ACS/PRCS Contact Strategy for Group Quarters

The Census Bureau collects data for group quarters through personal interview, online, or by paper. The Census Bureau can obtain the facility information by allowing the group quarters contact to upload the roster of residents online or by conducting a personal visit interview with a group quarters contact. Once the interviewer obtains the roster of residents, they can randomly select residents for person-level interviews. During the person-level phase, a computer-assisted personal interviewing instrument is used to collect detailed information for each sampled resident. Interviewers also have the option to distribute a bilingual (English/Spanish) questionnaire to residents for self-response if unable to complete a computer-assisted personal interviewing interview. Residents in some group quarters will have the option to self-respond to the survey online. A small sample of respondents are recontacted for quality assurance purposes.

Statistics produced from the ACS program may include a combination of data collected on the survey from respondents as well as administrative data from other sources.
