Discussion

The NRC is withdrawing RG 3.25, Revision 1, “Standard Format and Content of Safety Analysis Reports for Uranium Enrichment Facilities.” RG 3.25, Revision 1, provided guidance on the standard format and content of a safety analysis report (SAR) for uranium enrichment facilities and related documents submitted as part of an application to construct or modify and operate a nuclear fuel cycle facility. This RG revision endorsed the standard format and content for SARs and integrated safety analysis (ISA) summaries described in NUREG–1520, “Standard Review Plan for the Review of a License Application for a Fuel Cycle Facility,” as a process that the NRC staff found acceptable for meeting the regulatory requirements. Applicants use NUREG–1520 while developing fuel cycle facility applications, and NRC staff use NUREG–1520 while reviewing these applications.

NUREG–1520 provides current guidance to applicants and NRC staff reviewers on the acceptable content and format of SARs and ISA summaries. Therefore, the NRC determined that RG 3.25, Revision 1 is no longer needed to simply refer to NUREG–1520 and is being withdrawn. Revision 0 of RG 3.25 is also still available but is not the most recent acceptable guidance for developing and reviewing these license applications.

The withdrawal of RG 3.25, Revision 1, does not alter any prior or existing NRC licensing approval or the acceptability of licensee commitments to RG 3.25, Revision 1. Although RG 3.25, Revision 1 is withdrawn, current licensees may continue to use it and withdrawal does not affect any existing licenses or agreements. However, RG 3.25, Revision 1 should not be used in future requests or applications for NRC licensing actions. The NRC is considering the withdrawal of RG 3.25, Revision 0.

Additional Information

As noted in the **Federal Register** on December 9, 2022 (87 FR 75671), this document is being published in the “Rules” section of the **Federal Register** to comply with publication requirements under chapter I of title 1 of the Code of Federal Regulations.

Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC’s public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the “Regulatory Guide” series.

Dated: March 14, 2024.

DEPARTMENT OF ENERGY

10 CFR Part 436

RIN 1901–AB63

Energy Savings Performance Contract Procedures and Methods Technical Amendment

AGENCY: Federal Energy Management Program, Department of Energy.

ACTION: Final rule; technical amendment.

SUMMARY: The U.S. Department of Energy (DOE) is publishing this technical amendment to remove a regulatory provision specifying that the energy savings performance contract (ESPC) regulations apply only to ESPCs awarded on or before September 30, 2003. DOE’s technical amendment to remove the regulatory sunset date will make the regulations consistent with the statutory authority.

DATES: The effective date of this technical amendment is March 19, 2024.

SUPPLEMENTARY INFORMATION:

I. Background

Section 155(a) of the Energy Policy Act of 1992 (EPAAct 1992, Pub. L. 102–486) directed DOE, with the concurrence of the Federal Acquisition Regulatory Council, to “establish procedures and methods for use by Federal agencies to select, monitor, and terminate contracts with energy service contractors.” On April 10, 1995, DOE published a final rule implementing the current ESPC regulations (the 1995 Final Rule) (60 FR 18326), which included the sunset date originally in section 155 of the Energy Policy Act of 1992 (Pub. L. 102–486). Specifically, section 155(c)(1) of EPAAct 1992 provided, “The authority to enter into new contracts under this section shall cease to be effective five years after the date procedures and methods are established. . . .” The statutory sunset date was subsequently extended several times¹ until the ESPC statutory authority was permanently reauthorized by section 514 of the Energy Independence and Security Act of 2007 (Pub. L. 110–140), which removed the sunset language from 42 U.S.C. 8287.

In this rule, DOE is removing from 10 CFR 436.30(a) the provision specifying that subpart B applies only to ESPCs awarded on or before September 30, 2003. DOE’s removal of the regulatory sunset date will make the regulations consistent with the statutory authority.

II. Need for Correction

Currently, 10 CFR 436.30(a) specifies that subpart B applies only to ESPCs awarded on or before September 30, 2003. This provision is not consistent with current ESPC statutory authority, which was permanently reauthorized by EISA section 514. The regulatory amendment in this final rule makes the regulations consistent with statutory authority and therefore is technical in nature. DOE has historically updated the sunset language in the regulations to mirror the statutory language. (65 FR 39784; June 28, 2000). This final rule similarly updates the regulatory language to be consistent with statutory authority.
