A regulatory flexibility agenda shall contain, among other things, a brief description of the subject area of any rule which is likely to have a significant economic impact on a substantial number of small entities. DHS's printed agenda entries include regulatory actions that are in the Department's regulatory flexibility agenda. Printing of these entries is limited to fields that contain information required by the agenda provisions of the Regulatory Flexibility Act. Additional information on these entries is available in the Unified Agenda published on the internet.

The semiannual agenda of the Department conforms to the Unified Agenda format developed by the Regulatory Information Service Center.

*Abstract:* The Department of Homeland Security (DHS) is

withdrawing its proposed rule titled Homeland Security Acquisition Regulation (HSAR) Subcontractor Labor Hour Rates Under Time and Materials Contracts (HSAR Case 2010-001) and providing a Notice of Withdrawal. The notice of proposed rulemaking proposed to amend the Homeland Security Acquisition Regulation (HSAR) parts 3016 and 3052 to require DHS contracts for time and material or labor hours (T&M/LH) to include separate labor hour rates for subcontractors and a description of the method that will be used to record and bill for labor hours for both contractors and subcontractors. DHS is withdrawing this proposed rule

because of differing agency priorities and the staleness of the public comments. DHS will not take any further action on this proposal at this time.

*Abstract:* The Coast Guard would amend the lifejacket approval requirements and follow-up program requirements by incorporating new bi-national standards. At the same time, the Coast Guard would amend lifejacket and personal flotation devices (PFDs) carriage requirements to allow for the use of equipment approved to the new standards, and to remove obsolete equipment approval requirements. The new standards are intended to replace the legacy standards. The amendments would streamline the process for approval of PFDs and allow manufacturers the opportunity to produce more innovative equipment that meets the approval requirements of both Canada and the United States,

while reducing the burden for manufacturers in both the approval process and follow-up program. The rule is expected to provide a cost savings by reducing the regulatory burden on PFD manufacturers by harmonizing our PFD approval standards with Canada, requiring less frequent inspections of manufacturing facilities, providing lower cost PFD user manuals, and by potentially creating a new market in PFDs with a lower buoyancy rating. This rule is consistent with Executive Order 14058, which directs agencies to take actions that improve service delivery and customer experience by decreasing administrative burdens, enhancing transparency, and improving the efficiency and effectiveness of government.

In June 2020, CISA published for public comment a retrospective analysis of the CFATS program. And in January 2021, CISA invited additional public comment through an ANPRM concerning the removal of certain explosive chemicals from CFATS. CISA intends to address many of the subjects raised in both ANPRMs and the retrospective analysis in this regulatory action, including potential updates to CFATS cybersecurity requirements and Appendix A to the CFATS regulations.
