- or moderate-income census tracts or in census tracts where the median renter is low- or moderate-income; nonprofit or CDFI ownership or control; documented occupancy by low- or moderate-income individuals; or an owner commitment to maintain the affordability of housing units for low- or moderate-income individuals for at least five years. These commenters also asserted that the agencies should include a requirement to periodically confirm the continued affordability of housing activities that receive community development consideration.

Scope of affordable housing category. Many commenters urged the agencies to provide additional support for difficult-to-finance housing projects by narrowing the agencies’ proposal. For example, one commenter expressed the view that, by incorporating a wide variety of housing models, the proposed affordable housing category could reward banks that gravitate to easier-to-finance projects, versus projects for which banks may need further incentives to provide financing. Other commenters, for example, suggested that the agencies should prioritize consideration of activities that finance owner-occupied homes over investor-owned housing, with one of these commenters conveying that the agencies should evaluate any investor-related lending to determine whether it helps to build wealth for minority consumers or, alternatively, displaces them. This commenter also asserted that the agencies needed to comprehensively analyze banks’ multifamily lending to provide consideration for beneficial activities and to impose sanctions for adverse behavior, such as financing landlords who are harassing and displacing tenants. Along those same lines, several commenters emphasized that the agencies should scrutinize banks’ multifamily lending programs, including those conducted in partnership with third-party non-bank institutions, for illegal practices. Another commenter asserted that insufficient regulation of low-income housing tax credit investments has contributed, nationally, to over-

²⁹⁶ See *id.*

concentration and racial and ethnic segregation of low-income housing tax credit projects in minority communities, and that the agencies should address this dynamic in the final rule.

A variety of commenters addressed the agencies' request for feedback on what changes, if any, the agencies should consider to ensure that the proposed affordable housing category of community development is clearly and appropriately inclusive of activities that support affordable housing for low- or moderate-income individuals. Many commenters requested that the agencies add provisions specific to community land trusts, shared equity models, land banks, accessory dwelling units (ADUs), and manufactured housing to the proposed affordable housing category. In support of this view, a commenter asserted that adding these housing initiatives would help strengthen communities and reduce social barriers such as unemployment, lack of education, and limited transportation. Another commenter recommended that the agencies specifically include supportive housing that provides both affordable housing and wrap-around services for people with complex medical needs. Commenters further requested that the agencies allow a guidance line of credit, which is a form of credit pre-approval from a lender, to be eligible for CRA consideration, as this financing method is used by nonprofit organizations in the affordable housing space.

Other general comments on affordable housing category. Some comments touched on affordable housing in conjunction with other community development activities. Commenter feedback included requests that the agencies: promote co-development of disaster preparedness and climate resiliency activities with affordable housing and other activities to mitigate the risk of displacement; provide more support specifically for government-subsidized housing; and provide more quantitative and qualitative consideration of the value of low-income housing tax credit and NMTC syndications and sponsorship activities.

Final Rule

The agencies are adopting final § _____.13(b), which establishes criteria for consideration of affordable housing activities, substantially as proposed but with targeted revisions discussed in the section-by-section analysis that follows. Overall, the agencies are adopting a final rule that maintains the multi-pronged approach to the affordable housing category. As part of this, the agencies have decided to retain in the

final rule separate prongs for government-related programs, including subsidized affordable housing, and naturally occurring affordable housing. Under this approach, the agencies can better tailor the standards for each affordable housing prong. Moreover, for information and discussion regarding the agencies' consideration of comments recommending adoption of additional race- and ethnicity-related provisions in this final rule, see section III.C of this

SUPPLEMENTARY INFORMATION.

Section _____.13(b)(1) Rental Housing in Conjunction With a Government Affordable Housing Plan, Program, Initiative, Tax Credit, or Subsidy

The Agencies' Proposal

In proposed § _____.13(b)(1), the agencies proposed that a rental housing unit be considered affordable housing if it is purchased, developed, financed, rehabilitated, improved, or preserved in conjunction with a Federal, State, local, or tribal government affordable housing plan, program, initiative, tax credit, or subsidy with a stated purpose or the bona fide intent of providing affordable housing for low- or moderate-income individuals. The agencies intended this proposed provision to cover a broad range of government-related affordable multifamily and single-family rental housing activities for low- or moderate-income individuals, including low-income housing tax credits.

To qualify under this component of the affordable housing category, a government-related affordable housing plan, program, initiative, tax credit, or subsidy would have needed "a stated purpose or bona fide intent of supporting affordable rental housing for low- or moderate-income individuals."²⁹⁷ The agencies did not propose a separate affordability standard for this prong and would rely upon the affordability standards set in each respective government affordable housing plan or program.

The agencies sought feedback on whether additional requirements should be included to ensure that activities qualifying under this category of community development support housing that is both affordable to and occupied by low- or moderate-income individuals. In this regard, the agencies sought feedback on whether to include in this component a specific rent affordability standard based on 30 percent of 80 percent of area median income, or a requirement that programs must verify that occupants of affordable units are low- or moderate-income

individuals or families. The agencies also sought feedback on whether activities involving government-sponsored programs that have a stated purpose or bona fide intent to provide affordable housing that serves middle-income individuals, in addition to low- or moderate-income individuals, should qualify under this prong in certain circumstances. For example, the agencies sought feedback on government-sponsored programs that support housing affordable to middle-income individuals if the housing is located in nonmetropolitan counties or in high opportunity areas.²⁹⁸

Comments Received

Many commenters offered general views on the proposed standards of the first component of the affordable housing category. Some commenters believed the proposed component was overly broad, expressing concerns: that government programs and tax credits do not always benefit low-income individuals and people of color and, therefore, the agencies should reconsider the presumption that any government plan benefits local communities; that the agencies should address the over-concentration and racial and ethnic segregation of low-income housing tax credit projects in minority communities by imposing additional requirements for low-income housing tax credit investments to be eligible for community development consideration; that it is not clear how a plan can require and enforce affordable housing; and that the component should be removed entirely, asserting that it is overly restrictive and could hinder bank investments.

Several commenters asked the agencies to broaden the proposed government-related rental housing standard by permitting activities that are "consistent with" or "in alignment with" government program guidelines, so that such guidelines could be considered but not required. Other commenter feedback included: support for an automatic presumption that activities with State or Federal low-income housing tax credits or other affordable housing tax credits or incentives qualify for community development consideration; and requests that the agencies recognize activities undertaken in conjunction with additional program sponsors such as community-focused entities with a stated mission and record of providing affordable housing and Tribally Designated Housing Entities (TDHEs).

²⁹⁷ Proposed § _____.13(b)(1).

²⁹⁸ See proposed § _____.12.

Stated purpose or bona fide intent of providing affordable housing for low- or moderate-income individuals. Some commenters supported the agencies' proposal to require that government plans, programs, initiatives, tax credits, or subsidies must have a "stated purpose or bona fide intent" of providing affordable housing for low- or moderate-income individuals in order for associated bank activities to receive community development consideration. In this regard, a commenter noted that the proposal allows State and local governments to tailor their affordable housing programs to meet the specific needs of their constituents.

Other commenters expressed a variety of concerns about the "stated purpose or bona fide intent" standard, including: that the standard would not adequately target activities that benefit low- or moderate-income households; and that government programs should not need to have a stated purpose or bona fide intent of providing affordable housing to low- or moderate-income individuals.

Affordability standard. Some commenters supported the agencies' proposal to not include an affordability standard in proposed § ____ .13(b)(1) and recommended that the agencies refrain from establishing any affordability standards for this component.

However, the majority of commenters that addressed this component of the proposal supported establishing an affordability standard that would be based on 30 percent of 80 percent of area median income for rents. This affordability standard would be separate from the affordability standard proposed for naturally occurring affordable housing (which is addressed in the section-by-section analysis of final § ____ .13(b)(2)). Commenter feedback also included suggestions that the agencies: establish a lower affordability threshold in order to serve a lower income population; utilize hybrid approaches whereby the agencies adopt an area median income-based threshold for all units and require that a portion of the units serve lower income populations, such as very low-income individuals; and use the HUD Fair Market Rents standard to establish affordability standards.

Verification of low- or moderate-income status. Commenters expressed differing views about the use of verification measures to ensure the low- and moderate-income status of renter occupants of housing units. Some commenters supported the inclusion of verification measures in the government-related rental housing component of the final rule to ensure that low- and moderate-income

individuals occupy a majority of the affordable units in government-related housing. For example, several commenters suggested that a majority standard was not enough, and that 100 percent of the units should be occupied by low- or moderate-income individuals in order to qualify under § ____ .13(b)(1). A different commenter supported verifying the income of occupants in circumstances where funding did not occur under government housing programs with income guidelines. However, several other commenters stated that additional verification of occupant income would be unnecessary, given that it is reasonable to assume government programs would collect and verify this information.

Expanding the proposal to cover certain affordable housing to middle-income individuals. Many commenters expressed views regarding whether the agencies should expand CRA consideration in the affordable housing category to include activities in conjunction with government-related rental housing in certain geographic areas that is affordable to middle-income individuals. Some commenters opposed such an expansion, indicating that CRA resources should be targeted to low- or moderate-income families, not middle-income families. For example, a few commenters opposed providing consideration for middle-income housing, noting that the low- or moderate-income housing needs in high opportunity areas are immense and raised a concern that giving consideration for middle-income housing in such areas would dilute the incentive to meet those needs.²⁹⁹ Some commenters expressed concern that consideration in the affordable housing category for lending that benefits middle- or high-income households would result in banks receiving CRA consideration for financing developments that could price low- and moderate-income families out of their current communities.

Among the commenters that supported expanding CRA consideration to government-related rental housing activities that provide affordable housing to middle-income individuals, most qualified their recommendation by stating that such activities should be limited to high

²⁹⁹ The term "high opportunity area" has not been uniformly defined within the housing industry. The agencies proposed to define a "high opportunity area" as (1) An area designated by HUD as a "Difficult Development Area"; or (2) An area designated by a State or local Qualified Allocation Plan as a High Opportunity Area, and where the poverty rate falls below 10 percent (for metropolitan areas) or 15 percent (for nonmetropolitan areas).

opportunity areas, rural and nonmetropolitan counties, high-cost markets, or a combination thereof. Citing the need for rental housing affordable to middle-income individuals in high opportunity areas and nonmetropolitan areas, one commenter urged the agencies to further explore and consider providing CRA consideration for affordable housing that serves individuals and families with a range of incomes. Another commenter suggested that government programs serving middle-income—as well as low- and moderate-income—individuals in rural and nonmetropolitan areas should be included. A different commenter suggested that CRA consideration may be appropriate in nonmetropolitan and rural areas where median income measurements can distort market characteristics in a way that is unique to rural areas, and that partial credit could be considered for housing benefiting middle-income people if the housing is developed or maintained by a CBDO with a history of serving the needs of low- and moderate-income people and places.

Some commenters urged consideration for housing where the cost of rent is up to HUD's Fair Market Rents standard in the relatively few, particularly unaffordable markets where Fair Market Rents exceeds the affordability standard of 30 percent of 80 percent of area median income. One commenter suggested that housing for middle-income individuals should be considered where there is a documented need by the local government or housing agencies due to the high cost of housing in the area compared to local wages. Another commenter suggested that activities in middle-income census tracts and low- to moderate-income adjacent tracts should be considered. Other commenters recommended that the agencies use a high-cost areas standard rather than a high opportunity areas criterion.

Final Rule

The agencies are adopting final § ____ .13(b)(1) with some substantive and technical revisions. Under final § ____ .13(b)(1), rental housing for low- or moderate-income individuals that is purchased, developed, financed, rehabilitated, improved, or preserved in conjunction with a Federal, State, local, or tribal government affordable housing plan, program, initiative, tax credit, or subsidy will receive consideration under the affordable housing category. This component is intended to enable consideration of the full range of government-related affordable rental

housing activities for low- and moderate-income individuals, including programs, plans, initiatives, tax credits, and subsidies pertaining to both multifamily and single-family properties. The examples in the following discussion demonstrate how this affordable housing component is designed to add greater clarity concerning the many types of government-related rental housing activities that qualify for consideration.

The final rule retains the requirement set out in the NPR that an activity be conducted “in conjunction with” a government plan, program, initiative, tax credit, or subsidy to ensure that there is a direct link between activities that are given consideration under this affordable housing prong and government-sponsored programs or initiatives. While the agencies have not adjusted the “in conjunction with” language in the final rule to expand the proposed standard as requested by some commenters, the agencies believe that the range of covered activities is broad. For example, consistent with the agencies’ proposal, qualification under this component of the final rule includes activities with rental properties receiving low-income housing tax credits or subsidized by government programs that provide affordable rental housing for low- or moderate-income individuals, such as project-based section 8 rental assistance and the HOME Investment Partnerships Program. In addition, this component includes Federal, State, local, and tribal government affordable housing plans, programs, initiatives, tax credits, or subsidies that support affordable housing for low- or moderate-income individuals. Examples include affordable multifamily housing programs offered by State housing finance agencies and affordable housing trust funds managed by a local government to support the development of affordable housing for low- or moderate-income individuals. Qualification under this component also includes affordable rental units for low- or moderate-income individuals created as a result of local government inclusionary zoning programs, which often provide requirements or incentives for developers to set aside a portion of housing units within a property for occupancy by low- or moderate-income individuals.

Stated purpose or bona fide intent of providing affordable housing for low- or moderate-income individuals. As also discussed in the section-by-section analysis of final § _____.13(a), the final rule removes the specific requirement within proposed § _____.13(b)(1) that a

government plan, program, initiative, tax credit, or subsidy must have a “stated purpose or bona fide intent of providing affordable housing for low- or moderate-income individuals.” The agencies are making this change in part to avoid potential confusion regarding how the activities eligible for consideration under this component differ from activities that qualify for consideration under the bona fide intent standard in final § _____.13(a)(1)(ii). Additionally, the agencies have considered commenter feedback that there are government plans, programs, initiatives, tax credits, and subsidies that provide access to rental housing for low- and moderate-income individuals but that do not have a stated mission of providing affordable housing for low- and moderate-income individuals. Removal of this specific requirement is intended to affirm that activities conducted in conjunction with such government plans, programs, initiatives, tax credits, or subsidies nonetheless may be considered under this component of the affordable housing category. Regarding commenter suggestions that certain government programs, including a low-income housing tax credit program, may not benefit, or may negatively affect, low-income or minority communities, the agencies believe that it is appropriate to recognize and defer to the expertise and priorities of Federal, State, and local government entities responsible for the design and implementation of affordable housing programs, plans, initiatives, tax credits, and subsidies. For more information and discussion regarding the agencies’ consideration of comments recommending adoption of race- and ethnicity-related provisions in this final rule, see section III.C of this **SUPPLEMENTARY INFORMATION.**

Affordability standard. While the NPR sought feedback on whether to include an affordability standard for activities under § _____.13(b)(1), the final rule implements the proposed approach without applying a uniform affordability standard. Instead, the final rule accommodates the various affordability standards across government affordable housing plans, programs, and initiatives. Consistent with concerns expressed by many commenters, the agencies are of the view that assessing affordability using the standards set in the applicable government program helps to ensure that the affordability determination reflects local needs and priorities that accommodate unique economic conditions, particularly in high-cost and rural areas. In addition, the agencies believe that adopting a

uniform affordability standard in this context could create undue complexity by requiring additional evaluation to determine whether some loans, investments, or services supporting rental housing in connection with government programs could receive consideration under other components of the affordable housing category. Accordingly, under final § _____.13(b)(1), any loan, investment, or service supporting rental housing in conjunction with a government program will be eligible for consideration. The agencies note that in determining the amount of credit the bank will receive under final § _____.13(a), the agencies will defer to the government program’s affordability standard. To illustrate, if a government program defines affordability as rent that does not exceed 40 percent of a low- or moderate-income renter’s income, the agencies would consider the percentage of units with rents that do not exceed 40 percent of a low- or moderate-income renter’s income to determine under final § _____.13(a) whether the project meets the majority standard. For more information on the majority standard and partial credit under CRA, see the section-by-section analysis of § _____.13(a).

Verification of low- or moderate-income status. As with the proposal, the final rule does not require, for activities under final § _____.13(b)(1), verification that a majority of occupants of affordable units are low- or moderate-income individuals. The agencies considered feedback on this issue and note that community development consideration will be based on the pro rata share of affordable units pursuant to final § _____.13(a) unless a majority of the units are affordable to low- or moderate-income individuals. See the section-by-section analysis of § _____.13(a). Ultimately, the agencies will be able to determine eligibility under final § _____.13(b)(1) by leveraging information demonstrating that the housing is in conjunction with a government plan, program, initiative, tax credit, or subsidy, and the rent amounts being charged to renters.

Housing affordable to middle-income individuals. As previously stated, the agencies sought feedback on whether activities involving government programs that have a stated purpose or bona fide intent to provide affordable housing serving low-, moderate-, and middle-income individuals should qualify for affordable housing consideration in certain circumstances, such as when these activities are located in high opportunity areas or nonmetropolitan geographic areas.

While the agencies recognize that there are government programs that target affordable housing for middle-income individuals, the agencies have decided not to adopt a provision that would extend § _____.13(b)(1) to include housing affordable solely to middle-income individuals in certain geographic areas. Consistent with the proposal, and as discussed further in the section-by-section analysis of final § _____.13(a)(2), bank support for projects and programs that include housing that is affordable to low-, moderate-, and middle-income individuals would be eligible for pro rata consideration based on the portion of the project affordable to low- and moderate-income individuals.

The agencies acknowledge feedback from some commenters raising concerns about the limited supply of affordable housing in high opportunity areas and nonmetropolitan areas and expressing the view that consideration of support for housing affordable to middle-income individuals could provide additional flexibility for banks to identify opportunities to address community needs. However, the agencies are persuaded by commenter concerns that broadening this category could reduce the emphasis on activities that directly contribute to housing for low- and moderate-income individuals, for whom housing options in high opportunity areas and nonmetropolitan areas are equally important and may be more difficult to attain.

Under current CRA interagency guidance, examiners have flexibility to consider a bank's lending and investments in high-cost areas, including those activities that address the housing needs of middle-income individuals in addition to low- or moderate-income individuals.³⁰⁰ In developing the final rule, the agencies considered whether this flexibility should be incorporated into the evaluation of multifamily rental housing activities in conjunction with a government plan, but decided to retain the proposed rule's focus on housing units that are affordable to low- and moderate-income individuals. The agencies considered that additional regulatory provisions would be needed to designate high-cost markets and to ensure that low- and moderate-income individuals are also likely to benefit from the housing (generally consistent with standards for affordable housing in high-cost market under current guidance)³⁰¹ and found these

requirements would add undue complexity to the final rule while also adding significant uncertainty in terms of how this would impact affordable housing opportunities for low- and moderate-income individuals. Relatedly, the agencies considered that the structure of the Community Development Financing Metric would not distinguish between housing affordable to low- and moderate-income individuals, as opposed to middle-income households in high-cost markets, and have considered concerns that including all of these activities in the metric could impact the degree to which activities focus on housing affordable to low- and moderate-income individuals who likely also face acute housing needs in such high-cost areas. The agencies further considered the role of the impact and responsiveness review and whether it could address such complexities; however, the agencies determined that such an approach would be uncertain and that the more appropriate approach, on balance, was to focus this component on housing affordable to low- and moderate-income households. The agencies note that government affordable housing programs may benefit low-, moderate-, and middle-income individuals, even in high-cost markets. Accordingly, for an activity to receive full consideration under the final rule, the majority of the housing units must be affordable to low- or moderate-income individuals. If the housing units that are affordable to low- and moderate-income individuals represent less than a majority of the housing units, then the activity will receive pro rata consideration under the final rule.

For nonmetropolitan areas, the agencies considered—as expressed by some commenters—that these geographies may have limited opportunities for affordable housing. However, the agencies have determined that, as in other geographies, the best approach in nonmetropolitan areas is to focus on units affordable to low- or moderate-income individuals under this component of affordable housing. As

credit shortage due to housing costs, the agencies consider “whether an institution’s loan to or investment in an organization that funds affordable housing for middle-income people or areas, as well as low- and moderate-income people or areas, has as its primary purpose community development”). See also Q&A § _____.12(g)(1)–1 (“The concept of ‘affordable housing’ for low- or moderate-income individuals does hinge on whether low- or moderate-income individuals benefit, or are likely to benefit, from the housing. It would be inappropriate to give consideration to a project that exclusively or predominately houses families that are not low- or moderate income simply because the rents or housing prices are set according to a particular formula.”)

discussed above, under the alternative approach of allowing housing affordable to middle-income individuals in nonmetropolitan areas, bank activities for affordable housing could consist of activities solely or mostly focused on housing affordable to middle-income individuals, with an eliminated or reduced focus on housing affordable to low- or moderate-income individuals in these communities. Accordingly, under the final rule, activities in conjunction with government programs in nonmetropolitan areas that may include middle-income renters such as the USDA Section 515 Rural Rental Housing or Multifamily Guaranteed Rural Rental Housing programs could be eligible for consideration to the extent such activities create units affordable to low- and moderate-income individuals. In addition, the agencies note the addition of a component focused on affordable single-family rental housing in nonmetropolitan census areas, as discussed further in the section-by-section analysis of § _____.13(b)(3).

While the agencies have declined to expand consideration of rental housing activities in conjunction with a government affordable housing plan, program, initiative, tax credit, or subsidy that targets middle-income individuals, the agencies believe that including an impact and responsiveness factor that supports affordable housing in High Opportunity Areas in final § _____.15(b)(7) will support encouragement of affordable housing in geographic areas where the cost of residential development is high and affordable housing opportunities can be limited. Additional impact and responsiveness factors, such as the geographic impact and responsiveness factors discussed in the section-by-section analysis of § _____.15(b)(1) through (3), may also help encourage more affordable housing in nonmetropolitan areas. These and other impact and responsiveness factors are discussed further in the section-by-section analysis of final § _____.15.

Section _____.13(b)(2) Multifamily Rental Housing With Affordable Rents

The Agencies' Proposal

Proposed § _____.13(b)(2) provided criteria to define affordable low- or moderate-income multifamily rental housing that does not involve a government program, initiative, tax credit, or subsidy (also referred to as naturally occurring affordable housing in this **SUPPLEMENTARY INFORMATION**). With the proposed criteria in § _____.13(b)(2), the agencies sought to provide clear and consistent standards

³⁰⁰ See Q&A § _____.12(g)–3.

³⁰¹ See *id.* (noting, for example, that with respect to loans or investments addressing a middle-income

to identify naturally occurring affordable housing that may receive affordable housing consideration under the CRA. First, under this component, the agencies proposed that the rent for the majority of the units in a multifamily property could not exceed 30 percent of 60 percent of the area median income for the metropolitan area or nonmetropolitan county. Second, the agencies proposed that naturally occurring affordable housing would also be required to satisfy one or more of the following additional eligibility criteria in order to increase the likelihood that units benefit low- or moderate-income individuals: (1) the housing is located in a low- or moderate-income census tract; (2) the housing is purchased, developed, financed, rehabilitated, improved, or preserved by a nonprofit organization with a stated mission of, or that otherwise directly supports, providing affordable housing; (3) there is an explicit written pledge by the property owner to maintain rents affordable to low- or moderate-income individuals for at least five years or the length of the financing, whichever is shorter; or (4) the bank provides documentation that a majority of the residents of the housing units are low- or moderate-income individuals or families.

Comments Received

Overall, commenters supported the inclusion of naturally occurring affordable housing in the affordable housing category. Many commenters generally expressed the view that naturally occurring affordable housing is an important part of the affordable housing ecosystem and serves many low- or moderate-income individuals.

Several commenters supported the inclusion of naturally occurring affordable housing-related activity but expressed concerns that the proposal as written would be either too restrictive or too lenient to provide assurance that the activity would actually support affordable housing for low- or moderate-income individuals. One commenter that opposed the inclusion of naturally occurring affordable housing in the affordable housing category asserted that doing so would divert CRA-eligible capital from traditional income-restricted, subsidized affordable housing that provides permanently affordable apartments to low- or moderate-income families, while another expressed concern that the proposal would not provide sufficient protection to residents in gentrifying areas and suggested additional affordability restrictions. Commenters who were concerned with the requirements being

too restrictive expressed, for example, that the proposed standards would not account for any of the naturally occurring affordable housing in their local markets.

Final Rule

The agencies are adopting in final § _____.13(b)(2) a component for naturally occurring affordable housing with some substantive revisions. Specifically, as described in detail in the section-by-section analyses that follow, the final rule recognizes that multifamily rental housing purchased, developed, financed, rehabilitated, improved, or preserved can be considered under final § _____.13(b)(2) if for the majority of units, the monthly rent as underwritten by the bank, reflecting post-construction or post-renovation changes, does not exceed 30 percent of 80 percent of the area median income and if the housing also meets one or more of the criteria in final § _____.13(b)(2)(ii). The agencies believe that naturally occurring affordable housing provides a meaningful contribution to the stock of available affordable housing and believe that the criteria discussed in more detail below will help to address commenter concerns that including consideration for such housing will divert resources from other types of affordable housing projects.

As noted previously, some commenters urged the agencies to implement a single category for all affordable rental housing, including housing that is developed in conjunction with a government affordable housing plan, program, initiative, tax credit, or subsidy and naturally occurring affordable housing. Upon consideration of commenter feedback, the agencies have determined to retain a separate component in the final rule for multifamily rental housing that has rents affordable to low- and moderate-income individuals. Naturally occurring affordable housing is not already subject to the requirements of a government plan, program, initiative, tax credit, or subsidy, and the agencies believe that by including adequate affordability criteria and the additional criteria in § _____.13(b)(2)(ii), the final rule will help to ensure that activities qualifying under this prong will meaningfully benefit low- and moderate-income individuals.

Section _____.13(b)(2)(i) Affordability Standard for Multifamily Rental Housing With Affordable Rents

The Agencies' Proposal

The agencies proposed an affordability standard to determine if multifamily rental housing had affordable rents and therefore would be considered naturally occurring affordable housing. The agencies proposed that rents would be considered affordable if the rent for the majority of the units in a multifamily property did not exceed 30 percent of 60 percent of the area median income for the metropolitan area or nonmetropolitan county.³⁰² This proposed standard would have established narrower affordability criteria than what is often used today to determine whether rents are affordable for low- or moderate-income individuals, which is 30 percent of 80 percent of the area median income.

Under the agencies' proposal, the rent amount used to determine whether the affordability standard is met would be the monthly rental amounts as underwritten by the bank, reflecting any post-construction or post-renovation rents considered as part of the bank's underwriting for financing.³⁰³ The agencies' objective in including this provision was to target community development consideration to properties that are likely to remain affordable and to minimize the likelihood of providing consideration for activities that may result in displacement of low- or moderate-income individuals. The agencies intended to reinforce these objectives by requiring that a majority of the units meet the affordability standard. The agencies sought feedback on whether there were alternative ways to ensure that CRA consideration for support of naturally occurring affordable housing is targeted to properties where rents remain affordable for low- or moderate-income individuals.

Comments Received

Many commenters addressed the affordability threshold for naturally occurring affordable housing under proposed § _____.13(b)(2). The majority of commenters on the issue opposed the proposed affordability threshold of 30 percent of 60 percent of area median income and supported raising the affordability threshold to 30 percent of 80 percent of area median income. Commenters cited several reasons for adopting a higher affordability standard,

³⁰² See proposed § _____.13(b)(2).

³⁰³ See *id.*

including that doing so would align with other affordable housing programs and would better account for affordable housing needed to address housing shortages and provide workforce housing. Some commenters expressed concern that a 30 percent of 60 percent of area median income affordability standard could have a negative impact on the availability of debt financing for affordable rental housing. Other commenters supported the proposed 30 percent of 60 percent of area median income affordability threshold, citing that it would preserve resources for low- or moderate-income renters who are most in need of housing support. Other commenters suggested that the affordability standard should be closer to 30 percent of 30 to 50 percent of area median income in high-cost areas. In contrast, some commenters asserted that the affordability threshold should be higher and more flexible in high-cost markets. Lastly, a few commenters recommended that the agencies adopt the HUD Fair Market Rents standard to determine rental affordability for naturally occurring affordable housing.³⁰⁴

Several commenters expressed support for the proposal that monthly rents, for the purposes of determining affordability, be determined as underwritten by the bank, reflecting post-construction or post-renovation changes, as applicable. However, these same commenters noted that, to ensure continuing affordability, consideration for prior-year financings should be conditioned on periodic documentation that the units remain affordable. For example, one commenter suggested that examiners should evaluate rent rolls annually to confirm ongoing affordability of properties financed in prior years and examination cycles.

The agencies received comments supporting the requirement that a majority of units in a naturally occurring affordable housing property must meet the affordability standard. One commenter suggested that the agencies consider a higher standard for the percent of units that must meet the affordability criteria to ensure long term affordability of most units. Another commenter expressed concerns that the proposed requirement does not adequately incentivize mixed income and inclusionary housing. Rather, the commenter suggested the final rule should provide pro rata credit based on

the percentage of affordable units among market rate units in a property.

Final Rule

Final § _____.13(b)(2)(i) is revised from the proposal and adopts an affordability standard stating that naturally occurring affordable housing purchased, developed, financed, rehabilitated, improved, or preserved will be considered affordable housing under final § _____.13(b) if, for the majority of the units, the monthly rent as underwritten by the bank, reflecting post-construction or post-renovation changes as applicable does not exceed 30 percent of 80 percent of the area median income. The affordability standard adopted in the final rule does not include the proposed 30 percent of 60 percent of the area median income affordability standard, which the agencies proposed in recognition that, historically, a substantial percentage of occupied rental units with affordability between 61 and 80 percent of area median income were occupied by middle- or upper-income households.³⁰⁵ However, the agencies have determined that the proposed affordability standard would have restricted eligibility for properties with affordability levels at 80 percent of area median income even in cases where many of the units are occupied by low- or moderate-income households. Additionally, the agencies are sensitive to the concerns expressed by some commenters that the proposed affordability standard could have had a negative impact on the availability of debt financing for this type of affordable housing. The overwhelming majority of commenters favored the adoption of a more flexible affordability standard than the proposal, with most commenters supporting the use of the 30 percent of 80 percent of area median income affordability standard adopted in final § _____.13(b)(2)(i).

The final rule retains the agencies' proposal to use the monthly rental amounts as underwritten by the bank to determine whether the rental housing meets the affordability standard. The prong further specifies that rent amounts should reflect any post-construction or post-renovation changes considered as part of the bank's underwriting for providing financing. The agencies' objective in including this provision is to target community development consideration to properties that are likely to remain affordable and to avoid providing consideration for activities that may result in displacement of low- or moderate-income individuals.

Though some commenters suggested that the agencies require documentation (such as rent rolls or an annual review of rents) to confirm ongoing affordability, the agencies are not adopting an annual verification process as part of the final rule. In this context, the agencies view evaluation of the loan underwriting, which contains a forward-looking assessment of projected rent amounts and rental income, along with the requirement to meet one of the four additional criteria, described below, as sufficient to promote the agencies' objective of ensuring that a bank intends to finance properties where rent remains affordable to low- or moderate-income individuals.

Final § _____.13(b)(2)(i) requires the majority of units in naturally occurring affordable housing to meet the affordability standard. The prong does not award pro rata consideration for activities related to properties in which fewer than 50 percent of housing units are affordable. The agencies believe that this requirement will help to ensure activities that qualify under this prong support housing that is both affordable and likely to be occupied by low- and moderate-income individuals. As discussed further in the section-by-section analysis of final § _____.13(a) above, this majority standard in § _____.13(b)(2) is consistent with similar majority criteria for other categories of community development in § _____.13(a), which are intended to emphasize activities that are responsive to community needs, especially the needs of low- and moderate-income individuals and communities.

Section _____.13(b)(2)(ii) Additional Eligibility Standards for Multifamily Rental Housing With Affordable Rents The Agencies' Proposal

The agencies proposed that one of four additional criteria would have to be met for multifamily housing to qualify as naturally occurring affordable housing under proposed § _____.13(b)(2).³⁰⁶ These criteria were intended to increase the likelihood that multifamily housing under this component of affordable housing would benefit low- or moderate-income individuals and that the rents would likely remain affordable for low- or moderate-income individuals. Specifically, in addition to the requirement that rents for a majority of the units meet the affordability standard, multifamily housing would have to meet at least one of the following criteria:

³⁰⁴ See HUD, Office of Policy Research and Development, "Fair Market Rents," https://www.hud.gov/program_offices/public_indian_housing/programs/hcv/landlord/fmr.

³⁰⁵ See 87 FR 33884, 33895 (June 3, 2022).

³⁰⁶ See proposed § _____.13(b)(2)(i) through (iv).

(1) The housing is located in a low- or moderate-income census tract;

(2) The housing is purchased, developed, financed, rehabilitated, improved, or preserved by any nonprofit organization with a stated mission of, or that otherwise directly supports, affordable housing;

(3) The property owner has made an explicit written pledge to maintain affordable rents for low- or moderate-income individuals for at least five years or the length of the financing, whichever is shorter; or

(4) The bank provides documentation that the majority of the housing units are occupied by low- or moderate-income individuals or families.³⁰⁷

Comments Received

The agencies received a number of comments on this aspect of the proposal, with some commenters objecting generally to the proposed additional criteria, suggesting that naturally occurring affordable housing should be simplified into a single requirement that the housing meet an affordability standard. Comments specific to each of the additional eligibility criteria are discussed in the respective section-by-section analyses for those sections.

Final Rule

The agencies are adopting proposed § _____.13(b)(2)(i) through (iv) in a revised and reorganized final § _____.13(b)(2)(ii), which requires naturally occurring affordable housing to meet one or more eligibility criteria in addition to the affordability standard in § _____.13(b)(2)(i). Specifically, the final rule requires that a project meet at least one of the following eligibility criteria: (1) the housing is located in a low- or moderate-income census tract; (2) the housing is located in a census tract in which the median income of renters is low- or moderate-income and the median rent does not exceed 30 percent of 80 percent of the area median income; (3) the housing is purchased, developed, financed, rehabilitated, improved, or preserved by any nonprofit organization with a stated mission of, or that otherwise directly supports, providing affordable housing; or (4) the bank provides documentation that a majority of the housing units are occupied by low- or moderate-income individuals or families.

The agencies have adopted several changes to the proposed eligibility criteria based on commenter feedback, as described below. The agencies believe that the eligibility criteria

adopted in the final rule will ensure that naturally occurring affordable housing is likely to benefit low- or moderate-income individuals and increase the likelihood that rents will remain affordable for low- or moderate-income individuals. By offering multiple criteria to demonstrate that rental housing with affordable rents is likely to benefit low- and moderate-income individuals, the agencies sought to provide flexibility and balance the objectives of encouraging banks to support naturally occurring affordable housing with ensuring that this housing is likely to benefit low- and moderate-income individuals.

Section _____.13(b)(2)(ii)(A) and (B) Low- or Moderate-Income Census Tracts and Low- and Moderate-Renter Median Income Census Tracts

The Agencies' Proposal

The first proposed additional criterion was that the location of the multifamily housing be in a low- or moderate-income census tract.³⁰⁸ This criterion was based in part on the agencies' recognition that verifying tenant income might be infeasible for many property owners or developers, whereas median census tract income is readily available. This criterion is also consistent with current guidance providing that examiners may consider economic and related factors associated with a particular geographic area to determine whether the housing is likely to benefit low- or moderate-income individuals.³⁰⁹

The agencies also sought feedback on whether to include a geographic criterion to encompass middle- and upper-income census tracts in which at least 50 percent of renters are low- or moderate-income. The agencies considered that affordable rental housing in a neighborhood in which the majority of renters are low- or moderate-income would also be likely to benefit low- or moderate-income individuals. Incorporating this standard into the CRA regulation could result in multifamily housing in certain middle- and upper-income census tracts qualifying as naturally occurring affordable housing under proposed § _____.13(b)(2).

Further, the agencies sought feedback on not including a geographic criterion. Under this option, to qualify under this component of affordable housing, the multifamily housing would have had to meet one of the other criteria in addition to the proposed affordability standard of rents not exceeding 30 percent of 60 percent of the area median income.

Comments Received

The agencies received some comments that supported requiring all naturally occurring affordable housing to be located in a low- or moderate-income census tract. Alternatively, some commenters urged the agencies to eliminate this criterion, with viewpoints including: that multifamily loans should be evaluated on the affordability of the housing and not simply the location of the housing; that this criterion could present a risk of providing consideration for units that are not serving low- or moderate-income residents soon after the financing occurs; and that this criterion could incentivize concentrating affordable housing in low- or moderate-income areas.

Some commenters addressed the agencies' request for comment on whether to expand this proposed geographic criterion. Of these, several commenters indicated a preference to prioritize other criteria (e.g., affordability and low- or moderate-income occupancy) over the location of a property. However, other commenters supported qualifying naturally occurring affordable housing specifically in census tracts in which the majority of renters were low- or moderate-income. One commenter supported expansion of the geographic criteria into census tracts in which the majority of renters were low- or moderate-income if the agencies also increased the required percentage of units in naturally occurring affordable housing properties from the proposed 50 percent to 60 or 67 percent. Some commenters supported qualifying naturally occurring affordable housing in other geographic areas, including distressed and underserved census tracts, and others supported expansion of the geographic criteria to nonmetropolitan and rural census tracts.

Final Rule

In final § _____.13(b)(2)(ii)(A), the agencies are adopting the proposed geographic criterion (see proposed § _____.13(b)(2)(i)), that the housing be located in a low- or moderate-income census tract, as one of the ways of demonstrating that naturally occurring affordable housing is likely to benefit low- and moderate-income individuals. This approach is consistent with existing guidance, under which examiners may review factors such as demographic, economic, and market data in surrounding geographies to determine the likelihood that housing will "primarily" accommodate low- or moderate-income individuals. For example, examiners look at median

³⁰⁷ Proposed § _____.13(b)(2)(i) through (iv).

³⁰⁸ See proposed § _____.13(b)(2)(i).

³⁰⁹ See Q&A § _____.12(g)(1)-1.

rents of the assessment area and the project; the median home value of either the assessment area, and the project; the median home value of either the assessment area, low- or moderate-income geographies, or the project; the low- or moderate-income population in the area of the project; or the past performance record of the organization(s) undertaking the project.³¹⁰ In addition, retaining the geographic criterion provides a streamlined option for determining whether housing qualifies as naturally occurring affordable housing that is likely to benefit low- and moderate-income individuals or families, as census tract income data is readily available and verifiable information.

The final rule also adopts a new geographic criterion in final § _____.13(b)(2)(ii)(B), indicating that naturally occurring affordable housing may qualify for consideration if it is located in a census tract in which the median income of renters is low or moderate, and the median rent does not exceed 30 percent of 80 percent of the area median income. In doing so, the agencies intend to help address the concern commenters noted, that restricting naturally occurring affordable housing to low- and moderate-income census tracts could promote geographic concentrations of poverty, and the agencies recognize the importance of locating affordable housing in communities of all income levels.

The agencies acknowledge concern expressed by some commenters that naturally occurring affordable housing in middle- and upper-income tracts could be more likely to attract higher-income renters and could contribute to the involuntary displacement of lower-income renters. The agencies evaluated several alternatives to this geographic criterion to better ensure that low- and moderate-income renters were likely to benefit from this housing and determined that adding the requirement that the median rent in the census tracts must not exceed 30 percent of 80 percent of the area median income would increase the likelihood that low- and moderate-income individuals would benefit from the housing. Moreover, adding these census tracts increases the number of qualifying census tracts (compared to only low- and moderate-income tracts) by over 100 percent—adding about 23,000 middle- and upper-income census tracts—in addition to the approximately 22,500 low- and moderate-income census tracts that would be eligible

currently.³¹¹ This criterion also aligns with current guidance in the Interagency Questions and Answers on the information that may be considered when determining the likelihood that the housing will primarily accommodate low- or moderate-income individuals or families.³¹²

Section _____.13(b)(2)(ii)(C) Nonprofit Organizations With a Stated Mission of, or That Otherwise Directly Support, Providing Affordable Housing The Agencies' Proposal

The agencies proposed a second criterion for determining whether multifamily housing qualifies as naturally occurring affordable housing under proposed § _____.13(b)(2). Specifically, the agencies proposed that if housing is purchased, developed, financed, rehabilitated, improved, or preserved by any “nonprofit organization with a stated mission of, or that otherwise directly supports, providing affordable housing,” then the activity could be considered naturally occurring affordable housing.³¹³ The agencies intended this provision to encompass organizations that have a mission to serve individuals and communities especially vulnerable to housing instability or that otherwise target services to low- or moderate-income individuals and communities. Multifamily housing that met this criterion in addition to the affordability standard in proposed § _____.13(b)(2)(i) would qualify as naturally occurring affordable housing under proposed § _____.13(b)(2) in any census tract, including middle- and upper-income census tracts.

Comments Received

Most of the commenters who commented on the second proposed criterion for naturally occurring affordable housing supported its inclusion and stated that it was well tailored to providing CRA consideration for units that meet the purposes of the CRA. A few commenters suggested that this criterion should be a requirement for CRA consideration for naturally occurring affordable housing. In addition, some commenters

³¹¹ Based on including census tracts where the median rent is below 30 percent of 80 percent of the area median income and where the median renter's income is below 80 percent of the area median income in the 2015–2019 American Community Survey.

³¹² See, e.g., Q&A § _____.12(g)(1)–1. Under existing guidance, examiners may look at median rents of an assessment area and other factors to determine the likelihood that housing will primarily accommodate low- and moderate-income individuals.

³¹³ Proposed § _____.13(b)(2)(ii).

recommended additional requirements—for example, that the nonprofits should be led by people of color, a majority of residents should be low- or moderate-income, or the property must be compliant with anti-displacement principles.

Several other commenters opposed the proposed criterion. For example, a commenter opposing this criterion stated that it would impede banks from garnering community development financing consideration because affordable housing often comes from partnerships with small developers, as well as nonprofit organizations.

Final Rule

Under final § _____.13(b)(2)(ii)(C), the agencies are adopting the proposed additional eligibility criterion for affordable multifamily housing activity in conjunction with a nonprofit organization with a stated mission of, or that otherwise directly supports, providing affordable housing substantially as proposed (*see* proposed § _____.13(b)(2)(ii)). The agencies observe that many of these nonprofit organizations serve individuals and communities that are especially vulnerable to housing instability or otherwise target services to low- or moderate-income individuals and communities. The agencies do not anticipate that this criterion will impede community development financing consideration for banks working with small property developers that are not nonprofit organizations, as this criterion is only one of four criteria for qualifying naturally occurring affordable housing activities. The agencies also considered commenter recommendations for additional requirements, and the agencies do not believe such additional requirements are necessary given the agencies' view that the proposed criterion is adequate to provide consideration for loans, investments, and services supporting housing units that are likely to be occupied by low- or moderate-income individuals.

Proposed § _____.13(b)(2)(iii) Written Affordability Pledge

The Agencies' Proposal

The agencies proposed a third criterion for determining whether multifamily housing would qualify as naturally occurring affordable housing under proposed § _____.13(b)(2). This criterion would have required the property owner's explicit written pledge to maintain rents that are affordable for at least five years or for the length of the

³¹⁰ See Q&A § _____.12(g)(1)–1.

financing, whichever is shorter,³¹⁴ and was intended to address concerns about the likelihood of rents in an eligible property increasing in the future and potentially displacing low- or moderate-income households. Multifamily housing that met this criterion in addition to the baseline affordable rent standard discussed above would qualify as naturally occurring affordable housing under proposed § ____ .13(b)(2) in any census tract, including middle- and upper-income census tracts.

Comments Received

Several commenters supported this proposed criterion. Of those commenters, a few supported the proposed five-year time period for the affordability pledge. Most commenters addressing this aspect of the proposal suggested extending the duration of the pledge—to 10, 15, or 20 years—or ensuring that the pledge is binding. Other commenter sentiment included: that the effectiveness of the criterion would depend on the legal enforceability of such a written pledge and the ability of an entity to monitor compliance; that this criterion should be required of all naturally occurring affordable housing lending and should not be optional; and that the pledge should be to keep the rents affordable for low- and moderate-income renters for the life of the investment or loan. Another commenter suggested that the agencies should publish best-practice examples of documents that outline the affordability restrictions, time period for those restrictions, and applicable tenant protections.

Some commenters, however, opposed the additional criterion for an owner's explicit written pledge altogether on the grounds that it would be unappealing to property owners and unrealistic in many markets.

Final Rule

In the final rule, the agencies have determined to not adopt the proposed additional eligibility criterion that would allow consideration based on an explicit written pledge by the property owner to maintain affordable rents for low- or moderate-income individuals for at least five years or the length of the financing, whichever is shorter. In proposing this additional eligibility criterion, the agencies sought to increase

the number of options for demonstrating the likelihood that housing will benefit low- and moderate-income persons, while recognizing that *requiring* such a pledge would necessitate additional documentation.

In determining not to adopt this part of the proposal, the agencies considered the views of many commenters who supported the written affordability pledge proposal, a longer affordability period, or a mandatory pledge on the belief that such requirements would help to ensure that housing remains affordable and would limit the risk of renter displacement due to increasing rents. The agencies also considered feedback that the effectiveness of such a pledge would depend on its legal enforceability and that enforcing the pledge could be impracticable and potentially require an entity to monitor compliance.

The agencies evaluated the proposed additional criterion in light of feedback from commenters and determined that, because neither the agencies nor the banks would be in a position to effectively oversee the enforceability of these pledges, which may not be recorded in the public record, the impact of these pledges could be limited. In addition, the proposed criterion would have required the pledge to be in effect for either five years or the length of the financing, which could have had the unintended result of providing consideration for, and possibly unintentionally encouraging, one-year loans that would not contribute to ongoing affordability. Finally, by retaining the criterion that naturally occurring affordable housing be purchased, developed, financed, rehabilitated, improved, or preserved by any nonprofit organization with a stated mission of, or that otherwise directly supports, providing affordable housing, the agencies believe that including a pledge criterion would likely be superfluous for nonprofit owners, and not a clear means to capture activity that is outside other criteria that would apply to naturally occurring affordable housing.

Section ____ .13(b)(2)(ii)(D) Tenant Income Documentation

The Agencies' Proposal

A fourth additional criterion proposed by the agencies for determining whether multifamily housing would qualify as naturally occurring affordable housing under proposed § ____ .13(b)(2) was that the bank provided documentation that the majority of the housing units were occupied by low- or moderate-income

individuals or households.³¹⁵ Multifamily housing that met this criterion in addition to the affordability standard in § ____ .13(b)(2)(i) would qualify as naturally occurring affordable housing under proposed § ____ .13(b)(2) in any census tract, including middle- and upper-income census tracts.

Comments Received

Of those commenters who weighed in on the criterion that the bank provide documentation that the majority of the housing units were occupied by low- or moderate-income individuals or households, most supported retaining it as a criterion in the final rule and suggested ways that the criterion could be successfully implemented. However, one commenter asserted that banks do not have the authority to collect tenant income information, while another indicated that the documentation could be impossible to obtain if units remain vacant after the project is completed. Another commenter suggested that the acceptance of Housing Choice Vouchers should be included as a way of demonstrating that rents will be affordable for low- and moderate-income individuals. A few commenters raised objections, stating that the proposed criterion is unnecessary, overreaching, and impractical as proposed and could lead banks that seek CRA consideration to impose new burdensome administrative requirements on multifamily borrowers.

Final Rule

The final rule adopts § ____ .13(b)(2)(iv) as proposed, renumbered as final § ____ .13(b)(2)(ii)(D), which allows a bank to demonstrate the eligibility of multifamily housing by, in addition to meeting the affordability standard, providing documentation that a majority of the housing units in an unsubsidized multifamily affordable housing project are occupied by low- or moderate-income individuals or families. For example, in the case of a multifamily rental property with a majority of rents set at 30 percent of 80 percent of area median income, the activity could receive consideration under this additional criterion where the bank can document that the majority of occupants receive Housing Choice Vouchers.³¹⁶

³¹⁴ See proposed § ____ .13(b)(2)(iii). The agencies noted in the NPR their expectation that the length of financing would often go beyond the five-year written affordability pledge. The agencies further stated that they would scrutinize short-term financing (less than five years) to ensure such financing is not a way to avoid the affordability commitment. See 87 FR 33884, 33896 n. 72 (June 3, 2022).

³¹⁵ See proposed § ____ .13(b)(2)(iv).

³¹⁶ The housing choice voucher program is the Federal Government's major program for assisting very low-income families, the elderly, and the disabled to afford decent, safe, and sanitary housing in the private market. See 24 CFR part 982 (program requirements for the tenant-based housing assistance program under section 8 of the United

The agencies observe that such documentation would demonstrate that the activity was benefiting low- or moderate-income individuals. The agencies acknowledge commenters' assertion that tenant income documentation might be unobtainable, unnecessary, or impractical. However, the agencies ultimately believe this criterion provides a useful alternative for banks that are able to obtain such documentation through the process of originating or renewing a loan. Banks retain the flexibility to demonstrate eligibility using the other criteria in final § _____.13(b)(2)(ii)

Other Comments on Naturally Occurring Affordable Housing

Commenters offered a variety of suggestions for alternative ways to ensure that CRA consideration for naturally occurring affordable housing would be targeted to properties where rents remain affordable for low- or moderate-income individuals. Some commenters indicated that the rule should emphasize one or more of the proposed criteria in different combinations, while other commenters offered suggestions for criteria that were not expressly contemplated in the proposal. A few commenters asserted that the agencies should take steps to limit consideration for financing that may not provide long-term affordable housing, citing, for example, concern regarding the long-term intentions of certain institutional investors and private developers. Several commenters requested that the agencies require contracts or land use agreements that ensure a specific level and length of affordability, especially, at least one commenter noted, for properties where a renovation is occurring.

Some commenters suggested that the agencies create anti-displacement requirements, quality of housing requirements, or both, in order for activities supporting naturally occurring affordable housing properties to qualify for CRA consideration. Commenter feedback along these lines included: that the agencies should require banks to demonstrate that landlord borrowers are complying with tenant protection, habitability, local health code, civil rights, credit reporting act, unfair, deceptive, or abusive acts and practices, and other laws; that the agencies should give credit to banks for adopting and adhering to anti-displacement and responsible lending best practices in

their CRA activities, and downgrade banks for incidents of harm and displacement of low- or moderate-income and racial and ethnic minority tenants; that incentivizing mixed-income housing developments with a focus on racial and income integration would help address displacement concerns; and that loans to finance rental housing should only receive consideration if they are structured to tangibly improve the lives of tenants and do not permit landlords to pull money away from operations to pay for greater debt service.

Final Rule

For the reasons stated in the preceding discussion of the affordability standard and additional eligibility requirements, the agencies are adopting the component for naturally occurring affordable housing under final § _____.13(b)(2) with revisions. The agencies are not adopting commenter suggestions to restrict CRA consideration for financing provided to institutional investors and private developers, because the basis for doing so is not clear, especially if the affordability requirements of this section are met, and because such parties play an important role in adding to the overall supply of needed affordable housing. Instead, the agencies are relying on the criteria adopted to ensure that the multifamily housing with affordable rents is likely to benefit low- or moderate-income individuals. Similarly, the agencies considered, but are not requiring contracts or land use agreements that ensure a specific level and period of affordability, as these would be challenging for a bank to enforce efficiently. Additionally, the agencies are not including an additional criterion in this component regarding resident displacement and responsible lending best practices. The agencies believe that such a criterion is less needed in the naturally occurring affordable housing context given that such activities will create units or facilitate maintenance of existing units of affordable housing, and examiners will retain the discretion to consider whether an activity reduces the number of housing units affordable to low- or moderate-income individuals. The agencies believe the adopted criteria will appropriately encourage activities beneficial to low- and moderate-income individuals and families.

Section _____.13(b)(3) One-to-Four Family Rental Housing With Affordable Rents in Nonmetropolitan Census Tracts The Agencies' Proposal

In the NPR, the agencies sought feedback on whether single-family rental housing should be considered under the naturally occurring affordable housing category, provided that it meets the same combination of criteria proposed for multifamily rental housing.³¹⁷ This alternative would have expanded the affordable housing category to include single-family rental housing that meets the affordability threshold and the additional eligibility criteria under proposed § _____.13(b)(2)(i) and (ii), respectively. The agencies also sought feedback on whether such an alternative should be limited to rural geographies, or eligible in all geographies.³¹⁸ In seeking feedback on the potential expansion to include unsubsidized single-family affordable rental housing, the agencies acknowledged that single-family rental housing can be an important source of affordable housing, especially in geographies, such as rural communities, where multifamily housing is less common.

Comments Received

Many commenters offered views on whether single-family rental housing should be considered under the naturally occurring affordable housing category, provided such housing meets the requirements of proposed § _____.13(b)(2). Some commenters generally opposed expanding the naturally occurring affordable housing proposal to include single-family homes, noting: that this expansion could incentivize investors buying single-family homes to serve as investment properties rather than encouraging homeownership amongst low- or moderate-income individuals and families; that such an expansion could inadvertently reinforce racial segregation and concentrated poverty; and that permanent home mortgage loans for single-family rental housing were already covered as part of the proposed Retail Lending Test.

Most of the commenters that remarked on this alternative supported broadening the eligibility of naturally occurring affordable housing to include single-family rental housing in some or all geographies. For example, one commenter noted that affordable single-family rentals are a critical part of the multipronged approach to address

³¹⁷ States Housing Act of 1937 (42 U.S.C. 1437f); the tenant-based program is the housing choice voucher program). See also HUD, "Choice Vouchers Fact Sheet," https://www.hud.gov/topics/housing_choice_voucher_program_section_8.

³¹⁷ See 87 FR 33895.

³¹⁸ *Id.*

affordable housing in this country and should be included in the affordable housing category.

Imposing higher standards for single-family rental housing. Although several commenters suggested applying the exact same naturally occurring affordable housing criteria to both multifamily and single-family housing, some commenters suggested that activities relating to single-family rentals be held to a higher standard or subject to additional restrictions as compared to activities relating to multifamily naturally occurring affordable housing. Commenters supporting higher standards raised a number of considerations including: that single-family rental housing should be limited to homes that either are eligible for purchase (e.g., lease-to-own), are prioritized for low- or moderate-income families enrolled in first-time homeowner programs through HUD, or are part of a State program that will remain permanently affordable through a community land trust or other vehicle to sustain affordability; that single-family rental housing should be limited to housing owned or developed by a nonprofit organization; and that, if for-profit ownership and development is allowed, there should be mechanisms to ensure that the property is in decent physical condition and that bank financing is not supporting abusive property owners, landlords, management companies, or investors.

Other commenters expressed concerns about investor activity. For example, a commenter suggested that the agencies restrict CRA consideration to properties whose owners own fewer than 50 single-family rental units unless the owner is a nonprofit with a bona fide mission of providing affordable housing. Another commenter recommended that, to prevent speculative activity or corporate ownership, the agencies could exclude from consideration single-family rental housing in any low- or moderate-income or predominantly minority census tract in which more than one-third of the single-family housing stock became rental housing in last five years.

Geographic considerations in recognizing affordable single-family rental activity. A few commenters addressed the agencies' request for comment on whether to limit any inclusion of single-family rental properties in the proposed naturally occurring affordable housing component to properties located in rural areas. The majority of these commenters opposed limiting single-family rentals to rural areas. In this regard, a commenter stated that affordable housing is needed

everywhere and, therefore, the category should not be limited to rural communities. A few commenters supported limiting single-family rentals to rural areas, noting the large percentage of occupied rental units in rural areas that are single-family homes. Another commenter suggested eliminating all geographic criteria and allowing single-family rentals to receive CRA consideration anywhere.

Final Rule

The final rule adopts as final § _____.13(b)(3) a component in the affordable housing category for single-family rental housing in nonmetropolitan areas. The component applies in instances where such housing is purchased, developed, financed, rehabilitated, improved, or preserved, and the housing meets the affordability criterion in final § _____.13(b)(2)(i) and at least one of the additional eligibility criteria in final § _____.13(b)(2)(ii). This component is intended to address single-family rental housing with affordable rents in nonmetropolitan areas. As previously noted, the agencies inquired whether the proposed approach to considering naturally occurring affordable housing should be broadened to include single-family rental housing that meets the requirements in proposed § _____.13(b)(2), and if so, whether consideration of single-family rental housing should be limited to rural geographies, or eligible in all geographies. In making this determination, the agencies have considered the views from commenters on this request for feedback.

Standards for single-family rental housing. Currently, the lack of a consistent standard for affordability, combined with unclear methods for determining whether low- or moderate-income individuals are likely to benefit, leads to inconsistent consideration of unsubsidized affordable housing, including single-family rental housing. The agencies sought feedback on the potential application of the criteria in proposed § _____.13(b)(2)(i) and (ii) to single-family rental housing because those criteria aim to provide a consistent methodology for determining benefit for low- or moderate-income individuals. After considering commenter feedback, the agencies believe that the revised criteria for naturally occurring affordable housing for multifamily rental housing under § _____.13(b)(2), which include a defined affordability standard and a requirement that rents be determined based on the amounts used by the bank for purposes of underwriting, are suitable for

adoption in the single-family nonmetropolitan area rental housing context. The agencies carefully considered commenter suggestions for a more stringent or more lenient affordability standard, and determined that adopting the criteria in final § _____.13(b)(2) for both multifamily rental housing and single-family rental housing in nonmetropolitan areas will provide a clear and consistent option that is likely to benefit low- and moderate-income individuals and families.

Geographic considerations in recognizing affordable single-family rental activity. Although the agencies considered the assertion by some commenters that affordable rental housing is needed in all geographic areas, as noted previously, this component supports consideration only for single-family rental housing in nonmetropolitan areas. The agencies also considered that the composition of the housing stock varies across geographies, and that in some areas, such as in certain nonmetropolitan areas, it may be difficult to develop affordable multifamily rental housing at scale, either in conjunction with a government program or as naturally occurring affordable housing. An agency analysis of data from the 2016–2020 American Community Survey showed that 22 percent of occupied rental units in nonmetropolitan areas are structures with more than 4 units, compared to 47 percent of occupied rental units in metropolitan areas.³¹⁹ In reaching their determination, the agencies believe that the final rule approach appropriately balances adding a component specific to affordable single-family rental housing and tailoring it to the unique affordable housing needs in nonmetropolitan areas. The agencies also considered that not including this component could otherwise limit opportunities for affordable housing in nonmetropolitan areas.

This component is designed to address the single-family affordable housing needs in nonmetropolitan areas, including the particular needs in rural areas. Accordingly, although the agencies recognize that single-family affordable housing is important to

³¹⁹ Multifamily housing is also less common in rural areas where a smaller 12 percent of occupied rental units are in structures with more than 4 units according to the same data source. Rural areas are conceptually distinct from nonmetropolitan areas, however, and this final rule relies upon the nonmetropolitan area designation. The Census Bureau uses a distinct methodology of designating urban and rural census blocks relative to the Office of Management and Budget's methodology for determining if a county is within a metropolitan statistical area.

addressing the affordable housing needs for low- and moderate-income individuals in metropolitan areas, the agencies have determined not to expand this component to apply to single-family rental housing in metropolitan areas. Such units may still be eligible for consideration under final § _____.13(b)(1) to the extent that the unit(s) and associated loan, investment, or service meet the requirements under that component.

Section _____.13(b)(4) Affordable Owner-Occupied Housing for Low- or Moderate-Income Individuals

The Agencies' Proposal

Proposed § _____.13(b)(3) provided a component for the affordable housing category of community development for "activities that support affordable owner-occupied housing for low- or moderate-income individuals." This component included activities that: (1) "directly assist low- or moderate-income individuals to obtain, maintain, rehabilitate, or improve affordable owner-occupied housing"; or (2) "support programs, projects, or initiatives that assist low- or moderate-income individuals to obtain, maintain, rehabilitate, or improve affordable owner-occupied housing."³²⁰ Owner-occupied housing referenced in the agencies' proposal included both single-family and multifamily owner-occupied housing.

Activities under proposed § _____.13(b)(3) would have expressly excluded single-family home mortgage loans considered under the Retail Lending Test in proposed § _____.22.³²¹ Instead, as discussed in the agencies' proposal, activities eligible for consideration under proposed § _____.13(b)(3) included, for example, construction loan financing for a nonprofit housing developer building single-family owner-occupied homes affordable to low- or moderate-income individuals; financing or a grant provided to a nonprofit community land trust focused on providing affordable housing to low- or moderate-income individuals; a loan to a resident-owned manufactured housing community with homes that are affordable to low- or moderate-income individuals; a shared-equity program operated by a nonprofit organization to provide long-term affordable homeownership; and financing or grants for organizations that provide down payment assistance to low- or moderate-income homebuyers. Other activities eligible for

consideration under this proposed component include: activities with a governmental or nonprofit organization with a stated purpose of, or that otherwise directly supports, providing affordable housing; and activities conducted by the bank itself, or with other for-profit partners, provided that the activity directly supports affordable homeownership for low- or moderate-income individuals.

The agencies sought feedback on what conditions or terms, if any, should be added to this component to ensure that qualifying activities are affordable, sustainable, and beneficial for low- or moderate-income individuals and communities.

Comments Received

Nearly all commenters that commented on the affordable homeownership component of the NPR expressed support for CRA consideration for such activities. Some of the commenters suggested a different definition for this component under which the financing, construction, or rehabilitation of owner-occupied homes would qualify if: (1) the homes are located in a low- or moderate-income census tract or a distressed or underserved middle-income nonmetropolitan census tract; and (2) the sales price does not exceed four times the area median income. One commenter noted that this definition should explicitly include government programs with a "stated purpose or bona fide intent" of providing affordable housing or housing assistance for low-, moderate-, or middle-income individuals.

Many commenters offered specific suggestions regarding the activities that should be eligible for consideration under this component. Commenter suggestions included: that the agencies should explicitly include financing for the rehabilitation or reconstruction of an already owner-occupied home if the owner is a low- or moderate-income individual; that investments and interests in early buyout loans should receive CRA consideration because they enable servicers to work with and buy delinquent loans with government insurance or guarantees without foreclosing on the properties, thereby allowing residents to remain in their homes; and that the agencies should provide CRA consideration for the costs of transporting housing materials to remote areas.

A few commenters encouraged the agencies to use this component to encourage affordable homeownership for specific populations. For example, a commenter suggested that the agencies

increase and preserve affordable homeownership for low- or moderate-income individuals from racial and ethnic groups that were subjected to redlining and other discriminatory practices. Similarly, a commenter recommended that the agencies emphasize activities that expand homeownership for first-time buyers who are individuals with disabilities or represent other underserved populations.

Some commenters encouraged the agencies to include specific products or programs in this component of affordable housing. These suggestions include first-look homebuyer programs,³²² home repair programs that help homeowners bring homes into building code compliance, participation in specific pilot programs offered by the Federal National Mortgage Association (Fannie Mae) or the Federal Home Loan Mortgage Corporation (Freddie Mac) (collectively, the Government-sponsored enterprises or the GSEs),³²³ real estate-owned note sales, education on and resolution of heirs' property titles, low balance loans for homeowners, use of alternative credit models, limited equity housing cooperatives, and property tax abatements to assist low- or moderate-income owners whose taxes have risen rapidly. Other commenters suggested that the agencies provide CRA consideration for activities related to lender fee-for-service payments, investment, grants, and developing fees for service programming by HUD-certified housing counseling agencies. Lastly, some commenters recommended that the agencies encourage banks to partner with nonprofit affordable housing groups to provide or support affordable homeownership options. These commenters explained that nonprofit affordable housing groups—including developers, owners, counselors, and others—provide products and services that are appropriately tailored to low- and

³²² For example, Freddie Mac's First Look Initiative offers homebuyers and select nonprofit organizations an exclusive opportunity to purchase certain homes prior to competition from investors. See Freddie Mac, "Freddie Mac First Look Initiative," <https://www.homesteps.com/homesteps/offer/firstlook.html>.

³²³ GSE pilot programs are designed to target a wide range of housing access issues. GSE pilot programs may help renters establish and improve their credit scores, defray or decrease the cost of security deposits for renters, or take other actions to help renters and homeowners. For example, Fannie Mae's Multifamily Positive Rent Payment Reporting pilot program is aimed at helping renters build their credit history and improve their credit score. See Fannie Mae, "Fannie Mae Launches Rent Payment Reporting Program to Help Renters Build Credit" (Sept. 27, 2022), <https://www.fanniemae.com/newsroom/fannie-mae-news/rent-payment-reporting-program-launch>.

³²⁰ Proposed § _____.13(b)(3).

³²¹ See *id.*

moderate-income borrowers and help guard against predatory or unsustainable homeownership activities.

Final Rule

The agencies are adopting proposed § _____.13(b)(3), renumbered as final § _____.13(b)(4), with clarifying revisions to provide community development consideration for activities that support affordable owner-occupied housing for low- and moderate-income individuals. Specifically, in final § _____.13(b)(4), affordable housing includes “assistance for low- or moderate-income individuals to obtain, maintain, rehabilitate, or improve affordable owner-occupied housing, excluding loans by a bank directly to one or more owner-occupants of such housing.” The agencies believe that adopting this component facilitates consideration of a variety of the affordable housing models suggested by commenters. The agencies also note that some of the activities suggested by commenters, such as use of alternative credit scores, special purpose credit programs, and use of other credit products that assist low- or moderate-income individuals with purchasing a home could be considered responsive credit products under the Retail Services and Products Test, described in the section-by-section analysis of § _____.23. Owner-occupied one-to-four-family home mortgage loans, including but not limited to owner-occupied one-to-four-family home mortgage loans considered under the Retail Lending Test in § _____.22, are excluded from consideration under this component.

Relative to the agencies’ proposal, the final rule combines the two prongs (“direct” support and support for “plans, programs, and initiatives”) into a single component that covers all forms of assistance for affordable homeownership. By creating a single component, the agencies seek to streamline the requirement and clarify that a bank may receive community development consideration for activities that support any qualifying assistance under the component regardless of whether the support is provided directly to a low- or moderate-income individual or indirectly, through a third-party organization. As a result, under the final rule, a down payment grant provided by a bank to a low- or moderate-income individual is evaluated using the same standards as those standards that apply to a down payment grant to a nonprofit organization that provides affordable housing assistance to low- or moderate-income individuals. This parallel treatment is consistent with the agencies’ objectives, including the

objective seeking to provide greater clarity and consistency in the application of the regulations, and the criteria in the proposal.

Assistance for low- or moderate-income individuals to obtain, maintain, rehabilitate, or improve affordable owner-occupied housing. Under final § _____.13(b)(4), activities that assist low- or moderate-income individuals to obtain, maintain, rehabilitate, or improve affordable owner-occupied housing are considered. The proposal would have recognized activity that “directly” assists with these functions. The agencies removed “directly” to better align this component with the majority standard outlined in final § _____.13(a)(1)(i)(B)(1).

As noted in the proposal, activities under this component could be conducted in conjunction with a variety of financing types. For example, this component would include activities such as construction loan financing for a nonprofit housing developer constructing single-family owner-occupied homes affordable to low- or moderate-income individuals; a grant to a nonprofit organization that provides home rehabilitation and weatherization improvements for low- and moderate-income homeowners; financing or a grant to a nonprofit community land trust focused on providing affordable housing to low- or moderate-income individuals; a loan to a resident-owned manufactured housing community with homes that are affordable to low- or moderate-income individuals; a shared-equity program operated by a nonprofit organization to provide long-term affordable homeownership; and financing or grants for organizations that provide down payment assistance to low- or moderate-income homebuyers.³²⁴

Furthermore, under this component, eligible activities may include those involving assistance to a government agency or nonprofit organization that provides access to affordable homeownership, and assistance provided by the bank itself, or by other for-profit entities. Accordingly, each of the following may qualify for consideration under final § _____.13(b): participation in first-look homebuyer programs or home repair programs that help homeowners bring homes into building code compliance; a down payment grant offered directly by a bank to help low- or moderate-income individuals purchase a home; an investment in a government bond that finances home mortgage loans for low-

or moderate-income borrowers;³²⁵ and activities supporting a program that conducts free home repairs or maintenance for low- or moderate-income homeowners.

Exclusion of loans by a bank directly to owner-occupants. The proposal specifically excluded any home mortgage loans considered under the Retail Lending Test in § _____.22. The agencies were concerned that, as written, the requirement could suggest that a bank might receive consideration for such loans under either performance test, but not both. To minimize confusion and to clarify the agencies’ intent, final § _____.13(b)(4) replaces the reference to the Retail Lending Test with language that excludes any loan directly to an owner-occupant, regardless of whether the loan is considered under the Retail Lending Test. Consistent with the proposal, this clarification ensures that banks will not receive CRA consideration under both final § _____.13(b)(4) and final § _____.22 for a single loan.

Section _____.13(b)(5) Mortgage-Backed Securities

The Agencies’ Proposal

Under proposed § _____.13(b)(4), the agencies proposed to define standards for investments in mortgage-backed securities related to affordable housing that qualify for community development consideration. Specifically, the agencies proposed that mortgage-backed securities would qualify as affordable housing when the security contained “a majority of either loans financing housing for low- or moderate-income individuals or loans financing housing that otherwise qualifies as affordable housing under [proposed § _____.13(b)].”³²⁶ This proposed component of affordable housing was intended to be generally consistent with current practice and to recognize that purchases of qualifying mortgage-backed securities that contain home mortgage loans to low- or moderate-income borrowers or that otherwise contain loans that qualify as affordable housing are investments in affordable housing.

The agencies sought feedback on alternative approaches that would create a more targeted definition of qualifying mortgage-backed securities. One alternative approach would be to consider investments in mortgage-

³²⁵ See Q&A § _____.12(t)–2.

³²⁶ See Q&A § _____.12(t)–2. See also, e.g., Q&A § _____.23(b)–2 (indicating that CRA credit for MBS investments is conferred only if the MBS is “not backed primarily or exclusively by loans that the same institution originated or purchased.”).

³²⁴ See proposed § _____.13(b)(3).

backed securities only in proportion to the percentage of loans in the security secured by affordable properties. For example, if 60 percent of a qualifying mortgage-backed security consists of single-family home mortgage loans to low- or moderate-income borrowers, and 40 percent of the security consists of loans to middle- or upper-income borrowers, the mortgage-backed security would receive consideration only for the dollar value of the loans to low- or moderate-income borrowers. Additionally, the agencies sought feedback on whether to limit consideration of mortgage-backed securities to the initial purchase of a mortgage-backed security from the issuer, and not to consider subsequent purchases of the security. This change would have been intended to reduce the possibility of multiple banks receiving CRA consideration for purchasing the same security.

Comments Received

The majority of commenters recognized the important role mortgage-backed security purchases play in creating liquidity for the mortgage market and enabling banks to originate more loans and favored retaining this component of affordable housing. However, many of these commenters supported restrictions on the types of eligible securities as well as the amount of CRA consideration received relative to other activities. Other commenters suggested eliminating consideration for purchases of mortgage-backed securities altogether because of the view that such investments are low impact or add little value to communities.

Scope. Some commenters requested that the agencies clarify or modify the scope of this component. For example, a commenter sought clarification regarding the treatment of purchases of securities collateralized by mortgage loans in low- and moderate-income census tracts. Separately, several commenters recommended that the proposed mortgage-backed securities component include purchases of other affordable housing investment vehicles issued by State housing finance authorities or municipalities, such as mortgage revenue bonds. In contrast, other commenters supported restricting consideration to certain types of purchases of mortgage-backed securities, such as loans or mortgage-backed securities purchased from a certified CDFI, or loans or mortgage-backed securities that meet certain requirements but that are not guaranteed by the Federal Government. Other commenters proposed limitations that would provide CRA consideration only

for the first or second purchase of a mortgage-backed security.

Amount of consideration for mortgage-backed securities. The majority of commenters addressing the agencies' request for comment on whether to consider investment in mortgage-backed securities only in proportion to the percentage of loans in the security secured by affordable properties favored the proportional consideration alternative. In contrast, a couple of commenters addressing this alternative opposed using proportional consideration, asserting that it would increase complexity without material benefit to the volume and scope of affordable housing activities in low- or moderate-income communities. Other commenters suggested a hybrid approach whereby full CRA consideration would be granted for investments in mortgage-backed securities comprised of 50 percent or more affordable housing loans and pro rata credit would be granted for investments in mortgage-backed securities comprised of less than 50 percent affordable housing loans. Another commenter suggested that the full value of a mortgage-backed security only be considered when at least 50 percent of the underlying loans were used to finance supportive affordable housing developments.

Other commenters recommended that CRA consideration for purchases of mortgage-backed securities be discounted relative to other community development investments. These commenters suggested that mortgage-backed securities investments be discounted by 50 percent in comparison to more traditional lending or investment in qualified CRA activities because these securities remain liquid and provide comparably less public benefit than other qualifying CRA activities. Similarly, some commenters suggested that the agencies limit consideration for mortgage-backed securities investments to a percentage of a bank's nationwide community development activity, with some of these commenters suggesting either a 20 or 25 percent cap. Other commenters requested that consideration be limited to the percentage of loans to low- or moderate-income individuals.

Other restrictions or limitations. Finally, several commenters suggested that the agencies consider or set a minimum threshold for the time period that a bank must hold the mortgage-backed securities on its books, such as two or more years. Some commenters also opposed limiting mortgage-backed securities consideration to only the initial purchase from the issuer, citing

that this limitation would add complexity and could negatively impact the market for mortgage-backed securities.

Final Rule

In the final rule, the agencies are adopting the proposal related to mortgage-backed securities, renumbered as final § ____.13(b)(5) and reorganized to include final § ____.13(b)(5)(i) and (ii), with both substantive and clarifying edits. Specifically, the final rule includes as a component of affordable housing purchases of mortgage-backed securities that are collateralized by loans, a majority of which are not loans that the bank originated or purchased, and which are either home mortgage loans made to low- or moderate-income individuals or loans financing multifamily affordable housing that meets the requirements of final § ____.13(b)(1). For clarity, the two subcategories (home mortgage loans to low- or moderate-income individuals and loans secured by multifamily affordable housing) form two separate prongs under the overall mortgage-backed security component.

The agencies are also revising final § ____.13(b)(5) to confirm that the component only applies to mortgage-backed securities where a majority of the underlying loans are not loans that the bank originated or purchased. This limitation is consistent with current interagency guidance and ensures that banks are not likely to receive consideration under both final § ____.13(b)(5) and the Retail Lending Test in final § ____.22 for the same loan(s).³²⁷

Section ____.13(b)(5)(i)

Section ____.13(b)(5)(i). Final § ____.13(b)(5)(i) specifies that affordable housing includes purchases of mortgage-backed securities where a majority of the underlying loans are not loans that the bank originated or purchased and “[a]re home mortgage loans made to low- or moderate-income individuals.” This provision adopts the proposal to consider purchases of mortgage-backed securities that contain a majority of “loans financing housing for low- or -moderate income individuals” (proposed § ____.13(b)(4)). On further review, the agencies determined that “loans financing housing for low- or -moderate income individuals” could be read broadly to include single-family loans and multifamily loans. The agencies intended, however, to refer with this language solely to loans secured by

³²⁷ Q&A § ____.23(b)–2.

single-family homes. Thus, final § _____.13(b)(5)(i) refers more specifically to “home mortgage loans made to low- or moderate-income individuals.” As discussed further in the section-by-section analysis of § _____.12, “home mortgage loan” is defined to mean a “closed-end home mortgage loan” or an “open-end home mortgage loan,” which are in turn defined to exclude multifamily loans.³²⁸

The agencies also note that final § _____.13(b)(5)(i) only allows consideration based on the income of the individuals to whom the loans are made and does not allow consideration for mortgage-backed securities solely because the underlying loans are secured by property in low- and moderate-income census tracts. This approach, which is consistent with the agencies’ proposal, is intended to maintain the component’s focus on low- or moderate-income individuals. The agencies do not believe that providing consideration for mortgage-backed securities where the underlying loans are made to middle- or upper-income individuals residing in low- or moderate-income census tracts is likely to further the agencies’ goal of encouraging affordable housing lending to low- and moderate-income individuals.

Section _____.13(b)(5)(ii)

Under final § _____.13(b)(5)(ii), the agencies replaced phrasing that referred to loans that finance housing that “otherwise qualifies” as affordable housing with a direct reference to final § _____.13(b)(1). This revision clarifies that, as it relates to multifamily housing, the agencies intend to provide community development consideration only for those mortgage-backed securities where a majority of the underlying loans are secured by multifamily rental housing purchased, developed, financed, rehabilitated, improved, or preserved in conjunction with government affordable housing plans, programs, initiatives, tax credits, and subsidies. The agencies believe that this clarification will facilitate consistency in evaluating mortgage-backed securities. The agencies note that purchases of tax-exempt bonds issued by Freddie Mac and Fannie Mae, which finance affordable housing projects, and tax-exempt bond issuances that finance affordable housing projects sponsored by State housing authorities or municipalities, may be eligible for community development consideration

³²⁸ See final § _____.12 (defining “home mortgage loan,” “closed-end home mortgage loan,” and “open-end home mortgage loan”).

under the final rule, provided that the bond is a mortgage-backed security that meets the requirements in final § _____.13(b)(5)(ii).

Amount of consideration for mortgage-backed securities. Under final § _____.13(a) mortgage-backed securities that meet the requirements in final § _____.13(b)(5) (*i.e.*, a majority of the underlying loans are not loans that the bank originated or purchased, and are either home mortgage loans made to low- or moderate-income individuals or loans financing multifamily affordable housing that meets the requirements of final § _____.13(b)(1)) will be eligible to receive consideration for the full value of the security.³²⁹ The agencies carefully considered commenter feedback regarding the amount of consideration that mortgage-backed securities should be eligible to receive under CRA, including ideas for partial consideration of bank investments in mortgage-backed securities. On further deliberation, the agencies are not adopting a partial consideration framework for bank investments in mortgage-backed securities. The agencies believe that the final rule’s majority approach for mortgage-backed securities will facilitate compliance and supervision, as it is less complex than other alternatives suggested and considered, and consistent with the majority standard employed in most other categories of community development.³³⁰ While generally aligned with current guidance on bank investments in mortgage-backed securities noted earlier, the final rule will provide greater clarity, transparency, and uniformity in how bank investments in mortgage-backed securities are considered under CRA.

The agencies believe that the requirements in final § _____.13(b)(5), including the majority requirement, the home mortgage loan limitation, and the express tie to final § _____.13(b)(1) for multifamily affordable housing, appropriately balance considerations of current guidance; the benefits of greater consistency and clarity in the treatment of investments in mortgage-backed securities under CRA; and the recognition that purchases of mortgage-backed securities containing home mortgage loans to low- or moderate-income borrowers or loans that finance multifamily affordable housing can improve liquidity, in turn supporting more loans to low- and moderate-

³²⁹ See final § _____.13(a)(1)(i)(A)(2).

³³⁰ For discussion of the final rule on full and partial credit for community development loans, investments, and services, see the section-by-section analysis of final § _____.13(a).

income borrowers and more affordable housing development. The agencies remain sensitive to commenter views that mortgage-backed securities are lower in impact and responsiveness to community credit needs than other qualifying affordable housing activities more directly supporting housing for low- or moderate-income individuals. Accordingly, the agencies will continue to monitor the impact of including mortgage-backed securities in the affordable housing category.

Other restrictions or limitations. After carefully considering commenter feedback, the agencies have decided not to limit consideration of mortgage-backed securities to the initial purchase of a mortgage-backed security from the issuer under this component. The agencies sought feedback on limiting consideration to the initial purchase in order to emphasize activities that may more directly serve low- or moderate-income individuals and communities and to reduce the possibility of multiple banks receiving CRA consideration for purchasing the same security. However, the agencies believe that this potential limitation is mitigated as examiners will be able to use information regarding the amount of time a mortgage-backed security was owned by the bank to determine the appropriate amount of consideration. For more information regarding the agencies’ use of performance context, see the section-by-section analysis of § _____.21(d).

Complex, Specialized, and Novel Topics in Affordable Housing

As previously noted, the agencies sought feedback on how to ensure that the proposed affordable housing category is clearly defined and appropriately inclusive of activities that support affordable housing for low- or moderate-income individuals, including activities that involve complex, specialized, or novel solutions, such as community land trusts, shared equity models, and manufactured housing. The agencies considered the wide array of commenter responses that identified particular activities that help to further access to affordable housing for low- and moderate-income individuals. However, the agencies have declined to revise the affordable housing category to explicitly list such activities, because the agencies believe that many of the activities identified in comments would be eligible for community development consideration under the various components of the affordable housing category. This outcome is consistent with the agencies’ objective for the affordable housing category, which is to create standards and identify

characteristics that may be used to evaluate a broad range of affordable housing activities and programs, both current and future, and identify those that meet the standards for consideration. The following is a discussion of the ways in which several activities cited by commenters are captured within the various affordable housing components or may otherwise receive consideration under the final rule.

Manufactured housing. In the NPR, the agencies stated that a loan to a resident-owned manufactured housing community with homes that are affordable to low- or moderate-income individuals could be eligible for community development consideration as an activity that supports affordable homeownership for low- and moderate-income individuals. As noted previously, the agencies also requested feedback about the inclusion of manufactured housing in the proposed affordable housing category.

The agencies received several comments related to manufactured housing, and commenters provided feedback on a variety of approaches for affordable manufactured housing eligibility. For example, some commenters supported special consideration of financing for affordable manufactured housing that is on tribal land, while other commenters supported a broader approach to include all loans that finance affordable manufactured housing. Some commenters urged the agencies to provide consideration only for resident-owned manufactured housing communities or to nonprofit organizations that provide land for manufactured housing. In contrast, other commenters urged the agencies to include consideration for for-profit manufactured home communities, with one commenter suggesting that loans to manufactured housing communities with homes that are affordable to low- or moderate-income individuals should not be restricted to only resident-owned communities, because for-profit entities play an essential role in purchasing older communities and making significant infrastructure repairs, such as roads, sewer, and water. Another commenter suggested that community development consideration should be extended for loans to manufactured home dealers that commit to providing more favorable financing terms to low- or moderate-income buyers.

The agencies have considered these comments and recognize that manufactured housing can provide important affordable housing options for low- and moderate-income individuals

and families. Nonetheless, the agencies intend and expect that some manufactured housing activity will meet the requirements under a component of affordable housing adopted in the final rule. For example, an acquisition loan made to a manufactured housing community with homes that are affordable to low- or moderate-income individuals could help fill a housing gap and may qualify under final § _____.13(b)(4) as assistance supportive of affordable owner-occupied housing for low- or moderate-income individuals.³³¹ Alternatively, financing provided to a nonprofit, in conjunction with a government program, to develop manufactured housing and buy land for use as affordable rental housing for low- and moderate-income individuals and families could qualify under final § _____.13(b)(1) (rental housing in conjunction with a government affordable housing plan, program, initiative, tax credit, or subsidy).³³² As discussed further in the section-by-section analysis of final § _____.22(d)(1), below, single-family home mortgage loans meeting the HUD code for manufactured housing are generally reportable under HMDA, and will therefore receive consideration under the Retail Lending Test in final § _____.22.³³³

Shared equity housing programs and community land trusts. In the NPR, the agencies stated that a shared-equity program operated by a nonprofit organization to provide long-term affordable homeownership could be eligible for community development consideration as an activity that supports affordable homeownership for low- and moderate-income individuals.³³⁴ In addition, the agencies stated that an activity that provides financing for the acquisition of land for a shared equity housing project that brings permanent affordable housing to a community could meet the impact review factor for activities that result in a new community development financing product or service under the Community Development Financing Test or the Community Development Financing Test for Limited Purpose Banks, to the extent that it involves a new strategy to meet a community development need.³³⁵

³³¹ Final § _____.13(b)(4) is discussed in greater detail in the section-by-section analysis of § _____.13(b)(4), below.

³³² Final § _____.13(b)(1) is discussed in greater detail in the section-by-section analysis of § _____.13(b)(1), below.

³³³ See HUD Manufactured Home Construction and Safety Standards, 24 CFR part 3280.

³³⁴ 87 FR 33884, 33897 (June 3, 2022).

³³⁵ See 87 FR 33915.

The NPR also specifically addressed community land trusts, which typically operate a specific type of shared-equity program. The agencies stated that providing financing to, or a grant for a nonprofit community land trust focused on providing affordable owner-occupied housing to low- or moderate-income individuals could be eligible for community development consideration as an activity that supports affordable homeownership for low- and moderate-income individuals.³³⁶ Several commenters noted that activities, such as those conducted in coordination with community land trusts, can prevent displacement of vulnerable residents.

It is the agencies' view that shared equity housing programs, including but not limited to community land trust activities, provide opportunities to support long-term affordable housing. Commenters generally supported qualification of these activities under the affordable housing category, with some commenters noting that such activities can make homeownership affordable for low- or moderate-income individuals who might be otherwise unable to afford to purchase a home. The agencies agree that shared equity housing and community land trusts are important tools to promote homeownership. Although the final rule does not create a separate component or prong for qualification of shared equity housing as affordable housing, the agencies highlight that loans, investments, and services involving shared equity programs and community land trusts may be eligible for consideration under final § _____.13(b)(4), when they involve assistance for low- or moderate-income individuals to obtain affordable owner-occupied housing. As another example, to the extent that a community land trust operates rental housing meeting the requirements under final § _____.13(b)(1) or (2), loans, investments, and services to support such housing would qualify for consideration under the applicable component. Moreover, mortgage loans that allow homeowners to purchase a home through these programs may be considered under the Retail Lending Test in final § _____.22, or under the responsive credit product evaluation in the Retail Services and Products Test in final § _____.23.³³⁷

Accessory dwelling units (ADUs). Several commenters requested consideration for banks supporting development of ADUs under the affordable housing category. For example, commenters requested

³³⁶ See 87 FR 33897.

³³⁷ See final § _____.22.

consideration for loans extended to finance ADUs that are intended to help low- and moderate-income homeowners develop an income-producing property that could offset the cost of a mortgage or rising property taxes, or to encourage affordability by creating additional housing supply.³³⁸ One commenter suggested that the agencies provide community development consideration to ADUs and small multifamily buildings and asked the agencies to clarify that banks can receive consideration for loans to support improvements and repairs to existing dwellings, including for small dollar loans and to install accessibility features.

As adopted under final § _____.13(b), certain activities related to ADUs could be considered affordable housing, such as those that contribute to the provision of housing affordable to low- and moderate-income individuals and families. For example, a loan to a nonprofit organization that supports the creation of an ADU on the property of a low- or moderate-income homeowner could qualify under final § _____.13(b)(4). Alternatively, a loan or investment in a fund operated in conjunction with a government program to support the construction of ADUs could qualify under final § _____.13(b)(1), if the resulting ADUs were rental housing for low- or moderate-income individuals (and not considered under the Retail Lending Test).

Land banks. The NPR did not specifically address the consideration of land banks under the various prongs of the affordable housing category, and a number of commenters requested that the agencies explicitly address land banks and land bank-related activities in the final rule. Commenters stated that land bank-related activities often help to address the need for affordable housing for low- and moderate-income individuals and in low- and moderate-income communities. The agencies recognize that land banks, which are typically established by a government entity or a nonprofit organization, can help to facilitate the development of affordable housing by acquiring and holding land until some future time when it can be developed as affordable housing. The agencies acknowledge that many of these activities could be considered under the affordable housing category if they have the bona fide

intent and are specifically structured to provide affordable housing for low- and moderate-income individuals, and the agencies believe that these activities could qualify under several components of the affordable housing category under the final rule. For example, a loan to a land bank created by a government entity to hold land for the development of affordable rental housing could qualify under final § _____.13(b)(1). Alternatively, a loan to a land bank operated by a nonprofit organization for the purpose of acquiring land on which to develop and sell single-family housing to low- and moderate-income individuals could qualify under final § _____.13(b)(4).

Special purpose credit programs. In the proposal, the agencies sought feedback on whether special purpose credit programs³³⁹ should be listed as an example of a responsive credit product or program that facilitates mortgage and consumer lending targeted to low- or moderate-income borrowers under the Retail Services and Products Test.³⁴⁰ Several commenters instead recommended qualification for these activities under the affordable housing category of community development. In response to these comments, the agencies note that under the final rule, special purpose credit programs can be considered in the evaluation of responsive credit products and services pursuant to final § _____.23(c)(2)(v). In addition, although specific special purpose credit programs are not expressly listed as qualifying programs under the affordable housing category in final § _____.13(b), the agencies recognize that it would be possible for the objectives of specific special purpose credit programs to align with one or more affordable housing category components, and in such cases, these activities may be eligible for consideration within the affordable housing category of community development. For example, a grant to a nonprofit who is implementing a special purpose credit program that provides down payment assistance to low- or moderate-income individuals may qualify for consideration under final § _____.13(b)(4).

Down payment assistance. In the NPR, the agencies stated that financing or grants for organizations that provide

down payment assistance to low- or moderate-income homebuyers could be eligible for community development consideration as an activity that supports affordable homeownership for low- and moderate-income individuals under proposed § _____.13(b)(3).³⁴¹ Several commenters suggested that the agencies provide consideration for activities that provide down payment assistance to low- and moderate-income individuals. Nonetheless, the agencies note that direct grants and other programs offered by banks that help low- and moderate-income homebuyers make a down payment are eligible for consideration as an activity that supports affordable homeownership for low- and moderate-income individuals under final § _____.13(b)(4), as long as the down payment assistance is not provided as a loan by the bank directly to the owner-occupant of the home.

Other suggested housing programs. Commenters requested that the agencies explicitly address many additional activities, including but not limited to home repair for low- and moderate-income individuals and families, supportive housing models, and first-look homebuyer programs. The agencies have considered these recommendations and acknowledge that there are many types of investments, loans, and services provided by banks in connection with such activities that may qualify under the affordable housing category of community development. As previously noted, many activities recommended by commenters would qualify under one or more of the five affordable housing components adopted in final § _____.13(b), when the activity meets the qualifying criteria and thereby supports affordable housing for low- and moderate-income individuals and families. In addition, to provide increased certainty on what community development activities will qualify for CRA consideration, pursuant to final § _____.14, the agencies will maintain a publicly available, non-exhaustive illustrative list of examples of community development activities that qualify for CRA consideration, including examples of qualifying affordable housing activities. The list will be periodically updated. Final § _____.14 also provides a formal confirmation process through which any bank could request a determination as to whether a proposed community development activity would be eligible for CRA consideration.

³³⁸ Accessory dwelling units or ADUs are additional living quarters on single-family lots that are independent of the primary dwelling unit. See HUD, Office of Policy Development and Research, "Accessory Dwelling Units: Case Study" (June 2008), <https://www.huduser.gov/portal/publications/adu.pdf>.

³⁴¹ See 87 FR 33897.

Section _____.13(c) Economic Development

Current Approach

Under the current regulation, community development is defined to include “[a]ctivities that promote economic development by financing businesses or farms that meet the size eligibility standards of the U.S. Small Business Administration Development Company (SBDC) or Small Business Investment Company (SBIC) programs or have gross annual revenues of \$1 million or less.”³⁴² Under the current Interagency Questions and Answers, activities qualify as economic development if they meet both a “size” test and a “purpose” test.³⁴³

Size test. An institution’s loan, investment, or service meets the “size” test if it finances, directly or through an intermediary, businesses or farms that either meet, as noted, the size eligibility standards of the SBDC or SBIC programs, or have gross annual revenues of \$1 million or less.³⁴⁴ The term “financing” is considered broadly and includes technical assistance that readies a business that meets the size eligibility standards to obtain financing.³⁴⁵

Currently, small business loans and small farm loans that meet the definition of “loans to small businesses” or “loans to small farms,” based on the Call Report definitions—loans with original amounts of \$1 million or less to businesses and loans with original amounts of \$500,000 or less to farms³⁴⁶—are generally evaluated as retail loans and not as community development loans. Loans that exceed these amounts, as applicable, can be considered as community development loans if the business or farm borrower either meets the size eligibility standards of the SBDC or SBIC programs or has gross annual revenues of \$1 million or less.

Purpose test. A bank’s loans, investments, or services can meet the “purpose” test if they “promote economic development” by supporting either:

(1) Permanent job creation, retention, and/or improvement:

- For low- or moderate-income persons, in low- or moderate-income census tracts, in areas targeted for redevelopment by Federal, State, local, or tribal governments;

- By financing intermediaries that lend to, invest in, or provide technical assistance to start-ups or recently formed small businesses or small farms; or

- Through technical assistance or supportive services for small businesses or farms, such as shared space, technology, or administrative assistance;³⁴⁷ or

(2) Federal, State, local, or tribal economic development initiatives that include provisions for creating jobs or improving access by low- or moderate-income persons to jobs or to job training or workforce development programs.³⁴⁸

The agencies will presume that loans, investments, or services in connection with the following specific government programs promote economic development, thereby satisfying the purpose test: SBDCs, SBICs, USDA Rural Business Investment Companies³⁴⁹ (RBICs), New Markets Venture Capital Companies,³⁵⁰ NMTC-eligible Community Development Entities³⁵¹ (CDEs), or CDFIs that finance small businesses or small farms.³⁵²

Currently, an intermediate small bank that is not required to report small business or small farm loans may opt to have its small business and small farm loans considered as community development loans, as long as they meet the definition of community development. An intermediate small bank that opts to have such small business and small farm loans considered as community development loans cannot also choose to have these loans evaluated under the current lending test.³⁵³

The Agencies’ Proposal

The agencies proposed several revisions to the economic development category of community development that were intended to provide clarity to stakeholders about the activities that qualify under this category and to encourage activities supportive of small businesses and small farms.

Specifically, the agencies proposed that the economic development category of community development would comprise three types of activities:

- Activities undertaken consistent with Federal, State, local, or tribal government plans, programs, or initiatives that support small businesses, as defined in the plans, programs, or initiatives. This prong expressly included lending to, investing in, or providing services to an SBDC, SBIC, New Markets Venture Capital Company, qualified CDE, or RBIC (proposed § _____.13(c)(1)).

- Support for financial intermediaries that lend to, invest in, or provide technical assistance to businesses or farms with gross annual revenues of \$5 million or less (proposed § _____.13(c)(2)); or

- Providing technical assistance to support businesses or farms with gross annual revenues of \$5 million or less, or providing services such as shared space, technology, or administrative assistance to such businesses or farms or to organizations that have a primary purpose of supporting such businesses or farms (proposed § _____.13(c)(3)).

Gross annual revenue threshold for small businesses and small farms under economic development. The agencies proposed alternative size standards for defining small businesses and small farms, as discussed in the section-by-section analysis of § _____.12.³⁵⁴

Specifically, the agencies proposed a gross annual revenue threshold for the businesses and farms supported under proposed § _____.13(c)(2) and (3) of \$5 million or less. For government-related support of small businesses and small farms, the size standards of the relevant government plan, program, or initiative would apply, with the proposed \$5 million gross annual revenue threshold applying in the absence of a definition in the plan, program, or initiative. As discussed in the proposal, the \$5 million size standard was intended in part to align the meaning of small business and small farm across the CRA regulation, including under the proposed Retail Lending Test, with the definition of small business under the CFPB’s Section 1071 Proposed Rule, subsequently adopted in the Section 1071 Final Rule.

Purpose of job creation, retention, and improvement for low- and moderate-income individuals under economic development. Under the proposal, the current purpose test described above would not be required for loans, investments, and services to qualify as supporting economic development, as long as the proposed criteria in

³⁴² See current 12 CFR _____.12(g)(3). See also 13 CFR 120.10 (SBDC program) and 13 CFR part 107 (SBIC program).

proposed § ____ .13(c)(1), (2), or (3) were met. The agencies requested feedback on whether the proposed economic development category should retain a separate component of economic development to consider activities that support job creation, retention, and improvement for low- and moderate-income individuals. Moreover, the agencies sought feedback on whether activities conducted with businesses or farms of any size and that create or retain jobs for low- or moderate-income individuals should be considered. Additionally, the agencies requested feedback on criteria that could be included to demonstrate that the activities satisfied this component and that ensure activities are not qualified solely because they offer low wage jobs.

Evaluation of direct loans to small businesses and small farms. As discussed in greater detail in the section-by-section analysis of § ____ .22, the agencies proposed that a bank's reported loans to small businesses and small farms, regardless of the loan amount, generally would be evaluated under the proposed Retail Lending Test.³⁵⁵ Relatedly, under proposed § ____ .13(c), the agencies proposed that reported loans directly to small businesses and small farms would not be included in the economic development category of community development and, therefore, would not be considered in the proposed Community Development Financing Test. Consistent with current guidance, the agencies proposed that intermediate banks would retain flexibility to have certain retail loans—small business, small farm, and home mortgage loans—be considered as community development loans. This option was proposed to be available to an intermediate bank if those loans have a primary purpose of community development and are not required to be reported by the bank (under HMDA or CRA).³⁵⁶

The agencies proposed this approach to reflect the agencies' belief that loans to small businesses and small farms are primarily retail lending products for banks, and therefore would be more appropriately considered under the proposed Retail Lending Test. Under the proposed Retail Lending Test, described in detail in the section-by-section analysis of § ____ .22 below, small business loans and small farm loans

would be evaluated based on the distribution metrics and would not be subject to additional requirements such as the current community development criterion for economic development.³⁵⁷ Accordingly, the proposed revisions to the economic development category of community development were designed to emphasize other activities that would promote access to financing for small businesses and small farms, as discussed in greater detail below. However, as also discussed further below, the agencies also sought feedback on whether the proposed approach to evaluating direct small business and small farm lending solely under the Retail Lending Test would sufficiently recognize activities that support job creation, retention, and improvement for low- or moderate-income individuals and communities.

Under the proposal, for retail loans evaluated under the proposed Retail Lending Test, the agencies proposed to transition from the current CRA definitions of small business loans and small farm loans to the definitions of loans to small businesses and small farms with gross annual revenues of \$5 million or less—with the focus on the size of the small business or small farm, not the size of the loan. Hence, whereas currently, as noted, small business and small farm loans are generally evaluated under the lending test if they are loans with origination amounts of \$1 million or less to a business (of any size) and loans with origination amounts of \$500,000 or less to a farm (of any size),³⁵⁸ small business and small farm

³⁵⁷ As further discussed in the section-by-section analysis of final § ____ .42, under the current rule, for each census tract in which a bank (other than a small bank) originated or purchased a small business or small farm loan, the bank must report the aggregate number and amount of the loans with an amount at origination of: (1) \$100,000 or less; (2) more than \$100,000 but less than \$250,000; and (3) more than \$250,000. See current 12 CFR ____ .42(b)(1)(i) through (iii). These banks must also report small business and small farm loans to businesses and farms with gross annual revenues of \$1 million or less (based on the revenue size used by the bank in making the credit decision). See current 12 CFR ____ .42(b)(1)(iv). Subject to changes discussed in the proposal pertaining to the transition to using section 1071 data, the proposed Retail Lending Test distribution metrics would evaluate a bank's small business loans and small farm loans to businesses and farms with gross annual revenues of less than \$1 million. The proposal also would evaluate loans to small businesses and small farms of more than \$250,000 but less than or equal to \$1 million, and of \$250,000 or less. See proposed § ____ .22(d); see also final § ____ .22(e) and the accompanying section-by-section analysis. See also, e.g., current 12 CFR ____ .12(g)(3) and Q&A § ____ .12(g)(3)–1.

³⁵⁸ See 12 CFR ____ .12(v) (defining a small business loan as a loan included in "loans to small businesses" as defined in the instructions for preparation of the Call Report). See also 12 CFR ____ .12(w) (defining a small farm loan as a loan

lending evaluated under the proposed Retail Lending Test would consider loans of any size, as long as they were to businesses or farms with gross annual revenues of \$5 million or less.

As proposed, the transition to this evaluation approach for small business and small farm lending would be based on the availability of data under the CFPB Section 1071 Final Rule on small business loan data collection. In the interim, to evaluate small business and small farm loans under the Retail Lending Test, the agencies proposed to use the current definitions of small business loan and small farm loan.³⁵⁹ The agencies sought feedback on this aspect of the proposal and on whether to continue considering bank loans to small businesses and small farms that currently qualify under the economic development criteria as community development loans during the period between when the final rule becomes applicable and when the agencies begin to use section 1071 data for bank CRA evaluations.

Comments Received

Many commenters provided a variety of views on the proposal overall and offered feedback on the issues on which the agencies specifically requested comment, as discussed in further detail below. Several commenters expressed general support for the proposed changes to the economic development category and the proposed components. Many commenters expressed concerns, however, that the proposed changes to the economic development category would limit the activities that would have qualified under the current rule for this category and/or limit the range of small businesses that could be supported. Generally regarding a "size" and "purpose" test for the economic development category of community development, multiple commenters supported retaining the current size and purpose tests because, in these commenters' view, these tests highlight women- and minority-owned businesses. A commenter suggested that the "size" test and "purpose" test be retained but that a qualifying activity under the economic development category should be required to satisfy only one of these tests, not both.

Comments discussed below address the following topics regarding the proposed economic development category of community development: (1) proposed size standards for small

included in "loans to small farms" as defined in the instructions for preparation of the Call Report).

³⁵⁹ See 12 CFR ____ .12(v) (defining small business loan) and (w) (defining small farm loan).

³⁵⁵ See proposed § ____ .22(a); see also, e.g., final § ____ .22(d) and the accompanying section-by-section analysis.

³⁵⁶ See proposed § ____ .22(a)(5)(iii); compare with Q&A § ____ .12(h)—3 (small business, small farm, home mortgage, and consumer loan consideration for intermediate small banks).

businesses and small farms; (2) the proposal to eliminate the existing “purpose” test for qualifying economic development activities; (3) criteria to demonstrate job creation, retention, and improvement; and (4) the proposed evaluation of direct loans to small businesses and small farms. As relevant, comments on these topics are also included in the section-by-section analysis of the individual components of the final rule (final § ____ .13(c)(1) through (3)).

Gross annual revenue threshold for small businesses and small farms under economic development. Numerous commenters addressed the proposal to include a gross annual revenue threshold for businesses and farms that could be considered under the economic development category. Some commenters generally supported the proposed size threshold of gross annual revenues of \$5 million or less for businesses and farms, with some asserting the proposed size threshold would allow a greater number of small businesses to be supported under this category. A few commenters supported the \$5 million gross annual revenue threshold but suggested that support for intermediaries that target the smallest businesses (with gross annual revenues of \$1 million or less) should receive enhanced credit, while another commenter expressly supported using the \$5 million gross annual revenue threshold for the intermediary prong (proposed § ____ .13(c)(2)).

On the other hand, many commenters opposed or expressed concerns about the proposed size thresholds for small businesses and small farms. Commenters generally expressed concerns that the proposed approach would eliminate credit or stifle growth for many businesses, including minority-owned businesses and mid-sized companies, and would limit or omit many projects that impact low- and moderate-income areas or individuals. A commenter asserted that the proposed \$5 million gross annual revenue threshold failed to account for the significant positive impact larger businesses have on job creation, retention, and improvement. Some commenters suggested maintaining the current “size” standards to qualify activities that support small businesses and small farms under the economic development category, with some expressing concerns that activities directly supporting small businesses that meet the size eligibility standards established by the SBA and affiliated programs (but that have gross annual revenues of greater than \$5 million), as well as support for the financial

intermediaries assisting these businesses, would no longer qualify under this proposed economic development category. A commenter asserted that setting a specific revenue threshold for small businesses fails to recognize differences among businesses across different industries and suggested that the agencies adopt a business size index and standard like the one used by the SBA.³⁶⁰ A few commenters asserted that the proposed threshold of \$5 million in gross annual revenues would be too low. A few other commenters expressed concern that the proposal did not provide a clear rationale for the proposal to use a \$5 million gross annual revenues threshold for small businesses and farms supported under the proposed economic development category. One commenter recommended that banks of any size should be allowed to receive consideration for loans to any small business or small farm loan, regardless of gross annual revenue, under any category of community development.³⁶¹

Some commenters asserted that the proposed threshold of \$5 million in gross annual revenues for small businesses and small farms would be too high. A commenter suggested that the size standard should be \$1 million gross annual revenues or less, consistent with current CRA small business loan reporting, without consideration for the size standards established by the SBA and affiliated programs and noted that most small, minority-owned, and women-owned businesses have gross annual revenues of \$1 million or lower. Several commenters indicated that a \$5 million gross annual revenue threshold would create a disincentive for banks to support very small businesses and minority-owned businesses. Another commenter suggested that a size standard of \$750,000 in gross annual revenues would target an appropriate business size, particularly in rural areas, but also supported retaining the flexibility to use the size standards established by the SBA for economic development loans.

A few commenters suggested that, if the agencies adopt the small business and small farm gross annual revenue threshold as proposed, exceptions should also be adopted. A commenter suggested that activities that support minority-owned businesses, including those with more than \$5 million in gross

annual revenues, should also qualify without having to document job creation, retention, or improvement. Another commenter similarly suggested that any loan or investment in a certified minority business enterprise should qualify.

Purpose of job creation, retention, and improvement for low- and moderate-income individuals under economic development. The agencies received many comments related to the proposal to eliminate the “purpose” test from the economic development category of community development. Some commenters supported the expansion of possible eligible loan purposes; for example, a commenter favorable noted that the removal of the jobs-focused “purpose” test would enable banks to receive CRA consideration for making loans to small businesses or farms for new equipment or facilities that could support their growth. Another commenter asserted that the proposal would allow a greater number of small businesses to be supported, expressing the view that the “purpose” test required by current CRA regulations under the economic development definition limited support for some small businesses, particularly sole proprietors that generally do not create jobs for low- and moderate-income individuals, and therefore do not meet the current “purpose” test standard. A commenter stressed that an important reason to retain the existing “purpose” test is that it provides consideration for jobs to low- and moderate-income individuals and communities as well as areas targeted for revitalization.

Many commenters supported retaining job creation, retention, and improvement as a component of the economic development category. Some commenters raised concerns that the proposed approach to evaluate loans to small businesses and farms under the Retail Lending Test would not sufficiently recognize job creation, retention, and improvement benefits for low- and moderate-income individuals. Commenters expressed concern that eliminating the current purpose test focused on job creation, retention or improvement for low- and moderate-income individuals and would disincentivize banks from investing in certain funds, programs, and other activities that focus on these objectives. A commenter noted that retaining the purpose requirement would improve transparency and noted that they did not believe demonstrating that a loan’s purpose is to create, retain, or improve jobs is difficult. Several commenters highlighted that the requirements for qualifying a Public Welfare Investment

³⁶⁰ See, e.g., SBA, “Table of Size Standards” (effective March 17, 2023), <https://www.sba.gov/document/support-table-size-standards>.

³⁶¹ This commenter specifically suggested merging the proposed economic development category with the proposed revitalization category. See proposed § ____ .13(e).

(PWI) include demonstrating that the investment is designed “primarily” to promote the public welfare, including the welfare of low- or moderate-income communities or families (such as by providing housing, services, or jobs)³⁶² and that the emphasis on job creation should be similarly retained in the economic development category of community development under CRA. A few commenters expressed concerns about the possibility of materially different standards for community development investments versus permissible PWIs.

Many commenters also suggested that the economic development category include consideration for loans and investments to small businesses and small farms that demonstrate job creation, retention, and improvement not only for low- and moderate-income individuals, but also in low- and moderate-income areas and areas targeted for redevelopment by Federal, State, local, or tribal governments, consistent with current guidance.³⁶³ Several commenters suggested that loans to or investments in any size small business or small farm that could demonstrate job creation, retention, or improvement for low- and moderate-income individuals should be considered. One of these commenters also suggested that additional consideration should be given to activities that support businesses owned by persons of color, women or veterans, and small family-owned farms. Finally, a commenter suggested that if the jobs-focused requirement were not included in the economic development category, then it should be considered as part of the impact review for the Community Development Financing Test.³⁶⁴

In contrast, some commenters viewed a separate component for activities supporting job creation, retention, or improvement as unnecessary. For example, a commenter thought that the proposed approach for considering direct loans to small businesses and small farms under the Retail Lending Test was simpler and that other proposed components for the economic development category would support job creation and retention.

Criteria to demonstrate job creation, retention, and/or improvement for low- or moderate-income individuals. Commenters also provided input on criteria that could be included to

demonstrate that the purpose of an activity is job creation, retention, or improvement for low- or moderate-income individuals. Many commenters highlighted the CRA Interagency Questions and Answers and noted that banks have successfully followed this guidance to provide examiners with information that demonstrates the purpose of the activity to be job creation, improvement, or retention and that this approach should be sufficient. A commenter suggested any documentation about the type of job, training offered or outreach to low- and moderate-income individuals or areas should be considered.

Commenters provided suggestions on resources that a bank can use to demonstrate that the purpose of an activity is for job creation, retention, or improvement for low- or moderate-income individuals. For example, suggestions included relying on the recipient’s credit profile, public websites, such as glassdoor.com, and criteria established by the HUD Community Development Block Grant Program.³⁶⁵ A commenter suggested that if the anticipated or documented wages exceed 80 percent of area median income, the location of the job should be considered, particularly if the company has committed to hire from a low- or moderate-income or underserved area. This commenter did not support the development of a prescriptive standard or requirement for documentation, however, and suggested that a bank should be allowed to demonstrate, with or without documentation from the business, that the activity is likely to create or retain jobs.

Many commenters on this topic offered specific views on criteria that could be considered to evaluate the quality of the job. Commenters offered suggestions examiners should consider, such as the type of job, compensation, access to job training and other support for career advancement as well as quality specific factors, such as whether the job provides at least three employee benefits including health insurance, dental insurance, 401(k) or other retirement plan, sick leave, vacation leave, and disability, as well as consideration of whether the job offers at least a living wage and cited the “living wage calculator” developed by the Massachusetts Institute of

Technology.³⁶⁶ A commenter suggested using the same standards for assessing job quality as the Community Economic Development Program within the Office of Community Services at the U.S. Department of Health and Human Services³⁶⁷ to ensure that activities are not given credit if they offer only low wage jobs.

Several commenters did not support considering wages provided by the job as a measure of job quality. These commenters asserted that all jobs are valuable and should be considered regardless of the wages offered and indicated that jobs that offer lower wages may still be important entry level jobs. Additionally, a commenter noted that jobs created by small businesses provide important opportunities in historically marginalized communities and stated that the importance of creating jobs of all salary levels should be recognized.

Evaluation of direct loans to small businesses and small farms. Commenters had differing views on whether loans made by banks directly to small businesses and small farms should be considered under the economic development category of community development or should only be considered under the Retail Lending Test, as proposed. Some commenters raised concerns that the proposed approach to evaluate loans to small businesses and farms under the Retail Lending Test would not sufficiently recognize job creation, retention, and improvement benefits for low- to moderate-income individuals. For example, a commenter supported continuing to include loans to small businesses and small farms that satisfy the size and purpose tests as community development loans, asserting that considering them under the Retail Lending Test would fail to incentivize small business lending. Another commenter expressed concerns that this approach would limit community development activities not associated with government programs, such as activities undertaken through nonprofit affiliates of CDFIs, that CDFIs can leverage to meet economic development goals without some of the challenges of participating in a government program.

On the other hand, some commenters suggested that a bank should have the option of choosing whether to have a loan to a small business or small farm

³⁶² See 12 U.S.C. 24(Eleventh) (OCC), 12 U.S.C. 338a (Board), 12 CFR 345.12(g)(1) through (4), (h)(1), (i)(1), and (t)(1) (FDIC).

³⁶³ See Q&A § __.12(g)(3)–1.

³⁶⁴ See proposed §§ __.15 and __.24, discussed in the section-by-section analyses of final §§ __.15 and __.24.

³⁶⁵ See 24 CFR 570.208(a)(4). The comment cited HUD Office of Block Grant Assistance, “Basically CDBG,” <https://files.hudexchange.info/resources/documents/Basically-CDBG-Chapter-3-Nat-Obj.pdf>.

³⁶⁶ See Massachusetts Institute of Technology, “Living Wage Calculator,” <https://livingwage.mit.edu/>.

³⁶⁷ See U.S. Dept. of Health & Human Svcs., Office of Community Svcs., “Community Economic Development (CED),” <https://www.acf.hhs.gov/ocs/programs/ced>.

considered either under the proposed Community Development Financing Test or the proposed Retail Lending Test. A commenter recommended that the proposed flexibility for intermediate banks to have certain retail loans considered community development loans should be extended to large banks with under \$10 billion in assets. A few commenters suggested that, in general, loans to small businesses or small farms should be considered under the proposed Community Development Financing Test if they have a purpose of community development.

Some commenters asserted that the proposed approach would sufficiently recognize loans to small businesses and small farms and that may also support job creation, retention, and improvement for low- or moderate-income individuals or communities. A commenter asserted that the proposed approach would be more inclusive of all small business lending compared to the current approach, noting that only loans to small businesses that are greater than \$1 million and that also satisfy the size and purpose test qualify as community development loans. Another commenter expressed the view that removing the requirement that activities demonstrate job creation, retention, and improvement for low- and moderate-income individuals would incentivize banks to provide more support to micro-businesses.

Commenters provided several other suggestions for how direct lending to small businesses and small farms that demonstrates job creation, retention or improvement for low- and moderate-income individual could be considered if not included in the economic development category. A few commenters suggested that the agencies include a qualitative review of loans considered under the Retail Lending Test to determine whether they demonstrate job creation, retention, or improvement for low- and moderate-income individuals and communities. Another commenter suggested that only loans to small businesses and small farms that demonstrate job creation, retention, or improvement for low- and moderate-income individuals or areas should be considered under the proposed Retail Lending Test. This commenter further recommended that, of those loans, only loans that can demonstrate the creation of “good jobs,” supporting economic mobility, such as those that provide apprenticeships or shared equity, should qualify.

A few commenters suggested that the agencies eliminate the exclusion set forth in proposed § _____.24(a)(2)(i) for considering retail loans with a

community development purpose under the Community Development Financing Test with commenters suggesting that this could produce unintended results once the agencies replace the CRA definition of “small business loan” with a definition based on the CFPB’s Section 1071 Final Rule. One of the commenters explained that many community development loans are made to special purpose, startup, or nonprofit entities that do not have gross annual revenues of more than \$5 million. The commenter suggested that the proposed Retail Lending Test would incentivize banks to distribute their small business loans in a particular way but would not provide incentives for banks to make small business loans that satisfy the community development definition, which can be especially impactful loans. The commenter further explained that there would be no “double counting” of small business loans if the Community Development Financing Test allowed for certain small business loans to qualify as community development loans, since the Retail Lending Test and the Community Development Financing Test would evaluate different aspects of the same qualifying small business loan.

A commenter suggested that, for direct loans to small businesses and small farms, job creation, retention, or improvement should be considered as part of a qualitative review under the proposed Retail Services and Products Test for large and intermediate banks³⁶⁸ and suggested that for small banks, this criterion could be considered as part of the qualitative review under the Retail Lending Test. Another commenter also suggested that for large banks, job creation, retention, and improvement could be considered as part of a qualitative review under the proposed Retail Services and Products Test, but for intermediate and small banks it could be considered as part of a qualitative review under the Retail Lending Test.

Final Rule

Overview

The agencies are adopting, with revisions, the proposed economic development category in § _____.13(c). As

³⁶⁸ Under the proposal, small banks and intermediate banks would not be subject to the proposed Retail Services and Products Test. See proposed § _____.21(b)(2) and (3). As discussed in the section-by-section analysis of § _____.21, the agencies proposed that small banks would be evaluated under the performance standards for small banks under proposed § _____.29(a), but could opt to be evaluated under the Retail Lending Test. See proposed § _____.21(b)(3); see also final § _____.21(a)(3).

finalized, the provisions for this category are intended to provide greater clarity, to promote activities that support small businesses and small farms, and to recognize the role of intermediaries that provide assistance to small businesses and small farms.

Final § _____.13(c) establishes three components for the economic development category. For clarity and overall organization of this section, the final rule includes section headers for each of these three components. Under the final rule, the three components are:

- *Government-related support for small businesses and small farms* (final § _____.13(c)(1)), which includes activities undertaken in conjunction or in syndication with Federal, State, local, or tribal governments and comprises two subcomponents:
 - Loans, investments, and services other than direct loans to small businesses and small farms (final § _____.13(c)(1)(i)); and
 - Direct loans to small businesses and small farm (final § _____.13(c)(1)(ii)).
- *Intermediary support for small businesses and small farms* (final § _____.13(c)(2)), which provides for support to small businesses or small farms through intermediaries.

- *Other support for small businesses and small farms* (final § _____.13(c)(3)), which addresses for other assistance to small businesses or small farms, such as financial counseling, shared space, technology, or administrative assistance, to small businesses or small farms.

Relative to the proposal, the final rule broadens the scope of eligible activities under the economic development category and expands the range of small businesses and small farms that could be supported, while providing greater clarity to stakeholders regarding the economic development category. Each component of the final rule is discussed in turn in the section-by-section analysis below.

Section _____.13(c)(1) Government-Related Support for Small Businesses and Small Farms

The Agencies’ Proposal

Under proposed § _____.13(c)(1), activities “undertaken consistent with Federal, [S]tate, local, or tribal government plans, programs, or initiatives that support small businesses or small farms as those entities are defined in the plans, programs, or initiatives” would be considered community development loans as discussed in greater detail below.³⁶⁹ Consistent with current interagency

³⁶⁹ Proposed § _____.13(c)(1).

guidance,³⁷⁰ this proposed provision was intended to encourage support for highly responsive activities that are relevant to small businesses and small farms, as well as coordination among banks, government agencies, and other program participants. The proposed gross annual revenue threshold of \$5 million or less for qualifying businesses or farms would not be required for activities that support business or farms through these government plans, programs, or initiatives, or through the specified entities. Instead, the size standards used by the respective government plans, programs, or initiatives to qualify business or farms as small would apply.³⁷¹

The agencies also proposed to specify that lending to, investing in, or providing services to an SBDC, SBIC, New Markets Venture Capital Company, qualified CDE, or RBIC would qualify as economic development. With certain technical differences, this aspect of the proposal generally would memorialize existing guidance which presumes that activities with these entities promote economic development.³⁷² By including this list in the proposed regulation, the agencies intended to provide greater clarity and encourage the continued participation in, and support of, programs offered through these key providers of small business and small farm financing.

Comments Received

Several commenters supported § _____.13(c)(1) as proposed, with multiple commenters specifically supporting the agencies' inclusion of SBDCs in this component of the economic development category. A few commenters supported relying on the size standards used by the respective government programs to qualify activities, with a commenter noting that the proposal to allow consideration for activities that meet the size standards of the applicable government program would allow support for some larger businesses and would accommodate some level of intentional job creation. Commenter feedback also included a suggestion that the agencies include an express "presumption" of qualification for CRA credit for activities in connection with SBDCs, SBICs, RBICs,

³⁷⁰ See, e.g., Q&A § _____.12(g)(3)-1 and Q&A § _____.12(g)(4)(i)-1.

³⁷¹ See *id.*

³⁷² See Q&A § _____.12(g)(3)-1 (stating that "the agencies will presume that any loan or service to or investment in a SBDC, SBIC, [RBIC], New Markets Venture Capital Company, New Markets Tax Credit-eligible [CDE], or [CDFI] that finances small businesses or small farms, promotes economic development").

New Markets Venture Capital Companies, as well as Federal, State, local, or tribal government plans or programs.³⁷³ Commenters also suggested that loans and investments should be considered if they finance, either directly or through an intermediary, businesses or farms that either meet the size eligibility standards of the SBDC or SBIC programs or have \$5 million in gross annual revenues or less.

On the other hand, a commenter objected to the proposal to rely on the small business and small farm size standards of the applicable government plan, program, or initiative, asserting that government programs often do a poor job of targeting businesses owned by low- and moderate-income individuals. This commenter urged the agencies to adopt a \$5 million maximum gross annual revenue threshold for small businesses and farms under this component, asserting that this would be important for consistency in small business and small farm size standards across the regulation.

A few commenters expressed concerns about the presumption of qualifications for SBICs. For example, one of these commenters raised doubts as to how well SBICs serve targeted groups and suggested that SBICs should not automatically garner CRA credit.

Final Rule

The agencies are finalizing proposed § _____.13(c)(1) with revisions to the proposed activities undertaken with government plans, programs or initiatives for specificity and clarity. Final § _____.13(c)(1) adopts "Government-related support for small businesses and small farms" as the paragraph header for this component; this provision encompasses loans, investments, or services that are undertaken in conjunction or in syndication with Federal, State, local, or tribal government plans, programs, or initiatives. Such loans, investments, or services can be made or provided directly or indirectly to or in small businesses or small farms, as described below.

³⁷³ As noted earlier in this section-by-section analysis, the proposal specifies that "[e]conomic development activities are: (1) Activities undertaken consistent with Federal, State, local, or tribal government plans, programs, or initiatives that support small businesses or small farms as those entities are defined in the plans, programs, or initiatives, . . . including lending to, investing in, or providing services to an [SBDC] (13 CFR 120.10), [SBIC] (13 CFR 107), New Markets Venture Capital Company (13 CFR 108), qualified [CDE] (26 U.S.C. 45D(c)), or [RBIC] (7 CFR 4290.50)." See also Q&A § _____.12(g)(3)-1.

The final rule under § _____.13(c)(1) replaces the proposed rule text referencing activities undertaken "consistent with" Federal, State, local, or tribal government, plans, programs, or initiatives with the phrase "in conjunction or in syndication with" these plans, programs, or initiatives. In this way, the final rule emphasizes the intended link between loans, investments, or services that will qualify as economic development under this prong with Federal, State, local, or tribal government, plans, programs, or initiatives. The final rule adds "in syndication with" for clarity, to refer to those loans extended to a single borrower by a group of entities. The agencies believe that qualifying activities in conjunction with or in syndication with government plans, programs, or initiatives helps ensure that activities are responsive to the credit needs of small businesses and small farms, in alignment with the goals of CRA. In this regard, the agencies believe that government plans, programs, or initiatives are general indicators of community needs, and thus provide a mechanism for ensuring that activities are intentional and support the needs of small businesses and small farms. In addition, the nexus to government plans, programs, and initiatives provides transparency regarding program requirements and certainty for qualification, which the agencies believe is important for all stakeholders.

As noted above and as described below, final § _____.13(c)(1) is organized into two subcomponents: loans, investments, and services other than direct loans to small businesses and small farms (final § _____.13(c)(1)(i)); and direct loans to small businesses and small farms (final § _____.13(c)(1)(ii)).

Section _____.13(c)(1)(i) Loans, Investments, and Services Other Than Direct Loans to Small Businesses and Small Farms

The final rule in § _____.13(c)(1)(i) provides that loans, investments, and services, excluding direct loans to small businesses and small farms, that are undertaken in conjunction or in syndication with Federal, State, local, or tribal governments are eligible for consideration as economic development. Consistent with the proposal, under final § _____.13(c)(1)(i), loans, investments, and services may support small businesses or small farms in accordance with how small businesses and small farms are defined in the applicable plan, program, or initiative. If the government plan, program, or initiative does not identify

a standard for the size of the small businesses or small farms supported by the plan, program, or initiative, the small businesses or small farms supported must meet the definition of small business or small farm in final § _____.12. Also consistent with the proposal, loans to, investments in, or services provided to the following are presumed to meet the criteria of final § _____.13(c)(1)(i): SBICs; New Markets Venture Capital Companies; qualified CDEs; and RBICs.

Under final § _____.13(c)(1)(i), for example, an investment in a microloan program operated by a local government could be considered provided that this activity met the required criteria. The agencies are finalizing the provision regarding certain Federal programs to memorialize current interagency guidance and, as noted in the proposal, provide greater clarity and encourage the continued participation in, and support of, plans, programs or initiatives offered through these key providers of small business and small farm financing.³⁷⁴

The agencies understand that some commenters oppose the express presumption of qualification for activities in connection with SBICs because of concerns regarding how well SBICs serve certain groups of business owners, but the agencies believe that it is important to recognize them in the final rule because they offer an opportunity for banks to provide an important source of capital to grow small businesses.³⁷⁵ The agencies note that specifying SBICs and other entities in the final rule provides greater clarity and certainty about the types of loans, investments and services that may receive consideration under this subcomponent.

The final rule also provides consistency for stakeholders with the current framework. As noted, this subcomponent of the economic development final rule generally memorializes current interagency guidance, which provides that any loan or service to or investment in an SBDC, SBIC, RBIC, New Markets Venture Capital Company, NMTC-eligible CDE, or CDFI that finances small businesses or small farms, is presumed to promote economic development.³⁷⁶ As the proposal, final § _____.13(c)(1)(i) does not mention CDFIs, as activities with CDFIs are considered under a separate category

of community development in the final rule.³⁷⁷

Size eligibility standard under final § _____.13(c)(1)(i). As noted, for this subcomponent of economic development, the agencies are adopting a size standard for businesses or farms that are supported by government plans, programs, or initiatives that aligns with relevant size standards for small businesses and small farms intended to be the beneficiaries of the applicable government plan, program, or initiative. The size standard could be lower or higher than the \$5 million gross annual revenue threshold that would otherwise apply under the category, or it could be expressed in terms of employee size or some other measure. However, if the government plan, program, or initiative does not define a size standard for small businesses or small farms that it supports then the gross annual revenue consistent with the small business and small farm definitions in § _____.12 (gross annual revenue of \$5 million or less), would apply.

The agencies are not adopting a maximum gross annual revenue threshold of \$5 million for all small businesses and small farms under § _____.13(c)(1)(i) because the agencies believe that standards vary across different government plans, programs, and initiatives to address various community development and small business or farm needs; the standards in the final rule are designed to accommodate the ways in which these plans, programs, and initiatives may be tailored to respond to community needs. The agencies understand that government plans, programs, and initiatives will likely identify the standard for the size of business or farm supported and believe it is appropriate to maintain flexibility. However, for clarity, the final rule provides that, in the absence of a size standard established by the government program, plan, or initiative, the business or farm supported by the government program, plan, or initiative must meet the definition of “small business” or “small farm” as defined in § _____.12.

The agencies considered the feedback provided by commenters advocating for a higher or lower threshold for various reasons, including views that the proposed approach would eliminate credit or stifle growth for many businesses or would create a disincentive for banks to support very small businesses and minority-owned businesses. The agencies, however, believe the size standards established by

the government program or as provided in the definition for small business and small farms in § _____.12 will capture activities that support a broad range of small businesses and small farms, while providing clarity. The agencies also note that support for small businesses and small farms under final § _____.13(c)(2) and (3) is more targeted, to small businesses and small farms with gross annual revenues of \$5 million or less, which the agencies believe will appropriately focus those activities on smaller businesses. In addition, the impact and responsiveness review under final § _____.15 includes as a review factor support for small businesses or small farms with gross annual revenues of \$250,000 or less.³⁷⁸

Section _____.13(c)(1)(ii) Direct Loans to Small Businesses and Small Farms

The agencies are adopting a second subcomponent in final § _____.13(c)(1)(ii) to provide consideration of certain direct loans to small businesses and small farms. Specifically, under final § _____.13(c)(1)(ii), the economic development category of community development would include loans by a bank directly to businesses or farms, including, but not limited to, loans in conjunction or syndicated with an SBDC or SBIC, that meet the following size and purpose criteria:

- *Size eligibility standard.* The loans must be to businesses and farms that meet the size eligibility standards of the SBDC or SBIC programs or that meet the definition of small business or small farm in § _____.12 (final § _____.13(c)(1)(ii)(A)).

- *Purpose test.* The loans must have the purpose of promoting permanent job creation or retention for low- or moderate-income individuals or in low- or moderate-income census tracts (final § _____.13(c)(1)(ii)(B)).

The agencies considered broad commenter feedback that loans made to small businesses and small farms should be considered under economic development and that a “size” and “purpose” test should be retained for various reasons. The agencies understand commenter concerns that certain loans to small businesses do have a community development purpose and should be considered as community development loans. The agencies are also sensitive to expressed concerns about the potential reduction in qualifying loans if direct lending to small businesses is not included in the economic development category of the final rule. As stated in the proposal, the

³⁷⁴ See Q&A § _____.12(g)(3)–1.

³⁷⁵ See generally, SBA, “The Small Business Investment Company (SBIC) Program Overview” (Oct. 1, 2018), <https://www.sba.gov/sites/sbagov/files/2019-02/2018%20SBIC%20Executive%20Summary.pdf>.

³⁷⁶ See Q&A § _____.12(g)(3)–1.

³⁷⁷ See final § _____.13(k) and the accompanying section-by-section analysis.

³⁷⁸ See final § _____.15(b)(6) and the accompanying section-by-section analysis.

agencies believe that loans to small business and small farm are generally more suitable for consideration under the Retail Lending Test. However, the agencies have carefully considered the many comments on this issue, and believe there are certain loans to small businesses and small farms that would align with the goals of community development.

The first eligibility criterion—that the loans are made in conjunction or in syndication with a government plan, program, or initiative—is the same standard that applies to activities under final § _____.13(c)(1)(i) that are not direct loans to small businesses and small farms. As stated previously, the agencies believe that this criterion helps to demonstrate that the loans are responsive to identified community needs and support articulated community development goals. In addition, this criterion will increase certainty and transparency by setting a clear standard for determining that an activity qualifies as community development. This provision further specifies that loans in conjunction or syndication with SBDCs and SBICs, and that meet the size and purpose criteria, are considered to qualify as economic development under final § _____.13(c)(1)(ii). As similarly discussed in the section-by-section analysis of final § _____.13(c)(1)(i), the agencies believe that noting these programs in the rule text provides helpful clarity and transparency, as well as assurance that loans in conjunction or syndication with these programs, which serve an important role within the ecosystem of small business and small farm lending, will continue to qualify as economic development under the final rule.

Size eligibility standard. On consideration of the comments on a size eligibility standard for economic development and further deliberation, the agencies are adopting a size eligibility standard for direct loans to small businesses or small farms that aligns with the current CRA framework's size standard, discussed above—namely, the size standards of the SBDC or SBIC programs—in addition to including loans supporting businesses of gross annual revenues of \$5 million or less. The agencies believe that adopting these size standards for direct lending to small businesses under the economic development category of community development will provide consistency with the current CRA framework, which will foster certainty and predictability for banks engaging in this lending.

Purpose test. The agencies are also adopting a purpose test to qualify certain direct loans to small businesses and small farms under final § _____.13(c)(1)(ii)(B). As previously noted, loans that may be considered to be economic development under final § _____.13(c)(1)(ii) must have the purpose of promoting permanent job creation or retention for low- or moderate-income individuals or in low- or moderate-income census tracts. The agencies carefully considered commenter feedback on a purpose test for qualifying economic development activities. As discussed above, many commenters supported retaining job creation, retention, and improvement as a component of the economic development category. The agencies acknowledge feedback indicating that the current purpose test is helpful for encouraging jobs-focused activities, and have deliberated further on commenter concerns that the proposed approach to evaluate loans to small businesses and farms under the Retail Lending Test might not sufficiently recognize job-related activities benefiting low- and moderate-income individuals and communities. At the same time, the agencies have considered feedback that elimination of the purpose test provides greater flexibility and opens up the possibility of more activities meeting a wider range of small business and small farm credit needs to qualify as economic development.

On balance, the agencies determined it appropriate to retain consideration of direct loans to small businesses and small farms, in conjunction or syndication with a government plan, program, or initiative, and to apply a purpose test to this subcomponent of economic development, which is intended generally to align with the current purpose test and to be responsive to suggestions and concerns raised by commenters. Recognizing the benefits that commenters have noted of removing the purpose test from the economic development category of community development, however, the agencies are not applying the purpose test to final § _____.13(c)(1)(i) or (c)(2) or (3).

In adopting the purpose test for permanent job creation and retention for final § _____.13(c)(1)(ii)(B), the agencies sought to recognize the contributions of small businesses and small farms in communities, particularly with respect to long-term job opportunities for low- or moderate-income individuals. In addition to considering prior stakeholder feedback and comments on the proposal, the agencies considered their own supervisory experience

regarding the complexities involved under the current purpose test in determining whether small business and small farm loans support permanent job creation, retention, or improvement for low- or moderate-income individuals and low- or moderate-income census tracts. In addition, the agencies considered feedback that eliminating the purpose test from the final rule on economic development entirely could result in different standards for community development investments versus PWIs.³⁷⁹

The purpose test adopted in final § _____.13(c)(1)(ii)(A) requires that the loan proceeds are applied for the purpose of promoting permanent job creation or retention for low- or moderate-income individuals or in low- or moderate-income census tracts. As noted, loans that are made by a bank directly to small businesses or small farms in conjunction or in syndication with an SBDC or SBIC presumptively qualify under this prong but are not the exclusive loans that qualify; other loans that are made in conjunction or in syndication with other government programs, plans, or initiatives and that meet the size and purpose criteria could also qualify. For example, an SBA 7(a) loan³⁸⁰ extended for the purpose of purchasing new long-term machinery and that would allow a small business to hire additional employees could qualify, provided it also met other required criteria. A loan to support a facility improvement in conjunction with a State loan guarantee program associated with the State Small Business Credit Initiative could qualify provide it met all necessary criteria.³⁸¹ A working capital loan in conjunction with a State program that is for the purpose of retaining employees could qualify provided other required criteria are met. However, loans that fund general business operations would be less likely to qualify without additional information on whether the loan proceeds would be applied for the purpose of job creation or retention. The agencies believe that the purpose test under the final rule aligns appropriately with the current purpose test, with clarifying modifications discussed below, to provide continued encouragement of banks in extending

³⁷⁹ The agencies have noted comments on the proposal related to PWIs, and will continue to be aware of intersections between the CRA and PWI frameworks in supervising banks.

³⁸⁰ See SBA, "7(a) Loans," <https://www.sba.gov/funding-programs/loans/7a-loans>.

³⁸¹ See U.S. Dept. of Treasury, "State Small Business Credit Initiative," <https://home.treasury.gov/policy-issues/small-business-programs/state-small-business-credit-initiative-ssbci>.

loans to small businesses and small farms as a community development activity.

In keeping with current guidance, the purpose test in the final rule focuses on job-related benefits for low- or moderate-income individuals and low- or moderate-income census tracts.³⁸² Other items mentioned in the guidance—areas targeted for redevelopment by Federal, State, local, or tribal governments; intermediaries supporting small businesses and small farms; and technical assistance to small business and small farms—are incorporated elsewhere in the final rule provisions regarding community development.³⁸³

As explained above, under the current purpose test, a loan for the purpose of job improvement could qualify under economic development as long the loan met other criteria. The agencies are not adopting “job improvement” as a factor under the purpose test in this final rule. Although the agencies did not receive comments specific only to “job improvement” in feedback concerning the purpose test or economic development in general, based on supervisory experience, the agencies believe that difficulties arise in demonstrating and determining whether a loan promotes job improvement, presenting challenges to establishing predictable and workable standards for both compliance and supervision. In addition, the amount of time, resources, and expertise needed to fairly evaluate the quality of jobs could be overly burdensome for both the bank and examiners. However, job improvement is closely tied to workforce development and training programs and the agencies believe in the importance of the contributions these programs make into communities. Therefore, the final rule provides that workforce development or training programs can be considered community development as a community supportive service pursuant to § ____.13(d), discussed in more detail in the section-by-section analysis of § ____.13(d).

Relatedly, the final rule does not incorporate particular standards regarding the quality of jobs for low- and moderate-income individuals, including wage levels and other wage-related considerations. The agencies considered views and suggestions offered by commenters on this topic,

and have determined that it would be difficult to address job quality in the rule in a manner that would effectively and consistently account for the many diverse types of small businesses and small farms in different industry sectors.

The agencies believe that the final rule’s purpose test, focused on job creation and retention, will provide greater clarity relative to the current purpose test, thereby facilitating bank lending under this subcomponent of the final rule on economic development, and improved consistency and transparency in the agencies’ evaluations of this lending.

Consideration of Loans to Small Businesses and Small Farms Under the Retail Lending Test and Community Development Financing Test

Final § ____.13(c)(1)(ii) recognizes certain direct loans to small businesses and small farms that benefit local communities and have specific community development goals, but that are not evaluated under the Retail Lending Test.³⁸⁴ In addition, the final rule provides that certain direct loans by banks to small businesses or small farms may be considered under both the Community Development Financing Test and the Retail Lending Test, if they qualify for consideration under both tests. This approach is a change from the current rule where, as discussed above, loans to businesses with an origination amount of \$1 million or less and loans to farms with an origination amount of \$500,000 or less generally are evaluated only under the lending test, while loans that exceed the applicable loan amount can be considered as a community development loan if they meet the current size and purpose test. However, unlike under the current rule, which provides that the same loan cannot be counted as both a retail loan and a community development loan, the final rule allows small business and small farm loans to qualify under both the Retail Lending Test and Community Development Financing Test. This is also different from the agencies’ proposal, which would have considered reported loans made directly to small businesses and small farms under the Retail Lending Test.

The agencies believe that this approach is appropriate because the Retail Lending Test and Community Development Financing Test generally focus on a different aspect of a bank’s direct lending to small businesses and small farms: in general, under the Retail

Lending Test’s distribution analysis, the share of loans (based on loan count) to small businesses and small farms at different revenue levels is considered,³⁸⁵ while under the Community Development Financing Test, the dollar volume of loans is considered, as well as their impact and responsiveness.³⁸⁶ With respect to direct loans to small businesses and small farms that qualify as economic development under final § ____.13(c)(1)(ii), the agencies believe that this approach allows for a holistic evaluation of bank engagement in this lending.

Section ____.13(c)(2) Intermediary Support for Small Businesses and Small Farms

The Agencies’ Proposal

Under proposed § ____.13(c)(2), the second component of the proposed economic development category would comprise “[s]upport for financial intermediaries that lend to, invest in, or provide technical assistance to businesses or farms with gross annual revenues of \$5 million or less.” This provision was intended to promote and facilitate access to capital for smaller businesses and farms. The agencies proposed to use the same gross annual revenue standard for small businesses and farms in this provision as in other parts of the proposal for simplicity and consistency.

The current regulation and interagency guidance on community development activities does not specifically address financial intermediaries that increase access to capital for small businesses and small farms; proposed § ____.13(c)(2) was intended to respond to stakeholder feedback emphasizing, and the agencies’ recognition of, the importance of these intermediaries. Examples of financial intermediaries that the agencies intended this provision to cover included a Community Development Corporation that provides technical assistance to recently formed small businesses, or a CDFI that provides lending to support sustainability of small farms.

Comments Received

Many commenters provided a range of views on proposed § ____.13(c)(2),

³⁸⁵ See final § ____.22(e) and the accompanying section-by-section analysis. The agencies note that, consistent with the proposal, the dollar volume of small business and small farm lending would be considered in the Retail Lending Volume Screen of the final rule. See final § ____.22(c) and the accompanying section-by-section analysis.

³⁸⁶ See final § ____.24 and the accompanying section-by-section analysis.

³⁸² See Q&A § ____.12(g)(3)–1.

³⁸³ See *id.* See also, *e.g.*, final § ____.13(e) and (j)(2) (revitalization or stabilization activities in targeted census tracts and in Native Land Areas, respectively), (c)(2) (intermediary support for small businesses and small farms), and (c)(3) (other assistance for small businesses and small farms).

³⁸⁴ For discussion of the standards for evaluating loans under the Retail Lending Test, see the section-by-section analysis of § ____.22.

including a variety of suggestions for revisions. Some commenters expressly supported proposed § ____ .13(c)(2) without any further suggestions for additions or clarifications. Several commenters suggested that CDFIs be considered an eligible financial intermediary under this component. Several other commenters raised concerns that the removal of the current “size” test and “purpose” test would result in certain financial intermediaries being excluded from the economic development category and that this would limit access to capital for small businesses. Some of these commenters suggested including support for financial intermediaries or loan funds that are not licensed or certified by the SBA but that lend to or invest in small businesses that meet the size eligibility standards of the SBA’s SBIC or SBDC programs (which might exceed \$5 million in gross annual revenues). Another commenter similarly and more specifically requested that the agencies include in the definition of economic development financial intermediaries that lend to, invest in, or provide technical assistance to businesses that: (1) have more than \$5 million in gross annual revenues but still meet the size eligibility standards of the SBDC or SBIC Programs; and (2) support permanent job creation, retention, and/or improvement for low- and moderate-income individuals, in low- and moderate-income areas, or in areas targeted for redevelopment.

Some commenters who supported retaining job creation, retention, or improvement suggested that the final rule should clearly include consideration of investments and loans to financial intermediaries that support small business and small farms for the demonstrable purposes of job creation, retention, or improvement for low- and moderate-income individuals. Another commenter suggested that this component should also consider loans and investments made to CDFIs to support small businesses with less than \$5 million gross annual revenues, as these also help to create jobs. A commenter suggested that consideration for loans and investments to Community Action Agencies³⁸⁷ be presumed to advance economic development through workforce development, indicating that workforce development has been central to the creation and function of these entities.³⁸⁸ Another commenter

suggested that the proposal for financial intermediary support should also recognize loans and investments made to support projects using NMTCs,³⁸⁹ as well as activities that support economic development initiatives of universities and local chambers of commerce.

Some commenters emphasized that many financial intermediaries that are not certified SBICs, are minority-led and women-led and that such entities play an important role in providing access to capital for minority- and women-owned businesses. One of these commenters noted that many of these companies that fund small businesses in underserved communities face challenges becoming SBICs and suggested that the agencies provide consideration for non-SBICs that are owned by minorities and women as long as these companies adhere to SBIC net worth and after-tax income size limits. Another commenter suggested that loans to minority-owned small businesses should be presumed to promote economic development and receive CRA credit.

An additional commenter similarly suggested that the agencies should clarify that banks can receive credit for economic development activities that include investments and loans in a minority-owned small business or minority-owned financial intermediaries and that, at a minimum, these activities should count for credit if they achieve impact outcomes like job creation, retention, or improvement for low- to moderate-income persons or areas. Other feedback included concerns that, without more clarifications about the intended coverage of proposed § ____ .13(c)(2), banks would tend to favor activities with SBICs under proposed § ____ .13(c)(1), and that this would disadvantage minority-owned enterprises and first-time fund managers. At least one commenter supported coverage of activities with financial intermediaries that are not SBICs in the economic development category if these activities create, retain or improve jobs. A commenter suggested that this prong also include investments in Qualified Opportunity Funds that include low- and moderate-income census tracts in designated Opportunity Zones.³⁹⁰

development if they support “Federal, state, local, or tribal economic development initiatives that include provisions for creating or improving access by low- or moderate-income person to jobs or to job training or workforce development programs”).

³⁸⁷ See, e.g., Internal Revenue Service (IRS), LMSB-04-0510-016, “New Markets Tax Credits” (May 2010), <https://www.irs.gov/pub/irs-utl/atgnmtc.pdf>.

³⁸⁹ See, e.g., IRS, “Opportunity Zones,” FS-2020-13 (updated Apr. 2022), <https://www.irs.gov/newsroom/opportunity-zones> (discussing both

On a technical note, a commenter requested that the term “support” in the proposed regulatory text be further clarified to mean loans, investments, and services to financial intermediaries. Another commenter stated that the proposal did not specifically address financial intermediaries that increase access to capital for small businesses, asserting that determining business size later in the process would be inappropriate. Both industry and community group stakeholders have stressed the importance of financial intermediaries, such as loan funds, in providing access to financing for small businesses that are not ready for traditional bank financing. In addition, some commenters recommended clarifying that the size of the small business or small farm be determined at the time of the investment by the financial intermediary, noting that because the purpose of these investments is to support the growth of the business.

Final Rule

For the reasons discussed below, the agencies are finalizing proposed § ____ .13(c)(2) to include in the economic development category intermediaries that support small businesses and small farms; however, the final rule expands the type of intermediaries considered under this component and adopts several revisions for clarity and consistency with other prongs in the economic development category. Additionally, the final rule provides examples of the types of support an intermediary can provide to a small business or small farm. Specifically, final § ____ .13(c)(2) provides that loans, investments, or services provided to intermediaries that lend to, invest in, or provide assistance, such as financial counseling, shared space, technology, or administrative assistance, to small businesses or small farms can be considered under economic development.

The final rule broadens the types of intermediaries that may be considered under this category beyond financial intermediaries, by removing the word “financial” from the description of this category. Instead, under the final rule, non-financial intermediaries such as business incubators and small business assistance providers can be considered along with financial intermediaries such as nonprofit revolving loan funds. The agencies intend that the expansion of the types of intermediaries that can be included under this component will

Opportunity Zones and Qualified Opportunity Funds).

³⁸⁷ See Economic Opportunity Act of 1964, tit. II, Public Law 88-452, 78 Stat. 516-24 (1964).

³⁸⁸ See Q&A § ____ .12(g)(3)-1 (providing that activities are considered to promote economic

help address commenter concerns about some intermediaries that could be covered under the current rule potentially being excluded under the proposal, such as those that support primarily support businesses with gross annual revenue above \$5 million, and better ensure recognition of the range of intermediaries providing support for small businesses and small farms. The agencies intend that many of the intermediaries that could be considered under the current rule would continue to qualify under this component if they support small businesses and farms through loans, services, and investments. The agencies recognize that there are many types of intermediaries, including those that support minority-owned small businesses, as mentioned by commenters, and that financial intermediaries play a critical role in providing access to capital for small businesses and small farms when traditional bank financing might not be possible. For more information and discussion regarding the agencies' consideration of comments recommending adoption of additional race- and ethnicity-related provisions in this final rule, see section III.C of this

SUPPLEMENTARY INFORMATION.

To address commenter requests for clarification regarding the coverage of the proposed financial intermediary prong, the agencies note that, consistent with the proposal, the intermediaries under final § _____.13(c)(2) are distinct from intermediaries that provide government-related support to small businesses and small farms under final § _____.13(c)(1)(i); this allows for non-SBIC and other non-government-related intermediaries to be included in the economic development category. The agencies also recognize that intermediaries can provide support to businesses or farms of all sizes; however, consistent with the proposal, support for intermediaries under final § _____.13(c)(2) is focused on intermediary lending to, investments in, and services to businesses and farms with gross annual revenues of \$5 million or less.³⁹¹ The agencies believe that, for non-government-related aspects of economic development, a gross annual revenue threshold of \$5 million for supported businesses and farms will foster clarity regarding the availability and consistency in application. The agencies also believe that this size

³⁹¹ The standards for banks to receive full credit for these loans, investments, and services are discussed further in the section-by-section analysis of final § _____.13(a). See, e.g., final § _____.13(a)(1)(i)(B)(3).

standard will allow support for a wide range of financing, including the smallest businesses. For further discussion of the definition of small business and small farm in the final rule, see final § _____.12 (“small business” and “small farm”) and accompanying section-by-section analysis.

The final rule also clarifies that “support” for intermediaries means loans, investments, or services provided to intermediaries that lend to, invest in, or provide assistance to small businesses or small farms. As noted, in response to commenter concern that the term “support” in the proposal was not clear. Examples of activities that could be considered under this category are provided in the final rule and include financial counseling, shared space, technology, or administrative assistance.

The agencies did not adopt in the final rule a specific criterion for the point in time when the size of the small business or small farm should be determined, as suggested by some commenters. However, the agencies generally believe that this determination should be based on the size of the small business or small farm at the time of the activity undertaken by the intermediary.

The agencies also decline to specify that CDFIs are considered an eligible financial intermediary under this prong. The agencies recognize that CDFIs are important financial intermediaries, but rather than list them as qualified intermediaries for multiple community development categories, the agencies have adopted in the final rule that a bank will receive community development consideration if a loan, investment, or service involves a CDFI as specified under final § _____.13(k). In addition, the final rule establishes, as an impact and responsiveness review factor, consideration of whether a loan, investment, or services supports a CDFI.³⁹²

The agencies decline to include in this prong investments in Qualified Opportunity Funds that support projects in designated Opportunity Zones.³⁹³ The agencies do not believe that such activities are specifically designed or structured to support small businesses and small farms and therefore, loans or investments in Qualified Opportunity Funds would not likely meet criteria for

³⁹² For further discussion of the final rule provisions on CDFIs, see the section-by-section analysis of final § _____.13(k) and final § _____.15(b)(4).

³⁹³ See IRS, “Opportunity Zones,” FS-2020-13 (Aug. 2020; updated Apr. 2022) (discussing both Opportunity Zones and Qualified Opportunity Funds), <https://www.irs.gov/newsroom/opportunity-zones>.

economic development. However, the activity may qualify for community development credit under other categories of community development, such as revitalization and stabilization under § _____.13(e), so long as the activity meets the criteria for the relevant community development category.

Section _____.13(c)(3) Other Support for Small Businesses and Small Farms The Agencies' Proposal

Proposed § _____.13(c)(3) would have established a third prong of the economic development category: “[p]roviding technical assistance to support businesses or farms with gross annual revenues of \$5 million or less, or providing services such as shared space, technology, or administrative assistance to such businesses or farms or to organizations that have a primary purpose of supporting such businesses or farms.” This provision would have included services such as “shared space, technology, or administrative assistance” and codified current guidance highlighting these services.³⁹⁴ The agencies proposed this provision in recognition that some small businesses and small farms might not be prepared to obtain traditional bank financing and might need technical assistance and other services, including technical assistance and services provided directly by a bank, to obtain credit in the future.

Comments Received

Commenters on proposed § _____.13(c)(3) broadly supported it. A commenter asserted that this component would fill a gap in needed services for small businesses and small farms and play a critical role in helping a small business and small farm grow and thrive. Another commenter suggested including consideration in this economic development category for financial literacy training, community-owned real estate financing, and financial products and programs for immigrant and immigrant-owned businesses.

Final Rule

For the reasons discussed below, the final rule adopts, with clarifying edits, proposed § _____.13(c)(3) to provide clarity regarding support for small

³⁹⁴ See Q&A § _____.12(g)(3)-1 (providing that loans, investments, or services are considered to “promote economic development” if they “support permanent job creation, retention, and/or improvement . . . through technical assistance or supportive services for small businesses or farms, such as shared space, technology, or administrative assistance”).

businesses and small farms that is not provided through intermediaries. Specifically, final § _____.13(c)(3) states that assistance, such as financial counseling, shared space, technology, or administrative assistance, provided to small businesses and small farms can be considered economic development. To distinguish these activities from government-related support and intermediary support, these activities are referred to as “other support for small businesses and small farms” under the final rule, and are intended to include such services that are provided directly by a bank.

The agencies made several clarifying edits to the proposal for this component in the final rule. First, the agencies removed “technical” from the rule text out of recognition that providing access to space or technology goes beyond technical assistance and that this term might be applied and understood inconsistently. Second, the agencies removed the \$5 million gross annual revenues when referring to small businesses and small farms because these terms are defined in final § _____.12 (discussed further in the section-by-section analysis of final § _____.12). Finally, the agencies removed “primary purpose” to reference the level of support to businesses or farms to be consistent with the majority standard as described in final § _____.13(a), discussed further in the section-by-section analysis of final § _____.13(a).

The agencies acknowledge commenter feedback that some small businesses and small farms may not be in a position to obtain traditional bank financing and, as such, may need assistance to obtain credit in the future. The agencies believe that providing CRA consideration for assistance that supports small businesses and small farms will afford banks with recognition for the positive role they play in facilitating small business and small farm credit access. The agencies have noted through past experience that banks can play an important role in supporting, and directly providing the types of assistance that help small businesses and small farms obtain financing, which in turn strengthens small businesses and small farms,³⁹⁵ fostering their growth and durability.

³⁹⁵ See, e.g., OCC, “Community Development Loan Funds: Partnership Opportunities for Banks,” Community Development Insights (Oct. 2014), <https://www.occ.gov/publications-and-resources/publications/community-affairs/community-developments-insights/pub-insights-oct-2014.pdf>; Financial Services Forum, “Supporting Historically Underserved Communities,” <https://fsforum.com/our-impact/supporting-underserved-communities>.

In response to a commenter’s suggestion that banks should receive consideration for providing financial literacy training, community-owned real estate financing, and financial products and programs for immigrant and immigrant-owned businesses, the agencies note that financial counseling is specified as an example of the type of assistance that could be considered under final § _____.13(c)(3). Additionally, the final rule provides that banks may receive community development consideration for other types of financial literacy programs under final § _____.13(l), discussed further in the section-by-section analysis of § _____.13(l). The other items suggested by the commenter could also be considered under the economic development category, or other community development categories, assuming that the activities meet the appropriate criteria.

Evaluation Approach Prior to Section 1071 Data Availability

The Agencies’ Proposal and Comments Received

The agencies sought feedback on whether loans made directly by banks to small businesses and small farms that are currently evaluated as community development loans should continue to be considered community development loans until these loans are assessed as reported loans under the Retail Lending Test. Most commenters who opined on this question asserted that loans to small businesses and small farms should be considered community development loans during this transition period. For example, a commenter suggested that current guidance should be used to qualify loans to small businesses and small farms under the Community Development Finance Test until loans are evaluated as reported loans under the proposed Retail Lending Test.³⁹⁶ Similarly, a few commenters suggested that loans larger than \$1 million to small businesses and small farms should be considered community development loans, as they are currently, until section 1071 data are available, and these loans are evaluated as reported loans under the proposed Retail Lending Test.³⁹⁷ A few commenters suggested that during the transition period, banks should have the option of having loans evaluated under the proposed Community Development Financing Test or under the proposed Retail Lending Test. Another commenter suggested that banks should always have the option to report small

³⁹⁶ Q&A § _____.12(g)(3)–1.

³⁹⁷ *Id.*

business loans as community development loans if the economic development criteria are met.

Other commenters expressed concern with allowing banks to receive community development credit for loans that will be considered under the Retail Lending Test once section 1071 data are available and used in CRA evaluations. A commenter suggested that a bank should not be allowed to have these loans considered as community development loans only if the majority of the bank’s examination cycle took place before the final rule was implemented. Along the same lines, a commenter expressed concern that evaluating loans to small businesses and small farms as community development activities until they are assessed as reported loans under the Retail Lending Test could allow banks to receive credit for the same activity multiple times, and suggested that the loans should count only once, unless there is some change or expansion of the activity, such as an increased loan amount or new loan payment deferment option.

Final Rule

The agencies appreciate feedback from commenters regarding whether to continue to evaluate loans to small businesses and small farms as community development loans, if such loans meet the current specified criteria, prior to the availability of section 1071 data. The agencies considered the comments, including those that suggested providing banks the option to select consideration for these loans under either the proposed Community Development Financing Test or proposed Retail Lending Test during this interim period, or continuing to evaluate the loans under current interagency guidance until the CFPB section 1071 data are available and the reported loans can be evaluated under the proposed Retail Lending Test. On further consideration of this issue, the agencies have determined that continuing with the current evaluation approach or developing an interim approach for evaluating loans to small businesses and small farms loans during the interim period between the applicability date for final § _____.13(c) and availability and use in CRA evaluations of section 1071 data is not necessary. As discussed above regarding final § _____.13(c)(1)(ii), the final rule provides consideration of certain direct loans to small businesses and small farms as community development loans. This approach would enable certain government-related direct loans to businesses and farms that meet the criteria in final § _____.13(c)(1)(ii)

considered under economic development as soon as this provision of the final rule becomes effective. The agencies believe that this approach will provide greater clarity and reduce potential confusion and complexity during the interim period rather than continuing to apply current standards for considering loans to small businesses and small farms to be community development loans.³⁹⁸ The agencies note that, except for certain loans to small businesses and small farms as explained above, most lending to small businesses and small farms will be evaluated under the Retail Lending Test, and that the definitions for small business and small farm loans are subject to the final rule's transition amendments.³⁹⁹

Regarding the concern expressed by a commenter that evaluating loans to small businesses and small farms as community development until such loans are assessed under the Retail Lending Test would allow banks to get credit for the same activity multiple times, the agencies acknowledge, as discussed above, that some loans to small businesses and small farms that meet the criteria under final § _____.13(c)(1)(ii) will be considered under both the Retail Lending Test and Community Development Financing Test. However, the agencies do not believe that this would result in double counting because the final rule provides that different aspects of such loans would be considered under the applicable test.

Workforce Development and Job Training

The current regulations do not mention workforce development and training programs in the definition of community development⁴⁰⁰ (including the economic development category of

that definition⁴⁰¹), but the Interagency Questions and Answers provide that loans, investments, and services supporting these activities for businesses and farms that meet the "size" test discussed above are considered to "promote economic development."⁴⁰² The agencies proposed to consider workforce development and job training program activities under the community supportive services category of community development and this was generally supported by commenters who opined on this issue. Therefore, the agencies are adopting workforce development and job training as proposed as a community supportive services category under final § _____.13(d). See the section-by-section analysis of community supportive services in final § _____.13(d) below for additional discussion of the comments received and final rule.

Additional Issues

The agencies received other comments related to the economic development category. A few commenters suggested adding certain types of activities to those that could be considered for CRA credit under the economic development category. For example, a commenter suggested that loan referrals made by banks to CDFIs for small business loans should qualify and also suggested that loan referrals made by banks to non-bank lenders or fintech companies that have a mission of economic development that is consistent with the goals of the CRA should also qualify as economic development; this commenter asserted that partnerships between traditional and non-traditional lenders could increase access to capital for low-income geographic areas.

A few commenters suggested that if loans to small business and small farms are considered under the proposed Retail Lending Test, loans to minority-owned small businesses should nonetheless be considered separately as a qualifying activity under the economic development category of community development. Lastly, a commenter stated that the agencies' proposal was innovative but suggested that training for nonprofit organizations could be needed, as activities that are currently considered as community development might be considered under different performance tests.

The agencies decline to add a prong to the economic development category under final § _____.13(c) to provide

specific consideration for additional types of activities, such as loan referrals made by banks to CDFIs or those made by banks to nonbank lenders, as suggested by commenters. The agencies understand from commenters that partnerships between traditional and nontraditional lenders are important because of the potential to increase capital to small businesses and small farms. As discussed further in the section-by-section analysis of final § _____.23(c), such activities may qualify for consideration under the Retail Services and Products Test as such activities may help facilitate responsive credit products and programs.⁴⁰³

Regarding commenter suggestions that loans to minority-owned small businesses should be considered separately as a qualifying activity under the economic development category of community development, the agencies note that the final rule adopts a provision that certain direct loans to small businesses and small farms, which includes direct loans made to minority-owned small businesses, will be considered under the economic development category. See the section-by-section analysis of final § _____.13(c)(1)(ii) above. Additionally, the agencies have adopted an impact factor described in final § _____.15 for activities that benefit small businesses with gross annual revenue under \$250,000, which will serve to highlight activities with smaller businesses, which would include minority-owned businesses with gross annual revenue under \$250,000. For more information and discussion regarding the agencies' consideration of comments recommending adoption of additional race- and ethnicity-related provisions in this final rule, see section III.C of this **SUPPLEMENTARY INFORMATION**.

The agencies appreciate commenter feedback regarding the potential need for examiner training as the proposed approach to the evaluation of certain activities that would currently be considered only under community development may be considered under a different test or multiple tests. The agencies will take this feedback under advisement as the agencies develop implementation plans.

Section _____.13(d) Community Supportive Services Current Approach

The CRA regulations currently define community development to include "community services targeted to low- or

³⁹⁸ For a discussion of the final rule's incorporation of loans to small businesses and small farms into the economic development category of community development, see the section-by-section analysis of final § _____.13(c)(1)(ii). For a discussion of the final rule's consideration of small business and small farm lending under the Retail Lending Test, see the section-by-section analysis of final § _____.22(d).

³⁹⁹ The final rule's transition amendments will amend the definitions of "small business" and "small farm" to instead cross-reference to the definition of "small business" in the CFPB section 1071 regulation. This will allow the CRA regulatory definitions to adjust if the CFPB increases the threshold in the CFPB section 1071 regulatory definition of "small business." This is consistent with the agencies' intent articulated in the preamble to the proposal and elsewhere in this final rule to conform these definitions with the definition in the CFPB section 1071 regulation. The agencies will provide the effective date of these amendments in the **Federal Register** once section 1071 data are available.

⁴⁰⁰ See 12 CFR _____.12(g).

⁴⁰¹ See 12 CFR _____.12(g)(3).

⁴⁰² See Q&A § _____.12(g)(3)-1.

⁴⁰³ See final § _____.23 and the accompanying section-by-section analysis.

moderate-income individuals,”⁴⁰⁴ but the regulations do not further define community services. The Interagency Questions and Answers provide several examples of community services and characteristics of those services to assist institutions in determining whether the service is “targeted to low- or moderate-income individuals.”⁴⁰⁵ Interagency guidance also clarifies that “investments, grants, deposits, or shares in or to . . . [facilities that . . . provid[e] community services for low- and moderate-income individuals, such as youth programs, homecare centers, soup kitchens, health care facilities, battered women’s shelters, and alcohol and drug recovery centers” are considered community development investments eligible for CRA credit.⁴⁰⁶

The Agencies’ Proposal

In proposed § _____.13(d), the agencies replaced the current community development category of “community services targeted to low- or moderate-income individuals” with “community supportive services.”⁴⁰⁷ Specifically, incorporating and building on aspects of current guidance noted above, proposed § _____.13(d) defined community supportive services as “general welfare services that serve or assist low- or moderate-income individuals, including, but not limited to, childcare, education, workforce development and job training programs, and health services and housing services programs.”

The agencies proposed to consider workforce development and job training program activities under the community supportive services category of community development, rather than under economic development (where workforce development and job training programs are generally considered today). Existing guidance regarding economic development generally limits what can be considered an economic development activity (including workforce development and job training) to support for small businesses meeting certain size standards.⁴⁰⁸ Under the proposal to consider these activities under the reconfigured “community

supportive services” category, activities that support workforce development and job training programs would receive consideration if the program’s participants are low- or moderate-income individuals, without regard to the size of any business associated with the activity.⁴⁰⁹

The agencies also proposed to build on current guidance by both clarifying and expanding upon a non-exclusive list of examples of community services and characteristics of those services that banks can use to demonstrate that a program or organization primarily serves low- or moderate income individuals. Seven of the eight examples in proposed § _____.13(d) reflected current guidance with certain technical edits, as follows:

- Activities conducted with a nonprofit organization that has a defined mission or purpose of serving low- or moderate-income individuals or is limited to offering community supportive services exclusively to low- or moderate-income individuals (proposed § _____.13(d)(1));
- Activities conducted with a nonprofit organization located in and serving low- or moderate-income census tracts (proposed § _____.13(d)(2));
- Activities conducted in low- or moderate-income census tracts and targeted to the residents of the census tract (proposed § _____.13(d)(3));
- Activities offered to individuals at a workplace where the majority of employees are low- or moderate-income, based on readily available U.S. Bureau of Labor Statistics data for the average wage for workers in that particular occupation or industry (proposed § _____.13(d)(4));
- Services provided to students or their families through a school at which the majority of students qualify for free or reduced-price meals under the USDA’s National School Lunch Program (proposed § _____.13(d)(5));
- Services that have a primary purpose of benefiting or serving individuals who receive or are eligible to receive Medicaid (proposed § _____.13(d)(6)); and
- Activities that benefit or serve recipients of government assistance plans, programs, or initiatives that have income qualifications equivalent to, or stricter than, the definitions of low- and moderate-income (as defined in the proposed rule). Examples include, but are not limited to, HUD’s section 8, 202, 515, and 811 programs or the USDA’s section 514, 516, and Supplemental

Nutrition Assistance programs (proposed § _____.13(d)(8)).⁴¹⁰

The agencies also proposed an additional example not reflected in current guidance: activities that benefit or serve individuals who receive or are eligible to receive Federal Supplemental Security Income, Social Security Disability Insurance, or support through other Federal disability assistance programs.⁴¹¹ This proposed example reflected a suggested additional example raised in the Board CRA ANPR that received wide stakeholder support.⁴¹²

Comments Received

The agencies received comments on the community supportive services proposal from many different commenter types, raising a wide range of issues. Most of these commenters generally supported the agencies’ proposal. A few commenters, for example, expressed that the community development services proposal would elevate the importance of community services and provide more clarity about what types of activities are included. In contrast, a commenter that disagreed with the proposal stated that the proposal would create unnecessary confusion and complexity and limit flexibility. This commenter expressed the view that the current community services definition should be retained, asserting that it better allows banks to tailor the provision of services to the specific needs of each community.

Regarding the general definition of community supportive services in proposed § _____.13(d), many commenters expressed their support for including “health” or “healthcare services.” Several commenters also expressed support for the proposal to include workforce development and job training as community supportive services. A few of these commenters noted that doing so could allow banks to receive credit for supporting activities in connection with a wider range of businesses than under the current CRA framework.

Commenters also shared views on the list of examples in proposed § _____.13(d)(1) through (8). For example, a commenter that expressed support for the proposal to include “[a]ctivities conducted with a nonprofit organization located in and serving low- or moderate-income census tracts,”⁴¹³ noted that these types of organizations often serve the community in which they are

⁴⁰⁴ See 12 CFR _____.12(g)(2).

⁴⁰⁵ See Q&A § _____.12(g)(2)–1.

⁴⁰⁶ Q&A § _____.12(t)–1.

⁴⁰⁷ The proposed term “community supportive services” encompassed different activities than those proposed under the concept of “community development services,” which is described further in the section-by-section analysis of § _____.25(d) (proposed Community Development Services Test), below, and generally refers to volunteer service hours that meet any one of the community development purposes in final § _____.13.

⁴⁰⁸ See proposed § _____.13(d); compare with 12 CFR _____.12(g)(3) and Q&A § _____.12(g)(3)–1.

⁴¹³ Proposed § _____.13(d)(2).

located. With respect to proposed § ____.13(d)(7), regarding activities that benefit or serve individuals who receive or are eligible to receive Federal disability assistance, many civil rights and consumer advocacy groups for individuals with disabilities requested that the agencies also explicitly include vocational rehabilitation services and Medicaid-waiver funded home and community-based services. One commenter stated that, as not all individuals with disabilities receive Federal benefits, the agencies should consider including other activities that support individuals with disabilities, such as a loan to upgrade equipment in a public library to accommodate low- and moderate-income disabled individual patrons.

Commenters also encouraged the agencies to add a variety of examples to the list in § ____.13(d)(1) through (8). For instance, a few commenters suggested adding activities that promote digital inclusion or digital literacy, indicating that those activities can improve access to important community services. Additional examples suggested included, among others: food access and sustainability projects; activities that house the homeless; higher education career courses or programming; activities that support service members, veterans, and their families; and activities that support consumers with limited English proficiency.

Final Rule

As discussed in more detail below, the final rule revises the general definition of “community supportive services” in proposed § ____.13(d) to provide greater clarity about the meaning of this community development category. The final rule also adopts the non-exhaustive list of examples in § ____.13(d)(1) through (8) generally as proposed, with certain technical revisions.

Specifically, the final rule defines “community supportive services” as activities that assist, benefit, or contribute to the health, stability, or well-being of low- or moderate-income individuals, such as childcare, education, workforce development and job training programs, health services programs, and housing services programs. The definition in proposed § ____.13(d) is thus revised by replacing the phrase “general welfare activities that serve or assist low- or moderate-income individuals” with “activities that assist, benefit, or contribute to the health, stability, or well-being of low- or moderate-income individuals.” As noted in the proposal, the agencies believe that adopting a community

supportive services category that revises the existing “community services” category and associated guidance will provide clearer standards in the regulation for identifying the kind of activities that qualify as community development. Upon further consideration and in light of comments received, the agencies are concerned about potential confusion as to what constitutes “general welfare activities” in the proposed provision. The final rule’s revised language focusing on the “health, stability, or well-being” of low- or moderate-income individuals is intended to better achieve the agencies’ goal of providing clarity in outlining the kinds of activities that are eligible for consideration under this category, accounting for the types of benefits and services that many commenters highlighted.

The agencies are adopting as proposed the community supportive services listed in the proposed general definition—childcare, education, workforce development and job training programs, health services programs, and housing services programs; these are intended to be illustrative of the kinds of services that can meet the criterion of assisting, benefiting, or contributing to the health, stability, or well-being of low- or moderate-income individuals and, as noted above, were generally supported by commenters. As also discussed above, considering workforce development and job training activities under the community supportive services category of community development clarifies that bank support for workforce development and job training, whose participants are low- or moderate-income individuals, is eligible for CRA consideration, regardless of the size of the businesses that may be associated with those activities.

The final rule also adopts the non-exclusive list of examples of community supportive services in § ____.13(d)(1) through (8), generally as proposed, with certain revisions as follows:

- Proposed § ____.13(d)(1) is revised to refer to activities that are “conducted with a mission-driven nonprofit organization.” This change in final § ____.13(d)(1) reflects that the final rule adopts a new definition of “mission-driven nonprofit organization” in § ____.12, in order to support the term’s use across multiple provisions in § ____.13. As noted in the section-by-section analysis of § ____.12 above, the final definition is intended to be consistent with the types of organizations that the agencies proposed would be partners with banks in conducting community development.

- Proposed § ____.13(d)(2) through (5) are adopted generally as proposed, with non-substantive technical edits to align the regulatory text structure.

- Proposed § ____.13(d)(6), referencing activities that “*have a primary purpose of benefiting or serving individuals* who receive or are eligible to receive Medicaid” (emphasis added) is revised to reference activities that “*Primarily benefit or serve individuals* who receive or are eligible to receive Medicaid” (emphasis added), with no substantive change intended. This revision is a conforming change consistent with proposed § ____.13(a) that eliminates proposed references to the phrase “primary purpose of community development,” as discussed in the section-by-section analysis of § ____.13(a).

- Proposed § ____.13(d)(7) and (8) are revised to add the term “primarily,” so that, as adopted, they refer to activities that “*Primarily benefit or serve individuals* who receive or are eligible to receive” Federal disability assistance (final § ____.13(d)(7)) and “*Primarily benefit or serve recipients of government assistance plans, programs, or initiatives . . .*” (final § ____.13(d)(8)). This addition is intended to provide consistency with the language in final § ____.13(d)(6) described above, and to align with the agencies’ intent to provide examples of activities that are specifically focused on benefiting or serving the individuals described in these examples.

As discussed above, the examples in § ____.13(d)(1) through (6) and (8) are adapted from existing guidance to promote clarity and consistency regarding the types of services that could be considered to be targeted to low- or moderate-income individuals. The agencies believe that the adopted examples will facilitate banks’ ability to document and demonstrate that a program or organization assists, benefits, or contributes to the health, stability, or well-being of low- or moderate-income individuals as set forth in § ____.13(d). For example, with respect to § ____.13(d)(2), the agencies believe that qualified activities performed in conjunction with “a nonprofit organization located in and serving low- or moderate-income census tracts” are likely to assist, benefit, or contribute to the health, stability, or well-being of low- or moderate-income individuals due to the geographic location and service-orientation of the nonprofit organization on low- or moderate-income census tracts. Accordingly, the agencies believe that this example will facilitate banks’ identification of qualified community

supportive services and opportunities to serve needs in their communities.⁴¹⁴

In adopting the example in proposed § _____.13(d)(7), related to activities for individuals receiving or eligible to receive Federal disability assistance, the agencies understand that many disability programs are means-tested, and that research has found that households that include any working-age people with disabilities are more likely to have substantially lower incomes than those without any disabilities.⁴¹⁵ Accordingly, the agencies believe that the example in § _____.13(d)(7) will serve as another key proxy for activities that assist, benefit, or contribute to the health, stability, or well-being of low- or moderate-income individuals, and will facilitate banks' ability to identify clear and consistent examples of community supportive services.

The agencies also considered and appreciate additional examples of community supportive services offered by commenters, including additional suggestions noted above to supplement § _____.13(d)(7) regarding other activities that benefit or serve individuals with disabilities. As discussed above, the list of examples in § _____.13(d)(1) through (8) is non-exclusive. The agencies believe that the list of examples adopted in the final rule address a wide range of qualified community supportive services and do not believe that it would be possible or practicable to capture every kind of community supportive service in the regulation. The agencies note that, to the extent that any other activity meets the general definition set forth in § _____.13(d), it would be considered a community supportive service. While the agencies are not adding mention of specific additional community supportive services activities to the final rule, the agencies will take commenters' recommended examples under advisement as the agencies develop the illustrative list anticipated by § _____.14(a).

⁴¹⁴ Final § _____.13(d)(2) is distinguishable from final § _____.13(d)(1). Section _____.13(d)(1) references the narrower defined term of mission-driven nonprofit organizations, but is not geographically focused; while § _____.13(d)(2) references nonprofit organizations more broadly, but is focused on particular census tracts. Both examples are intended to facilitate banks' ability to identify and document that an activity is a qualified community supportive service.

⁴¹⁵ See, e.g., William Erickson, Camille Lee, and Sarah von Schrader, "2021 Disability Status Report: United States," Cornell University Yang-Tan Institute on Employment and Disability, 40 (2023), <https://www.disabilitystatistics.org/report/pdf/2021/2000000>.

Section _____.13(e) Through (j) Place-Based Community Development

Current Approach

The current regulation defines "community development" to include "activities that revitalize or stabilize" the following four types of geographic areas:

- Low- or moderate-income census tracts;
- Designated disaster areas;
- Distressed nonmetropolitan middle-income census tracts; and
- Underserved nonmetropolitan middle-income census tracts.⁴¹⁶

The Interagency Questions and Answers further elaborate on revitalization and stabilization activities in these geographic areas.⁴¹⁷ With respect to low- and moderate-income census tracts, designated disaster areas, and distressed nonmetropolitan middle-income census tracts, current guidance states that revitalization and stabilization activities are those that help to "attract new, or retain existing, businesses or residents" in that geographic area.⁴¹⁸ Current guidance for the same three targeted geographic areas also states that an activity will be presumed to revitalize or stabilize a geographic area if the activity is consistent with a government plan for the revitalization or stabilization of the area.⁴¹⁹

⁴¹⁶ 12 CFR _____.12(g)(4). The current regulation provides that distressed or underserved nonmetropolitan middle-income census tracts are "designated by [the Board, FDIC, and OCC] based on—(A) Rates of poverty, unemployment, and population loss; or (B) Population size, density, and dispersion." 12 CFR _____.12(g)(4)(iii). The regulation further provides that "[a]ctivities revitalize and stabilize [census tracts] designated based on population size, density, and dispersion if they help to meet essential community needs, including needs of low- and moderate-income individuals." *Id.*

⁴¹⁷ See Q&A § _____.12(g)(4)(i)–1 (regarding low- or moderate-income census tracts), Q&A § _____.12(g)(4)(ii)–2 (regarding designated disaster areas), Q&A § _____.12(g)(4)(iii)–3 (regarding distressed nonmetropolitan middle-income census tracts), and Q&A § _____.12(g)(4)(iii)–4 (regarding underserved nonmetropolitan middle-income census tracts). Activities considered to revitalize and stabilize a designated disaster area must also be "related to disaster recovery." See Q&A § _____.12(g)(4)(ii)–2.

⁴¹⁸ See Q&A § _____.12(g)(4)(i)–1 (regarding low- or moderate-income geographies), Q&A § _____.12(g)(4)(ii)–2 (regarding designated disaster areas), and Q&A § _____.12(g)(4)(iii)–3 (regarding distressed nonmetropolitan middle-income census tracts). The "attract new or retain existing businesses or residents" language is not in the guidance on revitalization and stabilization activities for underserved nonmetropolitan middle-income census tracts. See Q&A § _____.12(g)(4)(iii)–4.

⁴¹⁹ See Q&A § _____.12(g)(4)(i)–1 (regarding low- or moderate-income census tracts), Q&A § _____.12(g)(4)(ii)–2 (regarding designated disaster areas), and Q&A § _____.12(g)(4)(iii)–3 (regarding

Further, in designated disaster areas and distressed nonmetropolitan middle-income census tracts, current guidance specifies that examiners will consider all activities that revitalize or stabilize a census tract but give greater weight to those activities that are most responsive to community needs, including the needs of low- or moderate-income individuals or neighborhoods.⁴²⁰ In determining whether an activity revitalizes or stabilizes a low- or moderate-income census tract, in the absence of a Federal, State, local, or tribal government plan, guidance instructs examiners to evaluate activities based on the actual impact on the census tract, if that information is available.⁴²¹ If not, examiners will determine whether the activity is consistent with the community's formal or informal plans for the revitalization and stabilization of the low- or moderate-income census tract.⁴²²

Regarding underserved nonmetropolitan middle-income census tracts, current guidance focuses on clarifying the regulatory provision stating that activities in census tracts designated by the agencies as underserved based on "population size, density, and dispersion" are considered to be revitalization and stabilization activities "if they help to meet essential community needs, including needs of low- and moderate-income individuals."⁴²³ To this end, the Interagency Questions and Answers state that activities such as "financing for the construction, expansion, improvement, maintenance, or operation of essential infrastructure or facilities for health services, education, public safety, public services, industrial parks, affordable housing, or communication services" in underserved nonmetropolitan middle-income census tracts will be evaluated to determine whether they meet essential community needs.⁴²⁴ The guidance also provides several examples of projects that may be considered to meet essential community needs, such as hospitals, industrial parks, rehabilitated sewer lines, mixed-income housing, and renovated schools—as long as the population served includes

distressed nonmetropolitan middle-income census tracts).

⁴²⁰ See Q&A § _____.12(g)(4)(ii)–2 (regarding designated disaster areas) and Q&A § _____.12(g)(4)(iii)–3 (regarding distressed nonmetropolitan middle-income census tracts).

⁴²¹ See Q&A § _____.12(g)(4)(i)–1.

⁴²² See *id.*

⁴²³ 12 CFR _____.12(g)(4)(iii)(B).

⁴²⁴ Q&A § _____.12(g)(4)(iii)–4.

low- and moderate-income individuals.⁴²⁵

Overview of the Proposal

The agencies' proposal replaced the current revitalization and stabilization activities component of the community development definition with six separate categories of activities:

- Revitalization activities undertaken in conjunction with a government plan, program, or initiative;⁴²⁶
- Essential community facilities activities;⁴²⁷
- Essential community infrastructure activities;⁴²⁸
- Recovery activities in designated disaster areas;⁴²⁹
- Disaster preparedness and climate resiliency activities;⁴³⁰ and
- Qualifying activities in Native Land Areas.⁴³¹

Each of the proposed categories included requirements to benefit residents of targeted geographic areas, as discussed in more detail below, and thus are referred to as "place-based categories" (and the activities defined within the categories as "place-based activities") throughout this **SUPPLEMENTARY INFORMATION**. Each of the proposed place-based categories also generally shared three other common required eligibility criteria (with adjustments specific to certain categories). Specifically, relevant activities must:

- Benefit or serve residents of the targeted geographic area, including low- or moderate-income individuals;
- Not displace or exclude low- or moderate-income individuals; and
- Be conducted in conjunction with a Federal, State, local, or tribal government plan, program, or initiative that includes an explicit focus on benefiting or serving the targeted geographic area.

These criteria are generally referred to as "place-based criteria" throughout this **SUPPLEMENTARY INFORMATION**. By refining and further clarifying the current regulation and guidance regarding the revitalization and stabilization category of community development, the agencies intended to provide greater certainty about what activities are considered to revitalize and stabilize communities, and thus be considered community development.

This section-by-section analysis first discusses the three place-based criteria

noted above, including general comments received and general revisions made in the final rule. An analysis of each of the six place-based community development categories follows, under which specific final place-based criteria provisions and revisions are discussed. As will be discussed below, the final rule generally retains the three common place-based criteria proposed for each of the six place-based categories, with some modifications. The analysis of the place-based criteria below generally follows the order of the proposal; as discussed under the analysis of each of the specific place-based categories, the final rule reorganizes the common place-based criteria to establish a consistent parallel structure across the categories.

Benefits or Serves Residents, Including Low- or Moderate-Income Individuals, of Targeted Geographic Areas

The Agencies' Proposal

Across all place-based categories, the agencies proposed that activities supported by a bank's loans, investments, or services would be considered community development only in relation to particular geographic areas. Specifically, revitalization activities in conjunction with a government plan, program or initiative, essential infrastructure activities, essential community facilities activities, and disaster preparedness and climate resiliency activities would be community development under the proposal if they benefited or served residents, including low- or moderate-income residents, of one or more "targeted census tracts," defined in proposed § ____.12 to mean low- or moderate-income census tracts and distressed or underserved nonmetropolitan middle-income census tracts.⁴³² Similarly, essential community facilities, essential infrastructure, and disaster preparedness and climate resiliency activities would also be required to be "conducted in" targeted census tracts.⁴³³

Under the proposal, recovery activities in designated disaster areas qualified in census tracts of all income

levels, provided that the activities benefited or served residents, including low- or moderate-income residents, in an area subject to a Federal Major Disaster Declaration (excluding Major Disaster Categories A and B).⁴³⁴ Activities in Native Land Areas would qualify as community development if they were "specifically targeted to and conducted in Native Land Areas" and "benefited residents of Native Land Areas, including low- or moderate-income residents."⁴³⁵

The agencies also proposed requirements regarding the beneficiaries of place-based activities—specifically, that they benefit or serve residents of the relevant targeted geographic area, including low- or moderate-income residents. The express inclusion of "low- or moderate-income residents" incorporated an emphasis on benefits for low- and moderate-income individuals reflected in the current regulation and guidance on revitalization and stabilization activities, as well as the CRA statute.⁴³⁶ The agencies sought feedback on how place-based activities can focus on benefiting residents in targeted census tracts and ensure that the activities benefit low- or moderate-income residents.

Comments Received

Commenters offered various views on how to focus place-based activities on benefiting residents in targeted geographic areas, and how to ensure that the activities benefit low- or moderate-income residents. Comments specific to whether activities should be directly conducted in targeted geographic areas are generally discussed under the section-by-section analyses for the respective place-based categories, where applicable. Several commenters suggested that the agencies adopt quantitative measures for evaluating benefits, such as requiring a majority of the beneficiaries to be low- or moderate-income in the targeted geographic area, or requiring a majority of beneficiaries to be low- or moderate-income minorities. Some commenters recommended that data on benefits to low- and moderate-income residents

⁴³⁴ See proposed § ____.13(h)(1).

⁴³⁵ See proposed § ____.13(l). The definition of "Native Land Area" is discussed further in the section-by-section analysis of § ____.12.

⁴²⁷ See proposed § ____.13(f).

⁴²⁸ See proposed § ____.13(g).

⁴²⁹ See proposed § ____.13(h).

⁴³⁰ See proposed § ____.13(i).

⁴³¹ See proposed § ____.13(k).

⁴³² See proposed § ____.13(e) (revitalization activities), (f) (essential community facilities activities), (g) (essential community infrastructure activities), and (i) (disaster preparedness and climate resiliency activities). For further discussion of the definition of "targeted census tract," see the section-by-section analysis of § ____.12 ("targeted census tract").

⁴³³ See proposed § ____.13(f) (essential community facilities activities), (g) (essential community infrastructure activities), and (i) (disaster preparedness and climate resiliency activities).

should be part of community development data submissions, such as documentation regarding the number and percent of low- and moderate-income persons in the census tract(s) of the target area and a narrative explaining how the activity would benefit them, or other evidence of community benefit such as job creation, living wages, fair lease payments, or sound land-use planning practices. In contrast, a commenter suggested that the agencies also allow for consideration of activities where benefits to low- or moderate-income individuals are not readily quantifiable, but otherwise demonstrable. This commenter cautioned that “means testing” would complicate community development financing and might not be possible, potentially discouraging bank investment, but suggested that projects located in low- and moderate-income or distressed census tracts were likely to serve residents of those tracts and others in the area.

Some commenters suggested requiring community input to demonstrate that activities benefit residents, including low- or moderate-income residents, of targeted census tracts. For instance, commenters recommended that banks document (and the agencies consider) public feedback provided by community groups; public attestations; or community benefit agreements (CBAs). Several commenters recommended that examiners use their judgment to determine whether qualifying activities benefit low- and moderate-income residents, indicating, for example, that different types of activities will warrant different types of evidence to demonstrate benefit to low- and moderate-income residents. Other commenters suggested that a statement from a bank’s public or nonprofit organization partners could provide evidence of a place-based activity’s impact on low- and moderate-income communities.

Final Rule

The final rule generally retains the three common place-based criteria proposed for each of the six place-based categories, with some modifications. Generally applicable language and revisions are addressed here, with category-specific language described under each category below in this section-by-section analysis.

Consistent with the proposal, each of the final place-based categories adopts a specific focus on targeted geographic areas, discussed in each of the section-by-section analyses of the place-based categories below. Under the final rule,

the geographic area focus for each category is as follows:

- For revitalization or stabilization (§ ____ .13(e)), essential community facilities (§ ____ .13(f)), essential community infrastructure (§ ____ .13(g)), and disaster preparedness and weather resiliency (§ ____ .13(i)): “targeted census tracts.” Consistent with the proposal, targeted census tracts are defined in final § ____ .12 as low- and moderate-income census tracts, as well as distressed or underserved nonmetropolitan middle-income census tracts;
- For recovery of designated disaster areas (§ ____ .13(h)): “areas subject to a Federal Major Disaster Declaration, excluding Major Disaster Categories A and B”; and
- For qualified activities in Native Land Areas (§ ____ .13(j)): “residents of Native Land Areas.”⁴³⁷

For each place-based category, the final rule also adopts substantially as proposed the place-based criterion that activities benefit or serve residents, including low- or moderate-income individuals, in the targeted geographic areas, including the proposed criterion that revitalization activities in Native Land Areas must have “substantial benefits for low- and moderate-income residents.”⁴³⁸ The final rule revises the proposed language of this criterion, with no substantive change intended, to reference “low- or moderate-income individuals” rather than “low- or moderate-income residents,” which aligns with usage of the word “individuals” in the definitions of low-income and moderate-income in final § ____ .12 and is generally consistent with usage of the term “low- or moderate-income individuals” throughout the rule. As discussed in the proposal, this criterion establishes a consistent expectation that residents in the relevant targeted geographic areas will benefit from the qualifying activity and that the residents benefiting from the activity will include low- and moderate-income individuals. To further the purposes of CRA, the agencies believe it important that loans, investments, and services considered in a bank’s community development performance evaluation support place-based activities that provide direct benefit to the people living in targeted geographic areas rather than solely

supporting redevelopment these geographic areas more generally. Together with the other common place-based criteria discussed in more detail below, the agencies believe that this criterion will ensure a strong connection between activities and community needs.

The agencies have considered, but are not adopting, additional quantitative standards or criteria in final § ____ .13(e) through (j), including a requirement that a majority of the beneficiaries of a qualifying activity in the proposed (and final) targeted geographic areas be low- or moderate-income individuals, minorities, or other underserved individuals. The agencies understand and appreciate the concerns giving rise to commenter suggestions for more precisely defining qualifying community development activities to focus on these individuals and communities. For this reason, as noted in the proposal, the agencies also considered a criterion that place-based activities benefit or serve solely low- or moderate-income individuals.

On further consideration, however, the agencies believe that the final criterion (“benefits or serves residents, including low- or moderate-income residents”⁴³⁹) is appropriately adaptable, providing needed flexibility to address the wide range of community development needs that may exist in the areas targeted in the proposed and final rule’s place-based community development categories. Rather than adding quantitative limitations or other parameters to this proposed criterion, the agencies intend, in adopting this criterion generally as proposed, to maintain flexibility for activities to meet multiple types of community needs in the areas targeted by place-based activities—while also requiring the inclusion of low- or moderate-income individuals as beneficiaries. This flexibility remains particularly important in distressed and underserved nonmetropolitan middle-income census tracts, which can have fewer low- or moderate-income residents. The agencies further believe that this criterion, as adopted, is consistent with the CRA statute, which is focused on meeting the credit needs of an entire community, including low- and moderate-income needs.⁴⁴⁰ In addition,

⁴³⁷ The term “Native Land Area” is separately defined in section § ____ .12 and discussed in detail in the accompanying section-by-section analysis.

⁴³⁸ See proposed § ____ .13(l)(1)(i)(A) (“revitalization activities in Native Land Areas”) and final § ____ .13(j)(2)(ii) (revised to refer to “revitalization or stabilization activities in Native Land Areas”).

⁴³⁹ The final rule adopts different language for revitalization or stabilization activities in Native Land Areas, which must benefit or serve residents of Native Land Areas, “with substantial benefits for low- or moderate-income individuals” (emphasis added). See final § ____ .13(j)(2)(ii), discussed in the section-by-section analysis of § ____ .13(j).

⁴⁴⁰ See 12 U.S.C. 2903(a) and 2906(a)(1).

the agencies note that, under the majority standard discussed in the section-by-section analysis of § _____.13(a), loans, investments, or services supporting place-based community development may receive community development consideration only if the majority of the beneficiaries are, or the majority of the dollars benefit or serve, residents of the targeted geographic areas.⁴⁴¹

The agencies are also not adopting additional criteria, recommended by some commenters, for demonstrating and evaluating the benefits of place-based activities, such as through suggested data points or requiring community input. On further deliberation, the agencies are concerned that requiring specific ways of demonstrating benefits to residents could add complexity and burden, potentially dissuading banks from supporting place-based activities. The agencies further believe that maintaining some flexibility in the regulation is necessary to accommodate varying community needs and relationships that banks have with communities. At the same time, the agencies recognize that data and community input could be helpful in demonstrating and evaluating benefits of activities to residents of targeted geographic areas, including low- and moderate-income individuals; the final rule does not preclude banks and examiners from using an array of useful information in this regard.

As was noted by commenters, examiner judgment will continue to have a role in agency determinations regarding whether activities benefit residents of targeted geographic areas, including low- or moderate-income individuals. However, by adopting the criterion requiring activities to benefit or serve residents, including low- or moderate-income individuals, in combination with other place-based criteria, the agencies intend to clarify expectations and to promote consistency in application across place-based categories of community development.

Prohibits Displacement or Exclusion of Low- or Moderate-Income Individuals The Agencies' Proposal

The agencies proposed that eligible place-based activities could not lead to the displacement or exclusion of low- or moderate-income residents in relevant geographic areas.⁴⁴² For example, the

proposal noted that, if a project to build commercial development to revitalize an area involved demolishing housing occupied by low- or moderate-income individuals, then the project would not meet this criterion and loans, investments, or services supporting it would be ineligible for CRA credit. In proposing this criterion, the agencies sought to ensure that qualifying activities do not have a detrimental effect on low- or moderate-income individuals or communities or on other underserved communities. The agencies sought feedback on how considerations about whether an activity would displace or exclude low- or moderate-income residents should be reflected in the rule.

Comments Received

Most commenters supported requiring that qualifying place-based activities not displace or exclude low- and moderate-income residents. Many of these commenters asserted that the anti-displacement and anti-exclusion criterion should be extended to other categories of community development, with a number of commenters advocating for an extension of the criterion to the proposed category for affordable housing under proposed § _____.13(b), including the naturally occurring affordable housing prong in proposed § _____.13(b)(2).⁴⁴³

A variety of commenters asserted that the criterion should be strengthened, and offered suggestions for demonstrating or measuring non-displacement and non-exclusion for activities supported by a bank's loans, investments, or services. Suggestions included, for example, that a bank:

- Demonstrate compliance with tenant protections, local health and habitability codes, civil rights and other relevant laws;
- Conduct due diligence to determine whether a project involves any concerns relating to eviction, harassment, complaints, rent increases, or habitability violations;
- Demonstrate that projects did not reduce affordable housing units or displace small businesses or farms;
- Evidence support for resident retention through lending in low- and moderate-income communities or minority communities to ensure non-displacement of those communities; or
- Provide attestations from public sector or nonprofit partners that displacement did not occur, or require

other documentation of the community engagement process.

Other commenters focused on gentrification concerns more expressly. For example, commenters recommended that the agencies: (1) consider whether an activity would promote gentrification and displacement of existing low- and moderate-income residents through increased rents.; (2) recognize both physical displacement, such as in the proposal's example of affordable housing being demolished to create housing serving higher-income households, and more general displacement from inflationary pressures caused by rapid growth or gentrification; and (3) closely evaluate the demographics of financial institutions' financing practices in relation to gentrification. Other commenters indicated that impact on minorities within identified census tracts should be accounted for, or that the agencies should expand CRA discrimination downgrade criteria to include incidents of displacement of, or harm to, low- and moderate-income communities and/or minorities.

Some commenters supported the goal of preventing displacement but suggested that the proposed criterion was too broad and thus might inadvertently disqualify activities that would otherwise align with community development goals. Accordingly, some commenters recommended that the criterion be revised to, for instance: (1) allow for activities that result in displacement, if mitigation of displacement is incorporated into the project, such as voluntary agreements that provide for compensation, alternative housing in or near the relevant community, or other similar benefits to displaced residents; (2) provide other carve-outs from the criterion, such as for temporary relocations or limited displacement; or (3) include only involuntary or forced displacement, to permit, for example, voluntary relocation from climate-impacted areas.

Other commenters opposed the proposal to include an anti-displacement or anti-exclusion criterion as part of place-based community development activities, with some explicitly opposed to a criterion disallowing exclusion of low- and moderate-income individuals. Some of these commenters expressed concern about an undefined, overbroad, or subjective standard, with some suggesting that the proposed criterion would be difficult to demonstrate and for examiners to evaluate. A commenter suggested that meeting this criterion

⁴⁴¹ See final § _____.13(a)(1)(i)(B)(4) through (6).

⁴⁴² See proposed § _____.13(e)(2) (revitalization), (f)(2) (essential community facilities), (g)(2) (essential community infrastructure), (h)(2)

(recovery in designated disaster areas), proposed (i)(2) (disaster preparedness and climate resiliency), and (l)(1)(i)(B) and (l)(2)(i) (Native Land Areas).

⁴⁴³ See proposed § _____.13(b), discussed above.

would be especially difficult in advance of, or shortly after the completion of, the activity, and indicated that banks might not be able to predict or control the long-term effects of projects. This commenter asserted that the proposal would add inconsistency and uncertainty to CRA evaluations and potentially chill beneficial community development projects in low- or moderate-income communities.

Several commenters suggested that the agencies omit the displacement and exclusion prohibition and instead weigh the overall impact of activities on targeted census tracts (and other relevant geographic areas, as applicable). For example, commenters suggested that activities could have larger community benefits even if some displacement results, such as a commercial mixed-use project that results in some displacement of low- and moderate-income residents but includes housing for low- and moderate-income residents. A commenter also suggested that the proposed anti-displacement criterion was inconsistent with the criterion that a project be “in conjunction with” a government plan, indicating that government revitalization plans sometimes involve the removal of apartment buildings that have sub-standard units.

Final Rule

In the final rule, the agencies are adopting a revised version of the proposal to include a place-based criterion that activities may not “directly result in the forced or involuntary relocation of low- or moderate-income individuals” in the targeted geographic areas. This criterion is designed to ensure that qualifying activities do not have a direct detrimental effect on low- or moderate-income individuals or communities in the relevant targeted geographic areas. The agencies believe that qualifying place-based community development activities that deny such populations the benefits of those activities through forced or involuntary relocation out of the targeted geographic area would be inconsistent with the purpose of the CRA to encourage banks to help serve the credit needs of their communities, including low- or moderate-income populations.

The agencies have considered and are persuaded by comments that refinements to the proposed criterion are appropriate so as not to disqualify responsive community development activities that align with the purpose of the CRA. In particular, the agencies have considered concerns raised by some commenters based on their view

of the breadth of the proposed standard. The agencies recognize, for example, that otherwise qualifying disaster recovery or disaster preparedness activities with widespread benefits for a community could involve voluntary relocation residents due to environmental conditions such as an increased risk of significant flooding. Therefore, the agencies have revised the proposal to focus the final rule’s criterion on prohibiting activities that would result in the forced or involuntary physical displacement of low- or moderate-income individuals as a direct result of the activity.

The final rule’s criterion on displacement does not include the proposal’s specific prohibition on “exclud[ing]” low- and moderate-income residents. As noted above, the final rule includes a criterion that place-based activities must benefit or serve residents of a targeted geographic area, including low- or moderate-income individuals (with revitalization or stabilization activities in Native Land Areas requiring “substantial benefits for low- or moderate-income individuals”⁴⁴⁴). Given that the requirement to benefit or serve a targeted geographic area must include low- or moderate-income individuals (and therefore cannot exclude those individuals), on further consideration, the agencies believe that the exclusion language is redundant. However, the agencies do not intend a substantive change relative to the proposal. Thus, if low- or moderate-income individuals were not able to access or benefit from an activity, then the activity would not include low- or moderate-income individuals and therefore would not qualify as community development under the final rule.

Under the final rule, “forced or involuntary relocation” could encompass both overt activities such as demolishing a building, as well as actions directly resulting in conditions for remaining in place being infeasible or undesirable, such as uninhabitable conditions. Accordingly, under the final rule, a project that involves demolishing a multifamily building in which low- or moderate-income individuals reside, thereby forcibly removing residents, would not qualify as community development under the place-based categories. In contrast, projects involving relocation of individuals could conceivably qualify as community development where residents agree to voluntary relocation. Regarding the concern that the proposed anti-displacement standard could conflict

with government plans, the agencies believe that the revisions to the proposal—to focus on “forced or involuntary relocation”—will help mitigate this concern by adding greater specificity to the provision. For example, if a government plan involves demolishing a building that has suffered substantial hurricane damage, and all tenants are willing to relocate, the relocation of those tenants would not be disqualifying under this place-based criterion.

Additionally, the final rule states that activities may not “directly” result in forced or involuntary relocation. Accordingly, to be disqualified, an activity must directly relate to the involuntary relocation. For example, if a commercial development project to revitalize an area involved demolishing housing occupied by low- or moderate-income individuals, this project would directly result in the relocation of those occupants. Depending on the facts and circumstances, if the relocation were forced or involuntary, then the loans, investments, or services supporting the project would be ineligible for CRA consideration. In contrast, while the agencies note commenter feedback regarding future market pressures on rents and other costs resulting from neighborhood redevelopment and share these concerns, the agencies do not believe such pressures generally would directly result in forced or involuntary relocation, and thus generally would not be disqualifying under the final criterion. Further, the agencies believe that evaluating the impact of a particular project on the broader market in the future, such as the possibility of general rent increases across the market, could be challenging or speculative, resulting in inconsistencies in application and decreased certainty as to which projects may qualify as community development.

For similar reasons, the agencies are not incorporating specific displacement and relocation mitigation options as part of this criterion in the final rule. The agencies are concerned that doing so could create a need for a complex set of parameters regarding appropriate mitigation for otherwise qualifying activities. Further, determining when mitigation efforts are sufficient in all cases could be difficult or impracticable, as facts and circumstances can vary widely.

Likewise, on further consideration, the agencies are not adopting additional commenter-recommended standards or criteria to measure or otherwise demonstrate or determine whether an activity displaces residents. As with the above place-based criterion to benefit or

⁴⁴⁴ See final § _____.13(j)(2)(ii).

serve residents of a targeted geographic area, including low- and moderate-income individuals, the agencies are concerned that specific evidentiary requirements or required methods to demonstrate or determine whether an activity displaces residents could add complexity and burden, potentially dissuading banks from engaging in place-based activities. The agencies further recognize that the range of circumstances and contexts of potentially qualifying projects could have implications for whether specific measures pertaining to displacement determinations are appropriate, and might not be foreseeable.

The agencies have also considered commenter suggestions to incorporate this particular criterion into other community development categories, but believe that this criterion is most appropriate for place-based activities. The agencies believe that the criterion is appropriate specifically for place-based activities to ensure that activities designed to benefit a targeted geographic area do not have direct detrimental impacts on the residents the activities are intended to serve. Further, the relocation impacts of a particular activity can be more easily identified relative to a particular targeted geographic area, which are well-defined in, and the focus of, place-based community development activities in the final rule. Regarding comments encouraging expansion of the criterion to the affordable housing category, particularly naturally occurring affordable housing in § _____.13(b)(2), the agencies note that, under the final rule, this type of affordable housing is designed to create units or facilitate maintenance of existing units of affordable housing, and examiners will retain discretion to consider whether an activity reduces the number of housing units affordable to low- or moderate-income individuals. This design thus indirectly includes anti-displacement guardrails.⁴⁴⁵ The criterion is also less appropriate for other community development categories, such as community supportive services and financial literacy, that are unlikely to result in the direct relocation of residents.⁴⁴⁶

Regarding comments that the rule should permit downgrades for activities that result in displacement, the agencies note that under the final rule, as currently, evidence of illegal credit practices is the basis of a rating

⁴⁴⁵ For further discussion, see final § _____.13(b)(2) and the accompanying section-by-section analysis.

⁴⁴⁶ See final § _____.13(d) and (k), respectively, and the accompanying section-by-section analyses.

downgrade.⁴⁴⁷ The agencies have given serious consideration to the types of practices that should result in a ratings downgrade, in light of significant comments on this topic. For further discussion of the types of practices that can lead to a ratings downgrade under the final rule, see the section-by-section analysis of final § _____.28(d). The agencies also emphasize that, under the final rule, no place-based activity directly resulting in forced or involuntary relocation of low- or moderate-income individuals will qualify as community development, so no bank may receive community development consideration for loans, investments, or services supporting those activities.

Finally, the agencies are not removing this criterion from the final rule or revising the rule to weigh overall impacts to a market, such as net benefits of an activity to a particular market, accounting for displacement. The agencies have considered comments suggesting removal or revision in this regard, but believe that granting consideration for loans, investments, or services that support projects directly resulting in forced or involuntary relocation of low- or moderate-income residents of targeted geographic areas, even in conjunction with a government plan, would be inconsistent with the express focus of the CRA on the needs of low- or moderate-income populations.

Overall, the agencies believe that the final criterion as adopted offers a more precise standard relative to the proposal that appropriately balances encouraging activities that provide community benefits to residents of a targeted geographic area, including low- and moderate-income residents of targeted geographic areas, while discouraging activities that have detrimental effects on the residents of those targeted geographic areas, including low- or moderate-income individuals. The agencies recognize commenter concerns that the proposed rule was overbroad or could be difficult to evaluate, and believe that the final rule regulatory text on this criterion more accurately expresses the intent of the proposal and will be more practicable to establish than the proposed language.

Conducted in Conjunction With a Government Plan, Program, or Initiative The Agencies' Proposal

The agencies proposed that activities eligible under the place-based community development categories

⁴⁴⁷ See current 12 CFR _____.28(c), proposed § _____.28(d), and final § _____.28(d).

would need to be undertaken “in conjunction with a [F]ederal, [S]tate, local, or tribal government plan, program, or initiative” that, for most proposed place-based activities, would have to include “an explicit focus” on benefiting the relevant targeted geographic area.⁴⁴⁸ The agencies sought feedback on whether any or all place-based definition activities should be required to be conducted in conjunction with a government plan, program, or initiative and include an explicit focus of benefiting the targeted geographic area. In addition, the agencies sought feedback on appropriate standards for government plans, programs, or initiatives and asked about alternative options for determining whether place-based activities meet identified community needs.

Comments Received

Some commenters supported the proposed common criterion to require that place-based community development be conducted in conjunction with a government plan, program, or initiative. These comments included, for example, a commenter asserting that banks' lending should be aligned with government efforts to ensure investments reach underserved communities and have the highest impact, and expressing the view that the proposed language “in conjunction with” would ensure that alignment. Several commenters supportive of the proposed criterion suggested adding other criteria as well, such as showing that a plan, program, or initiative has broad community support, to ensure that the government plan, program or initiative is responsive to community needs, or involves consultation and partnership with community- and faith-based organizations in targeted communities to determine how best to tailor activities. Commenter recommendations also included that banks should have to demonstrate that the underlying government plan or program includes goals and standards appropriately aligned with a community development category under CRA; and that qualifying plans should be included in an official government document that is readily available to the public and has

⁴⁴⁸ See proposed § _____.13(e) (revitalization), (f)(3) (essential community facilities), (g)(3) (essential community infrastructure), (h)(3) (recovery in designated disaster areas), (i)(3) (disaster preparedness and climate resiliency), and (l)(1)(i) (revitalization in Native Land Areas). Proposed § _____.13(l)(2)(ii) (essential community facilities and essential community infrastructure in Native Land Areas) and (l)(3)(ii) (disaster preparedness and climate resiliency in Native Land Areas) did not include the “explicit focus” language.

been subject to a formal community review process.

However, a majority of commenters opposed or expressed concerns about requiring place-based activities to be conducted in conjunction with a government plan, program, or initiative as proposed, with some commenters suggesting eliminating the requirement altogether, or expanding the government plan, program, or initiative criteria to include other options for defining eligible activities. Some commenters viewed the criterion as too limiting, given that communities do not always have government plans, programs, or initiatives in place for community development. Commenters stated, for example, that: local governments in areas most in need of stabilization and revitalization, including small towns and rural areas, might not always have a plan, program, or initiative for the targeted census tract; consolidated plans developed at the State level often do not target rural areas at the census tract level; the requirement could prevent activities where banks are unable to find a government partner or to know in advance if one will be available for a prospective project; and, more generally, the requirement could lead to a contraction rather than an expansion of community development activities. A few commenters expressed concern that the proposed criterion would exclude impactful activities with nonprofit organizations or in the private sector that are not associated with a formal government plan but could effectuate the same community development purposes. A commenter expressed concern that banks could be penalized for supporting activities in areas without a plan and suggested that, at a minimum, the agencies should instead require only that an activity be conducted “consistent with” such a government plan, program, or initiative. Particularly regarding the proposed disaster preparedness and climate resiliency category of community development,⁴⁴⁹ a commenter suggested that if the government plan requirement were retained, the final rule should clarify that plans developed by local utilities are included.

Other commenters asserted that government plans that do exist do not always match community goals or, similar to comments mentioned above, may unevenly address community needs. For instance, a commenter suggested that a local agency plan or initiative might not be responsive to needs of modest-income residents or

minorities, or might be harmful to their interests. With respect to climate activities, a number of commenters argued that government plans may be inadequate or slow to respond to community needs. A few commenters noted that government programs regarding climate change often lack a racial justice focus.

Some commenters supported broadening this criterion to include place-based activities in partnership with not only governments, but also local community organizations with plans, programs, or initiatives, particularly organizations that have knowledge of, and a successful record of working within, the relevant community; or, similarly, community-led plans and plans conducted in conjunction with community development organizations and nonprofit organizations that benefit low- and moderate-income individuals and communities. For example, a commenter recommended that bank lending and investment in low- and moderate-income communities working with mission-driven lenders should receive community development consideration. Another commenter emphasized the importance of including in any criterion the activities of Black developers or community organizers that engage in place-based activities outside of government plans—as long as such activities still meet the explicit focus of benefiting the targeted census tract, including low- and moderate-income residents.

Other commenters suggested that place-based activities should instead simply qualify as community development if clearly supported by documentation that the activity meets a need in the community. For example, a commenter expressing concern regarding the level of required government engagement advocated for giving banks more flexibility to engage with non-government partners in projects that also met community needs, without the need to have a government plan in place. Several commenters suggested that the key qualification standard for place-based activities should be whether intended beneficiaries are low- and moderate-income census tract residents or other low- and moderate-income individuals.

Some commenters supported the agencies’ goals to create clear standards for qualification of place-based activities, but recommended alternatives to a requirement that place-based activities be conducted in conjunction with a government plan, program, or initiative. For example, several commenters suggested that, rather than

requiring a nexus to a government, plan, program, or initiative, the final rule should incorporate impact scoring to boost consideration of activities undertaken in conjunction with a government plan, or that government plans should serve as evidence that an activity is responsive to local needs.

A few commenters recommended a qualitative approach to assessing the value of place-based activities to the community, such as through examiner analysis of performance context or a CBA to determine community needs and whether activities respond to them. Additionally, a few commenters suggested that the agencies consider activities with a race-conscious objective or develop a ranking of activities that emphasize working in conjunction with government plans, programs, and initiatives that have a race conscious objective.

Final Rule

The final rule adopts the proposed criterion that activities be conducted in conjunction with a government plan, program, or initiative, with revisions to: (1) broaden the criterion to include activities undertaken in conjunction with a mission-driven nonprofit organization; and (2) to generally delete the word “explicit” where applicable when referencing the focus of the government plan on the relevant community development activity in a particular geographic area.⁴⁵⁰ Accordingly, the final rule generally adopts as a criterion that activities be undertaken in conjunction with a Federal, State, local, or tribal government or a mission-driven nonprofit organization, where the plan, program, or initiative includes a focus on, for example, “revitalizing or stabilizing targeted census tracts.”⁴⁵¹

In general. As discussed in the proposal, the agencies intend this criterion to achieve several objectives. First, the criterion will help ensure that place-based activities are responsive to identified community needs.

Government plans, programs, or initiatives provide a mechanism for ensuring that activities are intentional

⁴⁵⁰ As noted, the “explicit focus” language for the government plan, program, or initiative appeared the provisions for all proposed place-based categories of community development, other than essential community facilities, essential community infrastructure, and disaster preparedness and climate resiliency activities in Native Land Areas.

⁴⁵¹ See final § _____.13(e)(1)(i) (revitalization and stabilization), (f)(1) (essential community facilities), (g)(1) (essential community infrastructure), (h)(1)(i) (disaster recovery), and (i)(1) (disaster preparedness and weather resiliency). The “explicit focus” language is adopted regarding qualifying activities in Native Land Areas. See final § _____.13(j)(2)(i) and (j)(3)(i).

⁴⁴⁹ See final § _____.13(i), discussed in detail in the accompanying section-by-section analysis.

and support articulated community development goals, with a specific tie to the relevant geographic areas. The agencies believe that these plans, programs, and initiatives are general indicators of community needs. As discussed in more detail below, expanding the criterion to plans, programs, and initiatives of mission-driven nonprofit organizations will provide another mechanism to ensure a nexus between an activity and community needs in a particular geographic area, given these organizations' knowledge and record of working within, and with residents of, targeted geographic areas. Including mission-driven nonprofit organizations in the criterion also will help address commenter feedback that government plans, programs, and initiatives are not always available or are not always responsive to or inclusive of all of the needs in a particular geographic area.

Second, the final rule is intended to improve consistency, certainty, and transparency, which will give banks and other stakeholders more upfront clarity on how activities may qualify, prior to banks engaging in those activities. The criterion will increase consistency relative to current practice, where standards are complex and vary across geographic areas, including related to how banks can rely on a government plan to demonstrate qualification.⁴⁵² The rule will also increase certainty and transparency in that this criterion sets forth a clear standard for determining whether a place-based activity qualifies as community development and a bank's community development loans, investments, or services supporting it could receive community development consideration.

Finally, the agencies believe that the final rule will provide additional clarity relative to current guidance by permitting consideration for activities in conjunction with a program or initiative, even if not part of a plan. The agencies believe that the adopted criterion will allow for consideration of

activities related to a wide range of government plans, programs, and initiatives, including those found in all types of communities within the targeted geographic areas of the place-based community development categories. For example, a grant to support a park in a low-income census tract could qualify if undertaken in conjunction with a citywide government program or initiative to expand green space in low- or moderate-income areas, even if support for that park is not outlined in a particular plan. The final rule does not further specify the kinds of plans, programs, or initiatives that meet the criterion, nor the types of government entities, as these can vary by community and Federal, State, or local law.

Mission-driven nonprofit organization plan, program, or initiative. The final rule broadens the proposed criterion to include activities undertaken in conjunction with plans, programs, or initiatives of not only governments, but also mission-driven nonprofit organizations. (For a more detailed discussion of the definition of mission-driven nonprofit organization, see the section-by-section analysis of § _____.12 (“mission-driven nonprofit organization”).) In reaching a determination on this final rule provision, the agencies considered commenter views that the proposed government plan, program, or initiative criterion is too narrow or limited. The agencies are persuaded by points raised by some commenters that not all communities have government plans, programs, or initiatives in place or that plans may vary in their level of application to different geographic areas. The agencies also considered comments that government plans do not always match the goals of all members of the community. Further, the agencies considered commenter views that the proposed requirement for activities to be conducted in conjunction with a government plan, program, or initiative could exclude impactful activities that are not associated with a formal government plan but that could also bring benefits to residents of a targeted geographic area.

As defined in the final rule, mission-driven nonprofit organizations have knowledge of geographic areas that are the focus of place-based activities under the final rule, and a successful record of working within and with residents of these areas to meet community needs. Further, these organizations can be identified and evaluated through demonstrable and consistent standards (as discussed in more detail in the section-by-section analysis of § _____.12).

The agencies believe that expanding this criterion to include mission-driven nonprofit organizations will facilitate community partnerships between banks and these organizations. Moreover, the agencies believe that this expansion is consistent with ensuring that activities remain place-based and benefit or serve residents of targeted census tracts, designated disaster areas, and Native Land Areas, as applicable. In addition, the agencies believe that many commenters' specific suggestions will be addressed through this revision, such as suggestions to broaden the rule to allow for qualifying activities in connection with community organizations or community plans, programs, or initiatives.

The agencies also recognize commenter suggestions to include activities with a range of organizations and entities, such as Black developers, community organizers, or other specific groups other than government entities, for determining qualification under the place-based categories. While not specifically included in the final rule, the agencies believe that the revised adopted criterion will both allow for and encourage partnerships with many such organizations. The final rule does not expand this criterion to include all private sector partners, as the agencies believe that these entities can have varying goals and missions that do not always align with the goals of CRA. Instead, by adding mission-driven nonprofit organizations as defined in the final rule, the agencies believe that the final rule will appropriately broaden the kinds of plans, programs, and initiatives that can count for place-based activities, while continuing to ensure a focus on activities that are aligned with the goals of CRA.

Additional considerations. The agencies have carefully considered but are not adopting further revisions related to commenter feedback regarding whether to require this criterion; the appropriate standards for this criterion; and alternative options. This includes comments suggesting additional requirements for this criterion such as demonstrations related to formal community review; advocating for a more qualitative approach emphasizing examiner judgment for assessing the value of place-based activities to the community in lieu of this criterion; or suggesting that proposed government plans, programs, or initiatives be a method for demonstrating that an activity meets community needs rather than a requirement.

Regarding comments that any plan be included in a publicly available

⁴⁵² For example, under current guidance an activity in a distressed nonmetropolitan middle-income geography is presumed to revitalize or stabilize the area if the activity is consistent with a bona fide government revitalization or stabilization plan (see Q&A § _____.12(g)(4)(iii)-3), while an activity in a low- or moderate-income census tract is presumed to revitalize or stabilize the area if the activity has been approved by the governing board of an Enterprise Community or Empowerment Zone (designated pursuant to 26 U.S.C. 1391) and is consistent with the board's strategic plan, or if the activity has received similar official designation as consistent with a Federal, State, local, or tribal government plan for the revitalization or stabilization of the low- or moderate-income census tract. See Q&A § _____.12(g)(4)(i)-1.

document and/or be subject to formal community review process, or requiring community inputs as an additional criterion, the agencies are concerned that specific requirements of these types could be overly burdensome and limiting, and dissuade banks from engaging in place-based activities. However, the agencies expect that many government plans, programs, and initiatives will involve a public input process.

Regarding comments advocating for a more qualitative approach or that a government plan, program, or initiative be considered on an evidentiary rather than a mandatory basis, the agencies believe that including the adopted criterion—expanded to allow for activities in conjunction with mission-driven nonprofit organization plans, programs, and initiatives—is important to ensuring that activities qualifying under place-based community development categories are strongly linked to relevant local community needs in the targeted geographic areas.

In addition, as noted regarding other place-based criteria discussed above, the agencies recognize commenter feedback to consider activities with a race-conscious objective or to develop a ranking that favors encouraging work in conjunction with government plans, programs, and initiatives that are “racially-conscious.” While these provisions are not included in the final rule, the agencies intend that the revised adopted criterion provides standards for ensuring that a broad range of residents in targeted geographic areas benefit and are served by place-based activities. For more information and discussion regarding the agencies’ consideration of comments recommending adoption of additional race- and ethnicity-related provisions in this final rule, see section III.C of this **SUPPLEMENTARY INFORMATION**. On balance, the agencies believe the adopted criterion achieves an appropriate balance between a flexible standard that will ensure that place-based activities are designed to benefit or serve residents of targeted geographic areas, while also promoting clarity and consistency about eligible place-based activities.

“*Explicit focus*” and “*in conjunction with*”—in relation to a plan, program, or initiative. Other than for plans, programs, or initiatives related to activities in Native Land Areas,⁴⁵³ the final rule removes the term “explicit” from the proposed regulatory text, which would have required that the “explicit focus” of the government plan, program, or initiative be on, for

example, revitalizing targeted census tracts.⁴⁵⁴ The agencies recognize that plans, programs, or initiatives may cover broader range of community development needs than those related to a specific category of place-based activities. In addition, the agencies are concerned that too narrow a focus on the specific wording in the type of plan, program, or initiative could potentially and inadvertently disqualify otherwise eligible activities that align with the community development goals of CRA. The agencies do not intend that removal of the word “explicit” has any substantive implications for the requirement that a plan, program, or initiative under this criterion include a focus on, for example, revitalizing or stabilizing a targeted census tract, or on disaster preparedness or weather resiliency activities in a targeted census tract. For further discussion of the inclusion of “explicit focus” in the final rule provisions on activities in Native Land Areas, see the section-by-section analysis of § _____.13(j).

Finally, the agencies considered feedback to change the proposed requirement that an activity be “in conjunction with” a government plan, program, or initiative, to “consistent with” a plan, program, or initiative, but determined that “consistent with” would not provide sufficient clarity in determining when an activity meets the required standard. The agencies believe that finalizing a requirement for activities to be “in conjunction with” a government or mission-driven nonprofit organization plan, program, or initiative will provide greater clarity relative to current guidance by expressly connecting the eligible activity to the applicable plan, program, or initiative. Currently, as noted, standards are complex and vary across the targeted geographic areas, including guidance related to how banks can rely on a government plan to demonstrate that an activity helps to attract or retain residents. Under the final rule, a uniform standard will apply to all activities, with flexibility to cover a range of government and nonprofit entities, as well as varying types of plans, programs, and initiatives.

Regarding comments that any plan be included in a publicly available document and/or be subject to formal community review process, or requiring community inputs as an additional criterion, the agencies are concerned that a specific requirement in the regulation could be overly burdensome and limiting, and dissuade banks from engaging in place-based activities.

However, the agencies expect that many government plans, programs, and initiatives will involve a public input process.

Section _____.13(e) Revitalization or Stabilization Activities

The Agencies’ Proposal

In proposed § _____.13(e), the agencies proposed a category of community development for revitalization activities undertaken in conjunction with a Federal, State, local, or tribal government plan, program, or initiative that includes an explicit focus on revitalizing or stabilizing targeted census tracts.⁴⁵⁵ The plan, program, or initiative would also specifically need to include the targeted census tracts, although the goals of a plan, program or initiative could include stabilization or revitalization of other geographic areas.

In addition to the targeted geographic focus and government plan, program, or initiative common criterion, the agencies proposed that activities under this category would need to meet the two other common place-based elements: proposed § _____.13(e)(1) required activities to benefit or serve residents, including low- or moderate-income residents, in one or more of the targeted census tracts, while proposed § _____.13(e)(2) required that activities not displace or exclude low- or moderate-income residents in the targeted census tracts. Proposed § _____.13(e) also provided several representative examples to clarify the type of activities that could be considered under this category, including adaptive reuse of vacant or blighted buildings, brownfield redevelopment, or activities consistent with a plan for a business improvement district or main street program.

The agencies proposed to exclude housing-related activities from the category of revitalization activities in proposed § _____.13(e). Currently, pursuant to interagency guidance, activities that support housing for middle- and upper-income residents can receive community development credit if they revitalize or stabilize a distressed nonmetropolitan middle-income census tract or a designated disaster area, with greater weight given to activities that are most responsive to community needs, including needs of low- or moderate-income individuals or

⁴⁵⁵ See proposed § _____.12 (defining “targeted census tract” to mean: “(1) A low-income census tract or a moderate-income census tract; or (2) A distressed or underserved nonmetropolitan middle-income census tract”).

⁴⁵³ See final § _____.13(j)(2)(i) and (j)(3)(i).

⁴⁵⁴ See proposed § _____.13(e).

neighborhoods.⁴⁵⁶ Based in part on prior stakeholder feedback that housing that benefits middle- or upper-income individuals, particularly in a low- or moderate-income census tract, can lead to displacement of existing residents,⁴⁵⁷ the agencies proposed that, under the “affordable housing” category of community development in § ____ .13(b), as discussed above, activities that promote housing exclusively for middle- or upper-income residents would not be eligible for CRA credit as affordable housing, regardless of the type of geographic area benefited.⁴⁵⁸ The agencies considered that additional clarity could come from qualifying most housing-related community development activities under the affordable housing category. The agencies also recognized that affordable housing activities are often components of government plans, programs, and initiatives to revitalize communities, and therefore sought feedback on whether housing-related revitalization activities should be considered under the affordable housing category or the revitalization activities category, and under what circumstances.

Comments Received

Comments regarding the three common place-based criteria are discussed above. Remaining comments on proposed § ____ .13(e) primarily focused on the agencies’ request for feedback on whether certain housing activities should be considered eligible under the revitalization category of community development. Many commenters supported including consideration for housing activities under § ____ .13(e), consistent with current guidance.⁴⁵⁹ Some commenters asserted that these activities are central to overall community revitalization efforts, without specifying which housing activities should be included. A commenter suggested that limiting housing activities to the affordable housing category would create uncertainty for banks considering mixed-use revitalization projects that include both affordable housing and commercial revitalization. A few commenters suggested that affordable housing should be allowed to count under categories such as revitalization

and climate resiliency, but should not be double-counted, as counting twice could lead to decreases in investment. A commenter suggested that housing should be included as an eligible revitalization activity and should be counted in all geographic areas, while another commenter stated that limiting consideration of housing activities under the revitalization category to activities serving high poverty or high vacancy geographic areas may not be necessary, as pockets of distress exist in otherwise prosperous communities.

Some commenters seeking to include housing under § ____ .13(e) expressed support for including a variety of types of housing activities under the revitalization category as a crucial component of comprehensive, equitable neighborhood revitalization. Suggestions included, for example, eligibility for activities that support: (1) the construction or rehabilitation of owner-occupied homes (including condominiums and cooperatives), if the homes are in certain census tracts and the sales price is capped; (2) rehabilitation or reconstruction of owner-occupied homes if the owner is low-, moderate-, or middle-income; (3) the disposition, rehabilitation, or replacement of vacant and foreclosed homes, to create new opportunities for affordable homeownership for low- and moderate-income households; (4) supportive housing development, operation, and services in any geographic area, because the need for supportive housing outweighs supply (citing the impact of supportive housing due to lack of stable affordable housing with wrap-around services); and (5) home repair and mitigation activities for low- and moderate-income homeowners.

Other commenters supported including mixed-income or mixed-used housing under the revitalization category. For example, a commenter suggested that mixed-income and mixed-use housing developments should qualify: (1) if in low- and moderate-income census tracts, and (2) if in higher-cost areas, and rent is limited to 60 percent of the area median income. This commenter suggested that high-cost neighborhoods are often the least accessible to low- and moderate-income individuals, but because these neighborhoods often offer the greatest access to jobs, higher performing schools, transportation, and other necessities, increasing access to these neighborhoods should be considered a revitalization activity. A few commenters recommended including housing developments that have onsite or co-located childcare and early

education programs as eligible revitalization activities.

Alternatively, several commenters stated that place-based revitalization activities and housing activities should be separately considered under the rule, or with limited exceptions. For example, a commenter suggested that considering housing activities solely as part of the affordable housing category would help clarify whether disparities in non-housing resources and investments are being adequately addressed, which this commenter asserted is particularly important because affordable and subsidized housing is often concentrated in low-resourced areas. A few commenters similarly indicated that areas targeted for revitalization activities are often areas where low-income housing is already concentrated, and housing activities undertaken as part of revitalization efforts can risk perpetuating economic and racial segregation. A commenter generally supportive of qualifying housing activities outside of the revitalization category also supported an exception for housing being removed or demolished as part of a broader community revitalization effort.

Commenters also addressed proposed § ____ .13(e) beyond the question of whether to include housing. For example, a commenter expressed the view that the proposed rule’s definitions of revitalization and stabilization activities would help direct more of the benefits of CRA-focused investment to low- and moderate-income communities and individuals. Another commenter suggested that any community revitalization plan or activity should include assurances that low- and moderate-income households will be able to remain in the neighborhood and enjoy the benefits of revitalization (through CBAs, support of community land trusts, or inclusionary zoning).

A few commenters suggested certain activities that should be considered revitalization activities, such as broadband; sustainability projects including those related to food access, food and water source protection; renewable energy investments; and private investment in land banking activities.

Final Rule

The agencies are adopting proposed § ____ .13(e), reorganized for clarity and consistency with the structures of other place-based categories, and further modified as described below. The final rule makes a technical revision to the name of the proposed community development category from

⁴⁵⁶ See Q&A § ____ .12(g)(4)–2.

⁴⁵⁷ See 87 FR 33884, 33904 (June 3, 2022).

Stakeholder feedback considered for the proposal also included that revitalization or stabilization activities do not always provide direct benefits to low- or moderate-income individuals. See *id.* at 33902.

⁴⁵⁸ See proposed § ____ .13(b).

⁴⁵⁹ See 12 CFR ____ .12(g)(4) and Q&A § ____ .12(g)(4)–2.

“revitalization” to “revitalization or stabilization” for consistency with the current regulation and to reflect the agencies’ intent to retain the concept of “stabilization” in this community development category. Final § _____.13(e)(1) provides the general definition of the types of activities included in this category of community development. These activities must also meet specific place-based eligibility criteria in § _____.13(e)(i) through (iii). Final § _____.13(e)(2) adds a new provision for mixed-use revitalization or stabilization projects.

Section _____.13(e)(1) In General

Similar to the proposal, under final § _____.13(e)(1), revitalization or stabilization comprises activities that support revitalization or stabilization of targeted census tracts, including adaptive reuse of vacant or blighted buildings, brownfield redevelopment, support of a plan for a business improvement district or main street program, or any other activity that supports revitalization or stabilization. Final § _____.13(e)(1) incorporates the technical revision from “revitalization” to “revitalization or stabilization” and other non-substantive edits.

Consistent with the proposal, the final rule incorporates some aspects of existing guidance for revitalization and stabilization, but no longer focuses eligibility of activities on the extent to which an activity helps to attract or retain residents or businesses in targeted geographic areas. Consistent with prior stakeholder feedback and as noted in the proposal, the agencies have determined that the standard in current interagency guidance that an activity “attract new, or retain existing, businesses or residents” has proven difficult for banks, community groups, and the agencies to apply, resulting in inconsistent outcomes. Under the “attract or retain” standard, banks and other stakeholders lacked upfront clarity about which loans, services, or investments would be eligible for consideration, and the standard also sometimes allowed for development that did not align with the purpose of the CRA, such as housing for higher-income individuals, without benefits to low- or moderate-income individuals. Thus, the final rule focuses instead on revitalization and stabilization activities benefiting or serving targeted census tracts, and includes the other place-based criterion discussed in detail above. As further discussed below, the agencies believe that final § _____.13(e) will provide stakeholders with a better upfront understanding of the types of activities that will qualify as

revitalization and stabilization, and result in more consistency in community development consideration for loans, investments, and services supporting these activities.

The final rule adopts the proposed focus on activities in targeted census tracts, in alignment with current guidance. The agencies considered commenter suggestions to qualify revitalization or stabilization activities in all geographic areas, but believe that the geographic nexus to targeted census tracts—defined in final § _____.12 to include low-income census tracts, moderate-income census tracts, or distressed or underserved nonmetropolitan middle-income census tracts—is an important standard to align the final rule with a longstanding geographic focus of CRA implementation, consistent with the CRA’s emphasis on communities of need. The agencies believe that final § _____.13(e) will allow activities to qualify across a range of community types with varying needs, including distressed and underserved nonmetropolitan middle-income census tracts without significant low- or moderate-income populations, as well as more densely populated metropolitan census tracts with a greater concentration of low- or moderate-income individuals.

The examples of revitalization or stabilization in the final rule (as described above, adaptive reuse of vacant or blighted buildings, brownfield redevelopment, and support of a plan for a business improvement district or main street program) are drawn from current guidance and intended to clarify the types of activities that might be considered eligible under this category. However, these illustrative examples are intended to be non-exhaustive; the final rule clarifies that eligible activities include “any other activity that supports revitalization or stabilization.” The agencies recognize commenter suggestions to include specific activities under the revitalization or stabilization category, such as food access, renewable energy projects, or other sustainability projects, and believe that many of these types of projects could be included for consideration within this category upon meeting the required criteria. For example, a project to build a new supermarket within a low- or moderate-income census tract of a small town would qualify as a revitalization or stabilization activity if the activity met the required criteria. Similarly, the agencies recognize commenter support for including land banking and disposition of vacant or foreclosed land under revitalization, and believe that

these activities would qualify provided they met other criteria in § _____.13(e), as these are often central elements of neighborhood redevelopment efforts.

The agencies note that some activities raised by commenters might qualify in other categories; for example, broadband is provided as an example under final § _____.13(g) regarding essential community infrastructure. Other activities suggested by commenters might qualify under final § _____.13(b) regarding affordable housing, such as financing that assists low- or moderate-income individuals to rehabilitate or reconstruct their owner-occupied homes (excluding loans by a bank directly to one or more owner-occupants of such housing),⁴⁶⁰ or alternatively, the financing of a supportive housing development and operation that meets applicable requirements in § _____.13(b).⁴⁶¹ In response to comments suggesting co-located childcare and early education should qualify, the agencies believe this activity may, depending on the circumstances, qualify as a community supportive service (final § _____.13(d)) or an essential community facility (final § _____.13(f)), provided the activity meets all relevant criteria.

Section _____.13(e)(1)(i) Through (iii) Place-Based Criteria

The final rule adopts the three proposed common place-based eligibility criteria for revitalization or stabilization activities, reorganized to be in a consistent parallel order across all place-based categories, and with the revisions described in the discussion of the place-based criteria above in this section-by-section analysis. Accordingly, under the final rule, revitalization or stabilization activities are those that: are undertaken in conjunction with a plan, program, or initiative of a Federal, State, local, or tribal government or a mission-driven nonprofit organization, where the plan, program, or initiative includes a focus on revitalizing or stabilizing targeted census tracts (final § _____.13(e)(1)(i)); benefit or serve residents, including low- or moderate-income individuals, of targeted census tracts (final § _____.13(e)(1)(ii)); and do not directly result in the forced or involuntary relocation of low- or moderate-income individuals in targeted census tracts (final § _____.13(e)(1)(iii)).

As noted, the reasons for adopting these final criteria, and for revisions to

⁴⁶⁰ See final § _____.13(b)(4) and the accompanying section-by-section analysis.

⁴⁶¹ See final § _____.13(b)(1) and (2) and the accompanying section-by-section analyses.

the proposed criteria, are collectively discussed above in this section-by-section analysis. With respect to the revitalization or stabilization category in particular, the agencies note that final § _____.13(e)(1)(iii) is revised from the proposal to prohibit activities that directly result in forced or involuntary relocation of low- and moderate-income individuals in targeted census tracts. Accordingly, the agencies are not incorporating into the final rule a commenter suggestion that community revitalization plans include assurances that low- and moderate-income households will not be displaced. The agencies believe that adopting the common place-based criteria, combined with the majority standard set forth in § _____.13(a),⁴⁶² will adequately ensure that qualifying revitalization or stabilization activities benefit and serve the residents of targeted tracts, including low- and moderate-income individuals.

Section _____.13(e)(2) Mixed Use Revitalization or Stabilization Project

On consideration of feedback regarding whether housing-related revitalization activities should be considered under the revitalization category, the agencies are adopting a provision that brings certain mixed-used revitalization or stabilization projects under the revitalization and stabilization category of community development. Specifically, § _____.13(e)(2) incorporates into this community development category projects to revitalize or stabilize targeted census tracts that include both commercial and residential components, if: (1) the project meets all other criteria in § _____.13(e)(1), including all place-based criteria (final § _____.13(e)(2)(i)); and (2) more than 50 percent of the project is non-residential, as measured by the percentage of total square footage or dollar amount of the project (final § _____.13(e)(2)(i)).

The final rule is designed to take into account some commenters' views that mixed-use housing can be central to revitalization projects. However, the agencies do not intend to include in this category projects that are primarily comprised of housing, particularly mixed-use developments with housing that is targeted to middle- or upper-income individuals, including such projects in low- or moderate-income census tracts. The agencies have considered that this type of

development might not clearly benefit existing residents of the targeted census tracts, particularly low- or moderate-income residents, and can sometimes lead to displacement of existing residents. On further consideration of comments, the agencies are adopting this revision to better allow for needed comprehensive redevelopment efforts in targeted census tracts that involve mixed-use properties comprised of some, but not primarily, housing.

The agencies considered several alternative thresholds for the percentage of a mixed-use comprehensive redevelopment project that can be residential for the project to qualify as under § _____.13(e), and are adopting a threshold requiring that more than 50 percent of the project must be non-residential as measured by the percentage of total square footage or dollar amount of the project (corresponding to a threshold of 50 percent or lower for the residential component of the project). The agencies believe that the adopted percentage threshold provides appropriate additional flexibility for mixed-use development under the final rule's revitalization and stabilization category. In this regard, the agencies considered that a lower residential percentage threshold would exclude several types of mixed-use projects central to overall community revitalization efforts. On the other hand, the agencies believe that activities inclusive of a higher percentage threshold of housing within a project (*i.e.*, above 50 percent) are more appropriately considered under the affordable housing category in section § _____.13(b), as those projects are primarily housing.

An example of housing activity that could qualify under final § _____.13(e)(2), as long as all criteria are met, would be a main street mixed-use project to revitalize a series of vacant buildings to include 60 percent commercial space and 40 percent apartments serving middle-income residents. An example that would not qualify under § _____.13(e)(2) would include a condominium project that is 100 percent apartments that are affordable exclusively to higher-income residents in a targeted census tract. Likewise, the agencies recognize comments regarding supportive housing in any geographic area, and reconstruction or rehabilitation of owner-occupied homes in low- or moderate-income census tracts or distressed or underserved middle-income census tracts. These activities may qualify as affordable housing (final § _____.13(b)) and would qualify under § _____.13(e) if they meet criteria as part of a comprehensive

mixed-use revitalization project. Banks subject to the rule are permitted to qualify activities under any applicable category, but those activities may count only once for the purposes of calculating the Community Development Financing Metric.

Section _____.13(f) Essential Community Facilities

Current Approach and the Agencies' Proposal

Currently, in low- or moderate-income census tracts, distressed nonmetropolitan middle-income census tracts, and designated disaster areas, bank support for community facilities and infrastructure generally can receive community development consideration to the extent that these activities help to attract or retain residents or businesses.⁴⁶³ However, among these three geographic areas, these activities are only explicitly mentioned in current guidance for distressed nonmetropolitan middle-income areas⁴⁶⁴ (with guidance on designated disaster areas mentioning "essential community-wide infrastructure" but not facilities⁴⁶⁵). Regarding underserved nonmetropolitan middle-income census tracts, as noted earlier, the current CRA regulation provides that activities qualify for community development consideration in these areas "if they help to meet essential community needs, including needs of low- and moderate-income individuals."⁴⁶⁶ To clarify this provision, the Interagency Questions and Answers states that activities such as "financing for the construction, expansion, improvement, maintenance, or operation of essential infrastructure or facilities for health services, education, public safety, public services, industrial parks, affordable housing, or communication services" in underserved nonmetropolitan middle-income census tracts will be evaluated to determine whether they meet essential community needs.⁴⁶⁷

⁴⁶³ See Q&A § _____.12(g)(4)(i)—1 (regarding low- or moderate-income census tracts), Q&A § _____.12(g)(4)(ii)—2 (regarding designated disaster areas), and Q&A § _____.12(g)(4)(iii)—3 (for distressed nonmetropolitan middle-income census tracts).

⁴⁶⁴ See Q&A § _____.12(g)(4)(iii)—3 ("Qualifying activities may include, for example, . . . activities that provide financing or other assistance for essential infrastructure or facilities necessary to attract or retain businesses or residents.").

⁴⁶⁵ See Q&A § _____.12(g)(4)(ii)—2.

⁴⁶⁶ 12 CFR _____.12(g)(4)(iii)(B).

⁴⁶⁷ Q&A § _____.12(g)(4)(iii)—4. As also noted, the guidance provides several examples of projects that may be considered to meet essential community needs in underserved nonmetropolitan middle-income census tracts, such as hospitals, industrial parks, rehabilitated sewer lines, mixed-income housing, and renovated schools—as long as the

⁴⁶² For a detailed discussion of the majority standard in relation to when community development loans, investments, and services are eligible for full or partial credit, see the section-by-section analysis of final § _____.13(a).

The agencies' proposal aimed to provide more clarity, certainty, and consistency regarding CRA consideration for activities that support essential community facilities and infrastructure. To this end, proposed § _____.13(f) (essential community facilities) and proposed § _____.13(g) (essential community infrastructure, discussed further below in this section-by-section analysis) built on the current Interagency Questions and Answers to clarify that essential community facilities and essential community infrastructure would be considered community development if they were conducted in and benefit or serve residents of targeted census tracts, defined in proposed § _____.12 to mean low- or moderate-income census tracts, as well as distressed or underserved nonmetropolitan middle-income census tracts.

Specifically, the agencies proposed a category of community development for essential community facilities, defined as activities that provide financing or other support for public facilities that provide essential services generally accessible by a local community. Proposed § _____.13(f) included the following non-exhaustive examples of the types of facilities that would fall into this category: schools, libraries, childcare facilities, parks, hospitals, healthcare facilities, and community centers. The proposal further defined essential community facilities as activities conducted in targeted census tracts (as defined in proposed § _____.12) that also meet the other place-based criteria discussed above: that activities benefit or serve residents, including low- or moderate-income residents (proposed § _____.13(f)(1)); that activities do not displace or exclude low- or moderate-income residents in the targeted census tracts (proposed § _____.13(f)(2)); and that an activity that finances or supports essential community facilities must be conducted in conjunction with a Federal, State, local, or tribal government plan that includes an explicit focus on benefiting or serving the targeted census tracts (proposed § _____.13(f)(3)).

Comments Received

Most commenters offering feedback on the agencies' proposal regarding essential community facilities were generally supportive. A few commenters supported the agencies' decision not to propose the current requirement that community facilities must also attract or retain businesses and residents.

population served includes low- and moderate-income individuals. See *id.*

Commenters offered different views on the examples in the proposed essential community facilities category. Some commenters expressly supported the proposed examples of essential community facilities. Others sought clarity on the types of activities that would qualify under this community development category, or advocated for including additional types of activities in the regulation. For example, a number of commenters highlighted the proposed examples of hospitals and other healthcare-related facilities, noting this may encourage new investment in healthcare access, while others noted the inclusion of childcare facilities, citing a wide variety of community benefits.

Others sought clarity on the types of activities that would qualify under this community development category, or advocated for including additional types of activities in the regulation. Several commenters suggested that the agencies add supermarkets and other food-related facilities to the proposed list of examples, including because low- and moderate-income communities are disproportionately more likely to be food deserts.⁴⁶⁸ Other comments included: a suggestion to clarify that the financing of retail service businesses, including grocery stores, pharmacies, and other neighborhood-scale services, are eligible facilities, regardless of the size of the occupant business, as these facilities bring convenience, jobs, physical revitalization, and lower prices for consumers; and suggested eligibility for financing grocery stores larger than the size standards in the proposed Retail Lending Test or proposed economic development category of community development. Another commenter cautioned the agencies against defining all examples of essential community facilities and essential community infrastructure in the regulation, stating that doing so could cause banks to limit activities based on the list and limit creativity in responding to local needs.

A number of commenters also responded to the agencies' request for feedback regarding whether the proposed category should incorporate additional requirements to help ensure that essential community facilities activities include a benefit to low- or moderate-income residents in the communities served by these projects. Several commenters asserted that CRA

⁴⁶⁸ Suggestions also included adding support for grocery stores to the illustrative list of eligible activities in proposed § _____.14(a). For discussion of the proposed and final rules regarding the illustrative list of eligible community development loans, investments, and services, see the section-by-section analysis of final § _____.14(a).

credit should be given only to essential community facilities activities that serve critical community needs directly in low- and moderate-income areas that are otherwise unable to attract funding. One of these commenters stated that CRA credit should be limited if the market is already fully able to serve such needs. Another commenter recognized the challenges of determining the specific population of people who benefit from a public investment, but argued for identifying a set of characteristics or parameters to distinguish certain projects beneficial to low- and moderate-income residents from those where financing would be readily available at reasonable terms notwithstanding CRA eligibility.

Other commenters emphasized that the goal for qualifying activities under this category should be to provide benefits to low- and moderate-income residents. Commenter recommendations in support of this goal included, among others, that the final rule should: require banks to explain how low- and moderate-income residents benefit from an activity; include a primary purpose standard for qualifying bank support for essential community facilities under which a majority of the dollars invested by the bank would have to be directed toward supporting low- and moderate-income residents; and establish guardrails to ensure financing goes directly to low- and moderate-income communities, including metrics to measure benefits of these projects, such as jobs created for low- and moderate-income individuals and contracts with local companies, and growth in median income for census tract residents. A commenter recommended that any facility be presumed to serve low- and moderate-income residents if it is open to all residents of a targeted census tract, with fees (if any) that are affordable to low- and moderate-income persons.

A few commenters opposed adding other criteria to the essential community facilities category to ensure that low- and moderate-income communities and residents benefit. These commenters asserted that activities should qualify if they benefit the entire community, including but without a specific focus on low- and moderate-income residents. A commenter recommended that essential community facilities should qualify, at least for partial credit, if located outside of targeted census tracts, if and to the extent they benefit low- and moderate residents of the targeted geographic areas.

Final Rule

The agencies are adopting proposed § _____.13(f), reorganized for clarity and

consistency with the structures of other place-based categories and modified as described below. Consistent with the proposal, final § ____.13(f) provides the general definition of the types of activities included in this category of community development, and requires that these activities must also meet specific place-based eligibility criteria in final § ____.13(f)(1) through (3).

Section ____.13(f) In General

Under final § ____.13(f), essential community facilities are public facilities that provide essential services generally accessible by a local community, including, but not limited to, schools, libraries, childcare facilities, parks, hospitals, healthcare facilities, and community centers that benefit or serve targeted census tracts. The final rule reflects technical edits for readability, but is substantively consistent with the proposal. As noted in the discussion of the revitalization or stabilization category in § ____.13(e) above, the agencies believe that the final rule, with the common place-based criteria discussed throughout the section-by-section analysis of § ____.13(e) through (j), will provide stakeholders with a better upfront understanding of the types of essential community facilities that will qualify as community development relative to an “attract or retain” standard, resulting in more consistency in application. Further, the agencies believe that, relative to current practice, the final rule will better ensure that loans, investments, and services support activities aligned with the purposes of CRA to meet the credit needs of entire communities, including low- or moderate-income individuals.

The proposed rule defined essential community facilities as those that are “conducted in” targeted census tracts; the final rule revises the proposal to define essential community facilities as those that “benefit or serve” residents of targeted census tracts, including low- and moderate-income individuals. The agencies proposed the “conducted in” standard to facilitate a bank’s demonstration that activities are benefiting and serving the residents of a targeted census tract. Based on comments and on further consideration, however, the agencies believe that the “conducted in” standard could exclude facilities located in close proximity to a targeted census tract that nonetheless benefit and serve residents of that census tract, including low- and moderate-income individuals. For example, under the proposal, a construction loan to build a fire station located just outside but primarily serving residents of a targeted census

tract would have not qualified for consideration. Under the final rule, that construction loan could be considered, provided the loan’s other criteria are met. The agencies believe that the requirement as revised—to require that essential community facilities benefit or serve targeted census tracts—will ensure a strong connection between essential community facilities and community needs in targeted census tracts, and that this connection will be further bolstered by the other two place-based criteria (e.g., undertaken with a plan, program, or initiative that includes a focus on benefiting or serving the targeted census tract and not directly resulting in the forced or involuntary displacement of low- or moderate-income individuals in the targeted census tract). The agencies note that banks will be expected to be able to demonstrate that a project benefits the targeted census tracts in accordance with the rule.

The agencies considered but are not adopting the suggestion for a presumption that any facility open to all residents of targeted census tracts with affordable fees serves low- and moderate residents, given the variety of potential facts and circumstances. The agencies believe, however, that a facility will qualify for consideration if a bank demonstrates that the facility is public and provides essential services, serves low- or moderate-income residents in the targeted census tract, and meets the rule’s other required criteria. Similarly, the agencies are not adopting the commenter suggestion that activities qualify if they benefit the entire community without specific inclusion of low- and moderate-income individuals. The agencies believe that qualifying essential community facility activities should be demonstrably inclusive of low- and moderate-income individuals, in alignment with the CRA’s express focus on encouraging banks to meet low- and moderate-income community needs in the communities they serve.

Final § ____.13(f) adopts the proposed list of examples of essential community facilities: schools, libraries, childcare facilities, parks, hospitals, healthcare facilities, and community centers, which are generally consistent with examples found in current guidance. The agencies believe that these examples provide adequate clarity to illustrate the types of activities that may qualify under this category. The list is intended to help clarify, for instance, that a loan to help build a public school or a community center that serves residents of a targeted census tract would qualify for community development consideration, provided

all other criteria of § ____.13(f) are met. While the final rule does not adopt other examples raised by commenters, the agencies note that the list of examples is illustrative and non-exhaustive. The final rule does not preclude agency consideration of investments, loans, or services supporting other types of essential community facilities meeting the criteria set forth in § ____.13(f). The agencies do not believe that identifying every kind of essential community facility in the regulation is practicable or possible. However, the agencies will take commenters’ suggestions under advisement as the agencies develop the illustrative list contemplated by § ____.14(a).

Additionally, activities mentioned by commenters that might not qualify as essential community facilities under the final rule might qualify under other categories of community development. For example, a loan to finance a public road or sewer could qualify for consideration as supportive of essential community infrastructure under § ____.13(g), if all of the rule’s criteria were met, while a grant to support a food bank that opens a food pantry could qualify under § ____.13(d) as supportive of a community supportive service. Financing of retail service businesses such as grocery stores, retail pharmacies, and other neighborhood-scale services are generally private sector facilities, and thus are not considered essential community facilities, which are defined as public facilities. However, these retail services may qualify as revitalization or stabilization activities under § ____.13(e), should they meet the criteria of that provision.

On consideration of the comments and further deliberation, the agencies are not adopting additional or alternative requirements to help ensure that essential community facilities include a benefit to low- or moderate-income residents in the communities served by these projects. For example, regarding comments that the rule should qualify only activities supporting critical community needs, the agencies believe that this approach could be overly limiting in light of communities’ varying needs and different views about which needs are critical. The agencies intend the final rule to maintain sufficient flexibility for banks and communities to address a wide range of needs that communities consider important.

Regarding comments that the rule should require activities to have a primary purpose of serving low- and moderate-income residents in targeted

census tracts, the final rule seeks to maintain flexibility for activities to meet a range of community needs, while also requiring the inclusion of low- or moderate-income individuals as beneficiaries. As noted, this flexibility remains particularly important in distressed and underserved nonmetropolitan middle-income census tracts, which can have fewer low- or moderate-income residents. On the other hand, the agencies are also not adopting the suggestion to qualify facilities open to the entire community without specific inclusion of low- and moderate-income individuals. The agencies believe that the final criterion, as adopted, is tailored and consistent with the CRA statute, which focuses on benefits to communities, including to low- or moderate-income populations. The agencies believe that the rule as finalized, combined with the majority standard set forth in § _____.13(a),⁴⁶⁹ appropriately ensures inclusion of low- or moderate-income residents.

For similar reasons, the agencies are also not incorporating into final § _____.13(f) metrics for measuring the benefits of essential community facility activities to low- and moderate-income individuals. The agencies are concerned that specific metrics-related requirements or methodologies for demonstrating low- or moderate-income benefits of essential community facilities could be overly burdensome and complex to apply, potentially dissuading banks from supporting essential community facilities and limiting the adaptability of the rule to accommodate a variety of activities over time. However, banks will be expected to demonstrate that essential community facilities benefit or serve residents of targeted census tracts, including low- and moderate-income individuals. Finally, as discussed further in the section-by-section analysis of § _____.13(a), the agencies are not adopting a partial consideration option in § _____.13(f). The agencies believe the primary focus of activities should be to benefit or serve residents of targeted tracts and an alternative option providing partial consideration would allow for qualification of

activities that do not share this focus as an intentional goal.

Section _____.13(f)(1) Through (3) Place-Based Criteria

The final rule adopts the three common place-based eligibility criteria for essential community facilities, reorganized to be in a consistent parallel order across all place-based categories, and with the revisions described in the discussion of the place-based criteria above in this section-by-section analysis. Accordingly, under the final rule, essential community facilities are public facilities that: are undertaken in conjunction with a plan, program, or initiative of a Federal, State, local, or tribal government or a mission-driven nonprofit organization, where the plan, program, or initiative includes a focus on benefiting or serving targeted census tracts (final § _____.13(f)(1)); benefit or serve residents, including low- or moderate-income individuals, of targeted census tracts (final § _____.13(f)(2)); and do not directly result in the forced or involuntary relocation of low- or moderate-income individuals in targeted census tracts (final § _____.13(f)(3)). As noted, the reasons for adopting these final criteria, and for revisions to the proposed criteria, are collectively discussed above in this section-by-section analysis.

Section _____.13(g) Essential Community Infrastructure

The Agencies' Proposal

In proposed § _____.13(g), the agencies proposed a category of community development for essential community infrastructure activities, defined as activities that provide financing and other support for infrastructure, including, but not limited to broadband, telecommunications, mass transit, water supply and distribution, and sewage treatment and collection systems. The proposal further defined essential community infrastructure as activities conducted in targeted census tracts (as defined in proposed § _____.12 and discussed above) that also meet the other place-based criteria discussed above: that activities benefit or serve residents, including low- or moderate-income residents (proposed § _____.13(g)(1)); that activities do not displace or exclude low- or moderate-income residents in the targeted census tracts (proposed § _____.13(g)(2)); and that an activity that finances or supports essential community infrastructure must be conducted in conjunction with a Federal, State, local, or tribal government plan that includes an explicit focus on benefiting or serving

the targeted census tracts (proposed § _____.13(g)(3)). Thus, under the proposal, support for larger infrastructure projects could be eligible for community development consideration if the project is conducted in relevant targeted census tracts, demonstrably benefits the residents of the targeted census tracts, and it is evident that, in particular, low- or moderate-income residents, of the targeted census tracts would benefit and not be excluded from the larger-scale improvements.

Comments Received

Many comments on proposed § _____.13(g) provided feedback on the types of infrastructure that should be considered essential community infrastructure, with a number requesting clarification about specific types of infrastructure projects. Many commenters expressly supported the proposed consideration for broadband activities, emphasizing, among other things, the importance of broadband access in community resilience, closing the digital divide, and creating access to financial services, jobs, healthcare, and education, and noting the role of CRA in overcoming broadband investment costs. Additional commenter feedback included support for qualification of broadband infrastructure only if reliable, affordable, and locally controlled; and support for qualifying only the infrastructure examples included as part of the proposal. Other commenters generally highlighted the importance of investments made in functioning roadways, internet, health, and safety, with additional suggestions that the regulation specify a range of activities that qualify as essential community infrastructure, including renewable energy projects; transit-oriented infrastructure, including road and technology infrastructure; hospital construction; jail renovations; and refuse services.

The agencies also received a number of comments in response to the agencies' request for feedback regarding whether the proposed category should incorporate additional criteria to help ensure that essential community infrastructure activities include a benefit to low- or moderate-income residents in the communities served by these projects. Some commenters opposed additional criteria for community development consideration of infrastructure projects (or community facilities), indicating that activities benefiting all residents, including persons of any income level, should qualify. As discussed in more detail below, other commenters on this aspect

⁴⁶⁹ For further discussion of the standards for receiving full credit for a loan, investment, or service supportive of essential community facilities or essential community infrastructure, and related public comments, see the section-by-section analysis of § _____.13(a). Loans, investments, or services supporting community development under final § _____.13(f) meet the "majority standard" for receiving full credit if the majority of the beneficiaries are, or the majority of dollars benefit or serve, residents of targeted census tracts. See final § _____.13(a)(1)(i)(B)(4).

of the proposal supported an emphasis on benefits to low- and moderate-income residents, with some suggesting additional criteria for ensuring that community infrastructure projects qualifying as community development under the CRA benefit low- and moderate-income residents.

Some commenters asserted that essential community infrastructure activities should be focused on benefiting low- and moderate-income residents of targeted census tracts (or other relevant geographic areas). For example, a commenter expressed concerns about certain proposed infrastructure examples such as broadband, water, and sewage, as greatly expanding the number and types of eligible activities without a clear benefit to low- and moderate-income people and places. A few commenters recommended that essential community infrastructure be limited to activities with a clear and demonstrable benefit to, or primary purpose of serving, low- and moderate-income people and geographic areas. Several commenters suggested that CRA credit for infrastructure should be limited based on a strong correlation with benefits to low- and moderate-income individuals and families because reasonable financing is already available for most essential infrastructure projects. Commenters also asserted that CRA credit should be given only to essential community infrastructure activities that serve critical community needs directly in low- and moderate-income areas and are otherwise unable to attract funding. A few commenters recommended that essential community infrastructure be limited to activities with a clear and demonstrable benefit to, or primary purpose of serving, low- and moderate-income people and geographies. Another commenter emphasized that qualifying activities in this category should have a clear objective of meeting needs in targeted communities.

Other comments on ensuring benefits for ensuring benefit for low- and moderate-income individuals and communities included support for limiting CRA consideration to those activities with a strong correlation to benefits for low- and moderate-income individuals and families, such as a project in a majority low- and moderate-income population census tract. Suggestions for measuring the benefits of infrastructure projects to low- and moderate-income communities included considering jobs created for low- and moderate-income individuals; contracts with local companies; economic growth-related metrics such as growth in median income for census tract

residents; and environmental improvements, such as greenhouse gas emissions and/or pollution reductions, increases in the amount of greenspace, community health benefits, and climate adaptation strategies.

Citing the impact of historical disinvestment in basic infrastructure on many low- and moderate-income communities, particularly minority communities, a commenter suggested that the CRA framework should prioritize ensuring that all communities have a minimum standard of infrastructure, including protective infrastructure, over enhancing infrastructure in areas that already have a standard level of investment. Another commenter suggestion was that the agencies consider a bank's activities supporting essential community infrastructure in light of the overall balance of activities that comprise a bank's portfolio, to ensure that a significant portion of the bank's community development activities are targeting places and populations of high need with products that are not otherwise likely to be offered by the bank. This commenter further suggested that that agencies cap the volume of essential community infrastructure that could be included in the proposed Community Development Financing Metric,⁴⁷⁰ asserting that essential community infrastructure projects are often relatively safe investments to make but might not necessarily be directly targeted to low- and moderate-income persons or communities.

As also discussed above in the section-by-section analysis of § _____.13(a), a few commenters expressed support for giving partial credit for essential community infrastructure activities. Citing the large-scale nature of many infrastructure projects and concerns about the potential difficulty of applying the proposed primary purpose standard,⁴⁷¹ commenters recommended various approaches to a partial credit framework for essential community infrastructure. These included partial credit based on the percentage of low- and moderate-income census tracts served by the activity, or based on whether the infrastructure project meets or exceeds a minimum threshold of serving low- and moderate-income census tracts, residents, or small businesses or farms. A commenter separately suggested granting at least partial credit for

⁴⁷⁰ See proposed § _____.24. See also final § _____.24 and the accompanying section-by-section analysis.

⁴⁷¹ See proposed § _____.13(a). See also final § _____.13(a) and the accompanying section-by-section analysis.

infrastructure (and facilities) located outside of targeted census tracts, as long as the infrastructure benefits residents of those census tracts. In contrast, at least one commenter expressly opposed providing partial credit for bank support of essential community infrastructure, noting concerns that these activities tend to be large dollar transactions that are not necessarily targeted at low- and moderate-income residents with intentionality, and thus partial credit could allow for more projects to qualify and potentially comprise a significant portion of a bank's community development finance metric numerator at the expense of smaller, more impactful investments. However, this commenter recommended an exception for partial credit for activities in rural communities and cities with low bond ratings and thus that might not otherwise receive financing support.

Final Rule

The agencies are adopting proposed § _____.13(g), reorganized for clarity and consistency with the structures of other place-based categories and modified as described below. Consistent with the proposal, final § _____.13(g) provides the general definition of the types of activities included in this category of community development, and requires that they meet specific place-based eligibility criteria in final § _____.13(g)(1) through (3).

Section _____.13(g) In General

Under final § _____.13(g), essential community infrastructure comprises activities benefiting or serving targeted census tracts, including but not limited to broadband, telecommunications, mass transit, water supply and distribution, and sewage treatment and collection systems. Thus, final § _____.13(g) makes no substantive changes to the proposal other than technical edits for readability. As with other place-based categories, the agencies believe that final § _____.13(g), with the common place-based criteria discussed in more detail elsewhere in the section-by-section analysis of § _____.13, will provide stakeholders with a better upfront understanding of the types of essential community infrastructure that will qualify as community development relative to the current approach based on an "attract or retain" standard. Additionally, consistent with the proposal, the final rule clarifies that essential community infrastructure is a community development category that applies across all targeted census tracts (*i.e.*, low-income, moderate-income, distressed or underserved middle-

income census tracts), whereas, as noted, current guidance explicitly references infrastructure only in the context of distressed or underserved nonmetropolitan middle-income census tracts. Further, the agencies believe that, relative to current practice, the final rule will better ensure that loans, investments, and services support activities that align with the purposes of CRA to meet the credit needs of entire communities, including low- or moderate-income individuals.

As noted, proposed § _____.13(g) defined essential community infrastructure as those that are “conducted in” targeted census tracts; the final rule revises the proposal to define essential community infrastructure activities as those that “benefit or serve” residents of targeted census tracts, including low- or moderate-income individuals, similar to revisions made with respect to the essential community facilities category under § _____.13(f). As with proposed § _____.13(f), the agencies proposed the “conducted in” standard to facilitate a bank’s demonstration that essential community infrastructure activities are benefiting and serving the residents of a targeted census tract. Based on comments and on further consideration, the agencies believe that the “conducted in” standard could exclude infrastructure projects located in close proximity to a targeted census tract that nonetheless benefit and serve residents of that tract, including low- and moderate-income individuals. The agencies also intend this revision to strengthen the emphasis on benefits to residents of targeted census tracts, including low- or moderate-income individuals, in the event that infrastructure projects “conducted in” a targeted census tract might have only ancillary if any benefits for the targeted census tract. For example, a project to build a sewer line that connects services to a middle- or upper-income housing development but passes through a low- or moderate-income census tract without connecting needed sewer services to that community generally would not qualify as essential community infrastructure under the final rule.⁴⁷² In contrast, a project to improve water supply to residents of targeted census tracts could qualify as community development even if the water supply improvements were made outside of those census tracts, provided that the bank could demonstrate the project benefits the targeted census tracts in accordance with the rule. The agencies believe that the requirement as

revised—to require that essential community infrastructure benefit or serve targeted census tracts—will ensure a strong connection between essential community infrastructure and community needs in targeted census tracts, and that this connection will be further bolstered by the other two common place-based criteria. The agencies further note that banks will be expected to be able to demonstrate that a project benefits the targeted census tracts in accordance with the rule.

As noted above, the final rule adopts the proposed non-exhaustive list of examples of essential community infrastructure: broadband, telecommunications, mass transit, water supply and distribution, and sewage treatment and collection systems. On consideration of the comments and further review, the agencies continue to believe that the proposed examples provide adequate clarity for the types of activities that could be considered essential community infrastructure under final § _____.13(g), and also note that they generally align with current guidance, discussed above. Accordingly, examples of the types of loans, investments, and services that support essential community infrastructure under § _____.13(g) could include a municipal bond to help fund a transit improvement within targeted census tracts, or financing of a project to provide residents of targeted census tracts access to broadband, subject to the other criteria being met.

Regarding other examples raised by commenters, the agencies note that the list of examples is illustrative and non-exhaustive. Thus, the final rule does not preclude agency consideration of investments, loans, or services supporting other types of essential community infrastructure that meet the criteria set forth in § _____.13(g). The agencies do not believe that identifying every kind of essential community infrastructure in the regulation is practicable or possible. However, the agencies will take commenters’ suggestions under advisement as the agencies develop the illustrative list contemplated by § _____.14(a).

The agencies also considered the suggestion to limit the provision to only those activities listed in § _____.13(g), but believe that this approach would be too restrictive; communities may have differing infrastructure needs, and limitations could deter new or innovative essential community infrastructure projects. Additionally, activities that are not essential community infrastructure may qualify under other categories of community development. For example, a project to

redevelop vacant brownfield lots into buildable land would not qualify as essential community infrastructure in section § _____.13(g), but might qualify as a revitalization or stabilization activity pursuant to section § _____.13(e).

On consideration of the comments and further deliberation, the agencies believe that final § _____.13(g), combined with the majority standard set forth in § _____.13(a),⁴⁷³ appropriately ensures a focus on low- or moderate-income residents of targeted census tracts. Accordingly, the agencies have determined not to adopt additional or alternative requirements to help ensure that essential community infrastructure activities include a benefit to low- or moderate-income residents in the communities served by these projects. Having carefully reviewed commenter suggestions, the agencies are concerned that additional criteria might be overly limiting, such as qualifying only activities supporting critical community needs, or particular activities only under specified conditions, such as limited costs or local control. The agencies recognize that community needs can vary widely across communities, and therefore intend the final rule to be sufficiently adaptable for banks and communities to address those needs. While the agencies note that infrastructure projects in higher income areas tend to be sufficiently resourced, the agencies believe that the final rule will provide recognition of bank support for a variety of needed activities in targeted census tracts, including those projects that would be less likely to be funded otherwise.

In addition, the agencies are not adopting comments suggesting that the rule should require activities to primarily serve low- and moderate-income residents in targeted census tracts; to strongly correlate to the benefit to low- and moderate-income individuals; or to limit eligible activities to census tracts with majority low- or moderate-income populations. The final rule seeks to maintain flexibility for activities to meet a range of community needs, while also requiring the inclusion of low- or moderate-income individuals as beneficiaries. As noted in the discussion of essential community facilities (final § _____.13(f)), the agencies believe that this flexibility remains particularly important in distressed or

⁴⁷³ See final § _____.13(a)(1)(i)(B)(4) (providing that loans, investments, or services supporting community development under final § _____.13(f) and (g) meet the “majority standard” for receiving full credit if the majority of the beneficiaries are, or the majority of dollars benefit or serve, residents of targeted census tracts), discussed in the section-by-section analysis of final § _____.13(a)(1).

⁴⁷² See also Q&A § _____.12(g)(4)(iii)—4.

underserved nonmetropolitan middle-income census tracts, which can have fewer low- or moderate-income residents. Thus, the final rule is intended to balance a number of considerations by specifically requiring that essential community infrastructure under § _____.13(g) benefit or serve residents of these census tracts, or low- or moderate-income census tracts, but also requiring that low- or moderate-income individuals within those census tracts benefit from the project. At the same time, the agencies are declining to expand the rule to qualify activities benefiting all residents without regard to income level, as the agencies believe it is important that there be some demonstrated benefit to low- and moderate-income individuals.

For similar reasons, the agencies are also not adopting in the regulation recommended methods for measuring the benefits of these projects to low- and moderate-income individuals. The agencies are concerned that specific requirements in this regard could be overly burdensome and add a level of complexity to the rule that could run counter to facilitating partnerships between banks and communities to meet essential community infrastructure needs. The agencies further believe that there is a need to maintain flexibility in the rule, as noted above, for qualifying a range of infrastructure projects that meet varying community needs. However, banks will be expected to demonstrate that all of the criteria in § _____.13(g) have been met, notably the criterion in § _____.13(g)(2) that essential community infrastructure benefits or serves residents of targeted census tracts, including low- and moderate-income individuals.

The agencies have also considered comments suggesting an option to provide partial credit for activities under § _____.13(g), but continue to believe that not including a partial credit option for essential community infrastructure will better facilitate clarity and consistency in the consideration of essential community infrastructure. In addition, the agencies are concerned that providing partial credit could allow for qualification of projects without a specific focus on benefiting and serving residents of targeted census tracts, and might allow for activities with only tangential benefits to the targeted census tracts. The agencies recognize commenter concerns that the criteria for essential community infrastructure could result in support for larger infrastructure projects not qualifying for CRA credit, but believe that these larger projects are likely to have financing options even if

they have only ancillary benefits to residents of targeted census tracts. The place-based criteria adopted under the final rule thus are designed to help ensure that community development under the CRA includes larger infrastructure projects that provide clear and meaningful benefits to residents of targeted census tracts, and that smaller projects benefiting residents of targeted census tracts have needed financial support. Larger scale infrastructure projects will qualify if they meet all required criteria, including that there is a demonstrated majority benefit for residents of targeted census tracts.⁴⁷⁴ Thus, a bank could purchase a bond to fund improvements for a citywide water treatment project that is consistent with a city's capital improvement plan; this bond purchase would qualify if the majority of the project benefits or serves residents in the eligible census tracts, includes low- or moderate-income residents, and meets the other criteria of § _____.13(g).

Section _____.13(g)(1) Through (3) Place-Based Criteria

The final rule adopts the three common place-based eligibility criteria for essential community infrastructure, reorganized to be in a consistent parallel order across all place-based categories, and with the revisions described in the discussion of the place-based criteria above in this section-by-section analysis. Accordingly, under the final rule, essential community infrastructure are activities that: are undertaken in conjunction with a plan, program, or initiative of a Federal, State, local, or tribal government or a mission-driven nonprofit organization, where the plan, program, or initiative includes a focus on benefiting or serving targeted census tracts (final § _____.13(g)(1)); benefit or serve residents, including low- or moderate-income individuals, of targeted census tracts (final § _____.13(g)(2)); and do not directly result in the forced or involuntary relocation of low- or moderate-income individuals in targeted census tracts (final § _____.13(g)(3)). As noted, the reasons for adopting these final criteria, and for revisions to the proposed criteria, are collectively discussed above in this section-by-section analysis.

Section _____.13(h) Recovery Activities in Designated Disaster Areas

Current Approach and the Agencies' Proposal

Similar to the current CRA regulations and guidance regarding support for

designated disaster areas,⁴⁷⁵ proposed § _____.13(h) would establish recovery activities in designated disaster areas as a category of community development. Specifically, proposed § _____.13(h)(1) stated that these recovery activities comprised activities that revitalize or stabilize geographic areas subject to a Major Disaster Declaration administered by the Federal Emergency Management Agency (FEMA). Consistent with current guidance, the proposed provision expressly excluded activities that revitalize or stabilize counties designated to receive only FEMA Public Assistance Emergency Work Category A (Debris Removal) and/or Category B (Emergency Protective Measures), but modified the exclusion by providing that the agencies may determine to grant a temporary exception for these areas.⁴⁷⁶ Also aligned with current guidance, the proposal provided that activities promoting the revitalization or stabilization of designated disaster areas would be eligible for CRA consideration for 36 months after a Major Disaster Declaration unless that period is extended by the agencies.⁴⁷⁷

The proposal further defined recovery activities in designated disaster areas as activities that also meet the other place-based criteria discussed above: that activities benefit or serve residents, including low- or moderate-income residents (proposed § _____.13(h)(2)); not displace or exclude low- or moderate-income residents, of these geographic areas (proposed § _____.13(h)(2)); be conducted in conjunction with a Federal, State, local, or tribal government disaster plan that includes an explicit focus on benefiting the designated disaster area (proposed § _____.13(h)(3)). Under the proposal, activities in designated disaster areas that meet these eligibility standards could be considered regardless of the income level of the designated census tracts.

Comments Received

Comments on the proposal regarding recovery activities in designated disaster areas generally focused on the agencies' specific request for feedback on whether they should consider any additional criteria to ensure that activities in this category benefit low- or moderate-income individuals and communities. Some commenters, for example, indicated support for additional criteria for this category to focus the benefits of

⁴⁷⁵ See 12 CFR _____.12(g)(4)(ii). See also Q&A § _____.12(g)(4)(ii)-1 and -2.

⁴⁷⁶ See proposed § _____.13(h)(1); compare with Q&A § _____.12(g)(4)(ii)-1.

⁴⁷⁷ See *id.*

⁴⁷⁴ See final § _____.13(a)(1)(i)(B)(4) and the accompanying section-by-section analysis.

recovery activities in disaster areas on low- and moderate-income individuals and communities and to avoid recovery efforts being concentrated in higher-income areas. Commenters noted that disasters disproportionately impact low-income communities, and pointed to the inequitable distribution of recovery resources following a disaster. Several of these commenters recommended metrics to help ensure low- and moderate-income community benefit of disaster recovery activities, such as: (1) requiring that a specific percentage of benefits inure to low- and moderate-income residents; (2) use of a Social Vulnerability Index to help determine and assess low- and moderate-income benefit; or (3) consideration of criteria used in the Census Bureau's Community Resilience Estimates, which focus on various factors that could impact a community's ability to survive and rebound from declared disasters.⁴⁷⁸ A few commenters further suggested that the agencies give credit for activities that serve displaced residents who were forced to migrate, as well as the census tracts that receive those displaced residents; or require that recovery activities in designated disaster areas benefit low- and moderate-income communities, minority communities, or both, in order to be eligible for CRA consideration. Another commenter similarly suggested that the focus of disaster recovery should be expanded to include minority communities, to ensure the agencies are fulfilling their obligation under the Fair Housing Act's affirmatively furthering fair housing provision.⁴⁷⁹ This commenter suggested that minority individuals and communities are especially vulnerable to disasters and are also the least likely to have access to the resources needed to recover from disasters. Commenter feedback also included a recommendation to qualify activities that primarily benefit low- and moderate-income communities affected by a natural disaster without requiring a FEMA declaration or disaster plan for that community.

In lieu of additional criteria, a few commenters advocated for using the proposed impact review to give positive treatment for bank financing activities for disaster recovery based on the extent to which low- and moderate-income

individuals or neighborhoods benefit.⁴⁸⁰ For instance, a commenter suggested that CRA performance evaluations should specifically factor in the degree to which these activities benefit low- and moderate-income populations, with higher scores assigned to projects benefiting low- and moderate-income residents than other projects.

Some commenters supported qualifying recovery activities in designated disaster areas, regardless of income level, or otherwise opposed additional criteria to ensure benefits for low- and moderate-income individuals and communities in designated disaster areas. For example, a commenter supported considering disaster recovery activities as responsive to community needs and suggested that such activities in middle- and upper-income areas can benefit low- and moderate-income persons. A few commenters suggested that the agencies rely on the expertise of the bank's CRA professional to create a case for the activity and demonstrate that the activity is in direct response to a natural disaster. Another commenter referenced current guidance on disaster recovery activities under the CRA that are not income-limited,⁴⁸¹ and asserted that, to ensure that disaster recovery efforts are effective, all members of any community who have experienced economic dislocation due to a disaster must continue to be able to benefit from the community development activities undertaken by the financial institution, regardless of income.

Final Rule

Final § _____.13(h) adopts proposed § _____.13(h), reorganized for clarity and consistency with the structures of other place-based categories, and modified as described below. Consistent with the proposal, final § _____.13(h)(1) provides the general definition of the types of activities included in this category of community development and specifies that they must also meet the common place-based eligibility criteria (final § _____.13(h)(1)(i) through (iii)). Final § _____.13(h)(2) contains the proposed exclusion from consideration for loans, investments, and services supporting disaster recovery in counties designated to receive only FEMA Public Assistance Emergency Work Category A (Debris Removal) and/or Category B (Emergency Protective Measures), and the timeframe for eligibility for consideration.

Section _____.13(h)(1) Recovery of Designated Disaster Areas

Under final § _____.13(h)(1), activities that promote recovery of a designated disaster area are those that revitalize or stabilize geographic areas subject to a Major Disaster Declaration administered by FEMA. The final rule relocates the proposed additional parameters for qualification from proposed § _____.13(h)(1) to final § _____.13(h)(2), described below. The final rule is intended to describe eligible disaster recovery activities more clearly, as a stand-alone community development category of community development in the regulation, rather than including disaster recovery activities as a subcategory of revitalization and stabilization. Examples of bank activities for CRA credit as supportive of disaster recovery activities under final § _____.13(h) include, but are not limited to, assistance with rebuilding infrastructure; financing to retain businesses that employ local residents; and recovery-related housing or financial assistance to individuals in the designated disaster areas. As with the other place-based categories, the agencies believe that the final rule on disaster recovery activities, with the common place-based criteria discussed in more detail above, will provide stakeholders with a better upfront understanding of the types of disaster recovery activities that will qualify as community development relative to the current "attract or retain" standard.

The agencies have considered commenter suggestions for additional or alternative criteria to help ensure that designated disaster recovery activities include a benefit to low- or moderate-income residents in the communities served by these projects. In particular, the agencies are sensitive to commenter concerns that disasters can often more severely impact low- and moderate-income individuals. At the same time, given the disparate and widespread impacts that major disasters can involve, the agencies are concerned about unduly limiting qualification of activities under this category and possibly qualifying fewer disaster recovery activities than under the current rule. Thus, the agencies are not adopting commenter suggestions that the rule should require that a majority of, or all, of disaster recovery activity benefits go to low- or moderate-income residents and communities, or other similar limitations noted in the summary of comments above. The agencies continue to believe that activities that promote the recovery of designated disaster areas should benefit

⁴⁸¹ See Q&A § _____.12(g)(4)(ii)-1 and -2.

the entire community, including, but not limited to, low- or moderate-income individuals and communities, consistent with the purposes of CRA. Further, the agencies believe that the common place-based criteria adopted under the final rule will ensure a strong connection to community needs in designated disaster areas. Specifically, while activities in all census tract income levels may be considered, these activities must benefit or serve residents of the census tracts included in the designated disaster area, including low- or moderate-income individuals, and must not directly result in forced or involuntary relocation of individuals in designated disaster areas.

The agencies are also not adopting the suggestion to include under disaster recovery those activities that are not tied to specific FEMA Major Disaster Declarations or disaster recovery plans. The agencies believe that revising the current (and proposed) rule to take a more expansive approach to designating eligibility under the disaster recovery category would be overbroad and could require supplemental eligibility criteria that would add complexity to the final rule, potentially detracting from the increased clarity and transparency for stakeholders and examiners that the final rule is designed to achieve. Incorporating State disaster declarations, for example, would pose compliance and implementation challenges due to varying standards and the large volume of such declarations.

The agencies believe that generally retaining current and proposed parameters related to disaster recovery activities, including the focus on federally designated disaster areas and a nexus to a plan, program, or initiative,⁴⁸² benefits stakeholders by providing consistency and predictability. The agencies also believe that the final rule's tie to geographic areas subject to a FEMA Major Disaster Area Declaration will provide recognition for a wide range of projects benefiting communities in crisis across the United States within appropriately far-reaching, yet clearly defined, geographic areas. The agencies also note that there have been a significant number of FEMA Major Disaster Declarations in recent years, further indicating that the final rule approach has an appropriate scope for considering a wide range of activities assisting many specifically impacted communities.

Finally, the agencies are declining to adopt specific methods to measure benefits as suggested by some

commenters. As with similar suggestions for other place-based categories, the agencies are concerned that specific requirements could be difficult to implement and dissuade banks from engaging in these activities. The agencies further aim to support adaptability of the rule and recognize that different facts and circumstances could give rise to a wide range of appropriate ways to demonstrate that an activity meets the disaster recovery standards in final § _____.13(h). As noted elsewhere, however, banks will be expected to demonstrate that they have met all of the criteria in § _____.13(h) for activities in designated disaster areas, notably that the activities benefit residents, including low- or moderate-income individuals, of designated disaster areas.

Section _____.13(h)(1)(i) Through (iii) Place-Based Criteria

The final rule adopts the three common place-based eligibility criteria for disaster recovery activities, reorganized to be in a consistent parallel order across all place-based categories, and with the revisions described in the discussion of the place-based criteria above in this section-by-section analysis. Under the final rule, activities that promote recovery from a designated disaster are activities that: are undertaken in conjunction with a disaster plan, program, or initiative of a Federal, State, local, or tribal government or a mission-driven nonprofit organization, where the plan, program, or initiative includes a focus on benefiting or serving the designated disaster area (final § _____.13(h)(1)(i)); benefit or serve residents, including low- or moderate-income individuals, of the designated disaster area (final § _____.13(h)(1)(ii)); and do not directly result in the forced or involuntary relocation of low- or moderate-income individuals in the designated disaster area (final § _____.13(h)(1)(iii)). As noted, the reasons for adopting these final criteria, and for revisions to the proposed criteria, are collectively discussed above in this section-by-section analysis.

Section _____.13(h)(2) Eligibility Limitations for Loans, Investments, or Services Supporting Recovery of a Designated Disaster Area

Final § _____.13(h)(2) relocates and adopts, with non-substantive clarifications, the additional eligibility parameters in proposed § _____.13(h)(1). Specifically, under § _____.13(h)(2)(i), loans, investments, or services that support activities promoting recovery from a designated disaster in counties

designated to receive only FEMA Public Assistance Emergency Work Category A (Debris Removal) and/or Category B (Emergency Protective Measures) are not eligible for consideration under § _____.13(h), unless the agencies announce a temporary exception. Section _____.13(h)(2)(ii) states that loans, investments, and services that support activities under § _____.13(h) are eligible for consideration up to 36 months after a Major Disaster Declaration, unless that time period is extended by the agencies.

The agencies continue to believe that activities covered under Categories A and B are generally short-term recovery activities that would significantly expand the number of designated disaster areas,⁴⁸³ and that longer-term activities are more likely to provide sustained benefits to impacted communities and thus are a more appropriate focus under the CRA. The agencies are therefore generally adopting the definition of designated disaster areas included in the Interagency Questions and Answers,⁴⁸⁴ and permitting the agencies to consider exceptions on a case-by-case basis, such as disaster declarations for the COVID-19 pandemic. Similarly, consistent with the proposal and current guidance, the agencies are adopting a time frame in § _____.13(h)(2)(ii) making loans, investments, and services that support activities under § _____.13(h) eligible for consideration up to 36 months after a Major Disaster Declaration. Thus, for example, providing a loan for rebuilding a commercial property 24 months after a declaration could qualify, even if the project continues to be financed past 36 months. Overall, the agencies believe that adopting these criteria will recognize comments that supported a continuance of current practice for this category and provide clarity for banks on the qualification of activities.

Section _____.13(i) Disaster Preparedness and Weather Resiliency Activities

Current Approach

The agencies' CRA regulations have allowed CRA consideration for certain activities that help communities recover from natural disasters, including activities that help to revitalize and stabilize designated disaster areas, as discussed above. On a limited basis, activities that help designated disaster areas mitigate the impact of future disasters may be considered under CRA

⁴⁸³ See, e.g., FEMA, "Public Assistance Fact Sheet" (Oct. 2019), https://www.fema.gov/sites/default/files/2020-07/fema_public-assistance-fact-sheet_10-2019.pdf.

⁴⁸⁴ See Q&A § _____.12(g)(4)(ii)–1.

⁴⁸² See proposed § _____.13(h); see also Q&A § _____.12(g)(4)(ii)–1 and –2.

if Hazard Mitigation Assistance is included in the FEMA disaster declaration.⁴⁸⁵ Outside of activities related to disaster recovery, the Interagency Questions and Answers provide examples of “community development loans” that include loans financing “renewable energy, energy-efficient, or water conservation equipment or projects that support the development, rehabilitation, improvement, or maintenance of affordable housing or community facilities.”⁴⁸⁶ However, the current regulations and guidance do not expressly identify as eligible for CRA credit activities related to helping low- or moderate-income individuals, low- or moderate-income communities, small businesses, or small farms prepare for disasters or build resilience to future weather-related events.

The Agencies’ Proposal

In proposed § _____.13(i), the agencies proposed to establish a separate category of community development for activities that assist individuals and communities to prepare for, adapt to, and withstand natural disasters, weather-related disasters, or climate-related risks. As with other proposed place-based categories of community development, eligibility under this category would be conditioned on meeting the proposed common place-based criteria. Specifically, the proposal stated that disaster preparedness and climate resiliency activities are those conducted in targeted census tracts and that: benefit or serve residents, including low- or moderate-income residents, in one or more of the targeted census tracts (proposed § _____.13(i)(1)); do not displace or exclude low- or moderate-income residents in the targeted census tracts (proposed § _____.13(i)(2)); and are conducted in conjunction with a Federal, State, local, or tribal government plan, program, or initiative focused on disaster preparedness or climate resiliency that includes an explicit focus on benefiting a geographic area that includes the targeted census tracts (proposed § _____.13(i)(3)).

Comments Received

General comments. Most commenters addressing proposed § _____.13(i) generally supported adding this category of activities under the community development definition, as an appropriate step to encourage

financial institutions to support disaster preparedness and climate resilience activities. A number of commenters asserted that these activities can mitigate risks that disproportionately impact low- and moderate-income communities, as well as indigenous communities and communities of color. For example, a commenter stated that low- and moderate-income communities are particularly vulnerable to extreme weather and other natural disasters because they are more likely to be sited in locations that have not benefited from investment in hazard mitigation. A few commenters highlighted the importance of proactive investment in communities as consistent with mission of the CRA, in addition to post-disaster funding. A few commenters asserted that climate resilience is a critical foundation for community health and economic stability and growth, while another noted that the proposed category could help communities understand what kinds of climate-related investments they can seek financing for, and help financial institutions understand which activities can receive CRA credit. In contrast, a commenter opposed the proposal to include this category of activities in the community development definition, arguing that such activities are inconsistent with the CRA.

As discussed in more detail below, while most commenters expressed general support for proposed § _____.13(i), many of these commenters urged the agencies to clarify or broaden the scope and types of activities that would qualify under the proposed category as a way to strengthen the rule. Commenters also offered suggestions for revising the proposed category’s required elements for place-based activities under proposed § _____.13(i)(1) through (3), described in more detail below. Commenters also addressed miscellaneous topics outside the scope of the proposed provisions, discussed at the end of this section-by-section analysis.

Qualifying activities: scope and examples. The agencies requested comment on whether the proposed disaster preparedness and climate resiliency category appropriately defined qualifying activities in proposed § _____.13(i) as those that assist individuals and communities to prepare for, adapt to, and withstand natural disasters, weather-related disasters, or climate-related risks. The proposal also provided various examples of eligible activities contemplated by this proposed provision. While commenters generally supported proposed § _____.13(i), many of those commenters requested the

agencies provide additional clarity; provide additional, non-exhaustive examples of eligible qualifying activities; and/or broaden the types of eligible activities.

For example, some commenters supported the term “climate-related risks,” but asserted that the agencies should interpret the term to include not only natural hazards or weather-related risks, but also environmental health and other risks exacerbated by climate change, such as those related to air quality, pest increases, and warming waters. A few commenters suggested State law climate mitigation frameworks as reference points. Other commenters suggested that the final rule specify, or provide as examples, a variety of activities they recommended should qualify, such as development of community solar and microgrids, battery storage, residential electrification, energy and water efficiency measures, green technology, broad environmental initiatives such as the creation and expansion of green jobs, greenhouse emission mitigation and decarbonization, and toxic waste and industrial site clean-up, among others. One commenter cautioned the agencies against being overly prescriptive, recommending that the final rule maintain definitions broadly associated with essential infrastructure, rather than list specific activities that could become obsolete.

Categorizing activities that promote energy efficiency. The agencies sought comment on whether activities that promote energy efficiency should be included as a component of the disaster preparedness and climate resiliency category, or whether those activities should be considered under other categories, such as affordable housing (§ _____.13(b)) and essential community facilities (§ _____.13(f)). The agencies also sought feedback on whether certain activities that support energy efficiency should be included as an explicit component of the definition. Most commenters addressing the question supported the agencies’ inclusion of energy efficiency-promoting activities as a component of the disaster preparedness and climate resiliency category. For example, a commenter stated that energy efficiency activities can insulate low-income individuals from price inflation and fluctuations resulting from disasters and climate change impacts. Another commenter noted that in addition to decreased utility costs, many energy-efficient techniques support climate resiliency because they help maintain habitable conditions when power is disrupted. A commenter recommended that energy

⁴⁸⁵ See Q&A § _____.12(g)(4)(ii)–1 and FEMA, “How a Disaster Gets Declared” (Apr. 25, 2023), <https://www.fema.gov/disaster/how-declared>.

⁴⁸⁶ Q&A § _____.13(h)–1.

efficiency promoting activities be included as a component of the rule, but consideration for the activities should be conditioned on whether the activities benefited low- or moderate-income individuals or communities. In contrast, one commenter expressed that the agencies should not include activities that promote energy efficiency as a component of disaster preparedness and climate resiliency, asserting that these activities are outside the scope of the CRA and are more appropriate for environmental, social, and corporate governance guidance.

Several commenters also suggested that the agencies should take a broad view of what constitutes an eligible energy efficiency-promoting activity, with some suggesting mitigation efforts be considered. Examples include, among others: energy-efficient upgrades (or new installation) for residential and commercial buildings, such as appliance and fixture replacements, weatherization, improved insulation, window replacements, heat pump and HVAC system purchase and installation; and electrification or decarbonization measures that would help stabilize home energy costs; and water efficiency measures.
