Description

Sometime before 1968, human remains representing, at minimum, one individual were removed from Fort Osage (23JA45), in Jackson County, MO by an unknown party. Based on a past pattern of practice, it is likely that this individual was transferred to William Bass for analysis, possibly while he was at the University of Kansas, and subsequently brought by him to Knoxville when he began working at UTK in 1971. No associated funerary objects are present.

Cultural Affiliation

The human remains in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: archaeological information, geographical information, historical information, linguistics, and oral tradition.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, UTK has determined that:

- The human remains described in this notice represent the physical

remains of one individual of Native American ancestry.

- There is a relationship of shared group identity that can be reasonably traced between the human remains described in this notice and The Osage Nation.
