SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for extension of an approved collection of information under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* and implementing regulations at 5 CFR part 1320. This information collection assists NOAA in the development of funding and financing coastal resilience learning products and tools in support of the Coastal Zone Management Act of 1972 (CZMA), 16 U.S.C. 1451 *et seq.* NOAA’s Office for Coastal Management (OCM) and its regional, State, Federal, and non-profit partners have worked closely with coastal managers across the country to increase the resilience of our coastal communities, economies and ecosystems. Under the CZMA, OCM provides financial and technical assistance to states and territories, including that which helps its customers (coastal managers) develop hazard mitigation and climate adaptation plans that include strategies for short-term responses to immediate threats (e.g., flooding, hurricanes) as well as long-term responses to gradual changes (e.g., sea level rise, drought). Services are provided through outreach, training, funding, resource, and tool development.

Solutions to these resilience challenges are often complex and cross-sectoral. Therefore, coastal decision-makers regularly point to the need for more substantial, coordinated, sustained
