SUPPLEMENTARY INFORMATION:

I. Background

The NPS maintains the INTERIOR/NPS–2, Land Acquisition and Relocation Files, system of records. The mission of the NPS is to preserve the natural and cultural resources and values of the National Park system for the enjoyment, education, and inspiration of this and future generations. Land protection activities play a vital role in accomplishing these objectives within National Park units (often referred to as parks). The purpose of the system of records is to manage land acquisition, relocation, and realty management activities for lands or interests in lands associated with National Park units.

DOI is proposing to change the name of the system from INTERIOR/NPS–2, Land Acquisition and Relocation Files, to INTERIOR/NPS–2, Land Acquisition, Relocation, and Realty Management Records, to reflect the expanded scope of the system of records to include realty management activities. DOI is also updating the system location, category of records, category of individuals, records source categories, storage, retrieval, records retention and disposal, and safeguards; updating the authorities in accordance with the new Title 54 of the U.S. Code, which includes only laws applicable to NPS; updating the notification, records access and contesting procedures; adding new sections for security classification, purpose, and history of the system of records; and making general updates to the remaining sections to accurately reflect management of the system of records in accordance with the Office of Management and Budget (OMB) Circular A–108, *Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act*.

DOI is also changing the routine uses from a numeric to alphabetic list and is proposing to modify existing routine uses to provide clarity and transparency, and to reflect updates consistent with standard DOI routine

uses. Routine use A was modified to further clarify disclosures to the Department of Justice (DOJ) or other Federal agencies, when necessary, in relation to litigation or judicial hearings. Modified routine use B clarifies disclosures to a congressional office to respond to or resolve an individual's request made to that office. Modified routine use D allows DOI to refer matters to the appropriate Federal, State, local, or foreign agencies, or other public authority agencies responsible for investigating or prosecuting violations of, or for enforcing, or implementing, a statute, rule, regulation, order, or license. Modified routine use J and proposed routine use K allow DOI and NPS to share information with appropriate Federal agencies or entities when reasonably necessary to respond to a breach of personally identifiable information (PII) and to prevent, minimize, or remedy the risk of harm to individuals or the Federal Government, or assist an agency in locating individuals affected by a breach in accordance with OMB Memorandum M–17–12, *Preparing for and Responding to a Breach of Personally Identifiable Information*. Routine use P was modified to remove the reference to condemnation proceedings since the condemnation process is covered by routine use A and add clarifying reference to the regulations of the Attorney General for review of title for Federal land acquisitions.

DOI is proposing new routine uses to facilitate sharing of information with agencies and organizations to promote the integrity of the records in the system or carry out a statutory responsibility of the DOI or Federal Government. Proposed routine use C facilitates sharing of information with the Executive Office of the President to resolve issues concerning individuals' records. Proposed routine use E allows NPS to share information with other Federal agencies to assist in the performance of their responsibility to ensure records are accurate and complete, and to respond to requests from individuals who are the subject of the records. Proposed routine use F facilitates sharing of information related to hiring, issuance of a security clearance, or a license, contract, grant or benefit. Proposed routine use G allows NPS to share information with the National Archives and Records Administration (NARA) to conduct records management inspections. Proposed routine use H allows NPS to share information with external entities, such as State, territorial and local

governments, and Tribal organizations needed in response to court orders and/or for discovery purposes related to litigation. Proposed routine use I facilitates sharing of information with an expert, consultant, grantee, shared service provider, or contractor when authorized and necessary to perform services on DOI's behalf to carry out the purposes of the system. Proposed routine use L facilitates sharing with the OMB in relation to legislative affairs mandated by OMB Circular A-19. Proposed routine use M allows NPS to share information with the Department of the Treasury to recover debts owed to the United States. Proposed routine use N allows NPS to share information with the news media and the public if there is a legitimate public interest in the disclosure of the information. Proposed routine use Q allows NPS to share information with other Federal agencies, Federal entities, State, territorial, and local governments, Tribal organizations, and nonprofit partners on land acquisition, relocation, or realty management projects. Proposed routine use R facilitates sharing of information when authorized and necessary for land acquisition, relocation, or realty management projects.

II. Privacy Act

The Privacy Act of 1974, as amended, embodies fair information practice principles in a statutory framework governing the means by how Federal agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to records about individuals that are maintained in a "system of records." A "system of records" is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. The Privacy Act defines an individual as a United States citizen or lawful permanent resident. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DOI by complying with DOI Privacy Act regulations at 43 CFR part 2, subpart K, and following the procedures outlined in the Records Access, Contesting Record, and Notification Procedures sections of this notice.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the existence and character of each system of records that the agency maintains, and the routine uses of each system. The INTERIOR/NPS-2, Land Acquisition, Relocation, and Realty Management Records,

system of records notice is published in its entirety below. In accordance with 5 U.S.C. 552a(r), DOI has provided a report of this system of records to the Office of Management and Budget and to Congress.

III. Public Participation

You should be aware your entire comment including your personally identifiable information, such as your address, phone number, email address, or any other personal information in your comment, may be made publicly available at any time. While you may request to withhold your personally identifiable information from public review, we cannot guarantee we will be able to do so.
