Public Availability of Comments

Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Next Steps

If we decide to issue permits to any of the applicants listed in this notice, we will publish a notice in the **Federal Register**.

Authority

We publish this notice under section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Endangered and Threatened Wildlife and Plants; Initiation of 5-Year Status Reviews for 100 Species in American Sāmoa, California, Hawaii, Idaho, Oregon, and Washington

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of initiation of reviews; request for information.

SUMMARY: We, the U.S. Fish and Wildlife Service, are initiating 5-year status reviews for 100 species in American Sāmoa, California, Hawaii, Idaho, Oregon, and Washington under the Endangered Species Act of 1973. Three of these species also occur outside of United States jurisdiction, in Canada and the South Pacific. A 5-year status review is based on the best scientific and commercial data available at the time of the review; therefore, we are requesting submission of any new information on these species that has become available since the last reviews.

DATES: To ensure consideration in our reviews, we are requesting submission of new information no later than May 20, 2024. However, we will continue to accept new information about any species at any time.

ADDRESSES: *Submitting Information on Species:*

- Any of the 89 species occurring in Hawaii or American Sāmoa:

U.S. mail: Field Supervisor, Attention: 5-Year Review, U.S. Fish and Wildlife Service, Pacific Islands Fish and Wildlife Office, 300 Ala Moana Blvd., Room 3-122, Honolulu, HI 96850; or

Email: pifwo_admin@fws.gov.

- Woodland caribou and Spalding's catchfly:

SUPPLEMENTARY INFORMATION:

Why do we conduct 5-year status reviews?

Under the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531, *et seq.*), we maintain lists of endangered and threatened wildlife and plant species (referred to as the List) in the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for wildlife) and 17.12 (for plants). Section 4(c)(2) of the Act requires us to review each listed species’ status at least once every 5 years. For additional information about 5-year status reviews, refer to our factsheet at <https://www.fws.gov/project/five-year-status-reviews>.

What information do we consider in our review?

A 5-year status review considers all new information available at the time of the review. In conducting these reviews, we consider the best scientific and commercial data that have become available since the listing determination or most recent status reviews, such as:

A. Species biology, including but not limited to population trends, distribution, abundance, demographics, and genetics;

B. Habitat conditions, including but not limited to amount, distribution, and suitability;

C. Conservation measures that have been implemented that benefit the species;

D. Threat status and trends in relation to the five listing factors (as defined in section 4(a)(1) of the Act); and

E. Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Any new information will be considered during the 5-year status review and will also be useful in evaluating the ongoing recovery programs for these species.

Which species are under review?

This notice announces our active review of 100 species, including 6 mammals, 6 birds, 2 snails, 11 insects, and 75 plants, as listed in the table below.

Request for New Information

To ensure that a 5-year status review is complete and based on the best available scientific and commercial information, we request new information from all sources. See What Information Do We Consider in Our Review? for specific criteria. If you submit information, please support it with documentation such as maps, references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

If you wish to provide information for any species listed in the table, please submit your comments and materials to the appropriate contact in ADDRESSES.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Completed and Active Reviews

A table including hyperlinks to the most recently completed 5-year status review for each listed species, as well as notices of 5-year status reviews that are currently in progress, is available at <https://ecos.fws.gov/ecp/report/species-five-year-review>.

Authority

This document is published under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Notice of Intended Repatriation: San Diego State University, San Diego, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), San Diego State University (SDSU) intends to repatriate certain cultural items that meet the definition of unassociated funerary objects and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after April 19, 2024.

ADDRESSES: Jaime Lennox, San Diego State University, 5500 Campanile Drive, San Diego, CA 92182, telephone (619) 594-4575, email jlennox@sdsu.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of SDSU, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of 90 cultural items have been requested for repatriation. The 90 unassociated funerary objects are 66 ground stone objects and 24 pieces of worked shell. Ethnographer and archaeologist J.P. Harrington removed the cultural items from the Burton Mound Site located in Santa Barbara County, CA (CMP-SDSU-0568; CA-SBA-28; Harrington Collection) at an unknown date; Harrington's daughter, Awona Harrington, donated the collection to SDSU in 1961.

A total of 118 cultural items have been requested for repatriation. The 118 unassociated funerary objects are 117 faunal fragments and one shell

fragment. The cultural items were removed from site LAN-466 located in Los Angeles County, CA (CMP-SDSU-1031) at an unknown date by unknown individuals; SDSU received the collection at an unknown date.

Determinations

SDSU has determined that:

- The 208 unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains, and are connected, either at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from a specific burial site of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.

- There is a reasonable connection between the cultural items described in this notice and the Santa Ynez Band of Chumash Indians of the Santa Ynez Reservation, California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under ADDRESSES. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after April 19, 2024. If competing requests for repatriation are received, SDSU must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. SDSU is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25
