SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The Fire Protection in Shipyard Employment Standard specifies a number of information collection requirements. In general, the standard requires employers to develop a written fire safety plan covering elements that identify the potential fire risk hazards and procedures for reporting these hazards, employers to create, maintain, and update a written policy that describes the internal and outside fire response organizations that the employer will use, and employers to

notify employees and take the necessary precautions to make sure employees are safe from fire if for any reason a fire extinguishing system stops working. The standard also requires the employer to obtain medical exams for certain workers and to create and maintain records to certify that employees have been made aware of the details of the fire safety plan and that employees have been trained as required by the standard.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency’s functions to protect workers, including whether the information is useful;
- The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements specified in the Fire Protection in Shipyard Employment Standard. The agency is requesting an adjustment decrease in burden from 16,251 to 15,972 hours, a difference of 279 hours. This decrease in burden is due to the decrease in the number of affected workers and in the number of establishments.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Fire Protection in Shipyard Employment Standard.

OMB Control Number: 1218–0248.

Affected Public: Business or other for-profits.

Number of Respondents: 489.

Number of Responses: 185,473.

Frequency of Responses: On occasion.

Average Time per Response: Varies.

Estimated Total Burden Hours: 15,744.

Estimated Cost (Operation and Maintenance): \$0.
