

Contracted Services, and its alternate I require a contractor to report annually, in the System for Award Management, on the services performed under the contract or order, during the preceding Government fiscal year. Specifically, the contractor is required to report the following: the total dollar amount invoiced for services performed during the preceding fiscal year; and the number of direct labor hours, including subcontractor hours (when applicable), expended on services performed during the previous Government fiscal year.

This information collection will provide DoD with the ability to identify and report annually to Congress, in accordance with 10 U.S.C. 4505, on the inventory of contractor service contract actions. As an adjunct, the information will support DoD's total force management and in making strategic workforce planning and budget decisions pursuant to 10 U.S.C. 129a.

Draft edits to the current version include clarification on the application of M&V options used in performance-based projects, based on review of the FEMP energy savings performance contract (ESPC) program and feedback from stakeholders; and a reorganization of and additions to the guidance for specific energy conservation measures in Section 6.0. The appendices reflect DOE ESPC indefinite-delivery, indefinite-quantity (IDIQ) program-specific outline updates for the required M&V plan, post-installation report and annual report. Similarly, the Risk Responsibility and Performance Matrix has been updated to reflect the most recent version (2023) of the DOE ESPC IDIQ contract requirements. The draft guidelines would remain applicable to all performance-based contracts.
