Abstract: The Urban Waters Federal Partnership is a voluntary program created in 2011 that seeks to reconnect urban communities, particularly those that are overburdened or economically distressed, with their waterways to become stewards for clean urban waters. Working with a diverse set of partners, the program seeks to help communities restore and protect water quality and revitalize adjacent rural, suburban, and urban neighborhoods throughout the watershed.

As part of its strategic planning efforts, the EPA encourages programs to develop meaningful performance

measures, set ambitious targets, and link budget expenditures to results. Data collected under this ICR will assist the Urban Waters Federal Partnership in demonstrating results and carrying out evaluation efforts to ensure continual program improvement. In addition, the data will help the EPA estimate the environmental and programmatic impact of the program and evaluate the health of the partnership at each location.
